Re: New 24'x 24' Carport

To Whom it may concern,

I am writing this proposal letter for Historical Preservation approval to build a new 24'x24' flat roof carport located at 927 Canyon Road, Santa Fe, NM 87501. We are sending a new design that we would like to build, the last design was considered "too simple", so we have found another builder that can build a more Santa Fe Style Carport for a lower cost. The color we like is called **Mission Brown**. We are also going to use **Pro-Panel Roofing** that matches the pro-panel on our existing house. Thank you for your consideration!
