From: **Amanda Montano, Captain** Amanda Montano Amanda Montano (Nov 13, 2024 08:20 MST)

Subject: **ENDWI Grant BAR/Agreement**

Vendor Name: **New Mexico Department of Transportation**

Vendor Number: **7177**

ITEM AND ISSUE:
Request for approval of a Grant Agreement with the New Mexico Department of Transportation to Fund the End Driving While Impaired (ENDWI) Project, Buckle Up (BKLUP)/Click it or Ticket (CIOT) Project, and Selective Traffic Enforcement Program (STEP)/Summer Enforcement Period Project in the Total Amount of $82,835 through September 30, 2025. (Amanda Montano, Police Captain: admontano@santafenm.gov)

1. Request for Approval of a Budget Adjustment Resolution in the Total Amount of $82,835 from the NM Department of Transportation Fund – State Grants to the Police Overtime Fund.

Action Requested: **Approval of Agreement and BAR**

BACKGROUND AND SUMMARY:
The attached project award to the City of Santa Fe Police Department is from the New Mexico Department of Transportation and does not require matching funds from the City of Santa Fe. The project funds reimburse the City of Santa Fe Police Department for eligible expenses required to conduct projects aimed at reducing traffic-related injuries and deaths. End Driving While Impaired (ENDWI) Project # 05-AL-64-090 for $43,312 will allow officers to conduct sobriety checkpoints and DWI directed enforcement patrols in high crash locations identified in data compiled by local, state, or federal government agencies and included in the City's Operational Plan. Buckle Up (BKLUP)/Click it or Ticket (CIOT) Project # 05-OP-RF-090 for $9,220 is to conduct occupant protection directed enforcement patrols in high crash locations. Selective Traffic Enforcement Program (STEP)/Summer Enforcement Period Project # 05-PT-RF-090 for $30,303 is to conduct directed enforcement patrols in high crash locations identified in data compiled by local, state, or federal government agencies and the City's Operational Plan.

MEMORANDUM

Date: September 6, 2024

To: Ricky Serna, Cabinet Secretary

Through: Denise Peralta, Executive Director, Traffic Safety Division DocuSigned by: 6E06F1781CB749D...

Through: Amber Montoya, Staff Manager DocuSigned by: Amber Montoya 96053378AB0A49E...

From: John Vargas, Program Manager

Subject: Letter of Justification for Grant Agreement between the New Mexico Department of Transportation Traffic Safety Division and City of Santa Fe.

1. TSD Program Manager John Vargas Phone # 505-231-6784 will oversee the project(s).

2. The Consolidated Agreement provides funding to Santa Fe Police Department to conduct the following project(s) and activities as shown below.
   - ENDWI – $43,312.00 (annually) (Fed 164)
     The ENDWI program funds overtime enforcement for DWI checkpoint and DWI directed patrol program. Funds are used to maintain the program, as funding allows, and to expand the program in areas of the State with high rates of DWI.
   - BKLUP -$9,220.00 (annually) (State Road Fund)
     The BKLUP program funds overtime for law enforcement agencies to conduct safety belt and child restraint/ booster seat use activities to increase in occupant protection use in New Mexico.
   - STEP – $30,303.00 (annually) (State Road Fund)
     Provides funding for sustained enforcement program to target specific traffic problems such as speed, DWI, road rage, distracted and reckless driving, fatigue/ drowsy driving, occupant protection, and crashes involving pedestrians, primarily through the use of Safety Corridors. Participating agencies include local law enforcement.

3. The agreement will be effective from date of last signature to 9/30/2025.

4. Scopes of work, including deliverables, are provided in the applicable exhibits attached to the agreement below in Exhibit A-C.

5. The agreement is Exempt from the procurement as it is with another government agency, (per NMSA 1978 Section 13-1-98, et seq.)

RE: Project Agreement

Dear Coordinator:

Enclosed is the project agreement for the federal 2025 fiscal year. This letter contains information required to meet Federal Funding Accountability and Transparency Act (FFATA) and 2 CFR Part 200 requirements. Please provide a copy of this letter to the person responsible for meeting those requirements at your City, County, Town or Tribal agency. The following table contains the information necessary to meet these requirements.

Project Number	Funding Source	CFDA #	FAIN	Award Date	Amount
05-AL-64-090	BIL 164 Transfer Funds	20.608	69A37524300001640NMA	4/30/24	$43,312.00
05-OP-RF-090	State Road Fund				$9,220.00
05-PT-RF-090	State Road Fund				$30,303.00

2 CFR Subpart F 200.500-521
(a) Audit required. A non-Federal entity that expends $1,000,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single or program-specific audit conducted for that year in accordance with the provisions of this part.

(b) Single audit. A non-Federal entity that expends $1,000,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single audit conducted in accordance with §200.514 Scope of audit except when it elects to have a program-specific audit conducted in accordance with paragraph (c) of this section.

(c) *Program-specific audit election.* When an auditee expends Federal awards under only one Federal program (excluding R&D) and the Federal program's statutes, regulations, or the terms and conditions of the Federal award do not require a financial statement audit of the auditee, the auditee may elect to have a program-specific audit conducted in accordance with §200.507 Program-specific audits. A program-specific audit may not be elected for R&D unless all of the Federal awards expended were received from the same Federal agency, or the same Federal agency and the same pass-through entity, and that Federal agency, or pass-through entity in the case of a subrecipient, approves in advance a program-specific audit.

(d) Exemption when Federal awards expended are less than $1,000,000. A non-Federal entity that expends less than $1,000,000 during the non-Federal entity's fiscal year in Federal

MOBILITY FOR EVERYONE

awards is exempt from Federal audit requirements for that year, except as noted in §200.503.

Records must be available for review or audit by appropriate officials of the Federal agency, pass-through entity, and Government Accountability Office (GAO).

If expenditures are less than $1,000,000 during your agency's fiscal year 2024, please submit a statement to the Traffic Safety Division at the address listed on this letterhead. The Statement should read, "We did not meet the $1,000,000 expenditure threshold and therefore we are not required to have a single audit performed for FY {24}."

Your agency must submit copies of audits and review reports associated with this grant agreement to the Department for informational purposes if requested regardless of whether the criteria for audit or review are met.

Operational Plan
Your agency is required to develop an operational plan to include a jurisdiction-specific performance goal, problem statement, problem identification, and basic crash data upon which the project is based. Performance goals should be specific, measurable, action-oriented, realistic, and time-bound.

Performance Indicators
The Department has implemented performance indicators on Department funded law enforcement projects. The performance indicators are as follows:
ENDWI 1 DWI in 28 hours
BKLUP 1 seat belt or child restraint citation for every 2 hours of enforcement worked.
STEP 2 citations or warnings for every hour of enforcement worked.

At no time does the New Mexico Department of Transportation require an individual officer to issue a specific number of citations during an enforcement period.

We look forward to working with you to prevent injuries and fatalities. Thank you for your cooperation.

Sincerely,

GRANT AGREEMENT

This Grant Agreement (**Agreement**) is between the New Mexico Department of Transportation (**Department**) and City of Santa Fe (**Grantee**), collectively referred to as the "parties." This Agreement is effective as of the date of the last party to sign it on the signature page below. The Department and the Grantee agree as follows:

1. **Award.** The Department hereby awards the Grantee funding for the following projects:

   a. End Driving While Impaired (**ENDWI**), Project No. 05-AL-64-090, $43,312.00; 06-AL-64-090, $43,312.00;

   b. Buckle Up (**BKLUP**)/Click It or Ticket (**CIOT**), Project No. 05-OP-RF-090, $9,220.00; 06-OP-RF-090, $9,220.00;

   c. Selective Traffic Enforcement Program (**STEP**), Project No. 05-PT-RF-090, $30,303.00; 06-PT-RF-090, $30,303.00;

   d. Total Funding awarded per this Agreement $165,670.00.

2. **Scope of Work.** The Grantee shall perform the professional services stated in the following exhibit(s): **Exhibit A** - ENDWI; **Exhibit B** - BKLUP/CIOT; **Exhibit C** - STEP.

3. **Payment.** To be reimbursed for eligible expenses, the Grantee must submit timely and properly prepared reimbursement requests as provided in the Department's Electronic Grant Management System or the Traffic Safety Division Financial Management Manual 2019, as directed by the Department. The Grantee acknowledges that the Department will not pay for any expenses incurred prior to both parties signing the Agreement, after termination of the Agreement, or in excess of the amount of the award noted in Section 1. The Grantee must submit its final reimbursement request no later than forty-five (45) calendar days after termination of this Agreement, unless otherwise approved by the Department.

4. **Records and Audit.** The Grantee shall strictly account for all receipts and disbursements related to this Agreement. The Grantee shall record costs incurred, services rendered, and payment received. The Grantee shall maintain these financial records during the term of this Agreement and for three (3) years from the date of submission of the final reimbursement request. On request, the Grantee shall provide the financial records to the Department and the state auditor, and shall allow the Department and the state auditor to inspect or audit these financial records during business hours at the Grantee's principal office during the term of this Agreement and for three (3) years from the date of submission of the final reimbursement request. If the financial records provided by the Grantee are insufficient to support an audit by customary accounting practices, the Grantee shall reimburse the Department for any expense incurred related to the insufficient documentation within thirty (30) calendar days of written notice from the

Docusign Envelope ID: E56EF492-0187-495D-8EBB-78A4C59D2D98

Department. If an audit or inspection reveals that funds were used for expenses not directly related to the project or were used inappropriately, or that payments were excessive or otherwise erroneous, the Grantee shall reimburse the Department for those funds or payments within thirty (30) calendar days of written notice.

5. **Officials Not to Benefit.** The parties intend that no member of the New Mexico legislature or the United States Congress, or any public official, public employee or tribal council member, in that person's individual capacity, will benefit from this Agreement.

6. **Termination.** The Department may terminate this Agreement for any reason, by giving the Grantee thirty (30) calendar days written notice. On receipt of a "Notice of Cancellation," the Grantee shall suspend work unless otherwise directed by the Department in writing. The Grantee may only terminate this Agreement based on the Department's uncured, material breach of the Agreement and by giving the Department thirty (30) calendar days' written notice. The parties acknowledge that termination will not nullify obligations incurred prior to termination and any obligations intended to survive termination of the Agreement, including but not limited to Section 4 and Section 11.

7. **Appropriations.** The Grantee acknowledges that:

   a. this Agreement is contingent upon sufficient appropriations and authorizations being made by the Congress of the United States or the New Mexico state legislature;
   b. if sufficient appropriations and authorizations are not made, this Agreement will terminate upon written notice by the Department to the Grantee; and
   c. the Department will not expend any funds until approved for expenditure, and the Department's determination as to whether approval has been granted will be final.

8. **Compliance with Law.** The Grantee, its employees, agents and contractors, shall comply with the following:

   a. Title VI and Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, the Americans with Disabilities Act of 1990, the ADA Amendments Act of 2008, the Environmental Justice Act of 1994, the Civil Rights Restoration Act of 1987, and 49 C.F.R. Section 21;
   b. all applicable federal and state laws, rules, regulations, and executive orders pertaining to equal employment opportunity, including the Human Rights Act, NMSA 1978, Sections 28-1-1 through 28-1-15, and in accordance with such, the Grantee states that no person, on the grounds of race, religion, national origin, sex, sexual orientation, gender identity, spousal affiliation, serious medical condition, age, disability, or other protected class will be excluded from employment with or participation in, denied the benefits of, or otherwise subjected to, discrimination in any activity performed under this Agreement; if the Grantee is found to be in violation of any of these requirements, the Grantee shall take prompt and appropriate steps to correct such violation, subject to Section 6 above;
   c. state laws applicable to workers compensation benefits for the Grantee's employees, including the Workers' Compensation Act, NMSA 1978, Sections 52-1-1 through 52-1-70, and related rules;
   d. 2 C.F.R. 200, Subpart F - Audit Requirements, Sections 200.500 - 200.521; and
   e. those sections in Appendix A to Part 1300 labeled "applies to subrecipients as well as states."

9. **Notices.** For a notice under this Agreement to be valid, it must be in writing; be delivered by hand, registered or certified mail postage prepaid, fax or email; and be addressed as follows:

to the Department at:	to the Grantee at:
New Mexico Dept. of Transportation	Santa Fe, City of
Attn: Traffic Safety Division	Attn: Sergeant John Garcia
P.O. Box 1149	2515 Camino Entrada
Santa Fe, NM 87504	Santa Fe, NM 87505

10. **Severability**. The terms of this Agreement are lawful; performance of all duties and obligations shall conform with and do not contravene any state, local, or federal statute, regulation, rule, or ordinance. The parties intend that if any provision of this Agreement is held to be unenforceable, the rest of the Agreement will remain in effect as written.

11. **Liability.** Neither party shall be responsible for liability incurred as a result of the other party's acts or omissions in connection with this Agreement. Any liability incurred in connection with the Agreement is subject to the immunities and limitations of the New Mexico Tort Claims Act, NMSA 1978, Sections 41-4-1, *et seq.*, as amended, and any other applicable law. This section is intended only to define the liabilities between the parties and it is not intended to modify in any way, the parties' liabilities as governed by law.

12. **Project Responsibility.** The Grantee acknowledges that it bears sole responsibility for performing the services referred to in Section 2.

13. **Term.** This Agreement takes effect as of the date the last party to sign it on the signature page below. The grantee may not start work until directed to by the Department. The Agreement terminates on September 30, 2025, unless earlier terminated as provided in Section 6 or Section 7.

14. **Applicable Law.** The laws of the state of New Mexico, without giving effect to its choice of law provisions, govern all adversarial proceedings arising out of this Agreement.

15. **Jurisdiction and Venue.** The Grantee acknowledges the jurisdiction of the courts of the state of New Mexico for any adversarial proceeding arising out of this Agreement, and that venue for any such proceeding will be in the First Judicial District Court for the county of Santa Fe, New Mexico.

16. **No Third-party Beneficiary**. This Agreement does not confer any rights or remedies on anyone other than the parties.

17. **Scope of Agreement and Merger.** This Agreement incorporates all the agreements, covenants, and understanding between the parties concerning the subject matter of this Agreement. No prior agreements or understandings, verbal or otherwise, of the parties or their agents will be valid unless included in this Agreement.

18. **Disadvantaged Business Enterprise.** The following provision applies to a USDOT-assisted federally funded agreement only. The recipient shall not discriminate on the basis of race, color, national origin, sex, or other protected class in the award and performance of any USDOT-assisted

contract or in the administration of its DBE program or the requirements of 49 CFR Part 26. The recipient shall take all necessary and reasonable steps under 49 CFR Part 26 to ensure nondiscrimination in the award and administration of USDOT-assisted contracts. The recipient's DBE program, as required by 49 CFR Part 26 and as approved by USDOT, is incorporated by reference in this Agreement. Implementation of this program is a legal obligation and failure to carry out its terms shall be treated as a violation of this Agreement. Upon notification to the recipient of its failure to carry out its approved program, the USDOT may impose sanctions as provided for under Part 26 and may, in appropriate cases, refer the matter for enforcement under 18 U.S.C. 1001 and/or the Program Fraud Civil Remedies Act of 1986 (31 U.S.C. 3801 *et seq.*).

19. **Amendment.** No amendment of this Agreement will be effective unless it is in writing and signed by the parties.

The remainder of this page is intentionally left blank.

Each party is signing this Agreement on the date stated opposite that party's signature. This Agreement is effective as of the date of the last party to sign it on the signature page below.

Exhibit A: Scope of Work, Training, Reimbursement and Reporting

END DRIVING WHILE IMPAIRED (ENDWI) Project Number: 05-AL-64-090; 06-AL-64-090

1. **Scope of Work.** The Grantee shall conduct sobriety checkpoints (SCs) and DWI directed enforcement patrols (DDEPs) in high crash locations, identified in data compiled by local, state, or federal government agencies, included in the Grantee's Operational Plan, and as negotiated between the Department and the Grantee. The Department encourages the Grantee to accompany SCs and DDEPs with public information, media, and educational activities. SCs must be scheduled to be staffed by at least five (5) officers as required by *City of Las Cruces v. Bentancourt, 1987-NMAC-039*, and must last a minimum of four (4) hours. The number of officers staffing an SC must meet the amount required by *Bentancourt* but not exceed the number detailed in the Grantee's Operational Plan. If the SC is not staffed with the minimum number of officers or was not conducted for the minimum number of hours, the Grantee must submit a justification with the invoice for these services. The Department may deny the invoice for SCs based on the justification. DDEPs must deploy officers in high crash locations consistent with the enforcement plan. If the DDEPs were conducted in areas not consistent with the enforcement plan, the Grantee must submit a justification with the invoice for these services. The Department may deny the invoice for DDEPs based on the justification. The Grantee is encouraged to schedule SCs and DDEPs throughout the grant period with a focus on participating during the Superblitz Period, 3 Mini Superblitz Periods, and National DWI Mobilizations as identified below.

2. **Definitions.** For purposes of this exhibit, the following definitions apply:

"Agency Coordinator" means the person assigned by the Grantee to assume direct responsibility for administering all phases of the Agreement.

"Directed Enforcement Patrols" means activities that enforce traffic laws in areas consistent with the agency's operational plan.

"Operational Plan" means a plan based on the most current crash data that identifies the problem to be addressed, goals to be achieved, and the performance measures to be employed. The Grantee may update its operational plan as needed to align with current trends.

"Winter Superblitz Period" means November 16, 2024 to January 1, 2025.

"St. Patrick's Day Mini Superblitz Period" means March 9 to March 17, 2025.

"Cinco de Mayo May Mini Superblitz Period" means May 1 to May 7, 2025.

"National Occupant Protection Mobilization Click It Or Ticket Period" means May 19 to June 1, 2025.

"Fourth of July Mini Superblitz Period" means July 1 to July 8, 2025.

"National DWI Mobilization Period" means August 15 to September 1, 2025.

"Summer enforcement period" means June 18, 2025 to September 20, 2025.

3. **Training and Qualifications.** The Agency Coordinator must attend the Department's Law Enforcement Coordinators symposium and other Department training as required. The Grantee shall notify the Department of any changes to its Agency Coordinator as soon as possible. The Grantee's participating officers must have law enforcement certifications in all areas necessary to conduct the services noted in Section 1 of this exhibit. The Grantee shall keep documentation of training and provide the Department with a list of certified officers on request.

4. **Reimbursement.** The Department will pay the Grantee for the actual cost paid to personnel that worked the SCs and DDEPs. Claims for payment must specify officers' actual hourly rate of overtime pay based on the Grantee's overtime policy; the Department will not pay any amount in excess of that rate or for any amount that is not above and beyond the officers normal duties. At minimum, the Grantee should submit quarterly claims no later than January 30th, April 30th, and July 30th during this Agreement period. The final claim shall be submitted no later than October 31, 2025. If the final claim is submitted after October 31, 2025, the claim must be accompanied by a justification letter. The Department may deny the claim.

   Each claim must be on a form approved by the Department. The Department will pay the Grantee for the following:

   a. The Grantee must submit claims by the 10th of each month unless otherwise directed by the Department.
   b. pay, including overtime, for officers conducting traffic safety DWI enforcement in areas consistent with the enforcement plan;
   c. pay, including overtime, for officers attendance at administrative license revocation hearings and court hearings directly related to DWI arrests made while participating in the ENDWI program;
   d. overtime costs for officers or authorized personnel to support activities directly related to the SCs and/or DDEPs conducted during the claim month. Authorized personnel may include dispatcher(s), transport personnel, and others as authorized by checkpoint supervisor or command staff. The Grantee can only claim up to fifteen percent (15%) of the total monthly claim amount;
   e. in-state travel and related expenses for officers to attend DWI related training approved by the Department in advance to be reimbursed in accordance with 2.42.2 NMAC; and
   f. the employer's portion of related FICA taxes for each reimbursed hour if payment of such is included as a provision in the agency's written policy, personnel rule, municipal or county resolution, union, or association contract, or other document submitted to and accepted by the Department.

5. **Reporting.** *The Grantee must submit activity reports by the 10th of each month using the activity report form provided unless otherwise directed by the Department.* Activity reports must include the type of activity and types of citations issued. The Grantee must report all citations to the Motor Vehicle Division of the New Mexico Taxation and Revenue Department and to the appropriate court in accordance with New Mexico law. The Grantee must submit timely crash reports to the Department in accordance with NMSA 1978, Section 66-7-207. If the Grantee does not submit crash reports in accordance with NMSA 1978, Section 66-7-207, the Department may hold reimbursement claims until this provision is met.

6. **Funding.** The Department expects the funding source to be BIL 164 Transfer Funds and the Catalog of Federal Domestic Assistance (CFDA) number to be 20.608. However, both funding source and CFDA number are subject to change at the Department's discretion. The Grantee may transfer funds between budget categories only with prior written approval from the Department. The project's itemized budget is as follows:

FFY 2025	05-AL-64-090
Personal Services	$43,312.00
Contractual Services	$0.00
Commodities	$0.00
Indirect	$0.00
Other	$0.00
TOTAL	$43,312.00
FFY 2026	06-AL-64-090
Personal Services	$43,312.00
Contractual Services	$0.00
Commodities	$0.00
Indirect	$0.00
Other	$0.00
TOTAL	$43,312.00

7. **Goals.** Projected annual and five-year average alcohol-impaired fatality data indicate increasing numbers and rates of these fatalities from 2021 through 2026. The State's comprehensive set of proven countermeasure strategies and projects including ENDWI enforcement and media, law enforcement and prosecution support, supervised probation, drug courts, and court monitoring will assist the State in achieving reductions in these preventable fatalities. The State has set a 2024 annual target of 150 alcohol-impaired fatalities, with reductions each year through 2026.

8. **Equipment.** The Grantee may only purchase equipment under this Agreement with prior written approval of the Department.

Exhibit B: Scope of Work, Training, Reimbursement and Reporting

BUCKLE UP (BKLUP) and CLICK IT OR TICKET (CIOT) Project Number: 05-OP-RF-090; 06-OP-RF-090

1. **Scope of Work.** The Grantee shall conduct occupant protection directed enforcement patrols (ODEPs) in high crash locations identified in data compiled by local, state or federal government agencies and contained in the Grantee's Operational Plan. The Department encourages the Grantee to accompany the ODEPs with public information, media and educational activities. ODEPs must deploy officers in high crash locations consistent with the enforcement plan for occupant protection issues. If the ODEPs were conducted in areas not consistent with the enforcement plan, the Grantee must submit a justification with the invoice for these services. The Department may deny the invoice for ODEPs based on the justification. The Grantee is encouraged to schedule ODEPs throughout the grant period with a focus on participating during the Superblitz Period, 3 Mini Superblitz Periods, National DWI Mobilizations and the National Click It or Ticket Mobilizations identified below.

2. **Definitions.** For purposes of this exhibit, the following definitions apply:

   "Agency Coordinator" means the person assigned by the Grantee to assume direct responsibility for administering all phases of the Agreement.

   "Directed Enforcement Patrols" means activities that enforce traffic laws in areas consistent with the agency's operational plan.

   "Operational Plan" means a plan based on the most current crash data that identifies the problem to be addressed, goals to be achieved, and the performance measures to be employed. The Grantee may update its operational plan as needed to align with current trends.

   "Winter Superblitz Period" means November 16, 2024 to January 1, 2025.

   "St. Patrick's Day Mini Superblitz Period" means March 9 to March 17, 2025.

   "Cinco de Mayo May Mini Superblitz Period" means May 1 to May 7, 2025.

   "National Occupant Protection Mobilization Click It Or Ticket Period" means May 19 to June 1, 2025.

   "Fourth of July Mini Superblitz Period" means July 1 to July 8, 2025.

   "National DWI Mobilization Period" means August 15 to September 1, 2025.

   "Summer enforcement period" means June 18, 2025 to September 20, 2025.

3. **Training and Qualifications.** The Agency Coordinator must attend the Department's Law Enforcement Coordinators symposium and other Department training as required. The Grantee shall notify the Department of any changes to its Agency Coordinator as soon as possible. The Grantee's participating officers must have law enforcement certifications in all areas necessary to

conduct the services noted in Section 1 of this exhibit. The Grantee shall keep documentation of training and provide the Department with a list of certified officers on request.

4. **Reimbursement.** The Department will pay the Grantee for the actual cost paid to personnel that worked ODEPs. Claims for payment must specify officers' actual hourly rate of overtime pay based on the Grantee's overtime policy; the Department will not pay any amount in excess of that rate or for any amount that is not above and beyond the officers normal duties. At minimum, the Grantee should submit quarterly claims no later than January 30th, April 30th, and July 30th during this Agreement period. The final claim shall be submitted no later than October 31, 2025 on a form approved by the Department. If the final claim is submitted after October 31, 2025, the claim must be accompanied by a justification letter. The Department may deny the claim.

   The Department will pay the Grantee for the following:

   a. The Grantee must submit claims by the 10th of each month unless otherwise directed by the Department.
   b. pay, including overtime, for officers conducting traffic safety occupant protection focused enforcement in areas consistent with the enforcement plan;
   c. attendance at, and excess per diem for, operation safe kids training and the four-day NHTSA standardized child passenger safety training; and
   d. assistance at child safety seat clinics or car seat fitting stations.
   e. the employer's portion of related FICA taxes for each reimbursed hour if payment of such is included as a provision in the agency's written policy, personnel rule, municipal or county resolution, union, or association contract, or other document submitted to and accepted by the Department.

5. **Reporting.** *The Grantee must submit activity reports by the 10th of each month using the activity report form provided unless otherwise directed by the Department.* Activity reports must include the type of activity and types of citations issued. The Grantee must report all citations to the Motor Vehicle Division of the New Mexico Taxation and Revenue Department and to the appropriate court in accordance with New Mexico law. The Grantee must submit timely crash reports to the Department in accordance with NMSA 1978, Section 66-7-207. If the Grantee does not submit crash reports in accordance with NMSA 1978, Section 66-7-207, the Department may hold reimbursement claims until this provision is met.

6. **Funding.** The Department expects the funding source to be state road fund. However, the funding source is subject to change at the Department's discretion. The Grantee may transfer funds between budget categories only with prior written approval from the Department. The project's itemized budget is as follows:

FFY 2025	05-OP-RF-090
Personal Services	$9,2200.00
Contractual Services	$0.00
Commodities	$0.00
Indirect	$0.00
Other	$0.00
TOTAL	$9,220.00

FFY 2026	06-OP-RF-090
Personal Services	$9,220.00
Contractual Services	$0.00
Commodities	$0.00
Indirect	$0.00
Other	$0.00
TOTAL	$9,220.00

7. **Goals.**

a. Projected annual and five-year average occupant fatality data indicate increasing numbers and rates of these fatalities from 2021 through 2026. Given the State's comprehensive set of proven countermeasure strategies and associated projects, including enforcement of primary seat belt and child restraint use laws, high-visibility media, and child safety seat distribution system, the State has set a 2024 five-year average target of 122.7 occupant fatalities, with reductions each year through 2026.

b. The State anticipates being able to increase its seat belt use to at least 90 percent over the next three years, and although projections indicate a decline in these numbers through 2026, the State has determined to set targets of 90 percent in 2024, 2025 and 2026.

8. **Equipment.** The Grantee may only purchase equipment under this Agreement with prior written approval of the Department.

Exhibit C: Scope of Work, Training, Reimbursement and Reporting

SELECTIVE TRAFFIC ENFORCEMENT PROGRAM (STEP) and
SUMMER ENFORCEMENT PERIOD Project Number: 05-PT-RF-090; 06-PT-RF-090

1. **Scope of Work.** The Grantee shall conduct directed enforcement patrols (DEPs) in high crash locations identified in data compiled by local, state or federal government agencies and contained in the Grantee's Operational Plan. The Department encourages the Grantee to accompany the DEPs with public information, media and educational activities. DEPs must deploy officers in high crash locations consistent with the Operational Plan. If the DEPs were conducted in areas not consistent with the Operational Plan, the Grantee must submit a justification with the invoice for these services. The Department may deny the invoice for DEPs based on the justification. *The Grantee is encouraged to schedule DEPS through the grant period with a focus on participating during the Summer enforcement period which runs June 19, 2025 through September 21, 2025.*

2. **Definitions.** For purposes of this exhibit, the following definitions apply:

   "Agency Coordinator" means the person assigned by the Grantee to assume direct responsibility for administering all phases of the Agreement.

   "Directed Enforcement Patrols" means activities that enforce traffic laws in areas consistent with the agency's operational plan.

   "Operational Plan" means a plan based on the most current crash data that identifies the problem to be addressed, goals to be achieved, and the performance measures to be employed. The Grantee may update its operational plan as needed to align with current trends.

3. **Training and Qualifications.** The Agency Coordinator must attend the Department's Law Enforcement Coordinators symposium and other Department training as required. The Grantee shall notify the Department of any changes to its Agency Coordinator as soon as possible. The Grantee's participating officers must have law enforcement certifications in all areas necessary to conduct the services noted in Section 1 of this exhibit. The Grantee shall keep documentation of training and provide the Department with a list of certified officers on request.

4. **Reimbursement.**
   The Department will pay the Grantee for the actual cost paid to personnel that worked DEPs. Claims for payment must specify officers' actual hourly rate of overtime pay based on the Grantee's overtime policy; the Department will not pay any amount in excess of that rate or for any amount that is not above and beyond the officers normal duties. At minimum, the Grantee should submit quarterly claims no later than January 30th, April 30th, and July 30th during this Agreement period. The final claim shall be submitted no later than October 31, 2025 on a form approved by the Department. If the final claim is submitted after October 31, 2025, the claim must be accompanied by a justification letter. The Department may deny the claim.

   The Department will pay the Grantee for the following:

a. The Grantee must submit claims by the 10th of each month unless otherwise directed by the Department.
b. Pay, including overtime pay, for officers conducting the traffic safety enforcement described in paragraph 1 of this **Exhibit C**; and
c. training for officers as approved by the Department. Pay for travel and traffic safety related training
d. the employer's portion of related FICA taxes for each reimbursed hour if payment of such is included as a provision in the agency's written policy, personnel rule, municipal or county resolution, union, or association contract, or other document submitted to and accepted by the Department.

5. **Reporting.** *The Grantee must submit activity reports by the 10th of each month using the activity report form provided unless otherwise directed by the Department*. Activity reports must include the type of activity and types of citations issued. The Grantee must report all citations to the Motor Vehicle Division of the New Mexico Taxation and Revenue Department and to the appropriate court in accordance with New Mexico law. The Grantee must submit timely crash reports to the Department in accordance with NMSA 1978, Section 66-7-207. If the Grantee does not submit crash reports in accordance with NMSA 1978, Section 66-7-207, the Department may hold reimbursement claims until this provision is met.

6. **Funding – STEP.** The Department expects the funding source to be State Road Fund. However, the funding source is subject to change at the Department's discretion. The Grantee may transfer funds between budget categories only with prior written approval from the Department. The project's itemized budget is as follows:

FFY 2025	05-PT-RF-090
Personal Services	$30,.00
Contractual Services	$0.00
Commodities	$0.00
Indirect	$0.00
Other	$0.00
TOTAL	$30,303.00

FFY 2026	06-PT-RF-090
Personal Services	$30,303.00
Contractual Services	$0.00
Commodities	$0.00
Indirect	$0.00
Other	$0.00
TOTAL	$30,303.00

7. **Goals.**

a. Annual and five-year average speeding-related fatality data indicate increasing numbers and rates of such fatalities from 2021 through 2026. The State's Police Traffic Services program is focused on all dangerous driving behaviors, including speeding. The proven countermeasures focused on high-visibility enforcement will support the State's efforts to reduce these fatalities by prioritizing identified high-risk community streets and roadways, and by providing support and training to law enforcement officers. The State has set a 2024 annual target of 170 speeding-related fatalities, with reductions each year through 2026.

b. Annual and five-year average alcohol-impaired fatality data indicate increasing numbers and rates of these fatalities from 2021 through 2026. The State's comprehensive set of proven countermeasure strategies and projects including ENDWI enforcement and media, law enforcement and prosecution support, supervised probation, drug courts and court monitoring will assist the State in achieving reductions in these preventable fatalities. The State has set a 2024 annual target of 150 alcohol impaired fatalities, with reductions each year through 2026.

c. Annual and five-year average occupant fatality data indicate increasing numbers and rates of these fatalities from 2021 through 2026. Given the State's comprehensive set of proven countermeasure strategies and associated projects, including enforcement of primary seat belt and child restraint use laws, high-visibility media, and child safety seat distribution system, the State has set a 2024 five-year average target of 122.7 occupant fatalities, with reductions each year through 2026.

d. The State anticipates being able to increase its seat belt use to at least 90 percent over the next three years, and although projections indicate a decline in these numbers through 2026, the State has set targets of 90 percent seat belt use in 2024, 2025 and 2026.

e. Five-year average fatalities indicate increasing fatalities from 415.6 in 2021 to 470.4 in 2024; however the State has set a 2024 five-year target of 450.0 fatalities, with reductions in 2025 and 2026.

f. The methodology used to project five-year average suspected serious injuries indicate decreasing levels between 2021 to 2024, with levels more in the 2021 range in 2025 and 2026; however the State has set a 2024 five-year target of 1,018.6 serious injuries, with reductions through 2026.

g. Five-year average motorcyclist data indicate between 50 and 52 motorcyclist fatalities between 2021 and 2024, with slightly higher projections for 2025 and 2026. The State's Motorcycle Safety Program projects focused on Motorcyclist Rider Training, includes highlighting dangerous driving behaviors, such as impaired driving and non-helmet driving or riding. NMDOT also supports motorcycle safety awareness, communications and outreach to both motorcyclists and other vehicle drivers. The State has set a 2024 five-year average target of 49.8 motorcyclist fatalities, with reductions each year through 2026.

h. Projected annual data for under-21 drivers in fatal crashes indicate a reduction in these crashes from a high of 66 in 2021 to 50 (per 2022 preliminary data); however projected data indicate higher numbers of these crashes from 2023 through 2026. The State-funded Driver Education and Driver Safety Program aims to provide quality and comprehensive driver safety education throughout the State to novice drivers with the goal of reducing preventable fatalities. The State has set a 2024 annual target of 60 under -21 fatal crashes, with reductions each year through 2026.

i. 2021 pedestrian fatalities were at their highest level in over a decade at 102 in 2021, rising from 79 in 2020. 2022 preliminary data indicate a slight decrease to 94, but projections for 2024-2026 are indicating higher numbers of these fatalities. To assist the State with responding to these projected rises in fatalities, the NMDOT plans to work with NHTSA to facilitate a pedestrian program assessment in 2024. The State has set a 2024 annual target of 95 pedestrian fatalities, with reductions each year through 2026.

j. 2021 five-year bicyclist fatalities were at their highest level in the last five years. Although the five-year average is expected to go up slightly in 2022, projections indicate a downward trend and given this, the State has set a 2024 five-year average target of 6.0 bicyclist fatalities, with reductions each year through 2026.

8. **Equipment.** The Grantee may only purchase equipment under this Agreement with prior written approval of the Department.

Docusign Envelope ID: E56EF492-0187-495D-8EBB-78A4C59D2D98

Appendix A to Part 1300-Certifications and Assurances for Highway Safety Grants

[Each fiscal year, the Governor's Representative for Highway Safety must sign these Certifications and Assurances affirming that the State complies with all requirements, including applicable Federal statutes and regulations, that are in effect during the grant period. Requirements that also apply to subrecipients are noted under the applicable caption.]

State: New Mexico Fiscal Year: 2025

By submitting an application for Federal grant funds under 23 U.S.C. Chapter 4 or Section 1906, Public Law 109-59, as amended by Section 25024, Public Law 117-58, the State Highway Safety Office acknowledges and agrees to the following conditions and requirements. In my capacity as the Governor's Representative for Highway Safety, I hereby provide the following Certifications and Assurances:

GENERAL REQUIREMENTS

The State will comply with applicable statutes and regulations, including but not limited to:

- 23 U.S.C. Chapter 4-Highway Safety Act of 1966, as amended;
- Sec. 1906, Public Law 109-59, as amended by Sec. 25024, Public Law 117-58;
- 23 CFR part 1300-Uniform Procedures for State Highway Safety Grant Programs;
- 2 CFR part 200-Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards;
- 2 CFR part 1201-Department of Transportation, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

INTERGOVERNMENTAL REVIEW OF FEDERAL PROGRAMS

The State has submitted appropriate documentation for review to the single point of contact designated by the Governor to review Federal programs, as required by Executive Order 12372 (Intergovernmental Review of Federal Programs).

FEDERAL FUNDING ACCOUNTABILITY AND TRANSPARENCY ACT (FFATA)

The State will comply with FFATA guidance, *OMB Guidance on FFATA Subaward and Executive Compensation Reporting,* August 27, 2010, (https://www.fsrs.gov/documents/OMB Guidance on FFATA Subaward and Executive Compensation Reporting 082720 I 0.pdf) by reporting to FSRS.gov for each sub-grant awarded:

- Name of the entity receiving the award;
- Amount of the award;

- Information on the award including transaction type, funding agency, the North American Industry Classification System code or Catalog of Federal Domestic Assistance number (where applicable), program source;
- Location of the entity receiving the award and the primary location of performance under the award, including the city, State, congressional district, and country; and an award title descriptive of the purpose of each funding action;

o Unique entity identifier (generated by **SAM.gov);**

- The names and total compensation of the five most highly compensated officers of the entity if:

(i) the entity in the preceding fiscal year received-

(!) 80 percent or more of its annual gross revenues in Federal awards;

(II) $25,000,000 or more in annual gross revenues from Federal awards; and

(ii) the public does not have access to information about the compensation of the senior executives of the entity through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986;

- Other relevant information specified by 0MB guidance.

NONDISCRIMINATION

(applies to subrecipients as well as States)

The State highway safety agency [and its subrecipients] will comply with all Federal statutes and implementing regulations relating to nondiscrimination ("Federal Nondiscrimination Authoritics"). These include but are not limited to:

- *Title VI of the Civil Rights Act of 1964* (42 U.S.C. 2000d *et seq.*, 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin);
- *49 CFR part 21* (entitled *Non-discrimination in Federally-Assisted Programs of the Department of Transportation-Effectuation of Title VI of the Civil Rights Act of 1964);*
- *28 CFR 50.3* (U.S. Department of Justice Guidelines for Enforcement of Title VI of the Civil Rights Act of 1964);
- *The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970,* (42 U.S.C. 4601), (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- *Federal-Aid Highway Act of 1973, (23 USC. 324 et seq.), and Title IX of the Education Amendments of 1972,* as amended (20 U.S.C. 1681-1683 and 1685-1686) (prohibit discrimination on the basis of sex);
- *Section 504 of the Rehabilitation Act of 1973,* (29 U.S.C. 794 *et seq.),* as amended, (prohibits discrimination on the basis of disability) and 49 CPR part 27;
- *The Age Discrimination Act of 1975,* as amended, (42 U.S.C. 6101 *et seq.),* (prohibits discrimination on the basis of age);
- *The Civil Rights Restoration Act of 1987,* (Pub. L. 100-209), (broadens scope, coverage, and applicability of Title VI of the Civil Rights Act of 1964, The Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the

Federal aid recipients, subrecipients and contractors, whether such programs or activities are Federally-funded or not);

- *Titles II and III of the Americans with Disabilities Act* (42 U.S.C. 12131-12189) (prohibits discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing) and 49 CFR parts 37 and 38;
- *Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (preventing discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations);
- *Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency* (requiring that recipients of Federal financial assistance provide meaningful access for applicants and beneficiaries who have limited English proficiency (LEP));
- *Executive Order 13985, Advancing Racial Equity and Support for Underserved Communities through the Federal Government* (advancing equity across the Federal Government); and
- *Executive Order 13988, Preventing and Combating Discrimination on the Basis of Gender Identity or Sexual Orientation* (clarifying that sex discrimination includes discrimination on the grounds of gender identity or sexual orientation).

The preceding statutory and regulatory cites hereinafter are referred to as the "Acts" and "Regulations," respectively.

GENERAL ASSURANCES

In accordance with the Acts, the Regulations, and other pertinent directives, circulars, policy, memoranda, and/or guidance, the Recipient hereby gives assurance that it will promptly take any measures necessary to ensure that:

"No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity, for which the Recipient receives Federal financial assistance from DOT, including NHTSA."

The Civil Rights Restoration Act of 1987 clarified the original intent of Congress, with respect to Title VI of the Civil Rights Act of 1964 and other non-discrimination requirements (the Age Discrimination Act of 1975, and Section 504 of the Rehabilitation Act of 1973), by restoring the broad, institutional-wide scope and coverage of these nondiscrimination statutes and requirements to include all programs and activities of the Recipient, so long as any portion of the program is Federally assisted.

SPECIFIC ASSURANCES

More specifically, and without limiting the above general Assurance, the Recipient agrees with and gives the following Assurances with respect to its Federally assisted Highway Safety Grant Program:

Docusign Envelope ID: E56EF492-0187-495D-8EBB-78A4C59D2D98

1. The Recipient agrees that each "activity," "facility," or "program," as defined in § 21.23(b) and (e) of 49 CFR part 21 will be (with regard to an "activity") facilitated, or will be (with regard to a "facility") operated, or will be (with regard to a "program") conducted in compliance with all requirements imposed by, or pursuant to the Acts and the Regulations.
2. The Recipient will insert the following notification in all solicitations for bids, Requests For Proposals for work, or material subject to the Acts and the Regulations made in connection with all Highway Safety Grant Programs and, in adapted form, in all proposals for negotiated agreements regardless of funding source:

"The [name of Recipient], in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 USC 2000d to 2000d-4) and the Regulations, hereby notifies all bidders that it will affirmatively ensure that in any contract entered into pursuant to this advertisement, disadvantaged business enterprises will be afforded full and fair opportunity to submit bids in res7Jonse to this invitation and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award. "

3. The Recipient will inse1t the clauses of appendix A and E of this Assurance (also referred to as DOT Order 1050.2A) Ul in every contract or agreement subject to the Acts and the Regulations.
4. The Recipient will insert the clauses of appendix B of DOT Order 1050.2A, as a covenant running with the land, in any deed from the United States effecting or recording a transfer of real property, structures, use, or improvements thereon or interest therein to a Recipient.
5. That where the Recipient receives Federal financial assistance to construct a facility, or part of a facility, the Assurance will extend to the entire facility and facilities operated in connection therewith.
6. That where the Recipient receives Federal financial assistance in the form of, or for the acquisition of, real property or an interest in real property, the Assurance will extend to rights to space on, over, or under such property.
7. That the Recipient will include the clauses set forth in appendix C and appendix D of this DOT Order 1050.2A, as a covenant running with the land, in any future deeds, leases, licenses, permits, or similar instruments entered into by the Recipient with other parties:
    a. for the subsequent transfer of real property acquired or improved under the applicable activity, project, or program; and
    b. for the construction or use of, or access to, space on, over, or under real property acquired or improved under the applicable activity, project, or program.
8. That this Assurance obligates the Recipient for the period during which Federal financial assistance is extended to the program, except where the Federal financial assistance is to provide, or is in the form of, personal property, or real prope1ty, or interest therein, or structures or improvements thereon, in which case the Assurance obligates the Recipient, or any transferee for the longer of the following periods:
    a. the period during which the property is used for a purpose for which the Federal financial assistance is extended, or for another purpose involving the provision of similar services or benefits; or
    b. the period during which the Recipient retains ownership or possession of the property.
9. The Recipient will provide for such methods of administration for the program as are found by the Secretary of Transportation or the official to whom he/she delegates specific authority to give reasonable guarantee that it, other recipients, sub-recipients, sub- grantees,

contractors, subcontractors, consultants, transferees, successors in interest, and other participants of Federal financial assistance under such program will comply with all requirements imposed or pursuant to the Acts, the Regulations, and this Assurance.

10. The Recipient agrees that the United States has a right to seek judicial enforcement with regard to any matter arising under the Acts, the Regulations, and this Assurance.

By signing this ASSURANCE, the State highway safety agency also agrees to comply (and require any sub-recipients, sub-grantees, contractors, successors, transferees, and/or assignees to comply) with all applicable provisions governing NHTSA's access to records, accounts, documents, information, facilities, and staff. You also recognize that you must comply with any program or compliance reviews, and/or complaint investigations conducted by NHTSA. You must keep records, reports, and submit the material for review upon request to NHTSA, or its designee in a timely, complete, and accurate way. Additionally, you must comply with all other reporting, data collection, and evaluation requirements, as prescribed by law or detailed in program guidance.

The State highway safety agency gives this ASSURANCE in consideration of and for obtaining any Federal grants, loans, contracts, agreements, property, and/or discounts, or other Federal-aid and Federal financial assistance extended after the date hereof to the recipients by the U.S. Department of Transp01 lation under the Highway Safety Grant Program. This ASSURANCE is binding on the State highway safety agency, other recipients, sub-recipients, sub-grantees, contractors, subcontractors and their subcontractors', transferees, successors in interest, and any other pa1 licipants in the Highway Safety Grant Program. The person(s) signing below is/are authorized to sign this ASSURANCE on behalf of the Recipient.

THE DRUG-FREE WORKPLACE ACT OF 1988 (41 U.S.C. 8103)

The State will provide a drug-free workplace by:

a. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace, and specifying the actions that will be taken against employees for violation of such prohibition;
b. Establishing a drug-free awareness program to inform employees about:
    1. The dangers of drug abuse in the workplace;
    2. The grantee's policy of maintaining a drug-free workplace;
    3. Any available drug counseling, rehabilitation, and employee assistance programs;
    4. The penalties that may be imposed upon employees for drug violations occurring in the workplace;
    5. Making it a requirement that each employee engaged in the performance of the grant be given a copy of the statement required by paragraph (a);
c. Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will-
    1. Abide by the terms of the statement;
    2. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction;
d. Notifying the agency within ten days after receiving notice under subparagraph (c)(2) from an employee or otherwise receiving actual notice of such conviction;
e. Taking one of the following actions, within 30 days of receiving notice under

subparagraph (c)(2), with respect to any employee who is so convicted-

!. Taking appropriate personnel action against such an employee, up to and including termination;

2. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

f. Making a good faith effort to continue to maintain a drug-free workplace through implementation of all of the paragraphs above.

POLITICAL ACTIVITY *(HATCH* ACT)

(applies to subrecipients as well as States)

The State will comply with provisions of the Hatch Act (5 U.S.C. 1501-1508), which limits the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

CERTIFICATION REGARDING FEDERAL LOBBYING

(applies to subrecipients as well as States)

CERTIFICATION FOR CONTRACTS, GRANTS, LOANS, AND COOPERATIVE AGREEMENTS

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;
3. The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, subgrants, and contracts under grant, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this ce1tification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31,
U.S. Code. Any person who fails to file the required ce1tification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

RESTRICTION ON STATE LOBBYING
(applies to subrecipients as well as States)

None of the funds under this program will be used for any activity specifically designed to urge or influence a State or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any State or local legislative body. Such activities include both direct and indirect *(e.g.*, "grassroots") lobbying activities, with one exception. This does not preclude a State official whose salary is supported with NHTSA funds from engaging in direct communications with State or local legislative officials, in accordance with customary State practice, even if such communications urge legislative officials to favor or oppose the adoption of a specific pending legislative proposal.

CERTIFICATION REGARDING DEBARMENT AND SUSPENSION
(applies to subrecipients as well as States)

INSTRUCTIONS FOR PRIMARY TIER PARTICIPANT CERTIFICATION (STATES)

1. By signing and submitting this proposal, the prospective primary tier participant is providing the certification set out below and agrees to comply with the requirements of 2_ CFR parts 180 and 1200.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective primary tier participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary tier participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default or may pursue suspension or debarment.
4. The prospective primary tier participant shall provide immediate written notice to the department or agency to which this proposal is submitted if at any time the prospective primary tier participant learns its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms **covered transaction, civil judgment, debarment, suspension, ineligible, participant, person, principal, and voluntarily excluded,** as used in this clause, are defined in 2 CPR palts 180 and 1200. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.
6. The prospective primary tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation

in this covered transaction, unless authorized by the department or agency entering into this transaction.

7. The prospective primary tier pa1ticipant further agrees by submitting this proposal that it will include the clause titled "Instructions for Lower Tier Participant Certification" including the "Ce1tification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (*https://www.sam.gov/*).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency may terminate the transaction for cause or default.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS-PRIMARY TIER COVERED TRANSACTIONS

1. The prospective primary tier participant certifies to the best of its knowledge and belief, that it and its principals:
    a. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency;
    b. Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
    c. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses

enumerated in paragraph (1)(b) of this certification; and

d. Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

2. Where the prospective primary tier participant is unable to certify to any of the Statements in this certification, such prospective participant shall attach an explanation to this proposal.

INSTRUCTIONS FOR LOWER TIER PARTICIPANT CERTIFICATION

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below and agrees to comply with the requirements of J CFR parts 180 and 1200.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. The terms **covered transaction, civil judgment, debarment, suspension, ineligible, participant, person, principal, and voluntarily excluded,** as used in this clause, are defined in 2 CFR parts 180 and 1200. You may contact the person to whom this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Instructions for Lower Tier Participant Certification" including the "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.
7. A participant in a covered transaction may rely upon a certification of a prospective pa l ticipant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (*https://www.sam.gov/).*
8. Nothing contained in the foregoing shall be construed to require establishment of a system

of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION-LOWER TIER COVERED TRANSACTIONS

1. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency.
2. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

BUY AMERICA

(applies to subrecipients as well as States)

The State and each subrecipient will comply with the Buy America requirement (23 U.S.C. 313) when purchasing items using Federal funds. Buy America requires a State, or subrecipient, to purchase with Federal funds only steel, iron and manufactured products produced in the United States, unless the Secretary of Transportation determines that such domestically produced items would be inconsistent with the public interest, that such materials are not reasonably available and of a satisfactory quality, or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. In order to use Federal funds to purchase foreign produced items, the State must submit a waiver request that provides an adequate basis and justification for approval by the Secretary of Transportation.

CERTIFICATION ON CONFLICT OF INTEREST

(applies to subrecipients as well as States)

GENERAL REQUIREMENTS

No employee, officer, or agent of a State or its subrecipient who is authorized in an official capacity to negotiate, make, accept, or approve, or to take part in negotiating, making, accepting, or approving any subaward, including contracts or subcontracts, in connection with this grant shall have, directly or indirectly, any financial or personal interest in any such subaward. Such a financial or personal interest would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or personal interest in or a tangible personal benefit from an entity considered for a subaward. Based on this policy:

1. The recipient shall maintain a written code or standards of conduct that provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents.
    a. The code or standards shall provide that the recipient's officers, employees, or agents may neither solicit nor accept gratuities, favors, or anything of monetary value from present or potential sub awardees, including contractors or parties to subcontracts.
    b. The code or standards shall establish penalties, sanctions, or other disciplinary actions for violations, as permitted by State or local law or regulations.
2. The recipient shall maintain responsibility to enforce the requirements of the written code or standards of conduct.

DISCLOSURE REQUIREMENTS

No State or its subrecipient, including its officers, employees, or agents, shall perform or continue to perform under a grant or cooperative agreement, whose objectivity may be impaired because of any related past, present, or currently planned interest, financial or otherwise, in organizations regulated by NHTSA or in organizations whose interests may be substantially affected by NHTSA activities. Based on this policy:

1. The recipient shall disclose any conflict of interest identified as soon as reasonably possible, making an immediate and full disclosure in writing to NHTSA. The disclosure shall include a description of the action which the recipient has taken or proposes to take to avoid or mitigate such conflict.
2. NHTSA will review the disclosure and may require additional relevant information from the recipient. If a conflict of interest is found to exist, NHTSA may (a) terminate the award, or (b) determine that it is otherwise in the best interest of NHTSA to continue the award and include appropriate provisions to mitigate or avoid such conflict.
3. Conflicts of interest that require disclosure include all past, present, or currently planned organizational, financial, contractual, or other interest(s) with an organization regulated by NHTSA or with an organization whose interests may be substantially affected by NHTSA activities, and which are related to this award. The interest(s) that require disclosure include those of any recipient, affiliate, proposed consultant, proposed subcontractor, and key personnel of any of the above. Past interest shall be limited to within one year of the date of award. Key personnel shall include any person owning more than a 20 percent interest in a recipient, and the officers, employees or agents of a recipient who are responsible for making a decision or taking an action under an award where the decision or action can have an economic or other impact on the interests of a regulated or affected organization.

PROHIBITION ON USING GRANT FUNDS TO CHECK FOR HELMET USAGE
(applies to subrecipients as well as States)

The State and each subrecipient will not use 23 U.S.C. Chapter 4 grant funds for programs to check helmet usage or to create checkpoints that specifically target motorcyclists.

POLICY ON SEAT BELT USE

Docusign Envelope ID: E56EF492-0187-495D-8EBB-78A4C59D2D98

In accordance with Executive Order 13043, Increasing Seat Belt Use in the United States, dated April 16, 1997, the Grantee is encouraged to adopt and enforce on-the-job seat belt use policies and programs for its employees when operating company-owned, rented, or personally-owned vehicles. The National Highway Traffic Safety Administration (NHTSA) is responsible for providing leadership and guidance in support of this Presidential initiative. For information and resources on traffic safety programs and policies for employers, please contact the Network of Employers for Traffic Safety (NETS), a public-private partnership dedicated to improving the traffic safety practices of employers and employees. You can download information on seat belt programs, costs of motor vehicle crashes to employers, and other traffic safety initiatives at *www.trafficsafety.org*. The NHTSA website (*www.nhtsa.gov*) also provides information on statistics, campaigns, and program evaluations and references.

POLICY ON BANNING TEXT MESSAGING WHILE DRIVING

In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, States are encouraged to adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or rented vehicles, Government-owned, leased or rented vehicles, or privately-owned vehicles when on official Government business or when performing any work on or behalf of the Government. States are also encouraged to conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting while driving.

SECTION 402 REQUIREMENTS

I. To the best of my personal knowledge, the information submitted in the annual grant application in support of the State's application for a grant under 23 U.S.C. 402 is accurate and complete.

2. The Governor is the responsible official for the administration of the State highway safety program, by appointing a Governor's Representative for Highway Safety who shall be responsible for a State highway safety agency that has adequate powers and is suitably equipped and organized (as evidenced by appropriate oversight procedures governing such areas as procurement, financial administration, and the use, management, and disposition of equipment) to carry out the program. (23 U.S.C. 402(b)(1)(A))
3. At least 40 percent of all Federal funds apportioned to this State under 23 U.S.C. 402 for this fiscal year will be expended by or on behalf of political subdivisions of the State in carrying out local highway safety programs (23 U.S.C. 402(b)(1)(C)) or 95 percent by and on behalf of Indian tribes (23 U.S.C. 402(h)(2)), unless this requirement is waived in writing. (This provision is not applicable to the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.)
4. The State's highway safety program provides adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks. (23 U.S.C. 402(b)(1)(D))

5. As part of a comprehensive program, the State will support a data-based traffic safety enforcement program that fosters effective community collaboration to increase public safety, and data collection and analysis to ensure transparency, identify disparities in traffic enforcement, and inform traffic enforcement policies, procedures, and activities. (23 U.S.C. 402(b)(1)(E))
6. The State will implement activities in support of national highway safety goals to reduce motor vehicle related fatalities that also reflect the primary data-related crash factors within the State, as identified by the State highway safety planning process, including:
    - Participation in the National high-visibility law enforcement mobilizations as identified annually in the NHTSA Communications Calendar, including not less than 3 mobilization campaigns in each fiscal year to-
        - o Reduce alcohol-impaired or drug-impaired operation of motor vehicles; and
        - o Increase use of seat belts by occupants of motor vehicles;
    - Sustained enforcement of statutes addressing impaired driving, occupant protection, and driving in excess of posted speed limits;
    - An annual statewide seat belt use survey in accordance with 23 CFR part 1340 for the measurement of State seat belt use rates, except for the Secretary of Interior on behalf of Indian tribes;
    - Development of statewide data systems to provide timely and effective data analysis to support allocation of highway safety resources;
    - Coordination of triennial Highway Safety Plan, data collection, and information systems with the State strategic highway safety plan, as defined in 23 U.S.C. 148(a); and
    - Participation in the Fatality Analysis Reporting System (FARS), except for American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, or the United States Virgin Islands
7. The State will actively encourage all relevant law enforcement agencies in the State to follow the guidelines established for vehicular pursuits issued by the International Association of Chiefs of Police that are currently in effect. (23 U.S.C. 402U))
8. The State will not expend Section 402 funds to carry out a program to purchase, operate, or maintain an automated traffic enforcement system, except in a work zone or school zone. (23 U.S.C. 402(c)(4))

I understand that my statements in support of the State's application for Federal grant funds are statements upon which the Federal Government will rely in determining qualification for grant funds, and that knowing misstatements may be subject to civil or criminal penalties under 18 U.S.C. 1001. I sign these Certifications and Assurances based on personal knowledge, and after appropriate inquiry.

Subject: **Allocation 23-ZH5048-81-2**

Vendor Name: **Department of Finance Authority**

Vendor Number: **3125**

ITEM AND ISSUE:
Request for Approval of the Department of Finance & Administration Certification for Allocation 23-ZH5048-81 in the amount of $187,500 for the Hiring of Law Enforcement/Support Positions at the Santa Fe Police Department for FY25 (Year 2). Funds are allocated over a 3-year period. Ben Valdez, Deputy Chief of Police, bpvaldez@santafenm.gov, 505-955-5040.

1. Request for Approval of a Budget Adjustment Resolution in the Total Amount of $187,500 from the NM Department of Finance and Administration Fund to the Police Salaries Fund. BAR for Year 2 of this agreement. The funds are allocated over a 3-year period to hire law enforcement/support positions at Santa Fe Police Department.

BACKGROUND AND SUMMARY:
The City of Santa Fe submitted a request for a disbursement of funds from the Department of Finance and Administration (DFA). During the 2023 Legislative session, Governor Michelle Lujan Grisham signed legislation appropriating $57M for New Mexico law enforcement agencies to help build personnel capacity.

The FY24 Law Enforcement Recruitment Fund was established and allows the funds to be used:

- To fill law enforcement officer or support positions (if unfunded)
- To create new law enforcement officer or support positions.

The funds can be used for salaries and benefits up to the amount allocated by the award. The Department requested funding to create (4) Crime Scene Technician positions and (1) Crime Analyst position. On September 22, 2023, the City of Santa Fe received notice that we were awarded funding for the (5) positions, with each position being granted up to $75,000.

This appropriation is distributed over 3 years, for a total allocation of $656,250.00 to Santa Fe Police Department.

1. Year 1 allows for 100% of the allocation of $375,000, with each position being funded up to $75,000.00. **(COMPLETED)**
2. Year 2 allows for 50% of the allocation up to $187,500 for salary and benefits. The City of Santa Fe will absorb the remaining 50% in Year 2.
3. Year 3 the City will be able to utilize 25% up to $93,750 for salary and benefits and the City will be responsible for the remaining 75% of the funding.
4. Year 4 the City will be responsible for fully funding the positions.

The (5) support positions had been requested in previous years to allow expanded capacity to shift workload from personnel in police officer roles to civilian personnel.

With Year 1 approved and completed, we were able to fill all (5) support positions.

The Department has staffed the Crime Scene Unit with primarily civilian staff, which is currently fully staffed with (8) Crime Scene Technicians. This has allowed on duty coverage by the Crime Scene Unit to seven days a week during the hours of 6:00 a.m. to 10:00 p.m., with on call coverage from 10:00 p.m. to 6:00 a.m. This allows police officers to be assigned to higher priority calls that are not suitable for civilian staff to respond to.

We have been able to fully staff (2) Crime Analyst that are primarily responsible for completing monthly crime reports, compiling data for crime trends to support planning for deployment of resources for proactive operations and compiling data for annual crime reporting. We are working to expand their responsibilities to real time crime information that can be compiled and relayed to field and investigations units without disrupting the monthly reporting process. By increasing the staffing, we will be able to distribute the workload in the unit and have the ability to analyze and communicate real time crime information to our staff to curtail crime trends and efficiently deploy resources using real time intelligence-based information that is timely and relevant.

The certification has a requirement on reporting on the use of the funds to DFA on form "Exhibit A" which is attached to this packet. Any funds not disbursed during this fiscal year will need to be reverted back to DFA.

The positions have been a welcomed relief to our staff and their workload has been able to be distributed more equitably.

The Police Department will continue to work with the Human Resources and Finance Departments to plan for budgeting the positions for future years until the City completely absorbs the cost in the annual budget.

APPROPRIATION NUMBER:	TOTAL ALLOCATION AMOUNT:	REVERSION DATE:
23-ZH5048-81-2	**$656,250.00**	**June 30, 2025**

ALLOCATION PURPOSE

Six Hundred and Fifty Six Thousand Two Hundred and Fifty Dollars and Zero Cents over three years to hire law enforcement/support positions.

ALLOCATION DISBURSEMENT

The remaining allocation amount, after receiving the first-year allocation in fiscal year 2024, will be disbursed as follows: The second-year allocated funds will be disbursed up to $187,500 fiscal year 2025, and the third-year allocated funds will be disbursed up to $93,750 in fiscal year 2026. The Allocation Recipient will submit to the Department of Finance & Administration this signed document.

Funds for the second disbursement must be expended by June 30, 2025; and the last disbursement of 25% will be made in August 2025 to be expended by June 30, 2026. Any amount not expended in each of the two years will be returned to the State of New Mexico, Department of Finance and Administration in the year that it is scheduled for reversion. All expenditures must occur prior to the reversion date.

The Allocation Recipient agrees to submit quarterly reports using Exhibit A, Law Enforcement Recruitment Report, providing updates on the hiring of law enforcement/support positions.

CERTIFICATION

I hereby certify that the **City of Santa Fe**

1. Will only use the allocated funds to carry out and/or perform activities described in allocation language.
2. Will follow the procedure described in "Allocation Reporting" of allocated funds.

From: Ben Valdez, Deputy Chief of Police B. Valdez, DC (Oct 31, 2024 15:42 MDT)

ACTION:
Request for the Approval of New Mexico Department of Finance and Administration grant agreement (Project 24-I3023) for the purchase and installation of equipment, in the total amount of $(250,000.00). Ben Valdez, Deputy Chief of Police, bpvaldez@santafenm.gov, 505-955-5040.

1. Request for the Approval for a Budget Amendment Resolution (BAR) in the total amount of $(250,000.00) for the equipment and labor costs associated with executing this project.

BACKGROUND AND SUMMARY:
The Santa Fe Police Department received a $250,000.00 appropriation from the Legislature of the State of New Mexico through the Department of Finance and Administration via a grant. The purpose for the funding was to assist with purchasing and installing equipment related to our armored rescue vehicle project.

The project must be completed by June 30, 2026.

Grant Agreement signed by Legal
BAR
Project Ledger Form

STATE OF NEW MEXICO
DEPARTMENT OF FINANCE AND ADMINISTRATION
GENERAL FUND 93100 CAPITAL APPROPRIATION PROJECT

THIS AGREEMENT is made and entered into as of the date it is executed, by and between the Department of Finance and Administration, hereinafter called the "Department" or abbreviation such as "DFA/LGD", and **CITY OF SANTA FE**, hereinafter called the "Grantee". This Agreement shall be effective as of the date it is executed by the Department.

RECITALS

WHEREAS, in the **Laws of 2024, Chapter 66, Section 28, Paragraph 381**, the Legislature made an appropriation to the Department, funds from which the Department is making available to the Grantee pursuant to this Agreement; and

WHEREAS, the Department is granting to Grantee, and the Grantee is accepting the grant of, funds from this appropriation, in accordance with the terms and conditions of this Agreement; and

WHEREAS, pursuant to Sections 9-6-5 and 9-6-5.1 NMSA 1978, the Secretary of the Department of Finance and Administration has the power and the authority to (i) maintain long-range estimates and plans for capital projects and develop standards for measuring the need for, and utility of, proposed projects; (ii) contract for, receive and utilize any grants or other financial assistance made available by the United States government or by any other source, public or private; (iii) provide planning and funding assistance to units of local government, council of government organizations, Indian tribal governments situated within New Mexico, and to nonprofit entities having for their purpose local, regional or community betterment; (iv) incident to any such programs, may enter into contracts and agreements with such units of local government, council of government organizations, Indian tribal governments, nonprofit entities and the federal government; and (v) delegate such authority to the Local Government Division as being necessary and appropriate to such delegation;

AGREEMENT

NOW, THEREFORE, in consideration of the mutual covenants and obligations contained herein, the parties hereby mutually agree as follows:

ARTICLE I. PROJECT DESCRIPTION, AMOUNT OF GRANT AND REVERSION DATE

A. The project that is the subject of this Agreement is described as follows:

24-I3023 **$250,000.00** **APPROPRIATION REVERSION DATE: June 30, 2026**

Laws of 2024, Chapter 66, Section 28, Paragraph 381, Two Hundred Fifty Thousand Dollars And Zero Cents ($250,000.00), from the General Fund 93100 to purchase and install equipment, for the police department in Santa Fe in Santa Fe county;

The Grantee's total reimbursements shall not exceed Two Hundred Fifty Thousand Dollars And Zero Cents $250,000.00 (the "Appropriation Amount") minus the allocation for Art in Public Places ("AIPP amount")[1], if applicable, Zero Dollars And Zero Cents $0.00, which equals Two Hundred Fifty Thousand Dollars And Zero Cents $250,000.00 (the "Adjusted Appropriation Amount").

In the event of a conflict among the Appropriation Amount, the Reversion Date, as defined herein and/or the purpose of the Project, as set forth in this Agreement, and the corresponding appropriation language in the laws cited above in this Article I(A), the language of the laws cited herein shall control.

This project is referred to throughout the remainder of this Agreement as the "Project"; the information contained in Article I(A) is referred to collectively throughout the remainder of this Agreement as the "Project Description." [Optional Language if special conditions apply. Attachment A sets forth additional or more stringent requirements and conditions, which are incorporated by this reference as if set forth fully herein. If Optional Attachment A imposes more stringent requirements than any requirement set forth in this Agreement, the more stringent requirements of Attachment A shall prevail, in the event of irreconcilable conflict.] The Grantee shall reference the Project's number in all correspondence with and submissions to the Department concerning the Project, including, but not limited to, Requests for Payment and reports.

ARTICLE II. LIMITATION ON DEPARTMENT'S OBLIGATION TO MAKE GRANT DISBURSEMENT TO GRANTEE

A. Upon the Effective Date of this Agreement, for permissible purposes within the scope of the Project Description, the Grantee shall only be reimbursed monies for which the Department has issued and the Grantee has received a Notice of Department's Obligation to Reimburse Grantee (hereinafter referred to as "Notice of Obligation"). This Grant Agreement and the disbursement of any and all amounts of the above referenced Adjusted Appropriation Amount are expressly conditioned upon the following:

i. Irrespective of any Notice of Obligation, the Grantee's expenditures shall be made on or before the Reversion Date and, if applicable, an Early Termination Date (i.e., the goods have been delivered and accepted or the title to the goods has been transferred to the Grantee and/or the services have been rendered for the Grantee); and

ii. The total amount received by the Grantee shall not exceed the lesser of: (a) the Adjusted Appropriation Amount identified in Article I(A) herein or (b) the total of all amounts stated in the Notice(s) of Obligation evidencing that the Department has received and accepted the Grantee's Third Party Obligation(s), as defined in subparagraph iii of this Article II(A); and

iii. The Grantee's expenditures were made pursuant to the State Procurement Code and execution of binding written obligations or purchase orders with third party contractors or vendors for the provision of services, including professional services, or the purchase of tangible personal property and real property for the Project, hereinafter referred to as "Third Party Obligations"; and

iv. The Grantee's submittal of timely Requests for Payment in accordance with the procedures set forth in Article IX of this Agreement; and

v. In the event that capital assets acquired with Project funds are to be sold, leased, or licensed to or operated by a private entity, the sale, lease, license, or operating agreement:

a. must be approved by the applicable oversight entity (if any) in accordance with law; or

b. if no oversight entity is required to approve the transaction, the Department must approve the transaction as complying with law.

Prior to the sale, lease, license, or operating agreement being approved pursuant to Articles II(A)(v)(a) and II(A)(v)(b) herein, the Department may, in its sole and absolute discretion and unless inconsistent with State Board of Finance imposed conditions, reimburse the Grantee for necessary expenditures incurred to develop the Project sufficiently to make the sale, lease, license, or operating agreement commercially feasible, such as plan and design expenditures; and

vi. The Grantee shall request approval of its obligation(s) by submitting a Notice of Obligation form as provided by the Department. The Grantee's submission of documentation of all Third Party Obligations and amendments thereto (including terminations) to the Department and the Department's issuance and the Grantee's receiving of a Notice of Obligation for a particular amount in accordance with the terms of this Agreement shall be governed by the following:

a. The Grantee shall submit to the Department one copy of all Third Party Obligations and amendments thereto (including terminations) as soon as possible after execution by the Third Party **but prior to execution by the Grantee.**

b. Grantee acknowledges and agrees that if it chooses to enter into a Third Party Obligation prior to receiving a Notice of Obligation that covers the expenditure, it is solely responsible for such obligations.

c. The Department may, in its sole and absolute discretion, issue to Grantee a Notice of Obligation for the particular amount of that Third Party Obligation that only obligates the Department to reimburse Grantee's expenditures made on or before the Reversion Date or an Early Termination Date.

d. The date the Department signs the Notice of Obligation is the date that the Department's Notice of Obligation is effective. After that date, the Grantee is authorized to budget the particular amount set forth in the Notice of Obligation, execute the Third Party Obligation and request the Third Party to begin work. Payment for any work performed or goods received prior to the effective date of the Notice of Obligation is wholly and solely the obligation of the Grantee.

B. The Grantee shall implement, in all respects, the Project. The Grantee shall provide all necessary qualified personnel, material, and facilities to implement the Project. The Grantee shall finance its share (if any) of the costs of the Project, including all Project overruns.

C. Project funds shall not be used for purposes other than those specified in the Project Description.

D. Unless specifically allowed by law, Project funds cannot be used to reimburse Grantee for indirect Project costs.

---

[1]The AIPP amount is "an amount of money equal to one percent or two hundred thousand dollars ($200,000), whichever is less, of the amount of money appropriated for new construction or any major renovation exceeding one hundred thousand dollars ($100,000)." Section 13-4A-4 NMSA 1978.

[2]"Reimburse" as used throughout this Agreement includes Department payments to the Grantee for invoices received, but not yet paid, by the Grantee from a third party contractor or vendor, if the invoices comply with the provisions of this Agreement and are a valid liability of the Grantee.

ARTICLE III. NOTICE PROVISIONS AND GRANTEE AND DEPARTMENT DESIGNATED REPRESENTATIVES

Whenever written notices, including written decisions, are to be given or received, related to this Agreement, the following provisions shall apply.

The Grantee designates the person(s) listed below, or their successor, as their official representative(s) concerning all matters related to this Agreement:

Grantee: CITY OF SANTA FE
Name: Alan Webber
Title: Mayor
Address: PO Box 909, Santa Fe, NM 87504
Email: mayor@santafenm.gov
Telephone: 505-955-6590

The Grantee designates the person(s) listed below, or their successor, as their Fiscal Officer or Fiscal Agent concerning all matters related to this Agreement:

Grantee: CITY OF SANTA FE
Name: Emily K. Oster
Title: Finance Director
Address: PO Box 909, Santa Fe, NM 87504
Email: ekoster@santafenm.gov
Telephone: 505-629-3411

The Department designates the persons listed below, or their successors, as the Points of Contact for matters related to this Agreement.

Department: DFA/Local Government Division
Name: Daniel Catanach
Title: Program Manager
Address: Bataan Memorial Bldg. Rm 202, Santa Fe, NM 87501
Email: danieln.catanach@dfa.nm.gov
Telephone: 505-231-6090

The Grantee and the Department agree that either party shall send all notices, including written decisions, related to this Agreement to the above named persons by email or regular mail. In the case of mailings, notices shall be deemed to have been given and received upon the date of the receiving party's actual receipt or five calendar days after mailing, whichever shall first occur. In the case of email transmissions, the notice shall be deemed to have been given and received on the date reflected on the delivery receipt of email.

ARTICLE IV. REVERSION DATE, TERM, DEADLINE TO EXPEND FUNDS

A. As referenced in Article I(A), the applicable law establishes a date by which Project funds must be expended by Grantee, which is referred to throughout the remainder of this Agreement as the "Reversion Date." Upon being duly executed by both parties, this Agreement shall be effective as of the date of execution by the Department. It shall terminate on **June 30, 2026** the Reversion Date unless Terminated Before Reversion Date ("Early Termination") pursuant to Article V herein.
B. The Project's funds must be expended on or before the Reversion Date and, if applicable, Early Termination Date of this Agreement. For purposes of this Agreement, it is not sufficient for the Grantee to encumber the Project funds on its books on or before the Project's Reversion Date or Early Termination Date. Funds are expended and an expenditure has occurred as of the date that a particular quantity of goods are delivered to and received by the Grantee or title to the goods is transferred to the Grantee and/or as of the date particular services are rendered for the Grantee. Funds are ***not*** expended and an expenditure has ***not*** occurred as of the date they are encumbered by the Grantee pursuant to a contract or purchase order with a third party.

ARTICLE V. EARLY TERMINATION

A. Early Termination Before Reversion Date Due to Completion of the Project or Complete Expenditure of the Adjusted Appropriation or Violation of this Agreement

Early Termination includes:

i. Termination due to completion of the Project before the Reversion Date; or
ii. Termination due to complete expenditure of the Adjusted Appropriation Amount before the Reversion Date; or
iii. Termination for violation of the terms of this Agreement; or
iv. Termination for suspected mishandling of public funds, including but not limited to, fraud, waste, abuse, and conflicts of interest.

Either the Department or the Grantee may early terminate this Agreement prior to the Reversion Date by providing the other party with a minimum of fifteen (15) days' advance, written notice of early termination. Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department pursuant to Article V(A).

B. Early Termination Before Reversion Date Due to Non-appropriation

The terms of this Agreement are expressly made contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico for the performance of this Agreement. Throughout this Agreement the term "non-appropriate" or "non-appropriation" includes the following actions by the New Mexico Legislature: deauthorization, reauthorization or revocation of a prior authorization. The Legislature may choose to non-appropriate the Appropriation referred to in Article I and, if that occurs, the Department shall early terminate this Agreement for non-appropriation by giving the Grantee written notice of such termination, and such termination shall be effective as of the effective date of the law making the non-appropriation. The Department's decision as to whether sufficient appropriations or authorizations are available shall be accepted by the Grantee and shall be final. Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department pursuant to Article V(B).

C. Limitation on Department's Obligation to Make Grant Disbursements to Grantee in the Event of Early Termination

In the event of Early Termination of this Agreement by either party, the Department's sole and absolute obligation to reimburse the Grantee is expressly conditioned upon the limitations set forth Article II.

ARTICLE VI. SUSPENSION OF NEW OR FURTHER OBLIGATIONS

A. The Department may choose, in its sole and absolute discretion, to provide written notice to the Grantee to suspend entering into new and further obligations. Upon the receipt of such written notice by the Grantee:

i. The Grantee shall immediately suspend entering into new or further written obligations with third parties; and
ii. The Department will suspend the issuance of any new or further Notice of Obligation under this Agreement; and
iii. The Department may direct the Grantee to implement a corrective action plan in accordance with Article VI(D) herein.

B. In the event of Suspension of this Agreement, the Department's sole and absolute obligation to reimburse the Grantee is expressly conditioned upon the limitations set forth in Article II herein.

C. A suspension of new or further obligations under this Agreement shall remain in effect unless or until the date the Grantee receives written notice given by the Department informing the Grantee that the Suspension has been lifted or that the Agreement has been Early Terminated in accordance with Article V herein. If the Suspension is lifted, the Department will consider further requests for Notice of Obligation.

D. Corrective Action Plan in the Event of Suspension

In the event that the Department chooses, in its sole and absolute discretion to direct the Grantee to suspend entering into new or further written obligations with third parties pursuant to Article VI(A), the Department may, but is not obligated to, require the Grantee to develop and implement a written corrective action plan to remedy the grounds for the Suspension. Such corrective action plan must be approved by the Department and be signed by the Grantee. Failure to sign a corrective action plan or meet the terms and deadlines set forth in the signed corrective action plan, is hereby deemed a violation of the terms of this Agreement for purposes of Early Termination, Article V(A)(iii). The corrective action plan is in addition to, and not in lieu of, any other equitable or legal remedy, including but not limited to Early Termination.

ARTICLE VII. AMENDMENT

This Agreement shall not be altered, changed, or amended except by instrument in writing duly executed by both the parties hereto.

ARTICLE VIII. REPORTS

A. Database Reporting

The Grantee shall report quarterly Project activity by entering such Project information as the Department and the Department of Finance and Administration may require, such information entered directly into a database maintained by the Department of Finance and Administration. Additionally, the Grantee shall certify on the Request for Payment form that updates have been maintained and are current in the database. The Grantee hereby acknowledges that failure to perform and/or certify updates into the database will delay or potentially jeopardize the reimbursement of funds. The Department shall give Grantee a minimum of thirty (30) days' advance written notice of any changes to the information the Grantee is required to report.

Quarterly reports are due on the last day of each quarter. Quarter end reporting periods are September 30th, December 31st, March 31st, and June 30th.

B. Requests for Additional Information/Project Inspection

During the term of this Agreement and during the period of time during which the Grantee must maintain records pursuant to Article VIII, the Department may:

i. request such additional information regarding the Project as it deems necessary; and
ii. conduct, at reasonable times and upon reasonable notice, onsite inspections of the Project.

Grantee shall respond to such requests for additional information within a reasonable period of time, as established by the Department.

ARTICLE IX. REQUEST FOR PAYMENT PROCEDURES AND DEADLINES

A. The Grantee shall request payment by submitting a Request for Payment, in the form provided by the Department. Payment requests are subject to the following procedures:
   i. The Grantee must submit a Request for Payment; and
   ii. Each Request for Payment must contain proof of payment by the Grantee or liabilities incurred by the Grantee showing that the expenditures are valid or are liabilities incurred by the Grantee in the form of actual unpaid invoices received by the Grantee for services rendered by a third party or items of tangible personal property received by the Grantee for the implementation of the Project; provided, however, that the Grantee may be reimbursed for unpaid liabilities only if the Department, in its sole and absolute discretion, agrees to do so and in accordance with any special conditions imposed by the Department.
   iii. In cases where the Grantee is submitting a Request for Payment to the Department based upon invoices received, but not yet paid, by the Grantee from a third party contractor or vendor, if the invoices comply with the provisions of this Agreement and are a valid liability of the Grantee, the Grantee shall make payment to those contractors or vendors within five (5) business days from the date of receiving reimbursement from the Department or such shorter period of time as the Department may prescribe in writing. The Grantee is required to certify to the Department proof of payment to the third party contractor or vendor within ten (10) business days from the date of receiving reimbursement from the Department.

B. The Grantee must obligate 5% of the Adjusted Appropriation Amount within six months of execution of the grant agreement and must have expended no less than 85% of the Adjusted Appropriation Amount six months prior to the reversion date.

C. Deadlines

Requests for Payments shall be submitted by Grantee to the Department on the earlier of:
   i. Immediately as they are received by the Grantee but at a minimum thirty (30) days from when the expenditure was incurred or liability of the Grantee was approved as evidenced by an unpaid invoice received by the Grantee from a third party contractor or vendor; or
   ii. Twenty (20) days from date of Early Termination; or

iii. Twenty (20) days from the Reversion Date.

D. The Grantee's failure to abide by the requirements set forth in Article II and Article IX herein will result in the denial of its Request for Payment or will delay the processing of Requests for Payment. The Department has the right to reject a payment request for the Project unless and until it is satisfied that the expenditures in the Request for Payment are for permissible purposes within the meaning of the Project Description and that the expenditures and the Grantee are otherwise in compliance with this Agreement, including but not limited to, compliance with the reporting requirements and the requirements set forth in Article II herein to provide Third Party Obligations and the Deadlines set forth in Article IX herein. The Department's ability to reject any Request for Payment is in addition to, and not in lieu of, any other legal or equitable remedy available to the Department due to Grantee's violation of this Agreement.

ARTICLE X. PROJECT CONDITIONS AND RESTRICTIONS; REPRESENTATIONS AND WARRANTIES

A. The following general conditions and restrictions are applicable to the Project:

i. The Project's funds must be spent in accordance with all applicable state laws, regulations, policies, and guidelines, including, but not limited to, the State Procurement Code (or local procurement ordinance, where applicable).

ii. The Project must be implemented in accordance with the New Mexico Public Works Minimum Wage Act, Section 13-4-10 through 13-4-17 NMSA 1978, as applicable. Every contract or project in excess of sixty thousand dollars ($60,000) that the Grantee is a party to for construction, alteration, demolition or repair or any combination of these, including painting and decorating, of public buildings, public works or public roads and that requires or involves the employment of mechanics, laborers or both shall contain a provision stating the minimum wages and fringe benefits to be paid to various classes of laborers and mechanics, shall be based upon the wages and benefits that will be determined by the New Mexico Department of Workforce Solutions to be prevailing for the corresponding classes of laborers and mechanics employed on contract work of a similar nature in the locality. Further, every contract or project shall contain a stipulation that the contractor, subcontractor, employer or a person acting as a contractor shall pay all mechanics and laborers employed on the site of the project, unconditionally and not less often than once a week and without subsequent unlawful deduction or rebate on any account, the full amounts accrued at time of payment computed at wage rates and fringe benefit rates not less than those determined pursuant to Section 13-4-11 (B) NMSA 1978 to be the prevailing wage rates and prevailing fringe benefit rates issued for the project.

iii. The Project may only benefit private entities in accordance with applicable law, including, but not limited to, Article IX, Section 14 of the Constitution of the State of New Mexico, the "Anti-Donation Clause."

iv. The Grantee shall not for a period of 10 years from the date of this agreement convert any property acquired, built, renovated, repaired, designed or developed with the Project's funds to uses other than those specified in the Project Description without the Department's and the Board of Finance's express, advance, written approval, which may include a requirement to reimburse the State for the cost of the project, transfer proceeds from the disposition of property to the State, or otherwise provide consideration to the State.

v. The Grantee shall comply with all federal and state laws, rules and regulations pertaining to equal employment opportunity. In accordance with all such laws, rules and regulations the Grantee agrees to assure that no person shall, on the grounds of race, color, national origin, sex, sexual preference, age or handicap, be excluded from employment with Grantee, be excluded from participation in the Project, be denied benefits or otherwise be subject to discrimination under, any activity performed under this Agreement. If Grantee is found to be not in compliance with these requirements during the life of this Agreement, Grantee agrees to take appropriate steps to correct any deficiencies. The Grantee's failure to implement such appropriate steps within a reasonable time constitutes grounds for terminating this Agreement.

B. The Grantee hereby represents and warrants the following:

i. The Grantee has the legal authority to receive and expend the Project's funds.

ii. This Agreement has been duly authorized by the Grantee, the person executing this Agreement has authority to do so, and, once executed by the Grantee, this Agreement shall constitute a binding obligation of the Grantee, enforceable according to its terms.

iii. This Agreement and the Grantee's obligations hereunder do not conflict with any law or ordinance or resolution applicable to the Grantee, the Grantee's charter (if applicable), or any judgment or decree to which the Grantee is subject.

iv. The Grantee has independently confirmed that the Project Description, including, but not limited to, the amount and Reversion Date, is consistent with the underlying appropriation in law.

v. The Grantee's governing body has duly adopted or passed as an official act a resolution, motion, or similar action authorizing the person identified as the official representative of the Grantee to sign the Agreement and to sign Requests for Payment.

vi. The Grantee shall abide by New Mexico laws regarding conflicts of interest, governmental conduct and whistleblower

protection. The Grantee specifically agrees that no officer or employee of the local jurisdiction or its designees or agents, no member of the governing body, and no other public official of the locality who exercises any function or responsibility with respect to this Grant, during their tenure or for one year thereafter, shall have any interest, direct or indirect, in any contract or subcontract, or the proceeds thereof, for work to be performed or goods to be received, pursuant to this Grant. Further, Grantee shall require all of its contractors to incorporate in all subcontracts the language set forth in this paragraph prohibiting conflicts of interest.

vii. No funds have been paid or will be paid, by or on behalf of the Grantee, to any person for influencing or attempting to influence an officer or employee of this or any agency or body in connection with the awarding of any Third Party Obligation and that the Grantee shall require certifying language prohibiting lobbying to be included in the award documents for all subawards, including subcontracts, loans and cooperative agreements. All subrecipients shall be required to certify accordingly.

ARTICLE XI. STRICT ACCOUNTABILITY OF RECEIPTS AND DISBURSEMENTS; PROJECT RECORDS

A. The Grantee shall be strictly accountable for receipts and disbursements relating to the Project's funds. The Grantee shall follow generally accepted accounting principles, and, if feasible, maintain a separate bank account or fund with a separate organizational code, for the funds to assure separate budgeting and accounting of the funds.

B. For a period of six (6) years following the Project's completion, the Grantee shall maintain all Project related records, including, but not limited to, all financial records, requests for proposals, invitations to bid, selection and award criteria, contracts and subcontracts, advertisements, minutes of pertinent meetings, as well as records sufficient to fully account for the amount and disposition of the total funds from all sources budgeted for the Project, the purpose for which such funds were used, and such other records as the Department shall prescribe.

C. The Grantee shall make all Project records available to the Department, the Department of Finance and Administration, and the New Mexico State Auditor upon request. With respect to the funds that are the subject of this Agreement, if the State Auditor or the Department of Finance and Administration finds that any or all of these funds were improperly expended, the Grantee may be required to reimburse to the State of New Mexico, to the originating fund, any and all amounts found to be improperly expended.

ARTICLE XII. IMPROPERLY REIMBURSED FUNDS

If the Department determines that part or all of the Appropriation Amount was improperly reimbursed to Grantee, including but not limited to, Project funds reimbursed to Grantee based upon fraud, mismanagement, misrepresentation, misuse, violation of law by the Grantee, or violation of this Agreement, the Grantee shall return such funds to the Department for disposition in accordance with law.

ARTICLE XIII. LIABILITY

Neither party shall be responsible for liability incurred as a result of the other party's acts or omissions in connection with this Agreement. Any liability incurred in connection with this Agreement is subject to immunities and limitations of the New Mexico Tort Claims Act.

ARTICLE XIV. SCOPE OF AGREEMENT

This Agreement constitutes the entire and exclusive agreement between the Grantee and Department concerning the subject matter hereof. The Agreement supersedes any and all prior or contemporaneous agreements, understandings, discussions, communications, and representations, written or verbal.

ARTICLE XV. REQUIRED NON-APPROPRIATIONS CLAUSE IN CONTRACTS FUNDED IN WHOLE OR PART BY FUNDS MADE AVAILABLE UNDER THIS AGREEMENT

The Grantee acknowledges, warrants, and agrees that Grantee shall include a "non-appropriations" clause in all contracts between it and other parties that are (i) funded in whole or part by funds made available under this Agreement and (ii) entered into after the effective date of this Agreement that states:

"The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico for the performance of this Agreement. If sufficient appropriations and authorization are not made by the Legislature, the **CITY OF SANTA FE** may immediately terminate this Agreement by giving Contractor written notice of such termination. The **CITY OF SANTA FE**'s decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. Contractor hereby waives any rights to assert an impairment of contract claim against the **CITY OF SANTA FE** or the

Department of Finance and Administration, Local Government Division (DFA/LGD) or the State of New Mexico in the event of immediate or Early Termination of this Agreement by the **CITY OF SANTA FE** or the Department"

ARTICLE XVI. REQUIRED TERMINATION CLAUSE IN CONTRACTS FUNDED IN WHOLE OR PART BY FUNDS MADE AVAILABLE UNDER THIS AGREEMENT

Grantee acknowledges, warrants, and agrees that Grantee shall include the following termination clause in all contracts that are (i) funded in whole or part by funds made available under this Agreement and (ii) entered into after the effective date of this Agreement:

"This contract is funded in whole or in part by funds made available under a DFA/LGD Grant Agreement. Should the DFA/LGD early terminate the grant agreement, the CITY OF SANTA FE may early terminate this contract by providing Contractor written notice of such termination. In the event of termination pursuant to this paragraph, the CITY OF SANTA FE only liability shall be to pay Contractor for acceptable goods delivered and services rendered before the termination date."

Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department.

ARTICLE XVII. COMPLIANCE WITH UNIFORM FUNDING CRITERIA.

A. Throughout the term of this Agreement, Grantee shall:
   1. submit all reports of annual audits and agreed upon procedures required by Section 12-6-3(A)-(B) NMSA 1978 by the due dates established in 2.2.2 NMAC, reports of which must be a public record pursuant to Section 12-6-5(A) NMSA 1978 within forty-five days of delivery to the State Auditor;
   2. have a duly adopted budget for the current fiscal year approved by its budgetary oversight agency (if any);
   3. timely submit all required financial reports to its budgetary oversight agency (if any); and
   4. have adequate accounting methods and procedures to expend grant funds in accordance with applicable law and account for and safeguard grant funds and assets acquired by grant funds.

B. In the event Grantee fails to comply with the requirements of Paragraph A of this Article XVII, the Department may take one or more of the following actions:
   1. suspend new or further obligations pursuant to Article VI(A) of this Agreement;
   2. require the Grantee to develop and implement a written corrective action plan pursuant to Article VI(D) of this Agreement to remedy the non-compliance;
   3. impose special grant conditions to address the non-compliance by giving the Grantee notice of such special conditions in accordance with Article III of this Agreement; the special conditions shall be binding and effective on the date that notice is deemed to have been given pursuant to Article III; or
   4. terminate this Agreement pursuant to Article V(A) of this Agreement.

ARTICLE XVIII. SEVERANCE TAX BOND AND GENERAL OBLIGATION BOND PROJECT CLAUSES

A. Grantee acknowledges and agrees that the underlying appropriation for the Project is a severance tax bond or general obligation bond appropriation, and that the associated bond proceeds are administered by the New Mexico State Board of Finance (SBOF), an entity separate and distinct from the Department. Grantee acknowledges and agrees that (i) it is Grantee's sole and absolute responsibility to determine through SBOF staff what (if any) conditions are currently imposed on the Project; (ii) the Department's failure to inform Grantee of a SBOF imposed condition does not affect the validity or enforceability of the condition; (iii) the SBOF may in the future impose further or different conditions upon the Project; (iv) all SBOF conditions are effective without amendment of this Agreement; (v) all applicable SBOF conditions must be satisfied before the SBOF will release to the Department funds subject to the condition(s); and (vi) the Department's obligation to reimburse Grantee from the Project is contingent upon the then current SBOF conditions being satisfied.

B. Grantee acknowledges and agrees that the SBOF may in its sole and absolute discretion remove a project's assigned bond proceeds if the project doesn't proceed sufficiently. Entities must comply with the requirement to encumber five percent (5%) of Project funds within six months of bond issuance as certified by the grantee in the Bond Questionnaire and Certification documents submitted to the SBOF. Failure to comply may result in the bond proceeds reassignment to a new ready project. If this should occur this grant agreement will be suspended until the entity has demonstrated readiness as determined by the SBOF and the Department.

C. Grantee acknowledges and agrees that this Agreement is subject to the SBOF's Bond Project Disbursements rule, NMAC 2.61.6, as may be amended or re-codified. The rule provides definitions and interpretations of grant language for the purpose of determining whether a particular activity is allowable under the authorizing language of the agreement.

City of Santa Fe New Mexico
Memorandum

Date: **October 10, 2024**

To: **Mayor Alan Webber and Governing Body**
Finance, Quality of Life

Via: **Emily Oster, Finance Department Director** Emily K. Oster
Travis Dutton-Leyda, Chief Procurement Officer
Johanna Nelson, Director, Office of Economic Development Johanna Nelson (Nov 15, 2024 09:40 MST)

From: **Eric Renz-Whitmore, Economic Development Specialist, edrenzwhitmore@santafenm.gov**

Subject: **Request for Approval of a General Services Contract with UNM Anderson Center for Responsible Entrepreneurship Programming**

Vendor Name: **UNM Anderson Center for Responsible Entrepreneurship (CRE) Anderson School**

Vendor Number: **1073**

ITEM AND ISSUE:
The Office of Economic Development (OED) respectfully requests your review and approval of a General Services Contract with the UNM Anderson Center for Responsible Entrepreneurship, in the total amount of $300,000 (not to exceed). This contract is for entrepreneurial support, training, and administering an accelerator program, all aimed at strengthening Santa Fe's economy in line with the OED's mission.

Request for the Approval of a General Services Contract in the total amount of $ 300,000 (not to exceed) for entrepreneurial support, training and administering an accelerator; University of New Mexico Anderson School Center for Responsible Entrepreneurship, Office of Economic Development; (Eric Renz-Whitmore, edrenzwhitmore@santafenm.gov) (Johanna Nelson, jcnelson@santafenm.gov, 505-699-7003)

BACKGROUND AND SUMMARY:

The City of Santa Fe's Office of Economic Development (OED) supports a variety of programs that provide resources and technical assistance to entrepreneurs. To expand opportunities for those launching high-growth, high-impact ventures, the OED proposes continued support for the UNM

Anderson Center for Responsible Entrepreneurship (CRE) and its presence in Santa Fe. This funding will help establish an accelerator and related programs focused on fostering entrepreneurial development, business creation, and growth, with an emphasis on businesses that prioritize environmental and social stewardship through a triple bottom line approach. By supporting responsible businesses and B Corps, this initiative strengthens Santa Fe's business ecosystem while promoting sustainability and social responsibility.

In recent years, the OED has funded several accelerator-like programs. A study by the UNM Anderson School and Santa Fe Innovates found that many entrepreneurs and job seekers today are not only pursuing financial success but also seeking work that contributes to their communities and the planet.

PROCUREMENT METHOD:
The Procurement method is exempt, as UNM Anderson Center for Responsible Entrepreneurship (CRE) is a governmental institution. Contracts with UNM are exempt per NMSA 1978, Section 13-1-98 (A).

CITY OF SANTA FE
GENERAL SERVICES CONTRACT

Services

THIS CONTRACT is made and entered into by and between the City of Santa Fe, herein after referred to as the "City," and **University of New Mexico Anderson School of Management Center for Responsible Entrepreneurship** herein after referred to as the "Contractor " or "Center."

The objective of this contract is to create jobs through the launch of new ventures by the participating entrepreneurs. The pre-acceleration program guides entrepreneurs through a process to validate their startup idea, and the acceleration program guides entrepreneurs through a process to build and launch their business. Key metrics are the number of entrepreneurs participating in the programs, and the businesses that launch and create jobs through their venture.

IT IS MUTUALLY AGREED BETWEEN THE PARTIES:

1. **Definitions**

A. "Products and Services Schedule" refers to the complete list of products and services offered under this Contract and the price for each. Product and service descriptions may be amended with the prior approval of the City's Office of Economic Development Contract Administrator, Eric Renz-Whitmore. New products and services shall not be added to the Products and Services Schedule.

B. "Business Hours" means 8:00 a.m. to 5:00 p.m. Mountain Time.

2. **Scope of Work**

A. The Contractor shall perform the following work:

- Create short- and long-term positive impact for entrepreneurs and local businesses in Santa Fe and Northern New Mexico by completing the deliverables listed below.
- Build a reputation for fostering the social enterprise shift in capitalism (i.e., stakeholder capitalism) and promote UNM Anderson and Santa Fe as a place where social entrepreneurs and leaders thrive. These results will be measured by the number of attendees at the public events, and eventually, the number of attendees of individuals from New Mexico and other states in educational programs (e.g., executive education) and an annual conference.
- Each year, the Contractor will host a planning session with City economic development leaders to confirm plans, gather feedback, and make adjustments in the programming. Included in the planning sessions will be key community and mentor stakeholders in the Center.
- Complete Points 1 and 2 during the term of this contract:

Phase 1:

- Continue to operate a responsible entrepreneurship accelerator based in Santa Fe and operating on the UNM academic year. Hold a pre-acceleration workshop to take place over two Saturdays in June 2024. A 10-month acceleration program will begin in August 2024 and conclude in June 2025. Applications for the acceleration program will occur in July 2024. Targeted number of participants: 15 in pre-acceleration and 15 in acceleration program
- Develop hybrid programming to offer entrepreneurs and business leaders a mix of virtual and in-person sessions (target timing: Spring 2024). With 12 entrepreneurs completing the first acceleration program, the objective is to offer one or two short courses to continue to support them. An added element will be to offer an online digital certificate programs to continue to support their business acumen. The metrics will be the courses offered – in-person and virtual – and the number of attendees engaged in the programs.
- Develop an add-on social entrepreneur acceleration program, inviting individuals from all previous cohorts to apply (prospective launch: August 2025). The objective is to continue to support participating entrepreneurs in preview acceleration workshops to offer advanced programs in raising funds, scaling their business, etc. Feedback and program development would be based on collecting requirements from previous participating entrepreneurs. Target enrollment: 10 entrepreneurs
- Explore hosting the national B Academics Research community in Santa Fe (target timing: Summer/Fall 2025, requires working with a third-party – B Academics).
- Continue to develop an engaged mentoring community to support and guide local entrepreneurs and business leaders.

Phase 2:

- Develop and plan to host a conference on responsible entrepreneurship and leadership in Santa Fe, attracting attendees from New Mexico and other states, developing the reputation of Santa Fe as a place where social entrepreneurs and leaders thrive. The target date would be Fall 2026.
- Develop and plan to offer an abbreviated responsible entrepreneurship program for high school students in Santa Fe. The target date would be Summer 2026.

3. **Compensation**

The City shall pay to the Contractor based upon fixed prices for each Deliverable service as listed here. Paid upon receipt of quarterly progress reports showing the completion of a deliverable item of item(s).

Deliverable item:	U/I (unit of issue)	Price
01	See Below	$ 50,000
02	See Below	$135,000
03	See Below	$ 90,000

01 – Complete a 10-month accelerator program to support local responsible entrepreneurs, including supporting student entrepreneurs in the program; host 10 monthly Meetups to develop and support responsible innovation in Santa Fe. The first cohort will be completed on June 6, 2024. The next one would be June 2025, as the UNM Anderson Center will host a new cohort each year.
02 – Host a second two-day pre-acceleration program in Santa Fe with a second group for the 10-month acceleration program. Continue to develop diverse participation and expand the number of UNM students

involved in the program. The next pre-acceleration program will be in June 2024, and the following one will be June 2025, as the UNM Anderson Center will host a new pre-acceleration program each year.
03 – Host a third 2-day pre-acceleration program in Santa Fe with a second group for the 10-month acceleration program. Continue to develop diverse participation and expand the number of UNM students involved in the program. Formulate plans to support high school students in what responsible entrepreneurship is and how to evaluate and launch a venture. Develop a plan to gather responsible entrepreneurs and leaders from around New Mexico in Santa Fe.

Compensation excluding New Mexico Gross Receipts Tax will follow the Payment Schedule as follows:

- FY 2024:
  - June 30, 2024 - $50,000
    - Report on results of the first cohort and meetup/awareness-building events and activities.

- FY 2025:
  - September 30, 2024 - $33,750
    - Report on summer pre-acceleration sessions & cohort launch.
  - December 30, 2024 - $33,750
    - Report on cohort progress; Event series development.
  - March 31 2025 - $33,750
    - Report on cohort progress; development of National B Academics research community event.
  - June 30, 2025 - $33,750
    - Report on results of the second cohort; B Academics research community event development.

- FY 2026:
  - September 30, 2025 - $22,500
    - Report on National B Academic Research event; development of engagement plan for HS students regarding responsible entrepreneurship; how to evaluate and launch a venture.
  - December 31, 2025 - $22,5000
    - Report on plans for gathering of responsible entrepreneurs and leaders from around NM in Santa Fe.
  - March 31, 2026 - $22,500
    - Report on plans to launch responsible entrepreneurship programs for HS students in Santa Fe; gathering of responsible entrepreneurs and leaders from around New Mexico in Santa Fe.
  - June 30, 2026 - $22,500
    - Final report to include report on overall program and gathering of responsible entrepreneurship leaders in Santa Fe.

The total possible compensation excluding GRT is $275,000 and total possible GRT (at 8.1875%) is $22,515.63. The total compensation under this Contract shall not exceed two hundred ninety-seven thousand five hundred fifteen dollars and sixty-three cents ($297,515.63) including GRT.

4. **Payment Provisions**

All payments under this Contract are subject to the following provisions.

A. Acceptance - In accordance with NMSA 1978, Section 13-1-158 the City shall determine if the product or services provided meet specifications. Until the products or services have

been accepted in writing by the City, the City shall not pay for any products or services. Unless otherwise agreed upon between the City and the Contractor, within thirty (30) days from the date the City receives written notice from the Contractor that payment is requested for services or within thirty (30) days from the receipt of products, the City shall issue a written certification (by letter or email) of complete or partial acceptance or rejection of the products or services. Unless the City gives notice of rejection within the specified period, the products or services will be deemed to have been accepted.

B. Payment of Invoice - Upon acceptance that the products or services have been received and accepted, payment shall be tendered to the Contractor within thirty (30) days after the date of certification. After the thirtieth day from the date that written certification of acceptance is issued, late payment charges shall be paid on the unpaid balance due on the contract to the Contractor at the rate of 1.5 % per month. Contractor may submit invoices for payment no more frequently than monthly. Payment will be made to the Contractor's designated mailing address. Payment on each invoice shall be due within 30 days from the date of the acceptance of the invoice. The City agrees to pay in full the balance shown on each account's statement, by the due date shown on said statement.

5. **Term**

THIS CONTRACT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This contract shall terminate **three (3) years from date of final signature.**

6. **Default and Force Majeure**

The City reserves the right to cancel all, or any part of any orders placed under this contract without cost to the City, if the Contractor fails to meet the provisions of this contract and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of sub-contractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the sub-contractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this paragraph shall not be exclusive and are in addition to any other rights now being provided by law or under this contract.

7. **Termination**

A. Grounds. The City may terminate this Contract for convenience or cause. For contracts within their authority, the City Manager or their designee is authorized to provide the notice of termination, otherwise such notice of termination shall be provided by the Mayor, or their designee as authorized by the Governing Body. The Contractor may only terminate this Contract based upon the City's uncured, material breach of this Contract.

B. Notice: City Opportunity to Cure.

1) Except as otherwise provided in Paragraphs 7.A and 17, the City shall give the Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Contract upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Contract may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Contract, the Contractor is suspended or debarred by the City; or (iii) the Contract is terminated pursuant to Paragraph 17, "Appropriations", of this Contract.

C. Liability. Except as otherwise expressly allowed or provided under this Contract, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Contract. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS CONTRACT.*

8. **Amendment**

A. This Contract shall not be altered, changed, or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Contract to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Contract, pursuant to the termination provisions as set forth in Paragraph 7 herein, or to agree to the reduced funding.

9. **Status of Contractor**

The Contractor, and Contractor's agents and employees, are independent Contractors for the City and are not employees of the City. The Contractor, and Contractor's agents and employees, shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City because of this Contract. The Contractor acknowledges that all sums received hereunder are personally reportable by the Contractor for income tax purposes, including without limitation, self-employment tax and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has written authority to do so, and then only within the strict limits of that authority.

10. **Assignment**

The Contractor shall not assign or transfer any interest in this Contract or assign any claims for money due or to become due under this Contract without the prior written approval of the City.

11. **Subcontracting**

The Contractor shall not subcontract any portion of the services to be performed under this Contract without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Contract, nor shall any subcontract obligate direct payment from the City.

12. **Non-Collusion**

In signing this Contract, the Contractor certifies the Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City.

13. **Inspection of Plant**

The City may inspect, at any reasonable time during Contractor's regular business hours and upon prior written notice, the Contractor's plant or place of business, or any subcontractor's plant or place of business, which is related to the performance of this contract.

14. **Commercial Warranty**

The Contractor agrees that the tangible personal property or services furnished under this Contract shall be covered by the most favorable commercial warranties the Contractor gives to any customer for such tangible personal property or services, and that the rights and remedies provided herein shall extend to the City and are in addition to and do not limit any rights afforded to the City by any other clause of this order. The contractor agrees not to disclaim warranties of fitness for a particular purpose or merchantability.

15. **Condition of Proposed Items**

Where tangible personal property is a part of this Contract, all proposed items are to be NEW and of most current production, unless otherwise specified.

16. **Records and Audit**

During the term of this Contract and for three years thereafter, the Contractor shall maintain detailed records pertaining to the services rendered and products delivered. These records shall be subject to inspection by the City, the State Auditor and other appropriate state and federal authorities. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive or illegal payments.

17. **Appropriations**

The terms of this Contract, and any orders placed under it, are contingent upon sufficient appropriations and authorization being made by the Governing Body for the performance of this Contract. If sufficient appropriations and authorization are not made by the legislature, this Contract, and any orders placed under it, shall terminate upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Contract to unilaterally reduce funding, the Contractor shall have the option to terminate the Contract or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

18. **Release**

The Contractor, upon final payment of the amount due under this Contract, releases the City, its officers, and employees, from all liabilities, claims and obligations whatsoever arising from or under this Contract. The Contractor agrees not to purport to bind the City, unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

19. **Confidentiality**

Any confidential information provided to or developed by the Contractor in the performance of this Contract shall be kept confidential and shall not be made available to any individual or organization by the Contractor without prior written approval by the City.

20. **Conflict of Interest**

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Contract, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Contract. The Contractor shall comply with any applicable provisions of the New Mexico Governmental Conduct Act and the New Mexico Financial Disclosures Act.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Contract, will continue to comply with, and that this Contract complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Paragraph are material representations of fact upon which the City relied when this Contract was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Contract to the contrary, the City may immediately terminate the Contract.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

21. **Approval of Contractor Representative(s)**

The City reserves the right to require a change in Contractor representative(s) if the assigned representative(s) are not, in the opinion of the City, adequately serving the needs of the City.

22. **Scope of Contract; Merger**

This Contract incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements, and memorandum of understandings have been merged into this written contract.

23. **Notice**

The Procurement Code, NMSA 1978, Sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for bribes, gratuities, and kickbacks.

24. **Equal Opportunity Compliance**

The Contractor agrees to abide by all federal and state laws, and local Ordinances, pertaining to equal employment opportunity. In accordance with all such laws, rules, and regulations, the Contractor agrees to assure that no person in the United States shall on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Contract. If Contractor is found not to be in compliance with these requirements during the life of this Contract, Contractor agrees to take appropriate steps to correct these deficiencies.

25 **New Mexico Tort Claims Act**

Any liability incurred by the City of Santa Fe in connection with this Contract is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Contract modifies or waives any provision of the New Mexico Tort Claims Act.

26. **Applicable Law**

The laws of the State of New Mexico shall govern this Contract, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, Section 38-3-2. By execution of this Contract, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Contract.

27. **Limitation of Liability**

The Contractor's liability to the City, for any cause whatsoever shall be limited to the purchase price paid to the Contractor for the products and services that are the subject of the City's, claim. The foregoing limitation does not apply to paragraph 25 of this Contract or to damages resulting from personal injury caused by the Contractor's negligence.

28. **Incorporation by Reference and Precedence**

If this Contract has been procured pursuant to a request for proposals, this Contract is derived from (1) the request for proposal, (including any written clarifications to the request for proposals and any City response to questions); (2) the Contractor's best and final offer; and (3) the Contractor's response to the request for proposals.

In the event of a dispute under this Contract, applicable documents will be referred to for the purpose of clarification or for additional detail in the following order of precedence: (1) amendments to the Contract in reverse chronological order; (2) the Contract, including the scope of work and all terms and conditions thereof; (3) the request for proposals, including attachments thereto and written responses to questions and written clarifications; (4) the Contractor's best and final offer if such has been made and accepted by the City; and (5) the Contractor's response to the request for proposals.

29. **Workers' Compensation**

The Contractor agrees to comply with state laws and rules applicable to workers' compensation benefits for its employees. If the Contractor fails to comply with the Workers' Compensation Act and applicable rules when required to do so, this Contract may be terminated by the City.

30. **Inspection**

If this contract is for the purchase of tangible personal property (goods), final inspection and acceptance shall be made at Destination. Tangible personal property rejected at Destination for non-conformance to specifications shall be removed at Contractor's risk and expense promptly after notice of rejection and shall not be allowable as billable items for payment.

31. **Inspection of Services**

If this contract is for the purchase of services, the following terms shall apply.

A. Services, as used in this Article, include services performed, workmanship, and material furnished or utilized in the performance of services.

B. The Contractor shall provide and maintain an inspection system acceptable to the City covering the services under this Contract. Complete records of all inspection work performed by the Contractor shall be maintained and made available to the City and for as long thereafter as the Contract requires. The City has the right to inspect and test all services contemplated under this Contract to the extent practicable at all times and places during the term of the Contract. The City shall perform inspections and tests in a manner that will not unduly delay or interfere with Contractor's performance.

C. If the City performs inspections or tests on the premises of the Contractor or a subcontractor, the Contractor shall furnish, and shall require subcontractors to furnish, at no increase in contract price, all reasonable facilities and assistance for the safe and convenient performance of such inspections or tests.

D. If any part of the services do not conform with the requirements of this Contract, the City may require the Contractor to re-perform the services in conformity with the requirements of this Contract at no increase in contract amount. When the defects in services cannot be corrected by re-performance, the City may:

(1) require the Contractor to take necessary action(s) to ensure that future performance conforms to the requirements of this Contract; and

(2) reduce the contract price to reflect the reduced value of the services performed.

E. If the Contractor fails to promptly re-perform the services or to take the necessary action(s) to ensure future performance in conformity with the requirements of this Contract, the City may:

(1) by contract or otherwise, perform the services and charge to the Contractor any cost incurred by the City that is directly related to the performance of such service; or

(2) terminate the contract for default.

32. **Insurance**

If the services contemplated under this Contract will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Contract, the following insurance coverage(s), naming the City as additional insured.

A. Commercial General Liability insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. Broader Coverage and Limits. The insurance requirements under this Contract shall be the greater of (1) the minimum coverage and limits specified in this Contract, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor hereunder.

C. Contractor shall maintain the above insurance for the term of this Contract and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

33. **Impracticality of Performance**

A party shall be excused from performance under this Contract for any period that the party is prevented from performing as a result of an act of God, strike, war, civil disturbance, epidemic, or court order, provided that the party has prudently and promptly acted to take any and all steps that are within the party's control to ensure performance. Subject to this provision, such non-performance shall not be deemed a default or a ground for termination.

34. **Invalid Term or Condition**

If any term or condition of this Contract shall be held invalid or unenforceable, the remainder of this Contract shall not be affected and shall be valid and enforceable.

35. **Enforcement of Contract**

A party's failure to require strict performance of any provision of this Contract shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Contract shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

36. **Patent, Copyright and Trade Secret Indemnification**

A. The Contractor shall defend, at its own expense, the City against any claim that any product or service provided under this Contract infringes any patent, copyright to trademark in the United States or Puerto Rico, and shall pay all costs, damages and attorneys' fees that a court finally awards as a result of any such claim. In addition, if any third party obtains a judgment against the City based upon Contractor's trade secret infringement relating to any product or services provided under this Contract, the Contractor agrees to reimburse the City for all costs, attorneys' fees and amount of the judgment. To qualify for such defense and or payment, the City shall:

1) give the Contractor prompt written notice within 48 hours of any claim;
2) allow the Contractor to control the defense of settlement of the claim; and
3) cooperate with the Contractor in a reasonable way to facilitate the defense or settlement of the claim.

B. If any product or service becomes, or in the Contractor's opinion is likely to become the subject of a claim of infringement, the Contractor shall at its option and expense:

1) provide the City the right to continue using the product or service and fully indemnify the City against all claims that may arise out of the City's use of the product or service;
2) replace or modify the product or service so that it becomes non-infringing; or,
3) accept the return of the product or service and refund an amount equal to the value of the returned product or service, less the unpaid portion of the purchase price and any other amounts, which are due to the Contractor. The Contractor's obligation will be void as to any product or service modified by the City to the extent such modification is the cause of the claim.

37. **Survival**

The Contract paragraphs titled "Patent, Copyright, Trademark, and Trade Secret Indemnification; Indemnification; and Limit of Liability" shall survive the expiration of this Contract. Software licenses, leases, maintenance and any other unexpired Agreements that were entered into under the terms and conditions of this Contract shall survive this Contract.

38. **Disclosure Regarding Responsibility**

A. Any prospective Contractor and any of its Principals who enter into a contract greater than sixty thousand dollars ($60,000.00) with any City for professional services, tangible personal property, services or construction agrees to disclose whether the Contractor, or any principal of the Contractor's company is presently debarred, suspended, proposed for debarment, or declared ineligible for award of contract by any federal entity, state agency or local public body.

B. Principal, for the purpose of this disclosure, means an officer, director, owner, partner, or a person having primary management or supervisory responsibilities within a business entity or related entities.

C. The Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, the Contractor learns that the Contractor's disclosure was at any time erroneous or became erroneous by reason of changed circumstances.

D. A disclosure that any of the items in this requirement exist will not necessarily result in termination of this Contract. However, the disclosure will be considered in the determination of the Contractor's responsibility and ability to perform under this Contract. Failure of the Contractor to furnish a

disclosure or provide additional information as requested will be grounds for immediate termination of this Contract pursuant to the conditions set forth in Paragraph 7 of this Contract.

E. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the disclosure required by this document. The knowledge and information of a Contractor is not required to exceed that which is the normally possessed by a prudent person in the ordinary course of business dealings.

F. The disclosure requirement provided is a material representation of fact upon which reliance was placed when making an award and is a continuing material representation of the facts during the term of this Contract. If during the performance of the contract, the Contractor is indicted for or otherwise criminally or civilly charged by any government entity (federal, state or local) with commission of any offenses named in this document the Contractor must provide immediate written notice to the City. If it is later determined that the Contractor knowingly rendered an erroneous disclosure, in addition to other remedies available to the Government, the City may terminate the involved contract for cause. Still further the City may suspend or debar the Contractor from eligibility for future solicitations until such time as the matter is resolved to the satisfaction of the City.

39. **Suspension, Delay or Interruption of Work**

The City may, without cause, order the Contractor, in writing, to suspend, delay or interrupt the work in whole or in part for such period of time as the City may determine. The contract sum and contract time shall be adjusted for increases in cost and/or time associated with Contractor's compliance therewith. Upon receipt of such notice, Contractor shall leave the jobsite and any equipment in a safe condition prior to departing. Contractor must assert rights to additional compensation within thirty (30) days after suspension of work is lifted and return to work is authorized. Any compensation requested for which entitlement is granted and the contract sum adjusted, shall have profit included (for work completed) and for cost only (not profit) for Contractor costs incurred directly tied to the suspension itself and not otherwise covered by Contract remedy. Any change in Total Compensation must be reflected in an Amendment executed pursuant to Section 8 of this Contract.

40. **Notification**

Either party may give written notice to the other party in accordance with the terms of this Paragraph. Any written notice required or permitted to be given hereunder shall be deemed to have been given on the date of delivery if delivered by personal service or hand delivery or three (3) business days after being mailed.

To the City: Eric Renz-Whitmore, 123 E. Marcy Suite 205, Santa Fe, NM, 87501; edrenzwhitmore@santafenm.gov

To the Contractor: Robert Del Campo, Anderson Corporate & Community Engagement, MSC05 3090, 1 University of New Mexico, Albuquerque, NM, 87131; delcampo@unm.edu

Either party may change its representative or address above by written notice to the other in accordance with the terms of this Paragraph. The carrier for mail delivery and notices shall be the agent of the sender.

41 **Succession**

This Contract shall extend to and be binding upon the successors and assigns of the parties.

IN WITNESS WHEREOF, the Parties have executed this Contract as of the date of the signature by the required approval authorities below.

N. M. S. A. 1978, § 41-4-19

§ 41-4-19. Maximum liability

A. Unless limited by Subsection B of this section, in any action for damages against a governmental entity or a public employee while acting within the scope of the employee's duties as provided in the Tort Claims Act, the liability shall not exceed:

(1) the sum of two hundred thousand dollars ($200,000) for each legally described real property for damage to or destruction of that legally described real property arising out of a single occurrence;

(2) the sum of three hundred thousand dollars ($300,000) for all past and future medical and medically related expenses arising out of a single occurrence; and

(3) the sum of four hundred thousand dollars ($400,000) to any person for any number of claims arising out of a single occurrence for all damages other than real property damage and medical and medically related expenses as permitted under the Tort Claims Act.

B. The total liability for all claims pursuant to Paragraphs (1) and (3) of Subsection A of this section that arise out of a single occurrence shall not exceed seven hundred fifty thousand dollars ($750,000).

Good Morning,

As long as you select the correct remit address on 1073 the DBA will be Anderson School.

Hi again!

I wanted to check on this. Can we get a confirmation that UNM Anderson is covered for vendor registration on this?

Eric

Stephanie,

Thanks for this.

I'm wondering if we could get a memo confirming this approach for the UNM Anderson Center for Responsible Entrepreneurship? We'd include the memo in our packet to address any questions regarding vendor status.

My concern is that UNM Anderson does not appear in the Vendor Lookup menu in Munis (the entities that do are all separate business units). Since it doesn't come up as one of the entities we can do business with, I worry their contract will get kicked back without additional clarification and/or documentation.

Hi…

Wanted to check back on this (I'm checking with UNM on a few things).

Do they still need to do their Vendor Self Service updates? I thought this was taking care of that, but I don't see a new entity in the system (that we can pay). Is there anything else they need to do from your perspective?

Thanks,

Eric

Hello Stephanie,
Thank for looking into it. We appreciate your help getting us set up.

We will be collecting payment through our unrestricted accounting office, as it is the most secure and all transactions are tied to invoices that we generate. Payments should be mailed to the following address.

Unrestricted Acctg - Main
MSC01 1260
1 University of New Mexico
Albuquerque, NM 87131-0001

Thank you again. I will be out of the office tomorrow but can loop back on Monday if anything additional is needed.

Kind regards,
Kiana

[EXTERNAL]

Good Afternoon,

Patrick and I researched this vendor account. Because they are a school we do not add their FID to the file because they have so many departments we pay and only one account can use the FID. They will not have access to their vendor account we will have to make all the changes for them. I am going to update vendor 1073 with a new remit address and a DBA as Anderson School of Management. When creating the payment you will have to select the correct remit address.

Kiana,

Please send us the correct address to be used for the payment and I will update it for you.

Sincerely,

Eric-

We have the certificate of insurance---however we have some issues getting into the portal--it appears that using our tax id number we ARE registered with the City (Regents of the University of New Mexico, technically)---however we need our vendor id in order to align with this opportunity---I emailed the "email for help" address but it bounced back---any assistance would be very much appreciated! Thanks!

Subject: Contract next steps

[EXTERNAL]

Rob,

I hope you're doing well. We believe our contract with you is now in its final steps, including a committee presentation

and appearance at the City of Santa Fe's General Assembly in August.

There are two items we're going to need:

- A copy of UNM's Certificate of Insurance
- Signing up UNM Anderson (CRE) as a vendor to receive funds from the City of Santa Fe

The vendor setup, as I'd mentioned, is a bit of an annoyance but different from the Santa Fe business license you provided. Currently only UNM Continuing Education, UNM Los Alamos, and STC.UNM are set up in this way. The instructions for getting the appropriate unit signed up are at: https://santafenm.gov/VSS_Registration_Process_%282%29.pdf and I'm happy to help someone walk through it.

CITY OF SANTA FE

Date: October 7, 2024

To: Mayor Alan Webber and Governing Body
Finance Committee
Quality of Life Committee

Via: Brian Moya, Fire Chief

From: Daniel Garcia, Fleet Section Manager

Subject: Purchase of BME Type 3; Model 34 Commercial Wildland Vehicle

Vendor Name: Siddons Fire Apparatus

Vendor Number: 3592

ITEM AND ISSUE:
Santa Fe Fire Department respectfully requests your review and approval of the purchase request of a BME, Type 3; Model 34 Commercial Wildland Vehicle in the total amount of $486,350.00 – not to exceed for the prevention of Urban Interface Wildland Fires and provide more availability of units for a quicker response. (Siddons Fire Apparatus / Fire Department); (Daniel Garcia, Fire Fleet Manager, dagarcia@santafenm.gov, and (505) 231-8561; Brain Moya, Fire Chief, bjmoya@santafenm.gov, and (505) 955-3111.)

Action Requested: **Approval of purchase**

BACKGROUND AND SUMMARY:
The purchase of a BME Type 3; Model 34 Commercial Wildland Vehicle is essential for the prevention and mitigation of urban interface wildland fires, as well as to enhance the availability of units for faster response times. This Type 3 Wildland Fire Engine Pumper is specifically designed to navigate challenging environments that our main engines may not be able to access, such as narrow roads or mountainous terrain. By acquiring this unit, we will increase our department's capacity to respond to wildland fire threats in areas with restricted access, ensuring better protection for all districts within the city.

PROCUREMENT METHOD:
Small Purchase utilizing Cooperative Agreement.

The procurement method is the Cooperative Agreement HGACBuy #FS12-23 which expires on November 30, 2027.

FIRE TRUCKS

3892 STOCK UNIT
MODEL 34 "TARGHEE"

07/03/24

DETERMINATION OF APPARATUS WEIGHT

BME Fire Trucks, LLC. shall submit estimated "in-service" weight analysis required by applicable NFPA standards. This Excel computer weight analysis shall break down all major components of the apparatus and shall show the impact on percentage-of-load on the front and rear axles, total weight, and weight on each tire set.

The analysis shall evenly distribute the NFPA required minimum payload allowance or estimated equipment payload as provided by the purchaser into the specified compartments. The allowance for personnel, hose loads, water and foam fluids, and required NFPA equipment shall be outlined individually in the analysis and placed on the apparatus in its specific intended position.

CENTER-OF-GRAVITY ANALYSIS

BME Fire Trucks, LLC. shall perform an estimated center of gravity calculation as required by the applicable section of NFPA standards. This calculation shall include tilt angles, the estimated right to left load distribution, and load on each axle, including all specified major components.

LOW VOLTAGE TEST REQUIRMENTS

The fire apparatus low voltage electrical system shall be tested as required by this section and the test results shall be certified by the apparatus manufacturer. The certification shall be delivered to the purchaser with the documentation for the completed apparatus. The tests shall be performed when the air temperature is between 0 degrees Fahrenheit and 110 degrees Fahrenheit.

TEST SEQUENCE

The three tests defined below shall be performed in the order in which they appear. Before each test, the chassis batteries shall be fully charged until the voltage stabilizes at the voltage regulator set point and the lowest charge current is maintained for 10 minutes. The failure of any of these tests shall require a repeat of the test sequence.

RESERVE CAPACITY TEST

The chassis engine shall be started and kept running until the chassis engine and engine compartment temperatures are stabilized at normal operating temperatures and the chassis battery system is fully charged. The chassis engine shall be shut off and the minimum continuous electrical load shall be applied for 10 minutes. All electrical loads shall be turned off prior to attempting to restart the chassis engine. The chassis battery system shall then be capable of restarting the chassis engine. The failure to restart the chassis engine shall be considered a failure of this test.

ALTERNATOR PERFORMANCE TEST AT IDLE

The minimum continuous electrical load shall be applied with the chassis engine running at idle speed. The chassis engine temperature shall be stabilized at normal operating temperature. The chassis battery system shall be tested to detect the presence of a chassis battery current discharge. The detection of chassis battery current discharge shall be considered a failure of this test.

ALTERNATOR PERFORMANCE TEST AT FULL LOAD

The total continuous electrical load shall be applied with the chassis engine running up to the engine manufacturer's governed speed. The test duration shall be a minimum of two hours. The activation of the electrical system load management system shall be permitted during this test. The activation of an alarm due to excessive chassis battery discharge, as detected by the system required by NFPA (current edition), or an electrical system voltage of less than 11.8 volts direct current for a 12 volt direct current nominal system, for more than 120 seconds, shall be considered a failure of this test.

LOW VOLTAGE ALARM TEST

Following the completion of the tests described above, the chassis engine shall be turned off. With the chassis engine turned off, the total continuous electrical load shall be applied and shall continue to be applied until the excessive battery discharge alarm activates. The chassis battery voltage shall be measured at the battery terminals.

The test shall be considered to be a failure if the low voltage alarm has not yet sounded 140 seconds after the voltage drops to 11.70 volts direct current for a 12 volt direct current nominal system. The chassis battery system shall then be able to restart the chassis engine. The failure of the chassis battery system to restart the chassis engine shall be considered a failure of this test.

The completed fire apparatus shall undergo a complete 12 volt electrical load and performance testing per applicable sections of NFPA standards with inspection and test sheets included in delivery documentation.

DOCUMENTATION

The apparatus manufacturer shall provide the results of the low-voltage electrical system performance test, certified in writing, with the documentation provided to the purchaser at the time of delivery of the completed apparatus.

The test results shall consist of the following documents:

(1) Documentation of the electrical system performance tests.
(2) A written electrical load analysis, including the following:

- (a) The nameplate rating of the alternator.
- (b) The alternator rating under the conditions specified in NFPA 1906 (current edition).

- (c) Each of the component loads specified that make up the minimum continuous electrical load.
- (d) Additional electrical loads that, when added to the minimum continuous electrical load, determine the total continuous electrical load.
- (e) Each individual intermittent electrical load.

TEST RESULTS

BME Fire Trucks LLC. shall provide results of the apparatus testing and shall certify the following:

The weight of the completed apparatus, when loaded to its estimated in service weight, does not exceed the GVWR and GAWR of the chassis.

The complete unit, when loaded to its estimated in service weight, meets the weight distribution and vehicle stability requirements, as defined in the current NFPA guidelines.

The unit meets all required federal standards pertaining to the manufacturer and completion of the apparatus and a label tag has been affixed to the apparatus by the manufacturer stating same.

BME Fire Trucks LLC. shall provide all testing results, including engine, speed, acceleration, road ability, braking, and auxiliary braking to the Purchaser at the time of delivery.

DELIVERY REQUIREMENTS

The bidder shall not be responsible for delays in delivery due to strikes, acts of God, failure of suppliers to deliver, chassis shortage and other reasons beyond the reasonable control of the builder. Should BME Fire Trucks, LLC. be unable to comply with the proposed delivery date, we shall immediately contact the purchaser regarding delay information and actions to be taken by the company.

This vehicle shall be F.O.B. the BME Fire Trucks facility in Boise Idaho. Dealer shall be responsible for arrangement of delivery from factory.

GENERAL WARRANTY PROVISIONS

All materials and workmanship herein specified, including all equipment furnished, shall be guaranteed for a period of one (1) year after the acceptance date of the apparatus, unless otherwise noted, with the exception of any normal maintenance services or adjustments which shall be required. Under this warranty, BME Fire Trucks, LLC. shall be responsible for the costs of repairs to the apparatus that have been caused by defective workmanship or materials during this period.
This warranty shall not apply to the following:

- Any component parts or trade accessories such as chassis, engines, tires, pumps, valves, signaling devices, batteries, electric lights, bulbs, alternators, and all other installed equipment and accessories, in as much as they are usually warranted separately by their respective manufacturers, or are subject to

normal wear and tear.

- Failures resulting from the apparatus being operated in a manner or for a purpose not recommended by the apparatus manufacturer.
- Loss of time or use of the apparatus, inconvenience or other incidental expenses.
- Any apparatus which has been repaired or altered without written consent or outside of the apparatus manufacturer's factory and or authorized service center in any way that affects its stability, or which has been subject to misuse, negligence, or accident.
- Delivery of the apparatus to repair site.

DISCLAIMER

NO WARRANTIES ARE GIVEN BEYOND THOSE DESCRIBED HEREIN. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. THE COMPANY SPECIFICALLY DISCLAIMS WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OTHER REPRESENTATIONS TO THE USER/PURCHASER AND ALL OTHER OBLIGATIONS OR LIABILITIES. FURTHER, THE COMPANY EXCLUDES LIABILITY FOR CONSEQUENTIAL AND INCIDENTAL DAMAGES, ON THE PART OF THE COMPANY OR SELLER. No person is authorized to give any other warranties or to assume any liabilities on the Company's behalf unless made or assumed in writing by the seller; and no other person is authorized to give any warranties or to assume any liabilities on the seller's behalf unless made or assumed in writing by the seller.

OBTAINING SERVICE

Return the vehicle to any BME Fire Trucks, LLC. dealer/authorized service center; Return the vehicle to BME Fire Trucks, LLC. or contact BME Fire Trucks, LLC.. BME Fire Trucks, LLC. shall be solely responsible for determining the extent of repair under the terms of the warranty. Transportation costs shall be the responsibility of the purchaser.

MATERIAL AND WORKMANSHIP

All equipment provided shall be guaranteed to be new and of current manufacture, and unless specified otherwise, shall meet all requirements of these specifications and prevailing NFPA documents and be in condition at time of delivery for use as specified for this type of apparatus.

All workmanship shall be of the highest quality and accomplished in a professional manner so as to insure a functional apparatus with a high quality aesthetic appearance.

The construction shall be rugged and ample safety factors shall be provided to carry the loads specified to meet both on and off road requirements.

The apparatus shall be designed and the equipment mounted with due consideration to the distribution of load between the front and rear axles, so all specified equipment, with a full complement of personnel, can be carried without damage to the apparatus.

BODY AND STRUCTURAL WARRANTY

BME Fire Trucks, LLC. shall warrant each new apparatus body, if used in a normal and reasonable manner, against structural defects caused by defects in material, design or workmanship for a period of ten (10) years, covering parts & labor to the original purchaser which shall start on day of acceptance.

This warranty shall not apply to:

- Normal maintenance services or adjustments
- To any vehicle which will have been repaired or altered outside of our factory in any way so as, in the judgment of BME Fire Trucks, LLC., to affect it's stability, nor which has been subject to misuse, negligence, or accident, nor to any vehicle made by us which will have been operated to a speed exceeding the factory rated speed, or loaded beyond the factory rated load capacity.
- Commercial chassis and associated equipment furnished with chassis, signaling devices, generators, batteries, or other trade accessories as they are usually warranted separately by their respective manufacturers.
- Shipping costs of parts or apparatus for purposes of repair or replacement of parts. This warranty is in lieu of all other warranties, expressed or implied. All other representations as to the original purchaser and all other obligations or liabilities, including for incidental or consequential damage on the company's behalf unless made in writing by the company.

DARLEY FIRE PUMP WARRANTY

A three (3) year warranty on the Darley fire pump shall be provided. The provisions of this warranty shall be described in the completed apparatus documentation.

PLUMBING WARRANTY

The stainless steel fire pump plumbing shall carry a ten (10) year parts and labor warranty against defects in workmanship and perforation corrosion.

AKRON VALVE WARRANTY

The Akron valves shall carry a ten (10) year parts and labor manufacturer's warranty. Provisions of this warranty shall be provided with the completed apparatus documentation.

FOAM TANK WARRANTY

The foam tank shall carry a "lifetime" warranty against defects in workmanship and perforation corrosion. The provisions of this warranty shall be provided in the delivery documentation. The tank manufacturer shall repair, at no cost to the purchaser, any problems caused by defective materials and/or workmanship. The warranty shall cover the reasonable costs of removing the water tank from the apparatus and reinstalling it after the completion of the covered warranty repairs, but shall not cover any liability for the loss of service or downtime costs of the apparatus.

WATER TANK WARRANTY

The polypropylene water tank that is specified to be supplied with this apparatus shall be warranted by the water tank manufacturer for a "lifetime" period from the date that the apparatus is put into service. The tank manufacturer shall repair, at no cost to the purchaser, any problems caused by defective materials and/or workmanship. The warranty shall cover the reasonable costs of removing the water tank from the apparatus and reinstalling it after the completion of the covered warranty repairs, but shall not cover any liability for the loss of service or downtime costs of the apparatus.

PAINT WARRANTY

BME Fire Trucks, LLC. shall provide a seven (7) year paint warranty which shall cover peeling and/or de-lamination of the top coat and other layers of paint, cracking or checking, loss of gloss caused by cracking, checking or chalking, and any paint failure caused by defective paint materials covered by the paint manufacturer's material warranty.

CHASSIS WARRANTY

The specified chassis shall be provided with the chassis manufacturer's warranty. The exact provisions of this warranty shall be supplied with the completed apparatus documentation.

APPARATUS OPERATION MANUAL(S)

BME Fire Trucks, LLC. shall provide (2) electronic apparatus operational manual(s) on a USB thumb drive.

CHASSIS SPECIFICATION

Vehicle configuration

M2 106 plus conventional chassis

2024 model year specified

Set back axle - truck

Straight truck provision, non-towing

Lh primary steering location

General service

Truck configuration

Domiciled, usa 50 states (including california and carb opt-in states)

Fire service

Emergency vehicles business segment

Liquid bulk commodity

Terrain/duty: 10% (some) of the time, in transit, is spent on non-paved roads

Maximum 8% expected grade

Maintained gravel or crushed rock - most severe in-transit (between sites) road surface

Medium truck warranty

Expected front axle(s) load : 14000.0 lbs

Expected rear drive axle(s) load : 25000.0 lbs

Expected gross vehicle weight capacity : 39000.0 lbs

Engine

Cum l9 360ev hp @ 2200 rpm, 2200 gov rpm, 1150 lb-ft @ 1200 rpm, r/f/e

Engine equipment

2010 epa/carb/ghg21 configuration

2008 carb emission cert - clean idle (w/6x4 inch label shipped loose w/installation instructions) installed by final stage mfr on driver door or lh side hood

Oil pan for awd and awd conversions

Engine mounted oil check and fill

Side of hood air intake with nfpa compliant ember screen and fire retardant donaldson air cleaner

Ln 12v 320 amp 4962pgh pad mount alternator

(3) dtna genuine, flooded starting, min 2850cca, 525rc, threaded stud batteries

Standard battery jumpers

Wire ground return for battery cables with additional frame ground return

Non-polished battery box cover

Positive load disconnect with cab mounted control switch with locking provision mounted outboard driver seat

Cummins turbocharged 18.7 cfm air compressor with internal safety valve

Standard mechanical air compressor governor

Air compressor discharge line

Gvg, fire and emergency service vehicles engine warning

C-brake by jacobs with high med low brake with brake lamps

Rh outboard under step mounted horizontal aftertreatment system assembly with rh horizontal tailpipe

Engine aftertreatment device, automatic over the road active regeneration and virtual regeneration request switch in cluster and dash mounted inhibit switch

Standard exhaust system length

Rh standard horizontal tailpipe

6 gallon diesel exhaust fluid tank

100 percent diesel exhaust fluid fill

Lh under cab diesel exhaust fluid tank

Inboard mounted diesel exhaust fluid pump with above rail routing for 6 gallon diesel exhaust fluid tank, cummins engines

Standard diesel exhaust fluid tank cap

Horton 2-speed drivemaster advantage polarextreme fan drive

Automatic fan control with dash switch and indicator light, non engine mounted

Cummins spin on fuel filter

Combination full flow/bypass oil filter

1100 square inch aluminum radiator

Antifreeze to -60f, ethylene glycol pre-charged sca heavy duty coolant

Gates blue stripe coolant hoses or equivalent

Constant tension hose clamps for coolant hoses

Auxiliary engine cooling using water from fire pump

Aluminum flywheel housing

Electric grid air intake warmer

Delco 12v 39mt hd/ocp starter with thermal protection and integrated magnetic switch

Transmission

Allison 3000 evs automatic transmission with pto provision

Transmission equipment

Allison vocational package 265 - available on 3000/4000 product families with vocational model evs

Allison vocational rating for fire truck/emergency vehicle applications available with all product families

Primary mode gears, lowest gear 1, start gear 1, highest gear 6, available for 3000/4000 product families only

Secondary mode gears, lowest gear 1, start gear 1, highest gear 6, available for 3000/4000 product families only

Primary shift schedule recommended by dtna and allison, this defined by engine and vocational usage

Secondary shift schedule recommended by dtna and allison, this defined by engine and vocational usage

Primary shift speed recommended by dtna and allison, this defined by engine and vocational usage

Secondary shift speed recommended by dtna and allison, this defined by engine and vocational usage

Engine brake range preselect recommended by dtna and allison, this defined by engine and vocational usage

Engine brake range alternate preselect recommended by dtna and allison, this defined by engine and vocational usage

Fuel sense 2.0 disabled - performance - table based

Driver switch input - default - no switches

Electronic transmission wiring to customer interface connector

Customer installed chelsea 280 series pto

Pto mounting, lh side of main transmission allison

Magnetic plugs, engine drain, transmission drain, axle(s) fill and drain

Push button electronic shift control, dash mounted

Transmission prognostics - enabled 2013

Water to oil transmission cooler, in radiator end tank

Meritor mtc-4210 and mtc-4213 transfer case oil cooler

Transmission oil check and fill with electronic oil level check

Meritor mtc 4210xl-ec 2-speed transfer case

Transfer case shift controls in dash

Synthetic transmission fluid (tes-295 compliant)

Front axle and equipment

Mx-14-120-evo 14,000# 1790mm kpi single front drive axle

4.88 front axle ratio

Mxl 16t meritor extended lube front steering axle driveline with half round yokes

Meritor 16.5x5 q+ mx drive axle cast spider heavy duty cam front brakes

Fire and emergency severe service, non-asbestos front lining

Meritor cast iron front brake drums

Front brake dust shields

Front oil seals

Standard spindle nuts for all axles

Meritor automatic front slack adjusters

Trw tas-85 power steering

Power steering pump

2 quart see through power steering reservoir

Current available synthetic 75w-90 front axle lube

Front suspension

14,600# taperleaf front suspension

Maintenance free rubber bushings - front suspension

Front shock absorbers

Rear axle and equipment

Rs-25-160 27,000# r-series fire/emergency service single rear axle

4.89 rear axle ratio

Iron rear axle carrier with standard axle housing

Mxl 17t meritor extended lube main driveline with half round yokes

Mxl 17t meritor extended lube intertransmission driveline with half round yokes

Driver controlled traction differential - single rear axle

(1) driver controlled differential lock rear valve for single drive axle

Indicator light for each differential lockout switch, engage at speeds 5 mph or less, disengage w/ign off or speeds exceeding 25 mph

Meritor 16.5x7 p cast spider cam rear brakes, double anchor, cast shoes

Fire and emergency severe service non-asbestos rear brake lining

Brake cams and chambers on forward side of drive axle(s)

Webb heavy weight cast iron rear brake drums

Rear oil seals

Wabco tristop d longstroke 1-drive axle spring parking chambers

Haldex automatic rear slack adjusters

Current available synthetic 75w-90 rear axle lube

Rear suspension

27,000# flat leaf spring rear suspension with helper and radius rod for fire/emergency service

Spring suspension - no axle spacers

Standard axle seats in axle clamp group

Fore/aft control rods

Brake system

Air brake package

Wabco 4s/4m abs with traction control

Reinforced nylon, fabric braid and wire braid chassis air lines

Fiber braid parking brake hose

Standard brake system valves

Standard air system pressure protection and 85 psi pressure protection for air horn(s)

Std u.s. Front brake valve

Relay valve with 5-8 psi crack pressure, no rear proportioning valve

Bw ad-9si brake line air dryer with heater

Air dryer mounted outboard on lh rail

Steel air brake reservoirs mounted inside rail; customer accepts tanks mounted in rear overhang/rear suspension mount over rear axle only, if additional tanks are required mount in overhang

Pull cable on wet tank, petcock drain valves on all other air tanks

Wheelbase & frame

4500mm (177 inch) wheelbase

11/32x3-1/2x10-15/16 inch steel frame (8.73mmx277.8mm/0.344x10.94 inch) 120ksi

1600mm (63 inch) rear frame overhang

Frame overhang range: 61 inch to 70 inch

8 inch bolt on front frame extension

Calc'd back of cab to rear susp c/l (ca): 64.37 in

Calculated effective back of cab to rear suspension c/l (ca): 59.87 in

Calc'd frame length - overall : 269.55 in

Calculated frame space lh side : 41.3 in

Calculated frame space rh side : 10.27 in

Square end of frame

Front closing crossmember

Standard weight engine crossmember

Standard crossmember back of transmission

Standard midship #1 crossmember(s)

Standard rearmost crossmember

Standard suspension crossmember

Chassis equipment

Fender and front of hood mounted front mudflaps

Grade 8 threaded hex headed frame fasteners

D15-28195-000 center punch to mark centerline of rear suspension on top flange of frame

Fuel tanks

70 gallon/264 liter aluminum fuel tank - lh

23 inch diameter fuel tank(s)

Plain aluminum fuel tank

Fuel tank(s) forward

Chrome fuel tank cap(s)

Detroit fuel/water separator with water in fuel sensor and 12 volt preheater

Equiflo inboard fuel system

Auxiliary fuel supply and return ports located on lh fuel tank

High temperature reinforced nylon fuel line

Tires

Michelin xdn2 12r22.5 16 ply radial front tires

Michelin xdn2 12r22.5 16 ply radial rear tires

Hubs

Meritor iron front hubs

Conmet preset plus premium iron rear hubs

Wheels

Alcoa 8x 22.5x8.25 10-hub pilot 5.81 inset aluminum disc front wheels

Alcoa 8x 22.5x8.25 10-hub pilot aluminum disc rear wheels

Front wheel mounting nuts

Rear wheel mounting nuts

Cab exterior

8154 inch bbc high-roof aluminum conventional crew cab

Air cab mounting

Cab roof reinforcements for roof mounted components

2-1/2 inch fender extensions

Lh and rh exterior grab handles with single rubber insert

Hood mounted chromed plastic grille

Chrome hood mounted air intake grille

Fiberglass hood

Cab floor, toe board and firewall heat shield

Valve and plumbing for customer furnished air horn, piping capped at firewall

Dual electric horns

Rear license plate mount end of frame

Integral headlights with chrome bezels

Aerodynamic marker lights

Daytime running lights

Truck-lite 3 chamber modules with 45 series sealed beam lamps

Standard front turn signal lamps

Dual west coast bright finish heated mirrors

Door mounted mirrors

102 inch equipment width

Lh and rh 8 inch bright finish convex mirrors mounted under primary mirrors

Rh and lh electric powered windows

1-piece solar green glass windsheld

2 gallon windshield washer reservoir with fluid level indicator, frame mounted

Cab interior

Rugged trim package

Gray & carbon vinyl interior "rugged"

Carbon with premium gunmetal accent (rugged)

Molded plastic door panel

Forward roof mounted console

Lh and rh door storage pockets integrated into molded door panels

Digital alarm clock in driver display

M2/sd dash

Heater, defroster and air conditioner

Standard hvac ducting

Main hvac controls with recirculation switch

Standard heater plumbing

Valeo heavy duty a/c refrigerant compressor

Binary control, r-134a

Premium insulation

Solid-state circuit protection and fuses

12v negative ground electrical system

Premium cab lighting

Door locks and ignition switch keyed the same

Lh and rh electric door locks

Lh and rh integral door panel armrests

High visibility orange seat belts with driver indicator light and audible alarm

Adjustable tilt and telescoping steering column

4-spoke 18 inch (450mm) black steering wheel with switches

Seating shall be OEM. Front buckets and rear bench

Driver and passenger interior sun visors

Instruments & controls

Digital panel lamp dimmer switch in driver display

Configurable lower panel with integrated upper storage

Engine remote interface without interlocks

Bright argent finish gauge bezels

Low air pressure indicator light and audible alarm with (1) additional park switch for customer use

(1) single brake application air gauge

Dual needle primary and secondary air pressure gauge

Dash mounted air restriction indicator with graduations

Electronic cruise control with controls on steering wheel spokes

Key operated ignition switch and integral start position; 4 position off/run/start/accessory

Premium instrument cluster with 5.0 inch tft color display

Heavy duty onboard diagnostics interface connector located below lh dash

2 inch electric fuel gauge

Engine remote interface for remote throttle

Quickfit powertrain interface connector under cab with bluntcuts

Quickfit programmable interface connector(s) under cab with bluntcuts

Engine remote interface connector at powertrain interface connector

Electrical engine coolant temperature gauge

2 inch transmission oil temperature gauge

Electronic outside temperature sensor display in driver message center

Engine and trip hour meters integral within driver display

Pto controls for enhanced vehicle electric/electronic architecture

Electric engine oil pressure gauge

No overhead instrument panel

Quickfit programmable interface module + (4) 20 amp fused relays

Am/fm/wb world tuner radio with auxiliary input, j1939

Dash mounted radio

(2) radio speakers in cab

Multi-band am/fm/wb/cb lh mirror mounted antenna system

Standard radio wiring with steering wheel controls

Electronic mph speedometer with secondary kph scale, without odometer

Standard vehicle speed sensor

Electronic 3000 rpm tachometer

Detroit connect platform hardware

Ignition switch controlled engine stop

Digital voltage display integral with driver display

Single electric windshield wiper motor with delay

Rotary headlamp switch, marker lights/headlights switch with pull out for optional fog/road lamps

One valve parking brake system with warning indicator

Self canceling turn signal switch with dimmer, headlamp flash, wash/wipe/intermittent

2 integral electronic turn signal flasher with 40 amp (20 amp per side) trailer lamp capacity

Design

Paint: one solid color

Color

Cab color a: "97902EY" Candy Apple Red

Black, high solids polyurethane chassis paint

CAB SEATING AND WEIGHT ALLOWANCE

A warning label shall be installed in the cab to indicate seating positions.

LABELS, STANDARD PACKAGE SET

A standard set of labels shall be provided and installed on the inside of chassis cab area. The labels shall contain the required information based on the applicable components for the apparatus.

DATA PLAQUE

A data plaque shall be provided and installed on the inside of the driver's door. The data plaque shall contain the required information based on the applicable components for the apparatus:

- Engine oil
- Engine coolant
- Chassis transmission fluid
- Drive axle lubricant
- Power steering fluid
- Pump, generator, or other component lubrications
- Other NFPA applicable fluid levels or data as required
- Paint manufacturer, type, and color number
- Tire Speed Ratings

Location shall be in the driver's compartment or on the driver's door.

DATA PLAQUE

A data plaque shall be provided and installed. The plaque shall contain the following information.

- Pump make and model
- GPM capacity rating
- Truck serial and production number
- Pump performance (specific GPMs at rated pressures with engine RPM)
- Governed engine RPM
- Pump gear ratio

WARNING LABEL -- NO RIDING ON REAR

A warning label stating: "WARNING: DO NOT RIDE ON REAR STEP WHILE VEHICLE IS IN MOTION. DEATH OR SERIOUS INJURY MAY RESULT" shall be installed on the rear of the apparatus. The label shall be applied to the vehicle at the rear step area. The label shall warn personnel that riding in or on these areas, while the vehicle is in motion, is prohibited.

WARNING LABEL -- SEAT BELT USAGE

A warning label, stating: "WARNING CRASH HAZARD OCCUPANTS MUST BE SEATED AND BELTED WHEN VEHICLE IS IN MOTION..." shall be provided in the apparatus cab interior. This label shall be located so that it is visible from all seating positions.

LOUD NOISE WARNING LABEL

A final stage manufacturer shall install "hearing loss" potential warning labels on the vehicle in any areas or fixed equipment that produces excessive noise levels. (Exhaust outlet, sirens and air horns shall not be required for such equipment.)

AIR FILTER EMBER PROTECTION SCREEN WARNING LABEL

A warning label, stating: "THIS VEHICLE HAS AN AIR INTAKE EMBER SCREEN WHICH REQUIRES PERIODIC INSPECTION & CLEANING" shall be provided and installed in the apparatus cab interior.

FRESH AIR EMBER SEPARATOR WARNING LABEL

A warning label, stating: "THIS APPARATUS IS EQUIPPED WITH A CAB FRESH AIR INTAKE EMBER PROTECTION SCREEN. ROUTINE INSPECTION IS REQUIRED." shall be provided and installed in the apparatus cab interior.

WARNING LABEL -- DO NOT WEAR HELMET

A warning label, stating: "CAUTION: DO NOT WEAR HELMET WHILE SEATED" shall be provided in the apparatus cab interior. This label shall be located so that it is visible from all seating positions.

MANUFACTURER LOGO

The apparatus shall include a BME logo plaque which shall be affixed at the rear of the apparatus.

The BME plaque shall feature white reflective material on the outside of the Maltese cross and red reflective material in the middle.

FRONT TOW PLATE

A horizontal full frame width, ¾-inch thick steel plate, center pull, front tow eye shall be furnished and installed through or below the front bumper. The tow eye plate shall be triangle shaped extended 6 inches beyond the front bumper with a 3-inch X 4-inch rectangle tow eye.

The tow eye shall be braced and gusseted to prevent frame rail or bumper damage and bolted to the front frame rail web.

The tow plate shall to be sprayed with black durabak.

FRONT RECEIVER

There shall be one 2" receiver hitch on the front of the apparatus. The receiver shall be mounted off set as to prevent towing use.

REAR RECEIVER

There shall be one 2" receiver hitch on the rear of the apparatus. The receiver shall be mounted off set as to prevent towing use.

REAR BUSTLE

A single, frame mounted, 3-inch X 4-inch diameter, rear towing eye shall be provided. It shall be manufactured from ¾-inch thick steel plate and bolted between the rear frame rail webs with SAE Grade 8 frame bolts and lock nuts.

The tow eye shall be braced and gusseted to prevent damage to the frame rails, bumper or apparatus body while being towed from various angles. Access to the tow eye shall be below the bumper and designed not to interfere with the required angle of departure. The bustle shall be painted job color.

FRONT FRAME EXTENSION

The front frame rails shall be extended 16" ahead of the cab grill or fender area.

BUMPER PLATFORM

The front bumper extended frame rails shall feature an overlay constructed of .125 inch, 5052 grade, aluminum embossed diamond plate which shall offer space for mounting components necessary to the apparatus. The bumper extension shall measure approximately sixteen (16) inches from the cab to the front face of the extension and shall be approximately eight (8) inches in height.

BUMPER

There shall be an International 15 degree bumper installed on the apparatus.

FRONT BUMPER COLOR

The front bumper shall be painted job color.

BUMPER SIDE WINGS

The bumper shall have steel side wings.

FRONT BUMPER WINGS COLOR

The front bumper wings shall be painted job color.

REPLACEMENT FRONT BUMPER

The front bumper on the Freightliner shall be replaced with an International front bumper.

DRIVERS SIDE -- FRONT BUMPER COMPARTMENT

One (1) recessed hose storage compartment shall be installed in the drivers side of the bumper. The compartment shall be constructed of smooth aluminum. The floor of the compartment shall have drain holes provided.

BUMPER COMPARTMENT NYLON HOLD DOWN STRAP

One (1) nylon strap with a buckle shall be installed on the specified front bumper compartment. The nylon strap shall act as a hold down mechanism for the hose in the compartment.

The straps shall be black in color.

BUMPER COMPARTMENT GRATING

The specified bumper compartment shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

CENTER -- FRONT BUMPER COMPARTMENT

One (1) recessed hose storage compartment shall be installed in the center front bumper. The compartment shall be constructed of smooth aluminum. The floor of the compartment shall have drain holes provided.

BUMPER COMPARTMENT DOOR

An aluminum tread plate door shall be installed on the specified front bumper compartment. The non-skid surface door shall have a stainless steel hinge at the rear, latch, and hold open device installed.

The specified door(s) shall have a Polished stainless-steel D-ring door handle.

BUMPER COMPARTMENT GRATING

The specified bumper compartment shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

PASSENGER SIDE -- FRONT BUMPER COMPARTMENT

One (1) recessed hose storage compartment shall be installed in the passenger side of the bumper. The compartment shall be constructed from smooth aluminum. The floor of the compartment shall have drain holes provided.

BUMPER COMPARTMENT NYLON HOLD DOWN STRAP

One (1) nylon strap with a buckle shall be installed on the specified front bumper compartment. The nylon strap shall act as a hold down mechanism for the hose in the compartment.

The straps shall be black in color.

BUMPER COMPARTMENT GRATING

The specified bumper compartment shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

BUMPER DISCHARGE SWIVEL STOPPER

There shall be a swivel elbow stopper installed just behind the front discharge(s).

FRONT BUMPER BEZEL

The center of the front bumper shall feature a bezel, the bezel shall trim out around the front tow plate and front Whelen Micro Pioneer lights and have an BME logo. The BME logo shall have reflective material behind it.

REFLECTIVE BACKGROUND

Part shall feature a Red reflective background.

AIR HORN

One (1) Buell brand, Model #1063 15" air horn shall be provided and mounted on the frame rail of the passenger's side frame, behind the bumper.

AIR HORN FOOT SWITCH

One (1) foot switch shall be provided and installed. The foot switch shall be located on the driver's side of the floor and shall activate the air horn system.

AIR HORN PUSH BUTTON SWITCH

One (1) push button switch shall be provided on the pump panel. The switch shall activate the air horn system.

EXHAUST SYSTEM MODIFICATION

The chassis exhaust system shall be modified to exit on the passenger side of the apparatus ahead of the rear wheel.

EXHAUST HEAT WRAP

The exhaust pipe shall be wrapped with heat wrap from the diesel particulate filter to just shy of the end of the tailpipe.

BUMPER BOX PROTECTIVE FLAP

The protective flap shall be a cut down mud flap installed on the rear edge of the front bumper to eliminate debris from being deposited on the top of the front bumper and in the hose boxes.

REAR MUD FLAPS

The chassis shall be supplied with mud flaps with BME's logo. The mud flaps shall be installed behind the rear wheels.

DRIVER'S SIDE UNDER CAB COMPARTMENT

The apparatus shall be equipped with an enclosed stainless steel compartment located under the crew door on the drivers side of the cab. The compartments clear door opening shall measure approximately 32" wide x 12.5" high x 19.25" deep with a hinged aluminum door and a D-ring style latch.

The doors shall be painted job color.

BRASS BOX SLIDE TRAY

The left under cab compartment shall have these additional items installed, a 10-gauge reinforced plain anodized aluminum sliding drawer-type tray with a 4-inch vertical flange on all sides to be utilized for the storage of nozzles and adapters.

The tray shall utilize the maximum available space within this compartment and have extra heavy duty 500 pound lock-in/lock-out roller glides with stops to prevent it from sliding all the way out and to hold it securely in place when the compartment door is opened or closed.

The brass box tray shall feature adjustable 16 section slotted 4-inch high "egg-crate" divider designed for vertical storage of various nozzles and adapters.

COMPARTMENT LIGHTING

One (1) Code 3 800 Series Corner LED lights shall be installed in the specified compartment(s).

COMPARTMENT LIGHT SWITCHES

Each interior compartment light shall be automatically controlled by a door activated "On-Off" switch.

PASSENGER'S SIDE UNDER CAB COMPARTMENT

The apparatus shall be equipped with an enclosed stainless steel compartment located under the crew door on the passenger side of the cab. The compartments clear door opening shall measure approximately 35" wide x 12.5" high x 15.25" deep with double hinged aluminum doors.
The doors shall be painted job color.

SLIDE TRAY

A 250# capacity slide tray shall be installed in the specified under cab compartment. The chassis batteries shall be located on this tray in the undercab compartment.

COMPARTMENT LIGHTING

One (1) Code 3 800 Series Corner LED lights shall be installed in the specified compartment(s).

COMPARTMENT LIGHT SWITCHES

Each interior compartment light shall be automatically controlled by a door activated "On-Off" switch.

CAB STEPS

Aggressive, extruded aluminum surfaces shall be installed on each of the cab steps areas.

CAB DOOR REFLECTIVE PANELS

The cab doors shall include reflective trim installed inside each door.

Specified part shall include Red and White DOT approved reflective striping.

AIR HOSE OUTLET

There shall be one (1) female quick connect air outlet provided and installed. The quick connect fitting shall provide connection to a utility air hose and shall be located on the drivers side pump operator's panel. There shall be a shut off located at the tank.

AIR TANK RELOCATION

The air tanks shall be relocated to the rear of the truck between the frame rails.

BATTERY RELOCATION

The chassis batteries are to be relocated to the passenger side of the chassis, below the rear cab door in a custom made under cab box.

UNDERHOOD LIGHTS

There shall be two (2) Tecniq LED light(s) installed under the hood of the chassis. Lights shall have local switching on the driver side under the hood.

AIR FILTER EMBER PROTECTION SCREEN AND WARNING LABEL

The chassis air intake shall be protected by an ember guard of 18 Mesh, 0.017-inch wire diameter, and a maximum mesh opening of 0.039 inches. The ember guard shall be sized to fit and located at the intake opening. The screen shall be readily accessible for inspection and maintenance.

EMBER SEPARATOR -- FRESH AIR INTAKE TO CAB

The cabin air filter shall be protected by an ember guard with a maximum mesh opening of 0.039 inches.

EMBER SEPARATOR

The final stage manufacturer shall install a stainless steel ember separator within the auxiliary fire pump engine air intake system.

FUEL TANK SKID PLATE

A heavy duty removable skid plate shall be fastened to the bottom side of the fuel tank. The skid plate shall have the front and rear sides turned up to prevent digging into the ground when the apparatus is in off road conditions.

AIR, FUEL, ELECTRICAL LINE PROTECTION

All air lines, fuel lines and electrical harnesses below the chassis frame rails shall be protected with fire resistive sleeves.

FUEL TANK VENTING

The O.E.M fuel tank vent line shall be extended from the fuel tank and vented to the atmosphere. The vent line shall extend vertically from the tank to the bottom of the cab rear window and then bend 180 degrees towards the ground.

TIRE PRESSURE INDICATOR SYSTEM

There shall be a tire pressure indicator at each tire's valve stem on the vehicle that shall indicate if there is insufficient pressure in the specific tire.

FIRE PUMP SPECIFICATIONS

A Darley model JMP 500 GPM two stage fire pump shall be installed. Power to drive the pump shall be provided by the same engine used to propel the apparatus. The pump shall be equipped with a series-parallel changeover valve control on the pump panel.

Pump casing shall be a fine grain cast iron, with a minimum tensile strength of 30,000 PSI. Pump shall contain a cored heating jacket feature that, if selected, can be connected into the vehicle antifreeze system to protect the pump from freezing in cold climates, and to help reject engine heat from engine coolant, providing longer life for the engine. Seal rings shall be renewable, double labyrinth, wrap around bronze type.

The pump shaft shall be splined to receive broached impeller hubs, for greater resistance to wear, torsional vibration, and torque imposed by engine, as well as ease of maintenance and repair.

Bearings provided shall be heavy duty, deep groove, radial-type ball bearings. Sleeve bearings on any portion of the pump or transmission shall be prohibited due to wear, deflection, and alignment concerns. The bearings shall be protected at all openings from road dirt and water splash with oil seals and water slingers.

The impeller shall be a high strength bronze alloy, splined to the pump shaft for precision fit, durability, and ease of maintenance. Impeller shaft oil seals shall be constructed to be free from steel components except for the internal lip spring. The impeller shaft oil seals shall carry a lifetime warranty against damage from corrosion from water and other fire-fighting fluids.

The pump transmission case shall be heavy-duty cast iron with adequate oil reserve capacity to maintain low operating temperature. Pump ratio to be selected by the manufacturers engineering department. Gears shall be helical in design and precision ground for quiet operation and extended life. Gears to be cut from high strength alloy steel, ground, and carburized. Chain drive and/or design requiring extra lubricating pump is not acceptable.

Pump drive shaft shall be precision ground, heat-treated alloy steel, with a 1-3/8 spline. Gears shall be helical design, and shall be precision ground for quiet operation and extended life. The pump transmission shall require no further lubrication beyond that provided by the intrinsic action of the gears, to reduce the likelihood of failure due to loss of auxiliary lubrication.

MECHANICAL SEAL

The mechanical seal shall use silicon carbide mechanical seals with welded springs. The stationary face of our mechanical seals shall be made from silicon carbide, an extremely hard and heat dissipative material, which resists wear and dry running damage.

PUMP SHIFT NO PUMP AND ROLL

The pump transmission shall be engaged by a guarded toggle switch which will lock in both the road and the pump mode to ensure that accidental pump engagement or disengagement is avoided.

The main fire pump shift controls shall be mounted in the cab and identified as "PUMP SHIFT" and shall include a permanently inscribed pump shift instruction I.D. plate. The pump shift controls shall include indicating lights located on the in-cab and left pump panels that advise the operator that the pump shift has been completed and it is O.K. to pump.

The main pump shall be used for stationary pumping only. The main pump shall include a lock-out system that is interfaced with the apparatus electrical and parking brake systems and is designed to keep the main pump from being used in pump and roll operations.

FIRE PUMP ANODE SYSTEM

The fire pump plumbing system shall be provided with anode system to reduce corrosion within the piping. The anode shall be bolt-in or screw-in type and easily replaceable.

ELECTRIC PRIMER SPECIFICATIONS

A 12 volt electrically driven positive displacement fire pump primer system shall be installed. The priming pump shall be constructed of heat treated aluminum and hard coat anodized and shall not use oil in the operation. The system shall perform in compliance to applicable NFPA standards.

FIRE PUMP TEST

The fire pump shall undergo factory fire pump tests for a minimum of 30 minutes of continuous pump at rated capacity at rated net pump pressure prior to delivery of the completed apparatus. the complete pump test shall include a pressure control test, a priming system test, a vacuum test and a water tank to pump flow test. The factory pump testing results shall be furnished on delivery.

FIRE PUMP PTO AND DRIVELINES

A "Hot Shift" power-take-off shall be installed on the transmission PTO opening with the controls located in the chassis cab, with an AMBER warning light to note engagement. The drive shaft and universals shall be sized for intended usage and pump rating.

INTAKE DUMP VALVE

An Elkhart model #40/40 intake dump valve shall be provided and mounted on the suction side of the pump. The valve shall be preset from the factory at 125 psi. The discharge piping of the dump valve shall be a minimum of 2-1/2" diameter and shall terminate with a 2-1/2" male NST adapter. The excess water shall be

discharged to the ground. A label shall be provided indicating: "DUMP VALVE DISCHARGE, DO NOT CAP".

BYPASS FIRE PUMP COOLER

The fire pump shall be equipped with 3/8" cooling line from the pump to the water tank. This re-circulation line shall be controlled by a pump panel control valve with nameplate label noting it as the "fire pump bypass cooler".

OVERHEAT PROTECTION MANAGER

The fire pump shall be equipped with an overheat protection device which monitors the temperature of the water inside the pump and relieves water when the temperature inside the pump exceeds 140 degrees Fahrenheit. The Waterous Model #OPM shall also have an warning light on the pump panel to provide additional protection in the event the temperature inside the pump continues to rise with the overheat protection valve open. The warning light and test button shall be mounted to a heavy polished casting that is mounted to the pump operator's panel.

MASTER PUMP DRAIN

One (1) Trident, multiple-port drain valve, fabricated from bronze, shall be provided and controlled at the pump operator's control panel. The valve shall be opened by turning a rotary hand wheel. The valve shall be plumbed to drain both the discharge and intake sides of the pump, the relief valve and other plumbing components as required.

The valve shall be placed as low as possible to provide proper drainage of the components plumbed to it. The valve shall be rated to 600 PSI minimum and suitable for daily valve actuation.

MAIN PUMP PLUMBING

The PTO main pump plumbing system shall utilize stainless steel piping incorporating hosing to allow for flex. The piping shall utilize TIG welding to provide a complete seal. Hard angles shall be avoided when possible to improve water flow characteristics. The piping shall utilize Victaulic couplers whenever possible to allow flex as the body module flexes.

Threaded sections of piping shall be avoided to reduce the leak potential of the system. Victaulic couplers shall be used in place of threading to reduce leak potential. Schedule 10 stainless steel piping shall be used for transport type piping. Schedule 40 stainless steel shall be used for areas requiring threading to provide a stable threading base. Brackets shall be installed to support threading locations thereby reducing the potential for leaks.

All hoses shall be connected directly to the tank due to the different flex ratios of the tank to body. Any front discharges, any rear discharges, and all cross lays shall use hose to reach the actual discharge. The use of hose

shall be utilized due to the difference in flex or movement between the discharge location and the pump connection. Drain lines shall be provided at the lowest points in the plumbing system to allow for complete drainage. Bleeders shall be provided for all gauges to relieve pressure after use.

PORTABLE PUMP

A Darley 1-1/2AGE 24K portable pump shall be provided on the apparatus. The unit shall have a liquid cooled, 24 HP, Kubota D902 diesel engine equipped with an electric start.

Pump Performance
- 20 gpm @ 310 psi
- 140 gpm @ 145 psi
- 180 gpm @ 80 psi

Diesel Engine
Kubota, D902 Diesel, water-cooled, 24 hp.

Fuel Supply
The engine shall be piped to the chassis fuel system with provisions to prevent fuel drain back to the tank when the engine is shutdown.

Fuel Prime
A fuel re-prime pump shall be provided to assist in fuel delivery to the diesel engine from the chassis tank.

Lubrication
Pressure feed with spin-on filter.

Starter
12-volt electric wired into the chassis battery system

Exhaust
A spark arrestor shall be provided on the engine exhaust system.

Air Intake
An air cleaner shall be provided with easy access to remove the element.
An ember screen shall be provided on the inlet to the air cleaner.

The aux pump shall be capable of flowing water though the following discharges only.

- Front bumper discharges
- Front bumper monitor (if applicable)
- Booster hose reel

Cross lay pre connect discharges
Rear 1-1/2" discharge

DUAL DARLEY DELUXE PANELS

The auxiliary pump shall be controlled by a dual Darley, Deluxe panel set up. One panel shall be located on the pump panel and one panel shall be located in the cab console.

AUXILIARY PUMP PLUMBING

The auxiliary fire pump plumbing system shall utilize stainless steel piping incorporating hosing to allow for flex. The piping shall utilize TIG welding to provide a complete seal. Hard angles shall be avoided when possible to improve water flow characteristics. The piping shall utilize Victaulic couplers whenever possible to allow flex as the body module flexes.

Threaded sections of piping shall be avoided to reduce the leak potential of the system. Victaulic couplers shall be used in place of threading to reduce leak potential. Schedule 10 stainless steel piping shall be used for transport type piping. Schedule 40 stainless steel shall be used for areas requiring threading to provide a stable threading base. Brackets shall be installed to support threading locations thereby reducing the potential for leaks.

All hoses shall be connected directly to the tank due to the different flex ratios of the tank to body. Any front discharges, any rear discharges, and all cross lays shall use hose to reach the actual discharge. The use of hose shall be utilized due to the difference in flex or movement between the discharge location and the pump connection.

AUXILIARY PUMP EXHAUST SYSTEM

The auxiliary fire pump and engine assembly shall have a muffler and exhaust pipe. The exhaust pipe shall be directed out of the compartment and away from the pump operator. An additional guard shall be installed where the pipe is exposed to touch by an operator.

PRIMER ASSEMBLY

The auxiliary pump shall use the main pump primer to prime the pump. Primer control shall be located on the aux pump control panel and shall utilize one primer for both pumps.

LOW PRESSURE PUMP SHUT-DOWN

If the fire pump runs out of water and the pressure decreases below 20 PSI, an automatic pressure switch shall detect the condition, and turn off the fire pump operation.

LOW OIL PRESSURE / HIGH TEMPERATURE PUMP SHUT-DOWN

If the fire pump has low oil pressure or high engine temperature, automatic pressure switches shall detect the condition, and the device shall turn off the fire pump operation. There shall be an override switch provided and installed on the operators pump panel to allow the system to be disabled when required.

AUXILIARY FUEL SYSTEM

The fuel system for the auxiliary fire pump shall be plumbed to the chassis fuel system. There shall be a separate fuel pickup tube mounted in the chassis fuel tank specifically for a separate engine driven pump assembly. There shall be an electric fuel pump with regulator and fuel hose furnished between the chassis fuel tank and the auxiliary pump.

AUXILIARY FIRE PUMP ELECTRIC START WIRING TO CHASSIS

Properly sized 12 volt positive and negative cables shall be provided from the chassis battery to the auxiliary fire pump.

AUXILIARY AND MAIN PUMP PLUMBING

The auxiliary fire pump shall be plumbed to the main pump discharge.

AUXILIARY PUMP OIL DRAIN EXTENSION

There shall be an oil drain extension installed on the auxiliary pump. This will allow for the engine oil to be drained without removing the auxiliary engine.

4" UNGATED INTAKE -- LEFT SIDE

One (1) 4" un-gated suction intake shall be installed on the left side pump panel to supply the fire pump from an external water supply. The threads shall be 4" NH male and equipped with a removable screen.

One (1) chrome brass 4" NH rocker lug cap with a securing chain or cable shall be installed on the intake.

2-1/2" GATED INTAKE -- LEFT SIDE

One (1) 2-1/2" gated suction intake shall be recessed mounted on the left side pump panel to supply the fire pump from an external water supply. The valve shall be a quarter-turn ball valve with the appropriate handle and shall have 2-1/2" NH female thread.

The intake shall be equipped with a South Park Corp. 3/4" Push-pull type drain valve mounted to the bottom of the valve.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome brass 2-1/2" NH rocker lug plug with a securing chain or cable shall be installed on the intake.

2-1/2" GATED INTAKE -- RIGHT SIDE

One (1) 2-1/2" gated suction intake shall be recess mounted on the right side pump panel to supply the fire pump from an external water supply. The valve shall be a quarter-turn ball valve with the appropriate handle and shall have 2-1/2" NH female thread.

The intake shall be equipped with a South Park Corp. 3/4" Push-pull type drain valve mounted to the bottom of the valve.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome brass 2-1/2" NH rocker lug plug with a securing chain or cable shall be installed on the intake.

WATER TANK SUPPLY LINE TO FIRE PUMP

A 3" water tank to pump line shall be installed, with a 3" full flow quarter turn ball valve and 3" piping. The line shall be equipped with a hump hose with stainless steel hose clamps and a 3" check valve to prevent pressurization of the water tank.

One (1) Akron 8830 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control, Akron Model R1 valve handle.

The 3" valve shall be equipped with an air operated cylinder and control actuator installed on pump panel.

PUMP TO TANK

There shall be a pump to tank line provided from the discharge side of the pumps and plumbed to the top of the tank. The plumbing shall be 2-inch with a 2-inch Akron 8800 series ¼-turn full flow ball valve, and shall be controlled at the left pump panel by a push/pull T-handle and linkage. The pump to tank shall be plumbed to flow water from both the main and auxiliary pumps

One (1) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control, Akron Model R1 valve handle.

The valve shall be equipped with a Thuemling manually operated pull rod, with quarter-turn locking feature.

2-1/2" DISCHARGE LEFT SIDE – FORWARD PUMP PANEL

One (1) 2-1/2" discharge shall be installed on the left side forward pump panel area controlled by a quarter turn ball valve with the appropriate handle. The discharge shall have 2-1/2" NH male hose threads, bleeder valve, and chrome brass cap, with a label adjacent the control handle.

A Class 1 quarter-turn 3/4" drain and bleeder valve shall be installed on the discharge valve.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome brass 2.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

LINE PRESSURE GAUGE

There shall be one (1) 2.5" diameter -30-0-600 PSI pressure gauge internally lit.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

Gauge bezel shall be Chrome in color.

2.5" DISCHARGE -- REAR LEFT

One (1) 2.5" discharge shall be installed on the rear left panel with controlled by a quarter turn ball valve. The discharge shall have 2.5" NH male hose threads and nameplate label adjacent the control handle.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

(1) chrome plated brass 30 degree elbow with 2.5" swivel female NH x 2.5" male NH thread with rocker lugs shall be provided on the discharge.

One (1) chrome brass 2.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

2" DISCHARGE -- REAR RIGHT

One (1) 2" discharge shall be installed on the rear right panel, controlled by a quarter turn ball valve on pump panel. The discharge shall have 2" NPT x 1-1/2" NH male hose threads and nameplate label adjacent the valve control handle.

One (1) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome plated brass reducing adapter with a 2" female NH x 1.5" male NH thread with rocker lugs shall be provided on the discharge.

One (1) chrome plated brass 30 degree elbow with 1.5" swivel female NH x 1.5" male NH thread with rocker lugs shall be provided on the discharge.

One (1) chrome plated brass 1.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

1-1/2" CROSSLAY DISCHARGES

Two (2) 1-1/2" hose cross lays shall be installed over pump enclosure. One (1) each side. They shall be arranged in a single stack design with a divider in the center of the storage area. Each storage area shall extend from the

side of the pump house to the center of the pump house. The dimensions shall be approximately 4-1/2" wide x 36" deep x 32" tall.

Two (2) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

The crosslay hosebed shall be equipped with an aluminum diamond plate hinged cover and vinyl end flap enclosures on each side, installed in compliance with applicable NFPA #1900 standards. The cover shall be equipped with rubber bumpers and lift up handle on each end of the cover.

The specified crosslay flaps shall be red.

CROSSLAY EDGES

The crosslay side sheets shall be rolled on each side to act as a guide for the hose to come out of the tray.

Two (2) chrome plated brass reducing adapter with a 2" female NH x 1.5" male NH thread with rocker lugs shall be provided on the discharge.

Two (2) chrome plated brass 1.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

1-1/2" BUMPER AREA DISCHARGE (LEFT SIDE)

One (1) 2" discharge shall be provided at the driver's side of the front bumper extension. The discharge shall be plumbed with 2" flexible high pressure hose with reusable fittings or welded stainless steel pipe. The front bumper discharge shall be equipped with a 2" quarter turn ball valve. The discharge shall have a 90 degree full swivel elbow, terminating in 1-1/2" NST male threads, to allow the hose to be pulled in any direction without kinking.

One (1) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome plated brass 1.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

1-1/2" BUMPER AREA DISCHARGE (RIGHT SIDE)

One (1) 2" discharge, shall be provided at the passenger's side of the front bumper extension. The discharge shall be plumbed with 2" flexible high pressure hose with reusable fittings or welded stainless steel pipe. The front bumper discharge shall be equipped with a 2" quarter turn ball valve. The discharge shall have a 90 degree full swivel elbow, terminating in 1-1/2" NST male threads, to allow the hose to be pulled in any direction without kinking.

One (1) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome plated brass 1.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

2" ISOLATION VALVE

One (1) 2" inline valve, labeled, shall be provided to isolate the front bumper extension discharge piping in the case of a hose or piping failure. This valve shall normally be left in the open position. Control for this valve shall be through the use of a R1 handle, painted red, located at the valve.

One (1) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control, Akron Model R1 valve handle.

HOSE REEL

There shall be one (1) Hannay aluminum hose reel(s) Model #SBSEPF17-28-29-RT shall be installed. The reel shall have leak proof ball bearing swing joint, adjustable friction brake, electric 12 volt rewind and manual crank rewind provisions. The reel shall be plumbed with wire reinforced, high-pressure hose coupled with brass fittings. The reel shall be designed to hold 125% of the specified hose capacity.

The reel shall be provided with a 12 volt electric motor of appropriate size for rewinding. The hose reel shall have provisions for being rewound manually. The pinion shaft for the manual rewind gear shall be equipped with an adjustable tension brake, controlled at the hose reel.

One (1) Akron 8810 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

HOSE REEL MOUNTING

The hose reel shall be mounted over the pump enclosure.

Two (2) Cole Hersee #M-608 push button hose reel rewind controls shall be installed supplied and installed to rewind the hose reel. One (1) button shall be installed on the left pump panel and one (1) button shall be installed on the right panel.

HOSE REEL ROLLERS

The hose reel shall include one horizontal and two vertical chrome fairlead rollers. Two (2) additional sets of fair lead rollers shall be located on the auxiliary pump cover for guiding the hose across the top of the apparatus.

FOAM SYSTEM

A FoamPro electronic foam system shall be provided. The system shall be designed for use with Class A foam concentrate. The foam proportioning operation shall be designed for direct measurement of water flows and shall remain consistent within the specified flows and pressures. The system shall be capable of accurately delivering foam solution as required by applicable sections of the NFPA standards.

The system shall be equipped with a control module suitable for installation on the pump panel. There shall be a microprocessor incorporated within the motor driver that shall receive input from the system's flowmeter, while also monitoring the foam concentrate pump output. The microprocessor shall compare the values to ensure that the desired amount of foam concentrate is injected onto the discharge side of the fire pump. A "foam capable" paddlewheel-type flowmeter shall be installed in the discharge side of the piping system.

The control module shall enable the pump operator to:

- Activate the foam proportioning system
- Select the proportioning rates from 0.1% to 1.0%
- See a "low concentrate" warning light flash when the foam tank level becomes low and in two (2) minutes, if the foam concentrate has not been added to the tank, the foam concentrate pump shall be capable of shutting down.

A 12-volt electric motor driven positive displacement plunger pump shall be provided. The pump capacity range shall be 0.1 to 1.7 GPM (6.4L/min) at 200 PSI (13.8 BAR) with a maximum operating pressure up to 400 PSI

(27.6 BAR). The system shall draw a maximum of 30 amps at 12 volts. The motor shall be controlled by the microprocessor which shall be mounted to the base of the pump. It receives signals from the control module and power the 1/3 horsepower (.25 Kw) electric motor in a variable speed duty cycle to ensure that the correct proportion of concentrate is injected into the water stream.

A full flow check valve shall be provided in the discharge piping to prevent foam contamination of the fire pump and water tank. A 5 PSI (.35 BAR) opening pressure check valve shall be provided in concentrate line.

Components of the complete proportioning system as described above shall include:

- Operator control module
- Paddlewheel flowmeter
- Pump and electric motor/motor driver
- Wiring harnesses
- Low level tank switch
- Foam tank
- Foam injection check valve
- Main waterway check valve
- Flowmeter and tee with 2" male NPT threads.

The foam system shall be installed and calibrated to manufacturer's requirements. In addition the system shall be tested and certified by the apparatus manufacturer to applicable NFPA standards.

The foam system design shall be tested and pass environmental testing in accordance to SAE standards.

An installation and operation manual shall be provided for the unit. The system shall have a one (1) year limited warranty by the foam system manufacturer.

The FoamPro 1600 Series foam system shall be provided with a control cable from the controller to the foam pump assembly.

The FoamPro 1600 Series foam system shall be provided with a standard pump panel mounted FoamPro control head.

A FoamPro brass flowmeter shall be provided. The flowmeter shall be installed in the "foam capable" discharge line. The flowmeter shall have maximum accuracy between the flow range of 15 GPM and 520 GPM and be capable of operation between 5 GPM to 625 GPM. The tee shall have NPT and Victaulic inlet and outlets connections.

A FoamPro instruction and system rating label shall be provided. The label shall display information for a FoamPro 1600 Series foam system and shall meet applicable sections of the NFPA standards.

A FoamPro foam system schematic label shall be installed on the pump panel near foam controls. The label shall be a diagram of the FoamPro 1600 series foam system layout and shall meet applicable sections of the NFPA standards.

FOAM SYSTEM OUTLETS

The following discharges shall have foam distributed to them.

Front bumper discharges
Front bumper monitor (if applicable)
Pump house crosslay pre connects
Booster hose reel
Rear 1-1/2" discharge

FOAM SYSTEM CAB CONTROL

A FoamPro on-off control switch shall be installed in the cab console.

FOAM UPLOAD SYSTEM

There shall be a Hale EZ Foam upfill system supplied and installed on the apparatus.

PUMP MODULE ENCLOSURE

The PTO fire pump enclosure shall be a separate unit from the body unit and shall be attached and supported at the chassis frame rails. This module shall allow for independent flexing of the pump enclosure from the body, chassis, and tank, and shall permit quick removal. The module shall have Polypro mounting pads and shall be attached to the frame rails. The pump module shall also house the auxiliary pump and hose reel mounted up above the plumbing. The bolt-on pump enclosure support structure shall be constructed of steel tubing.

The pump enclosure shall be approximately 27" front to rear, 72" right to left, and 60" high.

The top portion above the pump panel (operators side), and above the pump house compartment (right hand side) shall have an stainless steel overlay. The overlay shall contour around the front and rear of the pump module approx 3" and extend down the outer edges of the module on both sides left and right to the bottom of the module. On the front of the pump house module there shall be an ALDP overlay that extends from left to right along the top approx 8" tall.

There shall be polished stainless steel bezels around panel mounted discharge and intake valves, they will be removable for ease of service.

AUXILIARY PUMP COVER

A louvered hinged cover with suitable latches shall be provided over the pump and power unit assembly. The area around the assembly shall remain open for maintenance and air circulation and the radiator shall be located behind ventilated side sheet.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

PUMP ENCLOSURE RUNNING BOARD

Both the drivers and passenger side shall be equipped with a side running board a minimum of 12" deep. The running board shall extend along the width of the pump enclosure from the forward end of the body module to behind the chassis cab. The exterior edge of the running board shall be constructed of a non-slip aggressive surface, supported by the pump enclosure framework, and bolted in place with stainless steel fasteners.

PUMP ACCESS SERVICE DOOR -- UPPER LEFT SIDE

The upper left side of the side mount pump enclosure shall be provided with a pump service access door. The hinged door shall be constructed of stainless steel powder coated satin black, with push button type lever latches for service access.

PUMP PANELS

The pump panels shall be constructed of stainless steel, bolted to the pump enclosure with stainless steel fasteners. The operators side pump panel shall be powdercoated satin black, while the right side panel shall be brushed stainless steel.

MASTER PUMP DISCHARGE AND INTAKE GAUGES

MASTER INTAKE PRESSURE GAUGE

One (1) master intake pressure gauge shall be provided on the operator's panel. The gauge shall be a Span brand, or equivalent, 30-0-150 PSI graduated, with a minimum diameter of 4-1/2", backlit for nighttime operations and silicone liquid filled to prevent condensation inside the gauge and to dampen the movement.

The gauge housing shall be constructed of Zytel nylon with a 1/4" NPT brass male fitting centrally located on the rear of the housing. The gauge shall be filled with low-temperature liquid with an operating range of -40 to +150 degrees Fahrenheit, which prevents bouncing of the readout needle and provides for an accuracy rating of 3% or 1" hg on the vacuum side and 5% or 15 PSI on the pressure side of the gauge.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

Gauge bezel shall be Chrome in color.

MASTER DISCHARGE PRESSURE GAUGE

One (1) master discharge pressure gauge shall be provided on the operator's panel. The gauge shall be a Span brand, or equivalent, 0-600 PSI graduated, with a minimum diameter of 4-1/2", backlit for nighttime operations and silicone liquid filled to prevent condensation inside the gauge and to dampen the movement.

The gauge housing shall be constructed of Zytel nylon with a 1/4" NPT brass male fitting centrally located on the rear of the housing. The gauge shall be filled with low-temperature liquid with an operating range of -40 to +150 degrees Fahrenheit, which prevents bouncing of the readout needle and provides for an accuracy rating of 5% or 15 PSI on the pressure side of the gauge.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

Gauge bezel shall be Chrome in color.

TEST TAPS

Test taps for pump intake and pump pressure with name plate labels shall be provided on the pump instrument panel.

PRESSURE GOVERNOR and ENGINE MONITORING DISPLAY

Fire Research PumpBoss series PBA401-D00 pressure governor and monitoring display kit shall be installed. The kit shall include a control module, intake pressure sensor, discharge pressure sensor, and cables. The control module case shall be waterproof and have dimensions not to exceed 6 3/4" high by 4 5/8". The control knob shall be 2" in diameter with no mechanical stops, have a serrated grip, and a red idle push button in the center. It shall not extend more than 1 3/4" from the front of the control module. Inputs for monitored engine

information and outputs for engine control shall be on the J1939 databus. Inputs from the pump discharge and intake pressure sensors shall be electrical.

The following continuous displays shall be provided:

Engine RPM; shown with four daylight bright LED digits more than 1/2" high
Check engine and stop engine warning LEDs
Engine oil pressure; shown on a dual color (green/red) LED bar graph display
Engine coolant temperature; shown on a dual color (green/red) LED bar graph display
Transmission Temperature: shown on a dual color (green/red) LED bar graph display
Battery voltage; shown on a dual color (green/red) LED bar graph display
Pressure and RPM operating mode LEDs
Pressure / RPM setting; shown on a dot matrix message display
Throttle ready LED.

The dot-matrix message display shall show diagnostic and warning messages as they occur. It shall show monitored apparatus information, stored data, and program options when selected by the operator. All LED intensity shall be automatically adjusted for day and night time operation.
The program shall store the accumulated operating hours for the pump and engine to be displayed with the push of a button. It shall monitor inputs and support audible and visual warning alarms for the following conditions:

High Battery Voltage
Low Battery Voltage (Engine Off)
Low Battery Voltage (Engine Running)
High Transmission Temperature
Low Engine Oil Pressure
High Engine Coolant Temperature
Out of Water (visual alarm only)
No Engine Response (visual alarm only).

The program features shall be accessed via push buttons located on the front of the control module. There shall be a USB port located at the rear of the control module to upload future firmware enhancements.

The governor shall operate in two control modes, pressure and RPM. No discharge pressure or engine RPM variation shall occur when switching between modes. A throttle ready LED shall light when the interlock signal is recognized. The governor shall start in pressure mode and set the engine RPM to idle. In pressure mode the governor shall automatically regulate the discharge pressure at the level set by the operator. In RPM mode the governor shall maintain the engine RPM at the level set by the operator except in the event of a discharge pressure increase. The governor shall limit a discharge pressure increase in RPM mode to a maximum of 30 psi. Other safety features shall include recognition of no water conditions with an automatic programmed response and a push button to return the engine to idle.

The pressure governor and display shall be programmed to interface with a Cummins engine.

WATER TANK GAUGE

One (1) Fire Research TankVision model WLA300-A00-S20 tank gauge shall be installed on the pump panel. The water tank indicator kit shall include an electronic indicator module, a pressure sensor, and a 10' sensor cable. The indicator shall show the volume of water in the tank on nine (9) easy to see super bright LEDs.

The specified level gauge shall be active anytime the chassis battery switch is turned on.

WATER TANK GAUGE

One (1) Fire Research TankVision model WLA300-A00-S20 tank gauge shall be installed on the cab console. The water tank indicator kit shall include an electronic indicator module, a pressure sensor, and a 10' sensor cable. The indicator shall show the volume of water in the tank on nine (9) easy to see super bright LEDs. The gauge shall be powered when the parking brake is released and the aux pump is engaged.

WATER TANK VOLUME REMOTE INDICATOR

Two (2) Fire Research TankVision model WLA280-A00 tank remote indicator shall be installed. The indicator shall show the volume of water in the tank on Ninety six (96) easy to see super bright Tri-color LEDs. The indicator case shall be waterproof, manufactured of Polycarbonate material with an integrated lens. The package includes a rubber gasket.

The remote indicator shall receive input information over a datalink from a Fire Research TankVision primary indicator model WLA200-A00, WLA300-A00 or WLA400-A00. The remote indicator shall indicate the level as a single color in Red for 25% or less, Amber color for up to 50% volume, Blue color for up to 75% volume and Green color for up to 100% volume. When the level reaches 25%, the red LEDs will begin flashing. When the level is empty, the red LEDs will scroll in a down-chasing motion and then flash three times. It shall have the program capability to adjust the brightness level for day time and nighttime viewing.

The specified level gauge shall be active anytime the chassis battery switch is turned on.

CLASS A FOAM TANK GAUGE

One (1) Fire Research brand, Model WLA360-A00 tank level gauge shall be provided on the pump operator's panel to monitor the foam concentrate storage tank level. The gauge shall indicate the foam concentrate storage tank liquid level on an LED bar graph display.

The specified level gauge shall be active anytime the chassis battery switch is turned on.

NOMENCLATURE PLATES

The apparatus shall be equipped with color coded labels. The labels shall be furnished for discharges, intakes, and for other controls and indicators. All labels shall be in English format.

MIDSHIP PUMP PANEL LIGHTS -- DRIVERS SIDE

There shall be three Tecniq brand LED lights installed under a stainless steel light shield mounted above the pump panel. The two outer lights shall be operated by a panel mounted switch, while the middle light will only be activated upon pump engagement.

One (1) of the pump panel lights shall illuminate at the time the fire pump is engaged.

MIDSHIP PUMP PANEL LIGHTS -- PASSENGER SIDE

There shall be one Tecniq brand LED light installed under a stainless steel light shield mounted above the pump panel. The light shall activate upon pump engagement.

PUMP ENCLOSURE WORK LIGHTS

Two (2) LED work lights shall be installed in the pump enclosure. The work lights shall have clear lenses and shall have a control switch.

DESIGN AND SCOPE OF WILDLAND BODY

The body shall be designed and constructed of commonly available structural components for ease of repair and maintenance. The body shall be of a modular design with the body structure independent of the chassis frame rails. The body module shall be mounted to the chassis frame rails utilizing a unique double spring mounting system for flexibility and durability over the lifetime of the apparatus. The fabrication of the body shall be of welded construction to withstand the rigors of fire service use.

The body shall be designed to incorporate and support the tank, hose bed, compartments, and all other equipment intended to be stored in or mounted to the body module. The body skeleton and compartment framework shall be designed of tubular members for increased strength and stress resistance. There shall be no sheet metal or extrusions utilized in the foundation or structural components of the body module due to their critical role in assuring lifetime durability, functionality and usability.

BODY FRAMEWORK

The entire body framework shall be fabricated from steel tubing. The body framework shall be a completely welded unit, forming a connected, stable frame for strength, longevity and providing the skeleton of the body module. The internal upright members of the framework shall act as support for the top layer of the body module. The external upright members shall act as an exoskeleton providing form and support for compartments

while acting as the external surfaces of the module. The framework shall define the compartment openings and provide a rigid mounting location for all compartments and doors.

The foundation cross-members shall be placed perpendicular to the chassis frame rails in the wheel well area extending the full width of the body and shall be constructed of 3 inch high x 2 inch wide x .25 inch tubing. The foundation members parallel to the chassis frame rails shall be constructed of 3 inch square x .25 inch tubing and shall connect the foundation cross members and extend the full length of the body.

All tank support cross members shall be placed to support the water tank as per the tank manufacture's recommendation. These supports shall be constructed of 3 inch high x 2 inch wide x .25inch steel tubing. The tank support angles shall be constructed of 4 inch x 4 inch x .25 inch thick angles and shall be placed at the tank sides parallel to the chassis frame rails to provide lateral support for the tank and protection from debris from the wheels.

The internal upright supports for top layer components shall be placed to provide support for all components located on the top layer of the body module and shall be constructed of steel tubing measuring 2 inch square x .25 inch wall thickness. All front to rear connecting members shall be 3 inches high x 2 inches wide x .125 inch wall thickness and shall be placed in between the interior upright support members to provide rigidity, stability and support to all top layer components. All gussets shall be constructed of 2 inches high x 3 inches wide x .25 inch thick plate which shall be placed on the top and bottom of the foundation cross members where they intersect with the exterior members.

BODY MOUNTING SYSTEM

The mounting assembly shall be designed to isolate and protect the body module from vibration and twisting stresses imparted by the flexing of the chassis frame rails. The body module shall employ spring loaded body mounting assemblies. Each two piece mounting assembly shall be designed to positively position the body on the frame rails while allowing lateral and forward or aft movement. Mounting assemblies shall be placed forward and rearward of the rear axle as necessary to provide a strong and stable mounting of the body module

Each mounting assembly shall consist of a "male" upper mounting bracket and a "female" lower mounting bracket. The upper mounting brackets shall be fabricated from .25 inch thickness steel plate, with .250 inch painted steel lower mounting brackets. The upper mounting brackets shall be welded directly to the foundation connecting members. The lower mounting brackets shall be bolted to the exterior side facing surface of the chassis frame rails.

The mounting brackets shall be aligned and connected by two (2) 5/8 inch diameter grade 8 bolts equipped with compression springs. The springs shall be of the appropriate tension rating for the weight requirements of the body module. The mounting assembly shall be designed to completely eliminate sheering forces on the mounting bolts.

The foundation connecting members shall be placed on top of the chassis frame rails for added strength and

stability. The foundation members shall be isolated from the steel chassis frame rails by .25 inch thickness steel plates which have .5 inch thick 80 durometer rubber pads vulcanized to the bottom surface of each plate. The steel plates shall be welded to the bottom of the foundation, doubling as additional gussets at foundation cross member joints.

COMPARTMENT FLOOR, SWEEP OUT STYLE

Each compartment shall feature a raised floor sufficient enough to allow debris to be removed easily from the compartment.

BODY MATERIAL

All materials utilized shall be of the correct type, alloy, and thickness to withstand the intended usage and provide protection against cracking, corrosion or metal fatigue. The body compartments shall be fabricated using 14 gauge steel for most compartments unless otherwise stated. Any use of proprietary parts or materials in the construction of the body shall be unacceptable, due to potential delays or difficulties in an unlikely event of future repairs or when service becomes necessary.

All external upright supports for integral compartments shall incorporate a second set of upright supports constructed of 3 inch wide x 2 inch deep x .250 inch wall thickness and shall be located outboard of the internal upright supports to provide a rigid structure for the compartments to be mounted to. The compartment openings shall be constructed of 3 inch high x 2 inch wide x .125 inch wall thickness cross members and shall be placed in between the external upright supports to define the openings of all enclosed body compartments again, providing a rigid mounting location for compartments.

COMPARTMENTATION

All compartments shall be constructed of 14 gauge E.G. steel welded for strength and shall be sealed from the elements. The compartments shall be attached to the steel superstructure only, in order to maintain a truly modular design. Each compartment shall feature a smooth edges and surfaces from the walls to each weld without burs or sharp edges in the material.

DRIVER'S SIDE BODY COMPARTMENTS

COMPARTMENT D1

One compartment shall be provided on the driver's side of the apparatus body above the rear wheels. This compartment shall span from just behind the pump panel to the back of the rear wheel well quarter panel. The compartments approximate "clear door opening" is 51" wide by 39" high with a variable depth of 13.5"/22".

COMPARTMENT VENTILATION

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

COMPARTMENT SILL PLATE

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

ADJUSTABLE UNISTRUT

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) vertical channels on the back wall of the compartment.

ADJUSTABLE SHELF

There shall be (1) adjustable shelf(elvs) installed; and the shelf(elvs) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(elvs) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

COMPARTMENT SHELF GRATING

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

COMPARTMENT GRATING

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

COMPARTMENT GRATING EDGE

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

COMPARTMENT LIGHTING

The specified compartment shall have two (2) vertical and one (1) horizontal Code 3 800 series lights installed.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

COMPARTMENT D2

One full height compartment shall be provided on the driver's side of the apparatus body aft of the rear wheels. This compartment shall span from behind the rear wheel well quarter panel to the rear of the body in width and from the top of the body to the rub rail in height. The compartments approximate "clear door opening" is 34" wide by 58" high with a variable depth of 13.5"/22".

COMPARTMENT VENTILATION

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

COMPARTMENT SILL PLATE

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

ADJUSTABLE UNISTRUT

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) vertical channels on the back wall of the compartment.

ADJUSTABLE SHELF

There shall be (1) adjustable shelf(elvs) installed; and the shelf(elvs) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(elvs) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

COMPARTMENT SHELF GRATING

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

COMPARTMENT GRATING

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

COMPARTMENT GRATING EDGE

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

COMPARTMENT LIGHTING

The specified compartment shall have two (2) vertical and one (1) horizontal Code 3 800 series lights installed.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

PASSENGER SIDE BODY COMPARTMENTS

COMPARTMENT P1

One compartment shall be provided on the passenger's side of the apparatus body above the rear wheels. This compartment shall span from just behind the pump panel to the back of the rear wheel well quarter panel in width and from the top of the body side to the wheel well in height. The compartments approximate "clear door opening" is 51" wide by 39" high with a depth of 12".

COMPARTMENT VENTILATION

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

COMPARTMENT SILL PLATE

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

ADJUSTABLE UNISTRUT

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) vertical channels on the back wall of the compartment.

ADJUSTABLE SHELF

There shall be (1) adjustable shelf(elvs) installed; and the shelf(elvs) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(elvs) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

COMPARTMENT SHELF GRATING

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

COMPARTMENT GRATING

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

COMPARTMENT GRATING EDGE

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

COMPARTMENT LIGHTING

The specified compartment shall have two (2) vertical and one (1) horizontal Code 3 800 series lights installed.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

COMPARTMENT P2

One compartment shall be provided on the passenger's side of the apparatus body aft of the rear wheels. This compartment shall span from behind the rear wheel well quarter panel to the rear of the body in width and from

below the walkway to the rub rail in height. The compartments approximate "clear door opening" is 34" wide by 58" high with a variable depth of 12"/22".

COMPARTMENT VENTILATION

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

COMPARTMENT SILL PLATE

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

ADJUSTABLE UNISTRUT

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) vertical channels on the back wall of the compartment.

ADJUSTABLE SHELF

There shall be (1) adjustable shelf(elvs) installed; and the shelf(elvs) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(elvs) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

COMPARTMENT SHELF GRATING

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

COMPARTMENT GRATING

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

COMPARTMENT GRATING EDGE

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

COMPARTMENT LIGHTING

The specified compartment shall have two (2) vertical and one (1) horizontal Code 3 800 series lights installed.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

BACK BODY COMPARTMENTS

COMPARTMENT B1

One compartment shall be provided at the back of the apparatus body, below the hose bed and above the tailboard. This compartment shall span just center of the tank. The compartments approximate "clear door opening" is 27" wide by 34" high with a depth of 25".

COMPARTMENT VENTILATION

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

COMPARTMENT SILL PLATE

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

ADJUSTABLE UNISTRUT

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) horizontal channels on the back wall of the compartment.

ADJUSTABLE SHELF

There shall be (1) adjustable shelf(elvs) installed; and the shelf(elvs) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(elvs) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

COMPARTMENT SHELF GRATING

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

COMPARTMENT GRATING

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

COMPARTMENT GRATING EDGE

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

COMPARTMENT LIGHTING

The specified compartment shall have two (2) vertical Code 3 800 series lights installed.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

PUMP HOUSE COMPARTMENT (PH1)

There shall be a compartment located on the upper passenger side of the pump house. The compartment dimensions shall be approximately 21" wide x 23" high x 12" deep.

COMPARTMENT VENTILATION

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

ADJUSTABLE UNISTRUT

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

ADJUSTABLE SHELF

There shall be (1) adjustable shelf(elvs) installed; and the shelf(elvs) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(elvs) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

COMPARTMENT SHELF GRATING

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

COMPARTMENT GRATING

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

COMPARTMENT GRATING EDGE

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

COMPARTMENT LIGHTING

The specified compartment shall have two vertical Code 3 800 series lights installed.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

PUMP HOUSE COMPARTMENT (PH2)

There shall be a compartment located on the lower passenger side of the pump house. The compartment dimensions shall be approximately 11.5" wide x 18" high x 18" deep.

COMPARTMENT FLOOR DRAIN

The compartment shall be provided with rear corner floor drains to the underside of the body.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

SLIDE-IN REAR LADDER COMPARTMENT - PASSENGER SIDE

The rear passenger side of the apparatus body shall have a vertically mounted slide-in ladder storage compartment. The compartment shall be **capable** of storing one (1) *20-foot three-section Duo Safety model #912 ladder, one (1) *backboard minimum dimensions 72" L x 16" W x 2" H (Ferno "Najo Light NB5500" or similar), one (1) *8-foot long pike pole and one (1) *5-foot digging bar, one (1) *8-foot rubbish hook, *New York Roof Hook with locking pins to secure each item.

*Items are to be purchased by the end user.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

SLIDE-IN REAR SUCTION HOSE COMPARTMENTS

Two (2) suction hose storage compartments will be located above the side storage compartments on both sides of the apparatus. The compartments will hold a combined total of three (3) eight (8) foot sections of four (4) inch hard suction hose and strainer.

Both compartments will be capable of holding two (2) eight (8) foot sections of hose if needed. Each compartment will have a stainless steel painted hinged door on the rear of the compartment. Each compartment door will have a locking positive latching door latch.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

TOP COMPARTMENT TC1

The hose bed shall be provided with a compartment down the center of the hosebed. The top compartment shall have a one piece aluminum treadplate cover. Approximate "clear door opening" dimensions shall be 13" wide by 75" deep and 16" high.

ALUMINUM TREADPLATE DOOR

This compartment shall feature an embossed aluminum diamond plate lid. The lid shall be bare embossed aluminum diamond plate.

DOOR LATCH

The specified hinged door(s) shall be equipped with a sealed, black lever latch(es). Latch(es) shall be non-locking style.

LIGHTING

The specified compartment shall have no compartment lighting.

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

PAINTED ALUMINUM PANEL

There shall be a smooth aluminum panel bolted to the rear of the center top storage box.

WHEEL WELL PANEL CONSTRUCTION

The outer wheel well panel shall be galvanneal steel of the same gauge as compartment construction and an integral part of the overall body design. The exterior wheel well area shall be painted to match the body.

WHEEL WELL LINERS

Wheel well liners designed to protect the body from impact resulting from road debris thrown by the tires shall be installed. The removable liners shall be constructed from UHMW material to encompass the entire inner wheel well area. The liners shall be secured with stainless steel threaded fasteners.

REAR WHEEL FENDERETTES

Polished stainless steel fenderettes shall be installed at each rear wheel opening. The fenderettes shall be positioned outside of the wheel well panel to cover the tire area that extends past the body. The fenderettes shall be secured with stainless steel threaded fasteners.

DRIVERS SIDE BODY -- SCBA CYLINDER STORAGE PROVISIONS

A storage area for an SCBA cylinder shall be provided in the forward area of the driver's side wheel well. Dimensions shall be 8" diameter x 26" deep.

The SCBA door shall be a Cast Products door.

The SCBA cylinder storage tube shall be made from plastic. There shall be rubber matting to cusion the bottle glued into the tube.

DOOR LATCH

The specified hinged door(s) shall be equipped with (1), textured chrome lever latch(es). Latch(es) shall be non-locking style with a raised button.

SCBA CYLINDER STRAPS

There shall be a 1" nylon tether installed to secure the bottle in the storage tube.

DRIVERS SIDE BODY -- SCBA CYLINDER STORAGE PROVISIONS

A storage area for an SCBA cylinder shall be provided in the rearward area of the driver's side wheel well. Dimensions shall be 8" diameter x 26" deep.

The SCBA door shall be a Cast Products door.

The SCBA cylinder storage tube shall be made from plastic. There shall be rubber matting to cusion the bottle glued into the tube.

DOOR LATCH

The specified hinged door(s) shall be equipped with (1), textured chrome lever latch(es). Latch(es) shall be non-locking style with a raised button.

SCBA CYLINDER STRAPS

There shall be a 1" nylon tether installed to secure the bottle in the storage tube.

PASSENGER SIDE BODY – SCBA CYLINDER STORAGE PROVISIONS

A storage area for an SCBA cylinder shall be provided in the forward area of the passenger's side wheel well. Dimensions shall be 8" diameter x 26" deep.

The SCBA door shall be a Cast Products door.

The SCBA cylinder storage tube shall be made from plastic. There shall be rubber matting to cusion the bottle glued into the tube.

DOOR LATCH

The specified hinged door(s) shall be equipped with (1), textured chrome lever latch(es). Latch(es) shall be non-locking style with a raised button.

SCBA CYLINDER STRAPS

There shall be a 1" nylon tether installed to secure the bottle in the storage tube.

PASSENGER SIDE BODY -- SCBA CYLINDER STORAGE PROVISIONS

A storage area for an SCBA cylinder shall be provided in the rearward area of the passenger's side wheel well. Dimensions shall be 8" diameter x 26" deep.

The SCBA door shall be a Cast Products door.

The SCBA cylinder storage tube shall be made from plastic. There shall be rubber matting to cusion the bottle glued into the tube.

DOOR LATCH

The specified hinged door(s) shall be equipped with (1), textured chrome lever latch(es). Latch(es) shall be non-locking style with a raised button.

SCBA CYLINDER STRAPS

There shall be a 1" nylon tether installed to secure the bottle in the storage tube.

RUB RAILS, CLEARANCE LIGHTS, AND REFLECTIVE TAPE

The sides of the lower body area fore and aft of the wheel well area shall be provided with 2" x 1.25" x .250" extruded aluminum rub rails, with end caps or angled corners.

Specified part shall include White reflective striping.

FRONT OF BODY -- PROTECTIVE SURFACE

The entire front of the apparatus body shall include a protective surface, constructed of aluminum tread plate material.

FRONT CORNERS OF BODY -- PROTECTIVE SURFACES

The front corners of the apparatus body shall include a protective surface installed. The surface shall be constructed of polished stainless steel material.

REAR BODY PANELS

The entire rear of the apparatus body shall be painted apparatus color.

OUTER REAR BODY PANELS -- PROTECTIVE COVERING

The rear outer panels of the body shall have protective surfaces installed on the corners. The protective covering shall be constructed of polished stainless steel material.

TOP OF BODY COMPARTMENTS -- PROTECTIVE SURFACES

The top of the side compartments shall have a protective surfaces installed. The surface shall be constructed of aluminum tread plate material.

ANODIZED ALUMINUM DRIP RAIL

All enclosed compartment doors shall be provided with an aluminum drip rail above the doors.

ALUMININUM – COMPARTMENT DOOR, HINGED OVERLAP

One (1) single, vertically hinged door shall be provide and fabricated from aluminum. The frame of the door shall be constructed of 1.75" x 1.75" x .125" aluminum tubing to prevent corrosion and provide structural support. The spacing created by the frame tubing shall filled with Styrofoam for added support, dent resistance, insulation and noise reduction. The exterior surface shall be .125" aluminum for durability. The interior surface shall be .080" aluminum. There shall be no mechanical fasteners, such as bolt heads or rivets on the inside or outside of the doors.

The exterior of the door shall overlap the opening of the compartment. A .75" lip shall be constructed around the opening of the compartment and the exterior of the door. A rubber seal shall be installed on the .75" lip on both the compartment and the door to provide for a double seal against water and dust.

The door shall be designed utilizing a D-ring style latch system. A 6" stainless steel D-ring latch, large enough to accommodate a gloved hand, shall be mounted on the exterior of the door. A stainless steel bezel shall be installed to house and protect the D-ring locking mechanism. The easily serviced bezel shall be mounted utilizing stainless steel screws. The D-ring locking mechanism shall be a double catch design. The first catch shall engage to secure the door in the event of improper closure. The second catch shall seal the door from water and other elements once the door has been properly closed.

The door shall be mounted using a stainless steel piano style hinge and a .25" diameter hinge pin for stability. The vertical hinge shall be mounted to the body frame with threaded inserts and stainless steel screws to preserve functionality and ease of maintenance in the event of damage.

Gas struts shall be utilized to hold the door in the open position and to prevent the door from slamming during closing. The gas struts shall be mounted directly to the door with a stainless steel bracket assembly for stability and ease of maintenance. The gas struts shall be mounted to the interior of the compartment with a fully adjustable assembly.

The exterior of the compartment doors shall be painted to match the body in quality and tone. The interior surface shall not be painted, it shall be sanded utilizing a dual orbital technique.

The specified door(s) shall have a Polished stainless-steel D-ring door handle.

The specified door(s) D-ring handles shall be equipped with manual key door locks keyed to use the 1250 key.

COMPARTMENT DOOR EDGE STRIPING

The hinged compartment doors shall have reflective striping applied on the edges. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

ALUMININUM – COMPARTMENT DOOR, HINGED OVERLAP

There shall be five (5) double, vertically hinged sets of doors fabricated from aluminum and installed on the apparatus body. Each door shall feature exterior surfaces which overlaps the opening of the compartment. The exterior surface shall be .125" aluminum for durability and damage resistance. The interior surface shall be .080" aluminum for structural support and overall appealing appearance of the compartment. The frame of the doors shall be constructed of 1.75" x 1.75" x .125" aluminum tubing to prevent corrosion and provide structural support. The spacing created by the frame tubing shall be filled with Styrofoam for added support and dent resistance, temperature insulation, and noise reduction.

A .75" lip shall be constructed around the opening of the compartment and the exterior of the door. A rubber seal shall be installed on the .75" lip of both the compartment and the door to provide for a double seal against water and dust. A rain gutter shall be mounted above the latch type door for an added third layer of water protection.

The doors shall be designed utilizing a D-ring latch system. A 6 inch stainless steel D-ring latch, large enough to accommodate a gloved hand, shall be mounted on the exterior of the door to allow the door to seal and fasten in the closed position. A stainless steel bezel shall be installed to house and protect the D-ring locking mechanism. The easily serviced bezel shall be mounted utilizing stainless steel screws for added stability of the mechanism

and ease of maintenance in the event of damage. The D-ring locking mechanism shall be of a double catch design. The first catch shall engage to secure the door in the event of improper closure. The second catch will seal the door to water and other elements once the doors has been properly closed.

The doors shall be mounted with a stainless steel hinges with .25" diameter hinge pin for stability. The vertical hinges shall be mounted to the body frame with threaded inserts and stainless steel screws to preserve functionality with use or age and ease of maintenance in the event of damage.

Gas struts shall be utilized to hold the door in the open position and to prevent the door from slamming during closing. The gas struts are mounted directly to the door with a stainless steel bracket assembly for stability and ease of maintenance. The gas struts shall be mounted to the interior of the compartment with fully adjustable assembly for ease of adjustment and maintenance while increasing stability.

The specified door(s) shall have a Polished stainless-steel D-ring door handle.

The specified door(s) D-ring handles shall be equipped with manual key door locks keyed to use the 1250 key.

COMPARTMENT DOOR EDGE STRIPING

The hinged compartment doors shall have reflective striping applied on the edges. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

REAR STEP

The rear bumper shalll be made from aluminum diamondback grip strut. The design of the grip strut shall allow for no debris or dust buildup and will allow for easy clean out with just water.

The step shall be of a three piece design each section to operate independently during body and chassis flexing. The step will be full body width.

The drop step will have locking positions to allow for up position storage and rear compartment door opening access.

AUXILIARY FIXED STEP -- DRIVERS SIDE REAR

Three (3) Cast Products square cast aluminum auxiliary step(s) shall be provided. The step shall be installed on the rear drivers side of the body.

AUXILIARY FIXED STEP -- PASSENGER SIDE REAR

Three (3) Cast Products square cast aluminum auxiliary step shall be provided. The step shall be installed on the rear passenger side of the body.

HANDRAILS

One (1) knurled type non-slip handrail, approximately 18" in length, shall be vertically installed.

HANDRAILS

Two (2) knurled type non-slip handrail, approximately 42" in length, shall be vertically installed.

HANDRAILS

Two (2) knurled type non-slip handrail, approximately 12" in length, shall be horizontally installed.

HANDRAILS

Two (2) knurled type non-slip handrail, approximately 18" in length, shall be horizontally installed.

HANDRAILS

One (1) knurled type non-slip handrail, approximately 60" in length, shall be horizontally installed.

HOSE BODY CONSTRUCTION SPECIFICATIONS

The hose bed side sheets and floor shall be constructed from aluminum material. The hosebed shall provide two separate hose beds one on the left and one on the right side of the top loaded center dunnage. The hose body shall be free of sharp corners, bolts, or other obstructions that may catch hose and other equipment.

HOSE STORAGE BRACKETS

There shall be two (2) I-Zone hose bracket(s) provided on the rear of the apparatus body one on each side left and right. The mount(s) shall be mounted under CPI fixed step(s). Approx length of the I-zone pole shall be 24".

ALUMINUM HOSEBED GRATING

The hose bed compartment deck shall be constructed entirely from maintenance-free, extruded aluminum slats. The slats shall feature an anodized, contoured, ribbed top surface. The slats shall be of widths approximately 3/4" high x 4.5" wide and shall be welded into a one-piece grid system to prevent the accumulation of water and allow ventilation to assist in drying hose.

ALUMINUM HOSEBED COVER

Two (2) separate aluminum tread plate hose bed covers shall be installed, ⅛-inch aluminum alloy diamond plate reinforced with a ⅛-inch aluminum alloy hat section as needed to support walking on the hose bed covers. The covers shall be hinged on the outboard side using full length polished stainless steel hinges with a minimum ⅜-inch pin and 1-inch joint length and installed to avoid any hindrance in walking on hose bed covers.

The hose bed covers shall have full length handrails installed along the rear lip of the covers and two (2) mechanisms on each cover to assist with opening and closing of the hose bed covers. Each hose bed cover shall have a mechanism to hold the hose bed cover in the open position and will be substantial enough to prevent accidental closing in extreme wind conditions.

The covers shall be reinforced so that they will support the weight of a person walking on the cover and shall be sloped to the outboard side of the apparatus to aid in water run-off.

HOSEBED REAR ENCLOSURE

A vinyl end skirt with three (3) straps, and large quick release buckles (minimum 2-inch) shall be installed on each hose bed cover. Quick release buckles and nylon tie down straps shall be attached to the end skirts. The end skirts will be weighted at the bottom end with a full width flat strip of metal sewn into the hem of the skirt. The end skirts, straps, buckles, etc. will be exposed to direct sun light and shall be protected against UV rays.

The flaps shall be red in color.

HOSEBED -- AREA LIGHTS

(4) Tecniq E10 lights shall be provided and installed on hosebed door(s).

DOOR AJAR SENSOR

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

WATER TANK SPECIFICATIONS

A 500 gallon booster tank (Poly Tank) shall be fabricated from a minimum of .500" polypropylene complete with a minimum of .375" polypropylene internal full height baffles that are raised 4" off the tank floor for maximum water flow between baffles. In addition, provisions for the main pump outlet, direct tank filler inlet, a pump to tank filler/churn valve inlet, a back pump filler outlet, a fitting for an electronic water level gauge sensor and clean outs for manual tank flushing shall be provided. The tank shall be structurally reinforced and restrained to prevent deformities or damage to the tank or apparatus body during stressed off road operations. The booster tank shall be a rectangular design, and shall be capable of being completely removable from the

body without cutting or bending of any components. The tank and cradle assembly shall be mounted to the chassis frame in strict accordance to the tank manufacturer's installation guidelines.

The water tank shall be configured in a rectangular style with consistent widths on the sides from top to bottom.

TANK FILL AND OVERFLOW PROVISIONS

The water tank shall have a combination vent and manual fill tower. The fill tower shall be fabricated from 1/2" polypropylene and shall have a minimum outer perimeter dimension of 8" x 8". The tower shall have a 1/4" thick polypropylene screen and a polypropylene hinged cover. Inside the fill tower, halfway down from the top, shall be fastened a vent overflow pipe. The vent overflow shall be fabricated from Schedule 40 polypropylene pipe, with a minimum I.D. of 4". The vent overflow shall be designed to run through the tank interior and shall be designed to exit the water tank interior behind the rear wheels.

The tank cover shall be fabricated from 1/2" thick polypropylene and shall incorporate a three-piece design which allows for the removal of each individual cover section for inspection or repair of the tank interior, if necessary. The tank cover shall be recessed 3/8" from the top of the tank sides and shall be welded to both the sides and the longitudinal baffles. Each of the three cover sections shall have hold downs to assist in keeping the cover rigid under fast filling conditions. These hold downs shall consist of 2" polypropylene dowels, spaced a maximum of 30" apart, fitted and then welded to the transverse partitions. The dowels shall extend through the cover sections and be welded to them. Two of the dowels shall be drilled and tapped to accommodate the tank lifting eyes.

The sump shall have a minimum dimension of 8" x 6" with a 3/4" thick bottom. On all tanks with a bulkhead suction inlet, a 3" Schedule 40 polypropylene pipe sweep shall be provided from the front of the tank to the sump location. The sump shall have a threaded plug located at the bottom of it for a tank drain and clean out.

There shall be two standard tank outlets: one for the tank to pump suction line, which shall be a minimum of a 3" NPTF coupling, and one for a tank fill line, which shall be a minimum of a 1-1/2" NPTF coupling. All tank fill couplings shall be backed with flow deflectors to break up the stream of water entering the tank.

The water tank shall rest on the body subframe cross members, which shall be spaced a maximum of 22" apart. The tank shall be insulated from those cross members by hard rubber insulators, with a minimum thickness of 1/4", glued and mechanically fastened to the cross members to protect the tank from direct contact with the steel body subframe. The tank shall be designed on a free-floating suspension principle and shall not require the use of additional hold downs. The tank shall be completely removable without disturbing or dismantling the apparatus body structure.

VENT AND OVERFLOW

The fill tower shall incorporate a vent and overflow system shall be designed into the water tank. The system shall include a 3" diameter PVC pipe that functions both as an air vent while emptying the tank and as an overflow when filling the tank. The overflow shall discharge excess water below the frame rails of the vehicle.

TANK SUMP AND DRAIN PROVISIONS

A one (1) cubic foot (minimum) polypropylene sump, with anti-swirl baffles shall be provided. The sump shall be located as close to the center of the tank floor as the chassis cross members, and differential driveline will allow.

One (1) 3-inch or 4-inch National Pipe Thread (NPT) outlet and plug shall be provided in the sump floor for flushing of the tank. A 1½-inch drain valve shall be provided in the tank sump for flushing of the booster tank. The valve will be located as to provide for adequate clearance from cross members and differential during extreme twisting motions of the chassis and buildup

The sump shall also be provided with a 1-inch NPT outlet for the back pump filler hose.

Due to space constraints, it may be necessary to locate the main pump suction outlet in the tank sump for maximum water usage. The main pump suction tube will be of an adequate size to supply the main pump with enough water to meet pump ratings.

A minimum 3-inch direct tank fill NPT inlet and internal manifold shall be provided on the left rear of the tank. If the direct tank fill inlet is located on the rear tank wall, the inlet manifold shall pass through the first baffle and feature a turn down to eliminate any possible damage to the tank or baffles while filling the tank.

WATER TANK DRAIN PROVISIONS

A 3" plugged drain provision shall be installed in the bottom of the water tank, sump, or plumbing for water tank draining and the flushing-out of debris.

CLASS A FOAM TANK SPECIFICATIONS

The Class A foam tank shall have a capacity of 20 gallons. The foam tank shall be manufactured by UPF and have a lifetime warranty.

The tank shall be equipped with a positive sealing pressure/vacuum vent type cap, a low foam concentrate sensor that turns off the foam pump at a pre-set level, a visual sight gauge, an easily accessible brass or stainless steel drain valve located at the lowest point of the foam tank and an accessible brass or stainless steel cleanable strainer installed in the supply line from the foam tank to the foam pump.

The foam tank shall be mounted on a removable sub-structure. The tank will have a positive tie down. The tie down will allow for easy removal of the foam tank.

The foam tank will have two (2) quarter turn brass or stainless shut off valves at the pump supply and fill lines to allow for the removal of the tank without loss of foam. The float switch harness and the foam concentrate supply and fill lines shall have connections located adjacent to the tank to facilitate foam tank removal.

FOAM TANK FILL AND VENTING PROVISIONS

The foam concentrate tank shall be provided with a fill pipe having a volume of not less than 2 percent of the total tank volume. The filler opening shall be capped with a sealed air-tight threaded cover. The fill opening shall be designed to incorporate a removable screen and shall be located so that foam concentrate from a five (5) gallon container can be dumped into the tank.

The foam tank filler shall be equipped with a pressure/vacuum vent that enables the tank to compensate for changes in pressure or vacuum when filling or withdrawing foam concentrate from the tank. The pressure/vacuum vent shall not allow atmospheric air to enter the foam tank except during operation or to compensate for thermal fluctuations. The vent shall be protected to prevent foam concentrate from escaping or directly contacting the vent at any time. The vent shall be of sufficient size to prevent tank damage during filling or foam withdrawal.

A color coded label or visible permanent marking that reads "CLASS A -- FOAM TANK FILL" shall be placed at or near the foam concentrate tank fill opening. An additional label shall be placed at or near any foam concentrate tank fill opening stating the type of foam concentrate the system is designed to use.

Any restrictions on the types of foam concentrate that can be used with the system shall also be stated, along with a warning message that states "WARNING: DO NOT MIX BRANDS AND TYPES OF FOAM."

A 3/4" diameter connection, piping, and gate type valve shall be installed for the foam tank for draining purposes.

DIRECT TANK FILL - REAR DRIVERS SIDE

A valve for direct filling of the tank shall be supplied. The 1/4 turn valve shall be configured with 2-1/2" NH female threads, debris screen, threaded plug with retention chain and lever handle. The valve shall be located on the drivers side rear of the apparatus.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome brass 2-1/2" NH rocker lug plug with a securing chain or cable shall be installed on the intake.

(1) chrome plated brass 30 degree elbow with 2.5" swivel female NH x 2.5" male NH thread with rocker lugs shall be provided on the direct tank fill.

BACK PACK FILL SYSTEM

There shall be one (1) back pack fill system provided and installed on the lower area of the pump panel. The valve plumbing shall be 3/4" I.D. hose.

12 VOLT ELECTRICAL SPECIFICATIONS

The following describes the low voltage electrical system on the apparatus including all panels, electrical components, switches and relays, wiring harnesses and other electrical components. The apparatus manufacturer shall conform to the latest Federal DOT standards, current automotive electrical system standards, and the applicable requirements of the NFPA 1906.

Wiring shall be stranded copper or copper alloy conductors of a gauge rated to carry 125 percent of the maximum current for which the circuit is protected. Voltage drops shall not exceed 10 percent in all wiring from the power source to the using device. The wiring and wiring harness and insulation shall be in conformance to applicable SAE and NFPA standards. The wiring harness shall conform to SAE J-1128 with GXL temperature properties. Exposed wiring shall be run in a loom with a 290 degree Fahrenheit rating. Wiring looms shall be properly supported and attached to body members. Electrical conductors shall be constructed in accordance with applicable SAE standards, except when good engineering practice requires special construction.

All wiring connections and terminations shall provide positive mechanical and electrical connections and be installed in accordance with the device manufacturer's instructions. When wiring passes through metal panels, electrical connections shall be with mechanical type fasteners and rubber/plastic grommets.

Wiring between cab and body shall be split using Deutsch type connectors or enclosed in a terminal junction panel allowing body removal with minimal impact on the apparatus electrical system. Connections shall be insulated with heat shrink crimp-type tubing to resist moisture and foreign debris such as grease and road grime. Weather resistant connectors shall be provided throughout the system.

Electrical junction or terminal boxes shall be weather resistant and located away from water spray conditions. When required, automatic reset breakers and relays shall be housed in the main body junction panel.

There shall be no exposed electrical cabling, harnesses, or terminal connections located in compartments, unless enclosed in an electrical junction box or covered with a removable electrical panel. Wiring shall be secured in place and protected against heat, liquid contaminants and damage and shall be uniquely identified at least every six inches (6") by color coding or permanent marking with a circuit function code and identified on a reference chart or electrical wiring schematic per requirements of applicable NFPA 1906 standards.

Low voltage protective devices shall be provided for the electrical circuits. The devices shall be accessible and located in required terminal connection locations or weather resistant enclosures. Over current protection devices shall be automatic reset type suitable for electrical equipment and meet SAE standards. All electrical equipment, switches, relays, terminals, and connectors shall have a direct current rating of 125 percent of maximum current for which the circuit is protected. Electro-magnetic interference suppression shall be provided in the system as required in applicable SAE standards.

The electrical system shall include the following:

Electrical terminals in weather exposed areas shall have a non-conductive grease or spray applied. All terminal plugs located outside of the cab or body shall be treated with a corrosion preventative compound.

All electrical wiring shall be placed in a protective loom or be harnessed.

Exposed connections shall be protected by heat shrink material and sealed connectors.

Large fender washers shall be used when fastening equipment to the underside of the cab roof and all holes made in the roof shall be caulked with silicone.

Electrical components installed in exposed areas shall be mounted in a manner that will not allow moisture to accumulate inside.

A service loop shall be provided behind an electrical appliance to allow them to be pulled away from mounting area for inspection and service work.

Upon completion of the vehicle and prior to delivery, the apparatus shall be electrically tested and the electrical testing, certifications, and test results shall be submitted with delivery documentation per requirements of NFPA 1906.

ELECTRICAL WIRING HARNESS

The electrical system shall be divided into separate harnesses. The individual harness shall be connected with Deutsch type quick connectors. The wiring and appliances shall be protected by automatic reset type circuit breakers.

CUSTOM FABRICATED CONSOLE

A custom fabricated electrical console and enclosure shall be located between the driver's and the officer's seating positions. The console shall feature a fixed lid with optional radio mounting locations located at the front of the console. The console shall have two (2) cup holders.

The specified compartment(s) shall be coated with Hamlet Black colored Multi-Spec paint.

12 VOLT POWER SOURCE

There shall be two (2) 12 volt plug-in utility power connection(s) rated at 20 amps provided and installed in the cab console.

The specified power source shall be wired to the switched battery circuit.

USB CHARGING PORT

Two (2) USB charging port(s) shall be installed in the cab of the truck for the fire departments accessory devices. The USB charging port shall have two (2) USB connections and shall have a 5 volt, 4.8A output with Intelligent Device Recognition capabilities.

The specified power source shall be wired to the switched battery circuit.

BATTERY SWITCH - MASTER DISCONNECT

A battery cutoff switch shall be provided in the cab within easy reach of the driver; by the chassis manufacturer. The switch shall be rated for 300 amps.

BATTERY CHARGER

A Kussmaul Autocharge 1000 PLC, model #091-215-12, automatic battery charger shall be provided. The battery charger shall be wired to the 12 volt battery system. The unit shall be mounted in a clean, dry area accessible for service and/or maintenance. It shall be wired to the specified shore power receptacle. Included in the package is a Kussmaul Super 20 Auto Eject Deluxe with built in bar graph display. Mounting location shall be determined in pre-con

The specified auto eject cover shall be yellow.

IDENTIFICATION LIGHTS

All LED identification lights shall be installed on the vehicle as required by applicable highway regulations.

LICENSE PLATE MOUNTING AND LIGHT

A predrilled backing plate and LED light shall be installed on the rear for mounting of the license plate.

Stop, Tail, Turn Lights, Whelen M Series, Quad, Package

STOP AND TAIL LIGHTS

Two (2) Whelen Model #M62BTTC, 4" x 6" LED brake, tail, turn lights with clear lenses shall be provided. The light shall be furnished with a Clear optic polycarbonate lens for maximum light spread and furnished with

a 6" wire pigtail. The light can be used in combination with a separated turn signal, or alone as a Brake, tail, and turn light.

TURN SIGNALS

Two (2) Whelen M62TC light heads shall be installed on the apparatus. The lightheads shall feature an Clear lens with sequential cheveron arrow, with multi flash pattern.

BACK-UP LIGHTS

Two (2) Whelen M-Series M62BU, 4" x 6" rear LED back-up lights shall be installed.

TAILLIGHT BEZELS

Two chrome (2) Whelen M Series housings shall be installed at the rear of the apparatus for four (4) Whelen M-Series stop-tail-turn-backup and warning lights.

ZONE C-- LOWER REAR WARNING LIGHTS

Two (2) Whelen M6 Series Model # M6RC warning light shall be provided. The warning light shall incorporate Linear Super-LED® and Smart LED® technology. The M6RC configuration shall consist of 18 red Super-LEDs and a clear optic polycarbonate lens.

The lens/reflector assembly shall be sealed and resistant to water, moisture, dust, and other environmental conditions. The hard coated lens shall provide extended life/luster protection against UV and chemical stresses.

MAP LIGHT

One (1) Havis Shields #C-MAP-T-LED 12" LED map light, 12 volt, with a gooseneck arm an on-off switch located on the base of the light shall be installed on the dashboard.

FRONT BUMPER -- GROUND LIGHTS

There shall be two (2) Tecniq E10, LED ground light(s) installed under the front bumper.

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

CAB GROUND LIGHTS

There shall be four (4) Tecniq E10, LED ground lights installed under the cab door(s).

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

GROUND LIGHTS - PUMP PANEL

There shall be two (2) Tecniq E10, LED ground lights installed under the pump panel running board(s).

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

GROUND LIGHTS - UNDER REAR STEP

There shall be two (2) Tecniq E10, LED ground lights installed under the rear step area.

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

PIONEER MICRO

There shall be two (2) Whelen Pioneer Micro lights provided and installed on the apparatus.

The lights shall be located:

- Two located under the middle steps on the back of the apparatus. They shall be operated by the "Rear Scene" switch located on the Whelen siren controller

PIONEER MICRO

There shall be two (2) Whelen Pioneer Micro lights provided and installed on the apparatus. They shall be located in the center section of the front bumper in provided cutouts. The lights shall be controlled by a button labeled "Scene Front" on the whelen siren controller.

The fowarad facing scene light(s) shall be activated by individual buttons or switches on the cab center console.

PIONEER FLOOD/SPOT SURFACE MOUNT LIGHTHEAD

Four (4) Whelen Pioneer Plus™ Model # PCPSM1C shall be provided and installed on the apparatus. The light head shall have a chrome housing.

The scene lights shall be activated by individual buttons or switches on the cab center console. Left, right, and rear scene light controls.

DOOR OPEN WARNING LIGHT

The door ajar warning system shall be separated into four zones, a Front, Left, Right, and Rear zone. Each zone shall have an individually labeled warning light and also activate an audible alarm. The door ajar lights and audible alarm shall activate only when the apparatus parking brake has been released.

RADIO ANTENNA INSTALLATION

There shall be four (4) radio antenna installed on the apparatus and routed to the cab center console.

BACK UP ALARM

One (1) solid state back up alarm shall be provided at the rear of the apparatus. The back up alarm shall be wired to the reverse circuit of the transmission, and shall provide an audible alarm to the rear of the apparatus when reverse gear is selected. The alarm shall have a volume of 87 to 112 db while in operation.

HEADLIGHT FLASHER

The headlights shall be set to alternate flash (Wig-Wag).

The wig wag shall be triggered by the siren controller slide switch position 3.

ELECTRONIC SIREN

A Whelen CenCom Core C399 electric siren and lighting control module shall be installed.

WHELEN CORE CONTROL HEAD

There shall be a Whelen model CCTL6 control head supplied with the Cencom Core system. It features a 3 section control head, with 8 push buttons, 4- position slide switch with a 7 position rotary knob. A manual siren and air horn button, and 3 traffic advisor control buttons.

WHELEN CORE WECANX TRAFFIC ADVISOR MODULE

There shall be a Whelen model CTA Traffic Advisor module interfaced with the Cencom Core system.

SIREN SPEAKER

One (1) Whelen Model #SA315P siren speaker shall be provided. The 100 watt siren speaker shall be designed in a black nylon composite housing with 123 decibel rating.

ZONE A FRONT UPPER -- LIGHTBAR

One (1) Whelen Cenator series WeCanx light bar shall be installed on the apparatus.

ZONE A -- LOWER FRONT WARNING LIGHTS

Two (2) Whelen M6 Series Model # M6D warning light shall be provided. The warning light shall incorporate Linear Super-LED® and Smart LED® technology.

The lens/reflector assembly shall be sealed and resistant to water, moisture, dust, and other environmental conditions. The hard coated lens shall provide extended life/luster protection against UV and chemical stresses. The M6D light shall include a split design including red and white LEDs, with a clear lens.

The specified Whelen M6 lights shall be equipped with chrome plastic flange type light bezel mountings.

ZONE A -- LOWER FRONT WARNING LIGHTS

Two (2) Whelen ION series lights, model TLIR shall provided. The light head shall have red LEDs.

ZONE B AND D-- FRONT INTERSECTION

Two (2) Whelen M6 Series Model # M6RC warning light shall be provided. The warning light shall incorporate Linear Super-LED® and Smart LED® technology. The M6RC configuration shall consist of 18 red Super-LEDs and a clear optic polycarbonate lens.

The lens/reflector assembly shall be sealed and resistant to water, moisture, dust, and other environmental conditions. The hard coated lens shall provide extended life/luster protection against UV and chemical stresses.

The specified Whelen M6 lights shall be equipped with chrome plastic flange type light bezel mountings.

ZONE B AND D LOWER MID-BODY WARNING LIGHTS

Two (2) Whelen M6 Series Model # M6RC warning light shall be provided. The warning light shall incorporate Linear Super-LED® and Smart LED® technology. The M6RC configuration shall consist of 18 red Super-LEDs and a clear optic polycarbonate lens.
The lens/reflector assembly shall be sealed and resistant to water, moisture, dust, and other environmental conditions. The hard coated lens shall provide extended life/luster protection against UV and chemical stresses.

The specified Whelen M6 lights shall be equipped with chrome plastic flange type light bezel mountings.

ZONE B AND D– UPPER SIDE REAR WARNING LIGHTS

Two (2) Whelen M6 Series Model # M6RC warning light shall be provided. The warning light shall incorporate Linear Super-LED® and Smart LED® technology. The M6RC configuration shall consist of 18 red Super-LEDs and a clear optic polycarbonate lens.

The lens/reflector assembly shall be sealed and resistant to water, moisture, dust, and other environmental conditions. The hard coated lens shall provide extended life/luster protection against UV and chemical stresses.

The specified Whelen M6 lights shall be equipped with chrome plastic flange type light bezel mountings.

ZONE C UPPER REAR

Two (2) Whelen M6 Series Model # M6RC warning light shall be provided. The warning light shall incorporate Linear Super-LED® and Smart LED® technology. The M6RC configuration shall consist of 18 red Super-LEDs and a clear optic polycarbonate lens.

The lens/reflector assembly shall be sealed and resistant to water, moisture, dust, and other environmental conditions. The hard coated lens shall provide extended life/luster protection against UV and chemical stresses.

The specified Whelen M6 lights shall be equipped with chrome plastic flange type light bezel mountings.

REAR TRAFFIC ADVISOR, EIGHT (8) L.E.D. LAMPS

A Whelen TAZ86 eight lamp LINZ6 Super-LED Traffic Advisor with all amber lights shall be provided and mounted at the rear of the body. The solid state traffic advisor shall include model TACTL5 control head, or it can be directly connected to a Whelen CenCon Siren Head Controller.

PAINT CODES/COLORS

The apparatus shall be painted Candy Apple Red.

BODY PAINTING SPECIFICATIONS

All exposed surfaces shall be prepared and painted using a multi-step process to ensure a blemish-free, protective coating for the base metal materials.

All removable items, such as brackets and compartment doors, shall be removed and painted separately to insure finish paint behind them after they are reinstalled.

Due to its modular design, the apparatus body shall be completely finish painted prior to its installation on the

chassis.

The body shall be sanded, and cleaned. Any imperfections or defects in the metal shall be corrected with premium body filler and then sanded smooth.

An epoxy primer shall be utilized on all painted and coated surfaces and shall prepare the metal for the final paint. The direct-to-metal primer shall be used to create a first level seal allowing secure adhesion between the base metal and the subsequent substrates.

All body and components shall then be primed, thoroughly sanded, and meticulously inspected for any imperfections; which shall be properly corrected..

All surfaces shall then be painted with a base coat of premium paint following the guidelines as established by the paint manufacturer. The body shall be painted using a single color to match the cab primary color, and then shall be buffed to a high gloss finish.

INTERIOR COMPARTMENT FINISH

The interior wall, floor and ceiling surfaces of compartments shall be finished with Rust-Oleum brand Multispec color flecked paint. The final color combination shall be determined in pre-con.

The specified compartment(s) shall be coated with Hamlet Black colored Multi-Spec paint.

TOUCH-UP PAINT

Touch-up paint shall be furnished with the completed truck at final delivery.

VALVE PAINTING

All exposed valves shall be painted to match the color of the exterior body.

CHEVRON STRIPING

The outer rear panels of the body only shall have 3M brand 6" wide reflective red and yellow striping installed over 50% of available area. The rear doors, suction doors and ladder door shall not be chevron striped.

STRIPING PACKAGE- SINGLE 4" STRIPE

There shall be a single 4" reflective stripe installed one on each side of the apparatus. The stripe is limited to single color only.

WHEEL CHOCKS

Two (2) Worden brand, Model #HWC-7WH wheel chocks shall be provided.

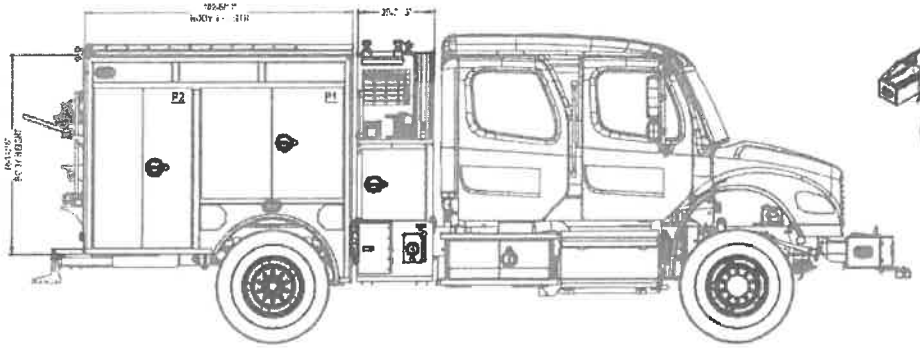
5# DRY CHEMICAL FIRE EXTINGUISHER

One (1) 5# ABC dry chemical fire extinguisher and mounting bracket shall be provided on the apparatus. The extinguisher shall have a pressure gauge and shall be filled with a dry chemical extinguishing agent.

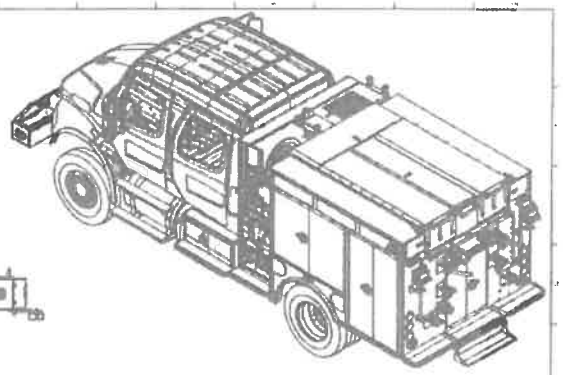
HYDRAULIC JACK

One (1) hydraulic jack shall be provided. The jack shall be designed for lifting capacity of twelve (12) tons.

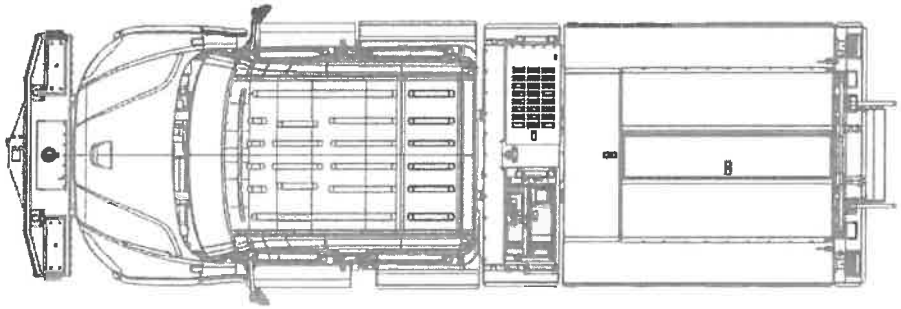
LUG WRENCH



There shall be one (1) lug wrench provided and shipped loose with the completed apparatus.



REFLECTOR



A set of three (3) triangular reflectors shall be provided.

MASTER GENERAL PROVISIONS

This Master Agreement is made and entered into, by and between the Houston-Galveston Area Council hereinafter referred to as H-GAC having its principal place of business at 3555 Timmons Lane, Suite 120, Houston, Texas 77027 and Siddons Martin Emergency Group LLC, hereinafter referred to as the Contractor, having its principal place of business at 1362 E Richey Road, Houston, TX 77073.

WITNESSETH:

WHEREAS, H-GAC hereby engages the Contractor to perform certain services in accordance with the specifications of the Master Agreement; and

WHEREAS, the Contractor has agreed to perform such services in accordance with the specifications of the Master Agreement;

NOW, THEREFORE, H-GAC and the Contractor do hereby agree as follows:

ARTICLE 1: LEGAL AUTHORITY

The Contractor warrants and assures H-GAC that it possesses adequate legal authority to enter into this Master Agreement. The Contractor's governing body, where applicable, has authorized the signatory official(s) to enter into this Master Agreement and bind the Contractor to the terms of this Master Agreement and any subsequent amendments hereto.

ARTICLE 2: APPLICABLE LAWS

The Contractor agrees to conduct all activities under this Master Agreement in accordance with all federal laws, executive orders, policies, procedures, applicable rules, regulations, directives, standards, ordinances, and laws, in effect or promulgated during the term of this Master Agreement, including without limitation, workers' compensation laws, minimum and maximum salary and wage statutes and regulations, and licensing laws and regulations. When required, the Contractor shall furnish H-GAC with satisfactory proof of its compliance therewith.

ARTICLE 3: PUBLIC INFORMATION

Except as stated below, all materials submitted to H-GAC, including any attachments, appendices, or other information submitted as a part of a submission or Master Agreement, are considered public information, and become the property of H-GAC upon submission and may be reprinted, published, or distributed in any manner by H-GAC according to open records laws, requirements of the US Department of Labor and the State of Texas, and H-GAC policies and procedures. In the event the Contractor wishes to claim portions of the response are not subject to the Texas Public Information Act, it shall so; however, the determination of the Texas Attorney General as to whether such information must be disclosed upon a public request shall be binding on the Contractor. H-GAC will request such a determination only if Contractor bears all costs for preparation of the submission. H-GAC is not responsible for the return of creative examples of work submitted. H-GAC will not be held accountable if material from submissions is obtained without the written consent of the contractor by parties other than H-GAC, at any time during the evaluation process.

ARTICLE 4: INDEPENDENT CONTRACTOR

The execution of this Master Agreement and the rendering of services prescribed by this Master Agreement do not change the independent status of H-GAC or the Contractor. No provision of this Master Agreement or act of H-GAC in performance of the Master Agreement shall be construed as making the Contractor the agent, servant, or

employee of H-GAC, the State of Texas, or the United States Government. Employees of the Contractor are subject to the exclusive control and supervision of the Contractor. The Contractor is solely responsible for employee related disputes and discrepancies, including employee payrolls and any claims arising therefrom.

ARTICLE 5: ANTI-COMPETITIVE BEHAVIOR

Contractor will not collude, in any manner, or engage in any practice which may restrict or eliminate competition or otherwise restrain trade.

ARTICLE 6: SUSPENSION AND DEBARMENT

Debarment and Suspension (Executive Orders 12549 and 12689) – A contract award (2 CFR 180.220) must not be made to parties listed on the government-wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR Part 1966 Comp. p. 189) and 12689 (3 CFR Part 1989 Comp. p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

Pursuant to the Federal Rule above, Respondent certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency or by the State of Texas and at all times during the term of the Contract neither it nor its principals will be debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency or by the State of Texas Respondent shall immediately provide the written notice to H-GAC if at any time the Respondent learns that this certification was erroneous when submitted or has become erroneous by reason of changed circumstances. H-GAC may rely upon a certification of the Respondent that the Respondent is not debarred, suspended, ineligible, or voluntarily excluded from the covered contract, unless the H-GAC knows the certification is erroneous.

ARTICLE 7: GOAL FOR CONTRACTING WITH SMALL AND MINORITY BUSINESSES, WOMEN'S BUSINESS ENTERPRISES, AND LABOR SURPLUS AREA FIRMS (if subcontracts are to be let)

H-GAC's goal is to assure that small and minority businesses, women's business enterprises, and labor surplus area firms are used when possible in providing services under a contract. In accordance with federal procurements requirements of 2 CFR §200.321, if subcontracts are to be let, the prime contractor must take the affirmative steps listed below:

1. Placing qualified small and minority businesses and women's business enterprises on solicitation lists;
2. Assuring that small and minority businesses and women's business enterprises are solicited whenever they are potential sources;
3. Dividing total requirements, when economically feasible, into smaller task or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;
4. Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;
5. Using the services and assistance as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce.
6.

Nothing in this provision will be construed to require the utilization of any firm that is either unqualified or unavailable. The Small Business Administration (SBA) is the primary reference and database for information on requirements related to Federal Subcontracting https://www.sba.gov/federal-contracting/contracting-guide/prime-subcontracting

NOTE: The term DBE as used in this solicitation is understood to encompass all programs/business enterprises such as: Small Disadvantaged Business (SDB), Historically Underutilized Business (HUB), Minority Owned Business Enterprise (MBE), Women Owned Business Enterprise (WBE) and Disabled Veteran Business Enterprise (DVBE) or other designation as issued by a certifying agency.

Contractor agrees to work with and assist HGACBuy customer in meeting any DBE targets and goals, as may be required by any rules, processes, or programs they might have in place. Assistance may include compliance with reporting requirements, provision of documentation, consideration of Certified/Listed

subcontractors, provision of documented evidence that an active participatory role for a DBE entity was considered in a procurement transaction, etc.

ARTICLE 8: SCOPE OF SERVICES
The services to be performed by the Contractor are outlined in an Attachment to this Master Agreement.

ARTICLE 9: PERFORMANCE PERIOD
This Master Agreement shall be performed during the period which begins Dec 01 2023 and ends Nov 30 2027. All services under this Master Agreement must be rendered within this performance period, unless directly specified under a written change or extension provisioned under Article 21, which shall be fully executed by both parties to this Master Agreement.

ARTICLE 10: PAYMENT OR FUNDING
Payment provisions under this Master Agreement are outlined in the Special Provisions. H-GAC will not pay for any expenses incurred prior to the execution date of a contract, or any expenses incurred after the termination date of the contract.

ARTICLE 11: PAYMENT FOR WORK
The H-GAC Customer is responsible for making payment to the Contractor upon delivery and acceptance of the goods or completion of the services and submission of the subsequent invoice.

ARTICLE 12: PAYMENT TERMS/PRE-PAYMENT/QUANTITY DISCOUNTS
If discounts for accelerated payment, pre-payment, progress payment, or quantity discounts are offered, they must be clearly indicated in the Contractor's submission prior to contract award. The applicability or acceptance of these terms is at the discretion of the Customer.

ARTICLE 13: REPORTING REQUIREMENTS
If the Contractor fails to submit to H-GAC in a timely and satisfactory manner any report required by this Master Agreement, or otherwise fails to satisfactorily render performances hereunder, H-GAC may terminate this Master Agreement with notice as identified in Article 29 of these General Provisions. H-GAC has final determination of the adequacy of performance and reporting by Contractor. Termination of this Master Agreement for failure to perform may affect Contractor's ability to participate in future opportunities with H-GAC. The Contractor's failure to timely submit any report may also be considered cause for termination of this Master Agreement. Any additional reporting requirements shall be set forth in the Special Provisions of this Master Agreement.

ARTICLE 14: INSURANCE
Contractor shall maintain insurance coverage for work performed or services rendered under this Master Agreement as outlined and defined in the attached Special Provisions.

ARTICLE 15: SUBCONTRACTS AND ASSIGNMENTS
Except as may be set forth in the Special Provisions, the Contractor agrees not to assign, transfer, convey, sublet, or otherwise dispose of this Master Agreement or any right, title, obligation, or interest it may have therein to any third party without prior written approval of H-GAC. The Contractor acknowledges that H-GAC is not liable to any subcontractor or assignee of the Contractor. The Contractor shall ensure that the performance rendered under all subcontracts shall result in compliance with all the terms and provisions of this Master Agreement as if the performance rendered was rendered by the Contractor. Contractor shall give all required notices, and comply with all laws and regulations applicable to furnishing and performance of the work. Except where otherwise expressly required by applicable law or regulation, H-GAC shall not be responsible for monitoring Contractor's compliance, or that of Contractor's subcontractors, with any laws or regulations.

ARTICLE 16: AUDIT
Notwithstanding any other audit requirement, H-GAC reserves the right to conduct or cause to be conducted an independent audit of any transaction under this Master Agreement, such audit may be performed by the H-GAC

local government audit staff, a certified public accountant firm, or other auditors designated by H-GAC and will be conducted in accordance with applicable professional standards and practices. The Contractor understands and agrees that the Contractor shall be liable to the H-GAC for any findings that result in monetary obligations to H-GAC.

ARTICLE 17: TAX EXEMPT STATUS

H-GAC and Customer members are either units of government or qualified non-profit agencies, and are generally exempt from Federal and State sales, excise or use taxes. Respondent must not include taxes in its Response. It is the responsibility of Contractor to determine the applicability of any taxes to an order and act accordingly. Exemption certificates will be provided upon request.

ARTICLE 18: EXAMINATION OF RECORDS

The Contractor shall maintain during the course of the work complete and accurate records of all of the Contractor's costs and documentation of items which are chargeable to H-GAC under this Master Agreement. H-GAC, through its staff or designated public accounting firm, the State of Texas, and United States Government, shall have the right at any reasonable time to inspect, copy and audit those records on or off the premises by authorized representatives of its own or any public accounting firm selected by H-GAC. The right of access to records is not limited to the required retention period, but shall last as long as the records are retained. Failure to provide access to records may be cause for termination of the Master Agreement. The records to be thus maintained and retained by the Contractor shall include (without limitation): (1) personnel and payroll records, including social security numbers and labor classifications, accounting for total time distribution of the Contractor's employees working full or part time on the work, as well as cancelled payroll checks, signed receipts for payroll payments in cash, or other evidence of disbursement of payroll payments; (2) invoices for purchases, receiving and issuing documents, and all other unit inventory records for the Contractor's stocks or capital items; and (3) paid invoices and cancelled checks for materials purchased and for subcontractors' and any other third parties' charges.

Contractor agrees that H-GAC will have the right, with reasonable notice, to inspect its records pertaining to purchase orders processed and the accuracy of the fees payable to H-GAC. The Contractor further agrees that the examination of records outlined in this article shall be included in all subcontractor or third-party Master Agreements.

ARTICLE 19: RETENTION OF RECORDS

The Contractor and its subcontractors shall maintain all records pertinent to this Master Agreement, and all other financial, statistical, property, participant records, and supporting documentation for a period of no less than seven (7) years from the later of the date of acceptance of the final payment or until all audit findings have been resolved. If any litigation, claim, negotiation, audit or other action involving the records has been started before the expiration of the retention period, the records shall be retained until completion of the action and resolution of all issues which arise from it, or until the end of the seven (7) years, whichever is later, and until any outstanding litigation, audit, or claim has been fully resolved.

ARTICLE 20: DISTRIBUTORS, VENDORS, RESELLERS

Contractor agrees and acknowledges that any such designations of distributors, vendors, resellers or the like are for the convenience of the Contractor only and the awarded Contractor will remain responsible and liable for all obligations under the Contract and the performance of any designated distributor, vendor, reseller, etc. Contractor is also responsible for receiving and processing any Customer purchase order in accordance with the Contract and forwarding of the Purchase Order to the designated distributor, vendor, reseller, etc. to complete the sale or service. H-GAC reserves the right to reject any entity acting on the Contractor's behalf or refuse to add entities after a contract is awarded.

ARTICLE 21: CHANGE ORDERS AND AMENDMENTS

A. Any alterations, additions, or deletions to the terms of this Master Agreement, which are required by changes in federal or state law or by regulations, are automatically incorporated without written amendment hereto, and shall become effective on the date designated by such law or by regulation.

B. To ensure the legal and effective performance of this Master Agreement, both parties agree that any amendment that affects the performance under this Master Agreement must be mutually agreed upon and that all such amendments must be in writing. After a period of no less than 30 days subsequent to written notice, unless sooner implementation is required by law, such amendments shall have the effect of qualifying the terms of this Master Agreement and shall be binding upon the parties as if written herein.

C. Customers have the right to issue a change order to any purchase orders issued to the Contractor for the purposes of clarification or inclusion of additional specifications, qualifications, conditions, etc. The change order must be in writing and agreed upon by Contractor and the Customer agency prior to issuance of any Change Order. A copy of the Change Order must be provided by the Contractor to, and acknowledged by, H-GAC.

ARTICLE 22: CONTRACT ITEM CHANGES

A. If a manufacturer discontinues a contracted item, that item will automatically be considered deleted from the contract with no penalty to Contractor. However, H-GAC may at its sole discretion elect to make a contract award to the next lowest Respondent for the item, or take any other action deemed by H-GAC, at its sole discretion, to be in the best interests of its Customers.

B. If a manufacturer makes any kind of change in a contracted item which affects the contract price, Contractor must advise H-GAC of the details. H-GAC may allow or reject the change at its sole discretion. If the change is rejected, H-GAC will remove the item from its program and there will be no penalty to Contractor. However, H- GAC may at its sole discretion elect to make a contract award to the next lowest Respondent for the item, or take any other action deemed by H-GAC, at its sole discretion, to be in the best interests of its Customers.

C. If a manufacturer makes any change in a contracted item which does not affect the contract price, Contractor shall advise H-GAC of the details. If the 'new' item is equal to or better than the originally contracted item, the 'new' item shall be approved as a replacement. If the change is rejected H-GAC will remove the item from its program and there will be no penalty to Contractor. However, H-GAC may at its sole discretion elect to make a contract award to the next lowest Respondent for the item or may take any other action deemed by H-GAC at its sole discretion, to be in the best interests of its Customers.

D. In the case of specifically identified catalogs or price sheets which have been contracted as base bid items or as published options, routine published changes to products and pricing will be automatically incorporated into the contract. However, Contractor must still provide written notice and an explanation of the changes to products and pricing. H-GAC will respond with written approval.

ARTICLE 23: CONTRACT PRICE ADJUSTMENTS

Price Decreases

If Contractor's Direct Cost decreases at any time during the full term of this award, Contractor must immediately pass the decrease on to H-GAC and lower its prices by the amount of the decrease in Direct Cost. (Direct Cost means Contractor's cost from the manufacturer of any item or if Contractor is the manufacturer, the cost of raw materials required to manufacture the item, plus costs of transportation from manufacturer to Contractor and Contractor to H-GAC. Contractor must notify H-GAC of price decreases in the same way as for price increases set out below. The price decrease shall become effective upon H-GAC's receipt of Contractor's notice. If Contractor routinely offers discounted contract pricing, H-GAC may request Contractor accept amended contract pricing equivalent to the routinely discounted pricing.

Price Increase
Contractors may request a price increase for items priced as Base Bid items and Published Options. The amount of any increase will not exceed actual documented increase in Contractor's Direct Cost and will not exceed 10% of the previous bid price. Considerations on the percentage limit will be given if the price increase is the result of increased tariff charges or other governmental actions, or other economic factors. Manufacturer price/contract changes involving the sale of motor vehicles will be considered and may be allowed during the entire contract period subject to submission and verification of the proper documentation required for a contract change as referenced in this section.

Price Changes
Any permanent increase or decrease in offered pricing for a base contract item or published option is considered a price change. Temporary increases in pricing by whatever name (e.g., 'surcharge', 'adjustment', 'equalization charge', 'compliance charge', 'recovery charge', etc.), are also considered to be price changes.
For published catalogs and price sheets as part of an H-GAC contract, requests to amend the contract to reflect any new published catalog or price sheet must be submitted whenever the manufacturer publishes a new document. The request must include the new catalog or price sheet. All Products shall, at time of sale, be equipped as required under any then current applicable local, state, and federal government requirements. If, during any contract, changes are made to any government requirements which cause a manufacturer's costs of production to increase, Contractor may increase pricing to the extent of Contractor's actual cost increase. The increase must be substantiated with support documentation acceptable to H-GAC prior to taking effect. Modifications to a Product required to comply with such requirements which become effective after the date of any sale are the responsibility of the Customer.

Requesting Price Increase/Required Documentation
Contractor must submit a written overview of changes requested and reasons for the request, stating the amount of the increase, along with an itemized list of any increased prices, showing the Contractor's current price, revised price, the actual dollar difference and the percentage of the price increase by line item. Price change requests must be supported with substantive documentation (e.g., notices from suppliers and manufacturers of pricing changes in products, components, transportation, raw materials or commodities, and/or product availability, copies of invoices from suppliers, etc.) clearly showing that Contractor's actual costs have increased per the applicable line-item bid. The Producer Price Index (PPI) may be used as partial justification, subject to approval by H-GAC, but no price increase based solely on an increase in the PPI will be allowed. This documentation should be submitted in Excel format to facilitate analysis and updating of the website. The letter and documentation must be sent to Lead Program Coordinator, james.glover@h-gac.com.

Review/Approval of Requests
If H-GAC approves the price increase, Contractor will be notified in writing; no price increase will be effective until Contractor receives this notice. If H-GAC does not approve Contractor's price increase, Contractor may terminate its performance upon sixty (60) days advance written notice to H-GAC, however Contractor must fulfill any outstanding Purchase Orders. Termination of performance is Contractor's only remedy if H-GAC does not approve the price increase. H-GAC reserves the right to accept or reject any price change request.

ARTICLE 24: DELIVERIES AND SHIPPING TERMS

The Contractor agrees to make deliveries only upon receipt of authorized Customer Purchase Order acknowledged by H-GAC. Delivery made without such Purchase Order will be at Contractor's risk and will leave H-GAC the option of canceling any contract awarded to the Contractor. The Contractor must secure and deliver any item within five (5) working days, or as agreed to on any corresponding customer Purchase Order.

Shipping must be Freight On Board Destination to the delivery location designated on the Customer purchase order. The Contractor will retain title and control of all goods until delivery is completed and the Customer has accepted the delivery. All risk of transportation and all related charges are the responsibility of the Contractor. The Customer will notify the Contractor and H-GAC promptly of any damaged goods and will assist the Contractor in arranging for inspection. The Contractor must file all claims for visible or concealed damage. Unless otherwise stated in the Master Agreement, deliveries must consist only of new and unused merchandise.

ARTICLE 25: RESTOCKING (EXCHANGES AND RETURNS)

There will be no restocking charge to the Customer for return or exchange of any item purchased under the terms of any award. If the Customer wishes to return items purchased under an awarded contract, the Contractor agrees to exchange, these items for other items, with no additional charge incurred. Items must be returned to Contractor within thirty (30) days from date of delivery. If there is a difference in price in the items exchanged, the Contractor must notify H-GAC and invoice Customer for increase price or provide the Customer with a credit or refund for any decrease in price per Customer's preference. On items returned, a credit or cash refund will be issued by the Contractor to Customer. This return and exchange option will extend for thirty (30) days following the expiration of the term of the Contract. All items returned by the Customer must be unused and in the same merchantable condition as when received. Items that are special ordered may be returned only upon approval of the Contractor.

ARTICLE 26: MANUALS

Each product delivered under contract to any Customer must be delivered with at least one (1) copy of a safety and operating manual and any other technical or maintenance manual. The cost of the manual(s) must be included in the price for the Product offered.

ARTICLE 27: OUT OF STOCK, PRODUCT RECALLS, AND DISCONTINUED PRODUCTS

H-GAC does NOT purchase the products sold pursuant to a Solicitation or Master Agreement. Contractor is responsible for ensuring that notices and mailings, such as Out of Stock or Discontinued Notices, Safety Alerts, Safety Recall Notices, and customer surveys, are sent directly to the Customer with a copy sent to H-GAC. Customer will have the option of accepting any equivalent product or canceling the item from Customer's Purchase Order. Contractor is not authorized to make substitutions without prior approval.

ARTICLE 28: WARRANTIES, SALES, AND SERVICE

Warranties must be the manufacturer's standard and inclusive of any other warranty requirements stated in the Master Agreement; any warranties offered by a dealer will be in addition to the manufacturer's standard warranty and will not be a substitute for such. Pricing for any product must be inclusive of the standard warranty.

Contractor is responsible for the execution and effectiveness of all product warranty requests and any claims, Contractor agrees to respond directly to correct warranty claims and to ensure reconciliation of warranty claims that have been assigned to a third party.

ARTICLE 29: TERMINATION PROCEDURES

The Contractor acknowledges that this Master Agreement may be terminated for Convenience or Default. H-GAC will not pay for any expenses incurred after the termination date of the contract.

A. *Convenience*

H-GAC may terminate this Master Agreement at any time, in whole or in part, with or without cause, whenever H-GAC determines that for any reason such termination is in the best interest of H-GAC, by providing written notice by certified mail to the Contractor. Upon receipt of notice of termination, all services hereunder of the Contractor and its employees and subcontractors shall cease to the extent specified in the notice of termination.

The Contractor may cancel or terminate this Master Agreement upon submission of thirty (30) days written notice, presented to H-GAC via certified mail. The Contractor may not give notice of cancellation after it has received notice of default from H-GAC.

B. *Default*

H-GAC may, by written notice of default to the Contractor, terminate the whole or any part of the Master Agreement, in any one of the following circumstances:

(1) If the Contractor fails to perform the services herein specified within the time specified herein or any extension thereof; or

(2) If the Contractor fails to perform any of the other provisions of this Master Agreement for any reason whatsoever, or so fails to make progress or otherwise violates the Master Agreements that completion of services herein specified within the Master Agreement term is significantly endangered, and in

either of these two instances does not cure such failure within a period of ten (10) days (or such longer period of time as may be authorized by H-GAC in writing) after receiving written notice by certified mail of default from H-GAC.

(3) In the event of such termination, Contractor will notify H-GAC of any outstanding Purchase Orders and H-GAC will consult with the End User and notify the Contractor to what extent the End User wishes the Contractor to complete the Purchase Order. If Contractor is unable to do so, Contractor may be subject to a claim for damages from H-GAC and/or the End User.

ARTICLE 30: SEVERABILITY

H-GAC and Contractor agree that should any provision of this Master Agreement be determined to be invalid or unenforceable, such determination shall not affect any other term of this Master Agreement, which shall continue in full force and effect.

ARTICLE 31: FORCE MAJEURE

To the extent that either party to this Master Agreement shall be wholly or partially prevented from the performance of any obligation or duty placed on such party by reason of or through strikes, stoppage of labor, riot, fire, flood, acts of war, insurrection, accident, order of any court, act of God, or specific cause reasonably beyond the party's control and not attributable to its neglect or nonfeasance, in such event, the time for the performance of such obligation or duty shall be suspended until such disability to perform is removed. Determination of force majeure shall rest solely with H-GAC.

ARTICLE 32: CONFLICT OF INTEREST

No officer, member or employee of the Contractor or Contractors subcontractor, no member of the governing body of the Contractor, and no other public officials of the Contractor who exercise any functions or responsibilities in the review or Contractor approval of this Master Agreement, shall participate in any decision relating to this Master Agreement which affects his or her personal interest, or shall have any personal or pecuniary interest, direct or indirect, in this Master Agreement.

A. **Conflict of Interest Questionnaire:** Chapter 176 of the Texas Local Government Code requires contractors contracting or seeking to contract with H-GAC to file a conflict-of-interest questionnaire (CIQ) if they have an employment or other business relationship with an H-GAC officer or an officer's close family member. The required questionnaire and instructions are located on the H-GAC website or at the Texas Ethics Commission website https://www.ethics.state.tx.us/forms/CIQ.pdf. H-GAC officers include its Board of Directors and Executive Director, who are listed on this website. Respondent must complete and file a CIQ with the Texas Ethics Commission if an employment or business relationship with H-GAC office or an officer's close family member as defined in the law exists.

B. **Certificate of Interested Parties Form – Form 1295:** As required by Section 2252.908 of the Texas Government Code. H-GAC will not enter a Contract with Contractor unless (i) the Contractor submits a disclosure of interested parties form to H-GAC at the time the Contractor submits the contract H-GAC, or (ii) the Contractor is exempt from such requirement. The required form and instructions are located at the Texas Ethics Commission website https://www.ethics.state.tx.us/whatsnew/elf_info_form1295.htm. Respondents who are awarded a Contract must submit their Form 1295 with the signed Contract to H-GAC.

ARTICLE 33: FEDERAL COMPLIANCE

Contractor agrees to comply with all federal statutes relating to nondiscrimination, labor standards, and environmental compliance. With regards to "Rights to Inventions Made Under a Contract or Master Agreement," If the Federal award meets the definition of "funding Master Agreement" under 37 CFR § 401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding Master Agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Master Agreements," and any implementing regulations issued by the awarding agency. Contractor agrees to be wholly compliant with the provisions of 2 CFR 200, Appendix II. Additionally, for work to be performed under the Master Agreement or subcontract thereof, including procurement

of materials or leases of equipment, Contractor shall notify each potential subcontractor or supplier of the Contractor's federal compliance obligations. These may include, but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) the Fair Labor Standards Act of 1938 (29 USC 676 et. seq.), (d) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps and the Americans with Disabilities Act of 1990; (e) the Age Discrimination in Employment Act of 1967 (29 USC 621 et. seq.) and the Age Discrimination Act of 1974, as amended (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age; (f) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (g) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to the nondiscrimination on the basis of alcohol abuse or alcoholism; (h) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (i) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (j) any other nondiscrimination provisions in any specific statute(s) applicable to any Federal funding for this Master Agreement; (k) the requirements of any other nondiscrimination statute(s) which may apply to this Master Agreement; (l) applicable provisions of the Clean Air Act (42 U.S.C. §7401 et seq.), the Federal Water Pollution Control Act, as amended (33 U.S.C. §1251 et seq.), Section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and the Environmental Protection Agency regulations at 40 CPR Part 15; (m) applicable provisions of the Davis- Bacon Act (40 U.S.C. 276a - 276a-7), the Copeland Act (40 U.S.C. 276c), and the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-332), as set forth in Department of Labor Regulations at 20 CPR 5.5a; (n) the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (P.L. 94-163).

ARTICLE 34: PROHIBITION ON CONTRACTING WITH ENTITIES USING CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE EQUIPMENT (EFFECTIVE AUG. 13, 2020 AND AS AMENDED OCTOBER 26, 2020)

Pursuant to 2 CFR 200.216, Contractor shall not offer equipment, services, or system that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. Covered telecommunications equipment or services means 1) telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities); 2) for the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities); 3) telecommunications or video surveillance services provided by such entities or using such equipment; or 4) telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country. Respondent must comply with requirements for certifications. The provision at 48 C.F.R Section 52.204-26 requires that offerors review SAM prior to completing their required representations. This rule applies to all acquisitions, including acquisitions at or below the simplified acquisition threshold and to acquisitions of commercial items, including commercially available off the-shelf items.

ARTICLE 35: DOMESTIC PREFERENCE

In accordance with 2 CFR 200.322, as appropriate and to the extent consistent with law, when using federal grant award funds H-GAC should, to the greatest extent practicable, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). H-GAC must include this requirement in all subawards including all contracts and purchase orders for work or products under the federal grant award. If Contractor intends to qualify for Purchase Orders using federal grant money, then it shall work with H-GAC to provide all required certifications and other documentation needed to show compliance.

ARTICLE 36: CRIMINAL PROVISIONS AND SANCTIONS

The Contractor agrees to perform the Master Agreement in conformance with safeguards against fraud and abuse as set forth by the H-GAC, the State of Texas, and the acts and regulations of any related state or federal agency. The Contractor agrees to promptly notify H-GAC of any actual or suspected fraud, abuse, or other criminal activity through the filing of a written report within twenty-four (24) hours of knowledge thereof. Contractor shall notify H-GAC of any accident or incident requiring medical attention arising from its activities under this Master Agreement within twenty-four (24) hours of such occurrence. Theft or willful damage to property on loan to the Contractor from H-GAC, if any, shall be reported to local law enforcement agencies and H-GAC within two (2) hours of discovery of any such act.

The Contractor further agrees to cooperate fully with H-GAC, local law enforcement agencies, the State of Texas, the Federal Bureau of Investigation, and any other duly authorized investigative unit, in carrying out a full investigation of all such incidents.

The Contractor shall notify H-GAC of the threat of lawsuit or of any actual suit filed against the Contractor pertaining to this Master Agreement or which would adversely affect the Contractor's ability to perform services under this Master Agreement.

ARTICLE 37: INDEMNIFICATION AND RECOVERY

H-GAC's liability under this Master Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, is limited to its order processing charge. In no event will H-GAC be liable for any loss of use, loss of time, inconvenience, commercial loss, lost profits, or savings or other incidental, special or consequential damages to the full extent such use may be disclaimed by law. Contractor agrees, to the extent permitted by law, to defend and hold harmless H-GAC, its board members, officers, agents, officials, employees, and indemnities from any and all claims, costs, expenses (including reasonable attorney fees), actions, causes of action, judgements, and liens arising as a result of Contractor's negligent act or omission under this Master Agreement. Contractor shall notify H-GAC of the threat of lawsuit or of any actual suit filed against Contractor relating to this Master Agreement.

ARTICLE 38: LIMITATION OF CONTRACTOR'S LIABILITY

Except as specified in any separate writing between the Contractor and an END USER, Contractor's total liability under this Master Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, but excluding its obligation to indemnify H-GAC, is limited to the price of the particular products/services sold hereunder, and Contractor agrees either to refund the purchase price or to repair or replace product(s) that are not as warranted. In no event will Contractor be liable for any loss of use, loss of time, inconvenience, commercial loss, loss of profits or savings or other incidental, special or consequential damages to the full extent such use may be disclaimed by law. Contractor understands and agrees that it shall be liable to repay and shall repay upon demand to END USER any amounts determined by H-GAC, its independent auditors, or any agency of State or Federal government to have been paid in violation of the terms of this Master Agreement.

ARTICLE 39: TITLES NOT RESTRICTIVE

The titles assigned to the various Articles of this Master Agreement are for convenience only. Titles shall not be considered restrictive of the subject matter of any Article, or part of this Master Agreement.

ARTICLE 40: JOINT WORK PRODUCT

This Master Agreement is the joint work product of H-GAC and the Contractor. This Master Agreement has been negotiated by H-GAC and the Contractor and their respective counsel and shall be fairly interpreted in accordance with its terms and, in the event of any ambiguities, no inferences shall be drawn against any party.

ARTICLE 41: PROCUREMENT OF RECOVERED MATERIAL

H-GAC and the Respondent must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include: (1) procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; (2) procuring solid waste management services in a manner that

maximizes energy and resource recovery; and (3) establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines. Pursuant to the Federal Rule above, as required by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. § 6962(c)(3)(A)(i)), Respondent certifies that the percentage of recovered materials content for EPA-designated items to be delivered or used in the performance of the Contract will be at least the amount required by the applicable contract specifications or other contractual requirements.

ARTICLE 42: COPELAND "ANTI-KICKBACK" ACT

Contractor shall comply with 18 U.S.C. § 874, 40 U.S.C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into the contract. The contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as appropriate agency instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses. A breach of the contract clauses above may be grounds for termination of the Contract, and for debarment as a contractor and subcontractor as provided in 29 C.F.R. § 5.12.

ARTICLE 43: DISCRIMINATION

Respondent and any potential subcontractors shall comply with all Federal statutes relating to nondiscrimination. These include, but are not limited to:

a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352), which prohibits discrimination on the basis of race, color, or national origin;
b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex;
c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps;
d) The Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101- 6107), which prohibits discrimination on the basis of age;
e) The Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse;
f) The Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism;
g) Sections 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records;
h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental, or financing of housing;
i) Any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and
j) The requirements of any other nondiscrimination statute(s) that may apply to the application.

ARTICLE 44: DRUG FREE WORKPLACE

Contractor must provide a drug-free workplace in accordance with the Drug-Free Workplace Act, as applicable. For the purposes of this Section, "drug-free" means a worksite at which employees are prohibited from engaging in the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance. H-GAC may request a copy of this policy.

ARTICLE 45: APPLICABILITY TO SUBCONTRACTORS

Respondent agrees that all contracts it awards pursuant to the contract awarded as a result of this Master Agreement will be bound by the foregoing terms and conditions.

ARTICLE 46: WARRANTY AND COPYRIGHT

Submissions must include all warranty information, including items covered, items excluded, duration, and renewability. Submissions must include proof of licensing if using third party code for programming.

ARTICLE 47: DATA HANDLING AND SECURITY

It will always be the responsibility of the selected Contractor to manage data transfer and to secure all data appropriately during the project to prevent unauthorized access to all data, products, and deliverables.

ARTICLE 48: DISPUTES

All disputes concerning questions of fact or of law arising under this Master Agreement, which are not addressed within the Whole Master Agreement as defined pursuant to Article 4 hereof, shall be decided by the Executive Director of H-GAC or his designee, who shall reduce his decision to writing and provide notice thereof to the Contractor. The decision of the Executive Director or his designee shall be final and conclusive unless, within thirty (30) days from the date of receipt of such notice, the Contractor requests a rehearing from the Executive Director of H-GAC. In connection with any rehearing under this Article, the Contractor shall be afforded an opportunity to be heard and offer evidence in support of its position. The decision of the Executive Director after any such rehearing shall be final and conclusive. The Contractor may, if it elects to do so, appeal the final and conclusive decision of the Executive Director to a court of competent jurisdiction. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the Master Agreement and in accordance with H-GAC's final decision.

ARTICLE 49: CHOICE OF LAW: VENUE

This Master Agreement shall be governed by the laws of the State of Texas. Venue and jurisdiction of any suit or cause of action arising under or in connection with the Master Agreement shall lie exclusively in Harris County, Texas. Disputes between END USER and Contractor are to be resolved in accordance with the law and venue rules of the state of purchase. Contractor shall immediately notify H-GAC of such disputes.

ARTICLE 50: ORDER OF PRIORITY

In the case of any conflict between or within this Master Agreement, the following order of priority shall be utilized: 1) General Provisions, 2) Special Provisions, 3) Scope of Work, and 4) Other Attachments.

ARTICLE 51: WHOLE MASTER AGREEMENT

Please note, this is an H-GAC Master Agreement template and is used for all products and services offered in H-GAC Cooperative Purchasing. Any redlines to this Master Agreement may not be reviewed. If this Master Agreement has not been signed by the Contractor within 30 calendar days, this Master Agreement will be automatically voided. The Master General Provisions, Master Special Provisions, and Attachments, as provided herein, constitute the complete Master Agreement between the parties hereto, and supersede any and all oral and written Master Agreements between the parties relating to matters herein. Except as otherwise provided herein, this Master Agreement cannot be modified without written consent of the parties.

ARTICLE 52: UNIVERSAL IDENTIFIER AND SYSTEM FOR AWARD MANAGEMENT (SAM)

In accordance with 2 CFR Title 2, Subtitle A, Chapter I, Part 25 as it applies to a Federal awarding agency's grants, cooperative agreements, loans, and other types of Federal financial assistance as defined in 2 CFR 25.406. Contractor understands and as it relates to 2 CFR 25.205(a), a Federal awarding agency may not make a Federal award or financial modification to an existing Federal award to an applicant or recipient until the entity has complied with the requirements described in 2 CFR 25.200 to provide a valid unique entity identifier and maintain an active SAM registration (www.SAM.gov) with current information (other than any requirement that is not applicable because the entity is exempted under § 25.110). 2 CFR 25.200(b) requires that registration in the SAM **prior to submitting an application or plan**; and maintain an active SAM registration with current information, including information on a recipient's immediate and highest level owner and subsidiaries, as well as on all predecessors that have been awarded a Federal contract or grant within the last three years, if applicable, at all

times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency; and provide its unique entity identifier in each application or plan it submits to the Federal awarding agency. To remain registered in the SAM database after the initial registration, the applicant is required to review and update its information in the SAM database on an annual basis from the date of initial registration or subsequent updates to ensure it is current, accurate and complete. At the time a Federal awarding agency is ready to make a Federal award, if the intended recipient has not complied with an applicable requirement to provide a unique entity identifier or maintain an active SAM registration with current information, the Federal awarding agency: (1) May determine that the applicant is not qualified to receive a Federal award; and (2) May use that determination as a basis for making a Federal award to another applicant.

ARTICLE 53: PROCUREMENT OF RECOVERED MATERIALS

In accordance with 2 CFR 200.323, the Houston-Galveston Area Council and the Contractor or Subrecipient must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include: (1) procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; (2) procuring solid waste management services in a manner that maximizes energy and resource recovery; and (3) establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines. Pursuant to the Federal Rule above, as required by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. § 6962(c)(3)(A)(i)), the Contractor or Subrecipient certifies that the percentage of recovered materials content for EPA-designated items to be delivered or used in the performance of the Agreement will be at least the amount required by the applicable contract specifications or other contractual requirements.

SIGNATURES:

H-GAC and the Contractor have read, agreed, and executed the whole Master Agreement as of the date first written above, as accepted by:

MASTER SPECIAL PROVISIONS

Please note, this is an H-GAC Master Agreement template and is used for all products and services offered in H-GAC Cooperative Purchasing. Any redlines to this Master Agreement may not be reviewed. Incorporated by attachment, as part of the whole Master Agreement, H-GAC and the Contractor do, hereby agree to the Master Special Provisions as follows:

ARTICLE 1: BIDS/PROPOSALS INCORPORATED

In addition to the whole Master Agreement, the following documents listed in order of priority are incorporated into the Master Agreement by reference: Bid/Proposal Specifications and Contractor's Response to the Bid/Proposal.

ARTICLE 2: END USER MASTER AGREEMENTS ("EUA")

H-GAC acknowledges that the END USER, which is the HGACBuy customer utilizing the contract (CUSTOMER and END USER may be used interchangeably) may choose to enter into an End User Master Agreement (EUA) with the Contractor through this Master Agreement. A CUSTOMER/END USER is a state agency, county, municipality, special district, or other political subdivision of a state, or a qualifying non-profit corporation (providing one or more governmental function or service that possess legal authority to enter into the Contract. The term of the EUA may exceed the term of the current H-GAC Master Agreement.

H-GAC's acknowledgement is not an endorsement or approval of the End User Master Agreement's terms and conditions. Contractor agrees not to offer, agree to or accept from the CUSTOMER/END USER, any terms or conditions that conflict with those in Contractor's Master Agreement with H-GAC. Contractor affirms that termination of its Master Agreement with H-GAC for any reason shall not result in the termination of any underlying EUA, which shall in each instance, continue pursuant to the EUA's stated terms and duration. Pursuant to the terms of this Master Agreement, termination of this Master Agreement will disallow the Contractor from entering into any new EUA with CUSTOMER/END USER. Applicable H-GAC order processing charges will be due and payable to H-GAC on any EUAs, surviving termination of this Master Agreement between H-GAC and Contractor.

ARTICLE 3: MOST FAVORED CUSTOMER CLAUSE

Contractor shall provide its most favorable pricing and terms to H-GAC. If at any time during this Master Agreement, Contractor develops a regularly followed standard procedure of entering into Master Agreements with other governmental customers within the State of Texas, and offers the same or substantially the same products/services offered to H-GAC on a basis that provides prices, warranties, benefits, and or terms more favorable than those provided to H-GAC, Contractor shall notify H-GAC within ten (10) business days thereafter, and this Master Agreement shall be deemed to be automatically retroactively amended, to the effective date of Contractor's most favorable past Master Agreement with another entity. Contractor shall provide the same prices, warranties, benefits, or terms to H-GAC and its CUSTOMER/END USER as provided in its most favorable past Master Agreement. H-GAC shall have the right and option at any time to decline to accept any such change, in which case the amendment shall be deemed null and void. If Contractor claims that a more favorable price, warranty, benefit, or term that was charged or offered to another entity during the term of this Master Agreement, does not constitute more favorable treatment, than Contractor shall, within ten (10) business days, notify H-GAC in writing, setting forth the detailed reasons Contractor believes the aforesaid

offer is not in fact most favored treatment. H-GAC, after due consideration of Contractor's written explanation, may decline to accept such explanation and thereupon this Master Agreement between H-GAC and Contractor shall be automatically amended, effective retroactively, to the effective date of the most favored Master Agreement, to provide the same prices, warranties, benefits, or terms to H-GAC and the CUSTOMER/END USER.

EXCEPTION: This clause shall not be applicable to prices and price adjustments offered by a bidder, proposer, or contractor, which are not within bidder's/proposer's control [example; a manufacturer's bid concession], or to any prices offered to the Federal Government and its agencies.

ARTICLE 4: PARTY LIABILITY

Contractor's total liability under this Master Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, is limited to the price of the particular products/services sold hereunder. Contractor agrees either to refund the purchase price or to repair or replace product(s) that are not as warranted. Contractor accepts liability to repay, and shall repay upon demand to CUSTOMER/END USER, any amounts determined by H-GAC, its independent auditors, or any state or federal agency, to have been paid in violation of the terms of this Master Agreement.

ARTICLE 5: GOVERNING LAW & VENUE

Contractor and H-GAC agree that Contractor will make every reasonable effort to resolve disputes with the CUSTOMER/END USER in accord with the law and venue rules of the state of purchase. Contractor shall immediately notify H-GAC of such disputes.

ARTICLE 6: SALES AND ORDER PROCESSING CHARGE

Contractor shall sell its products to CUSTOMER/END USER based on the pricing and terms of this Master Agreement. H-GAC will invoice Contractor for the applicable order processing charge when H-GAC receives notification of a CUSTOMER/END USER order. Contractor shall remit to H-GAC the full amount of the applicable order processing charge, after delivery of any product or service and subsequent CUSTOMER/END USER acceptance. Payment of the Order Processing Charge shall be remitted from Contractor to H-GAC, within thirty (30) calendar days or ten (10) business days after receipt of a CUSTOMER/END USER's payment, whichever comes first, notwithstanding Contractor's receipt of invoice. For sales made by Contractor based on this Master Agreement, including sales to entities without Interlocal Master Agreements, Contractor shall pay the applicable order processing charges to H-GAC. Further, Contractor agrees to encourage entities who are not members of H-GAC's Cooperative Purchasing Program to execute an H-GAC Interlocal Master Agreement. H-GAC reserves the right to take appropriate actions including, but not limited to, Master Agreement termination if Contractor fails to promptly remit the appropriate order processing charge to H-GAC. In no event shall H-GAC have any liability to Contractor for any goods or services a CUSTOMER/END USER procures from Contractor. At all times, Contractor shall remain liable to pay to H-GAC any order processing charges on any portion of the Master Agreement actually performed, and for which compensation was received by Contractor.

ARTICLE 7: LIQUIDATED DAMAGES

Contractor and H-GAC agree that Contractor shall cooperate with the CUSTOMER/END USER at the time a CUSTOMER/END USER purchase order is placed, to determine terms for any liquidated damages.

ARTICLE 8: INSURANCE

Unless otherwise stipulated in Section B of the Bid/Proposal Specifications, Contractor must have the following insurance and coverage minimums:

a. General liability insurance with a Single Occurrence limit of at least $1,000,000.00, and a General Aggregate limit of at least two times the Single Occurrence limit.
b. Product liability insurance with a Single Occurrence limit of at least $1,000,000.00, and a General Aggregate limit of at least two times the Single Occurrence limit for all Products except Automotive Fire Apparatus. For Automotive Fire Apparatus, see Section B of the Bid/Proposal Specifications.
c. Property Damage or Destruction insurance is required for coverage of End User owned equipment while in Contractor's possession, custody, or control. The minimum Single Occurrence limit is $500,000.00 and the General Aggregate limit must be at least two times the Single Occurrence limit. This insurance may be carried in several ways, e.g. under an Inland Marine policy, as art of Automobile coverage, or under a Garage Keepers policy. In any event, this coverage must be specifically and clearly listed on insurance certificate(s) submitted to H-GAC.
d. Insurance coverage shall be in effect for the length of any contract made pursuant to the Bid/Proposal, and for any extensions thereof, plus the number of days/months required to deliver any outstanding order after the close of the contract period.
e. Original Insurance Certificates must be furnished to H-GAC on request, showing Contractor as the insured and showing coverage and limits for the insurances listed above.
f. If any Product(s) or Service(s) will be provided by parties other than Contractor, all such parties are required to carry the minimum insurance coverages specified herein, and if requested by H-GAC, a separate insurance certificate must be submitted for each such party.
g. H-GAC reserves the right to contact insurance underwriters to confirm policy and certificate issuance and document accuracy.

ARTICLE 9: PERFORMANCE AND PAYMENT BONDS FOR INDIVIDUAL ORDERS

H-GAC's contractual requirements DO NOT include a Performance & Payment Bond (PPB); therefore, Contractor shall offer pricing that reflects this cost savings. Contractor shall remain prepared to offer a PPB to cover any order if so requested by the CUSTOMER/END USER. Contractor shall quote a price to CUSTOMER/END USER for provision of any requested PPB, and agrees to furnish the PPB within ten business (10) days of receipt of CUSTOMER/END USER's purchase order.

ARTICLE 10: ORDER PROCESSING CHARGE

H-GAC will apply an Order Processing Charge for each sale done through the H-GAC contract, with the exception of orders for motor vehicles. Any pricing submitted must include this charge amount per the most current H-GAC schedule. For motor vehicle orders, the Processing Charge is paid by the CUSTOMER/END USER. Contractor will need to refer to the solicitation for the Order Processing Charge.

ARTICLE 11: CHANGE OF STATUS

Contractor shall immediately notify H-GAC, in writing, of ANY change in ownership, control, dealership/franchisee status, Motor Vehicle license status, or name. Contractor shall offer written guidance to advise H-GAC if this Master Agreement shall be affected in any way by such change. H-GAC shall have the right to determine whether or not such change is acceptable, and to determine what action shall be warranted, up to and including cancellation of Master Agreement.

ARTICLE 12: REQUIREMENTS TO APPLICABLE PHYSICAL GOODS

In the case of physical goods (e.g. equipment, material, supplies, as opposed to services), all Products offered must comply with any applicable provisions of the Texas Business and Commerce Code, Title 1, Chapter 2 and with at least the following:

a. Be new, unused, and not refurbished.
b. Not be a prototype as the general design, operation, and performance. This requirement is NOT meant to preclude the Contractor from offering new models or configurations which incorporate improvements in a current design or add functionality, but in which new model or configuration may be new to the marketplace.
c. Include all accessories which may or may not be specifically mentioned in the Master Agreement, but which are normally furnished or necessary to make the Product ready for its intended use upon delivery. Such accessories shall be assembled, installed, and adjusted to allow continuous operation of Product at time of delivery.
d. Have assemblies, sub-assemblies and component parts that are standard and interchangeable throughout the entire quantity of a Product as may be purchased simultaneously by any END USER/CUSTOMER.
e. Be designed and constructed using current industry accepted engineering and safety practices, and materials.
f. Be available for inspection at any time prior to or after procurement.

ARTICLE 13: TEXAS MOTOR VEHICLE BOARD LICENSING

All Contractors that deal in motor vehicles shall maintain current licenses that are required by the Texas Motor Vehicle Commission Code. If at any time during this Master Agreement term, any required Contractor license is denied, revoked, or not renewed, Contractor shall be in default of this Master Agreement, unless the Texas Motor Vehicle Board issues a stay or waiver. Contractor shall promptly provide copies of all current applicable Texas Motor Vehicle Board documentation to H-GAC upon request.

ARTICLE 14: INSPECTION/TESTING

All Products sold pursuant to this Master Agreement will be subject to inspection/testing by or at the direction of H-GAC and/or the ordering CUSTOMER/END USER, either at the delivery destination or the place of manufacture. In the event a Product fails to meet or exceed all requirements of this Master Agreement, and unless otherwise agreed in advance, the cost of any inspection and/or testing, will be the responsibility of the Contractor.

ARTICLE 15: ADDITIONAL REPORTING REQUIREMENTS

Contractor agrees to submit written quarterly reports to H-GAC detailing all transactions during the previous three (3) month period. Reports must include, but are not limited, to the following information:

a. CUSTOMER/END USER Name
b. Product/Service purchased, including Product Code if applicable
c. Customer Purchase Order Number
d. Purchase Order Date
e. Product/Service dollar amount
f. HGACBuy Order Processing Charge amount

ARTICLE 16: BACKGROUND CHECKS

Cooperative customers may request background checks on any awarded contractor's employees who will have direct contact with students, or for any other reason they so choose, any may require contractor to pay the cost of obtaining any background information requested by the CUSTOMER/END USER.

ARTICLE 17: PROHIBITION ON CONTRACTS WITH COMPANIES BOYCOTTING ISRAEL CERTIFICATION

As required by Chapter 2271 of the Texas Local Government Code the Contractor must verify that it 1) does not boycott Israel; and 2) will not boycott Israel during the term of the Contract. Pursuant to Section 2271.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

ARTICLE 18: NO EXCLUDED NATION OR TERRORIST ORGANIZATION CERTIFICATION

As required by Chapter 2252 of the Texas Government Code the Contractor must certify that it is not a company engaged in active business operations with Sudan, Iran, or a foreign terrorist organization – specifically, any company identified on a list prepared and maintained by the Texas Comptroller under Texas Government Code §§806.051, 807.051, or 2252.153. (A company that the U.S. Government affirmatively declares to be excluded from its federal sanctions regime relating to Sudan, Iran, or any federal sanctions regime relating to a foreign terrorist organization is not subject to the contract prohibition.)

ARTICLE 19: PROHIBITION ON CONTRACTING WITH ENTITIES USING CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE EQUIPMENT (Effective Aug. 13, 2020 and as amended October 26, 2020)

Pursuant to 2 CFR 200.216, Contractor shall not offer equipment, services, or system that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. ''Covered telecommunications equipment or services means 1) telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities); 2) for the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities); 3) telecommunications or video surveillance services provided by such entities or using such equipment; or 4) telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country.

Contractor must comply with requirements for certifications. The provision at 48 C.F.R Section 52.204-26 requires that Contractors review SAM prior to completing their required representations. This rule applies to all acquisitions, including acquisitions at or below the simplified acquisition threshold and to acquisitions of commercial items, including commercially available off the-shelf items.

ARTICLE 20: BUY AMERICA ACT (National School Lunch Program and Breakfast Program)

With respect to products purchased by CUSTOMER/END USER for use in the National School Lunch Program and/or National School Breakfast Program, Contractor shall comply with all federal procurement laws and regulations with respect to such programs, including the Buy American provisions set forth in 7 C.F.R. Part 210.21(d), to the extent applicable. Contractor agrees to provide all certifications required by CUSTOMER/END USER regarding such programs.

In the event Contractor or Contractor's supplier(s) are unable or unwilling to certify compliance with the Buy American Provision, or the applicability of an exception to the Buy American provision, H-GAC CUSTOMER/END USER may decide not to purchase from Contractor. Additionally, H-GAC

CUSTOMER/END USER may require country of origin on all products and invoices submitted for payment by Contractor, and Contractor agrees to comply with any such requirement.

ARTICLE 21: BUY AMERICA REQUIREMENT (Applies only to Federally Funded Highway and Transit Projects)

With respect to products purchased by CUSTOMER/END USER for use in federally funded highway projects, Contractor shall comply with all federal procurement laws and regulations with respect to such projects, including the Buy American provisions set forth in 23 U.S.C. Section 313, 23 C.F.R. Section 635.410, as amended, and the Steel and Iron Preference provisions of Texas Transportation Code Section 223.045, to the extent applicable. Contractor agrees to provide all certifications required by CUSTOMER/END USER regarding such programs. With respect to products purchased by CUSTOMER/END USER for use in federally funded transit projects, Contractor shall comply with all federal procurement laws and regulations with respect to such projects, including the Buy American provisions set forth in 49 U.S.C. Section 5323(j)(1), 49 C.F.R. Sections 661.6 or 661.12, to the extent applicable. Contractor agrees to provide all certifications required by CUSTOMER/END USER regarding such programs.

ARTICLE 22: DOMESTIC PREFERENCE

In accordance with 2 CFR 200.322, as appropriate and to the extent consistent with law, a CUSTOMER/END USER using federal grant award funds should, to the greatest extent practicable, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). The CUSTOMER/END USER must include this requirement in all subawards including all contracts and purchase orders for work or products under the federal grant award. If Contractor intends to qualify for Purchase Orders using federal grant money, they shall work with the CUSTOMER/END USER to provide all required certifications and other documentation needed to show compliance.

ARTICLE 23: TITLE VI REQUIREMENTS

H-GAC in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 U.S.C. §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders that it will affirmatively ensure that any disadvantaged business enterprises will be afforded full and fair opportunity to submit in response to this Master Agreement and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award.

ARTICLE 24: EQUAL EMPLOYMENT OPPORTUNITY

Except as otherwise provided under 41 CFR Part 60, all Contracts and CUSTOMER/END USER Purchase Orders that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 shall be deemed to include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., pg.339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41CFR Part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

The equal opportunity clause provided under 41 CFR 60-1.4(b) is hereby incorporated by reference. Contractor agrees that such provision applies to any contract that meets the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 and agrees that it will comply with such provision.

ARTICLE 25: CLEAN AIR AND WATER POLLUTION CONTROL ACT

CUSTOMER/END USER Purchase Orders using federal funds must contain a provision that requires the Contractor to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean

Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

Pursuant to the Federal Rule above, Contractor certifies that it is in compliance with all applicable provisions of the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387) and will remain in compliance during the term of the Contract.

ARTICLE 26: PREVAILING WAGE

Contractor and any potential subcontractors have a duty to and shall pay the prevailing wage rate under the Davis-Bacon Act, 40 U.S.C. 276a – 276a-5, as amended, and the regulations adopted thereunder contained in 29 C.F.R. pt. 1 and 5.

ARTICLE 27: CONTRACT WORK HOURS AND SAFETY STANDARDS

As per the Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708), where applicable, all CUSTOMER/END USER Purchase Orders in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer, on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

ARTICLE 28: PROFIT AS A SEPARATE ELEMENT OF PRICE

For purchases using federal funds more than the current Simplified Acquisition Threshold of $250,000, requires negotiation of profit as a separate element of the price. See, 2 CFR 200.324(b). Contractor agrees to provide information and negotiate regarding profit as a separate element of the price for the purchase. Contractor also agrees that the total price, including profit, charged by Contractor will not exceed the awarded pricing, including any applicable discount, under any awarded contract.

ARTICLE 29: BYRD ANTI-LOBBYING AMENDMENT

Byrd Anti-Lobbying Amendment (31U.S.C. 1352) – Contractors that apply or bid for an award exceeding $100,000 must file the required anti-lobbying certification. Each tier must certify to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier, up to the CUSTOMER/END USER. As applicable, Contractor agrees to file all certifications and disclosures required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 USC 1352). Contractor certifies that it is currently in compliance with all applicable provisions of the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352) and will continue to be in compliance throughout the term of the Contract and further certifies that:

1. No Federal appropriated funds have been paid or will be paid by or on behalf of the Contractor, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection

with the awarding of a Federal contract, the making of a Federal Grant, the making of a Federal Loan, the entering into a cooperative Master Agreement, and the extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative Master Agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing, or attempting to influence, an officer or employee of a Member of Congress in connection with a Federal contract, grant, loan, or cooperative Master Agreement, Contractor shall complete and submit Standard Form – LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.
3. Contractor shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative Master Agreements) and that all subcontractors shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certificate is a prerequisite for making or entering into this transaction imposed by Section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

ARTICLE 30: COMPLIANCE WITH EPA REGULATIONS APPLICABLE TO GRANTS, SUBGRANTS, COOPERATIVE MASTER AGREEMENTS, AND CONTRACTS

Contractor certifies compliance with all applicable standards, orders, regulations, and/or requirements issued pursuant to the Clean Air Act of 1970, as amended (42 U.S.C. 1857(h)), Section 508 of the Clean Water Act, as amended (13 U.S.C. 1368), Executive Order 117389 and Environmental Protection Agency Regulation, 40 CFR Part 15.

ARTICLE 31: COMPLIANCE WITH ENERGY POLICY AND CONSERVATION ACT

Contractor certifies that Contractor will be in compliance with mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-163, 89 Stat. 871).

Project ID: FS12-23
Release Date: Wednesday, July 26, 2023
· **Due Date:** Thursday, September 14, 2023 12:00pm
Posted Wednesday, July 26, 2023 7:00am
Bid Unsealed Thursday, September 14, 2023 12:05pm
Pricing Unsealed Thursday, September 14, 2023 12:05pm

4. Specifications/Categories/Scope of Work

This is an indefinite quantity/indefinite delivery offerings contract. The HGACBuy Customer is responsible to ensure adequate competition is performed between the various contractors or contractors outside of HGACBuy to determine price reasonableness that might be required per any funding agency. Customer will need to ensure compliance with any funding agency requirements before proceeding with a purchase order under this contract. Please consult legal counsel regarding questions concerning compliance as a contractor under this solicitation.

4.1. Overview

H-GAC is soliciting responses for selecting qualified manufacturers, dealers, distributors, and service providers of Fire Apparatus and Other Special Service Vehicles and related services to make these types of products and services available to Customers of the HGACBuy Cooperative Purchasing Program under blanket type contracts. Customers (end users) may require selective acquisitions of equipment and/or services OR full turnkey projects necessitating additional services, training, and maintenance agreements. H-GAC is seeking the broadest possible selection of available fire apparatus and special service vehicles to best serve our customers by providing the largest selection of products/services available to meet their needs. This solicitation may include a request for a discount percent off price catalog, category, or manufacturer, or price list for supplies, materials, or not to exceed hourly rates for installation or repair. Respondents are not required to provide offerings on all categories. Please note: awarded contracts for FS12-23 allow contractors to update their manufacturer pricing and product offerings at any time during the course of the four-year contract term.

4.2. Categories

This Solicitation is divided into twelve (12) separate but related product categories (A-L). When submitting a response, Respondent may choose to submit a response to any of the categories or all of them. No additional weighted value will be assigned to a response that addresses more than one or all categories listed. All equipment must be the manufacturer's new and current model and must be fully operational upon delivery to the Customer.

This solicitation does not include ambulances - please see HGACBuy Contract AM10-20 and AM10-23.

Alternative Fuel Vehicles: All responses that include electric, hybrid, or other alternative fuel vehicles must include these vehicles in Category I. If that specific vehicle is also available with an internal combustion engine (ICE),

please list the ICE vehicle separately in the appropriate vehicle category. Category I will only include the alternative fuel vehicles, regardless of vehicle function or type.

Product categories are as follows:

A. **Wildland Fire Apparatus - Brush Fire, Off-Road Tenders/Tankers, Crew Carriers, Slip-in Units, etc.**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, type/function, model, chassis (make and model), cab configuration, 2WD/4WD, and fuel type, and tank and pump.

B. **Aerial Fire Apparatus - Boom/Platform, Ladder, Ladder/Platform, etc.**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, model, chassis, aerial category/construction, aerial functions, cab types, and axle configurations.

C. **Pumper Fire Apparatus**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, model, chassis, cab types, axle configurations, tank capacities/construction, and pump capacity/position.

D. **Pumper-Tanker/Tanker/Tender Fire Apparatus**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, model, chassis, cab types, axle configurations, tank capacities/construction, and pump capacity/position.

E. **Aircraft Rescue & Fire-Fighting Vehicles (ARFF)**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, model, chassis, cab types, axle configurations, and by Class Types 1-5.

F. **Special Service Apparatus – Rescue/Fast Response, Re-Hab, Hazmat, Mobile Emergency Command/Communication Centers/Trailers, Light/Air Vehicle, Dive Response Vehicle, ATV/UTV Response Vehicles, Mobile Fire Pump Testers, etc.**

Response listings/descriptions must be organized by Manufacturer, function, type, or purpose of the apparatus/vehicle, and include brief and concise details about the vehicle.

G. **Fire Boats, Rescue Boats, Emergency Response Boats**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, type, function, size, and propulsion.

H. **Fire Command Vehicles - Light, medium, and heavy-duty pickups and SUVs**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, model, chassis, and 2WD/4WD, fuel type.

I. **Electric/Alternative Fuel Fire Apparatus**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, model, chassis, vehicle type, fuel/propulsion type, and function.

J. **Fire Apparatus/Vehicle Service/Maintenance Plans**

Response listings/descriptions must include plan details, including details about which fees are included in costs, and items such as labor rates, and fee structures.

K. **Fire Apparatus/Vehicle Parts and Supplies**

Response listing need only to include percentage discount.

L. **Fire Apparatus/Vehicle Options**

Please provide a complete listing or catalog of options, accessories, and loose equipment offered. Please clearly indicate if the options are model or vehicle specific, or only available for specific models or vehicles. Options must be clearly identified as upgrades or downgrades and clearly show the net effect to the price of the base model. (Please upload in Section 9.1.4 Required Documents.)

4.3. General Requirements

All products priced and sold pursuant to this Solicitation must, as applicable:

1. Meet all applicable requirements of federal, state and local laws and regulations.
2. Be manufacturer's normal offering with all standard features and functions and performance levels.
3. Be ready for turn-key operation upon delivery.
4. Respondent must include specifications, brochures, warranty information, and any other relevant product information with solicitation Response.

Note: "Unpriced/unpublished" options cannot be quoted on the Base Pricing List and may not be sold through this contract.

4.4. Additional Requirements

Licenses

1. Contractor must have and maintain the appropriate license(s) as required by the State of Texas, Department of Transportation, Department of Motor Vehicles, Motor Vehicle Commission Code [latest edition], or any other local, state and federal licenses required and which are applicable to the respondent's operations.
2. The prescribed licenses must include the manufacturer/respondent, and any and all dealers and their representatives as may be required by the Motor Vehicle Department. Contractor must ensure all

emergency and specialty vehicles sold are in accordance with the laws of the state where the sale and acquisition are made.

3. Contractor must maintain all licensing required by the State of Texas as applicable to their business operations during the entire contract term. If during the contract period such licensing lapses, Contractor will be in default and become subject to contract termination unless issued a stay or waiver.

Manuals

1. Contractor must supply at the time of delivery, at least two (2) sets of complete operations and service documentation covering the completed emergency vehicles as delivered and accepted.
2. Respondent must supply the following information with their response: Technical Specifications, Product Brochures, Tear Sheets, Cut Sheets, Strippers, etc. which clearly show all the standard features and capabilities of each response listing.

Warranty

Contractors must comply with the minimum warranty and maintenance requirements described below for any products or services provided under this Solicitation.

1. Contractor must furnish with response, and for all equipment sold through this H-GAC contract, the manufacturer's general warranty, which must be honored by all the manufacturer's authorized service locations.
2. All service/maintenance plan listings must clearly indicate the cost structure for such plans, clearly indicating which costs and fees are included (such as: hourly labor rates, shop fees, supply fees, environmental fees).
3. The Contractor will handle all warranty claims and all work must be completed within ten (10) calendar days after receipt of equipment/vehicle by the Contractor without cost to H-GAC or the Customer. Delayed warranties must be available for all vehicles and equipment. Warranty start date will be effective the date that the completed unit is placed into service by the Customer. The Contractor must furnish a delayed warranty card/document for each unit delivered and/or advise the Customer of the procedures to be followed for obtaining the delayed start of warranty coverage. Requests for delayed warranties will not exceed six months after delivery.
4. Any and all documents necessary to effect manufacturer's warranty must be properly applied for and submitted by the Contractor. The Contractor will provide to H-GAC and the Customer a manufacturer's warranty which will be honored by any of the manufacturer's authorized dealers and a complete copy must be provided at the time of delivery. When additional warranties are available as standard, they must be included as a part of the response for the benefit of H-GAC and Customer.
5. The patient compartment, all modifications to the OEM chassis by Contractor on the accepted unit, and equipment and parts will be guaranteed for a minimum period of one (1) year against defects in design,

materials, and workmanship. The warranty period will begin upon final acceptance of the equipment. This warranty will cover parts and labor expenses.

6. In the event any component part of equipment or materials furnished under these specifications, or its subsequent contract(s), becomes defective by reason of material or workmanship during said period, and the end user agency immediately notifies Contractor of such defect, Contractor will, at no expense to the End User agency or H-GAC, repair or replace equipment or component with new equipment or component.
7. Warranty of all system equipment is the sole responsibility of the Contractor under contract, but may be performed by their certified, designated agent.

4.5. Vehicle Requirements

All equipment and vehicles must be new and be the manufacturer's latest and current model. Each vehicle must be fully assembled, adjusted, serviced and ready for immediate and continuous operation upon delivery. If the equipment or vehicle does not meet the specification requirements upon delivery, Contractor will be responsible for correcting all deficiencies and making any corrections or adjustments needed to attain specification requirements.

All equipment and vehicles must conform to applicable local, state, federal requirements and must comply to all applicable industry standards including National Fire Protection Association (NFPA), Department of Transportation, United States Coast Guard (USCG), and Occupational Safety and Health Administration (OSHA).

4.6. Service / Maintenance Plans and Parts

All service/maintenance plan listings must clearly indicate the cost structure for such plans, including which costs and fees are included (ex: hourly labor rates, shop fees, supply fees, environmental fees).

4.7. Labor Hours Definitions

If the awarded contract contains hours for labor related services, the following definitions will apply:

1. "Business Day" Monday through Friday
2. "Business Hours" Standard Business Hours 8 a.m. to 5 p.m.
3. "Regular Time" Work that occurs during standard business hours
4. "Emergency Time" Work that occurs outside standard business hours

4.8. Administrative Fee

For each purchase order processed under an awarded contract, H-GAC will directly invoice the contractor an administrative fee (Order Processing Charge) applicable to the sale of all equipment and services submitted in contractor's response. It is the contractor's responsibility to remit the administrative fee within thirty (30) days of processing any customer's purchase order, even if an invoice is not received from H-GAC. Contractor agrees that H-GAC will have the right, with reasonable notice, to inspect its records pertaining to purchase orders processed and the accuracy of the fees payable to H-GAC. For this solicitation the administrative fee is as follows:

Administrative Fee (per Purchase Order)

Category A – Brush Trucks/Light Rescue	$1,000 per purchase order
Category B – Aerial Fire Apparatus	$2,000 per purchase order
Category C – Pumper Fire Apparatus	$2,000 per purchase order
Category D – Pumper/Tanker and Tanker Apparatus	$2,000 per purchase order
Category E – ARFF Apparatus	$2,000 per purchase order
Category F – Special Service Vehicles	
Heavy Rescue*/Special Service	$2,000 per purchase order
Light Rescue/Quick Response	$1,000 per purchase order
All Trailers	2% of purchase order

*Heavy Rescue is vehicle with GVWR of 26,000 and above.

Category G –Fire/Rescue/Emer. Response Boats	2% of purchase order
Category H - Fire Command Vehicles	$1,000 per purchase order
Category I - Alternative Fuel Vehicles	Fee determined by category of vehicle
Category J –Service/Maintenance Plans	2% per purchase order
Category K - Fire Apparatus/Vehicle Parts and Supplies	2% per purchase order
Category L - Fire Apparatus/Vehicle Options	No separate fee - part of vehicle

4.9. Final Contract Deliverables

Contractor agrees to submit written quarterly reports to H-GAC detailing all transactions during the previous three (3) month period. Reports must include, but are not limited, to the following information:

- Customer Name and address
- HGACBuy confirmation number
- Product/Service purchased
- Customer Purchase Order Number
- Purchase Order Date
- Product/Service dollar amount
- HGACBuy Order Processing Charge amount

Reports must be provided to H-GAC in Excel or other acceptable electronic format by the 30th day of the month following the quarter being reported. If Contractor defaults in providing Products or Services reporting as required by the contract, recourse may be exercised through cancellation of the contract and other legal remedies as appropriate.

POST IN A CONSPICUOUS PLACE

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Siddons Martin Emergency Group, LLC

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only one of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☑ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . . . S

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

1362 E Richey Road

Requester's name and address (optional)

6 City, state, and ZIP code

Houston, Texas 77073

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

2	7	–	4	3	3	3	5	9	0

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

must obtain your correct taxpayer identification number (TIN), which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid).
- Form 1099-DIV (dividends, including those from stocks or mutual funds).
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds).
- Form 1099-NEC (nonemployee compensation).
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers).
- Form 1099-S (proceeds from real estate transactions).
- Form 1099-K (merchant card and third-party network transactions).
- Form 1098 (home mortgage interest), 1098-E (student loan interest), and 1098-T (tuition).
- Form 1099-C (canceled debt).
- Form 1099-A (acquisition or abandonment of secured property).

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

Caution: If you don't return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See *What is backup withholding*, later.

By signing the filled-out form, you:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued);
2. Certify that you are not subject to backup withholding; or
3. Claim exemption from backup withholding if you are a U.S. exempt payee; and
4. Certify to your non-foreign status for purposes of withholding under chapter 3 or 4 of the Code (if applicable); and
5. Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting is correct. See *What is FATCA Reporting*, later, for further information.

Note: If you are a U.S. person and a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien;
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States;
- An estate (other than a foreign estate); or
- A domestic trust (as defined in Regulations section 301.7701-7).

Establishing U.S. status for purposes of chapter 3 and chapter 4 withholding. Payments made to foreign persons, including certain distributions, allocations of income, or transfers of sales proceeds, may be subject to withholding under chapter 3 or chapter 4 of the Code (sections 1441–1474). Under those rules, if a Form W-9 or other certification of non-foreign status has not been received, a withholding agent, transferee, or partnership (payor) generally applies presumption rules that may require the payor to withhold applicable tax from the recipient, owner, transferor, or partner (payee). See Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities.

The following persons must provide Form W-9 to the payor for purposes of establishing its non-foreign status.

- In the case of a disregarded entity with a U.S. owner, the U.S. owner of the disregarded entity and not the disregarded entity.
- In the case of a grantor trust with a U.S. grantor or other U.S. owner, generally, the U.S. grantor or other U.S. owner of the grantor trust and not the grantor trust.
- In the case of a U.S. trust (other than a grantor trust), the U.S. trust and not the beneficiaries of the trust.

See Pub. 515 for more information on providing a Form W-9 or a certification of non-foreign status to avoid withholding.

Foreign person. If you are a foreign person or the U.S. branch of a foreign bank that has elected to be treated as a U.S. person (under Regulations section 1.1441-1(b)(2)(iv) or other applicable section for chapter 3 or 4 purposes), do not use Form W-9. Instead, use the appropriate Form W-8 or Form 8233 (see Pub. 515). If you are a qualified foreign pension fund under Regulations section 1.897(l)-1(d), or a partnership that is wholly owned by qualified foreign pension funds, that is treated as a non-foreign person for purposes of section 1445 withholding, do not use Form W-9. Instead, use Form W-8EXP (or other certification of non-foreign status).

Nonresident alien who becomes a resident alien. Generally, only a nonresident alien individual may use the terms of a tax treaty to reduce or eliminate U.S. tax on certain types of income. However, most tax treaties contain a provision known as a saving clause. Exceptions specified in the saving clause may permit an exemption from tax to continue for certain types of income even after the payee has otherwise become a U.S. resident alien for tax purposes.

If you are a U.S. resident alien who is relying on an exception contained in the saving clause of a tax treaty to claim an exemption from U.S. tax on certain types of income, you must attach a statement to Form W-9 that specifies the following five items.

1. The treaty country. Generally, this must be the same treaty under which you claimed exemption from tax as a nonresident alien.
2. The treaty article addressing the income.
3. The article number (or location) in the tax treaty that contains the saving clause and its exceptions.
4. The type and amount of income that qualifies for the exemption from tax.
5. Sufficient facts to justify the exemption from tax under the terms of the treaty article.

Example. Article 20 of the U.S.-China income tax treaty allows an exemption from tax for scholarship income received by a Chinese student temporarily present in the United States. Under U.S. law, this student will become a resident alien for tax purposes if their stay in the United States exceeds 5 calendar years. However, paragraph 2 of the first Protocol to the U.S.-China treaty (dated April 30, 1984) allows the provisions of Article 20 to continue to apply even after the Chinese student becomes a resident alien of the United States. A Chinese student who qualifies for this exception (under paragraph 2 of the first Protocol) and is relying on this exception to claim an exemption from tax on their scholarship or fellowship income would attach to Form W-9 a statement that includes the information described above to support that exemption.

If you are a nonresident alien or a foreign entity, give the requester the appropriate completed Form W-8 or Form 8233.

Backup Withholding

What is backup withholding? Persons making certain payments to you must under certain conditions withhold and pay to the IRS 24% of such payments. This is called "backup withholding." Payments that may be subject to backup withholding include, but are not limited to, interest, tax-exempt interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, payments made in settlement of payment card and third-party network transactions, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

You will not be subject to backup withholding on payments you receive if you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return.

Payments you receive will be subject to backup withholding if:

1. You do not furnish your TIN to the requester;
2. You do not certify your TIN when required (see the instructions for Part II for details);
3. The IRS tells the requester that you furnished an incorrect TIN;
4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only); or
5. You do not certify to the requester that you are not subject to backup withholding, as described in item 4 under "*By signing the filled-out form*" above (for reportable interest and dividend accounts opened after 1983 only).

Certain payees and payments are exempt from backup withholding. See *Exempt payee code*, later, and the separate Instructions for the Requester of Form W-9 for more information.

See also *Establishing U.S. status for purposes of chapter 3 and chapter 4 withholding*, earlier.

What Is FATCA Reporting?

The Foreign Account Tax Compliance Act (FATCA) requires a participating foreign financial institution to report all U.S. account holders that are specified U.S. persons. Certain payees are exempt from FATCA reporting. See *Exemption from FATCA reporting code*, later, and the Instructions for the Requester of Form W-9 for more information.

Updating Your Information

You must provide updated information to any person to whom you claimed to be an exempt payee if you are no longer an exempt payee and anticipate receiving reportable payments in the future from this person. For example, you may need to provide updated information if you are a C corporation that elects to be an S corporation, or if you are no longer tax exempt. In addition, you must furnish a new Form W-9 if the name or TIN changes for the account, for example, if the grantor of a grantor trust dies.

Penalties

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of $50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a $500 penalty.

Criminal penalty for falsifying information. Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of federal law, the requester may be subject to civil and criminal penalties.

Specific Instructions

Line 1

You must enter one of the following on this line; **do not** leave this line blank. The name should match the name on your tax return.

If this Form W-9 is for a joint account (other than an account maintained by a foreign financial institution (FFI)), list first, and then circle, the name of the person or entity whose number you entered in Part I of Form W-9. If you are providing Form W-9 to an FFI to document a joint account, each holder of the account that is a U.S. person must provide a Form W-9.

- **Individual.** Generally, enter the name shown on your tax return. If you have changed your last name without informing the Social Security Administration (SSA) of the name change, enter your first name, the last name as shown on your social security card, and your new last name.

Note for ITIN applicant: Enter your individual name as it was entered on your Form W-7 application, line 1a. This should also be the same as the name you entered on the Form 1040 you filed with your application.

- **Sole proprietor.** Enter your individual name as shown on your Form 1040 on line 1. Enter your business, trade, or "doing business as" (DBA) name on line 2.
- **Partnership, C corporation, S corporation, or LLC, other than a disregarded entity.** Enter the entity's name as shown on the entity's tax return on line 1 and any business, trade, or DBA name on line 2.
- **Other entities.** Enter your name as shown on required U.S. federal tax documents on line 1. This name should match the name shown on the charter or other legal document creating the entity. Enter any business, trade, or DBA name on line 2.
- **Disregarded entity.** In general, a business entity that has a single owner, including an LLC, and is not a corporation, is disregarded as an entity separate from its owner (a disregarded entity). See Regulations section 301.7701-2(c)(2). A disregarded entity should check the appropriate box for the tax classification of its owner. Enter the owner's name on line 1. The name of the owner entered on line 1 should never be a disregarded entity. The name on line 1 should be the name shown on the income tax return on which the income should be reported. For example, if a foreign LLC that is treated as a disregarded entity for U.S. federal tax purposes has a single owner that is a U.S. person, the U.S. owner's name is required to be provided on line 1. If the direct owner of the entity is also a disregarded entity, enter the first owner that is not disregarded for federal tax purposes. Enter the disregarded entity's name on line 2. If the owner of the disregarded entity is a foreign person, the owner must complete an appropriate Form W-8 instead of a Form W-9. This is the case even if the foreign person has a U.S. TIN.

Line 2

If you have a business name, trade name, DBA name, or disregarded entity name, enter it on line 2.

Line 3a

Check the appropriate box on line 3a for the U.S. federal tax classification of the person whose name is entered on line 1. Check only one box on line 3a.

IF the entity/individual on line 1 is a(n) . . .	THEN check the box for . . .
• Corporation	Corporation.
• Individual or • Sole proprietorship	Individual/sole proprietor.
• LLC classified as a partnership for U.S. federal tax purposes or • LLC that has filed Form 8832 or 2553 electing to be taxed as a corporation	Limited liability company and enter the appropriate tax classification: P = Partnership, C = C corporation, or S = S corporation.
• Partnership	Partnership.
• Trust/estate	Trust/estate.

Line 3b

Check this box if you are a partnership (including an LLC classified as a partnership for U.S. federal tax purposes), trust, or estate that has any foreign partners, owners, or beneficiaries, and you are providing this form to a partnership, trust, or estate, in which you have an ownership interest. You must check the box on line 3b if you receive a Form W-8 (or documentary evidence) from any partner, owner, or beneficiary establishing foreign status or if you receive a Form W-9 from any partner, owner, or beneficiary that has checked the box on line 3b.

Note: A partnership that provides a Form W-9 and checks box 3b may be required to complete Schedules K-2 and K-3 (Form 1065). For more information, see the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

If you are required to complete line 3b but fail to do so, you may not receive the information necessary to file a correct information return with the IRS or furnish a correct payee statement to your partners or beneficiaries. See, for example, sections 6698, 6722, and 6724 for penalties that may apply.

Line 4 Exemptions

If you are exempt from backup withholding and/or FATCA reporting, enter in the appropriate space on line 4 any code(s) that may apply to you.

Exempt payee code.

- Generally, individuals (including sole proprietors) are not exempt from backup withholding.
- Except as provided below, corporations are exempt from backup withholding for certain payments, including interest and dividends.
- Corporations are not exempt from backup withholding for payments made in settlement of payment card or third-party network transactions.
- Corporations are not exempt from backup withholding with respect to attorneys' fees or gross proceeds paid to attorneys, and corporations that provide medical or health care services are not exempt with respect to payments reportable on Form 1099-MISC.

The following codes identify payees that are exempt from backup withholding. Enter the appropriate code in the space on line 4.

1—An organization exempt from tax under section 501(a), any IRA, or a custodial account under section 403(b)(7) if the account satisfies the requirements of section 401(f)(2).

2—The United States or any of its agencies or instrumentalities.

3—A state, the District of Columbia, a U.S. commonwealth or territory, or any of their political subdivisions or instrumentalities.

4—A foreign government or any of its political subdivisions, agencies, or instrumentalities.

5—A corporation.

6—A dealer in securities or commodities required to register in the United States, the District of Columbia, or a U.S. commonwealth or territory.

7—A futures commission merchant registered with the Commodity Futures Trading Commission.

8—A real estate investment trust.

9—An entity registered at all times during the tax year under the Investment Company Act of 1940.

10—A common trust fund operated by a bank under section 584(a).

11—A financial institution as defined under section 581.

12—A middleman known in the investment community as a nominee or custodian.

13—A trust exempt from tax under section 664 or described in section 4947.

The following chart shows types of payments that may be exempt from backup withholding. The chart applies to the exempt payees listed above, 1 through 13.

IF the payment is for . . .	THEN the payment is exempt for . . .
• Interest and dividend payments	All exempt payees except for 7.
• Broker transactions	Exempt payees 1 through 4 and 6 through 11 and all C corporations. S corporations must not enter an exempt payee code because they are exempt only for sales of noncovered securities acquired prior to 2012.
• Barter exchange transactions and patronage dividends	Exempt payees 1 through 4.
• Payments over $600 required to be reported and direct sales over $5,000[1]	Generally, exempt payees 1 through 5.[2]
• Payments made in settlement of payment card or third-party network transactions	Exempt payees 1 through 4.

[1] See Form 1099-MISC, Miscellaneous Information, and its instructions.

[2] However, the following payments made to a corporation and reportable on Form 1099-MISC are not exempt from backup withholding: medical and health care payments, attorneys' fees, gross proceeds paid to an attorney reportable under section 6045(f), and payments for services paid by a federal executive agency.

Exemption from FATCA reporting code. The following codes identify payees that are exempt from reporting under FATCA. These codes apply to persons submitting this form for accounts maintained outside of the United States by certain foreign financial institutions. Therefore, if you are only submitting this form for an account you hold in the United States, you may leave this field blank. Consult with the person requesting this form if you are uncertain if the financial institution is subject to these requirements. A requester may indicate that a code is not required by providing you with a Form W-9 with "Not Applicable" (or any similar indication) entered on the line for a FATCA exemption code.

A—An organization exempt from tax under section 501(a) or any individual retirement plan as defined in section 7701(a)(37).

B—The United States or any of its agencies or instrumentalities.

C—A state, the District of Columbia, a U.S. commonwealth or territory, or any of their political subdivisions or instrumentalities.

D—A corporation the stock of which is regularly traded on one or more established securities markets, as described in Regulations section 1.1472-1(c)(1)(i).

E—A corporation that is a member of the same expanded affiliated group as a corporation described in Regulations section 1.1472-1(c)(1)(i).

F—A dealer in securities, commodities, or derivative financial instruments (including notional principal contracts, futures, forwards, and options) that is registered as such under the laws of the United States or any state.

G—A real estate investment trust.

H—A regulated investment company as defined in section 851 or an entity registered at all times during the tax year under the Investment Company Act of 1940.

I—A common trust fund as defined in section 584(a).

J—A bank as defined in section 581.

K—A broker.

L—A trust exempt from tax under section 664 or described in section 4947(a)(1).

M—A tax-exempt trust under a section 403(b) plan or section 457(g) plan.

Note: You may wish to consult with the financial institution requesting this form to determine whether the FATCA code and/or exempt payee code should be completed.

Line 5

Enter your address (number, street, and apartment or suite number). This is where the requester of this Form W-9 will mail your information returns. If this address differs from the one the requester already has on file, enter "NEW" at the top. If a new address is provided, there is still a chance the old address will be used until the payor changes your address in their records.

Line 6

Enter your city, state, and ZIP code.

Part I. Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. If you are a resident alien and you do not have, and are not eligible to get, an SSN, your TIN is your IRS ITIN. Enter it in the entry space for the Social security number. If you do not have an ITIN, see *How to get a TIN* below.

If you are a sole proprietor and you have an EIN, you may enter either your SSN or EIN.

If you are a single-member LLC that is disregarded as an entity separate from its owner, enter the owner's SSN (or EIN, if the owner has one). If the LLC is classified as a corporation or partnership, enter the entity's EIN.

Note: See *What Name and Number To Give the Requester*, later, for further clarification of name and TIN combinations.

How to get a TIN. If you do not have a TIN, apply for one immediately. To apply for an SSN, get Form SS-5, Application for a Social Security Card, from your local SSA office or get this form online at *www.SSA.gov*. You may also get this form by calling 800-772-1213. Use Form W-7, Application for IRS Individual Taxpayer Identification Number, to apply for an ITIN, or Form SS-4, Application for Employer Identification Number, to apply for an EIN. You can apply for an EIN online by accessing the IRS website at *www.irs.gov/EIN*. Go to *www.irs.gov/Forms* to view, download, or print Form W-7 and/or Form SS-4. Or, you can go to *www.irs.gov/OrderForms* to place an order and have Form W-7 and/or Form SS-4 mailed to you within 15 business days.

If you are asked to complete Form W-9 but do not have a TIN, apply for a TIN and enter "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments, you will generally have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note: Entering "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon. See also *Establishing U.S. status for purposes of chapter 3 and chapter 4 withholding*, earlier, for when you may instead be subject to withholding under chapter 3 or 4 of the Code.

Caution: A disregarded U.S. entity that has a foreign owner must use the appropriate Form W-8.

Part II. Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if item 1, 4, or 5 below indicates otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required). In the case of a disregarded entity, the person identified on line 1 must sign. Exempt payees, see *Exempt payee code*, earlier.

Signature requirements. Complete the certification as indicated in items 1 through 5 below.

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered inactive during 1983. You must sign the certification or backup withholding will apply. If you are subject to backup withholding and you are merely providing your correct TIN to the requester, you must cross out item 2 in the certification before signing the form.

3. Real estate transactions. You must sign the certification. You may cross out item 2 of the certification.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have been notified that you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments made in settlement of payment card and third-party network transactions, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, qualified tuition program payments (under section 529), ABLE accounts (under section 529A), IRA, Coverdell ESA, Archer MSA or HSA contributions or distributions, and pension distributions. You must give your correct TIN, but you do not have to sign the certification.

What Name and Number To Give the Requester

For this type of account:	Give name and SSN of:
1. Individual	The individual
2. Two or more individuals (joint account) other than an account maintained by an FFI	The actual owner of the account or, if combined funds, the first individual on the account[1]
3. Two or more U.S. persons (joint account maintained by an FFI)	Each holder of the account
4. Custodial account of a minor (Uniform Gift to Minors Act)	The minor[2]
5. a. The usual revocable savings trust (grantor is also trustee)	The grantor-trustee[1]
b. So-called trust account that is not a legal or valid trust under state law	The actual owner[1]
6. Sole proprietorship or disregarded entity owned by an individual	The owner[3]
7. Grantor trust filing under Optional Filing Method 1 (see Regulations section 1.671-4(b)(2)(i)(A))**	The grantor*
8. Disregarded entity not owned by an individual	The owner
9. A valid trust, estate, or pension trust	Legal entity[4]
10. Corporation or LLC electing corporate status on Form 8832 or Form 2553	The corporation
11. Association, club, religious, charitable, educational, or other tax-exempt organization	The organization
12. Partnership or multi-member LLC	The partnership
13. A broker or registered nominee	The broker or nominee
14. Account with the Department of Agriculture in the name of a public entity (such as a state or local government, school district, or prison) that receives agricultural program payments	The public entity
15. Grantor trust filing Form 1041 or under the Optional Filing Method 2, requiring Form 1099 (see Regulations section 1.671-4(b)(2)(i)(B))**	The trust

[1] List first and circle the name of the person whose number you furnish. If only one person on a joint account has an SSN, that person's number must be furnished.

[2] Circle the minor's name and furnish the minor's SSN.

[3] You must show your individual name on line 1, and enter your business or DBA name, if any, on line 2. You may use either your SSN or EIN (if you have one), but the IRS encourages you to use your SSN.

[4] List first and circle the name of the trust, estate, or pension trust. (Do not furnish the TIN of the personal representative or trustee unless the legal entity itself is not designated in the account title.)

* **Note:** The grantor must also provide a Form W-9 to the trustee of the trust.

** For more information on optional filing methods for grantor trusts, see the Instructions for Form 1041.

Note: If no name is circled when more than one name is listed, the number will be considered to be that of the first name listed.

Secure Your Tax Records From Identity Theft

Identity theft occurs when someone uses your personal information, such as your name, SSN, or other identifying information, without your permission to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN,
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax return preparer.

If your tax records are affected by identity theft and you receive a notice from the IRS, respond right away to the name and phone number printed on the IRS notice or letter.

If your tax records are not currently affected by identity theft but you think you are at risk due to a lost or stolen purse or wallet, questionable credit card activity, or a questionable credit report, contact the IRS Identity Theft Hotline at 800-908-4490 or submit Form 14039.

For more information, see Pub. 5027, Identity Theft Information for Taxpayers.

Victims of identity theft who are experiencing economic harm or a systemic problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case intake line at 877-777-4778 or TTY/TDD 800-829-4059.

Protect yourself from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, forward this message to *phishing@irs.gov*. You may also report misuse of the IRS name, logo, or other IRS property to the Treasury Inspector General for Tax Administration (TIGTA) at 800-366-4484. You can forward suspicious emails to the Federal Trade Commission at *spam@uce.gov* or report them at *www.ftc.gov/complaint*. You can contact the FTC at *www.ftc.gov/idtheft* or 877-IDTHEFT (877-438-4338). If you have been the victim of identity theft, see *www.IdentityTheft.gov* and Pub. 5027.

Go to *www.irs.gov/IdentityTheft* to learn more about identity theft and how to reduce your risk.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to provide your correct TIN to persons (including federal agencies) who are required to file information returns with the IRS to report interest, dividends, or certain other income paid to you; mortgage interest you paid; the acquisition or abandonment of secured property; the cancellation of debt; or contributions you made to an IRA, Archer MSA, or HSA. The person collecting this form uses the information on the form to file information returns with the IRS, reporting the above information. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation and to cities, states, the District of Columbia, and U.S. commonwealths and territories for use in administering their laws. The information may also be disclosed to other countries under a treaty, to federal and state agencies to enforce civil and criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. You must provide your TIN whether or not you are required to file a tax return. Under section 3406, payors must generally withhold a percentage of taxable interest, dividends, and certain other payments to a payee who does not give a TIN to the payor. Certain penalties may also apply for providing false or fraudulent information.

CITY OF SANTA FE

Date: November 20, 2024

To: Governing Body

From: Caryn Grosse, PMP, Facilities Project Manager III

Via: Regina Wheeler, Public Works Department Director Regina Wheeler (Nov 21, 2024 16:54 MST)
Sam Burnett, Facilities Division Director JOHN BURNETT (Nov 20, 2024 17:16 MST)

Subject: Mary Esther Gonzales Addition

Vendor Name: FacilityBUILD, Inc.

Munis Vendor Number: 6681

ACTION:
Request for Approval of Amendment #2 to the General Services Contract with FacilityBUILD, Inc., for Design and Construction of an Addition at Mary Esther Gonzales Senior Center to Extend the Term to June 30, 2025. (Caryn Grosse, Public Works Project Manager; clgrosse@santafenm.gov)

CONTRACT NUMBER:
The FY23 Munis Contract Number is 3203945.

BACKGROUND AND SUMMARY:
The Governing Body approved the State of New Mexico Aging and Long-Term Services Department Capital Appropriation Project Grant Agreement A20E5288 in November 2022, which provided $2,484,852 to plan, design, construct, equip, and furnish an expansion of the Mary Esther Gonzales Senior Center (MEG). The reversion date of this state grant has been extended to June 30, 2025. The design contract was approved in May 2023. Amendment #1 added construction to the scope and was approved by the Governing Body in November 2023.

While the interior construction is expected to be substantially complete by the end of December, colder temperatures may delay completion of the retaining wall, sidewalk and patio. In addition, there are a variety of activities, including inspections, punch list and warranty, installation of furniture and equipment, and so on, which are necessary to close out the construction phase and prepare the space for use. To accommodate these activities, Amendment #2 to extend the contract term to June 30, 2025 is required.

The scope of the project includes renovation of the arts and crafts room to create ADA-accessible restrooms, reconfiguration of the fitness room to provide additional access for users, and the construction of 2 additional rooms. Mary Esther Gonzales Senior Center is the primary senior center in the City of Santa Fe and staff have seen a dramatic increase in the number of clients who use wheelchairs. These additional rooms will provide greater accessibility to activities offered by the Senior Center.

ATTACHMENTS:
Amendment #2
Amendment #1 23-0671
General Services Contract 23-0354
Certificate of Insurance

PROCUREMENT METHOD:
The procurement method used was NMSA 1978, Section 13-1-129, Statewide Price Agreement, 30-00000-23-00070, which expires on July 31, 2025.

CITY OF SANTA FE
AMENDMENT No. 2 TO
GENERAL SERVICES CONTRACT
ITEM #23-0354

This AMENDMENT No. 2 (the "Amendment") amends the CITY OF SANTA FE GENERAL SERVICES CONTRACT, dated June 6, 2023, (the "Contract"), between the City of Santa Fe (the "City") and FacilityBUILD, Inc. (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Contract, Contractor has agreed to provide the City of Santa Fe with design and construction services for the expansion of the Mary Esther Gonzales Senior Center.

B. Pursuant to Article 8 of the Contract, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. TERM:

Article 5 of the Contract is hereby deleted in its entirety and the City and Contractor substitute the following Article 5 in its place:

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This Agreement shall begin on the date approved by the City and end on June 30, 2025. The City reserves the right to renew the Agreement on an annual basis by mutual agreement, not to exceed a total of four years in accordance with NMSA 1978, §§ 13-1-150 through 152.

2. CONTRACT IN FULL FORCE.

Except as specifically provided in this Amendment, the Contract remains and shall remain in full force and effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No. 2 to the City of Santa Fe General Services Agreement as of the dates set forth below.

CITY OF SANTA FE
AMENDMENT No. 1 TO
GENERAL SERVICES AGREEMENT
ITEM #23-0354

This AMENDMENT No. 1 (the "Amendment") amends the CITY OF SANTA FE GENERAL SERVICES AGREEMENT, dated June 6, 2023 (the "Agreement"), between the City of Santa Fe (the "City") and FacilityBUILD, Inc. (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Agreement, Contractor has agreed to provide the City of Santa Fe with design and construction services in the expansion of the Mary Esther Gonzales Senior Center.

B. Pursuant to Article 8 of the Agreement, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. SCOPE OF WORK

Article 2 of the Agreement is amended to add to the scope of work so that Article 2 reads as follows:

Contractor shall design additions to the Mary Esther Gonzales Senior Center, located at 1121 Alto Street, Santa Fe, NM 87501, per the Design Cost Proposal RFE: 23-076, attached hereto and made a part thereof, and in accordance with all of the provisions of the contract with the State of New Mexico price agreement # 00-00000-20-00110. This work includes, but is not limited to the following:

a. Approximately 3,150 square foot addition to the west side of the building containing offices

for counseling, client assessment and respite.

b. Approximately 2,000 square foot addition to the south side of the building for two new multipurpose rooms, renovation of an existing arts and crafts room into new accessible restrooms.

c. Work to include drawings and specifications, building permit application and all associated documentation.

In addition, Contractor shall also construct the south side addition per the plans, which shall include two new rooms, labeled as billiards room and arts and crafts room, and a courtyard, renovate the existing arts and crafts room for new ADA accessible restrooms, and expand the fitness room, per the proposal dated September 5, 2023, marked "Exhibit A," which is attached hereto and made a part thereof.

2. COMPENSATION.

Article 3, of the Agreement is amended to increase the amount of compensation by a total of $1,747,444.50, so that Article 3, reads in its entirety as follows:

The City shall pay to the Contractor based upon fixed prices for each Deliverable item as listed here.

Deliverable item:		Price
01	Design & Value Engineering (original contract)	$169,548.20
02	Construction of addition and other renovations (Amendment #1)	$1,346,000.00

Unanticipated Cost Overrun:	Price
20% Unanticipated Construction Cost Overrun*	$269,200.00

*In the event the project exceeds the deliverable amount, the City, at its discretion, may agree to pay additional compensation to the contractor in an amount less than or equal to 20% of the project cost, $269,200.00,

The total compensation under this Agreement shall not exceed $1,930,874.46 including New Mexico gross receipts tax.

3. TERM:

Article 5 of the Agreement is hereby amended to read as follows:

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This Agreement shall begin on date approved by the City, and end on December 31, 2024. The City reserves the right to renew the contract on an annual basis by mutual Agreement not to exceed a total of four years in accordance with NMSA 1978, §§ 13-1-150 through 152.

4. AGREEMENT IN FULL FORCE.

Except as specifically provided in this Amendment, the Agreement remains and shall remain in full force and effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No. 1 to the City of Santa Fe General Service Contract as of the date signed by the City set forth below.

CITY OF SANTA FE:

ALAN WEBBER, MAYOR

CONSTRUCTION BUDGET COST PROPOSAL

Date: 9/5/2023 RFE: 23-076

City of Santa Fe **Project:** CITY OF SANTA FE – MARY ESTER GONZALES SENIOR CENTER – RENOVATIONS – DESIGN ONLY
CARYN GROSSE, PMP PUBLIC WORKS Procurement Contract: *State Wide Pricing Agreement (SPA)*
120 SOUTH FEDERAL PL. #305, Email address: CLGROSSE@SANTAFENM.GOV
SANTA FE, NM 87501 Telephone # (505) 955-5938
Physical Job Address: *1121 ALTO ST., SANTA FE, NM 87501*
Plans and specifications provided by: *Mifsud Associates Architects, LLC.*
Architectural Firm: Mifsud Associates Architects, LLC **Architect: Paul Mifsud**
227 East Palace Avenue, Suite E 505-982-2363
Santa Fe, NM 87501

Scope of Work:

Phase 1: construct addition at Mary Esther Gonzales Senior Center, including two (2) new multi-purpose rooms on the southeast side of the building totaling about 2,000 square feet, renovate an existing arts and crafts room into new ADA accessible restrooms, and reconfigure walls between the existing fitness and billards room and provide a courtyard and hallways for access/egress.

Phase 2: develop construction plans for an approximately 2,600 square foot addition to the west side of the building and containing offices for counseling, client assessment and respite, with ADA accessible unisex restroom and employee breakroom.

2) Per plan sheets A-1, A-2 and A-3 dated 7/12/2023 by Mifsud Associates Architect as approved 7/13/2023 by owner and to include owner approved updated revisions.

Clarifications:

1) This is a budget proposal; final construction costs to be based upon final design documents, not to exceed the specified budget of $1,808,386, including tax.

Excludes:

Items not shown on drawings, including repair or replacement of existing architectural, structural, electrical, fire systems, life safety, any existing facility code violations, hidden conditions or additional material testing outside the project area and not included in the design process, and site improvements beyond the construction documents. Existing Irrigation or landscape work or any design construction work not specifically described in the scope of work, construction documents, new design drawings or specification is not included. Material Testing, Hazardous Materials Assessment, Abatement, Disposal, existing Fire Alarm and Fire Protection that are not part of the design proposal unless specifically noted otherwise.

	Contingency	*20%*	**$1,346,000.00** **$269,200.00**
		Subtotal	**$1,615,200.00**

FROM: **Caryn Grosse, PMP, Facilities Project Administrator Sr.**

ACTION:
Approval of Amendment#1 to Item #23-0354 for General Services Contract with FacilityBUILD, Inc. to Design and Construct an Addition at Mary Esther Gonzales Senior Center to add Scope, Increase the Contract Amount to $1,930,874.46, including NMGRT, and Extend the Term to December 31, 2024. (Caryn Grosse, clgrosse@santafenm.gov, 505-955-5938)

BACKGROUND AND SUMMARY:
The Governing Body approved the State of New Mexico Aging and Long-Term Services Department Capital Appropriation Project Grant Agreement A20E5288 in November 2022, which provides $2,484,852 to plan, design, construct, equip, and furnish an expansion of the Mary Esther Gonzales Senior Center (MEG). This state grant currently expires on June 30, 2024.

The schedule for this project is being compressed to encumber and expend the grant as quickly as possible. In order to begin construction as soon as drawings are complete, this amendment is being processed before the final construction costs based on the 100% design has been developed. The amendment cost includes cost estimate based on 60% design plus 20% contingency for unanticipated costs and additional design.

The design contract in the amount of $183,657.15 was approved in May 2023. Design and construction drawings are progressing beyond 60% completion and the plans are expected to be completed and ready for construction in November 2023.

Scope includes renovation of the arts and crafts room to create ADA-accessible restrooms, reconfiguration of the fitness room to provide additional access for users, and the construction of 2 additional rooms. Mary Esther Gonzales Senior Center is the primary senior center in the City of Santa Fe and staff have seen a dramatic increase in the number of clients who use wheelchairs. These additional rooms will provide greater accessibility to activities offered by the Senior Center.

City Staff is requesting a six-month extension from the State for the grant funding. While the construction is planned to be substantially complete by the end of June, there are a variety of activities, including inspections, punch list and warranty, installation of furniture, and so on, which are necessary to close out the construction phase and prepare the space for use. To accommodate these activities, the amendment extends the contract term to December 31, 2024.

PROCUREMENT METHOD:
The procurement method is via NM Statewide Price Agreement (SWPA) # 30-00000-23-00070 General Construction Services State-Wide which expires on June 30, 2024.

CITY OF SANTA FE
GENERAL SERVICES CONTRACT

MEG Center Expansion Contract

THIS AGREEMENT is made and entered into by and between the City of Santa Fe, herein after referred to as the "City", and **FacilityBuild** herein after referred to as the "Contractor."

IT IS MUTUALLY AGREED BETWEEN THE PARTIES:

1. Definitions

A. "Products and Services Schedule" refers to the complete list of products and services offered under this Agreement and the price for each. Product and service descriptions may be amended with the prior approval of the Agreement Administrator. New products and services shall not be added to the Products and Services Schedule.

B. "Business Hours" means 8:00 a.m. to 5:00 p.m. Mountain Time.

C. "You" and "your" refers to **FacilityBuild**. "We," "us" or "our" refers to the City and whose accounts are created under this Agreement.

2. **Scope of Work**

A. Contractor shall design additions to the Mary Esther Gonzales Senior Center, located at 1121 Alto Street, Santa Fe, NM 87501, per the Design Cost Proposal RFE: 23-076, attached hereto and made a part thereof, and in accordance with all of the provisions of the contract with the State of New Mexico price agreement # 00-00000-20-00110. This work includes, but is not limited to the following:

1) Approximately 3,150 square foot addition to the west side of the building containing offices for counseling, client assessment and respite.
2) Approximately 2,000 square foot addition to the south side of the building for two new multipurpose rooms, renovation of an existing arts and crafts room into new accessible restrooms.
3) Work to include drawings and specifications, building permit application and all associated documentation.

3. **Compensation**

The City shall pay to the Contractor based upon fixed prices for each Deliverable item as listed here.

Deliverable item:	U/I (unit of issue)	Price
01 Design		$138,296.63
02 Value Engineering Contingency		$31,251.57

The total compensation under this Agreement shall not exceed $169,548.20 excluding New Mexico gross receipts tax of $14,108.95 for a total of $183,657.15.

4. **Payment Provisions**

All payments under this Agreement are subject to the following provisions.

A. Acceptance - In accordance with Section 13-1-158 NMSA 1978, the City shall determine if the product or services provided meet specifications. Until the products or services have been accepted in writing by the City, the City shall not pay for any products or services. Unless otherwise agreed upon between the City and the Contractor, within thirty (30) days from the date the City receives written notice from the Contractor that payment is requested for services or within thirty (30) days from the receipt of products, the City shall issue a written certification (by letter or email) of complete or partial acceptance or rejection of the products or services. Unless the City gives notice of rejection within the specified time period, the products or services will be deemed to have been accepted.

B. Payment of Invoice - Upon acceptance that the products or services have been received and accepted, payment shall be tendered to the Contractor within thirty (30) days after the date of invoice. After the thirtieth day from the date that written certification of acceptance is issued, late payment charges shall be paid on the unpaid balance due on the contract to the Contractor at the rate of 1.5 % per month. Contractor may submit invoices for payment no more frequently than monthly. Payment will be made to the Contractor's designated mailing address. Payment on each invoice shall be due within 30 days from the date of the acceptance of the invoice. The City agrees to pay in full the balance shown on each account's statement, by the due date shown on said statement.

5. **Term**

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This Agreement shall begin on date approved by the City, and end on December 31, 2023. The City reserves the right to renew the contract on an annual basis by mutual Agreement not exceed a total of four years in accordance with NMSA 1978, §§ 13-1-150 through 152.

6. **Default and Force Majeure**

The City reserves the right to cancel all or any part of any orders placed under this contract without cost to the City, if the Contractor fails to meet the provisions of this contract

and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of sub-contractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the sub-contractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this paragraph shall not be exclusive and are in addition to any other rights now being provided by law or under this contract.

7. **Termination**

A. Grounds. The City may terminate this Agreement for convenience or cause. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) Except as otherwise provided in Paragraphs 7.A and 17, the City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 17, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

8. **Amendment**

A. This Agreement shall not be altered, changed or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Agreement to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Agreement, pursuant to the termination provisions as set forth in Paragraph 7 herein, or to agree to the reduced funding.

9. **Status of Contractor**

The Contractor, and Contractor's agents and employees, are independent Contractors for the City and are not employees of the City. The Contractor, and Contractor's agents and employees, shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Agreement. The Contractor acknowledges that all sums received hereunder are personally reportable by the Contractor for income tax purposes, including without limitation, self-employment tax and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has written authority to do so, and then only within the strict limits of that authority.

10. **Assignment**

The Contractor shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without the prior written approval of the City.

11. **Subcontracting**

The Contractor shall not subcontract any portion of the services to be performed under this Agreement without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Agreement, nor shall any subcontract obligate direct payment from the City.

12. **Non-Collusion**

In signing this Agreement, the Contractor/Contractor certifies the Contractor/Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City.

13. **Inspection of Plant**

The City may inspect, at any reasonable time during Contractor's regular business hours and upon prior written notice, the Contractor's plant or place of business, or any subcontractor's plant or place of business, which is related to the performance of this contract.

14. **Commercial Warranty**

The Contractor agrees that the tangible personal property or services furnished under this Agreement shall be covered by the most favorable commercial warranties the Contractor gives to any customer for such tangible personal property or services, and that the rights and remedies provided herein shall extend to the City and are in addition to and do not limit any rights afforded to the City by any other clause of this order. Contractor agrees not to disclaim warranties of fitness for a particular purpose or merchantability.

15. **Condition of Proposed Items**

Where tangible personal property is a part of this Agreement, all proposed items are to be NEW and of most current production, unless otherwise specified.

16. **Records and Audit**

During the term of this Agreement and for three years thereafter, the Contractor shall maintain detailed records pertaining to the services rendered and products delivered. These records shall be subject to inspection by the City, the State Auditor and other appropriate state and federal authorities. The City shall have the right to audit billings both before and after payment. Payment under this Agreement shall not foreclose the right of the City to recover excessive or illegal payments.

17. **Appropriations**

The terms of this Agreement, and any orders placed under it, are contingent upon sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorization are not made by the legislature, this Agreement, and any orders placed under it, shall terminate upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Agreement to unilaterally reduce funding, the Contractor shall have the option to terminate the Agreement or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

18. **Release**

The Contractor, upon final payment of the amount due under this Agreement, releases the City, its officers and employees, from all liabilities, claims and obligations whatsoever arising from or under this Agreement. The Contractor agrees not to purport to bind the City, unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

19. **Confidentiality**

Any confidential information provided to or developed by the Contractor in the

performance of this Agreement shall be kept confidential and shall not be made available to any individual or organization by the Contractor without prior written approval by the City.

20. **Conflict of Interest**

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Agreement, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Agreement. The Contractor shall comply with any applicable provisions of the New Mexico Governmental Conduct Act and the New Mexico Financial Disclosures Act.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Agreement, will continue to comply with, and that this Agreement complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Paragraph are material representations of fact upon which the City relied when this Agreement was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Agreement to the contrary, the City may immediately terminate the Agreement.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

21. **Approval of Contractor Representative(s)**

The City reserves the right to require a change in Contractor representative(s) if the assigned representative(s) are not, in the opinion of the City, adequately serving the needs of the City.

22. **Scope of Agreement; Merger**

This Agreement incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements and understandings have been merged into this written Agreement. No prior agreements or understandings, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.

23. **Notice**

The Procurement Code, Sections 13-1-28 through 13-1-199 NMSA 1978, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for bribes, gratuities and kickbacks.

24. **Equal Opportunity Compliance**

The Contractor agrees to abide by all federal and state laws, and local Ordinances, pertaining to equal employment opportunity. In accordance with all such laws, rules, and regulations, the Contractor agrees to assure that no person in the United States shall on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Agreement. If Contractor is found not to be in compliance with these requirements during the life of this Agreement, Contractor agrees to take appropriate steps to correct these deficiencies.

25. **Indemnification**

The Contractor shall hold the City and its employees harmless and shall indemnify the City and its employees against any and all claims, suits, actions, liabilities and costs of any kind, including attorney's fees for personal injury or damage to property arising from the acts or omissions of the Contractor, its agents, officers, employees or subcontractors. The Contractor shall not be liable for any injury or damage as a result of any negligent act or omission committed by the City, its officers or employees.

26. **New Mexico Tort Claims Act**

Any liability incurred by the City of Santa Fe in connection with this Agreement is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Agreement modifies or waives any provision of the New Mexico Tort Claims Act.

27. **Applicable Law**

The laws of the State of New Mexico shall govern this Agreement, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, § 38-3-2.By execution of this Agreement, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Agreement.

28. **Limitation of Liability**

The Contractor's liability to the City, for any cause whatsoever shall be limited to the purchase price paid to the Contractor for the products and services that are the subject of the City's, claim. The foregoing limitation does not apply to paragraph 25 of this Agreement or to damages resulting from personal injury caused by the Contractor's negligence.

29. **Incorporation by Reference and Precedence**

If this Agreement has been procured pursuant to a request for proposals, this Agreement is derived from (1) the request for proposal, (including any written clarifications to the request for proposals and any City response to questions); (2) the Contractor's best and final offer; and (3) the Contractor's response to the request for proposals.

In the event of a dispute under this Agreement, applicable documents will be referred to for the purpose of clarification or for additional detail in the following order of precedence: (1) amendments to the Agreement in reverse chronological order; (2) the Agreement, including the scope of work and all terms and conditions thereof; (3) the request for proposals, including attachments thereto and written responses to questions and written clarifications; (4) the Contractor's best and final offer if such has been made and accepted by the City; and (5) the Contractor's response to the request for proposals.

30. **Workers' Compensation**

The Contractor agrees to comply with state laws and rules applicable to workers' compensation benefits for its employees. If the Contractor fails to comply with the Workers' Compensation Act and applicable rules when required to do so, this Agreement may be terminated by the City.

31. **Inspection**

If this contract is for the purchase of tangible personal property (goods), final inspection and acceptance shall be made at Destination. Tangible personal property rejected at Destination for non-conformance to specifications shall be removed at Contractor's risk and expense promptly after notice of rejection and shall not be allowable as billable items for payment.

32. **Inspection of Services**

If this contract is for the purchase of services, the following terms shall apply.

A. Services, as used in this Article, include services performed, workmanship, and material furnished or utilized in the performance of services.

B. The Contractor shall provide and maintain an inspection system acceptable to the City covering the services under this Agreement. Complete records of all inspection work performed by the Contractor shall be maintained and made available to the City and for as long thereafter as the Agreement requires. The City has the right to inspect and test all services

contemplated under this Agreement to the extent practicable at all times and places during the term of the Agreement. The City shall perform inspections and tests in a manner that will not unduly delay or interfere with Contractor's performance.

C. If the City performs inspections or tests on the premises of the Contractor or a subcontractor, the Contractor shall furnish, and shall require subcontractors to furnish, at no increase in contract price, all reasonable facilities and assistance for the safe and convenient performance of such inspections or tests.

D. If any part of the services do not conform with the requirements of this Agreement, the City may require the Contractor to re-perform the services in conformity with the requirements of this Agreement at no increase in contract amount. When the defects in services cannot be corrected by re-performance, the City may:

(1) require the Contractor to take necessary action(s) to ensure that future performance conforms to the requirements of this Agreement; and

(2) reduce the contract price to reflect the reduced value of the services performed.

E. If the Contractor fails to promptly re-perform the services or to take the necessary action(s) to ensure future performance in conformity with the requirements of this Agreement, the City may:

(1) by contract or otherwise, perform the services and charge to the Contractor any cost incurred by the City that is directly related to the performance of such service; or

(2) terminate the contract for default.

33. **Insurance**

If the services contemplated under this Agreement will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Agreement, the following insurance coverage(s), naming the City as additional insured.

A. Commercial General Liability insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. Broader Coverage and Limits. The insurance requirements under this Agreement shall be the greater of (1) the minimum coverage and limits specified in this Agreement, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Agreement are sufficient to cover the obligations of Contractor hereunder.

C. Contractor shall maintain the above insurance for the term of this Agreement and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically

state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

34. **Impracticality of Performance**

A party shall be excused from performance under this Agreement for any period that the party is prevented from performing as a result of an act of God, strike, war, civil disturbance, epidemic, or court order, provided that the party has prudently and promptly acted to take any and all steps that are within the party's control to ensure performance. Subject to this provision, such non-performance shall not be deemed a default or a ground for termination.

35. **Invalid Term or Condition**

If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

36. **Enforcement of Agreement**

A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

37. **Patent, Copyright and Trade Secret Indemnification**

A. The Contractor shall defend, at its own expense, the City against any claim that any product or service provided under this Agreement infringes any patent, copyright to trademark in the United States or Puerto Rico, and shall pay all costs, damages and attorneys' fees that a court finally awards as a result of any such claim. In addition, if any third party obtains a judgment against the City based upon Contractor's trade secret infringement relating to any product or services provided under this Agreement, the Contractor agrees to reimburse the City for all costs, attorneys' fees and amount of the judgment. To qualify for such defense and or payment, the City shall:

1) give the Contractor prompt written notice within 48 hours of any claim;
2) allow the Contractor to control the defense of settlement of the claim; and
3) cooperate with the Contractor in a reasonable way to facilitate the defense or settlement of the claim.

B. If any product or service becomes, or in the Contractor's opinion is likely to become the subject of a claim of infringement, the Contractor shall at its option and expense:

1) provide the City the right to continue using the product or service and fully indemnify the City against all claims that may arise out of the City's use of the product or service;

2) replace or modify the product or service so that it becomes non-infringing; or,

3) accept the return of the product or service and refund an amount equal to the value of the returned product or service, less the unpaid portion of the purchase price and any other amounts, which are due to the Contractor. The Contractor's obligation will be void as to any product or service modified by the City to the extent such modification is the cause of the claim.

38. **Survival**

The Agreement paragraphs titled "Patent, Copyright, Trademark, and Trade Secret Indemnification; Indemnification; and Limit of Liability" shall survive the expiration of this Agreement. Software licenses, leases, maintenance and any other unexpired Agreements that were entered into under the terms and conditions of this Agreement shall survive this Agreement.

39. **Disclosure Regarding Responsibility**

A. Any prospective Contractor and any of its Principals who enter into a contract greater than sixty thousand dollars ($60,000.00) with any City for professional services, tangible personal property, services or construction agrees to disclose whether the Contractor, or any principal of the Contractor's company is presently debarred, suspended, proposed for debarment, or declared ineligible for award of contract by any federal entity, state agency or local public body.

B. Principal, for the purpose of this disclosure, means an officer, director, owner, partner, or
a person having primary management or supervisory responsibilities within a business entity or related entities.

C. The Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, the Contractor learns that the Contractor's disclosure was at any time erroneous or became erroneous by reason of changed circumstances.

D. A disclosure that any of the items in this requirement exist will not necessarily result in termination of this Agreement. However, the disclosure will be considered in the determination of the Contractor's responsibility and ability to perform under this Agreement. Failure of the Contractor to furnish a disclosure or provide additional information as requested will be grounds for immediate termination of this Agreement pursuant to the conditions set forth in Paragraph 7 of this Agreement.

E. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the disclosure required by this document. The knowledge and information of a Contractor is not required to exceed that which is the normally possessed by a prudent person in the ordinary course of business dealings.

F. The disclosure requirement provided is a material representation of fact upon which reliance was placed when making an award and is a continuing material representation of the facts during the term of this Agreement. If during the performance of the contract, the

Contractor is indicted for or otherwise criminally or civilly charged by any government entity (federal, state or local) with commission of any offenses named in this document the Contractor must provide immediate written notice to the City. If it is later determined that the Contractor knowingly rendered an erroneous disclosure, in addition to other remedies available to the Government, the City may terminate the involved contract for cause. Still further the City may suspend or debar the Contractor from eligibility for future solicitations until such time as the matter is resolved to the satisfaction of the City.

40. **Suspension, Delay or Interruption of Work**

The City may, without cause, order the Contractor, in writing, to suspend, delay or interrupt the work in whole or in part for such period of time as the City may determine. The contract sum and contract time shall be adjusted for increases in cost and/or time associated with Contractor's compliance therewith. Upon receipt of such notice, Contractor shall leave the jobsite and any equipment in a safe condition prior to departing. Contractor must assert rights to additional compensation within thirty (30) days after suspension of work is lifted and return to work is authorized. Any compensation requested for which entitlement is granted and the contract sum adjusted, shall have profit included (for work completed) and for cost only (not profit) for Contractor costs incurred directly tied to the suspension itself and not otherwise covered by Contract remedy. Any change in Total Compensation must be reflected in an Amendment executed pursuant to Section 8 of this Agreement.

41. **Notification**

Either party may give written notice to the other party in accordance with the terms of this Paragraph. Any written notice required or permitted to be given hereunder shall be deemed to have been given on the date of delivery if delivered by personal service or hand delivery or three (3) business days after being mailed.

DESIGN COST PROPOSAL

Date: 4/17/2023 RFE: 23-076

City of Santa Fe **Project:** CITY OF SANTA FE – MARY ESTER GONZALES SENIOR CENTER – RENOVATIONS – DESIGN ONLY

CARYN GROSSE, PMP PUBLIC WORKS Procurement Contract: *SPA*

120 SOUTH FEDERAL PL. #305, Email address: CLGROSSE@SANTAFENM.GOV

SANTA FE, NM 87501 Telephone # (505) 955-5938

Physical Job Address: *1121 ALTO ST., SANTA FE, NM 87501*

Plans and specifications provided by: *Mifsud Associates Architects, LLC.*

Architectural Firm: Mifsud Associates Architects, LLC ***Architect: Paul Mifsud***

227 East Palace Avenue, Suite E 505-982-2363

Santa Fe, NM 87501

Scope of Design Work (Phase 1 and Phase 2):

1)The project will include an approximately 3,150 square foot addition to the west side of the building and containing offices for counseling, client assessment and respite. This addition will also include ADA accessible restrooms and an employee breakroom. The project will also include two new multi-purpose rooms to be added to the east side of the building totaling about 2,000 square feet. This work will include renovation an existing arts and crafts room into the new ADA accessible restroom and provide a hallway that will access the new multi-purpose rooms. The work will include providing drawings, and specifications, and submitting the Building Permit Application and all associated documentations. Architect will also meet with the owner and end user to obtain direction and to coordinate their needs to meet the requirements of the project.

*2)Post design inspection (Job Site Compliance Inspections) by the Architect or the design team is **not** included and will need to be added by a change order if desired or needed, when requested by owner.*

Clarifications:

*1) See **attached proposal (Attachment A) and plan (Attachment B) from Mifsud Associate Architects, LLC** dated February 14, 2023 for greater details and further clarifications including the civil, structural, architectural or MEP portion of the project.*

*2) Coral design costs (exterior site improvements or new storage facility) are **not** included within this cost proposal.*

3) A soils report for the new facility is included within this cost proposal.

4) An allowance of $3,500.00 is included for a materials report. Owner my provide a materials report and a credit of $3,500.00 will be issued if needed. Final cost of the materials report is TBD.

Value Engineering Contingency: *Should the design cost budget exceed the budgeted cost of $2,400,000.00 the design may be valued engineered - see Option A below for the added cost which may be exercised if approved by owner or if not needed credited back to the owner.*

Excludes:

Permit or expansion fees, Repair or replacement of existing architectural, structural, electrical, fire systems, life safety, existing code violations, hidden conditions or additional material testing, site improvements; Irrigation or landscape work or any design construction work not specifically described in the scope of work, construction documents, new design drawings or specification is not included. Material Testing, Hazardous Materials Assessment, Abatement, Disposal, Fire Alarm and Fire Protection that are not part of the design proposal unless specifically noted otherwise..

				$138,296.63
	Option A:	*Value Engineering Contingency*	*Add:*	**$31,251.57**

MIFSUD ASSOCIATES ARCHITECTS LLC

www.santafearchitects.com

Cameron Kilcup
Facility Build
5904 Florence Ave. NE
Albuquerque, New Mexico 87113

February 14, 2023

Dear Cameron,

Based on our previous programming work on this project, and on our extensive knowledge of the facility, we have developed this proposal to provide architectural consulting services for the proposed **additions and renovation work** at the **Mary Esther Gonzales Senior Center at 1121 Alto Street** in Santa Fe, New Mexico. Mifsud Associates Architects, LLC will provide consulting services for the design development, and construction documents of the proposed improvements. We are very familiar with this facility, while our previous work improving this building has given us a special understanding of the building's construction systems and renovation history.

PROJECT DESCRIPTION

The project will include an approximately 3,150 square foot addition to the west side of the existing building containing offices for counseling, client assessment, and respite. This addition will also include ADA accessible restrooms and an employee breakroom. The project will also include two new multi-purpose rooms to be added to the east side of the building totalling about 2,000 square feet. This work will include renovating an existing arts and crafts room into new ADA accessible restrooms and provide a new hallway that will access the new multi-purpose rooms. The design development will be closely based on the schematic design produced by our office in March of 2019. The work will include providing drawings, and specifications, and submitting the Building Permit Application and all associated documentation. We will also meet with you and the users to obtain direction and to coordinate their needs to meet the requirements of the project.

Our work will be divided into two Phases:

PHASE I: DESIGN DEVELOPMENT AND PRELIMINARY APPROVAL

Using the information we previously discussed, we will provide architectural design development services that explore options and develop a final scope for the work. The process will consist of our generation of design options and engineering strategies that we both review. You will have plans, elevations, and electrical and mechanical strategies that you approve before moving on to the next phase of the work. This work will also include a preliminary specification of the materials and equipment to be used. We will visit the site as needed to determine the existing conditions and available electrical and mechanical facilities for the project. Documents will be produced to define the basic layouts and conditions, including preliminary engineering drawings. We will meet with City of Santa Fe Public Works Department to ensure the design meets all requirements before moving on to the next Phase of the Work.

PHASE II: CONSTRUCTION AND PERMIT DOCUMENTS

We will produce and coordinate the final construction documents, which will be suitable for pricing and construction. We will develop and issue details as they are needed to describe the design. We will perform HVAC load calculations, Structural, Plumbing, Mechanical, and Electrical systems design and drawings. We understand that the building may require an upgraded electrical service. This work will include meeting with you and your staff to obtain direction and to coordinate your needs to meet the requirements of the project and to confirm the submittal requirements and submitting the Building Permit Application and all associated documentation. This work will also include Civil engineering services. Any changes made to the work completed in this phase after client approval will be considered additional services.

We will produce the following documents:

- Information sheet with a title, drawing index, vicinity map, and code information.
- Site Plan identifying site amenities, property lines, parking areas, and setbacks.
- Site Demolition Plan
- Demolition floor plan showing walls, structure, systems, and fixtures to be removed
- Floor Plans showing dimensions, wall types, windows and doors, and designated work areas.
- Exterior elevations of the remodelled building
- Reflected Ceiling Plans coordinating lighting and HVAC layouts
- Roof Plan, including drainage design.
- Interior elevations of restrooms and casework
- Typical wall sections of all separations and conditions, including reference to approved fire assemblies
- Detail sheets with site, roof , and other details.
- Window and door schedules, notes, and details

Drawings that will be provided by the Engineering team:

- Grading and drainage plans
- Site construction detail sheets
- Foundation plans & details
- Roof framing plans & details
- Mechanical plans, details, and schedules
- Mechanical Roof Plan, details, notes.
- Plumbing plans, details, notes, and schedules
- Electrical power & lighting plans.
- Electrical diagrams, panel schedules, and notes.
- Special systems plans, notes, and details.
- Fire Protection Plans, Details, and calculations.

CONTINGENCY

Value engineering revisions to the construction documents needed after the completion of Phase II of this agreement will be handled on an hourly basis under this contingency. *This is an estimate and not a fixed fee*, and if revisions to the design and construction documents are not needed this will not be utilized.

In order to provide quality services, please furnish us with full information as to your requirements including any special or extraordinary considerations for the project. Additionally, access to any pertinent existing data, including any environmental survey, asbestos-containing material test results, or energy evaluation will be critical to completing a successful project. This proposal assumes that a geotechnical investigation will be conducted on the site. A conventional concrete slab and stem wall on a continuous footing is assumed to be acceptable.

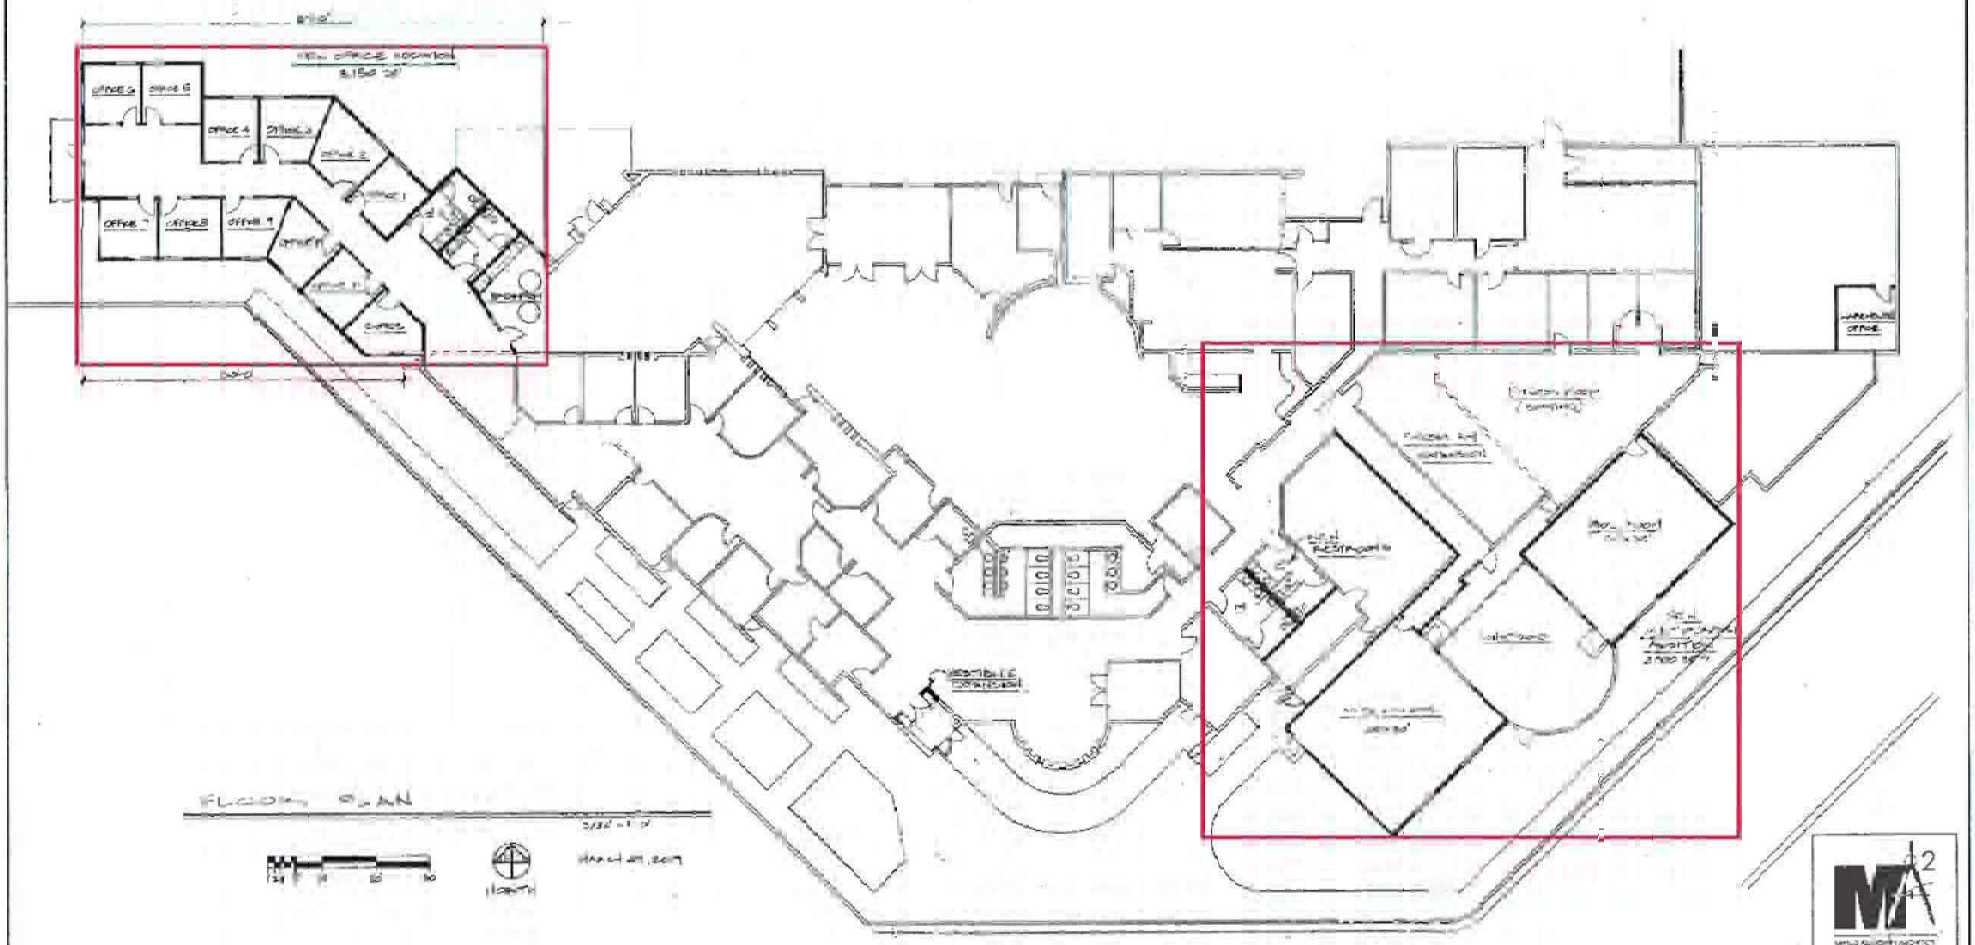
Not Included in Our Fees

Gross receipts tax at 8.3125%, plotting, permitting or approval fees, reproduction of documents for permitting and construction, third party renderings, and overnight mail charges are not included and if needed, will be billed as separate line items at our cost. We do NOT charge for in-house copies, phone calls, or faxes.

Hourly Rates (not including gross reciepts tax):

Principal Architect: $161.00/hour
Associate / Project Manager: $110/hour
Drafting / Expediter: $98.00/hour
Civil Engineer: $173.00/hour
Structural Engineer: $259.00/hour
Mechanical Engineer: $288.00/hour
Electrical Engineer: $288.00/hour

Terms



We will bill you monthly for the Work we have completed, and payment will be due within 30 days of billing. We will not require a down payment to begin our work. Interest will be charged at a rate of 4% per month for any outstanding balance unpaid after 60 days. The terms and conditions of this agreement are valid for 12 months from the date of the proposal.

This agreement may be terminated at any time by either party upon receipt of written notice. Any fees for services provided before notification of termination is received will be due and payable upon receipt of our final invoice. We agree that any disputes relating to our work on this project will at first be dealt with by a professional mediator. Mifsud Associates Architects' liability on this project shall be limited to the amount of our fees or $50,000.00, whichever is greater. Client shall indemnify, defend, and hold harmless MA Squared, DBA Mifsud Associates Architects, LLC, its officers, agents, employees and subcontractors from liability, and all associated costs arising from services or work performed on the Project by third parties, including but not limited to Client, its officers, employees, agents, subcontractors, consultants, and contractors.

MARY ESTHER GONZALES SENIOR CENTER

1121 ALTO STREET

SANTA FE, NEW MEXICO

City of Santa Fe, New Mexico
Memorandum

DATE: **May 10, 2023**

TO: **Public Works & Utilities Committee, Governing Body**

VIA: **Regina Wheeler, Public Works Director**
Kyra Ochoa, Community Health and Safety Department Director Kyra Ochoa (May 11, 2023 11:24 MDT)
Maria Sanchez-Tucker, Community Services Division Director Maria C. Tucker
Sam Burnett, Facilities Division Director

FROM: **Caryn Grosse, PMP, Facilities Project Administrator Sr.** CG

ACTION:
Approval of a General Services Contract with FacilityBUILD, Inc., in the total amount of $183,657.15, including NMGRT, for design of the Mary Esther Gonzales Senior Center Expansion; Caryn Grosse, clgrosse@santafenm.gov, 505-955-5938; Denise Gabaldon, rdgabaldon@santafenm.gov, 505-955-5934

BACKGROUND AND SUMMARY:
The Governing Body recently approved the State of New Mexico Aging and Long Term Services Department Capital Appropriation Project Grant Agreement A20E5288 which provides $2,484,852 to plan, design, construct, equip and furnish an expansion of the Mary Esther Gonzales Senior Center (MEG). The grant provides $148,466 for design. Community Services is providing an additional $35,200 to complete detailed design and construction plans from the schematic design (attached BAR). The remaining $2,311,537 of the grant is allocated for construction.

Mary Esther Gonzales Senior Center is the primary senior center in the City of Santa Fe. Located in the northeastern part of the City where senior population is concentrated, the MEG facility has seen a dramatic increase in clients who use wheelchairs.

Examples of planned improvements to the facility include:

1. While clients who use wheelchairs can be comfortably accommodated in the cafeteria, they are unable to easily access the fitness room and the arts & crafts room. These rooms will be expanded and remodeled to create wider entrances and larger aisles between equipment and furnishings to provide access for users in wheelchairs.

2. There is currently only one ADA toilet in the MEG and during peak hours when 200-250 people may be in the building, patrons who use wheelchairs may have to use non-ADA toilets which may compromise their safety and privacy. Installation of new ADA restrooms will be provided.

3. Additional offices for counseling, assessment of clients, and respite will be provided.

PROCUREMENT METHOD:
The procurement method is via NM Statewide Price Agreement (SWPA) # 00-00000-20-00110 which expires on June 30, 2023.

FUNDING SOURCE:
$183,666 is available for design; $148,466 from State of New Mexico Aging and Long Term Services Department Capital Appropriation Project Grant A20E5288 and $35,200 from Community Service

From: **Andrew Cordero, Contracts Administrator** AC

Subject: **On-Demand Parking Payment via Mobile App for Street Parking**

Vendor Name: **ParkMobile LLC**

Vendor Number: **1186**

ACTION:
Request for the Approval of Agreement with ParkMobile LLC for Mobile App for Street Parking for a Not to Exceed Total Amount of $235,800 Not Including NMGRT for a Three Year Term. (Andrew Cordero, Contracts Administrator, accordero@santafenm.gov)

BACKGROUND AND SUMMARY:
The purpose of this Agreement is for the continuation of payment services through the vendor's app for parking in lots and on-street. This includes signage for each parking meter. The cost per transaction is $0.30 and is paid by the parking customer. This payment app provides a convenient alternative payment method to the community which is used by both locals and visitors.

SERVICE TERMS	
Services	ParkMobile will provide Client with the Services related to the following types of parking transactions: **On-Demand, Reservations**
Initial Term	3 years beginning on the Effective Date
Renewal	This Agreement will automatically renew for additional successive one (1) year terms unless earlier terminated pursuant to this Agreement's express provisions or either party provides written notice of non-renewal at least sixty (60) days before the end of the then-current term (each a "Renewal Term" and, collectively, together with the Initial Term, the "Term").
Termination	Either party may terminate this Agreement effective immediately on written notice to the other party, if the breaching party materially breaches this Agreement, and such breach: (i) is incapable of cure; or (ii) being capable of cure, remains uncured thirty (30) days after the non-breaching party provides the breaching party with written notice of such breach. Notwithstanding any renewals or amendments, this Agreement shall terminate ten (10) years from the Effective Date if not terminated earlier.
Merchant of Record	The parties designate Client as the merchant of record. Client is responsible for the payment of payment processing and related fees. ParkMobile will pass real-time authorized debit/credit card transactions to Client via a gateway solution. ParkMobile will issue invoices to Client on a

	monthly basis for all fees due to ParkMobile under this Agreement. Client shall pay each invoice within thirty (30) days of the invoice date. Client shall make all payments hereunder in US dollars to the address or account specified on the applicable invoice.
Parking Locations	The Services will be provided to Client in the following locations / geographical territory: **All Client locations**
Signage	Client will receive one free welcome kit that includes the aluminum signs and/or decal stickers necessary to complete implementation (installation not included). All signage included in the welcome kit is designed using ParkMobile's standard signage templates. Custom signage may be made available to Client for purchase at ParkMobile's current signage rates. Any requested changes to ParkMobile's standard signage templates will be treated as custom signage. Additional and/or replacement signage may be purchased by Client at ParkMobile's then-current signage rates. Installation and maintenance of all signage is Client's sole responsibility.
Governing Law	State of New Mexico
Schedules	This Agreement incorporates the following Schedules: Schedule 1: Client General Terms and Conditions; Schedule 2: Services; Schedule 3: Client Electronic Funds Authorization Form

SCHEDULE 1:
CLIENT GENERAL TERMS & CONDITIONS

1. SERVICES

1.1 General. During the term, ParkMobile will provide the Services to Client in accordance with the terms and conditions of this Agreement.

1.2 Launch Date. ParkMobile and the Client's Parking Division Director will mutually agree in writing upon the launch date for the Services.

1.3 ParkMobile Application. On and after the launch date, Client's Parking Locations, along with associated Parking Information, will be made available to the general public through the ParkMobile Application.

1.4 Parking Management Services. Subject to the license granted in Section 2, Client will be provided access to the Platform to manage Client's Parking Locations and associated Parking Information.

1.5 Parking Locations. The parties agree that ParkMobile does not own, operate, manage, or maintain any Parking Location. Client agrees that ParkMobile is not responsible for the condition or operation of any Parking Location, including, but not limited to, the operation of third-party hardware and/or software-based solutions used by Client at the Parking Location or for the delivery and/or fulfillment of parking or other services at the Parking Location.

1.6 Publicity of Services. Each party will use commercially reasonable efforts to market the Services throughout the Term. All brochures and promotional material to be distributed by Client will be in a form mutually agreed upon by the parties, which will not be unreasonably withheld or delayed.

1.7 Exclusivity. Throughout the term, the parties agree that ParkMobile will be the exclusive provider of electronic payment parking services for Client.

1.8 PCI DSS. ParkMobile has obtained, and will continue to maintain throughout the term, Payment Card Industry – Data Security Standard (PCI DSS) certification.

1.9 Online Client General Terms & Conditions. The parties agree that this Agreement supersedes the Client General Terms and Conditions that is publicly available at https://parkmobile.io/client-terms with respect to the Services provided under this Agreement.

2. ACCESS & USE OF PLATFORM

2.1 Provision of Access. Subject to and conditioned on Client's and its Authorized Users' compliance with the terms and conditions of this Agreement, all applicable laws and regulations, and Client's payment of fees, ParkMobile grants Client a non-exclusive, non-transferable right to access and use the Platform during the Term. Such use is limited to Client's internal use. ParkMobile will provide Client Access Credentials to the Platform within a reasonable time following the Effective Date.

2.2 Documentation License. ParkMobile hereby grants to Client a non-exclusive, non-sublicensable, non-transferable license to use Documentation provided by ParkMobile during the Term solely for Client's internal business purposes in connection with its use of the Services.

2.3 Use Restrictions. Client will not, directly or indirectly, and will not permit any third party to, access or use the Platform or Documentation except as permitted by this Agreement. For purposes of clarity and without limiting the generality of the foregoing, Client shall not, except as this Agreement expressly permits: (a) copy, modify, or create derivative works of the Platform or Documentation, in whole or in part; (b) rent, lease, copy, lend, sell, sublicense, assign, distribute, publish, transfer, or otherwise make available the Platform or Documentation to any person or entity; (c) reverse engineer, disassemble, decompile, decode, adapt, or otherwise attempt to derive or gain access to any software component of the Platform, in whole or in part; (d) bypass or breach any security device or protection used by the Platform or access or use the Platform other than by an User authorized by the Client's Parking Division Director through the use of his or her own then valid Access Credentials; (e) remove any proprietary notices from the Platform or Documentation; (f) use the Platform or Documentation in any manner or for any purpose that infringes, misappropriates, or otherwise violates any IP Right or other right of any person, or that violates any applicable law; (g) intentionally or recklessly upload invalid data, malware, or other software agents through the Platform; or (h) use the Platform for any purpose beyond the scope of the access granted in this Agreement.

2.4 Reservation of Rights. Nothing in this Agreement grants any right, title, or interest in or to (including any license under) any IP Rights in or relating to, the Services, whether expressly, by implication, estoppel, or otherwise. All right, title, and interest in and to the Services are and will remain with ParkMobile.

2.5 Changes. ParkMobile reserves the right, in its sole discretion, to make any changes to the Services that it deems necessary or useful to: (a) maintain or enhance: (i) the quality or delivery of ParkMobile's services to its customers; (ii) the competitive strength of or market for ParkMobile's services; or (iii) the Services' cost efficiency or performance; or (b) to comply with applicable law. ParkMobile will provide the Services in substantially similar form during the term of this Agreement.

2.6 Suspension or Termination of Services. Notwithstanding anything to the contrary in this Agreement, ParkMobile may suspend, or terminate, Client's, any Authorized User's, or any other person's access to or use of all or any part of the Services, without incurring any resulting obligation or liability, if: (a) ParkMobile receives a judicial or other governmental demand or order, subpoena, or law enforcement request that expressly or by reasonable implication requires ParkMobile to do so; or (b) ParkMobile believes, in its good faith and sole discretion, that (i) Client or any Authorized User has failed to comply with any material

term of this Agreement, or accessed or used the Services beyond the scope of the rights granted or for a purpose not authorized under this Agreement; (ii) Client or any Authorized User is, has been, or is likely to be using the Services for fraudulent, misleading, or unlawful activities; (iii) there is a threat or attack on any of the Services; (iv) Client's or any Authorized User's use of the Services disrupts or poses a security risk to ParkMobile or to any other client, end user, vendor or partner of ParkMobile; or (v) this Agreement expires or is terminated. This Section does not limit any of ParkMobile's other rights or remedies, whether at law, in equity, or under this Agreement.

3. CLIENT RESPONSIBILITIES

3.1 **Use of Platform Account.** Client is responsible and liable for all uses of the Platform resulting from access provided by Client, directly or indirectly, whether such access or use is permitted by or in violation of this Agreement. Client must notify ParkMobile immediately of any breach of security or unauthorized use of Client's account.

3.2 **Parking Information.** Client is responsible for setting all rates, zones, and other required information regarding its Parking Locations offered through the ParkMobile Application and for keeping such information up to date within the Platform.

3.3 **Effect of Client Failure or Delay.** ParkMobile is not responsible or liable for any delay or failure of performance caused in whole or in part by Client's delay in performing, or failure to perform, any of its obligations under this Agreement.

4. SERVICE AND SUPPORT

4.1 **Scheduled Maintenance.** ParkMobile will use commercially reasonable efforts to schedule downtime for routine maintenance of the Services between the hours of 12:00 a.m. and 4:00 a.m., Eastern Time; however, ParkMobile may modify this window from time-to-time by providing Client with advance notice. If ParkMobile anticipates that it will need to perform maintenance activities that are likely to be disruptive to the use of the Services outside of the scheduled maintenance window, ParkMobile will use commercially reasonable efforts to give Client at least 24 hours prior notice. Notwithstanding the foregoing, ParkMobile reserves the right to perform any required emergency maintenance work outside of the scheduled maintenance window. To the extent practicable, ParkMobile will use commercially reasonable efforts to notify Client before commencing any emergency maintenance outside of the scheduled maintenance window and will use commercially reasonable efforts to limit or avoid impact to use of the Services.

4.2 **Client Support.** ParkMobile will use commercially reasonable efforts to assist Client with any technical support that Client may reasonably require in using the Services. ParkMobile will provide technical support for rate and configuration changes to Client Monday – Friday (excluding holidays) between the hours of 8:00 a.m. and 6:00 p.m. (ET). For issues relating to On-Demand Parking Services, Client may submit a support request via email to support@parkmobile.io. For issues relating to Reservation Parking Services, Client may submit a support request via email to prs@parkmobile.io. ParkMobile will provide Client with emergency technical support 24 hours a day, seven days a week, 365 days a year. In the event of an emergency involving technical and/or system availability issues, Client may contact the on-call engineer via email to applicationsupport@parkmobile.io.

4.3 **End-User Support.** ParkMobile will provide customer support for ParkMobile Users 24 hours a day, seven days a week, 365 days a year. There are multiple methods that ParkMobile Users can access customer support, such as: ParkMobile's online ticketing system, in-app chat feature, and toll-free phone number.

5. CONFIDENTIAL INFORMATION

5.1 **General.** Neither party will disclose the other party's Confidential Information except to its employees, affiliates, agents, or professional advisors ("Representatives") who need to know it and who have a legal obligation to keep it confidential. The receiving party will use the disclosing party's Confidential Information only to exercise rights and fulfill obligations under this Agreement. The receiving party will ensure that its Representatives are also subject to the same non-disclosure and use obligations. The receiving party may disclose the other party's Confidential Information when required by law after giving reasonable notice to the disclosing party, if permitted by law.

5.2 **Personal Data.** In the event a party discloses Personal Data to the other party, the receiving party will have the right to use the Personal Data only as required and necessary to perform its obligations under this Agreement.

6. INTELLECTUAL PROPERTY OWNERSHIP

6.1 **Client Data.** Client Data remains the sole and exclusive property of Client. Client grants ParkMobile a irrevocable, royalty-free license to use Client Data in connection with the Services for the term of the contract.

6.2 **Client Brand Features.** Client grants to ParkMobile a nonexclusive, nonsublicensable, nontransferable, royalty free license during the term to display Client's Brand Features, e.g., Client's seal and name under branding guidelines, in connection with providing and/or marketing the Services. ParkMobile will not make any use of Client's Brand Features in a manner that dilutes, tarnishes or blurs the value of such Brand Features.

6.3 **ParkMobile IP.** Client acknowledges that, as between Client and ParkMobile, ParkMobile owns all right, title, and interest, including all IP Rights, in and to the Services, including but not limited to the ParkMobile Application and the Platform.

6.4 **ParkMobile Brand Features.** ParkMobile grants to Client a nonexclusive, nonsublicensable, nontransferable, royalty free license during the term to display ParkMobile's Brand Features in connection with the Services, subject to ParkMobile's Brand Guidelines available at https://parkmobile.io/company/parkmobile-media-assets/logos/. Client will not make any use of ParkMobile's Brand Features in a manner that dilutes, tarnishes or blurs the value of such Brand Features.

6.5 **ParkMobile User Data.** ParkMobile User Data remains the sole and exclusive property of ParkMobile. ParkMobile may sublicense certain ParkMobile User Data to Client upon Client's execution of ParkMobile's Data Protection Agreement. Client will not, directly or indirectly: (i) sell or resell ParkMobile User Data in any capacity or form; (ii) create any derivative work using ParkMobile User Data; or (iii) use ParkMobile User Data for purposes other than those specifically allowed in this Agreement. Notwithstanding the foregoing, the parties acknowledge and agree that ParkMobile will not sublicense or provide any PCI Data to Client.

6.6 **Resultant Data.** Resultant Data remains the sole and exclusive property of ParkMobile. ParkMobile grants Client a revocable, royalty-free, non-exclusive, non-assignable, non-transferable license to applicable Resultant Data for the duration of the term only for Client's internal use in connection with the Services.

6.7 **Reservation of Rights.** ParkMobile reserves all rights not expressly granted to Client in this Agreement. Except for the limited rights and licenses expressly granted under this Agreement, nothing in this Agreement grants, by implication, waiver, estoppel, or otherwise, to Client or any third party any IP Rights or other right, title, or interest in or to the ParkMobile Application and/or the Platform.

7. FEES AND PAYMENT

7.1 **Fees.** Client shall pay ParkMobile the fees set forth in the Agreement that incorporates these Client General Terms & Conditions ("Fees") in accordance with this Section 7.

7.2 **Payment Terms.** The parties designate Client as the merchant of record. Client is responsible for the payment of payment processing and related fees. ParkMobile will pass real-time authorized debit/credit card transactions to Client via a gateway solution. ParkMobile will issue invoices to Client on a monthly basis for all fees due to ParkMobile under this Agreement. Client shall pay each invoice within thirty (30) days of the invoice date. Client shall make all payments hereunder in US dollars to the address or account specified on the applicable invoice.

7.3 **Taxes.** All fees and other amounts payable by Client under this Agreement are exclusive of taxes and similar assessments. Without limiting the foregoing, Client is responsible for all sales, use, and excise taxes, and any other similar taxes, duties, and charges of any kind imposed by any federal, state, or local governmental or regulatory authority on any amounts payable by Client hereunder, other than any taxes imposed on ParkMobile's income.

7.4 **Reserved.**

7.5 **No Deductions or Setoffs.** All amounts payable to ParkMobile under this Agreement shall be paid by Client to ParkMobile in full without any setoff, recoupment, counterclaim, deduction, debit, or withholding for any reason (other than any deduction or withholding of tax as may be required by applicable law).

7.6 .Fee Increases. ParkMobile may increase fees upon sixty (60) days' written notice.

7.7 **Limited Payment Agent.** Client appoints ParkMobile as its agent for the limited purpose of receiving, holding, and settling payments made by ParkMobile Users to Client in connection with the Services. Client acknowledges and agrees that receipt of payment from ParkMobile Users in connection with the Services by ParkMobile shall be deemed the same as receipt by Client itself.

8. REPRESENTATIONS AND WARRANTIES

8.1 **Mutual.** Each party represents, warrants and covenants to the other party that: (a) it is duly organized, validly existing, and in good standing as a corporation or other legal entity under the laws of the jurisdiction of its incorporation or other organization; (b) it has the full right, power, and authority to enter into and perform its obligations and grant the rights, licenses, consents, and authorizations it grants or is required to grant under this Agreement; (c) the representative that is executing this Agreement has been duly authorized by all necessary corporate or organizational action of such party; and (d) when executed and delivered by both parties, this Agreement will constitute the legal, valid, and binding obligation of such party, enforceable against such party in accordance with its terms.

8.2 **ParkMobile.** ParkMobile represents, warrants, and covenants to Client that ParkMobile will perform the Services using personnel of required skill, experience, and qualifications and in a professional and workmanlike manner in accordance with generally recognized industry standards for similar services and will devote adequate resources to meet its obligations under this Agreement.

8.3 **Disclaimers.** EXCEPT FOR THE EXPRESS WARRANTIES SET FORTH IN SECTION 8.1 AND SECTION 8.2, ALL SERVICES ARE PROVIDED "AS IS." PARKMOBILE SPECIFICALLY DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT, AND ALL WARRANTIES ARISING FROM COURSE OF DEALING, USAGE, OR TRADE PRACTICE. WITHOUT LIMITING THE FOREGOING, PARKMOBILE DOES NOT WARRANT THAT THE SERVICES OR ANY PRODUCTS OR RESULTS OF THE USE THEREOF WILL BE UNINTERRUPTED OR ERROR-FREE. PARKMOBILE SHALL NOT BE LIABLE FOR DELAYS, INTERRUPTIONS, SERVICE FAILURES, OR OTHER PROBLEMS INHERENT IN USE OF THE INTERNET AND ELECTRONIC COMMUNICATIONS.

9. INDEMNIFICATION

9.1 **Mutual.** Each party will indemnify, defend, and hold harmless the other party from and against any and all losses, damages, liabilities, costs (including reasonable attorneys' fees) ("Losses") incurred as a result from any third-party claim, suit, action, or proceeding ("Third-Party Claim") to the extent it arises from a breach of the indemnifying party's representations and warranties under this Agreement.

9.2 **ParkMobile.** ParkMobile will indemnify, defend, and hold harmless Client from and against any and all Losses incurred by Client resulting from any Third-Party Claim that the Platform or any use of the Platform in accordance

with this Agreement, infringes or misappropriates such third party's IP Rights, provided that Client promptly notifies ParkMobile in writing of the claim, cooperates with ParkMobile, and allows ParkMobile sole authority to control the defense and settlement of such claim.

9.3 [Reserved].

9.4 Mitigation. If any of the Services are claimed to, or in ParkMobile's opinion are likely to, infringe, misappropriate, or otherwise violate any third-party IP Rights, or if Client's use of the Services is enjoined or threatened to be enjoined, ParkMobile may, at its option and sole cost and expense: (a) obtain the right for Client to continue to use the Services as contemplated by this Agreement; (b) modify or replace the Services, in whole or in part, to seek to make the Services (as so modified or replaced) non-infringing, while providing equivalent features and functionality, in which case such modifications or replacements will constitute the Services, as applicable, under this Agreement; or (c) by written notice to Client, terminate this Agreement and require Client to immediately cease any use of the Services.

9.5 Sole Remedy. THIS SECTION 9 SETS FORTH CLIENT'S SOLE REMEDIES AND PARKMOBILE'S SOLE LIABILITY AND OBLIGATION FOR ANY ACTUAL, THREATENED, OR ALLEGED CLAIMS THAT THE SERVICES OR ANY SUBJECT MATTER OF THIS AGREEMENT INFRINGES, MISAPPROPRIATES, OR OTHERWISE VIOLATES ANY INTELLECTUAL PROPERTY RIGHTS OF ANY THIRD PARTY.

10. LIMITATION OF REMEDIES AND DAMAGES

10.1 Exclusion of Damages. EXCEPT AS OTHERWISE PROVIDED IN SECTION 10.3, IN NO EVENT WILL PARKMOBILE OR ANY OF ITS LICENSORS, SERVICE PROVIDERS, OR SUPPLIERS BE LIABLE UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ITS SUBJECT MATTER UNDER ANY LEGAL OR EQUITABLE THEORY, INCLUDING BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, AND OTHERWISE, FOR ANY: (A) LOSS OF PRODUCTION, USE, BUSINESS, REVENUE, OR PROFIT OR DIMINUTION IN VALUE; (B) IMPAIRMENT, INABILITY TO USE OR LOSS, INTERRUPTION, OR DELAY OF THE SERVICES; (C) LOSS, DAMAGE, CORRUPTION, OR RECOVERY OF DATA, OR BREACH OF DATA OR SYSTEM SECURITY; (D) COST OF REPLACEMENT GOODS OR SERVICES; (E) LOSS OF GOODWILL OR REPUTATION; OR (F) CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, SPECIAL, ENHANCED, OR PUNITIVE DAMAGES, REGARDLESS OF WHETHER SUCH PERSONS WERE ADVISED OF THE POSSIBILITY OF SUCH LOSSES OR DAMAGES OR SUCH LOSSES OR DAMAGES WERE OTHERWISE FORESEEABLE, AND NOTWITHSTANDING THE FAILURE OF ANY AGREED OR OTHER REMEDY OF ITS ESSENTIAL PURPOSE.

10.2 Cap on Monetary Liability. EXCEPT AS OTHERWISE PROVIDED IN SECTION 10.3, IN NO EVENT WILL THE COLLECTIVE AGGREGATE LIABILITY OF PARKMOBILE ARISING OUT OF OR RELATED TO THIS AGREEMENT, WHETHER ARISING UNDER OR RELATED TO BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR ANY OTHER LEGAL OR EQUITABLE THEORY, EXCEED ONE TIMES THE TOTAL AMOUNTS PAID TO PARKMOBILE UNDER THIS AGREEMENT IN THE 12 MONTH PERIOD PRECEDING THE EVENT GIVING RISE TO THE CLAIM. THE FOREGOING LIMITATIONS APPLY EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE.

10.3 Exceptions. The exclusions and limitations in Section 10.1 and Section 10.2 do not apply to ParkMobile's obligations under Section 9 or liability for ParkMobile's gross negligence or willful misconduct.

11. RESERVED

12. GENERAL TERMS

12.1 Assignment. Neither party shall not assign or otherwise transfer any of its rights, or delegate or otherwise transfer any of its obligations or performance under this Agreement, in each case whether voluntary, involuntarily, by operation of law, or otherwise, without the other party's prior written consent. No assignment, delegation, or transfer will relieve Client of any of its obligations or performance under this Agreement. Any purported assignment, delegation, or transfer in violation of this Section 12.1 is void. This Agreement is binding upon and inures to the benefit of the parties and their respective successors and permitted assigns.

12.2 Severability. If a court of competent jurisdiction holds any term or provision of this Agreement to be invalid, illegal or unenforceable, the rest of the Agreement will remain in effect.

12.3 Headings. The headings in this Agreement are for reference only and do not affect the interpretation of this Agreement.

12.4 Notices. Any notice or communication permitted or required under this Agreement must be in writing and will be deemed received by the addressee: (a) when received, if delivered by hand with signed confirmation of receipt; (b) when received, if sent by a nationally recognized overnight courier, signature required; (c) when sent, if by email (with confirmation of transmission), if sent during the addressee's normal business hours, and on the next business day, if sent after the addressee's normal business hours; and (d) on the third business day after the date mailed by certified or registered mail, return receipt requested, postage prepaid. Notices must be sent to the attention of the respective party's legal department at the address set forth at the beginning of this Agreement or such other address as either party may specific in writing. Any notice permitted or required under this Agreement that is sent to ParkMobile shall also be sent via email to legal-notices@parkmobile.io.

12.5 Governing Law. This Agreement and all related documents, and all matters arising out of or relating to this Agreement, whether sounding in contract, tort, or statute are governed by, and construed in accordance with, the

laws of the State of New Mexico , United States of America (including its statutes of limitations).

12.6 Amendment; Waivers. Any amendment must be in writing, signed by both parties, and expressly state that it is amending this Agreement. No waiver by any party will be effective unless explicitly set forth in writing and signed by the party so waiving. No terms or conditions stated in a Client purchase order, vendor onboarding process or web portal, or any other Client order documentation shall be incorporated into or form any part of this Agreement, and all such terms or conditions shall be null and void, notwithstanding any language to the contrary therein, whether signed before or after this Agreement.

12.7 Entire Agreement. This Agreement, together with any other documents incorporated herein by reference, constitutes the sole and entire agreement of the parties with respect to the subject matter of this Agreement and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to such subject matter.

12.8 Third-Party Beneficiaries. There are no third-party beneficiaries under this Agreement.

12.9 Force Majeure. Neither party will be liable to the other for any delay or failure to perform any obligation under this Agreement (except for a failure to pay Fees) if the delay or failure results from any cause beyond such party's reasonable control, including acts of God, labor disputes or other industrial disturbances, systemic electrical, telecommunications, or other utility failures, earthquakes, storms or other elements of nature, pandemics, blockages, embargoes, riots, acts or orders of government, acts of terrorism, or war.

12.10 Independent Contractors. The parties to this Agreement are independent contractors. The parties do not intend, and nothing in this Agreement should be construed, to create or enter into any partnership, joint venture, employment, franchise, agency, or similar relationship. Neither party has the power to bind the other or incur obligations on the other party's behalf without the other party's prior written consent.

12.11 Export Control. Client will comply with all export and import laws and regulations of the United States and other applicable jurisdictions. Without limiting the foregoing, Client: (i) represents and warrants that it is not listed on any U.S. government list of prohibited or restricted parties or located (or a national of) a country that is subject to a U.S. government embargo or that has been designated by the U.S. government as a "terrorist supporting" country; (ii) will not (and will not permit any third parties to) access or use any Service in violation of any U.S. export embargo, prohibition or restriction, and (iii) will not submit to any Service any information that is controlled under the U.S. International Traffic in Arms Regulation.

12.12 Interpretation. This Agreement shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting an instrument or causing any instrument to be drafted. The Schedules referred to herein shall be construed with, and as an integral part of, this Agreement to the same extent as if they were set forth verbatim herein.

12.13 Counterparts. The parties may execute this Agreement in counterparts, including PDF and other electronic copies, which taken together will constitute one instrument.

13. DEFINITIONS

"Access Credentials" means any user name, identification number, password, license or security key, security token, PIN, or other security code, method, technology, or device, used alone or in combination, to verify an individual's identity and authorization to access and use the Platform.

"Authorized User" means Client's employee, consultant, contractor, and agent who is authorized by Client to access and use the Platform under the rights granted to Client pursuant to this Agreement.

"Brand Features" means a party's trade names, trademarks, service marks, logos, domain names, and other distinctive brand features.

"Client Data" means any data specific to Client's operation that is provided by Client to ParkMobile to be used in the provision of Services that is not available to ParkMobile publicly or by other means.

"Confidential Information" means information that one party (or an affiliate) discloses to the other party under this Agreement, and that is marked as confidential or would normally be considered confidential information under the circumstances. It does not include information that is independently developed by the recipient, is rightfully given to the recipient by a third party without confidentiality obligations or becomes public through no fault of the recipient.

"Documentation" means any manuals, instructions, or other documents or materials that ParkMobile provides or makes available to Client in any form or medium and which describe the functionality, components, features, or requirements of the Services.

"IP Rights" means any and all registered and unregistered rights granted, applied for, or otherwise now or hereafter in existence under or related to any patent, copyright, trademark, trade secret, database protection, or other intellectual property rights laws, and all similar or equivalent rights or forms of protection, in any part of the world.

"Parking Information" means parking zones, parking rates, parking restrictions, selected payment methods, and other information necessary for the provision of the Services for a specific Parking Location.

"Parking Location" means the location or locations of Client's on-street parking, off-street parking, reservation parking, parking lots, parking decks, permitted parking, and other facilities where ParkMobile Users may park.

"ParkMobile Application" means any and all mobile and/or web applications, services, or interfaces developed, hosted, or managed by, on behalf of, or in partnership with ParkMobile and that are made available to the general

public and that facilities the payment of parking transactions.

"ParkMobile User" means an end user that uses the ParkMobile Application.

"ParkMobile User Data" means information, data, and other content, in any form or media, that is submitted, posted, or otherwise transmitted by or on behalf of a ParkMobile User, directly or indirectly, through the ParkMobile Application.

"PCI Data" means, as applicable, payment card number, cardholder name, expiration date, card verification code or value, service code, and/or security-related information used to authenticate cardholders and/or authorize payment card transactions

"Personal Data" means (i) any information about an identified or identifiable individual; or (ii) information that is not specifically about an identifiable individual but, when combined with other information, may identify an individual. Personal Data includes names, email addresses, postal addresses, telephone numbers, government identification numbers, financial account numbers, payment card information, license plate information, online identifiers (including IP addresses and cookie identifiers), network and hardware identifiers, geolocation information, and any information that constitutes “personal data” or “personal information” within the meaning of any relevant and applicable data privacy or protection laws.

"Platform" means access-controlled mobile and/or web applications, services or interfaces developed, hosted, or managed by, on behalf of, or in partnership with ParkMobile that are made available to Client to administer, configure, manage and/or monitor parking sessions, parking rates, and/or parking restrictions associated with Client’s Parking Locations.

"Resultant Data" means data and information related to Client’s, Authorized Users' and/or ParkMobile Users' use of the Services that is used by ParkMobile in an aggregate and anonymized manner, including to compile statistical and performance information related to the provision and operation of the Services.

"Services" means the ParkMobile Application, the Platform, and all other services provided by ParkMobile under this Agreement.

SCHEDULE 2: SERVICES
ON-DEMAND PARKING SERVICES

ParkMobile offers a service to ParkMobile Users that facilitates the activation of and payment for on-demand parking using the ParkMobile Application ("On-Demand Parking").

ParkMobile Users may begin and, if applicable, end a parking transaction in a variety of ways: (1) visiting https://app.parkmobile.io; (2) calling ParkMobile's IVR System, or (3) using the ParkMobile Application. In order to register with ParkMobile and begin a parking session, a consumer simply provide ParkMobile with the information required by ParkMobile to create an account, including payment method information and license plate number. Thereafter, subsequent parking sessions only require the ParkMobile User to enter or select the applicable parking duration available for the applicable location.

The parking zone code of the Client parking areas are indicated on parking signs or on parking meters. Enforcers of the Client check the validity of parking status real time against the Platform via a web service offering, provided as part of the Services, to determine if a valid parking right exists. This information can be accessed by using a handheld terminal, mobile device or personal digital assistant (PDA).

ParkMobile does not provide or pay for Client's use of handheld terminals, mobile devices or PDAs for enforcement or any data plans or other items needed for communication between such items and the Services.

At their option, ParkMobile Users will receive parking alert services from ParkMobile via SMS, ParkMobile Application push notification or email. The ParkMobile User may be notified, for example, when parked for an extended period of time or when the maximum parking time nears expiration.

ParkMobile Users can use On-Demand Parking anywhere the Services are available.

All parking charges are automatically charged to the ParkMobile User's payment method, and ParkMobile Users have real time access to an online account-based personal page accessible from https://app.parkmobile.io to access and print parking history, receipts, and statements.

RESERVATION PARKING SERVICES

ParkMobile offers a service to ParkMobile Users that facilitates the activation of and payment for reservation parking using the ParkMobile Application ("Reservation Parking").

For each Parking Location that the parties agree to on-board for Reservation Parking Services, ParkMobile shall make the Parking Location's parking inventory available for sale through the ParkMobile Application and shall market and advertise such availability. The number of parking spaces and corresponding reservation periods and parking rates making up the parking inventory shall be specified by Client and may be altered by Client at any time for parking inventory not reserved by a consumer.

Responsibilities of Client.

In order for ParkMobile to provide Reservation Parking Services, Client shall maintain an agreed upon number of parking spaces or transportation services at the Parking Location which shall be maintained at all times unless ParkMobile is notified otherwise in writing by Client.

If access to the Parking Location is denied for any reason other than a ParkMobile User's error or failure to abide by Client's rules and regulations, Client agrees to forfeit its share of the applicable parking fee and authorizes ParkMobile to refund the entire Parking Fee to the ParkMobile User. If access to the Parking Location is denied because of a ParkMobile User's error or failure to abide by Client's rules and regulations, no Parking Fees will be refunded to the ParkMobile User.

Client shall promote and market the Services through mutually agreed upon methods which shall include:

- a persistent, prominent “call to action” link/button on the parking and/or transportation pages of the Parking Location website(s) that directs users to the Client-branded website created by ParkMobile (e.g. a “Reserve Parking Now” button);

- Embedded content on the parking and/or transportation pages of the Parking Location website(s) describing why and how to reserve parking through ParkMobile (e.g. FAQs, videos, etc.), such content to be provided by ParkMobile; and

- mentions in emails promoting the Parking Location, including “know before you go” emails, all of which shall include a “call to action” to reserve event parking and link to the Client-branded website created by ParkMobile.

Client agrees to use commercially reasonable efforts to obtain for ParkMobile a license to use photo and video assets of the Parking Location (where Client is not the Parking Location owner) and any tenants of a Parking Location in connection with ParkMobile’s marketing of the Services as available at such Parking Location.

City of Santa Fe ADDENDUM

This agreement incorporates the additional terms and conditions in the addendum between ParkMobile (Contractor) and the CITY OF SANTA FE (City).

This Agreement may be terminated by either party upon 90 days written notice to the other party.

INDEMNIFICATION

CONTRACTOR shall indemnify, hold harmless and defend CITY from all losses, damages, claims or judgments, including payments of all attorneys' fees and costs on account of any suit, judgment, execution, claim, action or demand whatsoever arising from CONTRACTOR's breach of this Agreement.

NEW MEXICO TORT CLAIMS ACT

Any liability incurred by CITY in connection with this Agreement is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. CITY and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Agreement modifies or waives any provision of the New Mexico Tort Claims Act.

APPLICABLE LAW; CHOICE OF LAW; VENUE

CONTRACTOR shall abide by all applicable federal and state laws and regulations, and all ordinances, rules and regulations of CITY of Santa Fe. In any action, suit or legal dispute arising from this Agreement, CONTRACTOR agrees that the laws of the State of New Mexico shall govern. The parties agree that any action or suit arising from this Agreement shall be commenced in a federal or state court of competent jurisdiction in New Mexico. Any action or suit commenced in the courts of the State of New Mexico shall be brought in the First Judicial District Court.

APPROPRIATIONS

The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by CITY for the performance of this Agreement. If sufficient appropriations and authorization are not made by CITY, this Agreement shall terminate upon

written notice being given by CITY to CONTRACTOR. The CITY's decision as to whether sufficient appropriations are available shall be accepted by CONTRACTOR and shall be final.

RELEASE

CONTRACTOR agrees not to purport to bind CITY to any obligation not assumed herein by CITY unless CONTRACTOR has express written authority to do so, and then only within the strict limits of that authority.

INSURANCE

CONTRACTOR shall maintain general liability insurance throughout the term of this Agreement providing a minimum coverage in the amount required under the New Mexico Tort Claims Act. CONTRACTOR shall furnish CITY with proof of insurance of CONTRACTOR's compliance with the provisions of this section as a condition prior to performing services under this Agreement.

THIRD PARTY BENEFICIARIES

By entering into this Agreement, the parties do not intend to create any right, title or interest in or for the benefit of any person other than CITY and CONTRACTOR. No person shall claim any right, title or interest under this Agreement or seek to enforce this Agreement as a third-party beneficiary of this Agreement.

SEVERABILITY

In case any one or more of the provisions contained in this Agreement or any application thereof shall be invalid, illegal or unenforceable in any respect, the validity, legality, and enforceability of the remaining provisions contained herein and any other application thereof shall not in any way be affected or impaired thereby.

V2 2023

SOLE SOURCE REQUEST AND DETERMINATION FORM

This form must be submitted to the City of Santa Fe, Purchasing Division for authorization, determination, and processing by the Chief Procurement Officer (CPO).

Please ensure to complete this form in its entirety.

Date: 12/20/2023

Prepared By: Andrew Cordero **Title:** Contracts Administrator

Vendor Name: ParkMobile

Address: 1100 Spring Street NW Suite 200

City: Atlanta **State:** GA **Zip Code:** 30309

Short Description of Goods/Services to be procured:

On-demand parking payment via mobile app for street parking

Estimated Extended Cost: $235,800.00 **Term of Contract:** 3 years

Tax is subject to change.

One (1) to Four (4) years from date of award

Sole Source Request Justification Questions 1-3:

1. **Explain the purpose/need of purchase. Ensure to include a thorough scope of work for the services (the SOW cannot differ on the resultant contract/purchase documents), construction or items of tangible personal property (if this is an amendment request to an existing contract, attach current contract).**

Vendor to provide on-demand payment services through their app for parking in lots and on street. This includes required trademark signage for each parking meter.

2. Provide a detailed explanation of the criteria developed and specified by the department as necessary to perform and/or fulfill the contract.

X	**The contractor has affirmed sole source for the services, construction or items of tangible personal property *(Attach memo from vendor)*. Provide documentation of due diligence for other possible vendors/contractors to provide the requested services/goods proved unsuccessful; or**
	Other: explanation of the reasons, qualifications, proprietary rights or unique capabilities (*unique and how this uniqueness is substantially related to the intended purpose of the contract)* of the prospective contractor that makes the prospective contractor *the one source* capable of providing the required professional service, service, construction or item(s) of tangible personal property. (Please do not state the source is the "best" source or the "least costly" source. Those factors do not justify a "sole source.") U*nique and how this uniqueness is substantially related to the intended purpose of the contract*.

3. Explain why other similar professional services, services, construction or item(s) of tangible personal property *cannot* meet the intended purpose of the contract.

ParkMobile's registered trademark signage is a sole source product, and the manufacturing and distribution of such is made exclusively by ParkMobile. This signage is essential for resident and visitor awareness of a mobile payment parking solution in the municipalities in which it is offered and reflects the assigned zone numbers that customers will use to pay for their parking via ParkMobile's application, interactive voice response (IVR) phone number, or through ParkMobile's website (parkmobile.io).

Approvals:

Based on the above facts, the City of Santa Fe Purchasing Officer has made the determination that the justification for a Sole Source procurement is in accordance with NMSA 1978, § 13-1-126 and shall be posted for a 30-day period prior to award.

Travis Dutton-Leyda, CPO for the City of Santa Fe Date: Feb 5, 2024

Department Approval by:

RE: ParkMobile Sole Source Letter

To Whom It May Concern:

This letter is to confirm that ParkMobile's registered trademark signage is a sole source product, and the manufacturing and distribution of such is made exclusively by ParkMobile. No other entity has the express legal permission to create such signage or print materials with ParkMobile's registered trademark without written consent. This product must be purchased directly through ParkMobile's selected manufacturing vendor. There are no agents or dealers authorized to represent this product.

ParkMobile signage is essential for resident and visitor awareness of a mobile payment parking solution in the municipalities in which it is offered. The signs reflect the assigned zone numbers that customers will use to pay for their parking via ParkMobile's application, interactive voice response (IVR) phone number, or through ParkMobile's website (parkmobile.io). By offering ParkMobile's services, our clients provide their residents and visitors a smarter way to pay for parking, eliminating the need for cash/coins, and allowing the customer to choose a contactless option that will provide additional features for the best parking experience.

Please feel free to contact me if you have any questions or need any additional information. Thank you for your interest in ParkMobile.

Sincerely,

Danielle Kaplan
Associate Counsel

CORDERO, ANDREW C.

From: DUTTON-LEYDA, TRAVIS K.
Sent: Friday, October 11, 2024 2:37 PM
To: CORDERO, ANDREW C.; Purchasing DET
Subject: RE: Written Determination - ParkMobile LLC

Greetings,

The scope of work as written would be General Services. This determination relates only to that question and is no comment on whether the scope of work or procurement method meet all legal standards. I reserve the right to change this determination if the scope of work differs from the scope of work submitted for the original determination. This procurement must be conducted using the processes and procedures set forth by the City of Santa Fe, Central Purchasing, the Procurement Manual, and state statutes.

Please note:

- Save this email as a PDF and upload it into the corresponding Munis records.
- Check with WorkQuest dba Horizons of New Mexico (vendor # 8673) (mloehman@horizonsofnewmexico.org) if this service appears on their approved list.
- If your request includes anything that needs to be reviewed and preapproved by another City Department/Division, please send the same SOW to the corresponding email address and include their response in your packet/Munis.

  -IT components (anything IT) - ereview@santafenm.gov

  -Vehicles – dmjaramillo@santafenm.gov

  -Grants - mtbonifer@santafenm.gov; cmthompson@santafenm.gov; evlujan@santafenm.gov

  - Construction, Facilities, Furniture, Fixtures, Equipment, etc. - jsburnett@santafenm.gov

  -Emergency Related Purchases - bgwilliams@santafenm.gov

  -Asset over $5k - lmstorey@santafenm.gov

- Ensure that the appropriate templates and forms are used https://intranet.santafenm.gov/finance_1 and documented procedures/laws/rules are followed.
- > $20k per year, when processing this procurement, please ensure the procurement number issued by Munis and the procurement name are used in the appropriate documents and the subject of emails.
- If you are processing a procurement where the forecasted amount is =/> $60k, per NMSA 1978, Section 13-1-102, the procurement method must be ITB (if you choose not to use a cooperative or an existing contract). If you feel you need to process an RFP, you must get an Authorization and Plan approved before you process.
- < $20k per year, one quote is acceptable.

- From $20k to $60k per year, if you aren't using a cooperative or existing contract, you'll need to provide 3 quotes in your req. Must use the Munis Bid Module after 12/21/2023.
- Please keep this as part of the procurement file for future reference.
- Figure out your funding source and **inform Purchasing**. To ensure that the proper documents and language are used, it is important to identify the funding source for the subsequent contract. For instance, if federal funds are involved, the procurement request and subsequent contract must include the necessary federal language. Therefore, it is crucial to determine the funding source beforehand.
- Please review the pages linked below to determine whether any of the existing contracts/price agreements or cooperative agreements are applicable to this request. You might be able to use an existing price agreement to save time and money.
    - https://www.generalservices.state.nm.us/state-purchasing/statewide-price-agreements/ (if you choose to use a Statewide, you do not need to ask Horizons if they can do the work. State Purchasing must offer the SOW to Horizons prior to placing the award on their website.)

CITY OF SANTA FE

Date: November 6, 2024

To: Mayor Alan Webber and Governing Body
Airport Advisory Board, Finance, and Public Works and Utilities Committees.

Via: Layla S. Archuletta-Maestas, Deputy City Manager LAM

From: James Harris, Santa Fe Regional Airport Director JH

Terry Lease, Asset Development Manager, Office of Economic Development TL

Subject: Approval of a Permanent Access Easement by the City of Santa Fe to Grand Prix de Santa Fe, LLC

Vendor Name: **Grand Prix de Santa Fe, LLC**

Vendor Number: **5958**

ITEM AND ISSUE:
Request for Approval of Permanent Access Easement in Favor of Grand Prix de Santa Fe, LLC, as Grantee, in the Amount of $39,000.00 as Compensation to the City (James Harris, Santa Fe Regional Airport Director jcharris@santafenm.gov).

ACTION REQUESTED:
The Airport Director James Harris respectfully requests your review and approval of the Permanent Access Easement.

BACKGROUND AND SUMMARY:
Grand Prix de Santa Fe, LLC, ("Grand Prix"), located at 100 S. Polo Drive, Santa Fe, NM ("Grand Prix Property"), has requested a permanent access easement to allow for development of an upscale recreational vehicle resort ("RV Resort"). Grand Prix is an equestrian facility that specializes in hunter/jumper shows and showcases many other events, such as outdoor concerts, lacrosse matches, soccer games, antique shows, weddings, art shows and nationally recognized dog shows, among other events. Grand Prix events bring in new money from all over the world from participants and spectators staying for weeks at a time and enjoying all that Santa Fe has to offer, creating a tremendous economic boon to Santa Fe. In 2018, the City of Santa Fe conducted an economic impact study of one of Grand Prix's premier events, the two-week long Santa Fe Summer Series Horse Show, indicating a $13.5M benefit to Santa Fe's economy that year. Grand Prix's business was experiencing exponential growth prior to the COVID-19 pandemic, and like so many other businesses they were forced to shut down all business activities.

Grand Prix has been working to rebuild their business to pre-pandemic levels and the RV Resort is a key improvement. The proposed RV Resort will be located on Grand Prix property and the proposed access easement, that is the subject of this request, is located on land owned by the Santa Fe Regional Airport which coincidently is leased to Grand Prix (Lease Item #05-0043). Santa Fe County is requiring a permanent secondary ingress and egress road as a condition of approval of the RV park. The proposed easement runs in a north-south direction along the property line to minimize any potential impact of future development. The easement was appraised and Grand Prix will pay a one-time fee of $39,000.00 to the City. The proposed easement and properties are depicted on the attached Exhibit A.

PERMANENT ACCESS EASEMENT AGREEMENT

The City of Santa Fe, a Municipal Corporation, herein "Grantor" for and in consideration of Thirty-nine Thousand Dollars and No/100 ($39,000.00) and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, does hereby grant, bargain and convey unto Grand Prix de Santa Fe, LLC, a New Mexico limited liability company, whose address is P.O. Box 5353, Santa Fe, New Mexico 87502, herein "Grantee", its successors and assigns, a permanent non-exclusive access easement for ingress and egress upon, over and across the lands as set forth on Exhibit A, attached hereto and incorporated herein (the "Easement").

1. Grantee, its members, employees, representatives, contractors, agents, consultants, invitees, visitors, successors and assigns shall be entitled to exercise the rights granted hereunder without any notice or consent from Grantor.

2. This Permanent non-exclusive Access Easement Agreement is a covenant running with the land and the terms, covenants and provisions of this Agreement shall extend to and be binding upon Grantee and Grantor and their respective successors and assigns.

3. Grantee shall have the right to assign or transfer this Easement, and all rights granted or created herein, in whole or in part, to: (1) an affiliate or parent company; (2) an entity to which Grantee merges or consolidates; and (3) a successor in interest that purchases Grantee's adjoining property upon receipt of advance written consent by Grantor based upon compliance with terms of agreement and FAA approval of any assignment.

4. Non-use of the Easement granted herein, for any period in excess of five (5) years without the prior written consent of Grantor shall be conclusive proof of abandonment of the Easement and all rights herein granted shall revert back to the Grantor or its successor and assigns. Within a reasonable period of time after Grantor's City Manager providing notice of abandonment, Grantee shall restore the property to its original condition.

5. Grantor, its members, employees, representatives, contractors, agents, consultants, invitees, visitors, franchisee's, successors and assigns, shall be able to use and enjoy the Easement so long as Grantor's use does not interfere with the rights conveyed to Grantee herein.

6. As of the execution date, an unimproved road exists in the Easement. Grantee shall have no obligation to fully improve the existing road at any time in the future and the lack of any future improvements shall not be deemed non-use of the Easement.

7. Grantee shall maintain the Easement, including and not limited to, clearing all vegetation and other obstructions from the surface and filling ruts or holes which appear within the limits of the Easement. Failure to do so for a period in excess of one (1) year without the prior written consent of Grantor shall be conclusive proof of abandonment of the Easement and all rights herein granted shall revert back to the Grantor or its successor and assigns. Within a reasonable period of time after Grantor's City Manager providing notice of abandonment, Grantee shall restore the property to its original condition.

8. Grantee shall operate within the Easement in compliance with applicable ordinances and codes.

9. No improvements or personal property shall be performed or placed in the easement without prior written consent of the Grantor's City Manager.

IN WITNESS WHEREOF, the Grantor has executed this Agreement on Oct. 7th, 2024.

ITEM

Agreement for the City to provide potable water to the lower Acequia Madre in exchange for a reduced delivery obligation for Santa Fe River water at the Acequia Madre headgate.

BACKGROUND

Maximize Availability of Santa Fe River water

Since 2011 when the Buckman Direct Diversion (BDD) came online City of Santa Fe Water has shifted to a management strategy of using river water preferentially and sparing use of well water to allow our aquifers to recover and maximize their availability for use when needed. Santa Fe River water treated at the Canyon Road Water Treatment Plant (CRWTP) is used preferentially over river water treated at BDD due to large differences in energy costs associated with pumping water from the Rio Grande into Santa Fe. In this management framework, we seek to maximize availability of the Santa Fe River.

82.404 Acre Feet Santa Fe River Delivery Obligation to Acequia Madre

Based on an existing agreement between the Acequia Madre and City of Santa Fe, the City is obligated to deliver 82.404 acre-feet per year of water to the Acequia Madre headgate near where Alameda crosses the Santa Fe River and becomes Camino de La Cruz Blanca. Of this amount, 60.912 acre-feet per year are to serve fields at the lower end of the Acequia system in the traditional village of Agua Fria. We will refer to this section of the Acequia as the lower Acequia Madre.

Lower Acequia Madre Infrastructure Problems and Opportunity for Win-Win Agreement

The Acequia Madre itself is no longer an efficient way to move water from the headgate to the lower Acequia Madre. As a result, deliveries of water diverted at the headgate to farmers on the lower Acequia

are unreliable. Due to this lack of reliability, the farmers on the lower Acequia would prefer the certainty of 20 acre-feet per year of pressurized potable water to the uncertainty of how much of the 60.912 acre-feet per year diverted at the headgate will reach them and be available for use. Despite costs associated with treatment and distribution, because of the value of Santa Fe River water, the City is willing to deliver 20 acre-feet of potable water to the lower Acequia instead of delivering 60.912 acre-feet of untreated river water to the Acequia Madre headgate.

Other Terms of the Agreement

The proposed agreement allows either party to revert to the current agreement locations and amounts in any year where notice is given before the end of February. With the agreement of the Acequia Madre, the City may apply on its behalf for funding to improve or repair the Acequia.

Financial and Water Right Considerations

Variable water treatment costs (costs that only change with amount of water treated) at CRWTP are estimated to be approximately $0.26 per 1000 gallons, while they are estimated to be approximately $0.8 per 1000 gallons at BDD due largely to pumping requirements. With this agreement in place there will be almost 61 acre-feet of new water available for treatment at CRWTP, 20 acre-feet of which wouldn't have been treated otherwise and will go to the Lower Acequia Madre, and 41 acre-feet of which would have otherwise been treated at BDD. The savings realized by treating 41 acre-feet at CRWTP instead of at BDD outweigh the costs of treating 20 acre-feet of water for the lower Acequia Madre making this agreement financially beneficial to City of Santa Fe Water.

Another way to think about this agreement is that in most years the amount of water available to be treated at CRWTP is limited not by our right to divert (5040 acre-feet per year), but by availability. In years where we can't divert our full right this agreement effectively adds almost 41 acre-feet of diversion rights along the upper Santa Fe River. Water rights on the upper Santa Fe River are not available for purchase, but for context, less scarce water rights on the Middle Rio Grande are worth over $30,000 per acre-foot.

REQUEST

Approval of "Second Amended Stipulated Operating Agreement by City of Santa Fe and Acequia Madre de Santa Fe Community Ditch Association".

SECOND AMENDED STIPULATED OPERATING AGREEMENT BY CITY OF SANTA FE AND ACEQUIA MADRE DE SANTA FE COMMUNITY DITCH ASSOCIATION

WHEREAS, the City of Santa Fe ("City") and the Acequia Madre de Santa Fe Community Ditch Association ("Acequia Madre") (sometimes referred to herein in the singular as "Party" and in the plural as "the Parties") jointly submitted this Second Amended Stipulated Operating Agreement ("Second Amended Stipulation") to counsel for the State of New Mexico for its approval and joinder as a party to the Second Amended Stipulation for submission to the Court for approval and entry of an Order; and

WHEREAS, the State declined to become a party to the Second Amended Stipulation on the grounds that it does not impact any of the obligations or responsibilities of the State; and

WHEREAS, the State advised the City and Acequia Madre that the State has no objection to alternative administration of the water rights of the Parties proposed by the Second Amended Stipulation nor to the Acequia Madre and City entering into the proposed alternative administration.

Therefore, the Parties hereby stipulate and agree as follows:

1. This Second Amended Stipulation amends the January 28, 2015 Amended Stipulated Operating Agreement ("Amended Stipulation"), previously entered into by these Parties or their predecessors in interest and adopted by the February 10, 2015 Order of the Court, a copy of which is attached hereto as Attachment 1. This Second Amended Stipulation only amends and supersedes those provisions of the Amended Stipulation as expressly stated herein and all provisions of the Amended Stipulation not amended herein remain in effect.
2. The amended stipulations, agreements, descriptions of water right "requirements" and all other matters set forth herein are solely for the purpose of settlement and are without waiver

of or prejudice to any water right claims or any positions taken in respect to such claims, or other rights or defenses of the parties, and do not constitute a concession of the validity of any position asserted by the Parties.

3. The Parties enter this Second Amended Stipulation for the purpose of enabling the more efficient delivery of water by the City and the Acequia to 11.28 irrigated acres adjudicated under Subfile Nos. 11.381 to 11.382, which are located at the southern end of the Acequia ("Montoya Tracts"). The Parties recognize and agree that because of the distance involved, under recent and existing circumstances the delivery of water to the Montoya Tracts in the amounts adjudicated for those Tracts via diversion of water from the Santa Fe River at the Acequia's headgate and conveyance through the Acequia, results in excessive loss of water through evaporation and seepage, such that in most years no deliveries of water can be made to the Montoya Tracts.

4. Paragraph 3 of the Amended Stipulation is deleted and replaced by the following:

"3. A. This Amended Stipulation is based on a total number of irrigated acres served by the Acequia Madre of 15.26 acres. The Parties agree that the irrigation water requirements in an average weather year for the 15.26 irrigated acres served by the entire Acequia Madre, both the upper, eastern section ("upper Acequia") and the lower Acequia Madre which serves Subfile Nos. 11.381/11.382A, 11.381/11.382B, 11.381/11.382C, 11.381/11.382D and 11.381/11.382E ("lower Acequia"), is as follows: total Project Delivery Requirement ("PDR") is 82.404 acre feet per year (15.26 times the per acre PDR of 5.4); total Farm Delivery Requirement ("FDR") is 41.202 acre feet per year (15.26 times the per acre FDR of 2.7).

3.B. The Parties agree that, even though the adjudicated PDR and FDR for the 11.28 acres of lower Acequia are 5.4 acre feet per acre per year ("AFA") and 2.7 AFA, respectively, and without amending or modifying the adjudication of those amounts in any way, an Alternative Delivery Schedule may be desirable to benefit the lower Acequia Madre, such that the City may meet its delivery obligation of water for the lower Acequia by delivering twenty (20.0) acre feet per year ("AFY"), west of Henry Lynch Road and north of La Paz Lane ("lower Acequia Madre delivery location"). The following provisions will apply to the City's delivery of water to the lower Acequia under the Alternative Delivery Schedule:

i. The City of Santa Fe will make up to 20.0 AFY of water available at the lower Acequia Madre delivery location during the months of April through October. This delivery may consist of non-potable water delivered via surface flow in the Acequia itself, or potable water available on demand delivered through the City's distribution system via a three inch or smaller meter with a backflow preventer and downstream valve. Measurement devices for either option will be installed and maintained by the City. The City will provide members of the Acequia Madre access to flow measurements from all utilized devices via the internet. The City may remove measurement devices, and associated backflow related infrastructure from November through March to avoid vandalism and prevent freezing.

ii. If the City elects to provide water via non-potable surface flow in the Acequia itself, the City will provide to the Acequia Madre projected monthly delivery volumes, and the lower Acequia Madre may supplement flows with potable water on demand

if and when needed subject to fees associated with excess annual potable use as described in 3.B.iv below.

iii. The Acequia Madre shall be responsible for installation and maintenance of all Acequia infrastructure downstream of the lower Acequia Madre delivery location. If the Acequia Madre does not maintain infrastructure sufficient to fully contain all water until it is delivered to the lower Acequia, the Acequia Madre will be responsible for de-chlorination or any other water quality requirement necessary for surface discharge of potable water into an open channel.

iv. Any potable water deliveries in excess of 20.0 AFY will be billed at established rates for City water provided for irrigation purposes through the meter size utilized. Apart from these possible charges for excess annual use, there will be no charges to the Acequia Madre for potable water delivered through the lower Acequia Madre meter.

v. If there is an outstanding balance on the Acequia Madre account, the City of Santa Fe reserves the right to halt service following standard procedures for an overdue utility account.

vi. The required delivery of Santa Fe River water to the upper Acequia at the Acequia Madre headgate will be reduced from 82.404 AF/yr to 21.492 AF/yr during years in which the Alternative Delivery Schedule is used.

vii. If the Acequia Madre agrees in writing to shortage sharing operations with the City at its headgate, that agreement may include a consistent percent reduction in annual deliveries that year to the lower Acequia Madre meter.

viii. The Alternative Delivery Schedule shall apply in every calendar year, provided that the original delivery schedule set forth in the Amended Stipulation will be used if either party notifies the other in writing by February 28 of any year that the original delivery schedule and location will be used for that year.

ix. The Parties acknowledge that this Second Amended Stipulation provides for delivery of amounts of water to the lower Acequia less than the FDR adjudicated by the Court and agree that this reduced delivery under the Alternative Delivery Schedule does not constitute a waiver of the validity or enforceability of the full adjudicated rights for the water rights under Subfile Nos. 11.381 to 11.382. The Parties agree that this Second Amended Stipulation and the delivery of water to the lower Acequia for Subfile Nos. 11.381 to 11.382 pursuant thereto shall not be construed as admissions against interest by the Acequia Madre or the owners of water rights under Subfile Nos. 11.381 to 11.382, or submitted in evidence or used in any manner in any forum or legal proceeding as the basis for claims of abandonment or forfeiture of any part of those water rights.

5. The Parties agree that after consultation with the Acequia Madre and with its agreement the City may apply for funding which may be available to improve, repair, or rehabilitate the Acequia Madre. Any such application for funding will be pursuant to a funding or fiscal service agreement between the City and the Acequia Madre and any other joint action agreement between the parties.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date of the last signature by the required approval authorities below.

Subject: Amendment #1 – Santa Fe Suites

Vendor Name: Community Solutions

Vendor Number: 8937

ITEM AND ISSUE:
Request for the approval of Amendment #1 for the Service Agreement in the total amount of $969,500 for Capital Improvements and Unit Upgrades at Santa Fe Suites; Community Solutions DBA Vincent's Legacy LLC

Action Requested: Approve the amendment to extend the term to June 30, 2025

BACKGROUND AND SUMMARY:
The Affordable Housing Trust Fund (AHTF) will be utilized for capital improvements and unit upgrades at Santa Fe Suites. Santa Fe Suites is a 123-unit apartment building where 82 units are reserved for households earning 65% AMI or less and 41 units reserved for households earning less than 30% AMI.

Supportive services and case management are provided at the Santa Fe Suites by St. Elizabeth Shelters. Capital upgrades funded through this contract include, but are not limited to, replacement of fire alarm system, replacement of hot water heaters, parking lot repairs, unit renovations, and exterior painting.

The funds for this contract were not fully expended because the organization utilized funding on another Affordable Housing Trust contract in the amount of $910,000 first

CITY OF SANTA FE
AMENDMENT No. 1 TO
SERVICE AGREEMENT
ITEM# 23-0328

This AMENDMENT No. 1 (the "Amendment") amends the CITY OF SANTA FE PROFESSIONAL SERVICES AGREEMENT, dated May 31, 2023 (the "Contract"), between the City of Santa Fe (the "City") and **Community Solutions International Inc., Vincent's Legacy** (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Contract, Contractor has agreed to provide an affordable housing project for the City.

B. Pursuant to Article 14 of the Contract, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. TERM:

Article 4 of the Agreement is hereby deleted in its entirety and substitute the following Article 4 in its place:

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE CITY. This Agreement shall terminate on June 30, 2025 unless terminated pursuant to paragraph 5 (Termination), or paragraph 6 (Appropriations). In accordance with Section 13-1-150 NMSA 1978, no contract term for a professional

services contract, including extensions and renewals, shall exceed four years, except as set forth in Section 13-1-150 NMSA 1978.

2. CONTRACT IN FULL FORCE.

Except as specifically provided in this Amendment, the Contract remains and shall remain in full force and effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No. 1 to the Contract as of the dates set forth below.

CITY OF SANTA FE

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the "City," and **Community Solutions International Inc., Vincent's Legacy**, hereinafter referred to as the "Contractor," and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, and

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for professional services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

WHEREAS, the Contractor does hereby accept its designation as affordable homeowner services, rendering services related to home buyer assistance for low-moderate income households, as set forth in this Agreement; and

WHEREAS, it is agreed by the parties that the performance of the professional services is for a period of one year, as directed by the City.

NOW, THEREFORE, the parties hereby agree as follows:

1. Scope of Work.

The Contractor shall utilize Affordable Housing Trust Funds (AHTF) to provide the following affordable housing project for the City:

A. Use AHTF funds for costs associated with capital upgrades at the Santa Fe Suites. 123 rental units – 82 units for households earning at or less than 65% AMI and 41 units for households earning less than 30% AMI – will be directly or indirectly supported through this project.

1. Capital upgrade activities include, but are not limited to, replacement of fire alarm system, replacement of the hot water heater systems, parking lot repairs, unit renovations, and exterior painting.

B. Contractor will submit a final budget for these funds within 30 days after contract is executed. Contractor is required to submit invoices for expenses incurred.

C. Participate in the NM Coordinated Entry System (CES), managed by the NM Coalition to End Homelessness (NMCEH), as follows:

1. Ensure that property management intake staff is trained in completing an assessment identified by the NMCEH CES.

2. Complete the assessment with all persons experiencing homelessness who present to the agency for housing services and provide the completed assessments to NM CES by either sending them to NMCEH or entering them into HMIS (depending on Contractor's level of HMIS and CES access).

3. Select from the NM CES prioritized list to fill openings when appropriate.

4. Participate in case conferencing when intakes result in new clients who end up on the priority list so that the process moves beyond status updates to focus on action-oriented housing outcomes.

D. Contractor will report to the City on a quarterly basis the use of funds, program outcomes achieved, AMI% of assisted households, size of household, and other demographic information as required by the City's quarterly reporting form.

E. Contractor will become familiar with the Built for Zero methodology and contribute to the by-name list by submitting at minimum a monthly report to the City of unduplicated, de-identified individuals and families experiencing literal homelessness (Homeless Category 1) and commit to quality improvement practices.

F. Provide accurate and thorough recordkeeping copies on file for annual monitoring to include income verification, certification, and other supporting documentation to support the financial assistance provided.

2. Standard of Performance; Licenses.

A. The Contractor represents that Contractor possesses the personnel, experience and knowledge necessary to perform the services described under this Agreement.

B. The Contractor agrees to obtain and maintain throughout the term of this Agreement, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives and subcontractors.

3. Compensation.

A. The City shall pay to the Contractor in full payment for services satisfactorily

performed, such compensation not to exceed nine hundred sixty nine thousand five hundred dollars ($969,500), including gross receipts tax. **The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed ($969,500). This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Agreement shall equal the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Agreement reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Agreement being amended in writing prior to those services in excess of the total compensation amount being provided.**

B. Payment is subject to availability of funds pursuant to the Appropriations Paragraph set forth below and to any negotiations between the parties from year to year pursuant to Paragraph 1, Scope of Work, and to approval by the City. All invoices MUST BE received by the City no later than thirty 30) days after the termination of the Fiscal Year in which the services were delivered. Invoices received after such date WILL NOT BE PAID.

C. Contractor must submit a detailed statement accounting for all services performed and expenses incurred. If the City finds that the services are not acceptable, within thirty days after the date of receipt of written notice from the Contractor that payment is requested, it shall provide the Contractor a letter of exception explaining the defect or objection to the services, and outlining steps the Contractor may take to provide remedial action. Upon certification by the City that the services have been received and accepted, payment shall be tendered to the Contractor within thirty days after the date of acceptance. If payment is made by mail, the payment shall be

deemed tendered on the date it is postmarked. However, the City shall not incur late charges, interest, or penalties for failure to make payment within the time specified herein.

4. Term.

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE CITY. This Agreement shall terminate on **December 31, 2024** unless terminated pursuant to paragraph 4 (Termination), or paragraph 5 (Appropriations). In accordance with Section 13-1-150 NMSA 1978, no contract term for a professional services contract, including extensions and renewals, shall exceed four years, except as set forth in Section 13-1-150 NMSA 1978.

5. Termination.

A. Termination. This Agreement may be terminated by either of the parties hereto upon written notice delivered to the other party at least thirty (30) days prior to the intended date of termination. Except as otherwise allowed or provided under this Agreement, the City's sole liability upon such termination shall be to pay for acceptable work performed prior to the Contractor's receipt of the notice of termination, if the City is the terminating party, or the Contractor's sending of the notice of termination, if the Contractor is the terminating party; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor if the Contractor becomes unable to perform the services contracted for, as determined by the City or if, during the term of this Agreement, the Contractor or any of its officers, employees or agents is indicted for fraud, embezzlement or other crime due to misuse of City funds or due to the Appropriations paragraph herein. *THIS PROVISION IS*

NOT EXCLUSIVE AND DOES NOT WAIVE THE City's OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.

B. Termination Management. Immediately upon receipt by either the City or the Contractor of notice of termination of this Agreement, the Contractor shall: 1) not incur any further obligations for salaries, services or any other expenditure of funds under this Agreement without written approval of the City; 2) comply with all directives issued by the City in the notice of termination as to the performance of work under this Agreement; and 3) take such action as the City shall direct for the protection, preservation, retention or transfer of all property titled to the City and records generated under this Agreement. Any non-expendable personal property or equipment provided to or purchased by the Contractor with contract funds shall become property of the City upon termination and shall be submitted to the City as soon as practicable.

6. Appropriations.

The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorization are not made by the City Council, this Agreement shall terminate immediately upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Agreement to unilaterally reduce funding, the Contractor shall have the option to terminate the Agreement or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

7. Status of Contractor.

The Contractor and its agents and employees are independent contractors performing professional services for the City and are not employees of the City. The Contractor and its agents

and employees shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Agreement. The Contractor acknowledges that all sums received hereunder are reportable by the Contractor for tax purposes, including without limitation, self-employment and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

8. Assignment.

The Contractor shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without the prior written approval of the City.

9. Subcontracting.

The Contractor shall not subcontract any portion of the services to be performed under this Agreement without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Agreement, nor shall any subcontract obligate direct payment from the City.

10. Release.

Final payment of the amounts due under this Agreement shall operate as a release of the City, its officers and employees from all liabilities, claims and obligations whatsoever arising from or under this Agreement.

11. Confidentiality.

Any confidential information provided to or developed by the Contractor in the performance of this Agreement shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the City.

12. Product of Service -- Copyright.

All materials developed or acquired by the Contractor under this Agreement shall become the property of the City and shall be delivered to the City no later than the termination date of this Agreement. Nothing developed or produced, in whole or in part, by the Contractor under this Agreement shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor.

13. Conflict of Interest; Governmental Conduct Act.

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Agreement, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Agreement.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Agreement, will continue to comply with, and that this Agreement complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Article 12 are material representations of fact upon which the City relied when this Agreement was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Article 12 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Article 12 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and

notwithstanding anything in the Agreement to the contrary, the City may immediately terminate the Agreement.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

14. Amendment.

A. This Agreement shall not be altered, changed or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Agreement to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Agreement, pursuant to the termination provisions as set forth in Article 4 herein, or to agree to the reduced funding.

15. Entire Agreement.

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

16. Penalties for violation of law.

The Procurement Code, Sections 13-1-28 through 13-1-199, NMSA 1978, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities and kickbacks.

17. Equal Opportunity Compliance.

The Contractor agrees to abide by all federal and state laws and rules and regulations, and Santa Fe City Code, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Agreement. If Contractor is found not to be in compliance with these requirements during the life of this Agreement, Contractor agrees to take appropriate steps to correct these deficiencies.

18. Applicable Law.

The laws of the State of New Mexico shall govern this Agreement, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, sec. 38-3-2 . By execution of this Agreement, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Agreement.

19. Workers Compensation.

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Agreement may be terminated by the City.

20. Professional Liability Insurance.

Contractor shall maintain professional liability insurance throughout the term of this

Agreement providing a minimum coverage in the amount required under the New Mexico Tort Claims Act. The Contractor shall furnish the City with proof of insurance of Contractor's compliance with the provisions of this section as a condition prior to performing services under this Agreement.

21. Other Insurance

If the services contemplated under this Agreement will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Agreement, the following insurance coverage(s), naming the City as additional insured.

A. Commercial General Liability insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. Broader Coverage and Limits. The insurance requirements under this Agreement shall be the greater of (1) the minimum coverage and limits specified in this Agreement, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Agreement are sufficient to cover the obligations of Contractor hereunder.

C. Contractor shall maintain the above insurance for the term of this Agreement and name the City as an additional insured and provide for 30 days cancellation notice on any

Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

22. Records and Financial Audit.

The Contractor shall maintain detailed time and expenditure records that indicate the date; time, nature and cost of services rendered during the Agreement's term and effect and retain them for a period of three (3) years from the date of final payment under this Agreement. The records shall be subject to inspection by the City. The City shall have the right to audit billings both before and after payment. Payment under this Agreement shall not foreclose the right of the City to recover excessive or illegal payments

23. Indemnification.

The Contractor shall defend, indemnify and hold harmless the City from all actions, proceeding, claims, demands, costs, damages, attorneys' fees and all other liabilities and expenses of any kind from any source which may arise out of the performance of this Agreement, caused by the negligent act or failure to act of the Contractor, its officers, employees, servants, subcontractors or agents, or if caused by the actions of any client of the Contractor resulting in injury or damage to persons or property during the time when the Contractor or any officer, agent, employee, servant or subcontractor thereof has or is performing services pursuant to this Agreement. In the event that any action, suit or proceeding related to the services performed by the Contractor or any officer, agent, employee, servant or subcontractor under this Agreement is brought against the Contractor, the Contractor shall, as soon as practicable but no later than two (2) days after it receives notice thereof, notify the legal counsel of the City.

24. New Mexico Tort Claims Act

Any liability incurred by the City of Santa Fe in connection with this Agreement is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Agreement modifies or waives any provision of the New Mexico Tort Claims Act.

25. Invalid Term or Condition.

If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

26. Enforcement of Agreement.

A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

27. Notices.

Any notice required to be given to either party by this Agreement shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

To the City: Office of Affordable Housing
PO Box 909

To the Contractor: Community Solutions International Inc., Vincent's Legacy
1200 Camino Consuelo
Santa Fe, NM 87507

28. Authority.

If Contractor is other than a natural person, the individual(s) signing this Agreement on behalf of Contractor represents and warrants that he or she has the power and authority to bind Contractor, and that no further action, resolution, or approval from Contractor is necessary to enter into a binding contract.

29. Merger.

This Agreement incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, Agreements and understandings have been merged into this written Agreement. No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.

30. Non-Collusion.

In signing this Agreement, the Contractor certifies the Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City's Chief Procurement Officer.

31. Default/Breach.

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

32. Equitable Remedies.

The Contractor acknowledges that its failure to comply with any provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

33. Default and Force Majeure.

The City reserves the right to cancel all or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date of the signature by the required approval authorities below.

ITEM AND ISSUE:
Request for the Approval of the Service Agreement in the Total Amount of $969,500 for Capital Improvements and Unit Upgrades at Santa Fe Suites; Community Solutions DBA Vincent's Legacy LLC; (Cody Minnich, cjminnich@santafenm.gov, (505) 955-6574)

BACKGROUND AND SUMMARY:
Affordable Housing Trust Funds (AHTF) are generated from development activity (developer fees, pre-inclusionary housing agreements), payoffs of City-held liens, and land sales from Tierra Contenta. In recent years, the Governing Body has committed $3,000,000 annually to the trust fund to respond to the urgent housing needs in Santa Fe. These funds are used for affordable housing projects and activities to benefit income-qualified grantees. Eligible housing activities are outlined in SFCC Chapter 26-3. Uses of funds are determined by the housing needs identified in the City's Five Year Strategic Housing Plan and regulated by the NM Mortgage Finance Authority for compliance with the NM Affordable Housing Act. AHTF is used only for affordable housing, whether for capital costs or direct financial assistance to income qualified beneficiaries. Because AHTF funds are local revenue, criteria for how they are used can be more localized to better meet Santa Fe's unique needs.

The City of Santa Fe and the Office of Affordable Housing issued a Request for Application on January 20, 2023 to support housing solutions for people experiencing homelessness, those at risk of homelessness or who are precariously/unsuitably housed, those at risk of losing their housing either because of eviction, foreclosure or safety and condition issues, including homeowners, or renters/homeowners who are heavily cost burdened.

Funding is available to developers and sponsors of affordable housing, including partnerships, corporations, limited liability companies, joint ventures, public/private partnerships and non-profit organizations that are organized under state, local, or tribal laws and can provide proof of such organization. Eligible applicants must have proven financial capacity and organizational experience to carry out the activities described in the proposal submitted to receive an AHTF allocation.

RFA #23/39/R. For RFA #23/39/R, a balance of $3,664,500 in the AHTF is available. Applications were reviewed and funding recommendations were made by the City's Community Development Commission (CDC) at the CDC Meeting on March 1, 2023. Awards are based on the applicant's demonstration of how the proposed project meets the City's priority of preventing homelessness, ending homelessness, and/or

stabilizing the housing situations of those who are at risk of losing their housing. The following criteria was evaluated by the CDC to make funding recommendations:

1) Funding: the proposed project budget is realistic, funds are leveraged at a 3:1 ratio from other sources (for every $1 of AHTF, $3 is from other sources), revenue is sufficient to accomplish the proposed project and matching funds are secured.
2) Need/Benefit and Project Feasibility: the proposed project addresses underlying/systemic challenges in the community, is responsive to current/future market demand, and the applicant demonstrates feasibility through site control, if applicable, and provides a realistic timeframe for the completion of proposed activities.
3) Affordability: the proposed project effectively meets the income eligibility requirements of the NM Affordable Housing Act, and applicant describes how affordability targets will be achieved and monitored over time for compliance, and how equity will be secured.
4) Organizational Capability and Management: the applicant adequately describes its organizational experience, expertise in the proposed type(s) of housing or assistance, and demonstrates financial soundness.

Projects Funded. Ten applications were submitted for the AHTF funds. Ten AHTF applications were deemed responsive and eligible for funding. Because the funding requests for AHTF far exceeded what was available, funding amounts were determined based on a variety of factors related to priority needs identified in the Five Year Affordable Housing Strategic Plan. The Table below details all of the Community Development Commission's recommendations:

GRANTEE	REQUESTED	RECOMMENDED
Adelante (SFPS)	$60,000	$60,000
Community Solutions DBA Vincent's Legacy	***$1,500,000***	***$969,500***
Homewise	$500,000	$500,000
Life Link	$250,000	$250,000
NM Coalition to End Homelessness (Early Intervention)	$225,000	$200,000
NM Coalition to End Homelessness (Consuelo's Place Shelter)	$713,000	$575,000
SF Recovery Center	$60,000	$60,000
SF Community Housing Trust #1	$600,000	$600,000
St Elizabeth Shelters	$250,000	$250,000
Youthworks	$210,000	$200,000
TOTAL	**$4,368,000**	**3,664,500**

Community Solutions DBA Vincent's Legacy LLC
Santa Fe Suites Capital Improvements
$969,500
AHTF Funds will be utilized for capital improvements and unit upgrades at Santa Fe Suites. Santa Fe Suites is a 123-unit apartment building where 82 units are reserved for households earning 65% AMI or less and 41 units reserved for households earning less than 30% AMI. Supportive services and case management are provided at SF Suites by St Elizabeth Shelters. Capital upgrades funded through this contract include, but are not limited to, replacement of fire alarm system, replacement of hot water heaters, parking lot repairs, unit renovations, and exterior painting.

PROCUREMENT METHOD:
The procurement method is RFA #23/39/R which expires June 30, 2024.

WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule. This agreement applies only to the extent that you perform work under a written contract that requires you to obtain this agreement from us.

This agreement shall not operate directly or indirectly to benefit any one not named in the Schedule.

Schedule

City of Santa Fe
1200 Camino Consuelo
Santa Fe, NM 87507

For the states of CA, UT, TX, refer to state specific endorsements.
This endorsement is not applicable in KY, NH, and NJ.

The endorsement does not apply to policies in Missouri where the employer is in the construction group of code classifications. According to Section 287.150(6) of the Missouri statutes, a contractual provision purporting to waive subrogation rights against public policy and void where one party to the contract is an employer in the construction group of code classifications.

For Kansas, use of this endorsement is limited by the Kansas Fairness in Private Construction Contract Act(K.S.A.. 16-1801 through 16-1807 and any amendments thereto) and the Kansas Fairness in Public Construction Contract Act(K.S.A 16-1901 through 16-1908 and any amendments thereto). According to the Acts a provision in a contract for private or public construction purporting to waive subrogation rights for losses or claims covered or paid by liability or workers compensation insurance shall be against public policy and shall be void and unenforceable except that, subject to the Acts, a contract may require waiver of subrogation for losses or claims paid by a consolidated or wrap-up insurance program.

WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule. This agreement applies only to the extent that you perform work under a written contract that requires you to obtain this agreement from us.

This agreement shall not operate directly or indirectly to benefit any one not named in the Schedule.

Schedule

City of Santa Fe

1200 Camino Consuelo

Santa Fe, NM 87507

WAIVER OF SUBROGATION IN FAVOR OF City of Santa Fe WHEN REQUIRED BY WRITTEN CONTRACT.

For the states of CA, UT, TX, refer to state specific endorsements.
This endorsement is not applicable in KY, NH, and NJ.

The endorsement does not apply to policies in Missouri where the employer is in the construction group of code classifications. According to Section 287.150(6) of the Missouri statutes, a contractual provision purporting to waive subrogation rights against public policy and void where one party to the contract is an employer in the construction group of code classifications.

For Kansas, use of this endorsement is limited by the Kansas Fairness in Private Construction Contract Act(K.S.A.. 16-1801 through 16-1807 and any amendments thereto) and the Kansas Fairness in Public Construction Contract Act(K.S.A 16-1901 through 16-1908 and any amendments thereto). According to the Acts a provision in a contract for private or public construction purporting to waive subrogation rights for losses or claims covered or paid by liability or workers compensation insurance shall be against public policy and shall be void and unenforceable except that, subject to the Acts, a contract may require waiver of subrogation for losses or claims paid by a consolidated or wrap-up insurance program.

Subject: Amendment #2 – JL Gray Bella Luz - Lamplighter

Vendor Name: JL Gary – Bella Luz Apartments 2022, LLLP

Vendor Number: 9452

ACTION:
Request for Approval of Amendment #2 to the City of Santa Fe Services Agreement with Bella Luz Apartments 2022, LLLP for the Lamplighter Motel Conversion Project to Extend the Term through June 30, 2026 (Johanna Nelson, Interim Director Affordable Housing, jhnelson@santafenm.gov)

BACKGROUND AND SUMMARY:
Responding to the RFA 22/01/R, Bella Luz Apartments 2022, LLLP was awarded the services contract to support the Lamplighter motel conversion project. The initiative involves transforming a property with 62 rooms and 16 studio apartments into 58 units of affordable housing. These units will be made available to households earning below 80% of the Area Median Income (AMI), with up to 25% reserved for special needs population. The total contract amount of $800,000 remains unchanged with this amendment. Funds are being allocated from the Affordable Housing Trust Funds for this contract to complete tasks related to development and design work. This amendment will extend the current contracts deadline of December 31, 2024 to June 30, 2026.

PROCUREMENT METHOD:

The procurement method was completed through RFA #22/01/R
Chief Procurement Officer Approval: _____ **Date:** Nov 15, 2024

CITY OF SANTA FE
AMENDMENT No. 2 TO
SERVICES AGREEMENT
ITEM# 23-0696

This AMENDMENT No. 2 (the "Amendment") amends the CITY OF SANTA FE SERVICES AGREEMENT, dated July 5, 2022 (the "Contract"), between the City of Santa Fe (the "City") and Bella Luz Apartments 2022, LLLP. (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Contract, Contractor has agreed to provide an affordable housing project for the City.

B. Pursuant to Article 8 of the Contract, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. TERM:

Article 5 of the Agreement is hereby deleted in its entirety and substitute the following Article 5 in its place:
This Agreement shall be effective when signed by the City and shall terminate on June 30, 2026.

2. CONTRACT IN FULL FORCE.

Except as specifically provided in this Amendment, the Agreement remains and shall remain in full force and effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No. 2 to the Contract as of the dates set forth below.

ITEM AND ISSUE:
Request for the Approval of Amendment No. 1 to the Affordable Housing Trust Fund (AHTF) Service Agreement in the Total Amount of $800,000 for the Lamplighter Motel Conversion Project to Extend the Term through December 31, 2024; Bella Luz Apartments 2022, LLLP; (Cody Minnich, Project Manager, Office of Affordable Housing, cjminnich@santafenm.gov, (505) 955-6574)

BACKGROUND AND SUMMARY:
Affordable Housing Trust Funds (AHTF) are sourced from various channels, including developer fees, pre-inclusionary housing agreements, payoffs of City-held liens, and land sales from Tierra Contenta. These funds are dedicated to financing projects and initiatives aimed at providing affordable housing for income-qualified individuals. The eligible housing activities are explicitly detailed in SFCC Chapter 26-3. Allocation decisions are guided by the housing priorities outlined in the City's Five-Year Strategic Housing Plan and are subject to oversight by the NM Mortgage Finance Authority to ensure compliance with the NM Affordable Housing Act. Importantly, AHTF is exclusively earmarked for affordable housing endeavors, covering both capital expenses and direct financial aid to eligible beneficiaries. Given that AHTF funds are locally generated, their utilization criteria can be tailored to better address the unique needs of Santa Fe.

The City of Santa Fe and the Office of Affordable Housing issued a Request for Applications on October 15, 2021, seeking proposals to address housing challenges faced by individuals experiencing homelessness, those at risk of homelessness, or residing in precarious or unsuitable conditions. This includes individuals facing potential housing loss due to eviction, foreclosure, safety concerns, or inadequate living conditions, encompassing both homeowners and renters facing significant financial burdens.

Responding to the RFA, Bella Luz Apartments submitted an application and was granted $800,000 from the AHTF to support their Lamplighter motel conversion project. The initiative involves transforming a property with 62 rooms and 16 studio apartments into 58 units of affordable housing. These units will be made available to households earning below 80% of the Area Median Income (AMI), with up to 25% reserved for special needs populations. AHTF funds are being allocated to cover soft costs associated with the project, including developer, architectural, and design fees.

Facing challenges inherent in the development process, such as protracted entitlement procedures and the need for asbestos remediation, Bella Luz formally requested an extension to the AHTF agreement to ensure sufficient time to expend the funds.

PROCUREMENT METHOD:
The procurement method is RFA #22/01/R.

CONTRACT NUMBER:
The Munis contract number is 3203618.

FUNDING SOURCE:
The funding source is:

CITY OF SANTA FE
SERVICE AGREEMENT

THIS AGREEMENT is made and entered into by and between the City of Santa Fe, herein after **referred to as the "City", and Bella Luz Apartments 2022, LLLP, herein after referred to as the "Contractor."**

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, § 13-1-95.2.E; and NMSA 1978, § 13-1-111.

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for certain professional services as well as incorporated unilateral services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

WHEREAS, the Contractor does hereby accept its designation as a provider of affordable housing programming, rendering services related to providing affordable support services and subsidy for the City, as set forth in this Agreement; and

WHEREAS, it is agreed by the parties that the performance of the professional services is for a period of one and a half years, as directed by the City.

IT IS MUTUALLY AGREED BETWEEN THE PARTIES:

1. **Scope of Work**

The Contractor shall utilize Affordable Housing Trust Funds (AHTF) to provide the following affordable housing project for the City:

A. Utilize funds to pay soft costs associated with the rehabilitation and configuration of the Lamplighter Inn into 58 units of affordable housing for households earning 80% AMI or less. Eligible costs for these funds may include and are limited to:

a. Developer fees
b. Architectural and Design fees
c. Feasibility studies, such as traffic studies, geotechnical studies, or environmental reviews
d. Land and real estate costs, such as legal fees, appraisal fees, surveys, inspections, and permits

e. Insurance fees
f. Other reasonable costs may submitted for approval to the City as required by project conditions.

B. Submit a final budget for the City's approval for use of these funds 30 days after contract is executed. The Contractor is required to submit invoices for expenses incurred that correspond to the approved budget.

C. Report to the City on a quarterly basis the use of funds, program outcomes achieved, AMI% of assisted households, size of household, and other demographic information as required by the City's quarterly reporting form.

D. Provide accurate and thorough recordkeeping copies on file for annual monitoring to include income verification, certification, and other supporting documentation to support the financial assistance provided.

E. Professional Certifications

a. The Contractor represents that it possesses the personnel, experience and knowledge necessary to perform the services described under this Agreement.

b. The Contractor agrees to obtain and maintain throughout the term of this Agreement, all applicable professional and business licenses required by law, for itself, its employees, representatives and subcontractors.

2. **Performance of Services**

A. The Consultant will perform services under this Agreement with the degree of skill and care ordinarily provided by competent professional engineers, architects, or consultants practicing in the same or similar locality and under the same or similar circumstances and professional license and as expeditiously as is prudent, considering the ordinary professional skill and care of a competent engineer, architect, or other consultant.

B. The City is agreeing to contract with the Consultant on the basis of its qualifications and proposal, including its proposed Key Personn80el, who are the employees of the Consultant responsible for performing major aspects of the services to be provided under this Agreement, and it's designated Subconsultants, the other professional service providers, who will provide specialized services under this Agreement.

C. The Contractor represents that Contractor possesses the personnel, experience and knowledge necessary to perform the services described under this Agreement.

D. The Contractor agrees to obtain and maintain throughout the term of this Agreement, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives and subcontractors.

3. **Compensation**

A. The City shall pay to the Contractor in full payment for services satisfactorily performed, such compensation not to exceed eight hundred thousand dollars ($800,000), including gross receipts tax. **The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed ($800,000). This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Agreement shall equal the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Agreement reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Agreement being amended in writing prior to those services in excess of the total compensation amount being provided.**

B. Payment is subject to availability of funds pursuant to the Appropriations Paragraph set forth below and to any negotiations between the parties from year to year pursuant to Paragraph 1, Scope of Work, and to approval by the City. All invoices MUST BE received by the City no later than thirty 30) days after the termination of the Fiscal Year in which the services were delivered. Invoices received after such date WILL NOT BE PAID.

C. Contractor must submit a detailed statement accounting for all services performed and expenses incurred. If the City finds that the services are not acceptable, within thirty days after the date of receipt of written notice from the Contractor that payment is requested, it shall provide the Contractor a letter of exception explaining the defect or objection to the services, and outlining steps the Contractor may take to provide remedial action. Upon certification by the City that the services have been received and accepted, payment shall be tendered to the Contractor within thirty days after the date of acceptance. If payment is made by mail, the payment shall be deemed tendered on the date it is postmarked. However, the City shall not incur late charges, interest, or penalties for failure to make payment within the time specified herein.

4. **Payment Provisions**

All payments under this Agreement are subject to the following provisions.

A. Acceptance - In accordance with Section 13-1-158 NMSA 1978, the City shall determine if the product or services provided meet specifications. Until the products or services have been accepted in writing by the City, the City shall not pay for any products or services. Unless otherwise agreed upon between the City and the Contractor, within thirty (30) days from the date the City receives written notice from the Contractor that payment is requested for services or within thirty (30) days from the receipt of products, the City shall issue a written certification (by letter or email) of complete or partial acceptance or rejection of the products or services. Unless the City gives notice of rejection within the specified time period, the products or services will be deemed to have been accepted.

B. Payment of Invoice - Upon acceptance that the products or services have been received and accepted, payment shall be tendered to the Contractor within thirty (30) days after the date of invoice. After the thirtieth day from the date that written certification of acceptance is issued, late payment charges shall be paid on the unpaid balance due on the contract to the Contractor at the rate of 1.5 % per month. Contractor may submit invoices for payment no more frequently than monthly. Payment will be made to the Contractor's designated mailing address. Payment on each invoice shall be due within 30 days from the date of the acceptance of the invoice. The City agrees to pay in full the balance shown on each account's statement, by the due date shown on said statement.

5. **Term**

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This Agreement shall begin on date approved by the City, and end on **December 31, 2023**. The City reserves the right to renew the contract on an annual basis by mutual Agreement not exceed a total of four years in accordance with NMSA 1978, §§ 13-1-150 through 152.

6. **Default and Force Majeure**

The City reserves the right to cancel all or any part of any orders placed under this contract without cost to the City, if the Contractor fails to meet the provisions of this contract and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of sub-contractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the sub-contractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this paragraph shall not be exclusive and are in addition to any other rights now being provided by law or under this contract.

7. **Termination**

A. Grounds. The City may terminate this Agreement for convenience or cause. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) Except as otherwise provided in Paragraphs 7.A and 17, the City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 17, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

8. **Amendment**

A. This Agreement shall not be altered, changed or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Agreement to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Agreement, pursuant to the termination provisions as set forth in Paragraph 7 herein, or to agree to the reduced funding.

9. **Status of Contractor**

The Contractor, and Contractor's agents and employees, are independent Contractors for the City and are not employees of the City. The Contractor, and Contractor's agents and employees, shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Agreement. The Contractor acknowledges that all sums received hereunder are personally reportable by the Contractor for income tax purposes, including without limitation, self-employment tax and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has written authority to do so, and then only within the strict limits of that authority.

10. **Assignment**

The Contractor shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without the prior written approval of the City.

11. **Subcontracting**

The Contractor shall not subcontract any portion of the services to be performed under this Agreement without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Agreement, nor shall any subcontract obligate direct payment from the City.

12. **Non-Collusion**

In signing this Agreement, the Contractor/Contractor certifies the Contractor/Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City.

13. **Inspection of Plant**

The City may inspect, at any reasonable time during Contractor's regular business hours and upon prior written notice, the Contractor's plant or place of business, or any subcontractor's plant or place of business, which is related to the performance of this contract.

14. **Commercial Warranty**

The Contractor agrees that the tangible personal property or services furnished under this Agreement shall be covered by the most favorable commercial warranties the Contractor gives to any customer for such tangible personal property or services, and that the rights and remedies provided herein shall extend to the City and are in addition to and do not limit any rights afforded to the City by any other clause of this order. Contractor agrees not to disclaim warranties of fitness for a particular purpose or merchantability.

15. **Condition of Proposed Items**

Where tangible personal property is a part of this Agreement, all proposed items are to be NEW and of most current production, unless otherwise specified.

16. **Records and Audit**

During the term of this Agreement and for three years thereafter, the Contractor shall maintain detailed records pertaining to the services rendered and products delivered. These records shall be subject to inspection by the City, the State Auditor and other appropriate state and federal authorities. The City shall have the right to audit billings both before and after

payment. Payment under this Agreement shall not foreclose the right of the City to recover excessive or illegal payments.

17. **Appropriations**

The terms of this Agreement, and any orders placed under it, are contingent upon sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorization are not made by the legislature, this Agreement, and any orders placed under it, shall terminate upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Agreement to unilaterally reduce funding, the Contractor shall have the option to terminate the Agreement or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

18. **Release**

The Contractor, upon final payment of the amount due under this Agreement, releases the City, its officers and employees, from all liabilities, claims and obligations whatsoever arising from or under this Agreement. The Contractor agrees not to purport to bind the City, unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

19. **Confidentiality**

Any confidential information provided to or developed by the Contractor in the performance of this Agreement shall be kept confidential and shall not be made available to any individual or organization by the Contractor without prior written approval by the City.

20. **Conflict of Interest**

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Agreement, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Agreement. The Contractor shall comply with any applicable provisions of the New Mexico Governmental Conduct Act and the New Mexico Financial Disclosures Act.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Agreement, will continue to comply with, and that this Agreement complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Paragraph are material representations of fact upon which the City relied when this Agreement was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, Contractor learns that Contractor's

representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Agreement to the contrary, the City may immediately terminate the Agreement.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

21. **Approval of Contractor Representative(s)**

The City reserves the right to require a change in Contractor representative(s) if the assigned representative(s) are not, in the opinion of the City, adequately serving the needs of the City.

22. **Scope of Agreement; Merger**

This Agreement incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements and understandings have been merged into this written Agreement. No prior agreements or understandings, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.

23. **Notice**

The Procurement Code, Sections 13-1-28 through 13-1-199 NMSA 1978, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for bribes, gratuities and kickbacks.

24. **Equal Opportunity Compliance**

The Contractor agrees to abide by all federal and state laws, and local Ordinances, pertaining to equal employment opportunity. In accordance with all such laws, rules, and regulations, the Contractor agrees to assure that no person in the United States shall on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Agreement. If Contractor is found not to be in compliance with these requirements during the life of this Agreement, Contractor agrees to take appropriate steps to correct these deficiencies.

25. **Indemnification**

The Contractor shall hold the City and its employees harmless and shall indemnify the

City and its employees against any and all claims, suits, actions, liabilities and costs of any kind, including attorney's fees for personal injury or damage to property arising from the acts or omissions of the Contractor, its agents, officers, employees or subcontractors. The Contractor shall not be liable for any injury or damage as a result of any negligent act or omission committed by the City, its officers or employees.

26. **New Mexico Tort Claims Act**

Any liability incurred by the City of Santa Fe in connection with this Agreement is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Agreement modifies or waives any provision of the New Mexico Tort Claims Act.

27. **Applicable Law**

The laws of the State of New Mexico shall govern this Agreement, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, § 38-3-2.By execution of this Agreement, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Agreement.

28. **Limitation of Liability**

The Contractor's liability to the City, for any cause whatsoever shall be limited to the purchase price paid to the Contractor for the products and services that are the subject of the City's, claim. The foregoing limitation does not apply to paragraph 25 of this Agreement or to damages resulting from personal injury caused by the Contractor's negligence.

29. **Incorporation by Reference and Precedence**

If this Agreement has been procured pursuant to a request for proposals, this Agreement is derived from (1) the request for proposal, (including any written clarifications to the request for proposals and any City response to questions); (2) the Contractor's best and final offer; and (3) the Contractor's response to the request for proposals.

In the event of a dispute under this Agreement, applicable documents will be referred to for the purpose of clarification or for additional detail in the following order of precedence: (1) amendments to the Agreement in reverse chronological order; (2) the Agreement, including the scope of work and all terms and conditions thereof; (3) the request for proposals, including attachments thereto and written responses to questions and written clarifications; (4) the Contractor's best and final offer if such has been made and accepted by the City; and (5) the Contractor's response to the request for proposals.

30. **Workers' Compensation**

The Contractor agrees to comply with state laws and rules applicable to workers' compensation benefits for its employees. If the Contractor fails to comply with the Workers' Compensation Act and applicable rules when required to do so, this Agreement may be terminated by the City.

31. **Inspection**

If this contract is for the purchase of tangible personal property (goods), final inspection and acceptance shall be made at Destination. Tangible personal property rejected at Destination for non-conformance to specifications shall be removed at Contractor's risk and expense promptly after notice of rejection and shall not be allowable as billable items for payment.

32. **Inspection of Services**

If this contract is for the purchase of services, the following terms shall apply.

A. Services, as used in this Article, include services performed, workmanship, and material furnished or utilized in the performance of services.

B. The Contractor shall provide and maintain an inspection system acceptable to the City covering the services under this Agreement. Complete records of all inspection work performed by the Contractor shall be maintained and made available to the City and for as long thereafter as the Agreement requires. The City has the right to inspect and test all services contemplated under this Agreement to the extent practicable at all times and places during the term of the Agreement. The City shall perform inspections and tests in a manner that will not unduly delay or interfere with Contractor's performance.

C. If the City performs inspections or tests on the premises of the Contractor or a subcontractor, the Contractor shall furnish, and shall require subcontractors to furnish, at no increase in contract price, all reasonable facilities and assistance for the safe and convenient performance of such inspections or tests.

D. If any part of the services do not conform with the requirements of this Agreement, the City may require the Contractor to re-perform the services in conformity with the requirements of this Agreement at no increase in contract amount. When the defects in services cannot be corrected by re-performance, the City may:

(1) require the Contractor to take necessary action(s) to ensure that future performance conforms to the requirements of this Agreement; and

(2) reduce the contract price to reflect the reduced value of the services performed.

E. If the Contractor fails to promptly re-perform the services or to take the necessary action(s) to ensure future performance in conformity with the requirements of this Agreement, the City may:

(1) by contract or otherwise, perform the services and charge to the Contractor any cost incurred by the City that is directly related to the performance of such service; or

(2) terminate the contract for default.

33. **Insurance**

If the services contemplated under this Agreement will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Agreement, the following insurance coverage(s), naming the City as additional insured.

A. Commercial General Liability insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. Broader Coverage and Limits. The insurance requirements under this Agreement shall be the greater of (1) the minimum coverage and limits specified in this Agreement, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Agreement are sufficient to cover the obligations of Contractor hereunder.

C. Contractor shall maintain the above insurance for the term of this Agreement and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

34. **Impracticality of Performance**

A party shall be excused from performance under this Agreement for any period that the party is prevented from performing as a result of an act of God, strike, war, civil disturbance, epidemic, or court order, provided that the party has prudently and promptly acted to take any and all steps that are within the party's control to ensure performance. Subject to this provision, such non-performance shall not be deemed a default or a ground for termination.

35. **Invalid Term or Condition**

If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

36. **Enforcement of Agreement**

A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

37. **Patent, Copyright and Trade Secret Indemnification**

A. The Contractor shall defend, at its own expense, the City against any claim that any product or service provided under this Agreement infringes any patent, copyright to trademark in the United States or Puerto Rico, and shall pay all costs, damages and attorneys' fees that a court finally awards as a result of any such claim. In addition, if any third party obtains a judgment against the City based upon Contractor's trade secret infringement relating to any product or services provided under this Agreement, the Contractor agrees to reimburse the City for all costs, attorneys' fees and amount of the judgment. To qualify for such defense and or payment, the City shall:

1) give the Contractor prompt written notice within 48 hours of any claim;
2) allow the Contractor to control the defense of settlement of the claim; and
3) cooperate with the Contractor in a reasonable way to facilitate the defense or settlement of the claim.

B. If any product or service becomes, or in the Contractor's opinion is likely to become the subject of a claim of infringement, the Contractor shall at its option and expense:

1) provide the City the right to continue using the product or service and fully indemnify the City against all claims that may arise out of the City's use of the product or service;

2) replace or modify the product or service so that it becomes non-infringing; or,

3) accept the return of the product or service and refund an amount equal to the value of the returned product or service, less the unpaid portion of the purchase price and any other amounts, which are due to the Contractor. The Contractor's obligation will be void as to any product or service modified by the City to the extent such modification is the cause of the claim.

38. **Survival**

The Agreement paragraphs titled "Patent, Copyright, Trademark, and Trade Secret Indemnification; Indemnification; and Limit of Liability" shall survive the expiration of this Agreement. Software licenses, leases, maintenance and any other unexpired Agreements that were entered into under the terms and conditions of this Agreement shall survive this Agreement.

39. **Disclosure Regarding Responsibility**

A. Any prospective Contractor and any of its Principals who enter into a contract greater than sixty thousand dollars ($60,000.00) with any City for professional services, tangible

personal property, services or construction agrees to disclose whether the Contractor, or any principal of the Contractor's company is presently debarred, suspended, proposed for debarment, or declared ineligible for award of contract by any federal entity, state agency or local public body.

B. Principal, for the purpose of this disclosure, means an officer, director, owner, partner, or
a person having primary management or supervisory responsibilities within a business entity or related entities.

C. The Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, the Contractor learns that the Contractor's disclosure was at any time erroneous or became erroneous by reason of changed circumstances.

D. A disclosure that any of the items in this requirement exist will not necessarily result in termination of this Agreement. However, the disclosure will be considered in the determination of the Contractor's responsibility and ability to perform under this Agreement. Failure of the Contractor to furnish a disclosure or provide additional information as requested will be grounds for immediate termination of this Agreement pursuant to the conditions set forth in Paragraph 7 of this Agreement.

E. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the disclosure required by this document. The knowledge and information of a Contractor is not required to exceed that which is the normally possessed by a prudent person in the ordinary course of business dealings.

F. The disclosure requirement provided is a material representation of fact upon which reliance was placed when making an award and is a continuing material representation of the facts during the term of this Agreement. If during the performance of the contract, the Contractor is indicted for or otherwise criminally or civilly charged by any government entity (federal, state or local) with commission of any offenses named in this document the Contractor must provide immediate written notice to the City. If it is later determined that the Contractor knowingly rendered an erroneous disclosure, in addition to other remedies available to the Government, the City may terminate the involved contract for cause. Still further the City may suspend or debar the Contractor from eligibility for future solicitations until such time as the matter is resolved to the satisfaction of the City.

40. **Suspension, Delay or Interruption of Work**

The City may, without cause, order the Contractor, in writing, to suspend, delay or interrupt the work in whole or in part for such period of time as the City may determine. The contract sum and contract time shall be adjusted for increases in cost and/or time associated with Contractor's compliance therewith. Upon receipt of such notice, Contractor shall leave the jobsite and any equipment in a safe condition prior to departing. Contractor must assert rights to additional compensation within thirty (30) days after suspension of work is lifted and return to work is authorized. Any compensation requested for which entitlement is granted and the contract sum adjusted, shall have profit included (for work completed) and for cost only (not

profit) for Contractor costs incurred directly tied to the suspension itself and not otherwise covered by Contract remedy. Any change in Total Compensation must be reflected in an Amendment executed pursuant to Section 8 of this Agreement.

41. **Notification**

Either party may give written notice to the other party in accordance with the terms of this Paragraph. Any written notice required or permitted to be given hereunder shall be deemed to have been given on the date of delivery if delivered by personal service or hand delivery or three (3) business days after being mailed.

To the City: Office of Affordable Housing
PO Box 909
Santa Fe, NM 87504-0909

To the Contractor: Bella Luz Apartments 2022, LLLP
c/o JL Gray Company
2407 W. Picacho Ste A1
Las Cruces, NM 88007

Either party may change its representative or address above by written notice to the other in accordance with the terms of this Paragraph. The carrier for mail delivery and notices shall be the agent of the sender.

To the Contractor: Santa Fe Community Housing Trust

42. **Succession**

This Agreement shall extend to and be binding upon the successors and assigns of the parties.

43. **Entire Agreement.**

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

44. **Penalties for violation of law.**

The Procurement Code, Sections 13-1-28 through 13-1-199, NMSA 1978, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities and kickbacks.

45. **Default/Breach.**

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

46. **Equitable Remedies.**

The Contractor acknowledges that its failure to comply with any provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

47. **Default and Force Majeure.**

The City reserves the right to cancel all or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date of the signature by the required approval authorities below.

FROM: **Cody Minnich, Housing Grant Manager**

ITEM AND ISSUE:
Request for the Approval of the Service Agreement in the Total Amount of $800,000 for the Lamplighter Inn project; (Bella Luz, LLLP); (Cody Minnich, cjminnich@santafenm.gov, (505) 955-6574)

BACKGROUND AND SUMMARY:
Affordable Housing Trust Funds (AHTF) are generated from development activity (developer fees, pre-inclusionary housing agreements), payoffs of City-held liens, and land sales from Tierra Contenta. These funds are used for affordable housing projects and activities to benefit income-qualified grantees. Eligible housing activities are outlined in SFCC Chapter 26-3. Uses of funds are determined by the housing needs identified in the City's Five Year Strategic Housing Plan and regulated by the NM Mortgage Finance Authority for compliance with the NM Affordable Housing Act. AHTF is used only for affordable housing, whether for capital costs or direct financial assistance to income qualified beneficiaries. Because AHTF funds are local revenue, criteria for how they are used can be more localized to better meet Santa Fe's unique needs.

The City of Santa Fe and the Office of Affordable Housing issued a Request for Application on October 15, 2021 to support housing solutions for people experiencing homelessness, those at risk of homelessness or who are precariously/unsuitably housed, those at risk of losing their housing either because of eviction, foreclosure or safety and condition issues, including homeowners, or renters/homeowners who are heavily cost burdened.

Funding is available to developers and sponsors of affordable housing, including partnerships, corporations, limited liability companies, joint ventures, public/private partnerships and non-profit organizations that are organized under state, local, or tribal laws and can provide proof of such organization. Eligible applicants must have proven financial capacity and organizational experience to carry out the activities described in the proposal submitted to receive an AHTF allocation.

For RFA #22/01/R, a balance of $3,000,000 in the AHTF was made available. Applications were reviewed and funding recommendations were made by the City's Community Development Commission (CDC) at the CDC Meeting on March 2nd. Awards are based on the applicant's demonstration of how the proposed project meets the City's priority of preventing homelessness, ending homelessness, and/or stabilizing the housing situations of those who are at risk of losing their housing. The following criteria was evaluated by the CDC to make funding recommendations:

1) Funding: the proposed project budget is realistic, funds are leveraged at a 3:1 ratio from other sources (for every $1 of AHTF, $3 is from other sources), revenue is sufficient to accomplish the proposed project and matching funds are secured.
2) Need/Benefit and Project Feasibility: the proposed project addresses underlying/systemic challenges in the community, is responsive to current/future market demand, and the applicant demonstrates feasibility through site control, if applicable, and provides a realistic timeframe for the completion of proposed activities.
3) Affordability: the proposed project effectively meets the income eligibility requirements of the NM Affordable Housing Act, and applicant describes how affordability targets will be achieved and monitored over time for compliance, and how equity will be secured.
4) Organizational Capability and Management: the applicant adequately describes its organizational experience, expertise in the proposed type(s) of housing or assistance, and demonstrates financial soundness.

Six applications were submitted for the AHTF funds. Five AHTF applications were deemed responsive and eligible for funding. Because the funding requests for AHTF far exceeded what was available, funding amounts were determined based on a variety of factors related to priority needs identified in the Five Year Affordable Housing Strategic Plan. The Table below details all of the Community Development Commission's recommendations:

GRANTEE	REQUESTED	RECOMMENDED
HOMEWISE	$1,617,375.00	$700,000.00
LAMPLIGHTER	$1,037,339.00	$800,000.00
COMMUNITY SOLUTIONS	$1,500,000.00	$910,000.00
SF CIVIC HOUSING AUTHORITY	$500,000.00	$500,000.00
YOUTHWORKS	$180,000.00	$90,000.00
TOTAL	**$4,834,714.00**	**$3,000,000.00**

Bella Luz, LLLP – Lamplighter

Amount Requested: $1,037,339
Amount Recommended: $800,000
Funds will support the acquisition and rehabilitation of motel property to house renters who are unstably housed, transitioning out of homelessness, or workforce renters. The property will be converted from 62 rooms and 16 studio apartments to 58 units of affordable housing available to households earning under 80% AMI with up to 25% of said units being available to special needs populations. AHTF funds will support soft costs associated with this project, such as developer, architectural, and design fees.

PROCUREMENT METHOD:
The procurement method is the RFA # 22/01/R which expires June 30, 2023.

CONTRACT NUMBER:
The FY22 Munis contract number is 3203423.

FUNDING SOURCE:
The funding source is:
Fund Name/Number: Community Development/Fund 240
Munis Org Name/Number: Affordable Housing Trust Fund/2400223
Munis Object Name/Number: Subsidy Payments/510500

ACTION REQUESTED:
The Office of Affordable Housing respectfully requests your review and approval.

JOHN BURNETT (Nov 14, 2024 14:44 MST)

From: Roberta Catanach, Project Administrator

Subject: Amendment #2 – JL Gray Bella Luz - Lamplighter

Vendor Name: JL Gary – Bella Luz Apartments 2022, LLLP

Vendor Number: 9452

ACTION:
Request for Approval of Amendment #2 to the City of Santa Fe Services Agreement with Bella Luz Apartments 2022, LLLP for the Lamplighter Motel Conversion Project to Extend the Term through June 30, 2026 (Johanna Nelson, Interim Director Affordable Housing, jhnelson@santafenm.gov)

BACKGROUND AND SUMMARY:
Responding to the RFA 22/01/R, Bella Luz Apartments 2022, LLLP was awarded the services contract to support the Lamplighter motel conversion project. The initiative involves transforming a property with 62 rooms and 16 studio apartments into 58 units of affordable housing. These units will be made available to households earning below 80% of the Area Median Income (AMI), with up to 25% reserved for special needs population. The total contract amount of $800,000 remains unchanged with this amendment. Funds are being allocated from the Affordable Housing Trust Funds for this contract to complete tasks related to development and design work. This amendment will extend the current contracts deadline of December 31, 2024 to June 30, 2026.

PROCUREMENT METHOD:

The procurement method was completed through RFA #22/01/R

CITY OF SANTA FE
AMENDMENT No. 2 TO
SERVICES AGREEMENT
ITEM# 23-0696

This AMENDMENT No. 2 (the "Amendment") amends the CITY OF SANTA FE SERVICES AGREEMENT, dated July 5, 2022 (the "Contract"), between the City of Santa Fe (the "City") and Bella Luz Apartments 2022, LLLP. (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Contract, Contractor has agreed to provide an affordable housing project for the City.

B. Pursuant to Article 8 of the Contract, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. TERM:

Article 5 of the Agreement is hereby deleted in its entirety and substitute the following Article 5 in its place:
This Agreement shall be effective when signed by the City and shall terminate on June 30, 2026.

2. CONTRACT IN FULL FORCE.

Except as specifically provided in this Amendment, the Agreement remains and shall remain in full force and effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No. 2 to the Contract as of the dates set forth below.

ITEM AND ISSUE:
Request for the Approval of Amendment No. 1 to the Affordable Housing Trust Fund (AHTF) Service Agreement in the Total Amount of $800,000 for the Lamplighter Motel Conversion Project to Extend the Term through December 31, 2024; Bella Luz Apartments 2022, LLLP; (Cody Minnich, Project Manager, Office of Affordable Housing, cjminnich@santafenm.gov, (505) 955-6574)

BACKGROUND AND SUMMARY:
Affordable Housing Trust Funds (AHTF) are sourced from various channels, including developer fees, pre-inclusionary housing agreements, payoffs of City-held liens, and land sales from Tierra Contenta. These funds are dedicated to financing projects and initiatives aimed at providing affordable housing for income-qualified individuals. The eligible housing activities are explicitly detailed in SFCC Chapter 26-3. Allocation decisions are guided by the housing priorities outlined in the City's Five-Year Strategic Housing Plan and are subject to oversight by the NM Mortgage Finance Authority to ensure compliance with the NM Affordable Housing Act. Importantly, AHTF is exclusively earmarked for affordable housing endeavors, covering both capital expenses and direct financial aid to eligible beneficiaries. Given that AHTF funds are locally generated, their utilization criteria can be tailored to better address the unique needs of Santa Fe.

The City of Santa Fe and the Office of Affordable Housing issued a Request for Applications on October 15, 2021, seeking proposals to address housing challenges faced by individuals experiencing homelessness, those at risk of homelessness, or residing in precarious or unsuitable conditions. This includes individuals facing potential housing loss due to eviction, foreclosure, safety concerns, or inadequate living conditions, encompassing both homeowners and renters facing significant financial burdens.

Responding to the RFA, Bella Luz Apartments submitted an application and was granted $800,000 from the AHTF to support their Lamplighter motel conversion project. The initiative involves transforming a property with 62 rooms and 16 studio apartments into 58 units of affordable housing. These units will be made available to households earning below 80% of the Area Median Income (AMI), with up to 25% reserved for special needs populations. AHTF funds are being allocated to cover soft costs associated with the project, including developer, architectural, and design fees.

Facing challenges inherent in the development process, such as protracted entitlement procedures and the need for asbestos remediation, Bella Luz formally requested an extension to the AHTF agreement to ensure sufficient time to expend the funds.

CITY OF SANTA FE
SERVICE AGREEMENT

THIS AGREEMENT is made and entered into by and between the City of Santa Fe, herein after **referred to as the "City", and Bella Luz Apartments 2022, LLLP, herein after referred to as the "Contractor."**

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, § 13-1-95.2.E; and NMSA 1978, § 13-1-111.

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for certain professional services as well as incorporated unilateral services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

WHEREAS, the Contractor does hereby accept its designation as a provider of affordable housing programming, rendering services related to providing affordable support services and subsidy for the City, as set forth in this Agreement; and

WHEREAS, it is agreed by the parties that the performance of the professional services is for a period of one and a half years, as directed by the City.

IT IS MUTUALLY AGREED BETWEEN THE PARTIES:

1. **Scope of Work**

The Contractor shall utilize Affordable Housing Trust Funds (AHTF) to provide the following affordable housing project for the City:

A. Utilize funds to pay soft costs associated with the rehabilitation and configuration of the Lamplighter Inn into 58 units of affordable housing for households earning 80% AMI or less. Eligible costs for these funds may include and are limited to:

a. Developer fees
b. Architectural and Design fees
c. Feasibility studies, such as traffic studies, geotechnical studies, or environmental reviews
d. Land and real estate costs, such as legal fees, appraisal fees, surveys, inspections, and permits

e. Insurance fees
f. Other reasonable costs may submitted for approval to the City as required by project conditions.

B. Submit a final budget for the City's approval for use of these funds 30 days after contract is executed. The Contractor is required to submit invoices for expenses incurred that correspond to the approved budget.

C. Report to the City on a quarterly basis the use of funds, program outcomes achieved, AMI% of assisted households, size of household, and other demographic information as required by the City's quarterly reporting form.

D. Provide accurate and thorough recordkeeping copies on file for annual monitoring to include income verification, certification, and other supporting documentation to support the financial assistance provided.

E. Professional Certifications

a. The Contractor represents that it possesses the personnel, experience and knowledge necessary to perform the services described under this Agreement.

b. The Contractor agrees to obtain and maintain throughout the term of this Agreement, all applicable professional and business licenses required by law, for itself, its employees, representatives and subcontractors.

2. **Performance of Services**

A. The Consultant will perform services under this Agreement with the degree of skill and care ordinarily provided by competent professional engineers, architects, or consultants practicing in the same or similar locality and under the same or similar circumstances and professional license and as expeditiously as is prudent, considering the ordinary professional skill and care of a competent engineer, architect, or other consultant.

B. The City is agreeing to contract with the Consultant on the basis of its qualifications and proposal, including its proposed Key Personn80el, who are the employees of the Consultant responsible for performing major aspects of the services to be provided under this Agreement, and it's designated Subconsultants, the other professional service providers, who will provide specialized services under this Agreement.

C. The Contractor represents that Contractor possesses the personnel, experience and knowledge necessary to perform the services described under this Agreement.

D. The Contractor agrees to obtain and maintain throughout the term of this Agreement, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives and subcontractors.

3. **Compensation**

A. The City shall pay to the Contractor in full payment for services satisfactorily performed, such compensation not to exceed eight hundred thousand dollars ($800,000), including gross receipts tax. **The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed ($800,000). This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Agreement shall equal the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Agreement reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Agreement being amended in writing prior to those services in excess of the total compensation amount being provided.**

B. Payment is subject to availability of funds pursuant to the Appropriations Paragraph set forth below and to any negotiations between the parties from year to year pursuant to Paragraph 1, Scope of Work, and to approval by the City. All invoices MUST BE received by the City no later than thirty 30) days after the termination of the Fiscal Year in which the services were delivered. Invoices received after such date WILL NOT BE PAID.

C. Contractor must submit a detailed statement accounting for all services performed and expenses incurred. If the City finds that the services are not acceptable, within thirty days after the date of receipt of written notice from the Contractor that payment is requested, it shall provide the Contractor a letter of exception explaining the defect or objection to the services, and outlining steps the Contractor may take to provide remedial action. Upon certification by the City that the services have been received and accepted, payment shall be tendered to the Contractor within thirty days after the date of acceptance. If payment is made by mail, the payment shall be deemed tendered on the date it is postmarked. However, the City shall not incur late charges, interest, or penalties for failure to make payment within the time specified herein.

4. **Payment Provisions**

All payments under this Agreement are subject to the following provisions.

A. Acceptance - In accordance with Section 13-1-158 NMSA 1978, the City shall determine if the product or services provided meet specifications. Until the products or services have been accepted in writing by the City, the City shall not pay for any products or services. Unless otherwise agreed upon between the City and the Contractor, within thirty (30) days from the date the City receives written notice from the Contractor that payment is requested for services or within thirty (30) days from the receipt of products, the City shall issue a written certification (by letter or email) of complete or partial acceptance or rejection of the products or services. Unless the City gives notice of rejection within the specified time period, the products or services will be deemed to have been accepted.

B. Payment of Invoice - Upon acceptance that the products or services have been received and accepted, payment shall be tendered to the Contractor within thirty (30) days after the date of invoice. After the thirtieth day from the date that written certification of acceptance is issued, late payment charges shall be paid on the unpaid balance due on the contract to the Contractor at the rate of 1.5 % per month. Contractor may submit invoices for payment no more frequently than monthly. Payment will be made to the Contractor's designated mailing address. Payment on each invoice shall be due within 30 days from the date of the acceptance of the invoice. The City agrees to pay in full the balance shown on each account's statement, by the due date shown on said statement.

5. **Term**

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This Agreement shall begin on date approved by the City, and end on **December 31, 2023**. The City reserves the right to renew the contract on an annual basis by mutual Agreement not exceed a total of four years in accordance with NMSA 1978, §§ 13-1-150 through 152.

6. **Default and Force Majeure**

The City reserves the right to cancel all or any part of any orders placed under this contract without cost to the City, if the Contractor fails to meet the provisions of this contract and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of sub-contractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the sub-contractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this paragraph shall not be exclusive and are in addition to any other rights now being provided by law or under this contract.

7. **Termination**

A. Grounds. The City may terminate this Agreement for convenience or cause. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) Except as otherwise provided in Paragraphs 7.A and 17, the City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 17, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

8. **Amendment**

A. This Agreement shall not be altered, changed or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Agreement to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Agreement, pursuant to the termination provisions as set forth in Paragraph 7 herein, or to agree to the reduced funding.

9. **Status of Contractor**

The Contractor, and Contractor's agents and employees, are independent Contractors for the City and are not employees of the City. The Contractor, and Contractor's agents and employees, shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Agreement. The Contractor acknowledges that all sums received hereunder are personally reportable by the Contractor for income tax purposes, including without limitation, self-employment tax and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has written authority to do so, and then only within the strict limits of that authority.

10. **Assignment**

The Contractor shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without the prior written approval of the City.

11. **Subcontracting**

The Contractor shall not subcontract any portion of the services to be performed under this Agreement without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Agreement, nor shall any subcontract obligate direct payment from the City.

12. **Non-Collusion**

In signing this Agreement, the Contractor/Contractor certifies the Contractor/Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City.

13. **Inspection of Plant**

The City may inspect, at any reasonable time during Contractor's regular business hours and upon prior written notice, the Contractor's plant or place of business, or any subcontractor's plant or place of business, which is related to the performance of this contract.

14. **Commercial Warranty**

The Contractor agrees that the tangible personal property or services furnished under this Agreement shall be covered by the most favorable commercial warranties the Contractor gives to any customer for such tangible personal property or services, and that the rights and remedies provided herein shall extend to the City and are in addition to and do not limit any rights afforded to the City by any other clause of this order. Contractor agrees not to disclaim warranties of fitness for a particular purpose or merchantability.

15. **Condition of Proposed Items**

Where tangible personal property is a part of this Agreement, all proposed items are to be NEW and of most current production, unless otherwise specified.

16. **Records and Audit**

During the term of this Agreement and for three years thereafter, the Contractor shall maintain detailed records pertaining to the services rendered and products delivered. These records shall be subject to inspection by the City, the State Auditor and other appropriate state and federal authorities. The City shall have the right to audit billings both before and after

payment. Payment under this Agreement shall not foreclose the right of the City to recover excessive or illegal payments.

17. **Appropriations**

The terms of this Agreement, and any orders placed under it, are contingent upon sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorization are not made by the legislature, this Agreement, and any orders placed under it, shall terminate upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Agreement to unilaterally reduce funding, the Contractor shall have the option to terminate the Agreement or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

18. **Release**

The Contractor, upon final payment of the amount due under this Agreement, releases the City, its officers and employees, from all liabilities, claims and obligations whatsoever arising from or under this Agreement. The Contractor agrees not to purport to bind the City, unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

19. **Confidentiality**

Any confidential information provided to or developed by the Contractor in the performance of this Agreement shall be kept confidential and shall not be made available to any individual or organization by the Contractor without prior written approval by the City.

20. **Conflict of Interest**

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Agreement, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Agreement. The Contractor shall comply with any applicable provisions of the New Mexico Governmental Conduct Act and the New Mexico Financial Disclosures Act.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Agreement, will continue to comply with, and that this Agreement complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Paragraph are material representations of fact upon which the City relied when this Agreement was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, Contractor learns that Contractor's

representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Paragraph 20 were erroneous on the effective date of this Agreement or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Agreement to the contrary, the City may immediately terminate the Agreement.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

21. **Approval of Contractor Representative(s)**

The City reserves the right to require a change in Contractor representative(s) if the assigned representative(s) are not, in the opinion of the City, adequately serving the needs of the City.

22. **Scope of Agreement; Merger**

This Agreement incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements and understandings have been merged into this written Agreement. No prior agreements or understandings, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.

23. **Notice**

The Procurement Code, Sections 13-1-28 through 13-1-199 NMSA 1978, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for bribes, gratuities and kickbacks.

24. **Equal Opportunity Compliance**

The Contractor agrees to abide by all federal and state laws, and local Ordinances, pertaining to equal employment opportunity. In accordance with all such laws, rules, and regulations, the Contractor agrees to assure that no person in the United States shall on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Agreement. If Contractor is found not to be in compliance with these requirements during the life of this Agreement, Contractor agrees to take appropriate steps to correct these deficiencies.

25. **Indemnification**

The Contractor shall hold the City and its employees harmless and shall indemnify the

City and its employees against any and all claims, suits, actions, liabilities and costs of any kind, including attorney's fees for personal injury or damage to property arising from the acts or omissions of the Contractor, its agents, officers, employees or subcontractors. The Contractor shall not be liable for any injury or damage as a result of any negligent act or omission committed by the City, its officers or employees.

26. **New Mexico Tort Claims Act**

Any liability incurred by the City of Santa Fe in connection with this Agreement is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Agreement modifies or waives any provision of the New Mexico Tort Claims Act.

27. **Applicable Law**

The laws of the State of New Mexico shall govern this Agreement, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, § 38-3-2.By execution of this Agreement, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Agreement.

28. **Limitation of Liability**

The Contractor's liability to the City, for any cause whatsoever shall be limited to the purchase price paid to the Contractor for the products and services that are the subject of the City's, claim. The foregoing limitation does not apply to paragraph 25 of this Agreement or to damages resulting from personal injury caused by the Contractor's negligence.

29. **Incorporation by Reference and Precedence**

If this Agreement has been procured pursuant to a request for proposals, this Agreement is derived from (1) the request for proposal, (including any written clarifications to the request for proposals and any City response to questions); (2) the Contractor's best and final offer; and (3) the Contractor's response to the request for proposals.

In the event of a dispute under this Agreement, applicable documents will be referred to for the purpose of clarification or for additional detail in the following order of precedence: (1) amendments to the Agreement in reverse chronological order; (2) the Agreement, including the scope of work and all terms and conditions thereof; (3) the request for proposals, including attachments thereto and written responses to questions and written clarifications; (4) the Contractor's best and final offer if such has been made and accepted by the City; and (5) the Contractor's response to the request for proposals.

30. **Workers' Compensation**

The Contractor agrees to comply with state laws and rules applicable to workers' compensation benefits for its employees. If the Contractor fails to comply with the Workers' Compensation Act and applicable rules when required to do so, this Agreement may be terminated by the City.

31. **Inspection**

If this contract is for the purchase of tangible personal property (goods), final inspection and acceptance shall be made at Destination. Tangible personal property rejected at Destination for non-conformance to specifications shall be removed at Contractor's risk and expense promptly after notice of rejection and shall not be allowable as billable items for payment.

32. **Inspection of Services**

If this contract is for the purchase of services, the following terms shall apply.

A. Services, as used in this Article, include services performed, workmanship, and material furnished or utilized in the performance of services.

B. The Contractor shall provide and maintain an inspection system acceptable to the City covering the services under this Agreement. Complete records of all inspection work performed by the Contractor shall be maintained and made available to the City and for as long thereafter as the Agreement requires. The City has the right to inspect and test all services contemplated under this Agreement to the extent practicable at all times and places during the term of the Agreement. The City shall perform inspections and tests in a manner that will not unduly delay or interfere with Contractor's performance.

C. If the City performs inspections or tests on the premises of the Contractor or a subcontractor, the Contractor shall furnish, and shall require subcontractors to furnish, at no increase in contract price, all reasonable facilities and assistance for the safe and convenient performance of such inspections or tests.

D. If any part of the services do not conform with the requirements of this Agreement, the City may require the Contractor to re-perform the services in conformity with the requirements of this Agreement at no increase in contract amount. When the defects in services cannot be corrected by re-performance, the City may:

(1) require the Contractor to take necessary action(s) to ensure that future performance conforms to the requirements of this Agreement; and

(2) reduce the contract price to reflect the reduced value of the services performed.

E. If the Contractor fails to promptly re-perform the services or to take the necessary action(s) to ensure future performance in conformity with the requirements of this Agreement, the City may:

(1) by contract or otherwise, perform the services and charge to the Contractor any cost incurred by the City that is directly related to the performance of such service; or

(2) terminate the contract for default.

33. **Insurance**

If the services contemplated under this Agreement will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Agreement, the following insurance coverage(s), naming the City as additional insured.

A. Commercial General Liability insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. Broader Coverage and Limits. The insurance requirements under this Agreement shall be the greater of (1) the minimum coverage and limits specified in this Agreement, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Agreement are sufficient to cover the obligations of Contractor hereunder.

C. Contractor shall maintain the above insurance for the term of this Agreement and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

34. **Impracticality of Performance**

A party shall be excused from performance under this Agreement for any period that the party is prevented from performing as a result of an act of God, strike, war, civil disturbance, epidemic, or court order, provided that the party has prudently and promptly acted to take any and all steps that are within the party's control to ensure performance. Subject to this provision, such non-performance shall not be deemed a default or a ground for termination.

35. **Invalid Term or Condition**

If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

36. **Enforcement of Agreement**

A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

37. **Patent, Copyright and Trade Secret Indemnification**

A. The Contractor shall defend, at its own expense, the City against any claim that any product or service provided under this Agreement infringes any patent, copyright to trademark in the United States or Puerto Rico, and shall pay all costs, damages and attorneys' fees that a court finally awards as a result of any such claim. In addition, if any third party obtains a judgment against the City based upon Contractor's trade secret infringement relating to any product or services provided under this Agreement, the Contractor agrees to reimburse the City for all costs, attorneys' fees and amount of the judgment. To qualify for such defense and or payment, the City shall:

1) give the Contractor prompt written notice within 48 hours of any claim;
2) allow the Contractor to control the defense of settlement of the claim; and
3) cooperate with the Contractor in a reasonable way to facilitate the defense or settlement of the claim.

B. If any product or service becomes, or in the Contractor's opinion is likely to become the subject of a claim of infringement, the Contractor shall at its option and expense:

1) provide the City the right to continue using the product or service and fully indemnify the City against all claims that may arise out of the City's use of the product or service;

2) replace or modify the product or service so that it becomes non-infringing; or,

3) accept the return of the product or service and refund an amount equal to the value of the returned product or service, less the unpaid portion of the purchase price and any other amounts, which are due to the Contractor. The Contractor's obligation will be void as to any product or service modified by the City to the extent such modification is the cause of the claim.

38. **Survival**

The Agreement paragraphs titled "Patent, Copyright, Trademark, and Trade Secret Indemnification; Indemnification; and Limit of Liability" shall survive the expiration of this Agreement. Software licenses, leases, maintenance and any other unexpired Agreements that were entered into under the terms and conditions of this Agreement shall survive this Agreement.

39. **Disclosure Regarding Responsibility**

A. Any prospective Contractor and any of its Principals who enter into a contract greater than sixty thousand dollars ($60,000.00) with any City for professional services, tangible

personal property, services or construction agrees to disclose whether the Contractor, or any principal of the Contractor's company is presently debarred, suspended, proposed for debarment, or declared ineligible for award of contract by any federal entity, state agency or local public body.

B. Principal, for the purpose of this disclosure, means an officer, director, owner, partner, or
a person having primary management or supervisory responsibilities within a business entity or related entities.

C. The Contractor shall provide immediate written notice to the City if, at any time during the term of this Agreement, the Contractor learns that the Contractor's disclosure was at any time erroneous or became erroneous by reason of changed circumstances.

D. A disclosure that any of the items in this requirement exist will not necessarily result in termination of this Agreement. However, the disclosure will be considered in the determination of the Contractor's responsibility and ability to perform under this Agreement. Failure of the Contractor to furnish a disclosure or provide additional information as requested will be grounds for immediate termination of this Agreement pursuant to the conditions set forth in Paragraph 7 of this Agreement.

E. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the disclosure required by this document. The knowledge and information of a Contractor is not required to exceed that which is the normally possessed by a prudent person in the ordinary course of business dealings.

F. The disclosure requirement provided is a material representation of fact upon which reliance was placed when making an award and is a continuing material representation of the facts during the term of this Agreement. If during the performance of the contract, the Contractor is indicted for or otherwise criminally or civilly charged by any government entity (federal, state or local) with commission of any offenses named in this document the Contractor must provide immediate written notice to the City. If it is later determined that the Contractor knowingly rendered an erroneous disclosure, in addition to other remedies available to the Government, the City may terminate the involved contract for cause. Still further the City may suspend or debar the Contractor from eligibility for future solicitations until such time as the matter is resolved to the satisfaction of the City.

40. **Suspension, Delay or Interruption of Work**

The City may, without cause, order the Contractor, in writing, to suspend, delay or interrupt the work in whole or in part for such period of time as the City may determine. The contract sum and contract time shall be adjusted for increases in cost and/or time associated with Contractor's compliance therewith. Upon receipt of such notice, Contractor shall leave the jobsite and any equipment in a safe condition prior to departing. Contractor must assert rights to additional compensation within thirty (30) days after suspension of work is lifted and return to work is authorized. Any compensation requested for which entitlement is granted and the contract sum adjusted, shall have profit included (for work completed) and for cost only (not

profit) for Contractor costs incurred directly tied to the suspension itself and not otherwise covered by Contract remedy. Any change in Total Compensation must be reflected in an Amendment executed pursuant to Section 8 of this Agreement.

41. **Notification**

Either party may give written notice to the other party in accordance with the terms of this Paragraph. Any written notice required or permitted to be given hereunder shall be deemed to have been given on the date of delivery if delivered by personal service or hand delivery or three (3) business days after being mailed.

To the City: Office of Affordable Housing
PO Box 909
Santa Fe, NM 87504-0909

To the Contractor: Bella Luz Apartments 2022, LLLP
c/o JL Gray Company
2407 W. Picacho Ste A1
Las Cruces, NM 88007

Either party may change its representative or address above by written notice to the other in accordance with the terms of this Paragraph. The carrier for mail delivery and notices shall be the agent of the sender.

To the Contractor: Santa Fe Community Housing Trust

42. **Succession**

This Agreement shall extend to and be binding upon the successors and assigns of the parties.

43. **Entire Agreement.**

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

44. **Penalties for violation of law.**

The Procurement Code, Sections 13-1-28 through 13-1-199, NMSA 1978, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities and kickbacks.

45. **Default/Breach.**

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

46. **Equitable Remedies.**

The Contractor acknowledges that its failure to comply with any provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

47. **Default and Force Majeure.**

The City reserves the right to cancel all or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date of the signature by the required approval authorities below.

ITEM AND ISSUE:
Request for the Approval of the Service Agreement in the Total Amount of $800,000 for the Lamplighter Inn project; (Bella Luz, LLLP); (Cody Minnich, cjminnich@santafenm.gov, (505) 955-6574)

BACKGROUND AND SUMMARY:
Affordable Housing Trust Funds (AHTF) are generated from development activity (developer fees, pre-inclusionary housing agreements), payoffs of City-held liens, and land sales from Tierra Contenta. These funds are used for affordable housing projects and activities to benefit income-qualified grantees. Eligible housing activities are outlined in SFCC Chapter 26-3. Uses of funds are determined by the housing needs identified in the City's Five Year Strategic Housing Plan and regulated by the NM Mortgage Finance Authority for compliance with the NM Affordable Housing Act. AHTF is used only for affordable housing, whether for capital costs or direct financial assistance to income qualified beneficiaries. Because AHTF funds are local revenue, criteria for how they are used can be more localized to better meet Santa Fe's unique needs.

The City of Santa Fe and the Office of Affordable Housing issued a Request for Application on October 15, 2021 to support housing solutions for people experiencing homelessness, those at risk of homelessness or who are precariously/unsuitably housed, those at risk of losing their housing either because of eviction, foreclosure or safety and condition issues, including homeowners, or renters/homeowners who are heavily cost burdened.

Funding is available to developers and sponsors of affordable housing, including partnerships, corporations, limited liability companies, joint ventures, public/private partnerships and non-profit organizations that are organized under state, local, or tribal laws and can provide proof of such organization. Eligible applicants must have proven financial capacity and organizational experience to carry out the activities described in the proposal submitted to receive an AHTF allocation.

For RFA #22/01/R, a balance of $3,000,000 in the AHTF was made available. Applications were reviewed and funding recommendations were made by the City's Community Development Commission (CDC) at the CDC Meeting on March 2nd. Awards are based on the applicant's demonstration of how the proposed project meets the City's priority of preventing homelessness, ending homelessness, and/or stabilizing the housing situations of those who are at risk of losing their housing. The following criteria was evaluated by the CDC to make funding recommendations:

1) Funding: the proposed project budget is realistic, funds are leveraged at a 3:1 ratio from other sources (for every $1 of AHTF, $3 is from other sources), revenue is sufficient to accomplish the proposed project and matching funds are secured.
2) Need/Benefit and Project Feasibility: the proposed project addresses underlying/systemic challenges in the community, is responsive to current/future market demand, and the applicant demonstrates feasibility through site control, if applicable, and provides a realistic timeframe for the completion of proposed activities.
3) Affordability: the proposed project effectively meets the income eligibility requirements of the NM Affordable Housing Act, and applicant describes how affordability targets will be achieved and monitored over time for compliance, and how equity will be secured.
4) Organizational Capability and Management: the applicant adequately describes its organizational experience, expertise in the proposed type(s) of housing or assistance, and demonstrates financial soundness.

Six applications were submitted for the AHTF funds. Five AHTF applications were deemed responsive and eligible for funding. Because the funding requests for AHTF far exceeded what was available, funding amounts were determined based on a variety of factors related to priority needs identified in the Five Year Affordable Housing Strategic Plan. The Table below details all of the Community Development Commission's recommendations:

GRANTEE	REQUESTED	RECOMMENDED
HOMEWISE	$1,617,375.00	$700,000.00
LAMPLIGHTER	$1,037,339.00	$800,000.00
COMMUNITY SOLUTIONS	$1,500,000.00	$910,000.00
SF CIVIC HOUSING AUTHORITY	$500,000.00	$500,000.00
YOUTHWORKS	$180,000.00	$90,000.00
TOTAL	**$4,834,714.00**	**$3,000,000.00**

Bella Luz, LLLP – Lamplighter

Amount Requested: $1,037,339
Amount Recommended: $800,000
Funds will support the acquisition and rehabilitation of motel property to house renters who are unstably housed, transitioning out of homelessness, or workforce renters. The property will be converted from 62 rooms and 16 studio apartments to 58 units of affordable housing available to households earning under 80% AMI with up to 25% of said units being available to special needs populations. AHTF funds will support soft costs associated with this project, such as developer, architectural, and design fees.

PROCUREMENT METHOD:
The procurement method is the RFA # 22/01/R which expires June 30, 2023.

CONTRACT NUMBER:
The FY22 Munis contract number is 3203423.

FUNDING SOURCE:
The funding source is:
Fund Name/Number: Community Development/Fund 240
Munis Org Name/Number: Affordable Housing Trust Fund/2400223
Munis Object Name/Number: Subsidy Payments/510500

ACTION REQUESTED:
The Office of Affordable Housing respectfully requests your review and approval.

City of Santa Fe New Mexico
Memorandum

Date: October 24, 2024

To: Governing Body

Via: Regina Wheeler
Regina Wheeler (Oct 29, 2024 17:01 MDT)
Regina Wheeler, Public Works Department Director

From: Romella Glorioso-Moss, PhD, CPM, Capital Projects Manager

Subject: Approval of a Cooperative Project Agreement - Design

Vendor Name: New Mexico Department of Transportation

Vendor Number: 7177

ACTION:
Request for Approval of a Cooperative Project Agreement – Design Control No. S100830 With the New Mexico Department of Transportation for the Engineering Design of Arroyo Chamisos Trail Extension in the Total Amount of $300,000 through December 31, 2026 (Romella Glorioso-Moss, rsglorioso-moss@santafenm.gov, 505-955-6623)

1) Request for Approval of a Budget Amendment Resolution (BAR) in the Total Amount of $300,000 using $256,320 of NMDOT funding and $43,680 of Road Impact Fees to Design the Arroyo Chamisos Trail Extension Project.

BACKGROUND AND SUMMARY:
The Arroyo Chamisos Trail Extension Project connecting East and West Zia neighborhoods has been prioritized in the Santa Fe Metropolitan Planning Organization's Bicycle Masterplan and the Bicycling and Pedestrian Strategic Plan FY2023-2033.

Recognizing the importance of this project, a $300,000 federal funding was granted via Recreational Trail Program administered by the New Mexico Department of Transportation. The funding will be used to design a 10 ft-wide, 845 ft-long paved multi-use path along the 20 ft-wide drainage easement on Arroyo de los Chamisos between Botulph Road and Old Arroyo Chamiso. The Cooperative Agreement terminates on December 31, 2026.

PROCUREMENT METHOD:
This funding is exempt from the New Mexico Procurement Code as per Section 13-1-98 A.

Control No.: S100830

COOPERATIVE PROJECT AGREEMENT – DESIGN

The **New Mexico Department of Transportation** (Department), and the City of Santa Fe (Local Agency) enter into this Agreement for Federal Highway Administration (FHWA) funding under NMSA 1978, Section 67-3-28. This Agreement for Project Control No.: S100830 is effective as of the date of the last party to sign it on the signature page.

1. Funding and Project Description.

a. Funding for Design Work is as follows:

1. **FFY 2025 Rec Trails Prog (RTP) Funds**
   Department's 85.44% share $256,320
   Arroyo Chamisos Trail Extension. Arroyo Chamisos Trail connection between East Zia and West Zia. (Description as per STIP database, this agreement only pertains to the Design Work portion of Project Control No. S100830.)
2. **City's matching 14.56% share** $43,680
   For the purpose stated above.
3. **The Total Project Funding for Design Work** $300,000

b. Attached as Exhibit A is a table of data on funding as required by 2 CFR 200.331.
c. The Local Agency shall provide all the work, labor, materials and services necessary to perform the Project.
d. The Local Agency is responsible for all Project costs that exceed federal funding.
e. The Local Agency must repay certain federal funding to the Department if:
   1. The Project is cancelled.
   2. An audit determines an overpayment or federal funds were used for ineligible cost items.
   3. The construction of a road on a right-of-way acquisition is not undertaken within twenty (20) years after the fiscal year in which the funds are authorized.
   4. Acquisition of right-of-way or construction of the road for a preliminary engineering project is not undertaken within ten (10) years following the fiscal year in which the project is authorized.

   The Local Agency must repay or establish a repayment plan for the federal funds within forty-five (45) days of notice from the Department.

2. Payment – Reimbursement.

The Department will reimburse the Local Agency upon receipt of reimbursement requests with supporting documentation and certification that costs have been incurred. Reimbursement requests may be submitted monthly or, at a minimum, quarterly. Expenses that are documented and determined to be eligible under 2 CFR Part 200 will be reimbursed based on the Local Agency's required Match. The final Project payment request must be submitted within thirty (30) calendar days of completion of (a) the PS&E package or (b) final payment to the contractor for Construction or Project Work and (c) prior to termination of this Agreement. The Department will not reimburse the Local Agency for costs incurred (a) prior to obligation of federal funding and the effective date of this Agreement; (b) after expiration of this Agreement; or (c) in excess of the federal funding identified in Section 1.

3. Federal, State and Department Requirements.

Docusign Envelope ID: A8F7292E-D895-4FB6-9AF8-B9F23DE876A2

By entering into this Agreement, the Local Agency certifies and agrees to comply with any applicable Federal and State laws and regulations, and terms and conditions as set forth in:

a. Title 23, U.S. Code Highways and its associated regulations
b. 2 CFR Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. See Exhibit B.
c. 49 CFR Part 20, Lobbying Certification
d. 49 CFR Part 29, Governmentwide Debarment and Suspension (Non-procurement) and Governmentwide Debarment and Suspension (Grants) and Certification
e. The Department's policies and standards
f. The current Tribal/Local Government Handbook located at: https://www.dot.nm.gov/business-support/project-oversight-division/t-lpa-documents-and-information/
g. The Federal Funding Accountability and Transparency Act (FFATA) and certain contracting requirements regarding Office of Inspector General Reviews as identified on Exhibit B.

4. Term.

This Agreement becomes effective upon signature of all parties. The effective date is the date when the last party signed the Agreement on the signature page. This Agreement terminates on **December 31, 2026.** If a contract term extension is needed, the Local Agency must provide a written request to the Region or District T/LPA Coordinator sixty (60) days prior to the expiration date to ensure timely processing of an Amendment. The Region or District will then have two weeks to submit to Project Oversight Division to ensure timely processing of an Amendment.

5. Termination.

The Department may terminate this agreement and request repayment under Section 1e above for the following reasons:

a. Failure to timely contract: The Local Agency, under a Design Agreement, must enter into a written agreement with an engineering consultant within three (3) months from the effective date this Agreement.
b. Inactivity: If there are no Project expenditures for twelve (12) consecutive months.
c. Failure to comply: If the Local Agency fails to comply with any provision of this Agreement.
d. Local Agency's Request: The Local Agency may seek termination in writing to the Department, which will be fully considered.

6. Third Party Beneficiary.

This Agreement does not confirm any rights or remedies on anyone other than the Department and the Local Agency. The Department is not a party to any agreement between the Local Agency and a Project contractor at any tier.

7. New Mexico Tort Claims Act.

Neither party is responsible for liability incurred as a result of the other party's acts or omissions. Any liability incurred is subject to the immunities and limitations of the New Mexico Tort Claims Act, NMSA 1978, Section 41-4-1, et seq. This paragraph is intended only to define the liabilities between the parties, and it is not intended to modify, in any way, the parties' liabilities as governed by common law or the New Mexico Tort Claims Act.

8. Appropriation.

The terms of this Agreement are contingent upon sufficient appropriations and authorizations from the New Mexico Legislature or the United States Congress when federal funds are involved. If sufficient appropriations and authorizations are not made, this Agreement terminates immediately upon written notice from the Department. The Department is not committed to expenditure of funds until they are programmed, budgeted, obligated by FHWA, encumbered, and approved for expenditure. The Department's decision on whether funds are sufficient is final.

Docusign Envelope ID: A8F7292E-D895-4FB6-9AF8-B9F23DE876A2

9. Scope of this Agreement.
This Agreement constitutes the entire Agreement between the Parties. Any claimed covenant, term, condition, warranty or promise of performance not included in this document or its amendments, is not part of this Agreement and not enforceable. The performance of all duties and obligations must conform with and must not contravene any state, local, or federal statutes, regulations, rules, or ordinances.

10. Severability.
In the event that any portion of this Agreement is determined to be void, unconstitutional, or unenforceable, the remainder of this Agreement remains in full force and effect.

11. Principal Contacts and Notices.
The principal contacts for this Agreement are listed below. Except as otherwise specified, all notices must be in writing and must be given to the principal contacts listed below.

Docusign Envelope ID: A8F7292E-D895-4FB6-9AF8-B9F23DE876A2

EXHIBIT B

Uniform Administrative Requirements and Audit
2 CFR § 200, Uniform Administrative Requirements, Cost Principals, and Audit Requirements for Federal Awards, applies to each non-profit organization, each institution of higher education, and local governments as a whole when they or one of their departments receives federal funds. 2 CFR § 200 is formally OMB Circular A-133. Any non-profit organization, institution of higher education, or local government spending more than $750,000 in federal funds from all sources within a 12-month period must have an audit performed on the use of the funds. The Department defines the 12-month period as July 1 to June 30.

Federal Funding Accountability and Transparency Act (FFATA).
The FFATA requires full disclosure to the public of all entities or organizations receiving federal funds. Central to this law is www.USASpending.gov, a publicly available website with searchable information on each federal grant and contract over $25,000. In addition, the Federal Subaward Reporting System (FSRS), www.FSRS.gov, was developed for reporting on executive compensation and first-tier subawards. The Local Agency is required to register with the US Contractor Registration (System for Award Management [SAM] System) and get a Unique Entity Identifier (UEI) number. The Local Agency is responsible for providing their executive compensation and subaward information to the Department for entry into FSRS.gov. The Department is responsible for providing award information to USA Spending. The type of information reported includes:

- Name of Local Agency receiving the award
- Amount of Award
- Funding Agency
- NAICS code for contracts or the Catalog of Federal Domestic Assistance program number for grants
- Program source
- Award title descriptive of the purpose of the funding action
- Location of the Local Agency, including the Congressional District
- Place of performance of the program or activity, including the Congressional District
- UEI number of the Local Agency and its parent organization if one exists
- Total compensation – If the Local Agency in the preceding year received eighty (80) percent or more of its annual gross revenues in federal awards, which exceeds $25 million annually, and the public has no access to this information under the Securities Exchange Act or the Internal Revenue Code, then the names of the top five executives of the Local Agency are also required to comply with the FFATA.
- The Department will extract as much information as possible from the Local Agency's grant application and standard reports.

Office of Inspector General Review

Docusign Envelope ID: A8F7292E-D895-4FB6-9AF8-B9F23DE876A2

The Local Agency, when procuring services, shall provide to all bidders the reporting and oversight requirements that they are bound to from the time of bid submission. The following provisions must be included in all prime contracts, subcontracts, and other contracts for services for a federally funded project:

1. **Inspector General Reviews**: Any Inspector General of a federal department or executive agency shall review, as appropriate, any concerns raised by the public about specific investments using federal funds. Any findings of such reviews not related to an ongoing criminal proceeding shall be relayed immediately to the New Mexico Department of Transportation or the agency concerned.

2. **Access of Offices of Inspector General to Certain Records and Employees**: With respect to each contract or grant awarded using federal funds, any representative of an appropriate Inspector General appointed under the Inspector General Act of 1978, 1,5 USC App. 3 and specifically § 8G, 5 USC App. 3 (2014) is authorized to examine any records of the contractor or grantee, any of its subcontractors or sub-grantees, or any state or local agency administering such contract, that pertain to, and involve transactions relating to, the contract, subcontract, grant, or sub-grant; and to interview any officer or employee of the contractor, grantee, sub-grantee, or agency regarding such transactions. In addition, the Local Agency should do the following:
   a. Allow access by the Government Accountability Office Comptroller General and his representatives to examine any records of the contractor or any of contractor's subcontractors, or any state or local agency administering such contract that directly pertain to, and involve transactions relating to, the contract or subcontract
   b. Allow the Comptroller General and his representatives to interview any officer or employee of the contractor or any of contractor's subcontractors, or of any state or Local Agency administering the contract, regarding such transactions

   Nothing in this section should be interpreted to limit or restrict in any way any existing authority of an Inspector General. The Department's Office of Inspector General (OIG) has the authority to carry out all duties required. The duties are the same as those specified in Federal Law: OIG, 23 USC § 302 (1998) (the capability to carry out the duties required by law); 23 USC § 112(2) (2012) (contracting for engineering and design services); the review of Federal-aid construction contract.

Subject: On-call Project Management Services

Vendor Name: Capital Program Management Services LLC

Munis Vendor Number:10565

ITEM AND ISSUE:

Request Approval of a Professional Servcies Contract with Capital Program Management Services LLC for not to Exceed $4,327,500 Including NMGRT for On-Call Project Management Services For a Four Year Term.

CONTRACT NUMBER:

The FY25 3250324

BACKGROUND AND SUMMARY:

On-call professional services agreements are established to augment the capacity and skills of City staff. With an unprecedented level of funding for capital projects, it is essential to have on-call professional services at hand to ensure the compliant, timely and successful deployment of projects. Project Managers, Division Directors and Department Directors oversee service professionals to ensure that procedures comply with City commitment to community engagement and cost effective, sustainable, safe and compliant infrastructure.

RFP 24060 was advertised in July 2024. Three responsive offers were received and three agreements for on-call project management services are being established.

On-call service agreements are not a guarantee of work. The City will issue task orders to vendor as need and funding arise.

CITY OF SANTA FE

PROFESSIONAL SERVICES CONTRACT

THIS CONTRACT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the "City," and **Capital Program Management Services LLC (CPGMS)**, hereinafter referred to as the "Contractor," and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, section 13-1-111 and

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for professional services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

The City and the Contractor hereby agree as follows:

1. Scope of Work

The Contractor shall provide the following services-for the City:

Project types that Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

The City's Facilities Division Director or Director of Public Works ~~will~~ shall provide Contractors with Task Order scopes of work for which Contractors may provide a quotation for owner representative project management services related to any particular project. Upon receiving the City's request for services, the Contractor shall provide the City with an estimate of hours of labor, costs and schedule to perform the work. Each Task Order will be negotiated on a project-by-project basis. This work may be phased in alignment with City priorities and funding.

Examples of tasks that could be included in the Task Order scopes of work include:

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding
    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement
    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement
    a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
    b. Ensure project plan and administration adhere to all requirements of funding sources.
    c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
    d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
    e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
    f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:
        i. Review of Plans and Plats
        ii. Design Analysis Reports (DARs)
        iii. Drainage Reports
        iv. Design Plans at all phases

v. Conformance to standards and specifications
vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents
vii. A/E Contract Exhibit Review
viii. Safety Studies
ix. Corridor studies
x. Traffic Impact Analysis
xi. Lighting and Signalization Reports
xii. Engineering Estimates Opinions of Probable Cost
xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.
i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction
   a. Perform construction management services,
   b. Provide digital photo and/or video logs of construction progress at each stage;
   c. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
   d. Construction quality control monitoring, testing and inspection;
   e. Assist in resolution of unforeseen conditions
   f. Continue to maintain critical path schedule
6. Asset Management
   a. Assist with claim analysis and development of corrective action plans;
   b. Provide expert witness services,
   c. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

2. Standard of Performance; Licenses

A. The Contractor does hereby accept its designation as a professional service, rendering services related to Project Management Services for the City, as set forth in this Agreement. The Contractor represents that Contractor possesses the personnel, experience, and knowledge necessary to perform the services described under this Contract.

B. The Contractor agrees to obtain and maintain throughout the term of this Contract, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives, and subcontractors.

3. Compensation

.A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed four million dollars ($4,000,000.00), excluding gross receipts tax. The New Mexico gross receipts tax levied on the amounts payable under this Agreement totaling three hundred twenty-seven thousand five hundred dollars ($327,500.00) shall be paid by the City to the Contractor. **The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed four million, three hundred twenty-seven thousand five hundred dollars ($4,327,500.00) for the term of this agreement.**

B. Payment. The total compensation under this Agreement shall not exceed four million three hundred-seven thousand five hundred dollars ($4,327,500) including New Mexico gross receipts tax. **This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Agreement shall equal the amount stated herein. The Parties do not intend for the Contractor to continue to provide Services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the Services provided under this Agreement reach the total compensation amount. In no event will the Contractor be paid for Services provided in excess of the total compensation amount without this Agreement being amended in writing prior to services, in excess of the total compensation amount being provided.**

C. Payment shall be made upon Acceptance of each Deliverable and upon the receipt and Acceptance of a detailed, certified Payment Invoice. Payment will be made to the Contractor's designated mailing address. In accordance with Section 13-1-158 NMSA 1978, payment shall be tendered to the Contractor within thirty (30) days of the date of written certification of Acceptance. All Payment Invoices MUST BE received by the City no later than fifteen (15) days after the termination of this Agreement. Payment Invoices received after such date WILL NOT BE PAID.

D. **Notice of Extended Payment Provision For Grant Funded Contracts**. This contract allows the owner to make payment within 45 days after submission of an undisputed request for payment.

4. Term

THIS CONTRACT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE CITY. This Contract shall terminate **four (4) years from date of final signature** unless terminated pursuant to paragraph 5 (Termination) and paragraph 6 (Appropriations).

5. Termination

A. Grounds. The City may terminate this Agreement for convenience or cause. For contracts within their authority, the City Manager or their designee is authorized to provide the notice of termination, otherwise such notice of termination shall be provided by the Mayor or their designee as authorized by the Governing Body. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) The City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 6, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

6. Appropriations

The terms of this Contract are contingent upon sufficient appropriations and authorization being made by the Governing Body for the performance of this Contract. If sufficient appropriations and authorization are not made by the Governing Body, this Contract shall terminate immediately upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Contract to unilaterally reduce funding, the Contractor shall have the option to terminate the Contract or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

7. Status of Contractor

The Contractor and its agents and employees are independent contractors performing professional services for the City and are not employees of the City. The Contractor and its agents and employees shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Contract. The Contractor acknowledges that all sums received hereunder are reportable by the Contractor for tax purposes, including without limitation, self-employment and business income tax. The

Contractor agrees not to purport to bind the City unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

8. Assignment

The Contractor shall not assign or transfer any interest in this Contract or assign any claims for money due or to become due under this Contract without the prior written approval of the City.

9. Subcontracting

The Contractor shall not subcontract any portion of the services to be performed under this Contract without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Contract, nor shall any subcontract obligate direct payment from the City.

10. Release

Final payment of the amounts due under this Contract shall operate as a release of the City, its officers and employees from all liabilities, claims and obligations whatsoever arising from or under this Contract.

11. Confidentiality

Any confidential information provided to or developed by the Contractor in the performance of this Contract shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the City.

12. Product of Service -- Copyright

All materials developed or acquired by the Contractor under this Contract shall become the property of the City and shall be delivered to the City no later than the termination date of this Contract. Nothing developed or produced, in whole or in part, by the Contractor under this Contract shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor.

13. Conflict of Interest; Governmental Conduct Act

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Contract, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Contract.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Contract, will continue to comply with, and that this Contract complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Article are material representations of fact upon which the City relied when this Contract was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Article were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Article were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Contract to the contrary, the City may immediately terminate the Contract.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

14. Amendment

A. This Agreement shall not be altered, changed, or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Contract to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Contract, pursuant to the termination provisions as set forth in Article 4 herein, or to agree to the reduced funding.

15. Entire Agreement.

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

16. Merger

This Contract incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements, and understandings have been merged into this written contract.

All terms and conditions of the RFP#24060 Owner Representative Project Management Services and the Contractor's response to such document(s) are incorporated herein by reference and is included in the order of precedence.

No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Contract.

17. Penalties for violation of law

NMSA 1978, sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities, and kickbacks.

18. Equal Opportunity Compliance

The Contractor agrees to abide by all federal and state laws and rules and regulations, and Santa Fe City Code, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Contract. If Contractor is found not to be in compliance with these requirements during the life of this Contract, Contractor agrees to take appropriate steps to correct these deficiencies.

19. Applicable Law

The laws of the State of New Mexico shall govern this Contract, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, section 38-3-2. By execution of this Contract, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Contract.

20. Workers Compensation

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Contract may be terminated by the City.

21. Professional Liability Insurance

Contractor shall maintain professional liability insurance throughout the term of this Contract providing a minimum coverage in the amount required under the New Mexico Tort Claims Act. The Contractor shall furnish the City with proof of insurance of Contractor's compliance with the provisions of this section as a condition prior to performing services under this Contract.

22. Other Insurance

If the services contemplated under this Contract will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Contract, the following insurance coverage(s), naming the City as additional insured.

A. **Commercial General Liability** insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. **Business Automobile Liability** insurance for all owned, non-owned automobiles, with a combined single limit not less than $1,000,000 per accident.

C. **Broader Coverage and Limits**. The insurance requirements under this Contract shall be the greater of (1) the minimum coverage and limits specified in this Contract, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor hereunder.

D. Contractor shall maintain the above insurance for the term of this Contract and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

23. Records and Financial Audit

The Contractor shall maintain detailed time and expenditure records that indicate the date; time, nature and cost of services rendered during the Contract's term and effect and retain them for a period of three (3) years from the date of final payment under this Contract. The records shall be subject to inspection by the City. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive or illegal payments.

24. Indemnification

The Contractor shall defend, indemnify and hold harmless the City from all actions, proceeding, claims, demands, costs, damages, attorneys' fees and all other liabilities and expenses of any kind from any source which may arise out of the performance of this Contract, caused by the negligent act or failure to act of the Contractor, its officers, employees, servants, subcontractors or agents, or if caused by the actions of any client of the Contractor resulting in injury or damage to persons or property during the time when the Contractor or any officer, agent, employee, servant or subcontractor thereof has or is performing services pursuant to this Contract. If any action, suit or proceeding related to the services performed by the Contractor or any officer, agent, employee, servant or subcontractor under this Contract is brought against the Contractor, the Contractor shall, as soon as practicable but no later than two (2) days after it receives notice thereof, notify the legal counsel of the City.

25. New Mexico Tort Claims Act

Any liability incurred by the City of Santa Fe in connection with this Contract is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Contract modifies or waives any provision of the New Mexico Tort Claims Act.

26. Invalid Term or Condition

If any term or condition of this Contract shall be held invalid or unenforceable, the remainder of this Contract shall not be affected and shall be valid and enforceable.

27. Enforcement of Contract

A party's failure to require strict performance of any provision of this Contract shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Contract shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

28. Notices

Any notice required to be given to either party by this Contract shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

To the City:
Regina Wheeler, Public Works Department Director
City of Santa Fe
P.O. Box 909
Santa Fe, NM 87504-0909
rawheeler@santafenm.gov

To the Contractor:
Lloyd J Gronning, President
Capital Project Management Services LLC
199 East Chili Line Road
Santa Fe, NM 87508
lgronning@cpgms.com

29. Authority

If Contractor is other than a natural person, the individual(s) signing this Contract on behalf of Contractor represents and warrants that he or she has the power and authority to bind Contractor, and that no further action, resolution, or approval from Contractor is necessary to enter a binding contract.

30. Non-Collusion

In signing this Agreement, the Contractor certifies the Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City's Chief Procurement Officer.

31. Default/Breach

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages, and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

32. Equitable Remedies

The Contractor acknowledges that its failure to comply with any provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

33. Default and Force Majeure

The City reserves the right to cancel all, or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Contract as of the date of the signature by the required approval authorities below.

A. **SCOPE OF WORK**

The Owner's Representative Project Manager contractors shall provide the services described in this scope of work to assist and represent the City of Santa Fe in the planning and management of infrastructure projects in the City. The City plans to establish multiple contracts with multiple service providers to be available to support projects and improvements as needs arise and funding is available.

Project types that Owner Representative Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding

    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement

    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement

a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
b. Ensure project plan and administration adhere to all requirements of funding sources.
c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:

    i. Review of Plans and Plats

    ii. Design Analysis Reports (DARs)

    iii. Drainage Reports

    iv. Design Plans at all phases

    v. Conformance to standards and specifications

    vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents

    vii. A/E Contract Exhibit Review

    viii. Safety Studies

    ix. Corridor studies

    x. Traffic Impact Analysis

    xi. Lighting and Signalization Reports

    xii. Engineering Estimates Opinions of Probable Cost

    xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.

i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction

    a. Perform construction management services,
    b. Provide digital photo and/or video logs of construction progress at each stage;
    c. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
    d. Construction quality control monitoring, testing and inspection;
    e. Assist in resolution of unforeseen conditions
    f. Continue to maintain critical path schedule

6. Asset Management

    a. Assist with claim analysis and development of corrective action plans;
    b. Provide expert witness services,
    c. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

Engineer of Record Services: So that the Contractor can objectively represent the City in review of work of design, engineering and construction services related to the Project, Contractor shall not provide those services to the Project for which they are providing Owner Representative Project Management Services. This does not prohibit Contractor from providing engineering or other technical services via a separate agreement to other City projects occurring concurrent with the Project.

Thank you for your consideration,

Subject: RE: Request for Determination

Greetings,

The scope of work as written would be Professional Services. This determination relates only to that question and is no comment on whether the scope of work or procurement method meet all legal standards. I reserve the right to change this determination if the scope of work differs from the scope of work submitted for the original determination. This procurement must be conducted using the processes and procedures set forth by the City of Santa Fe, Central Purchasing, the Procurement Manual, and state statutes.

Please note:

- Save this email as a PDF and upload it into the corresponding Munis records.
- Check with WorkQuest dba Horizons of New Mexico (mloehman@horizonsofnewmexico.org) if this service appears on their approved list.
- If any of your request include anything that needs to be reviewed and preapproved by another city Department/Division, please send your SOW to the corresponding email address, and provide their response to this office when you submit your procurement request for processing.
  - IT components - ereview@santafenm.gov
  - Vehicles – dmjaramillo@santafenm.gov
  - Grants - mtbonifer@santafenm.gov; cmthompson@santafenm.gov
  - Facilities, Furniture, Fixture, Equipment - jsburnett@santafenm.gov
- Ensure that the appropriate templates and forms are used https://intranet.santafenm.gov/finance_1 and documented procedures/laws/rules are followed.
- > $20k per year, when processing this procurement, please ensure the procurement number issued by Munis and the procurement name are used in the appropriate documents and the subject of emails.
- If you are processing a procurement where the forecasted amount is =/> $60k, per NMSA 1978, Section 13-1-102, if you aren't using a cooperative or existing contract, you must process an RFP.
- < $20k per year, one quote is acceptable.
- From $20k to $60k per year, if you aren't using a cooperative or existing contract, you'll need to provide 3 quotes in your req. Must use the Munis Bid Module after 12/21/2023.
- Figure out your funding source and **inform Purchasing**. To ensure that the proper documents and language are used, it is important to identify the funding source for the subsequent contract. For instance, if federal funds are involved, the procurement request and subsequent contract must include the necessary federal language. Therefore, it is crucial to determine the funding source beforehand.
- Review the pages linked below to determine whether any of the existing price agreements/contracts or cooperative agreements are applicable to this request. You might be able to use an existing price agreement/contract to save time and money.

- https://www.generalservices.state.nm.us/state-purchasing/statewide-price-agreements/ (if you choose to use a Statewide, you do not need to ask Horizons if they can do the work. State Purchasing must offer the SOW to Horizons prior to placing the award on their website.)

Subject: Request for Determination

Good Morning,

I am requesting a Determination on the scope of work below:

SCOPE OF WORK

The Owner's Representative Project Manager contractors shall provide the services described in this scope of work to assist and represent the City of Santa Fe in the planning and management of infrastructure projects in the City. The City plans to establish multiple contracts with multiple service providers to be available to support projects and improvements as needs arise and funding is available.

Project types that Owner Representative Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding

    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement

    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement

    a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
    b. Ensure project plan and administration adhere to all requirements of funding sources.

c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:

i. Review of Plans and Plats

ii. Design Analysis Reports (DARs)

iii. Drainage Reports

iv. Design Plans at all phases

v. Conformance to standards and specifications

vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents

vii. A/E Contract Exhibit Review

viii. Safety Studies

ix. Corridor studies

x. Traffic Impact Analysis

xi. Lighting and Signalization Reports

xii. Engineering Estimates Opinions of Probable Cost

xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.
i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction

1. Perform construction management services,
2. Provide digital photo and/or video logs of construction progress at each stage;
3. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
4. Construction quality control monitoring, testing and inspection;
5. Assist in resolution of unforeseen conditions
6. Continue to maintain critical path schedule

6. Asset Management

1. Assist with claim analysis and development of corrective action plans;
2. Provide expert witness services,
3. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

Engineer of Record Services: So that the Contractor can objectively represent the City in review of work of design, engineering and construction services related to the Project, Contractor shall not provide those services to the Project for which they are providing Owner Representative Project Management Services. This does not prohibit Contractor from providing engineering or other technical services via a separate agreement to other City projects occurring concurrent with the Project.

Subject: On-call Project Management Services

Vendor Name: Wilson & Company Inc

Munis Vendor Number:2574

ITEM AND ISSUE:

Request Approval of a Professional Servcies Contract with Wilson & Company Inc for not to Exceed $4,327,500 Including NMGRT for On-Call Project Management Services for a Four Year Term.

CONTRACT NUMBER:

The FY25 3250325

BACKGROUND AND SUMMARY:

On-call professional services agreements are established to augment the capacity and skills of City staff. With an unprecedented level of funding for capital projects, it is essential to have on-call professional services at hand to ensure the compliant, timely and successful deployment of projects. Project Managers, Division Directors and Department Directors oversee service professionals to ensure that procedures comply with City commitment to community engagement and cost effective, sustainable, safe and compliant infrastructure.

RFP 24060 was advertised in July 2024. Three responsive offers were received and three agreements for on-call project management services are being established.

On-call service agreements are not a guarantee of work. The City will issue task orders to vendor as need and funding arise.

CITY OF SANTA FE

PROFESSIONAL SERVICES CONTRACT

THIS CONTRACT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the "City," and **Wilson & Company Inc., Engineers & Architects**, hereinafter referred to as the "Contractor," and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, section 13-1-111 and

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for professional services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

The City and the Contractor hereby agree as follows:

1. Scope of Work

The Contractor shall provide the following services-for the City:

Project types that Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

The City's Facilities Division Director or Director of Public Works shall provide Contractors with Task Order scopes of work for which Contractors may provide a quotation for owner representative project management services related to any particular project. Upon receiving the City's request for services, the Contractor shall provide an estimate of hours of labor, costs and schedule to the perform the work. Each Task Order will be negotiated on a project-by-project basis. This work may be phased in alignment

with City priorities and funding.

Examples of tasks that could be included in the Task Order scopes of work include:

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding
    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement
    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement
    a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
    b. Ensure project plan and administration adhere to all requirements of funding sources.
    c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
    d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
    e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
    f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may perform technical reviews and services to include but not be limited to:
        i. Review of Plans and Plats
        ii. Design Analysis Reports (DARs)
        iii. Drainage Reports

iv. Design Plans at all phases
v. Conformance to standards and specifications
vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents
vii. A/E Contract Exhibit Review
viii. Safety Studies
ix. Corridor studies
x. Traffic Impact Analysis
xi. Lighting and Signalization Reports
xii. Engineering Estimates Opinions of Probable Cost
xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.
i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction
    a. Perform construction management services,
    b. Provide digital photo and/or video logs of construction progress at each stage;
    c. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
    d. Construction quality control monitoring, testing and inspection;
    e. Assist in resolution of unforeseen conditions
    f. Continue to maintain critical path schedule
6. Asset Management
    a. Assist with claim analysis and development of corrective action plans;
    b. Provide expert witness services,
    c. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

2. Standard of Performance; Licenses

A. The Contractor does hereby accept its designation as a professional service, rendering services related to Project Management Services for the City, as set forth in this Agreement. The Contractor represents that Contractor possesses the personnel, experience, and knowledge necessary to perform the services described under this Contract.

B. The Contractor agrees to obtain and maintain throughout the term of this Contract, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives, and subcontractors.

3. Compensation

A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed four million dollars ($4,000,000.00), excluding gross receipts tax for the term of this agreement. The New Mexico gross receipts tax levied on the amounts payable under this Agreement totaling three hundred twenty-seven thousand five hundred dollars ($327,500.00) shall be paid by the City to the Contractor. **The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed four million, three hundred twenty-seven thousand five hundred dollars ($4,327,500.00).**

B. Payment. The total compensation under this Agreement shall not exceed $4,327,500 including New Mexico gross receipts tax. **This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Agreement shall equal the amount stated herein. The Parties do not intend for the Contractor to continue to provide Services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the Services provided under this Agreement reach the total compensation amount. In no event will the Contractor be paid for Services provided in excess of the total compensation amount without this Agreement being amended in writing prior to services, in excess of the total compensation amount being provided.**

C. Payment shall be made upon Acceptance of each Deliverable and upon the receipt and Acceptance of a detailed, certified Payment Invoice. Payment will be made to the Contractor's designated mailing address. In accordance with Section 13-1-158 NMSA 1978, payment shall be tendered to the Contractor within thirty (30) days of the date of written certification of Acceptance. All Payment Invoices MUST BE received by the City no later than fifteen (15) days after the termination of this Agreement. Payment Invoices received after such date WILL NOT BE PAID.

D. **Notice of Extended Payment Provision For Grant Funded Contracts**. This contract allows the owner to make payment within 45 days after submission of an undisputed request for payment.

4. Term

THIS CONTRACT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE CITY. This Contract shall terminate **four (4) years from date of final signature** unless terminated pursuant to paragraph 5 (Termination) and paragraph 6 (Appropriations).

5. Termination

A. Grounds. The City may terminate this Agreement for convenience or cause. For contracts within their authority, the City Manager or their designee is authorized to provide the notice of termination, otherwise such notice of termination shall be provided by the Mayor or their designee as authorized by the Governing Body. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) The City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 6, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

6. Appropriations

The terms of this Contract are contingent upon sufficient appropriations and authorization being made by the Governing Body for the performance of this Contract. If sufficient appropriations and authorization are not made by the Governing Body, this Contract shall terminate immediately upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Contract to unilaterally reduce funding, the Contractor shall have the option to terminate the Contract or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

7. Status of Contractor

The Contractor and its agents and employees are independent contractors performing professional services for the City and are not employees of the City. The Contractor and its agents and employees shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Contract. The Contractor acknowledges that all sums received hereunder are reportable by the Contractor for tax purposes, including without limitation, self-employment and business income tax. The

Contractor agrees not to purport to bind the City unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

8. Assignment

The Contractor shall not assign or transfer any interest in this Contract or assign any claims for money due or to become due under this Contract without the prior written approval of the City.

9. Subcontracting

The Contractor shall not subcontract any portion of the services to be performed under this Contract without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Contract, nor shall any subcontract obligate direct payment from the City.

10. Release

Final payment of the amounts due under this Contract shall operate as a release of the City, its officers and employees from all liabilities, claims and obligations whatsoever arising from or under this Contract.

11. Confidentiality

Any confidential information provided to or developed by the Contractor in the performance of this Contract shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the City.

12. Product of Service -- Copyright

All materials developed or acquired by the Contractor under this Contract shall become the property of the City and shall be delivered to the City no later than the termination date of this Contract. Nothing developed or produced, in whole or in part, by the Contractor under this Contract shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor.

13. Conflict of Interest; Governmental Conduct Act

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Contract, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Contract.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Contract, will continue to comply with, and that this Contract complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Article are material representations of fact upon which the City relied when this Contract was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Article were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Article were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Contract to the contrary, the City may immediately terminate the Contract.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

14. Amendment

A. This Agreement shall not be altered, changed, or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Contract to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Contract, pursuant to the termination provisions as set forth in Article 4 herein, or to agree to the reduced funding.

15. Entire Agreement.

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

16. Merger

This Contract incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements, and understandings have been merged into this written contract.

All terms and conditions of the RFP#24060 Owner Representative Project Management Services and the Contractor's response to such document(s) are incorporated herein by reference and is included in the order of precedence.

No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Contract.

17. Penalties for violation of law

NMSA 1978, sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities, and kickbacks.

18. Equal Opportunity Compliance

The Contractor agrees to abide by all federal and state laws and rules and regulations, and Santa Fe City Code, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Contract. If Contractor is found not to be in compliance with these requirements during the life of this Contract, Contractor agrees to take appropriate steps to correct these deficiencies.

19. Applicable Law

The laws of the State of New Mexico shall govern this Contract, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, section 38-3-2. By execution of this Contract, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Contract.

20. Workers Compensation

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Contract may be terminated by the City.

21. Professional Liability Insurance

Contractor shall maintain professional liability insurance throughout the term of this Contract providing a minimum coverage in the amount required under the New Mexico Tort Claims Act. The Contractor shall furnish the City with proof of insurance of Contractor's compliance with the provisions of this section as a condition prior to performing services under this Contract.

22. Other Insurance

If the services contemplated under this Contract will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Contract, the following insurance coverage(s), naming the City as additional insured.

A. **Commercial General Liability** insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. **Business Automobile Liability** insurance for all owned, non-owned automobiles, with a combined single limit not less than $1,000,000 per accident.

C. **Broader Coverage and Limits**. The insurance requirements under this Contract shall be the greater of (1) the minimum coverage and limits specified in this Contract, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor hereunder.

D. Contractor shall maintain the above insurance for the term of this Contract and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

23. Records and Financial Audit

The Contractor shall maintain detailed time and expenditure records that indicate the date; time, nature and cost of services rendered during the Contract's term and effect and retain them for a period of three (3) years from the date of final payment under this Contract. The records shall be subject to inspection by the City. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive or illegal payments.

24. Indemnification

The Contractor shall defend, indemnify and hold harmless the City from all actions, proceeding, claims, demands, costs, damages, attorneys' fees and all other liabilities and expenses of any kind from any source which may arise out of the performance of this Contract, caused by the negligent act or failure to act of the Contractor, its officers, employees, servants, subcontractors or agents, or if caused by the actions of any client of the Contractor resulting in injury or damage to persons or property during the time when the Contractor or any officer, agent, employee, servant or subcontractor thereof has or is performing services pursuant to this Contract. If any action, suit or proceeding related to the services performed by the Contractor or any officer, agent, employee, servant or subcontractor under this Contract is brought against the Contractor, the Contractor shall, as soon as practicable but no later than two (2) days after it receives notice thereof, notify the legal counsel of the City.

25. New Mexico Tort Claims Act

Any liability incurred by the City of Santa Fe in connection with this Contract is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Contract modifies or waives any provision of the New Mexico Tort Claims Act.

26. Invalid Term or Condition

If any term or condition of this Contract shall be held invalid or unenforceable, the remainder of this Contract shall not be affected and shall be valid and enforceable.

27. Enforcement of Contract

A party's failure to require strict performance of any provision of this Contract shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Contract shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

28. Notices

Any notice required to be given to either party by this Contract shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

To the City:
Regina Wheeler, Public Works Department Director
City of Santa Fe
P.O. Box 909
Santa Fe, NM 87504-0909
rawheeler@santafenm.gov

To the Contractor:
Daniel Aguirre, Senior Vice President
Wilson & Company, Inc. Engineers & Architects
4401 Masthead Street NE, Suite 150
Albuquerque, NM 87109
daniel.aguirre@wilsonco.com

29. Authority

If Contractor is other than a natural person, the individual(s) signing this Contract on behalf of Contractor represents and warrants that he or she has the power and authority to bind Contractor, and that no further action, resolution, or approval from Contractor is necessary to enter a binding contract.

30. Non-Collusion

In signing this Agreement, the Contractor certifies the Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City's Chief Procurement Officer.

31. Default/Breach

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages, and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

32. Equitable Remedies

The Contractor acknowledges that its failure to comply with any provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

33. Default and Force Majeure

The City reserves the right to cancel all, or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Contract as of the date of the signature by the required approval authorities below.

Good morning Amanda,

Thank you very much for the opportunity, but we will decline this procurement.

Best regards,

Matt

Matt Loehman
Executive Director

Horizons of New Mexico

A. **SCOPE OF WORK**

The Owner's Representative Project Manager contractors shall provide the services described in this scope of work to assist and represent the City of Santa Fe in the planning and management of infrastructure projects in the City. The City plans to establish multiple contracts with multiple service providers to be available to support projects and improvements as needs arise and funding is available.

Project types that Owner Representative Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding

    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement

    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement

a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
b. Ensure project plan and administration adhere to all requirements of funding sources.
c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:

    i. Review of Plans and Plats

    ii. Design Analysis Reports (DARs)

    iii. Drainage Reports

    iv. Design Plans at all phases

    v. Conformance to standards and specifications

    vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents

    vii. A/E Contract Exhibit Review

    viii. Safety Studies

    ix. Corridor studies

    x. Traffic Impact Analysis

    xi. Lighting and Signalization Reports

    xii. Engineering Estimates Opinions of Probable Cost

    xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.

i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction

    a. Perform construction management services,
    b. Provide digital photo and/or video logs of construction progress at each stage;
    c. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
    d. Construction quality control monitoring, testing and inspection;
    e. Assist in resolution of unforeseen conditions
    f. Continue to maintain critical path schedule

6. Asset Management

    a. Assist with claim analysis and development of corrective action plans;
    b. Provide expert witness services,
    c. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

Engineer of Record Services: So that the Contractor can objectively represent the City in review of work of design, engineering and construction services related to the Project, Contractor shall not provide those services to the Project for which they are providing Owner Representative Project Management Services. This does not prohibit Contractor from providing engineering or other technical services via a separate agreement to other City projects occurring concurrent with the Project.

Thank you for your consideration,

Amanda Archuleta

Subject: RE: Request for Determination

Greetings,

The scope of work as written would be Professional Services. This determination relates only to that question and is no comment on whether the scope of work or procurement method meet all legal standards. I reserve the right to change this determination if the scope of work differs from the scope of work submitted for the original determination. This procurement must be conducted using the processes and procedures set forth by the City of Santa Fe, Central Purchasing, the Procurement Manual, and state statutes.

Please note:

- Save this email as a PDF and upload it into the corresponding Munis records.
- Check with WorkQuest dba Horizons of New Mexico (mloehman@horizonsofnewmexico.org) if this service appears on their approved list.
- If any of your request include anything that needs to be reviewed and preapproved by another city Department/Division, please send your SOW to the corresponding email address, and provide their response to this office when you submit your procurement request for processing.
  - IT components - ereview@santafenm.gov
  - Vehicles – dmjaramillo@santafenm.gov
  - Grants - mtbonifer@santafenm.gov; cmthompson@santafenm.gov
  - Facilities, Furniture, Fixture, Equipment - jsburnett@santafenm.gov
- Ensure that the appropriate templates and forms are used https://intranet.santafenm.gov/finance_1 and documented procedures/laws/rules are followed.
- > $20k per year, when processing this procurement, please ensure the procurement number issued by Munis and the procurement name are used in the appropriate documents and the subject of emails.
- If you are processing a procurement where the forecasted amount is =/> $60k, per NMSA 1978, Section 13-1-102, if you aren't using a cooperative or existing contract, you must process an RFP.
- < $20k per year, one quote is acceptable.
- From $20k to $60k per year, if you aren't using a cooperative or existing contract, you'll need to provide 3 quotes in your req. Must use the Munis Bid Module after 12/21/2023.
- Figure out your funding source and **inform Purchasing**. To ensure that the proper documents and language are used, it is important to identify the funding source for the subsequent contract. For instance, if federal funds are involved, the procurement request and subsequent contract must include the necessary federal language. Therefore, it is crucial to determine the funding source beforehand.
- Review the pages linked below to determine whether any of the existing price agreements/contracts or cooperative agreements are applicable to this request. You might be able to use an existing price agreement/contract to save time and money.

- https://www.generalservices.state.nm.us/state-purchasing/statewide-price-agreements/ (if you choose to use a Statewide, you do not need to ask Horizons if they can do the work. State Purchasing must offer the SOW to Horizons prior to placing the award on their website.)

Subject: Request for Determination

Good Morning,

I am requesting a Determination on the scope of work below:

SCOPE OF WORK

The Owner's Representative Project Manager contractors shall provide the services described in this scope of work to assist and represent the City of Santa Fe in the planning and management of infrastructure projects in the City. The City plans to establish multiple contracts with multiple service providers to be available to support projects and improvements as needs arise and funding is available.

Project types that Owner Representative Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding

    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement

    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement

    a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
    b. Ensure project plan and administration adhere to all requirements of funding sources.

c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:

i. Review of Plans and Plats

ii. Design Analysis Reports (DARs)

iii. Drainage Reports

iv. Design Plans at all phases

v. Conformance to standards and specifications

vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents

vii. A/E Contract Exhibit Review

viii. Safety Studies

ix. Corridor studies

x. Traffic Impact Analysis

xi. Lighting and Signalization Reports

xii. Engineering Estimates Opinions of Probable Cost

xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.
i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction

1. Perform construction management services,
2. Provide digital photo and/or video logs of construction progress at each stage;
3. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
4. Construction quality control monitoring, testing and inspection;
5. Assist in resolution of unforeseen conditions
6. Continue to maintain critical path schedule

6. Asset Management

    1. Assist with claim analysis and development of corrective action plans;
    2. Provide expert witness services,
    3. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

Engineer of Record Services: So that the Contractor can objectively represent the City in review of work of design, engineering and construction services related to the Project, Contractor shall not provide those services to the Project for which they are providing Owner Representative Project Management Services. This does not prohibit Contractor from providing engineering or other technical services via a separate agreement to other City projects occurring concurrent with the Project.

Thank you in advance,

Amanda Archuleta

CITY OF SANTA FE

Date: November 21, 2024

To: Governing Body

From: Regina Wheeler, Public Works Director RW
RW (Nov 21, 2024 13:13 MST)

Subject: On-call Project Management Services

Vendor Name: Leroy N. Pacheco

Munis Vendor Number:2102

ITEM AND ISSUE:

Request Approval of a Professional Servcies Contract with Leroy N. Pacheco for not to Exceed $4,327,500 Including NMGRT for On-Call Project Management Services For a Four Year Term.

CONTRACT NUMBER:

The FY25 3250326

BACKGROUND AND SUMMARY:

On-call professional services agreements are established to augment the capacity and skills of City staff. With an unprecedented level of funding for capital projects, it is essential to have on-call professional services at hand to ensure the compliant, timely and successful deployment of projects. Project Managers, Division Directors and Department Directors oversee service professionals to ensure that procedures comply with City commitment to community engagement and cost effective, sustainable, safe and compliant infrastructure.

RFP 24060 was advertised in July 2024. Three responsive offers were received and three agreements for on-call project management services are being established.

On-call service agreements are not a guarantee of work. The City will issue task orders to vendor as need and funding arise.

CITY OF SANTA FE

PROFESSIONAL SERVICES CONTRACT

THIS CONTRACT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the "City," and **Leroy Nicholas Pacheco** hereinafter referred to as the "Contractor," and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, section 13-1-111 and

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for professional services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

The City and the Contractor hereby agree as follows:

1. Scope of Work

The Contractor shall provide the following services for the City:

Project types that Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

The City's Facilities Division Director or Director of Public Works shall provide Contractors with Task Order scopes of work for which Contractors may provide a quotation for owner representative project management services related to any particular project. Upon receiving the City's request for services, the Contractor shall provide an estimate of hours of labor, costs and schedule to the perform the work. Each Task Order will be negotiated on a project-by-project basis. This work may be phased in alignment

with City priorities and funding.

Examples of tasks that could be included in the Task Order scopes of work include:

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding
    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement
    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement
    a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
    b. Ensure project plan and administration adhere to all requirements of funding sources.
    c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
    d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
    e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
    f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may perform technical reviews and services to include but not be limited to:
        i. Review of Plans and Plats
        ii. Design Analysis Reports (DARs)
        iii. Drainage Reports

iv. Design Plans at all phases
v. Conformance to standards and specifications
vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents
vii. A/E Contract Exhibit Review
viii. Safety Studies
ix. Corridor studies
x. Traffic Impact Analysis
xi. Lighting and Signalization Reports
xii. Engineering Estimates Opinions of Probable Cost
xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.
i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction
    a. Perform construction management services,
    b. Provide digital photo and/or video logs of construction progress at each stage;
    c. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
    d. Construction quality control monitoring, testing and inspection;
    e. Assist in resolution of unforeseen conditions
    f. Continue to maintain critical path schedule
6. Asset Management
    a. Assist with claim analysis and development of corrective action plans;
    b. Provide expert witness services,
    c. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

2. **Standard of Performance; Licenses**

A. The Contractor does hereby accept its designation as a professional service, rendering services related to Project Management Services for the City, as set forth in this Agreement. The Contractor represents that Contractor possesses the personnel, experience, and knowledge necessary to perform the services described under this Contract.

B. The Contractor agrees to obtain and maintain throughout the term of this Contract, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives, and subcontractors.

3. **Compensation**

A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed four million dollars ($4,000,000.00), excluding gross receipts tax for the term of this agreement. The New Mexico gross receipts tax levied on the amounts payable under this Agreement totaling three hundred twenty-seven thousand five hundred dollars ($327,500.00) shall be paid by the City to the Contractor. **The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed four million, three hundred twenty-seven thousand five hundred dollars ($4,327,500.00).**

B. Payment. The total compensation under this Agreement shall not exceed $4,327,500 including New Mexico gross receipts tax. **This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Agreement shall equal the amount stated herein. The Parties do not intend for the Contractor to continue to provide Services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the Services provided under this Agreement reach the total compensation amount. In no event will the Contractor be paid for Services provided in excess of the total compensation amount without this Agreement being amended in writing prior to services, in excess of the total compensation amount being provided.**

C. Payment shall be made upon Acceptance of each Deliverable and upon the receipt and Acceptance of a detailed, certified Payment Invoice. Payment will be made to the Contractor's designated mailing address. In accordance with Section 13-1-158 NMSA 1978, payment shall be tendered to the Contractor within thirty (30) days of the date of written certification of Acceptance. All Payment Invoices MUST BE received by the City no later than fifteen (15) days after the termination of this Agreement. Payment Invoices received after such date WILL NOT BE PAID.

D. **Notice of Extended Payment Provision For Grant Funded Contracts**. This contract allows the owner to make payment within 45 days after submission of an undisputed request for payment

4. Term

THIS CONTRACT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE CITY. This Contract shall terminate **four (4) years from date of final signature** unless terminated pursuant to paragraph 5 (Termination) and paragraph 6 (Appropriations).

5. Termination

A. Grounds. The City may terminate this Agreement for convenience or cause. For contracts within their authority, the City Manager or their designee is authorized to provide the notice of termination, otherwise such notice of termination shall be provided by the Mayor or their designee as authorized by the Governing Body. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) The City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 6, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

6. Appropriations

The terms of this Contract are contingent upon sufficient appropriations and authorization being made by the Governing Body for the performance of this Contract. If sufficient appropriations and authorization are not made by the Governing Body, this Contract shall terminate immediately upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Contract to unilaterally reduce funding, the Contractor shall have the option to terminate the Contract or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

7. Status of Contractor

The Contractor and its agents and employees are independent contractors performing professional services for the City and are not employees of the City. The Contractor and its agents and employees shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Contract. The Contractor acknowledges that all sums received hereunder are reportable by the Contractor for tax purposes, including without limitation, self-employment and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

8. Assignment

The Contractor shall not assign or transfer any interest in this Contract or assign any claims for money due or to become due under this Contract without the prior written approval of the City.

9. Subcontracting

The Contractor shall not subcontract any portion of the services to be performed under this Contract without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Contract, nor shall any subcontract obligate direct payment from the City.

10. Release

Final payment of the amounts due under this Contract shall operate as a release of the City, its officers and employees from all liabilities, claims and obligations whatsoever arising from or under this Contract.

11. Confidentiality

Any confidential information provided to or developed by the Contractor in the performance of this Contract shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the City.

12. Product of Service -- Copyright

All materials developed or acquired by the Contractor under this Contract shall become the property of the City and shall be delivered to the City no later than the termination date of this Contract. Nothing developed or produced, in whole or in part, by the Contractor under this Contract shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor.

13. Conflict of Interest; Governmental Conduct Act

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Contract, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Contract.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Contract, will continue to comply with, and that this Contract complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Article are material representations of fact upon which the City relied when this Contract was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Article were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in

Paragraphs A and B of this Article were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Contract to the contrary, the City may immediately terminate the Contract.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

14. Amendment

A. This Agreement shall not be altered, changed, or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Contract to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Contract, pursuant to the termination provisions as set forth in Article 4 herein, or to agree to the reduced funding.

15. Entire Agreement.

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

16. Merger

This Contract incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements, and understandings have been merged into this written contract.

All terms and conditions of the RFP #24060 **Owner Representative Project Management Services** and the Contractor's response to such document(s) are incorporated herein by reference and is included in the order of precedence.

No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Contract.

17. Penalties for violation of law

NMSA 1978, sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities, and kickbacks.

18. Equal Opportunity Compliance

The Contractor agrees to abide by all federal and state laws and rules and regulations, and Santa Fe City Code, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Contract. If

Contractor is found not to be in compliance with these requirements during the life of this Contract, Contractor agrees to take appropriate steps to correct these deficiencies.

19. Applicable Law

The laws of the State of New Mexico shall govern this Contract, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, section 38-3-2. By execution of this Contract, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Contract.

20. Workers Compensation

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Contract may be terminated by the City.

21. Professional Liability Insurance

Contractor shall maintain professional liability insurance throughout the term of this Contract providing a minimum coverage in the amount required under the New Mexico Tort Claims Act. The Contractor shall furnish the City with proof of insurance of Contractor's compliance with the provisions of this section as a condition prior to performing services under this Contract.

22. Other Insurance

If the services contemplated under this Contract will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Contract, the following insurance coverage(s), naming the City as additional insured.

A. **Commercial General Liability** insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. **Business Automobile Liability** insurance for all owned, non-owned automobiles, with a combined single limit not less than $1,000,000 per accident.

C. **Broader Coverage and Limits**. The insurance requirements under this Contract shall be the greater of (1) the minimum coverage and limits specified in this Contract, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor hereunder.

D. Contractor shall maintain the above insurance for the term of this Contract and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form

furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

23. Records and Financial Audit

The Contractor shall maintain detailed time and expenditure records that indicate the date; time, nature and cost of services rendered during the Contract's term and effect and retain them for a period of three (3) years from the date of final payment under this Contract. The records shall be subject to inspection by the City. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive or illegal payments.

24. Indemnification

The Contractor shall defend, indemnify and hold harmless the City from all actions, proceeding, claims, demands, costs, damages, attorneys' fees and all other liabilities and expenses of any kind from any source which may arise out of the performance of this Contract, caused by the negligent act or failure to act of the Contractor, its officers, employees, servants, subcontractors or agents, or if caused by the actions of any client of the Contractor resulting in injury or damage to persons or property during the time when the Contractor or any officer, agent, employee, servant or subcontractor thereof has or is performing services pursuant to this Contract. If any action, suit or proceeding related to the services performed by the Contractor or any officer, agent, employee, servant or subcontractor under this Contract is brought against the Contractor, the Contractor shall, as soon as practicable but no later than two (2) days after it receives notice thereof, notify the legal counsel of the City.

25. New Mexico Tort Claims Act

Any liability incurred by the City of Santa Fe in connection with this Contract is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Contract modifies or waives any provision of the New Mexico Tort Claims Act.

26. Invalid Term or Condition

If any term or condition of this Contract shall be held invalid or unenforceable, the remainder of this Contract shall not be affected and shall be valid and enforceable.

27. Enforcement of Contract

A party's failure to require strict performance of any provision of this Contract shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Contract shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

28. Notices

Any notice required to be given to either party by this Contract shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

To the City:
Regina Wheeler, Public Works Department Director
City of Santa Fe
P.O. Box 909
Santa Fe, NM 87504-0909
rawheeler@santafenm.gov

To the Contractor:
Leroy N. Pacheco
305 Lomita Street
Santa Fe, NM 87505
engineer@leroypacheco.com

29. Authority

If Contractor is other than a natural person, the individual(s) signing this Contract on behalf of Contractor represents and warrants that he or she has the power and authority to bind Contractor, and that no further action, resolution, or approval from Contractor is necessary to enter a binding contract.

30. Non-Collusion

In signing this Agreement, the Contractor certifies the Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City's Chief Procurement Officer.

31. Default/Breach

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages, and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

32. Equitable Remedies

The Contractor acknowledges that its failure to comply with any provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

33. Default and Force Majeure

The City reserves the right to cancel all, or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the

above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Contract as of the date of the signature by the required approval authorities below.

A. **SCOPE OF WORK**

The Owner's Representative Project Manager contractors shall provide the services described in this scope of work to assist and represent the City of Santa Fe in the planning and management of infrastructure projects in the City. The City plans to establish multiple contracts with multiple service providers to be available to support projects and improvements as needs arise and funding is available.

Project types that Owner Representative Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding

    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement

    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement

a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
b. Ensure project plan and administration adhere to all requirements of funding sources.
c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:

    i. Review of Plans and Plats

    ii. Design Analysis Reports (DARs)

    iii. Drainage Reports

    iv. Design Plans at all phases

    v. Conformance to standards and specifications

    vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents

    vii. A/E Contract Exhibit Review

    viii. Safety Studies

    ix. Corridor studies

    x. Traffic Impact Analysis

    xi. Lighting and Signalization Reports

    xii. Engineering Estimates Opinions of Probable Cost

    xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.

i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction

    a. Perform construction management services,
    b. Provide digital photo and/or video logs of construction progress at each stage;
    c. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
    d. Construction quality control monitoring, testing and inspection;
    e. Assist in resolution of unforeseen conditions
    f. Continue to maintain critical path schedule

6. Asset Management

    a. Assist with claim analysis and development of corrective action plans;
    b. Provide expert witness services,
    c. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

Engineer of Record Services: So that the Contractor can objectively represent the City in review of work of design, engineering and construction services related to the Project, Contractor shall not provide those services to the Project for which they are providing Owner Representative Project Management Services. This does not prohibit Contractor from providing engineering or other technical services via a separate agreement to other City projects occurring concurrent with the Project.

Thank you for your consideration,

Subject: RE: Request for Determination

Greetings,

The scope of work as written would be Professional Services. This determination relates only to that question and is no comment on whether the scope of work or procurement method meet all legal standards. I reserve the right to change this determination if the scope of work differs from the scope of work submitted for the original determination. This procurement must be conducted using the processes and procedures set forth by the City of Santa Fe, Central Purchasing, the Procurement Manual, and state statutes.

Please note:

- Save this email as a PDF and upload it into the corresponding Munis records.
- Check with WorkQuest dba Horizons of New Mexico (mloehman@horizonsofnewmexico.org) if this service appears on their approved list.
- If any of your request include anything that needs to be reviewed and preapproved by another city Department/Division, please send your SOW to the corresponding email address, and provide their response to this office when you submit your procurement request for processing.
  - IT components - ereview@santafenm.gov
  - Vehicles – dmjaramillo@santafenm.gov
  - Grants - mtbonifer@santafenm.gov; cmthompson@santafenm.gov
  - Facilities, Furniture, Fixture, Equipment - jsburnett@santafenm.gov
- Ensure that the appropriate templates and forms are used https://intranet.santafenm.gov/finance_1 and documented procedures/laws/rules are followed.
- > $20k per year, when processing this procurement, please ensure the procurement number issued by Munis and the procurement name are used in the appropriate documents and the subject of emails.
- If you are processing a procurement where the forecasted amount is =/> $60k, per NMSA 1978, Section 13-1-102, if you aren't using a cooperative or existing contract, you must process an RFP.
- < $20k per year, one quote is acceptable.
- From $20k to $60k per year, if you aren't using a cooperative or existing contract, you'll need to provide 3 quotes in your req. Must use the Munis Bid Module after 12/21/2023.
- Figure out your funding source and **inform Purchasing**. To ensure that the proper documents and language are used, it is important to identify the funding source for the subsequent contract. For instance, if federal funds are involved, the procurement request and subsequent contract must include the necessary federal language. Therefore, it is crucial to determine the funding source beforehand.
- Review the pages linked below to determine whether any of the existing price agreements/contracts or cooperative agreements are applicable to this request. You might be able to use an existing price agreement/contract to save time and money.

- https://www.generalservices.state.nm.us/state-purchasing/statewide-price-agreements/ (if you choose to use a Statewide, you do not need to ask Horizons if they can do the work. State Purchasing must offer the SOW to Horizons prior to placing the award on their website.)

Subject: Request for Determination

Good Morning,

I am requesting a Determination on the scope of work below:

SCOPE OF WORK

The Owner's Representative Project Manager contractors shall provide the services described in this scope of work to assist and represent the City of Santa Fe in the planning and management of infrastructure projects in the City. The City plans to establish multiple contracts with multiple service providers to be available to support projects and improvements as needs arise and funding is available.

Project types that Owner Representative Project Manager Contractors may be asked to support include but are not limited to planning, design, construction and remodeling of parks, buildings, roadways, parking facilities and systems, stormwater infrastructure, trails, urban redevelopment, ADA improvements, spine infrastructure, dry utilities, renovation, remodel and repairs of historic and culturally significant facilities and infrastructure in historic districts, recreation facility maintenance, repairs, design and construction; renewable energy projects; electric vehicle infrastructure; ADA Compliance; bridge repairs and replacement, resiliency and hazard mitigation; vehicle maintenance facilities; water and waste water facilities and distribution systems, demolition, remediation, asset management tools and data, multimodal planning including roadways, transit, pedestrian and bicycle facilities, transit facilities and infrastructure, infrastructure specification development and other City infrastructure related needs.

1. Planning, scoping and developing budgetary estimates.
    a. Assist with the preparation and review of scopes of work
    b. Assist with development of programming requirements including soliciting input from public and stakeholder agencies,
    c. Assist in development of early budgetary estimates, cash flow projections and total cost of ownership
    d. Identification of risks and mitigation actions
    e. Urban redevelopment predevelopment activities including developing critical path schedule for and advising on land use entitlements, environmental, public engagement, procurement, development agreements and other urban redevelopment activities.
2. Securing and administering funding

    a. Assist in identification potential funding sources.
    b. Assist with development of funding applications.
    c. Assist in ensuring project activities adhere to funding requirements.
    d. Assist in development of reimbursement packages.
3. Engaging project professionals and procurement

    a. Assist in review and selection of other contractors needed for the project including development and review of scopes of work, contract terms, RFPs, invitations to bid (ITBs) and other work required to engage required professionals to complete a project.
4. Project deployment, tracking and public engagement

    a. Assist in contract administration for other contractors engaged in the project including managing scope and cost change processes and coordinating and validating payment requests from contractors providing services to projects;
    b. Ensure project plan and administration adhere to all requirements of funding sources.

c. Submit monthly invoice with monthly project reports including accomplishments, planned activities, earned value and percent complete,
d. Maintain Project cash flow projections, risks, mitigation strategies and challenges.
e. Preparation and management of project plans and schedules, including developing and maintaining critical path schedules,
f. Review and respond to technical, contractual and design documents generated for the project. While the Engineer of Record for the Project is responsible for design and engineering meeting standards and specifications, Owner Representative Project Manager Contractor may preform technical reviews and services to include but not be limited to:

i. Review of Plans and Plats

ii. Design Analysis Reports (DARs)

iii. Drainage Reports

iv. Design Plans at all phases

v. Conformance to standards and specifications

vi. Construction Contract Book, including but not limited to special provisions, Notices to Contractors, and/or other supplemental contract documents

vii. A/E Contract Exhibit Review

viii. Safety Studies

ix. Corridor studies

x. Traffic Impact Analysis

xi. Lighting and Signalization Reports

xii. Engineering Estimates Opinions of Probable Cost

xiii. Value Engineering

g. Document management and control including all design, construction, contract administration documents, correspondence, and as-builts;
h. Assisting with the planning, noticing, conduction and reporting of public and stakeholder information and engagement meetings including developing presentations, facilitating the meeting and publishing detailed accounting of input and responses.
i. Lead and document project meetings;
j. Ensure all documents generated for and by the project team are professional, correct, complete and accessible.
k. Assist in developing and or reviewing cost estimates;
l. Perform or scope and oversee completion of commissioning services;
m. Perform project closeout;
n. Ensure that project actions comply with any and all requirements of funding
o. Support presentations to Governing Body, agency stakeholders and committees.
p. Represent the City on behalf of the Project.

5. Construction

1. Perform construction management services,
2. Provide digital photo and/or video logs of construction progress at each stage;
3. Document and coordinate any Construction Team request for information (RFI), and the response from the Design Team, and City;
4. Construction quality control monitoring, testing and inspection;
5. Assist in resolution of unforeseen conditions
6. Continue to maintain critical path schedule

6. Asset Management

    1. Assist with claim analysis and development of corrective action plans;
    2. Provide expert witness services,
    3. Planning, development, implementation, data gathering, updating and reporting asset management information and tools

Engineer of Record Services: So that the Contractor can objectively represent the City in review of work of design, engineering and construction services related to the Project, Contractor shall not provide those services to the Project for which they are providing Owner Representative Project Management Services. This does not prohibit Contractor from providing engineering or other technical services via a separate agreement to other City projects occurring concurrent with the Project.

Subject: Grant Agreement for Balanced Resources Acquisition and Information Network (BRAIN) Grid Modernization Project

---

ACTION:
Request for Approval of a Governmental Services Agreement with the State of New Mexico, Energy, Minerals and Natural Resources Department in the Total Amount of $550,000 to Establish the Balanced Resources Acquisition and Information Network (BRAIN) a Consolidated Energy Information Tool. (Caryn Grosse, Public Works Project Manager, clgrosse@santafenm.gov)

Request for Approval of a Budget Amendment Resolution (BAR) to Allocate Grant Proceeds of $550,000 to FY25 Revenue and Expenses for the BRAIN Project.

BACKGROUND AND SUMMARY:
Facilities Division applied for and received a $550,000 EMNRD Grid Modernization Grant to implement a Balanced Resource Acquisition and Information Network (BRAIN) for the City of Santa Fe. The BRAIN assesses and consolidates energy usage data from facilities and renewable energy generation into an intuitive, single-station control center. The tool will show real-time production and usage, provide alerts when operation parameters are not being met, incorporate billing data, produce energy reports and collect production and consumption data.

The system will help measure performance and efficiency and support optimization of building controls, energy generation resources and future storage resources.

A separate contract with Paradise Power Company, Inc., to implement the BRAIN, follows this grant agreement.

Implementation of the BRAIN is expected to be completed by June 30, 2025.

STATE OF NEW MEXICO,
GOVERNMENTAL SERVICES AGREEMENT
BETWEEN THE
STATE OF NEW MEXICO,
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
AND
CITY OF SANTA FE

THIS GOVERNMENTAL SERVICES AGREEMENT (Agreement) is made and entered into by and between the State of New Mexico, Energy, Minerals and Natural Resources Department (EMNRD), Energy Conservation and Management Division (ECAM) and the City Of Santa Fe (Entity).

THE PARTIES MUTUALLY AGREE:

1. Scope of Work: Entity shall:

Establish the Balanced Resources Acquisition and Information Network (BRAIN) data center and management platform. Interconnect the BRAIN to the Entity's energy-generation assets and energy-consuming facilities. Ensure the BRAIN's functionality by building out a software interface that shows the Entity's real-time energy-generation and use, provides alerts when predetermined operational parameters are not being met, produces automated energy billing reports, and collects historic energy production and consumption data.

Regularly educate and inform EMNRD's Energy Conservation and Management Division (ECAM) about the steps required to build the BRAIN and evaluate the BRAIN's effectiveness and replicability as outlined in Section 2.(A) – Deliverables.

2. Compensation:

A. EMNRD shall pay Entity for services satisfactorily performed pursuant to the Scope of Work and Deliverables as specified below. This amount shall not exceed five hundred fifty thousand dollars ($550,000.00), including New Mexico governmental gross receipts taxes, pursuant to Paragraph B of this Compensation Section. EMNRD shall make payment upon the satisfactory and timely completion of the work described in the Scope of Work and for no more than the maximum amount set forth below for each deliverable:

Deliverables	Completion Date	Invoice Amount
Submit to ECAM a written report summarizing the project background, scope, and schedule, and executed agreement(s) with providers(s). Establish and submit to ECAM performance goals and associated targets and/or milestones that adequately demonstrate the progress of the project.	January 3, 2025	$130,000.00
Submit to ECAM a written report summarizing results of assessment of PNM relationship. Include information and learnings from billing data correlation and API portal data assessment.	March 10, 2025	$80,000.00

Submit to ECAM a written report detailing progress related to billing data configuration, initial BRAIN structure, and billing account integration. Provide a brief evaluation of performance goals.	March 31, 2025	$120,000.00
Submit to ECAM a written report of the API/real-time electric usage integration progress including a summary of the anticipated economic impacts.	May 11, 2025	$160,000.00
Submit to ECAM a written report validating real-time data reporting and alerts. Include a brief description of the operational procedures that will be carried out as a result of different alert types.	June 10, 2025	$40,000.00
Presentation to ECAM program manager and staff of the BRAIN dashboard as well as a written report summarizing implementation results as they relate to the performance goals.	June 15, 2025	$20,000.00

This amount is a maximum and not a guarantee that the work assigned to be performed by Entity under this Agreement shall equal the amount stated herein or the amounts stated per task. The parties do not intend for the Entity to continue to provide services without compensation when the total compensation amount is reached. Entity is responsible for notifying EMNRD when the services provided under this Agreement reach the total compensation amount. In no event shall the Entity be paid for services provided exceeding the total compensation amount without this Agreement being amended in writing prior to those services exceeding the total compensation amount being provided. EMNRD MUST receive all invoices no later than fifteen (15) days after the termination of the Fiscal Year in which the services were delivered. Invoices received after such date SHALL NOT BE PAID.

B. Entity shall be responsible for paying New Mexico Governmental Gross Receipts taxes levied on amounts payable under this Agreement, if applicable.

C. Entity must submit detailed invoices accounting for all services performed. Invoices evidencing the propriety of each claim for payment must be supported by approved purchase order. If EMNRD finds that the invoice services, are not acceptable, within 30 days of receipt of written notice from Entity that payment is requested for services received, EMNRD shall provide Entity a letter of exception explaining the defect or objection to the invoice or services, and outlining steps Entity may take to provide remedial action. Upon certification by EMNRD that the invoice or services have been received and accepted, EMNRD shall tender payment to Entity within 30 days after the date of acceptance. If payment is made by mail, the payment shall be deemed tendered on the date it is postmarked. However, EMNRD shall not incur late charges, interest, or penalties for failure to make payment within the time specified herein.

3. Term: This Agreement becomes effective when executed by an authorized representative of Entity and of EMNRD and when funds have been encumbered for this Agreement. It shall terminate on June 30, 2025, unless earlier terminated pursuant to Section 4, Termination, or Section 5, Appropriations, below.

4. Termination: Either party may terminate this Agreement upon written notice delivered to the other at least 10 days prior to the intended termination date. By such

termination, neither party may nullify or avoid any obligation required to have been performed prior to termination.

5. Appropriations: This Agreement's terms are contingent upon the New Mexico State Legislature and the United States Department of Energy (DOE) granting sufficient appropriation and authorization. If sufficient appropriation or authorization is not granted, EMNRD may terminate this Agreement, or in the alternative suspend performance pending approval of sufficient appropriation or authorization, upon written notice from EMNRD to Entity. EMNRD's decision as to whether sufficient appropriations are available shall be at its sole and absolute discretion and shall be final, binding, and accepted by Entity.

6. Status of Entity: Entity and its agents and employees are independent contractors performing professional services for EMNRD and are not employees of the State of New Mexico. Entity and its agents and employees shall not accrue leave, retirement, insurance, bonding, use of state vehicles, or any other benefits afforded to employees of the State of New Mexico as a result of this Agreement. Entity agrees not to purport to bind the State of New Mexico unless the Entity has express written authority to do so, and then only within the strict limits of that written authority.

7. Assignment: Entity shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without EMNRD's prior written approval.

8. Subcontracting: Entity shall not subcontract any portion of the services to be performed under this Agreement or obligate itself in any manner to any third party, with respect to any rights or responsibilities under this Agreement, without EMNRD's prior written approval. EMNRD may disallow costs incurred by the Entity in relation to a subcontract if Entity does not obtain prior written approval.

A. Entity shall comply with 2 C.F.R. 200.318 through 200.326 for procurement of property or services conducted pursuant to this Agreement.

B. Any contract shall include all provisions necessary to allow Entity to meet its obligations and requirements under this Agreement and all provisions required by law.

9. Release: Final payment of the amounts due under this Agreement shall operate as a release of EMNRD, its officers, and employees, and the State of New Mexico from all liabilities, claims, and obligations whatsoever arising from or under this Agreement.

10. Confidentiality: Any confidential information provided to or developed by Entity in the performance of this Agreement shall be kept confidential and shall not be made available by Entity to any individual or organization without EMNRD's prior written approval.

11. Product of Services; Copyright: All materials developed or acquired by Entity under this Agreement shall become the State of New Mexico's property and be delivered to EMNRD no later than this Agreement's expiration date. Nothing Entity produces, in whole or in part, under this Agreement shall be the subject of a copyright application or other claim of ownership by or on behalf of Entity.

12. Conflict of Interest; Governmental Conduct Act: Entity warrants that it presently

has no interest and that it shall not acquire any interest, direct or indirect, which would conflict in any manner with performance or other services required under this Agreement. Entity certifies that all applicable provisions of the requirements of the Governmental Conduct Act, NMSA 1978, Sections 10-16-1 through –18, including provisions related to contracting with, or employing, public officers, legislators, state employees, or former state employees, have been followed.

13. Amendment: This Agreement shall not be altered, changed, or amended except by written instrument executed and approved by the parties hereto.

14. Merger: This Agreement incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements, and understandings have been merged into this written Agreement. No prior agreement or understanding, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless as embodied in this Agreement.

15. Penalties for Violation of Law: The Procurement Code, NMSA 1978, Sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for bribes, gratuities, and kickbacks.

16. Equal Opportunity Compliance: Entity agrees to abide by all federal and state laws and rules and regulations, and executive orders of the Governor of the State of New Mexico, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Entity assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation, or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Agreement. If Entity is found not to be in compliance with these requirements during the life of this Agreement, Entity agrees to take appropriate steps to correct these deficiencies.

17. Applicable Law: The laws of the State of New Mexico shall govern this Agreement, without giving effect to New Mexico's choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, Section 38-3-1(G). By execution of this Agreement, Entity acknowledges and agrees to the exclusive jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Agreement.

18. Records and Audit:

A. Entity shall maintain detailed time and expenditure records that indicate the date, time, nature, and cost of services rendered during the Agreement's term and effect and retain them until six years after the termination date specified in Section 3, Term. These records shall be maintained and available within the State of New Mexico. During this time, such records shall be subject to inspection by EMNRD, DFA, and the State Auditor and DOE. Entity further agrees to include in all subcontracts hereunder the same right of inspection and audit against all subcontractors. EMNRD shall have the right to audit billings both before and after payment. Payment under this Agreement shall not foreclose EMNRD's right to recover excessive or illegal payments. The periods of inspection and audit may be extended for records, which relate to litigation or settlement of claims arising out of performance of this Agreement and costs and

expenses related to this Agreement for which exception is under consideration by DOE and shall continue until all potential litigation, appeals, claims, or exceptions have expired or been resolved.

B. If Entity receives $750,000 or more in federal funding from all sources in the aggregate in a fiscal year, Entity's financial records involving services and procurement under this Agreement shall be audited annually pursuant to all federal, state, and local government audit requirements, and in accordance with the Single Audit Act Amendments of 1996, 2 C.F.R. 200, Subpart F – Audit Requirements. Entities who do not meet the $750,000 audit threshold (Tier 7), must complete the State of New Mexico – Office of the State Auditor Certification Form for Tier 1 and Tier 2, or the Office of the State Auditor Agreed Upon Procedures (Tiers 3-6) in accordance with the Audit Act, NMSA 1978, Sections 12-6-1 through 12-6-14, and 2.2.2.16 NMAC, Annual Financial Procedures Required for Local Public Bodies with Annual Revenues Less than Five Hundred Thousand Dollars. To comply with state audit requirements, Entities shall have one of the above-mentioned Forms or Agreed Upon Procedures on file with the Office of the State Auditor. Entity shall provide EMNRD with a copy of the independent financial audit, either in hard copy format or electronically, no more than 45 days after the audit's completion for each fiscal year this Agreement is in effect.

19. Liability: Neither party shall be responsible for liability incurred as a result of the other party's acts or omissions in connection with this Agreement. Any liability incurred with this Agreement is subject to the immunities and limitations of the Tort Claims Act, NMSA 1978, Sections41-4-1 *et seq.*, as amended.

20. Procurement, Utilization, and Disposition of Property: Entity shall report acquisition of any capital property (property with an expected life of at least one year) to EMNRD within one month following the acquisition. If upon termination of this Agreement Entity has any property in its possession belonging to EMNRD, Entity shall account for the property and dispose of it as EMNRD directs. All property acquired by the Entity or procured under this Agreement shall be used and disposed of in accordance with DOE regulations governing disposal of property.

21. Invalid Term or Condition: If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

22. Enforcement of Agreement: A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict performance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no waiver of a specified right by a party shall be effective to waive any other rights.

23. Notice: Except as otherwise specified herein, all notices hereunder shall be in writing) and shall be given to the relevant party at its address set forth below, or such other address as such party may hereafter specify by notice to the other given by courier, by United States certified or registered mail, or by telecommunication device capable of creating a written record of such notice and its receipt.

To Risk Management Division:

Risk Management Division
General Services Department
P.O. Drawer 26100
Santa Fe, NM 87502-0110

24. Authority: If Entity is other than a natural person, the individual(s) signing this Agreement on behalf of Entity represent and warrant that the individual has the power and authority to bind Entity, and that no further action, resolution, or approval from Entity or any other entity is necessary to enter a binding contract.

25. Acknowledgment: Entity shall acknowledge EMNRD and DOE as a co-sponsor and funding source in all news releases, programs, proceedings, and related publicity/publications for the project.

26. Minimum Wage Rate: If applicable, Entity shall comply with minimum wage rates as established by the New Mexico Department of Workforce Solutions, Labor Relations Division, and with all other applicable requirements of that Department, including posting of the wage rates in a prominent location on the site for hiring and performing of this Agreement.

27. Compliance with Law and Funding Source Conditions:

A. Entity shall comply with all applicable state and federal statutes, regulations, or rules, including without limitation those imposed as a consequence of funding pursuant to this Agreement.

B. Compliance with use of Minority Business Enterprises (MBEs) and Women's Business Enterprises (WBEs) - Entity shall take affirmative steps to assure that MBEs and WBEs are used when possible as sources of supplies and services. The affirmative steps shall include the following:

1) including qualified MBEs/WBEs on solicitation lists;

2) assuring that MBEs/WBEs are solicited once they are identified;

3) when economically feasible, dividing total requirements into smaller tasks or quantities so as to permit maximum MBE/WBE participation;

4) where feasible, establishing delivery schedules which will encourage MBE/WBE participation;

5) encouraging use of the services of the U.S. Department of Commerce's Minority Business Development Agency and the U.S. Small Business Administration to identify MBEs/WBEs, as required; and

6) if any subcontracts are to be let, requiring the subcontractor to take the affirmative steps listed above.

C. Compliance with Trafficking Victims Protection Act of 2000 - Entity, Entity's employees, subcontractors, and subcontractors' employees shall not:

1) engage in severe forms of trafficking in persons during this Agreement's term;

2) procure a commercial sex act during this Agreement's term; or

3) use forced labor in the performance of this Agreement.

D. Compliance with NMSA 1978, Section 66-7-374, Texting While Driving - Entity and Entity's employees shall not read or view a text message or manually type on a handheld mobile communication device for any purpose while driving a motor vehicle in connection with this Agreement, except to summon medical or other emergency help, or unless that device is an amateur radio and the driver holds a valid amateur radio operator license issued by the Federal Communications Commission.

E. In the event this Agreement is funded with federal monies, Entity shall comply with 2 C.F.R. 200.318 through 200.326 for procurement of property or services conducted pursuant to this Agreement.

F. In the event this Agreement is funded with federal monies and Entity wishes to enter into an agreement with a small business firm or non-profit organization regarding the substitution of parties, assignment, or performance of experimental, developmental, or research work under this Agreement, Entity shall comply with the requirements of 37 C.F.R. Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements" and any implementing regulations issued by the DOE.

G. Entity shall not award subcontracts to parties listed on the government-wide exclusions in the federal System for Award Management (SAM), in accordance with OMB guidelines that implement federal Executive Orders 12549 (3 C.F.R. part 1986, Comp., p. 189) and 12689 (3 C.F.R. part 1989 Comp., p. 235), "Debarment and Suspension." SAM exclusions contain the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regularity authority other than Executive Order 12549.

H. If the value of this Agreement exceeds $100,000, Entity shall comply with the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352) regarding the limitations of use of appropriated funds to influence certain federal contracting and financial transactions.

I. If this Agreement is valued at more than $150,000, Entity shall comply with all applicable standards orders or requirements issued under the federal Clean Air Act (42 U.S.C. § 7401 *et seq.*); Clean Water Act (33 U.S.C. § 1251 *et seq.*); Executive Order 11738 (Providing for Administration of the Clean Air Act and the Federal Water Pollution Control Act With Respect to Federal Contracts, Grants, or Loans); and U.S. Environmental Protection Agency (EPA) regulations.

28. Insurance Coverage: Entity shall provide EMNRD a statement indicating that the activities described in the Scope of Work are covered by insurance as set forth below, secured in accordance with any method allowed by applicable law, including self-insurance, pooling of self-insured reserves, or insurance provided by a third party, prior to commencing work under this Agreement. Entity shall maintain continuous coverage of the activities described in the Scope of Work, so long as this Agreement is in effect. Failure to maintain such coverage is reason for immediate termination of this Agreement. Entity shall notify EMNRD prior to cancellation or expiration of any insurance required under this Agreement.

A. Worker's Compensation protection that complies with the requirements of the Worker's Compensation Act, NMSA 1978, Sections 52-1-1 *et seq.*, if applicable. If the Entity fails to comply with the Workers Compensation Act and applicable rules when required to do so, EMNRD may terminate this Agreement.

B. Comprehensive public liability protection covering property damage and personal injury liability that may arise under this Agreement and any amendments hereto, in amounts equal or greater than liability limits set forth in NMSA 1978, Sections 41-4-19, as it may be amended from time to time.

IN WITNESS WHEREOF, the parties hereto have herein below executed this Agreement.

CITY OF SANTA FE

Date: November 22, 2024

To: Governing Body

Via: Regina Wheeler
Regina Wheeler (Nov 22, 2024 10:57 MST)
Regina Wheeler, Public Works Department Director

From: Romella Glorioso-Moss, PhD, CPM, Complete Streets Capital Projects Manager RGM

ACTION:
Request Approval of a Budget Adjustment Resolution (BAR) to Allocate Road Impact Fees in the Total Amount of $489,000 to FY 2025 WIP Construction for Construction Engineering and Management Services of Agua Fria Street and Cottonwood Drive Roundabout Project (Romella Glorioso-Moss, rsglorioso-moss@santafenm.gov)

BACKGROUND AND SUMMARY:
The City is starting to construct the Agua Fria Street – Cottonwood Drive Roundabout project with $3M federal funding as soon as the Contractor's Construction Services Agreement has been approved by the Governing Body. However, the federal grant does not pay for construction engineering and management services which includes NMDOT certified construction inspectors and material testing. An additional $489,000 road impact fees is requested to pay for these services. Construction is estimated to last from 15 to 18 months depending on the weather and supply chain.

The Agua Fria Street – Cottonwood Drive Roundabout project is included in Table 80 - Planned Major Roads Improvements of the *Infrastructure and Capital Improvements Plan* for $2M of road impact fees.

The funding source is: Road Impact Fees
Fund Name/Number: CIP

ACTION:
Request Approval of a Budget Adjustment Resolution (BAR) to Allocate Road Impact Fees in the Total Amount of $112,000 to FY 2025 WIP Design for the Engineering Design of Henry Lynch Reconstruction Project (Romella Glorioso-Moss, rsglorioso-moss@santafenm.gov)

BACKGROUND AND SUMMARY:
The engineering design of Henry Lynch Road Reconstruction Project began in 2022 with funding from the New Mexico Department of Transportation (NMDOT) via its Transportation Project Fund Program for $450,000. At the first public meeting conducted in 2022, the residents voiced concern about the poor drainage system causing regular flooding. However, the NMDOT funding is only for roadway design. An additional $112,000 is needed to address poor drainage system. The roadway design is approaching 60% completion. Henry Lynch Road Reconstruction project is included in Table 80 Planned Major Roads Improvements of the *Infrastructure and Capital Improvements Plan* for $3M of road impact fees.

CITY OF SANTA FE

Date: November 22, 2024

To: Governing Body and Finance Committee

From: Micheal Dozier, Waste Management Division MD

Via: John Dupuis, Public Works Director JD

Subject: Administration Generator Replacement

Vendor Name: Wagner Equipment Co.

Munis Vendor Number: 2387

ITEM AND ISSUE:

Waste Management Division Paseo Real Wastewater treatment plant (WWTP) respectfully requests your review and approval of a State Wide Price Agreement in the of $305,336.02 excluding tax for the purchase, installation and testing of the Administration generator for a term of 60 days with Wagner Equipment Company.

Action Requested: Request approval of a BAR in the amount of $308,576 and the State Wide Price Agreement for Wagner Equipment Co.

CONTRACT NUMBER:

State price Agreement #40-00000-23-00045 EXP February 22, 2025

BACKGROUND AND SUMMARY:

The wastewater treatment facility uses a backup generator to maintain the facility equipment during a power outage. the generator experienced a major failure on two units the facility needs to continue operating during power outages. power failures will directly effect the quality of the effluent discharge and will take the facility out of compliance.

Prior Approvals and Supporting Information:

PROCUREMENT METHOD:

The procurement method used was NMSA 1978, Section 13-1-129, Statewide Price Agreement

Re: Santa Fe Wastewater

We are pleased to submit this quotation for the following quality equipment:

Model: V12 GCAG
Quantity: 1
Rating: 800 kW
Fuel: DIESEL
Excitation: PM
Frequency: 60 Hz
Voltage: 480 V
Duty: STANDBY

The following features will be included:

Quantity	Characteristic Name	Feature Description
1	APPLICATION INDICATOR	STANDBY POWER
1	PGS EMISSION CERTIFICATION	EPA STATIONARY EMERGENCY
1	UL LISTING	UL 2200 LISTED PACKAGE GEN SET
1	SEISMIC CERTIFICATION	IBC SEISMIC CERT OF COMPLIANCE
1	VOLTAGE OPTION	60HZ 480 VOLT (WYE)
1	ENGINE RATING	60 Hz, 800 EKW W/FAN
1	CONFIGURATION	D800 GC (C27 800KW) TIER 2
1	ALTERNATOR TEMPERATURE RISE	125C TEMP RISE OVER 40C AMB
1	ALTERNATOR	E3835L4/1B-2/3-RW-PM

AURORA Colorado 80011-3513

303-739-3000

Notes Deviations and Exceptions:

Quote includes delivery to site, site startup and load-bank testing.

Freight is estimated at $ 7,500.00, if the actual cost exceeds that amount a surcharge will be added.

Off-loading, installation and initial fuel fill are included in the installation services price.

Wagner does not provide air emission permits. We will provide emission information on the Caterpillar engine to the owner to aid in the permitting process.

Customer Value Agreement:

One-year factory authorized generator routine maintenance is not included in the quoted price, if required add $5,478.00 per generator.

Availability & Lead Times:

Lead-time will be estimated when order is placed, currently the generator C27 leadtime is 1-2 weeks.

Thank you for the opportunity to quote. We look forward to your valued business.

Sincerely,

Rodney Sanchez

Email: **james.ortega@gsd.nm.gov**

Title**:** **Generator Preventative Maintenance and Repair**

Term**:** **February 23, 2024 thru February 22, 2025**

This Statewide Price Agreement is made subject to the "terms and conditions" as indicated on subsequent pages.

Accepted for the State of New Mexico

Natalie Martinez

Date: 2/23/2024

Dorothy Mendonca
New Mexico State Purchasing Agent

x **This Agreement was signed on behalf of the State Purchasing Agent**

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

Terms and Conditions

(Unless otherwise specified)

1. **General:** When the State Purchasing Agent or his/her designee issues a purchase document in response to the Vendor's bid, a binding contract is created.

2. **Variation in Quantity:** No variation in the quantity of any item called for by this order will be accepted unless such variation has been caused by conditions of loading, shipping, packing or allowances in manufacturing process and then only to the extent, if any, specified in this order.

3. **Assignment:**

a. Neither the order, nor any interest therein, nor any claim thereunder, shall be assigned or transferred by the Vendor, except as set forth in Subparagraph 3b or as expressly authorized in writing by the State Purchasing Agent or his/her designee. No such assignment or transfer shall relieve the Vendor from the obligations and liabilities under this order.

b. Vendor agrees that any and all claims for overcharge resulting from antitrust violations which are borne by the State as to goods, services, and materials purchased in connection with this bid are hereby assigned to the State.

4. **State Furnished Property:** State furnished property shall be returned to the State upon request in the same condition as received except for ordinary wear, tear and modifications ordered hereunder.

5. **Discounts:** Prompt payment discounts will not be considered in computing the low bid.

6. **Inspection:** Final inspection and acceptance will be made at the destination. Supplies rejected at the destination for nonconformance with specifications shall be removed at the Vendor's risk and expense, promptly after notice of rejection.

7. **Inspection of Plant:** The State Purchasing Agent or his/her designee may inspect, at any reasonable time, the part of the Contractor's, or any subcontractor's plant or place of business, which is related to the performance of this contract.

8. **Commercial Warranty:** The Vendor agrees that the supplies or services furnished under this order shall be covered by the most favorable commercial warranties the Vendor gives for such to any customer for such supplies or services. The rights and remedies provided herein shall extend to the State and are in addition to and do not limit any rights afforded to the State by any other clause of this order. **Vendor agrees not to disclaim warranties of fitness for a particular purpose of merchantability.**

9. **Taxes:** The unit price shall exclude all state taxes.

10. **Packing, Shipping and Invoicing:**

a. The State's purchasing document number and the Vendor's name, user's name and location shall be shown on each packing and delivery ticket, package, bill of lading and other correspondence in connection with the shipments. The user's count will be accepted by the Vendor as final and conclusive on all shipments not accompanied by a packing ticket.

b. The Vendor's invoice shall be submitted duly certified and shall contain the following information: order number, description of supplies or services, quantities, unit price and extended totals. Separate invoices shall be rendered for each and every complete shipment.

c. Invoices must be submitted to the using agency and NOT the State Purchasing Agent.

11. **Default:** The State reserves the right to cancel all or any part of this order without cost to the State, if the Vendor fails to meet the provisions of this order and, except as otherwise provided herein, to hold the Vendor liable for any excess cost occasioned by the State due to the Vendor's default. The Vendor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Vendor, such causes include but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the State shall determine that the supplies or services to be furnished by

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

the subcontractor were obtainable from other sources in sufficient time to permit the Vendor to meet the required delivery scheduled. The rights of the State provided in this paragraph shall not be exclusive and are in addition to any other rights now being provided by law or under this order.

12. **Non-Collusion:** In signing this bid the Vendor certifies he/she has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the State Purchasing Agent or his/her designee.

13. **Nondiscrimination:** Vendor doing business with the State of New Mexico must be in compliance with the Federal Civil Rights Act of 1964 and Title VII of the Act (Rev. 1979) and the Americans with Disabilities Act of 1990 (Public Law 101-336).

14. **The Procurement Code:** Sections 13-1-28 through 13-1-199 NMSA 1978, imposes civil and criminal penalties for its violation. In addition the New Mexico criminal statutes impose felony penalties for bribes, gratuities and kickbacks.

15. **Items:** All bid items are to be NEW and of most current production, unless otherwise specified.

16. **Payment for Purchases:** Except as otherwise agreed to: late payment charges may be assessed against the user state agency in the amount and under the conditions set forth in Section 13-1-158 NMSA 1978.

17. **Workers' Compensation:** The Contractor agrees to comply with state laws and rules pertaining to Workers' Compensation benefits for its employees. If the Contractor fails to comply with Workers' Compensation Act and applicable rules when required to do so, this Agreement may be terminated by the contracting agency.

18. **Submission of Bid:** Bids must be submitted in a sealed envelope with the bid number and opening date clearly indicated on the bottom left hand side of the front of the envelope. Failure to label bid envelope will necessitate the premature opening of the bid in order to identify the bid number.

19. **Contractor Personnel**: Personnel proposed in the Contractor's written bid to the Procuring Agency are considered material to any work performed under this Price Agreement. Once a Purchase Order or contract has been executed, no changes of personnel will be made by the Contractor without prior written consent of the Procuring Agency. Replacement of any Contractor personnel, if approved, shall be with personnel of equal ability, experience, and qualifications. The Contractor will be responsible for any expenses incurred in familiarizing the replacement personnel to insure their being productive to the project immediately upon receiving assignments. Approval of replacement personnel shall not be unreasonably withheld. The Procuring Agency shall retain the right to request the removal of any of the Contractor's personnel at any time.

20. **Subcontracting:** The Contractor shall not subcontract any portion of the Price Agreement without the prior written approval of the Procuring Agency. No such subcontracting shall relieve the Contractor from its obligations and liabilities under this Price Agreement, nor shall any subcontracting obligate payment from the Agency.

21. **Records and Audit:** The Contractor shall maintain detailed time and expenditure records that indicate the date, time, nature, and cost of services rendered during this Price Agreement's term and effect, and retain them for a period of three (3) years from the date of final payment under this Price Agreement. The records shall be subject to inspection by the Agency, State Purchasing Division, Department of Finance and Administration, and for Information Technology contracts, State Chief Information Officer. The Agency shall have the right to audit billings, both before and after payment. Payment for services under this Price Agreement shall not foreclose the right of the Agency to recover excessive or illegal payments.

22. **Subcontracts:** The foregoing requirements for Contractor Personnel, Subcontracting, and Audit shall be inserted into all subcontracts from the prime contractor to the subcontractor.

New Mexico Employees Health Coverage

A. If Contractor has, or grows to, six (6) or more employees who work, or who are expected to work, an average of at least 20 hours per week over a six (6) month period during the term of the contract, Contractor certifies, by signing

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

this agreement, to have in place, and agrees to maintain for the term of the contract, health insurance for its New Mexico Employees and offer that health insurance to its New Mexico Employees if the expected annual value in the aggregate of any and all contracts between Contractor and the State exceeds $250,000 dollars.

B. Contractor agrees to maintain a record of the number of its New Mexico Employees who have (a) accepted health insurance; (b) declined health insurance due to other health insurance coverage already in place; or (c) declined health insurance for other reasons. These records are subject to review and audit by a representative of the state.

C. Contractor agrees to advise all of its New Mexico Employees of the availability of State publicly financed health care coverage programs by providing each of its New Mexico Employees with, as a minimum, the following web site link to additional information: https://bewellnm.com.

D. For purposes of this Paragraph, the following terms have the following meanings:

(1) "New Mexico Employee" means any resident of the State of New Mexico employed by Contractor who performs the majority of the employee's work for Contractor within the State of New Mexico, regardless of the location of Contractor's office or offices; and

(2) "offer" means to make available, without unreasonable restriction, enrollment in one or more health coverage plans and to actively seek and encourage participation in order to achieve the goals of Executive Order 2007-049. This could include State publicly financed public health coverage programs such as *Insure New Mexico!*

Statewide Price Agreement

Article I – Statement of Work
Under the terms and conditions of this Price Agreement all State of New Mexico agencies, commissions, institutions, political subdivisions and local public bodies allowed by law may issue orders for items and/or services described herein. The terms and conditions of this Price Agreement shall form a part of each order issued hereunder.

The items and/or services to be ordered shall be as listed under Article IX - Price Schedule. All orders issued hereunder will bear both an order number and this Price Agreement number. It is understood that no guarantee or warranty is made or implied by the New Mexico State Purchasing Agent, his/her designee or the user that any order for any definite quantity will be issued under this Price Agreement. The Contractor is required to accept the order and furnish the items and/or services in accordance with the articles contained hereunder for the quantity of each order.

Article II – Term
The term of this Price Agreement, for issuance of orders, shall be as indicated in the specifications.

Article III – Specifications
Items and/or services furnished hereunder shall conform to the requirements of specifications and/or drawings applicable to items listed under Article IX-Price Schedule. Orders issued against this schedule will show the applicable Price Agreement item(s), number(s), and price(s); however they may not describe the item(s) fully.

Article IV – Shipping and Billing Instructions
Contractor shall ship in accordance with the following instructions: Shipment shall be made only against specific orders which the user may place with the Contractor during the term; The Contractor shall enclose a packing list with each shipment listing the order number, price agreement number and the commercial parts number (if any) for each item; Delivery shall be made as indicated on page1. If vendor is unable to meet stated delivery the State Purchasing Agent or his/her designee must be notified.

Article V – Termination
The Agency may terminate this Agreement for convenience or cause. The Contractor may only terminate this Agreement based upon the Agency's uncured, material breach of this Agreement. Contractor shall give Agency written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the Agency's material breaches of this Agreement upon which the termination is based and (ii) state what the Agency must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the Agency does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30)

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

days, the Agency does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach. Termination of this Contract, however, shall not affect any outstanding orders. This provision is not exclusive and shall not waive other rights and remedies afforded either party in the event of breach of contract or default. In such instances the contract may be cancelled effective immediately.

Article VI – Amendment
This Price Agreement may be amended by mutual agreement of the New Mexico State Purchasing Agent or his/her designee and the Contractor upon written notice by either party to the other. An amendment to this Price Agreement shall not affect any outstanding orders issued prior to the effective date of the amendment as mutually agreed upon, and as published by the New Mexico State Purchasing Agent or his/her designee. Amendments affecting price adjustments and/or the extension of a price agreement expiration date are not allowed unless specifically provided in the bid and price agreement specifications.

Article VII – Indemnity Clause
Contractor shall indemnify and hold harmless the State, its officers and employees, against liability, claims, damages, losses or expenses arising out of bodily injury to persons or damage to properties caused by, or resulting from Contractor's, and/or its employees, own negligent act or omission while Contractor, and/or its employees, perform or fails to perform its obligations and duties under the Terms and Conditions of this agreement. This save harmless and indemnification clause is subject to the immunities, provisions, and limitations of the Tort Claims Act (Section 41-4-1, et seq., N.M.S.A. 1978 comp. and Section 57-7-1 N.M.S.A. 1878 comp. and any amendments thereto.

It is specifically agreed between the parties executing this agreement that it is not intended by any of the provisions of any part of the agreement to create in the public or any member thereof a third party beneficiary or to authorize anyone not a party to the agreement to maintain a suit(s) for wrongful death(s), bodily and/ or personal injury(s) to person(s), damage(s) to property(ies) and/or any other claim(s) whatsoever pursuant to the provisions of this agreement.
Vendor shall provide all insurance necessary to employees on the work site, including but not limited to Worker's Compensation.

Article VIII – Issuance or Orders
Only written signed orders are valid under this Price Agreement.

Article IX – Packing (if applicable)
Packing shall be in conformance with standard commercial practices.

Article X – Price Schedule
Prices as listed in the price schedule hereto attached are firm.

Specifications:
The State of New Mexico wishes to establish a State-Wide price agreement to provide inspection, preventive maintenance services, repair and replacement, and emergency services as needed for generators and related equipment **located at various facility sites throughout the State of New Mexico.**

The term of this Price Agreement shall be for one (1) year from date of award with the option to extend for a period of two (2) additional years, on a year-to-year basis, by mutual agreement of all parties and approval of the New Mexico State Purchasing Agent at the same price, terms and conditions. This Price Agreement shall not exceed three (3) years.

All inspections will be performed by a qualified operator/ technician/ electrician. All waste materials and unusable fluids will be disposed of in accordance with local regulations. Written test and inspection reports will be submitted to maintenance supervisor upon completion. Test reports shall be suitable for submission to the User Agency to verify compliance with NFPA 110 guidelines.

Contractors shall be licensed for the work to be performed by this Price Agreement by the State of New Mexico, Regulation and Licensing Department, Construction Industries Division (CID). **Technicians providing services should have five (5) years' practical field experience with power generators. Evidence of such experience may include dates of licensure, references from prior contracts with their dates, etc. Vendors may be required to provide proof of experience prior to delivery of service.**

Both Generator Contractors and Electrical Contractors are encouraged to bid since both types of services are involved. Multiple contractors may be awarded for both Electricians and Generator Contractors. It is not required to bid on every item. To meet the needs of all the facilities located throughout the state, the State reserves the right to award multiple contractors to provide these services.

Scope of work:
A. Preventative maintenance (PM1)
B. Preventative maintenance (PM 2)
C. Preventative Maintenance (PM 3)
D. Monthly Building Outage Test
E. Load bank test.
F. Repair service, parts and labor for any of the generator system and related parts/equipment.
G. Emergency repair service including spill cleanup and remediation and all related costs of such.
H. Rental of portable backup generator(s) or automatic transfer switch (ATS) with hookup including electrical.
I. Replacement of generator, automatic transfer switch (ATS), fuel tank, cabling to ATS or any other system related parts/elements including infrastructure
J. Automatic Transfer Switch maintenance
K. Installation of replacement or new Generators

A. Preventative Maintenance 1 (PM1)
Inspections performed semi-annually.

General
Visual inspection- visual inspection of overall condition, look for foreign objects, loose or broken fittings, missing guards or other damaged components. Correct or adjust as necessary. (Note-inspection may reveal damage to components that require immediate attention. Any **additional charges that may apply will need to be pre-approved by the agency requesting service**.)

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

Cooling System

- Radiator/heat exchanger- visual inspection for leaks, damage, and debris. Check that louvers or air dampers operate correctly.
- Coolant- visual inspection for correct level and condition of coolant (rust, oil, contaminants). Check coolant conditioner concentration and temperature protection. Check filler cap gasket and sealing surfaces.
- Hoses and connections- visual inspection of all hoses for deterioration. Check tightness of all hose connections.
- Fan drive pulley and fan- check for loose or worn pulleys and lube fan drive bearing. Check fan operation and clearance.
- Fan belts-inspect for wear or deterioration. Check tension and adjust as necessary.
- Jacket water heater- inspect for proper operation. Check thermostat setting for proper coolant temperature.
- Water pump- visual and operational. Inspection for leaks or unusual noises.

Fuel System

- Fuel tank- visually inspect fuel tank system for leaks and fuel level. Test day tank pump for proper operation. Inspect fuel condition for contaminants.
- Water trap/separator-drain water from fuel tank or water separator. Fuel lines and connections-inspect for leaks and tight connections.
- Check line brackets.
- Governor and controls- inspect governor oil level. Inspect controls and linkage for proper operation. Add oil as necessary.
- Fuel filters- primary/secondary- inspect for damage, leaks, and proper operations. Clean primary filter screen.
- Fuel pressure- operations check of gauge for correct pressure.
- Fuel lines and connections-inspect for tight connections. Check line brackets.

Air Induction and Exhaust System

- Air filter service indicator-note reading. Inspect for proper operation. Reset indicator.
- Air filter-inspect. Clean as necessary
- Air inlet system- inspects piping and air filter housing for damage, loose connections and evidence of leaks. Clean air filter housing if filter is cleaned or replaced. Check housing seals and gaskets.
- Turbocharger- inspect for oil leakage or exhaust leakage. Check for unusual noises and proper operation.
- Exhaust manifold- inspect for damage, loose or missing hardware, evidence of exhaust leakage. Inspect for oil slobbering. Load bank recommendation may be necessary (note-load bank testing will help seat piston rings and remove carbon deposits- additional charges may apply).
- Exhaust system - inspect silencer and piping for damage, corrosion or leakage. Check rain cap. Check supports for vibration damage and loose connections.

Lube Oil System

- Oil level- inspect for correct oil level and contamination. Visually inspect unit for leaks.
- Oil pressure- operational check of gauge for correct pressure. Operational and visual inspection of pre-lube pump.
- Crankcase breather-inspect for proper operation. Check connections and inspect hose for deterioration. Note excessive blow-by.
- Scheduled oil sample- obtain live oil sample for analysis and submit for testing if required per NFPA 110/ASTM 110 guidelines.

Starting System

- Batteries- inspect for damage or leakage. Clean and tighten all battery cable connections.
- Batteries- specific gravity- check electrolyte level and specific gravity. Fill cells with distilled water as necessary.
- Battery charger- inspect for proper operation, loose terminals, and deteriorated wiring.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

- Starting motor- inspect electrical connections and wiring. For air starters, inspect oil jar and feeder operation. Operational check of abnormal engagement and cranking noises.
- Alternator- inspect for proper operation, loose connections, and mounting hardware. Check belts, pulleys, and voltage output.

Engine Monitors and Safety Controls

- Safety controls inspect proper operation, loose connections, and wiring deterioration. Check all safety controls for proper operation.
- Remote annunciators and alarms- inspect and test all panel and system alarms for proper operation.

Power Generator

- Slip rings and brushes -remove and inspect brushes, clean slip rings. Adjust as necessary.
- Space heaters - inspect for proper operation.

Control Panel

- Start controls- manual/auto- operational check for proper operation. Check automatic start.
- Voltmeter- operational check for correct readings. Check voltage.
- Level, voltage gain, and voltage droop adjustment.
- Ammeter- operational check for correct readings if load is available. Frequency meter- operational check for correct readings. Load and No-load readings if possible.
- Automatic transfer switch- clean, inspect and test for proper operation.

Gas (Or Other Types Of Fuel) Engines

- Carburetor and linkage- inspect for proper operation, free of binding.
- Magneto/distributor and ignition system-check condition of ignition wires. Check magneto/distributor operation.

B. Preventative Maintenance 2 (PM 2):

Includes all service level one (PM1) inspections-PM2 is performed annually.

Fuel System

- Fuel filter-replace. Inspect for proper sealing and operation.

Lube Oil System

- Oil and filters- change. Inspect all gaskets and seals. Cut open old filter for internal inspection.
- Scheduled oil sample- obtain live oil sample for analysis and submit for testing if required per NFPA 110/ASTM 110 guidelines. Crankcase breather- inspect and clean.

Air Induction and Exhaust System

- Valve adjustment- check and adjust valves as necessary.
- Valve rotators- operational inspection to ensure proper valve rotation.
- Turbocharger- inspect turbocharger for proper end play of rotating assembly. Check for oil leakage or unusual noises.

Engine Monitors and Safety Controls

- Gauge accuracy- check oil pressure, water temperature, and alternator gauges for accuracy. Replace as necessary (additional charges may apply to user agency).

Generator

- Generator rear bearing- lubricate.
- Vibration isolators- check for proper adjustment and condition.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

Control Panel

- Circuit breakers- inspect free movement and tight connections.
- Automatic transfer switch- clean, inspect and test for proper operation. Measure voltage drop across contacts.
- Lubricate mechanical linkage as recommended by the manufacturer control panel- vacuum and clean.

Gas (Or Other Types of Fuel) Engines

- Spark plugs- gap and clean.
- Carburetor- check operation, air/fuel ratio, and differential pressure. Adjust as necessary.
- Lubricate linkage.

Ignition System

- Check for proper operation. Tune engine as necessary.

C. Preventative Maintenance 3 (PM 3)

To include the following items:

General

Visual inspection- visual inspection of overall condition, look for foreign objects, loose or broken fittings, missing guards or other damaged components. Correct or adjust as necessary. (Note-inspection may reveal damage to components that require immediate attention. Any **additional charges that may apply will need to be pre-approved by the agency requesting service**.)

Cooling System

- Radiator/heat exchanger- visual inspection for leaks, damage, and debris. Check that louvers or air dampers operate correctly.
- Coolant- visual inspection for correct level and condition of coolant (rust, oil, contaminants). Check coolant conditioner concentration and temperature protection. Check filler cap gasket and sealing surfaces. Take a coolant sample and submit for testing if required per NFPA 110/ASTM 110 guidelines.
- Hoses and connections- visual inspection of all hoses for deterioration. Check tightness of all hose connections.
- Fan drive pulley and fan- check for loose or worn pulleys and lube fan drive bearing. Check fan operation and clearance.
- Fan belts-inspect for wear or deterioration. Check tension and adjust as necessary.
- Jacket water heater- inspect for proper operation. Check thermostat setting for proper coolant temperature.
- Water pump- visual and operational. Inspection for leaks or unusual noises.

Fuel System

- Fuel tank- visually inspects fuel tank system for leaks and fuel level. Test day tank pump for proper operation. Inspect fuel condition for contaminants. Take a fuel sample and submit for testing if required per NFPA 110/ASTM 110 guidelines.
- Water trap/separator-drain water from fuel tank or water separator. Fuel lines and connections-inspect for leaks and tight connections.
- Check line brackets.
- Governor and controls- inspect governor oil level. Inspect controls and linkage for proper operation. Add oil as necessary.
- Fuel filters- primary/secondary- inspect for damage, leaks, and proper operations. Clean primary filter screen.
- Fuel pressure- operations check of gauge for correct pressure.

Air Induction and Exhaust System

- Air filter service indicator-note reading. Inspect for proper operation. Reset indicator.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

- Air filter-replace air filter element.
- Air inlet system- inspects piping and air filter housing for damage, loose connections and evidence of leaks. Clean air filter housing if filter is cleaned or replaced. Check housing seals and gaskets.
- Turbocharger- inspect for oil leakage or exhaust leakage. Check for unusual noises and proper operation.
- Exhaust manifold- inspect for damage, loose or missing hardware, evidence of exhaust leakage. Inspect for oil slobbering. Load bank recommendation may be necessary (note-load bank testing will help seat piston rings and remove carbon deposits- additional charges may apply).
- Exhaust system - inspect silencer and piping for damage, corrosion or leakage. Check rain cap. Check supports for vibration damage and loose connections.

Lube Oil System

- Oil level- inspect for correct oil level and contamination. Visually inspect unit for leaks.
- Oil pressure- operational check of gauge for correct pressure. Operational and visual inspection of pre-lube pump.
- Crankcase breather-inspect for proper operation. Check connections and inspect hose for deterioration. Note excessive blow-by.
- Scheduled oil sample- obtain live oil sample for analysis and submit for testing if required per NFPA 110/ASTM 110 guidelines.

Starting System

- Batteries- inspect for damage or leakage. Clean and tighten all battery cable connections.
- Batteries- specific gravity- check electrolyte level and specific gravity. Fill cells with distilled water as necessary.
- Battery charger- inspect for proper operation, loose terminals, and deteriorated wiring.
- Starting motor- inspect electrical connections and wiring. For air starters, inspect oil jar and feeder operation. Operational check of abnormal engagement and cranking noises.
- Alternator- inspect for proper operation, loose connections, and mounting hardware. Check belts, pulleys, and voltage output.

Engine Monitors and Safety Controls

- Safety controls inspect proper operation, loose connections, and wiring deterioration. Check all safety controls for proper operation.
- Remote annunciators and alarms- inspect and test all panel and system alarms for proper operation.

Power Generator

- Slip rings and brushes -remove and inspect brushes, clean slip rings. Adjust as necessary.
- Space heaters - inspect for proper operation.

Control Panel

- Start controls- manual/auto- operational check for proper operation. Check automatic start.
- Voltmeter- operational check for correct readings. Check voltage.
- Level, voltage gain, and voltage droop adjustment.
- Ammeter- operational check for correct readings if load is available. Frequency meter- operational check for correct readings. Load and No-load readings if possible.
- Automatic transfer switch- clean, inspect and test for proper operation.

Gas (Or Other Types of Fuel) Engines

- Fuel lines and connections-inspect for tight connections. Check line brackets.
- Carburetor and linkage- inspect for proper operation, free of binding.
- Magneto/distributor and ignition system-check condition of ignition wires. Check magneto/distributor operation.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

Fuel System
- Fuel filter-replace. Inspect for proper sealing and operation.
- Take a fuel sample and submit for testing if required per NFPA 110/ASTM 110 guidelines.

Lube Oil System
- Oil and filters- change. Inspect all gaskets and seals. Cut open old filter for internal inspection.
- Scheduled oil sample- obtain live oil sample for analysis and submit for testing if required per NFPA 110/ASTM 110 guidelines.
- Crankcase breather- inspect and clean.

Air Induction and Exhaust System
- Valve adjustment- check and adjust valves as necessary.
- Valve rotators- operational inspection to ensure proper valve rotation.
- Turbocharger- inspect turbocharger for proper end play of rotating assembly. Check for oil leakage or unusual noises.

Engine Monitors and Safety Controls
- Gauge accuracy- check oil pressure, water temperature, and alternator gauges for accuracy. Replace as necessary (additional charges may apply to user agency).

Generator
- Generator rear bearing- lubricate.
- Vibration isolators- check for proper adjustment and condition.

Control Panel
- Circuit breakers- inspect free movement and tight connections.
- Lubricate mechanical linkage as recommended by the manufacturer control panel- vacuum and clean.
- Gas engines
- Fuel filter -replace.
- Spark plugs- gap and clean.
- Carburetor- check operation, air/fuel ratio, and differential pressure. Adjust as necessary.
- Lubricate linkage.

Ignition System
- Check for proper operation. Tune engine as necessary.

General
Replace Belts, hoses, thermostat, batteries, battery cables, chargers, heaters, Spark plugs, glow plugs, injectors, flush radiator and replace coolant, clean oil pumps (not at the oil pan, any other oil type pumps like the coolant oil pump would need to be cleaned), clamps, and gauges, transfer switch components, relays switches, fuses, breakers, etc. During the actual PM3, if a component replacement is not recommended, allow the Agency to decide if it shall be replaced or not.

D. Monthly Building Outage Test

To be performed as recommended and upon written request of user agency only.
The test is to be performed with a 30-minute run and 5-minute cool down and according to NFPA 110.

E. Load Bank Tests

To be performed as recommended and upon request of user Agency only. User Agency will not be held liable for load tests performed without proper authorization.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

NFPA 110 Emergency and Standby Power Systems--**8.4.9.7*** Where the test required in 8.4.9 is combined with the annual load bank test, the first 3 hours shall be at not less than the minimum loading required by 8.4.9.5 and the remaining hour shall be at not less than 75 percent of the nameplate kW rating of the EPS.

Connect resistive load banks to generator load terminals.
Supervise and operate generator set under resistive load for a period not less than two (2) consecutive hours as follows:

- 15 minutes @ 25% LOAD (load applied immediately without warm-up)
- 15 minutes @ 50% LOAD
- Per NFPA @ 75% LOAD
- Per NFPA @ 100% LOAD
- Per NFPA @ 75% LOAD
- 10 minutes @ 25% LOAD
- 5 minutes @ 0 % LOAD

F. Repair service, parts and labor.

- The awarded contractor will provide repair service as requested by authorized personnel for unforeseen equipment failures and fuel spills.
- Twenty-four (24) hour emergency service is mandatory due to the critical security issues associated with the operation of State buildings.
- Awarded contractor(s) must dispatch to all emergency situations within two (2) hours of being notified by authorized facility personnel.
- All parts supplied by vendor will be covered by the manufacturer's warranty of such parts and vendor will administer such warranty on behalf of the user Agency.
- Contact name and phone number of service technician to be made available to maintenance supervisor, business manager and control center officer in charge.
- Only new replacement parts/components are acceptable. Replacement parts will be bid at list price less applicable discount.
- The awarded contractor shall provide parts discounts from either house or trade catalogs as bid, and the list must be clearly marked with the applicable discount amounts. The Agency, at their discretion, may request dated parts lists to determine if the applicable discount is valid in the event that parts are purchased from the contractor. The Agency may at their discretion determine when the service/repair can be accomplished by the Agency's in-house personnel.

G. Emergency Repair Service

Awarded contractors must have a service team/vehicle dispatched and on the road within 2 hours of the time-of-service request, as repairs may be urgent for security enforcement or safety/sanitation issues. Awarded contractors must ensure that the emergency be stabilized within 48 hours. It is desired that parts be received, and service completed within forty-eight (48) hours for essential operating equipment.

H. Rental and Hook up of portable backup generator or automatic transfer switch (ATS)

I. Replacement of Generator, ATS, fuel tank, and any other related parts/elements of Generator system. A used or refurbished generator with an extended warranty may be considered if replacement is needed. The purchase of major replacement equipment may be accomplished under this Statewide Price Agreement through an operating lease or through a direct purchase. All purchases of major replacement equipment, new, used or refurbished, require prior approval by the user agency. The ATSs can be rented as an interim solution for an ATS that cannot be repaired.

J. Any engineering needed for stamped drawings/ system design

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

K. Maintenance and repairs to transfer switches.

- Check 24-volt relays
- Check fuses.
- Check heaters.
- Check low/high voltage lugs for tightness.
- Check for controls and control panels
- Repair, replace any components, parts as needed.

System	Part	Description	PM1	PM2	PM3
General					
			PM 1 is performed semi-annually	Includes all service level one (PM1) inspections- PM2 is performed annually	Includes all items under PM 1 & 2 with additional items of inspection and maintenance
	Overall	Visual inspection- visual inspection of overall condition, look for foreign objects, loose or broken fittings, missing guards or other damaged components. Correct or adjust as necessary. (Note-inspection may reveal damage to components that require immediate attention. Additional charges may apply.)	X	X	X
	System Exercising	Generator Operation offline. Generator Operation online with ATS in the emergency position	X	X	X
Cooling system					
	Radiator/heater exchanger	Visual inspection for leaks, damage, and debris. Check that louvers or air dampers operate correctly.	X	X	X
	Coolant	Visual inspection for correct level and condition of coolant (rust, oil, contaminants). Check coolant conditioner concentration and temperature protection. Check filler cap gasket and sealing surfaces.	X	X	X
		Flush radiator and replace coolant			X
	Hoses and connectio	Visual inspection of all hoses for deterioration. Check tightness of all hose connections.	X	X	X
		Replace hoses			X

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

System	Part	Description	PM1	PM2	PM3
General					
	Fan	Fan drive pulley and fan- check for loose or worn pulleys and lube fan drive bearing. Check fan operation and clearance.	X	X	X
	Fan belts	Fan belts-inspect for wear or deterioration. Check tension and adjust as necessary.	X	X	X
	Jacket water heater	Replace fan belts			X
		Inspect for proper operation. Check thermostat setting for proper coolant temperature.	X	X	X
		Replace thermostat and heater			X
	Water pump	Visual and operational. Inspection for leaks or unusual noises.	X	X	X
Fuel system					
	Fuel tank	Visually inspects fuel tank system for leaks and fuel level. Test day tank pump for proper operation. Inspect fuel condition for contaminants.	X	X	X
	Water trap/separator	Drain water from fuel tank or water separator. Fuel lines and connections-inspect for leaks and tight connections.	X	X	X
	Line brackets.	Check line brackets.	X	X	X
	Governor and control	Inspect governor oil level. Inspect controls and linkage for proper operation. Add oil as necessary.	X	X	X
	Fuel filters-Primary/secondary	Inspect for damage, leaks, and proper operations. Clean primary filter screen.	X	X	X
	Fuel filter	Replace filter. Inspect for proper sealing and operation.		X	X
	Fuel pressure	Operations check of gauge for correct pressure.	X	X	X
	Fuel lines and connections	Inspect for tight connections. Check line brackets.	X	X	X
Air induction and exhaust system					
	Air filter	Service indicator-note reading. Inspect for proper operation. Reset indicator	X	X	X
		Inspect. Clean as necessary	X	X	X
		Replace air filter element			X
	Air inlet system	Inspects piping and air filter housing for damage, loose connections and evidence of leaks. Clean air filter housing if filter is cleaned or replaced. Check housing seals and gaskets.	X	X	X

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

System	Part	Description	PM1	PM2	PM3
General					
	Turbocharger	Inspect for oil leakage or exhaust leakage. Check for unusual noises and proper operation.	X	X	X
	Turbocharger	Inspect turbocharger for proper end play of rotating assembly. Check for oil leakage or unusual noises.		X	X
	Exhaust manifold	Inspect for damage, loose or missing hardware, evidence of exhaust leakage. Inspect for oil slobbering. Load bank recommendation may be necessary (note- load bank testing will help seat piston rings and remove carbon deposits- additional charges may apply).	X	X	X
	Exhaust system	Inspect silencer and piping for damage, corrosion or leakage. Check rain cap. Check supports for vibration damage and loose connections.	X	X	X
	Valve adjustment	Check and adjust valves as necessary.		X	X
	Valve rotators	Operational inspection to ensure proper valve rotation.		X	X
Lube oil system					
	Oil level	Inspect for correct oil level and contamination. Visually inspect unit for leaks.	X	X	X
	Oil pressure	Operational check of gauge for correct pressure. Operational and visual inspection of pre-lube pump.	X	X	X
	Crankcase breather	Inspect for proper operation. Check connections and inspect hose for deterioration. Note excessive blow-by.	X	X	X
	Crankcase breather	Inspect and clean.		X	X
	Scheduled oil sample	Obtain live oil sample for analysis and submit for testing if required per NFPA 110/ASTM 110 guidelines.		X	X
	Oil and filters	Change. Inspect all gaskets and seals. Cut open old filter for internal inspection.		X	X
	Oil Pumps	Clean oil pumps			X
Starting system					
	Batteries	Inspect for damage or leakage. Clean and tighten all battery cable connections.	X	X	X
		Specific gravity- check electrolyte level and specific gravity. Fill cells with distilled water as necessary.	X	X	X
		Replace batteries, battery cables			X
	Battery charger	Inspect for proper operation, loose terminals, and deteriorated wiring.	X	X	X

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

System	Part	Description	PM1	PM2	PM3
General					
		Replace battery charger			X
	Starting motor	Inspect electrical connections and wiring. For air starters, inspect oil jar and feeder operation. Operational check of abnormal engagement and cranking noises.	X	X	X
	Alternator	Inspect for proper operation, loose connections, and mounting hardware. Check belts, pulleys, and voltage output.	X	X	X
		Replace belts			X
	Ignition system	Check for proper operation. Tune engine as necessary.		X	X
		Replace spark plugs, glow plugs, injectors			X
Engine monitors and safety controls					
	Safety controls	Inspect for proper operation, loose connections, and wiring deterioration. Check all safety controls for proper operation.	X	X	X
	Remote annunciators and alarms	Inspect and test all panel and system alarms for proper operation.	X	X	X
	Gauge accuracy	Check oil pressure, water temperature, and alternator gauges for accuracy. Replace as necessary (additional charges may apply to user agency).		X	X
		Replace gauges			X
Generator					
	Generator rear bearing	Lubricate		X	X
	Vibration isolators	Check for proper adjustment and condition.		X	X
Power generator					
	Slip rings and brushes	Remove and inspect brushes, clean slip rings. Adjust as necessary.	X	X	X
	Space heaters	Inspect for proper operation	X	X	X
Control panel					
	Start controls-Manual/ Auto	Operational check for proper operation. Check automatic start.	X	X	X
	Voltmeter	Operational check for correct readings. Check voltage.	X	X	X
		Level, voltage gain, and voltage drop adjustment.	X	X	X
	Ammeter	Operational check for correct readings, if load is available. Frequency meter-operational check for correct readings. Load and No load readings if possible.	X	X	X

System	Part	Description	PM1	PM2	PM3
General					
	Automatic transfer switch- and see below	Clean, inspect and test for proper operation.	X	X	X
		Measure voltage drop across contacts.		X	X
	Circuit breakers	Inspect free movement and tight connections.		X	X
	Mechanical linkage	Lubricate mechanical linkage as recommended by the manufacturer control panel- vacuum and clean.		X	X
	Other	Replace relays, switches, fuses and breakers			X
		Connect Cat ET or other brand software where applicable and record all events and clear memory			X
Gas (or other types of fuel) engines					
	Carburetor and linkage	Inspect for proper operation, free of binding.	X	X	X
	Carburetor	Check operation, air/fuel ratio, and differential pressure. Adjust as necessary.		X	X
	Linkage	Lubricate linkage		X	X
	Magneto/distributor and ignition system	Check condition of ignition wires. Check magneto/distributor operation.	X	X	X
	Spark plugs	Gap and clean.		X	X
	Fuel lines and connections	Inspect for tight connections. Check line brackets.			X
Miscellaneous					
		Replace all clamps, belts, hoses, gauges, etc.			X
Transfer Switch					
		Check 24-volt relays	X	X	X
		Check fuses	X	X	X
		Check heaters	X	X	X
		Check low/high voltage lugs for tightness	X	X	X
		Check for controls and control panels	X	X	X
		Repair: replace any components, parts as needed.	X	X	X

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

K. Installation of replacement or new Generators:
This price agreement will provide for the replacement or upgrade of existing generators, as well as the installation of new generators. To include all parts and accessories required to complete installation of those units.

Additional bid and scope information:
Coolant samples, fuel samples and oil samples will need to be collected and tested when required per NFPA 110/ASTM 110 maintenance guidelines.

A list of all gensets will not be provided. This statewide price agreement can be used by any government entity in New Mexico, so all types of generators can be covered. That is why the list of manufacturers that you service is being **requested.**

When the Agency/Governmental entity signs you up for actual PM3 for that generator, they will be given the option to replace all of the components or only a few of the components on an individual basis.

Do not include mileage in the cost of service. It is a separate item 044. An employee's 'windshield time' will be included in the cost of service.

All work shall be performed in accordance with all applicable New Mexico Building Codes. The awarded contractor shall be fully responsible to obtain all permits associated with this work as required by the State of New Mexico, Construction Industries Division or the local authority having jurisdiction (AHJ). The CID is the jurisdictional authority for permits in state buildings and will serve as the code inspecting authority on work for state buildings. The contractor shall request all appropriate inspections in appropriate time frames.
The CID/AHJ has the right to stop any work being formed that is not in compliance with applicable New Mexico Building Codes or City/County Building codes and may direct the Contractor to perform corrective action as needed.

The cost for any building permits will be in addition to the prices set forth in this Price Agreement. Contractor to include an estimate for the cost of the permit in any quotation provided.

Subcontractors are allowed on this State Price Agreement. If their services are not specifically listed in the price list, a detailed description of the services that the Subcontractor is providing will need to be submitted along with the vendor's quote. The use of a subcontractor must have prior approval as well as the named subcontractor. If the Agency objects to the use of a particular named contractor, the Contractor shall propose another one that is acceptable to the Agency. No Markup is allowed on subcontractors.

General Overhead and Profit on the Contractor's self-performed work is not allowable as a separate line item.
If special equipment is required to perform the work required in a project/repair, the Contractor may bill for the cost of said equipment, at the actual cost of renting the equipment. Invoices will be attached to billing in order for payment to be approved. The contractor will notify the user Agency of the need to rent equipment.

Backup Portable Generators: The cost of fuel as needed for backup portable generators (or the existing generator) is an allowable expense under this contract. It will be added based on an estimated cost and invoiced on the exact cost. When a backup portable generator is brought in, the initial fuel will be provided. Cabling will also be provided. The exact length of the cabling will vary from project to project. The delivery fee is included in the bid rental amount but is based on the assumption that a local source for the portable generator is found. If the portable generator has to come from out of state or a long distance, there will be an add on allowed for those cases. The extra charge for a separate crane for setup will be estimated and invoiced at the cost of crane rental.

Certificate of insurance is required. Per NMSA 1978 13-4-18, Performance and Materials and Payment Bonds are required for projects over $25,000 and is an allowable added expense with no markup.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

Overnight shipping may be requested by authorized personnel for priority repair needs. Overnight shipments to be made upon approval by authorized personnel only. The Agency will not accept charges for overnight shipping if prior approval has not been obtained from Agency authorized personnel. Shipping charges incurred to meet the needs of the Agency will be acquired at the best obtainable price.

Mileage is allowable based on the bid rate per mile. It will be calculated using the Rand McNally map from point to point from the service base to the job site using the shortest route. The first 20 miles to/from will not be figured into the calculation: only the excess over 20 miles. If a prolonged stay is required, per diem for lodging and meals is only allowable at the State rate. Trip charges that are the result of the installer/repairer neglecting to bring the known needed materials/parts will not be allowed.

If the replacement or repair is of sufficient travel length that it makes sense to stay in the area rather than incur mileage to return daily to the contractor's base site, then per diem charges are allowable for up to $85 per day per person. This would include lodging and meals. **Receipts may be required for invoicing**.

The awarded contractor will be required to abide by all rules and regulations associated with these institutions. Service technicians may be required to enter areas in which he/she will be exposed to clients which could be inmates at Correctional Facilities.

The Agency will not be held responsible for injury to vendor personnel or damage to vendor equipment.

The State reserves the right to terminate this price agreement at any time without notice if repair service, response time and/or institution rules are not adhered to.

Contractor's Warranty:
Contractor shall provide a One-Year Labor warranty for major replacements, beginning from the date of final payment. Materials warranty will be limited to new materials installed as part of the work. Material warranties will not apply to any rebuilt or reused materials or parts. Materials warranties will follow the manufacturer's warranty period. Repairs shall be warranted for 90 days.

Manufacturer's Warranty:
When available, the Contractor will provide extended manufacturer's warranties for materials installed by this Price Agreement.

Insurance:
Contractor shall provide all insurance necessary for employees on the work site, including but not limited to Workman's Compensation Insurance.

Contractor shall indemnify and hold harmless the State of New Mexico, its Officers, and employees against liability claims, damages, losses or expenses arising out of bodily injury to persons or damage to property caused by, or resulting from Contractor's and / or its employees, own neglect act(s) or omission(s) while Contractor, and / or its employees, perform(s) or fails to perform its obligations and duties under the terms and conditions of this Price Agreement. This save harmless and indemnification clause is subject to the immunities, provisions, and limitations of the Tort Claims Act (41-4-1, et seq., NMSA 1978 comp) and Section 57-7-1 NMSA, 1978 Comp., and any amendments thereto.

It is specifically agreed between the parties executing this Price Agreement that it is not intended by any of the provisions of the Price Agreement to create the public or any member thereof a third party beneficiary or to authorize anyone not a party beneficiary or to authorize anyone not a party to the Price Agreement to maintain a suit(s) for wrongful death(s) bodily and / or personal injury(ies) to person(s), damages to property(ies) and / or any other claim(s) whatsoever pursuant to the provisions of this Price Agreement.

DocuSign Envelope ID: 265D037D-23F6-4FC7-8C0A-F0281E7A3FA1

The Contractor shall provide Public Liability Insurance for the minimum amount of $100,000 for damage to or destruction of property arising out of each occurrence. The amount of $300,000 to any person for any number of claims arising out of each occurrence for all damages other than property damage as permitted under the New Mexico Tort Claims Act, and $500,000 for all claims arising out of each occurrence. Umbrella or excess liability coverage shall not be considered as any part of the primary coverage.
The contractor agrees to comply with state laws and rules pertaining to commercial general liability insurance, auto insurance and workers' compensation insurance coverage for its employees. If contractor fails to comply with the workers' compensation act and applicable rules when required to do so, the contract may be canceled effective immediately. Upon award of a project/repair, the contractor shall provide the user Agency with their insurance certificates.

Bidders shall provide pricing for:
SEE ATTACHED BID FORM.
In general, it includes:
Cost for PM 1 Service.
Cost for PM 2 Service.
Cost for PM 3 Service.
Hourly rate for service/repair, portal to portal, normal working hours
Hourly rate for emergency service/repair, portal to portal, non- working hours, to include weekends and holidays.
Rate for load test.
Discount % replacement parts on non-specific brands from most current house or trade service price schedules or vendor catalog.
Rental charges for portable backup generator(s)
Electrical Work related to ATS and hookup of the rental generator.
Discount % of new or replacement Generators from most current publicly available retail pricing.

Method of Award:
Multiple contractors may be chosen--- Both Electricians and Generator Servicers.
It is not required to bid on every item.

Escalation/Reduction Clause:
In the event of a labor rate increase, an escalation request will be reviewed by the State Purchasing Division on an individual basis. Labor rate increases will only be allowed with verified rate increases mandated by Unions or by the Department of Workforce Solutions Wage Rate Decision increases. Please be aware this measure is not intended to allow any increase in profit margin, only to compensate for an actual cost increase. Price decreases as well as increases shall apply. If vendor's prices are reduced for any reason, users shall receive the benefit of such reductions. Price increases will not be retroactive to orders already in house or backorders. Orders will be filled at the price in effect on the date of receipt of the order by the vendor.

Supply the following for an escalation/reduction:
1. Beginning Wage Rate Determination at the time of award.
2. New Wage Rate Determination at the time of escalation request.
3. Or Union documentation showing increase or decrease.

Tax Note:
Price shall not include state gross receipts tax or local option tax. Such tax or taxes shall be added at time of invoicing at current rate and shown as a separate item to be paid by user.

*****End of Specifications*****

Electronic Record and Signature Disclosure

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

A. ELECTRONIC RECORD AND SIGNATURE DISCLOSURE (ERSD)

From time to time, New Mexico General Services Department (GSD), on behalf of the State of New Mexico (SONM), may be required by law to provide you with certain written notices or disclosures. Stated below are the terms and conditions for GSD's providing you such notices and disclosures electronically through the DocuSign system. Please read this information carefully. If you are able to access this information electronically and agree to **this Electronic Record and Signature Disclosure (ERSD)**, please confirm your agreement by selecting the check-box next to "I agree to use electronic records and signatures" before clicking "CONTINUE" within the DocuSign system.

B. Obtaining paper copies

At any time up to twenty (20) calendar days following your use of DocuSign to electronically sign a document, you may request a paper copy of any record provided or made available electronically to you by GSD. You will have the ability to download and print documents SONM sends you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a twenty (20) calendar day period after such documents are first sent to you. Following the twenty (20) day period, if you want GSD to send you paper copies of any such documents from GSD's office, you will be charged a $1.00 per-page fee plus postage. You may request delivery of such paper copies from GSD by following the procedure stated in Section H, below.

C. Withdrawing your consent

If you decide to receive notices and disclosures from GSD electronically, you may at any time change your mind and inform GSD you want to receive required notices and disclosures only in paper format. The procedure concerning how you may inform GSD of your decision to receive future notices and disclosures in paper format as well as withdraw your consent to receive notices and disclosures electronically is stated in Section D, immediately below.

D. Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed with which GSD will be able to complete certain steps in specific transactions and deliver paper copies to you. GSD will need: (1) to send the required notices or disclosures to you in paper format; and (2) wait until GSD receives your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from SONM or to electronically sign documents generated and sent to you from SONM.

E. All notices and disclosures will be sent to you electronically

Unless you inform GSD otherwise according to these procedures, GSD will electronically provide you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements and other documents that are required to be provided or made available to you during the course of your electronic signature relationship with SONM. To reduce the possibility of inadvertent non-receipt, GSD prefers to provide all required notices and disclosures by the same method and to the same email or physical address that you furnish to GSD. Thus, you may receive the disclosures and notices electronically or in paper form. If you do not agree with this procedure, please inform GSD according to the procedures stated in Section I, below. Please also refer to Section D, immediately above, which states the consequences resulting from your declination of electronic delivery of notices and disclosures.

F. How to contact GSD:

You may inform General Services Department (GSD) of any changes you select regarding State Purchasing Division's (SPD) electronic communications with you, to request paper copies of certain information from SPD, and to withdraw your prior consent to receive notices and disclosures electronically by emailing your request(s) to SPD at: *GSD.SPDinfo@state.nm.us*

G. To advise SPD of your new email address

To inform SPD of a change in the email address to which SPD sends you notices and disclosures electronically, you must send an email to SPD at *GSD.SPDinfo@state.nm.us* and in the body of such request you must include your previous and new email addresses.

H. To request paper copies from SPD

To request delivery of paper copies of electronic notices and disclosures that DocuSign and/or SPD have previously provided to you, you must send an email to SPD at *GSD.SPDinfo@state.nm.us* and in the body of your email request state your email address, full name, mailing address, and telephone number. SPD will charge you a $1.00 per page copy fee plus postage.

I. To withdraw your consent with SPD

To inform SPD that you no longer wish to receive notices and disclosures in electronic format you may:

(1) Decline to sign a document from within a signing session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may:

(2) Send SPD an email to *GSD.SPDinfo@state.nm.us* and in the body of your request state your email address, full name, mailing address, and telephone number.

J. Required hardware and software

The minimum system requirements for using the DocuSign system may change over time. The current DocuSign system requirements may be found at:
https://support.docusign.com/guides/signer-guide-signing-system-requirements

K. Acknowledging your access and consent to receive and sign documents electronically

To confirm that you are able to electronically access the information contained in this Electronic Record and Signature Disclosure (ERSD), please confirm that you have: (1) read this ERSD, and either: (2) you are able to print on paper or electronically save this ERSD for your future reference and access; or (3) you are able to email this ERSD to an email address where you will be able to print this ERSD on paper and/or save this ERSD for your future reference and access. Further, if you consent to receiving notices and disclosures from DocuSign and/or SPD exclusively in electronic format, then select the check-box next to "I agree to use electronic records and signatures," before you click "CONTINUE" within the DocuSign system.

By selecting the check-box next to "I agree to use electronic records and signatures," you confirm that:

- You have read this Electronic Record and Signature Disclosure (ERSD); and
- You can print this ERSD on paper, or you can save and/ or send this ERSD to a location where you can print this ERSD, for your future reference and access; and
- Until or unless you notify SPD as stated in this ERSD, you consent to exclusively receive through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you by SPD during the course of your electronic signature relationship with SPD.

CITY OF SANTA FE

Date: October 24, 2024

To: Governing Body, Finance Committee, and Public Works & Utilities Committee

From: P. Fred Heerbrandt, P.E., Engineer Supervisor FH

Via: John Dupuis, Public Utilities Department Director JD

Subject: Hazen and Sawyer Operational Support Contract Amendment #1

Vendor Name: Hazen and Sawyer

Munis Vendor Number: 7789

ITEM AND ISSUE:

Public Utilities Department/Wastewater respectfully requests your review and approval of an Amendment #1 to contract #3204638 with Hazen and Sawyer for an Emergency Service. Amendment #1 increases the amount of compensation by $2,666,930.00 that will expand existing tasks within the original scope of work. The total compensation will not exceed $5,384,930.00 including gross receipt tax for a term of 3 years.

CONTRACT NUMBER:

The FY24 Munis contract number is 3204638

BACKGROUND AND SUMMARY:

The Wastewater Management (WWM) Division is requesting approval of Amendment #1 to expand three existing tasks withing the existing contract scope of work, which includes compiling and Asset Inventory and Condition Assessment, Production of a Digital Twin Process Model, and additional On-site Operational Support. The original contract was executed to respond to an Administrative Order issued by US EPA and NMED, due to the discharge of inadequately treated wastewater. The original contract was approved on April 4, 2024 as and Emergency, Item #24-0299.

Prior Approvals and Supporting Information:

RE: CONTRACT #19-0235, ON-CALL ENGINEERING SERVICES FOR THE CITY

The City of Santa Fe, NM is included as additional insured with respect to General Liability, Automobile Liability and Umbrella Liability when required by written contract. General Liability, Automobile Liability and Umbrella Liability are primary and non-contributory over any existing insurance and limited to liability arising out of the operations of the named insured and when required by written contract. General Liability, Automobile Liability, Umbrella Liability and Workers Compensation policies include a waiver of subrogation in favor of the additional insureds where permissible by state law and when required by written contract. Umbrella Liability coverage sits excess over General Liability, Automobile Liability and Employers Liability coverage. 30-day Notice of

City of Santa Fe
Emergency Determination Form

The emergency procurement method may only be used as described in NMSA 1978, Section 13-1-127 and in the City's Procurement Manual XII.

NOTE:

Notify all signatories as soon as you are made aware of the emergency. Give them a brief synopsis of the emergency, answer their questions, and let them know this document and all supporting documents will be sent to them for signatures. They should know about the request prior to obtaining signatures.

The Department that makes an emergency procurement to plan or prepare for the response to a serious threat to public health, welfare, safety or property caused by a flood, fire, epidemic, riot, act of terrorism, equipment failure or similar event shall account for the money spent in making the procurement and report on that accounting to the City's Finance Department Director within ninety days after the end of the contract or fiscal year in which the procurement was made, whichever comes first.

I.

Department:	Public Utilities, Wastewater Division, City of Santa Fe
Department Director:	John Dupuis
Department Contact:	Michael Dozier
Department Telephone Number:	(505) 955-4642
City of SF Chief Procurement Officer:	Travis Dutton-Leyda
Telephone Number:	(505) 629-8351

II.

Name of Contractor:	Hazen and Sawyer
Address of Contractor:	100 Sun Ave. NE, Suite 206, Albuquerque, NM 87109
Amount of prospective contract:	$5,384,930.00
Term of prospective contract:	3 years
Location of Services:	Paseo Real Wastewater Reclamation Facility

III. **Please thoroughly list the services (scope of work), construction or items of tangible personal property of the contract:**

The scope of work to be delivered by Hazen and Sawyer (Hazen) includes:

- Asset Inventory and Condition Assessment – Hazen will inventory all PRWRF assets, develop attribute data, field verify the condition of assets, develop risk-based scoring criteria, identify level of service goals, perform asset cost analysis, and develop a 10-year capital improvement plan for the PRWRF.
- Digital Twin – Hazen will provide technical services to advance the City's data visualization and process optimization initiatives. The digital twin task is broken into six subtasks:

development and tag addition, data exploration and cleaning, development of a data visualization tool, real-time process optimization, development of a mechanistic process digital twin, and addition of data-driven optimization features into the process twin (i.e., development of a hybrid model that includes mechanistic as well as data-driven components).

- Onsite Operational Support – Hazen will provide onsite support from July 24, 2024 through October 25, 2024 followed by part-time support for the remaining duration of Hazen's contract scheduled to end on September 30, 2026. Hazen staff will serve as an extension of the City's staff to support the operation and maintenance of the PRWRF.

IV. **Provide an explanation for the justification of the procurement including a description of the emergency condition(s) requiring use of emergency procurement and the practicable competition utilized in compliance with NMSA 1978, Section 13-1-127.**

The United States Environmental Protection Agency (EPA) issued Administrative Order (AO) CWA-06-2024-1765 to the City on July 10, 2024. The AO states that the City's Paseo Real Water Reclamation Facility (PRWRF) has repeatedly failed to meet effluent limits specified in the National Pollutant Discharge Elimination System (NPDES) Permit No. NM00222292. The City issued a response to the EPA's AO on April 4, 2024. The City's response provided an initial plan for immediate actions (30 days), near-term actions (6 months), and long-term actions (18 months) intended to address the permit violations as quickly as possible and implement measures to prevent similar exceedances from reoccurring.

Similarly, the New Mexico Environment Department (NMED) has determined that the City of Santa Fe Paseo Real Wastewater Treatment Plant (WWTP) has been operating in noncompliance with the New Mexico Water Quality Act (WQA) and Water Quality Control Commission's (WQCC) regulations (20.6.2 and 20.6.4 New Mexico Administrative Code) adopted pursuant to the WQA.

To facilitate the most efficient response to these regulators, the City requires emergency procurement to develop a plan and to implement that plan to bring the Paseo Real WWTP into compliance as soon as is feasible to do so.

Hazen has continuously supported the City's efforts to bring PRWRF back into permit compliance. Over the course of that effort, the City identified additional areas where Hazen's services will support the City's overall goals. The justification for each task included in this amendment follows:

- Asset Inventory and Condition Assessment – The City does not have a complete inventory of PRWRF assets and their condition. An asset inventory including condition is the foundation of an Asset Management Plan (AMP). An AMP is needed to proactively plan and execute repair/replacement of PRWRF assets to reduce the probability of asset failure(s) resulting in future permit violations.
- Digital Twin – The City does not have a system for processing and visualizing plant operational data or a system for simulating how operational changes may impact process performance. Data visualization dashboards will allow PRWRF staff to view operational data in real-time and make data-driven decisions. A digital twin will allow PRWRF staff to simulate the impacts of potential operational changes to verify that proposed changes will be beneficial rather than detrimental to operational goals and permit compliance.
- Onsite Operational Support – The PRWRF is currently understaffed, which has made it challenging for the City to perform operation and maintenance (O&M) activities and implement changes to improve plant performance. The City asked Hazen to station licensed Wastewater Treatment Operators onsite to improve plant O&M and implement the changes necessary to improve plant performance.

V. **Please describe what measures are being taken to minimize the duration and effect of this emergency procurement (for example: is the emergency only in place until a competitive process can be completed, etc.).**

By retaining Hazen to perform the requested scope of work, we can bring and continue maintain the facility in compliance with the acts and regulations listed above, thereby eliminating or minimizing the associated risks to public health and safety associated with noncompliant discharge.

VI. **Describe what measures the Department will take in the future to prevent/mitigate use of emergency procurement under similar circumstances.**

It is our goal and desire to prevent the conditions that precipitated the need for this emergency procurement by implementing immediate, near-term and long-term actions that will bring the WWTP back into compliance and maintain that compliance for the remainder of the plant's service life.

Re: Paseo Real Water Reclamation Facility (PRWRF)
Engineering, Operational Support, and Related Services in
Response to EPA Administrative Order CWA-06-2024-1745

Dear Mr. Dupuis:

We appreciated the opportunity to meet with the City of Santa Fe (City) on Wednesday, March 13, 2024 to discuss the referenced Administrative Order (AO) the City received from the U.S. Environmental Protection Agency (EPA) Region 6. As we discussed, the City would like to implement an overall plan that 1) responds to and resolves the AO, and 2) prepares the City for long-term, future success in operating and managing the Paseo Real Water Reclamation Facility (PRWRF) and similarly at a future facility being considered and visioned by the City as an eventual replacement for the PRWRF. The City's plan focuses on improving current data collection, regulatory compliance, operational, knowledge management / transfer, and management practices at the PRWRF, combined with selective capital improvements to existing PRWRF facilities. This comprehensive plan can be broken down into the following nine (9) steps:

1. Provide sampling and regulatory support to ensure compliance with existing permits.

2. Support the City's external communications with the New Mexico Environment Department (NMED).

3. Build a comprehensive base of knowledge management tools / decision trees to guide PRWRF staff in day-to-day operations and management of the facility.

4. Improve PRWRF laboratory practices, data management, workflows, and communications for all testing performed to ensure regulatory compliance and/or support treatment operations.

5. Provide an inventory of all PRWRF instrumentation, calibration practices, data flows, and uses of information currently collected and rectify gaps to improve process monitoring and control.

6. Develop a model for treatment operations using open-source software that integrates information available from lab test results and real-time supervisory control and data acquisition (SCADA) data.

7. Develop a "digital twin" model of PRWRF to simulate and help optimize treatment plant operations.

8. Develop tools for remote simulation and testing of proposed changes to plant operations.

9. Provide engineering support for short-term treatment plant improvement projects.

The following narrative further defines the specific activities and services Hazen and Sawyer ("Hazen") proposes to provide. This work will be performed under a new engineering services agreement between the City and Hazen to be issued in response to EPA Administrative Order CWA-06-2024-1745.

Scope of Work

1. Sampling and Regulatory Support

Hazen will coordinate one soil sampling event and four quarterly groundwater sampling events at the PRWRF, with the samples being analyzed for poly- and perfluoroalkyl substances (PFAS). Both the soil and groundwater samples will be analyzed using EPA Method 1633. The sampling and reporting will be conducted by a third party in the place of City staff, with minor support from City staff. We have assumed that a total of 10 soil samples will be collected during one soil sampling event (including duplicate samples), and that each sample will be collected from a depth of 2 to 3 feet below ground surface using a hand auger. Ten groundwater samples will be analyzed during each groundwater sampling event (7 PRWRF monitor wells and 3 quality assurance samples). The groundwater sampling for PFAS will begin before Hazen begins supporting the groundwater sampling that is required by the facility's discharge permits (discussed below).

Hazen will coordinate the quarterly groundwater sampling and analysis that is required under discharge permits DP-289 (Wastewater Reclamation Facility) and DP-135 (Sludge Disposal Facility) issued by the NMED Ground Water Quality Bureau (GWQB) for six (6) quarters, starting with the second quarter sampling event in 2024. Hazen will also coordinate the required reporting under these permits. The sampling and reporting will be conducted by a third party in the place of City staff, with minor support from City staff (e.g., for purge water disposal). The City will provide additional information (e.g., monthly totalized average daily and peak daily influent volumes, monthly volumes discharged to each reclaimed domestic wastewater recipient, discharge monitoring reports) for inclusion in the quarterly discharge permit reports prepared for NMED. This task will support the City in achieving compliance with the requirements of these permits.

2. Communications Support

Along with City leadership and staff, Hazen staff (Amy Ewing) will participate in weekly phone calls that will be scheduled with NMED to discuss the current and planned activities and progress made in support of responding to and resolving the AO.

3. **Build a comprehensive base of knowledge management tools / decision trees for PRWRF operations**

Daily activities by PRWRF operations, maintenance, and management staff will support routine and consistent compliance with permit limits established by the City's National Pollutant Discharge Elimination System (NPDES) Permit NM 0022292 once staff have a clear understanding of:

- The purpose of each unit process
- Key Performance Indicators (KPIs) for measuring its performance
- Its relationship to upstream and downstream unit processes
- Information needed to monitor the process, and
- Expectations for each level of staff on how to achieve performance goals set for the process

Hazen proposes to develop these understandings by developing a series of documents called Area Procedures and Expectations (APEs) for each of the seven (7) liquid stream unit processes and four (4) solids handling processes at PRWRF. Each APE, developed as a PowerPoint presentation, will provide a clear guide for each level of operations, maintenance, and management staff, and will provide specific guidance for how and when to adjust the process, by how much, and by whom. Hazen's production of APEs will leverage existing Operation and Maintenance (O&M) Manual and Standard Operating Procedure (SOP) documentation the City may already have in place for PRWRF.

APE production will also document gaps between available information routinely collected (e.g., lab tests and SCADA data) versus what is needed to achieve reliable performance, how such information is distributed, and what improvements to information management are needed so that key items are communicated to staff who need it the most and at a frequency that supports their needs. APE production will also identify information and records currently being collected that do not serve the purpose of optimizing a treatment process. Lastly, APEs will capture information provided during the development of Items 4 and 5 described below.

Once the APEs have been prepared, Hazen will provide on-site staff training for each. This will include administering knowledge assessment quizzes to confirm staff are absorbing the critical information needed to successfully operate and maintain each unit process.

The collection of APEs will form the foundation for PRWRF knowledge management / transfer to which existing staff can refer as they work to optimize facility operations and to train future staff. As "living documents", APEs can be periodically updated by the City to reflect new facilities and capital improvements implemented at PRWRF.

The next element of this PRWRF knowledge management program summarizes the information contained in the 11 APEs (7 for liquid processes / 4 for solids handling) and provides an overview for how each process is supposed to work. This document called **Unit Process Operating Strategies** provides a useful reference to all levels of PRWRF staff and will serve as a tool for newcomers so they can quickly become familiar with "the right way" to operate plant facilities.

The final element of the knowledge management program currently envisioned will be preparation of a PRWRF **Operational Plan**. This document will provide information on the staff hierarchy, command and

communications structure, state and federal regulatory permits, plant safety programs, interrelationships with other City work groups (e.g., purchasing and materials management), and key summaries about PRWRF unit processes extracted from the **Unit Process Operating Strategies** document. Whereas the latter focuses on the information needed to optimize plant treatment operations, the **Operational Plan** focuses on the PRWRF enterprise as a whole and the communications within each internal and external City work group needed to achieve the best performance possible from PRWRF.

4. **Improve PRWRF laboratory practices, data management, workflows, and communications**

Hazen will provide the City with external sampling and reporting support for samples that are collected by PRWRF staff and analyzed by the in-house laboratory to demonstrate compliance with applicable state and federal discharge permits and to support operational control of PRWRF unit processes. We will work with City staff to ensure that all lab process documentation is current and complete and will assist in clearly defining appropriate workflows for PRWRF staff involved in sample collection, testing, and reporting of results. This task will include performing a review of lab operations, external collection and testing of laboratory samples for a period of up to 4 weeks, and assistance with the transition back to in-house sampling and analysis after PRWRF staff roles and responsibilities have been clearly defined for future lab activity. Item 4 includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

5. **Provide an inventory of all PRWRF instrumentation**

Hazen will develop an updated inventory of all instrumentation installed at PRWRF including calibration procedures and how this information is managed, stored, accessed, and communicated (e.g., paper logbooks, SCADA, Operator10™ software, or an alternate operational data storage platform/historian). This inventory will identify existing instruments that do not perform their intended function and/or could be re-deployed to provide the information needed by Operations staff. This inventory will also note opportunities to add instruments that will support real-time monitoring of treatment processes, as needed to accomplish Items 6 through 8 below. If practical, Hazen will use the City's current asset database format and structure to prepare this inventory of PRWRF instrumentation, which might then be used as an input to the City's asset management program.

6. **Develop a model for treatment operations**

Hazen will use the available information from lab data and SCADA data including any improvements to these sources realized through the outcomes of the work on Items 3 through 5 above, and will develop an operational model for PRWRF performance. This model will be developed using open-source software (e.g., SUMO™, BioWIN™, or similar product) and calibrated using the available data set. This model will be tested using the updated procedures for controlling and adjusting plant operations developed under our work for Item 3. This item includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

7. **Develop a "digital twin" model of plant operations to simulate and help optimize treatment plant operations**

The modeling work for Item 6 will next be used to develop a more advanced model that will serve as a "digital twin" the City can use for a variety of purposes including:

- A testbed for proposed changes to existing modes of operation for a particular treatment process
- Observing responses to upset / unexpected conditions for influent wastewater
- Assessing the impact that mechanical breakdown of treatment plant equipment may have on plant performance

As described, the "digital twin" should allow the City to evaluate the plant's response to a suite of unexpected stressors and determine what facility improvements or changes to normal operating procedures will foster a more resilient operation. Item 7 includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

8. **Develop tools for remote simulation and testing of proposed changes to plant**

The City has expressed interest in having Hazen partner with a nationally recognized firm to perform remote modeling, testing, and optimization of PRWRF operations, such as are provided by the company AM-Team or a similar entity. This item will build upon the work completed by Hazen for Items 3 through 7. The specific scope for Item 8 will be further refined once the outcomes for Items 3 through 7 have been established.

9. **Provide engineering support for short-term plant improvement projects at PRWRF**

The City has engaged the services of AAC Construction to perform select construction projects at PRWRF that are characterized as limited scope, remove-and-replace in-kind for specific treatment plant equipment / systems that are out of service or are no longer working. Examples of these limited scope projects include restoring two (2) former traveling bridge filter systems to working condition and installing a new mechanical bar screen the City previously procured. Hazen will provide the engineering support the Contractor may need to properly install and commission these equipment systems so that they perform as intended. There may be other projects of this type that the City decides to undertake, in addition to these two projects, for which Hazen can provide the engineering support the Contractor may need. We have included an allowance of $400,000 to cover the effort we anticipate may be needed for engineering support for short-term plant improvement projects.

Project Management

Hazen will perform ongoing project management activities including cost control and monitoring, invoicing, and general coordination with the City's project manager and staff for each of the 9 items of support described under **Scope** that the City authorizes. Each month, we will provide an overall progress report and invoice for authorized tasks similar to the reporting and invoicing process we currently employ for Engineering On-call Contract #23-0516.

Schedule

The work elements described under Scope are expected to be completed over the next 30 months, as needed and as directed by City staff. We are prepared to begin our work for the City immediately upon receipt of its written authorization to proceed.

Compensation

We are requesting an initial authorization of $2,718,000 including NMGRT to provide the services that are described under the Scope. Attachment 1 provides a budget breakdown for Items 1 through 7 and 9. As requested by the City, we have deferred estimating the effort for Item 8, pending completion of Items 1 through 7. All work will be performed on a time and materials basis using the labor rates attached to this letter. Please note these labor rates are the same rates used by Hazen for its work under Engineering On-Call Contract #23-0516 with the City of Santa Fe, and which get adjusted annually at the beginning of the City's fiscal year. Expenses may include reimbursable mileage, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Please call me at (505) 259-1679 or Charlie Leder at (505) 236-3889 if you have any questions or would like to discuss further Hazen's plan for providing services to help the City respond to EPA Administrative Order CWA-06-2024-1745.

Sincerely,

Greg Gates, PE
Vice President

Charles S. Leder, PE
Senior Associate

Title: City of Santa Fe Public Utilities Director

Attachment 1

Proposed budgets for Engineering, Operational Support, and Related Services in Response to EPA Administrative Order CWA-06-2024-1745

Service Item	Proposed time and materials budget
1. Regulatory support	$ 250,000
2. Communications support	$ 25,000
3. Build a comprehensive base of knowledge management tools / roadmaps for PRWRF operations	$ 750,000
4. Improve PRWRF laboratory practices, data management, workflows, and communications	$ 350,000
5. Provide an inventory of all PRWRF instrumentation	$ 250,000
6. Develop a model for treatment operations	$ 300,000
7. Develop a "digital twin" model of plant operations to simulate and help optimize treatment plant operations	$ 200,000
8. Develop tools for remote simulation and testing of proposed changes to plant	TBD
9. Provide engineering support for short-term plant improvement projects at PRWRF	$ 400,000
Total estimated budget for all Items	$ 2,525,000
NMGRT Allowance[1]	$ 193,000
Total budget including applicable NMGRT	$ 2,718,000

1. Estimate calculated using the Albuquerque FY 2024 NMGRT rate of 7.625%. NMGRT will be assessed on labor and subconsultant work performed in New Mexico.

LABOR RATES FOR HAZEN AND SAWYER STAFF

	Rates over next 4 years			
	2023-2024	2024-2025	2025-2026	2026-2027
Vice President / Project Director	$348.91	$359.38	$370.16	$381.26
Senior Associate	$281.39	$289.83	$298.52	$307.48
Associate	$225.11	$231.86	$238.82	$245.98
Senior Principal Engineer	$191.33	$197.07	$202.98	$209.07
Principal Engineer	$168.83	$173.89	$179.11	$184.48
Engineer	$157.58	$162.31	$167.18	$172.20
Assistant Engineer	$135.06	$139.11	$143.28	$147.58
Technician	$112.55	$115.93	$119.41	$122.99
Effective date for rates	7/1/2023	7/1/2024	7/1/2025	7/1/2026

1. Work performed by subconsultants will be billed at cost plus a 10% mark-up

Hazen

City of Santa Fe, NM
Paseo Real WRF Asset Inventory and Condition Assessment
Scope of Work

1. Project Understanding

The Paseo Real Water Reclamation Facility (PRWRF) is owned and operated by the City of Santa Fe, New Mexico (CITY). The PRWRF has a permitted capacity of 13 million gallons per day (mgd), average day maximum month flow. PRWRF effluent is discharged into the lower Santa Fe River and can also be conveyed to non-potable reuse customers.

The CITY has requested a scope from Hazen and Sawyer (Hazen) for the development of an Asset Management Plan (AMP) for the PRWRF Facility. In parallel, Hazen has been supporting the City in the selection and procurement of a Computerized Maintenance Management System (CMMS) software product. The City has negotiated a contract with OpenGov to purchase and implement OpenGov's Asset Management environment for the following asset groups:

- Water Distribution
- Water Treatment
- Wastewater Treatment
- Wastewater Collection / Sanitary Sewer
- Transportation
- Parks and Recreation
- Stormwater

This scope of work will include asset inventory and attribute data development, field verification of the inventory along with physical condition assessment, development of risk scoring criteria, identifying level of service goals, asset cost analysis, and development of a 10-year capital improvement plan for the PRWRF Facility (wastewater treatment group). This task will lay the foundation for future asset management endeavors by establishing the following:

- Defining an "asset"
- Defining and assigning asset attributes
- Defining asset hierarchy
- Developing an asset inventory
- Performing a physical condition assessment
- Developing the risk scoring criteria (for likelihood of and consequence of failure scores)
- Developing the levels of service (LOS) that will help drive a prioritization of risk-based CIP projects and are focused on helping the CITY meet its LOS
- Creating a prioritized list of CIP projects based upon defensible risk scores and LOS

The database developed during this task (outside of CIP development), will be used to populate the CMMS system. Hazen acknowledges that both efforts are simultaneously occurring and will work to ensure that development and incorporation of data into the CMMS system is as seamless as possible.

The major elements of this task order are summarized below:

- Review of existing data and records
- Data validation and acceptance – establishing the limits and hierarchy of what to include in asset inventory, establishing asset definitions and attribute information
- Asset inventory and condition assessment field work – creating data collection forms and performing onsite inventory and condition assessment
- Establishment of an Asset Register
- Evaluation of expected useful / remaining life of assets and replacement cost data for assets
- Development of level of service goals and key performance indicators
- Development of a maintenance planning strategy
- Establishing an asset risk framework and risk scoring criteria for assets
- Development of an asset insights dashboard

The scope of work is detailed in the following section.

2. Scope of Services

The Scope of Services for this task order includes the following tasks:

Task 1 – Project Management

Hazen will perform the following project management activities associated with this effort:

1. Project Management – Task consists of ensuring performance of the work follows the agreed upon scope, budget, and schedule (estimated 12 months).
2. Submit monthly invoices and associated progress reports
3. Project Kickoff Meeting – The purpose of the meeting will be to:
    - Identify the key project personnel and contact information.
    - Review the project scope of services and project schedule
    - Review and discuss coordination with the CITY staff, treatment plant operations staff, and other supporting key staff.
    - Discuss the requested existing data, information, and materials CITY will provide
4. Conduct regular progress meetings with CITY project manager
5. QA/QC – Hazen will incorporate a robust QA/QC procedure of all data collected, placed in the asset register, and all deliverables provided to CITY.

All data developed for the CITY as part of this project, including mapping, asset attributes, inventories, CIP plans and anything else generated by the project, is the property of the CITY and will be available to the CITY in electronic format. Hazen will keep the CITY informed of the project progress and will notify the CITY of issues that arise which could potentially affect the schedule, scope, or budget. Any work outside this scope of work will only be performed following written approval by the CITY.

Task 1 Deliverables

- Monthly Invoices with Project Status Reports
- Kickoff Meeting Draft Agenda and Meeting Minutes
- Progress meetings minutes

- Any data generated during the project (draft (at the request of the CITY) or final (all final data to be given to the CITY)).

Task 2 – Data Review, Validation, and Acceptance

Prior to beginning this task, Hazen will submit a request for information (RFI) that includes existing asset information from the current CMMS system, process and instrumentation-related information from SCADA, and record drawings. These details are anticipated to be submitted in digital format for ease of analysis and inclusion in the condition assessment form. This task shall consist of the following services:

1. Hazen will evaluate the information provided by the CITY in response to the RFI
2. Hazen will use industry standards and confer with the CITY during a workshop to establish definition of an "asset" to be included in the inventory phase of the project.
3. Hazen will establish asset types and subtypes to develop a final nomenclature to move forward for the asset inventory phase of the project.
4. Hazen will propose to the CITY a standard asset hierarchy and classifications for various asset types, including name and numbering methods, based on industry standards. The CITY will be given an opportunity to comment on the hierarchies and suggest changes to it during a workshop.
5. Hazen will host a workshop with the CITY to gain input from the CITY and to use that to determine what attribute information will be collected on each class and subclass of assets. At a minimum, each asset must have an asset ID, name, location, condition, useful life remaining, type, material, size, and replacement cost. Additional attributes could include: manufacturer, serial number, capacity, flow rate, dimensions, installation date, operating status, as well as many others. Following the meeting Hazen will provide the CITY with a list of attribute information for the CITY's review. The CITY will approve the list before data collection occurs.

Task 2 Deliverables

1. Asset Inventory Draft Determination
    - Definition of an "asset" for each class and subclass of assets
    - Asset hierarchy in a flow diagram
    - List of asset types and subtypes in a spreadsheet

Task 3 – Asset Hierarchy and Asset Register Development

This task focuses on developing a comprehensive asset hierarchy and asset register for the PRWRF.

1. Designate Qualifying Assets – Hazen will conduct a workshop with CITY stakeholders to finalize the list of qualifying assets based on the preliminary list developed in Task 2.
2. Define Asset Hierarchy – Following the designation of qualifying assets, the workshop will continue to establish an appropriate asset hierarchy, ensuring all assets within the PRWRF are included. The asset hierarchy and the asset register will include the following components:
    - Asset Definition: Compile asset definitions using existing PRWRF asset lists and assets identified in Task 2.

- Asset Class: Group assets by type, functions, useful life, and pricing attributes (e.g. size, material, power).
- Data Standards: Establish data attributes required to support asset management needs.

3. Asset Register Development – Hazen will create the asset register using a hierarchical structure with "parent-child" relationships, allowing the CITY to navigate the database easily and extract information at various levels.

Task 3 Deliverables

- Asset Hierarchy
- Preliminary Asset Register with all identified assets, all available asset attribute information, photos of all visible assets, unique asset ID numbers, asset names that are known by staff (Microsoft Excel). This information will be provided to OpenGov as soon as available for use in initiation and validation phases.

Task 4 – Asset Inventory and Condition Assessment

This task includes the desktop and field work required for the asset inventory and condition assessment. Following completion of Task 2, Hazen will create an asset inventory in digital format that includes all asset types and subtypes with relevant attributes, as well as a condition assessment form. This task shall consist of the following services:

1. Hazen will develop a digital survey and condition assessment form to collect and assess asset data in the field.
    - Hazen will develop a physical condition framework for each asset type by discipline (civil/structural, HVAC, mechanical, and electrical/I&C) using the International Infrastructure Management Manual (IIMM) as a guideline to be used to assess condition during field verification. Hazen will share the draft condition assessment process with the CITY and the CITY will have a chance to comment and input on the process. Field personnel familiar with the assets will be invited to the meeting and their input will be considered in this process.
    - Hazen will include all asset attributes in forms that should be collected for each asset type Such as Collector 123, Fulcrum, or a similar platform which the City can utilize in the future independently.
    - Hazen will include the asset type, subtype, and hierarchy as fields to be populated in the digital form.
2. Hazen will create an asset register template that includes all asset types and subtypes with defined attributes. The asset register will also contain physical condition-related attributes.
3. Hazen will pre-populate available information from the obtained data. The information will be verified and updated during the field inspection, along with a physical condition score.
4. Hazen's field team will comprise specialists in civil/structural, HVAC, mechanical, and electrical/I&C.
5. Hazen will perform a visual condition assessment of each asset. The goal of the condition assessment is to identify the current state of assets with a condition score allowing estimation of the assets' remaining useful lives.

6. Hazen will design the Santa Fe WRF Asset Insight Dashboard user interface along with a data model and share with the CITY project manager before proceeding. Upon user interface approval, Hazen will develop the following four visual reports:

    - Home – Page navigation and a visual overview of the WRF assets.
    - Summary – Overview of asset count, condition, location, risk, useful life, and renewal needs.
    - Asset Details – Detailed view of asset attributes, inspection photos, and deterioration curve.
    - Asset Condition – View asset condition statistics by condition score and installation decade.

    All Dashboard pages will provide the user with the ability to filter visuals by process area, equipment type, discipline, condition score, and risk matrix bin.

    The Asset Insight Dashboard will be designed so that it may link with other facilities that are part of the CITY's operations.

Task 4 Deliverables

- Draft register for review by the CITY. Comments should be addressed by Hazen (it is understood that if a comment is not possible to address (i.e., can't make the change) Hazen will provide an explanation of why not.
- Final Asset Register with Attributes and Condition Assessments as specified in the list of attributes and containing any required changes based on the review of the draft – Spreadsheet. This information will be provided to OpenGov as soon as available for use in the configuration phase.
- PRWRF Asset Insight Digital Dashboard Pictures of each asset that is visible. The asset pictures will have the entire asset in the first picture with all subsequent pictures showing close ups of particular issues or concerns (e.g., the name plate, cracks, missing bolts, rust or other corrosion.) In any case with a visible name plate a picture of the name plate will be taken. The photos will be attached to the asset in the spreadsheet with the full asset photo as the first picture in the set of photos.

Task 5 – Expected/Remaining Useful Life Determination

This task aims to determine the expected useful life (EUL) and remaining useful life (RUL) of asset classes.

1. Expected Useful Life (EUL) – Using manufacturer design life, industry publications such as Engineering News Record (ENR), and data from similar Hazen projects, Hazen will establish a baseline EUL for each asset class.

2. Remaining Useful Life (RUL) – Based on collected attribute data, CITY maintenance records, and condition assessment scores, Hazen will estimate the RUL for each asset by adjusting up or down from the general attribute life. For example, if a pipe is to last 100 years but it is known to have multiple breaks and has shown signs of deterioration, the pipe's life should be shortened. If a pipe is known to be in good shape, exhibited no issues, etc., its life will be extended. For assets lacking visual condition assessments and any other information on

maintenance, repairs, or operator knowledge, the RUL will be calculated by dividing expected design life by asset age with straight line deterioration.

Task 5 Deliverables

- Estimated EUL for each asset class
- Estimated RUL for each asset
- Updated asset register with EUL and RUL for each asset

Task 6 – Replacement Valuation

This task involves estimating the current replacement cost for each asset.

1. Cost Data Collection and Review – Consolidate and review historical replacement cost data, local knowledge, RS Means databases, and costs from similar Hazen projects. Hazen will estimate current replacement costs in 2024 dollars using unit cost methods.
2. Workshop – Hazen will conduct a 3-hour Asset Valuation Review and Lifecycle Costing Workshop with CITY to review and validate replacement costs, develop cost factors for full implementation estimates, and determine maintenance strategies for run-to-fail assets and those with rehabilitation plans.

Task 6 Deliverables

- Updated asset register with bare and full cost estimates
- Total estimated valuation of the entire facility
- Workshop agenda, minutes, and presentation materials

Task 7 – Validate Levels of Service (LOS) and Develop Key Performance Indicators (KPIs)

This task will define and validate the Levels of Service (LOS) and Key Performance Indicators (KPIs).

1. Preliminary LOS and KPI Development – Hazen will seek input from CITY regarding potential LOS goals and KPIs prior to the workshop.

2. Using the list of potential LOS goals and other available information on LOS more generally, Hazen will develop a preliminary list of LOS and KPIs for CITY to review before a workshop.

3. Hazen will conduct a 3-hour workshop with key stakeholders to identify and validate LOS and KPIs for the facility. The discussion must include the following: what information would be required to measure the goals and determine whether KPIs are met, how difficult it would be to get this information (including whether this data currently exists), where the data would be held, how the KPIs would be calculated and stored, and who would have access to the data. Additionally, discussions of which goals/KPIs should be more publicly shared should be held.

Task 7 Deliverables

- LOS and KPI Summary Table
- Data required to meet the goals summary and where data is stored

Task 8 – Maintenance Planning

This task develops a maintenance planning strategy. Hazen will utilize a proven approach for utilizing asset criticality to determine the type of maintenance activities to be performed for the top ten qualifying asset classes. The level of effort required for maintenance activities will support estimated FTE staffing requirements.

1. Maintenance Approach Development – Utilize manufacturer-specific O&M manuals and industry-leading practices for failure monitoring and mitigation. Techniques include Failure Mode and Effects Analysis (FMEA), Preventive Maintenance Optimization (PMO), and Reliability Centered Maintenance (RCM).
2. Categorization of Maintenance Activities
    - Low Criticality: Operations Only or Run-To-Failure (RTF) Strategy—basic visual inspections or repair/replacement upon failure.
    - Medium Criticality: Operations + Condition/Performance—includes some condition/performance activities based on physical characteristics and financial feasibility.
    - High Criticality: Operations + Condition + Performance—comprehensive maintenance activities based on typical failure modes, from basic inspections to advanced predictive maintenance.

Task 8 Deliverables

- Maintenance strategy documentation for each asset class

Task 9 – Additional Services

The following tasks may be authorized by the CITY to develop a full Asset Management Program (AMP). The additional services described below provide high-level goals for each task as more information becomes available. At that time, the task item and deliverable will further be further delineated and detailed and authorized fee negotiated:

1. Gap Analysis – Prior to the development of the AMP, Hazen will provide a gap analysis at the facility to verify changes (asset removal or addition during the Emergency AO Projects) and update the data inventory. This scope item assumes up to 200 assets to be input into the data inventory.

2. Risk Framework Development - Define a performance condition assessment and consequence of failure assessment framework. This will include defining criteria, scoring definitions and scales, weighting, and scoring methodology specific to CITY'S PRWRF assets. Hazen will coordinate and solicit feedback from the Southwest Environmental Finance Center on project details.

3. Asset Risk Assessment (LoF and CoF) - implementation of a comprehensive asset risk assessment approach, including:
    a) Performance Condition Assessment
    b) Consequence of Failure Assessment
    c) Risk Scoring

4. Renewal and Replacement CIP Forecasting – Based on replacement valuations determined in task Hazen will provide a specific set of recommendations for the PRWRF that focus on:
    a. Known upcoming / in-process projects
    b. Program recommendations
    c. CIP project recommendations

    The CIP Projects will be identified by a priority based upon BRE and typically divided into high (1-2 years), medium (3-5 years) and low (6-10 years) priority. Hazen will delineate between rehabilitation and replacement projects and costs and provide costing for each recommendation by year. In addition, Hazen will utilize the information to develop asset inspection and maintenance scheduling guidelines for qualifying assets.

5. Staff Training – Hazen will develop and facilitate staff training of the AMP to support ownership and longevity of the program. Staff training is assumed to be conducted over a one-day period.

6. Unidentified Additional Services - In the development of this scope, Hazen and the CITY acknowledge there are uncertainties and unidentified tasks associated with the development of a full AMP. This task provides resources required to address these unidentified items. A budget allowance of $100,000 is included in this scope and budget for unidentified additional services.

3. Assumptions

Certain assumptions have been made in preparing the Scope of Services. To the extent possible, these assumptions are stated herein and are reflected in the estimated fee for services. If the requirements of the Project are different from the assumptions presented herein, or if the CITY desires additional services, the resultant scope changes will serve as the basis for amending this Contract or initiating the development of a new Contract as mutually agreed by CITY and Hazen. Project assumptions include:

- Based on similar projects, Hazen expects the asset count to be less than 1,500 assets inventoried. This scope of work assumes that the asset inventory will not exceed 1,500 assets. An inventory in excess of 1,500 assets will be considered additional work. The Hazen will keep the CITY informed of the progress of the inventory and if projected inventory exceeds the assumed quantity of assets.
- Kickoff meeting will be held virtually on MS Teams.
- No confined space entry is included during the asset inventory or condition assessment.
- There will be approximately 1-2 weeks of onsite asset inventory field work (estimated at 3-4 days per week)
- The CITY will open any electrical cabinets, operate equipment or valves, turn on/off equipment, etc., as needed to capture asset information.
- Operators will be available for the duration of Hazen's fieldwork and Hazen will seek to involve the Operators in the process of obtaining information to support knowledge transfer. Operators who are knowledgeable about the assets will be available to Hazen staff during field work.
- The efforts described herein would support and be compatible with a future ISO14001 certification.

4. Schedule

The proposed schedule for completing Tasks 1 through 8 is 12 months following notice to proceed. We are prepared to begin our work for the City immediately upon receipt of its written authorization to proceed. The schedule for additional services outlined in Task 9 would be determined when the scope of additional services requested by the CITY is negotiated.

5. Compensation

We are requesting an initial authorization of $623,038 to provide the services that are described under the Scope. Attachment 1 provides a budget breakdown for Tasks 1 – 9. All work will be performed on a time and materials basis. Expenses may include reimbursable mileage, airfare, lodging, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Hazen

Attachment 1

Proposed budgets for Asset Inventory and Condition Assessment Services

		Total	Fee		
Task	Description	Hours	Labor	Expense	Total
1	Project Management	174	$48,901	$500	$49,401
2	Data Review, Validation, and Acceptance	128	$41,391	$4,200	$45,591
3	Asset Inventory and Asset Register Development	132	$28,785	$3,700	$32,485
4	Asset Inventory and Condition Assessment	740	$142,026	$18,500	$160,526
5	Expected / Remaining Useful Life Determination	70	$13,864	$0	$13,864
6	Replacement Valuation	86	$17,931	$3,700	$21,631
7	Validate LOS and Develop KPIs	76	$15,262	$0	$15,262
8	Maintenance Planning	136	$26,981	$0	$26,981
9	Additional Services	494	$207,333	$5,550	$212,883
	NMGRT (8.1875% of Labor)			$44,415	$44,415
	TOTAL	**2,100**	**$542,473**	**$55,565**	**$623,038**

Hazen

The city of Santa Fe (the City) seeks to develop data visualization and process optimization tools that provide end-users with access to a common authoritative source for critical plant operations and performance data. This suite of tools is expected to provide plant process and operations staff with the ability to visualize plant performance data in near-real-time (NRT) and gain actionable insights to improve or optimize process performance. The suite will consist of a plantwide data visualization tool as well as a holistic process optimization web application that utilizes both mechanistic as well as data-driven modules to provide maximum value. Hazen will execute the project by developing core data system building blocks and visualization tools that enhance situational awareness and provide near-term functional value, while in parallel developing advanced process insight tools that leverage this data foundation.

The City has expressed a desire to develop a tool (or tools) that allows process engineers and plant operators at the Paseo Real Water Reclamation Facility (PRWRF) to visualize process data, assess plant performance as well as gain usable and actionable process optimization insights in close to real-time. City staff also noted that the ability to assess the impacts of operational changes (i.e., what-if or scenario analyses) on performance and ability to meet compliance requirements would be critical.

Under this Task Order, Hazen will provide technical support services to advance the City's data visualization and process optimization initiatives. This task order is broken into six major tasks: dataflow development and tag addition, data exploration and cleaning, development of a data visualization tool, real-time process optimization, development of a mechanistic process digital twin, and addition of data-driven optimization features into the process twin (i.e., development of a hybrid model that includes mechanistic as well as data-driven components).

Task 1. Data Foundation

The primary goal of this task is to ensure that critical analytical and operational data from the PRWRF is securely available in a central SQL data warehouse. Major activities include collaborating with City IT staff to develop secure SCADA and OP10 data export processes, building the data warehouse and necessary data pipelines, identifying and acquiring raw time series data, and creating new calculated time series for process optimization. Work under this task establishes the data foundation and computational environment for subsequent tasks.

Task 1.1: System Connectivity and Data Engineering

The goal of this task is to establish data connectivity, data pipelines, SQL data warehouse, and ancillary data engineering components necessary to provide a foundation for both project analytics and for routine operational use of project-developed tools by the City. While the data warehouse developed under this task will focus on a subset of critical data necessary to optimize plant performance, the overall data framework will be designed for future scalability, such that it may serve as a testbed and starting point for future plant-wide visualization and reporting if desired by the City.

Under this task Hazen will work closely with City IT staff and data stewards to develop secure and repeatable data acquisition processes and to comply with cybersecurity and data governance standards provided by the City upon project initiation. Key activities include:

- Collaborate with plant technical staff to draft a high-level requirements document and proposed data architecture diagram to support discussions with City IT staff. The document will focus on defining core requirements such as user roles and objectives, data sources, data granularity and refresh frequency, data retention and storage, and data accessibility and security.
- Hold up to 5 virtual coordination meetings with City IT staff and data owners.
- Provision a secure workspace within Hazen's Microsoft Azure or Fabric tenant that is dedicated to City of Santa Fe data and applications. This effort will consider opportunities to integrate or leverage existing data handling and reporting processes that are currently operational in Hazen's Azure and Power BI tenants, including a single user endpoint through the Santa Fe BI Application developed by Hazen, automated integration between live and historical data using stored procedures, and one-way data exports to securely obtain data from Santa Fe's operational systems.
- Design and build a semantic model and data warehouse to integrate metadata, raw data, calculated data, and cleaned data. The semantic model will be extensible to integrate model output data and recurring predictive data developed under subsequent tasks. As above, this effort will maximize opportunities to integrate or reuse existing model structures, with the overall goal of delivering a high-performing and low maintenance system.
- Develop a scalable process for managing time series metadata from multiple data sources (with a focus on SCADA and OP10). This includes specifying location and parameter attributes, friendly names, higher-level location and parameter categories, and reference values (e.g. regulatory limits,

operational targets, thresholds). This process will be based on an Excel file, a Microsoft List, or similar compatible technology.

- Support City staff in the development of recurring automated processes for securely exporting data and metadata from the SCADA Historian and the OP10 database to the data warehouse.
- Support City staff in the creation of gateways if needed.
- Ensure compliance with cybersecurity, data governance, and application development standards provided by the City.

Task 1.2: Acquire Raw Time Series Data

The goal of this task is to identify and acquire raw time series data from lab analyses and plant instrumentation that is most valuable for optimizing plant performance. This task involves reviewing metadata from OP10 and SCADA systems, identifying tags, developing queries, configuring data pipelines for recurring data movement, and conducting a one-time export of historical data. The data products created in this task form the data foundation of subsequent modeling and analytical activities.

- Review OP10 and SCADA historian metadata for the purpose of identifying tags or parameters that are most valuable for optimizing plant performance. Metadata shall be provided by the City, or alternately the City shall provide credentials sufficient to access metadata tables.
- Based on metadata review, collaborate with plant technical staff to select up to 20 critical influent and effluent concentrations and secondary process operational data from the OP10 system.
- Based on metadata review, collaborate with plant technical staff to select up to 200 tags critical for process assessment and control from the SCADA historian.
- Populate consistent metadata attributes for the selected raw time series data, including location and parameter attributes, user friendly names, reference values, and other attributes that may be useful in the display layer.
- Develop and deploy a system for managing and storing metadata attributes using Excel, Microsoft List, or similar no-code/low-code technology compatible with the data warehousing environment.
- Develop a script to query the OP10 database and return the desired parameters.
- Develop a script to query the SCADA historian and return the desired tags, aggregated to an hourly timestep. Temporal aggregation method will be tailored to the specific tag (e.g., for some tags an hourly average may be appropriate, while for others an hourly maximum may be appropriate).
- Conduct a one-time manual export of up to 5 years of historical data from SCADA Historian and OP10 database and load the data into the data warehouse. This work is limited to extraction of data from database or historian tables and does not include extraction of data from files.
- Configure, test, and deploy data pipelines and scheduling/orchestration features to establish recurring acquisition of data exported from SCADA and OP10 systems.

Hazen

Task 1.3: Calculate New Time Series Data

The goal of this task is to develop new calculated time series that are critical for process control, compliance, and optimization. These will include loading rates to processes such as the primary and secondary clarifiers, and secondary process key performance indicators (KPIs) such as total and aerobic solids retention times (SRT and aSRT), RAS rates, WAS rates, chemical usage normalized to forward flow, chemical usage per unit mass of nutrient removal achieved, air usage per unit of BOD/nutrient removal, and energy use per unit flow treated. These calculated time series will be developed for both historical data and for new incoming data as part of the operational system. Key activities include:

- Collaborate with plant technical staff to identify and define up to 50 new calculated time series.
- Develop equations and write scripts to generate new time series data. Scripts will be generated in SQL, Python, or other language consistent with the data warehousing environment.
- Validate script output by comparing summary statistics to expected upper and lower bounds for each parameter.
- Execute the scripts for historical data and store the data in the data warehouse.
- Configure, test, and deploy the scripts to automatically calculate and store new time series data on a recurring basis.
- Populate metadata for new calculated time series, including location and parameter attributes, user friendly names, and reference values.

Task 1 Deliverables:

- Scripts for querying City SCADA Historian and OP10 database
- Cloud-based SQL data warehouse containing up to 5 years of selected historical SCADA and OP10 data
- Scripts and/or data system configurations for recurring acquisition of data exported from SCADA and OP10 systems.
- Scripts for recurring calculation of new calculated time series.
- Metadata table for raw and calculated time series

Task 2. Data Exploration and Cleaning

The goal of this task is to develop data cleaning protocols to ensure that subsequent analytical, modeling, and visualization tools are driven by clean, quality-assured data. The focus will be on a subset of time series critical to model accuracy and performance, including influent flows and concentrations, airflows, sensor data (DO, ammonia), effluent quality, and solids production (primary and WAS sludge per unit flow treated). Data cleaning will be performed for up to 100 time series critical to performance of the models developed under Tasks 5 and 6.

Task 2.1. Initial Data Quality Review

Hazen will review available historical data from the data warehouse (e.g., up to 5 years of hourly data) with the goal of identifying data quality issues. This will involve creating a time series plot in Python for each of the 100 variables of interest. A process engineer (subject matter expert) will review each plot and identify obvious outliers, (e.g., an influent orthophosphate measurement of 100 mg/L when all the other values are below 10 mg/L). Those outliers will be manually removed from the dataset that will later be used for model development. Then, a data scientist will replot the cleaned data. Up to two additional iterations will be performed.

Following the first round of review by the subject matter expert, a more in-depth look at data quality issues will begin. For example, data stagnation may be seen in some measurements like sensors if a basin is taken offline. A measurement that appears to stagnate will be compared to other measurements to verify if this is the product of a basin being offline (e.g., DO readings are zero and airflow stagnates in the same basin, and flow through the other oxidation ditch doubles). This process of data review will identify the issues most frequently encountered in the dataset, including missing data, data out of range, stagnant data, or abrupt changes in the data. The issues identified and catalogued will inform the data cleanup methods employed in Task 2.2.

Task 2.2. Implement Data Cleaning Protocols

Based on the most frequently issues identified in the dataset, Hazen will develop data cleaning protocols for up to 100 time series. Cleaning protocols will be implemented using the Python Pecos algorithm, which identifies a normal range of operating values for each parameter and hence detects outliers; stagnation, missing data, and abrupt changes in values. For the 100 variables in data cleaning, up to a total of 200 custom rules may be implemented for targeted data cleaning. For instance, a stagnant airflow reading would trigger a check to see if the concerned oxidation ditch is out of service so that the airflow for that basin (or zone) can be recorded as zero. Missing hourly data will be replaced with the average value for the week for that same time of day and/or the same instrument reading in a parallel location.

Data cleaning will be executed using Python or similar scripts within the dedicated cloud workspace, and cleaned data will be integrated into the data warehouse. The raw and cleaned data will be maintained as distinct datasets to allow the analyst to visualize and compare raw and cleaned time series in the Power BI dashboard (Task 3).

The cleaned data will be displayed in Power BI and a numerical value assigned to each daily/hourly datapoint of the 100 time series selected. The coded values shall be as follows:

- 0 = good data, no issues found
- 1 = abrupt change
- 3 = data outside of high/low boundary
- 4 = abrupt change + data outside of high/low boundary

- 5 = stagnation
- 7 = missing data
- 8 = stagnation + data outside of high/low boundary

There will be three pages in Power BI dedicated to data cleaning visualization. The first page will display daily data and its coded value for each time series. The second page will do the same for hourly time series. The third page will plot each time series and its low and high boundaries. The duration of the timescale can be varied to have as much or little granularity as desired.

The data cleaning process will be established for near real-time cleaning through Power BI and Python scripting. The data cleaning scripts will be employed for three months on a trial basis. During this time, staff should review the results and provide comments at the conclusion of the trial. At the end of the trial period, the scripts will be finalized. It is anticipated that up to 20 rule modifications will be implemented based on feedback from City staff.

Task 2 Deliverables:

- Cleaned historical data for up to 100 time series, stored in the data warehouse as distinct time series and available for visualization in the Power BI dashboard.
- Data cleaning and filling scripts that will be implemented in near-real time on a daily/hourly basis, as specified for each of the 100 time series.

Task 3. Data Visualization Tool

The goal of this task is to develop a comprehensive visualization and reporting tool for near real-time assessment of PRWRF performance and process health. The tool will allow City staff to visualize observed data (Tasks 1 and 2), and mechanistic model-predicted data from Task 5 when used with Process Advisor results (Task 6). The overall objective is to enhance situational awareness and integrate data-driven process analytics with operator experience. Note that the Task 5 deliverable is a stand-alone web application that represents the physical layout of the PRWRF, which is separate from the Power BI tool discussed to this point.

The tool will be deployed in Hazen's tenant within Microsoft's Power BI web service and updated at an approximately hourly cadence. The refresh schedule may be further fine-tuned to optimize delivery and usage within the constraints of the Power BI web service. City team members will access the tool via desktop, tablet, or mobile devices.

Task 3.1. Develop Power BI Architecture

The goal of this task is to design, build, and deploy the core Power BI architecture necessary to deliver interactive Power BI dashboards to the end user. A robust backend and semantic model are essential for functionality and scalability as data and components are added to the system. Key activities include:

- Configure a Power BI semantic model and dataflows to integrate data and metadata from the data warehouse. Design shall consider import, direct query, composite, or other options as appropriate based on data volumes and analytical needs.
- Enrich core data and metadata tables with a master calendar table plus ancillary helper tables as needed.
- Set up a Power BI workspace for access by City and Hazen team members, and publish the Power BI report to the workspace
- Establish data refresh schedules to update dashboards with SCADA and OP10 data and calculated time series data regularly. Coordinate with end users to determine an appropriate refresh interval.

Task 3.2. Develop Observed Data Pages

The goal of this task is to create interactive dashboard pages that allow modelers, process engineers, and operations staff to easily review and analyze PRWRF operations and process performance data. The pages will be designed to meet multiple different end-user needs, including data inventory, data quality review, near-real-time process status, historical trending, and detailed process performance comparing against targets and historical benchmarks.

Observed data pages developed under this task will include at a minimum:

- Data Inventory: View all tags in the dataset and summary statistics for each tag (e.g., number of data points, min, max, avg, date range)
- Data Gaps: Highlight missing data. Note extended missing data periods will not be filled in using the Pecos algorithm described earlier. That is for short-duration events spanning a few hours or 1 - 2 days depending on the granularity of the data received.
- Single-Tag Data Navigator: Visualize time series data for any single tag. Assess daily, weekly, monthly, yearly, and seasonal trends, view percentile plots, compare year-on-year and month-on-month averages. Compare historical and current values against targets, benchmarks, limits, or other reference values.
- Single-Tag Data QC: Visualize raw versus cleaned time series data for any single tag.
- Multi-Tag Data Navigator: Plot and visualize multiple tags together, with percentile distributions and tabulated summaries of averages, minimums, maximums, and key percentiles. Plotting pages will leverage the capabilities of native Power BI visualizations; custom-coded visualizations are not included in this task.
- Correlation Analysis: Perform simple correlation analysis on selected tags, displaying results as a heatmap or scatter plot.

In addition, up to 5 custom pages will be developed to serve specific purposes and highlight selected metrics of interest to plant process and operational staff. These pages will be tailored to display plant-wide or process-specific metrics that are frequently reviewed or required by operations staff to make

decisions. The custom pages will provide a clear and concise overview of specific processes or topic areas, making it easier for staff to monitor and analyze important key aspects of their operation. As an example, custom pages might include:

- Interactive process flow diagram (PFD): An interactive PFD can be developed which displays the latest values of critical metrics adjacent to the relevant unit process or process areas. Additionally, tooltips can be provided, which allow users to hover over displayed metrics to get additional statistics for that tag.
- Nutrient Removal Performance: Dedicated pages for the removal efficiency of specific nutrients or species, including metrics like effluent concentrations, nutrient removal per pound of chemical used, and efficiency of bio-P or denitrification.
- Secondary Process Configuration: Highlights the set-up of the secondary process and the resultant effluent quality, displaying metrics like current MLSS, wasting rates, number of oxidation ditches in service, SRT, DO concentrations and oxidation ditch or secondary effluent ammonia.
- Energy Consumption: Focuses on energy use in the treatment process comparing the latest overall energy use to historical consumption. Metrics like energy use normalized to forward flow or blower energy use per pound of oxygen required are highlighted.
- Historical data sorter: Allows sorting of operational data by influent load, flow, and temperature, enabling staff to identify operationally similar days and conduct data-driven what-if analyses. This page can be updated to include the scoring algorithm (Task 6) to help operations staff identify high-performing decisions.

These pages will be developed through an interactive process that includes:

- Needs Assessment: Hazen meets with City staff to identify overall concepts, key questions, and specific requirements. This involves a 2-hour virtual workshop and up to 10 hours of individual interviews.
- Draft Development: Based on City feedback Hazen will develop up to 5 custom pages plus associated metrics.
- User Testing: Deploy draft pages for 1-2 weeks, allowing City staff to use and provide feedback.
- Feedback Collection: City staff provide prioritized feedback in a 1-hour comments virtual meeting or a document synthesizing feedback from multiple users.
- Revisions: Hazen addresses feasible comments within identified task budget limits and tracks remaining items.
- Final Deployment: Hazen deploys the final versions of the custom pages after City staff verify that comments were satisfactorily addressed.

Task 3.3. Develop Model Input/Output Pages

The goal of this task is to develop interactive dashboard pages for reviewing input and output data for the various models that comprise the overall Process Advisor Tool, including the Influent Model, the Process Model, the Setpoint Model, and the Optimization Tool. These pages will be geared for use by system

administrators, modelers, and analysts, and are focused on model data QC, model verification, model performance evaluation, and ad hoc plotting/tabulation.

The measures and semantic model updates developed under this task will establish the foundation for additional dashboard pages in Task 3.4, which will be geared for use by plant engineers and staff focusing on process performance and operator guidance.

Key activities include:

- Configure the Power BI semantic model and dataflows to integrate input and output data from the Influent Model, the Process Model, the Setpoint Model, and the Optimization Tool.
- Configure the semantic model to store and handle multiple different model realizations, such that users can examine model predictions over time (e.g., visualize output from today's model simulations as well as those executed last month).
- Configure the semantic model and associated metadata tables to allow easy comparison between observed and model-predicted values (e.g. compare observed vs predicted influent TN load, or observed vs predicted values).
- Create measures and dashboard pages for interactively displaying model inputs and outputs. These pages will be geared toward model data QC, model verification, model performance examination, and ad hoc plotting/tabulation.

Task 3.4. Develop Operational Guidance Pages

The goal of this task is to develop interactive dashboard pages for reviewing operational guidance provided by the various models that comprise the overall Process Advisor Tool, including the Influent Model, the Process Model, the Setpoint Model, and the Optimization Tool. These pages will be geared for use by plant operations staff and will feature integration of observations, predictions, and recommendations.

Up to 3 custom Operational Guidance Pages will be developed under this task. As an example, custom pages might include:

- Influent Load Predictions: Visualize predicted influent flow and load parameters for the next 24 hours. This page will help operators anticipate and prepare for varying influent conditions, incorporating model predictions and historical trends.
- Process Performance Indicators: Display key performance indicators (KPIs) such as SRT, MLSS, DO concentrations, and effluent quality metrics. This page will integrate model predictions and real-time data to provide a comprehensive overview of process performance.
- Optimization Recommendations: Present recommended operational setpoints for parameters like airflow, DO/aeration setpoints, wasting rates, and internal recycle rates. This page will integrate outputs from the Optimization Tool to guide operators in achieving optimal process performance.

Development of the pages will be similar to the custom page development process described above.

Task 3 Deliverables:

- A Power BI application containing one or more reports with multiple pages for interactive visualization of observed and model-predicted operational and process control data.
- Documentation, comprising a high-level PowerPoint presentation summarizing Power BI dataflows; an Excel-based data dictionary; and explanatory technical notes embedded within the Power BI application as comments, tooltips or metadata.
- Up to 8 hours of in-person and/or virtual training in usage of the Power BI tool.
- 40 hours of post-acceptance follow-on support for up to one year beyond delivery of the tools.

Task 4. Evaluate Real-Time Process Control Strategies

The ability to incorporate existing and/or new online analyzers into control strategies will be evaluated since this can provide immediate operational benefit. Up to three control strategies will be evaluated including but not limited to:

- Ammonia-based aeration control to optimize nitrification and denitrification simultaneously
- Automated aerobic SRT control to maintain nitrification as a load and temperature changes
- Nitrate-paced internal recycle to optimize energy and denitrification capacity
- Orthophosphate-paced metal salt addition to optimize cost, energy, and nutrient removal
- Live state point analysis tool to assess secondary clarifier capacity

In addition, the value of primary effluent COD and ammonia measurements will be evaluated as optional input to the holistic optimization modules described later.

The result of this task will be a presentation and a ten-page memorandum outlining the operational control strategy, capital cost estimates associated with implementation (equipment purchase, installation, and integration services), and a qualitative description of the programming logic. Examples of these programs used successfully at other WRFs will be presented as well. The memorandum is not a functional control description suitable for programming by an integrator, nor does it include any process modeling required for site-specific automated aerobic SRT control. That level of detail could be provided in future contracts.

Since no prior design work has been implemented at the PRWRF by Hazen, cost estimates will be order of magnitude and assume that power sources and wire and conduit pathways are available at the desired locations. This task does not include a detailed electrical evaluation.

Task 4 Deliverables:

- Virtual presentation and a ten-page memorandum outlining the operational control strategy, capital cost estimates associated with implementation (equipment purchase, installation, and integration services), and a qualitative description of the programming logic.

Hazen

Task 5. Develop Mechanistic Process Digital Twin (Process Model)

Mechanistic wastewater process models developed using commercial simulators (such as BioWin, GPS-X, or SUMO) are often employed for wastewater treatment facility design or process optimization planning. These models are complex and require detailed user training, limiting the number of staff who can run or modify simulations. Process advisory digital twins help overcome this operational barrier by expanding the number of staff who can leverage the model. The goal of this task is to create a mechanistic process digital twin to enhance the operational capabilities and process understanding of PRWRF staff.

The process digital twin and optimization toolkit (including the data-driven additions from Task 6) will be hosted by Hazen as a web application. The City will be responsible for hosting fees required to ensure full-time availability of the tool for City staff. Hazen will provide an estimate of these routine pass-through cloud service hosting fees to ensure transparency and accurate budgeting for the City.

Task 5.1. Develop Mechanistic Process Model

The mechanistic process model for the facility will be initially developed in BioWin under and existing scope task. Process model development will be based on historical operational data plus plantwide process sampling data collected from June 18 – 26, 2024.

The process model will be calibrated using a selection of plant data (to be determined by subject matter experts based on observed plant operational metrics and mass balances over different time periods) and validated against data from a different time period. Further context on process model development can be found in the scope outlining PRWRF Engineering, Operational Support, and Related Services in Response to EPA Administrative Order CWA-06-2024-1745, provided by Hazen to the City on March 18, 2024.

Under this scope, an uncalibrated SUMO model of the PRWRF will be developed. SUMO is proposed to leverage their advanced and well-documented digital twin API packages for live data integration and equipment control. An uncalibrated SUMO model will be deployed initially and later replaced with a calibrated model when the calibrated BioWin model is complete. A comparison of the BioWin calibrated model and SUMO calibrated model results will be developed to verify the models are equivalent.

Task 5.2. Build Web Interface for Mechanistic Process Twin

A web application wrapping the SUMO mechanistic process model will be developed and deployed for PRWRF staff. Users will be able to change influent characteristics and operational parameters (e.g., basins or units in service, DO concentrations, RAS and WAS rates) to visualize process impacts. This version of the process model will not have any connection with the live data and is intended as a training tool to facilitate PRWRF staff understanding of treatment concepts, and view the impacts of operating the process in different ways on performance and effluent quality.

In addition to specifying influent characteristics and operational parameters, users will select the number of primary and secondary clarifiers in service and specify SVI. Historical primary clarifier performance

(percent TSS removal as a function of units in service and hydraulic loading rate) will be analyzed to develop a linear relationship between either units in service, and/or hydraulic loading rate and percent TSS removal. This relationship will then be hard coded into the web application. Secondary clarifier performance will be coded using known relationships between SVI, which the user will specify, and Vo and K, the downward settling velocity and compaction coefficient, respectively, commonly used to model sludge settling mechanistically.

As a web-based application, the mechanistic process digital twin will be able to be accessed by up to three staff via a web browser (e.g. Microsoft Edge) from desktop computers running Windows 10 or later. Facility operators will be able to utilize the tool to develop and test their ideas for optimization and/or learn from mistakes with no effect on actual plant operations.

Building the web application involves creating an interactive homepage, that is an aerial image of the plant, with a customized set of key inputs and outputs, such as process MLSS, wasting rates and effluent nutrient concentration levels, which will help the user visualize the facility's performance, relative to the permit limits. There will also be a second screen to focus on the secondary process configuration, so users can better evaluate the treatment process to ensure regulatory compliance. The second screen includes a graph that shows DO, ammonia, nitrate, nitrite, and orthophosphate concentrations along the length of the oxidation ditches.

The web application will be introduced to PRWRF staff through a 2-hour virtual training meeting, which will be recorded for future use. Introductory training materials will be presented in PowerPoint, and then the web application will be demonstrated.

Task 5.3. Add Gamified User Interface for Operator Training

Hazen will add "gamified" features to the web application that will allow operators to create their own profile and avatar, and keep track of their high score simulation. Up to ten unique profiles will be supported. As operators interact with the tool from Task 5.2, they will be able to change treatment process variables and see the impact on process settings (such as the impacts of changing MLSS and wasting rates on the SRT), process performance (such as effluent quality and nutrient profiles), process efficiency (such as chemical use and energy use per unit flow treated) and solids generation (i.e., primary solids and WAS generated per unit flow treated). The game score will be determined by the scoring algorithm developed in Task 6.

The gamified user interface is expected to increase operator engagement with the process model and allow them to easily interact and extract valuable insights from mechanistic process models, which are typically not intuitive or user-friendly and have a steep learning curve. There will be some limitations to this as SVI is specified by the modeler and not predicted based on mechanistic equations in SUMO. Therefore, that portion of the score would have to be determined by the user-entered value.

Task 5.4 Replace Uncalibrated Model With Calibrated Model

When the BioWin model has been calibrated, the SUMO model will also be adjusted to match the performance of the BioWin model. The results of this conversion and verification will be presented to

City staff in a virtual meeting. Then, the uncalibrated SUMO model in the mechanistic digital twin will be replaced by the calibrated version, resulting in more accurate and representative predictions.

Task 5.5 Review Process Model

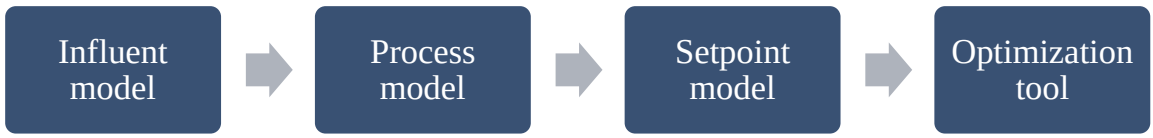
Approximately two months after deployment of the calibrated model, a virtual meeting with key stakeholders will be held to obtain operator feedback. Approximately 40 hours of additional development time will be included for operational enhancements to make the tool more useful.

Task 5 Deliverables:

- Uncalibrated SUMO model.
- Mechanistic process digital twin tool hosted by Hazen as a web-application. The web app will be geared for what-if process simulation and operator training with gamified features to promote engagement.
- Calibrated SUMO model.
- A presentation of the SUMO model calibration compared to the BioWin calibration.
- A two-hour recorded training course on using the process model.
- A follow-up virtual meeting 2 months after delivery to discuss user engagement and opportunities for improvement. 40 development hours are included in this scope.

Task 6. Process Advisor Tool

The goal of this task will be to build a Process Advisor Tool. The Process Advisor Tool includes an Influent Flow and Load Prediction Model, the mechanistic Process Model from Task 5, an equipment Setpoint Model, developed in this task, and development of an optimization algorithm and Optimization Tool to balance competing objectives in secondary treatment. This tool will take the mechanistic model from an offline training tool to a near real-time process advisory tool to guide operation of the secondary treatment system. The output of the tool will be hourly recommendations for airflow, DO/aeration setpoints, wasting rates, internal recycle rates and return activated sludge flow rates, and predicted energy and chemical consumption, SVI, and effluent quality. The following tasks are envisioned to develop the Process Advisor that leverages both mechanistic and data-driven components.



The first step in real-time system optimization is knowing what flow and loads are entering the PRWRF. While the process model in Task 5 is invaluable as a training tool, it is not linked to live data and does not know the influent conditions entering the PRWRF. Those conditions will be predicted using a data-driven model.

A data-driven Operational Setpoint Model is recommended to address three issues that mechanistic models alone cannot solve. First, mechanistic models don’t always represent real-world conditions accurately. They are simplifications of a more complex environmental system. Second, mechanistic

models often cannot directly incorporate live sensor data, which is also one of the most valuable indicators of real-world conditions. For example, the PRWRF has ammonia sensors near the end of the aerobic zone in the oxidation ditches. However, neither SUMO nor BioWin allows the user to specify the ammonia concentration at a given location in the process, this can only be specified on the influent. Therefore, it is not possible to use the sensor data in the process model directly. Third, mechanistic models to predict sludge settling properties from easily and routinely measured wastewater variables do not exist. Given that SVI is critically linked to secondary treatment capacity, some site-specific understanding of factors contributing to good/poor settling should be incorporated into operational decision making and optimization.

To address these limitations and gaps, a more robust representation of the system using a hybrid model that incorporates the mechanistic (SUMO) model and data-driven models of unknowns is recommended. Here, unknowns are things we would like to be able to predict like effluent ammonia, nitrate, orthophosphate, chemical feed quantities, energy use, SVI, and suggested internal flow rates like WAS, RAS, and nitrified recycle.

Before describing the tasks involved in this hybrid model development (Process Advisor Tool), it is important to understand the overall workflow and how the Process Model from Task 5 fits in. A flow diagram of the various components of the Process Advisor is shown in the figure below.

1. Influent Model (Task 6.1)

    a. Data-driven models will predict influent flow and load for the following day. This operation will run once a day around 10 pm.

    b. That average daily value for each parameter (flow, BOD concentration, etc.) will be converted to an hourly flow/concentration value using known diurnal flow and loading curves for PRWRF starting with midnight the following day, and running 12 am to 11 pm.

2. Process Model (Task 5)

    a. A dynamic 24-hour simulation using the Process Model will then ensue. The Process Model will emulate the operational control strategies used at the PRWRF. For example, if air is added to maintain a specific DO setpoint, that same approach will be modeled in SUMO.

b. Outputs such as energy and chemicals used and effluent characteristics from the Process Model will then become inputs to a data-driven model (the Setpoint Model).

c. This dynamic model will run from approximately 10:30 pm to 11:30 pm the night before the day it predicts values for.

3. Setpoint Model (Task 6.2). This data-driven model will run once an hour starting at midnight. Additional inputs to the data-driven model will include live sensor data.

    a. The Setpoint Model will recommend equipment setpoints for internal plant flows, DO, and airflow.

    b. The Setpoint Model will also predict effluent quality, energy and chemical use along with SVI.

    c. Optimization Tool (Task 6.3)

        i. A scoring algorithm that assigns targets, weights, and penalties to key variables will be developed. It is envisioned that this algorithm will include up to 8 variables: effluent ammonia, nitrate, total nitrogen, total phosphorus, and organic nitrogen; SVI, energy use for secondary treatment, and alum use.

        ii. An optimization algorithm will be applied to the scoring algorithm to maximize a daily score.

        iii. Each hour, a Python script will trigger the optimization algorithm to run the Setpoint Model iteratively to find an optimal operating strategy for the existing conditions.

        iv. The resulting variable values from the highest scoring algorithm will be returned hourly and displayed as a recommendation in the Power BI visualization tool (Task 3).

Task 6.1. Develop Influent Flow and Load Prediction Model

Hazen will perform exploratory data analysis to determine the most relevant variables for predicting influent flow and loading (COD, BOD, ISS, TKN, ammonia, TP). This step includes adding variables to the dataset to account for time lags in the system. Additional variables will be added and/or created as needed to predict hourly flows for the next 24-hours such as forecasted rainfall and streamflow. These influent flow and load predictions will be used as inputs to the mechanistic model. The mechanistic model will also receive information originating in SCADA (via a secure route established in Tasks 1-3) to specify the number of primary and secondary clarifiers in service, and the SVI from real data.

Up to eight algorithms will be developed to predict the following:

1. Average daily COD and BOD concentration today as a function of past values taking into account expected delays in laboratory data. If BOD is more accurate, COD (needed for the mechanistic model) will be estimated using the predicted BOD value and a fixed COD:BOD ratio. COD and BOD will be modeled as two separate variables, since they are expected to be predicted using distinct sets of predictor variables.
2. Average daily TSS concentration today as a function of past values. This will be converted to ISS (needed for the mechanistic model) using a fixed VSS:TSS influent ratio.
3. Average daily TKN and ammonia concentration today as a function of past values taking into account expected delays in laboratory data. If ammonia is more accurate, TKN (needed for the mechanistic model) will be estimated using the predicted ammonia value and a fixed ammonia:TKN ratio. Ammonia and TKN are being counted as two separate variables, since there may be differences in the approaches utilized to predict each of them.
4. Average daily TP concentration today as a function of past values.
5. Average daily Alkalinity concentration today as a function of past values.
6. Average daily influent flow.

The accuracy of these models and prediction approach will be considered to determine which models and approaches are best suited for deployment. For example, if the accuracy of the TKN model is poor but BOD is high, then TKN could be estimated from the BOD estimate and an average BOD:TKN ratio from historical data. It is assumed that a normalized diurnal flow and loading curve will be used to convert the daily average values to hourly values. For wet weather flow predictions, a more sophisticated predictive model could be developed under another scope. For this exercise, a simplification will be made to identify above average daily influent flow predictions as “wet weather,” and replace the normalized diurnal flow pattern with one wet weather hydrograph of the City’s choosing.

Task 6.2. Develop Operational Setpoint Model

Hazen will perform exploratory data analysis to determine the most relevant variables for predicting 16 operational setpoints and/or effluent parameters one hour in the future including but not limited to effluent ammonia, nitrate, organic nitrogen, and TP; and SVI, alum use, energy use for secondary aeration, RAS flow, internal recycle flow, DO setpoints, and airflow setpoints. This step includes adding variables to the dataset to account for time lags in the system. Outputs from the mechanistic model will also serve as inputs to this model. One Python model with up to sixteen outputs will be developed.

The accuracy of the Setpoint Model at predicting each output value will be presented and assessed. If a desired target is not accurately predicted, additional variables will be added and attempts will be made to optimize the accuracy of the model. A reasonable degree of accuracy is an R^2 value of approximately 0.7, but this may be adjusted depending on the mean absolute error relative to the average value of each parameter. Up to three iterations of model refinement to improve accuracy will be attempted. Variables with poor predictive accuracy will not be deployed in the final model.

It is anticipated that the XGBoost model will be utilized for this project. For simplification, each model will have the same independent variables weighted differently.

Hazen

Model quality and accuracy will also be evaluated using subject matter expertise, feature importance tables, and SHAP plots, which seek to explain the most important variables in each model and their directionality on the predicted variable. This is to verify that the logic in the model is appropriate.

Task 6.3. Create Scoring Algorithm and Optimization Tool

Scoring Algorithm. A scoring algorithm will be developed and deployed for assessing current performance (as part of Task 3) and identifying potential optimization solutions to provide actionable insights to plant operations staff (as part of Task 6). This algorithm will incorporate competing goals and appropriately weigh the outcomes. Hazen will solicit feedback from the City of Santa Fe to assign weights to different process goals, such as effluent ammonia, effluent phosphorus, chemical use, energy use, etc.

An example scoring algorithm for another facility is shown below.

Parameter	Average	Target	Weight
Effluent Ammonia (mg/L)	0.08	0.1	5
Effluent Nitrate (mg/L)	0.9	1.0	0.8
Effluent TP (mg/L)	1.3	1.4	1.2
Effluent Organic Nitrogen	0.9	0.9	0.5
SVI (mL/g)	83	90	0.004
Blower Energy (kW)	1508	1300	0.000003
Alum (gpd)	765	700	0.00001
Methanol (gpd)	842	485	0.00005

Three example values and point scores are shown below. In Example 3, the nitrification points are assigned as follows: (target – value)^2 x weight = (0.1-0.08)^2*5 = 0.002. This approach, developed with a holistic approach to treatment, allows the value of various treatment components like nitrification, denitrification, phosphorus removal, and settling properties to be compared with a single score.

Example	Ammonia	Nitrate	TP	SVI	Blower Energy	Alum	Methanol	Organic N
1	0.4	1.5	1.6	110	2000	1000	1200	1.1
2	0.2	1.1	1.5	100	1500	850	720	1
3	0.08	0.8	0.6	80	1000	400	400	0.8

Example	Nitrification Points	Nitrate Points	TP Points	SVI points	Energy Points	Alum Score	Methanol Score	Organic N Score	Total Score
1	-0.4500	-0.4000	-0.2400	-1.6000	-1.4700	-0.0030	-0.0036	-0.1000	-4.3
2	-0.0500	-0.0800	-0.1200	-0.4000	-0.1200	-0.0015	-0.0012	-0.0500	-0.8
3	0.0020	0.1600	0.9600	0.0400	0.0009	0.0030	0.0004	0.0500	1.2

The weights assigned to the competing goals will be tailored specifically to the PRWRF. The algorithm will assign points (or rewards) or penalties based on whether the process meets the treatment goals and the degree to which those goals are being met, exceeded, or unmet. Up to two versions of the weights can be programmed, for examples if there is a seasonal component to account for differences in seasonal permit limits or fundamental seasonal changes in operational paradigms, or to represent two operational philosophies—one that weighs regulatory compliance without regard for cost, and a second that incorporates energy and cost savings.

This scoring algorithm will be used to assess the current performance of the process alongside the visualization tool in Task 3. It can also be applied to past data where all required information is available. This historical data can be searched and filtered to identify days similar to the present to see how past performance was scored, giving the operator access to the operational setpoints that led to the best and worst outcomes in the past to aid in decision-making. Ultimately, it will be integrated with the completed hybrid (mechanistic + data-driven) tool developed in Task 6, which will automate the process. However, it will be available to operators sooner in a manual, data-driven historical data search format under Task 3.

Optimization Tool. The Optimization Tool involves writing a Python script that will trigger the optimization algorithm to run the Setpoint Model iteratively to find an optimal operating strategy for the existing conditions. This will happen each hour. The optimization algorithm will allow effluent variables to vary within an acceptable range (e.g., ammonia between 0.05 mg/L and 0.3 mg/) while predicting the behavior of the other variables in the optimization algorithm until a maximum score is achieved. The resulting variable values from the highest scoring algorithm will be returned hourly to the display layer in the Power BI visualization in Task 3 as a recommendation.

A Python script will also record the same values of those operational variables alongside the recommendation, so that after six months the recommendations can be compared with actions. The goal is to see how much the two programs are alike and different, and to build trust in this control strategy. Those two variables can be visualized side-by-side in the Power BI visual provided as Part of Task 3. The point is to build a database of advisory guidance to compare to actual control strategies. In this scope, the recommendations will never advance beyond an advisory tool, but if PRWRF staff like the results and trust the results, these recommendations could be integrated into a control strategy at an additional cost.

Task 6.4. Deploy Process Advisor Tool

Both the mechanistic and data-driven models need to be deployed in a digital cloud environment as a workflow. This includes the Influent Model, the Process Model, and the Operational Setpoint Model. As stated earlier, the Influent Model will run once a day at a fixed time, while the other two will run hourly in a sequence. This workflow also involves obtaining other necessary information from SCADA for the Process and Operational Setpoint Models such as the number of primary and secondary clarifiers in service, instrumentation data, the number of basins in service, etc.

The SQL data foundation (Task 1) will be leveraged to securely prepare the required inputs and store the outputs from each model in the sequence. SQL, Python, PowerQuery and/or other scripts will be used to move this information through the workflow. The following views in SQL are expected:

- Prepared data for influent models (8 views updated daily)
- Hourly diurnal flow and load curves for COD/BOD, TKN, TP, TSS, flow, and alkalinity (6 views that do not need to be updated)
- Output from mechanistic model (1 view updated daily)
- Prepared data input for Setpoint Model (1 view updated hourly)
- Output from Setpoint Model (1 view updated hourly)

This will be a Hazen-hosted Azure environment that will display the recommended operating points to the City via the Power BI dashboard (Task 3). This workflow is expected to take up to two hours to complete daily. Hosting fees will be estimated during the course of the project and communicated to the City. While there are no markups, the fees will be an ongoing expense for the City. Success of this step is predicated upon being able to obtain the proper data connectivity linkages described earlier in the scope.

Task 6.5. Documentation and Training

Hazen will develop a 20-page memorandum documenting the model development and deployment process. An appendix will contain a figure showing the accuracy of each data-driven model on a scatter plot of predicted versus observed values, a feature importance plot, and a SHapley Additive exPlanations (SHAP) plot. This single page document of each model will visually convey its accuracy and the importance and directionality of the independent variables.

Each step of the workflow (Influent Model, automated running of the Process Model, and the Setpoint Model) will be tested and the results shared with the City. Each step will be operated in a test mode and monitored for 30 days by Hazen staff, which will review the results on a weekly basis. During this time period, City staff will also have access to the visualization of results. Following the 30-day test, a virtual meeting will be held to discuss any feedback. Approximately 40 hours of additional development work are allocated for any modifications, and upon completion, the model will be considered complete.

A two-hour virtual training presentation will be held and recorded for PRWRF staff. This presentation will review the content of the technical memorandum and walk users through how to view the results of the models in the Power BI platform. An additional 40 hours of maintenance work to be allocated over the following 6 months are also included. Any additional effort beyond that will require a new scope and fee.

Task 6 Deliverables:

- Three additional Power BI pages displaying the recommendations from Process Advisor Tool.
- Azure workflow to sequentially run models and store model outputs.
- Scoring algorithm to enable assessment of current process performance and operate the Optimization Tool.

- 20-page technical memorandum.

Task 7**.** Data-Driven E. coli Model

PRWRF staff may wish to explore additional data-driven modeling outside of secondary treatment and the Process Advisor workflow. This scope item is included to account for one additional data-driven model, which can be developed and deployed as part of Task 3 (alongside the Task 6 deployment of the Process Advisor tool). It is anticipated that the City would like to develop a model to predict E.coli values one day in advance.

The technical approach will be similar to the influent concentration and load model development in Task 6.1. However, it is included separately from Task 6 because the outputs of the models developed under Task 6 could potentially be used as input variables for this model, and it is also anticipated that this model will utilize different independent variables from the models in Task 6, necessitating additional effort. The model in this task is anticipated to include other variables such as secondary effluent characteristics, which would not be appropriate to include in the influent model prediction and a downstream measurement cannot predict an upstream value.

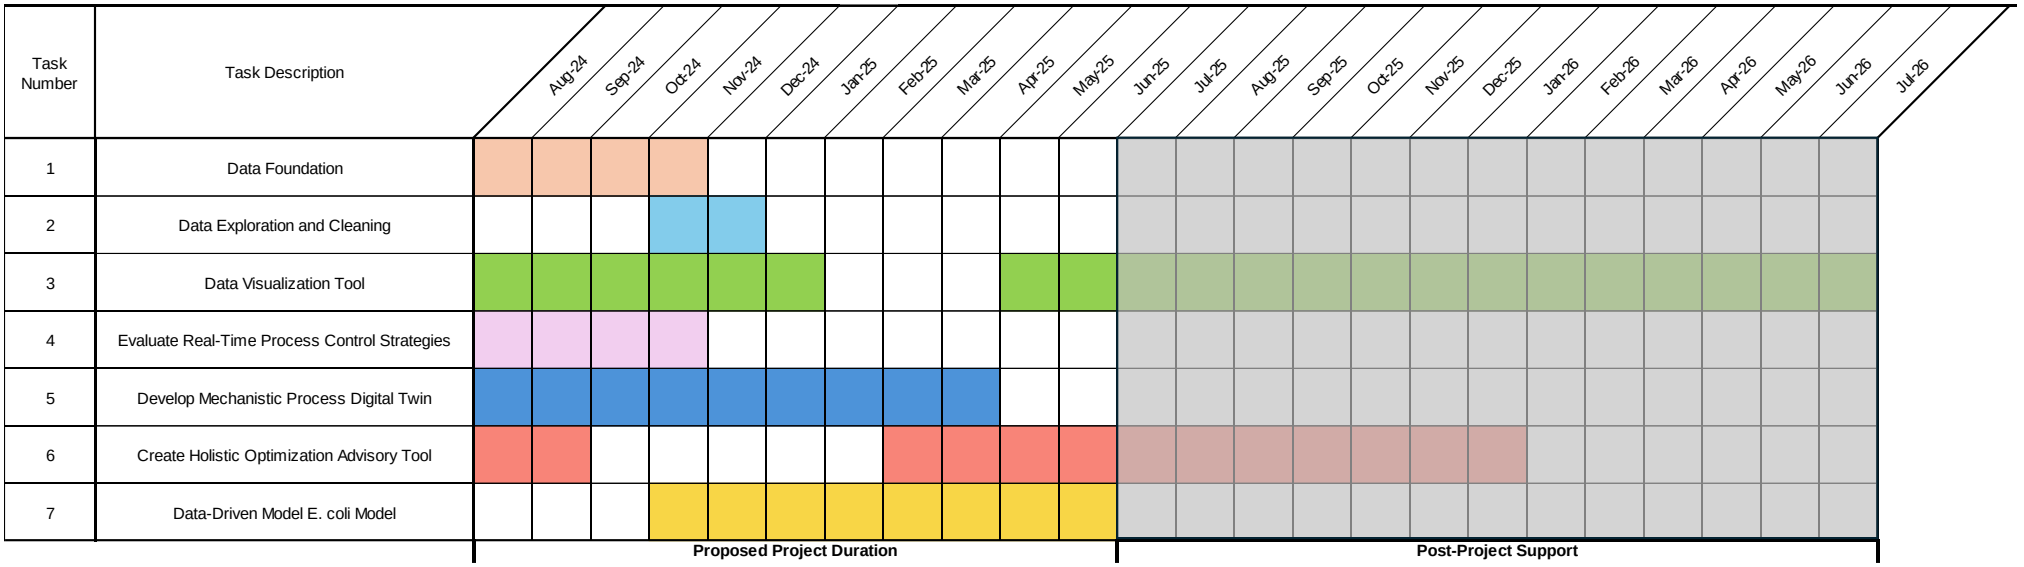
The accuracy of this model will be evaluated using the same approaches described in Task 6. If acceptable accuracy is achieved, this model will be deployed alongside the Process Advisor Tool in Task 6.

A 10-page technical memorandum summarizing the development of this model will be provided. A two-hour virtual training session with City staff will be included and recorded to summarize the model development and document the functionality of the tool and its intended use.

Task 7 Deliverables:

- One additional Power BI page displaying the E. Coli predicted value for the following day.
- Azure workflow to sequentially run models and store model outputs.
- A 10-page technical memorandum summarizing the development of this model.
- 2-hour virtual training workshop.

Meetings



As described above, Hazen will host six (6) virtual progress meetings and three (3) virtual workshops during the course of this task order. The progress meetings will be aimed at providing progress updates to the City as well as soliciting necessary feedback from the City on forthcoming deliverables. The workshops will focus on process staff and operator training in using the mechanistic process digital twin initially, and the Process Advisor Tool ultimately. While the exact agenda for the meetings may be modified in accordance with tool status or priorities for discussion or feedback, the meetings and workshops are broadly expected to cover the following:

Virtual Meeting / Workshop Number	Associated Tasks	Broad Meeting / Workshop Topic
Meeting 1 (May be up to 5 meetings 1.1, 1.2, 1.3, 1.4, 1.5)	1	Meeting with IT or Other City Staff as Needed for Data Sharing, Access and Continuous Updates
Meeting 2	2	Meeting to Review Data Flow and Data Cleaning Efforts
Workshop 1	3	Review General Data Visualization Tool (Power BI) and Gain Feedback for Finalization of Custom Pages
Meeting 3	3	Meeting to Solicit City Inputs on Operational Guidance Pages
Meeting 4	4	Meeting to Review Control Strategies
Meeting 5	5	Meeting to Train PRWRF Staff on Process Twin Web Application
Meeting 6	5	Meeting to Obtain Operator Feedback on Calibrated Twin
Workshop 2	6	Workshop to Review Final Tools (Power BI and Web-App) with City
Workshop 3	7	Progress Workshop for Data-Driven E.coli Modeling and Integration into Tools

Schedule

The figure on the following page provides a summary of the timeline for the proposed tasks. The timeline provided here assumes the completion of Task 1.1 as Time “Zero”, i.e., the timeline of months provided in the figure below is contingent upon the completion of the data warehouse set-up

Develop Mechanistic Process Digital Twin
6
Create Holistic Optimization Advisory Tool
7
Data-Driven Model E. coli Model
Proposed Project Duration
Post-Project Support

Hazen

Assumptions

1. For the data-driven modeling portion, at least 3 years of historical daily influent and effluent flow and concentration data for predicted parameters is available for analysis. Daily E. coli measurements and secondary effluent quality data are required for Task 7.

2. For the data-driven modeling portion, at least 6 months and preferably longer of historical hourly operational and flow data for predicted parameters is available for analysis. This includes but is not limited to DO analyzer readings, airflow measurements, blower/aerator energy use, SVI (daily is okay), nutrient analyzer readings, RAS flow, influent flow, WAS flow, and internal recycle flow. This time period must overlap with the above.

3. Microsoft Azure shall be the Cloud-based environment for digital tool deployments.

4. Santa Fe will access all deployments through HazenCloud, which is a Hazen-hosted Azure space. Hazen issues credentials to individual users and organizations.

5. Data acquisitions and connections can be made within two months (Task 1.1). If this timeline is not possible, the rest of the schedule will need to be adjusted accordingly.

Budget

The proposed not-to-exceed budget to provide the services described herein is $1,120,550. However, the $144,852 remaining in the budget for Task 700 – Digital Twin has been applied as a credit to result in a budget authorization request of $993,892.

Attachment 1 provides a budget breakdown for Task 1 – 7. All work will be performed on a time and materials basis. Labor will be billed using categorical rates. Expenses may include reimbursable mileage, airfare, lodging, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Hazen

Attachment 1: Proposed Budget

		Total	Fee		
Task	Description	Hours	Labor	Expense	Total
1	Data Foundation	716	$143,187		$143,187
2	Data Exploration and Cleaning	324	$73,591		$73,591
3	Data Visualization Tool	673	$124,844	$1,000	$125,844
4	Evaluate Real-Time Process Control Strategies	232	$54,450		$54,450
5	Develop Mechanistic Process Digital Twin	992	$263,499	$2,000	$265,499
6	Create Holistic Optimization Advisory Tool	1700	$389,567	$2,400	$391,967
7	Data Driven E. coli Model	275	$66,011		$66,011
	Credit for Budget Remaining in Task 700		($144,852)		($144,852)
	Subtotal Including Credit				$975,698
	NMGRT (8.1875% of Labor)			$18,193	$18,193
	TOTAL	4,912	$970,298	$23,593	$993,892

Hazen

City of Santa Fe, NM
Paseo Real WRF Onsite Operational Support
Scope of Work

1. Project Understanding

The City of Santa Fe (the City) has requested a scope from Hazen and Sawyer (Hazen) to provide onsite operational support at the Paseo Real Water Reclamation Facility (PRWRF). The City has requested full-time support for two months followed by part-time support for the remaining duration of Hazen's contract scheduled to end on September 30, 2026.

2. Personnel

Hazen and Sawyer proposes the following staff for this assignment:

- Tom Pfiester – Grade A Wastewater Treatment Operator licensed in Texas and Florida with 21 years of wastewater treatment operational experience. Prior to joining Hazen, Mr. Pfiester most recently served as Assistant Director of Wastewater Operations for Miami-Dade County.

- TJ Lynch – Grade IV Wastewater Treatment Operator licensed in North Carolina and Virginia with 31 years of wastewater treatment operational experience. Prior to joining Hazen, Mr. Lynch most recently served as Assistant Director of Raleigh Water.

- Charlie Leder – Level 4 Wastewater Treatment Operator licensed in New Mexico with 47 years of wastewater treatment operational experience. Prior to joining Hazen, Mr. Leder most recently served as Manager of Plant Operations for the Albuquerque Bernalillo County Water Utility Authority.

3. Scope of Services

Hazen staff will serve as an extension of the City's staff to support the operation of PRWRF. Hazen staff will provide the following services while stationed at the PRWRF:

- Regularly meet with City staff to assess operational challenges and goals.
- Review and reinforce PRWRF operational and regulatory requirements with City staff.
- Provide suggestions to improve plant operations and treatment efficacy.
- Provide hands-on troubleshooting support.
- Help develop Standard Operating Procedures (SOPs) and other operational guidelines.
- Coordinate with other Hazen staff to keep them apprised of onsite activities and new developments.

4. Schedule

The budget is based on the following schedule assumptions.

- Mr. Pfiester will be stationed at PRWRF full-time July 24, 2024 through September 27, 2024. He will then be stationed at PRWRF part-time (25%) October 1, 2024 to September 30, 2026. During the part-time phase, he will make one 1-week trip to PRWRF per month. The budget includes an additional three weeks of onsite support so Mr. Pfiester can spend four consecutive weeks onsite during the period spanning October 1, 2024 to September 30, 2026. The timing of the 4-week trip will be coordinated by the City and Hazen.

- Mr. Leder will be stationed at PRWRF part-time (50%) during September 2024. He will then be stationed at PRWRF part-time (25%) October 1, 2024 to September 30, 2026.

- Mr. Lynch will periodically visit PRWRF up to four (4) times between September 1, 2024 and September 30, 2026 to provide additional onsite support.

5. Assumptions

The following assumptions have been made in preparing the Scope of Work.

- Hazen staff will not function as the PRWRF Operator-in-Charge. Hazen's role is limited to operations support by providing assistance and suggestions as defined above. Neither Hazen nor individual Hazen staff assume liability for regulatory compliance.
- Monthly Operating Reports (MORs) will be reviewed, signed, and submitted by City staff. Hazen staff will not sign MORs or other regulatory documents.

6. Budget

The proposed not-to-exceed budget to provide the services described herein is $1,050,000. Attachment 1 provides a budget breakdown. All work will be performed on a time and materials basis. Labor will be billed using categorical rates. Expenses may include reimbursable mileage, airfare, lodging, car rentals, other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Item#_____
Munis Contract#_3204638
Original Contract Item# 24-0299
SWPA/GSA/Coop/RFP/ITB #: Emergency

CITY OF SANTA FE
AMENDMENT NO. 1 TO
PROFESSIONAL SERVICES CONTRACT
ITEM# 24-0299

This AMENDMENT No. 1 (the "Amendment") amends the CITY OF SANTA FE Professional Services Contract, dated April 11, 2024 (the "Contract"), between the City of Santa Fe (the "City") and Hazen & Sawyer (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Contract, Contractor has agreed to provide Engineering Support Services to assist in bringing the Paseo Real Wastewater Reclamation Facility back into compliance with its NPDES permit.

B. Pursuant to Article 14 of the Contract, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. SCOPE OF SERVICES

Article 1 of the Contract is amended to add the following additional tasks to the existing Scope of Work:

Additionally, the Contractor shall provide the following Services:

Task 1 – Paseo Real WRF Asset Inventory and Condition Assessment

A summary of the major elements of this task order is listed below:

- Review of existing data and records
- Data validation and acceptance – establishing the limits and hierarchy of what to include in asset inventory,

establishing asset definitions and attribute information

- Asset inventory and condition assessment field work – creating data collection forms and performing onsite inventory and condition assessment
- Establishment of an Asset Register
- Evaluation of expected useful / remaining life of assets and replacement cost data for assets
- Development of level of service goals and key performance indicators
- Development of a maintenance planning strategy
- Establishing an asset risk framework and risk scoring criteria for assets
- Development of an asset insights dashboard

A detailed Scope of Work for this Task 1 is listed in Exhibit B.

Task 2 – Production of a Digital Twin Process Model

The City desires to develop a tool (or tools) that allows process engineers and plant operators at the Paseo Real Water Reclamation Facility (PRWRF) to visualize process data, assess plant performance as well as gain usable and actionable process optimization insights in close to real-time. City staff also noted that the ability to assess the impacts of operational changes (i.e., what-if or scenario analyses) on performance and ability to meet compliance requirements would be critical. Under this Task, Hazen will provide technical support services to advance the City's data visualization and process optimization initiatives. This task is broken into six major tasks: dataflow development and tag addition, data exploration and cleaning, development of a data visualization tool, real-time process optimization, development of a mechanistic process digital twin, and addition of data-driven optimization features into the process twin (i.e., development of a hybrid model that includes mechanistic as well as data-driven components).

A detailed Scope of Work for this Task 2 is listed in Attachment C.

Task 3 – Paseo Real WRF Onsite Operational Support

The City of Santa Fe (the City) has requested a scope from Hazen and Sawyer (Hazen) to provide onsite operational support at the Paseo Real Water Reclamation Facility (PRWRF). The City has requested full-time

support for two months followed by part-time support for the remaining duration of Hazen's contract scheduled to end on September 30, 2026.

Hazen staff will serve as an extension of the City's staff to support the operation of PRWRF. Hazen staff will provide the following services while stationed at the PRWRF:

- Regularly meet with City staff to assess operational challenges and goals.
- Review and reinforce PRWRF operational and regulatory requirements with City staff.
- Provide suggestions to improve plant operations and treatment efficacy.
- Provide hands-on troubleshooting support.
- Help develop Standard Operating Procedures (SOPs) and other operational guidelines.
- Coordinate with other Hazen staff to keep them apprised of onsite activities and new developments

A detailed Scope of Work for this Task 3 is listed in Attachment D.

2. COMPENSATION.

Article 3, paragraph A of the Contract is amended to increase the amount of compensation by a total of $2,666,930.00 so that Article 3, paragraph A reads in its entirety as follows:

A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed five million three hundred eighty four thousand nine hundred and thirty dollars ($5,384,930.00), including gross receipts tax. The total amount payable to the Contractor under this Contract including gross receipts tax and expenses, shall not exceed $5,384,930.00 (five million three hundred eighty four thousand nine hundred and thirty dollars). This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Contract shall equal the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Contract reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Contract being amended in writing prior to those services in excess of the total compensation amount being provided.

C. CONTRACT IN FULL FORCE.

Except as specifically provided in this Amendment, the Contract remains and shall remain in full force and effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No. 1 to the Contract as of the dates set forth below.

Hazen

City of Santa Fe, NM
Paseo Real WRF Asset Inventory and Condition Assessment
Scope of Work

1. Project Understanding

The Paseo Real Water Reclamation Facility (PRWRF) is owned and operated by the City of Santa Fe, New Mexico (CITY). The PRWRF has a permitted capacity of 13 million gallons per day (mgd), average day maximum month flow. PRWRF effluent is discharged into the lower Santa Fe River and can also be conveyed to non-potable reuse customers.

The CITY has requested a scope from Hazen and Sawyer (Hazen) for the development of an Asset Management Plan (AMP) for the PRWRF Facility. In parallel, Hazen has been supporting the City in the selection and procurement of a Computerized Maintenance Management System (CMMS) software product. The City has negotiated a contract with OpenGov to purchase and implement OpenGov's Asset Management environment for the following asset groups:

- Water Distribution
- Water Treatment
- Wastewater Treatment
- Wastewater Collection / Sanitary Sewer
- Transportation
- Parks and Recreation
- Stormwater

This scope of work will include asset inventory and attribute data development, field verification of the inventory along with physical condition assessment, development of risk scoring criteria, identifying level of service goals, asset cost analysis, and development of a 10-year capital improvement plan for the PRWRF Facility (wastewater treatment group). This task will lay the foundation for future asset management endeavors by establishing the following:

- Defining an "asset"
- Defining and assigning asset attributes
- Defining asset hierarchy
- Developing an asset inventory
- Performing a physical condition assessment
- Developing the risk scoring criteria (for likelihood of and consequence of failure scores)
- Developing the levels of service (LOS) that will help drive a prioritization of risk-based CIP projects and are focused on helping the CITY meet its LOS
- Creating a prioritized list of CIP projects based upon defensible risk scores and LOS

The database developed during this task (outside of CIP development), will be used to populate the CMMS system. Hazen acknowledges that both efforts are simultaneously occurring and will work to ensure that development and incorporation of data into the CMMS system is as seamless as possible.

The major elements of this task order are summarized below:

- Review of existing data and records
- Data validation and acceptance – establishing the limits and hierarchy of what to include in asset inventory, establishing asset definitions and attribute information
- Asset inventory and condition assessment field work – creating data collection forms and performing onsite inventory and condition assessment
- Establishment of an Asset Register
- Evaluation of expected useful / remaining life of assets and replacement cost data for assets
- Development of level of service goals and key performance indicators
- Development of a maintenance planning strategy
- Establishing an asset risk framework and risk scoring criteria for assets
- Development of an asset insights dashboard

The scope of work is detailed in the following section.

2. Scope of Services

The Scope of Services for this task order includes the following tasks:

Task 1 – Project Management

Hazen will perform the following project management activities associated with this effort:

1. Project Management – Task consists of ensuring performance of the work follows the agreed upon scope, budget, and schedule (estimated 12 months).
2. Submit monthly invoices and associated progress reports
3. Project Kickoff Meeting – The purpose of the meeting will be to:
    - Identify the key project personnel and contact information.
    - Review the project scope of services and project schedule
    - Review and discuss coordination with the CITY staff, treatment plant operations staff, and other supporting key staff.
    - Discuss the requested existing data, information, and materials CITY will provide
4. Conduct regular progress meetings with CITY project manager
5. QA/QC – Hazen will incorporate a robust QA/QC procedure of all data collected, placed in the asset register, and all deliverables provided to CITY.

All data developed for the CITY as part of this project, including mapping, asset attributes, inventories, CIP plans and anything else generated by the project, is the property of the CITY and will be available to the CITY in electronic format. Hazen will keep the CITY informed of the project progress and will notify the CITY of issues that arise which could potentially affect the schedule, scope, or budget. Any work outside this scope of work will only be performed following written approval by the CITY.

Task 1 Deliverables

- Monthly Invoices with Project Status Reports
- Kickoff Meeting Draft Agenda and Meeting Minutes
- Progress meetings minutes

- Any data generated during the project (draft (at the request of the CITY) or final (all final data to be given to the CITY)).

Task 2 – Data Review, Validation, and Acceptance

Prior to beginning this task, Hazen will submit a request for information (RFI) that includes existing asset information from the current CMMS system, process and instrumentation-related information from SCADA, and record drawings. These details are anticipated to be submitted in digital format for ease of analysis and inclusion in the condition assessment form. This task shall consist of the following services:

1. Hazen will evaluate the information provided by the CITY in response to the RFI
2. Hazen will use industry standards and confer with the CITY during a workshop to establish definition of an "asset" to be included in the inventory phase of the project.
3. Hazen will establish asset types and subtypes to develop a final nomenclature to move forward for the asset inventory phase of the project.
4. Hazen will propose to the CITY a standard asset hierarchy and classifications for various asset types, including name and numbering methods, based on industry standards. The CITY will be given an opportunity to comment on the hierarchies and suggest changes to it during a workshop.
5. Hazen will host a workshop with the CITY to gain input from the CITY and to use that to determine what attribute information will be collected on each class and subclass of assets. At a minimum, each asset must have an asset ID, name, location, condition, useful life remaining, type, material, size, and replacement cost. Additional attributes could include: manufacturer, serial number, capacity, flow rate, dimensions, installation date, operating status, as well as many others. Following the meeting Hazen will provide the CITY with a list of attribute information for the CITY's review. The CITY will approve the list before data collection occurs.

Task 2 Deliverables

1. Asset Inventory Draft Determination
    - Definition of an "asset" for each class and subclass of assets
    - Asset hierarchy in a flow diagram
    - List of asset types and subtypes in a spreadsheet

Task 3 – Asset Hierarchy and Asset Register Development

This task focuses on developing a comprehensive asset hierarchy and asset register for the PRWRF.

1. Designate Qualifying Assets – Hazen will conduct a workshop with CITY stakeholders to finalize the list of qualifying assets based on the preliminary list developed in Task 2.
2. Define Asset Hierarchy – Following the designation of qualifying assets, the workshop will continue to establish an appropriate asset hierarchy, ensuring all assets within the PRWRF are included. The asset hierarchy and the asset register will include the following components:
    - Asset Definition: Compile asset definitions using existing PRWRF asset lists and assets identified in Task 2.

- Asset Class: Group assets by type, functions, useful life, and pricing attributes (e.g. size, material, power).
- Data Standards: Establish data attributes required to support asset management needs.

3. Asset Register Development – Hazen will create the asset register using a hierarchical structure with "parent-child" relationships, allowing the CITY to navigate the database easily and extract information at various levels.

Task 3 Deliverables

- Asset Hierarchy
- Preliminary Asset Register with all identified assets, all available asset attribute information, photos of all visible assets, unique asset ID numbers, asset names that are known by staff (Microsoft Excel). This information will be provided to OpenGov as soon as available for use in initiation and validation phases.

Task 4 – Asset Inventory and Condition Assessment

This task includes the desktop and field work required for the asset inventory and condition assessment. Following completion of Task 2, Hazen will create an asset inventory in digital format that includes all asset types and subtypes with relevant attributes, as well as a condition assessment form. This task shall consist of the following services:

1. Hazen will develop a digital survey and condition assessment form to collect and assess asset data in the field.
    - Hazen will develop a physical condition framework for each asset type by discipline (civil/structural, HVAC, mechanical, and electrical/I&C) using the International Infrastructure Management Manual (IIMM) as a guideline to be used to assess condition during field verification. Hazen will share the draft condition assessment process with the CITY and the CITY will have a chance to comment and input on the process. Field personnel familiar with the assets will be invited to the meeting and their input will be considered in this process.
    - Hazen will include all asset attributes in forms that should be collected for each asset type Such as Collector 123, Fulcrum, or a similar platform which the City can utilize in the future independently.
    - Hazen will include the asset type, subtype, and hierarchy as fields to be populated in the digital form.
2. Hazen will create an asset register template that includes all asset types and subtypes with defined attributes. The asset register will also contain physical condition-related attributes.
3. Hazen will pre-populate available information from the obtained data. The information will be verified and updated during the field inspection, along with a physical condition score.
4. Hazen's field team will comprise specialists in civil/structural, HVAC, mechanical, and electrical/I&C.
5. Hazen will perform a visual condition assessment of each asset. The goal of the condition assessment is to identify the current state of assets with a condition score allowing estimation of the assets' remaining useful lives.

6. Hazen will design the Santa Fe WRF Asset Insight Dashboard user interface along with a data model and share with the CITY project manager before proceeding. Upon user interface approval, Hazen will develop the following four visual reports:

    - Home – Page navigation and a visual overview of the WRF assets.
    - Summary – Overview of asset count, condition, location, risk, useful life, and renewal needs.
    - Asset Details – Detailed view of asset attributes, inspection photos, and deterioration curve.
    - Asset Condition – View asset condition statistics by condition score and installation decade.

    All Dashboard pages will provide the user with the ability to filter visuals by process area, equipment type, discipline, condition score, and risk matrix bin.

    The Asset Insight Dashboard will be designed so that it may link with other facilities that are part of the CITY's operations.

Task 4 Deliverables

- Draft register for review by the CITY. Comments should be addressed by Hazen (it is understood that if a comment is not possible to address (i.e., can't make the change) Hazen will provide an explanation of why not.
- Final Asset Register with Attributes and Condition Assessments as specified in the list of attributes and containing any required changes based on the review of the draft – Spreadsheet. This information will be provided to OpenGov as soon as available for use in the configuration phase.
- PRWRF Asset Insight Digital Dashboard Pictures of each asset that is visible. The asset pictures will have the entire asset in the first picture with all subsequent pictures showing close ups of particular issues or concerns (e.g., the name plate, cracks, missing bolts, rust or other corrosion.) In any case with a visible name plate a picture of the name plate will be taken. The photos will be attached to the asset in the spreadsheet with the full asset photo as the first picture in the set of photos.

Task 5 – Expected/Remaining Useful Life Determination

This task aims to determine the expected useful life (EUL) and remaining useful life (RUL) of asset classes.

1. Expected Useful Life (EUL) – Using manufacturer design life, industry publications such as Engineering News Record (ENR), and data from similar Hazen projects, Hazen will establish a baseline EUL for each asset class.

2. Remaining Useful Life (RUL) – Based on collected attribute data, CITY maintenance records, and condition assessment scores, Hazen will estimate the RUL for each asset by adjusting up or down from the general attribute life. For example, if a pipe is to last 100 years but it is known to have multiple breaks and has shown signs of deterioration, the pipe's life should be shortened. If a pipe is known to be in good shape, exhibited no issues, etc., its life will be extended. For assets lacking visual condition assessments and any other information on

maintenance, repairs, or operator knowledge, the RUL will be calculated by dividing expected design life by asset age with straight line deterioration.

Task 5 Deliverables

- Estimated EUL for each asset class
- Estimated RUL for each asset
- Updated asset register with EUL and RUL for each asset

Task 6 – Replacement Valuation

This task involves estimating the current replacement cost for each asset.

1. Cost Data Collection and Review – Consolidate and review historical replacement cost data, local knowledge, RS Means databases, and costs from similar Hazen projects. Hazen will estimate current replacement costs in 2024 dollars using unit cost methods.
2. Workshop – Hazen will conduct a 3-hour Asset Valuation Review and Lifecycle Costing Workshop with CITY to review and validate replacement costs, develop cost factors for full implementation estimates, and determine maintenance strategies for run-to-fail assets and those with rehabilitation plans.

Task 6 Deliverables

- Updated asset register with bare and full cost estimates
- Total estimated valuation of the entire facility
- Workshop agenda, minutes, and presentation materials

Task 7 – Validate Levels of Service (LOS) and Develop Key Performance Indicators (KPIs)

This task will define and validate the Levels of Service (LOS) and Key Performance Indicators (KPIs).

1. Preliminary LOS and KPI Development – Hazen will seek input from CITY regarding potential LOS goals and KPIs prior to the workshop.

2. Using the list of potential LOS goals and other available information on LOS more generally, Hazen will develop a preliminary list of LOS and KPIs for CITY to review before a workshop.

3. Hazen will conduct a 3-hour workshop with key stakeholders to identify and validate LOS and KPIs for the facility. The discussion must include the following: what information would be required to measure the goals and determine whether KPIs are met, how difficult it would be to get this information (including whether this data currently exists), where the data would be held, how the KPIs would be calculated and stored, and who would have access to the data. Additionally, discussions of which goals/KPIs should be more publicly shared should be held.

Task 7 Deliverables

- LOS and KPI Summary Table
- Data required to meet the goals summary and where data is stored

Task 8 – Maintenance Planning

This task develops a maintenance planning strategy. Hazen will utilize a proven approach for utilizing asset criticality to determine the type of maintenance activities to be performed for the top ten qualifying asset classes. The level of effort required for maintenance activities will support estimated FTE staffing requirements.

1. Maintenance Approach Development – Utilize manufacturer-specific O&M manuals and industry-leading practices for failure monitoring and mitigation. Techniques include Failure Mode and Effects Analysis (FMEA), Preventive Maintenance Optimization (PMO), and Reliability Centered Maintenance (RCM).
2. Categorization of Maintenance Activities
    - Low Criticality: Operations Only or Run-To-Failure (RTF) Strategy—basic visual inspections or repair/replacement upon failure.
    - Medium Criticality: Operations + Condition/Performance—includes some condition/performance activities based on physical characteristics and financial feasibility.
    - High Criticality: Operations + Condition + Performance—comprehensive maintenance activities based on typical failure modes, from basic inspections to advanced predictive maintenance.

Task 8 Deliverables

- Maintenance strategy documentation for each asset class

Task 9 – Additional Services

The following tasks may be authorized by the CITY to develop a full Asset Management Program (AMP). The additional services described below provide high-level goals for each task as more information becomes available. At that time, the task item and deliverable will further be further delineated and detailed and authorized fee negotiated:

1. Gap Analysis – Prior to the development of the AMP, Hazen will provide a gap analysis at the facility to verify changes (asset removal or addition during the Emergency AO Projects) and update the data inventory. This scope item assumes up to 200 assets to be input into the data inventory.

2. Risk Framework Development - Define a performance condition assessment and consequence of failure assessment framework. This will include defining criteria, scoring definitions and scales, weighting, and scoring methodology specific to CITY'S PRWRF assets. Hazen will coordinate and solicit feedback from the Southwest Environmental Finance Center on project details.

3. Asset Risk Assessment (LoF and CoF) - implementation of a comprehensive asset risk assessment approach, including:
    a) Performance Condition Assessment
    b) Consequence of Failure Assessment
    c) Risk Scoring

4. Renewal and Replacement CIP Forecasting – Based on replacement valuations determined in task Hazen will provide a specific set of recommendations for the PRWRF that focus on:
    a. Known upcoming / in-process projects
    b. Program recommendations
    c. CIP project recommendations

    The CIP Projects will be identified by a priority based upon BRE and typically divided into high (1-2 years), medium (3-5 years) and low (6-10 years) priority. Hazen will delineate between rehabilitation and replacement projects and costs and provide costing for each recommendation by year. In addition, Hazen will utilize the information to develop asset inspection and maintenance scheduling guidelines for qualifying assets.

5. Staff Training – Hazen will develop and facilitate staff training of the AMP to support ownership and longevity of the program. Staff training is assumed to be conducted over a one-day period.

6. Unidentified Additional Services - In the development of this scope, Hazen and the CITY acknowledge there are uncertainties and unidentified tasks associated with the development of a full AMP. This task provides resources required to address these unidentified items. A budget allowance of $100,000 is included in this scope and budget for unidentified additional services.

3. Assumptions

Certain assumptions have been made in preparing the Scope of Services. To the extent possible, these assumptions are stated herein and are reflected in the estimated fee for services. If the requirements of the Project are different from the assumptions presented herein, or if the CITY desires additional services, the resultant scope changes will serve as the basis for amending this Contract or initiating the development of a new Contract as mutually agreed by CITY and Hazen. Project assumptions include:

- Based on similar projects, Hazen expects the asset count to be less than 1,500 assets inventoried. This scope of work assumes that the asset inventory will not exceed 1,500 assets. An inventory in excess of 1,500 assets will be considered additional work. The Hazen will keep the CITY informed of the progress of the inventory and if projected inventory exceeds the assumed quantity of assets.
- Kickoff meeting will be held virtually on MS Teams.
- No confined space entry is included during the asset inventory or condition assessment.
- There will be approximately 1-2 weeks of onsite asset inventory field work (estimated at 3-4 days per week)
- The CITY will open any electrical cabinets, operate equipment or valves, turn on/off equipment, etc., as needed to capture asset information.
- Operators will be available for the duration of Hazen's fieldwork and Hazen will seek to involve the Operators in the process of obtaining information to support knowledge transfer. Operators who are knowledgeable about the assets will be available to Hazen staff during field work.
- The efforts described herein would support and be compatible with a future ISO14001 certification.

4. Schedule

The proposed schedule for completing Tasks 1 through 8 is 12 months following notice to proceed. We are prepared to begin our work for the City immediately upon receipt of its written authorization to proceed. The schedule for additional services outlined in Task 9 would be determined when the scope of additional services requested by the CITY is negotiated.

5. Compensation

We are requesting an initial authorization of $623,038 to provide the services that are described under the Scope. Attachment 1 provides a budget breakdown for Tasks 1 – 9. All work will be performed on a time and materials basis. Expenses may include reimbursable mileage, airfare, lodging, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Hazen

Attachment 1

Proposed budgets for Asset Inventory and Condition Assessment Services

		Total	Fee		
Task	Description	Hours	Labor	Expense	Total
1	Project Management	174	$48,901	$500	$49,401
2	Data Review, Validation, and Acceptance	128	$41,391	$4,200	$45,591
3	Asset Inventory and Asset Register Development	132	$28,785	$3,700	$32,485
4	Asset Inventory and Condition Assessment	740	$142,026	$18,500	$160,526
5	Expected / Remaining Useful Life Determination	70	$13,864	$0	$13,864
6	Replacement Valuation	86	$17,931	$3,700	$21,631
7	Validate LOS and Develop KPIs	76	$15,262	$0	$15,262
8	Maintenance Planning	136	$26,981	$0	$26,981
9	Additional Services	494	$207,333	$5,550	$212,883
	NMGRT (8.1875% of Labor)			$44,415	$44,415
	TOTAL	**2,100**	**$542,473**	**$55,565**	**$623,038**

Hazen

The city of Santa Fe (the City) seeks to develop data visualization and process optimization tools that provide end-users with access to a common authoritative source for critical plant operations and performance data. This suite of tools is expected to provide plant process and operations staff with the ability to visualize plant performance data in near-real-time (NRT) and gain actionable insights to improve or optimize process performance. The suite will consist of a plantwide data visualization tool as well as a holistic process optimization web application that utilizes both mechanistic as well as data-driven modules to provide maximum value. Hazen will execute the project by developing core data system building blocks and visualization tools that enhance situational awareness and provide near-term functional value, while in parallel developing advanced process insight tools that leverage this data foundation.

The City has expressed a desire to develop a tool (or tools) that allows process engineers and plant operators at the Paseo Real Water Reclamation Facility (PRWRF) to visualize process data, assess plant performance as well as gain usable and actionable process optimization insights in close to real-time. City staff also noted that the ability to assess the impacts of operational changes (i.e., what-if or scenario analyses) on performance and ability to meet compliance requirements would be critical.

Under this Task Order, Hazen will provide technical support services to advance the City's data visualization and process optimization initiatives. This task order is broken into six major tasks: dataflow development and tag addition, data exploration and cleaning, development of a data visualization tool, real-time process optimization, development of a mechanistic process digital twin, and addition of data-driven optimization features into the process twin (i.e., development of a hybrid model that includes mechanistic as well as data-driven components).

Task 1. Data Foundation

The primary goal of this task is to ensure that critical analytical and operational data from the PRWRF is securely available in a central SQL data warehouse. Major activities include collaborating with City IT staff to develop secure SCADA and OP10 data export processes, building the data warehouse and necessary data pipelines, identifying and acquiring raw time series data, and creating new calculated time series for process optimization. Work under this task establishes the data foundation and computational environment for subsequent tasks.

Task 1.1: System Connectivity and Data Engineering

The goal of this task is to establish data connectivity, data pipelines, SQL data warehouse, and ancillary data engineering components necessary to provide a foundation for both project analytics and for routine operational use of project-developed tools by the City. While the data warehouse developed under this task will focus on a subset of critical data necessary to optimize plant performance, the overall data framework will be designed for future scalability, such that it may serve as a testbed and starting point for future plant-wide visualization and reporting if desired by the City.

Under this task Hazen will work closely with City IT staff and data stewards to develop secure and repeatable data acquisition processes and to comply with cybersecurity and data governance standards provided by the City upon project initiation. Key activities include:

- Collaborate with plant technical staff to draft a high-level requirements document and proposed data architecture diagram to support discussions with City IT staff. The document will focus on defining core requirements such as user roles and objectives, data sources, data granularity and refresh frequency, data retention and storage, and data accessibility and security.
- Hold up to 5 virtual coordination meetings with City IT staff and data owners.
- Provision a secure workspace within Hazen's Microsoft Azure or Fabric tenant that is dedicated to City of Santa Fe data and applications. This effort will consider opportunities to integrate or leverage existing data handling and reporting processes that are currently operational in Hazen's Azure and Power BI tenants, including a single user endpoint through the Santa Fe BI Application developed by Hazen, automated integration between live and historical data using stored procedures, and one-way data exports to securely obtain data from Santa Fe's operational systems.
- Design and build a semantic model and data warehouse to integrate metadata, raw data, calculated data, and cleaned data. The semantic model will be extensible to integrate model output data and recurring predictive data developed under subsequent tasks. As above, this effort will maximize opportunities to integrate or reuse existing model structures, with the overall goal of delivering a high-performing and low maintenance system.
- Develop a scalable process for managing time series metadata from multiple data sources (with a focus on SCADA and OP10). This includes specifying location and parameter attributes, friendly names, higher-level location and parameter categories, and reference values (e.g. regulatory limits,

operational targets, thresholds). This process will be based on an Excel file, a Microsoft List, or similar compatible technology.

- Support City staff in the development of recurring automated processes for securely exporting data and metadata from the SCADA Historian and the OP10 database to the data warehouse.
- Support City staff in the creation of gateways if needed.
- Ensure compliance with cybersecurity, data governance, and application development standards provided by the City.

Task 1.2: Acquire Raw Time Series Data

The goal of this task is to identify and acquire raw time series data from lab analyses and plant instrumentation that is most valuable for optimizing plant performance. This task involves reviewing metadata from OP10 and SCADA systems, identifying tags, developing queries, configuring data pipelines for recurring data movement, and conducting a one-time export of historical data. The data products created in this task form the data foundation of subsequent modeling and analytical activities.

- Review OP10 and SCADA historian metadata for the purpose of identifying tags or parameters that are most valuable for optimizing plant performance. Metadata shall be provided by the City, or alternately the City shall provide credentials sufficient to access metadata tables.
- Based on metadata review, collaborate with plant technical staff to select up to 20 critical influent and effluent concentrations and secondary process operational data from the OP10 system.
- Based on metadata review, collaborate with plant technical staff to select up to 200 tags critical for process assessment and control from the SCADA historian.
- Populate consistent metadata attributes for the selected raw time series data, including location and parameter attributes, user friendly names, reference values, and other attributes that may be useful in the display layer.
- Develop and deploy a system for managing and storing metadata attributes using Excel, Microsoft List, or similar no-code/low-code technology compatible with the data warehousing environment.
- Develop a script to query the OP10 database and return the desired parameters.
- Develop a script to query the SCADA historian and return the desired tags, aggregated to an hourly timestep. Temporal aggregation method will be tailored to the specific tag (e.g., for some tags an hourly average may be appropriate, while for others an hourly maximum may be appropriate).
- Conduct a one-time manual export of up to 5 years of historical data from SCADA Historian and OP10 database and load the data into the data warehouse. This work is limited to extraction of data from database or historian tables and does not include extraction of data from files.
- Configure, test, and deploy data pipelines and scheduling/orchestration features to establish recurring acquisition of data exported from SCADA and OP10 systems.

Hazen

Task 1.3: Calculate New Time Series Data

The goal of this task is to develop new calculated time series that are critical for process control, compliance, and optimization. These will include loading rates to processes such as the primary and secondary clarifiers, and secondary process key performance indicators (KPIs) such as total and aerobic solids retention times (SRT and aSRT), RAS rates, WAS rates, chemical usage normalized to forward flow, chemical usage per unit mass of nutrient removal achieved, air usage per unit of BOD/nutrient removal, and energy use per unit flow treated. These calculated time series will be developed for both historical data and for new incoming data as part of the operational system. Key activities include:

- Collaborate with plant technical staff to identify and define up to 50 new calculated time series.
- Develop equations and write scripts to generate new time series data. Scripts will be generated in SQL, Python, or other language consistent with the data warehousing environment.
- Validate script output by comparing summary statistics to expected upper and lower bounds for each parameter.
- Execute the scripts for historical data and store the data in the data warehouse.
- Configure, test, and deploy the scripts to automatically calculate and store new time series data on a recurring basis.
- Populate metadata for new calculated time series, including location and parameter attributes, user friendly names, and reference values.

Task 1 Deliverables:

- Scripts for querying City SCADA Historian and OP10 database
- Cloud-based SQL data warehouse containing up to 5 years of selected historical SCADA and OP10 data
- Scripts and/or data system configurations for recurring acquisition of data exported from SCADA and OP10 systems.
- Scripts for recurring calculation of new calculated time series.
- Metadata table for raw and calculated time series

Task 2. Data Exploration and Cleaning

The goal of this task is to develop data cleaning protocols to ensure that subsequent analytical, modeling, and visualization tools are driven by clean, quality-assured data. The focus will be on a subset of time series critical to model accuracy and performance, including influent flows and concentrations, airflows, sensor data (DO, ammonia), effluent quality, and solids production (primary and WAS sludge per unit flow treated). Data cleaning will be performed for up to 100 time series critical to performance of the models developed under Tasks 5 and 6.

Task 2.1. Initial Data Quality Review

Hazen will review available historical data from the data warehouse (e.g., up to 5 years of hourly data) with the goal of identifying data quality issues. This will involve creating a time series plot in Python for each of the 100 variables of interest. A process engineer (subject matter expert) will review each plot and identify obvious outliers, (e.g., an influent orthophosphate measurement of 100 mg/L when all the other values are below 10 mg/L). Those outliers will be manually removed from the dataset that will later be used for model development. Then, a data scientist will replot the cleaned data. Up to two additional iterations will be performed.

Following the first round of review by the subject matter expert, a more in-depth look at data quality issues will begin. For example, data stagnation may be seen in some measurements like sensors if a basin is taken offline. A measurement that appears to stagnate will be compared to other measurements to verify if this is the product of a basin being offline (e.g., DO readings are zero and airflow stagnates in the same basin, and flow through the other oxidation ditch doubles). This process of data review will identify the issues most frequently encountered in the dataset, including missing data, data out of range, stagnant data, or abrupt changes in the data. The issues identified and catalogued will inform the data cleanup methods employed in Task 2.2.

Task 2.2. Implement Data Cleaning Protocols

Based on the most frequently issues identified in the dataset, Hazen will develop data cleaning protocols for up to 100 time series. Cleaning protocols will be implemented using the Python Pecos algorithm, which identifies a normal range of operating values for each parameter and hence detects outliers; stagnation, missing data, and abrupt changes in values. For the 100 variables in data cleaning, up to a total of 200 custom rules may be implemented for targeted data cleaning. For instance, a stagnant airflow reading would trigger a check to see if the concerned oxidation ditch is out of service so that the airflow for that basin (or zone) can be recorded as zero. Missing hourly data will be replaced with the average value for the week for that same time of day and/or the same instrument reading in a parallel location.

Data cleaning will be executed using Python or similar scripts within the dedicated cloud workspace, and cleaned data will be integrated into the data warehouse. The raw and cleaned data will be maintained as distinct datasets to allow the analyst to visualize and compare raw and cleaned time series in the Power BI dashboard (Task 3).

The cleaned data will be displayed in Power BI and a numerical value assigned to each daily/hourly datapoint of the 100 time series selected. The coded values shall be as follows:

- 0 = good data, no issues found
- 1 = abrupt change
- 3 = data outside of high/low boundary
- 4 = abrupt change + data outside of high/low boundary

- 5 = stagnation
- 7 = missing data
- 8 = stagnation + data outside of high/low boundary

There will be three pages in Power BI dedicated to data cleaning visualization. The first page will display daily data and its coded value for each time series. The second page will do the same for hourly time series. The third page will plot each time series and its low and high boundaries. The duration of the timescale can be varied to have as much or little granularity as desired.

The data cleaning process will be established for near real-time cleaning through Power BI and Python scripting. The data cleaning scripts will be employed for three months on a trial basis. During this time, staff should review the results and provide comments at the conclusion of the trial. At the end of the trial period, the scripts will be finalized. It is anticipated that up to 20 rule modifications will be implemented based on feedback from City staff.

Task 2 Deliverables:

- Cleaned historical data for up to 100 time series, stored in the data warehouse as distinct time series and available for visualization in the Power BI dashboard.
- Data cleaning and filling scripts that will be implemented in near-real time on a daily/hourly basis, as specified for each of the 100 time series.

Task 3. Data Visualization Tool

The goal of this task is to develop a comprehensive visualization and reporting tool for near real-time assessment of PRWRF performance and process health. The tool will allow City staff to visualize observed data (Tasks 1 and 2), and mechanistic model-predicted data from Task 5 when used with Process Advisor results (Task 6). The overall objective is to enhance situational awareness and integrate data-driven process analytics with operator experience. Note that the Task 5 deliverable is a stand-alone web application that represents the physical layout of the PRWRF, which is separate from the Power BI tool discussed to this point.

The tool will be deployed in Hazen's tenant within Microsoft's Power BI web service and updated at an approximately hourly cadence. The refresh schedule may be further fine-tuned to optimize delivery and usage within the constraints of the Power BI web service. City team members will access the tool via desktop, tablet, or mobile devices.

Task 3.1. Develop Power BI Architecture

The goal of this task is to design, build, and deploy the core Power BI architecture necessary to deliver interactive Power BI dashboards to the end user. A robust backend and semantic model are essential for functionality and scalability as data and components are added to the system. Key activities include:

- Configure a Power BI semantic model and dataflows to integrate data and metadata from the data warehouse. Design shall consider import, direct query, composite, or other options as appropriate based on data volumes and analytical needs.
- Enrich core data and metadata tables with a master calendar table plus ancillary helper tables as needed.
- Set up a Power BI workspace for access by City and Hazen team members, and publish the Power BI report to the workspace
- Establish data refresh schedules to update dashboards with SCADA and OP10 data and calculated time series data regularly. Coordinate with end users to determine an appropriate refresh interval.

Task 3.2. Develop Observed Data Pages

The goal of this task is to create interactive dashboard pages that allow modelers, process engineers, and operations staff to easily review and analyze PRWRF operations and process performance data. The pages will be designed to meet multiple different end-user needs, including data inventory, data quality review, near-real-time process status, historical trending, and detailed process performance comparing against targets and historical benchmarks.

Observed data pages developed under this task will include at a minimum:

- Data Inventory: View all tags in the dataset and summary statistics for each tag (e.g., number of data points, min, max, avg, date range)
- Data Gaps: Highlight missing data. Note extended missing data periods will not be filled in using the Pecos algorithm described earlier. That is for short-duration events spanning a few hours or 1 - 2 days depending on the granularity of the data received.
- Single-Tag Data Navigator: Visualize time series data for any single tag. Assess daily, weekly, monthly, yearly, and seasonal trends, view percentile plots, compare year-on-year and month-on-month averages. Compare historical and current values against targets, benchmarks, limits, or other reference values.
- Single-Tag Data QC: Visualize raw versus cleaned time series data for any single tag.
- Multi-Tag Data Navigator: Plot and visualize multiple tags together, with percentile distributions and tabulated summaries of averages, minimums, maximums, and key percentiles. Plotting pages will leverage the capabilities of native Power BI visualizations; custom-coded visualizations are not included in this task.
- Correlation Analysis: Perform simple correlation analysis on selected tags, displaying results as a heatmap or scatter plot.

In addition, up to 5 custom pages will be developed to serve specific purposes and highlight selected metrics of interest to plant process and operational staff. These pages will be tailored to display plant-wide or process-specific metrics that are frequently reviewed or required by operations staff to make

decisions. The custom pages will provide a clear and concise overview of specific processes or topic areas, making it easier for staff to monitor and analyze important key aspects of their operation. As an example, custom pages might include:

- Interactive process flow diagram (PFD): An interactive PFD can be developed which displays the latest values of critical metrics adjacent to the relevant unit process or process areas. Additionally, tooltips can be provided, which allow users to hover over displayed metrics to get additional statistics for that tag.
- Nutrient Removal Performance: Dedicated pages for the removal efficiency of specific nutrients or species, including metrics like effluent concentrations, nutrient removal per pound of chemical used, and efficiency of bio-P or denitrification.
- Secondary Process Configuration: Highlights the set-up of the secondary process and the resultant effluent quality, displaying metrics like current MLSS, wasting rates, number of oxidation ditches in service, SRT, DO concentrations and oxidation ditch or secondary effluent ammonia.
- Energy Consumption: Focuses on energy use in the treatment process comparing the latest overall energy use to historical consumption. Metrics like energy use normalized to forward flow or blower energy use per pound of oxygen required are highlighted.
- Historical data sorter: Allows sorting of operational data by influent load, flow, and temperature, enabling staff to identify operationally similar days and conduct data-driven what-if analyses. This page can be updated to include the scoring algorithm (Task 6) to help operations staff identify high-performing decisions.

These pages will be developed through an interactive process that includes:

- Needs Assessment: Hazen meets with City staff to identify overall concepts, key questions, and specific requirements. This involves a 2-hour virtual workshop and up to 10 hours of individual interviews.
- Draft Development: Based on City feedback Hazen will develop up to 5 custom pages plus associated metrics.
- User Testing: Deploy draft pages for 1-2 weeks, allowing City staff to use and provide feedback.
- Feedback Collection: City staff provide prioritized feedback in a 1-hour comments virtual meeting or a document synthesizing feedback from multiple users.
- Revisions: Hazen addresses feasible comments within identified task budget limits and tracks remaining items.
- Final Deployment: Hazen deploys the final versions of the custom pages after City staff verify that comments were satisfactorily addressed.

Task 3.3. Develop Model Input/Output Pages

The goal of this task is to develop interactive dashboard pages for reviewing input and output data for the various models that comprise the overall Process Advisor Tool, including the Influent Model, the Process Model, the Setpoint Model, and the Optimization Tool. These pages will be geared for use by system

administrators, modelers, and analysts, and are focused on model data QC, model verification, model performance evaluation, and ad hoc plotting/tabulation.

The measures and semantic model updates developed under this task will establish the foundation for additional dashboard pages in Task 3.4, which will be geared for use by plant engineers and staff focusing on process performance and operator guidance.

Key activities include:

- Configure the Power BI semantic model and dataflows to integrate input and output data from the Influent Model, the Process Model, the Setpoint Model, and the Optimization Tool.
- Configure the semantic model to store and handle multiple different model realizations, such that users can examine model predictions over time (e.g., visualize output from today's model simulations as well as those executed last month).
- Configure the semantic model and associated metadata tables to allow easy comparison between observed and model-predicted values (e.g. compare observed vs predicted influent TN load, or observed vs predicted values).
- Create measures and dashboard pages for interactively displaying model inputs and outputs. These pages will be geared toward model data QC, model verification, model performance examination, and ad hoc plotting/tabulation.

Task 3.4. Develop Operational Guidance Pages

The goal of this task is to develop interactive dashboard pages for reviewing operational guidance provided by the various models that comprise the overall Process Advisor Tool, including the Influent Model, the Process Model, the Setpoint Model, and the Optimization Tool. These pages will be geared for use by plant operations staff and will feature integration of observations, predictions, and recommendations.

Up to 3 custom Operational Guidance Pages will be developed under this task. As an example, custom pages might include:

- Influent Load Predictions: Visualize predicted influent flow and load parameters for the next 24 hours. This page will help operators anticipate and prepare for varying influent conditions, incorporating model predictions and historical trends.
- Process Performance Indicators: Display key performance indicators (KPIs) such as SRT, MLSS, DO concentrations, and effluent quality metrics. This page will integrate model predictions and real-time data to provide a comprehensive overview of process performance.
- Optimization Recommendations: Present recommended operational setpoints for parameters like airflow, DO/aeration setpoints, wasting rates, and internal recycle rates. This page will integrate outputs from the Optimization Tool to guide operators in achieving optimal process performance.

Development of the pages will be similar to the custom page development process described above.

Task 3 Deliverables:

- A Power BI application containing one or more reports with multiple pages for interactive visualization of observed and model-predicted operational and process control data.
- Documentation, comprising a high-level PowerPoint presentation summarizing Power BI dataflows; an Excel-based data dictionary; and explanatory technical notes embedded within the Power BI application as comments, tooltips or metadata.
- Up to 8 hours of in-person and/or virtual training in usage of the Power BI tool.
- 40 hours of post-acceptance follow-on support for up to one year beyond delivery of the tools.

Task 4. Evaluate Real-Time Process Control Strategies

The ability to incorporate existing and/or new online analyzers into control strategies will be evaluated since this can provide immediate operational benefit. Up to three control strategies will be evaluated including but not limited to:

- Ammonia-based aeration control to optimize nitrification and denitrification simultaneously
- Automated aerobic SRT control to maintain nitrification as a load and temperature changes
- Nitrate-paced internal recycle to optimize energy and denitrification capacity
- Orthophosphate-paced metal salt addition to optimize cost, energy, and nutrient removal
- Live state point analysis tool to assess secondary clarifier capacity

In addition, the value of primary effluent COD and ammonia measurements will be evaluated as optional input to the holistic optimization modules described later.

The result of this task will be a presentation and a ten-page memorandum outlining the operational control strategy, capital cost estimates associated with implementation (equipment purchase, installation, and integration services), and a qualitative description of the programming logic. Examples of these programs used successfully at other WRFs will be presented as well. The memorandum is not a functional control description suitable for programming by an integrator, nor does it include any process modeling required for site-specific automated aerobic SRT control. That level of detail could be provided in future contracts.

Since no prior design work has been implemented at the PRWRF by Hazen, cost estimates will be order of magnitude and assume that power sources and wire and conduit pathways are available at the desired locations. This task does not include a detailed electrical evaluation.

Task 4 Deliverables:

- Virtual presentation and a ten-page memorandum outlining the operational control strategy, capital cost estimates associated with implementation (equipment purchase, installation, and integration services), and a qualitative description of the programming logic.

Hazen

Task 5. Develop Mechanistic Process Digital Twin (Process Model)

Mechanistic wastewater process models developed using commercial simulators (such as BioWin, GPS-X, or SUMO) are often employed for wastewater treatment facility design or process optimization planning. These models are complex and require detailed user training, limiting the number of staff who can run or modify simulations. Process advisory digital twins help overcome this operational barrier by expanding the number of staff who can leverage the model. The goal of this task is to create a mechanistic process digital twin to enhance the operational capabilities and process understanding of PRWRF staff.

The process digital twin and optimization toolkit (including the data-driven additions from Task 6) will be hosted by Hazen as a web application. The City will be responsible for hosting fees required to ensure full-time availability of the tool for City staff. Hazen will provide an estimate of these routine pass-through cloud service hosting fees to ensure transparency and accurate budgeting for the City.

Task 5.1. Develop Mechanistic Process Model

The mechanistic process model for the facility will be initially developed in BioWin under and existing scope task. Process model development will be based on historical operational data plus plantwide process sampling data collected from June 18 – 26, 2024.

The process model will be calibrated using a selection of plant data (to be determined by subject matter experts based on observed plant operational metrics and mass balances over different time periods) and validated against data from a different time period. Further context on process model development can be found in the scope outlining PRWRF Engineering, Operational Support, and Related Services in Response to EPA Administrative Order CWA-06-2024-1745, provided by Hazen to the City on March 18, 2024.

Under this scope, an uncalibrated SUMO model of the PRWRF will be developed. SUMO is proposed to leverage their advanced and well-documented digital twin API packages for live data integration and equipment control. An uncalibrated SUMO model will be deployed initially and later replaced with a calibrated model when the calibrated BioWin model is complete. A comparison of the BioWin calibrated model and SUMO calibrated model results will be developed to verify the models are equivalent.

Task 5.2. Build Web Interface for Mechanistic Process Twin

A web application wrapping the SUMO mechanistic process model will be developed and deployed for PRWRF staff. Users will be able to change influent characteristics and operational parameters (e.g., basins or units in service, DO concentrations, RAS and WAS rates) to visualize process impacts. This version of the process model will not have any connection with the live data and is intended as a training tool to facilitate PRWRF staff understanding of treatment concepts, and view the impacts of operating the process in different ways on performance and effluent quality.

In addition to specifying influent characteristics and operational parameters, users will select the number of primary and secondary clarifiers in service and specify SVI. Historical primary clarifier performance

(percent TSS removal as a function of units in service and hydraulic loading rate) will be analyzed to develop a linear relationship between either units in service, and/or hydraulic loading rate and percent TSS removal. This relationship will then be hard coded into the web application. Secondary clarifier performance will be coded using known relationships between SVI, which the user will specify, and Vo and K, the downward settling velocity and compaction coefficient, respectively, commonly used to model sludge settling mechanistically.

As a web-based application, the mechanistic process digital twin will be able to be accessed by up to three staff via a web browser (e.g. Microsoft Edge) from desktop computers running Windows 10 or later. Facility operators will be able to utilize the tool to develop and test their ideas for optimization and/or learn from mistakes with no effect on actual plant operations.

Building the web application involves creating an interactive homepage, that is an aerial image of the plant, with a customized set of key inputs and outputs, such as process MLSS, wasting rates and effluent nutrient concentration levels, which will help the user visualize the facility's performance, relative to the permit limits. There will also be a second screen to focus on the secondary process configuration, so users can better evaluate the treatment process to ensure regulatory compliance. The second screen includes a graph that shows DO, ammonia, nitrate, nitrite, and orthophosphate concentrations along the length of the oxidation ditches.

The web application will be introduced to PRWRF staff through a 2-hour virtual training meeting, which will be recorded for future use. Introductory training materials will be presented in PowerPoint, and then the web application will be demonstrated.

Task 5.3. Add Gamified User Interface for Operator Training

Hazen will add "gamified" features to the web application that will allow operators to create their own profile and avatar, and keep track of their high score simulation. Up to ten unique profiles will be supported. As operators interact with the tool from Task 5.2, they will be able to change treatment process variables and see the impact on process settings (such as the impacts of changing MLSS and wasting rates on the SRT), process performance (such as effluent quality and nutrient profiles), process efficiency (such as chemical use and energy use per unit flow treated) and solids generation (i.e., primary solids and WAS generated per unit flow treated). The game score will be determined by the scoring algorithm developed in Task 6.

The gamified user interface is expected to increase operator engagement with the process model and allow them to easily interact and extract valuable insights from mechanistic process models, which are typically not intuitive or user-friendly and have a steep learning curve. There will be some limitations to this as SVI is specified by the modeler and not predicted based on mechanistic equations in SUMO. Therefore, that portion of the score would have to be determined by the user-entered value.

Task 5.4 Replace Uncalibrated Model With Calibrated Model

When the BioWin model has been calibrated, the SUMO model will also be adjusted to match the performance of the BioWin model. The results of this conversion and verification will be presented to

City staff in a virtual meeting. Then, the uncalibrated SUMO model in the mechanistic digital twin will be replaced by the calibrated version, resulting in more accurate and representative predictions.

Task 5.5 Review Process Model

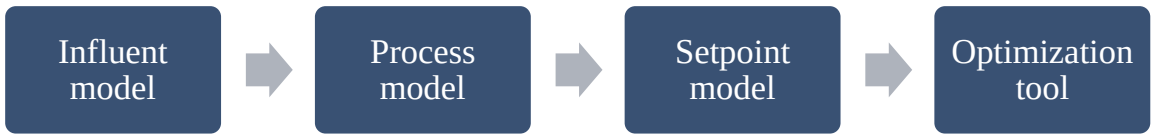
Approximately two months after deployment of the calibrated model, a virtual meeting with key stakeholders will be held to obtain operator feedback. Approximately 40 hours of additional development time will be included for operational enhancements to make the tool more useful.

Task 5 Deliverables:

- Uncalibrated SUMO model.
- Mechanistic process digital twin tool hosted by Hazen as a web-application. The web app will be geared for what-if process simulation and operator training with gamified features to promote engagement.
- Calibrated SUMO model.
- A presentation of the SUMO model calibration compared to the BioWin calibration.
- A two-hour recorded training course on using the process model.
- A follow-up virtual meeting 2 months after delivery to discuss user engagement and opportunities for improvement. 40 development hours are included in this scope.

Task 6. Process Advisor Tool

The goal of this task will be to build a Process Advisor Tool. The Process Advisor Tool includes an Influent Flow and Load Prediction Model, the mechanistic Process Model from Task 5, an equipment Setpoint Model, developed in this task, and development of an optimization algorithm and Optimization Tool to balance competing objectives in secondary treatment. This tool will take the mechanistic model from an offline training tool to a near real-time process advisory tool to guide operation of the secondary treatment system. The output of the tool will be hourly recommendations for airflow, DO/aeration setpoints, wasting rates, internal recycle rates and return activated sludge flow rates, and predicted energy and chemical consumption, SVI, and effluent quality. The following tasks are envisioned to develop the Process Advisor that leverages both mechanistic and data-driven components.



The first step in real-time system optimization is knowing what flow and loads are entering the PRWRF. While the process model in Task 5 is invaluable as a training tool, it is not linked to live data and does not know the influent conditions entering the PRWRF. Those conditions will be predicted using a data-driven model.

A data-driven Operational Setpoint Model is recommended to address three issues that mechanistic models alone cannot solve. First, mechanistic models don’t always represent real-world conditions accurately. They are simplifications of a more complex environmental system. Second, mechanistic

models often cannot directly incorporate live sensor data, which is also one of the most valuable indicators of real-world conditions. For example, the PRWRF has ammonia sensors near the end of the aerobic zone in the oxidation ditches. However, neither SUMO nor BioWin allows the user to specify the ammonia concentration at a given location in the process, this can only be specified on the influent. Therefore, it is not possible to use the sensor data in the process model directly. Third, mechanistic models to predict sludge settling properties from easily and routinely measured wastewater variables do not exist. Given that SVI is critically linked to secondary treatment capacity, some site-specific understanding of factors contributing to good/poor settling should be incorporated into operational decision making and optimization.

To address these limitations and gaps, a more robust representation of the system using a hybrid model that incorporates the mechanistic (SUMO) model and data-driven models of unknowns is recommended. Here, unknowns are things we would like to be able to predict like effluent ammonia, nitrate, orthophosphate, chemical feed quantities, energy use, SVI, and suggested internal flow rates like WAS, RAS, and nitrified recycle.

Before describing the tasks involved in this hybrid model development (Process Advisor Tool), it is important to understand the overall workflow and how the Process Model from Task 5 fits in. A flow diagram of the various components of the Process Advisor is shown in the figure below.

1. Influent Model (Task 6.1)

    a. Data-driven models will predict influent flow and load for the following day. This operation will run once a day around 10 pm.

    b. That average daily value for each parameter (flow, BOD concentration, etc.) will be converted to an hourly flow/concentration value using known diurnal flow and loading curves for PRWRF starting with midnight the following day, and running 12 am to 11 pm.

2. Process Model (Task 5)

    a. A dynamic 24-hour simulation using the Process Model will then ensue. The Process Model will emulate the operational control strategies used at the PRWRF. For example, if air is added to maintain a specific DO setpoint, that same approach will be modeled in SUMO.

b. Outputs such as energy and chemicals used and effluent characteristics from the Process Model will then become inputs to a data-driven model (the Setpoint Model).

c. This dynamic model will run from approximately 10:30 pm to 11:30 pm the night before the day it predicts values for.

3. Setpoint Model (Task 6.2). This data-driven model will run once an hour starting at midnight. Additional inputs to the data-driven model will include live sensor data.

    a. The Setpoint Model will recommend equipment setpoints for internal plant flows, DO, and airflow.

    b. The Setpoint Model will also predict effluent quality, energy and chemical use along with SVI.

    c. Optimization Tool (Task 6.3)

        i. A scoring algorithm that assigns targets, weights, and penalties to key variables will be developed. It is envisioned that this algorithm will include up to 8 variables: effluent ammonia, nitrate, total nitrogen, total phosphorus, and organic nitrogen; SVI, energy use for secondary treatment, and alum use.

        ii. An optimization algorithm will be applied to the scoring algorithm to maximize a daily score.

        iii. Each hour, a Python script will trigger the optimization algorithm to run the Setpoint Model iteratively to find an optimal operating strategy for the existing conditions.

        iv. The resulting variable values from the highest scoring algorithm will be returned hourly and displayed as a recommendation in the Power BI visualization tool (Task 3).

Task 6.1. Develop Influent Flow and Load Prediction Model

Hazen will perform exploratory data analysis to determine the most relevant variables for predicting influent flow and loading (COD, BOD, ISS, TKN, ammonia, TP). This step includes adding variables to the dataset to account for time lags in the system. Additional variables will be added and/or created as needed to predict hourly flows for the next 24-hours such as forecasted rainfall and streamflow. These influent flow and load predictions will be used as inputs to the mechanistic model. The mechanistic model will also receive information originating in SCADA (via a secure route established in Tasks 1-3) to specify the number of primary and secondary clarifiers in service, and the SVI from real data.

Up to eight algorithms will be developed to predict the following:

1. Average daily COD and BOD concentration today as a function of past values taking into account expected delays in laboratory data. If BOD is more accurate, COD (needed for the mechanistic model) will be estimated using the predicted BOD value and a fixed COD:BOD ratio. COD and BOD will be modeled as two separate variables, since they are expected to be predicted using distinct sets of predictor variables.
2. Average daily TSS concentration today as a function of past values. This will be converted to ISS (needed for the mechanistic model) using a fixed VSS:TSS influent ratio.
3. Average daily TKN and ammonia concentration today as a function of past values taking into account expected delays in laboratory data. If ammonia is more accurate, TKN (needed for the mechanistic model) will be estimated using the predicted ammonia value and a fixed ammonia:TKN ratio. Ammonia and TKN are being counted as two separate variables, since there may be differences in the approaches utilized to predict each of them.
4. Average daily TP concentration today as a function of past values.
5. Average daily Alkalinity concentration today as a function of past values.
6. Average daily influent flow.

The accuracy of these models and prediction approach will be considered to determine which models and approaches are best suited for deployment. For example, if the accuracy of the TKN model is poor but BOD is high, then TKN could be estimated from the BOD estimate and an average BOD:TKN ratio from historical data. It is assumed that a normalized diurnal flow and loading curve will be used to convert the daily average values to hourly values. For wet weather flow predictions, a more sophisticated predictive model could be developed under another scope. For this exercise, a simplification will be made to identify above average daily influent flow predictions as “wet weather,” and replace the normalized diurnal flow pattern with one wet weather hydrograph of the City’s choosing.

Task 6.2. Develop Operational Setpoint Model

Hazen will perform exploratory data analysis to determine the most relevant variables for predicting 16 operational setpoints and/or effluent parameters one hour in the future including but not limited to effluent ammonia, nitrate, organic nitrogen, and TP; and SVI, alum use, energy use for secondary aeration, RAS flow, internal recycle flow, DO setpoints, and airflow setpoints. This step includes adding variables to the dataset to account for time lags in the system. Outputs from the mechanistic model will also serve as inputs to this model. One Python model with up to sixteen outputs will be developed.

The accuracy of the Setpoint Model at predicting each output value will be presented and assessed. If a desired target is not accurately predicted, additional variables will be added and attempts will be made to optimize the accuracy of the model. A reasonable degree of accuracy is an R^2 value of approximately 0.7, but this may be adjusted depending on the mean absolute error relative to the average value of each parameter. Up to three iterations of model refinement to improve accuracy will be attempted. Variables with poor predictive accuracy will not be deployed in the final model.

It is anticipated that the XGBoost model will be utilized for this project. For simplification, each model will have the same independent variables weighted differently.

Hazen

Model quality and accuracy will also be evaluated using subject matter expertise, feature importance tables, and SHAP plots, which seek to explain the most important variables in each model and their directionality on the predicted variable. This is to verify that the logic in the model is appropriate.

Task 6.3. Create Scoring Algorithm and Optimization Tool

Scoring Algorithm. A scoring algorithm will be developed and deployed for assessing current performance (as part of Task 3) and identifying potential optimization solutions to provide actionable insights to plant operations staff (as part of Task 6). This algorithm will incorporate competing goals and appropriately weigh the outcomes. Hazen will solicit feedback from the City of Santa Fe to assign weights to different process goals, such as effluent ammonia, effluent phosphorus, chemical use, energy use, etc.

An example scoring algorithm for another facility is shown below.

Parameter	Average	Target	Weight
Effluent Ammonia (mg/L)	0.08	0.1	5
Effluent Nitrate (mg/L)	0.9	1.0	0.8
Effluent TP (mg/L)	1.3	1.4	1.2
Effluent Organic Nitrogen	0.9	0.9	0.5
SVI (mL/g)	83	90	0.004
Blower Energy (kW)	1508	1300	0.000003
Alum (gpd)	765	700	0.00001
Methanol (gpd)	842	485	0.00005

Three example values and point scores are shown below. In Example 3, the nitrification points are assigned as follows: (target – value)^2 x weight = (0.1-0.08)^2*5 = 0.002. This approach, developed with a holistic approach to treatment, allows the value of various treatment components like nitrification, denitrification, phosphorus removal, and settling properties to be compared with a single score.

Example	Ammonia	Nitrate	TP	SVI	Blower Energy	Alum	Methanol	Organic N
1	0.4	1.5	1.6	110	2000	1000	1200	1.1
2	0.2	1.1	1.5	100	1500	850	720	1
3	0.08	0.8	0.6	80	1000	400	400	0.8

Example	Nitrification Points	Nitrate Points	TP Points	SVI points	Energy Points	Alum Score	Methanol Score	Organic N Score	Total Score
1	-0.4500	-0.4000	-0.2400	-1.6000	-1.4700	-0.0030	-0.0036	-0.1000	-4.3
2	-0.0500	-0.0800	-0.1200	-0.4000	-0.1200	-0.0015	-0.0012	-0.0500	-0.8
3	0.0020	0.1600	0.9600	0.0400	0.0009	0.0030	0.0004	0.0500	1.2

The weights assigned to the competing goals will be tailored specifically to the PRWRF. The algorithm will assign points (or rewards) or penalties based on whether the process meets the treatment goals and the degree to which those goals are being met, exceeded, or unmet. Up to two versions of the weights can be programmed, for examples if there is a seasonal component to account for differences in seasonal permit limits or fundamental seasonal changes in operational paradigms, or to represent two operational philosophies—one that weighs regulatory compliance without regard for cost, and a second that incorporates energy and cost savings.

This scoring algorithm will be used to assess the current performance of the process alongside the visualization tool in Task 3. It can also be applied to past data where all required information is available. This historical data can be searched and filtered to identify days similar to the present to see how past performance was scored, giving the operator access to the operational setpoints that led to the best and worst outcomes in the past to aid in decision-making. Ultimately, it will be integrated with the completed hybrid (mechanistic + data-driven) tool developed in Task 6, which will automate the process. However, it will be available to operators sooner in a manual, data-driven historical data search format under Task 3.

Optimization Tool. The Optimization Tool involves writing a Python script that will trigger the optimization algorithm to run the Setpoint Model iteratively to find an optimal operating strategy for the existing conditions. This will happen each hour. The optimization algorithm will allow effluent variables to vary within an acceptable range (e.g., ammonia between 0.05 mg/L and 0.3 mg/) while predicting the behavior of the other variables in the optimization algorithm until a maximum score is achieved. The resulting variable values from the highest scoring algorithm will be returned hourly to the display layer in the Power BI visualization in Task 3 as a recommendation.

A Python script will also record the same values of those operational variables alongside the recommendation, so that after six months the recommendations can be compared with actions. The goal is to see how much the two programs are alike and different, and to build trust in this control strategy. Those two variables can be visualized side-by-side in the Power BI visual provided as Part of Task 3. The point is to build a database of advisory guidance to compare to actual control strategies. In this scope, the recommendations will never advance beyond an advisory tool, but if PRWRF staff like the results and trust the results, these recommendations could be integrated into a control strategy at an additional cost.

Task 6.4. Deploy Process Advisor Tool

Both the mechanistic and data-driven models need to be deployed in a digital cloud environment as a workflow. This includes the Influent Model, the Process Model, and the Operational Setpoint Model. As stated earlier, the Influent Model will run once a day at a fixed time, while the other two will run hourly in a sequence. This workflow also involves obtaining other necessary information from SCADA for the Process and Operational Setpoint Models such as the number of primary and secondary clarifiers in service, instrumentation data, the number of basins in service, etc.

The SQL data foundation (Task 1) will be leveraged to securely prepare the required inputs and store the outputs from each model in the sequence. SQL, Python, PowerQuery and/or other scripts will be used to move this information through the workflow. The following views in SQL are expected:

- Prepared data for influent models (8 views updated daily)
- Hourly diurnal flow and load curves for COD/BOD, TKN, TP, TSS, flow, and alkalinity (6 views that do not need to be updated)
- Output from mechanistic model (1 view updated daily)
- Prepared data input for Setpoint Model (1 view updated hourly)
- Output from Setpoint Model (1 view updated hourly)

This will be a Hazen-hosted Azure environment that will display the recommended operating points to the City via the Power BI dashboard (Task 3). This workflow is expected to take up to two hours to complete daily. Hosting fees will be estimated during the course of the project and communicated to the City. While there are no markups, the fees will be an ongoing expense for the City. Success of this step is predicated upon being able to obtain the proper data connectivity linkages described earlier in the scope.

Task 6.5. Documentation and Training

Hazen will develop a 20-page memorandum documenting the model development and deployment process. An appendix will contain a figure showing the accuracy of each data-driven model on a scatter plot of predicted versus observed values, a feature importance plot, and a SHapley Additive exPlanations (SHAP) plot. This single page document of each model will visually convey its accuracy and the importance and directionality of the independent variables.

Each step of the workflow (Influent Model, automated running of the Process Model, and the Setpoint Model) will be tested and the results shared with the City. Each step will be operated in a test mode and monitored for 30 days by Hazen staff, which will review the results on a weekly basis. During this time period, City staff will also have access to the visualization of results. Following the 30-day test, a virtual meeting will be held to discuss any feedback. Approximately 40 hours of additional development work are allocated for any modifications, and upon completion, the model will be considered complete.

A two-hour virtual training presentation will be held and recorded for PRWRF staff. This presentation will review the content of the technical memorandum and walk users through how to view the results of the models in the Power BI platform. An additional 40 hours of maintenance work to be allocated over the following 6 months are also included. Any additional effort beyond that will require a new scope and fee.

Task 6 Deliverables:

- Three additional Power BI pages displaying the recommendations from Process Advisor Tool.
- Azure workflow to sequentially run models and store model outputs.
- Scoring algorithm to enable assessment of current process performance and operate the Optimization Tool.

- 20-page technical memorandum.

Task 7**.** Data-Driven E. coli Model

PRWRF staff may wish to explore additional data-driven modeling outside of secondary treatment and the Process Advisor workflow. This scope item is included to account for one additional data-driven model, which can be developed and deployed as part of Task 3 (alongside the Task 6 deployment of the Process Advisor tool). It is anticipated that the City would like to develop a model to predict E.coli values one day in advance.

The technical approach will be similar to the influent concentration and load model development in Task 6.1. However, it is included separately from Task 6 because the outputs of the models developed under Task 6 could potentially be used as input variables for this model, and it is also anticipated that this model will utilize different independent variables from the models in Task 6, necessitating additional effort. The model in this task is anticipated to include other variables such as secondary effluent characteristics, which would not be appropriate to include in the influent model prediction and a downstream measurement cannot predict an upstream value.

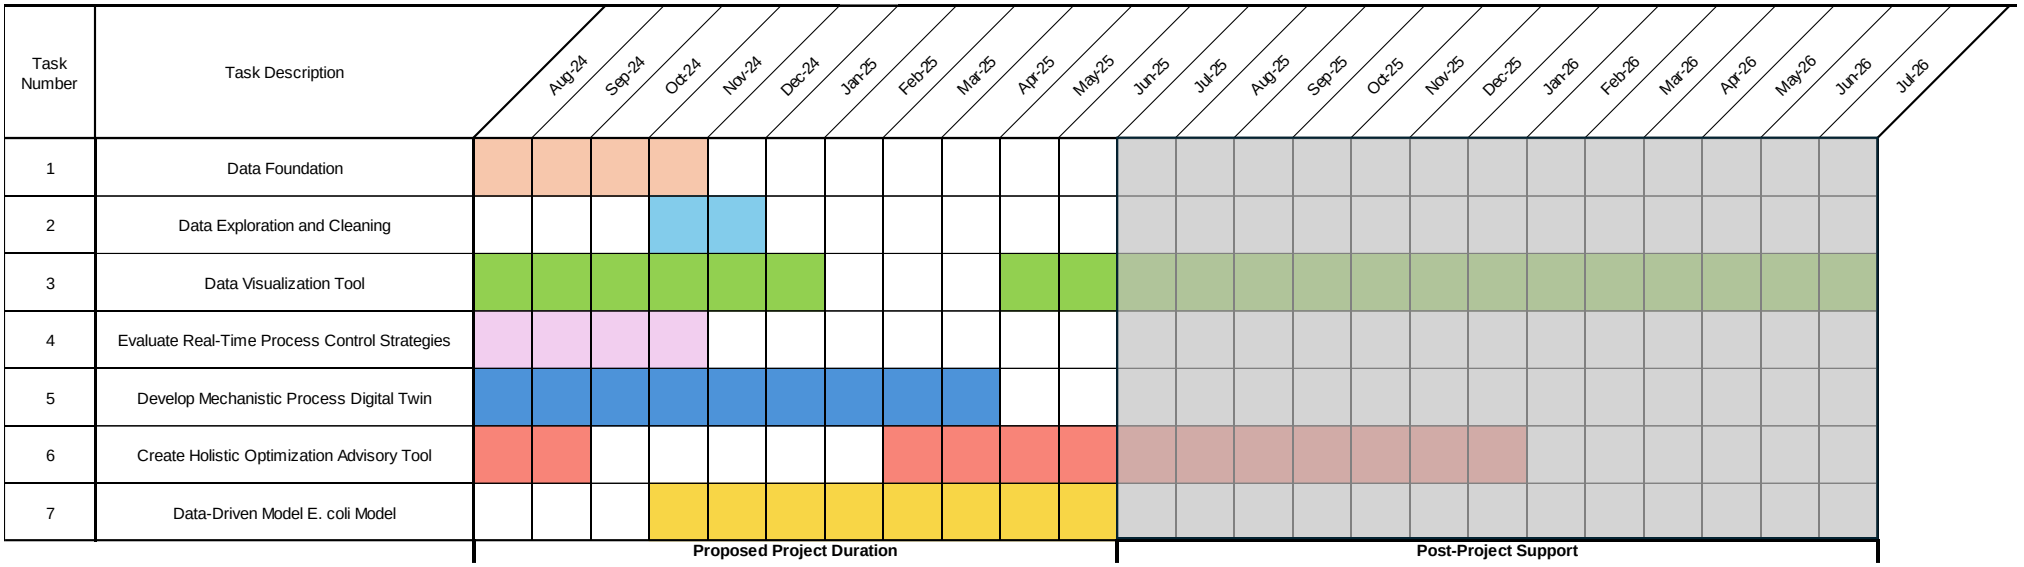
The accuracy of this model will be evaluated using the same approaches described in Task 6. If acceptable accuracy is achieved, this model will be deployed alongside the Process Advisor Tool in Task 6.

A 10-page technical memorandum summarizing the development of this model will be provided. A two-hour virtual training session with City staff will be included and recorded to summarize the model development and document the functionality of the tool and its intended use.

Task 7 Deliverables:

- One additional Power BI page displaying the E. Coli predicted value for the following day.
- Azure workflow to sequentially run models and store model outputs.
- A 10-page technical memorandum summarizing the development of this model.
- 2-hour virtual training workshop.

Meetings



As described above, Hazen will host six (6) virtual progress meetings and three (3) virtual workshops during the course of this task order. The progress meetings will be aimed at providing progress updates to the City as well as soliciting necessary feedback from the City on forthcoming deliverables. The workshops will focus on process staff and operator training in using the mechanistic process digital twin initially, and the Process Advisor Tool ultimately. While the exact agenda for the meetings may be modified in accordance with tool status or priorities for discussion or feedback, the meetings and workshops are broadly expected to cover the following:

Virtual Meeting / Workshop Number	Associated Tasks	Broad Meeting / Workshop Topic
Meeting 1 (May be up to 5 meetings 1.1, 1.2, 1.3, 1.4, 1.5)	1	Meeting with IT or Other City Staff as Needed for Data Sharing, Access and Continuous Updates
Meeting 2	2	Meeting to Review Data Flow and Data Cleaning Efforts
Workshop 1	3	Review General Data Visualization Tool (Power BI) and Gain Feedback for Finalization of Custom Pages
Meeting 3	3	Meeting to Solicit City Inputs on Operational Guidance Pages
Meeting 4	4	Meeting to Review Control Strategies
Meeting 5	5	Meeting to Train PRWRF Staff on Process Twin Web Application
Meeting 6	5	Meeting to Obtain Operator Feedback on Calibrated Twin
Workshop 2	6	Workshop to Review Final Tools (Power BI and Web-App) with City
Workshop 3	7	Progress Workshop for Data-Driven E.coli Modeling and Integration into Tools

Schedule

The figure on the following page provides a summary of the timeline for the proposed tasks. The timeline provided here assumes the completion of Task 1.1 as Time “Zero”, i.e., the timeline of months provided in the figure below is contingent upon the completion of the data warehouse set-up

Proposed Project Duration
Post-Project Support

Assumptions

1. For the data-driven modeling portion, at least 3 years of historical daily influent and effluent flow and concentration data for predicted parameters is available for analysis. Daily E. coli measurements and secondary effluent quality data are required for Task 7.

2. For the data-driven modeling portion, at least 6 months and preferably longer of historical hourly operational and flow data for predicted parameters is available for analysis. This includes but is not limited to DO analyzer readings, airflow measurements, blower/aerator energy use, SVI (daily is okay), nutrient analyzer readings, RAS flow, influent flow, WAS flow, and internal recycle flow. This time period must overlap with the above.

3. Microsoft Azure shall be the Cloud-based environment for digital tool deployments.

4. Santa Fe will access all deployments through HazenCloud, which is a Hazen-hosted Azure space. Hazen issues credentials to individual users and organizations.

5. Data acquisitions and connections can be made within two months (Task 1.1). If this timeline is not possible, the rest of the schedule will need to be adjusted accordingly.

Budget

The proposed not-to-exceed budget to provide the services described herein is $1,120,550. However, the $144,852 remaining in the budget for Task 700 – Digital Twin has been applied as a credit to result in a budget authorization request of $993,892.

Attachment 1 provides a budget breakdown for Task 1 – 7. All work will be performed on a time and materials basis. Labor will be billed using categorical rates. Expenses may include reimbursable mileage, airfare, lodging, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Hazen

Attachment 1: Proposed Budget

		Total	Fee		
Task	Description	Hours	Labor	Expense	Total
1	Data Foundation	716	$143,187		$143,187
2	Data Exploration and Cleaning	324	$73,591		$73,591
3	Data Visualization Tool	673	$124,844	$1,000	$125,844
4	Evaluate Real-Time Process Control Strategies	232	$54,450		$54,450
5	Develop Mechanistic Process Digital Twin	992	$263,499	$2,000	$265,499
6	Create Holistic Optimization Advisory Tool	1700	$389,567	$2,400	$391,967
7	Data Driven E. coli Model	275	$66,011		$66,011
	Credit for Budget Remaining in Task 700		($144,852)		($144,852)
	Subtotal Including Credit				$975,698
	NMGRT (8.1875% of Labor)			$18,193	$18,193
	TOTAL	4,912	$970,298	$23,593	$993,892

Hazen

City of Santa Fe, NM
Paseo Real WRF Onsite Operational Support
Scope of Work

1. Project Understanding

The City of Santa Fe (the City) has requested a scope from Hazen and Sawyer (Hazen) to provide onsite operational support at the Paseo Real Water Reclamation Facility (PRWRF). The City has requested full-time support for two months followed by part-time support for the remaining duration of Hazen's contract scheduled to end on September 30, 2026.

2. Personnel

Hazen and Sawyer proposes the following staff for this assignment:

- Tom Pfiester – Grade A Wastewater Treatment Operator licensed in Texas and Florida with 21 years of wastewater treatment operational experience. Prior to joining Hazen, Mr. Pfiester most recently served as Assistant Director of Wastewater Operations for Miami-Dade County.

- TJ Lynch – Grade IV Wastewater Treatment Operator licensed in North Carolina and Virginia with 31 years of wastewater treatment operational experience. Prior to joining Hazen, Mr. Lynch most recently served as Assistant Director of Raleigh Water.

- Charlie Leder – Level 4 Wastewater Treatment Operator licensed in New Mexico with 47 years of wastewater treatment operational experience. Prior to joining Hazen, Mr. Leder most recently served as Manager of Plant Operations for the Albuquerque Bernalillo County Water Utility Authority.

3. Scope of Services

Hazen staff will serve as an extension of the City's staff to support the operation of PRWRF. Hazen staff will provide the following services while stationed at the PRWRF:

- Regularly meet with City staff to assess operational challenges and goals.
- Review and reinforce PRWRF operational and regulatory requirements with City staff.
- Provide suggestions to improve plant operations and treatment efficacy.
- Provide hands-on troubleshooting support.
- Help develop Standard Operating Procedures (SOPs) and other operational guidelines.
- Coordinate with other Hazen staff to keep them apprised of onsite activities and new developments.

4. Schedule

The budget is based on the following schedule assumptions.

- Mr. Pfiester will be stationed at PRWRF full-time July 24, 2024 through September 27, 2024. He will then be stationed at PRWRF part-time (25%) October 1, 2024 to September 30, 2026. During the part-time phase, he will make one 1-week trip to PRWRF per month. The budget includes an additional three weeks of onsite support so Mr. Pfiester can spend four consecutive weeks onsite during the period spanning October 1, 2024 to September 30, 2026. The timing of the 4-week trip will be coordinated by the City and Hazen.

- Mr. Leder will be stationed at PRWRF part-time (50%) during September 2024. He will then be stationed at PRWRF part-time (25%) October 1, 2024 to September 30, 2026.

- Mr. Lynch will periodically visit PRWRF up to four (4) times between September 1, 2024 and September 30, 2026 to provide additional onsite support.

5. Assumptions

The following assumptions have been made in preparing the Scope of Work.

- Hazen staff will not function as the PRWRF Operator-in-Charge. Hazen's role is limited to operations support by providing assistance and suggestions as defined above. Neither Hazen nor individual Hazen staff assume liability for regulatory compliance.
- Monthly Operating Reports (MORs) will be reviewed, signed, and submitted by City staff. Hazen staff will not sign MORs or other regulatory documents.

6. Budget

The proposed not-to-exceed budget to provide the services described herein is $1,050,000. Attachment 1 provides a budget breakdown. All work will be performed on a time and materials basis. Labor will be billed using categorical rates. Expenses may include reimbursable mileage, airfare, lodging, car rentals, other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Hazen

Attachment 1: Proposed Budget

		Total	Fee		
Task	**Description**	**Hours**	**Labor**	**Expense**	**Total**
1	Full-Time Support	396	$108,196		$108,196
2	Part-Time Support	2,643	$749,478		$749,478
3	Project Management	50	$15,541		$15,541
4	Expenses Allowance			$105,291	$105,291
	Subtotal		$873,215	$105,291	$978,506
	NMGRT (8.1875% of Labor)			$71,494	
	TOTAL	**3,089**	**$873,215**	**$176,785**	**$1,050,000**

Item #:24-0299
Munis Contract #: 3204638
SWPA/GSA/Coop/RFP/ITB#: _____

CITY OF SANTA FE

PROFESSIONAL SERVICES CONTRACT

THIS CONTRACT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the "City," and **Hazen & Sawyer**, hereinafter referred to as the "Contractor," and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the Chief Procurement Officer of the City has made the determination that this Agreement is in accordance with the provisions of the New Mexico Procurement Code (NMSA 1978, 13-1-28 et seq.) pursuant to NMSA 1978, section 13-1-127; and

WHEREAS, the Contractor is one of such requisite and qualifications and is willing to engage with the City for professional services, in accordance with the terms and conditions hereinafter set out, and the Contractor understanding and consenting to the foregoing is willing to render such professional services as outlined in the Agreement; and

The City and the Contractor hereby agree as follows:

1. Scope of Work

The Contractor shall perform all the work required by this contract and any amendments thereof to build upon the improvements initiated in April 2023. The emergency procurement, this request for authorization, and accompanying Budget Adjustment Request (BAR) respond to the EPA's and NMED's requirement that the City eliminate or mitigate violations identified by the EPA within the shortest possible time. These actions, included as part of the a comprehensive plan, will clearly demonstrate the City's commitment to complete this project within the shortest possible time in the most efficient way possible.

The comprehensive plan focuses on improving current data collection, regulatory compliance, operational knowledge management / transfer, and management practices at the Paseo Real Water Reclamation Facility (PRWRF), combined with selective capital improvements to existing PRWRF facilities. This comprehensive plan can be broken down into the following ten (10) steps:

1. Provide sampling and regulatory support to ensure compliance with existing permits.

2. Support the City's external communications and regularly established weekly updates to improve communication and restore trust with Regulators.

3. Build a comprehensive base of knowledge & management tools / decision trees to guide PRWRF staff in day-to-day operations and management of the facility.

4. Improve PRWRF laboratory practices, data management, workflow, and communications for all testing performed to ensure regulatory compliance and/or support treatment operations.

5. Provide an inventory of all PRWRF instrumentation, calibration practices, data flows, and uses of information currently collected, and rectify gaps to improve process monitoring and control.

6. Develop a model for treatment operations using open-source software that integrates information available from lab test results and real-time supervisory control and data acquisition (SCADA) data.

7. Develop continuous modeling results incorporated into an advanced SCADA interface at the PRWRF to simulate and help optimize treatment plant operations and management.

8. Develop tools for simulation, testing, and operation of proposed changes to plant operations and enable remote operational support for emergency conditions.

9. Short-term treatment plant improvement projects. Examples of these limited scope projects include installing a new mechanical bar screen the already procured by the City, restoring two (2) former traveling bridge filter systems to working condition, or portable container based sand filtration equipment and related pumping capability.

10. Additional support to complete the items above including process engineering alternatives development and review, project management and scheduling support, construction related support and services, training support, and related items or equipment, as described in Contract Documents.

The Contractor shall provide the following services for the City:

See Exhibit A for additional detail for the Scope of Work

2. Standard of Performance; Licenses

A. The Contractor does hereby accept its designation as a professional service, rendering services related to professional services for the City, as set forth in this Agreement. The Contractor represents that Contractor possesses the personnel, experience, and knowledge necessary to perform the services described under this Contract.

B. The Contractor agrees to obtain and maintain throughout the term of this Contract, all applicable professional and business licenses required by law, for itself, its employees, agents, representatives, and subcontractors.

3. Compensation

A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed two million seven hundred eighteen thousand dollars ($2,718,000.00), excluding gross receipts tax. The New Mexico gross receipts tax levied on the amounts payable under this Contract and shall be paid by the City to the Contractor. **The total amount payable to the Contractor under this Contract excluding gross receipts tax and expenses, shall not exceed $2,718,000.00 (two million, seven hundred eight-teen thousand). This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Contract shall equal the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Contract reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Contract being amended in writing prior to those services in excess of the total compensation amount being provided.**

B. Payment is subject to availability of funds pursuant to the Appropriations Paragraph set forth below and to any negotiations between the parties from year to year pursuant to Paragraph 1, Scope of Work, and to approval by the City. All invoices MUST BE received by the City no later than thirty 30) days after the termination of the Fiscal Year in which the services were delivered. Invoices received after such date WILL NOT BE PAID.

C. Contractor must submit a detailed statement accounting for all services performed and expenses incurred. If the City finds that the services are not acceptable, within thirty days after the date of receipt of written notice from the Contractor that payment is requested, it shall provide the Contractor a letter of exception explaining the defect or objection to the services, and outlining steps the Contractor may take to provide remedial action. Upon certification by the City that the services have been received and accepted, payment shall be tendered to the Contractor within thirty days after the date of acceptance. If payment is made by mail, the payment shall be deemed tendered on the date it is postmarked.

D. If the City fails to pay the contractor within twenty-one days after receipt of an undisputed request for payment, the City shall pay interest to the contractor beginning on the twenty-second day after payment was due, computed at one and one-half percent of the undisputed amount per month or fraction of a month until the payment is issued. If the City receives an improperly completed invoice, the City shall notify the sender of the invoice within seven days of receipt in what way the invoice is improperly completed, and the owner has no further duty to pay on the improperly completed invoice until it is resubmitted as complete.

F. **Notice of Extended Payment Provision For Grant Funded Contracts**. This contract allows the owner to make payment within 45 days after submission of an undisputed request for payment.

4. Term

THIS CONTRACT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE CITY. This Contract shall terminate **in three years from date of final signature** unless terminated pursuant to paragraph 5 (Termination), or paragraph 6 (Appropriations). The City reserves the right to renew this contract on an annual basis by mutual agreement not to exceed a total of four (4) years in accordance with NMSA 1978, Sections 13-1-150 through 152.

5. Termination

A. Grounds. The City may terminate this Agreement for convenience or cause. For contracts within their authority, the City Manager or their designee is authorized to provide the notice of termination, otherwise such notice of termination shall be provided by the Mayor or their designee as authorized by the Governing Body. The Contractor may only terminate this Agreement based upon the City's uncured, material breach of this Agreement.

B. Notice; City Opportunity to Cure.

1) The City shall give Contractor written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Agreement upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Agreement, the Contractor is suspended or debarred by the City; or (iii) the Agreement is terminated pursuant to Paragraph 6, "Appropriations", of this Agreement.

C. Liability. Except as otherwise expressly allowed or provided under this Agreement, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT.*

6. Appropriations

The terms of this Contract are contingent upon sufficient appropriations and authorization being made by the Governing Body for the performance of this Contract. If sufficient appropriations and authorization are not made by the Governing Body, this Contract shall terminate immediately upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Contract to unilaterally reduce funding, the Contractor shall have the option to terminate the Contract or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

7. Status of Contractor

The Contractor and its agents and employees are independent contractors performing construction services for the City and are not employees of the City. The Contractor and its agents and employees shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Contract. The Contractor acknowledges that all sums received hereunder are reportable by the Contractor for tax purposes, including without limitation, self-employment and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

8. Assignment

The Contractor shall not assign or transfer any interest in this Contract or assign any claims for money due or to become due under this Contract without the prior written approval of the City.

9. Subcontracting

The Contractor shall not subcontract any portion of the services to be performed under this Contract without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Contract, nor shall any subcontract obligate direct payment from the City.

10. Release

Final payment of the amounts due under this Contract shall operate as a release of the City, its officers and employees from all liabilities, claims and obligations whatsoever arising from or under this Contract.

11. Confidentiality

Any confidential information provided to or developed by the Contractor in the performance of this Contract shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the City.

12. Product of Service – Copyright

All materials developed or acquired by the Contractor under this Contract shall become the property of the City and shall be delivered to the City no later than the termination date of this Contract. Nothing developed or produced, in whole or in part, by the Contractor under this Contract shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor.

13. Conflict of Interest; Governmental Conduct Act

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Contract, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Contract.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Contract, will continue to comply with, and that this Contract complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Article 12 are material representations of fact upon which the City relied when this Contract was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Article 12 were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Article 12 were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Contract to the contrary, the City may immediately terminate the Contract.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

14. Amendment

A. This Agreement shall not be altered, changed, or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Contract to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Contract, pursuant to the termination provisions as set forth in Article 4 herein, or to agree to the reduced funding.

15. Entire Agreement.

This Agreement, together with any other documents incorporated herein by reference and all related Exhibits and Schedules constitutes the sole and entire agreement of the Parties with respect to the subject matter of this Agreement, and supersedes all prior and contemporaneous understandings, agreements, representations, and warranties, both written and oral, with respect to the subject matter. In the event of any inconsistency between the statements in the body of this Agreement, and the related Exhibits and Schedules, the statements in the body of this Agreement shall control.

16. Merger

This Contract incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements, and understandings have been merged into this written contract.

All terms and conditions of the Emergency Procurement and the Contractor's response to such document(s) are incorporated herein by reference and is included in the order of precedence.

No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Contract.

17. Penalties for violation of law

NMSA 1978, sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities, and kickbacks.

18. Equal Opportunity Compliance

The Contractor agrees to abide by all federal and state laws and rules and regulations, and Santa Fe City Code, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Contract. If Contractor is found not to be in compliance with these requirements during the life of this Contract, Contractor agrees to take appropriate steps to correct these deficiencies.

19. Applicable Law

The laws of the State of New Mexico shall govern this Contract, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, section 38-3-2. By execution of this Contract, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Contract.

20. Workers Compensation

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Contract may be terminated by the City.

21. Professional Liability Insurance

Contractor shall maintain professional liability insurance throughout the term of this Contract providing a minimum coverage in the amount required under the New Mexico Tort Claims Act. The Contractor shall furnish the City with proof of insurance of Contractor's compliance with the provisions of this section as a condition prior to performing services under this Contract.

22. Other Insurance

If the services contemplated under this Contract will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Contract, the following insurance coverage(s), naming the City as additional insured.

A. **Commercial General Liability** insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. **Broader Coverage and Limits**. The insurance requirements under this Contract shall be the greater of (1) the minimum coverage and limits specified in this Contract, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor hereunder.

C. Contractor shall maintain the above insurance for the term of this Contract and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

23. Records and Financial Audit

The Contractor shall maintain detailed time and expenditure records that indicate the date; time, nature and cost of services rendered during the Contract's term and effect and retain them for a period of three (3) years from the date of final payment under this Contract. The records shall be subject to inspection by the City. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive or illegal payments.

24. Indemnification

The Contractor shall defend, indemnify and hold harmless the City from all actions, proceeding, claims, demands, costs, damages, attorneys' fees and all other liabilities and expenses of any kind from any source which may arise out of the performance of this Contract, caused by the negligent act or failure to act of the Contractor,

its officers, employees, servants, subcontractors or agents, or if caused by the actions of any client of the Contractor resulting in injury or damage to persons or property during the time when the Contractor or any officer, agent, employee, servant or subcontractor thereof has or is performing services pursuant to this Contract. If any action, suit or proceeding related to the services performed by the Contractor or any officer, agent, employee, servant or subcontractor under this Contract is brought against the Contractor, the Contractor shall, as soon as practicable but no later than two (2) days after it receives notice thereof, notify the legal counsel of the City.

25. New Mexico Tort Claims Act

Any liability incurred by the City of Santa Fe in connection with this Contract is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Contract modifies or waives any provision of the New Mexico Tort Claims Act.

26. Invalid Term or Condition

If any term or condition of this Contract shall be held invalid or unenforceable, the remainder of this Contract shall not be affected and shall be valid and enforceable.

27. Enforcement of Contract

A party's failure to require strict performance of any provision of this Contract shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Contract shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

28. Notices

Any notice required to be given to either party by this Contract shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

To the City:
City of Santa Fe Wastewater Division
Attn: Micheal Dozier, Wastewater Division Director
341 Caja del Rio Road
Santa Fe, NM 87505

To the Contractor:
Hazen & Sawyer
498 Seventh Ave, 11th Floor
New York, NY 10018

29. Authority

If Contractor is other than a natural person, the individual(s) signing this Contract on behalf of Contractor represents and warrants that he or she has the power and authority to bind Contractor, and that no further action, resolution, or approval from Contractor is necessary to enter a binding contract.

30. Non-Collusion

In signing this Agreement, the Contractor certifies the Contractor has not, either directly or indirectly, entered into action in restraint of free competitive bidding in connection with this offer submitted to the City's Chief Procurement Officer.

31. Default/Breach

In case of Default and/or Breach by the Contractor, for any reason whatsoever, the City may procure the goods or services from another source and hold the Contractor responsible for any resulting excess costs and/or damages, including but not limited to, direct damages, indirect damages, consequential damages, special damages, and the City may also seek all other remedies under the terms of this Agreement and under law or equity.

32. Equitable Remedies

The Contractor acknowledges that its failure to comply with any material provision of this Agreement will cause the City irrevocable harm and that a remedy at law for such a failure would be an inadequate remedy for the City, and the Contractor consents to the City 's obtaining from a court of competent jurisdiction, specific performance, or injunction, or any other equitable relief in order to enforce such compliance. The City's rights to obtain equitable relief pursuant to this Agreement shall be in addition to, and not in lieu of, any other remedy that the City may have under applicable law, including, but not limited to, monetary damages.

33. Default and Force Majeure

The City reserves the right to cancel all, or any part of any orders placed under this Agreement without cost to the City, if the Contractor fails to meet the provisions of this Agreement and, except as otherwise provided herein, to hold the Contractor liable for any excess cost occasioned by the City due to the Contractor's default. The Contractor shall not be liable for any excess costs if failure to perform the order arises out of causes beyond the control and without the fault or negligence of the Contractor; such causes include, but are not restricted to, acts of God or the public enemy, acts of the State or Federal Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather and defaults of subcontractors due to any of the above, unless the City shall determine that the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery scheduled. The rights and remedies of the City provided in this Clause shall not be exclusive and are in addition to any other rights now being provided by law or under this Agreement.

IN WITNESS WHEREOF, the Parties have executed this Contract as of the date of the signature by the required approval authorities below.

Re: Paseo Real Water Reclamation Facility (PRWRF)
Engineering, Operational Support, and Related Services in
Response to EPA Administrative Order CWA-06-2024-1745

Dear Mr. Dupuis:

We appreciated the opportunity to meet with the City of Santa Fe (City) on Wednesday, March 13, 2024 to discuss the referenced Administrative Order (AO) the City received from the U.S. Environmental Protection Agency (EPA) Region 6. As we discussed, the City would like to implement an overall plan that 1) responds to and resolves the AO, and 2) prepares the City for long-term, future success in operating and managing the Paseo Real Water Reclamation Facility (PRWRF) and similarly at a future facility being considered and visioned by the City as an eventual replacement for the PRWRF. The City's plan focuses on improving current data collection, regulatory compliance, operational, knowledge management / transfer, and management practices at the PRWRF, combined with selective capital improvements to existing PRWRF facilities. This comprehensive plan can be broken down into the following nine (9) steps:

1. Provide sampling and regulatory support to ensure compliance with existing permits.
2. Support the City's external communications with the New Mexico Environment Department (NMED).
3. Build a comprehensive base of knowledge management tools / decision trees to guide PRWRF staff in day-to-day operations and management of the facility.
4. Improve PRWRF laboratory practices, data management, workflows, and communications for all testing performed to ensure regulatory compliance and/or support treatment operations.
5. Provide an inventory of all PRWRF instrumentation, calibration practices, data flows, and uses of information currently collected and rectify gaps to improve process monitoring and control.
6. Develop a model for treatment operations using open-source software that integrates information

available from lab test results and real-time supervisory control and data acquisition (SCADA) data.

7. Develop a "digital twin" model of PRWRF to simulate and help optimize treatment plant operations.

8. Develop tools for remote simulation and testing of proposed changes to plant operations.

9. Provide engineering support for short-term treatment plant improvement projects.

The following narrative further defines the specific activities and services Hazen and Sawyer ("Hazen") proposes to provide. This work will be performed under a new engineering services agreement between the City and Hazen to be issued in response to EPA Administrative Order CWA-06-2024-1745.

Scope of Work

1. Sampling and Regulatory Support

Hazen will coordinate one soil sampling event and four quarterly groundwater sampling events at the PRWRF, with the samples being analyzed for poly- and perfluoroalkyl substances (PFAS). Both the soil and groundwater samples will be analyzed using EPA Method 1633. The sampling and reporting will be conducted by a third party in the place of City staff, with minor support from City staff. We have assumed that a total of 10 soil samples will be collected during one soil sampling event (including duplicate samples), and that each sample will be collected from a depth of 2 to 3 feet below ground surface using a hand auger. Ten groundwater samples will be analyzed during each groundwater sampling event (7 PRWRF monitor wells and 3 quality assurance samples). The groundwater sampling for PFAS will begin before Hazen begins supporting the groundwater sampling that is required by the facility's discharge permits (discussed below).

Hazen will coordinate the quarterly groundwater sampling and analysis that is required under discharge permits DP-289 (Wastewater Reclamation Facility) and DP-135 (Sludge Disposal Facility) issued by the NMED Ground Water Quality Bureau (GWQB) for six (6) quarters, starting with the second quarter sampling event in 2024. Hazen will also coordinate the required reporting under these permits. The sampling and reporting will be conducted by a third party in the place of City staff, with minor support from City staff (e.g., for purge water disposal). The City will provide additional information (e.g., monthly totalized average daily and peak daily influent volumes, monthly volumes discharged to each reclaimed domestic wastewater recipient, discharge monitoring reports) for inclusion in the quarterly discharge permit reports prepared for NMED. This task will support the City in achieving compliance with the requirements of these permits.

2. Communications Support

Along with City leadership and staff, Hazen staff (Amy Ewing) will participate in weekly phone calls that will be scheduled with NMED to discuss the current and planned activities and progress made in support of responding to and resolving the AO.

3. **Build a comprehensive base of knowledge management tools / decision trees for PRWRF operations**

Daily activities by PRWRF operations, maintenance, and management staff will support routine and consistent compliance with permit limits established by the City's National Pollutant Discharge Elimination System (NPDES) Permit NM 0022292 once staff have a clear understanding of:

- The purpose of each unit process
- Key Performance Indicators (KPIs) for measuring its performance
- Its relationship to upstream and downstream unit processes
- Information needed to monitor the process, and
- Expectations for each level of staff on how to achieve performance goals set for the process

Hazen proposes to develop these understandings by developing a series of documents called Area Procedures and Expectations (APEs) for each of the seven (7) liquid stream unit processes and four (4) solids handling processes at PRWRF. Each APE, developed as a PowerPoint presentation, will provide a clear guide for each level of operations, maintenance, and management staff, and will provide specific guidance for how and when to adjust the process, by how much, and by whom. Hazen's production of APEs will leverage existing Operation and Maintenance (O&M) Manual and Standard Operating Procedure (SOP) documentation the City may already have in place for PRWRF.

APE production will also document gaps between available information routinely collected (e.g., lab tests and SCADA data) versus what is needed to achieve reliable performance, how such information is distributed, and what improvements to information management are needed so that key items are communicated to staff who need it the most and at a frequency that supports their needs. APE production will also identify information and records currently being collected that do not serve the purpose of optimizing a treatment process. Lastly, APEs will capture information provided during the development of Items 4 and 5 described below.

Once the APEs have been prepared, Hazen will provide on-site staff training for each. This will include administering knowledge assessment quizzes to confirm staff are absorbing the critical information needed to successfully operate and maintain each unit process.

The collection of APEs will form the foundation for PRWRF knowledge management / transfer to which existing staff can refer as they work to optimize facility operations and to train future staff. As "living documents", APEs can be periodically updated by the City to reflect new facilities and capital improvements implemented at PRWRF.

The next element of this PRWRF knowledge management program summarizes the information contained in the 11 APEs (7 for liquid processes / 4 for solids handling) and provides an overview for how each process is supposed to work. This document called **Unit Process Operating Strategies** provides a useful reference to all levels of PRWRF staff and will serve as a tool for newcomers so they can quickly become familiar with "the right way" to operate plant facilities.

The final element of the knowledge management program currently envisioned will be preparation of a PRWRF **Operational Plan**. This document will provide information on the staff hierarchy, command and

communications structure, state and federal regulatory permits, plant safety programs, interrelationships with other City work groups (e.g., purchasing and materials management), and key summaries about PRWRF unit processes extracted from the **Unit Process Operating Strategies** document. Whereas the latter focuses on the information needed to optimize plant treatment operations, the **Operational Plan** focuses on the PRWRF enterprise as a whole and the communications within each internal and external City work group needed to achieve the best performance possible from PRWRF.

4. Improve PRWRF laboratory practices, data management, workflows, and communications

Hazen will provide the City with external sampling and reporting support for samples that are collected by PRWRF staff and analyzed by the in-house laboratory to demonstrate compliance with applicable state and federal discharge permits and to support operational control of PRWRF unit processes. We will work with City staff to ensure that all lab process documentation is current and complete and will assist in clearly defining appropriate workflows for PRWRF staff involved in sample collection, testing, and reporting of results. This task will include performing a review of lab operations, external collection and testing of laboratory samples for a period of up to 4 weeks, and assistance with the transition back to in-house sampling and analysis after PRWRF staff roles and responsibilities have been clearly defined for future lab activity. Item 4 includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

5. Provide an inventory of all PRWRF instrumentation

Hazen will develop an updated inventory of all instrumentation installed at PRWRF including calibration procedures and how this information is managed, stored, accessed, and communicated (e.g., paper logbooks, SCADA, Operator10™ software, or an alternate operational data storage platform/historian). This inventory will identify existing instruments that do not perform their intended function and/or could be re-deployed to provide the information needed by Operations staff. This inventory will also note opportunities to add instruments that will support real-time monitoring of treatment processes, as needed to accomplish Items 6 through 8 below. If practical, Hazen will use the City's current asset database format and structure to prepare this inventory of PRWRF instrumentation, which might then be used as an input to the City's asset management program.

6. Develop a model for treatment operations

Hazen will use the available information from lab data and SCADA data including any improvements to these sources realized through the outcomes of the work on Items 3 through 5 above, and will develop an operational model for PRWRF performance. This model will be developed using open-source software (e.g., SUMO™, BioWIN™, or similar product) and calibrated using the available data set. This model will be tested using the updated procedures for controlling and adjusting plant operations developed under our work for Item 3. This item includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

7. **Develop a "digital twin" model of plant operations to simulate and help optimize treatment plant operations**

The modeling work for Item 6 will next be used to develop a more advanced model that will serve as a "digital twin" the City can use for a variety of purposes including:

- A testbed for proposed changes to existing modes of operation for a particular treatment process
- Observing responses to upset / unexpected conditions for influent wastewater
- Assessing the impact that mechanical breakdown of treatment plant equipment may have on plant performance

As described, the "digital twin" should allow the City to evaluate the plant's response to a suite of unexpected stressors and determine what facility improvements or changes to normal operating procedures will foster a more resilient operation. Item 7 includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

8. **Develop tools for remote simulation and testing of proposed changes to plant**

The City has expressed interest in having Hazen partner with a nationally recognized firm to perform remote modeling, testing, and optimization of PRWRF operations, such as are provided by the company AM-Team or a similar entity. This item will build upon the work completed by Hazen for Items 3 through 7. The specific scope for Item 8 will be further refined once the outcomes for Items 3 through 7 have been established.

9. **Provide engineering support for short-term plant improvement projects at PRWRF**

The City has engaged the services of AAC Construction to perform select construction projects at PRWRF that are characterized as limited scope, remove-and-replace in-kind for specific treatment plant equipment / systems that are out of service or are no longer working. Examples of these limited scope projects include restoring two (2) former traveling bridge filter systems to working condition and installing a new mechanical bar screen the City previously procured. Hazen will provide the engineering support the Contractor may need to properly install and commission these equipment systems so that they perform as intended. There may be other projects of this type that the City decides to undertake, in addition to these two projects, for which Hazen can provide the engineering support the Contractor may need. We have included an allowance of $400,000 to cover the effort we anticipate may be needed for engineering support for short-term plant improvement projects.

Project Management

Hazen will perform ongoing project management activities including cost control and monitoring, invoicing, and general coordination with the City's project manager and staff for each of the 9 items of support described under **Scope** that the City authorizes. Each month, we will provide an overall progress report and invoice for authorized tasks similar to the reporting and invoicing process we currently employ for Engineering On-call Contract #23-0516.

Schedule

The work elements described under **Scope** are expected to be completed over the next 30 months, as needed and as directed by City staff. We are prepared to begin our work for the City immediately upon receipt of its written authorization to proceed.

Compensation

We are requesting an initial authorization of $2,718,000 including NMGRT to provide the services that are described under the Scope. Attachment 1 provides a budget breakdown for Items 1 through 7 and 9. As requested by the City, we have deferred estimating the effort for Item 8, pending completion of Items 1 through 7. All work will be performed on a time and materials basis using the labor rates attached to this letter. Please note these labor rates are the same rates used by Hazen for its work under Engineering On-Call Contract #23-0516 with the City of Santa Fe, and which get adjusted annually at the beginning of the City's fiscal year. Expenses may include reimbursable mileage, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Please call me at (505) 259-1679 or Charlie Leder at (505) 236-3889 if you have any questions or would like to discuss further Hazen's plan for providing services to help the City respond to EPA Administrative Order CWA-06-2024-1745.

Sincerely,

Greg Gates, PE
Vice President

Charles S. Leder, PE
Senior Associate

Attachment 1

Proposed budgets for Engineering, Operational Support, and Related Services in Response to EPA Administrative Order CWA-06-2024-1745

Service Item	Proposed time and materials budget
1. Regulatory support	$ 250,000
2. Communications support	$ 25,000
3. Build a comprehensive base of knowledge management tools / roadmaps for PRWRF operations	$ 750,000
4. Improve PRWRF laboratory practices, data management, workflows, and communications	$ 350,000
5. Provide an inventory of all PRWRF instrumentation	$ 250,000
6. Develop a model for treatment operations	$ 300,000
7. Develop a "digital twin" model of plant operations to simulate and help optimize treatment plant operations	$ 200,000
8. Develop tools for remote simulation and testing of proposed changes to plant	TBD
9. Provide engineering support for short-term plant improvement projects at PRWRF	$ 400,000
Total estimated budget for all Items	$ 2,525,000
NMGRT Allowance[1]	$ 193,000
Total budget including applicable NMGRT	$ 2,718,000

1. Estimate calculated using the Albuquerque FY 2024 NMGRT rate of 7.625%. NMGRT will be assessed on labor and subconsultant work performed in New Mexico.

LABOR RATES FOR HAZEN AND SAWYER STAFF

	Rates over next 4 years			
	2023-2024	2024-2025	2025-2026	2026-2027
Vice President / Project Director	$348.91	$359.38	$370.16	$381.26
Senior Associate	$281.39	$289.83	$298.52	$307.48
Associate	$225.11	$231.86	$238.82	$245.98
Senior Principal Engineer	$191.33	$197.07	$202.98	$209.07
Principal Engineer	$168.83	$173.89	$179.11	$184.48
Engineer	$157.58	$162.31	$167.18	$172.20
Assistant Engineer	$135.06	$139.11	$143.28	$147.58
Technician	$112.55	$115.93	$119.41	$122.99
Effective date for rates	7/1/2023	7/1/2024	7/1/2025	7/1/2026

1. Work performed by subconsultants will be billed at cost plus a 10% mark-up

City of Santa Fe
Emergency Determination Form

The Department that makes an emergency procurement to plan or prepare for the response to a serious threat to public health, welfare, safety or property caused by a flood, fire, epidemic, riot, act of terrorism, equipment failure or similar event shall account for the money spent in making the procurement and report on that accounting to the City's Finance Department Director within ninety days after the end of the contract or fiscal year in which the procurement was made, whichever comes first.

I. Department: Public Utilities, **City of Santa Fe**

Department Director: John Dupuis

Department Contact: _P. Fred Heerbrandt, P.E.

Department Telephone Number: 505-955-4623

City of SF Chief Procurement Officer: **Travis Dutton-Leyda, CPO**

Telephone Number: **(505) 629-8351**

II. **A. Name of Contractor: AquaSight**

Address of Contractor: 1650 W. Big Beaver Rd., Troy MI 48084

Amount of prospective contract: $350,000.00

Term of prospective contract: Three years

B. Name of Contractor: Great Western Electrical

Address of Contractor: 3310 Girard NE, Albuquerque, nm 87107

Amount of prospective contract: $155,690.08

Term of prospective contract: One year

C. Name of Contractor: Carollo Engineers, Inc.

Address of Contractor: P. O. Box 30835, Salt Lake City, UT 84130-0835

Amount of prospective contract: $80,000.00

Term of prospective contract: One year

D. Name of Contractor: ITSQUEST Staffing

Address of Contractor: 1012 Marquez Pl Ste 301B, Santa Fe, NM 87505

Amount of prospective contract: $264,463.70

Term of prospective contract: One year and two months

E. Name of Contractor: Hazen and Sawyer

Address of Contractor: 100 Sun Ave. NE, Suite 206, Albuquerque, NM 87109

Amount of prospective contract: $2,718,000.00

Term of prospective contract: 2.5 years

F. Name of Contractor: A.A.C. Construction, LLC

Address of Contractor: 18 La Luna Rd, Santa Fe, NM 57507

Amount of prospective contract: $2,465,837.04

Term of prospective contract: Two Years

G. Name of Contractor: Molzen Corbin

Address of Contractor: 2701 Miles Rd. SE, Albuquerque, NM 87106

Amount of prospective contract: $180,000

Term of prospective contract: Two Years

H. Name of Contractor: Rain for Rent (Western Oilfields Supply Co.)

Address of Contractor: 2495 Lakeside Drive, Las Cruces, NM 88007

Amount of prospective contract: $903,214.87

Term of prospective contract: Three Years

GRAND TOTAL: $7,117,250.69

The attached contractors and their associated scopes of work will assist City staff in bringing the wastewater reclamation facility into compliance.

Location of Services: Paseo Real Wastewater Reclamation Facility, 73 Paseo Real, Santa Fe, NM 87507

III. **Please thoroughly list the services (scope of work), construction or items of tangible personal property of the contract:**

1. Emergency funding request to remediate issues currently affecting the WWTF
   a. Contractors: Hazen and Sawyer ($2.7M), AAC construction (est.$2.5M), Carollo ($80k), Aquasight ($350k), ITSQuest (scheduler $264k), Great Western ($156k), Molzen Corbin ($180k), Rain for Rent ($903K)
   b. Improvements Plan
      - Quarterly Reporting disconnect
      - Weekly Meetings with NMED
      - Unit Process Operating Strategy documentation (Carollo/Hazen)
      - Instrumentation Implementation
      - Model Development/SCADA Integration
      - Sample and Reporting External Support
      - Advanced SCADA for Each Process
      - Unit Process Improvements

See attached proposals and scopes of work for details.

IV. **Provide an explanation for the justification of the procurement including a description of the emergency condition(s) requiring use of emergency procurement and the practicable competition utilized in compliance with NMSA 1978, § 13-1-127.**

The United States Environmental Protection Agency (EPA) has issued an Administrative Order (AO) issued to the City of Santa Fe for violations of the Clean Water Act (CWA) (33 U.S.C. §§ 1251-1387). The violations were identified during a review of the permit file and discharge monitoring reports submitted for the Paseo Real Wastewater Reclamation Facility. The violations alleged are for failure to meet permit effluent limitations. This AO does not assess a monetary penalty; however, it does require compliance with applicable federal regulations.

Similarly, the New Mexico Environment Department (NMED) has determined that the City of Santa Fe Paseo Real Wastewater Treatment Plant (WWTP) has been operating in noncompliance with the New Mexico Water Quality Act (WQA) and Water Quality Control Commission (WQCC)' regulations (20.6.2 and 20.6.4 New Mexico Administrative Code) adopted pursuant to the WQA.

To facilitate the most efficient response to these regulators, the City requires emergency procurement to develop a plan and to implement that plan to bring the Paseo Real Wastewater Reclamation Facility into compliance as soon as is feasible to do so.

EPA Region 6 Administrative Order Attached.

III. **Please describe what measures are being taken to minimize the duration and effect of this particular emergency procurement (for example: is the emergency only in place until a competitive process can be completed, etc.).**

By immediately bringing these contractors in to perform their requested scopes of work, we can begin to bring the facility into compliance, thereby eliminating or minimizing the associated risks to public health and safety associated with the non-compliant discharge.

IV. **Describe what measures the Department will take in the future to prevent/mitigate use of emergency procurement under similar circumstances.**

It is our goal and desire to prevent the conditions that precipitated the need for this emergency procurement by implementing the measures afforded by this emergency procurement.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
Region 6
FINDINGS OF VIOLATION AND COMPLIANCE ORDER
Docket Number: CWA-06-2024-1745; NPDES Permit Number: NM0022292

STATUTORY AUTHORITY

The following findings are made, and Order issued under the authority vested in the Administrator of the United States Environmental Protection Agency (EPA) by Section 309(a) of the Clean Water Act (Act), 33 U.S.C. § 1319(a). The Administrator of EPA delegated the authority to issue this Order to the Regional Administrator of EPA Region 6, who further delegated this authority to the Director of the Enforcement and Compliance Assurance Division.

FINDINGS

1. The City of Santa Fe (Respondent) is a municipality which was incorporated under the laws of the State of New Mexico, and as such, is a "person" as that term is defined at Section 502(5) of the Act, 33 U.S.C. § 1362(5), and 40 C.F.R. § 122.2.

2. At all times relevant to this Order (all relevant times), Respondent owned or operated a municipal wastewater treatment facility located at Airport Road, Santa Fe, Santa Fe County, New Mexico, 87504 (facility), and was, therefore, an "owner or operator" within the meaning of 40 C.F.R. § 122.2.

3. At all times relevant, the facility was a "point source" of a "discharge" of "pollutants" with its municipal wastewater to the receiving waters of Santa Fe River in Segment No. 20.6.4.113 of the Rio Grande Basin which are "waters of the United States" within the meaning of Section 502 of the Act, 33 U.S.C. § 1362, and 40 C.F.R. § 122.2.

4. Because Respondent owned or operated a facility that acted as a point source of discharges of pollutants to waters of the United States, Respondent and the facility were subject to the Act and the National Pollutant Discharge Elimination System (NPDES) program.

5. Under Section 301 of the Act, 33 U.S.C. § 1311, it is unlawful for any person to discharge any pollutant from a point source to waters of the United States, except with the authorization of, and in compliance with, an NPDES permit issued pursuant to Section 402 of the Act, 33 U.S.C. § 1342.

6. Section 402(a) of the Act, 33 U.S.C. § 1342(a), provides that the Administrator of EPA may issue permits under the NPDES program for the discharge of pollutants from point sources to waters of the United States. Any such discharge is subject to the specific terms and conditions prescribed in the applicable permit.

7. Respondent applied for and was issued NPDES Permit No. NM0022292 (herein the permit) under Section 402 of the Act, 33 U.S.C. § 1342, which became effective on September 1, 2021, and expires on August 31, 2026. At all relevant times, Respondent was authorized to discharge pollutants from the facility to waters of the United States only in compliance with the specific terms and conditions of the permit.

8. Part I.A of the permit places certain limitations on the quality and quantity of effluent discharged by Respondent. The relevant discharge limitations are indicated in the attached Table A.

9. Part I.C. of the permit requires the Respondent to sample and test its effluent and monitor its compliance with permit conditions according to specific procedures, in order to determine the facility's compliance or noncompliance with the permit and applicable regulations. It also requires the Respondent to file with EPA certified Discharge Monitoring Reports (DMRs) of the results of monitoring, and Noncompliance Reports when appropriate.

10. Certified DMRs filed by the Respondent with EPA in compliance with the permit show discharges of pollutants from the facility that exceed the permitted effluent limitations established in Part I.A of the permit, as specified in the attached Table B.

11. Each instance in which Respondent discharged pollutants to waters of the United States in amounts exceeding the effluent limitations contained in the permit is a violation of the permit and Section 301 of the Act, 33 U.S.C. § 1311. Each violation of the conditions of the permit or regulations described above is a violation of Section 301 of the Act, 33 U.S.C. § 1311.

12. Administrative Order (AO) Docket Number CWA-06-2019-1773 was issued on March 29, 2019, regarding the facility's NPDES permit excursions. The Respondent submitted a written response to the AO on May 31, 2019.

13. Administrative Order (AO) Docket Number CWA-06-2019-1818 was issued on August 26, 2019, regarding the facility's NPDES permit excursions. The Respondent submitted a written response to the AO on October 23, 2019.

14. Administrative Order (AO) Docket Number CWA-06-2021-1725 was issued on June 1, 2021, regarding the facility's NPDES permit excursions. The Respondent submitted a written response to the AO on June 11, 2021.

SECTION 309 (a)(3) COMPLIANCE ORDER

Based on the foregoing Findings and pursuant to the authority of Section 309 of the Act, EPA hereby orders Respondent to take the following actions:

A. Within thirty (30) days of the effective date of this Order, Respondent shall submit a list of the specific actions taken to correct the reporting and effluent violations cited in this Order.

B. Within thirty (30) days of the effective date of this Order, Respondent shall provide written certification to EPA, Region 6 that the violations cited herein have been corrected and that the facility is in compliance with the requirements of the permit.

C. In the event that Respondent believes complete correction of the violations cited herein is not possible within thirty (30) days of the effective date of this Order, Respondent shall, within thirty (30) days of the effective date of this Order, submit a comprehensive written plan for the elimination of the cited violations within the shortest possible time for EPA review. Such plan shall describe in detail the specific corrective actions to be taken and why such actions are sufficient to correct the violations. The plan may include interim corrective measures to address effluent limit violations as quickly as possible followed by subsequent permanent measures. The plan shall include a detailed schedule for the elimination of the violations within the shortest possible time, as well as measures to prevent these or similar violations from recurring.

D. If Respondent would like to arrange a meeting with EPA to discuss the allegations in this Order, it should contact EPA within forty-five (45) days of the effective date of this Order. The meeting will be held at the Region 6 offices, 1201 Elm Street, Dallas, Texas, and Respondent can provide any information it believes is relevant to this Order. Respondent shall submit to EPA all information or materials it considers relevant to EPA at least ten (10) days prior to the meeting.

E. To arrange a meeting, or to ask questions or comment on this matter, please contact Ms. Mona Tates, of my staff, at (214) 665-7152 or tates.mona@epa.gov.

F. Any information or correspondence submitted by Respondent to EPA under this Order shall be addressed to the following:

Ms. Nancy Williams
williams.nancy@epa.gov

and

Ms. Mona Tates
tates.mona@epa.gov

GENERAL PROVISIONS

Issuance of this Section 309(a)(3) Compliance Order shall not be deemed an election by EPA to forego any administrative, judicial, civil or criminal action to seek penalties, fines, or any other relief appropriate under the Act for the violations cited herein, or other violations that become known to EPA. EPA reserves the right to seek any remedy available under the law that it deems appropriate.

Respondent may seek federal judicial review of the Order pursuant to Chapter 7 of the Administrative Procedure Act, 5 U.S.C. §§ 701-706.

Failure to comply with this Section 309(a)(3) Compliance Order or the Act may result in further administrative action, or a civil judicial action initiated by the United States Department of Justice.

This Order does not constitute a waiver or modification of the terms or conditions of Respondent's NPDES permit, which remains in full force and effect. Compliance with the terms and conditions of this Order does not relieve Respondent of its obligation to comply with any applicable federal, state, or local law or regulation.

The effective date of this Order is the date it is received by the Respondent.

MOLZENCORBIN

March 20, 2024

Mr. Michael Dozier
Wastewater Division Manager
City of Santa Fe
P.O. Box 909
Santa Fe, New Mexico 87504-0909

RE: Emergency Purchase Order to Address EPA Administrative Order CWA-06-2024-1745 Citing Violations at the City of Santa Fe Paseo Real WWTP.

Dear Mr. Dozier:

The City of Santa Fe has requested that Molzen Corbin provide this Proposal for Engineering Services to assist in compliance with Administrative Order CWA-06-2024-1745. The Administrative Order was issued to the City of Santa Fe by the U.S. Environmental Protection Agency (USEPA) on March 4, 2024.

Molzen Corbin is one of the most experienced wastewater engineering firms in New Mexico. We have extensive experience designing, upgrading and retrofitting wastewater treatment facilities for communities throughout New Mexico. Our engineering staff regularly designs process modifications to improve performance at wastewater treatment facilities throughout the state.

We have assisted many communities when they have been issued Administrative Orders by the USEPA. We are experienced at working through the Administrative Order process to help communities comply with both the order and the conditions of their NPDES Permit. We have developed a template for responses to Administrative Orders and can assist them with their response.

Our process engineers work with the community's engineers and operators to evaluate data and assess operating conditions to solve water quality discharge problems. We may recommend changes to operating procedures, upgrades to existing facilities, replacement of aging equipment or installation of new infrastructure to improve effluent quality.

The City has expressed that Molzen Corbin develop a data-driven decision making approach to solving the problems at the Paseo Real Wastewater Treatment Facility. The City would like Molzen Corbin to explore ways that the Facility can be updated and streamlined so processes are equipped with that latest technology that is available.

Molzen Corbin understands that time is critical. The City of Santa Fe must submit a response to USEPA by April 3, 2024 as directed in Compliance Order Section C of the Compliance Order.

WILLINGNESS AND CAPABILITY

Molzen Corbin currently has staff available with the necessary expertise to assist the City of Santa Fe in complying with the Administrative Order. If the City needs services not offered by Molzen Corbin, this proposal includes fee for Additional Services that would allow Molzen Corbin to hire subconsultants. Additional Services may be used to explore multiple approaches to solving problems.

SCOPE OF SERVICES

This project may include but is not limited to the following:

- Research
- Process Engineering
- Design
- Construction Administration
- Telemetry and Controls

COMPENSATION
We propose to perform the Work described above on a Time and Materials basis based on our current Standard Billing Rates enclosed herein.

Basic Services – not to exceed $80,000 would include but not be limited to:

- Research
- Design
- Construction Administration

Additional Services – not to exceed $100,000 would include but not be limited to:

- Process Engineering
- Telemetry and Controls
- Other specialized services to be determined.

If you have any questions or require additional information, please contact Mr. Steve Morrow, P.E. at 505.242.5700.

Sincerely,

MOLZEN CORBIN

Kevin W. Eades, P.E.
Chief Executive Officer

Carollo Engineers, Inc.
On Call Engineering Services for
Water and Wastewater Processes and Treatment

SCOPE OF WORK
TASK ORDER 24-WW-01
Establishing Operational Excellence
March 19, 2024

The City of Santa Fe requested assistance to establish knowledge management tools that can be used to document the intent and nuances of each unit process. The resulting documentation can be used for training for new hires and refresher training for existing staff.

An evaluation of current conditions can help define available data, design parameters and current work routines. A gap analysis is typically used to establish the current conditions. From that analysis a more robust approach to formalize a variety of work practices and facility documentation that, if addressed, could provide more consistent facility operation. Consistent facility operation will result in reduced operating costs, less variable facility outputs, and improved O&M awareness.

Initially, three documents are desired. Two are Area Procedures and Expectations (APEs) to capture unit process information: Non-Potable Water Distribution (NPWD) and the Oxidation Ditch Biological Nutrient Removal (BNR) processes. The third is the initial Annual Operations Plan.

This Scope of Services includes working in concert with Hazen and Sawyer and the Wastewater Division Plant Superintendent, with concurrence with the Wastewater Division Director. For success, it is expected that the Plant Superintendent will be heavily involved in the development of the initiatives, with Carollo's and Hazen's Operations Specialists providing guidance and examples to complete and then launch the initiatives developed in this Scope of Services. It is probable that a variety of staff will be engaged, as many of these initiatives involve the existing database, upgraded presentation of concepts and instructions, and computer-based support.

The goal of this Scope of Services is to assist the City of Santa Fe and the Wastewater Division Plant Superintendent in developing means and methods to improve the operation and maintenance of wastewater treatment processes.

The work and resulting deliverables will be split between Carollo Engineers and (under separate authorization) Hazen. Additional authorizations may be required to complete the breadth of the envisioned Establishing Operational Excellence initiatives.

Services will include some or all of the specific tasks listed below, up to the budget upper limit for this Task Order.

PHASE 1 – Site Visit and Gap Analysis

Site Visit

1. This allows Operations Specialist(s) to learn the facility, but more importantly, meet the staff to establish our working relationships.

Conduct a gap analysis to understand the current state of facility operations.

1. The analysis will identify strengths, opportunities and concerns.
2. The results will be documented in a report.

Evaluate current databases for completeness.

1. Compare existing data and presentation to best-industry practices.
2. Includes daily process results, data tracking and trending used for process control and optimization.

Evaluate and upgrade existing unit process performance measurement reports.

1. Refine or establish key performance indicators to match typical industry practices.
2. Refine the presentation of performance data in monthly and annual formats to match KPIs and annual operating plan information.

Standardize unit process Standard Operating Procedures for the NPWD and BNR processes.

1. Evaluate existing SOPs against typical industry practices.
2. Define SOPs that may be missing.
3. Provide template to standardize SOPs based on EPA guidance.
4. Assist staff is the development of pilot SOPs based on the Oxidation Ditch BNR process.

Phase 2 – Develop Pilot APEs

Develop Area Procedures and Expectations (APEs) for the NPWD and BNR processes.

1. APEs will be developed in PowerPoint.
2. The presentation will define the treatment objectives, process control responses, control points, sampling locations, data recording, crucial SOPs, critical preventative maintenance activities, and expected duties and expectations of maintenance and operator personnel working within the process. These serve as a training tool for new employees and refresher information for others.
3. These APEs will be the model for all other identified process areas.

Draft a Facility Operations and Maintenance Plan (Plan).

1. The Plan establishes how O&M staff operate and maintain each unit process at the facility.
2. The Plan describes sampling means and methods used to demonstrate permit compliance.

Draft an Annual Operating Plan (AOP).

1. The AOP identifies factors, such as projected wastewater flows and loads, as well as activities, such as construction or extraordinary maintenance, which will impact plant operations in the coming year.
2. Based on these factors, specific operating strategies are identified for treatment unit processes for the year.

3. The AOP projects upcoming maintenance or construction activities for advanced planning to support budget allocations.
4. The plan identifies facility or capacity deficiencies to help inform capital improvement upgrades.

PRELIMINARY PROJECT APPROACH

The project objectives are provided below.

ID	Description	Work Required
Phase 1		
1.1	Site Visit and Gap Analysis	• Review current conditions • Conduct interview(s) • Confirm findings • Provide findings in a report
1.2	Process data reporting evaluation	• Evaluate existing means and methods • Provide report with suggested improvements
1.4	Data tracking and reporting	• Evaluate existing • Provide report with suggested improvements
1.5	Standard Operating Procedures	• Evaluate existing • Provide template for to standardize current and/or develop future SOPs
Phase 2		
2.1	NPWD Area Procedures and Expectations	• Develop PowerPoint • Provide NPWD staff training
2.2	BNR Area Procedures and Expectations	• Develop PowerPoint • Provide NPWD staff training
2.3	Facility Operations and Maintenance Plan	• Develop initial plan
2.4	Annual Operations Plan	• Develop initial plan

$80,000.00 of the contractual upper limit is allocated to work to be executed under this Task Order, inclusive of labor and expenses, but exclusive of NMGRT. The work will be invoiced on a time and materials basis. Project management time for staffing and budget management and reporting for this task order will be included when work is active on this task order. A progress report will accompany monthly invoices, providing a summary of work conducted under Task Order 24-WW-01 for the subject invoicing period. The invoice will indicate the amount of the $80,000.00 upper limit for this task order that has been incurred versus the amount remaining.

RE: Electrical Proposal
Santa Fe Waste Water SCATA Fiber Installation
Attention: Andrew Hardinge
Scope:

- Provide 18,000 feet of 1" innerduct.
- Provide 18,000 feet of TLC 24 fiber indoor, outdoor, and plenum rated.
- Provide and install 10 stainless NEMA4 boxes to end fiber runs in each building.
- Provide and install stainless NEMA4 boxes in manholes where fiber and innerduct splice.
- Pull innerduct and fiber per COSF WWTF proposed innerduct conduit system drawing.
- Provide and install a 2" EMT conduit from the SCATA room in the administration building to the underground manhole conduit system.
- Core holes into manholes to extend raceways to Las Campanas golf course pump house, dissolved air flotation control building, the holding tank by the lime bed, the maintenance office, and the primary clarifiers.

Labor	$70,363.35
Material retail	$63,101.26
Material 10% discount	$56,791.14
Equipment	$13,073.50
Permit	$800.00
Sub Total	$141,027.99
NMGRT @ 8.1875%	$11,546.67
Bond	$3,115.42
Total	**$155,690.08**

Exclusions

- Damaged to unmarked underground utilities.
- Testing and terminating the fiber.
- Overtime or after-hours work.
- Trench, conduit, fiber, and innerduct to secondary clarifiers and offices.

Regards,
Danny Burson
Project Manager

City of Santa Fe - Waste Water SCATA

Re: Paseo Real Water Reclamation Facility (PRWRF)
Engineering, Operational Support, and Related Services in
Response to EPA Administrative Order CWA-06-2024-1745

Dear Mr. Dupuis:

We appreciated the opportunity to meet with the City of Santa Fe (City) on Wednesday, March 13, 2024 to discuss the referenced Administrative Order (AO) the City received from the U.S. Environmental Protection Agency (EPA) Region 6. As we discussed, the City would like to implement an overall plan that 1) responds to and resolves the AO, and 2) prepares the City for long-term, future success in operating and managing the Paseo Real Water Reclamation Facility (PRWRF) and similarly at a future facility being considered and visioned by the City as an eventual replacement for the PRWRF. The City's plan focuses on improving current data collection, regulatory compliance, operational, knowledge management / transfer, and management practices at the PRWRF, combined with selective capital improvements to existing PRWRF facilities. This comprehensive plan can be broken down into the following nine (9) steps:

1. Provide sampling and regulatory support to ensure compliance with existing permits.

2. Support the City's external communications with the New Mexico Environment Department (NMED).

3. Build a comprehensive base of knowledge management tools / decision trees to guide PRWRF staff in day-to-day operations and management of the facility.

4. Improve PRWRF laboratory practices, data management, workflows, and communications for all testing performed to ensure regulatory compliance and/or support treatment operations.

5. Provide an inventory of all PRWRF instrumentation, calibration practices, data flows, and uses of information currently collected and rectify gaps to improve process monitoring and control.

6. Develop a model for treatment operations using open-source software that integrates information available from lab test results and real-time supervisory control and data acquisition (SCADA) data.

7. Develop a "digital twin" model of PRWRF to simulate and help optimize treatment plant operations.

8. Develop tools for remote simulation and testing of proposed changes to plant operations.

9. Provide engineering support for short-term treatment plant improvement projects.

The following narrative further defines the specific activities and services Hazen and Sawyer ("Hazen") proposes to provide. This work will be performed under a new engineering services agreement between the City and Hazen to be issued in response to EPA Administrative Order CWA-06-2024-1745.

Scope of Work

1. Sampling and Regulatory Support

Hazen will coordinate one soil sampling event and four quarterly groundwater sampling events at the PRWRF, with the samples being analyzed for poly- and perfluoroalkyl substances (PFAS). Both the soil and groundwater samples will be analyzed using EPA Method 1633. The sampling and reporting will be conducted by a third party in the place of City staff, with minor support from City staff. We have assumed that a total of 10 soil samples will be collected during one soil sampling event (including duplicate samples), and that each sample will be collected from a depth of 2 to 3 feet below ground surface using a hand auger. Ten groundwater samples will be analyzed during each groundwater sampling event (7 PRWRF monitor wells and 3 quality assurance samples). The groundwater sampling for PFAS will begin before Hazen begins supporting the groundwater sampling that is required by the facility's discharge permits (discussed below).

Hazen will coordinate the quarterly groundwater sampling and analysis that is required under discharge permits DP-289 (Wastewater Reclamation Facility) and DP-135 (Sludge Disposal Facility) issued by the NMED Ground Water Quality Bureau (GWQB) for six (6) quarters, starting with the second quarter sampling event in 2024. Hazen will also coordinate the required reporting under these permits. The sampling and reporting will be conducted by a third party in the place of City staff, with minor support from City staff (e.g., for purge water disposal). The City will provide additional information (e.g., monthly totalized average daily and peak daily influent volumes, monthly volumes discharged to each reclaimed domestic wastewater recipient, discharge monitoring reports) for inclusion in the quarterly discharge permit reports prepared for NMED. This task will support the City in achieving compliance with the requirements of these permits.

2. Communications Support

Along with City leadership and staff, Hazen staff (Amy Ewing) will participate in weekly phone calls that will be scheduled with NMED to discuss the current and planned activities and progress made in support of responding to and resolving the AO.

3. **Build a comprehensive base of knowledge management tools / decision trees for PRWRF operations**

Daily activities by PRWRF operations, maintenance, and management staff will support routine and consistent compliance with permit limits established by the City's National Pollutant Discharge Elimination System (NPDES) Permit NM 0022292 once staff have a clear understanding of:

- The purpose of each unit process
- Key Performance Indicators (KPIs) for measuring its performance
- Its relationship to upstream and downstream unit processes
- Information needed to monitor the process, and
- Expectations for each level of staff on how to achieve performance goals set for the process

Hazen proposes to develop these understandings by developing a series of documents called Area Procedures and Expectations (APEs) for each of the seven (7) liquid stream unit processes and four (4) solids handling processes at PRWRF. Each APE, developed as a PowerPoint presentation, will provide a clear guide for each level of operations, maintenance, and management staff, and will provide specific guidance for how and when to adjust the process, by how much, and by whom. Hazen's production of APEs will leverage existing Operation and Maintenance (O&M) Manual and Standard Operating Procedure (SOP) documentation the City may already have in place for PRWRF.

APE production will also document gaps between available information routinely collected (e.g., lab tests and SCADA data) versus what is needed to achieve reliable performance, how such information is distributed, and what improvements to information management are needed so that key items are communicated to staff who need it the most and at a frequency that supports their needs. APE production will also identify information and records currently being collected that do not serve the purpose of optimizing a treatment process. Lastly, APEs will capture information provided during the development of Items 4 and 5 described below.

Once the APEs have been prepared, Hazen will provide on-site staff training for each. This will include administering knowledge assessment quizzes to confirm staff are absorbing the critical information needed to successfully operate and maintain each unit process.

The collection of APEs will form the foundation for PRWRF knowledge management / transfer to which existing staff can refer as they work to optimize facility operations and to train future staff. As "living documents", APEs can be periodically updated by the City to reflect new facilities and capital improvements implemented at PRWRF.

The next element of this PRWRF knowledge management program summarizes the information contained in the 11 APEs (7 for liquid processes / 4 for solids handling) and provides an overview for how each process is supposed to work. This document called **Unit Process Operating Strategies** provides a useful reference to all levels of PRWRF staff and will serve as a tool for newcomers so they can quickly become familiar with "the right way" to operate plant facilities.

The final element of the knowledge management program currently envisioned will be preparation of a PRWRF **Operational Plan**. This document will provide information on the staff hierarchy, command and

communications structure, state and federal regulatory permits, plant safety programs, interrelationships with other City work groups (e.g., purchasing and materials management), and key summaries about PRWRF unit processes extracted from the **Unit Process Operating Strategies** document. Whereas the latter focuses on the information needed to optimize plant treatment operations, the **Operational Plan** focuses on the PRWRF enterprise as a whole and the communications within each internal and external City work group needed to achieve the best performance possible from PRWRF.

4. Improve PRWRF laboratory practices, data management, workflows, and communications

Hazen will provide the City with external sampling and reporting support for samples that are collected by PRWRF staff and analyzed by the in-house laboratory to demonstrate compliance with applicable state and federal discharge permits and to support operational control of PRWRF unit processes. We will work with City staff to ensure that all lab process documentation is current and complete and will assist in clearly defining appropriate workflows for PRWRF staff involved in sample collection, testing, and reporting of results. This task will include performing a review of lab operations, external collection and testing of laboratory samples for a period of up to 4 weeks, and assistance with the transition back to in-house sampling and analysis after PRWRF staff roles and responsibilities have been clearly defined for future lab activity. Item 4 includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

5. Provide an inventory of all PRWRF instrumentation

Hazen will develop an updated inventory of all instrumentation installed at PRWRF including calibration procedures and how this information is managed, stored, accessed, and communicated (e.g., paper logbooks, SCADA, Operator10™ software, or an alternate operational data storage platform/historian). This inventory will identify existing instruments that do not perform their intended function and/or could be re-deployed to provide the information needed by Operations staff. This inventory will also note opportunities to add instruments that will support real-time monitoring of treatment processes, as needed to accomplish Items 6 through 8 below. If practical, Hazen will use the City's current asset database format and structure to prepare this inventory of PRWRF instrumentation, which might then be used as an input to the City's asset management program.

6. Develop a model for treatment operations

Hazen will use the available information from lab data and SCADA data including any improvements to these sources realized through the outcomes of the work on Items 3 through 5 above, and will develop an operational model for PRWRF performance. This model will be developed using open-source software (e.g., SUMO™, BioWIN™, or similar product) and calibrated using the available data set. This model will be tested using the updated procedures for controlling and adjusting plant operations developed under our work for Item 3. This item includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

7. **Develop a "digital twin" model of plant operations to simulate and help optimize treatment plant operations**

The modeling work for Item 6 will next be used to develop a more advanced model that will serve as a "digital twin" the City can use for a variety of purposes including:

- A testbed for proposed changes to existing modes of operation for a particular treatment process
- Observing responses to upset / unexpected conditions for influent wastewater
- Assessing the impact that mechanical breakdown of treatment plant equipment may have on plant performance

As described, the "digital twin" should allow the City to evaluate the plant's response to a suite of unexpected stressors and determine what facility improvements or changes to normal operating procedures will foster a more resilient operation. Item 7 includes an initial workshop with Hazen and City staff to further define the City's specific goals and objectives for the work to be completed.

8. **Develop tools for remote simulation and testing of proposed changes to plant**

The City has expressed interest in having Hazen partner with a nationally recognized firm to perform remote modeling, testing, and optimization of PRWRF operations, such as are provided by the company AM-Team or a similar entity. This item will build upon the work completed by Hazen for Items 3 through 7. The specific scope for Item 8 will be further refined once the outcomes for Items 3 through 7 have been established.

9. **Provide engineering support for short-term plant improvement projects at PRWRF**

The City has engaged the services of AAC Construction to perform select construction projects at PRWRF that are characterized as limited scope, remove-and-replace in-kind for specific treatment plant equipment / systems that are out of service or are no longer working. Examples of these limited scope projects include restoring two (2) former traveling bridge filter systems to working condition and installing a new mechanical bar screen the City previously procured. Hazen will provide the engineering support the Contractor may need to properly install and commission these equipment systems so that they perform as intended. There may be other projects of this type that the City decides to undertake, in addition to these two projects, for which Hazen can provide the engineering support the Contractor may need. We have included an allowance of $400,000 to cover the effort we anticipate may be needed for engineering support for short-term plant improvement projects.

Project Management

Hazen will perform ongoing project management activities including cost control and monitoring, invoicing, and general coordination with the City's project manager and staff for each of the 9 items of support described under **Scope** that the City authorizes. Each month, we will provide an overall progress report and invoice for authorized tasks similar to the reporting and invoicing process we currently employ for Engineering On-call Contract #23-0516.

Schedule

The work elements described under **Scope** are expected to be completed over the next 30 months, as needed and as directed by City staff. We are prepared to begin our work for the City immediately upon receipt of its written authorization to proceed.

Compensation

We are requesting an initial authorization of $2,718,000 including NMGRT to provide the services that are described under the Scope. Attachment 1 provides a budget breakdown for Items 1 through 7 and 9. As requested by the City, we have deferred estimating the effort for Item 8, pending completion of Items 1 through 7. All work will be performed on a time and materials basis using the labor rates attached to this letter. Please note these labor rates are the same rates used by Hazen for its work under Engineering On-Call Contract #23-0516 with the City of Santa Fe, and which get adjusted annually at the beginning of the City's fiscal year. Expenses may include reimbursable mileage, printing, mailing, supplies, and other similar costs incurred to perform the work. The Hazen Project Manager will provide status reports indicating percent complete by task with each monthly invoice.

Please call me at (505) 259-1679 or Charlie Leder at (505) 236-3889 if you have any questions or would like to discuss further Hazen's plan for providing services to help the City respond to EPA Administrative Order CWA-06-2024-1745.

Sincerely,

Greg Gates, PE
Vice President

Charles S. Leder, PE
Senior Associate

Title: City of Santa Fe Public Utilities Director

Attachment 1

Proposed budgets for Engineering, Operational Support, and Related Services in Response to EPA Administrative Order CWA-06-2024-1745

Service Item	Proposed time and materials budget
1. Regulatory support	$ 250,000
2. Communications support	$ 25,000
3. Build a comprehensive base of knowledge management tools / roadmaps for PRWRF operations	$ 750,000
4. Improve PRWRF laboratory practices, data management, workflows, and communications	$ 350,000
5. Provide an inventory of all PRWRF instrumentation	$ 250,000
6. Develop a model for treatment operations	$ 300,000
7. Develop a "digital twin" model of plant operations to simulate and help optimize treatment plant operations	$ 200,000
8. Develop tools for remote simulation and testing of proposed changes to plant	TBD
9. Provide engineering support for short-term plant improvement projects at PRWRF	$ 400,000
Total estimated budget for all Items	$ 2,525,000
NMGRT Allowance[1]	$ 193,000
Total budget including applicable NMGRT	$ 2,718,000

1. Estimate calculated using the Albuquerque FY 2024 NMGRT rate of 7.625%. NMGRT will be assessed on labor and subconsultant work performed in New Mexico.

LABOR RATES FOR HAZEN AND SAWYER STAFF

	Rates over next 4 years			
	2023-2024	2024-2025	2025-2026	2026-2027
Vice President / Project Director	$348.91	$359.38	$370.16	$381.26
Senior Associate	$281.39	$289.83	$298.52	$307.48
Associate	$225.11	$231.86	$238.82	$245.98
Senior Principal Engineer	$191.33	$197.07	$202.98	$209.07
Principal Engineer	$168.83	$173.89	$179.11	$184.48
Engineer	$157.58	$162.31	$167.18	$172.20
Assistant Engineer	$135.06	$139.11	$143.28	$147.58
Technician	$112.55	$115.93	$119.41	$122.99
Effective date for rates	7/1/2023	7/1/2024	7/1/2025	7/1/2026

1. Work performed by subconsultants will be billed at cost plus a 10% mark-up

AQUASIGHT
INTELLIGENT WATER SOLUTIONS

March 19, 2024

John Dupuis
Director, Public Utilities Department
City of Santa Fe
200 Lincoln Avenue
Santa Fe, New Mexico 87501

Subject: Proposal for Aquasight APOLLO™ Intelligent Treatment Plant Solution

Dear Mr. Dupuis,

Aquasight is pleased to submit our proposal for implementation the APOLLO™ Intelligent Treatment Plant Solution for the City of Santa Fe Public Works Department.

With the primary goal of supporting your operations team and their successful work to meet all regulatory requirements at the Paseo Real Water Reclamation Facility, the APOLLO™ solution also will support many other benefits such as improved data visibility and mining for laboratory insights, identification of gaps in plant instrumentation, integration of Digital Twin capabilities for better process control, process optimization, and deeper knowledge capture for workforce training and support.

Our implementation program is collaborative, and we will work with your team to ensure project goals are achieved, and the City is provided with a strong foundational program for intelligent water and wastewater solutions.

If you have any questions, feel free to let us know. We look forward to working with the team.

Jonathan Hasson, PE

Vice President, Smart Water Solutions

Cc: Mahesh Lunani, CEO Aquasight

SANTA FE PUBLIC UTILITIES

PASEO REAL WATER RECLAMATION FACILITY PROCESS OPTIMIZATION PROJECT PROPOSAL

March 19, 2024

BACKGROUND

The City of Santa Fe, NM provides wastewater collection, treatment, and disposal services for nearly 90,000 residents and businesses. The City owns and operates the 9 MGD annual average daily flow (AADF) (rated for 13 MGD) Paseo Real Water Reclamation Facility which is a conventional activated sludge plant that includes screening and sedimentation for primary treatment, oxidation ditch basins, aeration, and clarification for secondary treatment plus nitrogen reduction, and disk and sand filters, chlorination, and dechlorination for tertiary treatment before discharging into the Santa Fe River (**Figure 1**). The City recently received an Administrative Order for permit exceedances in both E. Coli and Nitrogen. As a measure to ensure improved plant effluent performance, optimize data usage and process performance, the City desires a rapidly deployable, data-driven solution for increase opportunities for successful permit compliance.

The PRWRF has adequate data for some process control, but also could benefit from additional sensors and instrumentation to make it a more data rich facility. Data is generated and stored in a variety of different systems, and many of those systems do not share/communicate data well for daily operational benefits. There is an abundance of untapped potential to integrate and mine this data using science or ML/AI-based algorithms to help with process optimization, capture energy and chemical savings, store process knowledge, create maintenance insights, and assist with troubleshooting. This will require a tool that can provide streaming analytics, smart advisors, Aquasight COPILOT^{TM}, and actionable assistance to the staff to create a data driven O&M culture.

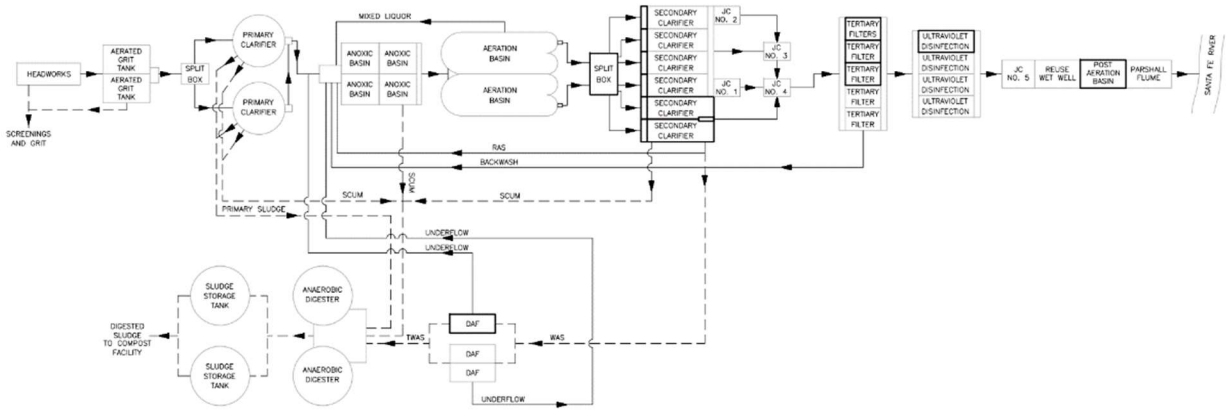

Figure 1: PRWRF Process Flow Diagram

PROJECT GOALS & EXPECTED BENEFITS

The City of Santa Fe Public Works is implementing a strategic initiative to further improve treatment plant effluent performance and reduce operating and maintenance costs by leveraging Aquasight's APOLLO™. The overall goal of this project is to implement a modular real-time advanced analytics and Copilot™ system for liquid unit processes that will support operator success for meeting permit discharge limits and support operational efficiencies for liquid processes that consume the greatest amount of power and chemicals. APOLLO™ will support the City's goals of continuous and measured progress towards the PRWRF optimization goals over time.

Benefits anticipated by implementation of the Aquasight APOLLO™ solution include:

- Deeper integration and sharing of Laboratory sampling data and insights supporting more informed operations.
- Identification of gaps in instrumentation throughout plant processes leading to a more data rich environment for improved process control, optimization, and decision making.
- Implementation of operator focused digital twin functionality allowing for improved real-time streaming insights into potential operational changes and their impacts on process performance KPIs.
- Capture of operational and institutional knowledge by providing a historical record of plant data and operational KPIs for improved new operator training and information recall.

In pursuit of this vision, Aquasight's APOLLO™ software is proposed to assist the City of Santa Fe by:

- Providing a one-stop integrated intelligence dashboarding and analysis solution.
- Integrating a copilot system with built in smart advisors.
- Driving energy and chemical savings and enabling fine tuning of control setpoints.
- Improving daily plant workflow and empowering a data driven decision culture.

- Storing operator knowledge to de-risk operator churn and retirements.
- Providing management visibility through remote off-site access.
- Highlighting compliance risks while providing quick access to process data.
- Enabling predictive maintenance of aeration and disinfection equipment.
- Providing robust tools for workforce training on plant performance at various flows and loads.
- Providing quick access of data for planning and engineering teams.
- Including monitoring and notifications on complex parameters.

Examples of the main dashboard for the aeration and secondary clarifier modules in action are provided in **Figure 2** and **Figure 3**, respectively.

Figure 2: Example of APOLLO's™ Activated Sludge (Aeration) Module

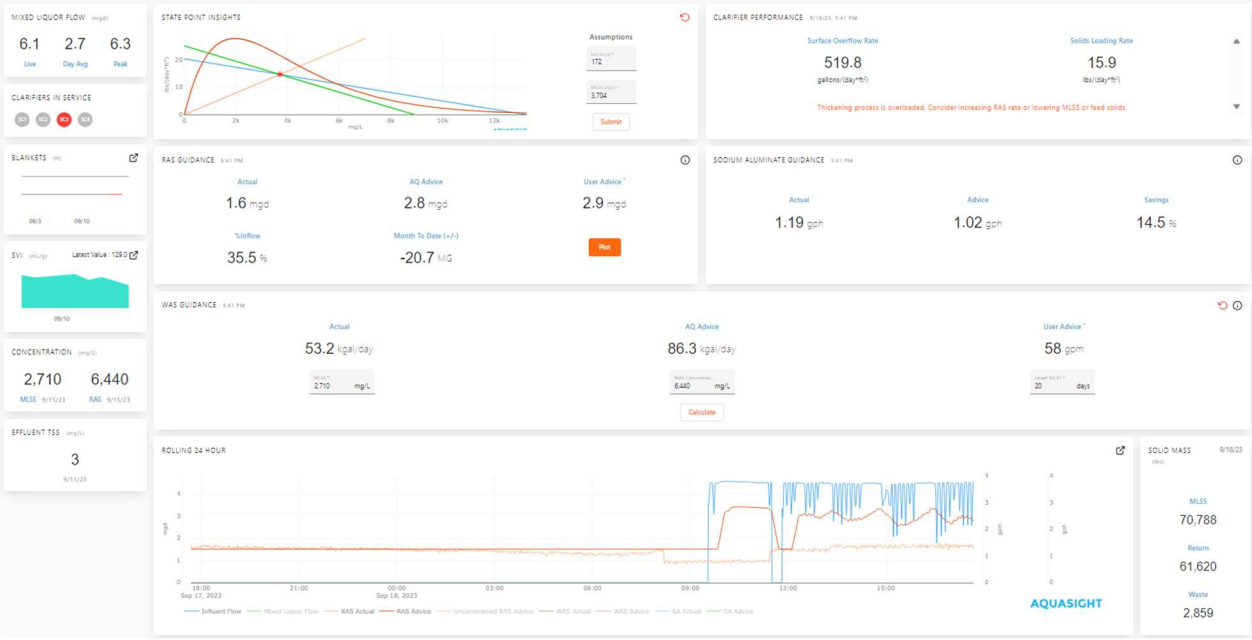

Figure 3: Example of APOLLO's™ Secondary Clarifier Module

SCOPE OF WORK

Generally, the scope of this project includes onboarding the PRWRF to Aquasight's APOLLO™ software equipped with seven (7) modules. The SCOPE OF WORK may change in the future depending on the needs of the plant. The final SOW will be determined in collaboration with the Utility team.

Table 1: Proposed APOLLO modules for PRWRF

Module	Description
Plant Dashboard	Default APOLLO™ module – Customizable dashboard that allows users to centralize analytics from various APOLLO™ modules to a single screen.
Weather	Default APOLLO™ module – Live weather radar with various meteorological layers.
Secondary Treatment – Activated Sludge	Focused on the aeration process, this module includes monitoring, analytics, and copilot dashboard and a detailed decode feature for analyzing aerator and process performance.
Secondary Treatment – Secondary Clarifiers	Focused on the secondary clarification process and RAS/WAS pumping, this module includes monitoring, analytics, and copilot

Module	Description
	dashboard and a detailed decode feature for analyzing process performance.
Disinfection	Focused on the UV disinfection with supplemental chlorination and dechlorination process, this module includes monitoring, analytics, and copilot dashboard and a detailed decode feature for analyzing permit compliance and process performance.
Lab Insights	Default APOLLO™ module – Provides users with a robust plotting tool for lab, live, and analytical data.
SAMI	Default APOLLO™ module – Digital alert system with customizable alert thresholds for parameters of the most critical interest.

Additionally, Aquasight will review data sources, data completeness, and instrumentation coverage for the PRWRF. We will make recommendations for additional instrumentation as may be necessary to optimize the data rich environment necessary for an optimized process solution.

The project goals described above will be completed through the following tasks:

Task 0 – Project Management
Task 1 – Data Polling
Task 2 – Site Visit and Plant Review Including Instrumentation Review and Recommendations
Task 3 – Aeration Onboarding
Task 4 – Secondary Clarifier & RAS/WAS Pumping Onboarding
Task 5 – UV Disinfection/Chlorination/Dechlorination Onboarding
Task 6 – Default Module Configuration
Task 7 – Training and Adoption

Appendix B: Project Milestones, Timeline, and Deliverables

The Aquasight scope of work for this project will have four key milestones and associated deliverables and will be implemented with approximately the following timelines (**Table 2)**. The timeline is subject to change by mutual agreement between Aquasight and the City of Santa Fe.

Table 2: Project Delivery Calendar

Milestones	WEEKS from Notice to Proceed	Aquasight Deliverables
1. Design Review, Instrumentation Review, Data Polling, Connections, Lab & Live Insights	~ 12 weeks	• APOLLO™ Release 1 – Lab Insights • Milestone 1 Report
2. Secondary Process & Aeration Modules	~ 16 weeks	• APOLLO™ Release 2 – Secondary & Aeration Modules • Milestone 2 Report
3. Disinfection Module & SAMI Alerts	~ 22 weeks	• APOLLO™ Release 3 – Disinfection Module & SAMI Alerts • Milestone 3 Report
4. Plant Dashboard, Training & Adoption	~ 26 weeks	• APOLLO™ Release 4 – Plant Dashboard, Training, & Adoption • APOLLO™ User Manual • Virtual Training Sessions

Appendix C: Required Participation from Santa Fe Public Works

DATA REQUIREMENTS

The following information is required from Santa Fe Public Works for successful project completion:

- Public Works SCADA Data Historian access,
- Public Works LIMS database access,
- Any applicable sensor/instrumentation API details,
- Where applicable, process data spreadsheets and mechanism to routinely upload,
- Process SOP's,
- Process design data,
- Equipment manufacturer information (specs, O&M manuals, etc.)
- Plant drawings of relevant processes,
- Energy bills,
- Control strategy documentation for automated control systems, and
- Plant budget and cost sheets

Where information is not available, assumptions will be made and discussed with Santa Fe Public Works team before implementing it in the APOLLO™ System.

O&M, SCADA, LAB, AND DESIGN CLARIFICATION MEETINGS

During deployment, in addition to or as a part of any project management meetings, Aquasight may request meetings with key Public Works staff. Such meetings are important to clarify operations, understand assumptions, and agree on key configurations in APOLLO™ systems.

Appendix D: Project Fee

Aquasight proposes the following Not-To-Exceed project fee for the APOLLO™ solution implementation for the City of Santa Fe Public Works Paseo Real Water Reclamation Facility:

APOLLO™ Onboarding Fee: **Not to Exceed $200,000**
APOLLO™ Annual Fee: **$50,000 per year, minimum three-year contract**

The project billing schedule will be included in the final contract documents, and shall have the basic invoice timing noted below:

- The Onboarding Fee shall be billed in monthly payments during the Onboarding period (estimated over 6 months) with the first Onboarding payment due at contract signing.
- The Annual Fee shall be billed at the beginning of each calendar year, with the first year Annual Fee billed at contract signing.

The following activities are covered in the annual fee:

- **APOLLO™ technology usage:** APOLLO™ technology that has been developed by Aquasight is the core foundation of this project. The technology will be the backbone for releases, metrics, advisors, KPIs and is accessible anywhere, on any device and at any time.
- **APOLLO™ system operations:** APOLLO™ system operations include lab and live database management, analytical scripts management, API management and user preferences, credential, and security management.
- **Infrastructure management:** APOLLO™ runs on several virtual machines and servers. These servers require upkeep and maintenance include software library updates, monitoring of infrastructure metrics and hardware management.
- **Advisor upkeep and maintenance:** Advisors require quality data inputs; unforeseen bad data quality events do occur in practical environment and advisors must be evolved to ensure it discards bad data or debugged to ensure optimal performance of smart advisors.
- **Ticket management and Help desk:** Access Aquasight help desk will operate 8:00 am to 5:00 pm EST during weekdays for any issues such as user access, applications and/or routine troubleshooting. Any high priority issue Aquasight will address in 1-to-4-hour time frame depending on type and nature of this issue during business hours and during weekend and holidays within 24-to-48-hour time frame.
- **SAMI:** Alert's system that manages e-mails, notifications, alert statistics, thresholds management and user settings.
- **Bug fixes:** If we detect any issues or bugs in optimal running of software or technology, Aquasight will fix free of cost and repair those bugs.
- **Data polling maintenance:** Polling software is installed in virtual machine within Santa Fe Public Works. When tag names are changed and database connections are reconfigured, this require polling software to be updated. Public Works should inform or discuss with Aquasight

before making changes on setting and access credentials which may disrupt the flow of data streaming to APOLLO™.

- **Free feature upgrade as part of APOLLO™ product roadmap:** Aquasight continuously evolves its technology and features for driving more value to customers. Such features will be available for free at no additional cost if they are part of the standard product roadmap.

Dear Michael Dozier,

Thank you for your inquiry. As requested, please find attached our proposal 1101-IND-2113715 for City of Santa Fe WWTP. We value this opportunity to provide a solution for your liquid handling need and we are committed to partnering with you to ensure your project's safe execution and completion.

To convert this proposal into a confirmed order WITHOUT ANY CHANGES, please click the "Start Signing" button to begin the electronic signature process.

If you would like to CHANGE anything in this proposal or discuss anything further, please call Kimbro Connell at 575-524-0879.

Thank you, and I look forward to working with you.

Project Description and Overview

PROJECT DESCRIPTION

Quoted as 28day cycle rental

Does not include applicable sales tax or services

PROJECT OVERVIEW

Provide pump and filtration equipment for max flows of 5mgd at final clarification.

STATEMENT OF WORK

RFR Responsibilities & Scope of Work

Rain for Rent (RFR) will provide the following: Provide pump and filtration equipment for max flows of 5mgd at final clarification. (2) 60-4SK, (1) 48-4SK, DV200E pump, HDPE pipe and misc fittings.
Delivery, installation, removal, pickup of all quoted materials/equipment

Due to the multitude of economic factors, materials, labor, hauling and freight are currently in a period of above average volatility. If, during the performance of work, the price of materials, labor, hauling or freight increases by 5% or greater through no fault of Rain for Rent, the contract price shall be equitably adjusted by an amount reasonably necessary to cover any such price increases. Equipment subject to availability at time of project.

Reference Materials

Project is quoted based on applicable/customer provided reference materials noted below:
Job Walk(s) 3-13-2023

Operating Parameters

System includes: Sand Media
System is designed to operate at a flow rate of 5mgd peak @ 80tdh
The water source location will be clarifor and discharging at location after clarifor. .

Customer Responsibilities

It is the customer's responsibility to inform RFR about prevailing wage at time of proposal. If RFR is informed after the quote is issued that certified payroll is required, quote will be subject to additional charges.

Jobsite:
Customer is responsible for:
1. Informing RFR of any jobsite or general requirement(s) to perform work on location.
2. Securing permits, fees, bonding, right of ways, vehicular/pedestrian traffic control, and security.
3. Providing safe, secure access and egress to an adequate staging area throughout the job which could include brush clearing, grading, and removal or replacement of any landscape or hardscape in the temporary right of way for the equipment.
4. Any damage to the environment including trees, vegetation, stream banks, or any other part of the site caused by the installation, removal, construction, pulling or dragging of equipment, or operation of the equipment that would require site restoration or environmental countermeasures.

Proposal Number 1101-IND-2113715 Confidentiality Notice: This proposal and any associated document(s) are privileged and confidential and are intended for the sole use of the addressee(s). They cannot be used, circulated, duplicated, quoted, or otherwise referred to or disclosed to third parties for any reason without the written consent of an Officer of Western Oilfields Supply Company dba/Rain for Rent. If you have received this information in error, please immediately contact us at info@rainforrent.com.

Liquid Ingenuity®

5. Any excavation, saw cutting, trench plating for the purpose of road crossings, backfilling, restoration, modification, or alteration of any permanent structure or site element including changes to pump pad preparation, suction, or discharge chambers during duration of job (including installation and removal).

System:

1. Customer will provide dedicated equipment with operator and fuel to perform all needed unloading, testing, operations, maintenance, relocating, cleaning, and reloading of provided equipment/system. Equipment must be capable of lifting 9000 Lbs.
2. If installation provided by RFR and Customer is operating system, this Transfer of Operation form will need to be reviewed and signed by both parties upon completion of setup. (sample form only): **https://rainforrentcorp.box.com/v/systemtransferoperation**
3. Customer will provide fueling.
4. Customer will provide preventative maintenance as recommended by manufacturer or per the Rental Agreement. **https://rainforrentcorp.box.com/v/pumpmaintenance**
5. Customer will supply all needed water for the commissioning, startup, and system testing. Project specific criteria for hydrotesting can be provided at an additional charge.
6. By accepting this quotation, the customer has acknowledged that the equipment proposed herein is suitable for its intended application and accepts all liabilities associated with its use. Customer is responsible for compliance with appropriate liquid/material quality standards, regulations, and testing protocols to meet all federal, state, local and job location specific requirements. Customer is responsible for all waste materials associated with this equipment/system.
7. RFR recommends a small-scale trial run of this product application to ensure system effectiveness. RFR does not warranty the water quality or degree of filtration. At customer request, RFR can perform a Total Suspended Solids (TSS) bench test to better select the appropriate media for optimized filtration effectiveness. Customer will be responsible for the cost of all media.
8. The customer will be designated as the generator for all liquid/solids processed with the use of RFR equipment. All used filtration media, such as carbon, sand, cartridges, bags, coalescing packs, etc. becomes the property of customer and is the responsibility of customer for proper disposal.
9. To activate carbon, customer will need to pre-soak for 24 hours.
10. RFR has not included the cost of the removal and regeneration for non-hazardous carbon. Customer is responsible for TCLP sample for TCLP VOC's, TCLP SVOC's, TCLP RCRA 8, pH. **https://rainforrentcorp.box.com/v/carbongenerator** If the carbon is deemed hazardous and cannot be regenerated, customer is responsible for additional disposal costs and/or final disposal. No media or materials will leave the site unless the TCLP RCRA 8 has been received and deemed non-hazardous unless otherwise noted.
11. RFR equipment/vessels will be taken off rent when the required testing has been submitted and accepted by RFR/Source Carbon Supplier for recycling and or disposal. Vessels cannot be removed until we receive and accept the testing that indicates the carbon is deemed NON-HAZARDOUS. At that time, the equipment will be taken off rent and be scheduled for pick-up from the site. Should the carbon be deemed HAZARDOUS the customer will be responsible to pay a third party for the chain of custody, transportation, and disposal of this material.
12. Additional cleaning and/or inspections may be required if tested material is deemed anything besides non-hazardous.

Customer is responsible for:

1. Any work in confined spaces.
2. Protecting system from damage including any freeze protection necessary to safeguard equipment from damage. Should equipment become frozen and damaged, customer is responsible for repair of equipment. RFR can provide necessary freeze protection at an additional charge per executed change order. Equipment stays on rent until it can be returned.
3. Using equipment in a safe and proper manner in accordance with manufacturers' recommendations, regulatory standards, and industry best practices. Improper usage may cause equipment/system failure, damage, possible incidents, injuries, and spills.

Upon Pickup:

Contact the RFR office at 575-524-0879 to schedule pickup when equipment/system is cleaned and ready to be released.
Flushing and cleaning of equipment must be performed to RFR's standards prior to being called off rent. RFR personnel will perform a visual inspection. It is recommended to have a customer representative on-site during inspection. Equipment found not to be in "delivered condition" will not be picked up. e picked up.

Project Scheduling & Billing

This quote is valid for 30 days. For the quoted items, RFR requires a signed quote not less than 14 days prior to delivery.

Estimated schedule durations:
Mobilization: 2 days
Installation: 3 days
Operation: TBD
Removal: 2 days
Demobilization: 1 day
System Rental Duration: 1 year or more

Customer acknowledges that availability of equipment/system and/or media will be confirmed at time of order. Additional freight charges may

Proposal Number 1101-IND-2113715 Confidentiality Notice: This proposal and any associated document(s) are privileged and confidential and are intended for the sole use of the addressee(s). They cannot be used, circulated, duplicated, quoted, or otherwise referred to or disclosed to third parties for any reason without the written consent of an Officer of Western Oilfields Supply Company dba/Rain for Rent. If you have received this information in error, please immediately contact us at info@rainforrent.com.

apply subject to mutually agreed upon change order.

Billing

1. This is an estimate only. Actual Time and Material used for this job will be billed to the customer.
Any re-rented equipment may be billed according to the third party's billing period. All billing subject to our standard terms and conditions in the rental agreement.
A minimum 2 hour charge will be assessed in the event the crew is at site and weather forces cancellation of work for remainder of day.

Rain for Rent's standard hours of operation are 7:30am – 4:00pm Monday – Friday. Time outside of normal business hours will be billed at 1.5x the base rate for Transportation and Service

Safety

Each employee is expected to adhere to the RFR Environmental, Health and Safety programs, which will protect the environment, the health and safety of the customer, employees, and others. RFR asks for your full cooperation to succeed in this expected outcome.

PROJECT COSTS	
Estimated Rental Total	$21,159.93
Estimated Environmental Recovery Fees	$687.70
Total Estimated Recurring Charges	$21,847.63
PROJECT COSTS	
Estimated Sale Total	$9,479.40
SERVICES	
Estimated Delivery	$14,818.04
Estimated Installation	$13,883.00
Estimated Removal	$8,018.00
Estimated Pickup	$2,618.04
GRAND TOTAL	$70,664.11

-Estimated costs do not include taxes

-Recurring rental project costs will be on a cycle/week/day basis+ tax

Engine driven equipment will be delivered with at least 50% fuel. A Fuel Convenience Charge will be implemented on a per gallon basis up to the delivered fuel level. Customer acknowledges that the Fuel Convenience Charge is not a retail sale of fuel. Customer may avoid the Fuel Convenience Charge if the Customer returns the Equipment at delivered level. The fuel convenience fee will be charged per gallon. No refunds will be given for a higher level of fuel upon return.

Customer Name _____ Customer Signature _____ Date _____

Proposal Acknowledgement

By signing this proposal, customer represents that he/she has read and agreed to both the Statement of Work and Quote Agreement sections, and is also agreeing to the grand total amount listed above, plus any recommended optional items if accepted and initialed. If customer requires a Purchase Order number to process and submit payment, it must be supplied to Rain for Rent at the time of acceptance of this proposal.

PO Number: _____

Rental Protection Plan

I have received and reviewed the Rental Protection Plan Agreement incorporated as the last page of this estimate. By initialing this paragraph, I understand that I am agreeing to enter into and be bound by the terms of the Rental Protection Plan Program Agreement and that I am authorized to enter into this Agreement on behalf of Customer. FOR ALL RENTALS OF EQUIPMENT, EXCEPT THOSE SPECIFICALLY EXCLUDED, YOU MAY EITHER SHOW PROOF OF PROPERTY INSURANCE IN ACCORDANCE WITH INSURANCE REQUIREMENTS AND RENTAL AGREEMENT OR PURCHASE THE RENTAL PROTECTION. THE PURCHASE OF THE RENTAL PROTECTION PLAN FOR RENTALS OF EQUIPMENT IS NOT MANDATORY AND MAY BE DECLINED IF YOU HAVE PROOF OF ALL RISK PROPERTY INSURANCE AS REQUIRED BY CONTRACT.

Proposal Number 1101-IND-2113715 Confidentiality Notice: This proposal and any associated document(s) are privileged and confidential and are intended for the sole use of the addressee(s). They cannot be used, circulated, duplicated, quoted, or otherwise referred to or disclosed to third parties for any reason without the written consent of an Officer of Western Oilfields Supply Company dba/Rain for Rent. If you have received this information in error, please immediately contact us at info@rainforrent.com.

Quote Agreement

If Customer has entered into a Master Service Agreement with Rain for Rent and there is a conflict between these terms and conditions of this Quotation Agreement and the Customer's Master Service Agreement, then the terms and conditions in the Customer's Master Service Agreement signed by Rain for Rent will prevail. Availability of products and services is subject to change without notice. Payment terms are net 30 days from invoice date. Interest at the rate of 18% per year shall be charged on any past due invoice. A Fuel Surcharge will be calculated and invoiced based on the diesel fuel price as published by the Department of Energy on https://www.eia.gov/petroleum/gasdiesel An Environmental Recovery Fee shall apply to all rental charges invoiced for the duration of the rental pursuant to this quote/Estimate to help offset direct and indirect costs associated with regulatory compliance, obtaining permits, and obtaining licenses. California Air Quality Fee will be added to the cost of diesel pumps used in California only. This is a State mandated fee. Customer is prohibited from deducting retention from Rain for Rent invoices and charging Rain for Rent liquidated damages. Customer is responsible for flushing and cleaning tanks, roll off boxes, pipelines, pumps, filters and other Rain for Rent equipment prior to return unless specifically agreed to by both parties in writing. The Terms and Conditions of the Rain For Rent Rental and Hazardous Material and/or Non-Hazardous Waste Agreement, Credit Application/Master Rental & Sales Agreement, Invoice and this Quotation (also known as the Rain for Rent Rental/Sale Estimate as may be referenced in any Master Service Agreement, Blanket Purchase Order, or any other contractual document executed between the parties) contain the complete and final agreement between Rain for Rent and Customer and no other agreement in any way modifying or adding to any of said Terms and Conditions will be binding upon Rain for Rent unless made in writing and signed by a Rain for Rent Corporate Officer or Rain for Rent authorized representative. The Customer cannot alter the equipment without Rain for Rent's prior written approval. Customer is responsible for equipment, repairs, maintenance and damage, excluding normal wear and tear or damage caused by Rain for Rent. Rain for Rent will service all engine driven equipment at 400 hours of runtime or as required by manufacturer specifications, if less than 400 hours. Labor will be billed on a time and materials basis, portal to portal from nearest Rain for Rent location. Prorated billing will occur if rental is returned prior to 400 hours. All returned equipment is subject to inspection by Rain for Rent personnel. Damages and accrued rent will be invoiced to Customer while equipment is out of service for repairs. The Customer is responsible for damage caused by reactive, corrosive or abrasive material; including, but not limited to sand, sodium hydroxide, chlorine, and acids. Customer must notify Rain for Rent immediately of any spill so that any necessary repairs to the system can be made and to minimize service interruption. The Customer assumes all risks of loss due to operation and use of the equipment. Customer will provide "all risk" property insurance for rented equipment. Customer shall pay Rain for Rent additional expenses caused by unforeseen or changing conditions, including, but not limited to, soil, underground conditions, rock formations, environmental conditions, weather events, regulations or restrictions, hard pan, boulders, cesspools, gas lines, waterlines, drain pipes, underground electrical conduits or other above ground or underground obstructions. All equipment rented or used products sold are provided "AS IS, WHERE IS" in their present condition. Rain for Rent makes no warranties, expressed or implied of any kind whatsoever with respect to the equipment or products. Sold equipment is not to be rented. Customer agrees that customer is renting equipment or purchasing used products based on their judgment and evaluation, without reliance upon any statements of representations by Rain for Rent, and that Rain for Rent is not responsible for any defects in their operation or for any repairs, parts or services, unless otherwise noted. All new products sold are provided without warranty beyond the terms of such warranty offered by the manufacturer, if any. Customer must comply with all original manufacturer's terms and conditions for any warranty claims that may arise. Neither Rain for Rent nor the manufacturer warranties the product if it has failed due to corrosion, misuse or damage; (2) it has been altered, repaired or modified in any way that would adversely affect its operation; or (3) it was installed or operated other than in accordance with manufacturer's operating instructions. Products supplied by Rain for Rent are warranted to be free from any defect in workmanship and material under conditions of normal use and service. Rain for Rent's obligation under this warranty is limited to replacing or repairing at the designated manufacturer's or Rain for Rent facility any part or parts returned to it with transportation charges prepaid, which Rain for Rent determines in its sole discretion to be defective. This Quotation excludes any additional costs to Rain for Rent associated with Owner Controlled Insurance (OCIP) or WRAP insurance programs that will be added to Rain for Rent's prices. De-watering, Roll-off, Vacuum boxes and similar equipment are not liquid tight. Rentee accepts full responsibility for all losses, damages and costs caused by or arising out of spills, leakage or discharge from this equipment. Rain for Rent will not be held liable for any structural or soils subsidence. This Quotation is valid for 30 days and is subject to credit approval. Rain for Rent will take every effort to protect our customers and employees. Due to the current pandemic, all quoted equipment and services are subject to delay, change, or unilateral cancelation by Rain for Rent. Please be assured every effort will be made to execute the quote as written. The customer is responsible to inform Rain for Rent of any jobsite hazards, precautions, or entry requirements relating to the Corona Virus prior to Rain for Rent personnel going onsite to perform work or deliver equipment. This includes informing Rain for Rent if anyone at the jobsite has tested positive and provide a list of actions taken to protect Rain for Rent personnel.

Rental Protection Plan Program Agreement

If you elect to maintain All Risk Property Insurance coverage, and the certificate of insurance You provide to Rain for Rent to evidence Your insurance coverage expires or is cancelled for any reason, You agree Rain for Rent may charge RPP for Your rentals until such time as You provide an acceptable and valid certificate of insurance to Rain for Rent. This Rental Protection Plan Program Agreement (this "RPP Agreement") is entered into between the undersigned Rentor and Rentee in relation to the Master Rental and Sales Agreement (MRSA) between Rentor and Rentee. If Rentee has checked or initialed, as applicable, the Rental Protection Plan Program (the "RPP Program") box on the quote, then Rentee has opted-in to the RPP Program and this RPPP Agreement shall supplement the MSRA whether or not executed by Rentee. Rentee understands and agrees that the RPP Program is not insurance and that the RPP Program provides only limited coverage, as described below.1.Cost; Deductible; Maximum Coverage; Rentee shall pay a fee equal to 15 percent (15%) of the rental charge for each covered item, which fee shall be listed on each invoice during which period Rentee has opted to participate in the RPP Program. In the event of a Covered Occurrence, as defined below, Rentee shall further be responsible for the lesser of $500 or 10 percent (10%) of the total loss, as a deductible. The maximum coverage available under the RPP Program is $150,000 per Covered Occurrence, whether or not there is more than one piece of equipment involved in the occurrence.2.Coverage; The RPP Program provides coverage only for losses involving Covered Equipment, as defined below, in the following instances: fire that was not caused by Rentee's gross negligence or willful misconduct; theft for which a police report was filed, and that occurred despite Rentee's reasonable precautions to protect and secure the covered equipment; and vandalism for which a police report was filed (individually, "Covered Occurrence," and collectively, "Covered Occurrence"). The RPP Program provides coverage only for the following types of equipment: pumps, electric submersible pumps, tanks, generators, light towers, filtration, boxes, heaters, spillguards, safety products, sprinklers, hoses, pipe, valves and fittings ("Covered Equipment"). Coverage does not extend to any equipment not owned by Rentor such as re-rented equipment.3.Exclusions; The RPP program does not cover any equipment or event of loss that is not specifically described in Section 2.Without limiting the foregoing, the RPP Program does not provide coverage for the following: misuse of equipment; willful abuse of equipment; failure to maintain equipment; failure to secure items from theft (including but not limited to failing to store items in a fenced, locked area or failing to maintain personnel on site); damage or theft while in transit to or from a jobsite; corrosion from any source; any damage caused by named storm events; any instance that occurs while the account is not in good standing, such as a default as defined in the MRSA or upon written notice of non-payment; and any occurrence not reported to Rentor within 24 hours after the occurrence. The RPP program does not provide coverage for: electronic equipment (controls, instrumentation, and wiring), flow meters, water meters, wheel wash systems & accessories, Freezesentry items, or tires.4.Claims; All claims must be submitted within 24 hours of the Covered Occurrence. Rentor's mechanic will inspect the equipment following any claim. The mechanic's findings as to the cause of the damage and cost of repair will be final. In the event of a theft or vandalism, Rentee must also provide supporting evidence that the site was secured at the time of loss.

Proposal Number 1101-IND-2113715 Confidentiality Notice: This proposal and any associated document(s) are privileged and confidential and are intended for the sole use of the addressee(s). They cannot be used, circulated, duplicated, quoted, or otherwise referred to or disclosed to third parties for any reason without the written consent of an Officer of Western Oilfields Supply Company dba/Rain for Rent. Agreement completed.
2024-04-04 - 4:49:48 PM GMT

CITY OF SANTA FE

Date: November 26, 2024

To: Mayor Alan Webber and Governing Body
Finance Committee, Public Works and Utilities Committees

From: Steven Walker, Emergency Procurement Program Manager

Via: John Dupuis, Public Utilities Department Director

Subject: AAC Emergency Amendment 1 – Construction Contract 3204639

Vendor Name: A.A.C. Construction, LLC

Vendor Number: 7958

ITEM AND ISSUE:

Public Utility Department respectfully requests your review and approval of an Amendment #1 to 3204639 with A.A.C. Construction, LLC for a Construction Contract. Amendment #1 increases the amount of compensation to support the WWTP with various problems and solutions to bring the WWFT into compliance by $4,109,144.16 and not to exceed total compensation of $6,574,981.20 for a term of 2 years.

CONTRACT NUMBER:
The FY24 Munis contract number is 3204639.

BACKGROUND AND SUMMARY:
The amendment with A.A.C. Construction, LLC adds to the work already performed for the emergency procurement. When contract 3204639 was originally written, a number of actionable items were quickly determined to help return the Paseo Real Wastewater Reclamation Facility (PRWRF) to compliance from violations of the Clean Water Act (CWA) (33 U.S.C. §§ 1251-1387) posed in Administrative Order Docket CWA-06-2024-1765. The contract and determination were approved by the City of Santa Fe Counsel, Mayor and Cleark on 12 April 2024. After Hazen and Sawyer's (contract #3204638) assessment of the facility, a number of other emergency items were identified.

These are listed as follows:

1) Installation of metering manholes and vaults for non-potable water
2) Installation of instrumentations and controls
3) Fabrications and metal installations, including welding operations
4) Acquisition of mechanical parts and supplies
5) Acquisition of building materials for structures
6) Transportation and deliveries
7) Building of minor concrete structures
8) False work for temporary structures
9) Moving of dry soils and aggregates
10) DAF building support to get pumps and electrical working
11) Various hardware and fasteners to keep things together
12) SCADA telemetry electrical support in various buildings

13) Minor building modifications as necessary to accommodate the administrator's/engineer's requirements
14) Aeration equipment assembly, installation, and power supply
15) Heavy equipment support as necessary to accommodate the various tasks.

The original action items were quickly and efficiently dealt with to get the PRWRF into compliance. These new tasks work toward keeping the PRWRF in compliance.

Prior Approvals and Supporting Information:

PROCUREMENT METHOD:
The procurement method used was NMSA 1978, Section 13-1-127, Emergency

City of Santa Fe
Emergency Determination Form

The emergency procurement method may only be used as described in NMSA 1978, Section 13-1-127 and in the City's Procurement Manual XII.

Notify all signatories as soon as you are made aware of the emergency. Give them a brief synopsis of the emergency, answer their questions, and let them know this document and all supporting documents will be sent to them for signatures. They should know about the request prior to obtaining signatures.

The Department that makes an emergency procurement to plan or prepare for the response to a serious threat to public health, welfare, safety or property caused by a flood, fire, epidemic, riot, act of terrorism, equipment failure or similar event shall account for the money spent in making the procurement and report on that accounting to the City's Finance Department Director within ninety days after the end of the contract or fiscal year in which the procurement was made, whichever comes first.

I.

Department:	Public Utilities, Wastewater Division, City of Santa Fe
Department Director:	John Dupuis
Department Contact:	Michael Dozier
Department Telephone Number:	(505)955-4642
Chief Procurement Officer:	Travis Dutton-Leyda
Telephone Number:	(505) 629-8351

II.

Name of Contractor:	A.A.C. Construction, LLC.
Address of Contractor:	18 L Luna Rd, Santa Fe, NM 57507
Amount of prospective contract:	$4,109,144.16
Term of prospective contract:	Two Years from the date of the original contract
Location of Services:	Paseo Real Wastewater Reclamation Facility

III. Please thoroughly list the services (scope of work), construction or items of tangible personal property of the contract:

1) Installation of metering manholes and vaults for non-potable water
2) Installation of instrumentations and controls
3) Fabrications and metal installations, including welding operations
4) Acquisition of mechanical parts and supplies
5) Acquisition of building materials for structures
6) Transportation and deliveries
7) Building of minor concrete structures
8) False work for temporary structures
9) Moving of dry soils and aggregates
10) DAF building support to get pumps and electrical working
11) Various hardware and fasteners to keep things together
12) SCADA telemetry electrical support in various buildings

13) Minor building modifications as necessary to accommodate the administrator's/engineer's requirements
14) Aeration equipment assembly, installation, and power supply
15) Heavy equipment support, as necessary, to accommodate the various tasks.

IV. Provide an explanation for the justification of the procurement including a description of the emergency condition(s) requiring use of emergency procurement and the practicable competition utilized in compliance with NMSA 1978, Section 13-1-127.

The United States Environmental Protection Agency (EPA) issued Administrative Order (AO) CWA-06-2024-1765 to the City on March 4, 2024. The AO states that the City's Paseo Real Water Reclamation Facility (PRWRF) has repeatedly failed to meet effluent limits specified in the National Pollutant Discharge Elimination System (NPDES) Permit No. NM00222292. The City issued a response to the EPA's AO on April 4, 2024. The City's response provided an initial plan for immediate actions (30 days), near-term actions (6 months), and long-term actions (18 months) intended to address the permit violations as quickly as possible and implement measures to prevent similar exceedances from reoccurring.

Similarly, the New Mexico Environment Department (NMED) has determined that the City of Santa Fe Paseo Real Wastewater Treatment Plant (WWTP) has been operating in noncompliance with the New Mexico Water Quality Act (WQA) and Water Quality Control Commission's (WQCC) regulations (20.6.2 and 20.6.4 New Mexico Administrative Code) adopted pursuant to the WQA.

Emergency procurement is required to complete the urgent action items in the scope of work to cumulatively address the AO. We also face ongoing needs for critical repairs and replacements throughout the plant, including pumps, piping, electrical equipment, and other infrastructure, as well as funding for supplemental chemicals to support critical treatment processes. If the City does not approve emergency procurement to expedite urgent actions, the City risks losing the progress made to date and facing even higher costs in the future due to non-compliance penalties that would prolong the emergency condition.

To keep the Paseo Real Wastewater Reclamation Facility in compliance, the above scope of work is required within two years from April 12, 2024; a time period that does not allow for competitive procurement.

EPA Region 6 Administrative Order Attached.

V. Please describe what measures are being taken to minimize the duration and effect of this emergency procurement (for example: is the emergency only in place until a competitive process can be completed, etc.).

The duration of the emergency procurement is determined by a set schedule of activities required to address and resolve National Pollutant Discharge Elimination System (NPDES) permit violations outlined in the Environmental Protection Agency (EPA) Administrative Order. While the Wastewater Management Division (WWMD) has made significant progress at the PRWRF, both the EPA Administrative Order and NMED Administrative Compliance Order remain in effect. Although the PRWRF is currently meeting most discharge permit requirements, full compliance has not been achieved. Specifically, effluent quality is not continuously meeting permit limits for total nitrogen and total phosphorus. Additional improvements are needed to restore PRWRF's long-term ability to reliably comply with permit requirements. Without continued funding to address these critical issues, the City risks regressing and jeopardizing the progress we've made, which could result in regulatory agencies administering significant financial penalties.

VI. Describe what measures the Department will take in the future to prevent/mitigate use of emergency procurement under similar circumstances.

To minimize the impact and duration of emergency procurement, WWMD has prioritized actions that are essential to long-term permit compliance. These actions are complex and multi-tiered, with some improvements requiring dozens of incremental steps to fully resolve. Furthermore, many of the incremental steps cannot be fully defined until preceding steps are completed. In the near term, emergency procurement remains necessary to expedite the most urgent action items critical to permit compliance. In the long term, competitive procurement will be utilized to address non-urgent action items. Both the urgent and non-urgent action items have been documented in an Action Item Log, which the Public Utilities Directory will present to the City Manager.

STATUTORY AUTHORITY

The following findings are made, and Order issued under the authority vested in the Administrator of the United States Environmental Protection Agency (EPA) by Section 309(a) of the Clean Water Act (Act), 33 U.S.C. § 1319(a). The Administrator of EPA delegated the authority to issue this Order to the Regional Administrator of EPA Region 6, who further delegated this authority to the Director of the Enforcement and Compliance Assurance Division.

FINDINGS

1. The City of Santa Fe (Respondent) is a municipality which was incorporated under the laws of the State of New Mexico, and as such, is a "person" as that term is defined at Section 502(5) of the Act, 33 U.S.C. § 1362(5), and 40 C.F.R. § 122.2.

2. At all times relevant to this Order (all relevant times), Respondent owned or operated a municipal wastewater treatment facility located at Airport Road, Santa Fe, Santa Fe County, New Mexico, 87504 (facility), and was, therefore, an "owner or operator" within the meaning of 40 C.F.R. § 122.2.

3. At all relevant times, the facility was a “point source” of a “discharge” of “pollutants” with its municipal wastewater to the receiving waters of Santa Fe River in Segment No. 20.6.4.113 of the Rio Grande Basin which is a “water of the United States” within the meaning of Section 502 of the Act, 33 U.S.C. § 1362, and 40 C.F.R. § 122.2.

4. Because Respondent owned or operated a facility that acted as a point source of discharges of pollutants to waters of the United States, Respondent and the facility were subject to the Act and the National Pollutant Discharge Elimination System (NPDES) program.

5. Under Section 301 of the Act, 33 U.S.C. § 1311, it is unlawful for any person to discharge any pollutant from a point source to waters of the United States, except with the authorization of, and in compliance with, an NPDES permit issued pursuant to Section 402 of the Act, 33 U.S.C. § 1342.

6. Section 402(a) of the Act, 33 U.S.C. § 1342(a), provides that the Administrator of EPA may issue permits under the NPDES program for the discharge of pollutants from point sources to waters of the United States. Any such discharge is subject to the specific terms and conditions prescribed in the applicable permit.

7. Respondent applied for and was issued NPDES Permit No. NM0022292 (herein the permit) under Section 402 of the Act, 33 U.S.C. § 1342, which became effective on September 1, 2021, and expires on August 31, 2026. At all relevant times, Respondent was authorized to discharge pollutants from the facility to waters of the United States only in compliance with the specific terms and conditions of the permit.

8. Part I.A of the permit places certain limitations on the quality and quantity of effluent discharged by Respondent. The relevant discharge limitations are indicated in the attached Table A.

9. Part I.C. of the permit requires the Respondent to sample and test its effluent and monitor its compliance with permit conditions according to specific procedures, in order to determine the facility's compliance or noncompliance with the permit and applicable regulations. It also requires the Respondent to file with EPA certified Discharge Monitoring Reports (DMRs) of the results of monitoring, and Noncompliance Reports when appropriate.

10. Certified DMRs filed by the Respondent with EPA in compliance with the permit show discharges of pollutants from the facility that exceed the permitted effluent limitations established in Part I.A of the permit, as specified in the attached Table B.

11. Each instance in which Respondent discharged pollutants to waters of the United States in amounts exceeding the effluent limitations contained in the permit is a violation of the permit and Section 301 of the Act, 33 U.S.C. § 1311. Each violation of the conditions of the permit or regulations described above is a violation of Section 301 of the Act, 33 U.S.C. § 1311.

12. On March 4, 2024, EPA issued Administrative Order Docket Number CWA-06-2024-1745 (Preceding AO) to the Respondent, which cited permit effluent limits violations. The Preceding AO required the correction of the cited violations within thirty (30) days of the issuance. In the event that the required correction was not possible, the Respondent was required to submit a comprehensive plan to eliminate the cited violations within the shortest time possible.

13. On April 4, 2024, the Respondent submitted a written response to the Preceding AO. In the response, the Respondent proposed a comprehensive plan consisting of immediate, near-term, and long-term actions to address the violations and to implement measures to prevent them from reoccurring. Immediate actions were scheduled to have occurred within

thirty (30) days of the April 4, 2024, response letter. Near-term actions were scheduled to be accomplished within six (6) months, and long-term actions within eighteen (18) months.

14. A schedule for compliance to eliminate the cited violations is hereby incorporated, by reference, into this Order.

SECTION 309 (a)(3) COMPLIANCE ORDER

15. Based on the foregoing Findings and pursuant to the authority of Section 309 of the Act, EPA hereby orders Respondent to take the following actions:

A. The Respondent shall accomplish the following tasks and comply with the following schedule of activities:

ACTIVITY	DUE DATE
1. Submit a certified statement of the status of the Immediate Actions proposed for completion within thirty (30) days of the April 4, 2024, response letter.	July 30, 2024
Near-term Actions	
2. Conduct Onsite Sampling, assess efficacy of the secondary treatment process and recommend process changes to improve treatment efficacy.	September 30, 2024
3. Collect influent and effluent samples for analysis, to be conducted by an outside laboratory, to determine if the cyanide exceedances are real or an artifact of false positives.	September 30, 2024
4. Have consultant audit the Respondent's laboratory procedures for cyanide analysis. Submit a certified report of the audit to this office. If the audit effort confirms that the cyanide exceedances are real, then also submit a proposed written action plan to address cyanide exceedances.	September 30, 2024
5. Repair failed process air piping and diffuser grids to increase the secondary treatment aerobic volume.	September 30, 2024
6. Install a temporary chemical closing system to improve sludge settling in the secondary clarifiers. Conduct jar testing to determine which specific chemical will be used.	September 30, 2024
7. Rehabilitate the two (2) existing travelling bridge sand filters so this infrastructure can return to service.	September 30, 2024
8. Build a comprehensive base of knowledge management tools and decision trees to guide plant staff with use of the developed Standard Operating Procedures (SOPs).	September 30, 2024
9. Train laboratory staff to improve laboratory sampling and handling practices, data management, workflow, and develop communications protocol for all testing performed to support treatment operations and regulatory compliance.	September 30, 2024
Long-term Actions	
10. Develop an inventory of all instrumentation, calibration practices, and data management for process control. Conduct a gap analysis to identify corrective actions for process control instrumentation.	October 31, 2025
11. Develop a steady-state biological process model of the Water Reclamation Facility to stimulate current treatment performance and evaluate alternatives to improve performance.	October 31, 2025
12. Attain compliance with all terms of this schedule.	November 30, 2025

B. Until compliance is achieved under this Order, Respondent shall submit a Quarterly Report indicating progress of the actions listed in this compliance schedule. The quarters will end in the months of March, June, September, and December and the Quarterly Reports are due by the 15th of the following month.

C. If Respondent would like to arrange a meeting with EPA to discuss the allegations in this Order, it should contact EPA within forty-five (45) days of the effective date of this Order. The meeting will be held at the Region 6 offices, 1201 Elm Street, Dallas, Texas, or through a virtual platform, as appropriate, and Respondent can provide any information it believes is relevant to this Order. Respondent shall submit to EPA all information or materials it considers relevant to EPA at least ten (10) days prior to the meeting.

D. To arrange a meeting, or to ask questions or comment on this matter, please contact Ms. Mona Tates, of my staff, at (214) 665-7152 or tates.mona@epa.gov.

E. Any information or correspondence submitted by Respondent to EPA under this Order shall be addressed to the following:

Ms. Mona Tates
tates.mona@epa.gov

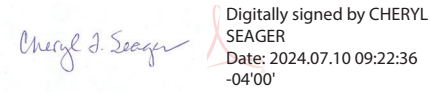
and

Ms. Nancy Williams
williams.nancy@epa.gov

GENERAL PROVISIONS

Issuance of this Section 309(a)(3) Compliance Order shall not be deemed an election by EPA to forego any administrative, judicial, civil or criminal action to seek penalties, fines, or any other relief appropriate under the Act for the violations cited herein, or other violations that become known to EPA. EPA reserves the right to seek any remedy available under the law that it deems appropriate.

Respondent may seek federal judicial review of the Order pursuant to Chapter 7 of the Administrative Procedure Act, 5 U.S.C. §§ 701-706.



Failure to comply with this Section 309(a)(3) Compliance Order or the Act may result in further administrative action, or a civil judicial action initiated by the United States Department of Justice.

This Order does not constitute a waiver or modification of the terms or conditions of Respondent's NPDES permit, which remains in full force and effect. Compliance with the terms and conditions of this Order does not relieve Respondent of its obligation to comply with any applicable federal, state, or local law or regulation.

The effective date of this Order is the date it is received by the Respondent.

SWPA/GSA/Coop/RFP/ITB #: Emergency Determination

CITY OF SANTA FE
AMENDMENT No. 1 TO
CONSTRUCTION CONTRACT
ITEM# 24-0297

This AMENDMENT No. 1 (the "Amendment") amends the CITY OF SANTA FE CONSTRUCTION CONTRACT, dated April 11, 2024 (the "Contract"), between the City of Santa Fe (the "City") and **A.A.C. Construction, LLC.** (the "Contractor"). The date of this Amendment shall be the date when it is executed by the City and the Contractor whichever occurs last.

RECITALS:

A. Under the terms of the Contract, the Contractor has agreed to build upon the improvements initiated for the City in April 2024 and to respond to the EPA's and NMED's requirement that the City eliminate or mitigate the violations identified by the EPA within the shortest possible time.
B. Pursuant to Article 14 of the Contract, and for good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, the City and the Contractor agree as follows:

1. SCOPE OF SERVICES

   The second to last paragraph in Article 1 of the Contract shall be amended to read as follows:

   The Contractor's scope of work includes support for plan items 5, 9, and 10 above. Additional detail on the Contractor's scope of work is listed in Exhibits A and B. The Contractor shall be responsible for verifications of all conditions, measurements, and dimensions for bidding.

2. COMPENSATION.

   Article 2, paragraph A of the Contract is amended to increase the amount of compensation by a total of $4,109,144.16 including New Mexico Gross Receipts Tax so that Article 2, paragraph A reads in its entirety

as follows:

A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed six million five hundred seventy-four thousand nine hundred eighty-one dollars and twenty cents ($6,574,981.20), including gross receipts tax of four hundred ninety-two thousand three hundred fifteen dollars and sixty-five cents ($492,315.65). The New Mexico gross receipts tax levied on the amounts payable under this contract shall be paid by the City to the Contractor.

The total amount payable to the Contractor under this Contract shall not exceed six million five hundred seventy-four thousand nine hundred eighty-one dollars and twenty cents ($6,574,981.20). This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Contract shall equal the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Contract reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Contract being amended in writing prior to those services in excess of the total compensation amount being provided

3. CONTRACT IN FULL FORCE.

Except as specifically provided in this Amendment, the Contract remains and shall remain in full force and

effect, in accordance with its terms.

IN WITNESS WHEREOF, the parties have executed this Amendment No.1 to the Contract as of the dates set forth below.

MEMORANDUM

DATE: ***March 29, 2024***

TO: ***Mayor Alan Webber and City Council***
Finance Committee
Public Works Public Utilities Committee

FROM: ***John Dupuis, Public Utilities Director*** JD

VIA: ***John Blair, City Manager*** JB
Emily Oster, Finance Director EKO

ITEM: Emergency Determination and Administrative Order Response

ISSUE:
Request Authorization to Complete the Paseo Real Water Reclamation Facility Administrative Order Emergency Project to ensure compliance with National Pollutant Discharge Elimination System (NPDES) and Discharge Permits and associated Contract approvals (Public Utilities Department/John Dupuis)

ISSUE:
In reference to the Paseo Real Water Reclamation Facility Administrative Order Emergency Project, the Public Utilities Department has submitted an Emergency Determination Form for emergency procurement to implement a comprehensive plan that provides interim corrective measures and for the long-term success in operating and managing the Paseo Real Water Reclamation Facility (PRWRF) necessary to ensure compliance with NPDES and Discharge Permits within the shortest possible time. The referenced Administrative Order (AO), which the City received on March 6th, 2024 from the U.S. Environmental Protection Agency (EPA) Region 6, is attached and requires within 30 days the submission of the comprehensive written plan for the elimination of the violations within the shortest possible time, as well as measures to prevent these or similar violations from recurring.

The scope of work from each vendor included with the Emergency Determination Form, and attached, is a natural progression of the extensive evaluation and improvements-initiated April 2024 and would have been implemented over a reasonable timeframe. The emergency procurement, this request for authorization, and accompanying Budget Adjustment Request (BAR) are responsive to the requirement for the elimination of the violations within the shortest possible time. These actions included as part of the comprehensive plan will clearly communicate our commitment to complete this project within the shortest possible time, averts unnecessary enforcement escalation, and begins to restore the trust of the public and our regulators.

The comprehensive plan focuses on improving current data collection, regulatory compliance, operational knowledge management / transfer, and management practices at the PRWRF, combined with selective capital improvements to existing PRWRF facilities. This comprehensive plan can be broken down into the following nine (10) steps:

1. Provide sampling and regulatory support to ensure compliance with existing permits.

2. Support the City's external communications and regularly establish weekly updates to improve communication and restore trust with Regulators.

3. Build a comprehensive base of knowledge & management tools / decision trees to guide PRWRF staff in day-to-day operations and management of the facility.

4. Improve PRWRF laboratory practices, data management, workflows, and communications for all testing performed to ensure regulatory compliance and/or support treatment operations.

5. Provide an inventory of all PRWRF instrumentation, calibration practices, data flows, and uses of information currently collected, and rectify gaps to improve process monitoring and control.

6. Develop a model for treatment operations using open-source software that integrates information available from lab test results and real-time supervisory control and data acquisition (SCADA) data.

7. Develop continuous modeling results incorporated into an advanced SCADA interface at the PRWRF to simulate and help optimize treatment plant operations and management.

8. Develop tools for simulation, testing, and operation of proposed changes to plant operations and enable remote operational support for emergency conditions.

9. Short-term treatment plant improvement projects. Examples of these limited scope projects include installing a new mechanical bar screen the already procured by the City, restoring two (2) former traveling bridge filter systems to working condition, or portable container-based sand filtration equipment and related pumping capability.

10. Additional support to complete the items above including process engineering alternatives development and review, project management and scheduling support, construction related support and services, training support, and related items or equipment.

Below is a list of the contractors that to date have provided a proposal/scope of work, the amount of the prospective contract, and the term of the prospective contract that, once authorized, will be negotiated, and executed as quickly as possible.

A. Name of Contractor: AquaSight
Amount of prospective contract: $350,000.00
Term of prospective contract: Three years

B. Name of Contractor: Great Western Electrical
Amount of prospective contract: $155,690.08
Term of prospective contract: One year

C. Name of Contractor: Carollo Engineers, Inc.
Amount of prospective contract: $60,000.00
Term of prospective contract: One year

D. Name of Contractor: ITSQUEST Staffing
Amount of prospective contract: $264,463.70
Term of prospective contract: One year and two months

E. Name of Contractor: Hazen and Sawyer
Amount of prospective contract: $2,718,000.00
Term of prospective contract: 2.5 years

F. Name of Contractor: A.A.C. Construction, LLC
Amount of prospective contract: $2,465,837.04
Term of prospective contract: Two Years

G. Name of Contractor: Molzen Corbin
Amount of prospective contract: $180,000.00
Term of prospective contract: Two Years

H. Name of Contractor: Rain for Rent (Western Oilfields Supply Co.)
Address of Contractor: 2495 Lakeside Drive, Las Cruces, NM 88007
Amount of prospective contract: $1,032,505.46
Term of prospective contract: Three Years

The current total prospective contract amount is **$7,226,496.28**. Contracts Attached for signature are E. Hazen & Sawyer, and A.A.C Construction, LLC others will be forth coming if contracts are required for the service requested.

The total budget amount requested is **$8,000,000**. Due to the critical nature of the funding and schedule for completion of the project, the Public Utilities Department requests authorization to the City Manager to negotiate and execute all necessary contracts and purchase orders to expedite project initiation. Once a contract is executed, the results will be reported to the Governing Body.

ACTION REQUESTED:

Request Approval of the of contracts with Hazen & Sawyer in the amount of $2,718,000.00 and with A.A.C Construction, LLC in the amount of $2,465,837.04.

THIS CONTRACT is made and entered into by and between the City of Santa Fe, New Mexico, hereinafter referred to as the "City," and **A.A.C. Construction, LLC** hereinafter referred to as the "Contractor," and is effective as of the date set forth below upon which it is executed by the Parties.

RECITALS

WHEREAS, the City, through its Governing Body, is authorized to enter into a construction Contract for the project; and

WHEREAS, the City has procured this Contract according to the established State and Local Purchasing procedures for contracts of the type and amount; and

The City and the Contractor hereby agree as follows:

1. Scope of Work

A. The Contractor shall perform the following work:

The Contractor shall perform all the work required by this contract to build upon the improvements initiated in April 2023. The emergency procurement, this request for authorization, and accompanying Budget Adjustment Request (BAR) respond to the EPA's and NMED's requirement that the City eliminate or mitigate the violations identified by the EPA within the shortest possible time. These actions, included as part of a comprehensive plan, will demonstrate our commitment to complete this project within the shortest possible time in the most efficient way possible.

The comprehensive plan focuses on improving current data collection, regulatory compliance, operational knowledge management / transfer, and management practices at the Paseo Real Water Reclamation Facility (PRWRF), combined with selective capital improvements to existing PRWRF facilities. This comprehensive plan can be broken down into the following ten (10) steps:

1. Provide sampling and regulatory support to ensure compliance with existing permits.

2. Support the City's external communications and regularly established weekly updates to improve communication and restore trust with Regulators.

3. Build a comprehensive base of knowledge & management tools / decision trees to guide PRWRF staff in day-to-day operations and management of the facility.

4. Improve PRWRF laboratory practices, data management, workflows, and communications for

all testing performed to ensure regulatory compliance and/or support treatment operations.

5. Provide an inventory of all PRWRF instrumentation, calibration practices, data flows, and uses of information currently collected, and rectify gaps to improve process monitoring and control.

6. Develop a model for treatment operations using open-source software that integrates information available from lab test results and real-time supervisory control and data acquisition (SCADA) data.

7. Develop continuous modeling results incorporated into an advanced SCADA interface at the PRWRF to simulate and help optimize treatment plant operations and management.

8. Develop tools for simulation, testing, and operation of proposed changes to plant operations and enable remote operational support for emergency conditions.

9. Short-term treatment plant improvement projects. Examples of these limited scope projects include installing a new mechanical bar screen the already procured by the City, restoring two (2) former traveling bridge filter systems to working condition, or portable container based sand filtration equipment and related pumping capability.

10. Additional support to complete the items above including process engineering alternatives development and review, project management and scheduling support, construction related support and services, training support, and related items or equipment, as described in the Contract Documents.

The Contractor's scope of work includes support for plan items 5, 9, and 10 above. Additional detail on the Contractor's scope of work is listed in Exhibit A. The Contractor shall be responsible for verifications of all conditions, measurements, and dimensions for bidding.

The Contractor shall be responsible for all permits, fees, and State inspections associated with the construction.

2. Compensation

A. The City shall pay to the Contractor in full payment for services satisfactorily performed such compensation not to exceed (two million four hundred sixty-five thousand eight hundred thirty-seven dollars and four cents) ($2,465.837.04), excluding gross receipts tax. The New Mexico gross receipts tax levied on the amounts payable under this Contract shall be paid by the City to the Contractor.

The total amount payable to the Contractor under this Contract, excluding Alternates (if needed) gross receipts tax and expenses, shall not exceed (two million four hundred sixty-five thousand eight hundred thirty-seven dollars and four cents) **$2,465,837,04. This amount is a maximum and not a guarantee that the work assigned to be performed by Contractor under this Contract shall equal**

the amount stated herein. The parties do not intend for the Contractor to continue to provide services without compensation when the total compensation amount is reached. Contractor is responsible for notifying the City when the services provided under this Contract reach the total compensation amount. In no event will the Contractor be paid for services provided in excess of the total compensation amount without this Contract being amended in writing prior to those services in excess of the total compensation amount being provided.

B. Payment in future fiscal years is subject to availability of funds pursuant to the Appropriations Paragraph set forth below and to any negotiations between the parties from year to year pursuant to Paragraph 1, Scope of Work, and to approval by the City. All invoices MUST BE received by the City no later than fifteen (15) days after the termination of the Fiscal Year in which the services were delivered. Invoices received after such date WILL NOT BE PAID.)

C. Contractor must submit a detailed statement accounting for all services performed and expenses incurred. If the City finds that the services are not acceptable, within thirty days after the date of receipt of written notice from the Contractor that payment is requested, it shall provide the Contractor a letter of exception explaining the defect or objection to the services, and outlining steps the Contractor may take to provide remedial action. Upon certification by the City that the services have been received and accepted, payment shall be tendered to the Contractor within twenty-one days after the date of acceptance. If payment is made by mail, the payment shall be deemed tendered on the date it is postmarked. .

D. If the City fails to pay the contractor within twenty-one days after receipt of an undisputed request for payment, the City shall pay interest to the contractor beginning on the twenty-second day after payment was due, computed at one and one-half percent of the undisputed amount per month or fraction of a month until the payment is issued. If the City receives an improperly completed invoice, the City shall notify the sender of the invoice within seven days of receipt in what way the invoice is improperly completed, and the owner has no further duty to pay on the improperly completed invoice until it is resubmitted as complete.

E. **Notice of Extended Payment Provision for Grant Funded Contracts**. This contract allows the City to make payment within 45 days after submission of an undisputed request for payment for contracts funded by grant money consistent with NMSA 1978, sec. 57-128-5(B).

3. Term

THIS CONTRACT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED IN WRITING BY THE CITY. This contract shall terminate **two (2) years from date of final signature**. The City reserves the right to renew this contract on an annual basis by mutual agreement not to exceed a total of ten (10) years in accordance with NMSA 1978, Sections 13-1-150 through 152.

4. Termination

A. Grounds. The City may terminate this Contract for convenience or cause. For contracts within their authority, the City Manager or their designee is authorized to provide the notice of termination, otherwise such notice of termination shall be provided by the Mayor or their designee as authorized by the Governing Body. The Contractor may only terminate this Contract based upon the City's uncured, material breach of this Contract.

B. Notice; City Opportunity to Cure.

1) Except as otherwise provided in Paragraphs 7.A and 17, the City shall give Contractor

written notice of termination at least thirty (30) days prior to the intended date of termination.

2) Contractor shall give City written notice of termination at least thirty (30) days prior to the intended date of termination, which notice shall (i) identify all the City's material breaches of this Contract upon which the termination is based and (ii) state what the City must do to cure such material breaches. Contractor's notice of termination shall only be effective (i) if the City does not cure all material breaches within the thirty (30) day notice period or (ii) in the case of material breaches that cannot be cured within thirty (30) days, the City does not, within the thirty (30) day notice period, notify the Contractor of its intent to cure and begin with due diligence to cure the material breach.

3) Notwithstanding the foregoing, this Contract may be terminated immediately upon written notice to the Contractor (i) if the Contractor becomes unable to perform the services contracted for, as determined by the City; (ii) if, during the term of this Contract, the Contractor is suspended or debarred by the City; or (iii) the Contract is terminated pursuant to Paragraph 5, "Appropriations," of this Contract.

C. Liability. Except as otherwise expressly allowed or provided under this Contract, the City's sole liability upon termination shall be to pay for acceptable work performed prior to the Contractor's receipt or issuance of a notice of termination; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Contract. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE CITY'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS CONTRACT.*

5. Appropriations

The terms of this Contract are contingent upon sufficient appropriations and authorization being made by the Governing Body for the performance of this Contract. If sufficient appropriations and authorization are not made by the Governing Body, this Contract shall terminate immediately upon written notice being given by the City to the Contractor. The City's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the City proposes an amendment to the Contract to unilaterally reduce funding, the Contractor shall have the option to terminate the Contract or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

6. Status of Contractor

The Contractor and its agents and employees are independent contractors performing construction services for the City and are not employees of the City. The Contractor and its agents and employees shall not accrue leave, retirement, insurance, bonding, use of City vehicles, or any other benefits afforded to employees of the City as a result of this Contract. The Contractor acknowledges that all sums received hereunder are reportable by the Contractor for tax purposes, including without limitation, self-employment and business income tax. The Contractor agrees not to purport to bind the City unless the Contractor has express written authority to do so, and then only within the strict limits of that authority.

7. Construction Contract Performance and Payment Bond

A. When a construction contract is awarded in excess of twenty-five thousand dollars ($25,000), the following bonds or security shall be delivered to the City and shall become binding on the parties upon the execution of the contract. If the Contractor fails to deliver the required performance and payment

bonds, the Contractor's bid shall be rejected, its bid security shall be enforced to the extent of actual damages. Award of the contract shall be made pursuant to the Procurement Code in the following manner:

(1) a performance bond satisfactory to the City, executed by a surety company authorized to do business in this state and said surety to be approved in federal circular 570 as published by the United States treasury department or the state board of finance or the local governing authority, in an amount equal to one hundred percent of the price specified in the contract; and

(2) a payment bond satisfactory to the City, executed by a surety company authorized to do business in this state and said surety to be approved in federal circular 570 as published by the United States treasury department or the state board of finance or the local governing authority, in an amount equal to one hundred percent of the price specified in the contract, for the protection of all persons supplying labor and material to the contractor or its subcontractors for the performance of the work provided for in the contract.

B. A subcontractor shall provide a performance and payment bond on a public works building project if the subcontractor's contract for work to be performed on a project is one hundred twenty-five thousand dollars ($125,000) or more.

8. Assignment

The Contractor shall not assign or transfer any interest in this Contract or assign any claims for money due or to become due under this Contract without the prior written approval of the City.

9. Subcontracting

The Contractor shall not subcontract any portion of the services to be performed under this Contract without the prior written approval of the City. No such subcontract shall relieve the primary Contractor from its obligations and liabilities under this Contract, nor shall any subcontract obligate direct payment from the City.

10. Release

Final payment of the amounts due under this Contract shall operate as a release of the City, its officers and employees from all liabilities, claims and obligations whatsoever arising from or under this Contract.

11. Confidentiality

Any confidential information provided to or developed by the Contractor in the performance of this Contract shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the City.

12. Product of Service -- Copyright

All materials developed or acquired by the Contractor under this Contract shall become the property of the City and shall be delivered to the City no later than the termination date of this Contract. Nothing developed or produced, in whole or in part, by the Contractor under this Contract shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor.

13. Conflict of Interest; Governmental Conduct Act

A. The Contractor represents and warrants that it presently has no interest and, during the term of this Contract, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under the Contract.

B. The Contractor further represents and warrants that it has complied with, and, during the term of this Contract, will continue to comply with, and that this Contract complies with all applicable provisions of the Governmental Conduct Act, Chapter 10, Article 16 NMSA 1978.

C. Contractor's representations and warranties in Paragraphs A and B of this Article 12 are material representations of fact upon which the City relied when this Contract was entered into by the parties. Contractor shall provide immediate written notice to the City if, at any time during the term of this Contract, Contractor learns that Contractor's representations and warranties in Paragraphs A and B of this Article 12 were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances. If it is later determined that Contractor's representations and warranties in Paragraphs A and B of this Article 12 were erroneous on the effective date of this Contract or have become erroneous by reason of new or changed circumstances, in addition to other remedies available to the City and notwithstanding anything in the Contract to the contrary, the City may immediately terminate the Contract.

D. All terms defined in the Governmental Conduct Act have the same meaning in this section.

14. Amendment

A. This Contract shall not be altered, changed or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the City proposes an amendment to the Contract to unilaterally reduce funding due to budget or other considerations, the Contractor shall, within thirty (30) days of receipt of the proposed Amendment, have the option to terminate the Contract, pursuant to the termination provisions as set forth in Article 4 herein, or to agree to the reduced funding.

15. Change Orders

A. Changes. The Contractor may only make changes or revisions within the Scope of Work as defined by Article 1 and/or Exhibit 1 after receipt of written approval by the City Manager or his/her designee. Such change may only be made to Tasks or Sub-Task as defined in the Scope of Work.

B. Change Request Process. In the event that circumstances warrant a change to accomplish the Scope of Work as described above, a Change Request shall be submitted that meets the following criteria:

1) The Project Manager shall draft a written Change Request for review and approval by the City Manager to include:

(a) the name of the person requesting the change;
(b) a summary of the required change;
(c) the start date for the change;
(d) the reason and necessity for change;
(e) the elements to be altered; and
(f) the impact of the change.

2. The City Manager shall provide a written decision on the Change Request to the Contractor within a maximum of ten (10) Business Days of receipt of the Change Request. All decisions

made by the City Manager are final. Change Requests, once approved, become a part of the Contract, and become binding as a part of the original Contract.

16. Merger

This Contract incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements and understandings have been merged into this written contract.

All terms and conditions of the Emergency Procurement and the Contractor's response to such document(s) are incorporated herein by reference and is included in the order of precedence.

No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Contract.

17. Penalties for violation of law

NMSA 1978, sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities and kickbacks.

18. Equal Opportunity Compliance

The Contractor agrees to abide by all federal and state laws and rules and regulations, and Santa Fe City Code, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Contract. If Contractor is found not to be in compliance with these requirements during the life of this Contract, Contractor agrees to take appropriate steps to correct these deficiencies.

19. Applicable Law

The laws of the State of New Mexico shall govern this Contract, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, section 38-3-2. By execution of this Contract, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Contract.

20. Workers Compensation

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Contract may be terminated by the City.

21. Other Insurance

If the services contemplated under this Contract will be performed on or in City facilities or property, Contractor shall maintain in force during the entire term of this Contract, the following insurance coverage(s), naming the City as additional insured.

A. **Commercial General Liability** insurance shall be written on an occurrence basis and be a broad as ISO Form CG 00 01 with limits not less than $2,000,000 per occurrence and $2,000,000 in the

aggregate for claims against bodily injury, personal and advertising injury, and property damage. Said policy shall include broad form Contractual Liability coverage and be endorsed to name the City of Santa Fe their officials, officers, employees, and agents as additional insureds.

B. **Business Automobile Liability** insurance for all owned, non-owned automobiles, with a combined single limit not less than $1,000,000 per accident.

C. **Broader Coverage and Limits**. The insurance requirements under this Contract shall be the greater of (1) the minimum coverage and limits specified in this Contract, or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the Named Insured. It is agreed that these insurance requirements shall not in any way act to reduce coverage that is broader or that includes higher limits than the minimums required herein. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor hereunder.

D. Contractor shall maintain the above insurance for the term of this Contract and name the City as an additional insured and provide for 30 days cancellation notice on any Certificate of Insurance form furnished by Contractor. Such certificate shall also specifically state the coverage provided under the policy is primary over any other valid and collectible insurance and provide a waiver of subrogation.

22. Records and Financial Audit

The Contractor shall maintain detailed time and expenditure records that indicate the date; time, nature and cost of services rendered during the Contract's term and effect and retain them for a period of three (3) years from the date of final payment under this Contract. The records shall be subject to inspection by the City. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive or illegal payments

23. Indemnification

The Contractor shall defend, indemnify and hold harmless the City from all actions, proceeding, claims, demands, costs, damages, attorneys' fees and all other liabilities and expenses of any kind from any source which may arise out of the performance of this Contract, caused by the negligent act or failure to act of the Contractor, its officers, employees, servants, subcontractors or agents, or if caused by the actions of any client of the Contractor resulting in injury or damage to persons or property during the time when the Contractor or any officer, agent, employee, servant or subcontractor thereof has or is performing services pursuant to this Contract. In the event that any action, suit or proceeding related to the services performed by the Contractor or any officer, agent, employee, servant or subcontractor under this Contract is brought against the Contractor, the Contractor shall, as soon as practicable but no later than two (2) days after it receives notice thereof, notify the legal counsel of the City.

24. New Mexico Tort Claims Act

Any liability incurred by the City of Santa Fe in connection with this Contract is subject to the immunities and limitations of the New Mexico Tort Claims Act, Section 41-4-1, et. seq. NMSA 1978, as amended. The City and its "public employees" as defined in the New Mexico Tort Claims Act, do not waive sovereign immunity, do not waive any defense and do not waive any limitation of liability pursuant to law. No provision in this Contract modifies or waives any provision of the New Mexico Tort Claims Act.

25. Invalid Term or Condition

If any term or condition of this Contract shall be held invalid or unenforceable, the remainder of this Contract shall not be affected and shall be valid and enforceable.

26. Enforcement of Contract

A party's failure to require strict performance of any provision of this Contract shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Contract shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

27. Notices

Any notice required to be given to either party by this Contract shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

To the City:
City of Santa Fe
Attn: Michael Dozier, Wastewater Department Director
315 Caja Del Rio
Santa Fe, NM 87507

To the Contractor:
A.A.C. Construction LLC
18 La Luna Road
Santa Fe, NM 87507

28. Authority

If Contractor is other than a natural person, the individual(s) signing this Contract on behalf of Contractor represents and warrants that he or she has the power and authority to bind Contractor, and that no further action, resolution, or approval from Contractor is necessary to enter into a binding contract.

29. Progress Payments

Based upon Application for Payment submitted to the City by the Contractor and Certificates for Payment issued by the City, the City shall make progress payments on account of the Contract sum to the Contractor as provided in the Contract documents for the period ending the last day of the month as follows:

Not later than twenty-one (21) days following the end of the period covered by the Application for Payment, one hundred percent (100%) of the portion of the Contract Sum properly allocable to labor, materials, and equipment incorporated in the work and one hundred percent (100%) of the portion of the Contract sum properly allocable to materials and equipment suitably stored at the site or some other location agreed upon in writing for the period covered by the Application for Payment, less the aggregate of previous payments made by the City; and upon substantial completion of the entire work, a sum sufficient to increase the total payments to one hundred percent (100%) of the Contract sum, less such amounts as the City shall determine for all incomplete work and unsettled claims as provided in the Contract documents.

30. Final Payment

Final payment, constituting the entire unpaid balance of the Contract sum, unless it is a disputed payment, shall be paid by the City to the Contractor within twenty-one (21) calendar days, after all deficiencies to the Contract document that were noted during the Substantial Completion Inspection and listed on the attachment to the Certificate of Substantial Completion have been corrected, and provided the Contract has been fully performed and a final Certificate for Payment has been issued by the City. In addition, the Contractor shall provide to the City a certified statement of Release of Lien (AIA Document G706A or approved form), Consent of Surety, Warranty from Prime Contractor, Warranties from Suppliers and Manufacturers, training sessions, equipment/operating manuals, and as-built drawings.

31. Schedule

The Contractor shall, within five (5) days after the effective date of Notice to Proceed, prepare and submit a progress schedule covering project operations for the 30-day Contract period. This progress schedule shall be of the type generally referred to as a Critical Path Method (CPM), Critical Path Schedule (CPS), and Critical Path Analysis (CPA), and other similar designations. The CPM shall be used to control the timing and sequences of the project. All work shall be done in accordance with the CPM Planning and Scheduling. A written statement of explanation shall be submitted with the progress schedule. All costs incurred by the contractor to implement the CPM shall be borne by the Contractor and are part of their Contract.

32. General and Special Provisions

A. Terms used in this Contract which are defined in the Conditions of the Contract shall have the meanings designated in those Conditions.

B. An enumeration of the Contractor's General Comprehensive Liability Insurance requirements appears in the General Conditions of the Contract for construction. Insurance requirements are also described in the Instructions to the Bidder section of the Project Manual. It is the sole responsibility of the Contractor to comply with the law.

C. This Contract shall not become effective until: (1) approved by the Governing Body; and (2) signed by all parties required to sign this Contract.

D. The Contractor shall maintain detailed time records which indicate the date, time and nature of services rendered. These records shall be subject to inspection by the City, the Department of Finance and Administration and the State Auditor. The City shall have the right to audit billings both before and after payment. Payment under this Contract shall not foreclose the right of the City to recover excessive illegal payments.

E. The Contractor warrants that the Contractor presently has no interest and shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance or services required under this Contract.

F. The Contractor hereby warrants that the Contractor complies with the Americans with Disabilities Act, 29 CFR 1630.

G. Gender, Singular/Plural. Words of any gender used in this Contract shall be held and

construed to include any other gender, and words in the singular number shall be held to include the plural, unless the context otherwise requires.

H. Captions and Section Headings. The captions and section headings contained in this Contract are for convenience of reference only, and in no way limit, define, or enlarge the terms, scope, and conditions of this Contract.

I. Certificates and Documents Incorporated. All certificates and documentation required by the provisions of the Contract shall be attached to this Contract at the time of execution and are hereby incorporated by reference as though set forth in full in this Contract to the extent they are consistent with its conditions and terms.

J. Separability. If any clause or provision of this Contract is illegal, invalid or unenforceable under present or future laws effective during the term of this Contract, then and in that event, it is the intention of the parties hereto that the remainder of this Contract shall not be affected thereby.

K. Words and Phrases. Words, phrases, and abbreviations, which have well-known technical or trade meanings used in the Contract documents shall be used according to such recognized meaning. In the event of a conflict, the more stringent meaning shall govern.

L. Relationship of Contract Documents. The Contract Documents are complementary, and any requirement of one Contract Document shall be as binding as if required by all.

M. Pursuant to NMSA 1978, section 13-1-191, reference is hereby made to the Criminal Laws of New Mexico (including NMSA 1978, sections 30-14-1, 30-24-2, and 30-41-1 through 30-41-3) which prohibit bribes, kickbacks, and gratuities, violation of which constitutes a felony. Further, the Procurement Code (NMSA 1978, sections 13-1-28 through 13-1-199) imposes civil and criminal penalties for its violation.

N. Pursuant to NMSA 1978, section 13-4-11. Reference is hereby made to the Minimum Wage on Public Works; weekly payments; posting wage scale; withholding funds.

IN WITNESS WHEREOF, the Parties have executed this Contract as of the date of the signature by the required approval authorities below.

ITEM AND ISSUE:
Wastewater Management is requesting a Budget increase from Cash Balance in Wastewater Enterprise Fund to WWMD WIP Construction (5000375-572970) to fund Emergency Procurement in the amount of $8,000,000.

BACKGROUND AND SUMMARY:
The Wastewater Treatment Facility is currently suffering wastewater treatment challenges causing difficulties maintaining consistent compliance with monitoring standards. An Environmental Protection Agency (EPA) Administrative Order and New Mexico Environment Department (NMED) Notice of Noncompliance has initiated an Emergency Procurement to remedy the compliance issues from multiple fronts.

FUNDING SOURCE:
Fund Name/Number: Wastewater Enterprise Fund/500
Munis Org Name/Number: CIP / 5000375
Munis Object Name/Number: WIP Construction / 572970

ACTION REQUESTED:
Wastewater Management respectfully requests the transfer of $8,000,000 dollars from Cash Balance in Wastewater Enterprise Fund to WWMD WIP Construction (5000375-572970) to fund Emergency Procurement.

City of Santa Fe
Emergency Determination Form

The Department that makes an emergency procurement to plan or prepare for the response to a serious threat to public health, welfare, safety or property caused by a flood, fire, epidemic, riot, act of terrorism, equipment failure or similar event shall account for the money spent in making the procurement and report on that accounting to the City's Finance Department Director within ninety days after the end of the contract or fiscal year in which the procurement was made, whichever comes first.

I. Department: Public Utilities, **City of Santa Fe**

Department Director: John Dupuis

Department Contact: _P. Fred Heerbrandt, P.E.

Department Telephone Number: 505-955-4623

City of SF Chief Procurement Officer: **Travis Dutton-Leyda, CPO**

Telephone Number: **(505) 629-8351**

II. **A. Name of Contractor: AquaSight**

Address of Contractor: 1650 W. Big Beaver Rd., Troy MI 48084

Amount of prospective contract: $350,000.00

Term of prospective contract: Three years

B. Name of Contractor: Great Western Electrical

Address of Contractor: 3310 Girard NE, Albuquerque, nm 87107

Amount of prospective contract: $155,690.08

Term of prospective contract: One year

C. Name of Contractor: Carollo Engineers, Inc.

Address of Contractor: P. O. Box 30835, Salt Lake City, UT 84130-0835

Amount of prospective contract: $80,000.00

Term of prospective contract: One year

D. Name of Contractor: ITSQUEST Staffing

Address of Contractor: 1012 Marquez Pl Ste 301B, Santa Fe, NM 87505

Amount of prospective contract: $264,463.70

Term of prospective contract: One year and two months

E. Name of Contractor: Hazen and Sawyer

Address of Contractor: 100 Sun Ave. NE, Suite 206, Albuquerque, NM 87109

Amount of prospective contract: $2,718,000.00

Term of prospective contract: 2.5 years

F. Name of Contractor: A.A.C. Construction, LLC

Address of Contractor: 18 La Luna Rd, Santa Fe, NM 57507

Amount of prospective contract: $2,465,837.04

Term of prospective contract: Two Years

G. Name of Contractor: Molzen Corbin

Address of Contractor: 2701 Miles Rd. SE, Albuquerque, NM 87106

Amount of prospective contract: $180,000

Term of prospective contract: Two Years

H. Name of Contractor: Rain for Rent (Western Oilfields Supply Co.)

Address of Contractor: 2495 Lakeside Drive, Las Cruces, NM 88007

Amount of prospective contract: $903,214.87

Term of prospective contract: Three Years

GRAND TOTAL: $7,117,250.69

The attached contractors and their associated scopes of work will assist City staff in bringing the wastewater reclamation facility into compliance.

Location of Services: Paseo Real Wastewater Reclamation Facility, 73 Paseo Real, Santa Fe, NM 87507

III. **Please thoroughly list the services (scope of work), construction or items of tangible personal property of the contract:**

1. Emergency funding request to remediate issues currently affecting the WWTF
   a. Contractors: Hazen and Sawyer ($2.7M), AAC construction (est.$2.5M), Carollo ($80k), Aquasight ($350k), ITSQuest (scheduler $264k), Great Western ($156k), Molzen Corbin ($180k), Rain for Rent ($903K)
   b. Improvements Plan
      - Quarterly Reporting disconnect
      - Weekly Meetings with NMED
      - Unit Process Operating Strategy documentation (Carollo/Hazen)
      - Instrumentation Implementation
      - Model Development/SCADA Integration
      - Sample and Reporting External Support
      - Advanced SCADA for Each Process
      - Unit Process Improvements

See attached proposals and scopes of work for details.

IV. **Provide an explanation for the justification of the procurement including a description of the emergency condition(s) requiring use of emergency procurement and the practicable competition utilized in compliance with NMSA 1978, § 13-1-127.**

The United States Environmental Protection Agency (EPA) has issued an Administrative Order (AO) issued to the City of Santa Fe for violations of the Clean Water Act (CWA) (33 U.S.C. §§ 1251-1387). The violations were identified during a review of the permit file and discharge monitoring reports submitted for the Paseo Real Wastewater Reclamation Facility. The violations alleged are for failure to meet permit effluent limitations. This AO does not assess a monetary penalty; however, it does require compliance with applicable federal regulations.

Similarly, the New Mexico Environment Department (NMED) has determined that the City of Santa Fe Paseo Real Wastewater Treatment Plant (WWTP) has been operating in noncompliance with the New Mexico Water Quality Act (WQA) and Water Quality Control Commission (WQCC)' regulations (20.6.2 and 20.6.4 New Mexico Administrative Code) adopted pursuant to the WQA.

To facilitate the most efficient response to these regulators, the City requires emergency procurement to develop a plan and to implement that plan to bring the Paseo Real Wastewater Reclamation Facility into compliance as soon as is feasible to do so.

EPA Region 6 Administrative Order Attached.

III. **Please describe what measures are being taken to minimize the duration and effect of this particular emergency procurement (for example: is the emergency only in place until a competitive process can be completed, etc.).**

By immediately bringing these contractors in to perform their requested scopes of work, we can begin to bring the facility into compliance, thereby eliminating or minimizing the associated risks to public health and safety associated with the non-compliant discharge.

IV. **Describe what measures the Department will take in the future to prevent/mitigate use of emergency procurement under similar circumstances.**

It is our goal and desire to prevent the conditions that precipitated the need for this emergency procurement by implementing the measures afforded by this emergency procurement.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
Region 6
FINDINGS OF VIOLATION AND COMPLIANCE ORDER
Docket Number: CWA-06-2024-1745; NPDES Permit Number: NM0022292

STATUTORY AUTHORITY

The following findings are made, and Order issued under the authority vested in the Administrator of the United States Environmental Protection Agency (EPA) by Section 309(a) of the Clean Water Act (Act), 33 U.S.C. § 1319(a). The Administrator of EPA delegated the authority to issue this Order to the Regional Administrator of EPA Region 6, who further delegated this authority to the Director of the Enforcement and Compliance Assurance Division.

FINDINGS

1. The City of Santa Fe (Respondent) is a municipality which was incorporated under the laws of the State of New Mexico, and as such, is a "person" as that term is defined at Section 502(5) of the Act, 33 U.S.C. § 1362(5), and 40 C.F.R. § 122.2.

2. At all times relevant to this Order (all relevant times), Respondent owned or operated a municipal wastewater treatment facility located at Airport Road, Santa Fe, Santa Fe County, New Mexico, 87504 (facility), and was, therefore, an "owner or operator" within the meaning of 40 C.F.R. § 122.2.

3. At all times relevant, the facility was a "point source" of a "discharge" of "pollutants" with its municipal wastewater to the receiving waters of Santa Fe River in Segment No. 20.6.4.113 of the Rio Grande Basin which are "waters of the United States" within the meaning of Section 502 of the Act, 33 U.S.C. § 1362, and 40 C.F.R. § 122.2.

4. Because Respondent owned or operated a facility that acted as a point source of discharges of pollutants to waters of the United States, Respondent and the facility were subject to the Act and the National Pollutant Discharge Elimination System (NPDES) program.

5. Under Section 301 of the Act, 33 U.S.C. § 1311, it is unlawful for any person to discharge any pollutant from a point source to waters of the United States, except with the authorization of, and in compliance with, an NPDES permit issued pursuant to Section 402 of the Act, 33 U.S.C. § 1342.

6. Section 402(a) of the Act, 33 U.S.C. § 1342(a), provides that the Administrator of EPA may issue permits under the NPDES program for the discharge of pollutants from point sources to waters of the United States. Any such discharge is subject to the specific terms and conditions prescribed in the applicable permit.

7. Respondent applied for and was issued NPDES Permit No. NM0022292 (herein the permit) under Section 402 of the Act, 33 U.S.C. § 1342, which became effective on September 1, 2021, and expires on August 31, 2026. At all relevant times, Respondent was authorized to discharge pollutants from the facility to waters of the United States only in compliance with the specific terms and conditions of the permit.

8. Part I.A of the permit places certain limitations on the quality and quantity of effluent discharged by Respondent. The relevant discharge limitations are indicated in the attached Table A.

9. Part I.C. of the permit requires the Respondent to sample and test its effluent and monitor its compliance with permit conditions according to specific procedures, in order to determine the facility's compliance or noncompliance with the permit and applicable regulations. It also requires the Respondent to file with EPA certified Discharge Monitoring Reports (DMRs) of the results of monitoring, and Noncompliance Reports when appropriate.

10. Certified DMRs filed by the Respondent with EPA in compliance with the permit show discharges of pollutants from the facility that exceed the permitted effluent limitations established in Part I.A of the permit, as specified in the attached Table B.

11. Each instance in which Respondent discharged pollutants to waters of the United States in amounts exceeding the effluent limitations contained in the permit is a violation of the permit and Section 301 of the Act, 33 U.S.C. § 1311. Each violation of the conditions of the permit or regulations described above is a violation of Section 301 of the Act, 33 U.S.C. § 1311.

12. Administrative Order (AO) Docket Number CWA-06-2019-1773 was issued on March 29, 2019, regarding the facility's NPDES permit excursions. The Respondent submitted a written response to the AO on May 31, 2019.

13. Administrative Order (AO) Docket Number CWA-06-2019-1818 was issued on August 26, 2019, regarding the facility's NPDES permit excursions. The Respondent submitted a written response to the AO on October 23, 2019.

14. Administrative Order (AO) Docket Number CWA-06-2021-1725 was issued on June 1, 2021, regarding the facility's NPDES permit excursions. The Respondent submitted a written response to the AO on June 11, 2021.

SECTION 309 (a)(3) COMPLIANCE ORDER

Based on the foregoing Findings and pursuant to the authority of Section 309 of the Act, EPA hereby orders Respondent to take the following actions:

A. Within thirty (30) days of the effective date of this Order, Respondent shall submit a list of the specific actions taken to correct the reporting and effluent violations cited in this Order.

B. Within thirty (30) days of the effective date of this Order, Respondent shall provide written certification to EPA, Region 6 that the violations cited herein have been corrected and that the facility is in compliance with the requirements of the permit.

C. In the event that Respondent believes complete correction of the violations cited herein is not possible within thirty (30) days of the effective date of this Order, Respondent shall, within thirty (30) days of the effective date of this Order, submit a comprehensive written plan for the elimination of the cited violations within the shortest possible time for EPA review. Such plan shall describe in detail the specific corrective actions to be taken and why such actions are sufficient to correct the violations. The plan may include interim corrective measures to address effluent limit violations as quickly as possible followed by subsequent permanent measures. The plan shall include a detailed schedule for the elimination of the violations within the shortest possible time, as well as measures to prevent these or similar violations from recurring.

D. If Respondent would like to arrange a meeting with EPA to discuss the allegations in this Order, it should contact EPA within forty-five (45) days of the effective date of this Order. The meeting will be held at the Region 6 offices, 1201 Elm Street, Dallas, Texas, and Respondent can provide any information it believes is relevant to this Order. Respondent shall submit to EPA all information or materials it considers relevant to EPA at least ten (10) days prior to the meeting.

E. To arrange a meeting, or to ask questions or comment on this matter, please contact Ms. Mona Tates, of my staff, at (214) 665-7152 or tates.mona@epa.gov.

F. Any information or correspondence submitted by Respondent to EPA under this Order shall be addressed to the following:

Ms. Nancy Williams
williams.nancy@epa.gov

and

Ms. Mona Tates
tates.mona@epa.gov

GENERAL PROVISIONS

Issuance of this Section 309(a)(3) Compliance Order shall not be deemed an election by EPA to forego any administrative, judicial, civil or criminal action to seek penalties, fines, or any other relief appropriate under the Act for the violations cited herein, or other violations that become known to EPA. EPA reserves the right to seek any remedy available under the law that it deems appropriate.

Respondent may seek federal judicial review of the Order pursuant to Chapter 7 of the Administrative Procedure Act, 5 U.S.C. §§ 701-706.

Failure to comply with this Section 309(a)(3) Compliance Order or the Act may result in further administrative action, or a civil judicial action initiated by the United States Department of Justice.

This Order does not constitute a waiver or modification of the terms or conditions of Respondent's NPDES permit, which remains in full force and effect. Compliance with the terms and conditions of this Order does not relieve Respondent of its obligation to comply with any applicable federal, state, or local law or regulation.

The effective date of this Order is the date it is received by the Respondent.

Subject: Amendment 5 to Amended and Restated Lease Agreement Between the City of Santa Fe and Santa Fe Recovery Center, Inc.

Vendor Name: Santa Fe Recovery Center, Inc.

Vendor Number: 2761

ITEM AND ISSUE:
The Office of Economic Development respectfully requests approval of Amendment No. 5 ("Amendment") to Amended and Restated Lease Agreement Between the City of Santa Fe and Santa Fe Recovery Center, Inc. for Buildings 6B-1 and 6B-2 and Building 12 (King Hall) at 1600 S. St. Michael's Drive, Santa Fe, NM. The Amendment, if approved, extends the term of the lease for King Hall to September 1, 2025 and for the Student Apartments to February 1, 2025.

Action Requested: Please approve Amendment No. 5 to the Amended and Restated Lease Agreement.

BACKGROUND AND SUMMARY:
On November 15, 2019, the City of Santa Fe ("City") and Santa Fe Recovery Center, Inc. ("SFRC"), a New Mexico non-profit corporation, entered into an amended and restated lease agreement (Item #19-0872) to occupy City owned buildings located at 1600 St. Michael's Drive on the former campus of the Santa Fe University of Art & Design. The lease agreement was for Buildings 6B-1 and 6B-2, an adjacent laundry/office accessory building, and a portion of Building 12 (King Hall). The initial term was six months with two optional terms of six months each.

Amendment No. 1 (August 26, 2020, Item #20-0442) allowed SFRC to occupy 6,000 additional square footage in Building 12 (King Hall) to expand their treatment facility, and adjusted rent and terms for partial vacation of some space. Amendment No. 2 (December 16, 2020, Item #20-0692) allowed SFRC to further expand their operations within King Hall and adjusted the term to end May 31, 2021. Amendment No. 3 (August 31, 2022, Item #22-0415) adjusted rent and extended the term of their lease agreement through November 1, 2023. Amendment No. 4 (November 16, 2023, Item #23-0467) extended the term of their lease agreement through November 1, 2024.

Amendment No. 5 will become effective with the date of final signature and will terminate on February 1, 2025 for the Student Apartments and September 1, 2025 for King Hall, with no provision for extension.

Amendment #2
Amendment #1
Amended and Restated Lease Agreement

AMENDMENT 5 TO AMENDED AND RESTATED LEASE AGREEMENT
BETWEEN
THE CITY OF SANTA FE AND SANTA FE RECOVERY CENTER, INC.

This Amendment No. 5 (the "Amendment") to the City of Santa Fe Amended and Restated Lease Agreement, Item #19-0872 dated November 15, 2019, as amended ("Lease Agreement"), is made and entered into as of the date of the last signature ("Effective Date"), by and between the CITY OF SANTA FE, a municipal corporation ("City") and SANTA FE RECOVERY CENTER, INC., a New Mexico non-profit corporation ("Lessee"), collectively the "Parties."

RECITALS:

A. The Lessor and Lessee had previously entered into the Lease Agreement, as amended, for the specific purpose of operating Lessee's "Extended Residential", "Recovery Housing" and "Social Detoxification" programs; and

B. On August 26, 2020, Amendment 1 was executed by the Parties to increase the size of the Premises, increase the base rent accordingly, and to allow Lessee to subsequently reduce the size of the Premises in Building 12 (King Hall) and reduce the base rent accordingly; and

C. On December 16, 2020, Amendment 2 was executed by the Parties to increase the size of the Premises to mitigate the effects of the COVID-19 Pandemic, with no increase to base rent; and

D. On August 31, 2022, Amendment 3 was executed by the Parties to extend the term of the Lease Agreement and to reduce rent based on a 2017 appraisal; and

E. On November 8, 2023, Amendment 4 was executed by the Parties to extend the term of the Lease Agreement and to remove the month-to-month tenancy provision if the Lessee was to remain in possession of the Premises after the expiration of the then current term; and

F. The Parties now desire to amend the Lease Agreement to reduce the size of the Premises, reduce the rent accordingly and to extend the term.

AMENDMENT:

Pursuant to Article 21 of the Lease Agreement, and for the good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, Lessor and Lessee agree that the Lease Agreement is amended as follows:

1. **Article 1 (PREMISES)** of the Lease Agreement is hereby deleted in its entirety and replaced with the following:

1. **PREMISES**

Lessor allows Lessee to use, occupy and improve, subject to the terms and conditions of this Lease Agreement, the following:

A. Portions of that certain existing City-owned building known as Building 12 (King Hall) consisting of approximately 20,525 square feet.

B. Certain City-owned buildings known as Buildings 6B-1 and 6B-2 containing 24 two-bedroom apartments of approximately 625 square feet each, and an adjacent laundry/office accessory building of approximately 400 square feet. Total square feet of approximately 15,400 square feet (collectively Student Apartments).

C. And furnishings as contained in the premises described above, all located at 1600 Saint Michaels Drive on the former campus of the Santa Fe University of Art & Design in the City of Santa Fe (Premises). Lessee accepts the Premises in its present state and agrees that it is in good condition, without any representation or warranty by Lessor as the condition of the Premises or as to the use, which may be made thereof.

2. **Article 3 (LEASE TERM)** of the Lease Agreement is hereby deleted in its entirety and replaced with the following:

3. **LEASE TERM**

A. The term of this Lease Agreement for King Hall shall commence at 12:00 a.m. on the Effective Date and terminate at 12:01 a.m. on September 1, 2025.

B. The term of this Lease Agreement for the Student Apartments shall commence at 12:00 a.m. on the Effective Date and terminate at 12:01 a.m. on February 1, 2025.

3. **Article 5 (RENT)** of the Lease Agreement is hereby deleted in its entirety and replaced with the following:

5. **RENT**

A. Lessee shall pay Monthly Base Rent for King Hall of $9,789.37 ($117,472.38 annually).

B. Lessee shall pay Monthly Base Rent for the Student Apartments of $7,345.00 ($88,140.00 annually).

C. Rent is due on the Effective Date and thereafter due in full on the first day of each month during the Term without notice or demand and without deduction or offset for any cause whatsoever. Lessee shall make payments to the Lessor's cashier's office, 200 Lincoln Avenue, Room 114, Santa Fe, NM.

Except as specifically provided in this Amendment #5, the Lease Agreement shall remain in full force and effect, in accordance with its term.

IN WITNESS WHEREOF, the parties have executed this Amendment #5 as of the dates set out below,

AMENDMENT 4 TO AMENDED AND RESTATED LEASE AGREEMENT BETWEEN THE CITY OF SANTA FE AND SANTA FE RECOVERY CENTER, INC.

This Amendment No. 4 (the "Amendment") to the City of Santa Fe Amended and Restated Lease Agreement, Item #19-0872 dated November 15, 2019, as amended ("Lease Agreement"), between the CITY OF SANTA FE, a municipal corporation ("City") and SANTA FE RECOVERY CENTER, INC., a New Mexico non-profit corporation ("Lessee"), collectively the "Parties.".

RECITALS:

A. The Lessor and Lessee had previously entered into the Lease Agreement, as amended, for the specific purpose of operating Lessee's Extended Residential, Recovery Housing and Social Detoxification Programs; and

B. On August 26, 2020, Amendment 1 was executed by the Parties to increase the size if the Premises, increase the base rent accordingly, and to allow Lessee to subsequently reduce the size of the Premises in Building 12 (King Hall) and reduce the base rent accordingly; and

C. On December 16, 2020, Amendment 2 was executed by the Parties to increase the size of the Premises to mitigate the effects of the COVID-19 Pandemic, with no increase to base rent; and

D. On August 31, 2022, Amendment 3 was executed by the Parties to extend the term and to reduce rent based on a 2017 appraisal.

E. The Parties now desire to amend the Lease Agreement to extend the term.

AMENDMENT:

Pursuant to Article 21 of the Lease Agreement, and for the good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, Lessor and Lessee agree that the Lease Agreement is amended as follows:

1. The first, second, and third paragraphs of Article 3 (LEASE TERM) of the Lease Agreement is hereby deleted in its entirety and replaced with the following:

3. **LEASE TERM**
The term of this Lease Agreement shall commence at 12:00 a.m. on the Effective Date and terminate at 12:01 a.m. on November 1, 2024.

Except as specifically provided in this Amendment #3, the Lease Agreement shall remain in full force and effect, in accordance with its term.

AMENDMENT 3 TO AMENDED AND RESTATED LEASE AGREEMENT

BETWEEN

THE CITY OF SANTA FE AND SANTA FE RECOVERY CENTER, INC.

This Amendment No. 3 (the "Amendment") to the City of Santa Fe Amended and Restated Lease Agreement, Item #19-0872 dated November 15, 2019, as amended ("Lease Agreement"), between the CITY OF SANTA FE, a municipal corporation ("City") and SANTA FE RECOVERY CENTER, INC., a New Mexico non-profit corporation ("Lessee"), collectively the "Parties.".

RECITALS:

A. The Lessor and Lessee had previously entered into the Lease Agreement, as amended, for the specific purpose of operating Lessee's Extended Residential, Recovery Housing and Social Detoxification Programs; and

B. On August 26, 2020, Amendment 1 was executed by the Parties to increase the size if the Premises, increase the base rent accordingly, and to allow Lessee to subsequently reduce the size of the Premises in Building 12 (King Hall) and reduce the base rent accordingly; and

C. On December 16, 2020, Amendment 2 was executed by the Parties to increase the size of the Premises to mitigate the effects of the COVID-19 Pandemic, with no increase to base rent; and

D. The Parties now desire to amend the Lease Agreement to extend the term and reduce rent to reflect a current market rental value based on a 2017 appraisal, which has been adjusted for inflation.

AMENDMENT:

Pursuant to Article 21 of the Lease Agreement, and for the good and valuable consideration, the receipt and sufficiency of which are acknowledged by the parties, Lessor and Lessee agree that the Lease Agreement is amended as follows:

1. The first and second paragraphs of Article 3 (LEASE TERM) of the Lease Agreement is hereby deleted in its entirety and replaced with the following:

> 3. **LEASE TERM**
> The term of this Lease Agreement shall commence at 12:00 a.m. on the Effective Date and terminate at 12.01 a.m. on November 1, 2023.

2. Article 5 (RENT), A (Base Rent) of is Lease Agreement is hereby deleted in its entirety and replaced with the following:

> A. Base Rent. Lessee shall pay monthly Rent of $17,134.37 which is due on the Effective Date and thereafter due in full on the first day of each month during the Term, without notice or demand and without deduction or offset for any cause whatsoever. Lessee shall make payments to City of Santa Fe, Treasury Division, 200 Lincoln Ave., Room 114, Santa Fe, NM, 87504.

Effective date of this Base Rent shall be June 1, 2022.

Except as specifically provided in this Amendment #3, the Lease Agreement shall remain in full force and effect, in accordance with its term.

IN WITNESS WHEREOF, the parties have executed this Amendment #3 as of the dates set out below,

AMENDMENT NO. 2 TO AMENDED AND RESTATED LEASE AGREEMENT BETWEEN THE CITY OF SANTA FE AND SANTA FE RECOVERY CENTER, INC. (BUILDINGS 6B-1, 6B-2, AND PORTIONS OF BUILDING 12)

This AMENDMENT NO. 2 to AMENDMENT NO. 1 dated August 26, 2020, and the AMENDED AND RESTATED LEASE AGREEMENT dated November 15, 2019, (Lease Agreement) is made and entered into this _____ day of _____, 2020 by and between the CITY OF SANTA FE, a Municipal Corporation (herein Lessor) and SANTA FE RECOVERY CENTER, INC., a New Mexico non-profit corporation (herein Lessee), whose address is 5312 Jaguar Drive, Santa Fe, NM 87507, collectively the "Parties".

RECITALS

WHEREAS, the Lessor and Lessee had previously entered into an Amendment 1 and the Amended and Restated Lease Agreement for use of City owned buildings for the specific purpose of operating the "Extended Residential", "Recovery Housing", and "Social Detoxification" programs of the Lessee;

WHEREAS, the Lessee has requested to utilize more housing units within Building 12 (King Hall) which incorporates two additional residential hallways within the King Hall facility in order spread out their existing population numbers to help mitigate the potential spread of Covid-19 on the Midtown Campus facility for the benefit of their clients;

WHEREAS, the Lessor agrees to allow Lessee the additional use of its buildings and furnishings for the purpose of mitigating the spread of Covid-19, but does so solely to expand the premises with their existing population to afford Lessee the ability to properly socially distance the existing population for drug and alcohol treatment programs;

WHEREAS, the Lessor due to these exigent circumstances and because the population will not increase agrees that while the Premises will be expanded the rental amount will not be changed;

NOW THEREFORE, the parties of this Amendment No. 2 do hereby agree as follows:

1. Lessor does hereby grant to Lessee an additional two residential hallways within Building 12 (King Hall) in order to spread out their existing population at the Midtown Campus facility to help mitigate the spread of Covid-19 for the benefit of their clients and the City of Santa Fe;

2. Parties do hereby agree to amend existing Article 1 of the Amended and Restated Lease Agreement and the Amendment 1 to read as follows:

1. PREMISES

Lessor allows Lessee to use, occupy, and improve, subject to the terms and conditions of this Lease Agreement, those certain existing city-owned buildings known as Buildings 6B-1 and 6B-2 (Student Apartments) (containing twenty-four (24) two-bedroom apartments of approximately 625 square-feet each), an adjacent laundry/office accessory building (approximately 400 square-feet), and portions of Building 12 (King Hall) (approximately 20,525 square-feet) and furnishings as contained in the premises described all located at 1600 St. Michael's Drive on the former campus of the Santa Fe University of Art & Design in the City of Santa Fe (the Premises), as more fully described and shown on **Exhibit A1** attached hereto and incorporated herein. Lessee accepts the Premises in its present state and agrees that it is in good condition, without any representation or warranty by Lessor as to the condition of the Premises or as to the use, which may be made thereof.

Lessor shall allow Lessee to reduce the used portions of Building 12 (King Hall) beginning November 1, 2020 by approximately 3,458 square-feet, which shall reduce the total square footage used in this building to (approximately 12,067 square-feet). This reduction shall only be allowed following a walkthrough scheduled by the Lessee with the Lessor in which the Lessee demonstrates the premises in questions have been vacated.

3. Parties do hereby agree with additional usage there is also necessity to amend existing Article 5 of the Amended and Restated Lease Agreement and the Amendment to read as follows removing B:

5. RENT

A. Base Rent Lessee shall pay thirty-five, two-hundred and fifty-five dollars and sixteen cents **($35,255.16)** as monthly "Rent". Rent is due on the Effective Date and thereafter due in full on the first day of each month during the Term without notice or demand and without deduction or offset for any cause whatsoever. Lessee shall make payments to the Lessor's cashier office, Room 114, 200 Lincoln Ave., Santa Fe, NM.

4. Except as specifically provided in this Amendment No. 2, all other existing terms and provisions of the Amended and Restated Lease Agreement remain and shall remain in full force and effect.

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals upon this Amendment No. 1 as of this _____ day of _____, 2020.

AMENDMENT NO. 1 TO AMENDED AND RESTATED LEASE AGREEMENT BETWEEN THE CITY OF SANTA FE AND SANTA FE RECOVERY CENTER, INC. (BUILDINGS 6B-1, 6B-2, AND PORTIONS OF BUILDING 12)

This AMENDMENT NO. 1 to AMENDED AND RESTATED LEASE AGREEMENT Item #19-0872, dated August, 2019, (Amended and Restated Lease Agreement) is made and entered into this 26th day of August, 2020 (Effective Date) by and between the CITY OF SANTA FE, a Municipal Corporation (herein Lessor) and SANTA FE RECOVERY CENTER, INC., a New Mexico non-profit corporation (herein Lessee), whose address is 5312 Jaguar Drive, Santa Fe, NM 87507, collectively the "Parties".

RECITALS

WHEREAS, the Lessor and Lessee had previously entered into an Amended and Restated Lease Agreement for use of City owned buildings for the specific purpose of operating the "Extended Residential", "Recovery Housing", and "Social Detoxification" programs of the Lessee;

WHEREAS, the Lessee has requested to utilize more housing units within Building 12 (King Hall) which incorporate an additional six thousand (6000) square feet on the second floor of the facility in order to expand their treatment capacity at the Midtown Campus facility for the benefit of their clients;

WHEREAS, Lessee agrees to expand its insurance requirements under Section 9 of the Amended and Restated Lease Agreement to encompass the new expanded premises;

WHEREAS, the Lessor has entered into an Exclusive Negotiation Agreement with a Master Developer, KDC/Cienda, which requires the Lessor to receive approval of any expansion of any lease on the Midtown Campus, and the Master Developer has approved this lease expansion subject to the Lease Agreement's Section 3 Lease Term;

WHEREAS, the Lessor is amiable to the plans of the Lessee to allow for the additional use of its buildings and furnishings for the purpose of increasing the services available to the public for drug and alcohol treatment programs;

NOW THEREFORE, the parties of this Amendment No. 1 do hereby agree as follows:

1. Lessor does hereby grant to Lessee an additional six thousand (6000) square feet within Building 12 (King Hall) on the second floor of the facility in order to expand their treatment capacity at the Midtown Campus facility for the benefit of their clients;

2. Parties do hereby agree to amend existing Article 1 of the Amended and Restated Lease Agreement to read as follows:

1. PREMISES

During the Effective Date of this Amendment Lessor allows Lessee to use, occupy, and improve, subject to the terms and conditions of this Lease Agreement, those certain existing city-owned buildings known as Buildings 6B-1 and 6B-2 (Student Apartments) (containing twenty-four (24) two-bedroom apartments of approximately 625 square-feet each), an adjacent laundry/office accessory building (approximately 400 square-feet), and portions of Building 12 (King Hall) (approximately 15,525 square-feet) and furnishings as contained in the premises described all located at 1600 St. Michael's Drive on the former campus of the Santa Fe University of Art & Design in the City of Santa Fe (the Premises), as more fully described and shown on **Exhibit A1** attached hereto and incorporated herein. Lessee accepts the Premises in its present state and agrees that it is in good condition, without any representation or warranty by Lessor as to the condition of the Premises or as to the use which may be made thereof.

Starting November 1, 2020, Lessor shall allow Lessee to reduce the used portions of Building 12 (King Hall) by approximately 3,458 square-feet, which shall reduce the total square footage used in this building to (approximately 12,067 square-feet). On November 1, 2020, the City will conduct a scheduled walkthrough, to ensure the reduction has occurred, and will reduce the rent starting on this date if the Lessee has reduced its footprint. If the Lessee has not reduced its footprint it will be charge for the entire expanded premises..

3. Parties do hereby agree that with the expansion of the premises there is also necessity to amend existing. Section 5 of the Amended and Restated Lease Agreement, which is amended to read as follows:

5. RENT

A. Base Rent. Lessee shall pay Thirty-Five Thousand Two Hundred Fifty-

Five Dollars and Sixteen Cents (**$35,255.16**) as monthly "Rent". Rent is due on the Effective Date and thereafter due in full on the first day of each month during the Term without notice or demand and without deduction or offset for any cause whatsoever. Lessee shall make payments to the Lessor's cashier office, Room 114, 200 Lincoln Ave., Santa Fe, NM.

B. Reduced Base Rent. Upon Lessor approving the reduction of the Premises as delineated in amended Section 1, on or after November 1, 2020. Lessee shall pay Thirty-One Thousand Three Hundred Twelve Dollars and Thirty-Eight Cents (**$31,312.38**) as monthly "Rent". If the Lessee does not prove a reduction in the Premises then Section 5(A) will still be the monthly base rent. Rent is due on the Effective Date and thereafter due in full on the first day of each month during the Term without notice or demand and without deduction or offset for any cause whatsoever. Lessee shall make payments to the Lessor's cashier office, Room 114, 200 Lincoln Ave., Santa Fe, NM.

4. Except as specifically provided in this Amendment No. 1, all other existing terms and provisions of the Amended and Restated Lease Agreement remain and shall remain in full force and effect.

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals upon this Amendment No. 1 as of this 26th day of August, 2020.

AMENDED AND RESTATED LEASE AGREEMENT
BETWEEN
THE CITY OF SANTA FE AND SANTA FE RECOVERY CENTER, INC.
(BUILDINGS 6B-1, 6B-2, AND PORTIONS OF BUILDING 12)

This AMENDED AND RESTATED LEASE AGREEMENT ("Lease Agreement"), dated and effective as of 15th day of November, 2019, amends, restates, supersedes and replaces in its entirety that certain Lease Agreement Item # 18-0935 dated August 15, 2018, and is made and entered into by and between the CITY OF SANTA FE, a municipal corporation ("Lessor") and SANTA FE RECOVERY CENTER, INC., a New Mexico non-profit corporation ("Lessee"), collectively the "Parties".

WITNESSETH:

In consideration of Lessee's promises herein, Lessor hereby gives Lessee a Lease Agreement, revocable and terminable as hereinafter provided, to enter on, occupy, make use of, and improve the real property of Lessor as follows:

1. PREMISES

Lessor allows Lessee to use, occupy, and improve, subject to the terms and conditions of this Lease Agreement, those certain existing city-owned buildings known as Buildings 6B-1 and 6B-2 (Student Apartments) (containing twenty-four (24) two-bedroom apartments of approximately 625 square-feet each), an adjacent laundry/office accessory building (approximately 400 square-feet), and portions of Building 12 (King Hall) (approximately 7,190.58 square-feet) all located at 1600 St. Michael's Drive on the former campus of the Santa Fe University of Art & Design in the City of Santa Fe (the "Premises"), as more fully described and shown on **Exhibit A1** attached hereto and incorporated herein. Lessee accepts the Premises in its present state and agrees that it is in good condition, without any representation or warranty by Lessor as to the condition of the Premises or as to the use which may be made thereof.

2. EFFECTIVE DATE

This Amended Lease Agreement shall become effective November 15, 2019 (the "Effective Date").

3. LEASE TERM

The term of this Lease Agreement shall commence at 12:00 a.m. on the Effective Date. The term of this Lease Agreement shall consist of an "Initial Term" of six (6) months with two (2) "Optional Terms" of six (6) months each.

Lessee's exercise of any Optional Term is contingent upon compliance with this Lease Agreement and with proper written notice by Lessee to Lessor at least ninety (90) days prior to the expiration of the Initial Term and shall be at Lessor's sole discretion.

In the event Lessee remains in possession of the Premises after the expiration of the Term of this Lease Agreement, such possession may, at the sole option of Lessor, be continued as a month-to-month tenancy. During any such month-to-month tenancy, the Rent due shall be prorated and payable on a monthly basis, and the terms and conditions of the Lease Agreement shall be otherwise applicable.

4. USE OF PREMISES

A. Conditions of Use. Lessee shall use the Premises solely for the specific purpose of operating the "Extended Residential", "Recovery Housing" and "Social Detoxification" programs of the Santa Fe Recovery Center subject to the following conditions:

i. Only Lessee's clients and staff are allowed to reside at the Premises, except that spouses and children of Lessee's clients may be allowed to reside on the Premises on a case-by-case basis at Lessee's discretion. No other persons are allowed to reside at the Premises;

ii. No violent felons or individuals who are a danger to themselves or others shall be allowed on the Premises;

iii. No alcohol or drugs (other than those prescribed by physicians for Lessee's clients) are allowed to be used or present on the Premises;

iv. Lessee's clients that relapse while residing at the Premises shall be physically escorted off of the Santa Fe University of Art & Design campus by Lessee and shall not be allowed to return for a minimum of thirty (30) days;

vi. Lessee shall deploy security cameras at the Premises over the front door of each apartment unit and in the interior courtyard between Buildings 6B-1 and 6B-2. Lessor reserves the right to require Lessee to employ licensed security guards at the Premises;

vii. Lessee shall staff the Premises twenty-four (24) hours per day and seven (7) days per week. Lessee's staff shall include a medical technician(s);

viii. Lessee shall place no signage of any kind on the exterior of the buildings or on the grounds without the prior written consent of Lessor;

ix. Lessee's residents and staff shall park in the existing parking lots immediately south of Building 6B-2, north of Building 6B-1 and east of Building 12.

x. Lessee shall restrict its client's visitors as follows: a) scheduled visits only during the client's first ninety (90) days of residency; and b) visitor check-in and check-out with Lessee's staff after the client's first ninety (90) days of residency;

B. Improvement of the Premises. Lessee may, with the prior written consent of Lessor and at no cost to Lessor, make minor improvements to the Premises as it deems necessary in furtherance of the intended use of the Premises as provided in Section 4.A above. Lessee shall upon Lessor's request, remove all such improvements made to the Premises at the termination of this Lease Agreement.

C. Trade Fixtures. All trade fixtures installed by Lessee after the Effective Date of this Lease Agreement shall remain the property of Lessee, who may remove the same upon termination of this Lease Agreement, provided that removal shall be done in such a manner as not to injure or damage the Premises.

In the event that Lessee fails to remove said trade fixtures after receipt of notice from Lessor to do so, Lessor may remove and dispose of the same as it sees fit and Lessee agrees to sell, assign, transfer and set over to Lessor all of Lessee's right, title and interest in and to said trade fixtures and any personal property not removed by Lessee. Lessee further agrees that should Lessor remove said trade fixtures pursuant to this paragraph, that Lessee shall pay Lessor upon demand the cost of such removal, plus the cost of transportation and disposal thereof.

D. Repairs and Maintenance. Lessee shall not cause or permit any waste, damage or injury to the Premises or to any improvements made to the Premises. Lessee shall, at its sole expense, keep and maintain the Premises in good and clean condition at all times and shall be responsible for the costs of any and all required repairs, replacements, and capital improvements that arise during the Term of this Lease Agreement. Repairs and replacements required to be made by the Lessee shall be made promptly as and when necessary and shall be at least equal in quality of materials and workmanship to that originally existing in the Premises. The lessee shall maintain the landscaping and plants between the building and the sidewalk along the entire perimeter of the building.

Lessor reserves the right to inspect the Premises at any time during the Term of this Lease Agreement to verify Lessee's compliance with this Section 4.D. In the event Lessee fails to maintain the Premises at a standard acceptable to the Lessor, as determined in Lessor's sole discretion, Lessor may terminate this Lease Agreement in accordance with Section 12 herein.

E. Compliance with Laws. Lessee's use of the Premises shall at all times be in compliance with the City of Santa Fe Municipal Code and other applicable local, state and federal regulations including but not limited to compliance with the City of Santa Fe Integrated Pest Management Policy (§10-7 SFCC 1987) (the Pest Management Policy).

5. RENT

A. Base Rent Lessee shall pay Twenty-Seven Thousand, Nine Hundred Eighty-Eight Dollars and No Cents (**$27,988.00**) as monthly "Rent". Rent is due on the Effective Date and thereafter due in full on the first day of each month during the Term without notice or demand and without deduction or offset for any cause whatsoever. Lessee shall make payments to the Lessor's cashier office, Room 114, 200 Lincoln Ave., Santa Fe, NM.

B. Base Rent Offsets. Lessee shall offset the first month's Rent due by deducting from the first month's Rent the cost of loss of use of the Premises as specified in **Exhibit B1** attached hereto. The Parties acknowledge that additional repairs may be required. The Parties agree to offset Rent by deducting the actual cost of repairs, provided that Lessor has reviewed and approved cost proposal(s) obtained by Lessee for said repairs or replacements prior to any work being performed. The rent may be offset only after the Lessor has approved the completed repairs, and a full invoice has been presented with a complete accounting, which includes original invoices and receipts for the work.

6. UTILITIES & SERVICES

Beginning on the Effective Date and until the termination of this Lease Agreement, the responsibility and costs for providing utilities and services to the Premises shall be the responsibility of the Parties as specified below:

A. Responsibility of Lessor. All natural gas, electricity, domestic water, and sanitary sewer service shall be provided to the Premises by Lessor.

B. Responsibility of Lessee. All telephone, cable or satellite television, wired or wireless internet, security alarm services, security video services, security monitoring services, solid waste collection services, cleaning, and repair services, including landscape maintenance, shall be coordinated and paid for by Lessee. Any utilities or services not specified herein shall be the responsibility of the Lessee.

7. TAXES

Lessee shall pay all taxes levied and assessed, if any, upon any personal property, fixtures and improvements belonging to Lessee and located upon the demised Premises, and all leasehold and possessory interest taxes levied or assessed by any proper taxing authority.

8. SUBLEASE, ASSIGNMENT OR TRANSFER

Lessee shall not sublet, assign or otherwise transfer this Lease Agreement, without the prior written consent of Lessor, which Lessor may withhold for any or no reason. Any such actions taken by Lessee shall result in the immediate termination of this Lease Agreement.

9. INSURANCE

Lessee shall at all times maintain and provide adequate insurance coverage which includes, without limitation, each of the following:

A. Casualty Insurance. Lessee shall carry and maintain in full force and effect during the term of this Lease Agreement casualty insurance ("extended coverage" and "additional extended coverage") as may be available for all improvements to the Premises in an amount sufficient to restore and replace existing structures and improvements if lost or damaged by any form of casualty. Lessee shall cause the City of Santa Fe to be named as an additional insured on such policy of insurance.

B. Liability Insurance. Lessee shall carry and maintain in full force and effect during the Term of this Lease Agreement, public liability insurance covering bodily injury and property damage, in a form and with an insurance company acceptable to Lessor, with limits of coverage not less than as stated in the New Mexico Tort Claims Act for each person injured and for each accident resulting in damage to property, against all claims and lawsuits arising from Lessee's use of the Premises. Lessee shall cause the City of Santa Fe to be named as an additional insured on such policy of insurance.

C. Workman's Compensation Insurance. Lessee shall carry and maintain in full force and effect during the Term of this Lease Agreement, workers' compensation insurance at statutory limits for its employees working at the Premises. Lessee shall cause the City of Santa Fe to be named as an additional insured on such policy of insurance.

D. Certificates of Insurance. Prior to the Effective Date of this Lease Agreement, and thereafter at any time during the Term of this Lease Agreement that Lessor requests, Lessee shall provide Lessor with certificates of insurance for each policy evidencing that the coverage required hereunder is current. Such policy shall provide that the coverage evidenced thereby shall not be terminated or modified for any reason without thirty (30) days prior written notice to the Lessor. A certificate or policy which states that failure to give such notice imposes no obligation on the part of the insurer shall be unacceptable to Lessor, and Lessee shall be responsible for removing such language from such certificate or policy.

10. INDEMNIFICATION

Lessee shall indemnify, hold harmless and defend Lessor from all losses, damages, claims or judgments, including payment of all attorney's fees and costs, on account of any suit, judgment, execution, claim, action or demand whatsoever arising from damages occurring on the Premises and Lessee's use of the Premises hereunder, including use of the Premises by Lessee's employees, agents, representatives, contractors, agents, guests, invitees or permitted assigns. Lessee shall

cause any and all agreements that Lessee enters into with any of the above parties to contain language indemnifying Lessor as provided in this Section.

11. EASEMENTS

Lessor reserves the exclusive right to grant access, utility or other easements on or through the Premises. Lessor shall notify Lessee in writing prior to Lessor's grant of any easement through the Premises.

12. TERMINATION

A. Lessor may terminate this Lease Agreement upon Lessee's failure to comply with any provisions contained herein. Prior to termination, Lessor shall hand deliver or mail notice to Lessee via certified or registered mail specifying:

i. the breach;

ii. the action required to cure the breach;

iii. a date, not less than fifteen (15) days from the date the notice is hand delivered or mailed to Lessee, by which such breach must be cured; and

iv. that failure to cure such breach on or before the date specified in the notice will result in termination of the Lease Agreement.

B. Lessee may terminate this Lease Agreement with written notice to Lessor at least thirty (30) days prior to the termination date.

C. Lessee acknowledges and understands that the premises are part of a process of planning and disposition of the midtown site, and as such all properties on the former Santa Fe University of Art and Design are subject to sale or lease as part of the City's program to redevelop the site. As such, at any time after January 15, 2021, the Lessor may terminate the lease agreement with written notice to the Lessee at least sixty (60) days prior to the termination date. Pursuant to such termination, Lessee is responsible for all cost and expenses associated with relocation.

13. NOTICE

Any required notice will be deemed delivered, given and received (i) when personally hand delivered, or (ii) five days after the same are deposited in the United States mail, postage prepaid, registered, addressed to the applicable party at the address indicated below for such party, or at such other address as may be designated by either party in a written notice to the other party:

To Lessor:	To Lessee:
City Manager	Sylvia Barela, Executive Director
City of Santa Fe	Santa Fe Recovery Center, Inc.
P. O. Box 909	4100 Lucia Lane
Santa Fe, NM 87504	Santa Fe, NM 87507

14. NO WAIVER

No waiver of a breach of any of the provisions contained in this Lease Agreement shall be construed to be a waiver of any succeeding breach of the same or any other provisions.

15. SEVERABILITY

In the event that one or more of the provisions contained in this Lease Agreement or any application thereof shall be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein and any other application thereof shall not in any way be affected or impaired thereby.

16. ENTIRE AGREEMENT

The foregoing constitutes the entire Lease Agreement between the Parties, represents their entire understanding, and defines all of their respective rights, title, and interests as well as all of their duties, responsibilities and obligations. Any and all prior lease agreements and understandings between the Parties related to the Premises, if any, are merged herein. This Lease Agreement shall not be modified or amended except by a written document signed by the Parties.

17. BINDING EFFECT

This Lease Agreement shall be binding upon and insure to the benefit of the Parties hereto and their respective successors and permitted assigns.

18. LITIGATION EXPENSE

In the event of litigation between the Parties, Lessee shall pay any necessary costs, including reasonable attorney's fees, expenses and other costs of collection or otherwise, which Lessor shall incur in enforcing this Lease Agreement or in recovering any and all damages caused to the Premises by Lessee, or Lessee's contractors, agents, employees or permitted assigns.

19. HEADINGS

The section headings contained in this Lease Agreement are for reference purposes only and shall not affect the meaning or interpretation of this Lease Agreement.

20. APPLICABLE LAW; VENUE

In any action, suit or legal dispute arising from this Lease Agreement, Lessee agrees that the laws of the State of New Mexico shall govern. The Parties agree that any action or suit arising from this Lease Agreement shall be commenced in a federal or state court of competent jurisdiction in New Mexico. Any action or suit commenced in the courts of the State of New Mexico shall be brought in the First Judicial District Court.

21. AMENDMENT

This Lease Agreement shall not be altered, changed or modified except by an amendment in writing executed by the Parties hereto.

[REMAINDER OF THIS PAGE LEFT BLANK INTENTIONALLY]

INTRODUCTION & PURPOSE

The City of Santa Fe is committed to equitable engagement processes and outcomes in the redevelopment of the Midtown site, while also recognizing a need to account for its investment, which includes about $2 million in debt service annually. The Plan for Midtown's development must balance the economic interests of the City with the public benefits it hoped to achieve by purchasing and developing the property.

GUIDANCE FROM THE COMMUNITY … MIDTOWN IS:

- Community Driven
- A Place for Youth & Families
- A Healthy Community
- Sustainable Development
- Supports Local Economic Development
- Provides Services to the Community
- A Place for Art and Culture

ACCESSIBLE, ALL-AGES, COMMUNITY ARTS & CULTURAL PROGRAMMING

CULTURAL HERITAGE & TRADITIONS, NEW MEDIA, & CREATIVE TECHNOLOGY

EDUCATION, TRAINING, LEADERSHIP DEVELOPMENT, & CAPACITY BUILDING

ALL ENA DELIVERABLES HAVE BEEN MET

Work Completed to Date Includes:

Site & Building Due Diligence

- Building and Site Inspections
- Mold, Lead, & Asbestos Inspections
- Conditions Assessments
- Code/ Regulatory Analysis
- Preliminary Building & Site Space Planning & Program
- LEED-ND Checklist
- Energy Analysis, Scope for Electrifying & Installing Photovoltaic Panels
- Finalized parcel lot lines
- Working with City Infrastructure Team

Operating & Governance

- Preliminary Operating Costs & 15 Yr Operating Proforma
- Sliding Scale Rents to Cover Op Costs & Debt Service Only
- National Precedent Studies
- Letter of Intent - all Tenant Partners
- Preliminary Governance Structure
- Tenant Partner Working Groups Established: Communications, Governance & Resourcing
- Community Development Plan

Development Costs & Schedule

- Preliminary Cost Estimates with Contingencies
- Phasing Plan
- Sources & Uses with Preliminary Financing Commitments
- Fundraising Feasibility Analysis & Strategy
- $8m pledged to date (33% of total development costs)
- Timeline for Phasing & Completion

SITE & BUILDING DUE DILIGENCE: KEY FINDINGS

Visual Arts Center

- Full Replacement of HVAC & Plumbing
- Significant Re-roofing & Stucco Repairs
- No Need to Sprinkler Building
- Some Mold Remediation

Barracks

- Roof and Structure in Good Condition
- Asbestos & Lead Remediation
- Full HVAC/ Plumbing/ Electrical Upgrade
- Requires Sprinklering
- Requires ADA Improvements

Typical openings. Fixed window(s) left, hollow metal door (right).

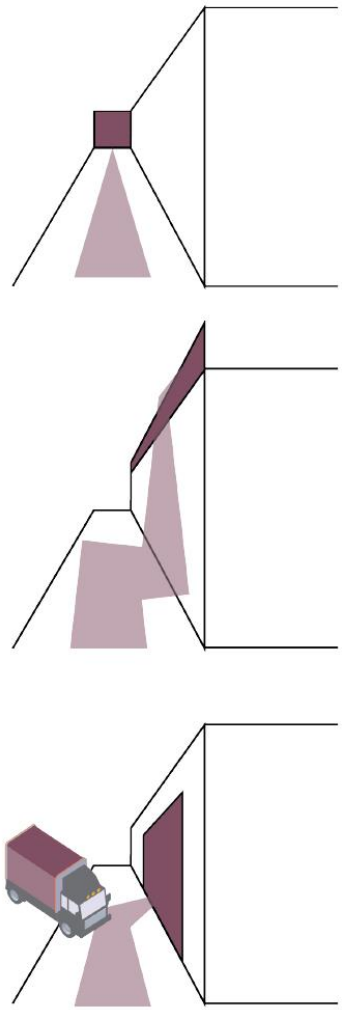
6	3,224	Meeting / Gathering
11	5,832	Professional Offices
16	8,672	Classroom / Training
19	9,850	Circulation / Back of House

66% LEASABLE SPACE

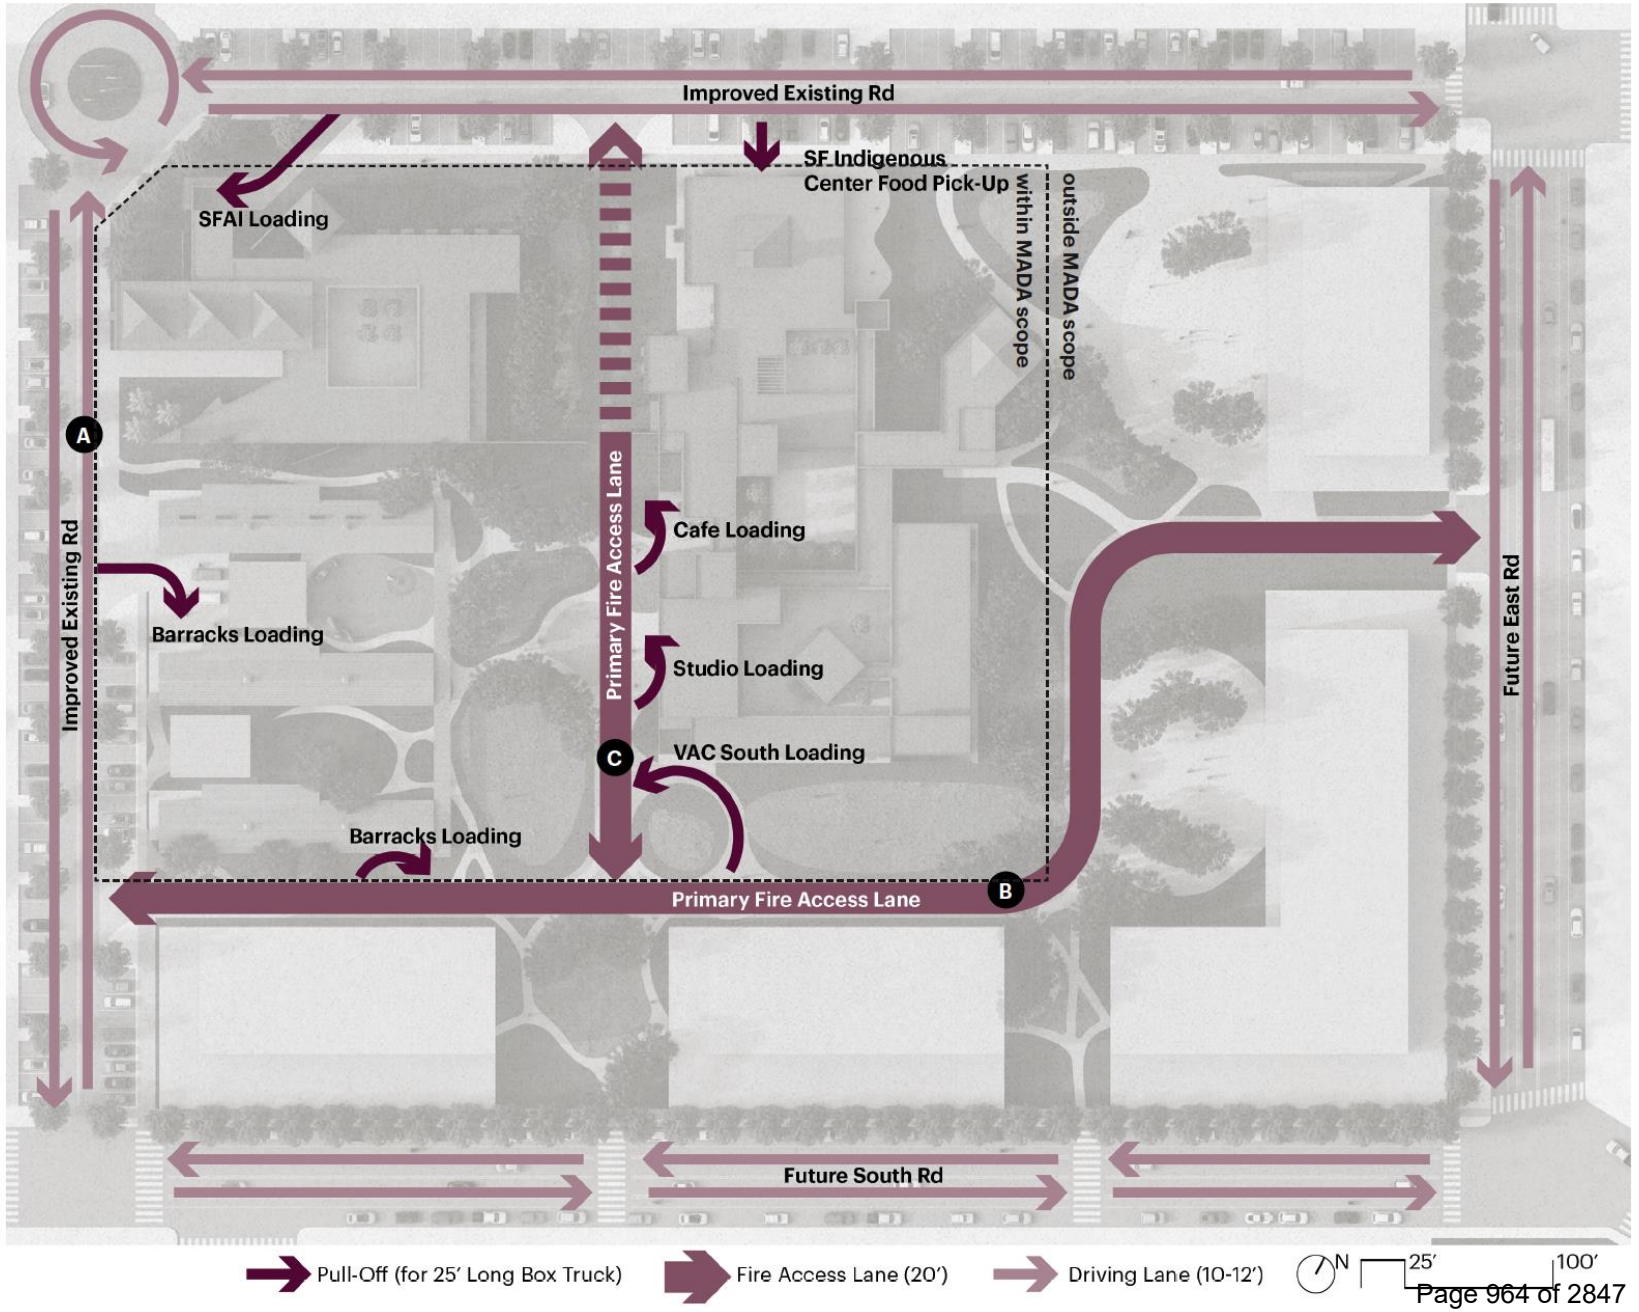
34,812 SF **Leasable**



9,850 SF **Unleasable**

7,919 SF **Shared**

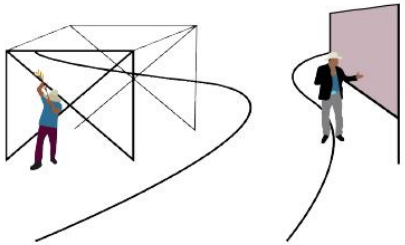
52,581 SF **Total**



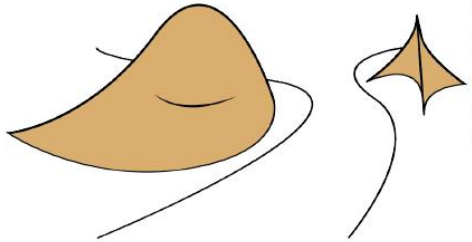
SITE CIRCULATION

A. New Streets and On-Street Parking
Once the City's reblocking plan is in place, the MADA block will be accessible by two new roads flanking the south and east sides. These roads will be two-way and will feature bike lanes and street parking. The design excludes surface parking within the block because the Midtown Masterplan deemphasizes surface parking and proposes a future parking structure to serve users.

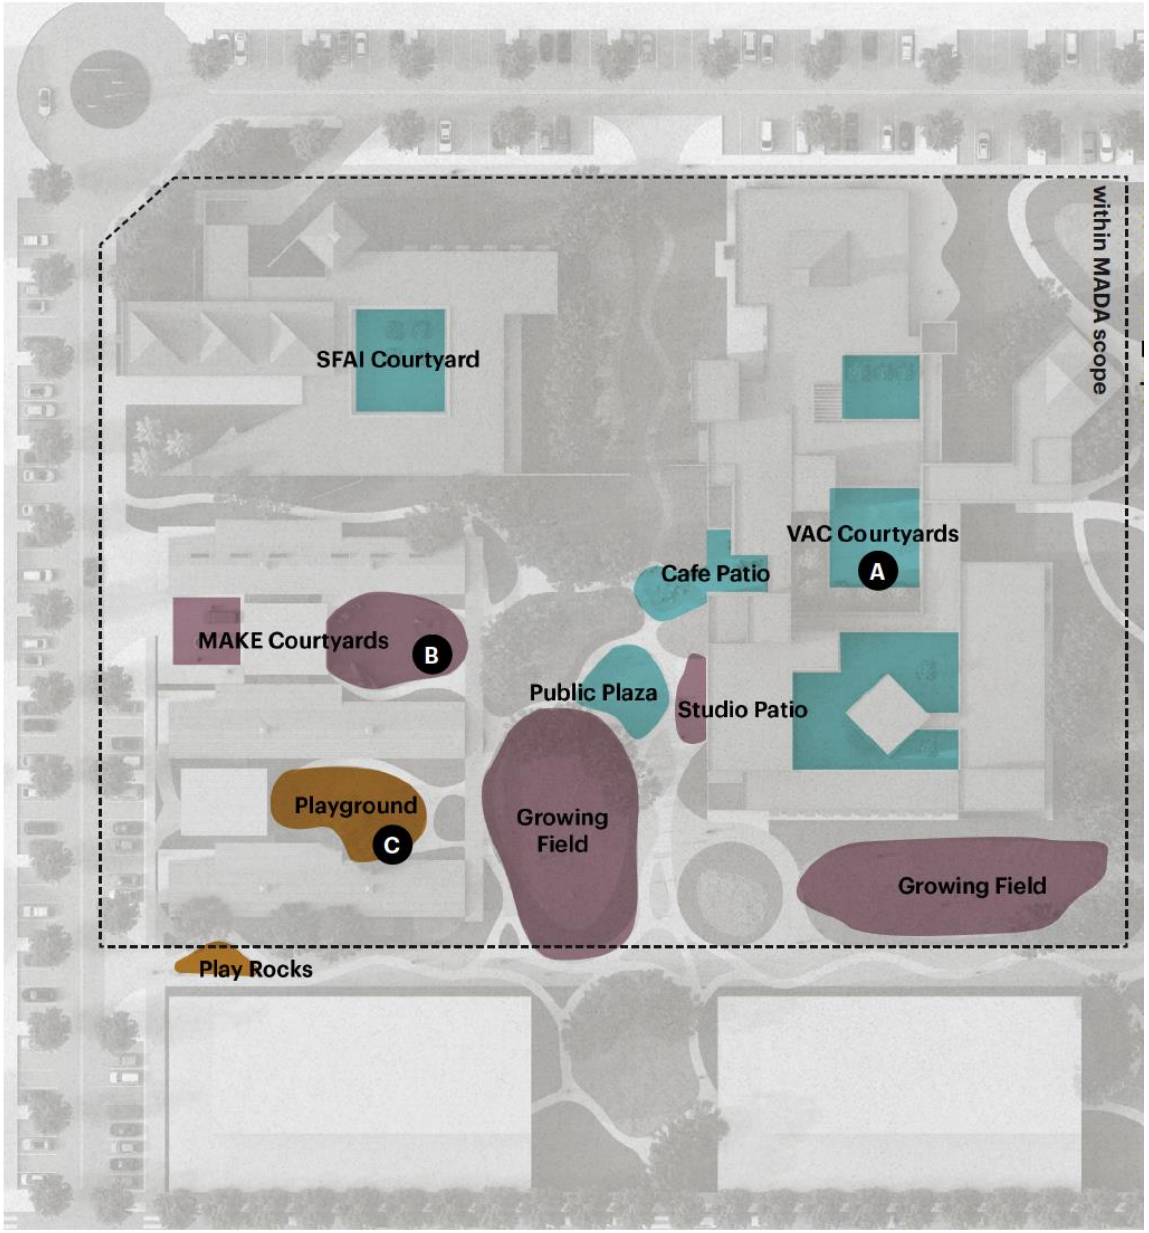
B. Emergency Access
Routes for emergency vehicles will increase the safety of all within the block, but also add to the circulation of the site. The N/S fire lane access is disguised as a secondary pedestrian pathway, but sits within an emergency-grade eco-paver lane with turf. The integration of the service-based areas and routes on site prioritizes the experience of the community members and users first.



C. Loading
Defined areas for loading and unloading on site and next to the key buildings will ensure ease of use for those who require it, from cafe deliveries to artists loading access.



OPEN SPACE



A. Gather
The openness of the block makes it clear that connection throughout the site is a priority to invite new relationships. Main pedestrian pathways organically connect the site to the main entrances of the buildings and to central plazas for events.

B. Work
Working courtyards adjacent to MAKE Santa Fe are paved and rated to allow for heavy vehicular and equipment loads. Fields for agricultural production rooted in permaculture principles are located in areas of high public visibility, access to sunlight, and adjacency to compatible programs.

C. Play
A playground is nestled safely between the southernmost Barracks, facing the inner portion of the MADA block to protect children from vehicular traffic.

ESTIMATED OPERATING COSTS BY PHASE AND TOTAL PROJECT

- Operating costs covered by below-market rate rental income
- Project renovations provide shell, move-in ready with “turnkey” leases
- Rents will be at a sliding scale determined by organization’s size and annual operating budget; demographics of constituent base, leadership and staff; and access to finance/ capital.
- Based on proposed 50-year Ground Lease with City at $1/ year

PHASE 1	
TOTAL OPERATING COSTS	
	TOTAL
Advertising & Promotion & Design	$ 15,000
Building Repair & Maintenance	$ 16,000
Operating Supplies and Expenses	$ 5,300
Insurance	$ 15,000

SUBTOTAL	**$ 307,200**
Contingency	$ 46,080
TOTAL	**$ 353,280**

COMMUNITY DEVELOPMENT PLAN SUMMARY

ECONOMIC BENEFITS

- Expanded access to entrepreneurship & professional development, internships
- Local UNM connection to higher ed, continuing education and certificate programs
- Skills training and education will focus on youth and adult development programs
- Create destination at Midtown, attract additional investment
- 50+ on-site jobs, 200+ temporary jobs annually

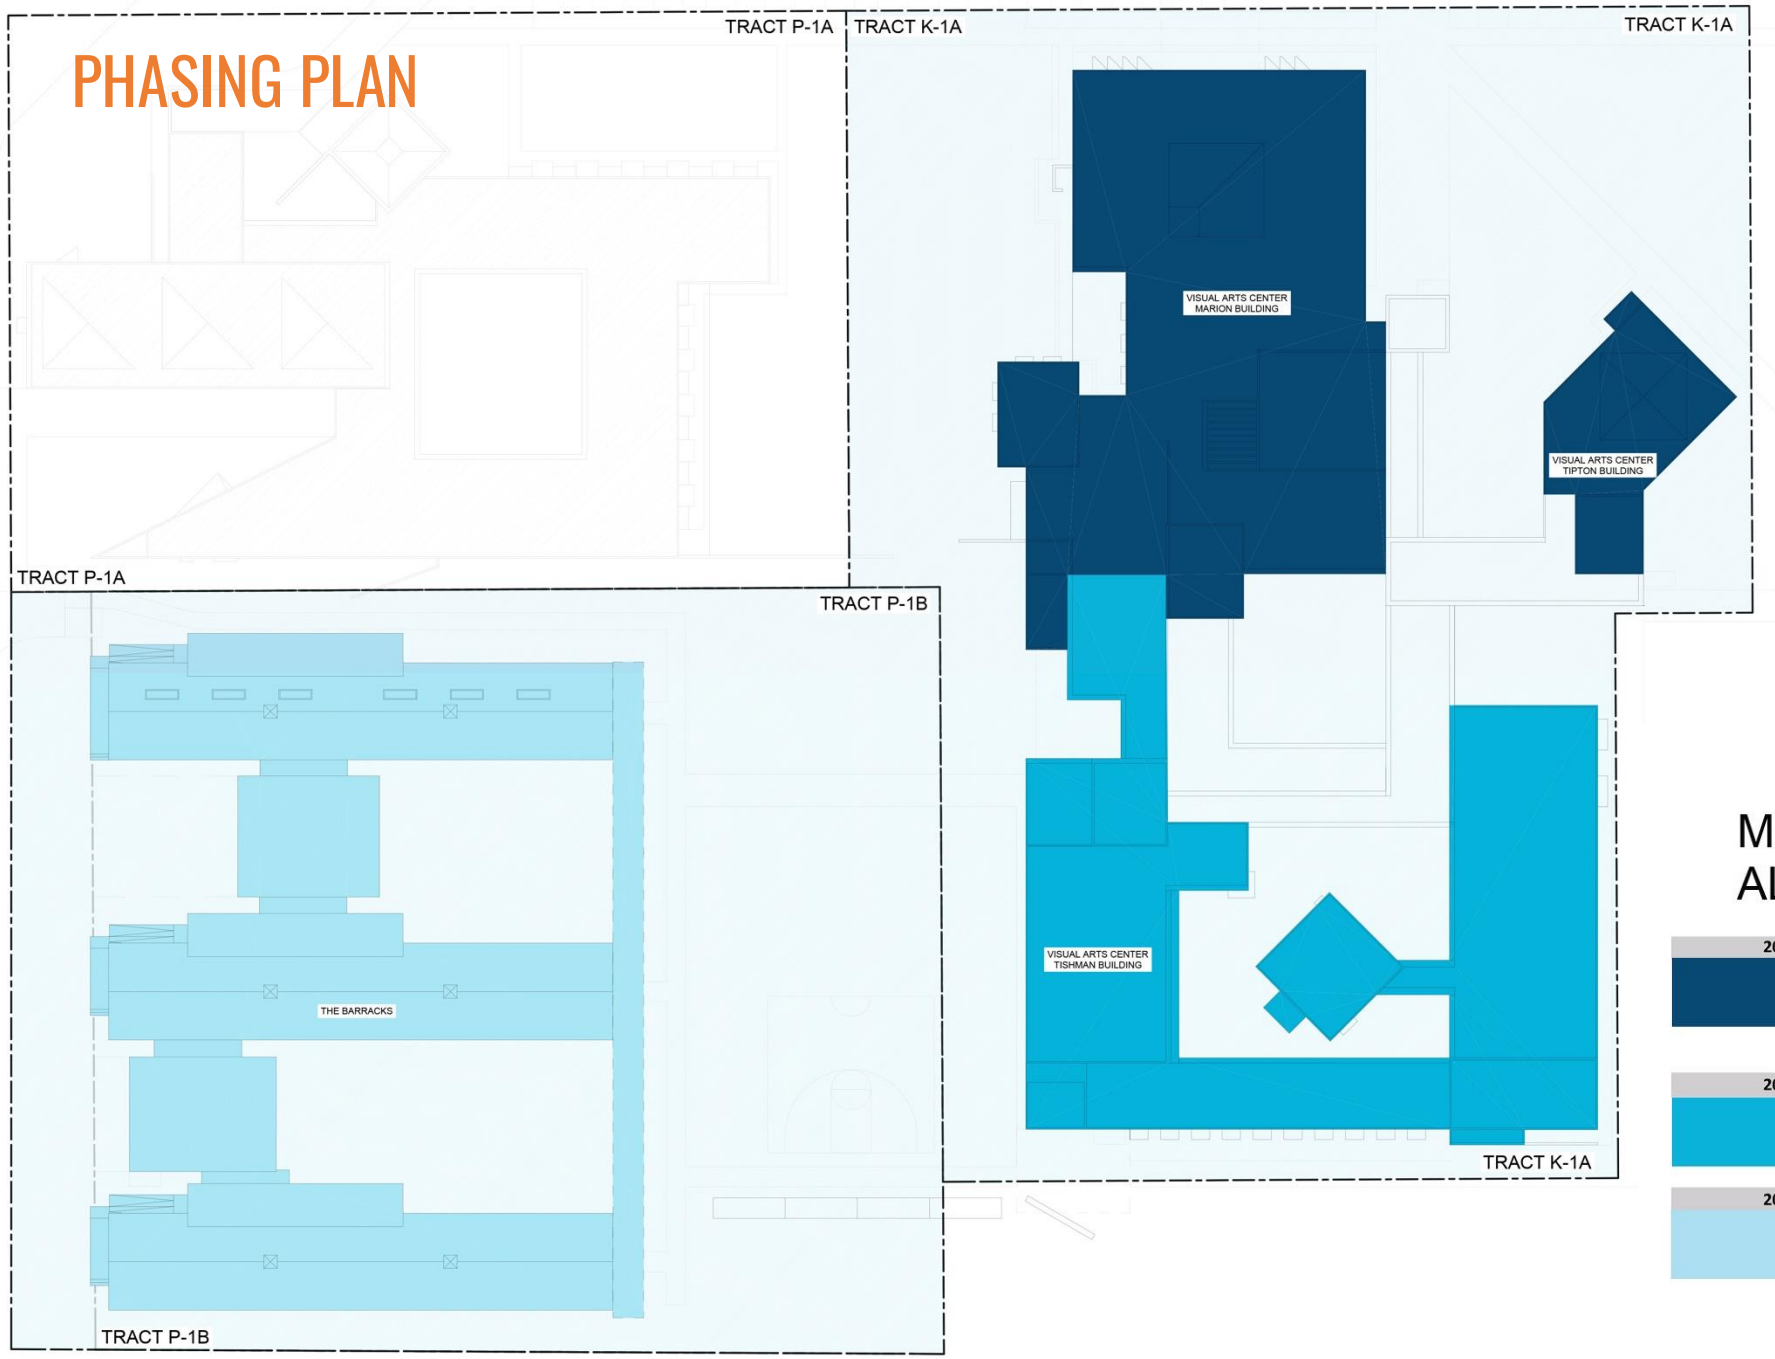
EQUITY BENEFITS

- Based on 2021 Midtown Engagement Partnership efforts
- Affordable arts & culture programming for local community
- Affordable/ sliding scale rental structure below market rate
- Capacity-building, resource sharing and collaborative programming builds non-profit sector and provides greater community impact
- 100% of jobs to local residents
- 450+ youth served, 50+ new internships
- 1800+ adults served through low-cost classes, trainings, certification programs

ENVIRONMENTAL BENEFITS

- Meet/ Exceed LEED-ND Requirements
- Fully electric, high-performance renovations
- Rooftop PV panels to provide 70-80% of energy
- Stormwater retention, habitat restoration, create outdoor gathering, making, and play zones
- Connected pathways and gathering spaces
- Retaining/ stewarding significant, iconic buildings
- Food production & distribution on site

CULTURAL BENEFITS



- Creates a vibrant multi-cultural center unlike anything in Santa Fe, with 10k+ participants annually
- Elevates the work of local award-winning organizations
- Multi-generational programming
- Does not silo the arts but includes with culinary, ecological, health, and social services
- Supports makers, emerging artists, art in new genres, emerging creative entrepreneurs, and the curious layperson of all ages

PRELIMINARY ESTIMATE OF CONSTRUCTION COSTS: TOTAL & BY PHASE

PROJECTED HARD COSTS	Year	Rate	Phase 1	Phase 2	Phase 3	TOTAL PROJECT COSTS	PER SF HARD COSTS
Current Year Construction Costs	2024		$3,886,765	$3,997,270	$6,628,628	$14,512,663	
Owner's Construction Contingency		10%	$388,676	$399,727	$662,863	$1,451,266	
Total Estimated Construction Cost			**$4,275,441**	**$4,396,997**	**$7,291,491**	**$15,963,929**	
Escalation Projections							
Year 1	2025	8%	$4,617,476	$4,748,757	$7,874,810		
Year 2	2026	6%	**$4,894,525**	$5,033,682	$8,347,299	**$4,894,525**	**$241**
Year 3	2027	5%	$5,139,251	**$5,285,366**	$8,764,664	**$5,285,366**	**$272**
Year 4	2028	4%	$5,344,821	$5,496,781	**$9,115,250**	**$9,115,250**	**$465**
Year 5	2029	3%	$5,505,166	$5,661,684	$9,388,708		
				TOTAL HARD COSTS		**$19,295,142**	

- Costs are based on preliminary scope of work only
- Renovation costs range between $240-$460/ square foot, still below new construction
- Estimates are conservative, with multiple contingencies
