Findings of Fact and Conclusions of Law

Case #2024-7898
Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment ("General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tracts 21 and 26, comprising approximately 8.18 acres and Tracts 23 and 24, comprising 13.45 acres from Commercial Office to Community Commercial ("Project"). The property is located at the southeast quadrant of the Las Soleras / Beckner Road roundabout ("Property") and is zoned C-1 (General Office).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7898.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. The Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan Amendment.
10. The Planning Commission heard Case #2024-7898 concurrently with Cases #2024-7899, 2024-7900, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tracts 21, 23, 24 and 26.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for General Plan amendments, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing.
16. The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment the proposal is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
18. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    The General Plan Amendment affects an area greater than two acres. Tracts 21 and 26 encompass 8.18 acres, and Tracts 23 and 24 encompass 13.45 acres (+/-21.63 total acres), both of which exceed the minimum size requirement for land use amendments.
19. General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
20. With the necessary infrastructure improvements as required by the conditions of approval, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
21. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
22. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
23. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the

Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing. All applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the General Plan Amendment is consistent with growth projections for Santa Fe, and that the project The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
7. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
8. The General Plan Amendment complies with SFCC 1987 Section 14-3.2(E)(1)(c), because it:
    a. does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby;
    b. affects an area greater than two acres. Tracts 21 and 26 encompass 8.18 acres, and Tracts 23 and 24 encompass 13.45 acres (+/-21.63 total acres), both of which exceed the minimum size requirement for land use amendments; and
    c. does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
9. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
13. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.
14. The Commission recommends approval of the requested General Plan amendment because the

applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-7898 to the Governing Body, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report.

Case #2024-8852
Las Soleras Master Plan Tract 19 General Plan Amendment
Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment (the "General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tract 19, comprising approximately 9.11 acres from Transitional Mixed Use to Community Commercial ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned MU (Mixed Use).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8852.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023,virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan Amendment.
10. The Planning Commission heard Case #2024-8852 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8853, 2024-8854 and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tract 19.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for general plan approval, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. Based on the Staff Report and exhibits and the testimony and evidence presented at the hearing, the Planning Commission finds that all applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
16. The General Plan Amendment is consistent with growth projections for Santa Fe, and the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.).
    i. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    ii. The General Plan Amendment affects an area greater than two acres. Tract 19 encompass 9.11 acres, and which exceeds the minimum size requirement for land use amendments.
    iii. The General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
18. With the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
19. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
20. The General Plan Amendment does not conflict with any existing City policies, or ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
21. The additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
5. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(c), the Commission finds that:
    iv. The amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    v. The amendment affects an area greater than two acres. Tract 19 encompass 9.11 acres, and which exceeds the minimum size requirement for land use amendments.
    vi. The amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
7. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the Commission finds that with the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
8. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
9. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the Commission finds that the proposed amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(g), the Commission finds that the proposed amendment does not conflict with any existing City policies, or ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan
12. The Applicant met the applicable Submittal Requirements.
13. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING

COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-8852 to the Governing Body, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report.

Findings of Fact and Conclusions of Law

Case #2024-8854
Las Soleras Master Plan Tract 20 General Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment ("General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tract 20, comprising approximately 10.7 acres from Commercial Business Use to Community Commercial ("Project"). The property is located south of the Rail Runner Loop ("Property") and is zoned BIP (Business Industrial Park).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8854.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. The Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.
9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan

Amendment.

10. The Planning Commission heard Case #2024-8854 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8852, 2024-8853, and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tract 20.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for General Plan amendments, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing.
16. The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
18. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
19. The General Plan Amendment affects an area greater than two acres. Tract 20 (+/-10.70 acres), exceeds the minimum size requirement for land use amendments.
20. General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
21. With the necessary infrastructure improvements as required by the conditions of approval, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
22. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
23. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
24. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing. All applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the General Plan Amendment is consistent with growth projections for Santa Fe, and that the project The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
7. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
8. The General Plan Amendment complies with SFCC 1987 Section 14-3.2(E)(1)(c), because it:
    a. does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby;
    b. affects an area greater than two acres. Tract 20 encompass 10.70 which exceed the minimum size requirement for land use amendments; and
    c. does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
9. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
13. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.
14. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-8854 to the Governing Body.

Findings of Fact and Conclusions of Law

Case #2024-7899
Las Soleras Master Plan Amendment Master Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a master plan amendment ("Master Plan Amendment") to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Project).

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission hereby FINDS and CONCLUDES as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987, Section 14-3.9(C) sets out procedures for the creation of a Master Plan and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7899.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. "SFCC") 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.9(C) sets out procedures for master plan approval and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body,

together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.

8. Staff recommended that the Commission recommend approval of the Las Soleras Master Plan Amendment, subject to conditions and technical corrections identified in the Staff Report.
9. The Planning Commission heard Case #2024-7899 concurrently with Cases #2024-7898, 2024-7900, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
10. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Master Plan Amendment.
11. Pursuant to SFCC 1987 Sections 14-3.9(C)(4), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
12. SFCC 1987 Section 14-3.9(D)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
13. The Master Plan Amendment consistent with the City of Santa Fe growth projections and economic development goals.
14. . The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
15. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.), maintaining a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan. The amendment to C-2 zoning provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining and more. The Master Plan amendment will facilitate future development that is expected to trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System, further enhancing the area's coordinated development.
16. The amendment aligns with the predominant zoning patterns in the area, which primarily are uses (multifamily and nonresidential) allowed within a C-2 District. The variety of C-2 uses, ranging from residential to light industrial, adheres to the Las Soleras Master Plan's original intent to foster a mix of uses, despite the proposed elimination of both Mixed Use and Business Industrial Park Districts, while also responding to current market demands. The master plan continues to maintain a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan.
17. This Master Plan amendment will significantly enhance the site’s ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System.
18. The net impact of the Master Plan Amendment on the utility system infrastructure is minimal and the existing infrastructure, water, wastewater, and parks are adequate to accommodate the Master Plan Amendment. Inadequacies in roads and fire service capacity can be adequately addressed as conditions of approval during the development of this project such that health and safety goals are met.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the Master plan Amendment.
3. Pursuant to SFCC 1987, 14-3.9(C)(4) the Planning Commission has the authority to review and recommend approve of a Master Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community.
6. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.).
7. Pursuant to 14-3.9(D)(1)(b), the Master Plan Amendment is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts.
8. Pursuant to 14-3.9(D)(1)(c)), the Master Plan Amendment will contribute to the coordinated and efficient development of the community.
9. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(d), the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:
Considering the foregoing findings and conclusions, the Planning Commission approves the Master Plan, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report for Case #2024-7899.

Case #2024-7900
Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tracts 21 and 26, comprising approximately 8.18 acres and Tracts 23 and 24, comprising 13.45 acres from General Office (C-1) to General Commercial (C-2) ("Project"). The property is located at the southeast quadrant of the Las Soleras / Beckner Road roundabout ("Property") and is zoned C-1.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7900.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).

9. Staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.
10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from C-1 to C-2.
11. The Planning Commission heard Case #2024-7900 concurrently with Cases #2024-7899, 2024-7898, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tracts 21, 23, 24, and 26 Rezoning from C-1 to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from C-1 (General Office Use) to C-2 (General Commercial) for Tracts 21, 23, 24, and 26.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe;

and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tracts 21 and 26 (8.18 acres) and Tracts 23 and 24 (13.45 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 21.63 acres across Tracts 21, 23, 24, and 26.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tracts 21, 23, 24, and 26. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from C-1 (General Office Use) to C-2 (General Commercial) for Tracts 21, 23, 24, and 26.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tracts 21 and 26 (8.18 acres) and Tracts 23 and 24 (13.45 acres), which meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or

general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from C-1 to C-2, as requested in the Application for Case #2024-7900.

Case #2024-8853
Las Soleras Master Plan Tract 19 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024, (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tract 19, comprising approximately 9.11 acres from Mixed Use (MU) to General Commercial (C-2) ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned MU.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8853.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).
9. Staff reviewed the Application and related materials submitted by the Applicant for conformity

with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from MU to C-2.
11. The Planning Commission heard Case #2024-8853 concurrently with Cases #2024-7900, 2024-7898 2024-7899, 2024-7900, 2024-8852, 2024-8855, 2024-8854, and 2024-8855.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tract 19 Rezoning from MU to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from MU (Mixed Use) to C-2 (General Commercial) for Tract 19.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tract19 (9.11 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 9.11 acres for Tract 19.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tract 19. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from MU (Mixed Use) to C-2 (General Commercial) for Tract 19.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tract 19 (9.11 acres) meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from MU to C-2, as requested in the Application for Case #2024-8853.

Planning Commission
Findings of Fact and Conclusions of Law

Case #2024-8855
Las Soleras Master Plan Tract 20 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024, (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tract 20, comprising approximately 10.70 acres from Business Industrial Park (BIP) to General Commercial (C-2) ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned BIP.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8855.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).
9. Staff reviewed the Application and related materials submitted by the Applicant for conformity

with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from BIP to C-2.
11. The Planning Commission heard Case #2024-8855 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8852, 2024-8853, and 2024-8854.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tract 20 Rezoning from BIP to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from BIP (Business Industrial Park) to C-2 (General Commercial) for Tract 20.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tract 20 (10.70 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 10.70 acres for Tract 20.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tract 20. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from BIP (Business Industrial Park) to C-2 (General Commercial) for Tract 20.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tract 19 (9.11 acres) meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from BIP to C-2, as requested in the Application for Case #2024-8855.

6. OLD BUSINESS

G. NEW BUSINESS

1. **Case #2024-7899. Las Soleras Master Plan Amendment.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Owner, requests a Master Plan Amendment to the Las Soleras Master Plan to change the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial). Additionally, they seek to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet. The property is located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout, and on the south side of Beckner Rd, encompassing

Parcels 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

2. **Case # 2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a General Plan Amendment is requested to change the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

3. **Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a rezoning to change the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a rezoning is requested to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

4. **Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial. The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the informational as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

5. **Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

   MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

   VOTE: The motion was approved on the following Roll Call vote:

   For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

   Against: Member Reiland

   Abstain: None

6. **Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial. The property, known as Tract 20 of the Las Soleras Master Plan, and is located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

7. **Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) Use to C-2 (General Commercial). The property, known as Tract 20 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

8. **Case #2024-8523. 235 West San Francisco Street, Variance.** Sommer Karnes & Associates LLP, Agent for G.E. Senlic, LLC., owners and applicant requests a variance to SFCC 1987, Section 14.8-6(C)(2)b to allow off-site parking more than 600 feet from the property within the Business Commercial District. The property

is zoned Business Commercial District, within the Lensic Subdistrict, with an approved 70 room hotel (Case #2019-1535) on .99-acre property. (Carly Venditti, Case Manager, cavenditti@santafenm.gov)

Postponed to October 3, 2024

9. **Case #2024-8342. 4851 Hart Road Development Plan.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a development plan to establish development standards for 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

10. **Case #2024-8343. 4851 Hart Road Terrain Management Variance.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a variance to the Terrain Management standards located in SFCC Ch. 14-8.2(D)(2)(b) to disturb natural slopes of thirty-percent or greater to develop 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to deny the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

CITY OF SANTA FE, NEW MEXICO

RESOLUTION NO. 2025-

A RESOLUTION

AMENDING THE GENERAL PLAN'S FUTURE LAND USE MAP DESIGNATION FROM COMMERCIAL BUSINESS USE TO COMMUNITY COMMERCIAL FOR LAS SOLERAS TRACT 20, FOR AN APPROXIMATELY 10.70 ACRE PROPERTY, OWNED BY BECKNER ROAD PARTNERSHIP, LLC (CASE NO. 2024-8854).

WHEREAS, on February 9, 2009, the Governing Body of the City of Santa Fe ("City") adopted the Las Soleras Master Plan ("Master Plan"), a comprehensive plan for Las Soleras; and

WHEREAS, on March 11, 2009, the Governing Body adopted the Ordinance 2009-06, annexing an approximately 546-acre property known as the Las Soleras; and

WHEREAS, the City's General Plan states that its guiding policies for economic development are to accomplish the following:

1) Promote diversification of the Santa Fe economy;

2) Promote increased job opportunities with higher wages for Santa Fe residents;

3) Support retail uses that serve the needs of Santa Fe residents and workers;

4) Develop and maintain an attractive climate for conducting business in Santa Fe; and

5) Promote small businesses; and

WHEREAS, Orion West, LLC, agent for Beckner Road Partnership, LLC ("Applicant"), applied to amend the General Plan Future Land Use Map for approximately 10.70 acres of land known as Tract 20, identified in Attachment A (the "Property"), from Commercial Business Use to Community Commercial ("Proposed Amendment"); and

WHEREAS, amending the General Plan requires an early neighborhood notification ("ENN") and the Applicant held an ENN on November 14, 2023; and

WHEREAS, Santa Fe City Code Section 14-3.2 (E) requires that the Governing Body make the following finding for an amendment to the general plan:

a) The amendment is consistent with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;

b) The amendment is consistent with other parts of the general plan;

c) The amendment does not:

(i) Allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area;

(ii) Affect an area of less than two acres, except when adjusting boundaries between districts; or

(iii) Benefit one or a few landowners at the expense of the surrounding landowners or the general public; and

WHEREAS, an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes general welfare or has other adequate public advantage or justification; and

WHEREAS, the amendment complies with extraterritorial zoning ordinances and extraterritorial plans; and

WHEREAS, the amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe that, in accordance with existing and future needs best promotes

health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development; and

WHEREAS, additionally, the amendment conforms with other City policies, including land use policies, ordinances, regulations and plans; and

WHEREAS, the Applicant's Proposed Amendment aligns with several City policies as articulated in the 1999 General Plan, including, but not limited to, commercial and community serving land uses articulated in Policy 3-G-2, Policy 4-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4; and

WHEREAS, pursuant to SFCC 1987, Section 14-3.2 (B)(2)(b), the Governing Body must amend the General Plan before approving a change to a zoning district designation that is inconsistent with the land use classification shown on the General Plan's future land use map; and

WHEREAS, pursuant to NMSA 1978, Section 3-19-9 (A), and SFCC 1987, Section 14-3.2(E)(1)(f), the City may amend its General Plan with the general purpose of guiding and accomplishing a coordinated, adjusted, and harmonious development of the City which will, in accordance with existing and future needs, best promote health, safety, morals, order, convenience, prosperity or the general welfare as well as efficiency and economy in the process of development; and

WHEREAS, the Planning Commission reviewed evidence related to the Proposed Amendment, held a public hearing on the Proposed Amendment on September 5, 2024, and recommended the Governing Body approve the Proposed Amendment; and

WHEREAS, on January 9, 2025, the Governing Body held a public hearing on the Proposed Amendment, having reviewed the staff report, the recommendation of the Planning Commission, and the evidence obtained at the public hearing, and having determined that the proposed amendment to the General Plan, as recommended by the Planning Commission, meets the approval criteria set forth in Section 14-3.2(E) of SFCC 1987 as follows:

- the Proposed Amendment's Community Commercial designation aligns with existing and

planned commercial developments nearby;

- Tract 20 encompasses approximately 10.70 acres, which exceeds two acres;
- the Proposed Amendment does not benefit one or a few landowners and the expense of surrounding landowners or the general public by providing commercial services that benefit the community and provide economic development, supporting community needs;
- the existing and proposed infrastructure will be able to accommodate the impacts the development;
- the Proposed Amendment contributes to the coordinated, adjusted and harmonious development of Santa Fe; and
- the Proposed Amendment does not conflict with any existing City policies, ordinances, or regulations and is in line with the General Plan's goals to balance growth with community serving commercial developments.

NOW, FURTHER, BE IT RESOLVED THAT the General Plan's Future Land Use Map is amended to change the designation of the Property from Commercial Business Use to Community Commercial.

PASSED, APPROVED, and ADOPTED this ___ day of ____ 2025.

1. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-7898. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use Map designation for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres, from Commercial Office Use to Community Commercial.

2. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8852. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from Transitional Mixed Use to Community Commercial.

3. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8854. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop from Commercial Business Use to Community Commercial.

4. CONSIDERATION OF A RESOLUTION

Master Plan Amendment. Case #2024-7899. Orion-West LLC, Agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the Las Soleras Master Plan land use designations on Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to a uniform classification of C-2 (General Commercial), and to reduce the width of the Utility and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet on the south side of Beckner Road.

5. CONSIDERATION OF BILL NO. 2025-1
   Rezoning. Case #2024-7900. Orion-West LLC, Agent for Applicant, Beckner Road Partnership, asks the Governing Body to adopt Bill 2025-01 to rezone Las Soleras Tracts 21 and 26, +/- 8.18 acres, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) to C-2 (General Commercial).

6. CONSIDERATION OF BILL NO. 2025-2
   Rezoning. Case #2024-8853. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, ask the Governing Body to adopt Bill 2025-2 to rezone Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from MU (Mixed Use) to C-2 (General Commercial).

7. CONSIDERATION OF BILL NO. 2025-3
   Rezoning. Case #2024-8855. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt Bill 2025-3 to rezone Las Soleras Tract 20, +/-10.70 acres located southwest of the Walking Rain Road / Beckner Road roundabout, from BIP (Business Industrial Park) to C-2 (General Commercial).

I. Planning Commission Recommendations:

On September 5, 2024, the Planning Commission ("Commission") recommended the Governing Body take the following actions:

1. **APPROVE** Case #2024-7899. Las Soleras Master Plan Amendment, changing land use designations for Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet, subject to the Master Plan conditions listed in Section III, Table 1 "Master Plan Conditions" and Master Plan Technical Corrections listed in attachment "A".
2. **APPROVE** Case #2024-7898. General Plan Amendment for Las Soleras Tracts 21, 23, 24, and 26 from Commercial Office Use to Community Commercial.
3. **APPROVE** Case #2024-7900. Rezoning for Las Soleras Tracts 21, 23, 24 and 26 from C-1 (General Office) to C-2 (General Commercial).
4. **APPROVE** Case #2024-8852**.** General Plan Amendment for Las Soleras Tract 19, from Transitional Mixed Use to Community Commercial.

5. **APPROVE** Case #2024-8853. Rezoning for Las Soleras Tract 19, from MU (Mixed Use) to C-2 (General Commercial).
6. **APPROVE** Case #2024-8854. General Plan Amendment for Las Soleras Tract 20, from Commercial Business Use to Community Commercial.
7. **APPROVE** Case #2024-8855. Rezoning for Las Soleras Tract 20, from BIP (Business Industrial Park) to C-2 (General Commercial).

II. Sample Motions:

Seven (7) motions will be required. Land Use recommends the motions in the following order:

1. **Move to approve or deny** Case #2024-7898, adopting a resolution amending the General Plan Future Land Use Map designation from Commercial Office Use to Community Commercial, for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres.

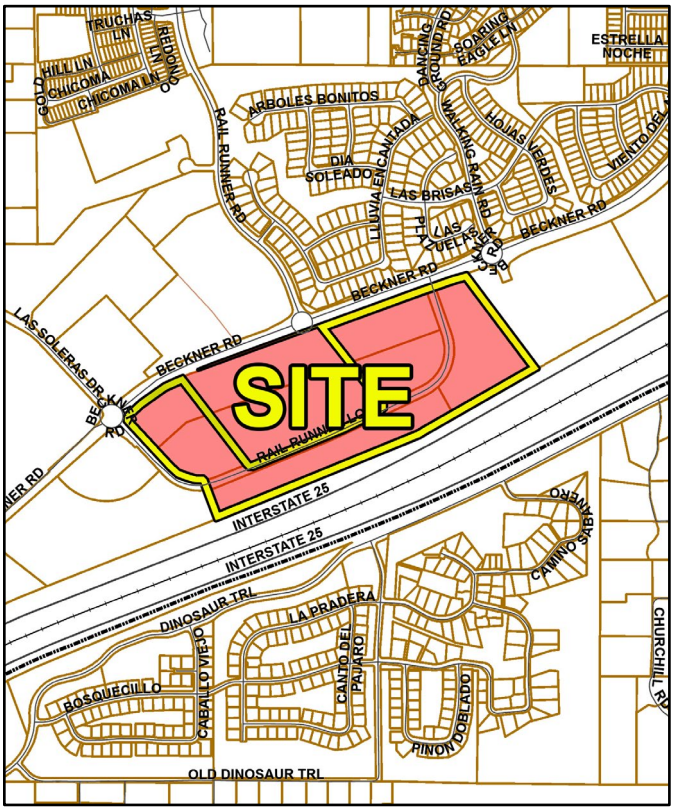
2. **Move to approve or deny** Case #2024-8852**,** adopting a resolution amending the General Plan Future Land Use designation from Transitional Mixed Use to Community Commercial, for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

3. **Move to approve or deny** Case #2024-8854, adopting a resolution amending the General Plan Future Land Use designation from Commercial Business Use to Community Commercial, for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop.

4. **Move to approve or deny** Case #2024-7899, adopting a resolution amending the Las Soleras Master Plan land use designations for Tracts 19, 20, 21, 23, 24 and 26 from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) to from 90 feet to 45 feet, subject to conditions of approval and technical corrections.

5. **Move to approve or deny** Case #2024-7900, adopting Bill 2025-01, changing the official Zoning Map designation from C-1 (General Office) to C-2 (General Commercial) for Las Soleras Tracts 21 and 26, +/- 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout.

6. **Move to approve or deny** Case #2024-8853, adopting Bill 2025-02 changing the official Zoning Map designation from MU (Mixed Use) to C-2 (General Commercial), for Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road/ Beckner Road roundabout.



7. **Move to approve or deny** Case #2024-8855. adopting Bill 2025-03 changing the official Zoning Map designation from BIP (Business Industrial Park) to C-2 (General Commercial) Las Soleras Tract 20, +/-10.70 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

III. Executive Summary

Beckner Road Partnership, LLC, Owner, (the "Applicant"), through its agent, Orion-West LLC, requests a master plan amendment ("Master Plan Amendment"), three (3) general plan amendments ("GP Amendments"), and three (3) Rezonings ("Rezonings") for Tracts 19, 20, 21, 23, 24, and 26 ("Tracts") within the Las Soleras Master Plan area (Master Plan) (see Figure 1) (together, the "Project"). The Applicant's goal is to amend the land use designations and zoning on the six (6) tracts from their current zoning designations of General Office (C-1), Mixed Use (MU) and Business Industrial Park (BIP) to Community Commercial (C-2). The Rezonings must be consistent with the Master Plan and General Plan.

On February 11, 2009, the Governing Body approved the Master Plan when it annexed the area, encompassing +/- 539 acres with a mix of uses including low, medium, and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The Master Plan included a walkable neighborhood supported by an anticipated Rail Runner transit stop, which has since been postponed indefinitely by the state. The mix of uses was intended to encourage a citywide balance of residential and nonresidential uses and to set those uses among extensive open spaces, parks and trail networks.

Since approval in 2009, the Governing Body amended the Master Plan four (4) times:

1. September 9, 2015, which realigned roads, reconfigured open space and trails, reduced park land and reconfigured certain tracts of land.
2. September 24, 2016, which established alternative height and setback standards for the R-6 and R-12 residentially zoned districts for Estancias de Las Soleras and Ross's Peak developments.
3. September 12, 2018, which changed the land use designation from "Transitional Mixed Use" to "High Density Residential" to reflect contemporaneous zoning and General Plan amendments, reduced a 90-foot utility, access, and trail corridor to 45 feet (La Rambla) on the north side of Beckner Road, and amended a condition related to dust control.
4. May 31, 2023, which increased the density from six units per acre to ten units per acre for land located at 4601 Rail Runner Road (pending recordation).

The proposed three (3) GP Amendments, Master Plan Amendment, and three (3) Rezonings, (together, the "Project") will allow the Applicant to develop Las Soleras Tracts 19, 20, 21, 23, 24, and 26 under the Community Commercial (C-2) zoning district. The Tracts

are currently zoned C-1 (General Office), MU (mixed use), and BIP (Business Industrial Park) (see Figure 2). A uniform C-2 designation for the project area will allow amenities such as neighborhood grocery stores to exist side-by side with residences. (Grocery stores and residences could not exist side-by-side in the existing BIP and C-1 districts.) In addition, the rezoning will remove restrictions on ratios for housing versus commercial development (as currently required in the Mixed Use districts). Staff anticipates that these changes will result in more cohesive and pedestrian friendly mixed use development.

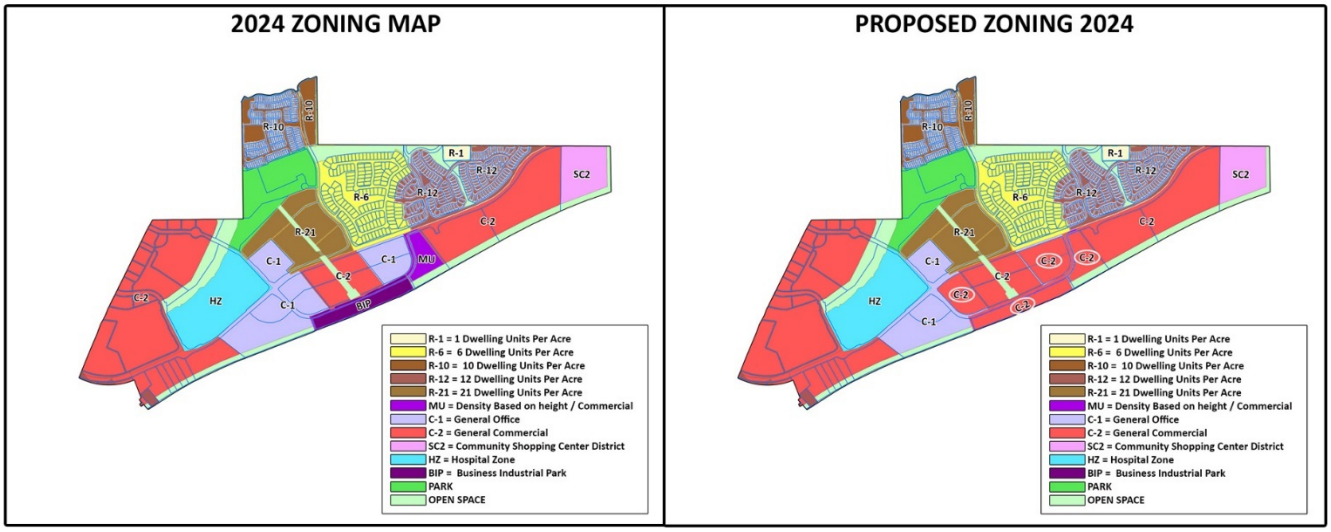


Figure 1 Existing (left) and Proposed Zoning (right)

The Applicant conducted a pre-application conference on September 28, 2023, and an Early Neighborhood Notification (ENN) meeting on November 14, 2023. On September 5, 2024, the Commission held a public hearing to review Case #2024-7899, Case #2024-7898, Case #2024-7900, Case #2024-8852, Case #2024-8853, Case #2024-8854, and Case #2024-8855 during which the Commission heard reports from City Planning and Land Use Department staff ("Staff"), testimony and evidence from the Applicant, and public comments by interested members of the public. The Commission found that the Master Plan Amendment, three (3) GP Amendments and three (3) Rezonings were consistent with the General Plan and that all approval criteria had been met.

The Commission voted to recommend that the Governing Body *approve* the Project on September 5th, 2024, subject to a condition of approval for the Master Plan Amendment. On October 3, 2024, the Commission adopted Findings of Fact and Conclusions of Law, (Attachment B, "Planning Commission Approved Findings of Fact and Conclusions of Law") and Commission Minutes (Attachment C, "Planning Commission Minutes"), reflecting its holdings from the public hearing.

IV. General Plan Amendment Approval Criteria

Table 2 analyzes all three (3) proposed General Plan Amendment according to approval criteria as set forth in the Santa Fe City Code, 14-3.2 "Amendments to the General Plan" for Case #2024-7879, Case #2024-8852, and Case #2024-8854.

Table 1 General Plan Amendment Approval Criteria Analysis

General Plan Amendment Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (General Plan Amendment):

"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals[1] are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan, it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

[Staff has removed three (3) paragraphs here. The Applicant's full response may be found in Attachment E, Applicant's materials]

[1] Staff Commentary: the policies referenced in this response are described in the City of Santa Fe 1999 General Plan, *available at* https://santafenm.gov/land-use/current-planning/long-range-planning/general-plan-1999.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report[2] further emphasizes the importance of diversifying Santa Fe's economic base to ensure sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment): Staff finds that the General Plan Amendments meet Criterion 1.

Staff agrees with the Applicant's response. The General Plan Amendments for the Tracts align with Santa Fe's growth and economic development strategies. The Applicant cites two (2) strategic documents that are reliable sources for understanding Santa Fe's future growth: the Angelou Plan ("Cultivating Santa Fe's Future Economy Economic Development Strategy, April 2004, by Angelou

[2] The "Angelou Plan" (referred to by the Applicant as the "Angelou Report") is a 2004 economic report from Angelou Economics. The Angelou Plan proposes a roadmap for Santa Fe's future economic development efforts based on economic analysis and community input. The Angelou Plan is included as Attachment C, "Economic Strategy".

Economics) and the 2008 Economic Development Strategy (included here as Attachment C, "Economic Strategy"). The General Plan Amendments are likely to allow for the type of neighborhood and community planning that are encouraged in the 1999 General Plan (*see* General Plan Themes, I-5). Specifically, the General Plan Amendments will allow for development designed to serve the immediate community, which helps reduce car-dependence and encourages community-oriented development (*see* General Plan Themes, I-13). Staff agrees that the Applicant's requested General Plan Amendments are consistent with projected growth patterns as described in both the Angelou Plan and the 2008 Economic Development Strategy.

General Plan Amendment Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response: *"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).*

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response: Staff agrees that Criterion 2 is met.

Staff agrees with the Applicant's response. The 1999 General Plan Policy Overlay designates the land at issue as an "infill area" (*see* 1999 General Plan, Chapter 3, "Land Use", p. 4). Guiding Policy 3-G-3 provides that "[t]here shall be infill development at densities that support the construction of affordable housing and a designated mix of land uses that provide an adequate balance of service retail and employment opportunities to address residential growth throughout the Urban Area".

1999 General Plan Guiding Policy 3-G-2 encourages mixed commercial/residential development throughout the City "[t]here shall be a mix of uses and housing types in all parts of the city." Additionally, much of the land near the Project site, along Cerrillos Road and I-25, is already

designated Community Commercial by the Future Land Use Map[3]. The General Plan Amendments will uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial, which will allow for development throughout the Project site that is consistent with the General Plan goal of encouraging mixed uses in all parts of the City.

General Plan Amendment Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **Yes**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

"With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (General Plan Amendment): Criterion 3 is met.

The Applicant's response does not contain enough detail to fully address all subsections of this criterial. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the Amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public.

[3] See City of Santa Fe Future Land Use Map, *available at* https://santafenm.gov/FutureLandUse.pdf (12/30/2024).

General Plan Amendment Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No) N/A**
Applicant's Response: *"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."* **Staff Response:** Criterion 14-3.2(E)(1)(c) is met, and therefore no further justification is needed at this time.	
General Plan Amendment Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans; **Staff Response:** There are no extraterritorial zoning ordinances or extraterritorial plans that affect the Property.	**Not Applicable**
General Plan Amendment Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) Yes**
Applicant's Response: *"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.* *In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."* **Staff Response:** Staff finds that Criterion 6[14-3.2(E)(1)(f)] is met. Staff agrees with the applicant's response, in that a Community Commercial designation across the entire Project site would provide an opportunity for growth that is consistent with 1999 General Plan Guiding Policy 3-G-2 ("[t]here shall be a mix of uses and housing types in all parts of the city") and allow development that, aligns well with the adjacent land uses. The Amendment promotes more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.	

General Plan Amendment Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	Criterion Met: (Yes/No) YES
Applicant's Response: *"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."* **Staff Response:** Staff agrees with the Applicant's response. The General Plan Amendments are consistent with multiple City policies that support the proposed change. The General Plan Amendments do not conflict with any existing city ordinances or regulations. Additionally, the Project meets all applicable Code criteria. The General Plan Amendments foster a harmonious development strategy, promote general welfare, and correspond with adjacent land uses and broader city policies, ensuring there are no conflicts with existing regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
General Plan Amendment Criterion 8 [14-3.2(E)(2)] Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a) the growth and economic projections contained within the general plan are erroneous or have changed;** **(b) no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or** **(c) conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Not Applicable**
Staff Response: The Applicant is not required to document compliance with Criterion 8, since the application does not amend land use policies.	

V. APPROVAL CRITERIA – MASTER PLAN AMENDMENT

Table 2 provides the Applicant's responses and staff's analysis of the Master Plan approval criteria, 14-3.9 "Master Plan", for Case #2024-7899 Las Soleras Master Plan Amendment.

According to City Code Section 14-3.9 (B)(3), "[f]inal actions by the governing body… concerning rezonings… shall include a specific finding or determination that the action complies with all applicable provisions of the master plan." Consequently, it is Staff's recommendation that the Governing Body consider the Master Plan Amendment before considering the Applicant's proposed Rezonings.

Staff recommends *conditional approval* of the Master Plan Amendment, effective upon approval of the relevant rezonings and an additional condition. As further discussed in the Planning Commission Staff Report, Staff finds that the Master Plan Amendment meets the criteria for approval, subject to a condition that the Master Plan Amendment include a "Master Sign Plan" that comprehensively addresses the design, placement, and specifications of all signs within the project area that are compatible with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. (*See* Attachment A, p. 4). Staff proposes that the Applicant must complete this condition prior to recording the Master Plan Amendment.

Table 2 Master Plan Amendment Approval Criteria Analysis

Criterion 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**
Applicant's Response (Master Plan): *The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals.* *Specifically, the following General Plan policy goals are supported:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.* *Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and* *Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.* *Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and* *Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and* *Policy 9-2-G-5: Promote small business.* *The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the*	

local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial.

Staff Response (Master Plan): Staff finds that the Master Plan meets Criterion 1 is met.

Staff agrees that the Master Plan Amendment is consistent with the proposed General Plan Amendments. The Master Plan Amendment still maintains the potential for a diverse range of uses as allowed within the C-2 District and allows for neighborhood-focused development as described in the policies referenced in the Applicant's response, above.

Criterion 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Master Plan):
"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan): Staff finds that Criterion 2 is met.

Staff agrees with the Applicant's response. The Master Plan Amendment is consistent with the Rezonings proposed for the area. . The variety of C-2 uses, ranging from residential to light industrial, are consistent with the Las Soleras Master Plan's original scheme to foster a mix of uses, by allowing for a more cohesive, neighborhood-focused development scheme across the Project site than Mixed Use, BIP, and C1, which restrict certain types of development to certain parts of Project site. . .

Criterion 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):
"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan): Criterion 3 is met.

Staff agrees with the applicant's response. The Master Plan Amendment provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining throughout the entire Project site, and more, which would not be allowed with the current combination of zoning restrictions. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth.

Criterion 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No) YES**

Applicant Response (Master Plan):

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan): Staff finds that Criterion 4 is met.

Staff generally agrees with the Applicant's response regarding the minimal impact of the Master Plan Amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the Applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, the Applicant's test is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Applicant's Traffic Analysis, the Traffic Division has raised certain points for consideration regarding future phases of the project (*See* Attachment B, Development Review Team (DRT) Comments):
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended Traffic Impact Analysis.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for future development:
1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not "have any concerns at this time from a water engineering standpoint", however, it noted that "the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project." *See* Attachment B, DRT Comments.

The Wastewater Division has "determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development." *See* Attachment B, DRT Comments.

The Parks Division raised no concerns for the project. *See* Attachment B, DRT Comments.

VI. Rezoning Approval Criteria

SFCC 1987, Sec. 14-3.5(C) requires the Governing Body to consider approval criteria for all rezoning proposals, and make complete findings of fact with respect to each criterion "sufficient to show that these criteria have been met", before the Governing Body approves a rezoning. Table 3, below, contains analysis of the three (3) Rezoning requests for Case #2024-7900, Case #2024-8853, and Case #2024-8855.

Table 3 Rezoning Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26

Rezoning Criterion 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning from C-1, MU, and BIP to C-2): *(i) "Not applicable"* *(ii) "As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development – most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."* *(iii) "As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.*	

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response: Criterion 1 is met.

Staff agrees that a different use category (here, Community Commercial/ C2) is more advantageous to the community as articulated in the General Plan policy sections cited in the Applicant's response. The Rezonings support a variety of uses, enhance walkability, and promote economic self-sufficiency within the master planned area by balancing residential and commercial development opportunities, which provides opportunities for shopping and employment in the immediate area. The Rezonings are designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs.

Rezoning Criterion 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response:
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response: Staff agrees with the Applicant's response, above. The Rezonings meet all applicable Chapter 14 requirements. The proposed Rezonings therefore meets Criterion 2.

Rezoning Criterion 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning): Staff finds that Criterion 3 is met.

Staff agrees with the Applicant's response that rezoning the Tracts to a uniform Community Commercial C-2 district across aligns with the City of Santa Fe's General Plan as proposed to be amended, and economic development goals. The proposal matches City policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the Future Land use Map, which designates the area Community Commercial.

Rezoning Criterion 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):

"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff finds that Criterion 4 is met.

For City policy regarding the amount of land sufficient to meet Rezoning Criterion 4, Staff looks to City Code General Plan Amendment Criteria, Section 14-3.2(E)(1)(c), which requires in part that an amendment does not "affect an area of less than two acres, except when adjusting boundaries between districts."

Based on this requirement, Staff concludes that the amount of land proposed for rezoning will not create a pocket of inconsistent development and is sufficient to help meet the City's land use goals of creating neighborhood-focused communities that include opportunities for both residential and commercial development.

Rezoning Criterion 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response:

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response: Staff finds that Criterion 5 is met.

Staff agrees with the Applicant's response the "subject property can be served by existing roadways and public water and sewer infrastructure."

Staff agrees with the Applicant's response that the existing infrastructure is adequate for the proposed development. However, the "Conceptual Test Fit" that the Applicant referenced is not from the City Code and is not a test that the City uses to evaluate projects. Additionally, DRT evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development, which will be reviewed at the permitting or development plan stage.

Rezoning Criterion 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response:

14-3.5(C)(2)(a):

"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

14-3.5(C)(2)(b):

"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

14-3.5(C)(2)(c):

"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las

Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response: Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

The Rezonings are consistent with applicable 1999 General Plan policies referenced in detail in the analysis of the previous criteria. The Rezonings are anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

VII. CONCLUSION

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on September 28, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

Staff and the DRT have analyzed the Project and found that it meets all applicable Code criteria. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

CITY OF SANTA FE

Planning and Land Use Department
Planning Commission Staff Report

Case Nos:	2024-(7899)(898)(7900)(8852)(8853)(8854)(8855)
Hearing Date:	September 5, 2024
Applicant:	Beckner Road Partnership, LLC
Request:	Master Plan Amendment, General Plan Amendments & Rezonings
Location:	The property is located SE of the Las Soleras/Beckner Rd roundabout & South of the Rail Runner Rd/Beckner Rd roundabout, & on the South side of Beckner Rd, being Tracts 19-26, within the Las Solares Master Plan.
Case Mgr.:	Daniel A. Esquibel
Existing Zoning:	C-1 (General Office), MU (Mixed Use), and BIP (Business Industrial Park)
Overlay:	Suburban Archaeological Review District
Pre-app. Mtg.:	September 28, 2023
ENN Mtg.:	November 14, 2023

Proposal: The Applicant's project includes 7 applications: an amendment to the Las Soleras Master Plan, 3 General Plan Amendments, (GPA) 3 rezonings (RZ), and a request to reduce the La Rambla Trail easement width from 90 feet to 45 feet. The GPAs change the Future Land Use Map designations from "Transitional Mixed Use, Business Commercial, and Commercial Office" to "Community Commercial". The RZs change the Official City Zoning Map designations from MU, BIP, and C-1, to C-2.

Case #2024-7899. Las Soleras Master Plan Amendment. Orion-West LLC, Agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a Master Plan Amendment to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and also that the Planning Commission recommend that the Governing Body approve an additional General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning. Orion-West LLC, Agent for Beckner Road Partnership, Owner, asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and that the Planning Commission also recommend the Governing Body to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial, for a property, described as Tract 19 on the Las Soleras Master Plan located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment. Orion-West LLC., agent for

Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial, on a property described as Tract 20 on the Las Soleras Master Plan, and located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, ask the Planning Commission to recommend the Governing Body approve a rezoning changing the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) to C-2 (General Commercial) on a property described as Tract 20 on the Las Soleras Master Plan, and located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

I. RECOMMENDATION

The Land Use Department recommends **APPROVAL** of the following cases, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A":

1. Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Case #2024-7898: Las Soleras Tracts 21, 23, 24, and 26 General Plan Amendment,
3. Case #2024-7900: Las Soleras Tracts 21, 23, 24, and 26 Rezoning,
4. Case #2024-8852: Tract 19 General Plan Amendment,
5. Case #2024-8853: Las Soleras Tract 19 Rezoning,
6. Case #2024-8854: Las Soleras Tract 20 General Plan Amendment, and
7. Case #2024-8855: Las Soleras Tract 20 Rezoning

Seven motions are required for these Cases:

1. Recommend the Governing Body approve or deny Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Recommend the Governing Body approve or deny Case #2024-7898: Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment, subject to the Master Plan conditions listed in Section II, Table 1 *"Master Plan Conditions"*, and Master Plan Technical Corrections listed in attachment "*A*",
3. Recommend the Governing Body approve or deny Case #2024-7900: Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning,
4. Recommend the Governing Body approve or deny Case #2024-8852: Tract 19 General Plan Amendment
5. Recommend the Governing Body approve or deny Case #2024-8853: Las Soleras Master Plan Tract 19 Rezoning,
6. Recommend the Governing Body approve or deny Case #2024-8854: Las Soleras Master Plan Tract 20 General Plan Amendment, and
7. Recommend the Governing Body approve or deny Case #2024-8855: Las Soleras Master Plan Tract 20 Rezoning

II. Master Plan Conditions

Table 1 Master Plan Conditions

#	Condition of approval	Dept/Division	Completed By:
1	The Applicant shall submit a Master Sign Plan to be included with the Master Plan amendment as a permanent component of future development of the Project. This Master Sign Plan must comprehensively address the design, placement, and specifications of all signs within the project area to ensure compatibility with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. This requirement shall apply to the entire project area, irrespective of any future subdivision or ownership change, and must be adhered to by all current and subsequent owners or developers.	Land Use/ Current Planning Division	Prior to recording the Master Plan

III. EXECUTIVE SUMMARY

The Governing Body approved the Las Soleras Master Plan (Master Plan) on February 11, 2009, encompassing approximately 539 acres with a mix of uses including low, medium and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The original master plan concept proposed a walkable mixed-use neighborhood focused on an anticipated Rail Runner transit stop. The mix of uses was intended to approximate the citywide balance of residential and nonresidential uses, set among extensive open spaces.

Since adoption in 2009, there have been 4 amendments to the Las Solares Master Plan:

A. September 9, 2015
   i. Realignment of roads, reconfiguration of open space and trail, reconfiguration and reduction of park land and the reconfiguration of land tracts.
B. September 24, 2016
   i. Establish alternative height and setback standards for the R-6 and R-12 residentially zoned districts of Las Soleras for Estancias de Las Soleras and Ross's Peak.
C. September 12, 2018

i. Rezoning from MU (Mixed Use) to R-21 (Residential-twenty-one dwelling units per acre) and a reduction in the 90-foot utility, access, and trail corridor to 45 feet (La Rambla).

ii. Amending Las Soleras Master Plan condition related to dust control

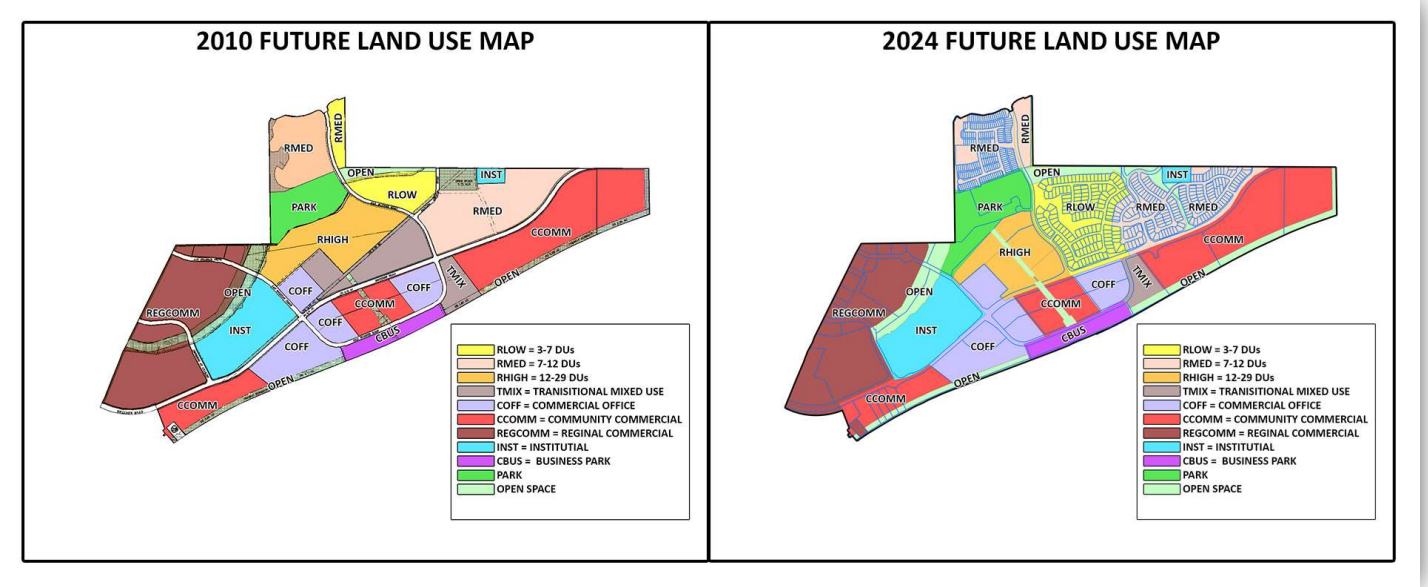
D. October 31, 2019

i. Rezoning from R-6 to R-10 for Las Solares Tract 13

IV. COMPARISON MAPS OF ZONING AND THE FUTURE LAND USE MAP

Figure 1 depicts a comparison between the 2010 Future Land Use Map (left), illustrating the land uses at the time of adoption of the Master Plan and Annexation into the City, and the current 2024 Future Land Use Map designations (right). The primary differences being within the project area where 4 lots (lots 21,23,24 and 26) were annexed in as Community Commercial (red) and are now designated as commercial office (light purple). There has also been an expansion of residential low density (yellow) and residential high density (goldenrod) and a reduction in Transitional Mixed Use (mauve) north of Beckner Road.

Figure 1 2010 / 2024 Future Land Use Map Comparison



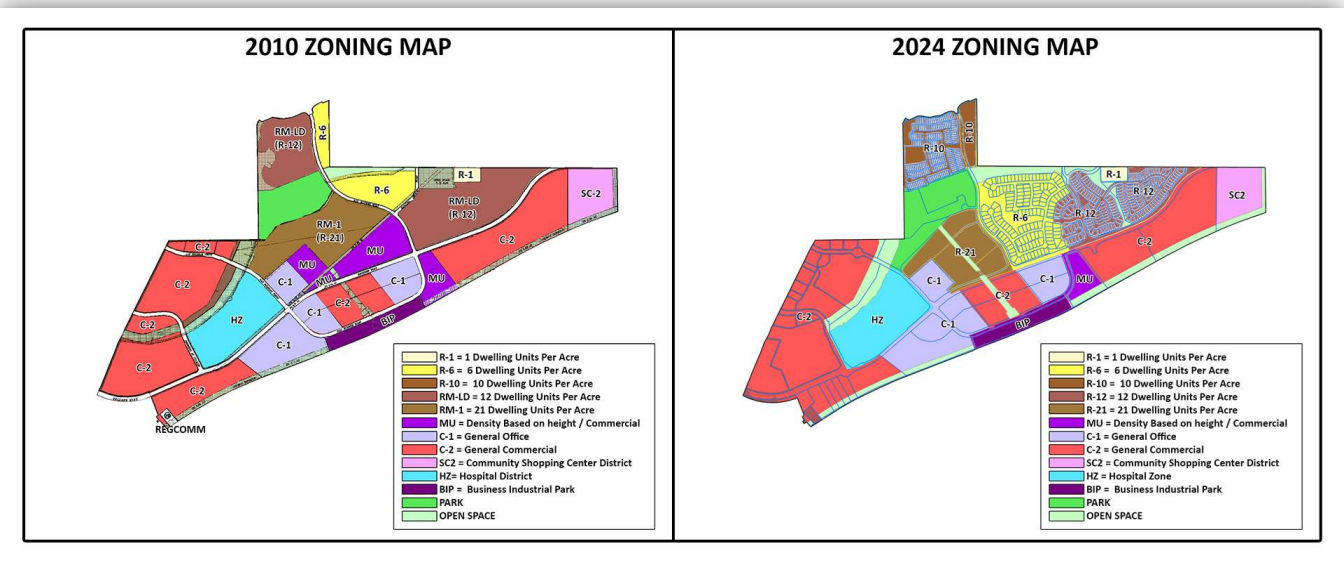


Figure 2 depicts a comparison between the 2010 Zoning Map established at annexation and the 2024 Zoning Map. The primary difference being a reduction in Mixed Use zoning (purple) in favor of more residential uses north of Beckner Road.

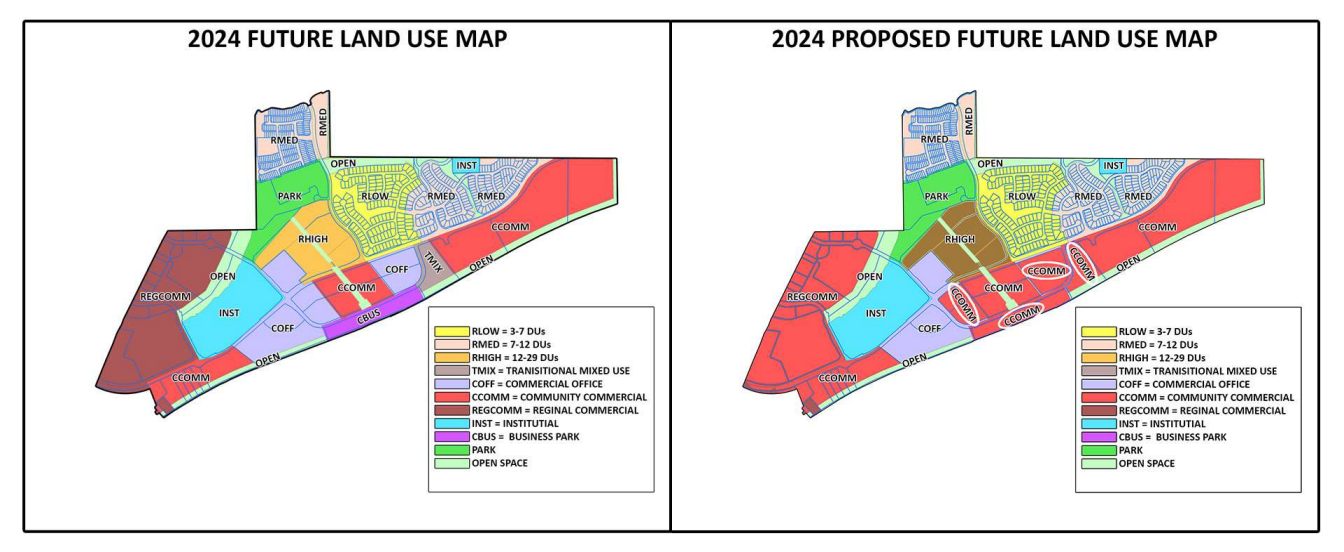

Figure 2 2010 Master Plan Zoning and 2024 Zoning Map Comparison

The Applicant's Proposed Changes

Figure 3 compares the existing 2024 Future Land Use Map and the applicant's proposed changes, from Commercial office (light purple), Business Park (dark purple), and Transitional Mixed Use (mauve) to Community Commercial (red).

Figure 3 2024 Future Land Use Map Comparison

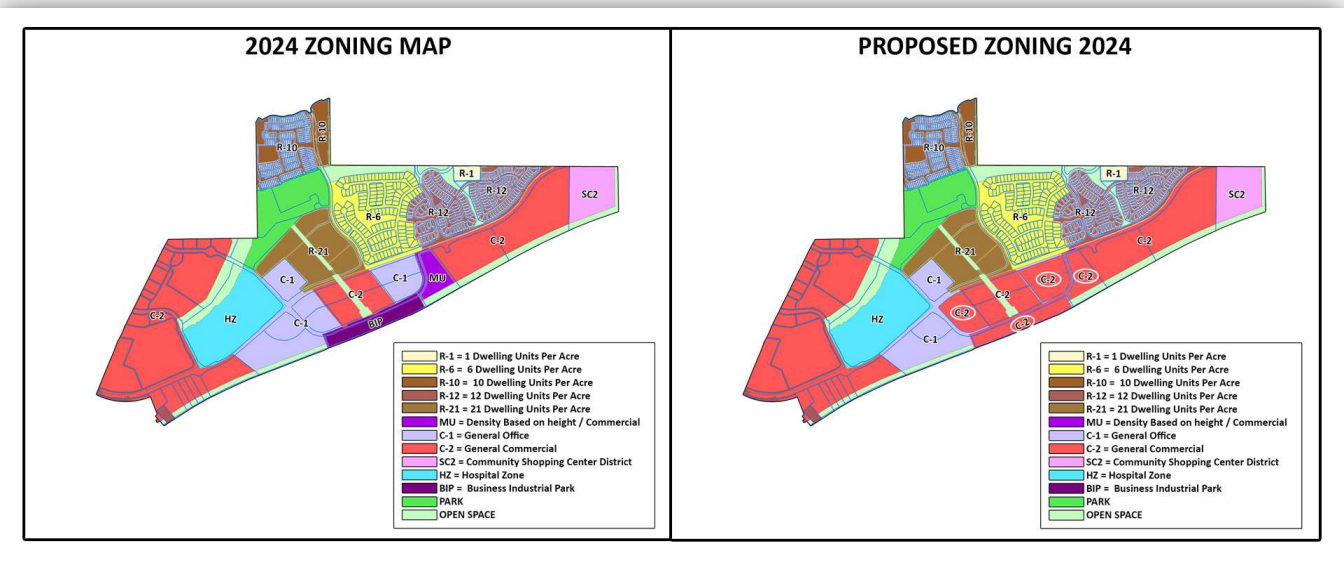
The General Plan describes Community Commercial Office as providing:

> *Sites for retail shopping areas, focus on a plaza, containing a wide variety of businesses, including retail stores; eating and drinking establishments; commercial recreation; service stations; automobile sales and repair services; financial, business, and personal services; and educational and social services.*

The General Plan describes Business Park as:

> *Business Parks shall provide areas appropriate for moderate- to low-intensity industrial and business park uses capable of being located next to commercial and residential areas with minimum buffering. Allowable uses include research and development related uses, light manufacturing, wholesaling, distribution and storage, retailing and small-scale restaurants as a related use only, and offices in a master planned landscaped setting. No raw materials processing or bulk handling would be allowed.*
>
> *The Business Park designation on the Future Land Use Map of the General Plan is intended to encompass the 11, Light Industrial District, and the IP, Industrial Park District, existing zoning categories. It is recommended that both districts be re-examined for allowable uses and appropriate standards. It is further recommended that the IP zoning district be restructured with a stronger emphasis on research and development, offices, and related uses, to be developed in a master planned landscaped setting, and that the district name be modified to Business and Industrial Park in order to reflect these changes.*
>
> *For new development and for rezonings within the Business Park designation, the appropriateness of 1 versus BIP (IP) is determined by the nature of adjacent land uses. Where an area designated Business Park on the Future Land Use map is adjacent to non-residential zoning, an existing non-residential use, or non-residential Future Land Use, then that area may be considered for 11 zoning. Where an area designated Business Park on the Future Land Use map is adjacent to residential zoning, an existing residential use, or residential Future Land Use, then that area may be considered for IP (BIP) zoning.*

The General Plan describes Transition Mixed Use as:



> *…mixed-use development, providing a variety of commercial (specific locations for big box retail), residential, and institutional opportunities.*

The General Plan describes Office as:

> *This classification provides sites for administrative, financial, business, professional, medical, and public offices, and small-scale restaurants (as a related use only) in areas where retail and other community commercial uses are not appropriate*.

Figure 4 compares the Applicant's proposed changes to the City Zoning Map, namely replacing C-1 (General Office), BIP (Business Industrial Park) and MU (Mixed Use) with C2 (General Commercial).

Figure 4 Existing and Proposed Zoning Map Comparison

Zoning Modifications

Table 2 *"Zoning Acreage Change"* depicts acreage changes affected by Master Plan Amendments for Las Solares Master.

Table 2 Zoning Acreage Change

Zoning	2010 Annexation (Acreages+/-)	2024 Current Zoning (Acreages +/-)	Proposed Changes (Acreages+/-)
R-1	3.02	3.02	3.02
R-6	28.96	46.9	46.9
RM-LD (R-10 & R-12)	102.66	81.19	81.19
RM-1 (R-21)	43.69	28.59	28.59
MU	37.49	9.11	0
C-1	50.29	50.45	30.75
C-2	171.5	171.5	~~239.47~~ 211.01
SC-2	20.21	20.21	20.21
HZ	39.03	39.03	39.03
BIP	10.7	10.7	0

Park	21.4	31.1	31.1

Figure 5 Line Graph

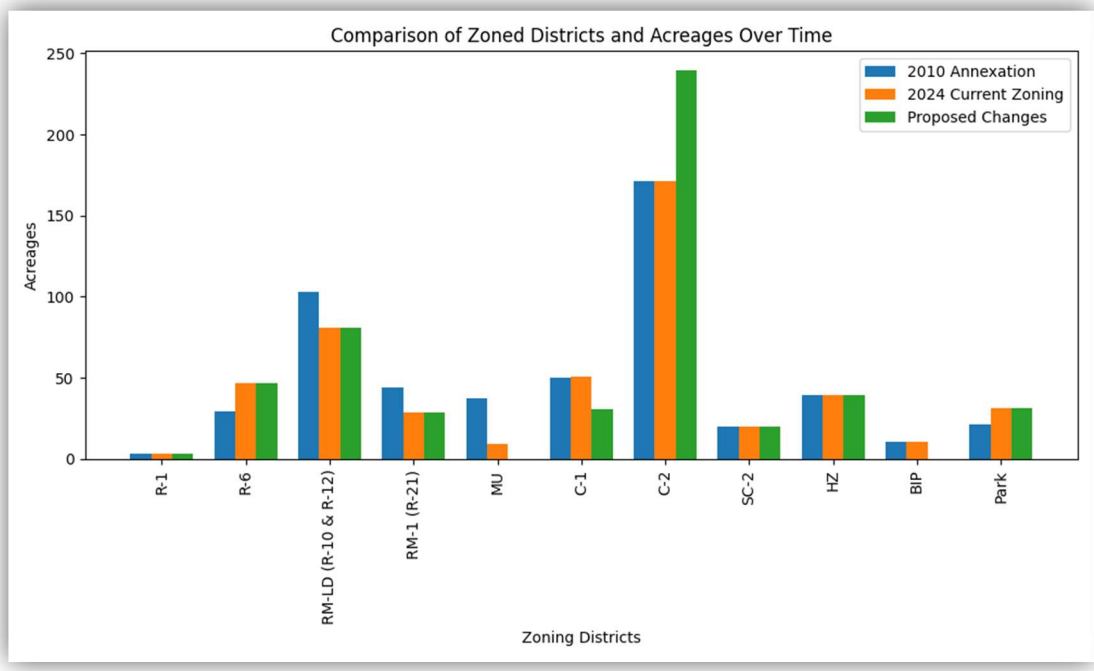


Figure 5, together with Figures 1-4 and Table 2 present an overview of modifications across various zoning categories, from the annexation agreement established in 2010 to the present year, and the applicants requested amendments. Figures 1-5 offer a general view of how acreages within the Master Plan area have changed across different zoning categories over time. The Master Plan amendment proposes modifications to the Master Plan zoning designations for Tracts 19, 21, 23, 24, and 26. The Master Plan amendment eliminates two zoning categories—MU (Mixed Use) from 9.11 acres to 0; and BIP (Business Industrial Park) from 10.7 acres to 0 acres—while reducing the area zoned as C-1 (General Office) from 50.45 acres to 30.75; and increasing those areas zoned as C-2 (General Commercial) from 171.5 acres to 239.47. In addition to the zoning changes, the applicant seeks to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet.

Relevant Chapter 14 Zoning District purpose statements:

14-4.3(A) C-1 Office and Related Commercial District

The purpose of the C-1 office and related commercial district is to provide areas for government offices; professional and business offices; medical and dental offices or clinics; personal care facilities for the elderly ; and hospitals , laboratories, pharmacies and related complementary businesses that provide sales or service of office equipment, medical and dental supplies and office supplies. This

district serves as a transitional buffer between more intense commercial use districts and residential districts.

14-4.3(B) C-2 General Commercial District

The C-2 general commercial district includes areas along streets carrying large volumes of traffic where commercial uses are appropriate. Regulations are designed to guide future additions or changes so as to discourage extension of existing and formation of future strip commercial development , to preserve the carrying capacity of the streets and to provide for off-street parking and loading.

14-4.3(H) BIP Business and Industrial Park District

1) Purpose

(a) The purpose of the BIP district is to provide locations for the development of jobs in research and development activities and in offices, institutions and limited light industrial settings. The BIP district regulations intend to ensure that district locations may be adjacent to residential and commercial areas with minimum buffering.

(b) It is also the purpose of the BIP district to allow related uses that complement or support the primary employment-based uses to create a functional and pedestrian-friendly development.

2) Rezoning Requirements

(a) Property is eligible for rezoning to BIP if the property is a minimum of four acres in size and all other applicable requirements of Chapter 14 are satisfied.

(b) Rezoning to BIP requires consideration and approval by the planning commission and governing body of a master plan or development plan for the property as provided in Sections 14-3.8 and 14-3.9."

14-4.3(L) MU Mixed-Use District

1) Purpose

It is the purpose of the MU mixed-use district to provide for the creative infill and development of underused and vacant land and buildings in Santa Fe. This zoning category allows office, commercial and residential uses in the same building or on the same property . MU zoning should accomplish the following goals:

(a) control sprawl by creating a more efficient use of land and more opportunities for infill ;

(b) promote affordable housing and economic development by emphasizing a variety of land uses

(c) promote creative and flexible land uses within Santa Fe;

(d) foster alternative means of transportation, including transit, bicycles and walking;

(e) promote infill development and pedestrian-oriented streetscapes in currently underused parking areas and along existing roadway corridors; and

(f) promote shared parking areas in the design and development of mixed-use projects.

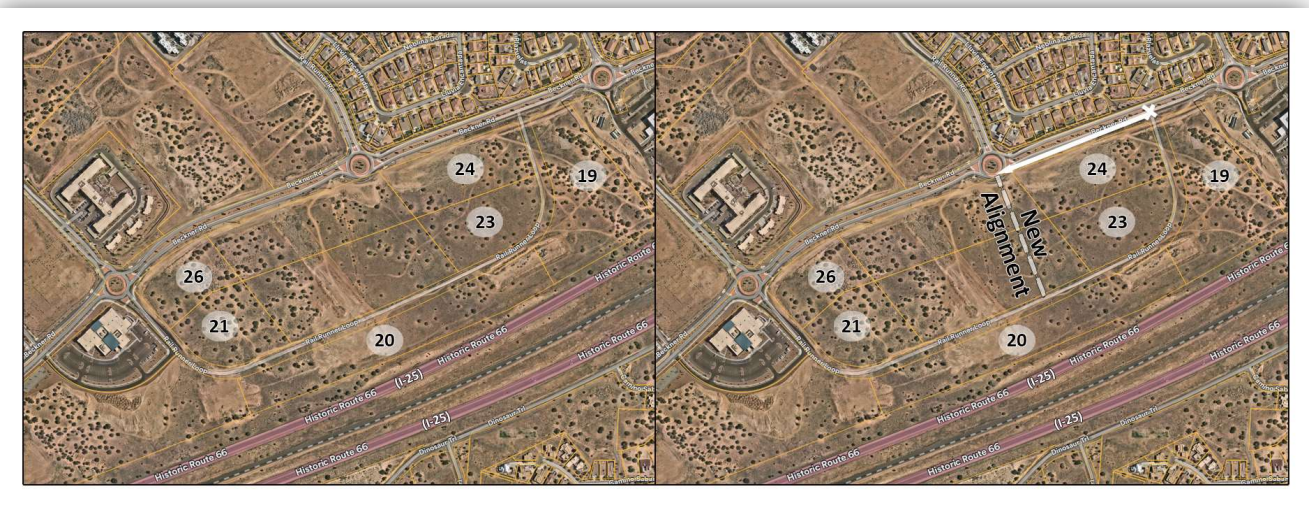
(2) Rezoning Requirements

(a) Application for rezoning to MU is not allowed for residentially zoned properties located in historic districts, as shown on the official zoning map.

(b) *Rezoning to MU requires consideration and approval by the planning commission and governing-body of preliminary or final development plans for the property as provided in Section 14-3.8.*

As districts expand, contract, or are eliminated, the urban fabric of the Los Soleras Master Plan area shifts. Expansion of C-2 zones might encourage more robust commercial development but could risk higher traffic and reduced pedestrian safety and less open space. Shrinking or eliminating MU districts could undermine efforts to increase urban density and mixed-use developments, potentially leading to greater vehicle dependence and loss of vibrant, multi-functional urban areas. Changes in BIP zoning could affect the availability of land for high-tech and industrial jobs, impacting local employment landscapes. Conversely, growth in C-1 areas could promote quieter, service-based environments but might limit opportunities for larger commercial ventures. Each adjustment to these zoning districts needs to be considered carefully to balance growth, community needs, and infrastructure capabilities.

The Applicant complied with Subsections 14-3.1(E) *"Pre-Application Conferences,"* 14-3.1(F) "Early Neighborhood Notification Procedures," and 14-3.1(H) *"Notice Requirements."*



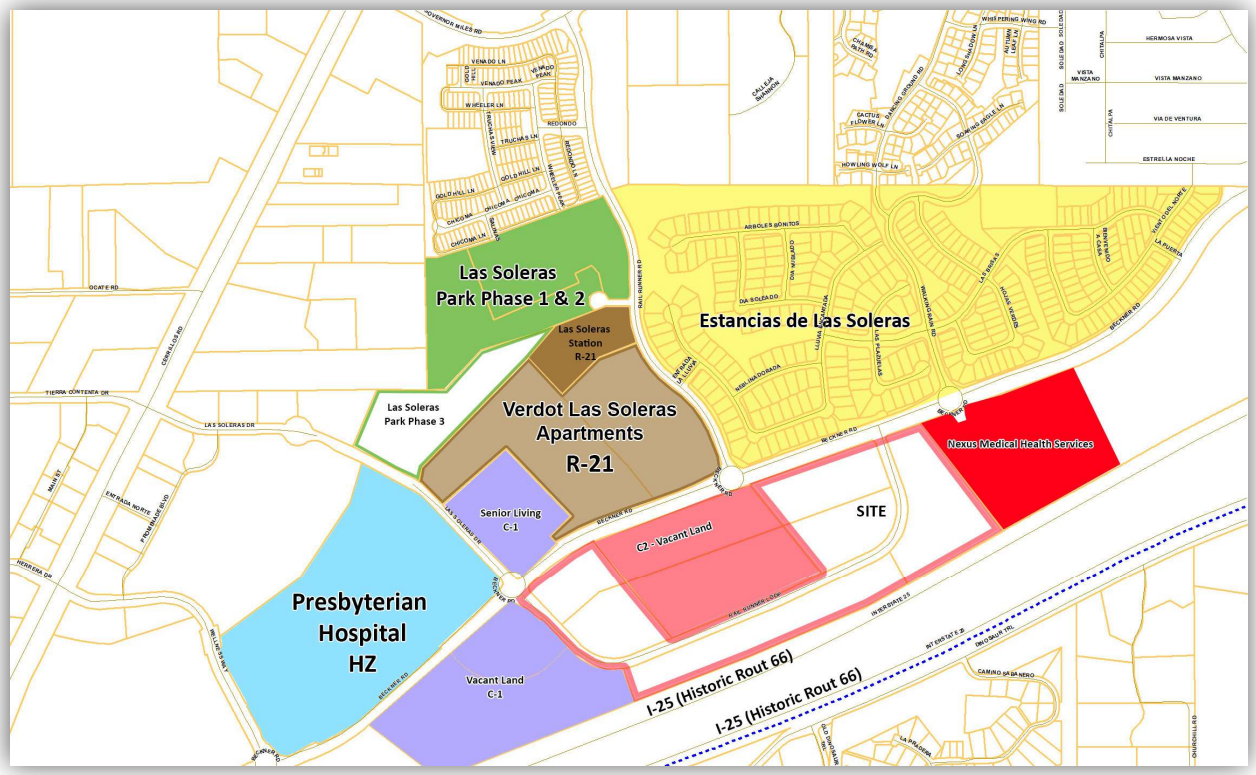
Staff's analysis finds that the Applicant met the approval criteria as outlined in Subsection 14-3.9(D) for Master Plans, Subsection 14-3.2(E) for amendments to the General Plan, and Subsection 14-3.5(C) for the rezoning request across all 7 case requests.

V. PROJECT ANALYSIS

A. Property Information:

Tracts 19, 20, 21, 23, 24, and 26 are vacant tracts of land measuring 9.11, 10.70, 4.70, 7.27, 6.18, and 3.48 acres, respectively, totaling approximately 41.44 acres. Tracts 19-23 are located off Rail Runner Loop. Per the approved Las Soleras Master Plan the Applicant will align Railrunner Loop to with the Railrunner Road Roundabout. Currently, Rail Runner Loop aligns with the Solares Drive/Beckner Road intersection at a roundabout on the west end and lies between the intersections of Rail Runner Road and Walking Rain Road/Beckner Road, each featuring roundabouts, at the east juncture. The eastern intersection will be realigned with the Rail Runner Road and Beckner Road intersection roundabout. Tracts 24 and 26 are located off Beckner Road (Reference Figure 6 *"Tract Location"*).

Figure 6 Tract Location



B. Adjacent Uses

Table 3 Nearby Development (Reference Figure 7 "Adjoining Uses")

Direction	Zoning
North	C-1 (General Office) 5011 Las Soleras Dr, R-21 (Residential - 21 dwelling units per acre) Verdot apartments, R-6 (Residential – dwelling units per acre) Estancias De Las Soleras
West	C-1 (General Office) vacant land
East	C-2 (General Commercial) - Nexus Medical Health Services
South	I-25 (Historic Rout 66)

Figure 7 Adjoining Uses

C. La Rambla Trail Easement

In addition to general plan amendments and rezoning requests, the application includes the realignment of Rail Runner Loop. The realignment is required as a condition of the Las Solares Master Plan, and the Applicant is adhearing to the required realignment condition. The applicant also seeks approval to reduce the La Rambla that traverses across Los Solares Tracts 22 and 25,. Tracts 22 and 25 are also currently owned by the applicant and will be integrated into future development, but they are not part of the current application as they are already zoned C2. The Master Plan amendment proposes reducing the La Rambla, originally established in 2010 as 90 feet wide, to 45 feet to align with the Rambla Trail width set by a previous Las Soleras Master Plan Amendment approved in 2019. Additionally, the applicant proposes the flexibility to adjust the location of the larger Plaza open space area anywhere along the Rambla between Beckner Road and Rail Runner Loop Road (Reference Figure 7 *"La Rambla Trail Easement.").*

Figure 8 La Rambla Trail Easement

VI. PROPOSED INFRASTRUCTURE

The City Code requires that proposed infrastructure can accommodate the impacts of the proposed development. "[T]he existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development." SFCC 1987, § 14-3.5(C)(1)(e). The Development Review Team ("DRT") concluded that City resources and infrastructure can accommodate the proposed request. *See* Attachment a, "DRT Comments".

VII. EARLY NEIGHBORHOOD NOTIFICATION MEETING

The Applicant conducted a virtual Early Neighborhood Notification Meeting (ENN) via Zoom on November 14, 2023. No members of the public attended the ENN. The Applicant complied with all notice and other procedural requirements as per City Code Section 14-3.1(F).

VIII. APPROVAL CRITERIA – MASTER PLAN

Section 14-3.9 Necessary Findings: (A) and (D):

Table 4 Master Plan

Criteria 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):

"The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals are supported:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the

Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response (Master Plan):

Staff agrees with the Applicant's response. The proposed Master Plan is consistent with several policy goals of the City of Santa Fe General Plan. Despite the elimination two zoned districts (Mixed Use and Business Industrial Park) originally envisioned in the Las Soleras Master Plan, the Master Plan still maintains the potential for a diverse range of uses as allowed within the C-2 District.

Staff finds that the Master Plan meets Criterion 1 (14-3.9(D)(1)(a).

Criteria 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):

"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan):

Staff agrees with the applicant's response. The amendment aligns with the predominant zoning patterns in the area, which primarily are uses (multifamily and nonresidential) allowed within a C-2 District. The variety of C-2 uses, ranging from residential to light industrial, adheres to the Las Soleras Master Plan's original intent to foster a mix of uses, despite the proposed elimination of both Mixed Use and Business Industrial Park Districts, while also responding to current market demands. The master plan continues to maintain a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan.

Staff finds that the Master Plan meets Criterion 2 (14-3.9(D)(1)(b).

Criteria 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Master Plan):

"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan):

Staff agrees with the applicant's response. The amendment to C-2 zoning provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such

as full-service dining and more. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth. Moreover, the rezoning of the property will facilitate future development that is expected to trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System, further enhancing the area's coordinated development. The Las Soleras Master Plan originally contained a Rail Runner Stop. However, the Rail Runner stop was canceled during Governor Martinez's Term in office. It is unclear if the Rail Runner Stop will occur at Las Soleras in the Future.

Staff finds that the Master Plan meets Criterion 3 (14-3.9(D)(1)(c)].

Criteria 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No)** **YES**

Applicant Response (Master Plan):
"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan):
Staff generally agrees with the applicant's response regarding the minimal impact of the proposed amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Traffic Analysis provided by the applicant, it has raised certain points for consideration regarding future phases of the project:
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended TIA.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for

future development:

1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not *"have any concerns at this time from a water engineering standpoint. The existing 12" main in Beckner should be able to accommodate the changes being proposed with no issues. For the future developments that come in under the general plan and master plan, the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project."*

The Wastewater Division has *"determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development."*

The Parks Division raised no concerns for the project.

Staff finds that the Master Plan meets Criterion 4 (14-3.9(D)(1)(d).

IX. General Plan

14-3.2 *"Amendments to the General Plan"* establishes approval criteria for amendments to the General Plan.

Table 5 General Plan Amendment Criteria

Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) YES**
Applicant's Response (General Plan Amendment): *"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*	

Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report further emphasizes the importance of diversifying Santa Fe's economic base to ensure

sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment):
Staff agrees with the Applicant's response. The proposed amendment for Las Soleras Tracts 19-26 aligns with Santa Fe's growth and economic development strategies. By citing strategic documents like the Angelou Report and the 2008 Economic Development Strategy, the response demonstrates that the amendment supports city policies on economic diversification and infrastructure development. The Applicant's use of demographic data underscores the amendment's relevance to current and future community needs, ensuring it contributes to Santa Fe's long-term prosperity and resilience.

Staff finds that the proposed amendment meets Criterion 1 [14-3.2(E)(1)(a)].

Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response (General Plan Amendment):
Staff agrees with the applicant's response. The applicant's request is to uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial. A Community Commercial classification aligns with the existing land use patterns nearby, where adjacent and nearby Tracts are already designated as Community Commercial. Eliminating the Transitional Mixed Use and Business Park designations for Tracts 19 and 20 resolves inconsistencies with the surrounding areas, streamlining the land use classifications and enhancing urban coherence.

As illustrated in this report (Figures 3 and 4) the Future Land Use Map, Tracts immediately adjacent to the east of Tracts 19 – 26 are already designated as Community Commercial. Additionally, Tracts 22 and 25 within the targeted area are currently classified as Community Commercial. Furthermore, there are areas designated Community and Regional Commercial only a short distance from the subject property to the west between I-25 and Beckner Road and to the north near the Presbyterian hospital.

The fact that Tracts 19 and 20 are currently designated as Transitional Mixed Use and Business Park, respectively, seems inconsistent with the predominantly Community Commercial and Office designations in the vicinity. This suggests that the proposed amendment to Community Commercial could harmonize the land use classifications in this part of the Las Soleras Master Plan area.

Moreover, the infrastructure in place serving Las Soleras—including roads, trails, and utilities has been designed to support the Master Plan as vacant Tracts are developed.

Staff finds that the proposed amendment meets Criterion 2 [14-3.2(E)(1)(b)].

Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **YES**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

Staff Response (General Plan Amendment):

Response to (i):

The applicant's response to item "(i)" of Criterion 3 focuses on reclassifying Tracts 19 and 20 from Transitional Mixed Use and Business Park to Community Commercial, matching the existing nearby uses of Community Commercial and Office. This standardizes land use according to the area's predominant commercial orientation. However, the response lacks specific details on how the changes for additional tracts (21, 23, 24, and 26) fit with their existing land use or if they conflict with the prevailing use and character of their surroundings.

The lack of detailed information on tracts 21, 23, 24, and 26 leaves a gap in determining full compliance with this criterion.

Response to (ii):
Staff agrees with the applicant response to item "(ii)." The Tracts involved in the amendment collectively exceed 2 acres.

Response to (iii):
Staff agrees with the applicant response to item "(iii)." The proposal to classify these Tracts as Community Commercial reflects the existing land use designations of adjacent areas and does not disproportionately benefit a single or small group of landowners at the expense of others. Instead, it is likely to provide broader economic benefits through job creation, enhanced tax revenues, and expanded service offerings, thus serving the general public interest.

Staff did not find sufficient detail within in the Applicant's response to address Criterion 3 [14-3.2(E)(1)(c)]. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the proposed amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public. Therefore, it is Staff's conclusion that the proposed amendment is consistent with Criterion 3.

Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (General Plan Amendment):
"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."

Staff Response (General Plan Amendment):
Staff agrees with the Applicant's response. The proposed amendment promotes general welfare by accelerating development in the Las Soleras area, which includes completing the Las Soleras Bridge over Arroyo de Los Chamisos. This infrastructure enhancement directly benefits the public.

Staff agrees with the Applicant's response. The proposed a General Plan Amendment that offers significant public advantages. Specifically, the Applicant highlights that the effective and accelerated development resulting from the amendment will facilitate the completion of critical infrastructure, notably the Las Soleras Bridge crossing Arroyo de Los Chamisos. This critical infrastructure is as a benefit to the general welfare, indicating that the amendment provides substantial public advantages beyond mere compliance, thereby satisfying the conditions set forth in Criterion 4.

Staff finds that the proposed amendment meets Criterion 4 [14-3.2(E)(1)(d)].

Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans;	**Not Applicable**
Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.

In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."

Staff Response (General Plan Amendment): Staff agrees with the applicant's response. The applicant's proposal for a uniform Community Commercial land use designation across Tracts 19-26, combined with the uses allowed under C-2 Zoning, aligns well with the adjacent land uses. This alignment promotes a more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4.

The application outlines several key benefits that contribute to the overall welfare of the community. These include the expansion of the Las Soleras trails system and the construction of the Las Soleras Bridge, which are anticipated to improve local infrastructure and connectivity significantly. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.

Staff finds that the Criterion 6[14-3.2(E)(1)(f)] is met.

Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."

Staff Response (General Plan Amendment):
Staff agrees with the applicant's response. The applicant has referenced multiple policies that support the proposed change, which is in line with the criteria for a General Plan amendment. This proposed change does not conflict with any existing city ordinances or regulations. The applicant asserts that the development from this amendment will conform to the City of Santa Fe's land use policies and adhere to the conditions outlined in the Las Soleras Master Plan.

The applicant's response aligns with the discussions under Criteria 1, 2, 4, and 6. These criteria collectively highlight that the amendment fosters a harmonious development strategy, promotes general welfare, and corresponds with adjacent land uses and broader city policies, ensuring there are no conflicts with existing

regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
Criterion 8 [14-3.2(E)(2) Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a)the growth and economic projections contained within the general plan are erroneous or have changed;(b)no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or(c)conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Criterion Met: (Yes/No)** **Not Applicable**
The Applicant is not required to document compliance with Criterion 2, since the application does not amend land use policies.	

X. ZONING APPROVAL CRITERIA

Section 14-3.5(A) and (C) SFCC 2001 sets forth approval criteria for rezoning as follows:

(1) The Planning Commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

Table 6 Rezoning from R-3 to C-2

Criteria 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning): ***Response to Criterion (1)(a)(i):*** *"Not applicable"* ***Response to Criterion (1)(a)(ii):*** *"As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -* *26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development –*	

most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."

Response to criterion (1)(a)(iii):

"As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.

Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and

Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.

Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and

Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.

Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and

Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response (Rezoning):

(i) The applicant addressed the first criteria "(i)" as "Not Applicable." Staff analysis found that there was no mistake in the original zoning.

(ii) Staff partially agrees with the Applicant's response. The Applicant, along with the information provided in this report, effectively demonstrates a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. However, the response does not provide a detailed justification for the zoning changes across all the mentioned tracts (19-26). This lack of comprehensive detail results in an incomplete response to the criteria.

(iii) Staff agrees with the Applicant's response regarding the rezoning of Tracts 19-26 to a uniform Community Commercial C-2 district, which is in line with Santa Fe's growth and economic development plans. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.

Staff finds that the Criterion 1 [14-3.5(C)(1)(a)] is met.

Criteria 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response (Rezoning): Staff Agrees with the applicant. The application provides all components to address the criteria for a rezoning request. Criterion 2 [14-3.5(C)(1)(b)] is met.

Criteria 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning):
Staff agrees with the Applicant's response that the rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 aligns with the City of Santa Fe's General Plan and economic development goals. The proposal matches city policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the future land use map.

Staff finds that Criterion 3 [14-3.5(C)(1)(c)] is met.

Criteria 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff agrees with the Applicant's response, the land proposed for rezoning is greater than 2 acres.

Staff finds that Criterion 4 [14-3.5(C)(1)(d)] is met.

Criteria 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Rezoning):
Staff agrees with the Applicant's response that the existing infrastructure is claimed to be adequate for the proposed development. However, this assertion is primarily based on comments from the Traffic Division, Fire Prevention, Water and Sewer Divisions and Parks Division. It is important to note that the "Conceptual Test Fit" land plan, while included, cannot be used to establish compliance with the criteria since it is not an actionable item on the agenda. Additionally, Development Review Team (DRT) evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development.

Staff finds that Criterion 5 [14-3.5(C)(1)(e)] is met.

Criteria 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Rezoning):
Response to 14-3.5(C)(2)(a):
"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Response to 14-3.5(C)(2)(b):
"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

Response to 14-3.5(C)(2)(c):
"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (Rezoning):

Response to 14-3.5(C)(2)(a):

The Applicant's response mainly focuses on Tracts 19 and 20, discussing their current zoning and the proposal to change them to Community Commercial. Although the response mentions that the broader area predominantly features Community Commercial and Office zones, it does not provide detailed information on the land use classifications for each of the other tracts from 19 to 26. Thus, the response does not comprehensively address all the tracts involved in the rezoning proposal.

Response to 14-3.5(C)(2)(b):

Staff agrees with the applicant response to item "(b)." The Tracts involved in the amendment collectively exceed 2 acres.

Response to 14-3.5(C)(2)(c):

Staff agrees with the Applicant's response. The C-2 Zoning for Tracts 19-26 is consistent with the existing land use patterns in adjacent areas within the Las Soleras Master Plan. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, it is anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

XI. CONCLUSION:

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on March 9, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

The Land Use Department together with the DRT have analyzed the project. The Applicant has addressed all criteria necessary to submit an amendment for review to the Las Soleras Master Plan, Amendment to the General Plan Future Land Use Map and a rezoning for Las Soleras Tracts 19, 21, 23, 24, and 26. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

DRT Member: Leroy N. Pacheco, PE

Phil Gallegos, PE (Wilson & Company)

Dept/Div: Public Works Department – Traffic Engineering

Case No.: Las Soleras GP, Rezoning & Master Plan, Parcels 19 – 26

Case Planner: Dan Esquibel, Planner and Case Manager

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response:**
1. N/A	N/A	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response:**
1. As described and listed in the attached email from Wilson & Co. dated 3/7/24	Prior to Filing Master Plan	
2.		
3.		
4.		

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. The original approved Master Plan note 46A states: "… Beckner Road shall be constructed as a four lane major arterial consistent with Chapter 14 of the City Code unless otherwise approved by the City of Santa Fe Public Works Department (consistent with approved or amended TIA).
2. Note that the updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road as described as a condition of approval in the original Master Plan.

Explanation of Conditions or Corrections (if needed):

(see following pages for notes required)

Las Soleras Tracts 19 through 26 Traffic Study for Zone Change REVISED

From Gallegos, Phil <Philip.Gallegos@wilsonco.com>

To engineer@leroypacheco.com<Engineer@leroypacheco.com>

CC Audra Gallegos (audra.gallegos@wilsonco.com)<Audra.Gallegos@wilsonco.com>

Date Thursday, March 7th, 2024 at 11:52 AM

Leroy, I have reviewed the Las Soleras Tracts 19 through 26 Traffic Study for Zone Change and have the following comments.

It should be noted and updated in the Executive Summary and Report that the proposed zone change indicates that a four lane facility on Beckner is required between Las Soleras to east of Rail Runner Road with a dual lane roundabout at Beckner and Rail Runner. Beckner should be expanded to a 4-lane facility from Cerrillos Road to East of Rail Runner Road with a dual lane roundabout at Beckner and Wellness Way as well for system continuity. As development in the area progresses Beckner may in the future be required to expand to a 4-lane facility from Cerrillos Road to Richards Ave. with dual lane roundabouts.

In general, I concur with the findings and recommendations in the report with the following comments. The markups can be viewed on the link below. Please let me know if you have any questions or need more information. Thanks, Phil

On page 12, 16 and 19 indicate page number for the 9 other proposed development projects

On page 28 the intersection of Beckner and Las Soleras should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 30 the intersection of Beckner and Rail Runner should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 32 the intersection Number 9 Walking Rain Road should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 35 intersection number 10 Beckner and Calle de Alegria is referenced as roundabout but on page 34 is referenced as an unsignalized intersection right in/right out.

On page 36 Beckner road/Calle de Alegria is reference instead of Governor Miles/Rail Runner

DRT Member: Geronimo Griego, Fire Marshal

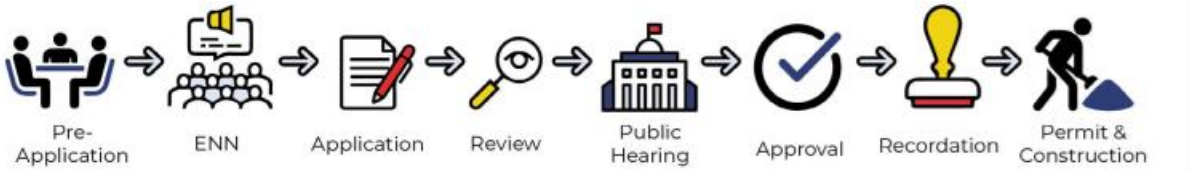
Dept/Div: Fire Prevention Divisions

Case No.: 2024-7898, 7900, 7899 Las Soleras GP, Rezoning & Master Plan, Parcels 19 – 26

Case Planner: Daniel Esquibel

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of Construction* – these conditions/technical corrections can be addressed during the construction and inspection processes.

Form Updated: March 2024

Development Review Process Flow Chart

*See the *2024 Development Review Schedule* for details

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. code provisions or other requirements below.		
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1.		
2.		
3.		
4.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. A comprehensive assessment of the fire service's capacity and requirements should be conducted for all substantial new masterplan developments.

2. Prior to the commencement of any construction, the water division and fire department must provide the approval of all infrastructure hydrants and waterlines.

3. Prior to the arrival of any combustible materials, a suitable all-weather access road capable of accommodating a 75,000-pound fire apparatus shall be provided

Explanation of Conditions or Corrections (if needed):

Subject: Case 2024-7898, 7899, 7900 - Las Soleras General Plan Amendment, Master Plan Amendment, and Rezoning

Dan,

For the subject cases, we don't have any concerns at this time from a water engineering standpoint. The existing 12" main in Beckner should be able to accommodate the changes being proposed with no issues. For the future developments that come in under the general plan and master plan, the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project.

Let me know if you have any questions.

Thanks,
Taylor

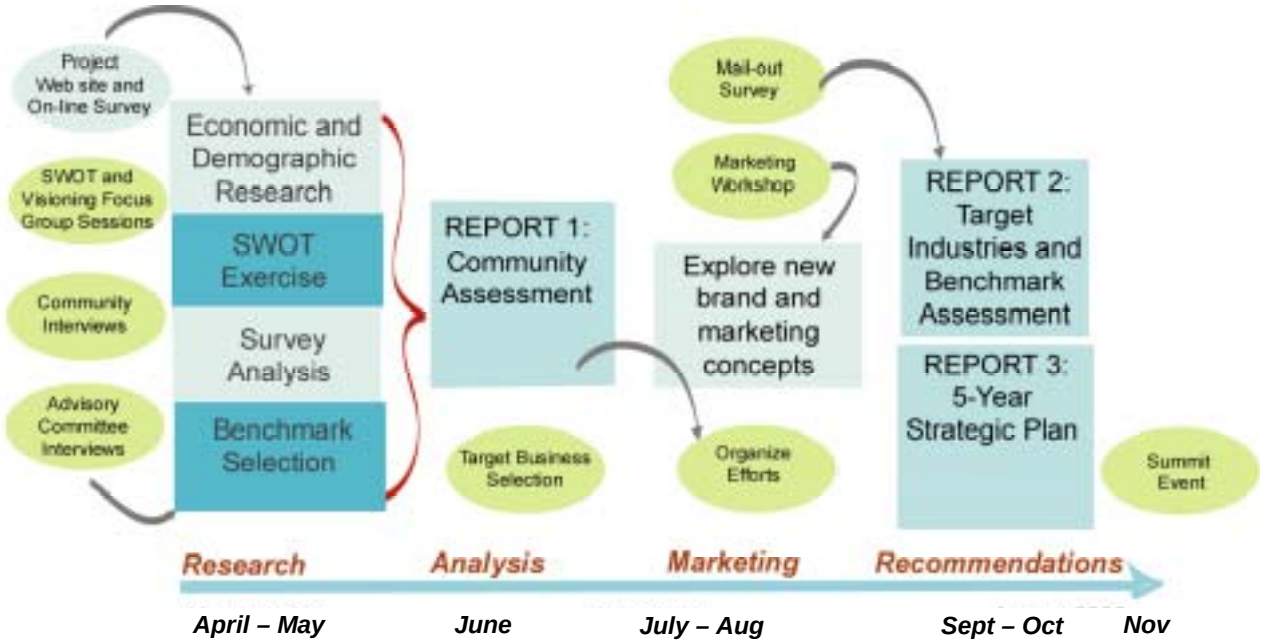
Introduction

This report contains a roadmap for Santa Fe's future economic development efforts. It reflects a planning process that has spanned the past seven months, involved hundreds of hours of research, and collected input from approximately 1,500 people in Santa Fe.



The strategic planning process began with an analysis of Santa Fe's current economic situation. This analysis, contained in *Report One: Community Assessment*, examines the strengths and challenges that Santa Fe faces in five areas that impact the city's effectiveness in economic development: business climate, infrastructure, workforce and education, quality of life, and economic development efforts. For each topic, several issues were examined and Santa Fe's performance was ranked. This report was the first step toward identifying the city's future opportunities and major areas for improvement.

Based on the results of the *Community Assessment* and input received from the community, AngelouEconomics (AE) identified seven major business sectors on which Santa Fe should focus its economic development efforts. These industries are: **Arts and Culture; Design; Hospitality; Water Conservation and Clean Energy Technologies; Software Development; Publishing and New Media; and Outdoor Gear and Apparel**. These industries should become the primary audience for future marketing efforts, and their needs should be considered in all community development activities. A description of the methodology used to identify these targets, a profile of each targeted business sector, and descriptions of the economic development efforts of several benchmark communities are provided in the second report of this project*, the Target Industry Report*. Secondary Target Industries were also identified, and included Health Services (both traditional and non-traditional), Retiree Services and Food and Beverage products.

This is the final report of the strategic planning process. It contains specific recommendations to (1) improve the city's economic health; (2) improve conditions for cultivating new target sector businesses, small entrepreneurial businesses; and (3) provide new opportunities for all Santa Fe families.

An illustration of the strategic planning process is provided on the following page.

Strategic Planning Process

Acknowledgements

The project team conducted interviews and focus groups with more than 200 individuals and organizations from the Santa Fe region, including those listed below. Their input shaped this strategy, and their future support will be critical to the implementation of the City's economic development initiative and achievement of long-term economic health.

In addition to the individuals listed above, the consulting team received **survey responses from 1,352 individuals and businesses located in the city**. The survey was a valuable tool used to measure impressions of the city's strengths and challenges and learn more about what residents believe makes Santa Fe special. We offer our gratitude to each individual who took the time to fill out the survey. Your comments helped mold the recommendations we offer in this report.

AngelouEconomics' core team for this project included Angelos Angelou, Amy Holloway, Chris Engle, Nicole Urbis, and Daniel Kah.

Executive Summary

What does Economic Development mean for Santa Fe?

How economic development is defined differs among communities. For many years, cities' economic development activities were focused on recruiting new employers. Recently, the focus of economic development in many cities has shifted, placing a stronger emphasis on community development activities that improve local workforce, infrastructure, and business climate to help local companies grow and new ones to emerge. This latter definition is more appropriate for Santa Fe.

The term "economic cultivation" has been chosen to describe Santa Fe's economic development practices. **The city's focus should be more on creating a climate that is ripe for entrepreneurship and small business success than on recruiting large companies.** The ultimate goal of economic cultivation in Santa Fe is to achieve long-term economic health. A healthy economy benefits all residents and businesses in the region, from the business community to not-for-profit organizations to the arts and to the native populations.

Overview of the Economic Development Plan

During the past seven months, AE has worked closely with Santa Fe leaders to compose an economic development strategy for the region. The driving objective of this strategy is to generate sustainable economic health and prosperity for the citizens of Santa Fe and the surrounding region.

Based on extensive research, the consulting team has developed a series of recommendations to accomplish this objective. All recommendations offered in this report are both (1) sustainable (creating consistent long-term economic growth in a non-damaging way) and (2) strategic (tailored and coordinated for meeting the city's long-term objectives).

The *Economic Development Plan* should be viewed as a living document. The New Mexico Media Strategies Report and the University of New Mexico's Bureau of Business & Economic Research's report on the cultural industries, for example, will be used to develop specific work plans for those clusters when they become available. The *Economic Development Plan* offers guidelines and techniques designed to improve the city's economic health. It provides Santa Fe with a structure to incorporate other activities, particularly specific initiatives within each targeted business sector. Other recommendations might be added or current ones eliminated as economic conditions change.

Recommendations fall into five categories:

- **Workforce development and education**
- **Entrepreneurship**
- **Sites and infrastructure**
- **Community development**

- **Marketing**

Santa Fe suffers from an increasing gap between local wages and cost of living. The gap can be narrowed through a variety of techniques – from increasing the minimum wage to assisting residents to find and finance affordable housing. These activities have already begun in Santa Fe. The Living Wage Ordinance (Ordinances 2002-12 and 2003-8) demonstrates the City's commitment to improving the incomes and wage rates of Santa Fe's citizens.

Economic development provides another approach to making it easier for Santa Feans to afford to live and work in the region. A strong economic development initiative has been laid out in this strategy. It focuses on diversifying Santa Fe's employment base through new business recruitment, expanding local companies, and supporting entrepreneurship. It contains tools that the City, the Community Development Division, and a wide range of regional organizations can use to increase the range of job opportunities available to Santa Feans. With a greater diversity of employment options comes a greater opportunity for residents to improve and employ their unique talents, generating new wealth for every Santa Fe family.

Themes of Santa Fe's Economic Development Plan

During the course of this project, several important themes have emerged in our discussions with the community. First, Santa Fe is a unique city and any new development should reflect its creative character. Second, Santa Fe wants to attract a targeted audience of visitors and businesses to the community. Tourists, for example, must come to Santa Fe with the intention (and financial wherewithal) to shop in local galleries, eat in locally-owned restaurants, and stay overnight in downtown and locally-owned accommodations. Third, Santa Feans feel a strong connection to the region's heritage. Many people who participated in focus groups and interviews, for example, have a deep desire to preserve the downtown space so that it does not become overly congested and lose its historical presence.

These themes appear throughout the Economic Development Plan. Based on these themes, we offer four overarching recommendations:

1. To be successful in economic development, Santa Fe's leaders should strive to foster a culture that creates jobs that complement the community's unique character.
2. Santa Fe cannot avoid change. The City should aggressively direct how those changes occur.
3. The key to economic development in Santa Fe is to ensure that new developments – whether it is a new civic center, new infrastructure project, or new educational program – retain the essence of the community. The essence of Santa Fe lies in its creative people, its strong history, and its core of arts and culture.
4. For the City to support a project, the project must provide new opportunities to Santa Fe's workforce.

Summary of Recommendations

To be successful, Santa Fe must develop highly integrated networks of businesses, training programs, capital providers, educational institutions, non-profit organizations, labor organizations, and government agencies. Economic development cannot be successful unless these groups work in a coordinated, collaborative fashion.

It is important that City officials adopt a more focused approach to economic development. It starts with City leaders identifying and agreeing to long-term goals. All future City decisions should be checked against these aforementioned overarching goals. Only initiatives that work toward accomplishing the City's long-term goals should be adopted. To jump-start the City's goal-setting activities, we have proposed specific goals for workforce development and education, entrepreneurship, sites and infrastructure, community development, and marketing.

A summary of recommendations is provided below. We have provided detailed action items for each recommendation within the body of the strategy.

I. Workforce Development and Education

Goal One: The community will place an increased value on education, realizing that education performance increases the quality of life for all Santa Fe residents and makes the community better able to retain a talented workforce. Pre-K - 12 education will be as strong as possible because the community invests in it. (p.15)

Strategies:

1. Help parents place a greater value on education.
2. Promote the value of quality education within the community. Turn Pre-K - 12 education into a "cause" around which the community can rally.

Goal Two: Educational and workforce development programs will be well-coordinated and in tune with the needs of the city's targeted business sectors. (p.19)

Strategies:

1. Develop an inventory of all workforce training programs in Santa Fe that prepare individuals for skills demanded by the city's targeted business sectors.
2. Closely link local Workforce Development One-Stop Centers with economic development efforts.
3. Enhance Santa Fe Community College's existing programs and start new programs aimed at the needs of Santa Fe's targeted business sectors.
4. Ensure the College of Santa Fe, the Institute of American Indian Arts, St. John's College, the University of Phoenix and branches of

Highlands University and UNM are kept up-to-date and involved in economic development.

II. Entrepreneurship

GOAL: Infrastructure, capital, and educational resources for entrepreneurs will be well networked both at the local and state level. (p.24)

Strategies:

1. Financially support the Santa Fe Business Incubator. Help the Incubator expand by offering more customized business resources. Help start-up companies by linking them to local and state financial capital.
2. Make information and training about starting businesses widely available. Celebrate entrepreneurial success stories as inspiration to potential entrepreneurs.
3. Motivate Santa Feans to start new companies.
4. Keep Santa Fe's existing small businesses strong.

III. Sites and Infrastructure

GOAL: Improvements to sites and infrastructure will consider the long-term needs of Santa Fe's targeted business sectors and small, entrepreneurial businesses. (p.32)

Strategies:

1. Take steps to make Santa Fe the water conservation and clean energy capital of the U.S.
2. Provide better infrastructure and processes to support creative activities.
3. Partner with Santa Fe County to solve infrastructure and site issues.
4. Approve and construct a new convention center that showcases the unique character of Santa Fe.

IV. Community Development

GOAL: Santa Fe's community and economic development activities support an environment that is favorable to (1) talented residents, (2) small, locally-owned businesses, and (3) targeted business sectors. (p.39)

Strategies:

1. Adopt a more business friendly attitude within City government.
2. Santa Fe's City Council should set goals for future development and allow those goals to drive decisions.
3. Provide greater support to the Community Development Division, and, particularly the Economic Development section.

4. Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.
5. Ensure that Santa Fe contains an atmosphere that is fun and attractive to young, creative people.

V. Marketing and Public Relations

GOAL: Santa Fe will engage in a targeted marketing campaign that builds local and national awareness of the city as a place to do business. (p.46)

Strategies:

1. Establish specific marketing roles for each organization currently involved in economic development.
2. Create and adopt a single economic development brand.
3. Better understand the target audiences.
4. Gain local media support.
5. Launch internal marketing.
6. Implement external campaigns.

Within these strategies, many individual action items are offered. Among these, we would like to point out five activities that are of particular significance:

1. **Construct a new civic center to replace the Sweeney Center.** The new civic center will support all of Santa Fe's target industries. The civic center should be designed to host executive level events, attracting those events that will bring the greatest benefit to Santa Fe's economy. In addition, the City should consider integrating high-end workforce training capacity within the civic center. The workforce training resources, from classrooms to high-tech audio/visual equipment, should be made available to local workforce service activities as well as to executive training events.
2. **Create a National Center for Art and Design Center and an arts incubator.** The National Center for Arts and Design will provide a single location in which multiple arts and design organizations could collaborate on projects of national significance. The one-of-a-kind concept would be modeled after national research consortia or laboratories, only with arts, rather than science, as its focus. As its first major project, the Center should consider developing a first-rate on-line Santa Fe Arts Market for selling locally produced artistic and handmade objects.

   This Center should be home to a variety of related activities, with educational programs at the core. Other activities that should be co-located within the facility include: office space for professional arts organizations and guilds; studios; exhibit space; retail shop for selling art. In the future, the campus could also contain loft apartments, a café, and an entrepreneurial resources center.

3. **Lobby the State to pass proposed legislation to create a certification program and network of small-business incubators.** The currently

proposed incubator certification program will possibly increase State funding to the Santa Fe Business Incubator. Lobby State legislators to pass this legislation. Long-term, Santa Fe leaders should work with the State to create a network of entrepreneurship one-stop shops, similar to the system utilized by the New Mexico Department of Labor. This would probably be more of a network of collaborating agencies and programs rather than an additional set of facilities. Santa Fe's leaders should work with the State to create a statewide network of small business incubators. The network of certified incubators could serve as a funnel of investment opportunities for the New Mexico Venture Capital Fund and as a built-in system of due diligence for State investment.

4. **Santa Fe should become the water conservation and clean energy capital of the U.S.** Water conservation technology companies locating in Santa Fe will be in a market with high internal demand for their products and will, therefore, be in close proximity to their customers. Santa Fe should create programs that promote the adoption of energy conservation while promoting a "buy local" campaign that would attract new clean energy providers to Santa Fe. Credits and incentives for consumers can be tied to their purchase from local suppliers. Santa Fe is an ideal pilot market for several technologies and should do what it can to bring those suppliers to the region.

5. **Santa Fe's leaders should agree to goals that will promote the long-term health of the local economy**. The community is widely known as a place that is unfriendly and difficult for business. This distinction makes it difficult for Santa Fe to remedy its suffering economic conditions. The City must take several initial steps before any economic recovery can occur. First, City leaders must agree that all decisions will be driven by one simple goal: To attain healthy economic conditions that will preserve Santa Fe's unique character and open opportunities for all Santa Fe families.

   Within City government, several actions will help the city create an easier environment in which to expand and start businesses. First, the City should strengthen and expand the Small Business Ombudsman position. Second, the City should provide strong support to the Community Development Division and Economic Development section. Economic development cannot occur unless this division is stable and well funded. Finally, the City should support a strong internal and external marketing effort. Marketing activities will require financial and human power resources from the City as well as other Santa Fe organizations.

The activities outlined in this strategy will require five years to complete, and the results of these activities may not be immediately apparent. Santa Fe's leaders must stay committed to the overarching goal of creating a healthy economy.

1. Workforce Development and Education

This project marks the beginning of a long-term economic development effort to improve the atmosphere in Santa Fe for growth of small to medium-sized businesses. Workforce development and education recommendations have been developed to help Santa Fe achieve the following three goals:

1. **The community will place an increased value on education, realizing that education performance increases the quality of life for Santa Fe residents and makes the community better able to retain a talented workforce.**

2. **Educational and workforce development programs will be well-coordinated, providing services that are in tune with the needs of the city's targeted business sectors.**

3. **Santa Fe's workforce development programs will offer advancement opportunities for individuals from all socioeconomic backgrounds.**

Santa Fe's workforce development programs should offer advancement opportunities for individuals from all socioeconomic backgrounds. Santa Fe's recommended targeted business sectors (see p. one)were selected, in part, because they contain a wide variety of occupations and ample opportunity for workers to advance their careers. (See the Target Industries Report for more detail on the target industries and how they were identified.)

Workforce development and economic development are closely linked. A strong workforce leads to business recruitment. A strong industry base generates a workforce that leads to entrepreneurship and long-term economic growth. Considering Santa Fe's current economic conditions, community leaders should make workforce development a top priority. A strong pool of workers is critical to business expansion and recruitment to the region, industrial diversification, and growing the population of young professionals.

For Santa Fe to experience the greatest possible benefit, education and workforce development activities must be viewed as an integrated continuum that spans from infant care to adult education. We encourage Santa Fe to communicate the workforce skill needs of the targeted business sectors to all educators. Show them how entrepreneurial skills, for example, will help students succeed once they graduate. Provide them with examples of other communities that have integrated entrepreneurship education into the early education curriculum.

Businesses in the targeted business sectors that have been recommended by AE demand that the best possible Pre-K - 12 education system, workforce training, and college programs are in place to prepare the workforce to succeed in targeted industry businesses. This ensures that they will be able to retain and recruit skilled workers, managers and executives who demand that their children

receive an excellent education. It also shows them that the community is willing to invest in itself, its future, and therefore will support them into the future. Goal One: The community will place an increased value on education, realizing that education performance increases the quality of life for all Santa Fe residents and makes the community better able to retain a talented workforce. Pre-K - 12 education will be as strong as possible because the community invests in it.

Basic education should be considered the foundation of successful economic development. Those regions across the U.S. that have invested in basic education are also the most successful in growing high tech, high wage employers. The two go hand-in-hand.

Before an aggressive economic development campaign is launched, it is essential that Santa Fe invest in the core of the community: local Pre-K - 12 education, the downtown, and infrastructure developed to support new economy businesses. This investment will have much greater pay off in the long term by helping the city retain its current employers and high skilled workers, as well as renew a positive spirit across the community.

Strategy One: Help parents place greater value on public education.

Actions

1. Get parents involved in the schools

- Adopt a take-home computer program. In this program, schools lend computers to parents for 4-6 weeks at a time. To be eligible for the program, parents are required to take an orientation workshop that teaches them the basics of operating a computer, common software packages, and how to use the Internet.
- Use local school facilities for evening community college or university classes. Courses could be for-credit or continuing education, ranging from computer literacy, self esteem, English as a second language, or literacy. Teachers or other parents can teach classes. Invite a local non-profit to fund a babysitter to be on-site for the duration of the class period.
- Start a cultural orientation program to help parents, teachers, and students understand and appreciate the culture of their peers.
- Use art exhibits and performances by students to attract parents to the schools and enhance cultural understanding.

2. Provide parents the tools to support learning at home

- Offer workshops, hands-on training, and home visits that train parents how to teach kids at home. Parents can make educational materials such as flash cards and board games at the workshops that they take home and use with their children. Alamo Navajo Community School provides excellent examples of effective programs:
    - Parents and Teachers as Partners Program – regularly scheduled meal shared by teachers and parents including a workshop on language/math skills development, reading, cooking with children, etc.

- Parent-Teacher meetings and open houses are scheduled at the same time as other community events (e.g. sports events) to attract more parents
- Bilingual home school liaisons make about 25 home visits per month to personalize school communications

Strategy Two: Promote the value of quality education within the community. Turn Pre-K - 12 education into a "cause" around which the community can rally.

Action:

1. ***Launch an internal marketing campaign to inform parents (and students) about the value of Pre-K - 12 education.***
   - Each school should adopt a program aimed at keeping parents informed about school events. Consider the following examples that have worked for other communities:
     - Weekly take-home folders that include a parent participation sheet, information on upcoming events, recent curriculum activities, and graded tests. Parents sign and students return to school. One single format could be developed for the Santa Fe School District- with easy ways for each school to customize it. Ideally, take home information would be available in both English and Spanish.
     - Ask for parent volunteers to serve on a phone chain to call other parents with updates about school events, get feedback, and answer questions.
   - Create a series of public service announcements aimed at instilling the value of public education in Santa Fe residents.
     - Work with school district to assign an internal marketing task force that meets for six months to one year. The task force will be responsible for organizing and overseeing the communication campaign. Task force members should include: representatives from the local school district, the parent-teacher organizations, education-related non-profit organizations, Santa Fe Community College, and other workforce service providers.
     - The internal marketing task force should seek a local advertising or public relations agency that will provide services pro bono or for a reduced rate.
     - Funding for the communications campaign could come from grants from local, state, or national education-related non-profit organizations and foundations.
     - Announcements should be based around a central theme, but available in various media forms, including radio spots, newspaper advertisements, posters and fliers, or television spots. Both English and Spanish language announcements are necessary.
     - Possible themes include: (1) the importance of staying in school; (2) opportunities for high school graduates other than attending a four-year university; (3) how students can help their families even more in the long term by continuing education or training after high school; (4) post-high school work, training, and education opportunities located in Santa Fe to retain young people; (5) the

benefits of investing in Santa Fe's schools to residents who do not have children in the school system.

- Start a school-by-school campaign to show middle school and high school students the range of alternatives to attending a four-year university.
    - Ask representatives from Santa Fe Community College, apprenticeship programs, SER Jobs for Progress and non-profit organizations to present their programs / non-university alternatives during classes or at after-school events
    - Ask representatives from Santa Fe Community College, apprenticeship programs, SER Jobs for Progress, and non-profit organizations to compile a short, easily understandable brochure on the programs they offer to high schoolers and recent graduates. Provide this brochure to all high school and junior high school guidance councilors. Place in locations where students congregate: libraries, after-school hangouts, shopping malls.
    - Over time, develop a Web site containing resources for non-university bound youth. The Web site should contain information about non-college options, links with training organizations, apprenticeship programs, and the community college. It could also contain job postings.
- Launch an Annual Education Day, a one-day outreach and educational event at which parents, teachers, non-profits, and community leaders share information about local schools, programs, services, and successes. The event could provide training to parents about how to continue the educational process at home.

Possible Funding Sources for Pre-K - 12 Education Improvements

- G&T Dropout Demonstration, Indian Health Services, Title IX
- Parent-Teacher Organization fundraising http://www.ptotoday.com/fundraising.html
- US Department of Health and Human Services GrantNet http://www.hhs.gov/grantsnet/
- State of New Mexico Department of Education http://164.64.166.11/fedpro/programs/index.html
- Edna McConnell Clark Foundation (http://www.emcf.org/)
- This site contains links to several good drop-out prevention programs: http://www.dropoutprevention.org/resource/grant/funding.htm
- The Foundation Center is a good overall Web site for researching grant funding available in the U.S. for a wide variety of causes. Their education page is at http://fdncenter.org/research/grants_class/taxb.html

Other resources:

- This site contains a listing of and links to a variety of non-college options for high school students: http://www.nohum.k12.ca.us/ahs/career/non_col.html

Goal Two: Educational and workforce development programs will be well coordinated and in tune with the needs of the city's targeted business sectors.

The recommended targeted business sectors will determine more than Santa Fe's audience for its marketing efforts. Rather, the needs of targeted business sectors should drive the infrastructure that Santa Fe develops, the business climate that it fosters, and the workforce development and educational programs that it supports. Economic development efforts will be most successful if all aspects of community development are in tune with targeted business sectors' needs and are well coordinated.

To target workforce development programs and educational programs, it is important to first understand the skill sets that are required by Santa Fe's targeted business sectors. The *Target Industry Report* provided a list of each targeted business sector's predominant occupations. The end of the workforce development recommendations section of this report (page 24) contains a table summarizes the workforce needs of Santa Fe's target industries and illustrates how they overlap with one another.

In the following section, we offer recommendations for programs at Santa Fe Community College that would help the College, and the community, better train people for targeted business-appropriate occupations. These programs also provide opportunities for Santa Fe residents of all skill levels to improve their education and become better qualified for the city's targeted business sectors.

Strategy One: Develop an inventory of all workforce training and college programs in Santa Fe that prepare individuals for skills demanded by the city's targeted business sectors.

During public input sessions, one predominant issue that emerged was the difficulty in finding information on workforce development and educational options. Individually, while the community college, College of Santa Fe, the Institute of American Indian Arts, St. John's College, University of Phoenix, one-stop center, and not-for-profits offer good information about their own programs: no single source of information is currently available.

To involve all Santa Feans in workforce development and education, this single source of information should be available in both print and on-line formats, and available in both English and Spanish.

Actions:

1. ***Develop the inventory and make available in print and on-line formats.***
    - The inventory should contain a listing of programs. Within each program, include information on eligibility requirements, cost, time required to complete the program, and possible career tracks for individuals completing the program.
    - The on-line inventory should allow users to sort based on all criteria: by eligibility requirements, by time to complete and cost, and by potential career tracks.

- Ensure that the inventory's Web site address is simple and memorable. (The inventory could also be made available on SFEDI's Web site. http://www.sfedi.org/workforce, for example.)
- Distribute the inventory and Web site address to a wide range of organizations in Santa Fe, including: One-Stop Centers; local high schools; Santa Fe Community College; the City of Santa Fe; local libraries; faith-based organizations, and; non-profit organizations.

2. ***Begin a series of informational sessions on workforce training options in Santa Fe neighborhoods and community organizations.***
   - Community outreach may be a more effective way to provide workforce service information to Santa Fe residents. Plan a series of informational sessions at local schools, faith-based organizations, and recreation centers.
   - Ask attendees to fill out a brief survey to determine their educational and employment background.
   - Bring one-stop shop employees to the event to provide one-to-one counseling on career opportunities.
   - Follow up with attendees after the session to provide them with additional information. Review survey responses to estimate what services may be more appropriate for each individual, and use this profile to determine the most appropriate course of action.

Strategy Two: Closely connect local Workforce Development One-Stop Centers with economic development efforts.

Actions:

1. ***Train One-Stop Center employees on the occupational and skill needs of Santa Fe's targeted business sectors.***

2. ***One-Stop Center career councilors should direct clients to programs at Santa Fe Community College and other workforce service providers that train workers for targeted business sectors' skills.***
   - Core skill requirements for all targeted business sectors fall into several broad categories, including computer training, design skills, creative skills, small business management, and hospitality.
   - One-Stop Centers should utilize the inventory of targeted skills programs as a tool to assist their clients.

3. ***Widely promote One-Stop Center services across Santa Fe. Local residents may not be aware that those services are available.***
   - Links to the One-Stop Center and future inventory of targeted businesses' training program Web sites should be widely available on all major community Web sites; including, for example, the City, County, Chamber of Commerce, SFEDI, Santa Fe Community College, public schools, and non-profit organizations.
   - Include the One-Stop Center (http://www.dol.state.nm.us/wdc15.htm) and/or targeted businesses' training programs Web site in the (earlier recommended) public service announcements. Consider simplifying the

Web site address to Santa Fe's One-Stop Centers. (www.santafejobs.com, www.worksantafe.com, or www.traintowork.com)

Strategy Three: Enhance Santa Fe Community College (SFCC)'s existing programs and start new programs aimed at the needs of Santa Fe's targeted business sectors.

Actions

1. Target SFCC programs around the design industry.

- The SFCC's campus plan calls for building a performing arts facility on campus. The facility should include a multi-purpose auditorium for theater and musical productions, exhibit, and studio space. Invite the community to utilize the center for Santa Fe film and music festivals, and offer free shuttles to auditorium from downtown during those events.
- Develop a core "design curriculum" that serves all design-related majors.
  - Currently, programs in interior design, introductory architecture, studio arts, and fine woodworking, for example, share similar skill sets.
  - The core design curriculum starts all design-related majors with the same coursework. Electives are used to refine the individual's skills into specific design fields as they progress through the program.
  - The core curriculum helps students engage with other creative individuals and provides them with a set of design skills that are transferable between industries.
  - Illustrate the new economic development marketing theme at the new performing facility by incorporating the theme "Creative Spirit of Santa Fe" into its design.
- Adopt a new curriculum / professional development courses to train film crews and pre- and post- production workers.
  - Identify what infrastructure is needed to support Santa Fe's burgeoning film industry.
  - Meet with Garson Studios and other local film support businesses and ask them what services / training they would like to see emerge at SFCC.
  - The curriculum should be coordinated with advanced film support courses offered at the College of Santa Fe.
  - Explore the potential for SFCC to host a pre- and post-production house. The center would provide on-the-job training for students and would be a valuable resource to professional film crews coming to the Santa Fe area. Between the SFCC, the College of Santa Fe and private business, a full range of pre- and post-production facilities should be available in Santa Fe.

2. Create innovative programs for the hospitality industry.

- Connect SFCC's hotel and restaurant management and culinary arts programs to growing needs in the film industry. Set catering and limousine services, for example, could be provided to film crews through the community college, providing students with good on-the-job training experience and would meet a demand.
- SFCC could develop a small hotel and restaurant next to the campus.

- Room rates and meal prices would be offered at a discount.
- The hotel and restaurant would employ students, providing training ground for hotel and restaurant management and culinary arts students. It could also offer guests alternative health care and spa services, which could be provided by individuals just entering the field.
- The design of the hotel should integrate water and energy conservation technologies and allow students to contribute to its design.
- Clients of other workforce training providers, such as SER Jobs for Progress, could also work at the SFCC hotel "incubator."
- If a SFCC hotel "incubator" is not feasible, develop an intensive internship program with local hotels, restaurants and caterers.

4. ***Develop curricula that help Santa Fe become a water and energy conservation role model for other cities.***
   - Create a water conservation curriculum.
     - The curriculum would combine water policy studies, a knowledge of water conservation techniques, and tools for students to design their own water conservation methods / technologies.
     - SFCC could reserve space on or off campus for a light manufacturing center or laboratory in which students could develop their own water conservation products.
     - Connect the program to the SBDC so that students with good business ideas can receive entrepreneurial support.
   - Adopt an alternative fuels curriculum.
   - Professors and students of the program should offer free community workshops that instruct homeowners, business owners, and Pre-K - 12 students about simple methods of conserving water and energy. This EPA Web site provides a good starting point for established curricula: http://www.epa.gov/teachers/curriculumconservation.htm
   - Encourage local real estate developers and businesses to engage students of the program in design of future developments. As part of the curriculum, require one class in which students form teams and are assigned to local businesses and developers to develop an innovative water or energy conservation technique for their facility.
   - Examine top conservation curricula at other US community colleges as models for the SFCC program. This link contains a ranking of the top 50 conservation and natural resource programs at communities and universities across the U.S. http://www.ccweek.com/top100/pdf/2001/topassoc-9900-cons&rnr.pdf
     - Tailor Santa Fe's program to the needs of water conservation and alternative fuels.

5. ***Enhance software and information technology classes to meet the needs of Santa Fe's targeted business sectors.***
   - Survey or organize a forum of Santa Fe bioinformatics and other information technology companies. Ask these businesses to describe the types of workers that they need. Ask them to participate in designing an ideal curriculum for an Associate's Degree and continuing education programs.

- Entice individuals with high tech skills to serve as part-time instructors. The Community College has a difficult time offering the high salaries demanded by individuals with high-tech skills and computer science knowledge, yet Santa Fe has a large population of these individuals. Rather than seeking full-time professors, ask young professionals and new retirees to teach one class per semester.
- Build computer training programs that teach desktop publishing, commercial design, film and sound editing, graphic design, and animation. These courses can be offered as part of a formal Associate's Degree curriculum and continuing education. These skills will be in demand by Santa Fe's targets, particularly in the arts and culture, design / film, and publishing and new media fields.

Strategy Four: Ensure that the four-year and graduate colleges and universities in the region, e.g. the College of Santa Fe, the Institute of American Indian Arts, St. John's College, the University of Phoenix and branches of Highlands University and UNM, are kept up-to-date and involved in economic development.

Actions

1. Inform the four-year and graduate colleges of the workforce needs of each targeted business sector.

- Identify degree programs within each College that fit with target business requirements.
- Include a description of these degree programs within future economic development marketing efforts

2. ***Work with the four-year and graduate colleges to retain graduates in Santa Fe.***
   - Each semester, meet with students within those degree programs to inform them of the opportunities within Santa Fe for graduates of their programs. Ask local target sector business executives to speak to the students.
   - Ensure the College's career placement centers are fully aware of job opportunities within Santa Fe.
   - One to two times each year, speak at a faculty meeting at all three colleges. Inform professors of economic development activities. Give them information about Santa Fe that increases the attractiveness of the community to 18-25 year olds.

3. ***Invite representatives from the four-year and graduate colleges to participate in prospect visits.***
   - When economic development prospects come to Santa Fe, invite College representatives to meet with the prospect or organize a brief tour of the Colleges' campuses.

4. ***Invite representatives from the four-year and graduate colleges to participate on economic development-related committees and task forces.***

Occupational Comparison of Santa Fe's Target Industries

Major Occupations	General Work Skills	Technical	Industry: Art and Culture	Design	Hospitality	Conservation Technologies	Software Development	Publishing and New Media	Outdoor Gear and Equipment

2. Entrepreneurship

GOAL: Infrastructure, capital, and educational resources for entrepreneurs will be well networked both at the local and state level.

A critical aspect of building sustainable economic competitiveness is linking economic performance to social cohesion. The stimulation of entrepreneurship through the formation and development of new commercial businesses and social enterprises can play a key role in creating a diversity of new jobs and bridging the gap between income levels and cost of living. The entrepreneur in the community is a primary contributor and mobilizer of resources to develop the economy, a provider of employment for others, and a stabilizing factor in the society.

Improvements to the entrepreneurial climate, both in Santa Fe and the state of New Mexico, will benefit not only potential business owners, but also the small businesses that are already in operation. An entrepreneurial climate is well suited for Santa Fe's creative, independent-minded population.

AE recommends that entrepreneurship drive all future economic development activities for the following reasons:

- Entrepreneurial activities are a productive outlet for energies of enterprising and enthusiastic people.
- Small businesses create jobs at relatively low capital cost and low environmental impact, especially in the fast-growing service sector.
- Small businesses develop a pool of skilled and semi-skilled workers who are the base for industrial expansion.
- Small businesses are a source of innovation in products, services and techniques.
- Entrepreneurs can contribute new ideas to economic development initiatives.
- Small businesses serve a social function by creating career opportunities and upward social mobility, and by preserving, in many instances, a set of values.
- Provide information at One-Stop Centers related to entrepreneurship as a career option – linking One-Stop Centers to local SBDC, providing "guide to starting a business in Santa Fe" at one-stop center.
- An entrepreneurial approach to economic development also benefits larger businesses that will be attracted to Santa Fe's unique character.

Small businesses are currently the crux of the Santa Fe economy, and local leaders should support them. The following section offers recommendations for boosting entrepreneurship and small business growth in Santa Fe.

Strategy One: Financially support Santa Fe's business incubator. Help the incubator expand by offering more customized business resources. Help start-up companies by linking them into local and state financial capital.

Actions:

1. ***Expand the Santa Fe Business Incubator to provide business resources appropriate to the targeted business sectors.***

   The most successful business incubators are those that provide more than just reduced rent office space and furniture for tenants. Like the current Santa Fe Business Incubator, they combine office space with knowledge – such as an SBDC office or other mentoring organizations - and are closely connected with local community colleges and universities. They provide first-rate telecommunications infrastructure, conference facilities, business services, and shared laboratory or manufacturing space. A good incubator will become a gathering place for the community for after hours networking events.

   The Santa Fe Business Incubator should also expand its connection to professional business services firms. For example, the incubator could assign volunteer task forces of service providers (e.g. comprised of one accountant, one attorney, and one marketing/advertising firm) to mentor companies during their time at the incubator. This benefits the companies as well as the volunteers, who can view their work with the incubator as business development. Marketing assistance, in particular, should be offered to incubator companies. Assistance should come from local advertising or marketing agencies that offer their services at a pro-bono or reduced rate, or by teams of students from SFCC or the College of Santa Fe.

2. ***Lobby State legislators to pass the current proposed legislation (embedded within the SBDC bill) to certify incubators and to match funding from the State to local incubators.***
   - The successful Santa Fe Business Incubator could serve as a model around which other incubators in New Mexico could be developed.
   - Incubators should be used as a place that sets standards for small business development.
   - The network of certified incubators could serve as a funnel of investment opportunities for the New Mexico Venture Capital Fund as well as serving as a built-in system of due diligence for State investment.

3. ***Work with the State, UNM, the Santa Fe Business Incubator, SFCC-SBDC and SCORE to set up an entrepreneurship one-stop shop center similar to workforce development centers.***
   - A one-stop shop entrepreneurship center would offer the same coaching and information services such as an SBDC combined with the business incubator services of the Santa Fe Business Incubator.
   - The one-stop shop should be established in a central location to provide the greatest access to all Santa Fe residents.

4. ***Establish a Small Business Enterprise Director within the Community Development Division.***
   - This individual should be responsible for: overseeing the entrepreneurship center; working with the SBDC and Incubator in keeping the community informed about how to start a company in Santa Fe; promoting Santa Fe as a good location for entrepreneurship; working with SFIBCA on creating a strong "buy local" campaign; developing and maintaining a searchable on-line inventory of all entrepreneurship resources in the region; and helping entrepreneurs and local small businesses navigate City processes and regulations.

5. ***Establish an arts incubator at a central location in Santa Fe.***
   - The campus should be home to a variety of related activities, with educational programs at the core. Other activities that should be co-located within the facility include: office space for professional arts organizations and guilds; studios; exhibit space; retail shop for selling art. In the future, the campus could also contain loft apartments, a café, and an entrepreneurial resources center.

Strategy Two: Make information and training about starting businesses widely available. Celebrate entrepreneurial success stories as inspiration to potential entrepreneurs.

Actions:

1. ***Involve The Santa Fe New Mexican in covering success stories of local business startups.***
   - Potential entrepreneurs will find inspiration from other individuals who have successfully started businesses.
   - Celebrate the success of local small businesses by featuring them in local news publications. Propose a schedule of small businesses to feature each month to make it easier for The Santa Fe New Mexican.

2. ***Santa Fe's numerous non-profit organizations are entrepreneurial businesses. Provide these organizations with good information to help them increase their financial capacity.***
   - Numbering almost 500 in Santa Fe, non-profits make up an important part of employment and activity in the community.
   - Non-profit organizations should be viewed as entrepreneurial small businesses.
   - Provide information to non-profits to help them learn how to increase their financial capacity.
   - Fund a series of 501c3 training seminars that train managers of non-profits how to be better business people. There are numerous consulting companies that provide non-profit training, as well as on-line guides that provide non-profits with helpful business tools. Check out sites such as: www.onPhilanthropy.com; www.npguides.org; or www.charitiesusa.com which links non-profit to service providers across the U.S.

- Encourage participation in *NGO New Mexico*, New Mexico's central non-profit business association.
- Collaborate with NGO New Mexico to sponsor monthly networking and training events. The training events should be the main vehicle for distributing information about how to make a non-profit profitable.
- NGO New Mexico could create a Web site listing all non-profit organizations, sortable by their service, and containing links to and contact information for each organization's Web site. Examine sites such as www.GuideStar.org and www.envirolink.org as examples of structuring a database of non-profit organizations.

3. ***Develop a single Web site containing an inventory of Santa Fe's entrepreneurship resources. Make the Web site name simple and memorable. Market the Web site address across the community.***
   - The Web site could be developed and maintained by several organizations, such as the Santa Fe Incubator, SCORE, the SBDC, or the (possible future) entrepreneurship one-stop shop.
   - Possible Web site names: www.etools.com or www.santafestartup.com

Strategy Three: Motivate Santa Feans to start new companies.

Actions:

2. ***Streamline the City's permitting process for events, new construction, and new business expansions in Santa Fe.***
   - Focus groups, interviews, and surveys have revealed that many businesses and individuals have experienced difficulty from the City in getting permits for new ventures – from construction or expansion of new facilities to permits for small weekend festivals.
   - Santa Fe's permitting process needs to be thoroughly reviewed and compared against the requirements of targeted business sectors.
   - Santa Fe's City government should commit to easing and shortening the permitting process within one year.
   - The City of Santa Fe's Web site should contain a page dedicated to simply outlining the permitting process and providing downloadable versions of permitting applications.
   - The City of Santa Fe's web site should be reliable and offer current and accurate information.

3. ***Consider waiving permitting fees for small businesses locating in targeted areas of Santa Fe (fees are already waived for certain affordable housing projects).***
   - Small businesses are interested in saving money at every possible point.
   - Waiving permitting fees is not a cost, but foregone revenue for the City.
   - Waiving permitting fees for small businesses moving into key areas of the city, downtown for example, will help small businesses and make a statement that the City supports them.

4. Expand the City of Santa Fe's Small Business Loan program.

- The Small Business Loan program is an important tool for encouraging the growth of local businesses and companies targeted in this economic development plan.
- Leverage the program with additional state and federal funding.
- Restore the program to its original funding levels.
- Take steps to ensure that the entire community is aware of the program and has easy access to it.
- Provide information about the program in the (proposed) entrepreneur resource center.

4. Utilize the results of the New Mexico Media Strategy Report to develop a work plan for the digital and new media industry cluster.

- Look at cities that have fostered the film industry. Identify targeted infrastructure improvements, permitting processes, training programs and other incentives that are geared to the needs of the industry. Draft necessary ordinances to implement those inducements in Santa Fe.
- Austin Film Commission and North Carolina (Advantage West) are models.
- Model a one-stop shop permitting process for the film industry after other good examples, such as Rio Rancho, New Mexico (http://www.rioranchonm.org/film_industry/#One); Film in Florida (http://www.filminflorida.com/prl/perm.asp);

Strategy Four: Keep Santa Fe's existing small businesses strong.

Santa Fe's future economic health will largely be determined by the amount of local spending at local businesses. Every transaction involving a business outside of the area causes money to leak out of the local economy. While seemingly insignificant when considering a single purchase, the sum of these effects is huge across an economy the size of Santa Fe's. *For more information, see AE's Small Business Report, completed for the Santa Fe Independent and Community Alliance.*

A strong tourism economy and large base of unique cultural assets require that city leaders pay particular attention to the role that small businesses play. Eighty-five percent of all businesses in Santa Fe employ fewer than 20 workers. Of these small businesses, over 90 percent are locally-owned. According to the U.S. Small Business Association, 3,900 Santa Fe companies employ fewer than 20 people. This is almost five times the number of all other companies combined.

The last five years, however, have seen a downward shift in the percentage of independently-owned companies in Santa Fe. Almost all industries experienced a decline in independents' share of both employment and number of establishments. The largest percentage drop was in retail, where current levels of independence (approximately 50 percent of all retail firms) are well below that

of the nation (almost 90 percent) and has dropped 40 percent in the past five years. This industry, more than any other, directly affects households and quality-of-life indicators. The change threatens the local diversity found in Santa Fe shopping and endangers the unique character of the area.

Actions:

1. Initiate a "buy local" campaign.

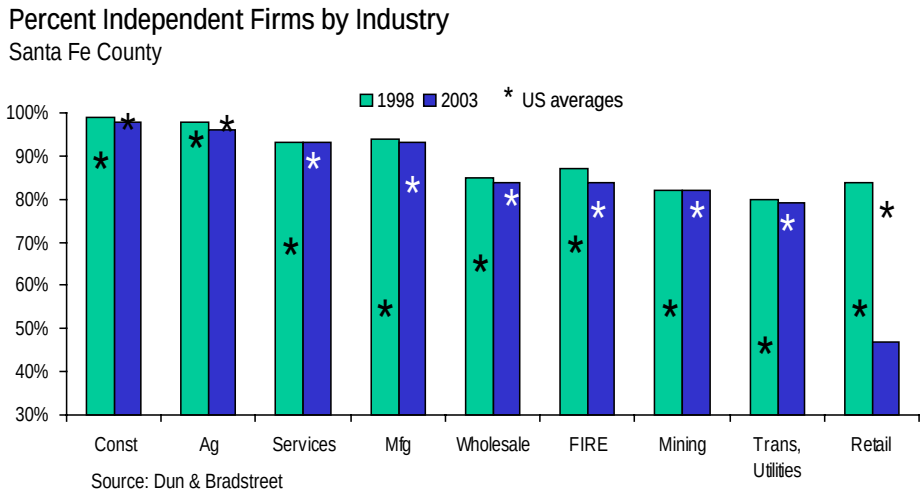
- Support the Santa Fe Independent Business and Community Alliance (SFIBCA).
- Provide funding or other resources to the SFIBCA for launching a "buy local" campaign.
- The campaign should educate local residents and businesses on the importance of buying from other local businesses.
- Each campaign piece should contain a different factoid pointing out the economic and cultural benefit of purchasing products and services from independently-owned small businesses.
- AE's *Santa Fe Small Business Report* provides data and survey results that support the notion of buying local (prepared for the SFIBCA in November 2003).
- To kick off the campaign, prepare a press release highlighting the results of AE's Small Business Report. Distribute the press release to local newspapers, alternative magazines, radio stations, and television stations. Print a series of flyers and direct mail postcards highlighting the main points of the study. Ask local business owners and community organizations to post the flyers in their establishments and to mail out the postcards to their clients.

2. Make downtown and other Santa Fe business districts more accessible to patrons of small businesses.

- The City should make supporting the needs of small, locally owned business a goal against which future decisions are measured.
- The best way to encourage residents to buy locally is to make access to independently-owned businesses convenient. Allow for mixed use developments where retail and small service businesses are intermingled among residences.
- Make downtown more pedestrian- and cyclist-friendly. Repair sidewalks so that shoppers and business people have a safe place to walk. Create a network of bike paths and lanes. This will encourage more pedestrian traffic and reduce automobile traffic in downtown Santa Fe. It will improve access to small downtown businesses and encourage residents who may have been frustrated by limited downtown parking to start shopping in downtown again.
- Improve parking in downtown. Struggles with parking often drive shoppers from downtown and towards big-box retail and malls. Offer free parking, enhance existing parking, and provide free shuttles around town. Encourage business practices that make parking less important, like home delivery of groceries and large bulky items.
- During the weekdays, most household shopping occurs after work, between 7 and 10 p.m. Encourage downtown businesses to stay open until 9 p.m. If it is difficult for small businesses to stay open that late

every night of the week, ask shop owners to agree to the same one or two evenings a week in which they stay open later.

- Start a monthly downtown celebration. In Austin, for example, every first Thursday of the month, stores in one shopping district stay open until 10 p.m. The sidewalks are filled with local artists and merchant booths selling wares. Local bands provide live music in the street. First Thursday now attracts more than 10,000 people every month.
- Provide adequate security downtown to help nighttime shoppers feel comfortable.



3. Identify business, historical and cultural districts that are suitable for economic development initiatives.

- Recommendations for downtown can be applied to any business or cultural districts.
- Support neighborhood/business events such as the Second Street Experience and explore developing similar events in other districts.
- Initiate planning with two districts per year.
- Link "buy local" initiative to district planning.
- Develop programs that highlight the economic benefits of historic preservation and historic districts.

4. Establish metrics for tracking the success of the "buy local" initiative.

By determining a set of tangible goals, communities establish clear priorities and are able to assess the performance of their programs, allowing more efficient use of resources. Metrics could include the following:

- *Sales receipts of downtown merchants.* Sales of downtown shops and service providers should increase a minimum of 10 percent each year if the buy local initiative is successful.
- *Percentage of independent businesses in Santa Fe.* For most industries, Santa Fe exceeds the national average in the percent of independently-owned businesses (see below chart). Increasing the percentage of locally-owned retail establishments could become a goal for the city.

- *Percentage of major employers headquartered in Santa Fe.* This figure points to the importance of home-grown successes. These companies tend to be more philanthropic and provide greater

economic independence for the region. The information for this metric could be measured from annual reports of local business activity.

- *Duration of local businesses*. This factor could be measured by counting the number of businesses that were established three years ago and are still in business. This method explicitly measures the ability of local businesses to survive in Santa Fe's economy. Santa Fe will know that it is supporting local, small businesses when the number of businesses surviving longer than three years increases. The City's data on business licenses provides this information.
- *Percentage of companies adding employees in the past year*. Expanding companies are as important to the economic health of a region as new companies. This metric can be easily obtained through government employment statistics and surveys.

Strategy Three: Sites and Infrastructure

GOAL: Improvements to sites and infrastructure will consider the long-term needs of Santa Fe's targeted business sectors and small, entrepreneurial businesses.

When companies are asked to rank the factors that most affect which state or region they select to locate in, workforce and education considerations are the most important, followed by access to customers and suppliers and business climate. The only infrastructure that is often mentioned in a regional context is transportation.

When choosing a specific development location within a state or region, however, the availability of infrastructure grows in importance. As infrastructure is available in almost every city, business prospects will compare a region or city's infrastructure (availability and pricing.)

The reason for the apparent contradiction in the importance of regional infrastructure versus specific sites is that larger areas such as regions or states possess sufficient infrastructure somewhere, so it is not a major corporate consideration until after the general location is picked. Therefore, although not the top priority to get a company to choose a region, once they have chosen the Santa Fe region, it is imperative that adequate infrastructure - water, sewers, streets and mass transit – be available to support business growth and development and that this infrastructure fare competitively with that of another region.

Santa Fe's most significant infrastructure issue (and economic development issue) is the region's water shortage. All economic development activities must consider the area's severe water constraints. The Mayor has stated that "water" is his number one goal and the City is in the process of trying to secure funding for the Diversion Plan, which will address this concern. The purpose of the Diversion Plan is to redirect surface water from the Rio Grande river into Santa Fe. Though the Diversion Plan will provide some relief to the city, preserving water and the area's unique environmental characteristics will be a goal of the city for many years to come. In turn, the target businesses recommended for Santa Fe in the *Target Industry Report*, will be environmentally sound and will require minimal water.

Strategy One: Take steps to make Santa Fe the water conservation and clean energy capital of the U.S.

Actions:

1. Incorporate water conservation and clean energy technologies into the design of all current and future public buildings.

2. Begin an annual student competition for design of water conservation innovations.

- The winner could receive funding for further development of the innovation, an internship with a local building contractor, or an opportunity to implement it on a test site.

3. Promote Santa Fe to expanding and relocating water conservation technology companies.

- The long process of developing the Diversion Plan and tackling the water issue has created a network of local water conservation expertise.
- The desperate water situation provides a good environment in which companies can test new water conservation technologies and techniques.
- Water conservation technology companies locating in Santa Fe will be locating in a market with high internal demand for their products and will, therefore, be in close proximity to their customers.
- Develop a marketing package highlighting Santa Fe's dedication to water conservation, its assets, and incentives.
- Organize a delegation of Santa Fe and State representatives to visit 1-2 communities that have successfully supported water conservation and clean energy usage. Use these trips to learn and to promote Santa Fe to businesses.

4. ***Offer incentives for water conservation and clean energy use.***

- Communities around the U.S. are offering incentives to businesses and consumers to adopt clean energy practices. Many utilities already offer their customers rebates or credits for installing energy-efficient equipment for HVAC, lighting, insulation, and windows. In addition, utilities are starting to offer consumers the option to purchase electricity from Green Energy sources such as wind power, solar, and biomass.
- Santa Fe should create programs that promote the adoption of energy conservation while promoting a "buy local" campaign that would attract new clean energy providers to Santa Fe. Credits and incentives for consumers can be tied to their purchase from local suppliers. Santa Fe is an ideal pilot market for several technologies and should do what it can to bring those suppliers to the region.
- Work with State officials to create a package of statewide incentives for clean energy and water conservation companies.
- Good examples include:
    - Austin, Texas has openly announced its intention to grow the consumption of renewable power and also to promote the development and attraction of clean energy companies and providers. Already, the city-owned utility, Austin Energy, sells 500 million KW-hours to local businesses and consumers and has a goal of fulfilling 5 percent of its energy needs with clean power. In addition, Austin is discussing ways of tying conservation incentives to the use of locally-developed services or products. This connection is the real key to promoting the city's Environmental Technologies cluster.
    - The state of New York currently offers incentives to both the producers of clean energy and its consumers. By leveraging state funding for energy conservation projects, the state's agency NYSERDA has promoted local job creation. Funding for this program reaches about $16.5 million per year and funds

approximately 150 projects annually for businesses, municipalities, institutions, and universities. Since 1991, NYSERDA's R&D program has stimulated new product sales of $200 million for New York companies, created 1,174 permanent jobs, developed 141 new products, processes, or services for commercial use, and leveraged nearly $2 of funding from outside sources for every dollar invested by NYSERDA.

- In August 2001, NYSERDA announced the creation of the Saratoga Energy Technology Park, specifically devoted to promoting the development of new, clean energy technologies. NYSERDA, working jointly with the University at Albany and the Saratoga Economic Development Corporation (SEDC), hopes to attract between 1,000 and 1,500 jobs to the Capital Region when emerging, environmentally-friendly energy companies take advantage of the park's resources.

Strategy Two: Provide better infrastructure and processes to support creative activities.

Actions:

1. Create a National Center for Arts and Design in Santa Fe.

- The National Center for Arts and Design will provide a single location in which multiple arts and design organizations could collaborate on projects of national significance. The one-of-a-kind concept would be modeled after national research consortia or laboratories, only with arts, rather than science, as its focus.
- The center would include educational resources, high quality studio space, design-oriented companies and non-profit organizations, exhibit space, and retail.
- The (possible future) arts incubator should become a core component of the Center.
- Consider locating the Center at the Railyards or other central site.
- The Center would invite national and international experts to teach seminars or guide teams of designers and artists on projects.
  - The Center would provide an environment in which teams of designers or artists could form to, for example:
  - Bid on architectural design for major projects within the U.S.
  - Provide creative support to the film industry
  - Create new artistic works
  - Provide design services for New Mexico public sector projects
  - Design unique water and energy conservation techniques
  - Create a one-of-a-kind program to promote Santa Fe's arts, culture, and design products

2. Find ways to centralize internet-based information aimed at promoting arts and culture in Santa Fe.

- Currently, many Web sites – from the Chamber of Commerce to individual galleries – contain information about arts and cultural events in Santa Fe. This is confusing to residents and obscures Santa Fe's image to outsiders.

- Promote links to existing central sites such as santafe.org and nmculturenet.org that are running the statewide calendar of events powered by NM CultureNet.
- Develop one Web site portal for all Santa Fe arts and cultural amenities. Host a contest where local artists and Web design companies submit Web URLs. Promote this contest to the community. Make the Web site name simple and memorable.
- The Web site could contain the following: events calendar; map of galleries and museums; and a searchable database of Santa Fe galleries and arts retail shops by "product" and genre (links to the Web sites of all galleries and shops in the database would be provided).
- Eventually, the Web site could also include a virtual market in which local artists could sell their wares.

Strategy Three: Partner with Santa Fe County to solve infrastructure and site issues.

Actions:

1. ***Develop a joint City / County strategy focused on the Redevelopment District of the Metro Area Highway Corridor Plan.***
   - The Metro Area Highway Corridor Plan was adopted by both the City and County and designates an area to be redeveloped to accommodate economic development around the NM 599 / Airport Road intersection.

2. ***Develop a joint City / County economic development strategy focused on the Community College District to implement programs outlined in this report.***
   - The Santa Fe Community College District includes the Santa Fe Community College, housing, and non-residential development.
   - The District represents an important outlet for providing more affordable housing to Santa Feans.
   - The future development of the District will impact both the City and County.

3. ***Develop a shared City / County business park.***
   - Long-term, the City of Santa Fe will run out of developable land for larger business expansions. Most larger businesses will be locating in the County.
   - Jointly develop a business park with the County. The City and County will share the cost of infrastructure improvements and land acquisition. In turn, the City and County will share tax revenue that is generated from the site.

4. ***Jointly improve the Santa Fe Airport.***
   - The expansion of the Santa Fe Airport will make Santa Fe more accessible to tourists, allow residents easier transportation into and out of the region, and give local companies better travel options.
   - A 1-hour or less drive time from an airport is a common site selection requirement for small and large businesses alike. The Airport can

become a major marketing tool for attracting and retaining companies in both the City and the County.

- Upgrade the Airport to Part 139 standards as soon as possible. The Santa Fe City Council should approve the application for Park 139 certification.
- Both the City and County should provide funding for expanding the Airport fire station (shared with the national guard) and upgrading security along the perimeter of the property.

5. Develop wireless Internet infrastructure in core population centers in the City and in the County.

- Encourage local entrepreneurs to develop wireless infrastructure for downtown Santa Fe and countywide in core neighborhoods and future developments such as the community college district.
- The process of wiring Santa Fe with the latest telecommunications infrastructure is already underway. The Santa Fe Light Trail fiber optic network is expected to be completed in 2004. The Plaza renovation (planned to begin in the spring of 2004) will include the installation of a wireless network for the central downtown area of Santa Fe.

Strategy Four: Approve and construct a new civic center that represents the unique character of Santa Fe.

The Sweeney Center does not serve the needs of the community and does not convey the high-end image of the city. While the existing facility could be renovated, it is more appropriate that the current building is torn down and a new civic center is built in its place.

The Santa Fe City Council is considering a one percent increase to occupancy taxes and a bond to fund a new civic center. This decision will have an important, positive impact on the City for many years to come. A new civic center will support each Santa Fe targeted business sector while providing a valuable asset to local residents.

Consider the civic center a tool for economic development. It draws visitors into the community. If marketed to the appropriate events, it can attract executives from Santa Fe's targeted business sectors, allowing the City to market on its doorstep. Those individuals visiting the civic center will also spend money in Santa Fe – dining out, staying in hotels, and shopping. Indirectly, these activities inject more money into the local economy and gives a boost to job creation.

As a tool for economic development, and an entry to the city, the design of the new civic center can be used to convey a message. It should embody the city's artistic and cultural heritage, history, and connection to the natural environment. It should reflect the community's strong desire to target the type of higher-end tourist that visits the city. The facility should incorporate modern architectural elements and high-tech equipment into traditional Santa Fe style to help counteract a perception that Santa Fe is unwilling to progress. Finally, the facility should incorporate cutting-edge water and renewable energy technologies to show Santa Fe's dedication to conserving natural resources.

The civic center will benefit Santa Fe's workforce in several ways. First, it creates both direct and indirect jobs. In the beginning, designing, building, and completing the civic center will generate employment. Once construction is complete, entry-level positions will be established in event catering, room set-up, and facility maintenance. Middle- and upper-level positions will be created in audio-visual support, facility management, marketing, and event planning.

In addition to the job impact, the civic center can play another very important role for workforce development. It can provide much-needed, centrally-located space for local workforce training activities. Imagine: A civic center that is fully equipped with the latest in audio visual technology from the central, large auditorium space to smaller classrooms and conference rooms. Not only are these amenities highly attractive to executive level conferences and industry events, but they are also a much-needed resource for local workforce training providers and companies. The community college, the workforce development center, and non-profit workforce organizations could share the civic center for their programs, ensuring that Santa Fe's workforce is being trained in world-class facilities.

Action:
Revisit the proposed civic center design. Ensure that the design adheres to the following guidelines:

- The new civic center should be designed to appeal to smaller, executive-level conferences. A larger capacity facility will not necessarily lead to a larger indirect job benefit for Santa Fe. As the size of the event gets larger, a higher portion of attendees will either not be able to find hotel rooms in downtown Santa Fe or will not be able to afford them. These individuals will stay in hotels outside of the central district; eat at restaurants outside of the central district (often large chains); and, with so much commuting, have little time to shop at local stores while congesting Santa Fe's roads.
- The true benefit of the civic center is generated when visitors (both from outside events and Santa Fe functions) spend time and money in locally-owned shops, restaurants, and hotels. This injection of money drives business for local proprietors, who then spend their own revenue hiring additional staff, buying locally-made goods, or shopping for themselves. These funds continue to trickle throughout the economy, driving business, and creating new jobs. Smaller, more targeted events attended by executive-level individuals are much more likely to attract attendees who stay in downtown Santa Fe, bring their families, extend their stay, and spend their money with local merchants.
- A new civic center locating in downtown Santa Fe, targeting executive level conferences, and providing attendees technologically-sophisticated audio / visual equipment will allow the City to charge higher rates for use of the facility.
- Santa Fe prides itself on being the "city different;" therefore, the new civic center should radiate what is distinct about Santa Fe. To do so, consider incorporating the following elements into the design of the facility:
    - Arts and culture are the cornerstones of the building design.

- The center includes gallery and / or exhibit space for local artists.
- The center incorporates the latest water and energy conservation technologies.
- The center contains modern elements in combination with traditional Santa Fe style to communicate the City's deep roots yet willingness to progress to the future.
- The center contains high-tech workforce training spaces of various sizes to make the facility truly community-oriented. Consider a facility that, in addition to a large event room (500 person capacity), also contains one large auditorium-style classroom (e.g. 100-200 seats), two-three classrooms (e.g. 30-50 seats), two conference rooms (25-30 seats), and several small breakout rooms (5-10 people).

Strategy Four: Community Development

GOAL: Santa Fe's community and economic development activities support an environment that is favorable to (1) talented residents, (2) small, locally-owned businesses, and (3) targeted business sectors.

The Community Development recommendations offered in this section center on two major topics: improving Santa Fe's business climate and improving the city's quality-of-life amenities, particularly for young and creative individuals.

The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens.

A high quality of life is also directly connected to the region's ability to attract tourists. Through the choice of investments in quality-of-life amenities, the region will be able to target the specific type of tourist that visits. Tourists should be considered an economic development audience, and they are actual prospects coming directly to you. Ensure that they overlap with the audience you have for your economic development efforts.

One of the easiest ways for Santa Fe to become top of mind for businesses and entrepreneurs in its targeted business sectors is for those individuals to visit the region and enjoy the time they spend there. Therefore, tourist activities should portray a certain image of the city, one that is appealing to those executives and other decision makers. Make sure all tourist attractions showcase the "Creative Spirit of Santa Fe."

Strategy One: Adopt a more business-friendly attitude within City departments.

Santa Fe's unique character has sometimes been a hindrance to business activity. The city is well known externally for its tough ordinances and unfriendly business leadership, characteristics that will damage Santa Fe as it pursues economic development. Even small businesses and entrepreneurs (the city's primary target audience) will not move to a city where it is not welcoming or affordable to conduct business.

Actions:

1. ***Ensure the permitting process is consistent and efficient.***
    - During this planning process, numerous businesses criticized the city's permitting process for being too complicated, inconsistent, and time-consuming.
    - Consider expediting permits for standard requests. Applying for and receiving permits for, for example, small, after hours or weekend

downtown events should be made as easy as possible with standard application forms and a quick turn around process.

- Be specific and open about permitting requirements. Make this information readily available on City Web sites and in handouts available at City offices.
- Look at other cities' permitting processes for good examples of ways to make Santa Fe's more efficient and consistent.
- Burlington, Vermont's award winning "Doing Business in Burlington" publication offers new and expanding businesses a comprehensive and easy-to-use guide to permitting and city regulations. Sections from this guide are available on the following Web site: http://www.cedoburlington.org/business/doing_business_in_burlington/dbb.htm
- Look at the City of Surrey, located outside of Vancouver, Canada, for a good example of creating a step-by-step guide for local residents on starting their own businesses. http://www.city.surrey.bc.ca/Doing+Business/Business+Development/Starting+Your+Own+Business/default.htm
- Specifically look at other cities that are fostering the film industry – Los Angeles, New York, Toronto, Austin, for example. How have these cities structured their permitting processes to make it easy for and attractive to film production? Apply these best practices in Santa Fe.

5. ***Strengthen the Small Business Ombudsman Position within the City of Santa Fe offices.***
   - The focus of the current Small Business Ombudsman position should be expanded to serve all sizes of businesses.
   - The services of the Ombudsman should be expanded to visiting local businesses on a regular basis, listening to their concerns, and reporting back to City officials.
   - The Ombudsman should also be the single point of contact for a business having trouble navigating city regulations. He/she should walk businesses through the permitting process and help resolve conflicts between City departments and local businesses.
   - The benefits of expanding the role of the Ombudsman are numerous. First, strengthening this position makes a statement that the City is truly interested in supporting local businesses. Second, by regularly visiting with local businesses, the Ombudsman can communicate back to City leaders the current needs of local businesses, giving the City good information on which to base decisions. Finally, it provides a valuable resource to local businesses and helps navigate the permitting processes and acts as a voice for them to City leaders.

6. ***Provide periodic customer service training to City employees who regularly interact with local businesses and residents.***
   - Ask the Small Business Ombudsman to lead the customer service training sessions or hire a professional firm to conduct the training.
   - Training should include not only customer service training, but also an explanation of Santa Fe's new economic development brand and the role City employees play in economic development.

- A customer service guide containing quick tips on customer service should be developed and distributed among City staff.

7. Establish incentives that encourage local businesses to expand in Santa Fe.

- Consider waiving permit and impact fees for local companies that want to expand.
- Incentives should come from both the State and the City, particularly in helping with infrastructure improvements. When Dell was expanding in Tennessee, for example, the State paid 80 percent of the roadway improvement costs while the City of Nashville paid 20 percent.
- Promote incentives to local businesses. Ask the local utility company to help "spread the word" by referring local companies to a Web site with updates on incentives.

Strategy Two: Santa Fe's City Council should set broad goals for future development and allow those goals to drive decisions.

Actions:

1. Invite a moderator to lead a City Council retreat. The retreat should accomplish the following:

- Identify the positive assets of Santa Fe that cause each individual to feel passionate.
- Identify common threads among all council members. List Santa Fe's top assets.
- Agree that these common threads represent the essence of the community. Preserving the community's essence should be the principle that guides all future decisions.
- Set several overarching goals for the city.
- Agree to rules of etiquette among council members that are adhered to in and outside of council meetings.
- Conduct a city council study session prior to each meeting to allow councilors to state their positions on topics that are up for discussion during the upcoming meeting. City Council meetings should not be the first time that councilors hear each other's positions on topics being addressed.

2. The first retreat should occur after the spring 2004 election and occur at least every two years, following the election of new city councilors.

Strategy Three: Provide greater support to the Community Development Division and Economic Development Section.

Although only a few organizations in Santa Fe are directly charged with economic development, the community contains many more groups that impact the effectiveness of economic development programs. More than many other communities, Santa Fe is home to a rich diversity of not-for-profit, government, and business organizations, each perceived to have its own unique vision for the

future of the community. The city, and surrounding region, have become polarized into different "camps" of opinions. Each group seems to view itself as being fiercely independent from the others. This often results in a breakdown of internal communication, the very foundation of strong economic development campaigns.

Communication and cooperation in Santa Fe will improve if these various, and seemingly contradictory, opinion groups realize that they have a common bond: their success depends on Santa Fe's sustained economic health.

Santa Fe's ability to remain economically healthy is important to every organization and individual in the city and region. For example, while local businesses depend on a healthy economy to create a market for their products, non-profit organizations depend on a strong economy so that they can raise funds from local businesses and residents to keep their programs going. Second homeowners rely on a healthy economy so that their property values are retained and that the City can afford to maintain the quality-of-life attributes that originally attracted them to the region. Ethnic and Native American populations rely on a healthy economy that provides them with job opportunities, a market for their products, and ultimately provides them with income to continue living in Santa Fe. (A complete table of Santa Fe opinion groups and their reasons for supporting a healthy economy is provided in the appendix to this report.)

Improved economic health should be important to every Santa Fe resident and business. Santa Fe's elected officials should, therefore, ensure that their decisions lead to stronger economic conditions within the city and surrounding region.

A critical component of a healthy economy is ensuring that a strong economic development team serves the City. This team should be supported with financial and staffing resources that provide it the freedom to implement smart, aggressive community development and economic development activities. A strong economic development team will be required to implement many of the recommendations in this strategy. City leaders should view the economic development team as its task force for managing the day-to-day improvement of Santa Fe's economic conditions.

Actions:

1. ***Increase funding to Santa Fe's Community Development Division.***
    - Funding should be increased incrementally each year for the next five years. Draw additional funding from the Economic Development Fund.
    - Additional funding will be used to do the following:
        - Expand the Small Business Ombudsman position and responsibilities (described in the Entrepreneurship strategies).
        - Establish a Small Business Enterprise Director position that will be responsible for setting up and managing an entrepreneurship one-stop shop in coordination with the Santa Fe Business Incubator, the SBDC, and other small business support organizations.
        - Fund an entrepreneurship resource center. The purpose of the facility is to provide a centrally located office where all Santa

Feans can access a library of helpful information and talk with knowledgeable individuals about starting a business.
    - Increase the City's funding to the Santa Fe Business Incubator (for operations or facility expansions).
    - Provide funding for future incubators, such as an arts incubator.
- Commit funding for a minimum of five years. Longer-term budgets allow the department to conduct better planning and act progressively.

2. Set specific performance objectives for marketing subcontractors.

- Continue to set and monitor annual performance benchmarks for marketing contractors.
- Use the marketing recommendations in this report as a guide for establishing performance benchmarks.
- Agree to a three-year or longer contract with the marketing subcontractor. Include terms that allow the city to cancel the contract if the subcontractor repeatedly misses performance benchmarks. Otherwise, do not make the subcontractor re-apply for funding every year.

3. Clearly define and better coordinate the economic development roles of SFEDI, the Chamber, and the City's economic development team.

- The Chamber's primary role is that of an advocate organization for existing Santa Fe businesses.
- The Chamber should work closely with the (possible future) business liaison within the City's Community Development Division. The Chamber should introduce the liaison to its members and facilitate meetings between the liaison and local companies.
- SFEDI's role should be external and internal marketing. SFEDI should be responsible for polishing the brand identity and core marketing themes recommended in this strategy and incorporating the brand and themes into its Web site, collateral, and public relations activities.
- SFEDI and the Chamber are both responsible for handling visits by site selectors and potential business recruits. SFEDI should be responsible for managing the prospect's itinerary, while the Chamber should assist in setting up meetings between leading Santa Fe businesses and the prospect.
- Santa Fe's economic development team should be responsible for managing the marketing subcontractor contract, initiating community development activities that will support an overall economic development plan, and facilitating the information flow between City government and local businesses, prospects, and business organizations.

Strategy Four: Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.

Santa Fe's essence revolves around the core of arts and cultural activities occurring within the city. Arts and culture define the city's image and quality of life. Its unique character is founded in its tradition of arts and culture. It is what distinguishes Santa Fe around the world, and it is why creative, intelligent individuals are drawn to the city.

Arts and culture have long been the engine for much of Santa Fe's economic development. Although the "industry" of arts and culture is difficult to define, and even more difficult to quantify, it is undeniable that artistic and cultural activities have a tremendous impact on every aspect of Santa Fe, from its international image to its local products to its workforce skills. Arts and culture are the common threads that run throughout the entire region.

Because arts and culture have such a large impact on the local economy, it is critical that artists and artistic organizations are invited to participate in economic development activities. The City must consider the needs of the cultural sector when implementing this Plan. In addition, the City and cultural sector must work together to ensure that the results of the BBER study and the New Mexico New Media Industries Strategy project are incorporated into future activities to grow and promote arts and culture.

Actions:

1. ***Make arts and culture the cornerstone of the new civic center.***
   - Involve local artists in designing the facility.
   - Throughout the facility, integrate space for exhibiting work by local artists.
   - (Additional recommendations have been provided in the Infrastructure section of this strategy.)

2. ***Take steps to ensure Santa Fe's arts and culture will be sustained for generations to come. Ensure that the arts sector is accessible to young people.***
   - Endorse young professionals' arts organizations such as Avant Guard and Intermezzo. Make information on these organizations widely available. Promote these organizations to companies considering Santa Fe as a future business location.
   - Make Santa Fe open and accessible to all New Mexico students. Work with State leaders to initiate a new program in which all New Mexico high school seniors take a senior trip to Santa Fe. The trip would involve a visit to the capital and an introduction to Santa Fe's heritage, artistic and cultural amenities.

3. ***Make Santa Fe's artistic amenities accessible to all Santa Fe residents.***
   - Continue taking steps to make the traditional performing arts more open to the general population, for example, rock operas or free concerts.
   - Ask local businesses to invite local performing and visual artists to perform or display their work at business functions and other community events.

4. ***Increase occupancy tax revenue to support the arts.***
   - Santa Fe provides approximately $950,000 to arts programs annually.
   - Private foundations fund the bulk of arts and cultural activities in Santa Fe.
   - The city's support for the arts could be increased to support one of many activities, such as funding a future arts incubator or National Center for Art and Design or contributing to the cost of a unified national marketing

campaign to promote Santa Fe's arts and culture to collectors, artists, and cultural tourists.

Strategy Five: Ensure that Santa Fe maintains an atmosphere that is entertaining and attractive to young, creative people.

Actions:

1. ***Affordable housing is necessary for retaining young and creative individuals. Make it easy for people to purchase and upgrade their homes.***
   - Continue to offer inducements such as down payment assistance or tax abatements / decreases for individuals within a certain age or income bracket.
   - Consider establishing a fund similar to Austin, Texas' Mayor's Challenge Fund to help young people and people in need of affordable housing to get loans for home improvements and expansions.

2. ***Establish new festivals, expand existing festivals, and widely promote these events.***
   - Santa Fe is an ideal location for festivals, and numerous festivals already take place each year.
   - Festivals help create an entertaining atmosphere in Santa Fe. They provide entertainment for residents from all socioeconomic backgrounds. They also attract people from outside of the region and are, therefore, a good marketing tool for the city.
   - Standardize permitting process for event organizers. Be expedient in responding to their requests.
   - Waive the permit requirement to play music on the plaza.
   - Bolster the annual jazz festival and film festivals. These two events have potential to draw an international audience.
   - Support the new International Folk Art Market. Make it an annual event that compliments Indian Market and Spanish Market. This has the potential to grow to be another important event that extends the tourism season.

3. ***Start an annual winter sports competition for college students in Santa Fe and the surrounding region.***
   - Seven colleges are located in the Santa Fe area. Initially start the competition for students at these colleges.
   - Within five years, begin inviting college students from all New Mexico colleges.
   - Within ten years, begin promoting the competition nationwide.

5. Marketing and Public Relations

GOAL: Santa Fe will engage in a targeted marketing campaign to create local and national awareness of the city as a place to do business.

Santa Fe faces two marketing challenges. First, the City faces internal communications issues. Throughout this report, we have recommended ways to consolidate information sources about educational, workforce development, entrepreneurship, and economic development activities to make it easier for Santa Fe residents to access. In this section, we recommend techniques for spreading the word about why improved economic conditions benefit all Santa Feans.

Outside of the region, Santa Fe is faced with another issue. While Santa Fe is well-known throughout the world for its southwestern style and arts, little is known about Santa Fe as a business location. The external marketing recommendations in this section are designed to provide the city with a more business-friendly appearance to outside businesses and entrepreneurs. We have suggested a new brand theme under which Santa Fe can promote itself to business investors. The brand theme we recommend ties closely to the city's arts and cultural strengths and existing tourism promotions.

Santa Fe has many opinion groups that serve as a good starting point for addressing internal communication problems. As discussed throughout this report, before the city can launch an effective economic development campaign - whether its focus is local entrepreneurship, expanding current businesses, or recruiting new ones - all organizations related to economic development must commit to a single strategy for the community. Communities benefit from a well-orchestrated marketing strategy that is managed by one organization.

Once Santa Fe opinion groups improve communication and collaboration, the city will be ready to market within the community. Internal marketing informs citizens and business leaders of the economic development vision and trains individuals to promote the community with a single message, rather than numerous ones that may dilute or confuse the core message. Internal marketing builds local awareness and buy-in so that when Santa Fe markets outside of its region, it has a strong team in place to augment its message. The most effective communities not only have a well-integrated economic development organization leading the marketing efforts, but they also have hundreds of community ambassadors as part of the team.

The use of local media and personal meetings are good avenues for "building local awareness." **With strong internal support, the chances of successful external marketing increase considerably.**

Once Santa Fe succeeds in its internal marketing efforts, it should incorporate external marketing activities aimed at growing targeted businesses and entrepreneurial activity. External marketing, for most communities, should begin one to two years after internal efforts have begun. The trick is then to balance

both internal and external activities to get the most return – awareness and business.

External marketing is vital to diversifying an economy.

It can significantly improve a community's economic health by creating new, higher paying jobs and increasing the tax base. For communities today, it is important to have a Web site as primary collateral and to also have material to distribute at conferences and meetings. An integrated approach to external marketing that includes the right combination and frequency of word-of-mouth, publicity, and personal meetings is the key to successful marketing.

For the city and surrounding region to retain local businesses and cultivate prospects for economic growth, a more proactive targeted campaign is required.

Strong marketing activities will help accomplish the following economic development goals:

- Improve internal knowledge of the resources that are currently available in the city for residents seeking education and training, for expanding businesses, and for potential entrepreneurs.
- Improve external knowledge of Santa Fe as a top location for young, creative individuals and innovative businesses.
- Increase the number of businesses approaching SFEDI, the Chamber, or the City for information about expanding their business in Santa Fe.
- Cultivate target businesses, helping them create new jobs at all skill levels.
- Increase the amount of positive, national and international publicity that Santa Fe receives.

AE is providing a Marketing Guide (MG) that contains information to assist Santa Fe in implementing the economic development strategies over the next five years. It is meant to be used in conjunction with this report and specifically to support leaders who will execute the marketing campaigns.

Strategy One: Establish specific marketing roles for each organization currently involved in economic development.

The strong opinions, energy, and culture of activism in Santa Fe should become the foundation for unified change and new direction. All Santa Feans have a common goal for their city: **to retain the qualities that make it unique by creating a vibrant and healthy economy.**

Santa Fe is fortunate to have several organizations marketing the city. Santa Fe Economic Development Inc. (SFEDI), Santa Fe Chamber of Commerce, and Santa Fe Convention & Visitors Bureau have made tremendous strides in building a highly recognized tourism brand and in cultivating businesses. External marketing activities, however, should continue to be overseen by one

single organization. All other economic development entities should support this entity's marketing efforts and avoid launching other external efforts that could dilute the city's primary marketing message.

For Santa Fe to reach its desired goals, the city must adopt a marketing strategy and provide specific marketing tasks to the single economic development marketing organization (currently SFEDI). Additional funding of approximately $50,000 will be required to fully implement this marketing plan.

Actions

1. ***The City and SFEDI should adopt the marketing strategy.***
2. ***The City should commit to a minimum of a three-year contract for its marketing subcontractor (currently SFEDI). Provide SFEDI (or other future marketing contractors) with a set budget for as many years as possible under city law. This provides the organization with the ability to focus on marketing rather than continually concerning themselves with contract renewal.***
3. ***Provide the marketing contractor with specific marketing expectations and goals.***
4. ***Tie the marketing contract to the accomplishment of specific marketing objectives. (Recruiting X number of companies per year, for example, is not a realistic marketing objective. Organizing two to three annual marketing missions to other communities, on the other hand, is a realistic marketing objective. Tie objectives to action rather than quantitative results. Action will yield results.)***

Strategy Two: Create and adopt a single economic development brand

Communities that establish an economic development marketing theme that differentiates them have a greater chance of being recognized and trusted. Santa Fe is marketing to build awareness and clarify that it welcomes creative, entrepreneurial people and is a good place for starting new businesses.

Santa Fe should promote a single economic development brand that complements the recognized tourism brand, creates community-wide buy-in and ambassadors, and reaches targeted businesses through a mix of publicity, direct marketing, and collateral. Direct marketing includes one-to-one meetings, targeted electronic campaign messages, missions, and conferences.

To create an economic development theme, AE reviewed Santa Fe's current brands, unique strengths and characteristics, and analyzed target audience requirements. A marketing focus group was also conducted to gain public input. The proposed theme is meant for all organizations involved in economic development-including the City, SFEDI, Chamber and arts and cultural organizations- to use. A logo that communicates Santa Fe's marketing identity and tag line should be developed and incorporated into all print and on-line collateral materials. The marketing contractor should hire an advertising firm to develop professional logos and marketing collateral.

As the *Community Assessment Report,* the first report of this project, states, one of Santa Fe's biggest strengths is its internationally-recognized tourism brand. Several marketing themes and tag lines have been developed and utilized in marketing promotions in the past, including: "Away. To Santa Fe," "The City Different," and "Untamed." These themes, in conjunction with the State's brand, "Land of Enchantment," have very strong and positive connotations. Santa Fe is already known worldwide as being a "different" destination to visit, as well as a place for distinctive culture and arts.

Because awareness of Santa Fe is so high, and its perception is so deeply rooted, the city's business-oriented theme should complement the existing tourism-related themes.

A brand theme conveys "who," "where," and "what" the city offers. Local leaders describe Santa Fe as being "creative" and "spiritual," having a "rich culture," strong "history," and "distinct" personality. These core themes should be communicated through the economic development brand.

Arts and Culture are the cornerstones of Santa Fe's economy, and they also contribute to its exceptional environment. Santa Fe is an economic engine and attractor of creative people. With Arts and Culture, Design, Hospitality, and Software Development being recommended targeted business sectors, and "creativity" being a key descriptor of the city, we recommend that the new brand theme be the "**Creative Spirit of Santa Fe**."

When tourists think of Santa Fe, they think of a center of culture and world-class art within a beautiful and spiritual setting. It is truly a "different" place. When business leaders think of Santa Fe, they think of a city with outstanding quality of life amenities, a rich heritage, and a diverse workforce. Most business professionals live in Santa Fe because of the rare and special quality of life they enjoy.

Using the "Creative Spirit" theme in every marketing activity that promotes economic development for the City of Santa Fe, will promote the city's most differentiating characteristic and will appeal to the targeted audiences.

A positioning pyramid is a technique used to determine a community's brand theme. It answers three questions: What is the community's product? What are its unique benefits? What does the community represent? This simple tool lays the foundation for a community's marketing communication program. This diagram illustrates Santa Fe's positioning pyramid.

Secondary messaging tailors a statement for a specific audience and dictates audience-related benefits. For information about the site selection needs of Santa Fe's marketing audiences, refer to the *Target Industry Report,* the second report of this project.

Actions:

1. ***The City and SFEDI (or future marketing contractor) should discuss and approve the branding theme.***
2. ***The City should ask the future marketing contractor to hire an advertising or graphic design firm to develop a logo and style guide.***
3. ***The future marketing contractor) should distribute the style guide to the City and the Chamber. The style guide should also be made widely available to other community organizations, including schools, not-for-profit organizations, local media, businesses, workforce service providers, and arts and cultural organizations. Encourage as many organizations in Santa Fe as possible to adopt the style guidelines in their own external promotions. The more consistent that Santa Fe's look appears from the outside, the more effective the new business brand will be.***

Strategy Three: Gain a thorough understanding of the target audience

Understanding the internal and external target audiences' needs will help Santa Fe's economic development team in crafting effective secondary messaging. A secondary message occurs after initial inquiry (audience has received primary message), touts quality, and provides detailed information that the target audience desires.

It is important for Santa Fe to first understand the needs of internal audiences and inform them of the city's economic development vision. **Local employers, the current workforce, influencers, and entrepreneurs** are key assets for economic development, and recognizing these sectors as a target audience and understanding their needs is sometimes overlooked. The City, SFEDI, and the Chamber should continue to improve relationships with local businesses and provide additional services that can help them to become more successful. Local media and personal meetings are effective mediums for building awareness and demand for economic development services.

Once the City successfully addresses internal audiences' needs, it should become familiar with targeted business sectors. **The target business sectors include: arts and culture, hospitality and tourism, design, conservation technologies, software development, publishing and new media, and outdoor gear and apparel companies.** Identify target business champions, business leaders with expert knowledge of a particular industry. These individuals understand industry players, trends, challenges and opportunities, and they have powerful connections within an industry. They may also be willing

to meet with site selectors, volunteer to speak at events promoting the county, and share industry knowledge with economic development leaders.

SFEDI has already begun organizing regular meetings of executives from its target clusters. These meetings should continue and expand to include industries that are recommended in this study but are not currently target clusters for SFEDI. Santa Fe should have at least three industry champions for each target business. The *Marketing Guide* (a supplemental report included as part of this project) lists industry associations that can be a resource for target business trends and prospects.

Santa Fe can use the targeted messaging and main "proof points" contained in the MG when crafting secondary messaging for marketing communication.

Each target business will be interested in the following:

- Extremely high quality of life
- Ample supply of artistic, technical, and scientific workers
- Proximity to customers and manufactures
- Workforce development programs and incubators
- Close proximity (1 hour) to the Albuquerque International Airport

Art and Culture, **Design,** and **Hospitality** firms will be interested in the following:

- Embedded artistic community and strong local support for the arts
- World-famous art galleries, museums, Indian Market, Spanish Market and flea markets
- World famous performing arts organizations such as the Santa Fe Opera, the Santa Fe Chamber Music Festival and many other music, dance and theater companies
- Educational offerings in performing and visual artistic disciplines through the College of Santa Fe, the Santa Fe Art Institute, and Santa Fe Community College

Design, Software Development and Publishing companies will be interested in the following:

- Santa Fe's image as an artistic and cultural capital of the Southwest
- Santa Fe's large cluster of software development, film businesses, and publishing companies
- Renowned southwestern culture, architecture, and cuisine
- The successful Santa Fe Business Incubator
- Federal research facilities at Los Alamos, Sandia, and Kirtland AFB are pioneers in many of the world's most advanced software development fields
- The College of Santa Fe's Moving Image Arts Department provides students with access to full range of film production experience
- Santa Fe Institute is a pioneer in the burgeoning complexity systems field
- The National Center for Genome Resources is a leader in bioinformatics research

Conservation Technology companies will be interested in the following:

- Santa Fe makes conservation a top priority
- Santa Fe's strong local market for water conservation and clean energy products
- Santa Fe's high quality workforce and area research facilities

Hospitality businesses will be interested in the following:

- Santa Fe is known as one the top 10 cities in the world to visit, *Travel + Leisure*
- Santa Fe is investing in a new civic center
- Santa Fe has a dedicated bilingual workforce

Outdoor Gear and Apparel companies will be interested in the following:

- Santa Fe offers a creative, active, and artistic workforce
- Santa Fe's mild climate and countless outdoor recreational opportunities make it a strong market for product testing
- Proximity to manufactures and suppliers

Actions:

1. ***Based on the results of the Target Industry Report, the marketing contractor and its advertising partner should develop an audience profile for each target business. The audience profile will detail the specific marketing technique that will most effectively reach each audience.***
2. ***The marketing conatractor and its advertising partner should consider the audience profiles when developing a new logo and collateral and revamping the Web site. The images, messages, and copy contained in collateral must address the industry needs contained in the Target Industry Report and audience profiles.***
3. ***The marketing contractor, SFEDI should work with the City and the Chamber to identify target business "champions."***
4. ***Invite champions to share their industry knowledge and prospects and assist with economic development improvements.***
5. ***Champions may already exist. SFEDI's board members already serve as leaders for each SFEDI cluster industry. These individuals should be involved in the additional target businesses recommended in this strategy.***

Strategy Four: Gain local media support.

As mentioned throughout this project, the need to improve communication throughout the city is an immediate priority. Members of the Advisory Committee of the Cultivate Santa Fe initiative have committed to being media champions.

As the Cultivate Santa Fe project is finalized, Advisory Committee members should **kick off an internal press relations campaign**. Media champions should write and "tell stories" related to economic development to local newspapers, radio stations, company newsletters, and Web sites to inform citizens about Santa Fe's vision. It is imperative that local newspapers, radio,

and television stations provide coverage and speak positively about the city's efforts. This will first create excitement within Santa Fe and will then spread throughout New Mexico. Local media is the first avenue for creating local "buzz**."**

Santa Fe's internal press relations (PR) campaign should focus on stories that discuss what economic cultivation means to Santa Feans. Advisory Committee members are encouraged to contribute articles and editorials (and speaking engagements / interviews) on the following topics: "Growing from Within," "Stay in Santa Fe," "Value of Education," and "The Creative Spirit." Communicate the message that, "for Santa Fe, economic cultivation is focusing on activities that improve workforce services, economic health, and overall community cooperation to help local companies succeed and new job opportunities to emerge for all Santa Fe families."

Additional PR campaigns should discuss Santa Fe's vision, characteristics of target businesses, start-up successes, economic development marketing achievements, and community ambassadors. Over time, the City, SFEDI, and the Chamber should host appreciation and celebration events for small businesses that have made big impacts on the economy.

Economic development leaders should focus additional internal marketing efforts on communicating information about actions the City is taking to improve those issues survey respondents rated as "least satisfactory." Among these issues, the cost of living, housing, growth management, and business growth topics should be continuously discussed so that citizens are informed of progress that is being made in these areas. Supplementary campaign topics should include what Santa Fe is doing to preserve the city "different." Local college professors should be asked to write articles and editorials on new college programs that will provide training for target businesses, and leaders from arts and cultural organizations should be asked to write articles on the importance of culture to Santa Fe's economy. The MG provides more detail on PR campaign topics and contains a media list.

Actions:

1. ***Following the completion of this report, the City and SFEDI should reconvene the project Advisory Committee. Ask Committee members to volunteer to serve as "media champions." Assign each volunteer with a topic on which they should write an editorial or conduct a radio interview.***
2. ***Ideally, two volunteers will partner on writing the editorial or conducting the radio interview, with each volunteer coming from an "opposite" field. A local real estate developer could partner, for example, with a representative from an environmental conservation organization. By partnering with an opposite, the community will understand that regaining Santa Fe's economic health is an issue that transcends traditional rivalries.***
3. ***Local media champions should help garner local publicity by personally meeting with editorial boards of local news companies. Present the editorial boards with background information on the Cultivate Santa Fe plan and the subjects on which the volunteer teams will be writing.***

4. ***Encourage local media companies to dedicate a section of their paper or broadcast to one or more of the following topics: (1) news updates on Santa Fe economic development; (2) how to start a company in Santa Fe or what resources are available to entrepreneurs; (3) profile of each target business and current Santa Fe businesses in those industries.***

Strategy Five: Launch an internal marketing campaign.

With strong internal community support, the likelihood of successful external marketing increases considerably. **For Santa Fe, approximately 70 percent of efforts should be invested in internal activities**. The main goal of internal marketing is to inform citizens of economic development efforts and successes, to garner the community's support for the plan, and to act as promoters. It may take up to two years to see substantial impacts from internal marketing, and Santa Fe should continue this effort indefinitely. City leaders cannot expect overnight results.

Internal marketing began when AE started this project and has occurred each time AE has presented the Cultivate Santa Fe reports to Santa Fe audiences. The next major activity will be the project Roll Out Event in April 2004. During the event, AE and the Advisory Committee will unveil the new economic development vision, theme, and goals to the community. The roll out event should be used to communicate both the purpose and benefits of the new goals as well as the next steps in the process, and to request support.

Publicity, promotion, and collateral are the three vehicles recommended to reach Santa Fe's internal audiences. The goal is to build awareness within each target audience in a quick, cost-effective manner.

Publicity is one of the best vehicles to cost-effectively reach internal audiences and generate interest. To reach its target businesses, Santa Fe should strive to appear in publications and newspapers read by these industries. To reach local businesses, Santa Fe should focus on local and regional newspapers, newsletters, and business publications. To reach businesses outside of Santa Fe, concentrate on industry trade, general business, and lifestyle publications. **Within the next year, a professional public relations firm or new public relations position created within SFEDI should be hired to manage this initiative.**

Other ways to communicate to the public include: delivering newsletters, similar to what is currently done by the Santa Fe Chamber of Commerce; posting news in church bulletins, high school and college papers, regional business journals, on community Web sites and at local business establishments. For instance, SFEDI could create banners with the new logo and Web site address that local establishments can post so that their clientele is informed of the new message and is directed to a Web site to get more information.

A "media outreach" is another PR service SFEDI should consider. It provides economic development leaders with a target media list, press pitch content, and

a distribution list. An excellent PR activity that gains awareness is a bylined article**,** which incorporates both press stories and advertising into one activity. Lastly, since economic development leaders are in the public eye, it is wise to consider press communication skills training, which teaches individuals how to work with reporters to get the most from your marketing investment.

Being rated by *Travel + Leisure* in August 2003, as the Top 10th World's Best City, is an outstanding accomplishment. This is a strong start to generating awareness with many of Santa Fe's targeted audiences – both internal and external.

Promotion includes spreading information by word-of-mouth and through one-to-one meetings, attending regional industry events with local businesses, speaking at business networking events with key influencers, forming relationships with regional economic development teams to sell Santa Fe as a place to do business. It also includes calling prospects to provide information on Santa Fe's unique business climate, available business park space, and the benefits of operating or expanding a business in the city.

The primary **collateral** piece used to promote Santa Fe should be SFEDI's Web site. By revamping the Web site to contain the new marketing message, this can be a strong piece to reach both internal and external audiences. The current Web site offers relevant content for most of the defined target audiences. Santa Fe should ask local businesses to mention the Web site to employees via local business Intranets and in their corporate marketing material when appropriate. These efforts will help build awareness.

SFEDI should consider adding or updating the following components on its Web site:

- Economic and Industry Information
- How to Start a Business in Santa Fe
- Local Company Database
- Sites and Business Parks
- Economic Development Projects
- Job Postings
- News Wire
- Local Company Testimonials
- Quality of Life
- Incentives and Permitting
- Annual Report

The MG provides an explanation of each of these components and also includes examples.

Actions:

1. ***The City and the marketing contractor should review and approve the internal marketing recommendations offered in this report.***
2. ***Identify local volunteers to assist with implementation.***
3. ***Ask individuals from the community with a passion for economic development and Santa Fe's future to volunteer and join the marketing team.***

Please refer to the MG for more detailed recommendations on internal activities.

In 2004 and 2005, SFEDI should implement activities that increase local awareness and improve internal communication. Local campaign ideas are provided below:

1. **Publicity**
   a. Education – "Stay in Santa Fe," "Value of Education," "Take Home Computer Program," and "Make & Take High School Learning Tools Program." SFEDI should involve local Pre-K - 12 schools and SFCC in this internal communications campaign.
   b. Workforce Development – One-Stop Shop for workforce training and new workforce development program Web site
   c. Entrepreneurship – New Web site database of Santa Fe's entrepreneurial resources, business incubator expansion, and creation of a Santa Fe arts incubator
   d. Local business success stories – Feature a new company in each issue
   e. Local Businesses – "Buy Local" campaign
   f. Tourism – Address the issue of the importance of tourism to a healthy Santa Fe economy
   g. New Marketing Strategy and Message – Showcase the new brand theme, logo, and new collateral
   h. Press Relations - Conduct training on working with the media, negotiate for reduced rates and budget $30,000 a year to hire a PR firm.

2. **Collateral - Web sites**
   a. Revamp the marketing contractor's Web site to incorporate new marketing theme (logo) and targeted messaging (*cost of approximately $10,000*).
   b. Assist other economic development-related organizations in incorporating the new logo (and marketing style) into their own Web sites.
   c. Encourage other economic development-related organizations, hospitality businesses, and on-line arts and cultural resources to include a link to SFEDI on their Web sites.
   d. The City and marketing contractor, together with local economic development-related organizations, should develop new Web sites that are mentioned throughout this strategy. New Web sites would include:
      i. An Arts & Culture portal to link all local artists' Web sites and act as a central resource and listing of festivals and events
      ii. A Santa Fe specific workforce development resource portal
      iii. A Web site resource for entrepreneurs, containing all information necessary for starting a business in Santa Fe
      iv. A Santa Fe specific film promotion Web site, e.g. http://www.wncfilm.net/

v. A Santa Fe non-profit organization Web site, containing a searchable database of all non-profit organizations in Santa Fe

3. **Collateral – brochures**
    a. A user-friendly guide to workforce training and educational resources in the Santa Fe region to be made available at schools and public gathering places such as libraries, churches, or social organizations
    b. A simple guide containing entrepreneurial resources. Similar to the Web site, the guide would provide step-by-step instructions on starting a business in Santa Fe. (Examples were provided earlier in this Strategy.)
    c. A SFEDI annual report

    Estimated cost: $10,000

4. **Promotion - Speak at regional business association events**
    a. Project Advisory Committee and / or newly created Implementation Committee.
    b. Support such as the Santa Fe film festival, Russian Summer 2004 Exhibit, International Folk Arts Festival, and Annual Jazz Festival and other events throughout the year.

5. **Promotion – Host an annual Economic Development Forum.** During the event, regional leaders can provide an overview of the year's successful economic development activities and an update of economic data for the Santa Fe and the larger region surrounding the city. The project roll-out event (April 2004) can be the first annual Santa Fe Economic Development Forum.

6. **Promotion – Create a welcome package** for newcomers. Send to new residents when they sign up for utilities.

7. **Promotion - Speak at local business associations** and provide update on Santa Fe's economic development and marketing efforts.

8. **Promotion - Establish a high school group** to gain a better understanding of what factors are important to teens when considering working in Santa Fe in five years. Consider calling the group "Teens Talk."

Strategy Six: Implement external campaigns

External marketing promotes Santa Fe to identified targeted businesses that reside outside of Santa Fe, complement the current economy and help the city meet its economic development vision. External marketing should begin in year 2006.

Web sites, publicity, and targeted direct marketing and selling are the most cost-effective methods for communities to convey their messages. Santa Fe should balance these activities, be consistent in the message it conveys, and

focus on campaigns that will directly reach prospects. The primary vehicle, and one that should be used throughout external efforts, is publicity. Santa Fe should then begin to incorporate collateral (Web site and brochure), marketing missions, and industry associations and conferences.

Publicity

Publicity may be the most effective form of economic development promotion. Santa Fe could significantly increase the amount of publicity it receives in publications, and ultimately reach the city's target business companies by having a PR firm on retainer to develop and distribute releases and bylined articles.

Collateral (Web site and Brochures)

Resources should be invested to redevelop the primary Web site that promotes economic development in Santa Fe to more effectively link it with regional economic development Web sites. The main economic development organization's URL and phone number should be incorporated into every activity that promotes the city. See the MG for more Web site recommendations.

Marketing Missions

Santa Fe leaders need to engage in marketing missions to recruit target business companies from other regions and to see first hand benchmark communities' efforts. Santa Fe can learn from benchmark communities by visiting these cities. Schedule marketing missions each year to a region with a high concentration of its target businesses and visit benchmark cities to observe what is effective and what is not within these business communities. *For example, visit regional neighbor benchmark cities such as Boulder, CO and Albuquerque, NM. In the second year, consider visiting national benchmark communities such as Asheville, NC and Santa Cruz, CA. In the third year, visit a large benchmark site such as Savannah, GA.* Volunteer representatives from business, government, and academia should attend marketing missions, which can involve a series of meetings with local companies to sell Santa Fe as an ideal business location.

Industry Associations and Conferences

Industry associations, a trusted source of information for member companies, offer an opportunity to track trends and prospects. SFEDI should consider joining the leading associations of its target businesses, place articles in industry association newsletters and sponsor two industry conferences per year. Industry conferences provide a unique opportunity for Santa Fe representatives to promote business development, and face-to-face marketing is recommended to supplement other marketing efforts. Santa Fe can attend, sponsor, and exhibit at conferences.

Actions:

1. ***The City and the marketing contractor approve the external marketing component of this strategy.***
2. ***Identify Industry Champions, board members, and other volunteers to assist with implementation. Individuals from the community with a***

passion for economic development and Santa Fe's future can volunteer and become part of the marketing team

3. Volunteers can assist by attending marketing missions or industry events on behalf of Santa Fe, to respond to calls from media, to distribute collateral, and to promote the marketing contractor's Web site.

Santa Fe should consider implementing activities that increase awareness among external audiences.

1. **Publicity campaign** to targeted national publications
    a. *Lifestyle publications*
    b. *Industry trade publications*
    c. *General business publications (e.g. Business Week, Forbes)*
    d. *Travel publications*
    e. CNBC's Odyssey Media feature**.** One 5-7 minute story costs $20,000 and is aired 50 times on national and regional news channels.

    Launch an advertising campaign to support publicity. $4,000 to develop an ad, ad placement costs between $5,000 - $15,000
2. **Direct marketing** – Obtain target business databases and send electronic campaign mail.
3. **Direct marketing** – Sponsor and/or attend 2-3 industry events per year.
4. **Direct marketing** – Once the civic center is complete, promote the facility to executive-level target industry events and training courses.
5. **Direct marketing** – Film a documentary about a well-known Santa Fe artist and submit it to film festivals and public television networks.

6. Direct marketing – Partner Economic Development teams with Albuquerque and other New Mexico economic development groups and take a mission to a market with a high concentration of target businesses.

Appendix: Performance Metrics

An important component of the implementation of Santa Fe's Economic Cultivation Plan is a monitoring system to track the success of the plan in the years to come. AngelouEconomics has identified several data sets that have been used during the strategic planning process that we believe will be good measures of economic performance. These data are easily found at state and national sources, are available at the city and county level, and should be considered good indicators of the overall economic health of Santa Fe and its citizens.

Many state and local economic development organizations already use performance metrics. These data are also called "benchmarks," as local data is usually placed side-by-side state or national data for comparison. By committing to measuring its achievements, Santa Fe will be joining the ranks of communities in Oregon, North Carolina, Minnesota, and Indiana who have developed successful benchmarking systems to monitor their economic performance. The performance metrics proposed in this plan provides Santa Fe's leaders with an excellent opportunity to demonstrate positive results of their efforts and policies and build confidence among the general public that the economy is heading in the right direction.

AngelouEconomics recommends several performance metrics for each major topic of the Cultivation Plan that could be used by Santa Fe's leaders to track progress:

Workforce Development and Education

- Increased job growth in target industry sectors
- Increased household income
- Increased percentage of population with 2- year degree or higher
- Increased average SAT scores for Santa Fe high school students
- Decreased high school drop out rate

Entrepreneurship

- Increased net annual new firm creation
- Increased percentage of companies at Santa Fe incubator classified within a target business sector
- Increased total venture capital funding in Santa Fe
- Decreased retail spending leakage

Infrastructure & Sites

- Successful annual progress and on-time completion of the Water Diversion Plan
- Construction progress and completion of the new Santa Fe convention center
- Increased percentage of new homes and buildings built in Santa Fe that classify as affordable living and/or "green"

Quality of Life

- Increased percentage of total population aged 25-44
- Increased percentage of total graduates from Santa Fe higher education institutions living in Santa Fe 1 year after graduation
- Decreased poverty rate
- Stable cost of living ratio (ratio between Santa Fe's average cost of living and average wage remains stable or decreases)

Marketing

- Increased state or national media mentions related to Santa Fe business activity
- Increased number of qualified target industry leads contacting SFEDI or other economic development-related organization about business expansion, relocation, or start up in Santa Fe (e.g. the City of Santa Fe, Santa Fe County, the Chamber of Commerce, or local real estate agency)
- Increased hotel occupancy, increased hotel occupancy in hotels located in downtown Santa Fe
- Increased visitor spending

AngelouEconomics recommends that performance be measured on a city basis. Benchmark data should be collected for the City of Santa Fe, Santa Fe County, the State of New Mexico, and the U.S. Santa Fe may also choose to include one or more of the comparison communities included in the *Community Assessment* report (Flagstaff, Boulder, Asheville, and Raleigh). Metrics are best used when they are calculated as a share of the U.S. average. For example, Santa Fe's average wage is currently $27,644 or 76.6% of the U.S. average. Santa Fe will know that it is successfully meeting the objectives of this *Economic Cultivation Plan* as this percentage increases over the next 5-10 years.

Performance metrics should be updated by the city's lead economic development organization on a bi-annual or yearly basis. The following page provides a sample format for tracking performance. This table can be expanded to include other performance metrics within each topic, additional historical data, and information on competitor communities.

Sample Performance Benchmarks
Santa Fe, New Mexico

		Workforce & Education	Entrepreneurship	Infrastructure & Sites	Quality of Life	Quality of Life	Marketing & ED
		Household income County	Venture Capital Funding to SF area companies County	Successful annual progress and completion of Water Diversion Plan City/County/State	Percentage of population 25-44 years old County	Cost of Housing Ratio City	Number of qualified target industry leads contacting SF ED orgs about biz expansion, relocation, or startup County

	2015	105.0%	$100 million (30%+)		33.0%	115	▼

Master List of Recommendations

Cultivate Santa Fe
Summary of Workforce Development and Education Recommendations

Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Supporting*
1. Help Parents place greater value on public education					
a. Get parents involved in schools					
Adopt a take home computer program	Mid term	2005	ongoing	SFPS	SF Bus., Dona
Use local school facilities for evening adult ed classes	Mid term	2005	ongoing	SFPS, SFCC	Other training p
Start a cultural education program	Mid term	2006	ongoing	SFPS	
b. Provide parents tools to support learning at home					
Hands-on teaching training for parents	Mid term	2005	ongoing	SFPS	Parent/Teache
Create "make and take" educational materials	Mid term	2005	ongoing	SFPS	Volunteer
Adopt a Parents and Teachers as Partners program	Long term	2007	ongoing	SFPS	Parent/Teache
Bilingual school liaisons to make home visits	Long term	2007	ongoing	SFPS	Volunteer
2. Promote the value of quality education within the community. Turn K-12 education into a "cause."					
a. Launch an internal marketing campaign to promote the value of public education	Short term	2004	2005	SFEDI, City, SFPS	
Schools create weekly take-home folders to inform parents	Mid term	2005	weekly	SFPS	
Start a volunteer phone chain to provide parents with school info	Mid term	2005	ongoing	SFPS	Parent/Teache
b. Create PSAs aimed at promoting the value of public education	Short term	2004	2005	SFEDI, SFPS	Volunteers, Loca
Organize an internal marketing task force	Short term	2004	2004	SFEDI, SFPS	
Seek local ad agencies who will provide service pro bono	Short term	2004	2004	SFEDI, SFPS	Local Agenc
Seek funding from non-profits and foundations to support program	Short term	2004	2004	SFPS, Chamber, SFEDI	Non profits, Fou
Identify a single message for the campaign and use multiple media sources	Short term	2004	2005	SFPS, SFEDI, Local Media	
c. Start a campaign to show students non-college career options	Mid term	2005	2008	SFPS	One Stop Ce
Invite local workforce development programs to present at school functions	Mid term	2005	ongoing	SFPS	One Stop Ce
Create a Web site containing resources for non-university bound youth	Mid term	2006	2006	One Stop Center	SFPS
d. Start an annual Education Day - outreach and educational event	Mid term	2006	annually	SFPS, City, Chamber	Workforce deve

Summary of Entrepreneurship Recommendations

Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Su*
1. Financially support the Santa Fe Incubator					
a. Expand the Incubator to provide resources for SF's target business sectors	Mid term	2005	2008	Incubator	
b. Lobby legislators to pass incubator certification and funding match program	*** Top 5 ***	2004	2004	Chamber, Incubator	Ci
The SF Incubator could be used as a model for incubators in other parts of NM					
The network for certified incubators could be a funnel of investment opps for the NM VC Fund					
c. Work with the State, UNM, the Santa Fe Incubator, and the SFCC-SBDC and SCORE to set up an entrepreneurship one-stop shop center similar to workforce development centers.	Long term	2007	2007	City Sm.Bus.Enterprise Director	SBD
The centrally located center would be a library of info about setting up a business in the region					
d. Set up an entrepreneurship center similar to workforce development centers	Long term	2007	2007	City	SBD
The centrally located center would offer coaching and a library of information					
Use funding from the pending Kaufman grant to help fund the center	Long term	2006	2007	City Sm.Bus.Enterprise Director	SBD
e. Establish a Small Enterprise Director position within the Community Dev. Division	Mid term	2005	ongoing	City	SBD
f. Establish an Arts Incubator at a central location in Santa Fe	***Top 5***	2006	2008	City	SFCC,
2. Make information and training about starting a business widely available - encourage local success.					
a. Involve the New Mexican in covering stories about local business startups	Short term	ongoing		New Mexican	
Potential entrepreneurs will find inspiration from the success of others					
Propose a schedule of small businesses to regularly feature	Short term	2004	ongoing	New Mexican	
Invite successful local entrepreneurs to speak at community events	Long term	ongoing		All SF organizations	
b. Provide Santa Fe non-profits with information to help themincrease their financial capacity					
Non-profits should be viewed as entrepreneurial small businesses					
Encourage participation in NGO New Mexico, New Mexico's central non-profit business organization.	Short term	2004	2005	Chamber	
Provide information and training to non-profits to help them learn how to increase their financial capacity	Mid term	2005	ongoing	Non Profit Business Assoc	Fo
The association should create a searchable Web site listing all non-profits in the region	Mid term	2005	2006	Non Profit Business Assoc	
c. Develop a single Web site containing an inventory resources for entrepreneurs	Mid term	2005	2005	City Sm.Bus.Enterprise Director	
3. Motivate Santa Feans to start new companies.					
a. Streamline the City's permitting process	Short term	2004	2005	City	
Review the current permitting process and compare to the needs of startups and target industries	Short term	2004	2004	City	
City government should commit to easing and shortening the process within one year	Short term	2004	2005	City	
The City Web site should contain easy to use permitting info and applications	Mid term	2005	2005	City	
b. Consider waiving permitting fees for small businesses locating in targeted areas	Mid term	2006	ongoing	City	
c. Expand the City's Small Business Loan Program					
Restore the program to its original funding level	Short term	2005		City	
Take steps to ensure that there is broad awareness of the program across the community	Short term	ongoing		City

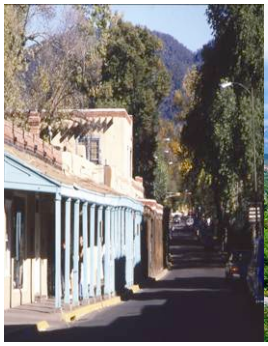
Summary of Sites and Infrastructure Recommendations



Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Sup*
1. Make Santa Fe the water conservation and clean energy capital of the U.S.	*** Top 5 ***	2004	ongoing	City	Enti
a. Incorporate clean energy and water conservation into the design of all public buildings	Mid term	2005	ongoing	City, County	
b. Begin an annual student competition for design of water conservation innovations	Long term	2007	annually	SFCC, City	Dev
c. Promote Santa Fe to expanding and relocating water conservation companies	Mid term	2005	ongoing	SFEDI, City	Cl
Promote the city's water shortage as an ideal test market for conservation tech and service firms					
Develop a marketing package highlighting SF's dedication to water conservation	Short term	2005	2006	SFEDI	
Organize a delegation to visit other cities that have successfully tackled the water issue	Short term	2004	2005	City, County	
d. Incentivize water conservation and clean energy use					
Expand programs in which utility companies offer rebates or credits to customers of clean energy	Mid term	2005	ongoing	Utilities, City	
Offer incentives to consumers that purchase energy/water or conservation technologies from local businesses	Long term	2007	ongoing	City, Utilities	
Work with State officials to create statewide incentives for energy and water conservation companies	Long term	2006	2008	City, County	
2. Provide better infrastructure and processes to support creative activities.					
a. Create a National Center for Art and Design in Santa Fe	*** Top 5 ***	2005	2008+	City	Ar
The Center is a single location where arts and design organizations can collaborate					
The Center should provide education, studios, small offices, exhibit space, and retail					
Consider placing the Center at the Rail Yards development or other central site, integrate proposed arts incubator					
The Center should invite international experts to teach seminars or lead local collaborative efforts					
b. Create a single Web site aimed at promoting arts and culture in Santa Fe	Short term	2004	2005	Arts Organizations	
One portal for all SF arts and cultural amenities, sets a single distinct image for SF					
Host a contest in which locals submit Web URLs or site design ideas	Short term	2004	2004	Arts Organizations	
Include an events calendar, map, and searchable database of SF arts / culture organizations					
Eventually, include a virtual market on the site in which local artists can sell their wares	Long term	2007	2008	Arts Organizations	
3. Partner with Santa Fe County to solve infrastructure and site issues.					
a. Develop a shared city / county business park	Long term	2006	2008+	City, County	
Share the cost of infrastructure, land, and tax revenue					
b. Jointly improve the Santa Fe Airport	Mid term	2004	2007	City, County	
SF City Council should approve the application for Park 139 certification	Short term	2004	2004	City Council	
Share funding for expanding the airport fire station and upgrading security along the perimeter	Mid term	2005	2006	City, County	
c. Develop wireless Internet infrastructure in core population centers in the city and county	Short term	2004	ongoing	City	L
4. Approve and construct a new convention center that represents the unique character of Santa Fe	*** Top 5 ***	2004	2008	City	Civic
a. Revisit the proposed design	Short term	2004	2005	City	Civic

Summary of Marketing Recommendations

Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibi*
1. Establish specific marketing roles for each organization involved in economic development.	Short term	2004	2004	City, SFEDI, Cha
a. The City and the marketing contractor should adopt this marketing strategy	Short term	2004	2004	City, SFED
b. The City should commit to a minimum 3-year contract with its marketing contractor	Short term	2004	ongoing	City
c. The City should tie the contract with the marketing contractor to specific performance metrics	Short term	2004	annually	City
2. Create and adopt a single economic development brand.	Short term	2004	2004	City, SFED
a. The City should strongly consider the brand identity "Creative Spirit of Santa Fe"	Short term	2004	2004	City, SFED
b. The City should ask its marketing contractor to hire a design firm to develop a logo and style guide	Short term	2004	2005	City, SFED
c. Distribute the style guide to all city departments, schools, media, non-profits, and arts organizations	Short term	2004	2005	City, SFED
Encourage as many organizations as possible to adopt the style guidelines in their own marketing				
The more organizations adopting the same marketing, the more powerful Santa Fe's brand will become				
3. Gain a thorough understanding of the target audiences.	Short term	2004	ongoing	City, SFED
a. Based on the Target Industry Report, develop an audience profile for each target	Short term	2004	ongoing	SFEDI
b. The City, its marketing contractor, and design firm should consider th audience profiles when developing the logo, style	Short term	2004	2005	SFEDI, City
c. The marketing contractor, SFEDI and the Chamber should identify target industry "champions"	Short term	2004	ongoing	SFEDI, City, Cha
d. Invite target industry champions to share their industry knowledge with the economic development team	Short term	2004	ongoing	SFEDI, Cham
4. Gain local media support for economic development.	Short - Mid	2004	2006	City, SFEDI, Cha
a. Reconvene the project advisory committee	Short term	2004	2004	City
b. Ask committee members to volunteer to become media champions, to write an article, or interview	Short term	2004	2004	Advisory Comm
c. Meet with local newspaper editorial boards and schedule a series of op/ed pieces on ED	Short term	2004	2005	Advisory Comm
5. Launch an internal economic development marketing campaign.	Short - Mid	2004	2006	SFEDI, City
a. The City and its marketing conatractor should review the internal marketing recommendations and Marketing Guide	Short term	2004	2004	SFEDI, City
b. Identify local volunteers to comprise an internal marketing team	Short term	2004	2004	SFEDI, City
c. Design marketing contractor's Web site to incorporate new brand identity, logo, style, and target industries	Short term	2005	2005	SFEDI
d. Launch other Web sites recommended throughout this strategic plan	Short - Long	2004	2008	Various organiza
e. Develop collateral (recommended throughout this strategic plan) and annual SFEDI report	Short - Mid	2004	2006	Various organiza
f. Host an annual economic development forum for the region; the roll out event can be the first	Short	2004	ongoing	City, SFEDI, Cha
g. Create a Welcome to Santa Fe package for newcomers	Mid term	2005	2005	City, Chamb
h. Establish an advisory group consisting of local students to provide info about what teens like/dislike about SF	Mid term	2005	ongoing	SFEDI, City
6. Launch an external marketing campaign.	Mid - Long	2006	2008+	SFEDI, City, Cha

ECONOMIC DEVELOPMENT DIVISION
Strategy for Implementation

Mission:

The mission of the Economic Development (ED) Division of the City of Santa Fe is to achieve long-term sustainable and focused economic growth by building a diverse, innovative economy with high-wage, high-impact jobs that provide opportunity and prosperity for the City's residents, businesses and entrepreneurs.

Objectives:

-Diversify the Santa Fe Economy with an emphasis on high wage jobs[1] and career paths.
-Pursue overall affordability where local wages can support living in Santa Fe (reduce leakage[2]).
-Bolster Santa Fe's leadership position and/or potential in innovation.

Background:

More than four years ago Angelou Economics produced a report for "Cultivating Santa Fe's Future Economy." The implementation strategies in this plan are principally derived from that report. In order to effectively institute the recommendations contained in the Angelou Plan the Economic Development Division has worked to outline a process for vetting potential projects. The process is designed to be fair, easily understood and transparent to members of the community.

Angelou Economics calls for the plan to be a 'living document,' and updated as conditions change. To that end, the Economic Development Division has held a series of key informant interviews and a series of professionally facilitated seminar meetings with input from members of the local business and economic community. The values and priorities outlined in this implementation plan were discussed and approved by attendees at these meetings. The implementation plan is designed to be driven by measurable, achievable outcomes in several of the target industries identified in the Angelou Plan.

Desired Outcomes:

The Economic Development Division will work to foster a creative and innovative cultural economy. Specific economic goals that have been identified are as follows:

- Create and attract a greater number of high-wage jobs. This will not be to the exclusion of supporting emerging business opportunities in focused sectors that would lead to high wage jobs, but may not start out with high paying jobs. This will give more of Santa Fe's population the ability to live and work in the community.
- Ensure that Santa Fe has a skilled and competitive workforce to support innovation and key economic base jobs[3] and primary industries[4]. This includes creating and expanding accessible career paths for local youth. Economic base jobs and primary industries are jobs and industries that derive fifty percent or more of their sales from outside of New Mexico and thus expand the local economy.
- Recruit and retain local talent by making professional opportunities in the area available and better understood in the community.
- Improve the climate for doing business in Santa Fe. This includes streamlining the processes of permitting, licensing and other regulatory requirements. The ED division also intends to celebrate innovation and success in leading local businesses.
- Improve the business infrastructure[5] in Santa Fe. This means working regionally to ensure easy, low-cost access to services, utilities, transportation and other key means of support for success in business and community development.
- Develop stronger working partnerships in the region. This means actively engaging key partners in projects and initiatives on a regular basis in order to maximize community input, expertise, support and communication.
- Promote a green and sustainable Santa Fe.
    - Actively promote and stimulate businesses and services consistent with the Sustainable Santa Fe Plan. This will include clean renewable energy, water conservation and waste reduction technologies.
    - Promote and support projects, developments, and initiatives with sustainable infrastructure[6] and that are consistent with the Sustainable Santa Fe Plan.
    - Cultivate and work to develop a green collar workforce[7] to support the clean renewable energy industry as well as both the new and retrofitting of buildings, sites and infrastructure to be more sustainable.

Division Work:

Staff will work consistently with partners on a regional and collaborative approach to economic development. The Chamber of Commerce, Santa Fe Business Alliance, Santa Fe County, the Museum Foundation of New Mexico, Creative Santa Fe, the Santa Fe Community College, SCORE, the Santa Fe incubator and local venture capital firms will all be key partnerships to maintain and strengthen. A responsive, cooperative, customer service oriented approach will be the guiding principle behind all work done by staff.

Staff work will include:

- Project Management (Site development, workforce training program development, business support program development and management, etc.)
- Business Retention, Expansion[8] and Passive Recruitment[9] (Incentive analysis, site location, funding facilitation consultation, strategic assistance, program referral, etc.)
- Marketing (Outreach, production of collateral materials, workshops, etc.)
- Actively Soliciting Proposals to meet community needs. (Proposals can come via our partners including the SF Chamber, the SF Alliance, the State Economic Development Department, staff, Councilors or from other sources.)
- Streamlining Business Processes (Licensing, permitting, etc.)
- Contract Management (Business support services, advocacy, etc.)
- Community and Business Relations (Staff will make regular visits to businesses to gain a firsthand understanding of the industries operating in the region and the challenges they face. During these visits staff will promote awareness of City and State economic development opportunities, policies and capabilities.)

Staff will visit approximately 50 businesses per year or approximately two businesses per week to discuss potential business development resources with each company. The resources that will be discussed will be but not limited to alternative financing programs (i.e. City's Small Business Loan Fund), technical assistance programs (i.e. SF Incubator, SCORE and SBDC programs) and State incentives. Staff will provide a quarterly report containing the following information:

- Number of Companies Visited
- Size of Portfolio (Number of Potential Company Expansions, Start-ups and Recruitments)
- Number of Companies Expanded, Started or Recruited
- Overview of Companies Expanded in Target Sectors, Number of Jobs, Average Wage and Capital Investment
- Progress on the Infrastructure Project implementation.

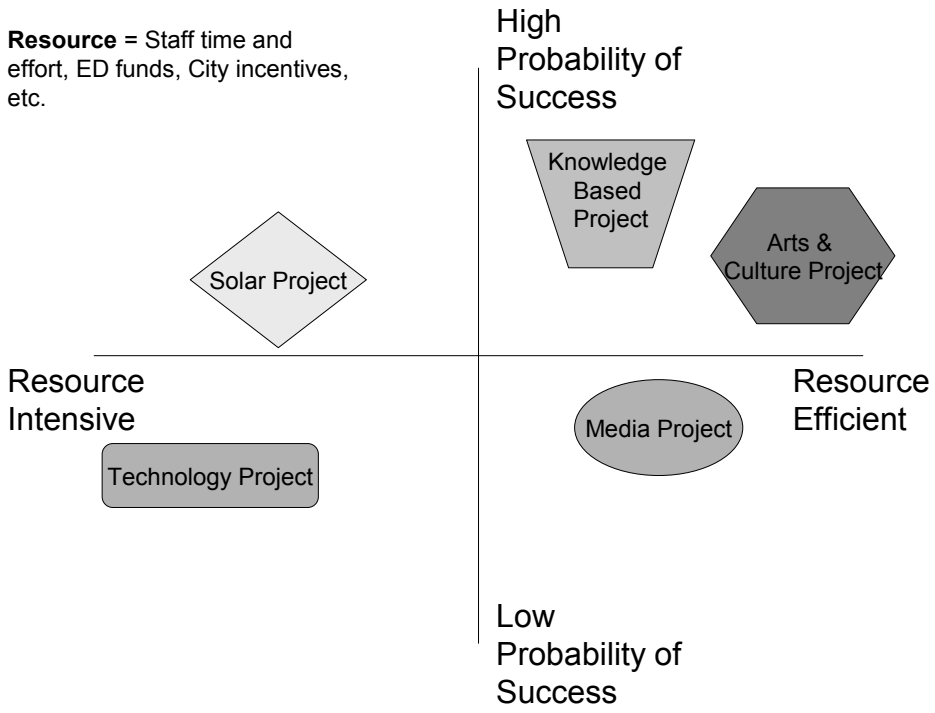
The Economic Development Division will take a proactive role in engaging a wide range of regional partners in collaborative efforts to benefit the economy. Emphasis will be placed on getting the right partners to cooperate on each project so that work can be focused on achieving measurable outcomes. For example, the Santa Fe Community College will be a key partner in workforce development and the Santa Fe Chamber of Commerce will be a key partner in business development.

Methodology:

The implementation strategy outlines a process for evaluating projects and proposals that meet agreed upon Economic Development Goals. Staff work will be focused along these guidelines:

- The Economic Development Division will focus efforts in a few strategic areas in order to effectively use limited resources. Projects will be outcome driven[10] with an emphasis on getting the greatest return for the investment of City resources.

- Work will be focused along three tracks – business development, workforce development and site & infrastructure development.



- Staff will work to streamline the process of providing services. Duties and provision of services will be aligned to best utilize resources, time and knowledge of staff.

- Significant effort will be made to provide good customer service and communication. The Division will be accessible to the community and work to ensure clear communication.

- Economic development activities will be regionally oriented with an emphasis on working in partnerships. Anticipated partners will include organizations such as the State of NM, the New Mexico Economic Development Partnership, the Santa Fe Community College, Santa Fe County, the Santa Fe Chamber of Commerce, the Santa Fe Alliance and the Santa Fe Incubator.

- The portfolio of projects will be organized with an investment/venture capital approach[11]. The portfolio will endeavor to balance safe bets and risky bets with an understanding that risky projects have a greater chance of failure but may yield the greatest returns. It is expected that applications for economic development projects, which may or may not solicit funding from the Economic Development fund, will be made throughout the year. All projects will be evaluated within the context of the current portfolio, as well as by taking into consideration pending applications. As staff will be working consistently with potential applications, there will be some preliminary assessment of where new applications will fall within the portfolio management spectrum. It is expected that the investment by the City will fall largely into projects with a high probability of success and efficient use of resources. To manage this portfolio, staff will work closely with projects and continually assess their progress toward meeting agreed upon objectives.

Venture Capital Portfolio

- Projects will be outcome driven and aligned with SMART Goals whenever possible. That is, goals that are - Specific, Measurable (data), Aggressive but Achievable, Relevant to Mission, and Timebound (not just open ended).

- During the working period and upon completion, each project will be assessed in order to make adjustments and improve outcomes. There will be a continuous feedback loop where project impact, strengths and weaknesses will be analyzed and any necessary corrections will be made.

Goals & Measures:

The goals and measures will be cumulative and cover a three year period.

1) Facilitate and assist in the creation of 900 high wage, economic base jobs (see definitions).

2) Facilitate the creation of 36 business expansions, startups, retention or recruitments to the Santa Fe region.
3) Increase the average wage in the Santa Fe region from $14.90 per hour to $15.90. This approach acknowledges and emerging trend in employment where employees contract to work on specific projects and may not be in salaried positions.
4) Complete or develop at least one infrastructure project per year. For example, an Arts & Cultural District[12], Mainstreet Program[13], telecommunications network plan, implementation of an Airport Master Plan, and expansion of solar industry capacity.
5) Facilitate and assist with the increase and/or creation of workforce career pathways and skill levels in targeted industry sectors by developing up to two workforce development programs. This will largely be accomplished by working with our local partners, including the SFCC, Santa Fe Public School District and the Northern Area Workforce Development Board.

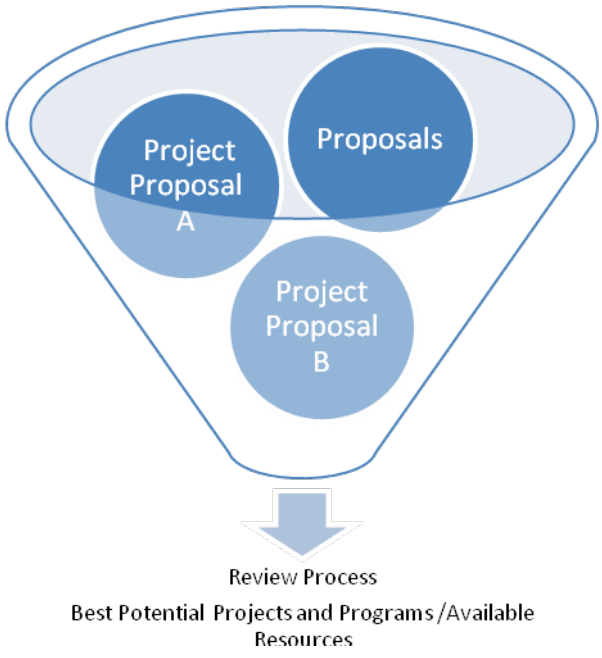
Targeted Sectors for Growth and Development:

Economic development activities will focus on targeted industries identified in the Angelou Plan and refined through the recent economic development seminar meetings. Targeted sectors are identified as follows:

- Media (Film, Publishing, Journalism, Video Game Production, etc.)
- Green – Consistent with Sustainable Santa Fe Plan and including: Clean renewable energy (with a focus on the solar industry), water conservation, waste reduction technologies and outdoor and recreational activities and equipment.
- Technology (Biotech, Nanotech, Software design, etc.)
- Knowledge Based Enterprise (Research and Development, Think Tanks, Financial Services, Consulting, Public Policy, etc.)
- Arts & Culture (Artisans, Fine Artists, and Cultural Heritage as described in the City's Cultural, Arts and Tourism Plan.)

Request for Proposal Versus Unsolicited Proposals:

The Economic Development Division anticipates two processes to generate projects and programs that will meet the Economic Development Implementation Strategy. These two processes reflect the nature of economic development work. The first will rely on generating proposals in response to an annual request for proposal and the second will allow for unsolicited proposals for economic development projects that may emerge during the course of a year.



1. *Request for Proposals* – Each year the staff will prepare a Request for Proposal (RFP) for services and/or programs that support local economic development efforts. Typically, these RFP's will allow for three years worth of contracting, subject to funding availability and successfully meeting the agreed upon outcomes

for a particular Scope of Work. These types of RFP's will focus on support services, such as those provided through the Santa Fe Incubator and SCORE and the management of the Santa Fe Loan Fund. These are services paid through the Economic Development Fund, which uses the 1% of the State's share of the GRT as its funding source.

2. *Unsolicited Proposals* – At any time, proposals may be submitted for projects that must meet the Local Economic Development Act. Such proposals may request funding through the EDF, below market rate rent for buildings and/or other types of incentives. These incentives may include fast tracking through the City's various review processes and/or favorable financing or other incentives such as Industrial Revenue Bonds (IRB's). Staff will work closely with organizations and/or entities seeking such support well in advance of an actual application for assistance. The process for evaluating these applications is the same as for those submitting proposals in response to a Request for Proposal.

Process for Evaluating Projects, Proposals and Incentives:

The process is designed to make project, proposal and incentive evaluation fast, easily understandable, transparent and accessible to the community. It is a way for staff to fully vet projects or incentive proposals and thereby determine the allocation of money, staff time and effort. The following illustrates how the evaluation process will consider multiple projects and focus efforts to those with the best potential outcome.

Stage 1 – Economic Development Target and Values Assessment

Staff will assess the project/proposal by applying the following values filters:

A. Environmental Footprint[14] (water, power, emissions etc)
B. Wages and Benefits[15] (Is it possible to live and work in Santa Fe?)
C. Innovative Position/Potential[16]
D. Local[17] (Does it fit with the City Different? Does it enhance the cultural fabric? Is it homegrown? Doest it provide positive impacts to local Santa Fe residents)

The project targets will be assessed qualitatively using a check mark system. When reviewing the project, each target met will be assessed and checked in the project evaluation chart below.

•

Stage 2 – Initial Business Plan/Proposal Review

- Staff will meet with representatives of a project/proposal and work to understand the proposed business plan and/or proposal, identify potential problems, discuss potential resources, and answer any questions.

- Staff will perform an initial evaluation to ascertain the plan strengths and weaknesses. Financial solvency, community need, growth potential and environmental footprint will also be evaluated.

- Staff will work with representatives to match them with appropriate economic development resources. Staff will also ensure that all proposals are in compliance with the State's enabling legislation the Local Economic Development Act[18] which in Santa Fe is the Economic Development Plan Ordinance.

Cost-Benefit Analysis: Economic Development projects will also include a cost-benefit analysis as required by the city's (11-11.1) Economic Development Plan Ordinance. In accordance with the Economic Development Plan ordinance, the projects and/or incentive proposal must provide a return on investment over a 10-year period that recoups the value of the assistance provided by the city to the project. The return on investment shall be of value and may be paid in money, in-kind services, jobs, expanded tax base, property or other thing or service of value for the expansion or improvement of the economy.

The cost-benefit analysis or impact analysis will measure both direct and indirect impacts in accordance with 11-11.9 of the Economic Development Plan ordinance which will include but is not limited to the following:

- Jobs
- Pay scale of jobs
- Anticipated impact of project on local tax base
- Anticipated impact of project on local school system

- Assistance in providing affordable housing to employees or to the community at large may qualify

If a proposal requires funds of less than $30,000 staff will make a recommendation to the City Manager and move forward. Quarterly reports will be made to the BQL on these projects. If the proposal requires funds of more than $30,000 staff will refer the project/proposal to the Economic Development Review Sub-Committee (EDRC) with a recommendation.

Staff will utilize the following target industry evaluation chart to map the benefits and impacts of a project/proposal, The system of checkmarks is designed to provide a quick overview of the project's applicability to the target industry areas and the types of program and/or assistance needed for a particular business plan:

Target Industry Evaluation Chart:

	Business Development	Workforce Development	Sites & Infrastructure
Targets			
Media			
Green			
Tech			
Knowledge Based Enterprise			
Arts & Culture			

The project will also be assessed whether it meets the city's values as defined in the city values filters chart below. The values will be assessed using the following quantitative measures on a scale of 1-3 where three is exceeds values and 1 does not meet values. Use of this scale will provide a quantitative comparison between projects and provide an initial assessment of a proposed project's ability to address agreed upon local values:

3- Exceeds Values Criteria
2 – Meets Values Criteria
1 – Does Not Meet Values Criteria

City's Values Filters Chart:

	Business Development	Workforce Development	Sites & Infrastructure
Values			
Low Environmental Footprint			
High Wages & Benefits			
Innovative Position/Potential			
Local			

Stage 3 – EDRC Review
The EDRC will review the staff recommendation and assess the project/proposal against the values filters, desired outcomes and financial feasibility. The EDRC will then make its recommendation to the Business and Quality of Life Committee (BQL).

Stage 4 – BQL Review
BQL will review the EDRC recommendation and assess the project/proposal against the values filters[19], desired outcomes and financial feasibility. BQL will then make its recommendation to the City Council OR reject the project/proposal.

Stage 5 – Council Review
The City Council will assess the project/proposal against the values filters, desired outcomes and financial feasibility. The City Council will approve or reject the project/proposal.

Project/Proposal Evaluation Flow Diagram

Requests for Proposals:

RFPs will be focused on getting results rather than outlining step by step procedures. This will allow for maximum input and creativity from RFP responders. Staff will evaluate RFP responses according to how well each proposal will meet the desired economic development outcomes.

The timeline for RFPs to be issued will be no more than 30 days after approval of the implementation plan by City Council. The RFPs will be reviewed and evaluated by a committee as required under the City's procurement code. The RFPs will be evaluated on how the respondents will meet the desired outcomes. RFP awardees will receive a contract for one year and two one year extensions.

Staff will work with RFP respondents to get more information, clarify how the work will be done and what outcomes need to be reached. For RFPs greater than $30,000 respondents will present their proposal to the EDRC. Staff will provide the EDRC with a funding recommendation.

Staff will administer contracts according to the scope of work and timeframe agreed upon in each contract. If necessary, at the discretion of the Division Director and Department Director, timeframe extensions and contract revisions may be made.

DEFINITIONS

[1] **High Wage Jobs** – In the State of New Mexico these are defined as jobs that pay a salary of $40,000 and above.

[2] **Leakage** – The loss of revenue in taxes and spending and the loss of talent that occurs when people cannot afford to work and live in the community.

[3] **Economic Base Jobs -** Economic base jobs are jobs in primary industries. An economic base job is any job that produces a product or service that is sold outside the community and thus brings in outside money. Most economists believe that the economic base job is the most important factor to a healthy economy.

[4] **Primary Industries** – Primary industries are defined on the same principle as economic base jobs. They are industries that derive fifty percent or more of their sales from outside of New Mexico and thus bring in new money expand the local economy. Businesses that bring in outside money are called primary industries, and they produce the coveted "economic base" jobs.

[5] **Business Infrastructure** – The basic facilities, services, and installations needed for the effective functioning of businesses in the area. This can include transportation and communications systems, water and power lines, as well as public institutions including schools and post offices.

[6] **Sustainable Infrastructure** – Basic facilities, services and installations which take care of the needs of the present generation without compromising the needs of future generations.

[7] **Green Collar Workforce** – A workforce employed in the environmental segment of the economy. Green collar workers include professionals such as conservation movement workers, environmental consultants, environmental or biological systems engineers, LEED's certified building architects, holistic passive solar building designers, solar energy and wind energy engineers, alternative energy vehicle engineers, organic farmers, environmental lawyers, ecology educators, and eco-technology workers. They also include vocational or trade-level employment: electricians who install solar panels, plumbers who install solar water heaters, and construction workers who build energy-efficient LEED certifed buildings, wind power farms, or other clean, renewable, sustainable future energy developments.

[8] **Business Retention and Expansion** – The retention of local businesses located in the Santa Fe region that may leave the community. Expansion is assisting local businesses in the Santa Fe region in growing their operations, employment or sales which results in more jobs and capital investment in Santa Fe.

[9] **Passive Recruitment** – Responding to inquiries and opportunities from businesses considering locating in the Santa Fe area but not actively marketing businesses to locate in Santa Fe from outside of Santa Fe.

[10] **Outcome Driven** – Guided by what results are or can be achieved rather than the method or process of working towards results.

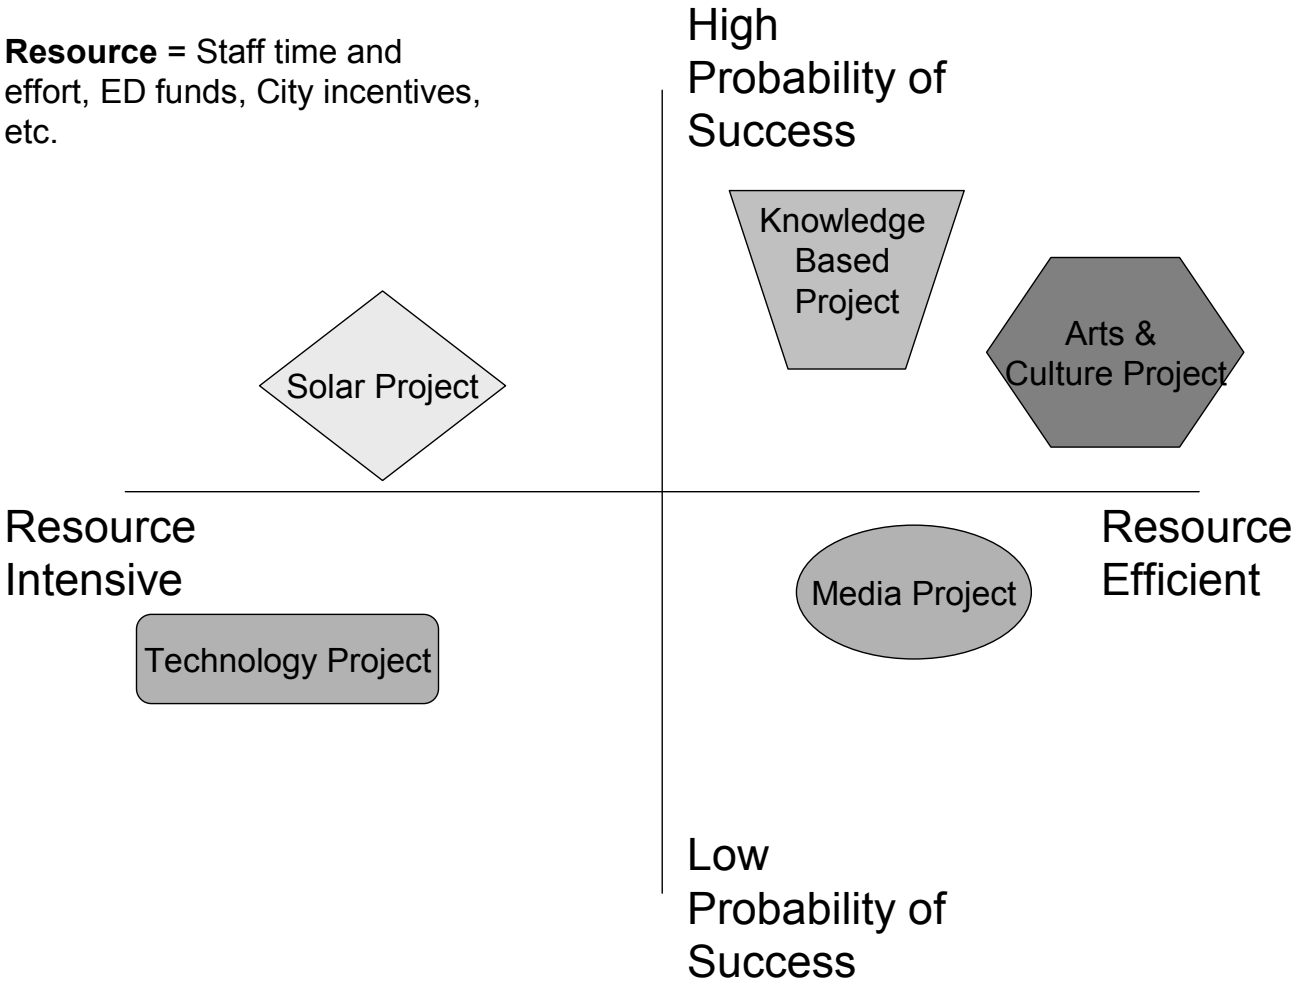
[11]**Investment/Venture Capital Approach** - An approach similar to that taken by investment and venture capital managers wherein resources are balanced between calculated risky and safe ventures where safe ventures produces lower returns on investment and higher risk ventures produces higher returns on investment. Investments are also spread across different areas to achieve stability through diversity.

[12] **Arts & Cultural District** – A State program administered by the Mainstreet program which is designed to enhance local economic development opportunities, in designated districts, by placing an emphasis on indigenous arts and culture. Applying communities develop a plan to support, develop and enhance the selected district's arts and cultural opportunities as a niche for economic development.

[13] **Mainstreet Program** - New Mexico's MainStreet Program is a grassroots economic development program that assists communities in revitalizing their traditional commercial neighborhoods. Mainstreet works to create an economically viable business environment while preserving local cultural and historic resources.

[14] **Environmental Footprint** – A project/proposal's potential impact on the local environment and ecology including water and power use, emissions, amount of solid waste generated, impact on local vegetation and wildlife and traffic impact.

[15] **Wages and Benefits** – A project/proposal's potential impact on or offering of employee pay and benefits including but not limited to retirement, healthcare, educational benefits, flexible scheduling, community service, support and involvement.



[16] **Innovation Position/Potential** – A project/proposal's potential impact on Santa Fe's innovation in an industry or the possibility of increasing the creative and/or innovative impact on the industry.

[17] **Local** – A project/proposal's homegrown origin or its impact on the cultural fabric, identity i.e. how it fits with the 'City Different,' and/or provides positive economic impacts to residents of Santa Fe,

[18] **Local Economic Development Act** – The State of New Mexico's enabling legislation which allows local governments the ability to use public money for private enterprises (including non-profits) in the form of land, building and infrastructure in order to foster economic development. This legislation allows public investment in private enterprises without violating the anti-donation clause of the New Mexico State Constitution

[19] **Values Filters** – The method for evaluating projects according to what is important to the local community's priorities.

RE: Las Soleras <u>Master Plan Amendment</u> Application – change Zoning Districts for Master Plan Parcels 19, 20, 21, 23, 24 and 26 to a uniform C-2 District and make adjustments to Rambla width in keeping with the North side of Beckner Road.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of applying for an amendment to the Las Soleras Master Plan per the SFCC 14-3.9 – MASTER PLANS. This application is a companion to both a General Plan Amendment and Rezoning application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

PURPOSE AND INTENT:

The current Master Plan zoning districts along with the zoning districts proposed with this application are found in the table below. The combined area of Parcels 19 – 26 is 57.63 acres.

Table I. ***Las Soleras Parcels 19-26 proposed Land Use Classification/Zoning District***

Parcel	Acres	Current Land Use Classification/Zoning District	Proposed Land Use Classification/Zoning District	Address Santa Fe, 87507
19	9.11	Transitional Mixed Use/MU	Community Commercial/C-2	5021 Rail Runner Loop
20	10.70	Business Park/BIP	Community Commercial/C-2	5091 Rail Runner Loop
21	4.70	Office/C-1	Community Commercial/C-2	5140 Rail Runner Loop
22*	9.12	Community Commercial/C-2	Community Commercial/C-2	5090 Rail Runner Loop
23	7.27	Office/C-1	Community Commercial/C-2	5040 Rail Runner Loop
24	6.18	Office/C-1	Community Commercial/C-2	4354 Beckner Road
25*	7.37	Community Commercial/C-2	Community Commercial/C-2	4552 Beckner Road
26	3.48	Office/C-1	Community Commercial/C-2	5210 Rail Runner Loop

**No change in Land Use Classification or Zoning requested*

The purpose of this application is to amend the Las Soleras Master Plan Zoning designations for Parcels 19, 20, 21, 23, 24, and 26 allowing for a uniform C-2, General Commercial Zoning District across parcels 19-26. The intent is to allow for the adjustment of existing lot lines as to accommodate future development in a thoughtful and organized manner as opportunities present themselves. The consistent C-2 zoning will also accommodate three story office and retail services including restaurants. This flexibility in use will provide an opportunity to attract business and commercial uses offering higher salaries and services to the surrounding neighborhood.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses as allowed in a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The rezoning of parcels to a C-2 District will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged.

Finally, this amendment also proposes a house keeping item in reducing the Rambla width from 90’ to 45’ to match the Rambla width as granted in the most recent Las Soleras Master Plan Amendment approved in 2019. The larger Plaza open space area will remain as is but this amendment request flexibility to locate the plaza anywhere along the Rambla between Beckner Road and Rail Runner Loop Road. See the Conceptual Test Fit for more perspective on this request.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be zoned as C-2 General Commercial

will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development. A uniform C-2 zoning across parcels 19-26 will make the relocation of lot lines an administrative process enabling the site parcels to be easily configured to the needs and sizes of a variety of uses.

A future Rail Runner rail stop was envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. A uniform C-2 zoning district could accommodate uses that eventually establish this base level of ridership.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is zoned C-2 General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely and especially within a C-2 Zoning district.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as C-1. It is partially developed with the Presbyterian Medical Services Office Building recently opened in late 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire northern edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as C-1; R21; and R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site. Thanks for your review and consideration of this application.

Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.

Las Soleras Parcels 19-26 - Master Plan Amendment Application
Approval Criteria Responses
February 12, 2024

The proposed amendment to reclassify Las Soleras Master Plan parcels from Transitional Mixed Use/MU, Business Park/BIP, and Office/C1 to Community Commercial/C-2 is summarized in Table I. by parcel.

Table I. ***Las Soleras Parcels 19-26 proposed Land Use Classification/Zoning District***

Parcel	Acres	Current Land Use Classification/Zoning District	Proposed Land Use Classification/Zoning District	Address Santa Fe, 87507
19	9.11	Transitional Mixed Use/MU	Community Commercial/C-2	5021 Rail Runner Loop
20	10.70	Business Park/BIP	Community Commercial/C-2	5091 Rail Runner Loop
21	4.70	Office/C-1	Community Commercial/C-2	5140 Rail Runner Loop
22*	9.12	Community Commercial/C-2	Community Commercial/C-2	5090 Rail Runner Loop
23	7.27	Office/C-1	Community Commercial/C-2	5040 Rail Runner Loop
24	6.18	Office/C-1	Community Commercial/C-2	4354 Beckner Road
25*	7.37	Community Commercial/C-2	Community Commercial/C-2	4552 Beckner Road
26	3.48	Office/C-1	Community Commercial/C-2	5210 Rail Runner Loop

**No change in Land Use Classification or Zoning requested*

SFCC 14-3.9 (D) MASTER PLAN AMENDMENT APROVAL CRITERIA; CONDITIONS

(1) Necessary Findings
(Ord. No. 2014-31 § 5)
Approval or amendment of a master plan requires the following findings:

(a) the master plan is consistent with the general plan;

Response: The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals are supported:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4: *Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*

Policy 9-2-G-5: *Promote small business.*

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

(b) the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;

Response: This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Parcels 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across parcels 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to

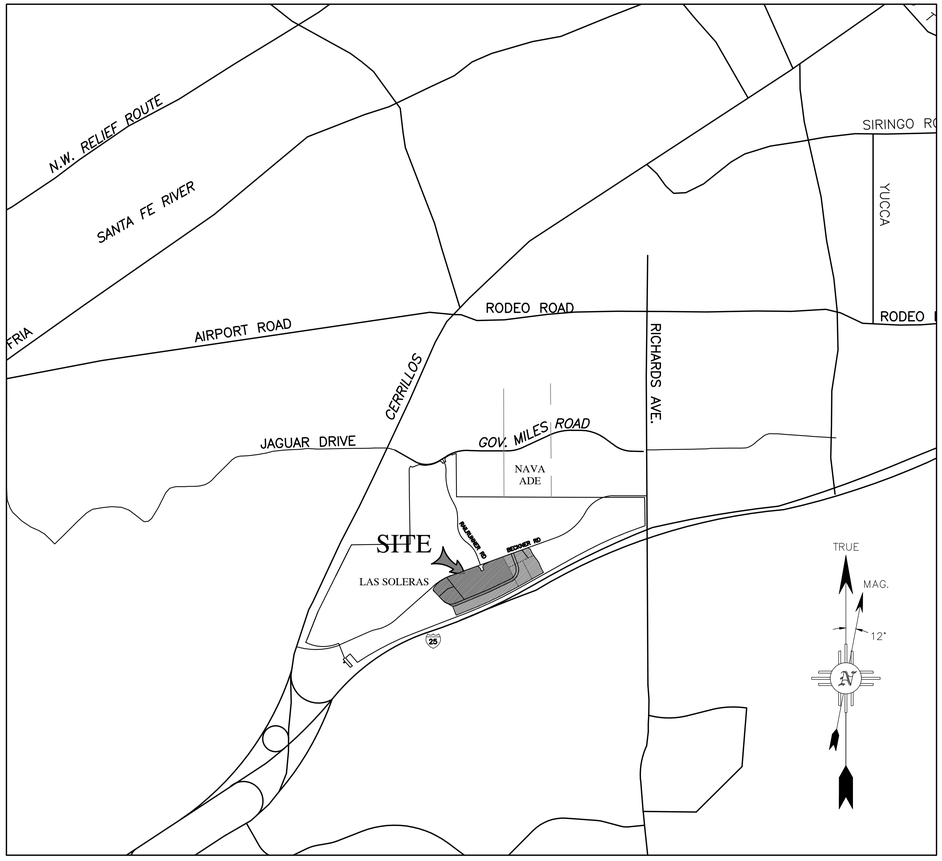
develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(c) development of the master plan area will contribute to the coordinated and efficient development of the community; and

Response: This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of parcels 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System.

(d) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.

Response: The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.



The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request.

Las Soleras Core

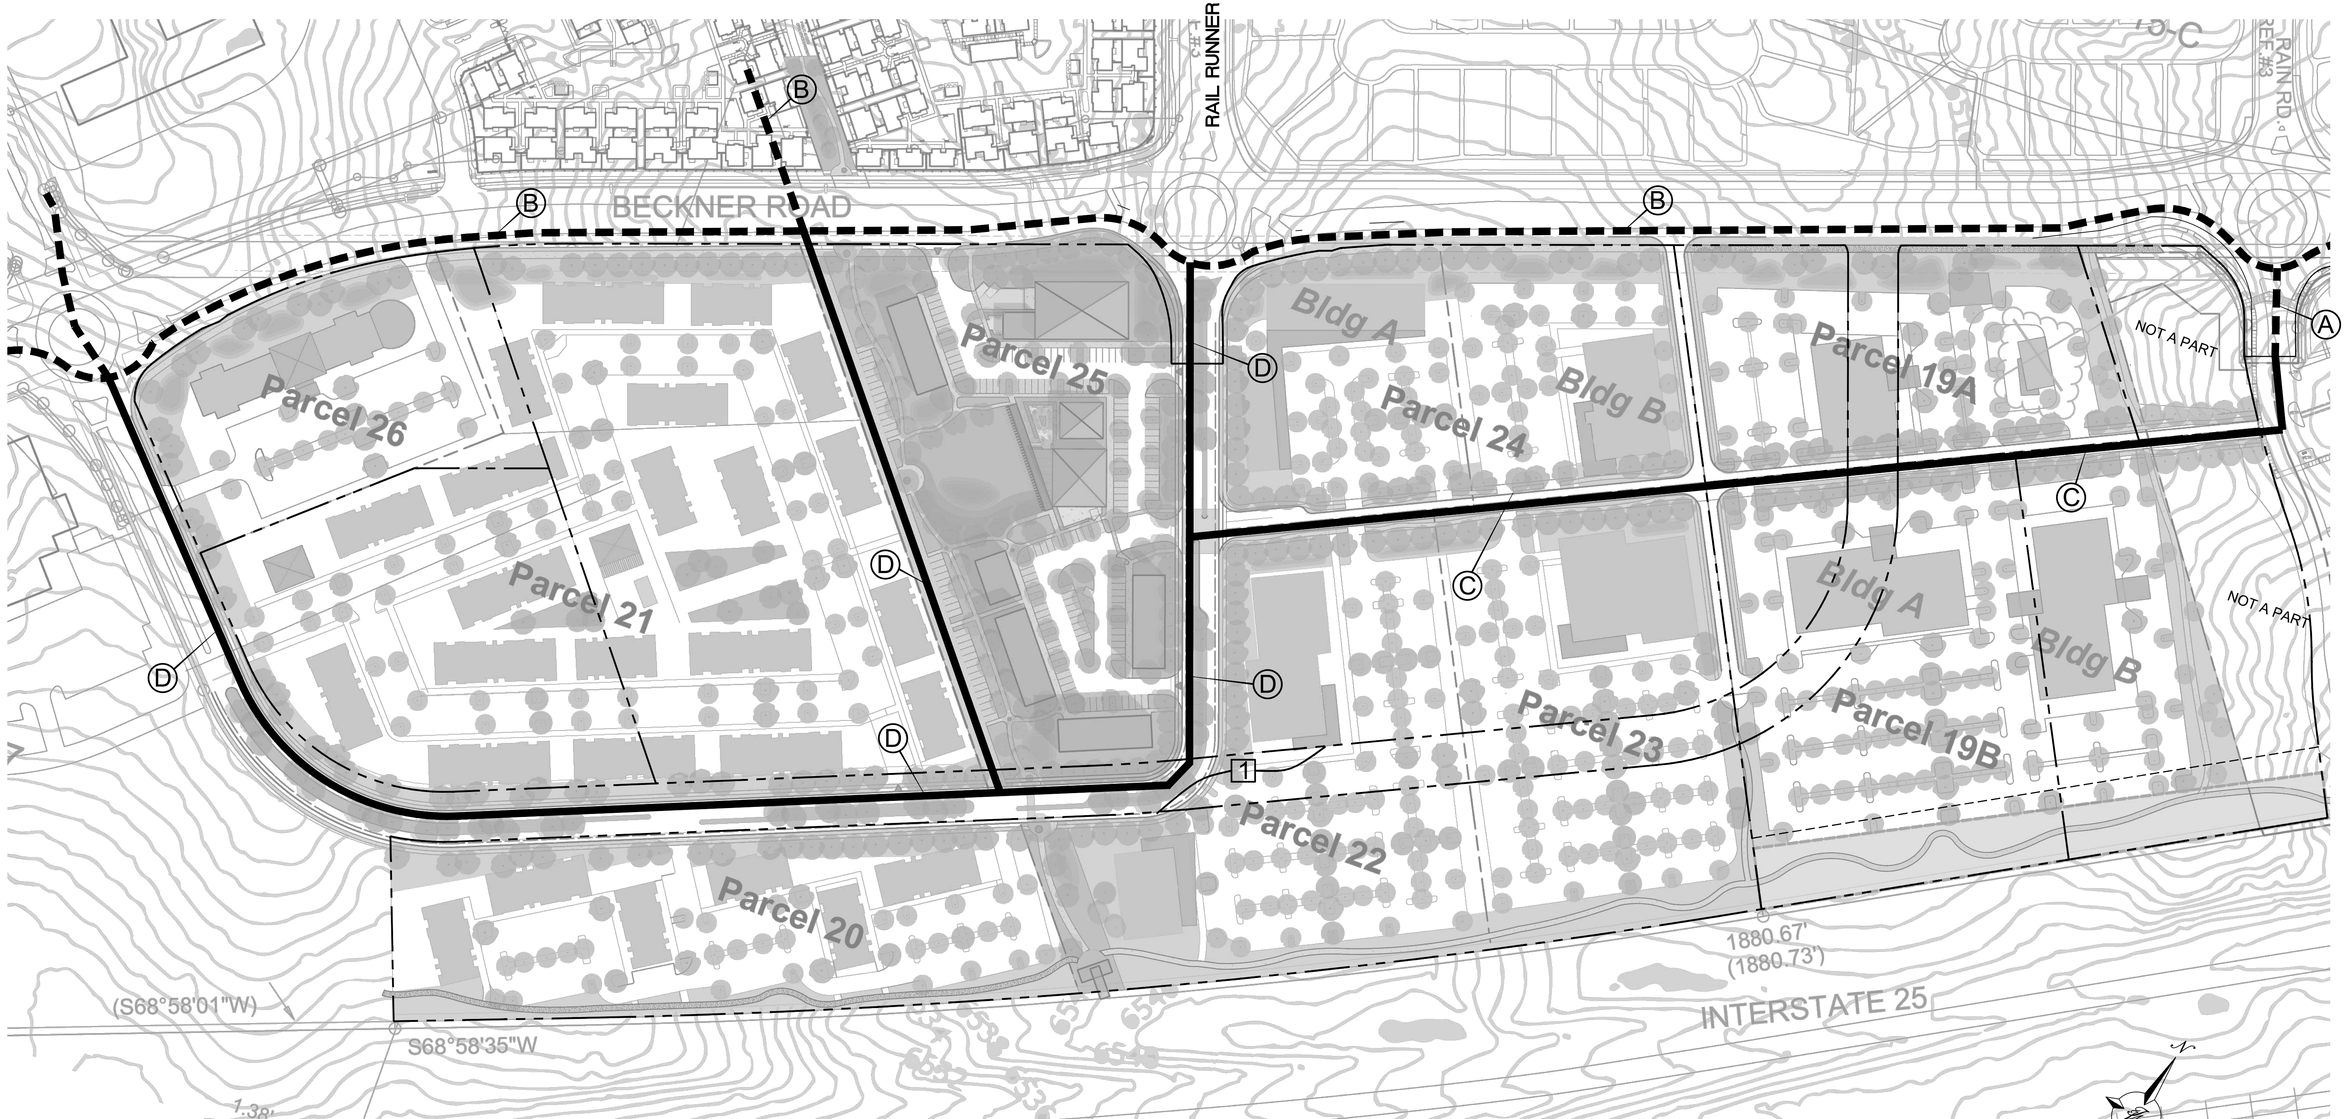
The Las Soleras Core is uniquely able to become the vibrant heart of southern Santa Fe. The Las Soleras Core is in an optimal location and size to host a variety of iconic neighborhood needs--a market, a restaurant, food-beverage outlets, neighborhood retail and commercial. Here is a conceptual look what the Core could be.

- Water harvesting along Becker and along Rail Runner Loop to capture stormwater to support a green edge of trees and native plants.
- Neighborhood Scale Market *(Size example: Kaune Market)*
- Food & Beverage *(Size example: Iconic Coffee)*
- Possible future road connection to east parcels would support an active engagement with lively Core
- Restaurant oriented toward "The Green" *(Size example: Rustica Resturant/SF Brewery)*
- The Long Zaguan would be a shady connector across the Green. An iconic feature with photovoltaic panels--conveying an embrace of art and environment.
- The Green repositions the required Master Plan parklet to be the heart of the Las Soleras Core. Where people can come to meet, eat, relax, and engage in small-scale community events such as music or recreation.
- Two-story buildings at the southern end of the Core would provide retail-commercial services spaces from which to serve the Las Soleras neighborhoods and south Santa Fe.
- The Rambla Trail system connects the Core with the surrounding residential neighborhoods, condominiums, senior living, apartments, office complexes, the regional hospital to the west. possible medical and education facilities, and a potential future rail raod station at I-25.

Las Solares Development Prototypes Data

Sept. 1, 2023

Notes: A. Test based on program and product prototypes



B. Applies CoSF development ordinance requirements

C. Test is for single story development.

D. Parking based on net lease (NL) of 10% reduction of gross square footage (GSF)

Opportunity: Consider asking CoSF to use a shared parking plan to increase density. Target would be for 10% shared of total provided.

Mr. Dan Esquibel
City of Santa Fe Water Division
200 Lincoln Avenue
Santa Fe, NM. 87501

RE: LAS SOLERAS 57 ACRE DEVELOPMENT
LAS SOLERAS PARCELS 19-26
WATER AND WASTEWATER LETTER

Dear Mr. Esquibel:

To ensure that the proposed General Plan land use classification of Community Commercial and associated proposed rezoning to a uniform C-2 district of the 57.63 acres of Las Soleras Master Plan parcels19-26 (located along the Southern edge of Beckner Rd between Las Soleras Dr and Walking Rain Rd) will not produce excessive demand on the existing water and sanitary sewer infrastructure in Beckner Rd, Tierra West LLC has prepared the following summary of existing water and sewer capacities and water and sewer flowrates for a conceptual design we are referencing as "Conceptual Test Fit A" for your review.

Sanitary sewer capacities were calculated assuming gravity flow along two of its segments – the segment from the roundabout at Las Soleras Dr to the roundabout at Rail Runner (along which the minimum slope is 0.73%), and another segment from Rail Runner to the roundabout at Walking Rain (along which the minimum slope is 1.05%). The capacity of the existing water main was calculated assuming an 11 ft/s flow velocity.

The capacity of both existing pipes was found to be sufficient to serve the property if developed per either the existing or proposed zoning, and the water and sewer flowrates for these conditions are summarized below.

For the first segment mentioned above (from Las Soleras Dr to Rail Runner), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 843 gpm with velocity 3.44 ft/s.

For the second segment mentioned above (from Rail Runner to Walking Rain), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 1,011 gpm with velocity 4.13 ft/s.

The peak sanitary sewer flowrate calculated for the development assuming development per the existing zoning was 150 gpm, For design Test Fit Concept "A" it is 191 gpm,

Water discharge was assessed for the existing 12" ductile iron main in Beckner using an assumed velocity of 11 ft/s and was calculated at 2,693 gpm.

The peak water flowrate calculated for the development assuming development per the existing zoning was 167 gpm with average irrigation flowrate 5.79 gpm, for design Test Fit Concept "A" it is 212 gpm with average irrigation flows at 5.52 gpm,

If you have any questions or need additional information regarding this matter, please do not hesitate to contact me.

Sincerely,

Ronald R. Bohannan, P.E

EARLY NEIGHBORHOOD MEETING NOTES

Project Name:	Las Soleras
Project Location:	4200 Beckner Road
Project Description:	Development Plan Amendment for Development Plan with Summary Plat/Lot Split for proposed 141-unit Apartment Complex
Applicant:	
Agent:	Orion West LLC
ENN Meeting Date:	14 November 2023
ENN Location:	Via Zoom
Application Type:	General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.
Land Use Planner:	Dan Esquibel
Attendance:	**City of Santa Fe:** Dan Esquibel **Developer Team:** Brian Nenninger (Agent), Maureen Mestas (Agent), Scott Herbert, Dave Delgado, Karl Sommer, Esq. **Neighborhood/Public:** 1 attendee. An unidentified neighbor who was on a non-video tile but did not identify him/herself or speak.

Notes/Comments:

14 November 2023/ 5:30 – 6:12pm Meeting

The meeting started at approximately 5:39pm. Roll call and introduction of those attending was held. Dan Esquivel indicated that he would like to wait an additional few minutes to allow others to log in. After a brief wait, the meeting continued without any additional attendees.

Brian Nenninger then introduced the Developer Team.

Brian Nenninger informed the group that this ENN is for the purposes of noticing a General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5 of all parcels in the Las Soleras Master Plan; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.

Highlights Brian shared during the presentation included:

The property is located within the 545 acre Las Soleras Master Plan Subdivision that was first created via an annexation ordinance in 2009. Since 2009 the Master Plan has been amended multiple times – the most recent being October 2019.

- Eight (8) existing legal parcels that together comprise 57.63-acres.
- Existing Zoning:

C-2: Two parcels
C-1: Four parcels
MU: One parcel
BIP: One parcel

- Master Plan Items that need to be "Cleaned Up."

Rail Runner Loop Road realignment to meet Rail Runner Road
Lot Line adjustments and resizing of parcels to better accommodate Commercial Users
Rambla open space design including location of "parklet."

The Applications that are being shared in the ENN are:

- General Plan Amendment Application
- Master Plan Amendment Application

Address Realignment of Rail Runner Loop Road
Propose modification to Rambla width.
Propose flexibility of "parklet" location along the Rambla
Discussion of Master Plat/Parcel Realignment

- Rezoning Application

Propose C-2 Zoning for eight parcels.

- Planned Unit Development (PUD) Application under consideration/discussion.

with City of Santa Fe

Brian wanted to take particular note that this is not an application for Development Plan Per the Santa Fe City Code. Qualified development/building construction will require separate Development Plan Applications, ENNs and Planning Commission Hearings.

He further stated that the proposed rezoning, along with the General Plan and Master Plan amendments lay the groundwork for better development needed to meet local market demands.

Those possible mix of uses for local market demand are:

- Neighborhood Commercial Retail, such as, Restaurants, Bakeries, Pubs, Coffee Shops, Marketplace/Grocery Coop, Copy/Printing, Dry Cleaning, Pharmacy
- Office (including Medical Office)
- Medical Education
- Multifamily Residential
- Hotel

Las Soleras Junction has transit-oriented improvements, specifically:

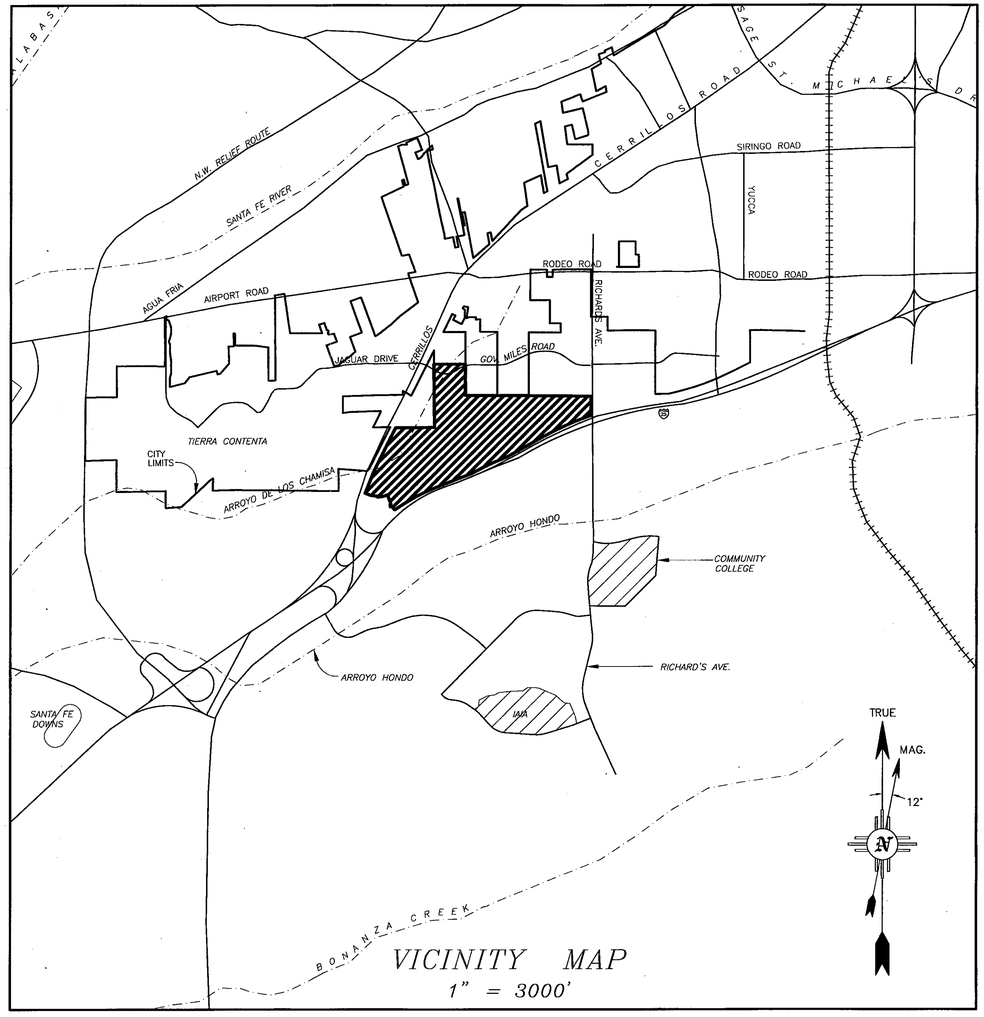
- Completion of Las Soleras bridge (triggered by 20 acres and 300,000 sf of development of parcels 19-26.)
- Further build out of Las Soleras trails system including the Rambla and "Parklet"
- Additional Bus stop/access on Rail Runner Loop Road
- Place holder for future Rail Runner Stop

Las Soleras Junction is a work in progress. Conceptual test fits to understand options for flow of pedestrians and vehicles within the site. Engineering and Design of Las Soleras Bridge to complete Las Soleras Drive from Cerrillos to Beckner. Utility and Traffic Study activity will be required. Design Guidelines are being developed to provide a cohesive, responsible, and pleasing experience for those who use and access the site. Guidelines will stay within the Santa Fe City Code and address, Architecture Concepts, Landscape Design, Lighting, Trails, Sidewalk and Roadway Connectivity to and within the site.

Brian then summarized the intention of the applications for this ENN, those key points being:

- Clean up issues in the Master Plan created from past developments/amendments. including the realignment of Rail Runner Loop Road with the relocated Rail Runner Road.
- Lay the groundwork for more effective use of parcels 19-26 through consistent zoning to allow for administrative lot line adjustments.
- Provide greater flexibility in providing neighborhood retail services including Food and Beverage. Uses brought to the site will be driven by the local and area market.
- Facilitate the completion of Las Soleras Drive and Bridge connecting Cerrillos to Beckner.

Brian opened the ENN for questions from the City Staff and neighbors. No one in attendance who was believed to be a neighbor asked to speak. No neighbor or other interested party was on the CHAT feature to ask questions.



There was a brief discussion between Dan Esquivel and Brian Nenninger about the status of the applications after the meeting. The meeting was then adjourned by Dan Esquivel.

ANNEXATION, ROAD DEDICATION AND VACATION PLAT

PREPARED FOR

LAS SOLERAS

WITHIN SECTIONS 7, 17, AND 18,
T.16N., R.9E., N.M.P.M.
SANTA FE COUNTY, NEW MEXICO.

NOTE:
ROAD DEDICATION MAY INCLUDE TEMPORARY OR PERMANENT CONSTRUCTION MAINTENANCE EASEMENTS FOR SLOPES, DRAINAGE STRUCTURES AND ANCILLARY IMPROVEMENTS AS DETERMINED BY FINAL ENGINEERING PLANS. OWNERS ACKNOWLEDGE THAT REASONABLE ADJUSTMENTS TO THE PRECISE LIMITS OF RIGHT–OF–WAY MAY BE REQUIRED BY THE PLANNING COMMISSION AT THE TIME OF SUBDIVISION PLAT APPROVAL.

ROADWAYS DEDICATED BY THIS PLAT MAY BE ADJUSTED TO ALIGN WITH CROSS STREET INTERSECTIONS AND TO SATISFY ENGINEERING STANDARDS PROVIDED THAT SUCH RE–ALIGNMENT DOES NOT DECREASE THE AREA OF DEDICATION AND IS ACCEPTED BY THE CITY AS EVIDENCED BY THE APPROVAL OF THE PUBLIC WORKS AND LAND USE DEPARTMENTS AND RECORDED AS A PLAT AMENDMENT.

LEGEND

BEARINGS ARE REFERRED TO THE NEW MEXICO STATE PLANE COORDINATE SYSTEM, NAD83 CENTRAL ZONE. DISTANCES SHOWN ARE GROUND LEVEL. REFERRED TO 6600' AMSL DATUM. TO CONVERT DISTANCES TO GRID DISTANCES MULTIPLY BY A SCALE FACTOR OF 0.999598.

- ●F DENOTES REBAR, OR AS SHOWN, FOUND.
- ● DENOTES 1/2" REBAR WITH CAP 7014 TO BE SET UPON RECORDING.
- • DENOTES CALCULATED POINT, NOT SET.
- DENOTES NEW LOT LINE.
- (#) DENOTES TRACT NUMBER.
- DENOTES BOUNDARY OF LANDS DEALT WITH BY THIS PLAT. INFORMATION OUTSIDE OF THIS BOUNDARY IS BACKGROUND INFORMATION ONLY, NOT VERIFIED FOR ACCURACY AND IS NOT PART OF THIS PLAT.

RE: General Plan Amendment Application – Change Land Use Designations from Office, Industrial Park, and Transitional Mixed Use to Community Commercial in Las Soleras Master Plan Parcels 19, 20, 21, 23, 24 and 26.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of applying for an amendment to the City of Santa Fe's General Plan per the SFCC 14-3.2 - AMENDMENTS TO THE GENERAL PLAN. This application is a companion to both a Master Plan Amendment and Rezoning application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

PURPOSE AND INTENT:

The current General Plan classification along with the *proposed* land use classification by parcel can be found in the table below. The combined area of all Parcels 19 – 26 is 57.63 acres.

Parcel	Acres	Current Land Use Classification	Proposed Land Use Classification	Address Santa Fe, 87507	UPC Number
19	9.11	Transitional Mixed Use	Community Commercial	5021 Rail Runner Loop	1050094200323000000
20	10.70	Business Park	Community Commercial	5091 Rail Runner Loop	1050094093244000000
21	4.70	Office	Community Commercial	5140 Rail Runner Loop	1049094529247000000
22*	9.12	Community Commercial	Community Commercial	5090 Rail Runner Loop	1050094065275000000
23	7.27	Office	Community Commercial	5040 Rail Runner Loop	1050094143308000000
24	6.18	Office	Community Commercial	4354 Beckner Road	1050094129338000000
25*	7.37	Community Commercial	Community Commercial	4552 Beckner Road	1050094041306000000
26	3.48	Office	Community Commercial	5210 Rail Runner Loop	1049094503274000000

**No change in Land Use Classification requested*

The purpose of this application is to provide a uniform Community Commercial land use classification along with a uniform C-2 zoning district (via separate rezoning application) across parcels 19-26 to allow for the adjustment of parcel lot lines to deliver future development that is better aligned with the goals and intent of the General Plan.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses as allowed by a Community Commercial land use classification and a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The reclassification of parcels to Community Commercial will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be reclassified as Community Commercial will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development and inconsistent with the goals and intent of the General Plan.

A future Rail Runner rail stop was envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. Although this demand will be difficult to achieve, it will be next to impossible without the somewhat denser development that can be realized by a reclassification to Community Commercial in parallel with a uniform C2 General Commercial zoning district.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is classified as Community Commercial and zoning is C-2, General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as Office. It is partially developed with the Presbyterian Medical Services Medical Office Building recently opened in the second quarter of 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire North edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as Office/C-1; Residential 12-29 dwelling units/R21; and Residential 3-7 dwelling units/R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this General Plan Land Use reclassification and related Rezoning application on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site.

Thanks for your review and consideration of this application. Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.
Orion West, LLC

Las Soleras Parcels 19-26 - Master Plan Amendment Application
Approval Criteria Responses
February 12, 2024
Amended to include revised General Plan Approval Criteria: July 30, 2024

The proposed amendment to reclassify Las Soleras Master Plan parcels from Transitional Mixed Use, Business Park, and Office to Community Commercial is summarized in Table I. by parcel.

Table I. ***Las Soleras Parcels 19-26 proposed General Plan Land Use Classification***

Parcel	Acres	Current Land Use Classification	Proposed Land Use Classification	Address Santa Fe, 87507	UPC Number
19	9.11	Transitional Mixed Use	Community Commercial	5021 Rail Runner Loop	1050094200323000000
20	10.70	Business Park	Community Commercial	5091 Rail Runner Loop	1050094093244000000

**No change in Land Use Classification requested*

SFCC 14-3.(E) GENERAL PLAN AMENDMENT APROVAL CRITERIA

(1) Criteria for All Amendments to the General Plan: The planning commission and the governing body shall review all general plan amendment proposals on the basis of the following criteria, and shall make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any amendment to the general plan:

(a) consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;

Response: The proposed General Plan Amendment for Las Soleras parcels 19-26 aligns with the growth projections for Santa Fe, fulfilling economic development goals as set forth in the comprehensive economic development plans detailed in both the Angelou Report and the 2008 Economic Development Strategy. This alignment ensures consistency with Santa Fe's economic development goals, specifically, the following goals are achieved:

Growth Projections, Economic Diversification, and Community Development: The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report further emphasizes the importance of diversifying Santa Fe's economic base to ensure sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment to enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being.

Infrastructure Utilization and Enhancement: The Angelou Report highlights the critical role of effectively utilizing existing infrastructure in fostering sustainable economic development (p. 33). Complementing this, the 2008 Economic Development Strategy details initiatives aimed at enhancing business infrastructure, which includes improving accessibility to essential services, utilities, and transportation systems. These improvements are vital for the success of business operations and the overall development of the community (Economic Development Division Strategy for Implementation pp. 4, 6). The proposed amendment specifically leverages this existing infrastructure to bolster economic growth and sustainability in the Las Soleras area, ensuring that the development aligns with Santa Fe's strategic goals for economic expansion and community enhancement.

Support for Entrepreneurial and Small Business Activities; Enhancement of Local Services and Job Opportunities: Both the Angelou Report and the Economic Development Division Strategy for Implementation emphasize the importance of bolstering Santa Fe's economic health by supporting small businesses and entrepreneurial ventures (Angelou Report p. 25; Economic Development Division Strategy for Implementation pp. 4, 6). The proposed amendment to transition land use to Community Commercial aligns with these objectives by enhancing spaces conducive to the growth of small businesses, thereby fostering job creation and economic resilience. This transformation into Community Commercial spaces is designed to bolster local services and generate employment opportunities, thereby advancing the economic goals of increasing job availability with better wages for Santa Fe residents, as outlined in the 2008 Economic Development Strategy (pp. 4, 6). This approach not only supports emerging business ventures but also contributes significantly to community development and economic diversification.

(b) consistency with other parts of the general plan;

Response: This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application). Specifically, the following policy goals are achieved:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*

Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*

Policy 4-4-G-4: *Promote a balance between residential development and new employment*

opportunities in detailed plans prepared for future growth areas; and

Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*

Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*

Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*

Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*

Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*

Policy 9-2-G-5: *Promote small business.*

The proposed amendment for reclassifying parcels 19-26 within the Las Soleras Master Planned community to Community Commercial aligns closely with the 1999 City of Santa Fe General Plan, ensuring the development is in harmony with broader city planning goals. The transition to Community Commercial addresses the need for a variety of housing types and mixed uses in the community, a principle supported by the plan's emphasis on creating diversified urban areas that balance residential and commercial growth. This change is designed to provide the necessary commercial services to a growing residential population, supporting the local community by offering neighborhood-focused retail, restaurants, and services that enhance the quality of life and economic viability of the area.

This amendment also supports strategic economic development by promoting higher-wage job opportunities, particularly in the healthcare sector, as evidenced by new facilities like the Nexus Health Medical Office and Cancer Center and the Presbyterian Hospital. These developments not only cater to the community's health needs but also contribute to the local economy by creating jobs that offer competitive wages. The emphasis on developing commercial areas that are accessible and encourage pedestrian activity aligns with city policies aiming to concentrate population densities in developing areas with central transit nodes, thereby reducing auto dependence and fostering a more sustainable urban environment.

The reclassification also facilitates a strong foundation for economic growth and community well-being by ensuring that new developments are integrated with the existing and planned infrastructure. This includes water and sewer systems and future improvements like the Las Soleras Bridge and expanded trails, enhancing connectivity and accessibility. By creating a cohesive community commercial hub that aligns with adjacent land uses and supports emerging business opportunities, the amendment reinforces the city's goals to develop an attractive climate for conducting business, promote small businesses, and ultimately achieve a community that balances residential and employment-based development.

(c) the amendment does not:

(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or

Response: With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or

Response: The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;

Response: As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

(d) an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification.

Response: The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos.

(e) compliance with extraterritorial zoning ordinances and extraterritorial plans;

Response: Since the adoption of the Subdivision Platting and Planning Zoning Ordinance (SPPaZO), the City has relinquished land use regulatory authority outside the city limits and the transfer of authority from extraterritorial jurisdiction to the City.

(f) contribution to a coordinated, adjusted, and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity, or the general welfare, as well as efficiency and economy in the process of development; and

Response: A consistent land use designation of Community Commercial for parcels 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.

In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan.

(g) consideration of conformity with other city policies, including land use policies, ordinances, regulations, and plans.

Response: Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed.

Rezoning Approval Criteria, Sections 14-3.5(C) and (D) SFCC 1987

(C) Approval Criteria

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) one or more of the following conditions exist:
  (i) there was a mistake in the original zoning;
  (ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or
  (iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;

(b) all the rezoning requirements of Chapter 14 have been met;

(c) the rezoning is consistent with the applicable policies of the general plan, including the future land use map;

(d) the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city; and

(e) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.

(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.

(D) Additional Applicant Requirements

(1) If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;

(2) If the proposed rezoning creates a need for additional streets, sidewalks or curbs necessitated by and attributable to the new development, the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning requirements.

Signature:  Date: **12 February 2024**

Santa Fe, NM 87501

RE: Las Soleras <u>Rezoning</u> Application – change Zoning Districts for Master Plan Parcels 19, 20, 21, 23, 24 and 26 to a uniform C-2 District.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of submitting a rezoning application per the SFCC 14-3.5 – REZONINGS. This application is a companion to both a General Plan Amendment and Master Plan Amendment application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

The current Master Plan zoning districts along with the zoning districts proposed with this application are found in the table below. The combined area of Parcels 19 – 26 is 57.63 acres.

Table I. ***Las Soleras Parcels 19-26 proposed Zoning***

**No change in Land Use Classification or Zoning requested*

The purpose of this application is to propose the rezoning of Las Soleras Master Plan Parcels 19, 20, 21, 23, 24, and 26 allowing for a uniform C-2, General Commercial Zoning District across parcels 19-26 collectively. The intent is to allow for the adjustment of existing lot lines needed to accommodate future development in a thoughtful and efficient manner. The consistent C-2 zoning can accommodate three story office along with retail services including full-service restaurants. This flexibility in use will provide an opportunity to pursue business and commercial uses that offer higher salaries and much needed services for the surrounding neighborhood.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses allowed in a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The rezoning of parcels to a C-2 District will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged within the site.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be zoned as C-2 General Commercial will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development. A uniform C-2 zoning across parcels 19-26 will make the relocation of lot lines an

administrative process enabling the site parcels to be easily configured to the needs and sizes of a variety of uses.

A future Rail Runner rail stop was originally envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. A uniform C-2 zoning district could accommodate uses that eventually establish this base level of ridership.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is zoned C-2 General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely and especially within C-2 Zoning districts.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as C-1. It is partially developed with the Presbyterian Medical Services Office Building recently opened in late 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire northern edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as C-1; R21; and R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site.
Thanks for your review and consideration of this application.

Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.
Orion West, LLC

Las Soleras Parcels 19-26 – Rezoning Application
Approval Criteria Responses
February 12, 2024

The proposed rezoning of Las Soleras Master Plan parcels 19, 20, 21, 23, 24, and 26 from MU, BIP, and C-1 to a uniform C-2 is summarized in Table I.

Table I. ***Las Soleras Parcels 19-26 proposed Zoning***

Parcel	Acres	Current Zoning District	Proposed Zoning District	Address Santa Fe, 87507	UPC Number
19	9.11	MU	C-2	5021 Rail Runner Loop	1050094200323000000
20	10.70	BIP	C-2	5091 Rail Runner Loop	1050094093244000000
21	4.70	C-1	C-2	5140 Rail Runner Loop	1049094529247000000
22*	9.12	C-2	C-2	5090 Rail Runner Loop	1050094065275000000
23	7.27	C-1	C-2	5040 Rail Runner Loop	1050094143308000000

26	3.48	C-1	C-2	5210 Rail Runner Loop	1049094503274000000

**No change in Land Use Classification or Zoning requested*

SFCC 14-3.5 (C) REZONING - APPROVAL CRITERIA

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) one or more of the following conditions exist:

(i) there was a mistake in the original zoning;

Response: Not applicable

(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or

Response: As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 - 26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development.

Las Soleras parcels 19-26 have been referenced collectively as triggers for various infrastructure development – most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for parcels 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative

impact on Master Plan parcels 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue.

(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;

Response: As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4: *Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*
Policy 9-2-G-5: *Promote small business.*

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The

intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

(b) all the rezoning requirements of Chapter 14 have been met;

Response: Yes, all zoning requirements of Chapter 14 have been met.

(c) the rezoning is consistent with the applicable policies of the general plan, including the future land use map;

Response: As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2:	*There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2:	*Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4:	*Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6:	*Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1:	*Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2:	*Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3:	*Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4:	*Develop and maintain an attractive climate for conducting business in Santa Fe; and*
Policy 9-2-G-5:	*Promote small business.*

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

(d) the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city; and

Response: The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management.

(e) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.

Response: The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request.

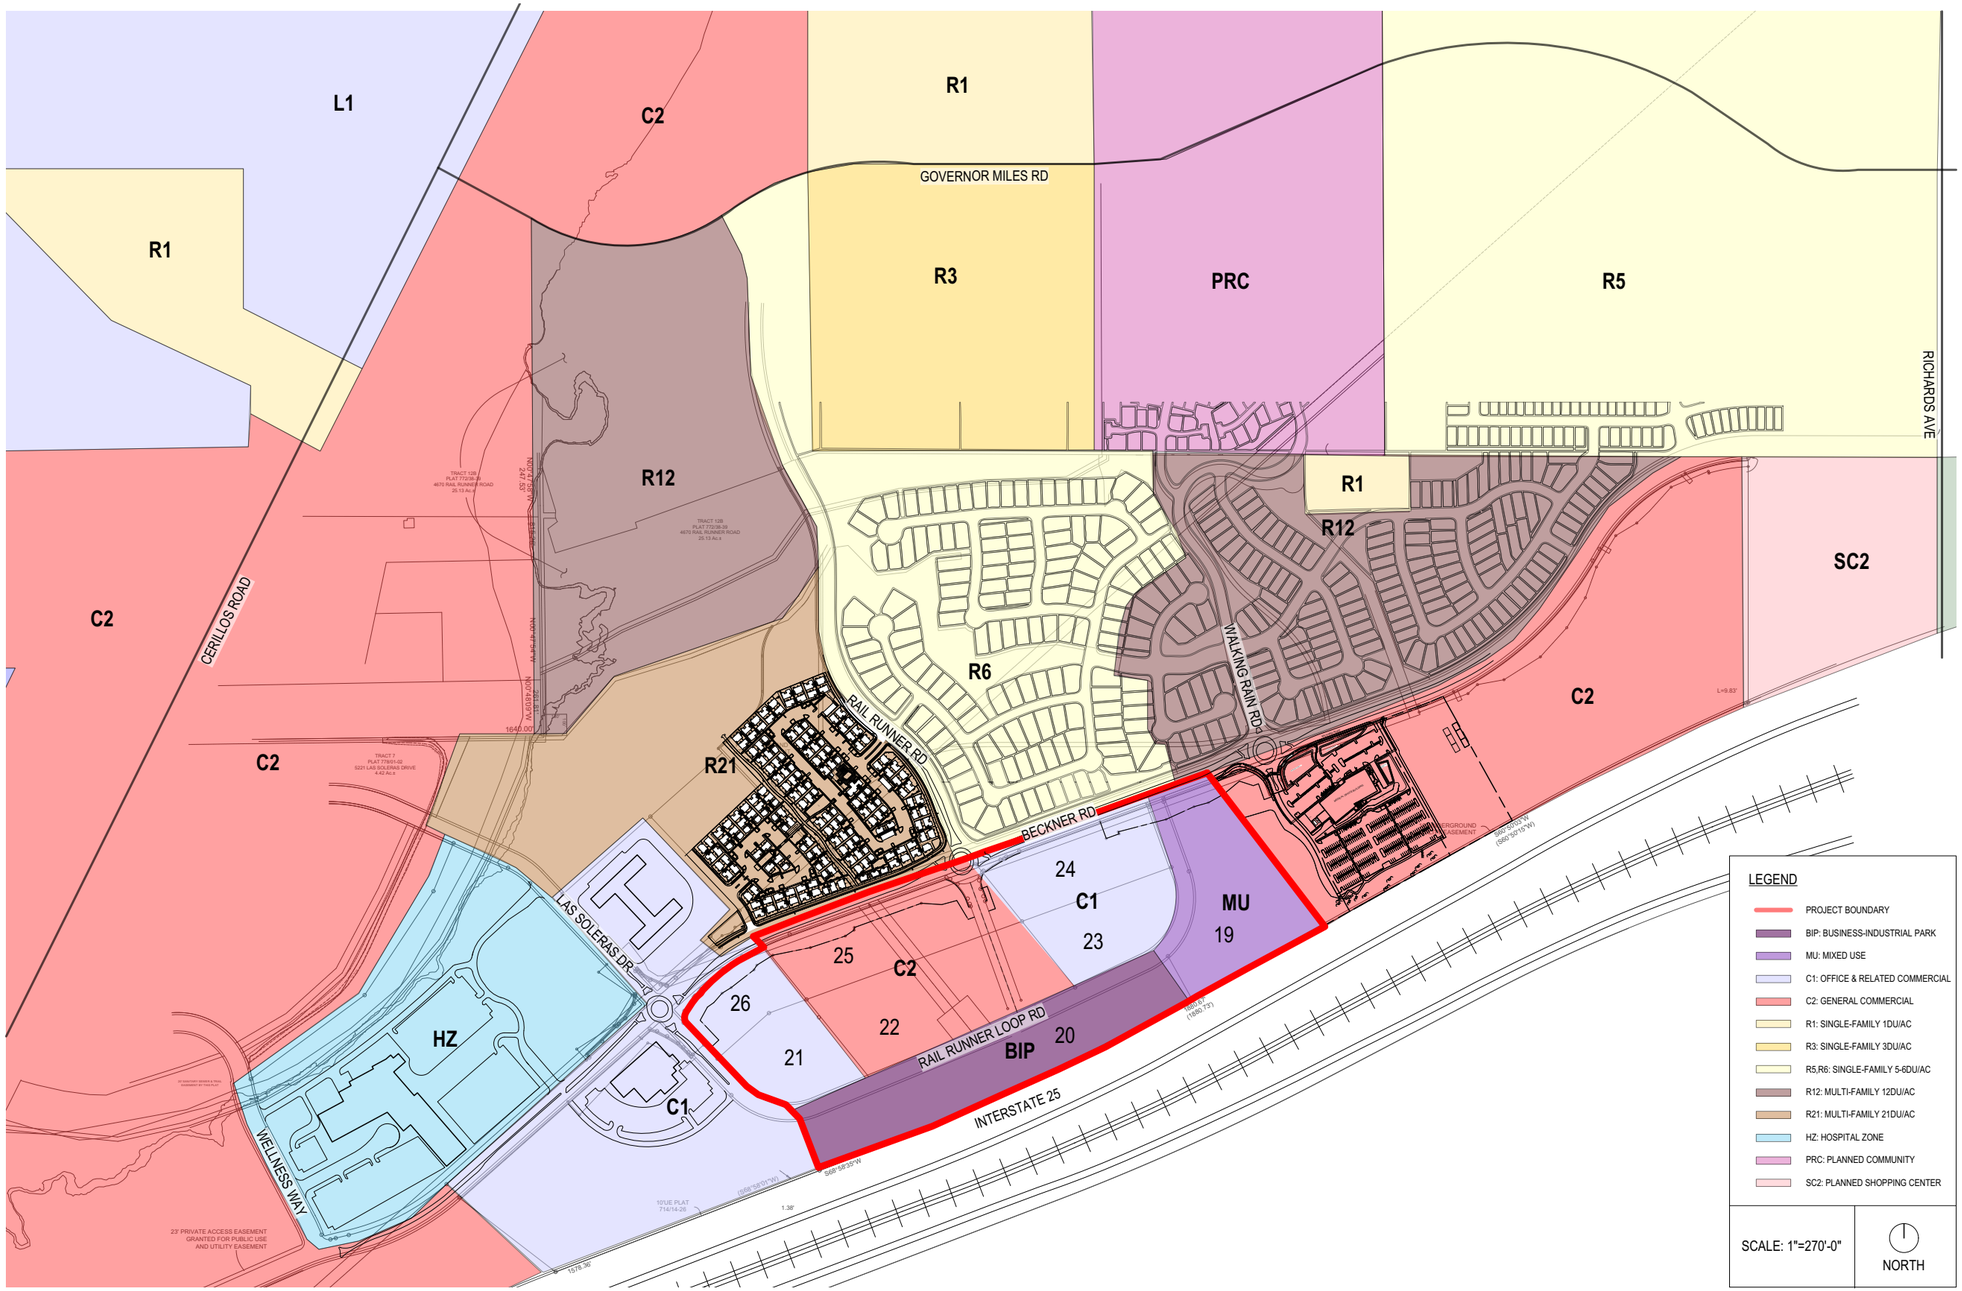
(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

Response: With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

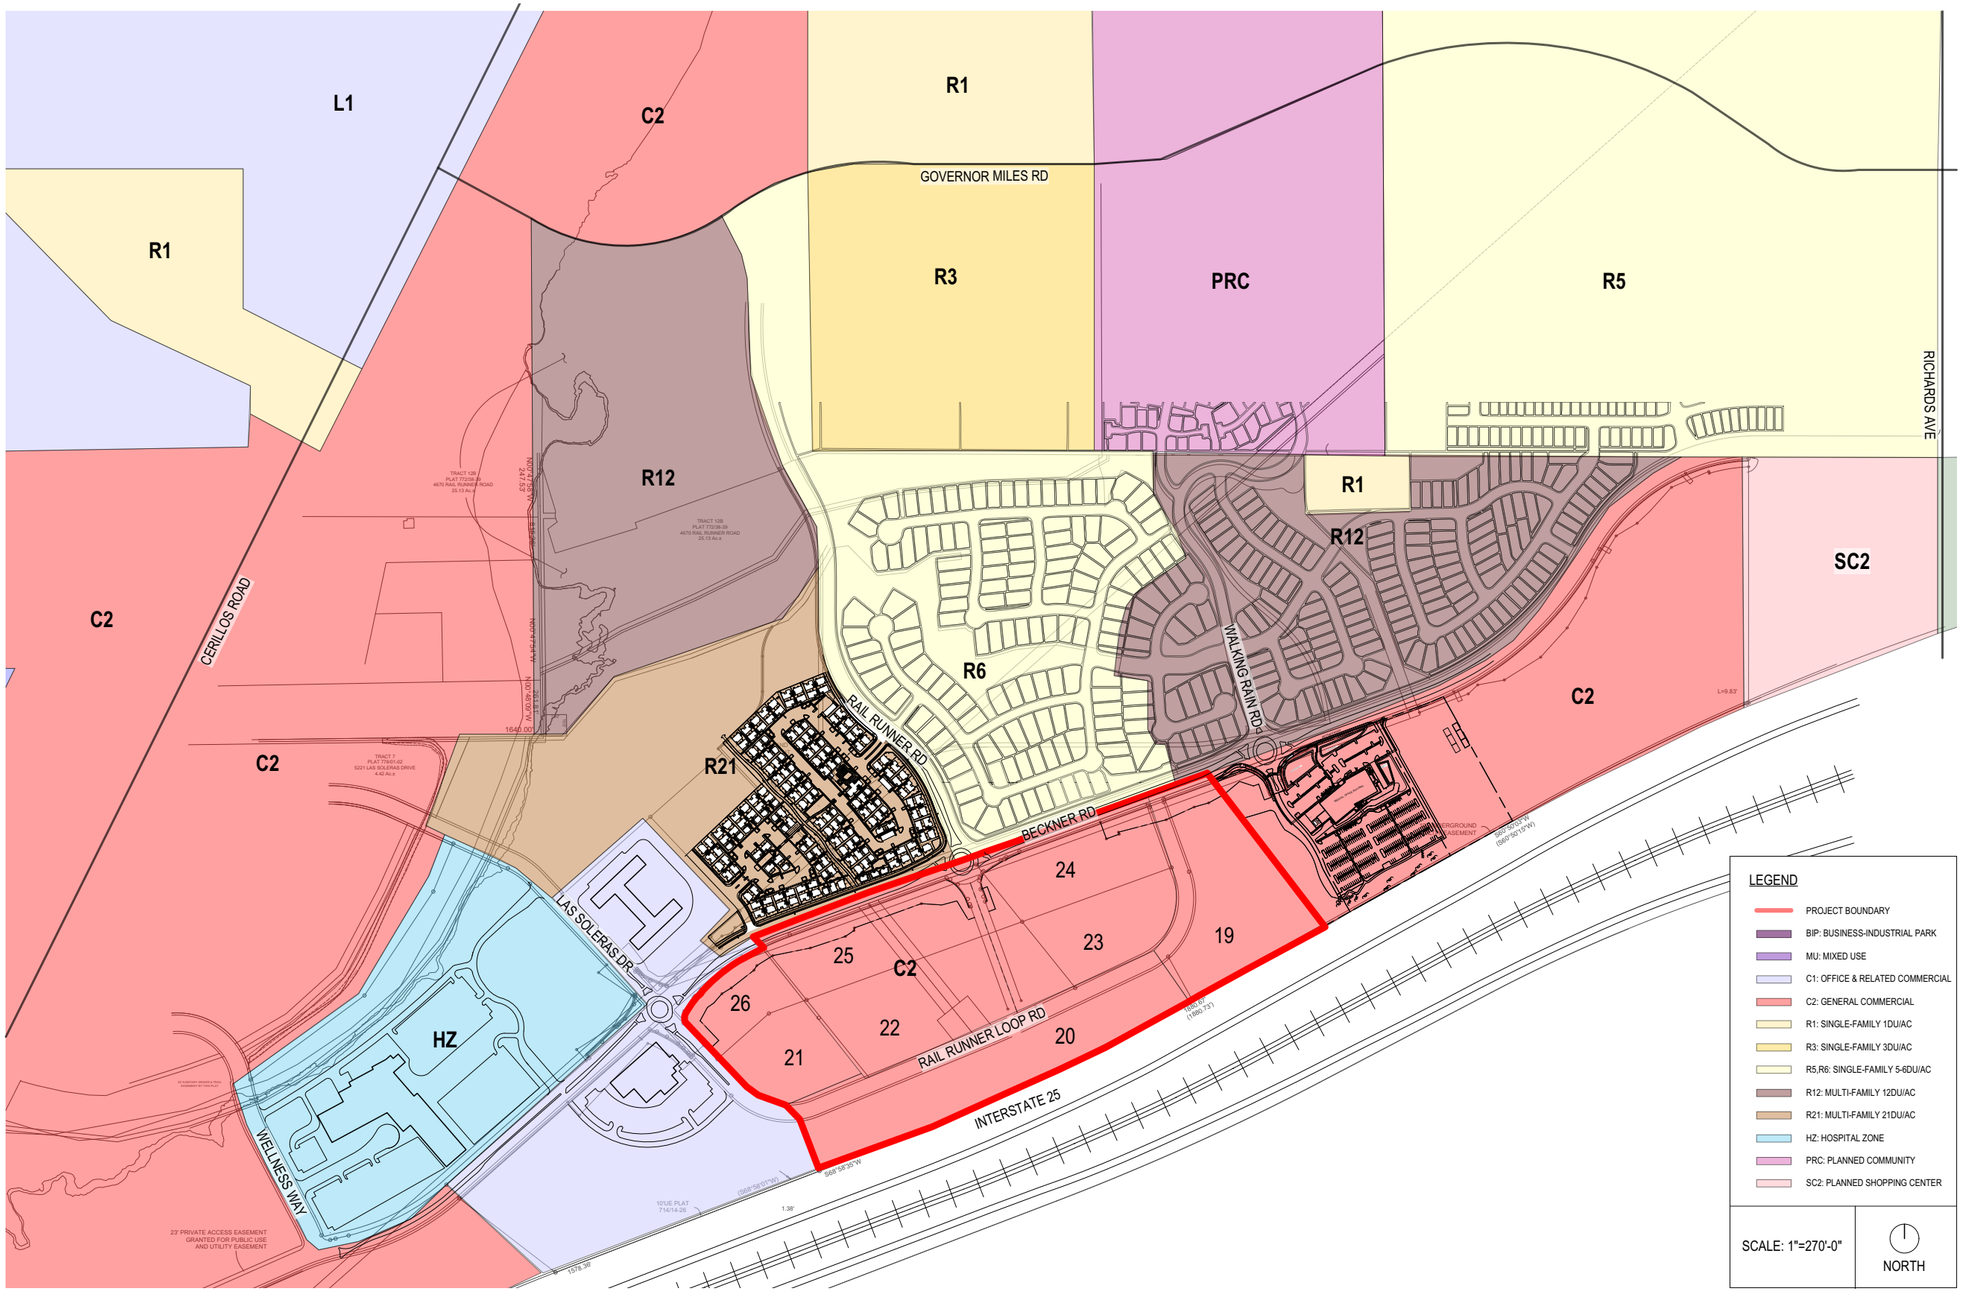
The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

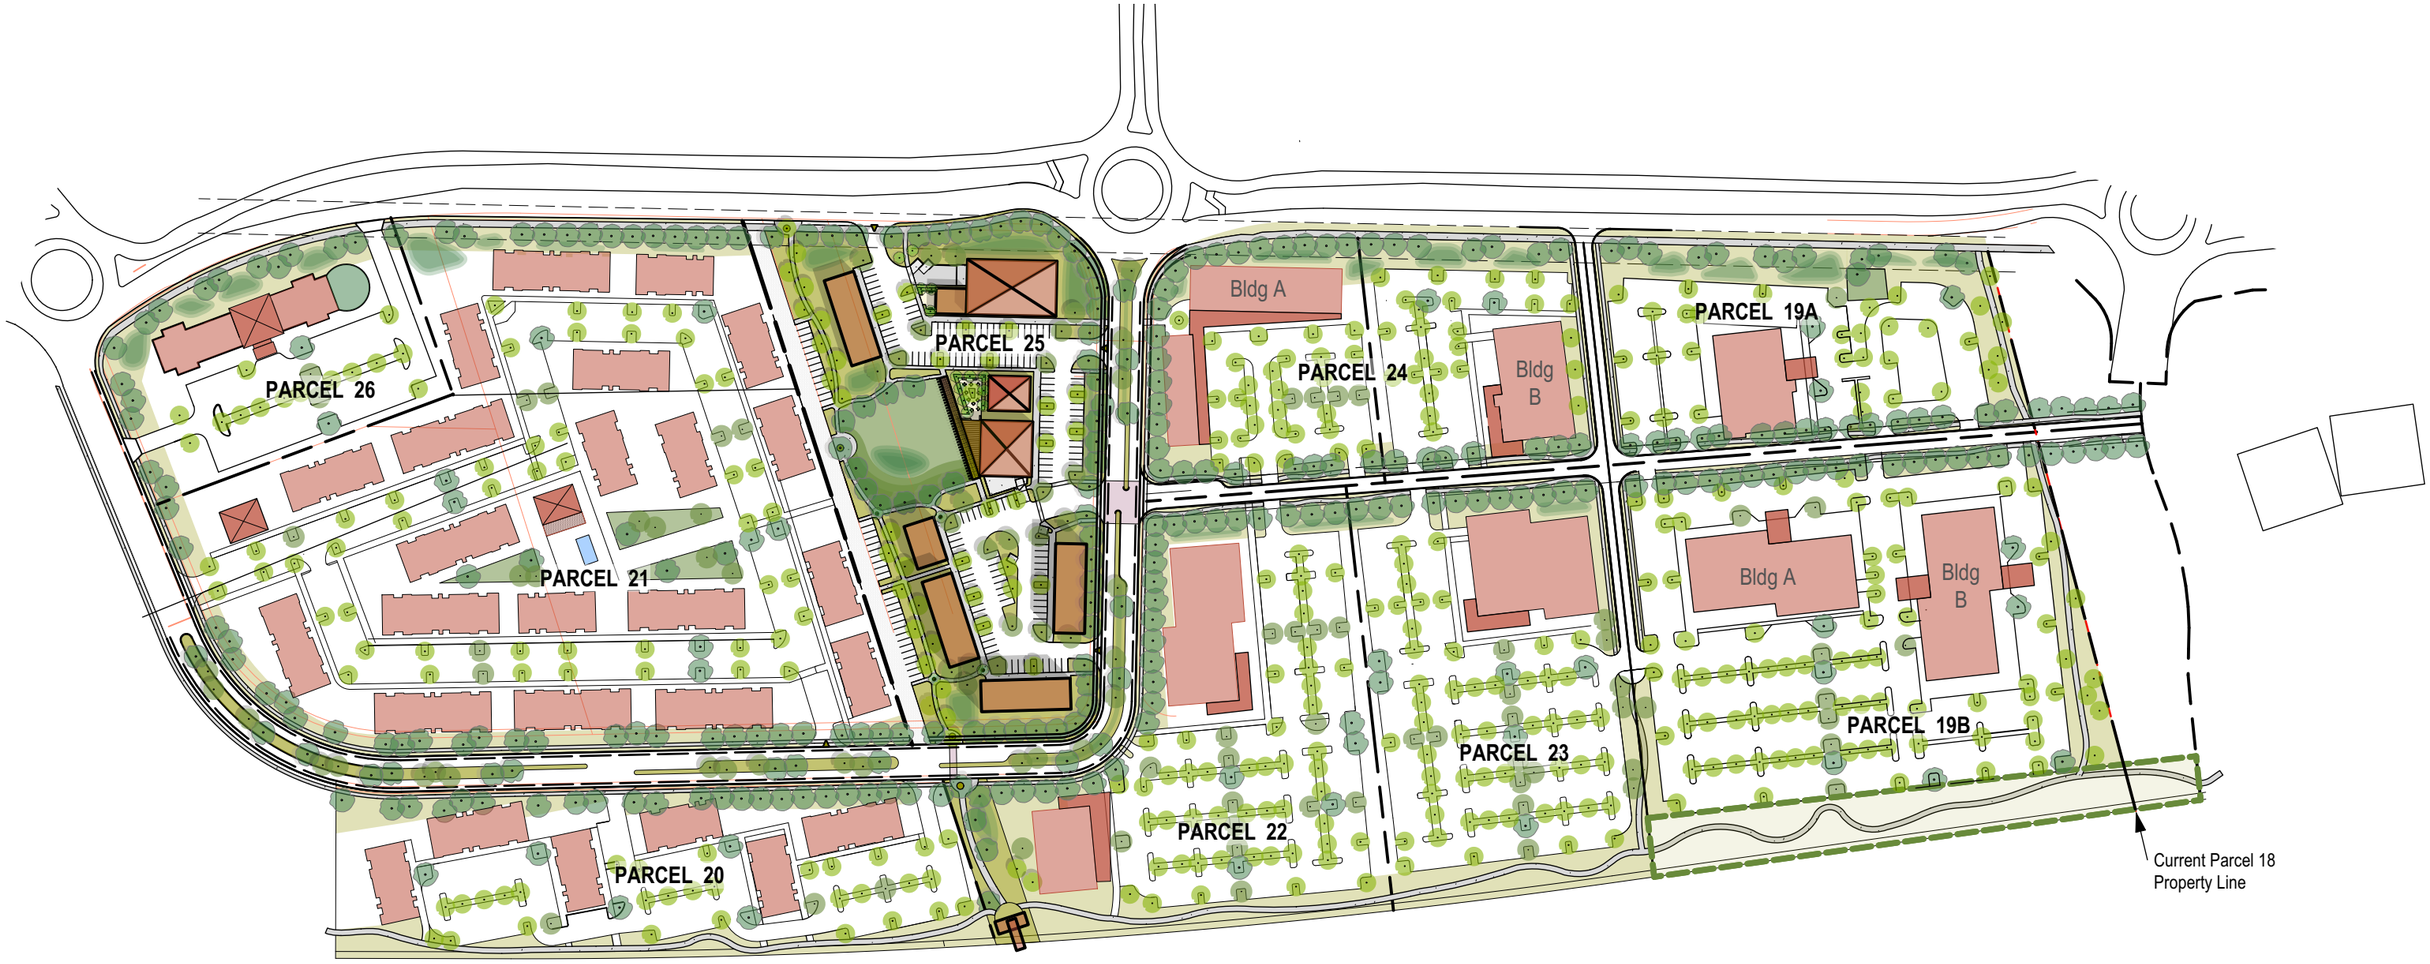


Response: The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.



Response: As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.



On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

Las Soleras Core

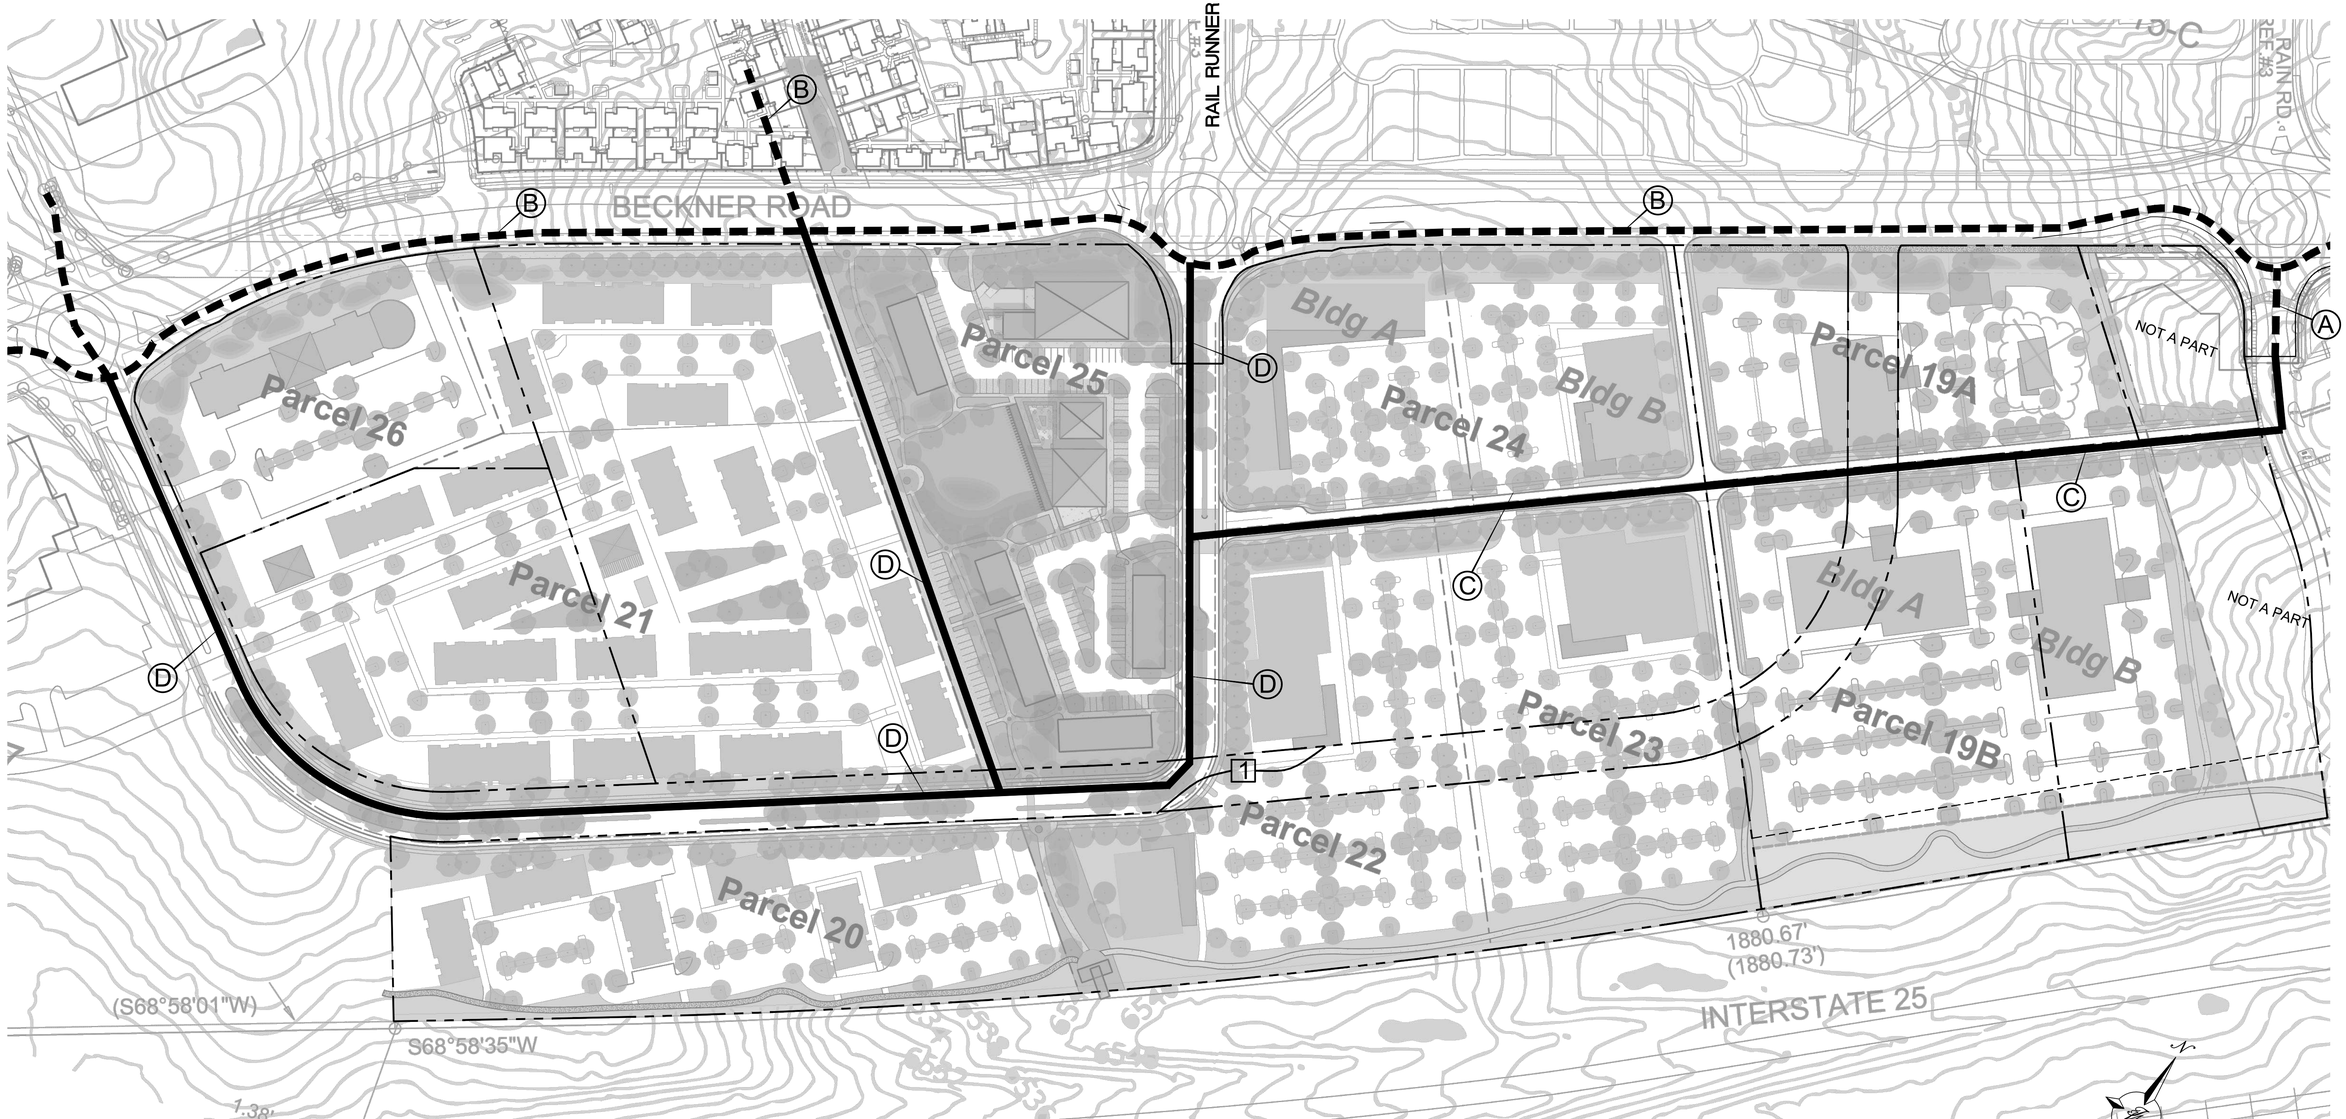
The Las Soleras Core is uniquely able to become the vibrant heart of southern Santa Fe. The Las Soleras Core is in an optimal location and size to host a variety of iconic neighborhood needs--a market, a restaurant, food-beverage outlets, neighborhood retail and commercial. Here is a conceptual look what the Core could be.

- Water harvesting along Becker and along Rail Runner Loop to capture stormwater to support a green edge of trees and native plants.
- Neighborhood Scale Market *(Size example: Kaune Market)*
- Food & Beverage *(Size example: Iconic Coffee)*
- Possible future road connection to east parcels would support an active engagement with lively Core
- Restaurant oriented toward "The Green" *(Size example: Rustica Resturant/SF Brewery)*
- The Long Zaguan would be a shady connector across the Green. An iconic feature with photovoltaic panels--conveying an embrace of art and environment.
- The Green repositions the required Master Plan parklet to be the heart of the Las Soleras Core. Where people can come to meet, eat, relax, and engage in small-scale community events such as music or recreation.
- Two-story buildings at the southern end of the Core would provide retail-commercial services spaces from which to serve the Las Soleras neighborhoods and south Santa Fe.
- The Rambla Trail system connects the Core with the surrounding residential neighborhoods, condominiums, senior living, apartments, office complexes, the regional hospital to the west. possible medical and education facilities, and a potential future rail raod station at I-25.

Las Solares Development Prototypes Data

Sept. 1, 2023

Notes: A. Test based on program and product prototypes



B. Applies CoSF development ordinance requirements

C. Test is for single story development.

D. Parking based on net lease (NL) of 10% reduction of gross square footage (GSF)

Opportunity: Consider asking CoSF to use a shared parking plan to increase density. Target would be for 10% shared of total provided.

Mr. Dan Esquibel
City of Santa Fe Water Division
200 Lincoln Avenue
Santa Fe, NM. 87501

RE: LAS SOLERAS 57 ACRE DEVELOPMENT
LAS SOLERAS PARCELS 19-26
WATER AND WASTEWATER LETTER

Dear Mr. Esquibel:

To ensure that the proposed General Plan land use classification of Community Commercial and associated proposed rezoning to a uniform C-2 district of the 57.63 acres of Las Soleras Master Plan parcels19-26 (located along the Southern edge of Beckner Rd between Las Soleras Dr and Walking Rain Rd) will not produce excessive demand on the existing water and sanitary sewer infrastructure in Beckner Rd, Tierra West LLC has prepared the following summary of existing water and sewer capacities and water and sewer flowrates for a conceptual design we are referencing as "Conceptual Test Fit A" for your review.

Sanitary sewer capacities were calculated assuming gravity flow along two of its segments – the segment from the roundabout at Las Soleras Dr to the roundabout at Rail Runner (along which the minimum slope is 0.73%), and another segment from Rail Runner to the roundabout at Walking Rain (along which the minimum slope is 1.05%). The capacity of the existing water main was calculated assuming an 11 ft/s flow velocity.

The capacity of both existing pipes was found to be sufficient to serve the property if developed per either the existing or proposed zoning, and the water and sewer flowrates for these conditions are summarized below.

For the first segment mentioned above (from Las Soleras Dr to Rail Runner), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 843 gpm with velocity 3.44 ft/s.

For the second segment mentioned above (from Rail Runner to Walking Rain), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 1,011 gpm with velocity 4.13 ft/s.

The peak sanitary sewer flowrate calculated for the development assuming development per the existing zoning was 150 gpm, For design Test Fit Concept "A" it is 191 gpm,

Water discharge was assessed for the existing 12" ductile iron main in Beckner using an assumed velocity of 11 ft/s and was calculated at 2,693 gpm.

The peak water flowrate calculated for the development assuming development per the existing zoning was 167 gpm with average irrigation flowrate 5.79 gpm, for design Test Fit Concept "A" it is 212 gpm with average irrigation flows at 5.52 gpm,

If you have any questions or need additional information regarding this matter, please do not hesitate to contact me.

Sincerely,

Ronald R. Bohannan, P.E

Project Management
PO Box 5744, Santa Fe, NM 87502-5744

EARLY NEIGHBORHOOD MEETING NOTES

Project Name:	Las Soleras
Project Location:	4200 Beckner Road
Project Description:	Development Plan Amendment for Development Plan with Summary Plat/Lot Split for proposed 141-unit Apartment Complex
Applicant:	
Agent:	Orion West LLC
ENN Meeting Date:	14 November 2023
ENN Location:	Via Zoom
Application Type:	General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.
Land Use Planner:	Dan Esquibel
Attendance:	**City of Santa Fe:** Dan Esquibel **Developer Team:** Brian Nenninger (Agent), Maureen Mestas (Agent), Scott Herbert, Dave Delgado, Karl Sommer, Esq. **Neighborhood/Public:** 1 attendee. An unidentified neighbor who was on a non-video tile but did not identify him/herself or speak.

Notes/Comments:

14 November 2023/ 5:30 – 6:12pm Meeting

The meeting started at approximately 5:39pm. Roll call and introduction of those attending was held. Dan Esquivel indicated that he would like to wait an additional few minutes to allow others to log in. After a brief wait, the meeting continued without any additional attendees.

Brian Nenninger then introduced the Developer Team.

Brian Nenninger informed the group that this ENN is for the purposes of noticing a General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5 of all parcels in the Las Soleras Master Plan; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.

Highlights Brian shared during the presentation included:

The property is located within the 545 acre Las Soleras Master Plan Subdivision that was first created via an annexation ordinance in 2009. Since 2009 the Master Plan has been amended multiple times – the most recent being October 2019.

- Eight (8) existing legal parcels that together comprise 57.63-acres.
- Existing Zoning:

C-2: Two parcels
C-1: Four parcels
MU: One parcel
BIP: One parcel

- Master Plan Items that need to be "Cleaned Up."

Rail Runner Loop Road realignment to meet Rail Runner Road
Lot Line adjustments and resizing of parcels to better accommodate Commercial Users
Rambla open space design including location of "parklet."

The Applications that are being shared in the ENN are:

- General Plan Amendment Application
- Master Plan Amendment Application

Address Realignment of Rail Runner Loop Road
Propose modification to Rambla width.
Propose flexibility of "parklet" location along the Rambla
Discussion of Master Plat/Parcel Realignment

- Rezoning Application

Propose C-2 Zoning for eight parcels.

- Planned Unit Development (PUD) Application under consideration/discussion.

with City of Santa Fe

Brian wanted to take particular note that this is not an application for Development Plan Per the Santa Fe City Code. Qualified development/building construction will require separate Development Plan Applications, ENNs and Planning Commission Hearings.

He further stated that the proposed rezoning, along with the General Plan and Master Plan amendments lay the groundwork for better development needed to meet local market demands.

Those possible mix of uses for local market demand are:

- Neighborhood Commercial Retail, such as, Restaurants, Bakeries, Pubs, Coffee Shops, Marketplace/Grocery Coop, Copy/Printing, Dry Cleaning, Pharmacy
- Office (including Medical Office)
- Medical Education
- Multifamily Residential
- Hotel

Las Soleras Junction has transit-oriented improvements, specifically:

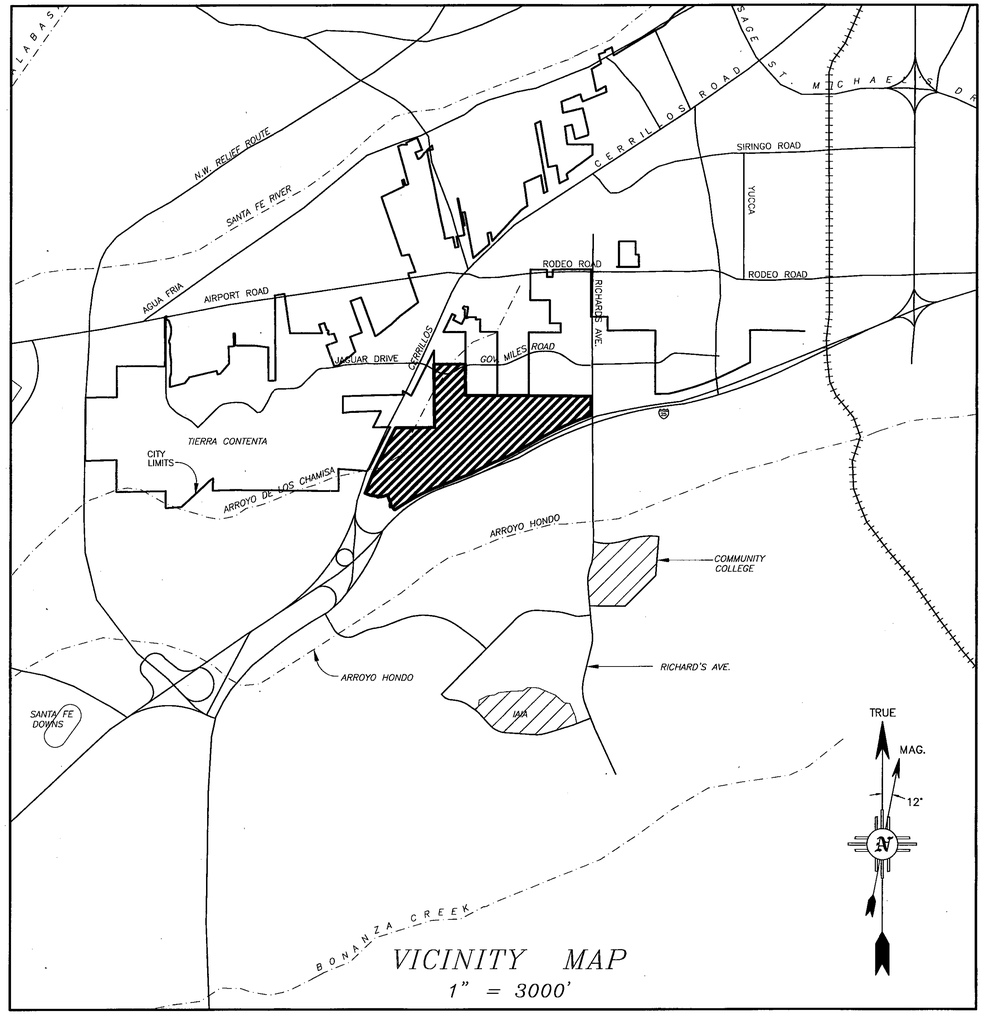
- Completion of Las Soleras bridge (triggered by 20 acres and 300,000 sf of development of parcels 19-26.)
- Further build out of Las Soleras trails system including the Rambla and "Parklet"
- Additional Bus stop/access on Rail Runner Loop Road
- Place holder for future Rail Runner Stop

Las Soleras Junction is a work in progress. Conceptual test fits to understand options for flow of pedestrians and vehicles within the site. Engineering and Design of Las Soleras Bridge to complete Las Soleras Drive from Cerrillos to Beckner. Utility and Traffic Study activity will be required. Design Guidelines are being developed to provide a cohesive, responsible, and pleasing experience for those who use and access the site. Guidelines will stay within the Santa Fe City Code and address, Architecture Concepts, Landscape Design, Lighting, Trails, Sidewalk and Roadway Connectivity to and within the site.

Brian then summarized the intention of the applications for this ENN, those key points being:

- Clean up issues in the Master Plan created from past developments/amendments. including the realignment of Rail Runner Loop Road with the relocated Rail Runner Road.
- Lay the groundwork for more effective use of parcels 19-26 through consistent zoning to allow for administrative lot line adjustments.
- Provide greater flexibility in providing neighborhood retail services including Food and Beverage. Uses brought to the site will be driven by the local and area market.
- Facilitate the completion of Las Soleras Drive and Bridge connecting Cerrillos to Beckner.

Brian opened the ENN for questions from the City Staff and neighbors. No one in attendance who was believed to be a neighbor asked to speak. No neighbor or other interested party was on the CHAT feature to ask questions.



There was a brief discussion between Dan Esquivel and Brian Nenninger about the status of the applications after the meeting. The meeting was then adjourned by Dan Esquivel.

"TITLE AND INDEXING INFORMATION FOR COUNTY CLERK"

ANNEXATION, ROAD DEDICATION AND VACATION PLAT

PREPARED FOR

LAS SOLERAS

WITHIN SECTIONS 7, 17, AND 18, T.16N., R.9E., N.M.P.M.
SANTA FE COUNTY, NEW MEXICO.

NOTE:
ROAD DEDICATION MAY INCLUDE TEMPORARY OR PERMANENT CONSTRUCTION MAINTENANCE EASEMENTS FOR SLOPES, DRAINAGE STRUCTURES AND ANCILLARY IMPROVEMENTS AS DETERMINED BY FINAL ENGINEERING PLANS. OWNERS ACKNOWLEDGE THAT REASONABLE ADJUSTMENTS TO THE PRECISE LIMITS OF RIGHT–OF–WAY MAY BE REQUIRED BY THE PLANNING COMMISSION AT THE TIME OF SUBDIVISION PLAT APPROVAL.

ROADWAYS DEDICATED BY THIS PLAT MAY BE ADJUSTED TO ALIGN WITH CROSS STREET INTERSECTIONS AND TO SATISFY ENGINEERING STANDARDS PROVIDED THAT SUCH RE–ALIGNMENT DOES NOT DECREASE THE AREA OF DEDICATION AND IS ACCEPTED BY THE CITY AS EVIDENCED BY THE APPROVAL OF THE PUBLIC WORKS AND LAND USE DEPARTMENTS AND RECORDED AS A PLAT AMENDMENT.

Title of Office: ~~NOTARY~~ Public

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2024-7898
Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment ("General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tracts 21 and 26, comprising approximately 8.18 acres and Tracts 23 and 24, comprising 13.45 acres from Commercial Office to Community Commercial ("Project"). The property is located at the southeast quadrant of the Las Soleras / Beckner Road roundabout ("Property") and is zoned C-1 (General Office).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7898.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. The Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan Amendment.
10. The Planning Commission heard Case #2024-7898 concurrently with Cases #2024-7899, 2024-7900, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tracts 21, 23, 24 and 26.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for General Plan amendments, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing.
16. The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment the proposal is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
18. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    The General Plan Amendment affects an area greater than two acres. Tracts 21 and 26 encompass 8.18 acres, and Tracts 23 and 24 encompass 13.45 acres (+/-21.63 total acres), both of which exceed the minimum size requirement for land use amendments.
19. General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
20. With the necessary infrastructure improvements as required by the conditions of approval, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
21. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
22. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
23. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the

Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing. All applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the General Plan Amendment is consistent with growth projections for Santa Fe, and that the project The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
7. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
8. The General Plan Amendment complies with SFCC 1987 Section 14-3.2(E)(1)(c), because it:
    a. does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby;
    b. affects an area greater than two acres. Tracts 21 and 26 encompass 8.18 acres, and Tracts 23 and 24 encompass 13.45 acres (+/-21.63 total acres), both of which exceed the minimum size requirement for land use amendments; and
    c. does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
9. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
13. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.
14. The Commission recommends approval of the requested General Plan amendment because the

applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-7898 to the Governing Body, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report.

Case #2024-8852
Las Soleras Master Plan Tract 19 General Plan Amendment
Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment (the "General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tract 19, comprising approximately 9.11 acres from Transitional Mixed Use to Community Commercial ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned MU (Mixed Use).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8852.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023,virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan Amendment.
10. The Planning Commission heard Case #2024-8852 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8853, 2024-8854 and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tract 19.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for general plan approval, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. Based on the Staff Report and exhibits and the testimony and evidence presented at the hearing, the Planning Commission finds that all applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
16. The General Plan Amendment is consistent with growth projections for Santa Fe, and the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.).
    i. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    ii. The General Plan Amendment affects an area greater than two acres. Tract 19 encompass 9.11 acres, and which exceeds the minimum size requirement for land use amendments.
    iii. The General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
18. With the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
19. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
20. The General Plan Amendment does not conflict with any existing City policies, or ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
21. The additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
5. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(c), the Commission finds that:
   iv. The amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
   v. The amendment affects an area greater than two acres. Tract 19 encompass 9.11 acres, and which exceeds the minimum size requirement for land use amendments.
   vi. The amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
7. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the Commission finds that with the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
8. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
9. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the Commission finds that the proposed amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(g), the Commission finds that the proposed amendment does not conflict with any existing City policies, or ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan
12. The Applicant met the applicable Submittal Requirements.
13. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING

COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-8852 to the Governing Body, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report.

Findings of Fact and Conclusions of Law

Case #2024-8854
Las Soleras Master Plan Tract 20 General Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment ("General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tract 20, comprising approximately 10.7 acres from Commercial Business Use to Community Commercial ("Project"). The property is located south of the Rail Runner Loop ("Property") and is zoned BIP (Business Industrial Park).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8854.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. The Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.
9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan

Amendment.

10. The Planning Commission heard Case #2024-8854 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8852, 2024-8853, and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tract 20.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for General Plan amendments, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing.
16. The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
18. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
19. The General Plan Amendment affects an area greater than two acres. Tract 20 (+/-10.70 acres), exceeds the minimum size requirement for land use amendments.
20. General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
21. With the necessary infrastructure improvements as required by the conditions of approval, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
22. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
23. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
24. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing. All applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the General Plan Amendment is consistent with growth projections for Santa Fe, and that the project The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
7. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
8. The General Plan Amendment complies with SFCC 1987 Section 14-3.2(E)(1)(c), because it:
    a. does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby;
    b. affects an area greater than two acres. Tract 20 encompass 10.70 which exceed the minimum size requirement for land use amendments; and
    c. does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
9. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
13. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.
14. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-8854 to the Governing Body.

Findings of Fact and Conclusions of Law

Case #2024-7899
Las Soleras Master Plan Amendment Master Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a master plan amendment ("Master Plan Amendment") to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Project).

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission hereby FINDS and CONCLUDES as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987, Section 14-3.9(C) sets out procedures for the creation of a Master Plan and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7899.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. "SFCC") 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.9(C) sets out procedures for master plan approval and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body,

together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.

8. Staff recommended that the Commission recommend approval of the Las Soleras Master Plan Amendment, subject to conditions and technical corrections identified in the Staff Report.
9. The Planning Commission heard Case #2024-7899 concurrently with Cases #2024-7898, 2024-7900, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
10. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Master Plan Amendment.
11. Pursuant to SFCC 1987 Sections 14-3.9(C)(4), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
12. SFCC 1987 Section 14-3.9(D)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
13. The Master Plan Amendment consistent with the City of Santa Fe growth projections and economic development goals.
14. . The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
15. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.), maintaining a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan. The amendment to C-2 zoning provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining and more. The Master Plan amendment will facilitate future development that is expected to trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System, further enhancing the area's coordinated development.
16. The amendment aligns with the predominant zoning patterns in the area, which primarily are uses (multifamily and nonresidential) allowed within a C-2 District. The variety of C-2 uses, ranging from residential to light industrial, adheres to the Las Soleras Master Plan's original intent to foster a mix of uses, despite the proposed elimination of both Mixed Use and Business Industrial Park Districts, while also responding to current market demands. The master plan continues to maintain a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan.
17. This Master Plan amendment will significantly enhance the site’s ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System.
18. The net impact of the Master Plan Amendment on the utility system infrastructure is minimal and the existing infrastructure, water, wastewater, and parks are adequate to accommodate the Master Plan Amendment. Inadequacies in roads and fire service capacity can be adequately addressed as conditions of approval during the development of this project such that health and safety goals are met.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the Master plan Amendment.
3. Pursuant to SFCC 1987, 14-3.9(C)(4) the Planning Commission has the authority to review and recommend approve of a Master Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community.
6. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.).
7. Pursuant to 14-3.9(D)(1)(b), the Master Plan Amendment is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts.
8. Pursuant to 14-3.9(D)(1)(c)), the Master Plan Amendment will contribute to the coordinated and efficient development of the community.
9. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(d), the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:
Considering the foregoing findings and conclusions, the Planning Commission approves the Master Plan, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report for Case #2024-7899.

Findings of Fact and Conclusions of Law

Case #2024-7900
Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tracts 21 and 26, comprising approximately 8.18 acres and Tracts 23 and 24, comprising 13.45 acres from General Office (C-1) to General Commercial (C-2) ("Project"). The property is located at the southeast quadrant of the Las Soleras / Beckner Road roundabout ("Property") and is zoned C-1.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7900.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).

9. Staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.
10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from C-1 to C-2.
11. The Planning Commission heard Case #2024-7900 concurrently with Cases #2024-7899, 2024-7898, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tracts 21, 23, 24, and 26 Rezoning from C-1 to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from C-1 (General Office Use) to C-2 (General Commercial) for Tracts 21, 23, 24, and 26.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe;

and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tracts 21 and 26 (8.18 acres) and Tracts 23 and 24 (13.45 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 21.63 acres across Tracts 21, 23, 24, and 26.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tracts 21, 23, 24, and 26. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from C-1 (General Office Use) to C-2 (General Commercial) for Tracts 21, 23, 24, and 26.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tracts 21 and 26 (8.18 acres) and Tracts 23 and 24 (13.45 acres), which meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or

general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from C-1 to C-2, as requested in the Application for Case #2024-7900.

Findings of Fact and Conclusions of Law

Case #2024-8853
Las Soleras Master Plan Tract 19 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024, (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tract 19, comprising approximately 9.11 acres from Mixed Use (MU) to General Commercial (C-2) ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned MU.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8853.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).
9. Staff reviewed the Application and related materials submitted by the Applicant for conformity

with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from MU to C-2.
11. The Planning Commission heard Case #2024-8853 concurrently with Cases #2024-7900, 2024-7898 2024-7899, 2024-7900, 2024-8852, 2024-8855, 2024-8854, and 2024-8855.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tract 19 Rezoning from MU to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from MU (Mixed Use) to C-2 (General Commercial) for Tract 19.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tract19 (9.11 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 9.11 acres for Tract 19.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tract 19. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from MU (Mixed Use) to C-2 (General Commercial) for Tract 19.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tract 19 (9.11 acres) meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from MU to C-2, as requested in the Application for Case #2024-8853.

Case #2024-8855
Las Soleras Master Plan Tract 20 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024, (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tract 20, comprising approximately 10.70 acres from Business Industrial Park (BIP) to General Commercial (C-2) ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned BIP.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8855.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).
9. Staff reviewed the Application and related materials submitted by the Applicant for conformity

with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from BIP to C-2.
11. The Planning Commission heard Case #2024-8855 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8852, 2024-8853, and 2024-8854.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tract 20 Rezoning from BIP to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from BIP (Business Industrial Park) to C-2 (General Commercial) for Tract 20.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tract 20 (10.70 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 10.70 acres for Tract 20.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tract 20. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from BIP (Business Industrial Park) to C-2 (General Commercial) for Tract 20.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tract 19 (9.11 acres) meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from BIP to C-2, as requested in the Application for Case #2024-8855.

MINUTES

**REGULAR MEETING OF
THE PLANNING COMMISSION
SEPTEMBER 05, 2024 AT
6:00 PM**

A. ROLL CALL

Members Present:
Chair Janet Clow
Vice Chair Jessica Eaton Lawrence
Member Gurushabad Mirando
Member Peter Smith
Member Thomas (TJ) Reiland

Members Excused:
Member Phil Lucero
Member Sasha McGhee

B. PLEDGE OF ALLEGIANCE

C. APPROVAL OF AGENDA

MOTION: Vice Chair Eaton Lawrence moved, seconded by Commissioner Reiland, to approved the agenda as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Smith, Member Reiland

Against: None

Abstain: Member Mirando

D. APPROVAL OF MINUTES:

1. August 1, 2024

MOTION: Vice Chair Eaton Lawrence moved, seconded by Commissioner Reiland, to approve as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Smith, Member Reiland

Against: None

Abstain: Member Mirando

E. APPROVAL OF FINDINGS/CONCLUSIONS

1. Case #2023-7079. Bungalows on Cerrillos Development Plan. AMENDED

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

2. Case #2023-7662. Bungalows on Cerrillos variance (Setback). AMENDED

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

3. **Case #2023-7663. Bungalows on Cerrillos variance (Slopes). AMENDED**

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

6. OLD BUSINESS

G. NEW BUSINESS

1. **Case #2024-7899. Las Soleras Master Plan Amendment.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Owner, requests a Master Plan Amendment to the Las Soleras Master Plan to change the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial). Additionally, they seek to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet. The property is located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout, and on the south side of Beckner Rd, encompassing

Parcels 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

2. **Case # 2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a General Plan Amendment is requested to change the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

3. **Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a rezoning to change the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a rezoning is requested to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

4. **Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial. The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the informational as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

5. **Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

   MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

   VOTE: The motion was approved on the following Roll Call vote:

   For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

   Against: Member Reiland

   Abstain: None

6. **Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial. The property, known as Tract 20 of the Las Soleras Master Plan, and is located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

7. **Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) Use to C-2 (General Commercial). The property, known as Tract 20 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

8. **Case #2024-8523. 235 West San Francisco Street, Variance.** Sommer Karnes & Associates LLP, Agent for G.E. Senlic, LLC., owners and applicant requests a variance to SFCC 1987, Section 14.8-6(C)(2)b to allow off-site parking more than 600 feet from the property within the Business Commercial District. The property

is zoned Business Commercial District, within the Lensic Subdistrict, with an approved 70 room hotel (Case #2019-1535) on .99-acre property. (Carly Venditti, Case Manager, cavenditti@santafenm.gov)

Postponed to October 3, 2024

9. **Case #2024-8342. 4851 Hart Road Development Plan.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a development plan to establish development standards for 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

10. **Case #2024-8343. 4851 Hart Road Terrain Management Variance.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a variance to the Terrain Management standards located in SFCC Ch. 14-8.2(D)(2)(b) to disturb natural slopes of thirty-percent or greater to develop 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to deny the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

CITY OF SANTA FE, NEW MEXICO

RESOLUTION NO. 2025-

A RESOLUTION

AMENDING THE LAS SOLERAS MASTER PLAN FOR TRACTS 19, 20, 21, 23, 24 AND 26, COMPRISED OF APPROXIMATELY 41.44 ACRES; CHANGING THE LAND USE DESIGATIONS FROM MIXED USE, BIP (BUSINESS INDUSTRIAL PARK), AND C-1 (GENERAL OFFICE) TO C-2 (GENERAL COMMERCIAL) AND TO REDUCE THE WIDTH OF THE UTILITY AND TRAIL CORRIDOR (LA RAMBLA TRAIL) FROM 90 TO 45 FEET ON THE SOUTH SIDE OF BECKNER ROAD (CASE NO. 2024-7899).

WHEREAS, on February 11, 2009, the Governing Body of the City of Santa Fe ("City") annexed property known as Las Soleras Subdivision, into the city of Santa Fe; and

WHEREAS, on the same day, the Governing Body approved General Plan amendments, rezonings, a lot line adjustment, and a road dedication plat, subject to fifty (50) conditions of approval, known as the Las Soleras Master Plan ("Master Plan"); and

WHEREAS, on September 9, 2015, the Governing Body approved amended the Master Plan, to realign roads, reconfigure open and space trails, reduce park land, and reconfigure certain tracts of land; and

WHEREAS, on September 24, 2016, the Governing Body approved Case No. 2016-64 and

adopted Resolution No. 2016-78, which amended the Master Plan, to establish alternative height and setback standards for the residential six dwelling units per acre and residential twelve dwelling units per acre residentially zoned districts for Estancias de Las Soleras and Ross's Peak developments; and

WHEREAS, on September 12, 2018, the Governing Body approved Case No. 2018-50 and adopted Resolution No. 2018-59, which approved Amendment No. 3 to the Master Plan, which changed the zoning from mixed use to residential, twenty-one dwelling units per acre, for property located between Governor Miles, Interstate 25 and Cerrillos Road and Richards Avenue, reduced the 90-foot utility and trail corridor to 45 feet on the North Side of Beckner Road; and

WHEREAS, on May 31, 2023, the Governing Body approved Case No. 2021-3811 and adopted Resolution No. 2023-27, which approved Amendment No. 4 to the Las Soleras Master Plan, which increased the density from six units per acre to ten units per acre for land located at 4601 Rail Runner Road; and

WHEREAS, Orion-West, agent for Beckner Road Partnership, LLC ("Applicant"), applied to amend the Las Soleras Master Plan for approximately 41.44 acres of land, known as Tracts 19, 20, 23, 24 and 26, and identified in Attachment A (the "Property"), from Mixed Use (MU), Business Industrial Park (BIP), and General Office (C-1) to General Commercial (C-2) and to reduce the width of the Utility and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet south of Beckner Road ("Proposed Amendment"); and

WHEREAS, amending the Master Plan requires an early neighborhood notification ("ENN") meeting and Applicant held an ENN on November 14, 2023; and

WHEREAS, SFCC 1987, Section 14-3.9(D)(1) requires the following findings for an amendment of a master plan:

(a) The master plan is consistent with the general plan;

(b) The master plan is consistent with the purpose and intent of the zoning districts that apply to or will apply to the master plan area and with the applicable use regulations and

development standards of those districts;

(c) Development of the master plan area will contribute to the coordinated and efficient development of the community; and

(d) The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development; and

WHEREAS, the Planning Commission reviewed evidence related to the Proposed Amendment, held a public hearing on the Proposed Amendment on September 5, 2024, and recommended the Governing Body approve the Proposed Amendment; and

WHEREAS, on January 9, 2025, the Governing Body held a public hearing on the Proposed Amendment; having reviewed the staff report, the recommendation of the Planning Commission, and the evidence obtained at the public hearing; and determined that the proposed amendment to the Master Plan, as recommended by the Planning Commission, meets the approval criteria set forth in Section 14-3.9(D)(1) of SFCC 1987 as follows:

- the Proposed Amendment is consistent with the general plan;
- the Proposed Amendment is consistent with the purpose and intentof the applicable zoning districts and the applicable use regulations and development standards for those districts;
- the development with the Proposed Amendment will contribute to the coordinated and efficient development of the community; and
- the existing and proposed infrastructure will be able to accommodate the impacts of the Proposed Amendment.

NOW, THEREFORE, BE IT RESOLVED THAT the Master Plan for Tracts of land more particularly described in Attachment A, known as Tracts 19, 20, 21, 23, 24 and 26 of the Las Soleras Master Plan, are amended to change the land use designations of the Property from Mixed Use, Business Industrial Park, and General Office to Community Commercial, and the width of the Utility

and Trail Corridor (La Rambla Trail) is reduced from 90 feet to 45 feet south of Beckner Road.

PASSED, APPROVED, and ADOPTED this ___ day of ____ 2025.

1. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-7898. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use Map designation for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres, from Commercial Office Use to Community Commercial.

2. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8852. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from Transitional Mixed Use to Community Commercial.

3. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8854. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop from Commercial Business Use to Community Commercial.

4. CONSIDERATION OF A RESOLUTION

Master Plan Amendment. Case #2024-7899. Orion-West LLC, Agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the Las Soleras Master Plan land use designations on Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to a uniform classification of C-2 (General Commercial), and to reduce the width of the Utility and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet on the south side of Beckner Road.

5. CONSIDERATION OF BILL NO. 2025-1
   Rezoning. Case #2024-7900. Orion-West LLC, Agent for Applicant, Beckner Road Partnership, asks the Governing Body to adopt Bill 2025-01 to rezone Las Soleras Tracts 21 and 26, +/- 8.18 acres, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) to C-2 (General Commercial).

6. CONSIDERATION OF BILL NO. 2025-2
   Rezoning. Case #2024-8853. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, ask the Governing Body to adopt Bill 2025-2 to rezone Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from MU (Mixed Use) to C-2 (General Commercial).

7. CONSIDERATION OF BILL NO. 2025-3
   Rezoning. Case #2024-8855. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt Bill 2025-3 to rezone Las Soleras Tract 20, +/-10.70 acres located southwest of the Walking Rain Road / Beckner Road roundabout, from BIP (Business Industrial Park) to C-2 (General Commercial).

I. Planning Commission Recommendations:

On September 5, 2024, the Planning Commission ("Commission") recommended the Governing Body take the following actions:

1. **APPROVE** Case #2024-7899. Las Soleras Master Plan Amendment, changing land use designations for Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet, subject to the Master Plan conditions listed in Section III, Table 1 "Master Plan Conditions" and Master Plan Technical Corrections listed in attachment "A".
2. **APPROVE** Case #2024-7898. General Plan Amendment for Las Soleras Tracts 21, 23, 24, and 26 from Commercial Office Use to Community Commercial.
3. **APPROVE** Case #2024-7900. Rezoning for Las Soleras Tracts 21, 23, 24 and 26 from C-1 (General Office) to C-2 (General Commercial).
4. **APPROVE** Case #2024-8852**.** General Plan Amendment for Las Soleras Tract 19, from Transitional Mixed Use to Community Commercial.

5. **APPROVE** Case #2024-8853. Rezoning for Las Soleras Tract 19, from MU (Mixed Use) to C-2 (General Commercial).
6. **APPROVE** Case #2024-8854. General Plan Amendment for Las Soleras Tract 20, from Commercial Business Use to Community Commercial.
7. **APPROVE** Case #2024-8855. Rezoning for Las Soleras Tract 20, from BIP (Business Industrial Park) to C-2 (General Commercial).

II. Sample Motions:

Seven (7) motions will be required. Land Use recommends the motions in the following order:

1. **Move to approve or deny** Case #2024-7898, adopting a resolution amending the General Plan Future Land Use Map designation from Commercial Office Use to Community Commercial, for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres.

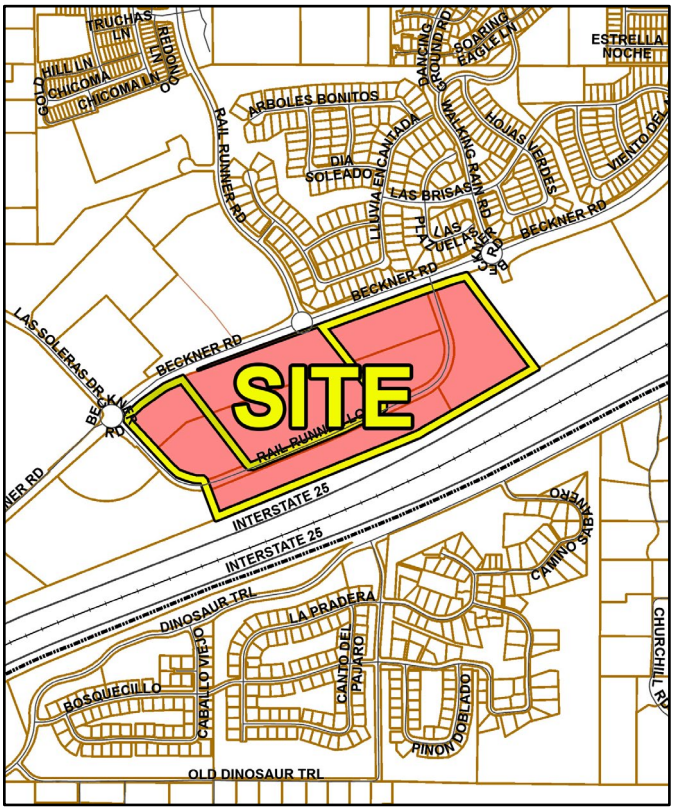
2. **Move to approve or deny** Case #2024-8852**,** adopting a resolution amending the General Plan Future Land Use designation from Transitional Mixed Use to Community Commercial, for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

3. **Move to approve or deny** Case #2024-8854, adopting a resolution amending the General Plan Future Land Use designation from Commercial Business Use to Community Commercial, for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop.

4. **Move to approve or deny** Case #2024-7899, adopting a resolution amending the Las Soleras Master Plan land use designations for Tracts 19, 20, 21, 23, 24 and 26 from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) to from 90 feet to 45 feet, subject to conditions of approval and technical corrections.

5. **Move to approve or deny** Case #2024-7900, adopting Bill 2025-01, changing the official Zoning Map designation from C-1 (General Office) to C-2 (General Commercial) for Las Soleras Tracts 21 and 26, +/- 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout.

6. **Move to approve or deny** Case #2024-8853, adopting Bill 2025-02 changing the official Zoning Map designation from MU (Mixed Use) to C-2 (General Commercial), for Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road/ Beckner Road roundabout.



7. **Move to approve or deny** Case #2024-8855. adopting Bill 2025-03 changing the official Zoning Map designation from BIP (Business Industrial Park) to C-2 (General Commercial) Las Soleras Tract 20, +/-10.70 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

III. Executive Summary

Beckner Road Partnership, LLC, Owner, (the "Applicant"), through its agent, Orion-West LLC, requests a master plan amendment ("Master Plan Amendment"), three (3) general plan amendments ("GP Amendments"), and three (3) Rezonings ("Rezonings") for Tracts 19, 20, 21, 23, 24, and 26 ("Tracts") within the Las Soleras Master Plan area (Master Plan) (see Figure 1) (together, the "Project"). The Applicant's goal is to amend the land use designations and zoning on the six (6) tracts from their current zoning designations of General Office (C-1), Mixed Use (MU) and Business Industrial Park (BIP) to Community Commercial (C-2). The Rezonings must be consistent with the Master Plan and General Plan.

On February 11, 2009, the Governing Body approved the Master Plan when it annexed the area, encompassing +/- 539 acres with a mix of uses including low, medium, and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The Master Plan included a walkable neighborhood supported by an anticipated Rail Runner transit stop, which has since been postponed indefinitely by the state. The mix of uses was intended to encourage a citywide balance of residential and nonresidential uses and to set those uses among extensive open spaces, parks and trail networks.

Since approval in 2009, the Governing Body amended the Master Plan four (4) times:

1. September 9, 2015, which realigned roads, reconfigured open space and trails, reduced park land and reconfigured certain tracts of land.
2. September 24, 2016, which established alternative height and setback standards for the R-6 and R-12 residentially zoned districts for Estancias de Las Soleras and Ross's Peak developments.
3. September 12, 2018, which changed the land use designation from "Transitional Mixed Use" to "High Density Residential" to reflect contemporaneous zoning and General Plan amendments, reduced a 90-foot utility, access, and trail corridor to 45 feet (La Rambla) on the north side of Beckner Road, and amended a condition related to dust control.
4. May 31, 2023, which increased the density from six units per acre to ten units per acre for land located at 4601 Rail Runner Road (pending recordation).

The proposed three (3) GP Amendments, Master Plan Amendment, and three (3) Rezonings, (together, the "Project") will allow the Applicant to develop Las Soleras Tracts 19, 20, 21, 23, 24, and 26 under the Community Commercial (C-2) zoning district. The Tracts

are currently zoned C-1 (General Office), MU (mixed use), and BIP (Business Industrial Park) (see Figure 2). A uniform C-2 designation for the project area will allow amenities such as neighborhood grocery stores to exist side-by side with residences. (Grocery stores and residences could not exist side-by-side in the existing BIP and C-1 districts.) In addition, the rezoning will remove restrictions on ratios for housing versus commercial development (as currently required in the Mixed Use districts). Staff anticipates that these changes will result in more cohesive and pedestrian friendly mixed use development.

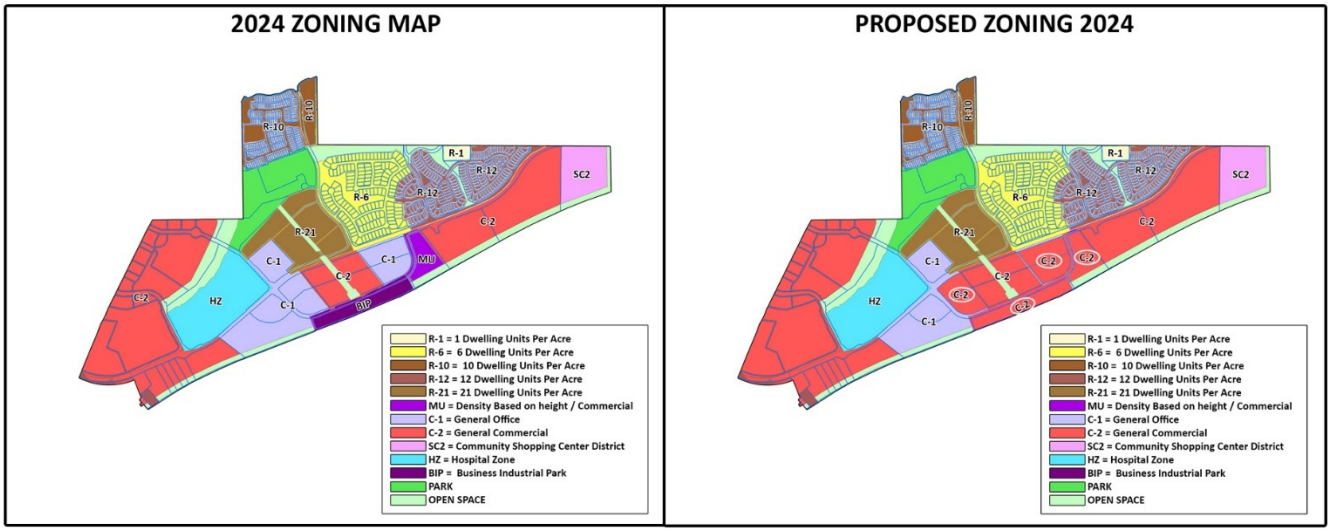


Figure 1 Existing (left) and Proposed Zoning (right)

The Applicant conducted a pre-application conference on September 28, 2023, and an Early Neighborhood Notification (ENN) meeting on November 14, 2023. On September 5, 2024, the Commission held a public hearing to review Case #2024-7899, Case #2024-7898, Case #2024-7900, Case #2024-8852, Case #2024-8853, Case #2024-8854, and Case #2024-8855 during which the Commission heard reports from City Planning and Land Use Department staff ("Staff"), testimony and evidence from the Applicant, and public comments by interested members of the public. The Commission found that the Master Plan Amendment, three (3) GP Amendments and three (3) Rezonings were consistent with the General Plan and that all approval criteria had been met.

The Commission voted to recommend that the Governing Body *approve* the Project on September 5th, 2024, subject to a condition of approval for the Master Plan Amendment. On October 3, 2024, the Commission adopted Findings of Fact and Conclusions of Law, (Attachment B, "Planning Commission Approved Findings of Fact and Conclusions of Law") and Commission Minutes (Attachment C, "Planning Commission Minutes"), reflecting its holdings from the public hearing.

IV. General Plan Amendment Approval Criteria

Table 2 analyzes all three (3) proposed General Plan Amendment according to approval criteria as set forth in the Santa Fe City Code, 14-3.2 "Amendments to the General Plan" for Case #2024-7879, Case #2024-8852, and Case #2024-8854.

Table 1 General Plan Amendment Approval Criteria Analysis

General Plan Amendment Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (General Plan Amendment):

"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals[1] are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan, it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

[Staff has removed three (3) paragraphs here. The Applicant's full response may be found in Attachment E, Applicant's materials]

[1] Staff Commentary: the policies referenced in this response are described in the City of Santa Fe 1999 General Plan, *available at* https://santafenm.gov/land-use/current-planning/long-range-planning/general-plan-1999.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report[2] further emphasizes the importance of diversifying Santa Fe's economic base to ensure sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment): Staff finds that the General Plan Amendments meet Criterion 1.

Staff agrees with the Applicant's response. The General Plan Amendments for the Tracts align with Santa Fe's growth and economic development strategies. The Applicant cites two (2) strategic documents that are reliable sources for understanding Santa Fe's future growth: the Angelou Plan ("Cultivating Santa Fe's Future Economy Economic Development Strategy, April 2004, by Angelou

[2] The "Angelou Plan" (referred to by the Applicant as the "Angelou Report") is a 2004 economic report from Angelou Economics. The Angelou Plan proposes a roadmap for Santa Fe's future economic development efforts based on economic analysis and community input. The Angelou Plan is included as Attachment C, "Economic Strategy".

Economics) and the 2008 Economic Development Strategy (included here as Attachment C, "Economic Strategy"). The General Plan Amendments are likely to allow for the type of neighborhood and community planning that are encouraged in the 1999 General Plan (*see* General Plan Themes, I-5). Specifically, the General Plan Amendments will allow for development designed to serve the immediate community, which helps reduce car-dependence and encourages community-oriented development (*see* General Plan Themes, I-13). Staff agrees that the Applicant's requested General Plan Amendments are consistent with projected growth patterns as described in both the Angelou Plan and the 2008 Economic Development Strategy.

General Plan Amendment Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response: *"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).*

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response: Staff agrees that Criterion 2 is met.

Staff agrees with the Applicant's response. The 1999 General Plan Policy Overlay designates the land at issue as an "infill area" (*see* 1999 General Plan, Chapter 3, "Land Use", p. 4). Guiding Policy 3-G-3 provides that "[t]here shall be infill development at densities that support the construction of affordable housing and a designated mix of land uses that provide an adequate balance of service retail and employment opportunities to address residential growth throughout the Urban Area".

1999 General Plan Guiding Policy 3-G-2 encourages mixed commercial/residential development throughout the City "[t]here shall be a mix of uses and housing types in all parts of the city." Additionally, much of the land near the Project site, along Cerrillos Road and I-25, is already

designated Community Commercial by the Future Land Use Map[3]. The General Plan Amendments will uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial, which will allow for development throughout the Project site that is consistent with the General Plan goal of encouraging mixed uses in all parts of the City.

General Plan Amendment Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **Yes**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

"With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (General Plan Amendment): Criterion 3 is met.

The Applicant's response does not contain enough detail to fully address all subsections of this criterial. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the Amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public.

[3] See City of Santa Fe Future Land Use Map, *available at* https://santafenm.gov/FutureLandUse.pdf (12/30/2024).

General Plan Amendment Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No) N/A**
Applicant's Response: *"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."* **Staff Response:** Criterion 14-3.2(E)(1)(c) is met, and therefore no further justification is needed at this time.	
General Plan Amendment Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans; **Staff Response:** There are no extraterritorial zoning ordinances or extraterritorial plans that affect the Property.	**Not Applicable**
General Plan Amendment Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) Yes**
Applicant's Response: *"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.* *In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."* **Staff Response:** Staff finds that Criterion 6[14-3.2(E)(1)(f)] is met. Staff agrees with the applicant's response, in that a Community Commercial designation across the entire Project site would provide an opportunity for growth that is consistent with 1999 General Plan Guiding Policy 3-G-2 ("[t]here shall be a mix of uses and housing types in all parts of the city") and allow development that, aligns well with the adjacent land uses. The Amendment promotes more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.	

General Plan Amendment Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	Criterion Met: (Yes/No) YES
Applicant's Response: *"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."* **Staff Response:** Staff agrees with the Applicant's response. The General Plan Amendments are consistent with multiple City policies that support the proposed change. The General Plan Amendments do not conflict with any existing city ordinances or regulations. Additionally, the Project meets all applicable Code criteria. The General Plan Amendments foster a harmonious development strategy, promote general welfare, and correspond with adjacent land uses and broader city policies, ensuring there are no conflicts with existing regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
General Plan Amendment Criterion 8 [14-3.2(E)(2)] Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a) the growth and economic projections contained within the general plan are erroneous or have changed;** **(b) no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or** **(c) conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Not Applicable**
Staff Response: The Applicant is not required to document compliance with Criterion 8, since the application does not amend land use policies.	

V. APPROVAL CRITERIA – MASTER PLAN AMENDMENT

Table 2 provides the Applicant's responses and staff's analysis of the Master Plan approval criteria, 14-3.9 "Master Plan", for Case #2024-7899 Las Soleras Master Plan Amendment.

According to City Code Section 14-3.9 (B)(3), "[f]inal actions by the governing body… concerning rezonings… shall include a specific finding or determination that the action complies with all applicable provisions of the master plan." Consequently, it is Staff's recommendation that the Governing Body consider the Master Plan Amendment before considering the Applicant's proposed Rezonings.

Staff recommends *conditional approval* of the Master Plan Amendment, effective upon approval of the relevant rezonings and an additional condition. As further discussed in the Planning Commission Staff Report, Staff finds that the Master Plan Amendment meets the criteria for approval, subject to a condition that the Master Plan Amendment include a "Master Sign Plan" that comprehensively addresses the design, placement, and specifications of all signs within the project area that are compatible with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. (*See* Attachment A, p. 4). Staff proposes that the Applicant must complete this condition prior to recording the Master Plan Amendment.

Table 2 Master Plan Amendment Approval Criteria Analysis

Criterion 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**
Applicant's Response (Master Plan): *The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals.* *Specifically, the following General Plan policy goals are supported:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.* *Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and* *Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.* *Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and* *Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and* *Policy 9-2-G-5: Promote small business.* *The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the*	

local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial.

Staff Response (Master Plan): Staff finds that the Master Plan meets Criterion 1 is met.

Staff agrees that the Master Plan Amendment is consistent with the proposed General Plan Amendments. The Master Plan Amendment still maintains the potential for a diverse range of uses as allowed within the C-2 District and allows for neighborhood-focused development as described in the policies referenced in the Applicant's response, above.

Criterion 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Master Plan):
"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan): Staff finds that Criterion 2 is met.

Staff agrees with the Applicant's response. The Master Plan Amendment is consistent with the Rezonings proposed for the area. . The variety of C-2 uses, ranging from residential to light industrial, are consistent with the Las Soleras Master Plan's original scheme to foster a mix of uses, by allowing for a more cohesive, neighborhood-focused development scheme across the Project site than Mixed Use, BIP, and C1, which restrict certain types of development to certain parts of Project site. . .

Criterion 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):
"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan): Criterion 3 is met.

Staff agrees with the applicant's response. The Master Plan Amendment provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining throughout the entire Project site, and more, which would not be allowed with the current combination of zoning restrictions. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth.

Criterion 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No) YES**

Applicant Response (Master Plan):

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan): Staff finds that Criterion 4 is met.

Staff generally agrees with the Applicant's response regarding the minimal impact of the Master Plan Amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the Applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, the Applicant's test is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Applicant's Traffic Analysis, the Traffic Division has raised certain points for consideration regarding future phases of the project (*See* Attachment B, Development Review Team (DRT) Comments):
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended Traffic Impact Analysis.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for future development:
1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not "have any concerns at this time from a water engineering standpoint", however, it noted that "the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project." *See* Attachment B, DRT Comments.

The Wastewater Division has "determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development." *See* Attachment B, DRT Comments.

The Parks Division raised no concerns for the project. *See* Attachment B, DRT Comments.

VI. Rezoning Approval Criteria

SFCC 1987, Sec. 14-3.5(C) requires the Governing Body to consider approval criteria for all rezoning proposals, and make complete findings of fact with respect to each criterion "sufficient to show that these criteria have been met", before the Governing Body approves a rezoning. Table 3, below, contains analysis of the three (3) Rezoning requests for Case #2024-7900, Case #2024-8853, and Case #2024-8855.

Table 3 Rezoning Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26

Rezoning Criterion 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning from C-1, MU, and BIP to C-2): *(i) "Not applicable"* *(ii) "As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development – most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."* *(iii) "As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.*	

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response: Criterion 1 is met.

Staff agrees that a different use category (here, Community Commercial/ C2) is more advantageous to the community as articulated in the General Plan policy sections cited in the Applicant's response. The Rezonings support a variety of uses, enhance walkability, and promote economic self-sufficiency within the master planned area by balancing residential and commercial development opportunities, which provides opportunities for shopping and employment in the immediate area. The Rezonings are designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs.

Rezoning Criterion 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response:
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response: Staff agrees with the Applicant's response, above. The Rezonings meet all applicable Chapter 14 requirements. The proposed Rezonings therefore meets Criterion 2.

Rezoning Criterion 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning): Staff finds that Criterion 3 is met.

Staff agrees with the Applicant's response that rezoning the Tracts to a uniform Community Commercial C-2 district across aligns with the City of Santa Fe's General Plan as proposed to be amended, and economic development goals. The proposal matches City policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the Future Land use Map, which designates the area Community Commercial.

Rezoning Criterion 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):

"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff finds that Criterion 4 is met.

For City policy regarding the amount of land sufficient to meet Rezoning Criterion 4, Staff looks to City Code General Plan Amendment Criteria, Section 14-3.2(E)(1)(c), which requires in part that an amendment does not "affect an area of less than two acres, except when adjusting boundaries between districts."

Based on this requirement, Staff concludes that the amount of land proposed for rezoning will not create a pocket of inconsistent development and is sufficient to help meet the City's land use goals of creating neighborhood-focused communities that include opportunities for both residential and commercial development.

Rezoning Criterion 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response:

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response: Staff finds that Criterion 5 is met.

Staff agrees with the Applicant's response the "subject property can be served by existing roadways and public water and sewer infrastructure."

Staff agrees with the Applicant's response that the existing infrastructure is adequate for the proposed development. However, the "Conceptual Test Fit" that the Applicant referenced is not from the City Code and is not a test that the City uses to evaluate projects. Additionally, DRT evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development, which will be reviewed at the permitting or development plan stage.

Rezoning Criterion 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response:

14-3.5(C)(2)(a):

"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

14-3.5(C)(2)(b):

"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

14-3.5(C)(2)(c):

"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las

Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response: Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

The Rezonings are consistent with applicable 1999 General Plan policies referenced in detail in the analysis of the previous criteria. The Rezonings are anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

VII. CONCLUSION

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on September 28, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

Staff and the DRT have analyzed the Project and found that it meets all applicable Code criteria. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

CITY OF SANTA FE

Planning and Land Use Department
Planning Commission Staff Report

Case Nos:	2024-(7899)(898)(7900)(8852)(8853)(8854)(8855)
Hearing Date:	September 5, 2024
Applicant:	Beckner Road Partnership, LLC
Request:	Master Plan Amendment, General Plan Amendments & Rezonings
Location:	The property is located SE of the Las Soleras/Beckner Rd roundabout & South of the Rail Runner Rd/Beckner Rd roundabout, & on the South side of Beckner Rd, being Tracts 19-26, within the Las Solares Master Plan.
Case Mgr.:	Daniel A. Esquibel
Existing Zoning:	C-1 (General Office), MU (Mixed Use), and BIP (Business Industrial Park)
Overlay:	Suburban Archaeological Review District
Pre-app. Mtg.:	September 28, 2023
ENN Mtg.:	November 14, 2023

Proposal: The Applicant's project includes 7 applications: an amendment to the Las Soleras Master Plan, 3 General Plan Amendments, (GPA) 3 rezonings (RZ), and a request to reduce the La Rambla Trail easement width from 90 feet to 45 feet. The GPAs change the Future Land Use Map designations from "Transitional Mixed Use, Business Commercial, and Commercial Office" to "Community Commercial". The RZs change the Official City Zoning Map designations from MU, BIP, and C-1, to C-2.

Case #2024-7899. Las Soleras Master Plan Amendment. Orion-West LLC, Agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a Master Plan Amendment to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and also that the Planning Commission recommend that the Governing Body approve an additional General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning. Orion-West LLC, Agent for Beckner Road Partnership, Owner, asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and that the Planning Commission also recommend the Governing Body to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial, for a property, described as Tract 19 on the Las Soleras Master Plan located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment. Orion-West LLC., agent for

Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial, on a property described as Tract 20 on the Las Soleras Master Plan, and located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, ask the Planning Commission to recommend the Governing Body approve a rezoning changing the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) to C-2 (General Commercial) on a property described as Tract 20 on the Las Soleras Master Plan, and located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

I. RECOMMENDATION

The Land Use Department recommends **APPROVAL** of the following cases, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A":

1. Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Case #2024-7898: Las Soleras Tracts 21, 23, 24, and 26 General Plan Amendment,
3. Case #2024-7900: Las Soleras Tracts 21, 23, 24, and 26 Rezoning,
4. Case #2024-8852: Tract 19 General Plan Amendment,
5. Case #2024-8853: Las Soleras Tract 19 Rezoning,
6. Case #2024-8854: Las Soleras Tract 20 General Plan Amendment, and
7. Case #2024-8855: Las Soleras Tract 20 Rezoning

Seven motions are required for these Cases:

1. Recommend the Governing Body approve or deny Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Recommend the Governing Body approve or deny Case #2024-7898: Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment, subject to the Master Plan conditions listed in Section II, Table 1 *"Master Plan Conditions"*, and Master Plan Technical Corrections listed in attachment "*A*",
3. Recommend the Governing Body approve or deny Case #2024-7900: Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning,
4. Recommend the Governing Body approve or deny Case #2024-8852: Tract 19 General Plan Amendment
5. Recommend the Governing Body approve or deny Case #2024-8853: Las Soleras Master Plan Tract 19 Rezoning,
6. Recommend the Governing Body approve or deny Case #2024-8854: Las Soleras Master Plan Tract 20 General Plan Amendment, and
7. Recommend the Governing Body approve or deny Case #2024-8855: Las Soleras Master Plan Tract 20 Rezoning

II. Master Plan Conditions

Table 1 Master Plan Conditions

#	Condition of approval	Dept/Division	Completed By:
1	The Applicant shall submit a Master Sign Plan to be included with the Master Plan amendment as a permanent component of future development of the Project. This Master Sign Plan must comprehensively address the design, placement, and specifications of all signs within the project area to ensure compatibility with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. This requirement shall apply to the entire project area, irrespective of any future subdivision or ownership change, and must be adhered to by all current and subsequent owners or developers.	Land Use/ Current Planning Division	Prior to recording the Master Plan

III. EXECUTIVE SUMMARY

The Governing Body approved the Las Soleras Master Plan (Master Plan) on February 11, 2009, encompassing approximately 539 acres with a mix of uses including low, medium and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The original master plan concept proposed a walkable mixed-use neighborhood focused on an anticipated Rail Runner transit stop. The mix of uses was intended to approximate the citywide balance of residential and nonresidential uses, set among extensive open spaces.

Since adoption in 2009, there have been 4 amendments to the Las Solares Master Plan:

A. September 9, 2015
   i. Realignment of roads, reconfiguration of open space and trail, reconfiguration and reduction of park land and the reconfiguration of land tracts.
B. September 24, 2016
   i. Establish alternative height and setback standards for the R-6 and R-12 residentially zoned districts of Las Soleras for Estancias de Las Soleras and Ross's Peak.
C. September 12, 2018

i. Rezoning from MU (Mixed Use) to R-21 (Residential-twenty-one dwelling units per acre) and a reduction in the 90-foot utility, access, and trail corridor to 45 feet (La Rambla).

ii. Amending Las Soleras Master Plan condition related to dust control

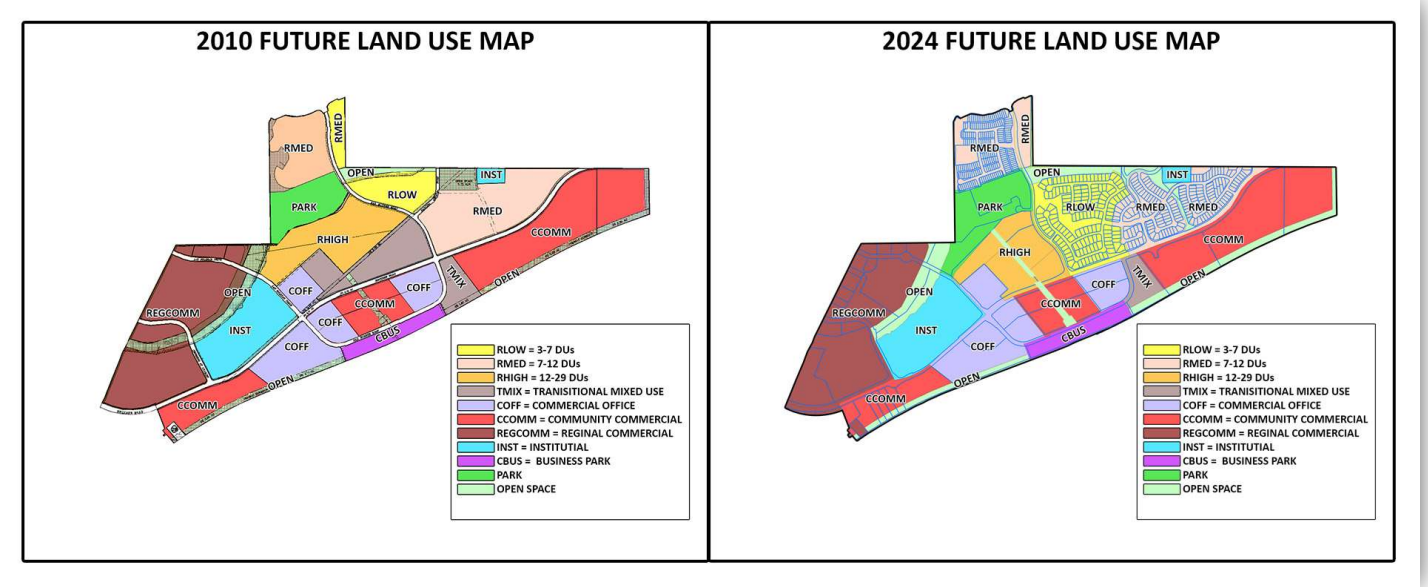
D. October 31, 2019

i. Rezoning from R-6 to R-10 for Las Solares Tract 13

IV. COMPARISON MAPS OF ZONING AND THE FUTURE LAND USE MAP

Figure 1 depicts a comparison between the 2010 Future Land Use Map (left), illustrating the land uses at the time of adoption of the Master Plan and Annexation into the City, and the current 2024 Future Land Use Map designations (right). The primary differences being within the project area where 4 lots (lots 21,23,24 and 26) were annexed in as Community Commercial (red) and are now designated as commercial office (light purple). There has also been an expansion of residential low density (yellow) and residential high density (goldenrod) and a reduction in Transitional Mixed Use (mauve) north of Beckner Road.

Figure 1 2010 / 2024 Future Land Use Map Comparison



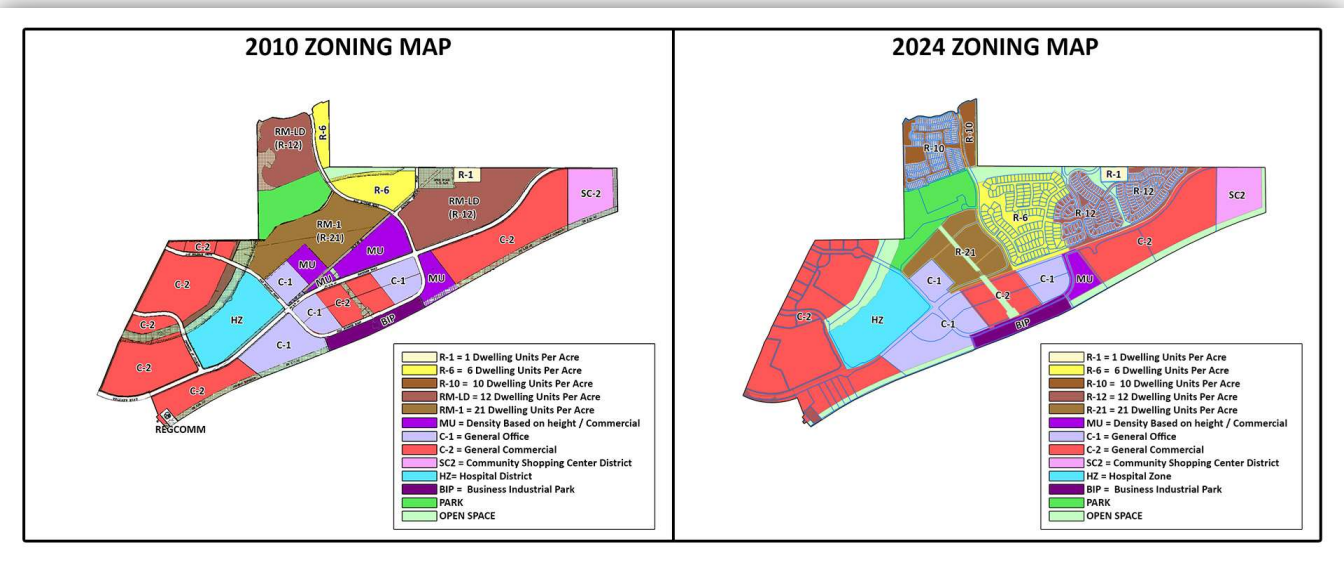


Figure 2 depicts a comparison between the 2010 Zoning Map established at annexation and the 2024 Zoning Map. The primary difference being a reduction in Mixed Use zoning (purple) in favor of more residential uses north of Beckner Road.

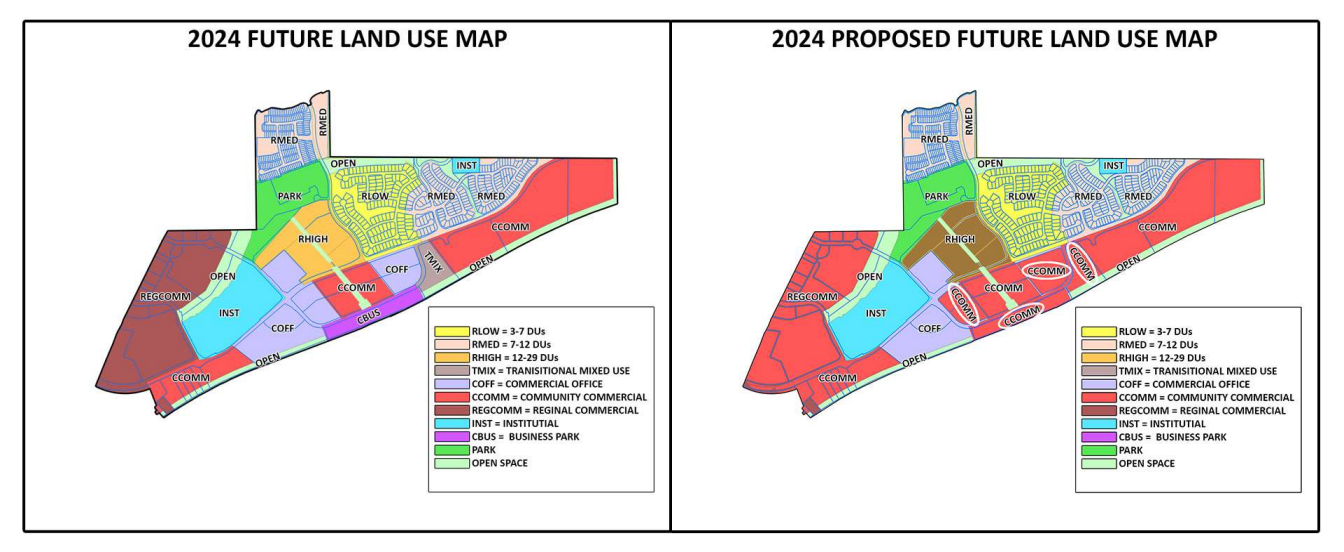

Figure 2 2010 Master Plan Zoning and 2024 Zoning Map Comparison

The Applicant's Proposed Changes

Figure 3 compares the existing 2024 Future Land Use Map and the applicant's proposed changes, from Commercial office (light purple), Business Park (dark purple), and Transitional Mixed Use (mauve) to Community Commercial (red).

Figure 3 2024 Future Land Use Map Comparison

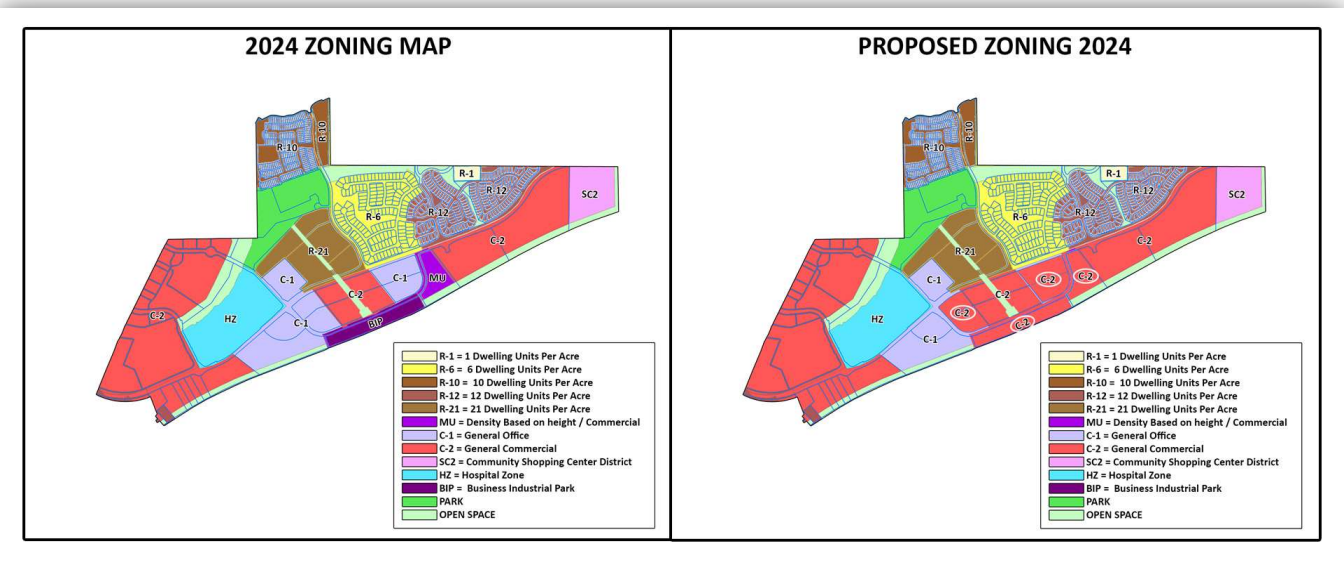
The General Plan describes Community Commercial Office as providing:

> *Sites for retail shopping areas, focus on a plaza, containing a wide variety of businesses, including retail stores; eating and drinking establishments; commercial recreation; service stations; automobile sales and repair services; financial, business, and personal services; and educational and social services.*

The General Plan describes Business Park as:

> *Business Parks shall provide areas appropriate for moderate- to low-intensity industrial and business park uses capable of being located next to commercial and residential areas with minimum buffering. Allowable uses include research and development related uses, light manufacturing, wholesaling, distribution and storage, retailing and small-scale restaurants as a related use only, and offices in a master planned landscaped setting. No raw materials processing or bulk handling would be allowed.*
>
> *The Business Park designation on the Future Land Use Map of the General Plan is intended to encompass the 11, Light Industrial District, and the IP, Industrial Park District, existing zoning categories. It is recommended that both districts be re-examined for allowable uses and appropriate standards. It is further recommended that the IP zoning district be restructured with a stronger emphasis on research and development, offices, and related uses, to be developed in a master planned landscaped setting, and that the district name be modified to Business and Industrial Park in order to reflect these changes.*
>
> *For new development and for rezonings within the Business Park designation, the appropriateness of 1 versus BIP (IP) is determined by the nature of adjacent land uses. Where an area designated Business Park on the Future Land Use map is adjacent to non-residential zoning, an existing non-residential use, or non-residential Future Land Use, then that area may be considered for 11 zoning. Where an area designated Business Park on the Future Land Use map is adjacent to residential zoning, an existing residential use, or residential Future Land Use, then that area may be considered for IP (BIP) zoning.*

The General Plan describes Transition Mixed Use as:



> *…mixed-use development, providing a variety of commercial (specific locations for big box retail), residential, and institutional opportunities.*

The General Plan describes Office as:

> *This classification provides sites for administrative, financial, business, professional, medical, and public offices, and small-scale restaurants (as a related use only) in areas where retail and other community commercial uses are not appropriate*.

Figure 4 compares the Applicant's proposed changes to the City Zoning Map, namely replacing C-1 (General Office), BIP (Business Industrial Park) and MU (Mixed Use) with C2 (General Commercial).

Figure 4 Existing and Proposed Zoning Map Comparison

Zoning Modifications

Table 2 *"Zoning Acreage Change"* depicts acreage changes affected by Master Plan Amendments for Las Solares Master.

Table 2 Zoning Acreage Change

Zoning	2010 Annexation (Acreages+/-)	2024 Current Zoning (Acreages +/-)	Proposed Changes (Acreages+/-)
R-1	3.02	3.02	3.02
R-6	28.96	46.9	46.9
RM-LD (R-10 & R-12)	102.66	81.19	81.19
RM-1 (R-21)	43.69	28.59	28.59
MU	37.49	9.11	0
C-1	50.29	50.45	30.75
C-2	171.5	171.5	~~239.47~~ 211.01
SC-2	20.21	20.21	20.21
HZ	39.03	39.03	39.03
BIP	10.7	10.7	0

Park	21.4	31.1	31.1

Figure 5 Line Graph

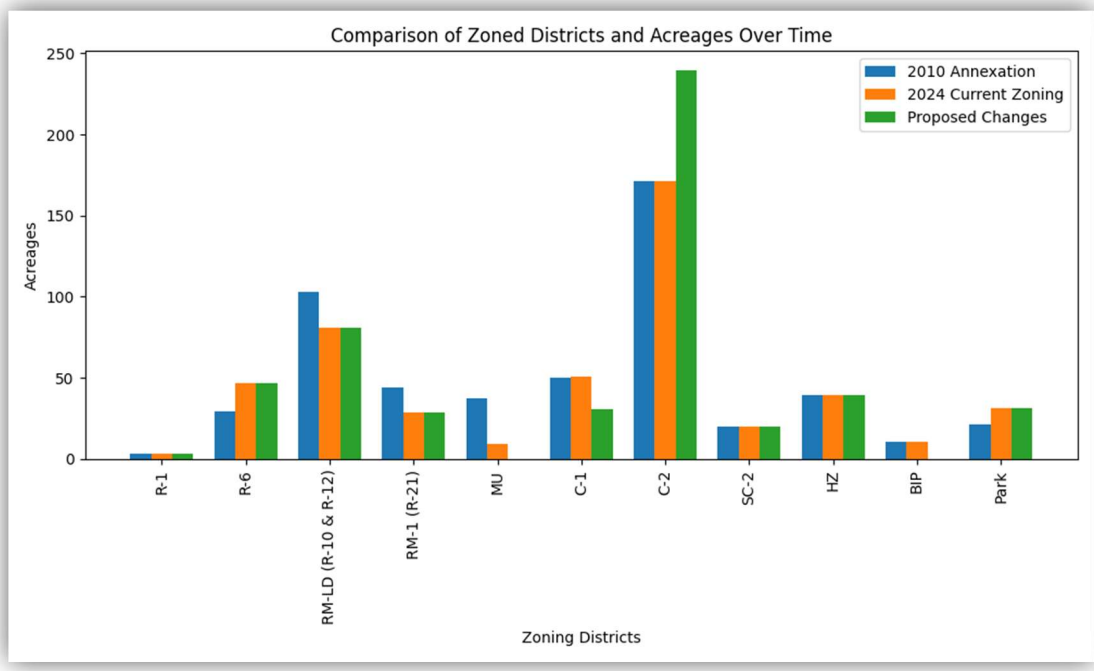


Figure 5, together with Figures 1-4 and Table 2 present an overview of modifications across various zoning categories, from the annexation agreement established in 2010 to the present year, and the applicants requested amendments. Figures 1-5 offer a general view of how acreages within the Master Plan area have changed across different zoning categories over time. The Master Plan amendment proposes modifications to the Master Plan zoning designations for Tracts 19, 21, 23, 24, and 26. The Master Plan amendment eliminates two zoning categories—MU (Mixed Use) from 9.11 acres to 0; and BIP (Business Industrial Park) from 10.7 acres to 0 acres—while reducing the area zoned as C-1 (General Office) from 50.45 acres to 30.75; and increasing those areas zoned as C-2 (General Commercial) from 171.5 acres to 239.47. In addition to the zoning changes, the applicant seeks to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet.

Relevant Chapter 14 Zoning District purpose statements:

14-4.3(A) C-1 Office and Related Commercial District

The purpose of the C-1 office and related commercial district is to provide areas for government offices; professional and business offices; medical and dental offices or clinics; personal care facilities for the elderly ; and hospitals , laboratories, pharmacies and related complementary businesses that provide sales or service of office equipment, medical and dental supplies and office supplies. This

district serves as a transitional buffer between more intense commercial use districts and residential districts.

14-4.3(B) C-2 General Commercial District

The C-2 general commercial district includes areas along streets carrying large volumes of traffic where commercial uses are appropriate. Regulations are designed to guide future additions or changes so as to discourage extension of existing and formation of future strip commercial development , to preserve the carrying capacity of the streets and to provide for off-street parking and loading.

14-4.3(H) BIP Business and Industrial Park District

1) Purpose

(a) The purpose of the BIP district is to provide locations for the development of jobs in research and development activities and in offices, institutions and limited light industrial settings. The BIP district regulations intend to ensure that district locations may be adjacent to residential and commercial areas with minimum buffering.

(b) It is also the purpose of the BIP district to allow related uses that complement or support the primary employment-based uses to create a functional and pedestrian-friendly development.

2) Rezoning Requirements

(a) Property is eligible for rezoning to BIP if the property is a minimum of four acres in size and all other applicable requirements of Chapter 14 are satisfied.

(b) Rezoning to BIP requires consideration and approval by the planning commission and governing body of a master plan or development plan for the property as provided in Sections 14-3.8 and 14-3.9."

14-4.3(L) MU Mixed-Use District

1) Purpose

It is the purpose of the MU mixed-use district to provide for the creative infill and development of underused and vacant land and buildings in Santa Fe. This zoning category allows office, commercial and residential uses in the same building or on the same property . MU zoning should accomplish the following goals:

(a) control sprawl by creating a more efficient use of land and more opportunities for infill ;

(b) promote affordable housing and economic development by emphasizing a variety of land uses

(c) promote creative and flexible land uses within Santa Fe;

(d) foster alternative means of transportation, including transit, bicycles and walking;

(e) promote infill development and pedestrian-oriented streetscapes in currently underused parking areas and along existing roadway corridors; and

(f) promote shared parking areas in the design and development of mixed-use projects.

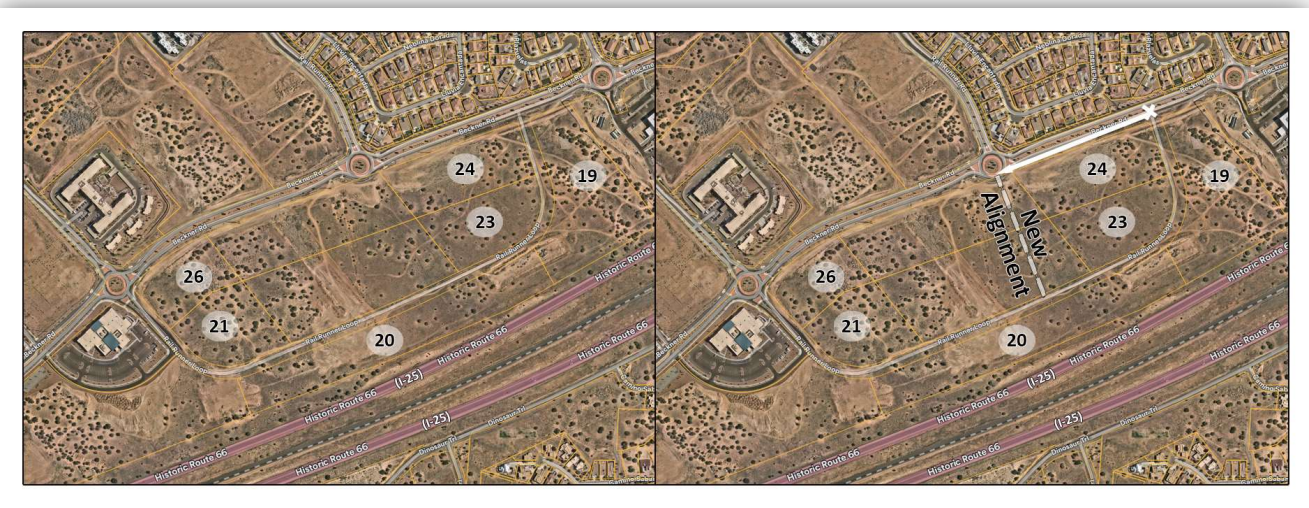
(2) Rezoning Requirements

(a) Application for rezoning to MU is not allowed for residentially zoned properties located in historic districts, as shown on the official zoning map.

(b) *Rezoning to MU requires consideration and approval by the planning commission and governing-body of preliminary or final development plans for the property as provided in Section 14-3.8.*

As districts expand, contract, or are eliminated, the urban fabric of the Los Soleras Master Plan area shifts. Expansion of C-2 zones might encourage more robust commercial development but could risk higher traffic and reduced pedestrian safety and less open space. Shrinking or eliminating MU districts could undermine efforts to increase urban density and mixed-use developments, potentially leading to greater vehicle dependence and loss of vibrant, multi-functional urban areas. Changes in BIP zoning could affect the availability of land for high-tech and industrial jobs, impacting local employment landscapes. Conversely, growth in C-1 areas could promote quieter, service-based environments but might limit opportunities for larger commercial ventures. Each adjustment to these zoning districts needs to be considered carefully to balance growth, community needs, and infrastructure capabilities.

The Applicant complied with Subsections 14-3.1(E) *"Pre-Application Conferences,"* 14-3.1(F) "Early Neighborhood Notification Procedures," and 14-3.1(H) *"Notice Requirements."*



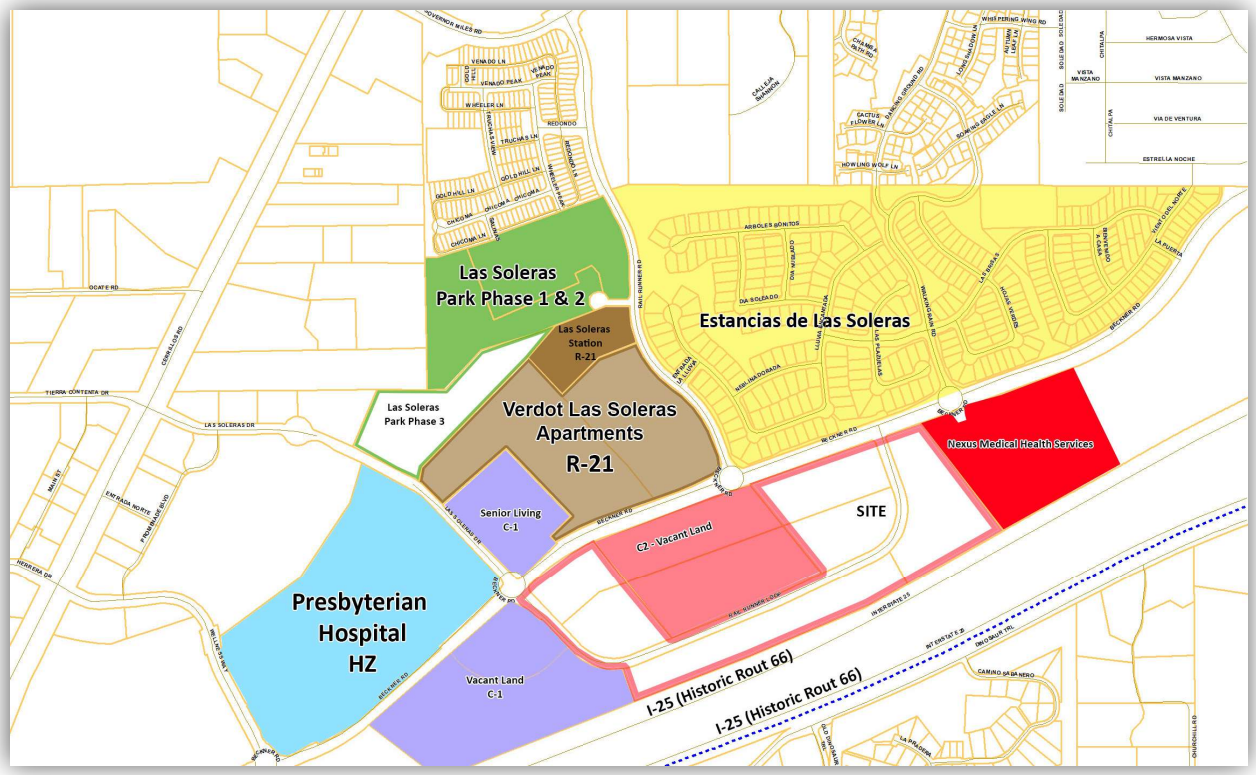
Staff's analysis finds that the Applicant met the approval criteria as outlined in Subsection 14-3.9(D) for Master Plans, Subsection 14-3.2(E) for amendments to the General Plan, and Subsection 14-3.5(C) for the rezoning request across all 7 case requests.

V. PROJECT ANALYSIS

A. Property Information:

Tracts 19, 20, 21, 23, 24, and 26 are vacant tracts of land measuring 9.11, 10.70, 4.70, 7.27, 6.18, and 3.48 acres, respectively, totaling approximately 41.44 acres. Tracts 19-23 are located off Rail Runner Loop. Per the approved Las Soleras Master Plan the Applicant will align Railrunner Loop to with the Railrunner Road Roundabout. Currently, Rail Runner Loop aligns with the Solares Drive/Beckner Road intersection at a roundabout on the west end and lies between the intersections of Rail Runner Road and Walking Rain Road/Beckner Road, each featuring roundabouts, at the east juncture. The eastern intersection will be realigned with the Rail Runner Road and Beckner Road intersection roundabout. Tracts 24 and 26 are located off Beckner Road (Reference Figure 6 *"Tract Location"*).

Figure 6 Tract Location



B. Adjacent Uses

Table 3 Nearby Development (Reference Figure 7 "Adjoining Uses")

Direction	Zoning
North	C-1 (General Office) 5011 Las Soleras Dr, R-21 (Residential - 21 dwelling units per acre) Verdot apartments, R-6 (Residential – dwelling units per acre) Estancias De Las Soleras
West	C-1 (General Office) vacant land
East	C-2 (General Commercial) - Nexus Medical Health Services
South	I-25 (Historic Rout 66)

Figure 7 Adjoining Uses

C. La Rambla Trail Easement

In addition to general plan amendments and rezoning requests, the application includes the realignment of Rail Runner Loop. The realignment is required as a condition of the Las Solares Master Plan, and the Applicant is adhearing to the required realignment condition. The applicant also seeks approval to reduce the La Rambla that traverses across Los Solares Tracts 22 and 25,. Tracts 22 and 25 are also currently owned by the applicant and will be integrated into future development, but they are not part of the current application as they are already zoned C2. The Master Plan amendment proposes reducing the La Rambla, originally established in 2010 as 90 feet wide, to 45 feet to align with the Rambla Trail width set by a previous Las Soleras Master Plan Amendment approved in 2019. Additionally, the applicant proposes the flexibility to adjust the location of the larger Plaza open space area anywhere along the Rambla between Beckner Road and Rail Runner Loop Road (Reference Figure 7 *"La Rambla Trail Easement.").*

Figure 8 La Rambla Trail Easement

VI. PROPOSED INFRASTRUCTURE

The City Code requires that proposed infrastructure can accommodate the impacts of the proposed development. "[T]he existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development." SFCC 1987, § 14-3.5(C)(1)(e). The Development Review Team ("DRT") concluded that City resources and infrastructure can accommodate the proposed request. *See* Attachment a, "DRT Comments".

VII. EARLY NEIGHBORHOOD NOTIFICATION MEETING

The Applicant conducted a virtual Early Neighborhood Notification Meeting (ENN) via Zoom on November 14, 2023. No members of the public attended the ENN. The Applicant complied with all notice and other procedural requirements as per City Code Section 14-3.1(F).

VIII. APPROVAL CRITERIA – MASTER PLAN

Section 14-3.9 Necessary Findings: (A) and (D):

Table 4 Master Plan

Criteria 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):

"The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals are supported:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the

Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response (Master Plan):

Staff agrees with the Applicant's response. The proposed Master Plan is consistent with several policy goals of the City of Santa Fe General Plan. Despite the elimination two zoned districts (Mixed Use and Business Industrial Park) originally envisioned in the Las Soleras Master Plan, the Master Plan still maintains the potential for a diverse range of uses as allowed within the C-2 District.

Staff finds that the Master Plan meets Criterion 1 (14-3.9(D)(1)(a).

Criteria 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):

"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan):

Staff agrees with the applicant's response. The amendment aligns with the predominant zoning patterns in the area, which primarily are uses (multifamily and nonresidential) allowed within a C-2 District. The variety of C-2 uses, ranging from residential to light industrial, adheres to the Las Soleras Master Plan's original intent to foster a mix of uses, despite the proposed elimination of both Mixed Use and Business Industrial Park Districts, while also responding to current market demands. The master plan continues to maintain a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan.

Staff finds that the Master Plan meets Criterion 2 (14-3.9(D)(1)(b).

Criteria 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Master Plan):

"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan):

Staff agrees with the applicant's response. The amendment to C-2 zoning provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such

as full-service dining and more. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth. Moreover, the rezoning of the property will facilitate future development that is expected to trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System, further enhancing the area's coordinated development. The Las Soleras Master Plan originally contained a Rail Runner Stop. However, the Rail Runner stop was canceled during Governor Martinez's Term in office. It is unclear if the Rail Runner Stop will occur at Las Soleras in the Future.

Staff finds that the Master Plan meets Criterion 3 (14-3.9(D)(1)(c)].

Criteria 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No)** **YES**

Applicant Response (Master Plan):
"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan):
Staff generally agrees with the applicant's response regarding the minimal impact of the proposed amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Traffic Analysis provided by the applicant, it has raised certain points for consideration regarding future phases of the project:
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended TIA.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for

future development:

1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not *"have any concerns at this time from a water engineering standpoint. The existing 12" main in Beckner should be able to accommodate the changes being proposed with no issues. For the future developments that come in under the general plan and master plan, the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project."*

The Wastewater Division has *"determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development."*

The Parks Division raised no concerns for the project.

Staff finds that the Master Plan meets Criterion 4 (14-3.9(D)(1)(d).

IX. General Plan

14-3.2 *"Amendments to the General Plan"* establishes approval criteria for amendments to the General Plan.

Table 5 General Plan Amendment Criteria

Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) YES**
Applicant's Response (General Plan Amendment): *"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*	

Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report further emphasizes the importance of diversifying Santa Fe's economic base to ensure

sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment):
Staff agrees with the Applicant's response. The proposed amendment for Las Soleras Tracts 19-26 aligns with Santa Fe's growth and economic development strategies. By citing strategic documents like the Angelou Report and the 2008 Economic Development Strategy, the response demonstrates that the amendment supports city policies on economic diversification and infrastructure development. The Applicant's use of demographic data underscores the amendment's relevance to current and future community needs, ensuring it contributes to Santa Fe's long-term prosperity and resilience.

Staff finds that the proposed amendment meets Criterion 1 [14-3.2(E)(1)(a)].

Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response (General Plan Amendment):
Staff agrees with the applicant's response. The applicant's request is to uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial. A Community Commercial classification aligns with the existing land use patterns nearby, where adjacent and nearby Tracts are already designated as Community Commercial. Eliminating the Transitional Mixed Use and Business Park designations for Tracts 19 and 20 resolves inconsistencies with the surrounding areas, streamlining the land use classifications and enhancing urban coherence.

As illustrated in this report (Figures 3 and 4) the Future Land Use Map, Tracts immediately adjacent to the east of Tracts 19 – 26 are already designated as Community Commercial. Additionally, Tracts 22 and 25 within the targeted area are currently classified as Community Commercial. Furthermore, there are areas designated Community and Regional Commercial only a short distance from the subject property to the west between I-25 and Beckner Road and to the north near the Presbyterian hospital.

The fact that Tracts 19 and 20 are currently designated as Transitional Mixed Use and Business Park, respectively, seems inconsistent with the predominantly Community Commercial and Office designations in the vicinity. This suggests that the proposed amendment to Community Commercial could harmonize the land use classifications in this part of the Las Soleras Master Plan area.

Moreover, the infrastructure in place serving Las Soleras—including roads, trails, and utilities has been designed to support the Master Plan as vacant Tracts are developed.

Staff finds that the proposed amendment meets Criterion 2 [14-3.2(E)(1)(b)].

Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **YES**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

Staff Response (General Plan Amendment):

Response to (i):

The applicant's response to item "(i)" of Criterion 3 focuses on reclassifying Tracts 19 and 20 from Transitional Mixed Use and Business Park to Community Commercial, matching the existing nearby uses of Community Commercial and Office. This standardizes land use according to the area's predominant commercial orientation. However, the response lacks specific details on how the changes for additional tracts (21, 23, 24, and 26) fit with their existing land use or if they conflict with the prevailing use and character of their surroundings.

The lack of detailed information on tracts 21, 23, 24, and 26 leaves a gap in determining full compliance with this criterion.

Response to (ii):
Staff agrees with the applicant response to item "(ii)." The Tracts involved in the amendment collectively exceed 2 acres.

Response to (iii):
Staff agrees with the applicant response to item "(iii)." The proposal to classify these Tracts as Community Commercial reflects the existing land use designations of adjacent areas and does not disproportionately benefit a single or small group of landowners at the expense of others. Instead, it is likely to provide broader economic benefits through job creation, enhanced tax revenues, and expanded service offerings, thus serving the general public interest.

Staff did not find sufficient detail within in the Applicant's response to address Criterion 3 [14-3.2(E)(1)(c)]. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the proposed amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public. Therefore, it is Staff's conclusion that the proposed amendment is consistent with Criterion 3.

Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (General Plan Amendment):
"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."

Staff Response (General Plan Amendment):
Staff agrees with the Applicant's response. The proposed amendment promotes general welfare by accelerating development in the Las Soleras area, which includes completing the Las Soleras Bridge over Arroyo de Los Chamisos. This infrastructure enhancement directly benefits the public.

Staff agrees with the Applicant's response. The proposed a General Plan Amendment that offers significant public advantages. Specifically, the Applicant highlights that the effective and accelerated development resulting from the amendment will facilitate the completion of critical infrastructure, notably the Las Soleras Bridge crossing Arroyo de Los Chamisos. This critical infrastructure is as a benefit to the general welfare, indicating that the amendment provides substantial public advantages beyond mere compliance, thereby satisfying the conditions set forth in Criterion 4.

Staff finds that the proposed amendment meets Criterion 4 [14-3.2(E)(1)(d)].

Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans;	**Not Applicable**
Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.

In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."

Staff Response (General Plan Amendment): Staff agrees with the applicant's response. The applicant's proposal for a uniform Community Commercial land use designation across Tracts 19-26, combined with the uses allowed under C-2 Zoning, aligns well with the adjacent land uses. This alignment promotes a more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4.

The application outlines several key benefits that contribute to the overall welfare of the community. These include the expansion of the Las Soleras trails system and the construction of the Las Soleras Bridge, which are anticipated to improve local infrastructure and connectivity significantly. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.

Staff finds that the Criterion 6[14-3.2(E)(1)(f)] is met.

Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."

Staff Response (General Plan Amendment):
Staff agrees with the applicant's response. The applicant has referenced multiple policies that support the proposed change, which is in line with the criteria for a General Plan amendment. This proposed change does not conflict with any existing city ordinances or regulations. The applicant asserts that the development from this amendment will conform to the City of Santa Fe's land use policies and adhere to the conditions outlined in the Las Soleras Master Plan.

The applicant's response aligns with the discussions under Criteria 1, 2, 4, and 6. These criteria collectively highlight that the amendment fosters a harmonious development strategy, promotes general welfare, and corresponds with adjacent land uses and broader city policies, ensuring there are no conflicts with existing

regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
Criterion 8 [14-3.2(E)(2) Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a)the growth and economic projections contained within the general plan are erroneous or have changed;(b)no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or(c)conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Criterion Met: (Yes/No)** **Not Applicable**
The Applicant is not required to document compliance with Criterion 2, since the application does not amend land use policies.	

X. ZONING APPROVAL CRITERIA

Section 14-3.5(A) and (C) SFCC 2001 sets forth approval criteria for rezoning as follows:

(1) The Planning Commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

Table 6 Rezoning from R-3 to C-2

Criteria 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning): ***Response to Criterion (1)(a)(i):*** *"Not applicable"* ***Response to Criterion (1)(a)(ii):*** *"As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -* *26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development –*	

most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."

Response to criterion (1)(a)(iii):

"As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.

Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and

Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.

Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and

Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.

Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and

Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response (Rezoning):

(i) The applicant addressed the first criteria "(i)" as "Not Applicable." Staff analysis found that there was no mistake in the original zoning.

(ii) Staff partially agrees with the Applicant's response. The Applicant, along with the information provided in this report, effectively demonstrates a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. However, the response does not provide a detailed justification for the zoning changes across all the mentioned tracts (19-26). This lack of comprehensive detail results in an incomplete response to the criteria.

(iii) Staff agrees with the Applicant's response regarding the rezoning of Tracts 19-26 to a uniform Community Commercial C-2 district, which is in line with Santa Fe's growth and economic development plans. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.

Staff finds that the Criterion 1 [14-3.5(C)(1)(a)] is met.

Criteria 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response (Rezoning): Staff Agrees with the applicant. The application provides all components to address the criteria for a rezoning request. Criterion 2 [14-3.5(C)(1)(b)] is met.

Criteria 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning):
Staff agrees with the Applicant's response that the rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 aligns with the City of Santa Fe's General Plan and economic development goals. The proposal matches city policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the future land use map.

Staff finds that Criterion 3 [14-3.5(C)(1)(c)] is met.

Criteria 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff agrees with the Applicant's response, the land proposed for rezoning is greater than 2 acres.

Staff finds that Criterion 4 [14-3.5(C)(1)(d)] is met.

Criteria 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Rezoning):
Staff agrees with the Applicant's response that the existing infrastructure is claimed to be adequate for the proposed development. However, this assertion is primarily based on comments from the Traffic Division, Fire Prevention, Water and Sewer Divisions and Parks Division. It is important to note that the "Conceptual Test Fit" land plan, while included, cannot be used to establish compliance with the criteria since it is not an actionable item on the agenda. Additionally, Development Review Team (DRT) evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development.

Staff finds that Criterion 5 [14-3.5(C)(1)(e)] is met.

Criteria 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Rezoning):
Response to 14-3.5(C)(2)(a):
"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Response to 14-3.5(C)(2)(b):
"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

Response to 14-3.5(C)(2)(c):
"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (Rezoning):

Response to 14-3.5(C)(2)(a):

The Applicant's response mainly focuses on Tracts 19 and 20, discussing their current zoning and the proposal to change them to Community Commercial. Although the response mentions that the broader area predominantly features Community Commercial and Office zones, it does not provide detailed information on the land use classifications for each of the other tracts from 19 to 26. Thus, the response does not comprehensively address all the tracts involved in the rezoning proposal.

Response to 14-3.5(C)(2)(b):

Staff agrees with the applicant response to item "(b)." The Tracts involved in the amendment collectively exceed 2 acres.

Response to 14-3.5(C)(2)(c):

Staff agrees with the Applicant's response. The C-2 Zoning for Tracts 19-26 is consistent with the existing land use patterns in adjacent areas within the Las Soleras Master Plan. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, it is anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

XI. CONCLUSION:

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on March 9, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

The Land Use Department together with the DRT have analyzed the project. The Applicant has addressed all criteria necessary to submit an amendment for review to the Las Soleras Master Plan, Amendment to the General Plan Future Land Use Map and a rezoning for Las Soleras Tracts 19, 21, 23, 24, and 26. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

Dept/Div: Public Works Department – Traffic Engineering

Case No.: Las Soleras GP, Rezoning & Master Plan, Parcels 19 – 26

Case Planner: Dan Esquibel, Planner and Case Manager

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response:**
1. N/A	N/A	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response:**
1. As described and listed in the attached email from Wilson & Co. dated 3/7/24	Prior to Filing Master Plan	
2.		
3.		
4.		

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. The original approved Master Plan note 46A states: "… Beckner Road shall be constructed as a four lane major arterial consistent with Chapter 14 of the City Code unless otherwise approved by the City of Santa Fe Public Works Department (consistent with approved or amended TIA).
2. Note that the updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road as described as a condition of approval in the original Master Plan.

Explanation of Conditions or Corrections (if needed):

Las Soleras Tracts 19 through 26 Traffic Study for Zone Change REVISED

From Gallegos, Phil <Philip.Gallegos@wilsonco.com>

To engineer@leroypacheco.com<Engineer@leroypacheco.com>

CC Audra Gallegos (audra.gallegos@wilsonco.com)<Audra.Gallegos@wilsonco.com>

Date Thursday, March 7th, 2024 at 11:52 AM

Leroy, I have reviewed the Las Soleras Tracts 19 through 26 Traffic Study for Zone Change and have the following comments.

It should be noted and updated in the Executive Summary and Report that the proposed zone change indicates that a four lane facility on Beckner is required between Las Soleras to east of Rail Runner Road with a dual lane roundabout at Beckner and Rail Runner. Beckner should be expanded to a 4-lane facility from Cerrillos Road to East of Rail Runner Road with a dual lane roundabout at Beckner and Wellness Way as well for system continuity. As development in the area progresses Beckner may in the future be required to expand to a 4-lane facility from Cerrillos Road to Richards Ave. with dual lane roundabouts.

In general, I concur with the findings and recommendations in the report with the following comments. The markups can be viewed on the link below. Please let me know if you have any questions or need more information. Thanks, Phil

On page 12, 16 and 19 indicate page number for the 9 other proposed development projects

On page 28 the intersection of Beckner and Las Soleras should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 30 the intersection of Beckner and Rail Runner should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 32 the intersection Number 9 Walking Rain Road should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 35 intersection number 10 Beckner and Calle de Alegria is referenced as roundabout but on page 34 is referenced as an unsignalized intersection right in/right out.

On page 36 Beckner road/Calle de Alegria is reference instead of Governor Miles/Rail Runner

DRT Member: Geronimo Griego, Fire Marshal

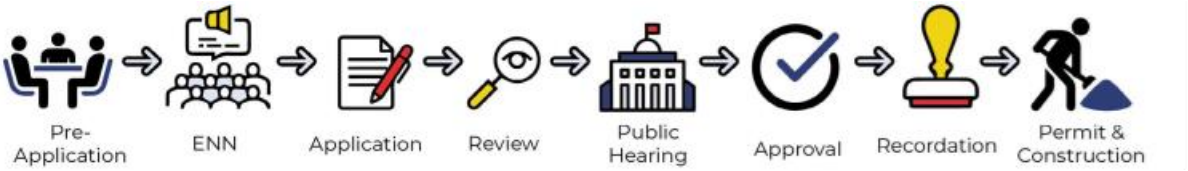
Dept/Div: Fire Prevention Divisions

Case No.: 2024-7898, 7900, 7899 Las Soleras GP, Rezoning & Master Plan, Parcels 19 – 26

Case Planner: Daniel Esquibel

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of Construction* – these conditions/technical corrections can be addressed during the construction and inspection processes.

Form Updated: March 2024

Development Review Process Flow Chart

*See the *2024 Development Review Schedule* for details

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. code provisions or other requirements below.		
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1.		
2.		
3.		
4.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. A comprehensive assessment of the fire service's capacity and requirements should be conducted for all substantial new masterplan developments.

2. Prior to the commencement of any construction, the water division and fire department must provide the approval of all infrastructure hydrants and waterlines.

3. Prior to the arrival of any combustible materials, a suitable all-weather access road capable of accommodating a 75,000-pound fire apparatus shall be provided

Explanation of Conditions or Corrections (if needed):

Subject: Case 2024-7898, 7899, 7900 - Las Soleras General Plan Amendment, Master Plan Amendment, and Rezoning

Dan,

For the subject cases, we don't have any concerns at this time from a water engineering standpoint. The existing 12" main in Beckner should be able to accommodate the changes being proposed with no issues. For the future developments that come in under the general plan and master plan, the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project.

Let me know if you have any questions.

Thanks,
Taylor

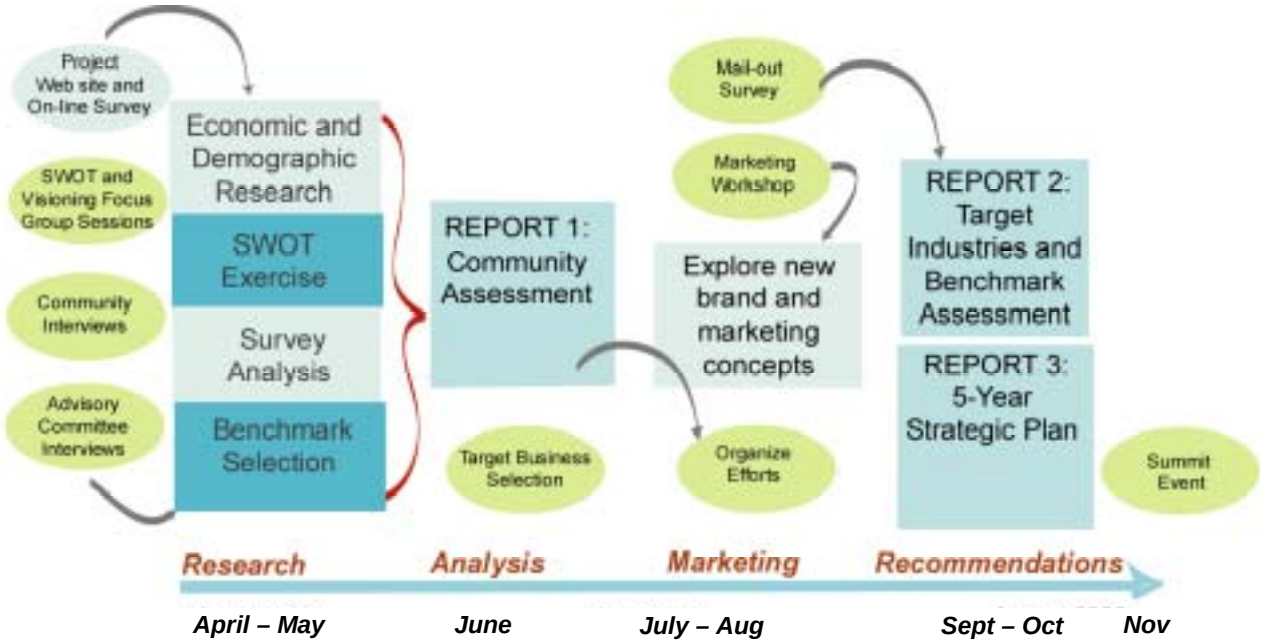
Introduction

This report contains a roadmap for Santa Fe's future economic development efforts. It reflects a planning process that has spanned the past seven months, involved hundreds of hours of research, and collected input from approximately 1,500 people in Santa Fe.



The strategic planning process began with an analysis of Santa Fe's current economic situation. This analysis, contained in *Report One: Community Assessment*, examines the strengths and challenges that Santa Fe faces in five areas that impact the city's effectiveness in economic development: business climate, infrastructure, workforce and education, quality of life, and economic development efforts. For each topic, several issues were examined and Santa Fe's performance was ranked. This report was the first step toward identifying the city's future opportunities and major areas for improvement.

Based on the results of the *Community Assessment* and input received from the community, AngelouEconomics (AE) identified seven major business sectors on which Santa Fe should focus its economic development efforts. These industries are: **Arts and Culture; Design; Hospitality; Water Conservation and Clean Energy Technologies; Software Development; Publishing and New Media; and Outdoor Gear and Apparel**. These industries should become the primary audience for future marketing efforts, and their needs should be considered in all community development activities. A description of the methodology used to identify these targets, a profile of each targeted business sector, and descriptions of the economic development efforts of several benchmark communities are provided in the second report of this project*, the Target Industry Report*. Secondary Target Industries were also identified, and included Health Services (both traditional and non-traditional), Retiree Services and Food and Beverage products.

This is the final report of the strategic planning process. It contains specific recommendations to (1) improve the city's economic health; (2) improve conditions for cultivating new target sector businesses, small entrepreneurial businesses; and (3) provide new opportunities for all Santa Fe families.

An illustration of the strategic planning process is provided on the following page.

Strategic Planning Process

Acknowledgements

The project team conducted interviews and focus groups with more than 200 individuals and organizations from the Santa Fe region, including those listed below. Their input shaped this strategy, and their future support will be critical to the implementation of the City's economic development initiative and achievement of long-term economic health.

In addition to the individuals listed above, the consulting team received **survey responses from 1,352 individuals and businesses located in the city**. The survey was a valuable tool used to measure impressions of the city's strengths and challenges and learn more about what residents believe makes Santa Fe special. We offer our gratitude to each individual who took the time to fill out the survey. Your comments helped mold the recommendations we offer in this report.

AngelouEconomics' core team for this project included Angelos Angelou, Amy Holloway, Chris Engle, Nicole Urbis, and Daniel Kah.

Executive Summary

What does Economic Development mean for Santa Fe?

How economic development is defined differs among communities. For many years, cities' economic development activities were focused on recruiting new employers. Recently, the focus of economic development in many cities has shifted, placing a stronger emphasis on community development activities that improve local workforce, infrastructure, and business climate to help local companies grow and new ones to emerge. This latter definition is more appropriate for Santa Fe.

The term "economic cultivation" has been chosen to describe Santa Fe's economic development practices. **The city's focus should be more on creating a climate that is ripe for entrepreneurship and small business success than on recruiting large companies.** The ultimate goal of economic cultivation in Santa Fe is to achieve long-term economic health. A healthy economy benefits all residents and businesses in the region, from the business community to not-for-profit organizations to the arts and to the native populations.

Overview of the Economic Development Plan

During the past seven months, AE has worked closely with Santa Fe leaders to compose an economic development strategy for the region. The driving objective of this strategy is to generate sustainable economic health and prosperity for the citizens of Santa Fe and the surrounding region.

Based on extensive research, the consulting team has developed a series of recommendations to accomplish this objective. All recommendations offered in this report are both (1) sustainable (creating consistent long-term economic growth in a non-damaging way) and (2) strategic (tailored and coordinated for meeting the city's long-term objectives).

The *Economic Development Plan* should be viewed as a living document. The New Mexico Media Strategies Report and the University of New Mexico's Bureau of Business & Economic Research's report on the cultural industries, for example, will be used to develop specific work plans for those clusters when they become available. The *Economic Development Plan* offers guidelines and techniques designed to improve the city's economic health. It provides Santa Fe with a structure to incorporate other activities, particularly specific initiatives within each targeted business sector. Other recommendations might be added or current ones eliminated as economic conditions change.

Recommendations fall into five categories:

- **Workforce development and education**
- **Entrepreneurship**
- **Sites and infrastructure**
- **Community development**

- **Marketing**

Santa Fe suffers from an increasing gap between local wages and cost of living. The gap can be narrowed through a variety of techniques – from increasing the minimum wage to assisting residents to find and finance affordable housing. These activities have already begun in Santa Fe. The Living Wage Ordinance (Ordinances 2002-12 and 2003-8) demonstrates the City's commitment to improving the incomes and wage rates of Santa Fe's citizens.

Economic development provides another approach to making it easier for Santa Feans to afford to live and work in the region. A strong economic development initiative has been laid out in this strategy. It focuses on diversifying Santa Fe's employment base through new business recruitment, expanding local companies, and supporting entrepreneurship. It contains tools that the City, the Community Development Division, and a wide range of regional organizations can use to increase the range of job opportunities available to Santa Feans. With a greater diversity of employment options comes a greater opportunity for residents to improve and employ their unique talents, generating new wealth for every Santa Fe family.

Themes of Santa Fe's Economic Development Plan

During the course of this project, several important themes have emerged in our discussions with the community. First, Santa Fe is a unique city and any new development should reflect its creative character. Second, Santa Fe wants to attract a targeted audience of visitors and businesses to the community. Tourists, for example, must come to Santa Fe with the intention (and financial wherewithal) to shop in local galleries, eat in locally-owned restaurants, and stay overnight in downtown and locally-owned accommodations. Third, Santa Feans feel a strong connection to the region's heritage. Many people who participated in focus groups and interviews, for example, have a deep desire to preserve the downtown space so that it does not become overly congested and lose its historical presence.

These themes appear throughout the Economic Development Plan. Based on these themes, we offer four overarching recommendations:

1. To be successful in economic development, Santa Fe's leaders should strive to foster a culture that creates jobs that complement the community's unique character.
2. Santa Fe cannot avoid change. The City should aggressively direct how those changes occur.
3. The key to economic development in Santa Fe is to ensure that new developments – whether it is a new civic center, new infrastructure project, or new educational program – retain the essence of the community. The essence of Santa Fe lies in its creative people, its strong history, and its core of arts and culture.
4. For the City to support a project, the project must provide new opportunities to Santa Fe's workforce.

Summary of Recommendations

To be successful, Santa Fe must develop highly integrated networks of businesses, training programs, capital providers, educational institutions, non-profit organizations, labor organizations, and government agencies. Economic development cannot be successful unless these groups work in a coordinated, collaborative fashion.

It is important that City officials adopt a more focused approach to economic development. It starts with City leaders identifying and agreeing to long-term goals. All future City decisions should be checked against these aforementioned overarching goals. Only initiatives that work toward accomplishing the City's long-term goals should be adopted. To jump-start the City's goal-setting activities, we have proposed specific goals for workforce development and education, entrepreneurship, sites and infrastructure, community development, and marketing.

A summary of recommendations is provided below. We have provided detailed action items for each recommendation within the body of the strategy.

I. Workforce Development and Education

Goal One: The community will place an increased value on education, realizing that education performance increases the quality of life for all Santa Fe residents and makes the community better able to retain a talented workforce. Pre-K - 12 education will be as strong as possible because the community invests in it. (p.15)

Strategies:

1. Help parents place a greater value on education.
2. Promote the value of quality education within the community. Turn Pre-K - 12 education into a "cause" around which the community can rally.

Goal Two: Educational and workforce development programs will be well-coordinated and in tune with the needs of the city's targeted business sectors. (p.19)

Strategies:

1. Develop an inventory of all workforce training programs in Santa Fe that prepare individuals for skills demanded by the city's targeted business sectors.
2. Closely link local Workforce Development One-Stop Centers with economic development efforts.
3. Enhance Santa Fe Community College's existing programs and start new programs aimed at the needs of Santa Fe's targeted business sectors.
4. Ensure the College of Santa Fe, the Institute of American Indian Arts, St. John's College, the University of Phoenix and branches of

Highlands University and UNM are kept up-to-date and involved in economic development.

II. Entrepreneurship

GOAL: Infrastructure, capital, and educational resources for entrepreneurs will be well networked both at the local and state level. (p.24)

Strategies:

1. Financially support the Santa Fe Business Incubator. Help the Incubator expand by offering more customized business resources. Help start-up companies by linking them to local and state financial capital.
2. Make information and training about starting businesses widely available. Celebrate entrepreneurial success stories as inspiration to potential entrepreneurs.
3. Motivate Santa Feans to start new companies.
4. Keep Santa Fe's existing small businesses strong.

III. Sites and Infrastructure

GOAL: Improvements to sites and infrastructure will consider the long-term needs of Santa Fe's targeted business sectors and small, entrepreneurial businesses. (p.32)

Strategies:

1. Take steps to make Santa Fe the water conservation and clean energy capital of the U.S.
2. Provide better infrastructure and processes to support creative activities.
3. Partner with Santa Fe County to solve infrastructure and site issues.
4. Approve and construct a new convention center that showcases the unique character of Santa Fe.

IV. Community Development

GOAL: Santa Fe's community and economic development activities support an environment that is favorable to (1) talented residents, (2) small, locally-owned businesses, and (3) targeted business sectors. (p.39)

Strategies:

1. Adopt a more business friendly attitude within City government.
2. Santa Fe's City Council should set goals for future development and allow those goals to drive decisions.
3. Provide greater support to the Community Development Division, and, particularly the Economic Development section.

4. Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.
5. Ensure that Santa Fe contains an atmosphere that is fun and attractive to young, creative people.

V. Marketing and Public Relations

GOAL: Santa Fe will engage in a targeted marketing campaign that builds local and national awareness of the city as a place to do business. (p.46)

Strategies:

1. Establish specific marketing roles for each organization currently involved in economic development.
2. Create and adopt a single economic development brand.
3. Better understand the target audiences.
4. Gain local media support.
5. Launch internal marketing.
6. Implement external campaigns.

Within these strategies, many individual action items are offered. Among these, we would like to point out five activities that are of particular significance:

1. **Construct a new civic center to replace the Sweeney Center.** The new civic center will support all of Santa Fe's target industries. The civic center should be designed to host executive level events, attracting those events that will bring the greatest benefit to Santa Fe's economy. In addition, the City should consider integrating high-end workforce training capacity within the civic center. The workforce training resources, from classrooms to high-tech audio/visual equipment, should be made available to local workforce service activities as well as to executive training events.
2. **Create a National Center for Art and Design Center and an arts incubator.** The National Center for Arts and Design will provide a single location in which multiple arts and design organizations could collaborate on projects of national significance. The one-of-a-kind concept would be modeled after national research consortia or laboratories, only with arts, rather than science, as its focus. As its first major project, the Center should consider developing a first-rate on-line Santa Fe Arts Market for selling locally produced artistic and handmade objects.

   This Center should be home to a variety of related activities, with educational programs at the core. Other activities that should be co-located within the facility include: office space for professional arts organizations and guilds; studios; exhibit space; retail shop for selling art. In the future, the campus could also contain loft apartments, a café, and an entrepreneurial resources center.

3. **Lobby the State to pass proposed legislation to create a certification program and network of small-business incubators.** The currently

proposed incubator certification program will possibly increase State funding to the Santa Fe Business Incubator. Lobby State legislators to pass this legislation. Long-term, Santa Fe leaders should work with the State to create a network of entrepreneurship one-stop shops, similar to the system utilized by the New Mexico Department of Labor. This would probably be more of a network of collaborating agencies and programs rather than an additional set of facilities. Santa Fe's leaders should work with the State to create a statewide network of small business incubators. The network of certified incubators could serve as a funnel of investment opportunities for the New Mexico Venture Capital Fund and as a built-in system of due diligence for State investment.

4. **Santa Fe should become the water conservation and clean energy capital of the U.S.** Water conservation technology companies locating in Santa Fe will be in a market with high internal demand for their products and will, therefore, be in close proximity to their customers. Santa Fe should create programs that promote the adoption of energy conservation while promoting a "buy local" campaign that would attract new clean energy providers to Santa Fe. Credits and incentives for consumers can be tied to their purchase from local suppliers. Santa Fe is an ideal pilot market for several technologies and should do what it can to bring those suppliers to the region.

5. **Santa Fe's leaders should agree to goals that will promote the long-term health of the local economy**. The community is widely known as a place that is unfriendly and difficult for business. This distinction makes it difficult for Santa Fe to remedy its suffering economic conditions. The City must take several initial steps before any economic recovery can occur. First, City leaders must agree that all decisions will be driven by one simple goal: To attain healthy economic conditions that will preserve Santa Fe's unique character and open opportunities for all Santa Fe families.

   Within City government, several actions will help the city create an easier environment in which to expand and start businesses. First, the City should strengthen and expand the Small Business Ombudsman position. Second, the City should provide strong support to the Community Development Division and Economic Development section. Economic development cannot occur unless this division is stable and well funded. Finally, the City should support a strong internal and external marketing effort. Marketing activities will require financial and human power resources from the City as well as other Santa Fe organizations.

The activities outlined in this strategy will require five years to complete, and the results of these activities may not be immediately apparent. Santa Fe's leaders must stay committed to the overarching goal of creating a healthy economy.

1. Workforce Development and Education

This project marks the beginning of a long-term economic development effort to improve the atmosphere in Santa Fe for growth of small to medium-sized businesses. Workforce development and education recommendations have been developed to help Santa Fe achieve the following three goals:

1. **The community will place an increased value on education, realizing that education performance increases the quality of life for Santa Fe residents and makes the community better able to retain a talented workforce.**

2. **Educational and workforce development programs will be well-coordinated, providing services that are in tune with the needs of the city's targeted business sectors.**

3. **Santa Fe's workforce development programs will offer advancement opportunities for individuals from all socioeconomic backgrounds.**

Santa Fe's workforce development programs should offer advancement opportunities for individuals from all socioeconomic backgrounds. Santa Fe's recommended targeted business sectors (see p. one)were selected, in part, because they contain a wide variety of occupations and ample opportunity for workers to advance their careers. (See the Target Industries Report for more detail on the target industries and how they were identified.)

Workforce development and economic development are closely linked. A strong workforce leads to business recruitment. A strong industry base generates a workforce that leads to entrepreneurship and long-term economic growth. Considering Santa Fe's current economic conditions, community leaders should make workforce development a top priority. A strong pool of workers is critical to business expansion and recruitment to the region, industrial diversification, and growing the population of young professionals.

For Santa Fe to experience the greatest possible benefit, education and workforce development activities must be viewed as an integrated continuum that spans from infant care to adult education. We encourage Santa Fe to communicate the workforce skill needs of the targeted business sectors to all educators. Show them how entrepreneurial skills, for example, will help students succeed once they graduate. Provide them with examples of other communities that have integrated entrepreneurship education into the early education curriculum.

Businesses in the targeted business sectors that have been recommended by AE demand that the best possible Pre-K - 12 education system, workforce training, and college programs are in place to prepare the workforce to succeed in targeted industry businesses. This ensures that they will be able to retain and recruit skilled workers, managers and executives who demand that their children

receive an excellent education. It also shows them that the community is willing to invest in itself, its future, and therefore will support them into the future. Goal One: The community will place an increased value on education, realizing that education performance increases the quality of life for all Santa Fe residents and makes the community better able to retain a talented workforce. Pre-K - 12 education will be as strong as possible because the community invests in it.

Basic education should be considered the foundation of successful economic development. Those regions across the U.S. that have invested in basic education are also the most successful in growing high tech, high wage employers. The two go hand-in-hand.

Before an aggressive economic development campaign is launched, it is essential that Santa Fe invest in the core of the community: local Pre-K - 12 education, the downtown, and infrastructure developed to support new economy businesses. This investment will have much greater pay off in the long term by helping the city retain its current employers and high skilled workers, as well as renew a positive spirit across the community.

Strategy One: Help parents place greater value on public education.

Actions

1. Get parents involved in the schools

- Adopt a take-home computer program. In this program, schools lend computers to parents for 4-6 weeks at a time. To be eligible for the program, parents are required to take an orientation workshop that teaches them the basics of operating a computer, common software packages, and how to use the Internet.
- Use local school facilities for evening community college or university classes. Courses could be for-credit or continuing education, ranging from computer literacy, self esteem, English as a second language, or literacy. Teachers or other parents can teach classes. Invite a local non-profit to fund a babysitter to be on-site for the duration of the class period.
- Start a cultural orientation program to help parents, teachers, and students understand and appreciate the culture of their peers.
- Use art exhibits and performances by students to attract parents to the schools and enhance cultural understanding.

2. Provide parents the tools to support learning at home

- Offer workshops, hands-on training, and home visits that train parents how to teach kids at home. Parents can make educational materials such as flash cards and board games at the workshops that they take home and use with their children. Alamo Navajo Community School provides excellent examples of effective programs:
    - Parents and Teachers as Partners Program – regularly scheduled meal shared by teachers and parents including a workshop on language/math skills development, reading, cooking with children, etc.

- Parent-Teacher meetings and open houses are scheduled at the same time as other community events (e.g. sports events) to attract more parents
- Bilingual home school liaisons make about 25 home visits per month to personalize school communications

Strategy Two: Promote the value of quality education within the community. Turn Pre-K - 12 education into a "cause" around which the community can rally.

Action:

1. ***Launch an internal marketing campaign to inform parents (and students) about the value of Pre-K - 12 education.***
   - Each school should adopt a program aimed at keeping parents informed about school events. Consider the following examples that have worked for other communities:
     - Weekly take-home folders that include a parent participation sheet, information on upcoming events, recent curriculum activities, and graded tests. Parents sign and students return to school. One single format could be developed for the Santa Fe School District- with easy ways for each school to customize it. Ideally, take home information would be available in both English and Spanish.
     - Ask for parent volunteers to serve on a phone chain to call other parents with updates about school events, get feedback, and answer questions.
   - Create a series of public service announcements aimed at instilling the value of public education in Santa Fe residents.
     - Work with school district to assign an internal marketing task force that meets for six months to one year. The task force will be responsible for organizing and overseeing the communication campaign. Task force members should include: representatives from the local school district, the parent-teacher organizations, education-related non-profit organizations, Santa Fe Community College, and other workforce service providers.
     - The internal marketing task force should seek a local advertising or public relations agency that will provide services pro bono or for a reduced rate.
     - Funding for the communications campaign could come from grants from local, state, or national education-related non-profit organizations and foundations.
     - Announcements should be based around a central theme, but available in various media forms, including radio spots, newspaper advertisements, posters and fliers, or television spots. Both English and Spanish language announcements are necessary.
     - Possible themes include: (1) the importance of staying in school; (2) opportunities for high school graduates other than attending a four-year university; (3) how students can help their families even more in the long term by continuing education or training after high school; (4) post-high school work, training, and education opportunities located in Santa Fe to retain young people; (5) the

benefits of investing in Santa Fe's schools to residents who do not have children in the school system.

- Start a school-by-school campaign to show middle school and high school students the range of alternatives to attending a four-year university.
    - Ask representatives from Santa Fe Community College, apprenticeship programs, SER Jobs for Progress and non-profit organizations to present their programs / non-university alternatives during classes or at after-school events
    - Ask representatives from Santa Fe Community College, apprenticeship programs, SER Jobs for Progress, and non-profit organizations to compile a short, easily understandable brochure on the programs they offer to high schoolers and recent graduates. Provide this brochure to all high school and junior high school guidance councilors. Place in locations where students congregate: libraries, after-school hangouts, shopping malls.
    - Over time, develop a Web site containing resources for non-university bound youth. The Web site should contain information about non-college options, links with training organizations, apprenticeship programs, and the community college. It could also contain job postings.
- Launch an Annual Education Day, a one-day outreach and educational event at which parents, teachers, non-profits, and community leaders share information about local schools, programs, services, and successes. The event could provide training to parents about how to continue the educational process at home.

Possible Funding Sources for Pre-K - 12 Education Improvements

- G&T Dropout Demonstration, Indian Health Services, Title IX
- Parent-Teacher Organization fundraising http://www.ptotoday.com/fundraising.html
- US Department of Health and Human Services GrantNet http://www.hhs.gov/grantsnet/
- State of New Mexico Department of Education http://164.64.166.11/fedpro/programs/index.html
- Edna McConnell Clark Foundation (http://www.emcf.org/)
- This site contains links to several good drop-out prevention programs: http://www.dropoutprevention.org/resource/grant/funding.htm
- The Foundation Center is a good overall Web site for researching grant funding available in the U.S. for a wide variety of causes. Their education page is at http://fdncenter.org/research/grants_class/taxb.html

Other resources:

- This site contains a listing of and links to a variety of non-college options for high school students: http://www.nohum.k12.ca.us/ahs/career/non_col.html

Goal Two: Educational and workforce development programs will be well coordinated and in tune with the needs of the city's targeted business sectors.

The recommended targeted business sectors will determine more than Santa Fe's audience for its marketing efforts. Rather, the needs of targeted business sectors should drive the infrastructure that Santa Fe develops, the business climate that it fosters, and the workforce development and educational programs that it supports. Economic development efforts will be most successful if all aspects of community development are in tune with targeted business sectors' needs and are well coordinated.

To target workforce development programs and educational programs, it is important to first understand the skill sets that are required by Santa Fe's targeted business sectors. The *Target Industry Report* provided a list of each targeted business sector's predominant occupations. The end of the workforce development recommendations section of this report (page 24) contains a table summarizes the workforce needs of Santa Fe's target industries and illustrates how they overlap with one another.

In the following section, we offer recommendations for programs at Santa Fe Community College that would help the College, and the community, better train people for targeted business-appropriate occupations. These programs also provide opportunities for Santa Fe residents of all skill levels to improve their education and become better qualified for the city's targeted business sectors.

Strategy One: Develop an inventory of all workforce training and college programs in Santa Fe that prepare individuals for skills demanded by the city's targeted business sectors.

During public input sessions, one predominant issue that emerged was the difficulty in finding information on workforce development and educational options. Individually, while the community college, College of Santa Fe, the Institute of American Indian Arts, St. John's College, University of Phoenix, one-stop center, and not-for-profits offer good information about their own programs: no single source of information is currently available.

To involve all Santa Feans in workforce development and education, this single source of information should be available in both print and on-line formats, and available in both English and Spanish.

Actions:

1. ***Develop the inventory and make available in print and on-line formats.***
    - The inventory should contain a listing of programs. Within each program, include information on eligibility requirements, cost, time required to complete the program, and possible career tracks for individuals completing the program.
    - The on-line inventory should allow users to sort based on all criteria: by eligibility requirements, by time to complete and cost, and by potential career tracks.

- Ensure that the inventory's Web site address is simple and memorable. (The inventory could also be made available on SFEDI's Web site. http://www.sfedi.org/workforce, for example.)
- Distribute the inventory and Web site address to a wide range of organizations in Santa Fe, including: One-Stop Centers; local high schools; Santa Fe Community College; the City of Santa Fe; local libraries; faith-based organizations, and; non-profit organizations.

2. ***Begin a series of informational sessions on workforce training options in Santa Fe neighborhoods and community organizations.***
   - Community outreach may be a more effective way to provide workforce service information to Santa Fe residents. Plan a series of informational sessions at local schools, faith-based organizations, and recreation centers.
   - Ask attendees to fill out a brief survey to determine their educational and employment background.
   - Bring one-stop shop employees to the event to provide one-to-one counseling on career opportunities.
   - Follow up with attendees after the session to provide them with additional information. Review survey responses to estimate what services may be more appropriate for each individual, and use this profile to determine the most appropriate course of action.

Strategy Two: Closely connect local Workforce Development One-Stop Centers with economic development efforts.

Actions:

1. ***Train One-Stop Center employees on the occupational and skill needs of Santa Fe's targeted business sectors.***

2. ***One-Stop Center career councilors should direct clients to programs at Santa Fe Community College and other workforce service providers that train workers for targeted business sectors' skills.***
   - Core skill requirements for all targeted business sectors fall into several broad categories, including computer training, design skills, creative skills, small business management, and hospitality.
   - One-Stop Centers should utilize the inventory of targeted skills programs as a tool to assist their clients.

3. ***Widely promote One-Stop Center services across Santa Fe. Local residents may not be aware that those services are available.***
   - Links to the One-Stop Center and future inventory of targeted businesses' training program Web sites should be widely available on all major community Web sites; including, for example, the City, County, Chamber of Commerce, SFEDI, Santa Fe Community College, public schools, and non-profit organizations.
   - Include the One-Stop Center (http://www.dol.state.nm.us/wdc15.htm) and/or targeted businesses' training programs Web site in the (earlier recommended) public service announcements. Consider simplifying the

Web site address to Santa Fe's One-Stop Centers. (www.santafejobs.com, www.worksantafe.com, or www.traintowork.com)

Strategy Three: Enhance Santa Fe Community College (SFCC)'s existing programs and start new programs aimed at the needs of Santa Fe's targeted business sectors.

Actions

1. Target SFCC programs around the design industry.

- The SFCC's campus plan calls for building a performing arts facility on campus. The facility should include a multi-purpose auditorium for theater and musical productions, exhibit, and studio space. Invite the community to utilize the center for Santa Fe film and music festivals, and offer free shuttles to auditorium from downtown during those events.
- Develop a core "design curriculum" that serves all design-related majors.
  - Currently, programs in interior design, introductory architecture, studio arts, and fine woodworking, for example, share similar skill sets.
  - The core design curriculum starts all design-related majors with the same coursework. Electives are used to refine the individual's skills into specific design fields as they progress through the program.
  - The core curriculum helps students engage with other creative individuals and provides them with a set of design skills that are transferable between industries.
  - Illustrate the new economic development marketing theme at the new performing facility by incorporating the theme "Creative Spirit of Santa Fe" into its design.
- Adopt a new curriculum / professional development courses to train film crews and pre- and post- production workers.
  - Identify what infrastructure is needed to support Santa Fe's burgeoning film industry.
  - Meet with Garson Studios and other local film support businesses and ask them what services / training they would like to see emerge at SFCC.
  - The curriculum should be coordinated with advanced film support courses offered at the College of Santa Fe.
  - Explore the potential for SFCC to host a pre- and post-production house. The center would provide on-the-job training for students and would be a valuable resource to professional film crews coming to the Santa Fe area. Between the SFCC, the College of Santa Fe and private business, a full range of pre- and post-production facilities should be available in Santa Fe.

2. Create innovative programs for the hospitality industry.

- Connect SFCC's hotel and restaurant management and culinary arts programs to growing needs in the film industry. Set catering and limousine services, for example, could be provided to film crews through the community college, providing students with good on-the-job training experience and would meet a demand.
- SFCC could develop a small hotel and restaurant next to the campus.

- Room rates and meal prices would be offered at a discount.
- The hotel and restaurant would employ students, providing training ground for hotel and restaurant management and culinary arts students. It could also offer guests alternative health care and spa services, which could be provided by individuals just entering the field.
- The design of the hotel should integrate water and energy conservation technologies and allow students to contribute to its design.
- Clients of other workforce training providers, such as SER Jobs for Progress, could also work at the SFCC hotel "incubator."
- If a SFCC hotel "incubator" is not feasible, develop an intensive internship program with local hotels, restaurants and caterers.

4. ***Develop curricula that help Santa Fe become a water and energy conservation role model for other cities.***
   - Create a water conservation curriculum.
     - The curriculum would combine water policy studies, a knowledge of water conservation techniques, and tools for students to design their own water conservation methods / technologies.
     - SFCC could reserve space on or off campus for a light manufacturing center or laboratory in which students could develop their own water conservation products.
     - Connect the program to the SBDC so that students with good business ideas can receive entrepreneurial support.
   - Adopt an alternative fuels curriculum.
   - Professors and students of the program should offer free community workshops that instruct homeowners, business owners, and Pre-K - 12 students about simple methods of conserving water and energy. This EPA Web site provides a good starting point for established curricula: http://www.epa.gov/teachers/curriculumconservation.htm
   - Encourage local real estate developers and businesses to engage students of the program in design of future developments. As part of the curriculum, require one class in which students form teams and are assigned to local businesses and developers to develop an innovative water or energy conservation technique for their facility.
   - Examine top conservation curricula at other US community colleges as models for the SFCC program. This link contains a ranking of the top 50 conservation and natural resource programs at communities and universities across the U.S. http://www.ccweek.com/top100/pdf/2001/topassoc-9900-cons&rnr.pdf
     - Tailor Santa Fe's program to the needs of water conservation and alternative fuels.

5. ***Enhance software and information technology classes to meet the needs of Santa Fe's targeted business sectors.***
   - Survey or organize a forum of Santa Fe bioinformatics and other information technology companies. Ask these businesses to describe the types of workers that they need. Ask them to participate in designing an ideal curriculum for an Associate's Degree and continuing education programs.

- Entice individuals with high tech skills to serve as part-time instructors. The Community College has a difficult time offering the high salaries demanded by individuals with high-tech skills and computer science knowledge, yet Santa Fe has a large population of these individuals. Rather than seeking full-time professors, ask young professionals and new retirees to teach one class per semester.
- Build computer training programs that teach desktop publishing, commercial design, film and sound editing, graphic design, and animation. These courses can be offered as part of a formal Associate's Degree curriculum and continuing education. These skills will be in demand by Santa Fe's targets, particularly in the arts and culture, design / film, and publishing and new media fields.

Strategy Four: Ensure that the four-year and graduate colleges and universities in the region, e.g. the College of Santa Fe, the Institute of American Indian Arts, St. John's College, the University of Phoenix and branches of Highlands University and UNM, are kept up-to-date and involved in economic development.

Actions

1. Inform the four-year and graduate colleges of the workforce needs of each targeted business sector.

- Identify degree programs within each College that fit with target business requirements.
- Include a description of these degree programs within future economic development marketing efforts

2. ***Work with the four-year and graduate colleges to retain graduates in Santa Fe.***

- Each semester, meet with students within those degree programs to inform them of the opportunities within Santa Fe for graduates of their programs. Ask local target sector business executives to speak to the students.
- Ensure the College's career placement centers are fully aware of job opportunities within Santa Fe.
- One to two times each year, speak at a faculty meeting at all three colleges. Inform professors of economic development activities. Give them information about Santa Fe that increases the attractiveness of the community to 18-25 year olds.

3. ***Invite representatives from the four-year and graduate colleges to participate in prospect visits.***

- When economic development prospects come to Santa Fe, invite College representatives to meet with the prospect or organize a brief tour of the Colleges' campuses.

4. ***Invite representatives from the four-year and graduate colleges to participate on economic development-related committees and task forces.***

Occupational Comparison of Santa Fe's Target Industries

Major Occupations	General Work Skills	Technical	Industry: Art and Culture	Design	Hospitality	Conservation Technologies	Software Development	Publishing and New Media	Outdoor Gear and Equipment

2. Entrepreneurship

GOAL: Infrastructure, capital, and educational resources for entrepreneurs will be well networked both at the local and state level.

A critical aspect of building sustainable economic competitiveness is linking economic performance to social cohesion. The stimulation of entrepreneurship through the formation and development of new commercial businesses and social enterprises can play a key role in creating a diversity of new jobs and bridging the gap between income levels and cost of living. The entrepreneur in the community is a primary contributor and mobilizer of resources to develop the economy, a provider of employment for others, and a stabilizing factor in the society.

Improvements to the entrepreneurial climate, both in Santa Fe and the state of New Mexico, will benefit not only potential business owners, but also the small businesses that are already in operation. An entrepreneurial climate is well suited for Santa Fe's creative, independent-minded population.

AE recommends that entrepreneurship drive all future economic development activities for the following reasons:

- Entrepreneurial activities are a productive outlet for energies of enterprising and enthusiastic people.
- Small businesses create jobs at relatively low capital cost and low environmental impact, especially in the fast-growing service sector.
- Small businesses develop a pool of skilled and semi-skilled workers who are the base for industrial expansion.
- Small businesses are a source of innovation in products, services and techniques.
- Entrepreneurs can contribute new ideas to economic development initiatives.
- Small businesses serve a social function by creating career opportunities and upward social mobility, and by preserving, in many instances, a set of values.
- Provide information at One-Stop Centers related to entrepreneurship as a career option – linking One-Stop Centers to local SBDC, providing "guide to starting a business in Santa Fe" at one-stop center.
- An entrepreneurial approach to economic development also benefits larger businesses that will be attracted to Santa Fe's unique character.

Small businesses are currently the crux of the Santa Fe economy, and local leaders should support them. The following section offers recommendations for boosting entrepreneurship and small business growth in Santa Fe.

Strategy One: Financially support Santa Fe's business incubator. Help the incubator expand by offering more customized business resources. Help start-up companies by linking them into local and state financial capital.

Actions:

1. ***Expand the Santa Fe Business Incubator to provide business resources appropriate to the targeted business sectors.***

   The most successful business incubators are those that provide more than just reduced rent office space and furniture for tenants. Like the current Santa Fe Business Incubator, they combine office space with knowledge – such as an SBDC office or other mentoring organizations - and are closely connected with local community colleges and universities. They provide first-rate telecommunications infrastructure, conference facilities, business services, and shared laboratory or manufacturing space. A good incubator will become a gathering place for the community for after hours networking events.

   The Santa Fe Business Incubator should also expand its connection to professional business services firms. For example, the incubator could assign volunteer task forces of service providers (e.g. comprised of one accountant, one attorney, and one marketing/advertising firm) to mentor companies during their time at the incubator. This benefits the companies as well as the volunteers, who can view their work with the incubator as business development. Marketing assistance, in particular, should be offered to incubator companies. Assistance should come from local advertising or marketing agencies that offer their services at a pro-bono or reduced rate, or by teams of students from SFCC or the College of Santa Fe.

2. ***Lobby State legislators to pass the current proposed legislation (embedded within the SBDC bill) to certify incubators and to match funding from the State to local incubators.***
   - The successful Santa Fe Business Incubator could serve as a model around which other incubators in New Mexico could be developed.
   - Incubators should be used as a place that sets standards for small business development.
   - The network of certified incubators could serve as a funnel of investment opportunities for the New Mexico Venture Capital Fund as well as serving as a built-in system of due diligence for State investment.

3. ***Work with the State, UNM, the Santa Fe Business Incubator, SFCC-SBDC and SCORE to set up an entrepreneurship one-stop shop center similar to workforce development centers.***
   - A one-stop shop entrepreneurship center would offer the same coaching and information services such as an SBDC combined with the business incubator services of the Santa Fe Business Incubator.
   - The one-stop shop should be established in a central location to provide the greatest access to all Santa Fe residents.

4. ***Establish a Small Business Enterprise Director within the Community Development Division.***
   - This individual should be responsible for: overseeing the entrepreneurship center; working with the SBDC and Incubator in keeping the community informed about how to start a company in Santa Fe; promoting Santa Fe as a good location for entrepreneurship; working with SFIBCA on creating a strong "buy local" campaign; developing and maintaining a searchable on-line inventory of all entrepreneurship resources in the region; and helping entrepreneurs and local small businesses navigate City processes and regulations.

5. ***Establish an arts incubator at a central location in Santa Fe.***
   - The campus should be home to a variety of related activities, with educational programs at the core. Other activities that should be co-located within the facility include: office space for professional arts organizations and guilds; studios; exhibit space; retail shop for selling art. In the future, the campus could also contain loft apartments, a café, and an entrepreneurial resources center.

Strategy Two: Make information and training about starting businesses widely available. Celebrate entrepreneurial success stories as inspiration to potential entrepreneurs.

Actions:

1. ***Involve The Santa Fe New Mexican in covering success stories of local business startups.***
   - Potential entrepreneurs will find inspiration from other individuals who have successfully started businesses.
   - Celebrate the success of local small businesses by featuring them in local news publications. Propose a schedule of small businesses to feature each month to make it easier for The Santa Fe New Mexican.

2. ***Santa Fe's numerous non-profit organizations are entrepreneurial businesses. Provide these organizations with good information to help them increase their financial capacity.***
   - Numbering almost 500 in Santa Fe, non-profits make up an important part of employment and activity in the community.
   - Non-profit organizations should be viewed as entrepreneurial small businesses.
   - Provide information to non-profits to help them learn how to increase their financial capacity.
   - Fund a series of 501c3 training seminars that train managers of non-profits how to be better business people. There are numerous consulting companies that provide non-profit training, as well as on-line guides that provide non-profits with helpful business tools. Check out sites such as: www.onPhilanthropy.com; www.npguides.org; or www.charitiesusa.com which links non-profit to service providers across the U.S.

- Encourage participation in *NGO New Mexico*, New Mexico's central non-profit business association.
- Collaborate with NGO New Mexico to sponsor monthly networking and training events. The training events should be the main vehicle for distributing information about how to make a non-profit profitable.
- NGO New Mexico could create a Web site listing all non-profit organizations, sortable by their service, and containing links to and contact information for each organization's Web site. Examine sites such as www.GuideStar.org and www.envirolink.org as examples of structuring a database of non-profit organizations.

3. ***Develop a single Web site containing an inventory of Santa Fe's entrepreneurship resources. Make the Web site name simple and memorable. Market the Web site address across the community.***
   - The Web site could be developed and maintained by several organizations, such as the Santa Fe Incubator, SCORE, the SBDC, or the (possible future) entrepreneurship one-stop shop.
   - Possible Web site names: www.etools.com or www.santafestartup.com

Strategy Three: Motivate Santa Feans to start new companies.

Actions:

2. ***Streamline the City's permitting process for events, new construction, and new business expansions in Santa Fe.***
   - Focus groups, interviews, and surveys have revealed that many businesses and individuals have experienced difficulty from the City in getting permits for new ventures – from construction or expansion of new facilities to permits for small weekend festivals.
   - Santa Fe's permitting process needs to be thoroughly reviewed and compared against the requirements of targeted business sectors.
   - Santa Fe's City government should commit to easing and shortening the permitting process within one year.
   - The City of Santa Fe's Web site should contain a page dedicated to simply outlining the permitting process and providing downloadable versions of permitting applications.
   - The City of Santa Fe's web site should be reliable and offer current and accurate information.

3. ***Consider waiving permitting fees for small businesses locating in targeted areas of Santa Fe (fees are already waived for certain affordable housing projects).***
   - Small businesses are interested in saving money at every possible point.
   - Waiving permitting fees is not a cost, but foregone revenue for the City.
   - Waiving permitting fees for small businesses moving into key areas of the city, downtown for example, will help small businesses and make a statement that the City supports them.

4. Expand the City of Santa Fe's Small Business Loan program.

- The Small Business Loan program is an important tool for encouraging the growth of local businesses and companies targeted in this economic development plan.
- Leverage the program with additional state and federal funding.
- Restore the program to its original funding levels.
- Take steps to ensure that the entire community is aware of the program and has easy access to it.
- Provide information about the program in the (proposed) entrepreneur resource center.

4. Utilize the results of the New Mexico Media Strategy Report to develop a work plan for the digital and new media industry cluster.

- Look at cities that have fostered the film industry. Identify targeted infrastructure improvements, permitting processes, training programs and other incentives that are geared to the needs of the industry. Draft necessary ordinances to implement those inducements in Santa Fe.
- Austin Film Commission and North Carolina (Advantage West) are models.
- Model a one-stop shop permitting process for the film industry after other good examples, such as Rio Rancho, New Mexico (http://www.rioranchonm.org/film_industry/#One); Film in Florida (http://www.filminflorida.com/prl/perm.asp);

Strategy Four: Keep Santa Fe's existing small businesses strong.

Santa Fe's future economic health will largely be determined by the amount of local spending at local businesses. Every transaction involving a business outside of the area causes money to leak out of the local economy. While seemingly insignificant when considering a single purchase, the sum of these effects is huge across an economy the size of Santa Fe's. *For more information, see AE's Small Business Report, completed for the Santa Fe Independent and Community Alliance.*

A strong tourism economy and large base of unique cultural assets require that city leaders pay particular attention to the role that small businesses play. Eighty-five percent of all businesses in Santa Fe employ fewer than 20 workers. Of these small businesses, over 90 percent are locally-owned. According to the U.S. Small Business Association, 3,900 Santa Fe companies employ fewer than 20 people. This is almost five times the number of all other companies combined.

The last five years, however, have seen a downward shift in the percentage of independently-owned companies in Santa Fe. Almost all industries experienced a decline in independents' share of both employment and number of establishments. The largest percentage drop was in retail, where current levels of independence (approximately 50 percent of all retail firms) are well below that

of the nation (almost 90 percent) and has dropped 40 percent in the past five years. This industry, more than any other, directly affects households and quality-of-life indicators. The change threatens the local diversity found in Santa Fe shopping and endangers the unique character of the area.

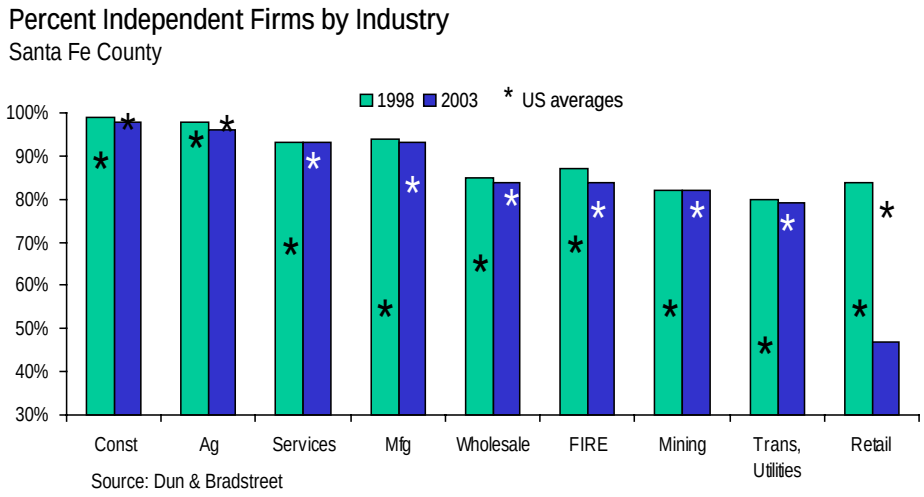
Actions:

1. ***Initiate a "buy local" campaign.***
    - Support the Santa Fe Independent Business and Community Alliance (SFIBCA).
    - Provide funding or other resources to the SFIBCA for launching a "buy local" campaign.
    - The campaign should educate local residents and businesses on the importance of buying from other local businesses.
    - Each campaign piece should contain a different factoid pointing out the economic and cultural benefit of purchasing products and services from independently-owned small businesses.
    - AE's *Santa Fe Small Business Report* provides data and survey results that support the notion of buying local (prepared for the SFIBCA in November 2003).
    - To kick off the campaign, prepare a press release highlighting the results of AE's Small Business Report. Distribute the press release to local newspapers, alternative magazines, radio stations, and television stations. Print a series of flyers and direct mail postcards highlighting the main points of the study. Ask local business owners and community organizations to post the flyers in their establishments and to mail out the postcards to their clients.

2. ***Make downtown and other Santa Fe business districts more accessible to patrons of small businesses.***
    - The City should make supporting the needs of small, locally owned business a goal against which future decisions are measured.
    - The best way to encourage residents to buy locally is to make access to independently-owned businesses convenient. Allow for mixed use developments where retail and small service businesses are intermingled among residences.
    - Make downtown more pedestrian- and cyclist-friendly. Repair sidewalks so that shoppers and business people have a safe place to walk. Create a network of bike paths and lanes. This will encourage more pedestrian traffic and reduce automobile traffic in downtown Santa Fe. It will improve access to small downtown businesses and encourage residents who may have been frustrated by limited downtown parking to start shopping in downtown again.
    - Improve parking in downtown. Struggles with parking often drive shoppers from downtown and towards big-box retail and malls. Offer free parking, enhance existing parking, and provide free shuttles around town. Encourage business practices that make parking less important, like home delivery of groceries and large bulky items.
    - During the weekdays, most household shopping occurs after work, between 7 and 10 p.m. Encourage downtown businesses to stay open until 9 p.m. If it is difficult for small businesses to stay open that late

every night of the week, ask shop owners to agree to the same one or two evenings a week in which they stay open later.

- Start a monthly downtown celebration. In Austin, for example, every first Thursday of the month, stores in one shopping district stay open until 10 p.m. The sidewalks are filled with local artists and merchant booths selling wares. Local bands provide live music in the street. First Thursday now attracts more than 10,000 people every month.
- Provide adequate security downtown to help nighttime shoppers feel comfortable.



3. Identify business, historical and cultural districts that are suitable for economic development initiatives.

- Recommendations for downtown can be applied to any business or cultural districts.
- Support neighborhood/business events such as the Second Street Experience and explore developing similar events in other districts.
- Initiate planning with two districts per year.
- Link "buy local" initiative to district planning.
- Develop programs that highlight the economic benefits of historic preservation and historic districts.

4. Establish metrics for tracking the success of the "buy local" initiative.

By determining a set of tangible goals, communities establish clear priorities and are able to assess the performance of their programs, allowing more efficient use of resources. Metrics could include the following:

- *Sales receipts of downtown merchants.* Sales of downtown shops and service providers should increase a minimum of 10 percent each year if the buy local initiative is successful.
- *Percentage of independent businesses in Santa Fe.* For most industries, Santa Fe exceeds the national average in the percent of independently-owned businesses (see below chart). Increasing the percentage of locally-owned retail establishments could become a goal for the city.

- *Percentage of major employers headquartered in Santa Fe.* This figure points to the importance of home-grown successes. These companies tend to be more philanthropic and provide greater

economic independence for the region. The information for this metric could be measured from annual reports of local business activity.

- *Duration of local businesses*. This factor could be measured by counting the number of businesses that were established three years ago and are still in business. This method explicitly measures the ability of local businesses to survive in Santa Fe's economy. Santa Fe will know that it is supporting local, small businesses when the number of businesses surviving longer than three years increases. The City's data on business licenses provides this information.
- *Percentage of companies adding employees in the past year*. Expanding companies are as important to the economic health of a region as new companies. This metric can be easily obtained through government employment statistics and surveys.

Strategy Three: Sites and Infrastructure

GOAL: Improvements to sites and infrastructure will consider the long-term needs of Santa Fe's targeted business sectors and small, entrepreneurial businesses.

When companies are asked to rank the factors that most affect which state or region they select to locate in, workforce and education considerations are the most important, followed by access to customers and suppliers and business climate. The only infrastructure that is often mentioned in a regional context is transportation.

When choosing a specific development location within a state or region, however, the availability of infrastructure grows in importance. As infrastructure is available in almost every city, business prospects will compare a region or city's infrastructure (availability and pricing.)

The reason for the apparent contradiction in the importance of regional infrastructure versus specific sites is that larger areas such as regions or states possess sufficient infrastructure somewhere, so it is not a major corporate consideration until after the general location is picked. Therefore, although not the top priority to get a company to choose a region, once they have chosen the Santa Fe region, it is imperative that adequate infrastructure - water, sewers, streets and mass transit – be available to support business growth and development and that this infrastructure fare competitively with that of another region.

Santa Fe's most significant infrastructure issue (and economic development issue) is the region's water shortage. All economic development activities must consider the area's severe water constraints. The Mayor has stated that "water" is his number one goal and the City is in the process of trying to secure funding for the Diversion Plan, which will address this concern. The purpose of the Diversion Plan is to redirect surface water from the Rio Grande river into Santa Fe. Though the Diversion Plan will provide some relief to the city, preserving water and the area's unique environmental characteristics will be a goal of the city for many years to come. In turn, the target businesses recommended for Santa Fe in the *Target Industry Report*, will be environmentally sound and will require minimal water.

Strategy One: Take steps to make Santa Fe the water conservation and clean energy capital of the U.S.

Actions:

1. Incorporate water conservation and clean energy technologies into the design of all current and future public buildings.

2. Begin an annual student competition for design of water conservation innovations.

- The winner could receive funding for further development of the innovation, an internship with a local building contractor, or an opportunity to implement it on a test site.

3. Promote Santa Fe to expanding and relocating water conservation technology companies.

- The long process of developing the Diversion Plan and tackling the water issue has created a network of local water conservation expertise.
- The desperate water situation provides a good environment in which companies can test new water conservation technologies and techniques.
- Water conservation technology companies locating in Santa Fe will be locating in a market with high internal demand for their products and will, therefore, be in close proximity to their customers.
- Develop a marketing package highlighting Santa Fe's dedication to water conservation, its assets, and incentives.
- Organize a delegation of Santa Fe and State representatives to visit 1-2 communities that have successfully supported water conservation and clean energy usage. Use these trips to learn and to promote Santa Fe to businesses.

4. ***Offer incentives for water conservation and clean energy use.***

- Communities around the U.S. are offering incentives to businesses and consumers to adopt clean energy practices. Many utilities already offer their customers rebates or credits for installing energy-efficient equipment for HVAC, lighting, insulation, and windows. In addition, utilities are starting to offer consumers the option to purchase electricity from Green Energy sources such as wind power, solar, and biomass.
- Santa Fe should create programs that promote the adoption of energy conservation while promoting a "buy local" campaign that would attract new clean energy providers to Santa Fe. Credits and incentives for consumers can be tied to their purchase from local suppliers. Santa Fe is an ideal pilot market for several technologies and should do what it can to bring those suppliers to the region.
- Work with State officials to create a package of statewide incentives for clean energy and water conservation companies.
- Good examples include:
    - Austin, Texas has openly announced its intention to grow the consumption of renewable power and also to promote the development and attraction of clean energy companies and providers. Already, the city-owned utility, Austin Energy, sells 500 million KW-hours to local businesses and consumers and has a goal of fulfilling 5 percent of its energy needs with clean power. In addition, Austin is discussing ways of tying conservation incentives to the use of locally-developed services or products. This connection is the real key to promoting the city's Environmental Technologies cluster.
    - The state of New York currently offers incentives to both the producers of clean energy and its consumers. By leveraging state funding for energy conservation projects, the state's agency NYSERDA has promoted local job creation. Funding for this program reaches about $16.5 million per year and funds

approximately 150 projects annually for businesses, municipalities, institutions, and universities. Since 1991, NYSERDA's R&D program has stimulated new product sales of $200 million for New York companies, created 1,174 permanent jobs, developed 141 new products, processes, or services for commercial use, and leveraged nearly $2 of funding from outside sources for every dollar invested by NYSERDA.

- In August 2001, NYSERDA announced the creation of the Saratoga Energy Technology Park, specifically devoted to promoting the development of new, clean energy technologies. NYSERDA, working jointly with the University at Albany and the Saratoga Economic Development Corporation (SEDC), hopes to attract between 1,000 and 1,500 jobs to the Capital Region when emerging, environmentally-friendly energy companies take advantage of the park's resources.

Strategy Two: Provide better infrastructure and processes to support creative activities.

Actions:

1. Create a National Center for Arts and Design in Santa Fe.

- The National Center for Arts and Design will provide a single location in which multiple arts and design organizations could collaborate on projects of national significance. The one-of-a-kind concept would be modeled after national research consortia or laboratories, only with arts, rather than science, as its focus.
- The center would include educational resources, high quality studio space, design-oriented companies and non-profit organizations, exhibit space, and retail.
- The (possible future) arts incubator should become a core component of the Center.
- Consider locating the Center at the Railyards or other central site.
- The Center would invite national and international experts to teach seminars or guide teams of designers and artists on projects.
  - The Center would provide an environment in which teams of designers or artists could form to, for example:
  - Bid on architectural design for major projects within the U.S.
  - Provide creative support to the film industry
  - Create new artistic works
  - Provide design services for New Mexico public sector projects
  - Design unique water and energy conservation techniques
  - Create a one-of-a-kind program to promote Santa Fe's arts, culture, and design products

2. Find ways to centralize internet-based information aimed at promoting arts and culture in Santa Fe.

- Currently, many Web sites – from the Chamber of Commerce to individual galleries – contain information about arts and cultural events in Santa Fe. This is confusing to residents and obscures Santa Fe's image to outsiders.

- Promote links to existing central sites such as santafe.org and nmculturenet.org that are running the statewide calendar of events powered by NM CultureNet.
- Develop one Web site portal for all Santa Fe arts and cultural amenities. Host a contest where local artists and Web design companies submit Web URLs. Promote this contest to the community. Make the Web site name simple and memorable.
- The Web site could contain the following: events calendar; map of galleries and museums; and a searchable database of Santa Fe galleries and arts retail shops by "product" and genre (links to the Web sites of all galleries and shops in the database would be provided).
- Eventually, the Web site could also include a virtual market in which local artists could sell their wares.

Strategy Three: Partner with Santa Fe County to solve infrastructure and site issues.

Actions:

1. ***Develop a joint City / County strategy focused on the Redevelopment District of the Metro Area Highway Corridor Plan.***
   - The Metro Area Highway Corridor Plan was adopted by both the City and County and designates an area to be redeveloped to accommodate economic development around the NM 599 / Airport Road intersection.

2. ***Develop a joint City / County economic development strategy focused on the Community College District to implement programs outlined in this report.***
   - The Santa Fe Community College District includes the Santa Fe Community College, housing, and non-residential development.
   - The District represents an important outlet for providing more affordable housing to Santa Feans.
   - The future development of the District will impact both the City and County.

3. ***Develop a shared City / County business park.***
   - Long-term, the City of Santa Fe will run out of developable land for larger business expansions. Most larger businesses will be locating in the County.
   - Jointly develop a business park with the County. The City and County will share the cost of infrastructure improvements and land acquisition. In turn, the City and County will share tax revenue that is generated from the site.

4. ***Jointly improve the Santa Fe Airport.***
   - The expansion of the Santa Fe Airport will make Santa Fe more accessible to tourists, allow residents easier transportation into and out of the region, and give local companies better travel options.
   - A 1-hour or less drive time from an airport is a common site selection requirement for small and large businesses alike. The Airport can

become a major marketing tool for attracting and retaining companies in both the City and the County.

- Upgrade the Airport to Part 139 standards as soon as possible. The Santa Fe City Council should approve the application for Park 139 certification.
- Both the City and County should provide funding for expanding the Airport fire station (shared with the national guard) and upgrading security along the perimeter of the property.

5. Develop wireless Internet infrastructure in core population centers in the City and in the County.

- Encourage local entrepreneurs to develop wireless infrastructure for downtown Santa Fe and countywide in core neighborhoods and future developments such as the community college district.
- The process of wiring Santa Fe with the latest telecommunications infrastructure is already underway. The Santa Fe Light Trail fiber optic network is expected to be completed in 2004. The Plaza renovation (planned to begin in the spring of 2004) will include the installation of a wireless network for the central downtown area of Santa Fe.

Strategy Four: Approve and construct a new civic center that represents the unique character of Santa Fe.

The Sweeney Center does not serve the needs of the community and does not convey the high-end image of the city. While the existing facility could be renovated, it is more appropriate that the current building is torn down and a new civic center is built in its place.

The Santa Fe City Council is considering a one percent increase to occupancy taxes and a bond to fund a new civic center. This decision will have an important, positive impact on the City for many years to come. A new civic center will support each Santa Fe targeted business sector while providing a valuable asset to local residents.

Consider the civic center a tool for economic development. It draws visitors into the community. If marketed to the appropriate events, it can attract executives from Santa Fe's targeted business sectors, allowing the City to market on its doorstep. Those individuals visiting the civic center will also spend money in Santa Fe – dining out, staying in hotels, and shopping. Indirectly, these activities inject more money into the local economy and gives a boost to job creation.

As a tool for economic development, and an entry to the city, the design of the new civic center can be used to convey a message. It should embody the city's artistic and cultural heritage, history, and connection to the natural environment. It should reflect the community's strong desire to target the type of higher-end tourist that visits the city. The facility should incorporate modern architectural elements and high-tech equipment into traditional Santa Fe style to help counteract a perception that Santa Fe is unwilling to progress. Finally, the facility should incorporate cutting-edge water and renewable energy technologies to show Santa Fe's dedication to conserving natural resources.

The civic center will benefit Santa Fe's workforce in several ways. First, it creates both direct and indirect jobs. In the beginning, designing, building, and completing the civic center will generate employment. Once construction is complete, entry-level positions will be established in event catering, room set-up, and facility maintenance. Middle- and upper-level positions will be created in audio-visual support, facility management, marketing, and event planning.

In addition to the job impact, the civic center can play another very important role for workforce development. It can provide much-needed, centrally-located space for local workforce training activities. Imagine: A civic center that is fully equipped with the latest in audio visual technology from the central, large auditorium space to smaller classrooms and conference rooms. Not only are these amenities highly attractive to executive level conferences and industry events, but they are also a much-needed resource for local workforce training providers and companies. The community college, the workforce development center, and non-profit workforce organizations could share the civic center for their programs, ensuring that Santa Fe's workforce is being trained in world-class facilities.

Action:
Revisit the proposed civic center design. Ensure that the design adheres to the following guidelines:

- The new civic center should be designed to appeal to smaller, executive-level conferences. A larger capacity facility will not necessarily lead to a larger indirect job benefit for Santa Fe. As the size of the event gets larger, a higher portion of attendees will either not be able to find hotel rooms in downtown Santa Fe or will not be able to afford them. These individuals will stay in hotels outside of the central district; eat at restaurants outside of the central district (often large chains); and, with so much commuting, have little time to shop at local stores while congesting Santa Fe's roads.
- The true benefit of the civic center is generated when visitors (both from outside events and Santa Fe functions) spend time and money in locally-owned shops, restaurants, and hotels. This injection of money drives business for local proprietors, who then spend their own revenue hiring additional staff, buying locally-made goods, or shopping for themselves. These funds continue to trickle throughout the economy, driving business, and creating new jobs. Smaller, more targeted events attended by executive-level individuals are much more likely to attract attendees who stay in downtown Santa Fe, bring their families, extend their stay, and spend their money with local merchants.
- A new civic center locating in downtown Santa Fe, targeting executive level conferences, and providing attendees technologically-sophisticated audio / visual equipment will allow the City to charge higher rates for use of the facility.
- Santa Fe prides itself on being the "city different;" therefore, the new civic center should radiate what is distinct about Santa Fe. To do so, consider incorporating the following elements into the design of the facility:
    - Arts and culture are the cornerstones of the building design.

- The center includes gallery and / or exhibit space for local artists.
- The center incorporates the latest water and energy conservation technologies.
- The center contains modern elements in combination with traditional Santa Fe style to communicate the City's deep roots yet willingness to progress to the future.
- The center contains high-tech workforce training spaces of various sizes to make the facility truly community-oriented. Consider a facility that, in addition to a large event room (500 person capacity), also contains one large auditorium-style classroom (e.g. 100-200 seats), two-three classrooms (e.g. 30-50 seats), two conference rooms (25-30 seats), and several small breakout rooms (5-10 people).

Strategy Four: Community Development

GOAL: Santa Fe's community and economic development activities support an environment that is favorable to (1) talented residents, (2) small, locally-owned businesses, and (3) targeted business sectors.

The Community Development recommendations offered in this section center on two major topics: improving Santa Fe's business climate and improving the city's quality-of-life amenities, particularly for young and creative individuals.

The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens.

A high quality of life is also directly connected to the region's ability to attract tourists. Through the choice of investments in quality-of-life amenities, the region will be able to target the specific type of tourist that visits. Tourists should be considered an economic development audience, and they are actual prospects coming directly to you. Ensure that they overlap with the audience you have for your economic development efforts.

One of the easiest ways for Santa Fe to become top of mind for businesses and entrepreneurs in its targeted business sectors is for those individuals to visit the region and enjoy the time they spend there. Therefore, tourist activities should portray a certain image of the city, one that is appealing to those executives and other decision makers. Make sure all tourist attractions showcase the "Creative Spirit of Santa Fe."

Strategy One: Adopt a more business-friendly attitude within City departments.

Santa Fe's unique character has sometimes been a hindrance to business activity. The city is well known externally for its tough ordinances and unfriendly business leadership, characteristics that will damage Santa Fe as it pursues economic development. Even small businesses and entrepreneurs (the city's primary target audience) will not move to a city where it is not welcoming or affordable to conduct business.

Actions:

1. ***Ensure the permitting process is consistent and efficient.***
    - During this planning process, numerous businesses criticized the city's permitting process for being too complicated, inconsistent, and time-consuming.
    - Consider expediting permits for standard requests. Applying for and receiving permits for, for example, small, after hours or weekend

downtown events should be made as easy as possible with standard application forms and a quick turn around process.

- Be specific and open about permitting requirements. Make this information readily available on City Web sites and in handouts available at City offices.
- Look at other cities' permitting processes for good examples of ways to make Santa Fe's more efficient and consistent.
- Burlington, Vermont's award winning "Doing Business in Burlington" publication offers new and expanding businesses a comprehensive and easy-to-use guide to permitting and city regulations. Sections from this guide are available on the following Web site: http://www.cedoburlington.org/business/doing_business_in_burlington/dbb.htm
- Look at the City of Surrey, located outside of Vancouver, Canada, for a good example of creating a step-by-step guide for local residents on starting their own businesses. http://www.city.surrey.bc.ca/Doing+Business/Business+Development/Starting+Your+Own+Business/default.htm
- Specifically look at other cities that are fostering the film industry – Los Angeles, New York, Toronto, Austin, for example. How have these cities structured their permitting processes to make it easy for and attractive to film production? Apply these best practices in Santa Fe.

5. ***Strengthen the Small Business Ombudsman Position within the City of Santa Fe offices.***
   - The focus of the current Small Business Ombudsman position should be expanded to serve all sizes of businesses.
   - The services of the Ombudsman should be expanded to visiting local businesses on a regular basis, listening to their concerns, and reporting back to City officials.
   - The Ombudsman should also be the single point of contact for a business having trouble navigating city regulations. He/she should walk businesses through the permitting process and help resolve conflicts between City departments and local businesses.
   - The benefits of expanding the role of the Ombudsman are numerous. First, strengthening this position makes a statement that the City is truly interested in supporting local businesses. Second, by regularly visiting with local businesses, the Ombudsman can communicate back to City leaders the current needs of local businesses, giving the City good information on which to base decisions. Finally, it provides a valuable resource to local businesses and helps navigate the permitting processes and acts as a voice for them to City leaders.

6. ***Provide periodic customer service training to City employees who regularly interact with local businesses and residents.***
   - Ask the Small Business Ombudsman to lead the customer service training sessions or hire a professional firm to conduct the training.
   - Training should include not only customer service training, but also an explanation of Santa Fe's new economic development brand and the role City employees play in economic development.

- A customer service guide containing quick tips on customer service should be developed and distributed among City staff.

7. Establish incentives that encourage local businesses to expand in Santa Fe.

- Consider waiving permit and impact fees for local companies that want to expand.
- Incentives should come from both the State and the City, particularly in helping with infrastructure improvements. When Dell was expanding in Tennessee, for example, the State paid 80 percent of the roadway improvement costs while the City of Nashville paid 20 percent.
- Promote incentives to local businesses. Ask the local utility company to help "spread the word" by referring local companies to a Web site with updates on incentives.

Strategy Two: Santa Fe's City Council should set broad goals for future development and allow those goals to drive decisions.

Actions:

1. Invite a moderator to lead a City Council retreat. The retreat should accomplish the following:

- Identify the positive assets of Santa Fe that cause each individual to feel passionate.
- Identify common threads among all council members. List Santa Fe's top assets.
- Agree that these common threads represent the essence of the community. Preserving the community's essence should be the principle that guides all future decisions.
- Set several overarching goals for the city.
- Agree to rules of etiquette among council members that are adhered to in and outside of council meetings.
- Conduct a city council study session prior to each meeting to allow councilors to state their positions on topics that are up for discussion during the upcoming meeting. City Council meetings should not be the first time that councilors hear each other's positions on topics being addressed.

2. The first retreat should occur after the spring 2004 election and occur at least every two years, following the election of new city councilors.

Strategy Three: Provide greater support to the Community Development Division and Economic Development Section.

Although only a few organizations in Santa Fe are directly charged with economic development, the community contains many more groups that impact the effectiveness of economic development programs. More than many other communities, Santa Fe is home to a rich diversity of not-for-profit, government, and business organizations, each perceived to have its own unique vision for the

future of the community. The city, and surrounding region, have become polarized into different "camps" of opinions. Each group seems to view itself as being fiercely independent from the others. This often results in a breakdown of internal communication, the very foundation of strong economic development campaigns.

Communication and cooperation in Santa Fe will improve if these various, and seemingly contradictory, opinion groups realize that they have a common bond: their success depends on Santa Fe's sustained economic health.

Santa Fe's ability to remain economically healthy is important to every organization and individual in the city and region. For example, while local businesses depend on a healthy economy to create a market for their products, non-profit organizations depend on a strong economy so that they can raise funds from local businesses and residents to keep their programs going. Second homeowners rely on a healthy economy so that their property values are retained and that the City can afford to maintain the quality-of-life attributes that originally attracted them to the region. Ethnic and Native American populations rely on a healthy economy that provides them with job opportunities, a market for their products, and ultimately provides them with income to continue living in Santa Fe. (A complete table of Santa Fe opinion groups and their reasons for supporting a healthy economy is provided in the appendix to this report.)

Improved economic health should be important to every Santa Fe resident and business. Santa Fe's elected officials should, therefore, ensure that their decisions lead to stronger economic conditions within the city and surrounding region.

A critical component of a healthy economy is ensuring that a strong economic development team serves the City. This team should be supported with financial and staffing resources that provide it the freedom to implement smart, aggressive community development and economic development activities. A strong economic development team will be required to implement many of the recommendations in this strategy. City leaders should view the economic development team as its task force for managing the day-to-day improvement of Santa Fe's economic conditions.

Actions:

1. ***Increase funding to Santa Fe's Community Development Division.***
    - Funding should be increased incrementally each year for the next five years. Draw additional funding from the Economic Development Fund.
    - Additional funding will be used to do the following:
        - Expand the Small Business Ombudsman position and responsibilities (described in the Entrepreneurship strategies).
        - Establish a Small Business Enterprise Director position that will be responsible for setting up and managing an entrepreneurship one-stop shop in coordination with the Santa Fe Business Incubator, the SBDC, and other small business support organizations.
        - Fund an entrepreneurship resource center. The purpose of the facility is to provide a centrally located office where all Santa

Feans can access a library of helpful information and talk with knowledgeable individuals about starting a business.
    - Increase the City's funding to the Santa Fe Business Incubator (for operations or facility expansions).
    - Provide funding for future incubators, such as an arts incubator.
- Commit funding for a minimum of five years. Longer-term budgets allow the department to conduct better planning and act progressively.

2. Set specific performance objectives for marketing subcontractors.

- Continue to set and monitor annual performance benchmarks for marketing contractors.
- Use the marketing recommendations in this report as a guide for establishing performance benchmarks.
- Agree to a three-year or longer contract with the marketing subcontractor. Include terms that allow the city to cancel the contract if the subcontractor repeatedly misses performance benchmarks. Otherwise, do not make the subcontractor re-apply for funding every year.

3. Clearly define and better coordinate the economic development roles of SFEDI, the Chamber, and the City's economic development team.

- The Chamber's primary role is that of an advocate organization for existing Santa Fe businesses.
- The Chamber should work closely with the (possible future) business liaison within the City's Community Development Division. The Chamber should introduce the liaison to its members and facilitate meetings between the liaison and local companies.
- SFEDI's role should be external and internal marketing. SFEDI should be responsible for polishing the brand identity and core marketing themes recommended in this strategy and incorporating the brand and themes into its Web site, collateral, and public relations activities.
- SFEDI and the Chamber are both responsible for handling visits by site selectors and potential business recruits. SFEDI should be responsible for managing the prospect's itinerary, while the Chamber should assist in setting up meetings between leading Santa Fe businesses and the prospect.
- Santa Fe's economic development team should be responsible for managing the marketing subcontractor contract, initiating community development activities that will support an overall economic development plan, and facilitating the information flow between City government and local businesses, prospects, and business organizations.

Strategy Four: Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.

Santa Fe's essence revolves around the core of arts and cultural activities occurring within the city. Arts and culture define the city's image and quality of life. Its unique character is founded in its tradition of arts and culture. It is what distinguishes Santa Fe around the world, and it is why creative, intelligent individuals are drawn to the city.

Arts and culture have long been the engine for much of Santa Fe's economic development. Although the "industry" of arts and culture is difficult to define, and even more difficult to quantify, it is undeniable that artistic and cultural activities have a tremendous impact on every aspect of Santa Fe, from its international image to its local products to its workforce skills. Arts and culture are the common threads that run throughout the entire region.

Because arts and culture have such a large impact on the local economy, it is critical that artists and artistic organizations are invited to participate in economic development activities. The City must consider the needs of the cultural sector when implementing this Plan. In addition, the City and cultural sector must work together to ensure that the results of the BBER study and the New Mexico New Media Industries Strategy project are incorporated into future activities to grow and promote arts and culture.

Actions:

1. ***Make arts and culture the cornerstone of the new civic center.***
   - Involve local artists in designing the facility.
   - Throughout the facility, integrate space for exhibiting work by local artists.
   - (Additional recommendations have been provided in the Infrastructure section of this strategy.)

2. ***Take steps to ensure Santa Fe's arts and culture will be sustained for generations to come. Ensure that the arts sector is accessible to young people.***
   - Endorse young professionals' arts organizations such as Avant Guard and Intermezzo. Make information on these organizations widely available. Promote these organizations to companies considering Santa Fe as a future business location.
   - Make Santa Fe open and accessible to all New Mexico students. Work with State leaders to initiate a new program in which all New Mexico high school seniors take a senior trip to Santa Fe. The trip would involve a visit to the capital and an introduction to Santa Fe's heritage, artistic and cultural amenities.

3. ***Make Santa Fe's artistic amenities accessible to all Santa Fe residents.***
   - Continue taking steps to make the traditional performing arts more open to the general population, for example, rock operas or free concerts.
   - Ask local businesses to invite local performing and visual artists to perform or display their work at business functions and other community events.

4. ***Increase occupancy tax revenue to support the arts.***
   - Santa Fe provides approximately $950,000 to arts programs annually.
   - Private foundations fund the bulk of arts and cultural activities in Santa Fe.
   - The city's support for the arts could be increased to support one of many activities, such as funding a future arts incubator or National Center for Art and Design or contributing to the cost of a unified national marketing

campaign to promote Santa Fe's arts and culture to collectors, artists, and cultural tourists.

Strategy Five: Ensure that Santa Fe maintains an atmosphere that is entertaining and attractive to young, creative people.

Actions:

1. ***Affordable housing is necessary for retaining young and creative individuals. Make it easy for people to purchase and upgrade their homes.***
   - Continue to offer inducements such as down payment assistance or tax abatements / decreases for individuals within a certain age or income bracket.
   - Consider establishing a fund similar to Austin, Texas' Mayor's Challenge Fund to help young people and people in need of affordable housing to get loans for home improvements and expansions.

2. ***Establish new festivals, expand existing festivals, and widely promote these events.***
   - Santa Fe is an ideal location for festivals, and numerous festivals already take place each year.
   - Festivals help create an entertaining atmosphere in Santa Fe. They provide entertainment for residents from all socioeconomic backgrounds. They also attract people from outside of the region and are, therefore, a good marketing tool for the city.
   - Standardize permitting process for event organizers. Be expedient in responding to their requests.
   - Waive the permit requirement to play music on the plaza.
   - Bolster the annual jazz festival and film festivals. These two events have potential to draw an international audience.
   - Support the new International Folk Art Market. Make it an annual event that compliments Indian Market and Spanish Market. This has the potential to grow to be another important event that extends the tourism season.

3. ***Start an annual winter sports competition for college students in Santa Fe and the surrounding region.***
   - Seven colleges are located in the Santa Fe area. Initially start the competition for students at these colleges.
   - Within five years, begin inviting college students from all New Mexico colleges.
   - Within ten years, begin promoting the competition nationwide.

5. Marketing and Public Relations

GOAL: Santa Fe will engage in a targeted marketing campaign to create local and national awareness of the city as a place to do business.

Santa Fe faces two marketing challenges. First, the City faces internal communications issues. Throughout this report, we have recommended ways to consolidate information sources about educational, workforce development, entrepreneurship, and economic development activities to make it easier for Santa Fe residents to access. In this section, we recommend techniques for spreading the word about why improved economic conditions benefit all Santa Feans.

Outside of the region, Santa Fe is faced with another issue. While Santa Fe is well-known throughout the world for its southwestern style and arts, little is known about Santa Fe as a business location. The external marketing recommendations in this section are designed to provide the city with a more business-friendly appearance to outside businesses and entrepreneurs. We have suggested a new brand theme under which Santa Fe can promote itself to business investors. The brand theme we recommend ties closely to the city's arts and cultural strengths and existing tourism promotions.

Santa Fe has many opinion groups that serve as a good starting point for addressing internal communication problems. As discussed throughout this report, before the city can launch an effective economic development campaign - whether its focus is local entrepreneurship, expanding current businesses, or recruiting new ones - all organizations related to economic development must commit to a single strategy for the community. Communities benefit from a well-orchestrated marketing strategy that is managed by one organization.

Once Santa Fe opinion groups improve communication and collaboration, the city will be ready to market within the community. Internal marketing informs citizens and business leaders of the economic development vision and trains individuals to promote the community with a single message, rather than numerous ones that may dilute or confuse the core message. Internal marketing builds local awareness and buy-in so that when Santa Fe markets outside of its region, it has a strong team in place to augment its message. The most effective communities not only have a well-integrated economic development organization leading the marketing efforts, but they also have hundreds of community ambassadors as part of the team.

The use of local media and personal meetings are good avenues for "building local awareness." **With strong internal support, the chances of successful external marketing increase considerably.**

Once Santa Fe succeeds in its internal marketing efforts, it should incorporate external marketing activities aimed at growing targeted businesses and entrepreneurial activity. External marketing, for most communities, should begin one to two years after internal efforts have begun. The trick is then to balance

both internal and external activities to get the most return – awareness and business.

External marketing is vital to diversifying an economy.

It can significantly improve a community's economic health by creating new, higher paying jobs and increasing the tax base. For communities today, it is important to have a Web site as primary collateral and to also have material to distribute at conferences and meetings. An integrated approach to external marketing that includes the right combination and frequency of word-of-mouth, publicity, and personal meetings is the key to successful marketing.

For the city and surrounding region to retain local businesses and cultivate prospects for economic growth, a more proactive targeted campaign is required.

Strong marketing activities will help accomplish the following economic development goals:

- Improve internal knowledge of the resources that are currently available in the city for residents seeking education and training, for expanding businesses, and for potential entrepreneurs.
- Improve external knowledge of Santa Fe as a top location for young, creative individuals and innovative businesses.
- Increase the number of businesses approaching SFEDI, the Chamber, or the City for information about expanding their business in Santa Fe.
- Cultivate target businesses, helping them create new jobs at all skill levels.
- Increase the amount of positive, national and international publicity that Santa Fe receives.

AE is providing a Marketing Guide (MG) that contains information to assist Santa Fe in implementing the economic development strategies over the next five years. It is meant to be used in conjunction with this report and specifically to support leaders who will execute the marketing campaigns.

Strategy One: Establish specific marketing roles for each organization currently involved in economic development.

The strong opinions, energy, and culture of activism in Santa Fe should become the foundation for unified change and new direction. All Santa Feans have a common goal for their city: **to retain the qualities that make it unique by creating a vibrant and healthy economy.**

Santa Fe is fortunate to have several organizations marketing the city. Santa Fe Economic Development Inc. (SFEDI), Santa Fe Chamber of Commerce, and Santa Fe Convention & Visitors Bureau have made tremendous strides in building a highly recognized tourism brand and in cultivating businesses. External marketing activities, however, should continue to be overseen by one

single organization. All other economic development entities should support this entity's marketing efforts and avoid launching other external efforts that could dilute the city's primary marketing message.

For Santa Fe to reach its desired goals, the city must adopt a marketing strategy and provide specific marketing tasks to the single economic development marketing organization (currently SFEDI). Additional funding of approximately $50,000 will be required to fully implement this marketing plan.

Actions

1. ***The City and SFEDI should adopt the marketing strategy.***
2. ***The City should commit to a minimum of a three-year contract for its marketing subcontractor (currently SFEDI). Provide SFEDI (or other future marketing contractors) with a set budget for as many years as possible under city law. This provides the organization with the ability to focus on marketing rather than continually concerning themselves with contract renewal.***
3. ***Provide the marketing contractor with specific marketing expectations and goals.***
4. ***Tie the marketing contract to the accomplishment of specific marketing objectives. (Recruiting X number of companies per year, for example, is not a realistic marketing objective. Organizing two to three annual marketing missions to other communities, on the other hand, is a realistic marketing objective. Tie objectives to action rather than quantitative results. Action will yield results.)***

Strategy Two: Create and adopt a single economic development brand

Communities that establish an economic development marketing theme that differentiates them have a greater chance of being recognized and trusted. Santa Fe is marketing to build awareness and clarify that it welcomes creative, entrepreneurial people and is a good place for starting new businesses.

Santa Fe should promote a single economic development brand that complements the recognized tourism brand, creates community-wide buy-in and ambassadors, and reaches targeted businesses through a mix of publicity, direct marketing, and collateral. Direct marketing includes one-to-one meetings, targeted electronic campaign messages, missions, and conferences.

To create an economic development theme, AE reviewed Santa Fe's current brands, unique strengths and characteristics, and analyzed target audience requirements. A marketing focus group was also conducted to gain public input. The proposed theme is meant for all organizations involved in economic development-including the City, SFEDI, Chamber and arts and cultural organizations- to use. A logo that communicates Santa Fe's marketing identity and tag line should be developed and incorporated into all print and on-line collateral materials. The marketing contractor should hire an advertising firm to develop professional logos and marketing collateral.

As the *Community Assessment Report,* the first report of this project, states, one of Santa Fe's biggest strengths is its internationally-recognized tourism brand. Several marketing themes and tag lines have been developed and utilized in marketing promotions in the past, including: "Away. To Santa Fe," "The City Different," and "Untamed." These themes, in conjunction with the State's brand, "Land of Enchantment," have very strong and positive connotations. Santa Fe is already known worldwide as being a "different" destination to visit, as well as a place for distinctive culture and arts.

Because awareness of Santa Fe is so high, and its perception is so deeply rooted, the city's business-oriented theme should complement the existing tourism-related themes.

A brand theme conveys "who," "where," and "what" the city offers. Local leaders describe Santa Fe as being "creative" and "spiritual," having a "rich culture," strong "history," and "distinct" personality. These core themes should be communicated through the economic development brand.

Arts and Culture are the cornerstones of Santa Fe's economy, and they also contribute to its exceptional environment. Santa Fe is an economic engine and attractor of creative people. With Arts and Culture, Design, Hospitality, and Software Development being recommended targeted business sectors, and "creativity" being a key descriptor of the city, we recommend that the new brand theme be the "**Creative Spirit of Santa Fe**."

When tourists think of Santa Fe, they think of a center of culture and world-class art within a beautiful and spiritual setting. It is truly a "different" place. When business leaders think of Santa Fe, they think of a city with outstanding quality of life amenities, a rich heritage, and a diverse workforce. Most business professionals live in Santa Fe because of the rare and special quality of life they enjoy.

Using the "Creative Spirit" theme in every marketing activity that promotes economic development for the City of Santa Fe, will promote the city's most differentiating characteristic and will appeal to the targeted audiences.

A positioning pyramid is a technique used to determine a community's brand theme. It answers three questions: What is the community's product? What are its unique benefits? What does the community represent? This simple tool lays the foundation for a community's marketing communication program. This diagram illustrates Santa Fe's positioning pyramid.

Secondary messaging tailors a statement for a specific audience and dictates audience-related benefits. For information about the site selection needs of Santa Fe's marketing audiences, refer to the *Target Industry Report,* the second report of this project.

Actions:

1. ***The City and SFEDI (or future marketing contractor) should discuss and approve the branding theme.***
2. ***The City should ask the future marketing contractor to hire an advertising or graphic design firm to develop a logo and style guide.***
3. ***The future marketing contractor) should distribute the style guide to the City and the Chamber. The style guide should also be made widely available to other community organizations, including schools, not-for-profit organizations, local media, businesses, workforce service providers, and arts and cultural organizations. Encourage as many organizations in Santa Fe as possible to adopt the style guidelines in their own external promotions. The more consistent that Santa Fe's look appears from the outside, the more effective the new business brand will be.***

Strategy Three: Gain a thorough understanding of the target audience

Understanding the internal and external target audiences' needs will help Santa Fe's economic development team in crafting effective secondary messaging. A secondary message occurs after initial inquiry (audience has received primary message), touts quality, and provides detailed information that the target audience desires.

It is important for Santa Fe to first understand the needs of internal audiences and inform them of the city's economic development vision. **Local employers, the current workforce, influencers, and entrepreneurs** are key assets for economic development, and recognizing these sectors as a target audience and understanding their needs is sometimes overlooked. The City, SFEDI, and the Chamber should continue to improve relationships with local businesses and provide additional services that can help them to become more successful. Local media and personal meetings are effective mediums for building awareness and demand for economic development services.

Once the City successfully addresses internal audiences' needs, it should become familiar with targeted business sectors. **The target business sectors include: arts and culture, hospitality and tourism, design, conservation technologies, software development, publishing and new media, and outdoor gear and apparel companies.** Identify target business champions, business leaders with expert knowledge of a particular industry. These individuals understand industry players, trends, challenges and opportunities, and they have powerful connections within an industry. They may also be willing

to meet with site selectors, volunteer to speak at events promoting the county, and share industry knowledge with economic development leaders.

SFEDI has already begun organizing regular meetings of executives from its target clusters. These meetings should continue and expand to include industries that are recommended in this study but are not currently target clusters for SFEDI. Santa Fe should have at least three industry champions for each target business. The *Marketing Guide* (a supplemental report included as part of this project) lists industry associations that can be a resource for target business trends and prospects.

Santa Fe can use the targeted messaging and main "proof points" contained in the MG when crafting secondary messaging for marketing communication.

Each target business will be interested in the following:

- Extremely high quality of life
- Ample supply of artistic, technical, and scientific workers
- Proximity to customers and manufactures
- Workforce development programs and incubators
- Close proximity (1 hour) to the Albuquerque International Airport

Art and Culture, **Design,** and **Hospitality** firms will be interested in the following:

- Embedded artistic community and strong local support for the arts
- World-famous art galleries, museums, Indian Market, Spanish Market and flea markets
- World famous performing arts organizations such as the Santa Fe Opera, the Santa Fe Chamber Music Festival and many other music, dance and theater companies
- Educational offerings in performing and visual artistic disciplines through the College of Santa Fe, the Santa Fe Art Institute, and Santa Fe Community College

Design, Software Development and Publishing companies will be interested in the following:

- Santa Fe's image as an artistic and cultural capital of the Southwest
- Santa Fe's large cluster of software development, film businesses, and publishing companies
- Renowned southwestern culture, architecture, and cuisine
- The successful Santa Fe Business Incubator
- Federal research facilities at Los Alamos, Sandia, and Kirtland AFB are pioneers in many of the world's most advanced software development fields
- The College of Santa Fe's Moving Image Arts Department provides students with access to full range of film production experience
- Santa Fe Institute is a pioneer in the burgeoning complexity systems field
- The National Center for Genome Resources is a leader in bioinformatics research

Conservation Technology companies will be interested in the following:

- Santa Fe makes conservation a top priority
- Santa Fe's strong local market for water conservation and clean energy products
- Santa Fe's high quality workforce and area research facilities

Hospitality businesses will be interested in the following:

- Santa Fe is known as one the top 10 cities in the world to visit, *Travel + Leisure*
- Santa Fe is investing in a new civic center
- Santa Fe has a dedicated bilingual workforce

Outdoor Gear and Apparel companies will be interested in the following:

- Santa Fe offers a creative, active, and artistic workforce
- Santa Fe's mild climate and countless outdoor recreational opportunities make it a strong market for product testing
- Proximity to manufactures and suppliers

Actions:

1. ***Based on the results of the Target Industry Report, the marketing contractor and its advertising partner should develop an audience profile for each target business. The audience profile will detail the specific marketing technique that will most effectively reach each audience.***
2. ***The marketing conatractor and its advertising partner should consider the audience profiles when developing a new logo and collateral and revamping the Web site. The images, messages, and copy contained in collateral must address the industry needs contained in the Target Industry Report and audience profiles.***
3. ***The marketing contractor, SFEDI should work with the City and the Chamber to identify target business "champions."***
4. ***Invite champions to share their industry knowledge and prospects and assist with economic development improvements.***
5. ***Champions may already exist. SFEDI's board members already serve as leaders for each SFEDI cluster industry. These individuals should be involved in the additional target businesses recommended in this strategy.***

Strategy Four: Gain local media support.

As mentioned throughout this project, the need to improve communication throughout the city is an immediate priority. Members of the Advisory Committee of the Cultivate Santa Fe initiative have committed to being media champions.

As the Cultivate Santa Fe project is finalized, Advisory Committee members should **kick off an internal press relations campaign**. Media champions should write and "tell stories" related to economic development to local newspapers, radio stations, company newsletters, and Web sites to inform citizens about Santa Fe's vision. It is imperative that local newspapers, radio,

and television stations provide coverage and speak positively about the city's efforts. This will first create excitement within Santa Fe and will then spread throughout New Mexico. Local media is the first avenue for creating local "buzz**."**

Santa Fe's internal press relations (PR) campaign should focus on stories that discuss what economic cultivation means to Santa Feans. Advisory Committee members are encouraged to contribute articles and editorials (and speaking engagements / interviews) on the following topics: "Growing from Within," "Stay in Santa Fe," "Value of Education," and "The Creative Spirit." Communicate the message that, "for Santa Fe, economic cultivation is focusing on activities that improve workforce services, economic health, and overall community cooperation to help local companies succeed and new job opportunities to emerge for all Santa Fe families."

Additional PR campaigns should discuss Santa Fe's vision, characteristics of target businesses, start-up successes, economic development marketing achievements, and community ambassadors. Over time, the City, SFEDI, and the Chamber should host appreciation and celebration events for small businesses that have made big impacts on the economy.

Economic development leaders should focus additional internal marketing efforts on communicating information about actions the City is taking to improve those issues survey respondents rated as "least satisfactory." Among these issues, the cost of living, housing, growth management, and business growth topics should be continuously discussed so that citizens are informed of progress that is being made in these areas. Supplementary campaign topics should include what Santa Fe is doing to preserve the city "different." Local college professors should be asked to write articles and editorials on new college programs that will provide training for target businesses, and leaders from arts and cultural organizations should be asked to write articles on the importance of culture to Santa Fe's economy. The MG provides more detail on PR campaign topics and contains a media list.

Actions:

1. ***Following the completion of this report, the City and SFEDI should reconvene the project Advisory Committee. Ask Committee members to volunteer to serve as "media champions." Assign each volunteer with a topic on which they should write an editorial or conduct a radio interview.***
2. ***Ideally, two volunteers will partner on writing the editorial or conducting the radio interview, with each volunteer coming from an "opposite" field. A local real estate developer could partner, for example, with a representative from an environmental conservation organization. By partnering with an opposite, the community will understand that regaining Santa Fe's economic health is an issue that transcends traditional rivalries.***
3. ***Local media champions should help garner local publicity by personally meeting with editorial boards of local news companies. Present the editorial boards with background information on the Cultivate Santa Fe plan and the subjects on which the volunteer teams will be writing.***

4. ***Encourage local media companies to dedicate a section of their paper or broadcast to one or more of the following topics: (1) news updates on Santa Fe economic development; (2) how to start a company in Santa Fe or what resources are available to entrepreneurs; (3) profile of each target business and current Santa Fe businesses in those industries.***

Strategy Five: Launch an internal marketing campaign.

With strong internal community support, the likelihood of successful external marketing increases considerably. **For Santa Fe, approximately 70 percent of efforts should be invested in internal activities**. The main goal of internal marketing is to inform citizens of economic development efforts and successes, to garner the community's support for the plan, and to act as promoters. It may take up to two years to see substantial impacts from internal marketing, and Santa Fe should continue this effort indefinitely. City leaders cannot expect overnight results.

Internal marketing began when AE started this project and has occurred each time AE has presented the Cultivate Santa Fe reports to Santa Fe audiences. The next major activity will be the project Roll Out Event in April 2004. During the event, AE and the Advisory Committee will unveil the new economic development vision, theme, and goals to the community. The roll out event should be used to communicate both the purpose and benefits of the new goals as well as the next steps in the process, and to request support.

Publicity, promotion, and collateral are the three vehicles recommended to reach Santa Fe's internal audiences. The goal is to build awareness within each target audience in a quick, cost-effective manner.

Publicity is one of the best vehicles to cost-effectively reach internal audiences and generate interest. To reach its target businesses, Santa Fe should strive to appear in publications and newspapers read by these industries. To reach local businesses, Santa Fe should focus on local and regional newspapers, newsletters, and business publications. To reach businesses outside of Santa Fe, concentrate on industry trade, general business, and lifestyle publications. **Within the next year, a professional public relations firm or new public relations position created within SFEDI should be hired to manage this initiative.**

Other ways to communicate to the public include: delivering newsletters, similar to what is currently done by the Santa Fe Chamber of Commerce; posting news in church bulletins, high school and college papers, regional business journals, on community Web sites and at local business establishments. For instance, SFEDI could create banners with the new logo and Web site address that local establishments can post so that their clientele is informed of the new message and is directed to a Web site to get more information.

A "media outreach" is another PR service SFEDI should consider. It provides economic development leaders with a target media list, press pitch content, and

a distribution list. An excellent PR activity that gains awareness is a bylined article**,** which incorporates both press stories and advertising into one activity. Lastly, since economic development leaders are in the public eye, it is wise to consider press communication skills training, which teaches individuals how to work with reporters to get the most from your marketing investment.

Being rated by *Travel + Leisure* in August 2003, as the Top 10th World's Best City, is an outstanding accomplishment. This is a strong start to generating awareness with many of Santa Fe's targeted audiences – both internal and external.

Promotion includes spreading information by word-of-mouth and through one-to-one meetings, attending regional industry events with local businesses, speaking at business networking events with key influencers, forming relationships with regional economic development teams to sell Santa Fe as a place to do business. It also includes calling prospects to provide information on Santa Fe's unique business climate, available business park space, and the benefits of operating or expanding a business in the city.

The primary **collateral** piece used to promote Santa Fe should be SFEDI's Web site. By revamping the Web site to contain the new marketing message, this can be a strong piece to reach both internal and external audiences. The current Web site offers relevant content for most of the defined target audiences. Santa Fe should ask local businesses to mention the Web site to employees via local business Intranets and in their corporate marketing material when appropriate. These efforts will help build awareness.

SFEDI should consider adding or updating the following components on its Web site:

- Economic and Industry Information
- How to Start a Business in Santa Fe
- Local Company Database
- Sites and Business Parks
- Economic Development Projects
- Job Postings
- News Wire
- Local Company Testimonials
- Quality of Life
- Incentives and Permitting
- Annual Report

The MG provides an explanation of each of these components and also includes examples.

Actions:

1. ***The City and the marketing contractor should review and approve the internal marketing recommendations offered in this report.***
2. ***Identify local volunteers to assist with implementation.***
3. ***Ask individuals from the community with a passion for economic development and Santa Fe's future to volunteer and join the marketing team.***

Please refer to the MG for more detailed recommendations on internal activities.

In 2004 and 2005, SFEDI should implement activities that increase local awareness and improve internal communication. Local campaign ideas are provided below:

1. **Publicity**
   a. Education – "Stay in Santa Fe," "Value of Education," "Take Home Computer Program," and "Make & Take High School Learning Tools Program." SFEDI should involve local Pre-K - 12 schools and SFCC in this internal communications campaign.
   b. Workforce Development – One-Stop Shop for workforce training and new workforce development program Web site
   c. Entrepreneurship – New Web site database of Santa Fe's entrepreneurial resources, business incubator expansion, and creation of a Santa Fe arts incubator
   d. Local business success stories – Feature a new company in each issue
   e. Local Businesses – "Buy Local" campaign
   f. Tourism – Address the issue of the importance of tourism to a healthy Santa Fe economy
   g. New Marketing Strategy and Message – Showcase the new brand theme, logo, and new collateral
   h. Press Relations - Conduct training on working with the media, negotiate for reduced rates and budget $30,000 a year to hire a PR firm.

2. **Collateral - Web sites**
   a. Revamp the marketing contractor's Web site to incorporate new marketing theme (logo) and targeted messaging (*cost of approximately $10,000*).
   b. Assist other economic development-related organizations in incorporating the new logo (and marketing style) into their own Web sites.
   c. Encourage other economic development-related organizations, hospitality businesses, and on-line arts and cultural resources to include a link to SFEDI on their Web sites.
   d. The City and marketing contractor, together with local economic development-related organizations, should develop new Web sites that are mentioned throughout this strategy. New Web sites would include:
      i. An Arts & Culture portal to link all local artists' Web sites and act as a central resource and listing of festivals and events
      ii. A Santa Fe specific workforce development resource portal
      iii. A Web site resource for entrepreneurs, containing all information necessary for starting a business in Santa Fe
      iv. A Santa Fe specific film promotion Web site, e.g. http://www.wncfilm.net/

v. A Santa Fe non-profit organization Web site, containing a searchable database of all non-profit organizations in Santa Fe

3. **Collateral – brochures**
    a. A user-friendly guide to workforce training and educational resources in the Santa Fe region to be made available at schools and public gathering places such as libraries, churches, or social organizations
    b. A simple guide containing entrepreneurial resources. Similar to the Web site, the guide would provide step-by-step instructions on starting a business in Santa Fe. (Examples were provided earlier in this Strategy.)
    c. A SFEDI annual report

    Estimated cost: $10,000

4. **Promotion - Speak at regional business association events**
    a. Project Advisory Committee and / or newly created Implementation Committee.
    b. Support such as the Santa Fe film festival, Russian Summer 2004 Exhibit, International Folk Arts Festival, and Annual Jazz Festival and other events throughout the year.

5. **Promotion – Host an annual Economic Development Forum.** During the event, regional leaders can provide an overview of the year's successful economic development activities and an update of economic data for the Santa Fe and the larger region surrounding the city. The project roll-out event (April 2004) can be the first annual Santa Fe Economic Development Forum.

6. **Promotion – Create a welcome package** for newcomers. Send to new residents when they sign up for utilities.

7. **Promotion - Speak at local business associations** and provide update on Santa Fe's economic development and marketing efforts.

8. **Promotion - Establish a high school group** to gain a better understanding of what factors are important to teens when considering working in Santa Fe in five years. Consider calling the group "Teens Talk."

Strategy Six: Implement external campaigns

External marketing promotes Santa Fe to identified targeted businesses that reside outside of Santa Fe, complement the current economy and help the city meet its economic development vision. External marketing should begin in year 2006.

Web sites, publicity, and targeted direct marketing and selling are the most cost-effective methods for communities to convey their messages. Santa Fe should balance these activities, be consistent in the message it conveys, and

focus on campaigns that will directly reach prospects. The primary vehicle, and one that should be used throughout external efforts, is publicity. Santa Fe should then begin to incorporate collateral (Web site and brochure), marketing missions, and industry associations and conferences.

Publicity

Publicity may be the most effective form of economic development promotion. Santa Fe could significantly increase the amount of publicity it receives in publications, and ultimately reach the city's target business companies by having a PR firm on retainer to develop and distribute releases and bylined articles.

Collateral (Web site and Brochures)

Resources should be invested to redevelop the primary Web site that promotes economic development in Santa Fe to more effectively link it with regional economic development Web sites. The main economic development organization's URL and phone number should be incorporated into every activity that promotes the city. See the MG for more Web site recommendations.

Marketing Missions

Santa Fe leaders need to engage in marketing missions to recruit target business companies from other regions and to see first hand benchmark communities' efforts. Santa Fe can learn from benchmark communities by visiting these cities. Schedule marketing missions each year to a region with a high concentration of its target businesses and visit benchmark cities to observe what is effective and what is not within these business communities. *For example, visit regional neighbor benchmark cities such as Boulder, CO and Albuquerque, NM. In the second year, consider visiting national benchmark communities such as Asheville, NC and Santa Cruz, CA. In the third year, visit a large benchmark site such as Savannah, GA.* Volunteer representatives from business, government, and academia should attend marketing missions, which can involve a series of meetings with local companies to sell Santa Fe as an ideal business location.

Industry Associations and Conferences

Industry associations, a trusted source of information for member companies, offer an opportunity to track trends and prospects. SFEDI should consider joining the leading associations of its target businesses, place articles in industry association newsletters and sponsor two industry conferences per year. Industry conferences provide a unique opportunity for Santa Fe representatives to promote business development, and face-to-face marketing is recommended to supplement other marketing efforts. Santa Fe can attend, sponsor, and exhibit at conferences.

Actions:

1. ***The City and the marketing contractor approve the external marketing component of this strategy.***
2. ***Identify Industry Champions, board members, and other volunteers to assist with implementation. Individuals from the community with a***

passion for economic development and Santa Fe's future can volunteer and become part of the marketing team

3. Volunteers can assist by attending marketing missions or industry events on behalf of Santa Fe, to respond to calls from media, to distribute collateral, and to promote the marketing contractor's Web site.

Santa Fe should consider implementing activities that increase awareness among external audiences.

1. **Publicity campaign** to targeted national publications
    a. *Lifestyle publications*
    b. *Industry trade publications*
    c. *General business publications (e.g. Business Week, Forbes)*
    d. *Travel publications*
    e. CNBC's Odyssey Media feature**.** One 5-7 minute story costs $20,000 and is aired 50 times on national and regional news channels.

    Launch an advertising campaign to support publicity. $4,000 to develop an ad, ad placement costs between $5,000 - $15,000
2. **Direct marketing** – Obtain target business databases and send electronic campaign mail.
3. **Direct marketing** – Sponsor and/or attend 2-3 industry events per year.
4. **Direct marketing** – Once the civic center is complete, promote the facility to executive-level target industry events and training courses.
5. **Direct marketing** – Film a documentary about a well-known Santa Fe artist and submit it to film festivals and public television networks.

6. Direct marketing – Partner Economic Development teams with Albuquerque and other New Mexico economic development groups and take a mission to a market with a high concentration of target businesses.

Appendix: Performance Metrics

An important component of the implementation of Santa Fe's Economic Cultivation Plan is a monitoring system to track the success of the plan in the years to come. AngelouEconomics has identified several data sets that have been used during the strategic planning process that we believe will be good measures of economic performance. These data are easily found at state and national sources, are available at the city and county level, and should be considered good indicators of the overall economic health of Santa Fe and its citizens.

Many state and local economic development organizations already use performance metrics. These data are also called "benchmarks," as local data is usually placed side-by-side state or national data for comparison. By committing to measuring its achievements, Santa Fe will be joining the ranks of communities in Oregon, North Carolina, Minnesota, and Indiana who have developed successful benchmarking systems to monitor their economic performance. The performance metrics proposed in this plan provides Santa Fe's leaders with an excellent opportunity to demonstrate positive results of their efforts and policies and build confidence among the general public that the economy is heading in the right direction.

AngelouEconomics recommends several performance metrics for each major topic of the Cultivation Plan that could be used by Santa Fe's leaders to track progress:

Workforce Development and Education

- Increased job growth in target industry sectors
- Increased household income
- Increased percentage of population with 2- year degree or higher
- Increased average SAT scores for Santa Fe high school students
- Decreased high school drop out rate

Entrepreneurship

- Increased net annual new firm creation
- Increased percentage of companies at Santa Fe incubator classified within a target business sector
- Increased total venture capital funding in Santa Fe
- Decreased retail spending leakage

Infrastructure & Sites

- Successful annual progress and on-time completion of the Water Diversion Plan
- Construction progress and completion of the new Santa Fe convention center
- Increased percentage of new homes and buildings built in Santa Fe that classify as affordable living and/or "green"

Quality of Life

- Increased percentage of total population aged 25-44
- Increased percentage of total graduates from Santa Fe higher education institutions living in Santa Fe 1 year after graduation
- Decreased poverty rate
- Stable cost of living ratio (ratio between Santa Fe's average cost of living and average wage remains stable or decreases)

Marketing

- Increased state or national media mentions related to Santa Fe business activity
- Increased number of qualified target industry leads contacting SFEDI or other economic development-related organization about business expansion, relocation, or start up in Santa Fe (e.g. the City of Santa Fe, Santa Fe County, the Chamber of Commerce, or local real estate agency)
- Increased hotel occupancy, increased hotel occupancy in hotels located in downtown Santa Fe
- Increased visitor spending

AngelouEconomics recommends that performance be measured on a city basis. Benchmark data should be collected for the City of Santa Fe, Santa Fe County, the State of New Mexico, and the U.S. Santa Fe may also choose to include one or more of the comparison communities included in the *Community Assessment* report (Flagstaff, Boulder, Asheville, and Raleigh). Metrics are best used when they are calculated as a share of the U.S. average. For example, Santa Fe's average wage is currently $27,644 or 76.6% of the U.S. average. Santa Fe will know that it is successfully meeting the objectives of this *Economic Cultivation Plan* as this percentage increases over the next 5-10 years.

Performance metrics should be updated by the city's lead economic development organization on a bi-annual or yearly basis. The following page provides a sample format for tracking performance. This table can be expanded to include other performance metrics within each topic, additional historical data, and information on competitor communities.

Sample Performance Benchmarks
Santa Fe, New Mexico

		Workforce & Education	Entrepreneurship	Infrastructure & Sites	Quality of Life	Quality of Life	Marketing & ED
		Household income County	Venture Capital Funding to SF area companies County	Successful annual progress and completion of Water Diversion Plan City/County/State	Percentage of population 25-44 years old County	Cost of Housing Ratio City	Number of qualified target industry leads contacting SF ED orgs about biz expansion, relocation, or startup County
Santa Fe		$ 41,519.00	$37 million	N/A	28.1%	137.8	Collect data

ECONOMIC DEVELOPMENT DIVISION
Strategy for Implementation

Mission:

The mission of the Economic Development (ED) Division of the City of Santa Fe is to achieve long-term sustainable and focused economic growth by building a diverse, innovative economy with high-wage, high-impact jobs that provide opportunity and prosperity for the City's residents, businesses and entrepreneurs.

Objectives:

-Diversify the Santa Fe Economy with an emphasis on high wage jobs[1] and career paths.
-Pursue overall affordability where local wages can support living in Santa Fe (reduce leakage[2]).
-Bolster Santa Fe's leadership position and/or potential in innovation.

Background:

More than four years ago Angelou Economics produced a report for "Cultivating Santa Fe's Future Economy." The implementation strategies in this plan are principally derived from that report. In order to effectively institute the recommendations contained in the Angelou Plan the Economic Development Division has worked to outline a process for vetting potential projects. The process is designed to be fair, easily understood and transparent to members of the community.

Angelou Economics calls for the plan to be a 'living document,' and updated as conditions change. To that end, the Economic Development Division has held a series of key informant interviews and a series of professionally facilitated seminar meetings with input from members of the local business and economic community. The values and priorities outlined in this implementation plan were discussed and approved by attendees at these meetings. The implementation plan is designed to be driven by measurable, achievable outcomes in several of the target industries identified in the Angelou Plan.

Desired Outcomes:

The Economic Development Division will work to foster a creative and innovative cultural economy. Specific economic goals that have been identified are as follows:

- Create and attract a greater number of high-wage jobs. This will not be to the exclusion of supporting emerging business opportunities in focused sectors that would lead to high wage jobs, but may not start out with high paying jobs. This will give more of Santa Fe's population the ability to live and work in the community.
- Ensure that Santa Fe has a skilled and competitive workforce to support innovation and key economic base jobs[3] and primary industries[4]. This includes creating and expanding accessible career paths for local youth. Economic base jobs and primary industries are jobs and industries that derive fifty percent or more of their sales from outside of New Mexico and thus expand the local economy.
- Recruit and retain local talent by making professional opportunities in the area available and better understood in the community.
- Improve the climate for doing business in Santa Fe. This includes streamlining the processes of permitting, licensing and other regulatory requirements. The ED division also intends to celebrate innovation and success in leading local businesses.
- Improve the business infrastructure[5] in Santa Fe. This means working regionally to ensure easy, low-cost access to services, utilities, transportation and other key means of support for success in business and community development.
- Develop stronger working partnerships in the region. This means actively engaging key partners in projects and initiatives on a regular basis in order to maximize community input, expertise, support and communication.
- Promote a green and sustainable Santa Fe.
    - Actively promote and stimulate businesses and services consistent with the Sustainable Santa Fe Plan. This will include clean renewable energy, water conservation and waste reduction technologies.
    - Promote and support projects, developments, and initiatives with sustainable infrastructure[6] and that are consistent with the Sustainable Santa Fe Plan.
    - Cultivate and work to develop a green collar workforce[7] to support the clean renewable energy industry as well as both the new and retrofitting of buildings, sites and infrastructure to be more sustainable.

Division Work:

Staff will work consistently with partners on a regional and collaborative approach to economic development. The Chamber of Commerce, Santa Fe Business Alliance, Santa Fe County, the Museum Foundation of New Mexico, Creative Santa Fe, the Santa Fe Community College, SCORE, the Santa Fe incubator and local venture capital firms will all be key partnerships to maintain and strengthen. A responsive, cooperative, customer service oriented approach will be the guiding principle behind all work done by staff.

Staff work will include:

- Project Management (Site development, workforce training program development, business support program development and management, etc.)
- Business Retention, Expansion[8] and Passive Recruitment[9] (Incentive analysis, site location, funding facilitation consultation, strategic assistance, program referral, etc.)
- Marketing (Outreach, production of collateral materials, workshops, etc.)
- Actively Soliciting Proposals to meet community needs. (Proposals can come via our partners including the SF Chamber, the SF Alliance, the State Economic Development Department, staff, Councilors or from other sources.)
- Streamlining Business Processes (Licensing, permitting, etc.)
- Contract Management (Business support services, advocacy, etc.)
- Community and Business Relations (Staff will make regular visits to businesses to gain a firsthand understanding of the industries operating in the region and the challenges they face. During these visits staff will promote awareness of City and State economic development opportunities, policies and capabilities.)

Staff will visit approximately 50 businesses per year or approximately two businesses per week to discuss potential business development resources with each company. The resources that will be discussed will be but not limited to alternative financing programs (i.e. City's Small Business Loan Fund), technical assistance programs (i.e. SF Incubator, SCORE and SBDC programs) and State incentives. Staff will provide a quarterly report containing the following information:

- Number of Companies Visited
- Size of Portfolio (Number of Potential Company Expansions, Start-ups and Recruitments)
- Number of Companies Expanded, Started or Recruited
- Overview of Companies Expanded in Target Sectors, Number of Jobs, Average Wage and Capital Investment
- Progress on the Infrastructure Project implementation.

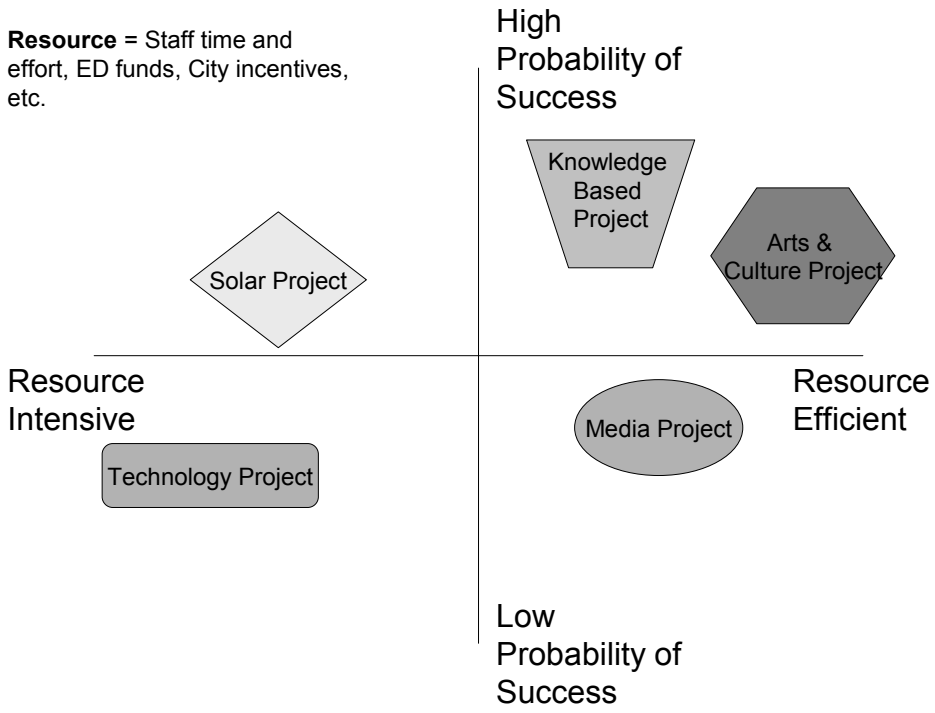
The Economic Development Division will take a proactive role in engaging a wide range of regional partners in collaborative efforts to benefit the economy. Emphasis will be placed on getting the right partners to cooperate on each project so that work can be focused on achieving measurable outcomes. For example, the Santa Fe Community College will be a key partner in workforce development and the Santa Fe Chamber of Commerce will be a key partner in business development.

Methodology:

The implementation strategy outlines a process for evaluating projects and proposals that meet agreed upon Economic Development Goals. Staff work will be focused along these guidelines:

- The Economic Development Division will focus efforts in a few strategic areas in order to effectively use limited resources. Projects will be outcome driven[10] with an emphasis on getting the greatest return for the investment of City resources.

- Work will be focused along three tracks – business development, workforce development and site & infrastructure development.



- Staff will work to streamline the process of providing services. Duties and provision of services will be aligned to best utilize resources, time and knowledge of staff.

- Significant effort will be made to provide good customer service and communication. The Division will be accessible to the community and work to ensure clear communication.

- Economic development activities will be regionally oriented with an emphasis on working in partnerships. Anticipated partners will include organizations such as the State of NM, the New Mexico Economic Development Partnership, the Santa Fe Community College, Santa Fe County, the Santa Fe Chamber of Commerce, the Santa Fe Alliance and the Santa Fe Incubator.

- The portfolio of projects will be organized with an investment/venture capital approach[11]. The portfolio will endeavor to balance safe bets and risky bets with an understanding that risky projects have a greater chance of failure but may yield the greatest returns. It is expected that applications for economic development projects, which may or may not solicit funding from the Economic Development fund, will be made throughout the year. All projects will be evaluated within the context of the current portfolio, as well as by taking into consideration pending applications. As staff will be working consistently with potential applications, there will be some preliminary assessment of where new applications will fall within the portfolio management spectrum. It is expected that the investment by the City will fall largely into projects with a high probability of success and efficient use of resources. To manage this portfolio, staff will work closely with projects and continually assess their progress toward meeting agreed upon objectives.

Venture Capital Portfolio

- Projects will be outcome driven and aligned with SMART Goals whenever possible. That is, goals that are - Specific, Measurable (data), Aggressive but Achievable, Relevant to Mission, and Timebound (not just open ended).

- During the working period and upon completion, each project will be assessed in order to make adjustments and improve outcomes. There will be a continuous feedback loop where project impact, strengths and weaknesses will be analyzed and any necessary corrections will be made.

Goals & Measures:

The goals and measures will be cumulative and cover a three year period.

1) Facilitate and assist in the creation of 900 high wage, economic base jobs (see definitions).

2) Facilitate the creation of 36 business expansions, startups, retention or recruitments to the Santa Fe region.
3) Increase the average wage in the Santa Fe region from $14.90 per hour to $15.90. This approach acknowledges and emerging trend in employment where employees contract to work on specific projects and may not be in salaried positions.
4) Complete or develop at least one infrastructure project per year. For example, an Arts & Cultural District[12], Mainstreet Program[13], telecommunications network plan, implementation of an Airport Master Plan, and expansion of solar industry capacity.
5) Facilitate and assist with the increase and/or creation of workforce career pathways and skill levels in targeted industry sectors by developing up to two workforce development programs. This will largely be accomplished by working with our local partners, including the SFCC, Santa Fe Public School District and the Northern Area Workforce Development Board.

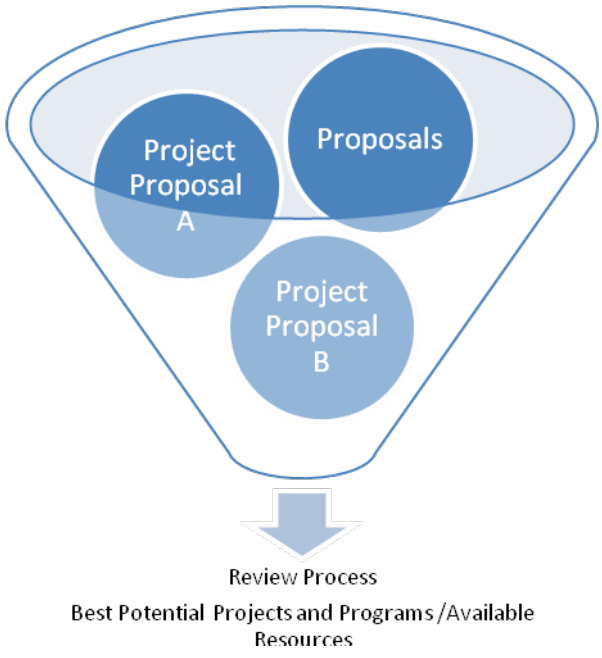
Targeted Sectors for Growth and Development:

Economic development activities will focus on targeted industries identified in the Angelou Plan and refined through the recent economic development seminar meetings. Targeted sectors are identified as follows:

- Media (Film, Publishing, Journalism, Video Game Production, etc.)
- Green – Consistent with Sustainable Santa Fe Plan and including: Clean renewable energy (with a focus on the solar industry), water conservation, waste reduction technologies and outdoor and recreational activities and equipment.
- Technology (Biotech, Nanotech, Software design, etc.)
- Knowledge Based Enterprise (Research and Development, Think Tanks, Financial Services, Consulting, Public Policy, etc.)
- Arts & Culture (Artisans, Fine Artists, and Cultural Heritage as described in the City's Cultural, Arts and Tourism Plan.)

Request for Proposal Versus Unsolicited Proposals:

The Economic Development Division anticipates two processes to generate projects and programs that will meet the Economic Development Implementation Strategy. These two processes reflect the nature of economic development work. The first will rely on generating proposals in response to an annual request for proposal and the second will allow for unsolicited proposals for economic development projects that may emerge during the course of a year.



1. *Request for Proposals* – Each year the staff will prepare a Request for Proposal (RFP) for services and/or programs that support local economic development efforts. Typically, these RFP's will allow for three years worth of contracting, subject to funding availability and successfully meeting the agreed upon outcomes

for a particular Scope of Work. These types of RFP's will focus on support services, such as those provided through the Santa Fe Incubator and SCORE and the management of the Santa Fe Loan Fund. These are services paid through the Economic Development Fund, which uses the 1% of the State's share of the GRT as its funding source.

2. *Unsolicited Proposals* – At any time, proposals may be submitted for projects that must meet the Local Economic Development Act. Such proposals may request funding through the EDF, below market rate rent for buildings and/or other types of incentives. These incentives may include fast tracking through the City's various review processes and/or favorable financing or other incentives such as Industrial Revenue Bonds (IRB's). Staff will work closely with organizations and/or entities seeking such support well in advance of an actual application for assistance. The process for evaluating these applications is the same as for those submitting proposals in response to a Request for Proposal.

Process for Evaluating Projects, Proposals and Incentives:

The process is designed to make project, proposal and incentive evaluation fast, easily understandable, transparent and accessible to the community. It is a way for staff to fully vet projects or incentive proposals and thereby determine the allocation of money, staff time and effort. The following illustrates how the evaluation process will consider multiple projects and focus efforts to those with the best potential outcome.

Stage 1 – Economic Development Target and Values Assessment

Staff will assess the project/proposal by applying the following values filters:

A. Environmental Footprint[14] (water, power, emissions etc)
B. Wages and Benefits[15] (Is it possible to live and work in Santa Fe?)
C. Innovative Position/Potential[16]
D. Local[17] (Does it fit with the City Different? Does it enhance the cultural fabric? Is it homegrown? Doest it provide positive impacts to local Santa Fe residents)

The project targets will be assessed qualitatively using a check mark system. When reviewing the project, each target met will be assessed and checked in the project evaluation chart below.

•

Stage 2 – Initial Business Plan/Proposal Review

- Staff will meet with representatives of a project/proposal and work to understand the proposed business plan and/or proposal, identify potential problems, discuss potential resources, and answer any questions.

- Staff will perform an initial evaluation to ascertain the plan strengths and weaknesses. Financial solvency, community need, growth potential and environmental footprint will also be evaluated.

- Staff will work with representatives to match them with appropriate economic development resources. Staff will also ensure that all proposals are in compliance with the State's enabling legislation the Local Economic Development Act[18] which in Santa Fe is the Economic Development Plan Ordinance.

Cost-Benefit Analysis: Economic Development projects will also include a cost-benefit analysis as required by the city's (11-11.1) Economic Development Plan Ordinance. In accordance with the Economic Development Plan ordinance, the projects and/or incentive proposal must provide a return on investment over a 10-year period that recoups the value of the assistance provided by the city to the project. The return on investment shall be of value and may be paid in money, in-kind services, jobs, expanded tax base, property or other thing or service of value for the expansion or improvement of the economy.

The cost-benefit analysis or impact analysis will measure both direct and indirect impacts in accordance with 11-11.9 of the Economic Development Plan ordinance which will include but is not limited to the following:

- Jobs
- Pay scale of jobs
- Anticipated impact of project on local tax base
- Anticipated impact of project on local school system

- Assistance in providing affordable housing to employees or to the community at large may qualify

If a proposal requires funds of less than $30,000 staff will make a recommendation to the City Manager and move forward. Quarterly reports will be made to the BQL on these projects. If the proposal requires funds of more than $30,000 staff will refer the project/proposal to the Economic Development Review Sub-Committee (EDRC) with a recommendation.

Staff will utilize the following target industry evaluation chart to map the benefits and impacts of a project/proposal, The system of checkmarks is designed to provide a quick overview of the project's applicability to the target industry areas and the types of program and/or assistance needed for a particular business plan:

Target Industry Evaluation Chart:

	Business Development	Workforce Development	Sites & Infrastructure
Targets			
Media			
Green			
Tech			
Knowledge Based Enterprise			
Arts & Culture			

The project will also be assessed whether it meets the city's values as defined in the city values filters chart below. The values will be assessed using the following quantitative measures on a scale of 1-3 where three is exceeds values and 1 does not meet values. Use of this scale will provide a quantitative comparison between projects and provide an initial assessment of a proposed project's ability to address agreed upon local values:

3- Exceeds Values Criteria
2 – Meets Values Criteria
1 – Does Not Meet Values Criteria

City's Values Filters Chart:

	Business Development	Workforce Development	Sites & Infrastructure
Values			
Low Environmental Footprint			
High Wages & Benefits			
Innovative Position/Potential			
Local			

Stage 3 – EDRC Review
The EDRC will review the staff recommendation and assess the project/proposal against the values filters, desired outcomes and financial feasibility. The EDRC will then make its recommendation to the Business and Quality of Life Committee (BQL).

Stage 4 – BQL Review
BQL will review the EDRC recommendation and assess the project/proposal against the values filters[19], desired outcomes and financial feasibility. BQL will then make its recommendation to the City Council OR reject the project/proposal.

Stage 5 – Council Review
The City Council will assess the project/proposal against the values filters, desired outcomes and financial feasibility. The City Council will approve or reject the project/proposal.

Project/Proposal Evaluation Flow Diagram

Requests for Proposals:

RFPs will be focused on getting results rather than outlining step by step procedures. This will allow for maximum input and creativity from RFP responders. Staff will evaluate RFP responses according to how well each proposal will meet the desired economic development outcomes.

The timeline for RFPs to be issued will be no more than 30 days after approval of the implementation plan by City Council. The RFPs will be reviewed and evaluated by a committee as required under the City's procurement code. The RFPs will be evaluated on how the respondents will meet the desired outcomes. RFP awardees will receive a contract for one year and two one year extensions.

Staff will work with RFP respondents to get more information, clarify how the work will be done and what outcomes need to be reached. For RFPs greater than $30,000 respondents will present their proposal to the EDRC. Staff will provide the EDRC with a funding recommendation.

Staff will administer contracts according to the scope of work and timeframe agreed upon in each contract. If necessary, at the discretion of the Division Director and Department Director, timeframe extensions and contract revisions may be made.

DEFINITIONS

[1] **High Wage Jobs** – In the State of New Mexico these are defined as jobs that pay a salary of $40,000 and above.

[2] **Leakage** – The loss of revenue in taxes and spending and the loss of talent that occurs when people cannot afford to work and live in the community.

[3] **Economic Base Jobs -** Economic base jobs are jobs in primary industries. An economic base job is any job that produces a product or service that is sold outside the community and thus brings in outside money. Most economists believe that the economic base job is the most important factor to a healthy economy.

[4] **Primary Industries** – Primary industries are defined on the same principle as economic base jobs. They are industries that derive fifty percent or more of their sales from outside of New Mexico and thus bring in new money expand the local economy. Businesses that bring in outside money are called primary industries, and they produce the coveted "economic base" jobs.

[5] **Business Infrastructure** – The basic facilities, services, and installations needed for the effective functioning of businesses in the area. This can include transportation and communications systems, water and power lines, as well as public institutions including schools and post offices.

[6] **Sustainable Infrastructure** – Basic facilities, services and installations which take care of the needs of the present generation without compromising the needs of future generations.

[7] **Green Collar Workforce** – A workforce employed in the environmental segment of the economy. Green collar workers include professionals such as conservation movement workers, environmental consultants, environmental or biological systems engineers, LEED's certified building architects, holistic passive solar building designers, solar energy and wind energy engineers, alternative energy vehicle engineers, organic farmers, environmental lawyers, ecology educators, and eco-technology workers. They also include vocational or trade-level employment: electricians who install solar panels, plumbers who install solar water heaters, and construction workers who build energy-efficient LEED certifed buildings, wind power farms, or other clean, renewable, sustainable future energy developments.

[8] **Business Retention and Expansion** – The retention of local businesses located in the Santa Fe region that may leave the community. Expansion is assisting local businesses in the Santa Fe region in growing their operations, employment or sales which results in more jobs and capital investment in Santa Fe.

[9] **Passive Recruitment** – Responding to inquiries and opportunities from businesses considering locating in the Santa Fe area but not actively marketing businesses to locate in Santa Fe from outside of Santa Fe.

[10] **Outcome Driven** – Guided by what results are or can be achieved rather than the method or process of working towards results.

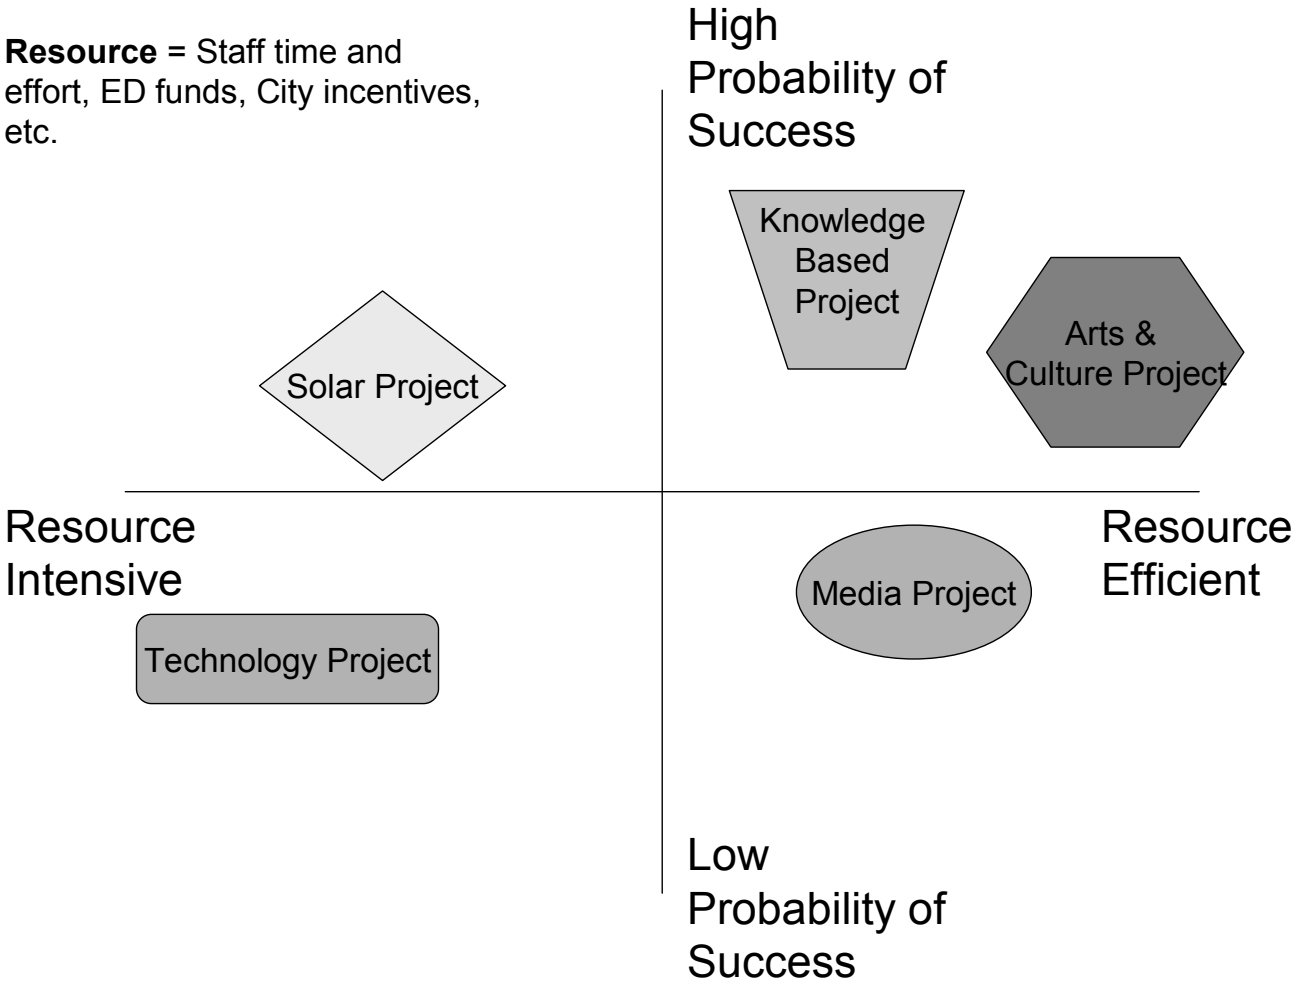
[11]**Investment/Venture Capital Approach** - An approach similar to that taken by investment and venture capital managers wherein resources are balanced between calculated risky and safe ventures where safe ventures produces lower returns on investment and higher risk ventures produces higher returns on investment. Investments are also spread across different areas to achieve stability through diversity.

[12] **Arts & Cultural District** – A State program administered by the Mainstreet program which is designed to enhance local economic development opportunities, in designated districts, by placing an emphasis on indigenous arts and culture. Applying communities develop a plan to support, develop and enhance the selected district's arts and cultural opportunities as a niche for economic development.

[13] **Mainstreet Program** - New Mexico's MainStreet Program is a grassroots economic development program that assists communities in revitalizing their traditional commercial neighborhoods. Mainstreet works to create an economically viable business environment while preserving local cultural and historic resources.

[14] **Environmental Footprint** – A project/proposal's potential impact on the local environment and ecology including water and power use, emissions, amount of solid waste generated, impact on local vegetation and wildlife and traffic impact.

[15] **Wages and Benefits** – A project/proposal's potential impact on or offering of employee pay and benefits including but not limited to retirement, healthcare, educational benefits, flexible scheduling, community service, support and involvement.



[16] **Innovation Position/Potential** – A project/proposal's potential impact on Santa Fe's innovation in an industry or the possibility of increasing the creative and/or innovative impact on the industry.

[17] **Local** – A project/proposal's homegrown origin or its impact on the cultural fabric, identity i.e. how it fits with the 'City Different,' and/or provides positive economic impacts to residents of Santa Fe,

[18] **Local Economic Development Act** – The State of New Mexico's enabling legislation which allows local governments the ability to use public money for private enterprises (including non-profits) in the form of land, building and infrastructure in order to foster economic development. This legislation allows public investment in private enterprises without violating the anti-donation clause of the New Mexico State Constitution

[19] **Values Filters** – The method for evaluating projects according to what is important to the local community's priorities.

Dan Esquibel, Senior Planner
City of Santa Fe
200 Lincoln Avenue
Santa Fe, NM 87501

RE: Las Soleras <u>Master Plan Amendment</u> Application – change Zoning Districts for Master Plan Parcels 19, 20, 21, 23, 24 and 26 to a uniform C-2 District and make adjustments to Rambla width in keeping with the North side of Beckner Road.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of applying for an amendment to the Las Soleras Master Plan per the SFCC 14-3.9 – MASTER PLANS. This application is a companion to both a General Plan Amendment and Rezoning application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

PURPOSE AND INTENT:

The current Master Plan zoning districts along with the zoning districts proposed with this application are found in the table below. The combined area of Parcels 19 – 26 is 57.63 acres.

Table I. ***Las Soleras Parcels 19-26 proposed Land Use Classification/Zoning District***

Parcel	Acres	Current Land Use Classification/Zoning District	Proposed Land Use Classification/Zoning District	Address Santa Fe, 87507
19	9.11	Transitional Mixed Use/MU	Community Commercial/C-2	5021 Rail Runner Loop
20	10.70	Business Park/BIP	Community Commercial/C-2	5091 Rail Runner Loop
21	4.70	Office/C-1	Community Commercial/C-2	5140 Rail Runner Loop
22*	9.12	Community Commercial/C-2	Community Commercial/C-2	5090 Rail Runner Loop
23	7.27	Office/C-1	Community Commercial/C-2	5040 Rail Runner Loop
24	6.18	Office/C-1	Community Commercial/C-2	4354 Beckner Road
25*	7.37	Community Commercial/C-2	Community Commercial/C-2	4552 Beckner Road
26	3.48	Office/C-1	Community Commercial/C-2	5210 Rail Runner Loop

**No change in Land Use Classification or Zoning requested*

The purpose of this application is to amend the Las Soleras Master Plan Zoning designations for Parcels 19, 20, 21, 23, 24, and 26 allowing for a uniform C-2, General Commercial Zoning District across parcels 19-26. The intent is to allow for the adjustment of existing lot lines as to accommodate future development in a thoughtful and organized manner as opportunities present themselves. The consistent C-2 zoning will also accommodate three story office and retail services including restaurants. This flexibility in use will provide an opportunity to attract business and commercial uses offering higher salaries and services to the surrounding neighborhood.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses as allowed in a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The rezoning of parcels to a C-2 District will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged.

Finally, this amendment also proposes a house keeping item in reducing the Rambla width from 90’ to 45’ to match the Rambla width as granted in the most recent Las Soleras Master Plan Amendment approved in 2019. The larger Plaza open space area will remain as is but this amendment request flexibility to locate the plaza anywhere along the Rambla between Beckner Road and Rail Runner Loop Road. See the Conceptual Test Fit for more perspective on this request.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be zoned as C-2 General Commercial

will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development. A uniform C-2 zoning across parcels 19-26 will make the relocation of lot lines an administrative process enabling the site parcels to be easily configured to the needs and sizes of a variety of uses.

A future Rail Runner rail stop was envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. A uniform C-2 zoning district could accommodate uses that eventually establish this base level of ridership.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is zoned C-2 General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely and especially within a C-2 Zoning district.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as C-1. It is partially developed with the Presbyterian Medical Services Office Building recently opened in late 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire northern edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as C-1; R21; and R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site. Thanks for your review and consideration of this application.

Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.

Las Soleras Parcels 19-26 - Master Plan Amendment Application
Approval Criteria Responses
February 12, 2024

The proposed amendment to reclassify Las Soleras Master Plan parcels from Transitional Mixed Use/MU, Business Park/BIP, and Office/C1 to Community Commercial/C-2 is summarized in Table I. by parcel.

Table I. ***Las Soleras Parcels 19-26 proposed Land Use Classification/Zoning District***

Parcel	Acres	Current Land Use Classification/Zoning District	Proposed Land Use Classification/Zoning District	Address Santa Fe, 87507
19	9.11	Transitional Mixed Use/MU	Community Commercial/C-2	5021 Rail Runner Loop
20	10.70	Business Park/BIP	Community Commercial/C-2	5091 Rail Runner Loop
21	4.70	Office/C-1	Community Commercial/C-2	5140 Rail Runner Loop
22*	9.12	Community Commercial/C-2	Community Commercial/C-2	5090 Rail Runner Loop
23	7.27	Office/C-1	Community Commercial/C-2	5040 Rail Runner Loop
24	6.18	Office/C-1	Community Commercial/C-2	4354 Beckner Road
25*	7.37	Community Commercial/C-2	Community Commercial/C-2	4552 Beckner Road
26	3.48	Office/C-1	Community Commercial/C-2	5210 Rail Runner Loop

**No change in Land Use Classification or Zoning requested*

SFCC 14-3.9 (D) MASTER PLAN AMENDMENT APROVAL CRITERIA; CONDITIONS

(1) Necessary Findings
(Ord. No. 2014-31 § 5)
Approval or amendment of a master plan requires the following findings:

(a) the master plan is consistent with the general plan;

Response: The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals are supported:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4: *Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*

Policy 9-2-G-5: *Promote small business.*

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

(b) the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;

Response: This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Parcels 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across parcels 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to

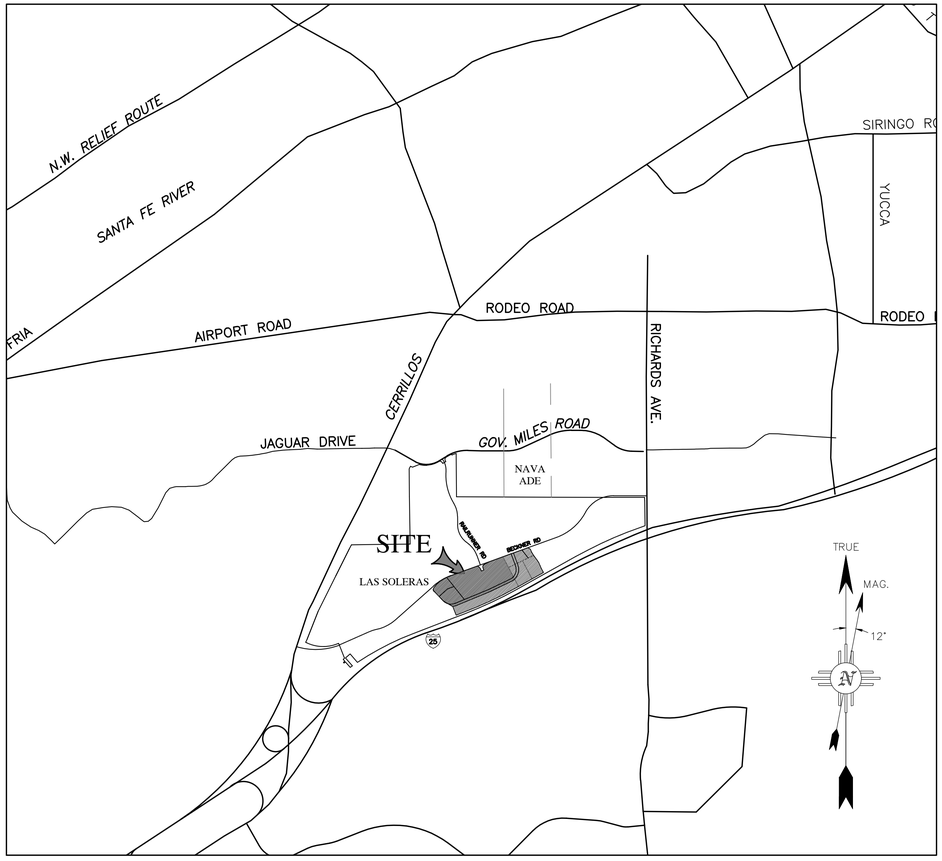
develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(c) development of the master plan area will contribute to the coordinated and efficient development of the community; and

Response: This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of parcels 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System.

(d) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.

Response: The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.



The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request.

Las Soleras Core

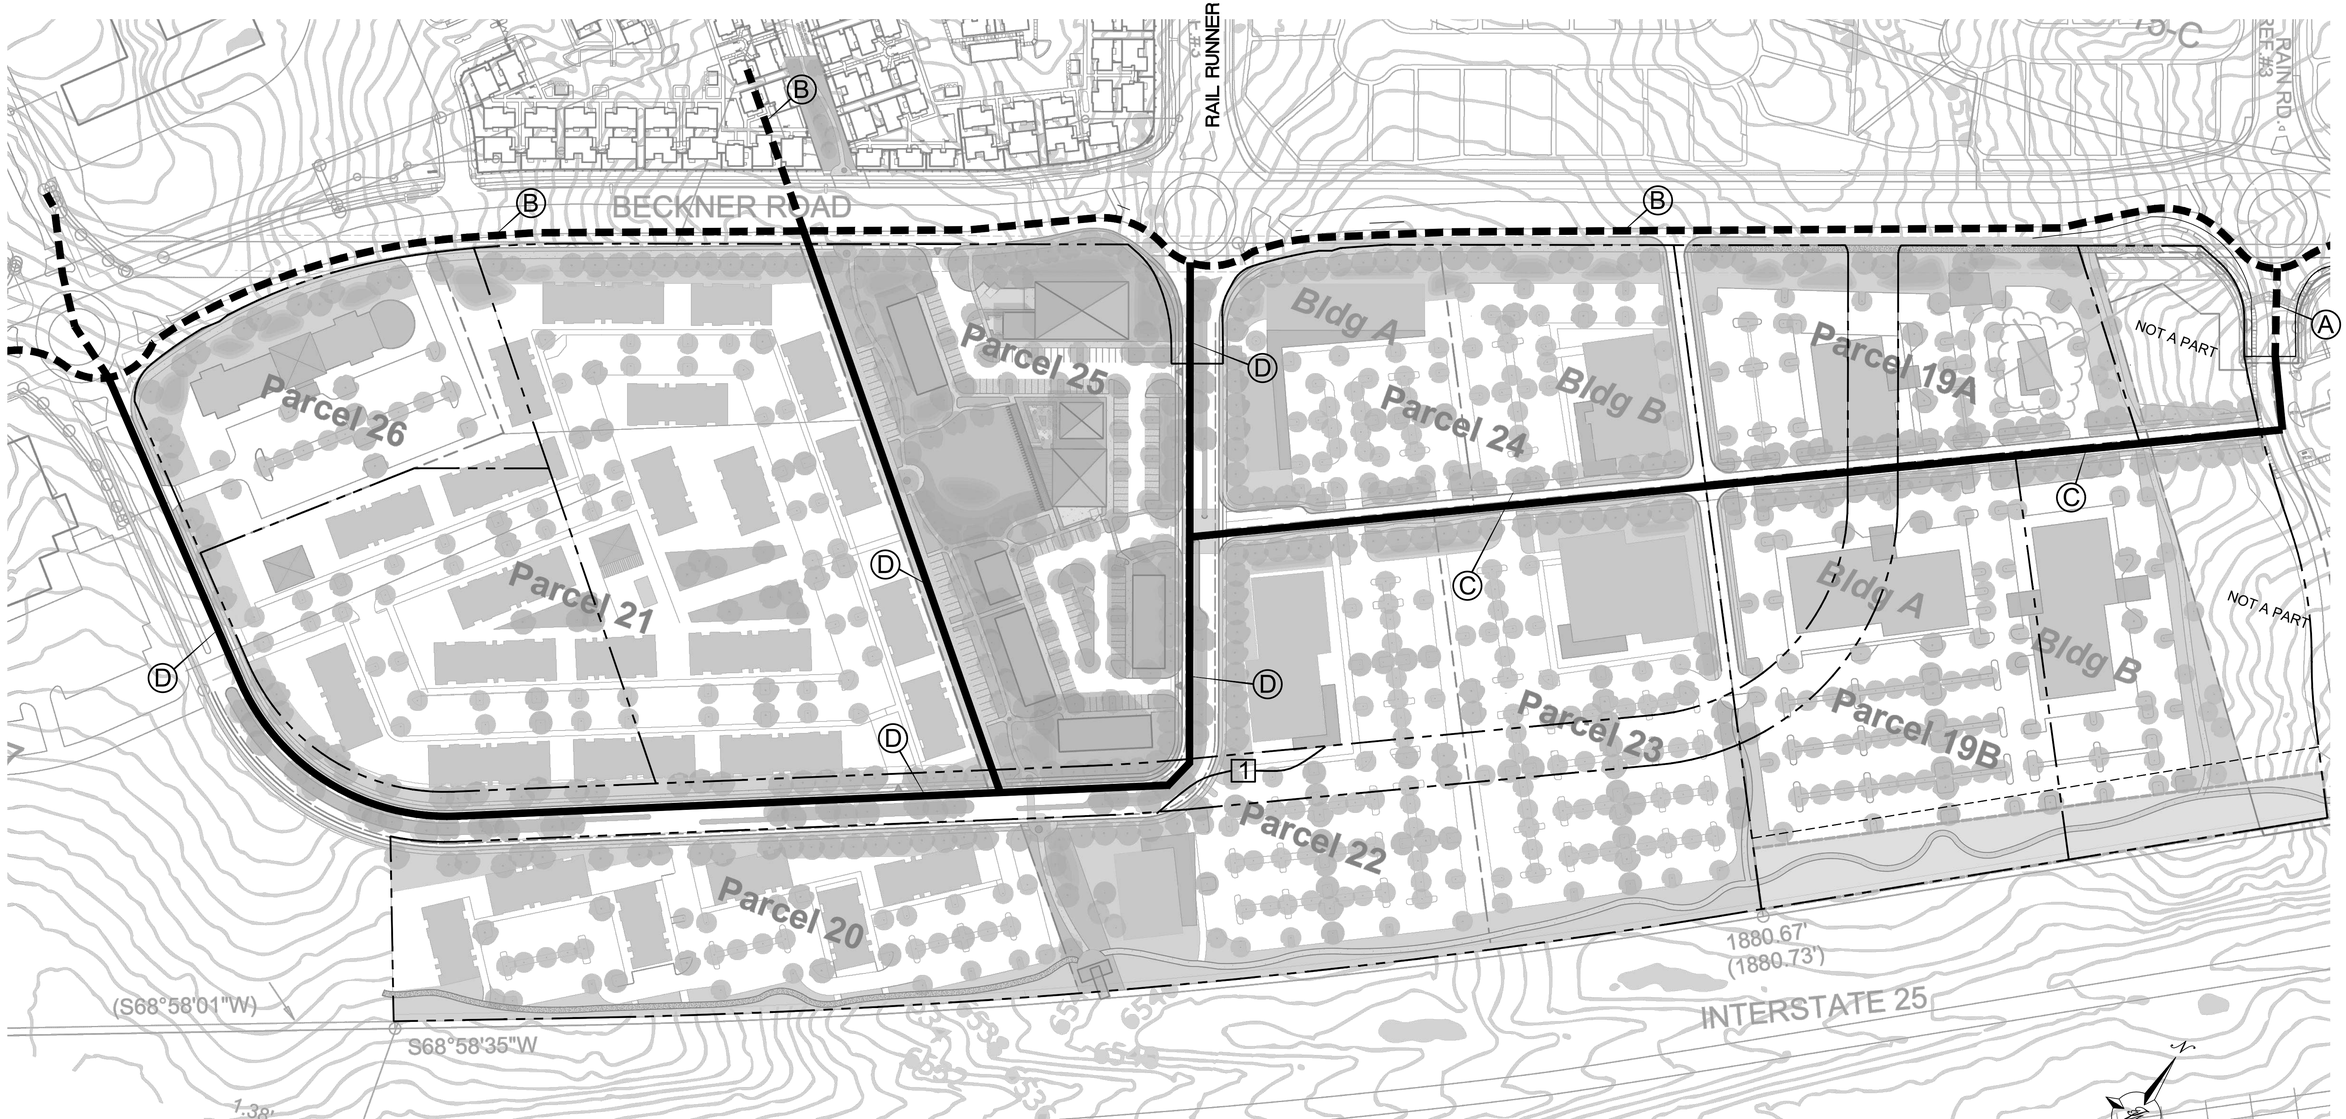
The Las Soleras Core is uniquely able to become the vibrant heart of southern Santa Fe. The Las Soleras Core is in an optimal location and size to host a variety of iconic neighborhood needs--a market, a restaurant, food-beverage outlets, neighborhood retail and commercial. Here is a conceptual look what the Core could be.

- Water harvesting along Becker and along Rail Runner Loop to capture stormwater to support a green edge of trees and native plants.
- Neighborhood Scale Market *(Size example: Kaune Market)*
- Food & Beverage *(Size example: Iconic Coffee)*
- Possible future road connection to east parcels would support an active engagement with lively Core
- Restaurant oriented toward "The Green" *(Size example: Rustica Resturant/SF Brewery)*
- The Long Zaguan would be a shady connector across the Green. An iconic feature with photovoltaic panels--conveying an embrace of art and environment.
- The Green repositions the required Master Plan parklet to be the heart of the Las Soleras Core. Where people can come to meet, eat, relax, and engage in small-scale community events such as music or recreation.
- Two-story buildings at the southern end of the Core would provide retail-commercial services spaces from which to serve the Las Soleras neighborhoods and south Santa Fe.
- The Rambla Trail system connects the Core with the surrounding residential neighborhoods, condominiums, senior living, apartments, office complexes, the regional hospital to the west. possible medical and education facilities, and a potential future rail raod station at I-25.

Las Solares Development Prototypes Data

Sept. 1, 2023

Notes: A. Test based on program and product prototypes



B. Applies CoSF development ordinance requirements

C. Test is for single story development.

D. Parking based on net lease (NL) of 10% reduction of gross square footage (GSF)

Opportunity: Consider asking CoSF to use a shared parking plan to increase density. Target would be for 10% shared of total provided.

Name	Plan Gross Sq. Ft.	Parking Required

Mr. Dan Esquibel
City of Santa Fe Water Division
200 Lincoln Avenue
Santa Fe, NM. 87501

RE: LAS SOLERAS 57 ACRE DEVELOPMENT
LAS SOLERAS PARCELS 19-26
WATER AND WASTEWATER LETTER

Dear Mr. Esquibel:

To ensure that the proposed General Plan land use classification of Community Commercial and associated proposed rezoning to a uniform C-2 district of the 57.63 acres of Las Soleras Master Plan parcels19-26 (located along the Southern edge of Beckner Rd between Las Soleras Dr and Walking Rain Rd) will not produce excessive demand on the existing water and sanitary sewer infrastructure in Beckner Rd, Tierra West LLC has prepared the following summary of existing water and sewer capacities and water and sewer flowrates for a conceptual design we are referencing as "Conceptual Test Fit A" for your review.

Sanitary sewer capacities were calculated assuming gravity flow along two of its segments – the segment from the roundabout at Las Soleras Dr to the roundabout at Rail Runner (along which the minimum slope is 0.73%), and another segment from Rail Runner to the roundabout at Walking Rain (along which the minimum slope is 1.05%). The capacity of the existing water main was calculated assuming an 11 ft/s flow velocity.

The capacity of both existing pipes was found to be sufficient to serve the property if developed per either the existing or proposed zoning, and the water and sewer flowrates for these conditions are summarized below.

For the first segment mentioned above (from Las Soleras Dr to Rail Runner), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 843 gpm with velocity 3.44 ft/s.

For the second segment mentioned above (from Rail Runner to Walking Rain), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 1,011 gpm with velocity 4.13 ft/s.

The peak sanitary sewer flowrate calculated for the development assuming development per the existing zoning was 150 gpm, For design Test Fit Concept "A" it is 191 gpm,

Water discharge was assessed for the existing 12" ductile iron main in Beckner using an assumed velocity of 11 ft/s and was calculated at 2,693 gpm.

The peak water flowrate calculated for the development assuming development per the existing zoning was 167 gpm with average irrigation flowrate 5.79 gpm, for design Test Fit Concept "A" it is 212 gpm with average irrigation flows at 5.52 gpm,

If you have any questions or need additional information regarding this matter, please do not hesitate to contact me.

Sincerely,

Ronald R. Bohannan P.E

							AVERAGE	PEAK	AVERAGE

WASTEWATER FLOWRATES (ASSUMED 90% OF PEAK WATER FLOWRATES, IN GPM)	**150**

Note:

1. All medical office and commercial buildings were assumed to be two-story buildings for comparison with the Concept A and B uses, which was factored in to the calculation of water flowrates in Gallons / Day
2. A floor area ratio of 0.25 was used to calculate all building sizes based on the existing zoning

Assumptions & References

1. Wastewater flowrates for office spaces comes from Metcalf and Eddy's book "Wastewater Engineering: Treatment and Resource Recovery" (5th Edition)
2. Wastewater flowrates for multifamily dwellings comes from Dewberry's "Land Development Handbook" (3rd Edition)
3. Industrial Park water use and number of employees determined through *Residential Water Use Research Project of the Johns Hopkins University and the Office of Technical Studies of the Architectural Standards Division of the Federal Housing Administration, 1963 and Metcalf & Eddy, Inc., 2003*

EARLY NEIGHBORHOOD MEETING NOTES

Project Name:	Las Soleras
Project Location:	4200 Beckner Road
Project Description:	Development Plan Amendment for Development Plan with Summary Plat/Lot Split for proposed 141-unit Apartment Complex
Applicant:	
Agent:	Orion West LLC
ENN Meeting Date:	14 November 2023
ENN Location:	Via Zoom
Application Type:	General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.
Land Use Planner:	Dan Esquibel
Attendance:	**City of Santa Fe:** Dan Esquibel **Developer Team:** Brian Nenninger (Agent), Maureen Mestas (Agent), Scott Herbert, Dave Delgado, Karl Sommer, Esq. **Neighborhood/Public:** 1 attendee. An unidentified neighbor who was on a non-video tile but did not identify him/herself or speak.

Notes/Comments:

14 November 2023/ 5:30 – 6:12pm Meeting

The meeting started at approximately 5:39pm. Roll call and introduction of those attending was held. Dan Esquivel indicated that he would like to wait an additional few minutes to allow others to log in. After a brief wait, the meeting continued without any additional attendees.

Brian Nenninger then introduced the Developer Team.

Brian Nenninger informed the group that this ENN is for the purposes of noticing a General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5 of all parcels in the Las Soleras Master Plan; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.

Highlights Brian shared during the presentation included:

The property is located within the 545 acre Las Soleras Master Plan Subdivision that was first created via an annexation ordinance in 2009. Since 2009 the Master Plan has been amended multiple times – the most recent being October 2019.

- Eight (8) existing legal parcels that together comprise 57.63-acres.
- Existing Zoning:

C-2: Two parcels
C-1: Four parcels
MU: One parcel
BIP: One parcel

- Master Plan Items that need to be "Cleaned Up."

Rail Runner Loop Road realignment to meet Rail Runner Road
Lot Line adjustments and resizing of parcels to better accommodate Commercial Users
Rambla open space design including location of "parklet."

The Applications that are being shared in the ENN are:

- General Plan Amendment Application
- Master Plan Amendment Application

Address Realignment of Rail Runner Loop Road
Propose modification to Rambla width.
Propose flexibility of "parklet" location along the Rambla
Discussion of Master Plat/Parcel Realignment

- Rezoning Application

Propose C-2 Zoning for eight parcels.

- Planned Unit Development (PUD) Application under consideration/discussion.

with City of Santa Fe

Brian wanted to take particular note that this is not an application for Development Plan Per the Santa Fe City Code. Qualified development/building construction will require separate Development Plan Applications, ENNs and Planning Commission Hearings.

He further stated that the proposed rezoning, along with the General Plan and Master Plan amendments lay the groundwork for better development needed to meet local market demands.

Those possible mix of uses for local market demand are:

- Neighborhood Commercial Retail, such as, Restaurants, Bakeries, Pubs, Coffee Shops, Marketplace/Grocery Coop, Copy/Printing, Dry Cleaning, Pharmacy
- Office (including Medical Office)
- Medical Education
- Multifamily Residential
- Hotel

Las Soleras Junction has transit-oriented improvements, specifically:

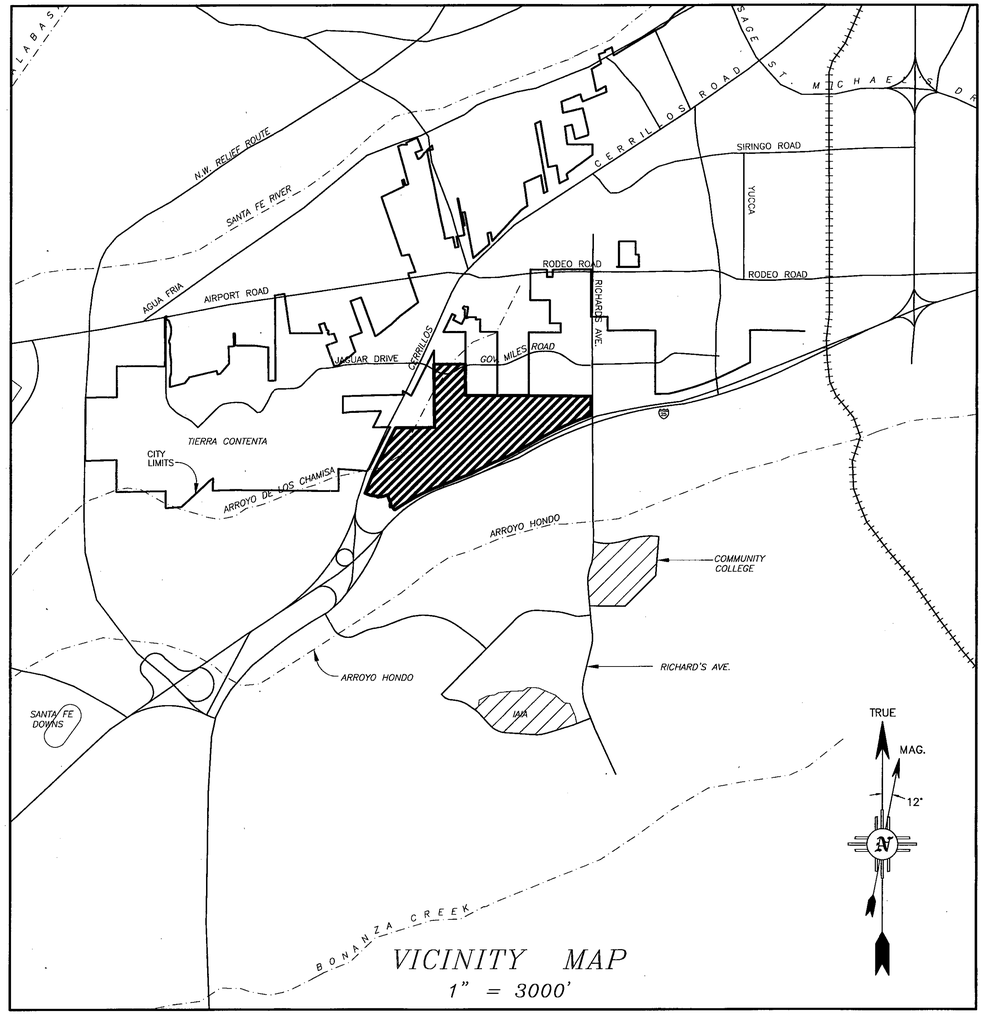
- Completion of Las Soleras bridge (triggered by 20 acres and 300,000 sf of development of parcels 19-26.)
- Further build out of Las Soleras trails system including the Rambla and "Parklet"
- Additional Bus stop/access on Rail Runner Loop Road
- Place holder for future Rail Runner Stop

Las Soleras Junction is a work in progress. Conceptual test fits to understand options for flow of pedestrians and vehicles within the site. Engineering and Design of Las Soleras Bridge to complete Las Soleras Drive from Cerrillos to Beckner. Utility and Traffic Study activity will be required. Design Guidelines are being developed to provide a cohesive, responsible, and pleasing experience for those who use and access the site. Guidelines will stay within the Santa Fe City Code and address, Architecture Concepts, Landscape Design, Lighting, Trails, Sidewalk and Roadway Connectivity to and within the site.

Brian then summarized the intention of the applications for this ENN, those key points being:

- Clean up issues in the Master Plan created from past developments/amendments. including the realignment of Rail Runner Loop Road with the relocated Rail Runner Road.
- Lay the groundwork for more effective use of parcels 19-26 through consistent zoning to allow for administrative lot line adjustments.
- Provide greater flexibility in providing neighborhood retail services including Food and Beverage. Uses brought to the site will be driven by the local and area market.
- Facilitate the completion of Las Soleras Drive and Bridge connecting Cerrillos to Beckner.

Brian opened the ENN for questions from the City Staff and neighbors. No one in attendance who was believed to be a neighbor asked to speak. No neighbor or other interested party was on the CHAT feature to ask questions.



There was a brief discussion between Dan Esquivel and Brian Nenninger about the status of the applications after the meeting. The meeting was then adjourned by Dan Esquivel.

**********END**********

LEGEND

BEARINGS ARE REFERRED TO THE NEW MEXICO STATE PLANE COORDINATE SYSTEM, NAD83 CENTRAL ZONE. DISTANCES SHOWN ARE GROUND LEVEL REFERRED TO 6600' AMSL DATUM. TO CONVERT DISTANCES TO GRID DISTANCES MULTIPLY BY A SCALE FACTOR OF 0.999598.

- ●F DENOTES REBAR, OR AS SHOWN, FOUND.
- ● DENOTES 1/2" REBAR WITH CAP 7014 TO BE SET UPON RECORDING.
- • DENOTES CALCULATED POINT, NOT SET.
- DENOTES NEW LOT LINE.
- DENOTES OLD LOT LINE (HEREBY VACATED).
- (#) DENOTES TRACT NUMBER.
- DENOTES BOUNDARY OF LANDS DEALT WITH BY THIS PLAT. INFORMATION OUTSIDE OF THIS BOUNDARY IS BACKGROUND INFORMATION ONLY, NOT VERIFIED FOR ACCURACY AND IS NOT PART OF THIS PLAT.

PREPARED FOR

LAS SOLERAS

WITHIN SECTIONS 7, 17, AND 18,
T.16N., R.9E., N.M.P.M.
SANTA FE COUNTY, NEW MEXICO.

NOTE:
ROAD DEDICATION MAY INCLUDE TEMPORARY OR PERMANENT CONSTRUCTION MAINTENANCE EASEMENTS FOR SLOPES, DRAINAGE STRUCTURES AND ANCILLARY IMPROVEMENTS AS DETERMINED BY FINAL ENGINEERING PLANS. OWNERS ACKNOWLEDGE THAT REASONABLE ADJUSTMENTS TO THE PRECISE LIMITS OF RIGHT–OF–WAY MAY BE REQUIRED BY THE PLANNING COMMISSION AT THE TIME OF SUBDIVISION PLAT APPROVAL.

ROADWAYS DEDICATED BY THIS PLAT MAY BE ADJUSTED TO ALIGN WITH CROSS STREET INTERSECTIONS AND TO SATISFY ENGINEERING STANDARDS PROVIDED THAT SUCH RE–ALIGNMENT DOES NOT DECREASE THE AREA OF DEDICATION AND IS ACCEPTED BY THE CITY AS EVIDENCED BY THE APPROVAL OF THE PUBLIC WORKS AND LAND USE DEPARTMENTS AND RECORDED AS A PLAT AMENDMENT.

LEGEND

BEARINGS ARE REFERRED TO THE NEW MEXICO STATE PLANE COORDINATE SYSTEM, NAD83 CENTRAL ZONE. DISTANCES SHOWN ARE GROUND LEVEL. REFERRED TO 6600' AMSL DATUM. TO CONVERT DISTANCES TO GRID DISTANCES MULTIPLY BY A SCALE FACTOR OF 0.999598.

- ●F DENOTES REBAR, OR AS SHOWN, FOUND.
- ● DENOTES 1/2" REBAR WITH CAP 7014 TO BE SET UPON RECORDING.
- • DENOTES CALCULATED POINT, NOT SET.
- DENOTES NEW LOT LINE.
- (#) DENOTES TRACT NUMBER.
- DENOTES BOUNDARY OF LANDS DEALT WITH BY THIS PLAT. INFORMATION OUTSIDE OF THIS BOUNDARY IS BACKGROUND INFORMATION ONLY, NOT VERIFIED FOR ACCURACY AND IS NOT PART OF THIS PLAT.

RE: General Plan Amendment Application – Change Land Use Designations from Office, Industrial Park, and Transitional Mixed Use to Community Commercial in Las Soleras Master Plan Parcels 19, 20, 21, 23, 24 and 26.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of applying for an amendment to the City of Santa Fe's General Plan per the SFCC 14-3.2 - AMENDMENTS TO THE GENERAL PLAN. This application is a companion to both a Master Plan Amendment and Rezoning application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

PURPOSE AND INTENT:

The current General Plan classification along with the *proposed* land use classification by parcel can be found in the table below. The combined area of all Parcels 19 – 26 is 57.63 acres.

Parcel	Acres	Current Land Use Classification	Proposed Land Use Classification	Address Santa Fe, 87507	UPC Number
19	9.11	Transitional Mixed Use	Community Commercial	5021 Rail Runner Loop	1050094200323000000
20	10.70	Business Park	Community Commercial	5091 Rail Runner Loop	1050094093244000000
21	4.70	Office	Community Commercial	5140 Rail Runner Loop	1049094529247000000
22*	9.12	Community Commercial	Community Commercial	5090 Rail Runner Loop	1050094065275000000
23	7.27	Office	Community Commercial	5040 Rail Runner Loop	1050094143308000000
24	6.18	Office	Community Commercial	4354 Beckner Road	1050094129338000000
25*	7.37	Community Commercial	Community Commercial	4552 Beckner Road	1050094041306000000
26	3.48	Office	Community Commercial	5210 Rail Runner Loop	1049094503274000000

**No change in Land Use Classification requested*

The purpose of this application is to provide a uniform Community Commercial land use classification along with a uniform C-2 zoning district (via separate rezoning application) across parcels 19-26 to allow for the adjustment of parcel lot lines to deliver future development that is better aligned with the goals and intent of the General Plan.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses as allowed by a Community Commercial land use classification and a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The reclassification of parcels to Community Commercial will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be reclassified as Community Commercial will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development and inconsistent with the goals and intent of the General Plan.

A future Rail Runner rail stop was envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. Although this demand will be difficult to achieve, it will be next to impossible without the somewhat denser development that can be realized by a reclassification to Community Commercial in parallel with a uniform C2 General Commercial zoning district.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is classified as Community Commercial and zoning is C-2, General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as Office. It is partially developed with the Presbyterian Medical Services Medical Office Building recently opened in the second quarter of 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire North edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as Office/C-1; Residential 12-29 dwelling units/R21; and Residential 3-7 dwelling units/R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this General Plan Land Use reclassification and related Rezoning application on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site.

Thanks for your review and consideration of this application. Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.
Orion West, LLC

Las Soleras Parcels 19-26 - Master Plan Amendment Application
Approval Criteria Responses
February 12, 2024
Amended to include revised General Plan Approval Criteria: July 30, 2024

The proposed amendment to reclassify Las Soleras Master Plan parcels from Transitional Mixed Use, Business Park, and Office to Community Commercial is summarized in Table I. by parcel.

Table I. ***Las Soleras Parcels 19-26 proposed General Plan Land Use Classification***

Parcel	Acres	Current Land Use Classification	Proposed Land Use Classification	Address Santa Fe, 87507	UPC Number
19	9.11	Transitional Mixed Use	Community Commercial	5021 Rail Runner Loop	1050094200323000000
20	10.70	Business Park	Community Commercial	5091 Rail Runner Loop	1050094093244000000
21	4.70	Office	Community Commercial	5140 Rail Runner Loop	1049094529247000000
22*	9.12	Community Commercial	Community Commercial	5090 Rail Runner Loop	1050094065275000000
23	7.27	Office	Community Commercial	5040 Rail Runner Loop	1050094143308000000
24	6.18	Office	Community Commercial	4354 Beckner Road	1050094129338000000
25*	7.37	Community Commercial	Community Commercial	4552 Beckner Road	1050094041306000000
26	3.48	Office	Community Commercial	5210 Rail Runner Loop	1049094503274000000

**No change in Land Use Classification requested*

SFCC 14-3.(E) GENERAL PLAN AMENDMENT APROVAL CRITERIA

(1) Criteria for All Amendments to the General Plan: The planning commission and the governing body shall review all general plan amendment proposals on the basis of the following criteria, and shall make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any amendment to the general plan:

(a) consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;

Response: The proposed General Plan Amendment for Las Soleras parcels 19-26 aligns with the growth projections for Santa Fe, fulfilling economic development goals as set forth in the comprehensive economic development plans detailed in both the Angelou Report and the 2008 Economic Development Strategy. This alignment ensures consistency with Santa Fe's economic development goals, specifically, the following goals are achieved:

Growth Projections, Economic Diversification, and Community Development: The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report further emphasizes the importance of diversifying Santa Fe's economic base to ensure sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment to enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being.

Infrastructure Utilization and Enhancement: The Angelou Report highlights the critical role of effectively utilizing existing infrastructure in fostering sustainable economic development (p. 33). Complementing this, the 2008 Economic Development Strategy details initiatives aimed at enhancing business infrastructure, which includes improving accessibility to essential services, utilities, and transportation systems. These improvements are vital for the success of business operations and the overall development of the community (Economic Development Division Strategy for Implementation pp. 4, 6). The proposed amendment specifically leverages this existing infrastructure to bolster economic growth and sustainability in the Las Soleras area, ensuring that the development aligns with Santa Fe's strategic goals for economic expansion and community enhancement.

Support for Entrepreneurial and Small Business Activities; Enhancement of Local Services and Job Opportunities: Both the Angelou Report and the Economic Development Division Strategy for Implementation emphasize the importance of bolstering Santa Fe's economic health by supporting small businesses and entrepreneurial ventures (Angelou Report p. 25; Economic Development Division Strategy for Implementation pp. 4, 6). The proposed amendment to transition land use to Community Commercial aligns with these objectives by enhancing spaces conducive to the growth of small businesses, thereby fostering job creation and economic resilience. This transformation into Community Commercial spaces is designed to bolster local services and generate employment opportunities, thereby advancing the economic goals of increasing job availability with better wages for Santa Fe residents, as outlined in the 2008 Economic Development Strategy (pp. 4, 6). This approach not only supports emerging business ventures but also contributes significantly to community development and economic diversification.

(b) consistency with other parts of the general plan;

Response: This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application). Specifically, the following policy goals are achieved:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*

Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*

Policy 4-4-G-4: *Promote a balance between residential development and new employment*

opportunities in detailed plans prepared for future growth areas; and

Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*

Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*

Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*

Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*

Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*

Policy 9-2-G-5: *Promote small business.*

The proposed amendment for reclassifying parcels 19-26 within the Las Soleras Master Planned community to Community Commercial aligns closely with the 1999 City of Santa Fe General Plan, ensuring the development is in harmony with broader city planning goals. The transition to Community Commercial addresses the need for a variety of housing types and mixed uses in the community, a principle supported by the plan's emphasis on creating diversified urban areas that balance residential and commercial growth. This change is designed to provide the necessary commercial services to a growing residential population, supporting the local community by offering neighborhood-focused retail, restaurants, and services that enhance the quality of life and economic viability of the area.

This amendment also supports strategic economic development by promoting higher-wage job opportunities, particularly in the healthcare sector, as evidenced by new facilities like the Nexus Health Medical Office and Cancer Center and the Presbyterian Hospital. These developments not only cater to the community's health needs but also contribute to the local economy by creating jobs that offer competitive wages. The emphasis on developing commercial areas that are accessible and encourage pedestrian activity aligns with city policies aiming to concentrate population densities in developing areas with central transit nodes, thereby reducing auto dependence and fostering a more sustainable urban environment.

The reclassification also facilitates a strong foundation for economic growth and community well-being by ensuring that new developments are integrated with the existing and planned infrastructure. This includes water and sewer systems and future improvements like the Las Soleras Bridge and expanded trails, enhancing connectivity and accessibility. By creating a cohesive community commercial hub that aligns with adjacent land uses and supports emerging business opportunities, the amendment reinforces the city's goals to develop an attractive climate for conducting business, promote small businesses, and ultimately achieve a community that balances residential and employment-based development.

(c) the amendment does not:

(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or

Response: With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or

Response: The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;

Response: As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

(d) an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification.

Response: The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos.

(e) compliance with extraterritorial zoning ordinances and extraterritorial plans;

Response: Since the adoption of the Subdivision Platting and Planning Zoning Ordinance (SPPaZO), the City has relinquished land use regulatory authority outside the city limits and the transfer of authority from extraterritorial jurisdiction to the City.

(f) contribution to a coordinated, adjusted, and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity, or the general welfare, as well as efficiency and economy in the process of development; and

Response: A consistent land use designation of Community Commercial for parcels 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.

In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan.

(g) consideration of conformity with other city policies, including land use policies, ordinances, regulations, and plans.

Response: Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed.

A case manager will be assigned to your project and will notify you within 10 business days if any additional information is needed. After your application has been reviewed by City staff, we will contact you regarding public notice requirements. A packet of information and instructions will be provided regarding the required mailing and sign posting. Please contact the Land Use Department staff at (505) 955-6647 with any questions.

Submittal Checklist (Requirements found in Section 14-3.5 SFCC 1987)

One (1) 24"x36" or 11"x17" scalable plan set and 1 CD or Flashdrive with a PDF copy are required. Submittal requirements may vary based on the individual application and the requested zoning district. The City reserves the right to request additional information at any time during the review process. See Section 14-4 and 14-5 SFCC 1987 for rezoning regulations related to specific zones. Please include the following and check box to indicate submittal:

☒	Letter of Application (intent, location, acreage)	☒	Narrative addressing approval criteria below	☒	Legal Lot of Record, Legal Description	☐	Development Plan (see Section 14-3.8 SFCC 1987)	☐ NA	Landscape, Parking and Lighting Plan, Signage Specifications
						☒	No Development Plan		
☐ NA	Terrain Management Plans (as required by Section 14-8.2 SFCC 1987)	☒	Traffic Impact Analysis ***(if required)***	☐ NA	Archaeological Clearance ***(if applicable)***	☐ NA	Sewer and Water Plan (including profiles and details), letter of availability ***(if applicable)***	☐ NA	Phasing Plan ***(if applicable)***
☒	ENN Meeting Notes								

Rezoning Approval Criteria, Sections 14-3.5(C) and (D) SFCC 1987

(C) Approval Criteria

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) one or more of the following conditions exist:
  (i) there was a mistake in the original zoning;
  (ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or
  (iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;

(b) all the rezoning requirements of Chapter 14 have been met;

(c) the rezoning is consistent with the applicable policies of the general plan, including the future land use map;

(d) the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city; and

(e) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.

(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.

(D) Additional Applicant Requirements

(1) If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;

(2) If the proposed rezoning creates a need for additional streets, sidewalks or curbs necessitated by and attributable to the new development, the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning requirements.

Signature:  Date: **12 February 2024**

RE: Las Soleras <u>Rezoning</u> Application – change Zoning Districts for Master Plan Parcels 19, 20, 21, 23, 24 and 26 to a uniform C-2 District.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of submitting a rezoning application per the SFCC 14-3.5 – REZONINGS. This application is a companion to both a General Plan Amendment and Master Plan Amendment application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

The current Master Plan zoning districts along with the zoning districts proposed with this application are found in the table below. The combined area of Parcels 19 – 26 is 57.63 acres.

Table I. ***Las Soleras Parcels 19-26 proposed Zoning***

Parcel	Acres	Current Zoning District	Proposed Zoning District	Address Santa Fe, 87507	UPC Number

26	3.48	C-1	C-2	5210 Rail Runner Loop	1049094503274000000

**No change in Land Use Classification or Zoning requested*

The purpose of this application is to propose the rezoning of Las Soleras Master Plan Parcels 19, 20, 21, 23, 24, and 26 allowing for a uniform C-2, General Commercial Zoning District across parcels 19-26 collectively. The intent is to allow for the adjustment of existing lot lines needed to accommodate future development in a thoughtful and efficient manner. The consistent C-2 zoning can accommodate three story office along with retail services including full-service restaurants. This flexibility in use will provide an opportunity to pursue business and commercial uses that offer higher salaries and much needed services for the surrounding neighborhood.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses allowed in a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The rezoning of parcels to a C-2 District will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged within the site.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be zoned as C-2 General Commercial will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development. A uniform C-2 zoning across parcels 19-26 will make the relocation of lot lines an

administrative process enabling the site parcels to be easily configured to the needs and sizes of a variety of uses.

A future Rail Runner rail stop was originally envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. A uniform C-2 zoning district could accommodate uses that eventually establish this base level of ridership.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is zoned C-2 General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely and especially within C-2 Zoning districts.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as C-1. It is partially developed with the Presbyterian Medical Services Office Building recently opened in late 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire northern edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as C-1; R21; and R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site.
Thanks for your review and consideration of this application.

Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.
Orion West, LLC

Las Soleras Parcels 19-26 – Rezoning Application
Approval Criteria Responses
February 12, 2024

The proposed rezoning of Las Soleras Master Plan parcels 19, 20, 21, 23, 24, and 26 from MU, BIP, and C-1 to a uniform C-2 is summarized in Table I.

Table I. ***Las Soleras Parcels 19-26 proposed Zoning***

Parcel	Acres	Current Zoning District	Proposed Zoning District	Address Santa Fe, 87507	UPC Number
19	9.11	MU	C-2	5021 Rail Runner Loop	1050094200323000000
20	10.70	BIP	C-2	5091 Rail Runner Loop	1050094093244000000
21	4.70	C-1	C-2	5140 Rail Runner Loop	1049094529247000000

26	3.48	C-1	C-2	5210 Rail Runner Loop	1049094503274000000

**No change in Land Use Classification or Zoning requested*

SFCC 14-3.5 (C) REZONING - APPROVAL CRITERIA

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) one or more of the following conditions exist:

(i) there was a mistake in the original zoning;

Response: Not applicable

(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or

Response: As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 - 26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development.

Las Soleras parcels 19-26 have been referenced collectively as triggers for various infrastructure development – most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for parcels 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative

impact on Master Plan parcels 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue.

(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;

Response: As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4: *Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*
Policy 9-2-G-5: *Promote small business.*

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The

intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

(b) all the rezoning requirements of Chapter 14 have been met;

Response: Yes, all zoning requirements of Chapter 14 have been met.

(c) the rezoning is consistent with the applicable policies of the general plan, including the future land use map;

Response: As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2:	*There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2:	*Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4:	*Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6:	*Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1:	*Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2:	*Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3:	*Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4:	*Develop and maintain an attractive climate for conducting business in Santa Fe; and*
Policy 9-2-G-5:	*Promote small business.*

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

(d) the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city; and

Response: The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management.

(e) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.

Response: The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request.

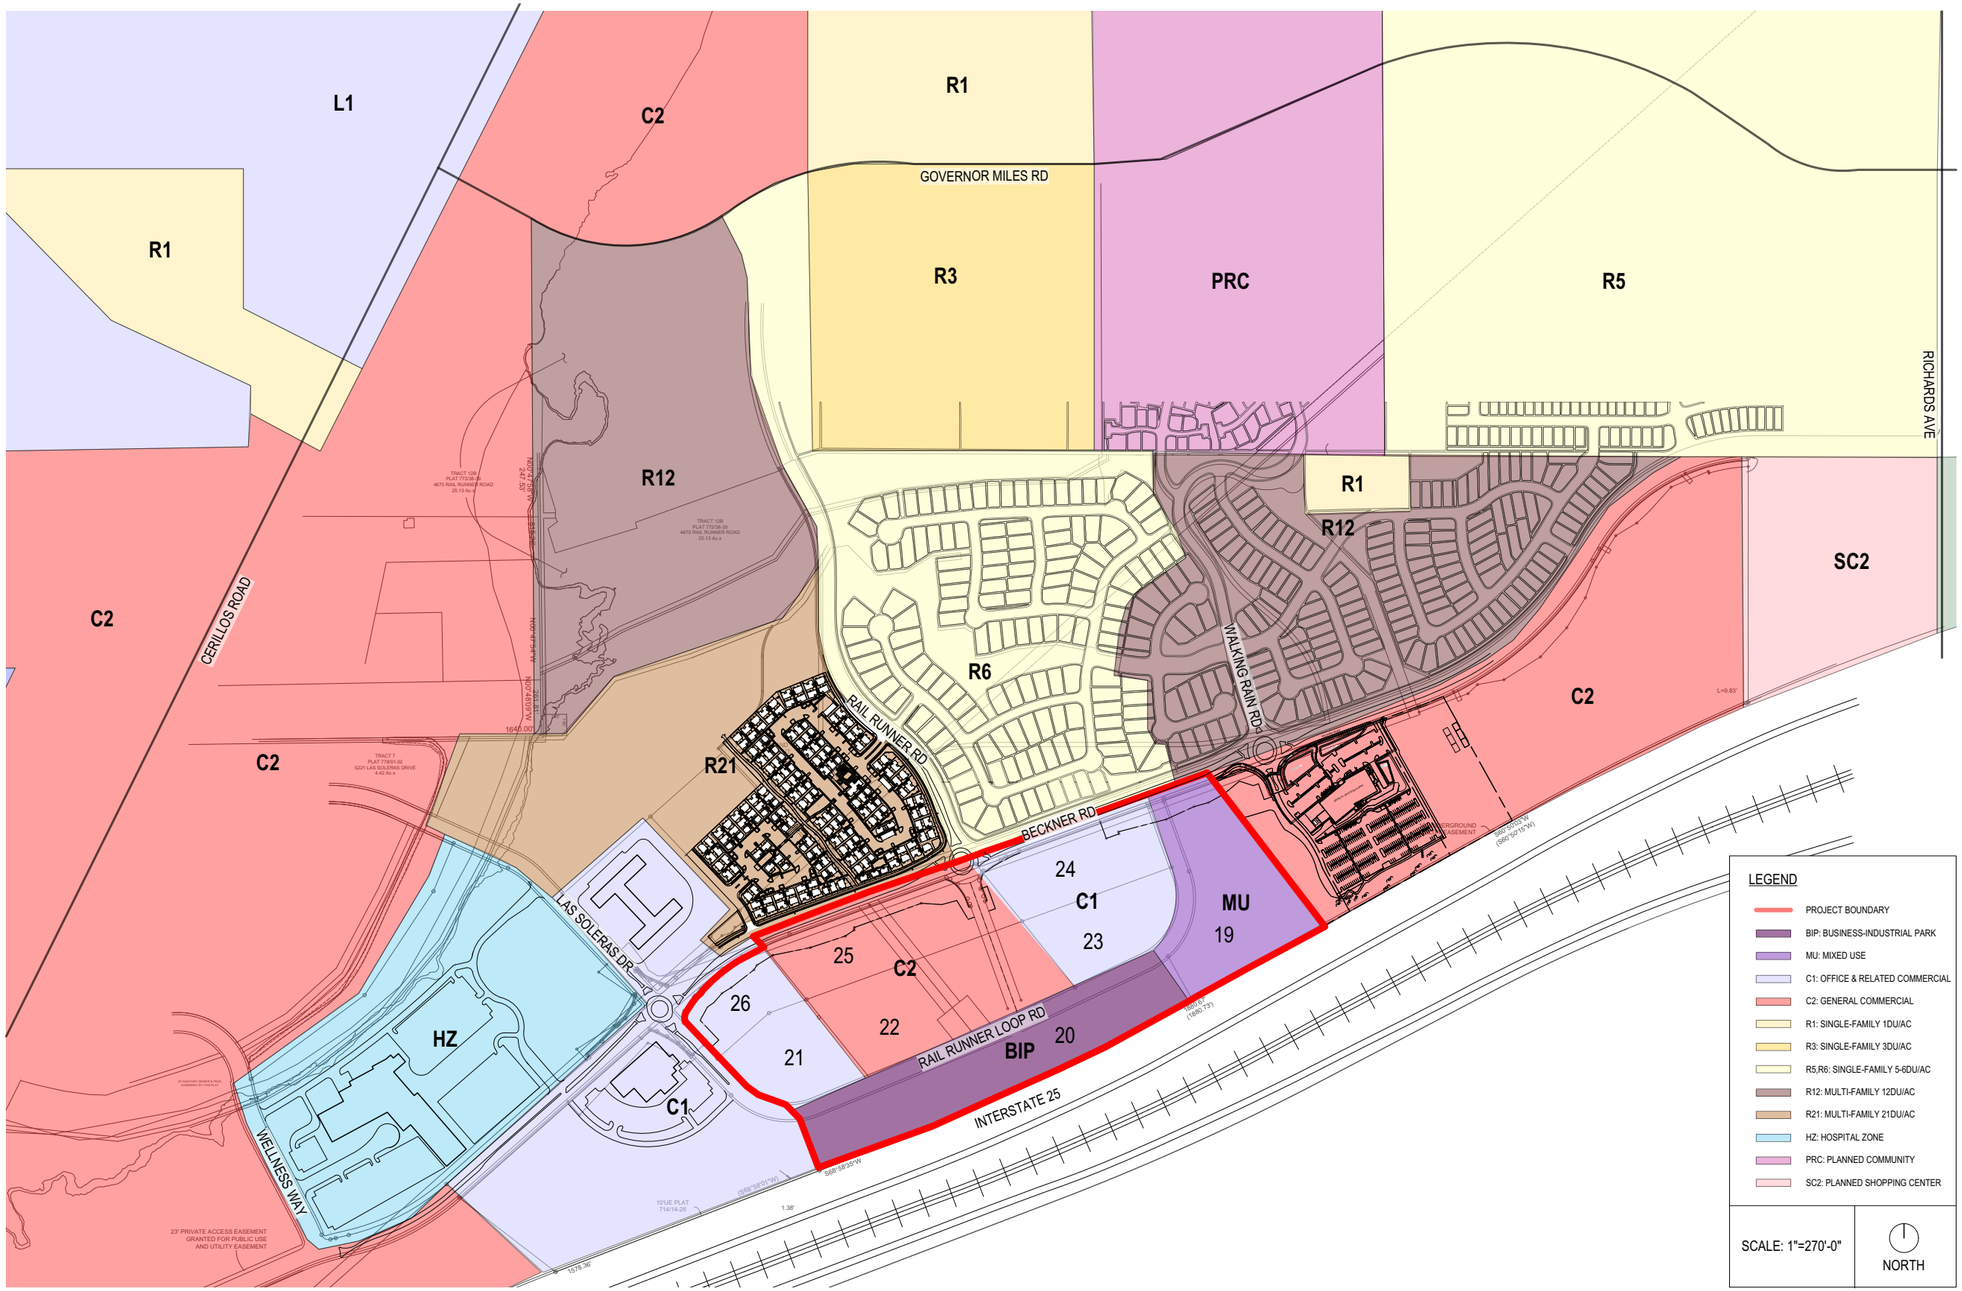
(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

Response: With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

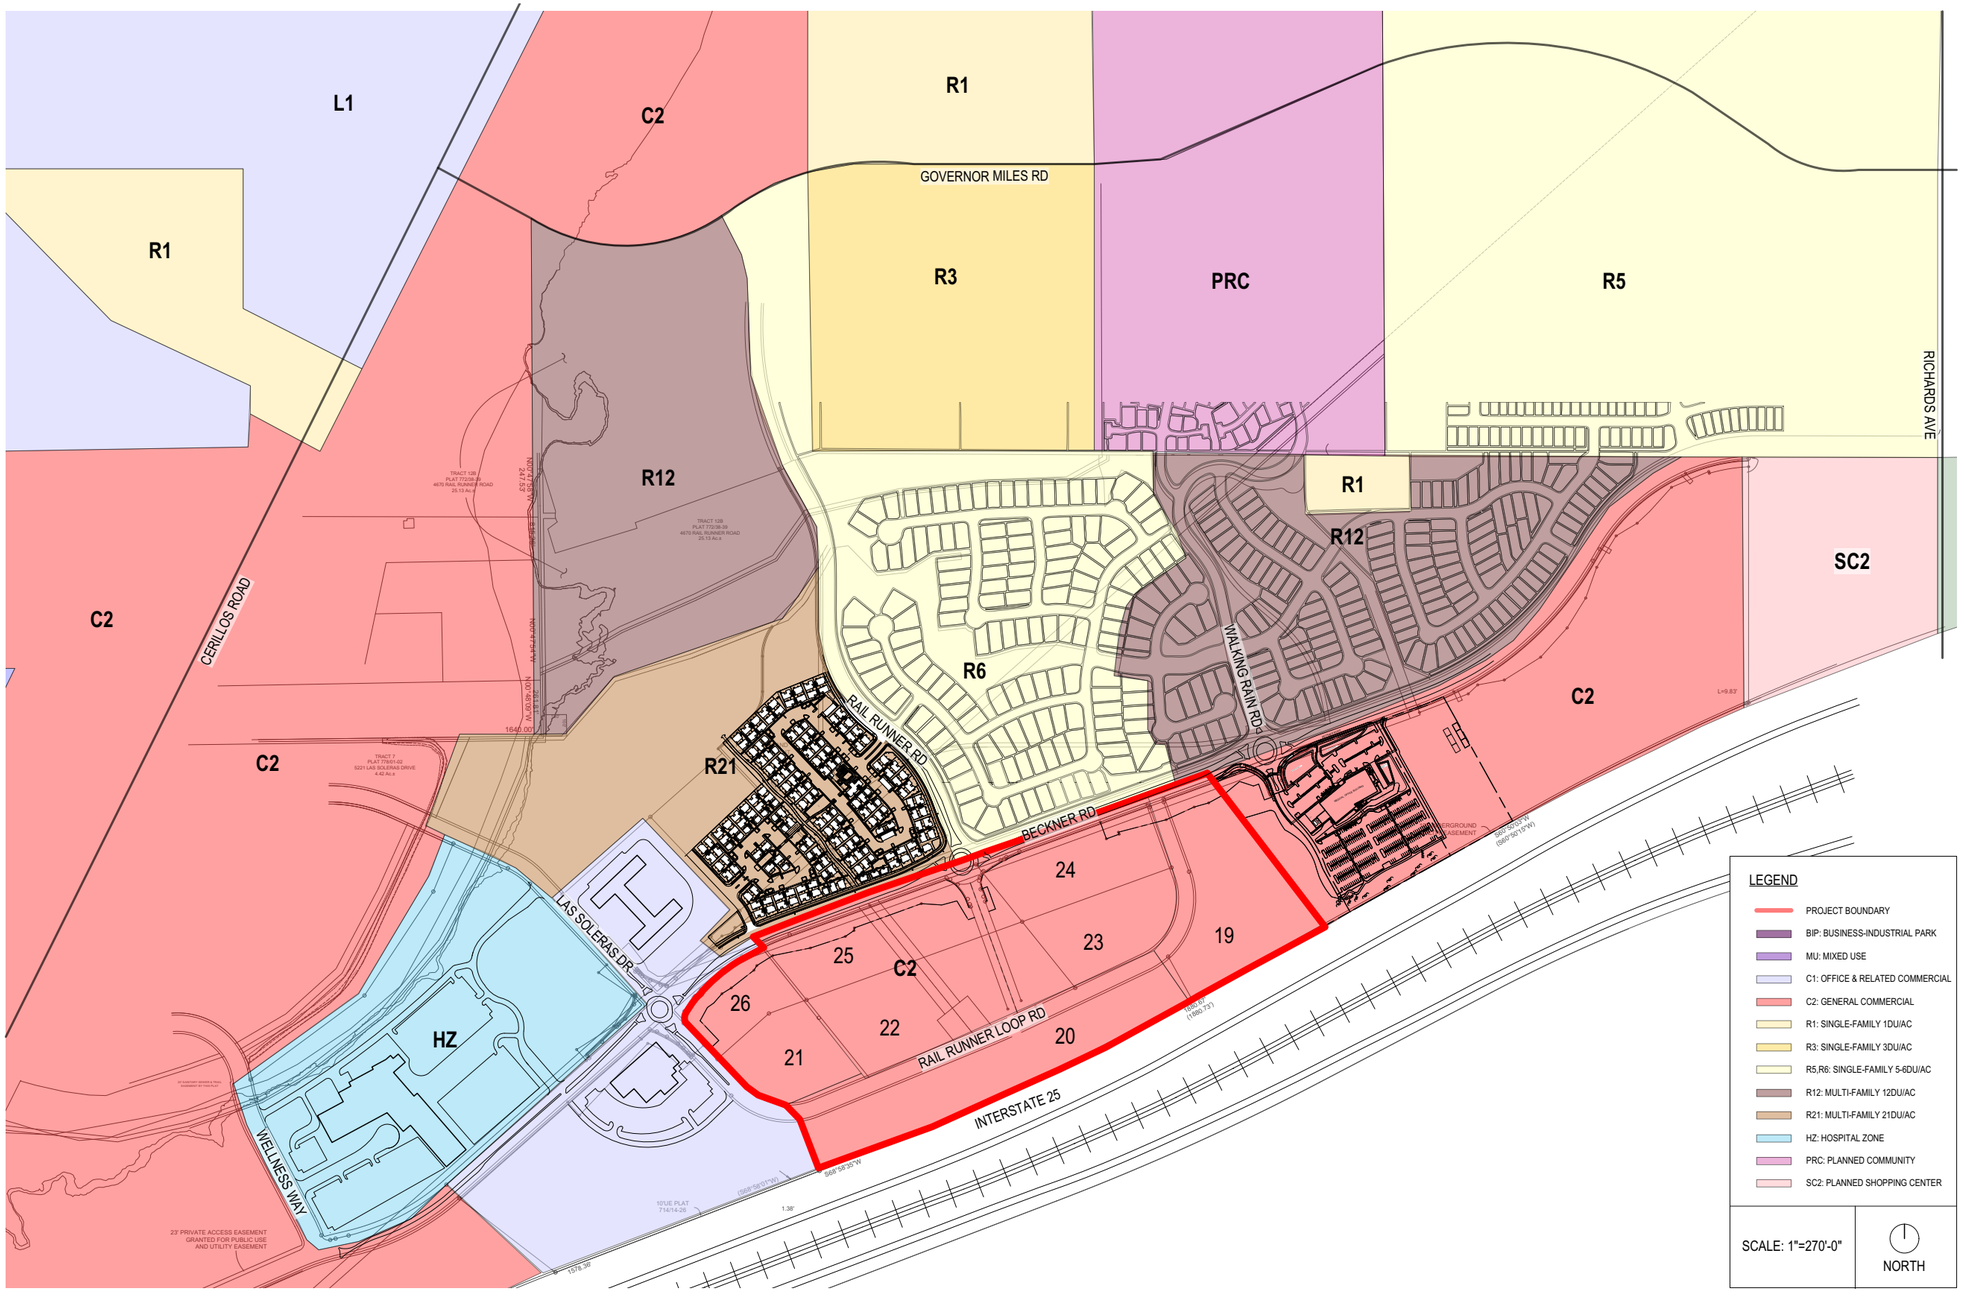
The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

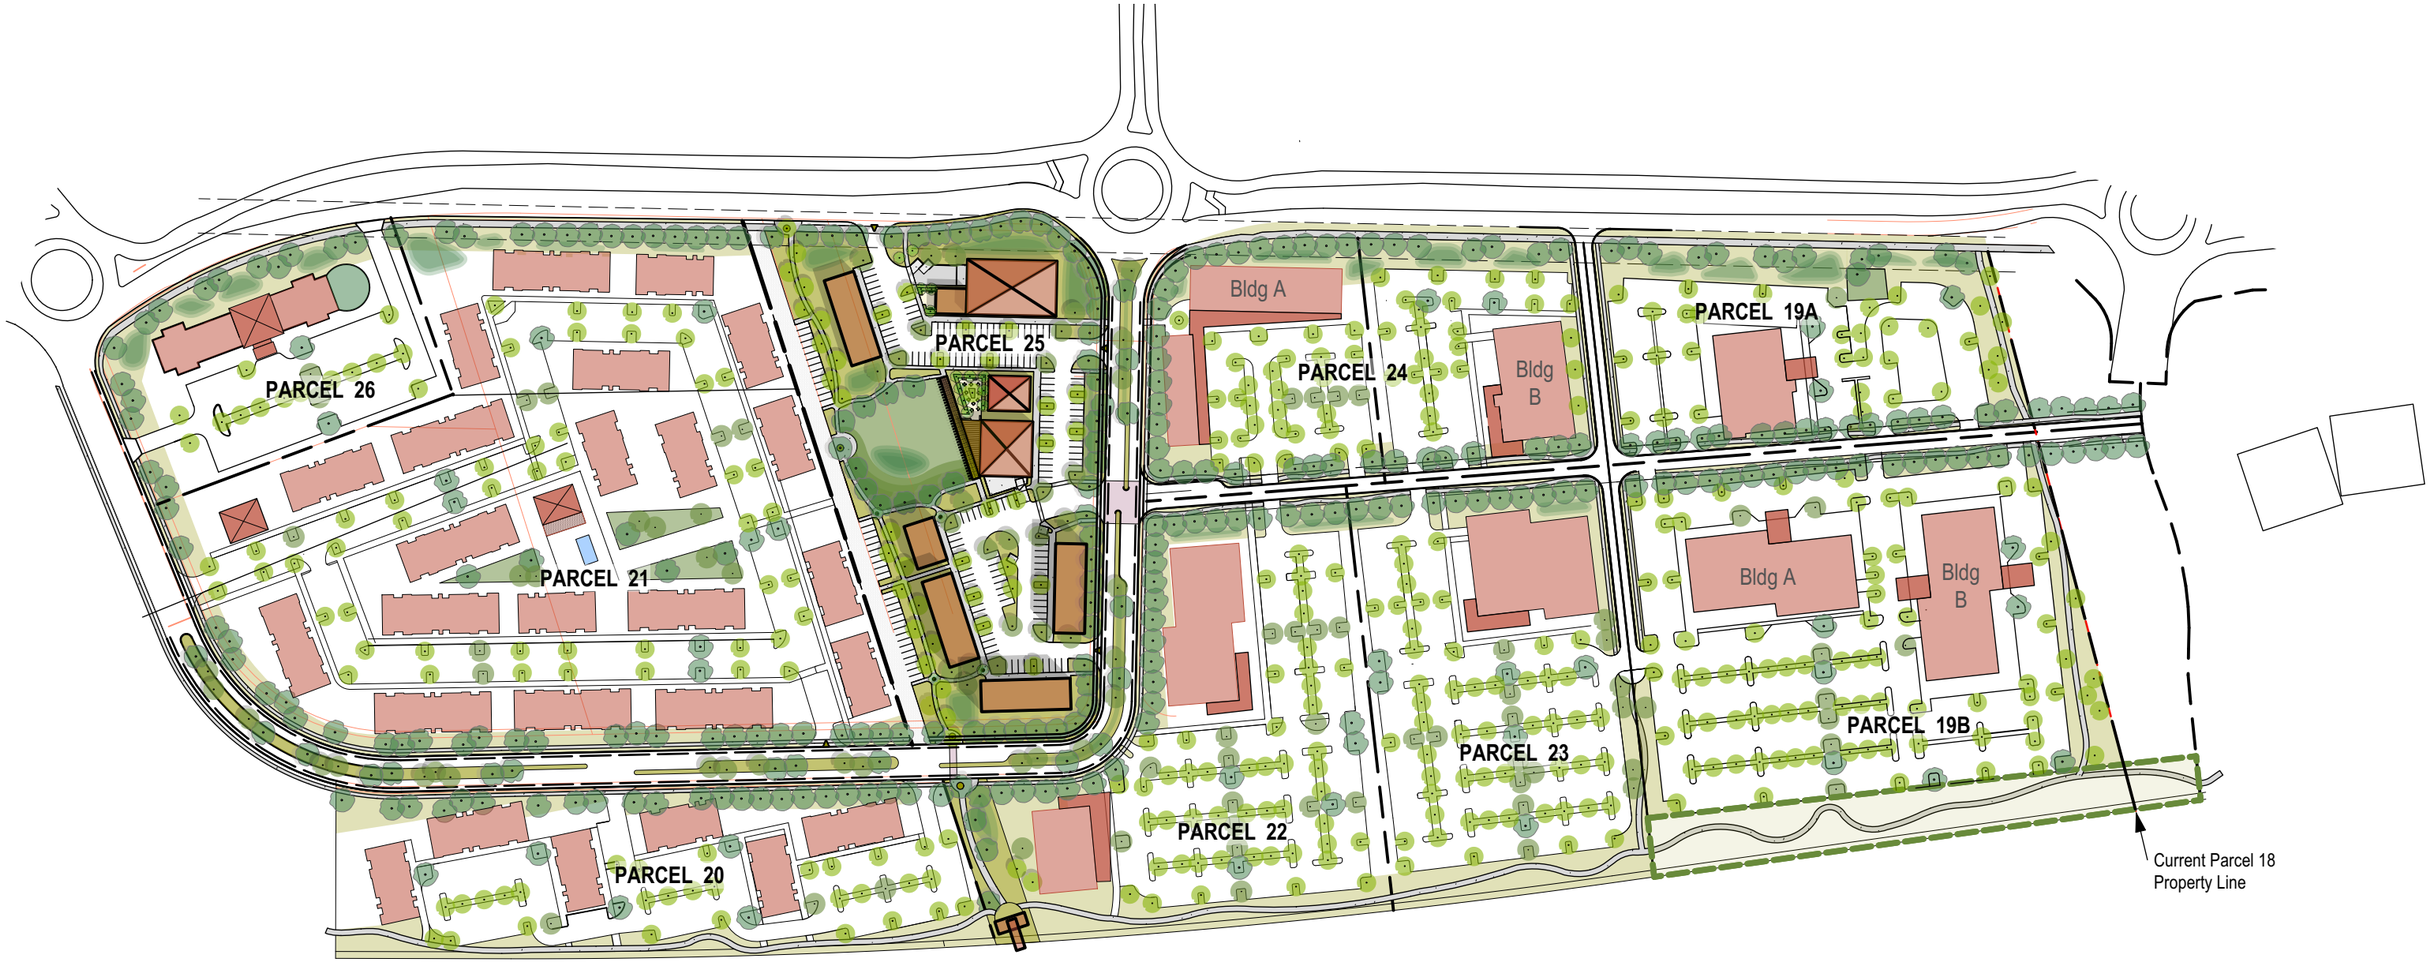


Response: The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.



Response: As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.



On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

Las Soleras Core

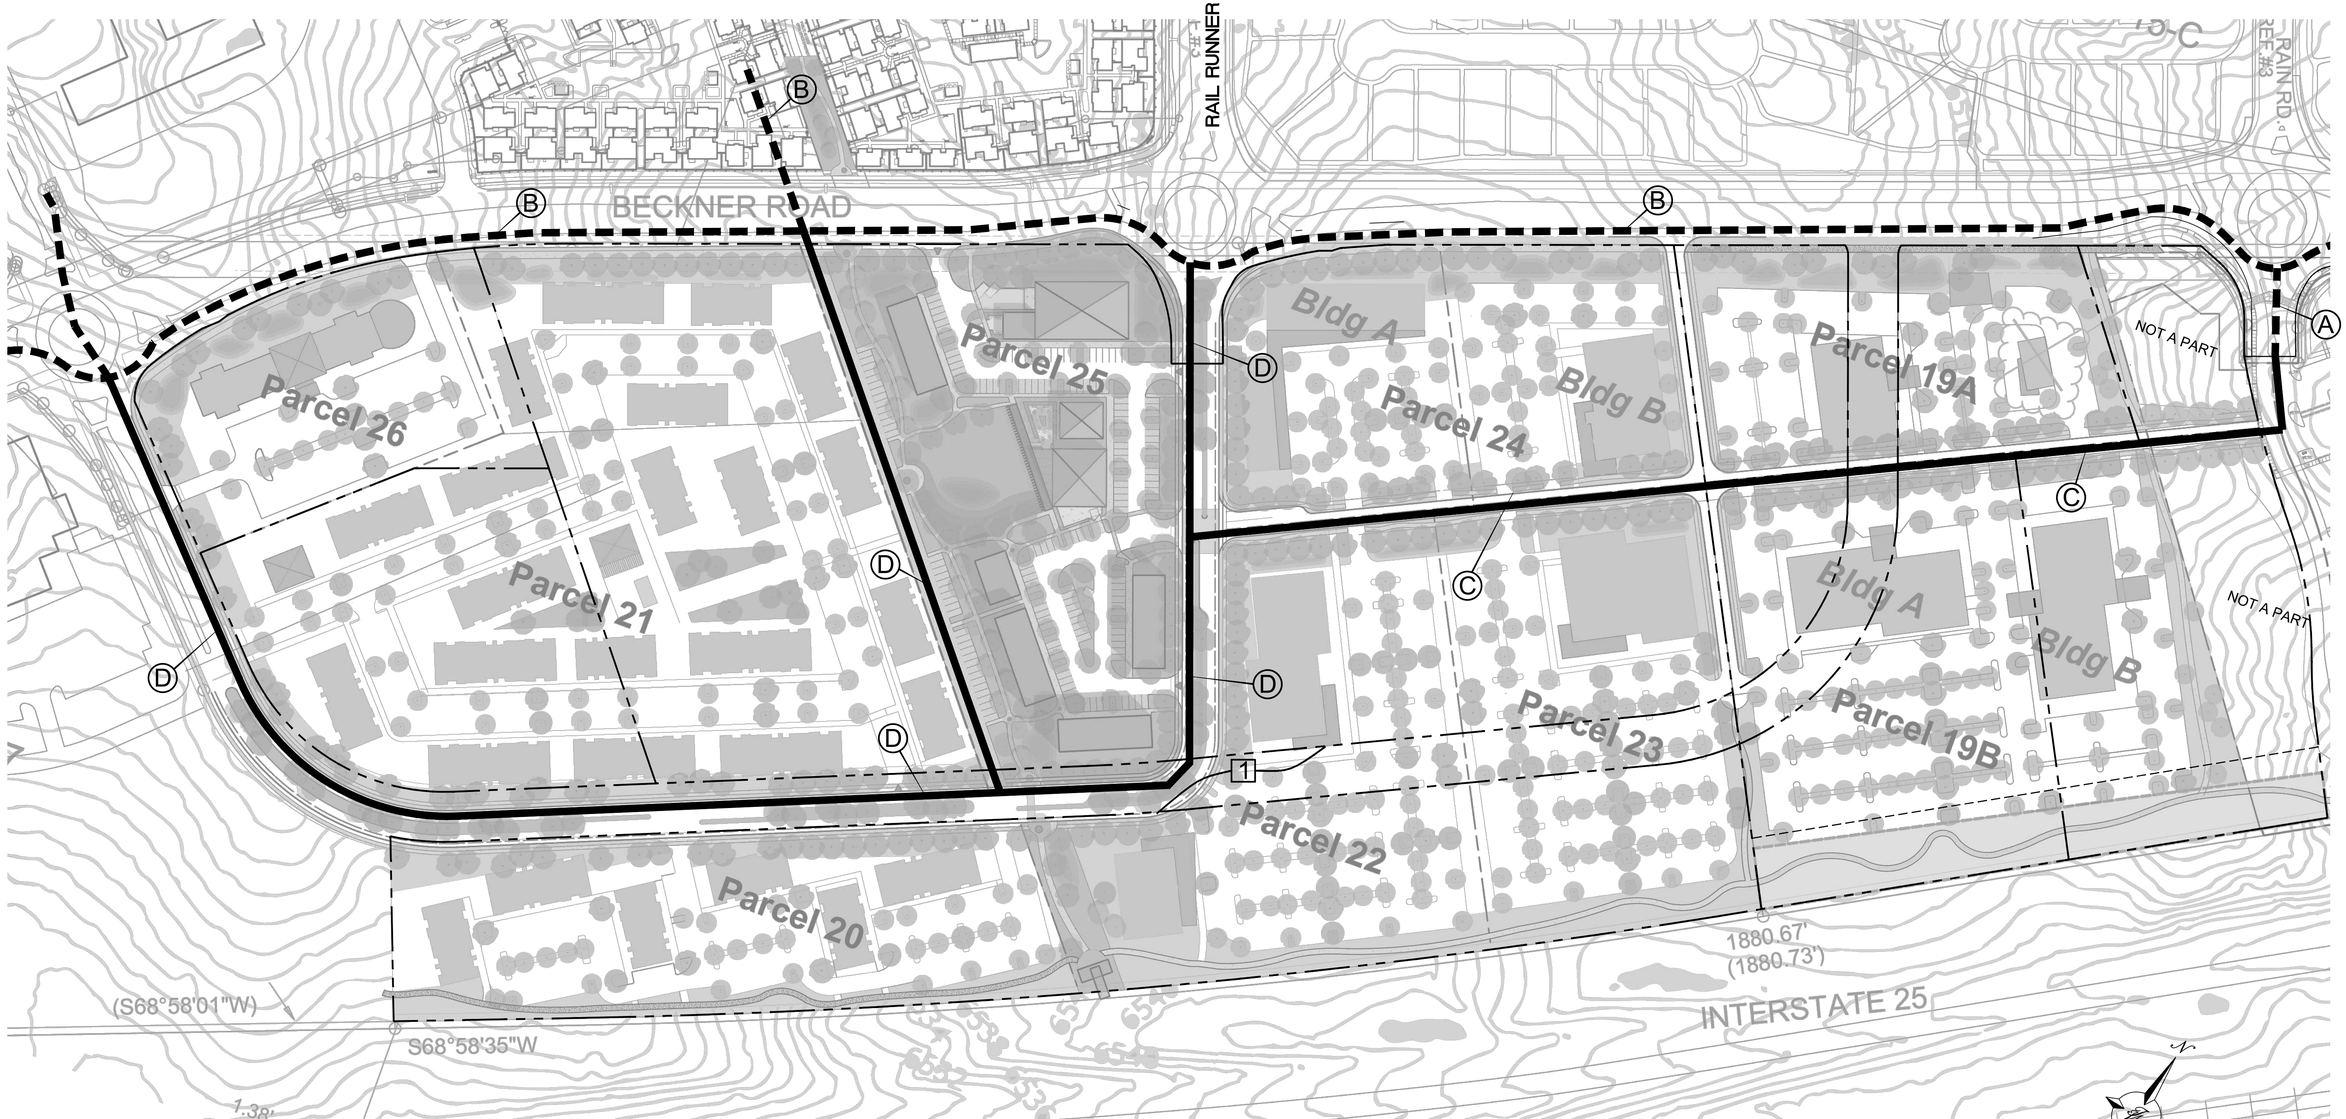
The Las Soleras Core is uniquely able to become the vibrant heart of southern Santa Fe. The Las Soleras Core is in an optimal location and size to host a variety of iconic neighborhood needs--a market, a restaurant, food-beverage outlets, neighborhood retail and commercial. Here is a conceptual look what the Core could be.

- Water harvesting along Becker and along Rail Runner Loop to capture stormwater to support a green edge of trees and native plants.
- Neighborhood Scale Market *(Size example: Kaune Market)*
- Food & Beverage *(Size example: Iconic Coffee)*
- Possible future road connection to east parcels would support an active engagement with lively Core
- Restaurant oriented toward "The Green" *(Size example: Rustica Resturant/SF Brewery)*
- The Long Zaguan would be a shady connector across the Green. An iconic feature with photovoltaic panels--conveying an embrace of art and environment.
- The Green repositions the required Master Plan parklet to be the heart of the Las Soleras Core. Where people can come to meet, eat, relax, and engage in small-scale community events such as music or recreation.
- Two-story buildings at the southern end of the Core would provide retail-commercial services spaces from which to serve the Las Soleras neighborhoods and south Santa Fe.
- The Rambla Trail system connects the Core with the surrounding residential neighborhoods, condominiums, senior living, apartments, office complexes, the regional hospital to the west. possible medical and education facilities, and a potential future rail raod station at I-25.

Las Solares Development Prototypes Data

Sept. 1, 2023

Notes: A. Test based on program and product prototypes



B. Applies CoSF development ordinance requirements

C. Test is for single story development.

D. Parking based on net lease (NL) of 10% reduction of gross square footage (GSF)

Opportunity: Consider asking CoSF to use a shared parking plan to increase density. Target would be for 10% shared of total provided.

Name	Plan Gross Sq. Ft.	Parking Required

Mr. Dan Esquibel
City of Santa Fe Water Division
200 Lincoln Avenue
Santa Fe, NM. 87501

RE: LAS SOLERAS 57 ACRE DEVELOPMENT
LAS SOLERAS PARCELS 19-26
WATER AND WASTEWATER LETTER

Dear Mr. Esquibel:

To ensure that the proposed General Plan land use classification of Community Commercial and associated proposed rezoning to a uniform C-2 district of the 57.63 acres of Las Soleras Master Plan parcels19-26 (located along the Southern edge of Beckner Rd between Las Soleras Dr and Walking Rain Rd) will not produce excessive demand on the existing water and sanitary sewer infrastructure in Beckner Rd, Tierra West LLC has prepared the following summary of existing water and sewer capacities and water and sewer flowrates for a conceptual design we are referencing as "Conceptual Test Fit A" for your review.

Sanitary sewer capacities were calculated assuming gravity flow along two of its segments – the segment from the roundabout at Las Soleras Dr to the roundabout at Rail Runner (along which the minimum slope is 0.73%), and another segment from Rail Runner to the roundabout at Walking Rain (along which the minimum slope is 1.05%). The capacity of the existing water main was calculated assuming an 11 ft/s flow velocity.

The capacity of both existing pipes was found to be sufficient to serve the property if developed per either the existing or proposed zoning, and the water and sewer flowrates for these conditions are summarized below.

For the first segment mentioned above (from Las Soleras Dr to Rail Runner), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 843 gpm with velocity 3.44 ft/s.

For the second segment mentioned above (from Rail Runner to Walking Rain), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 1,011 gpm with velocity 4.13 ft/s.

The peak sanitary sewer flowrate calculated for the development assuming development per the existing zoning was 150 gpm, For design Test Fit Concept "A" it is 191 gpm,

Water discharge was assessed for the existing 12" ductile iron main in Beckner using an assumed velocity of 11 ft/s and was calculated at 2,693 gpm.

The peak water flowrate calculated for the development assuming development per the existing zoning was 167 gpm with average irrigation flowrate 5.79 gpm, for design Test Fit Concept "A" it is 212 gpm with average irrigation flows at 5.52 gpm,

If you have any questions or need additional information regarding this matter, please do not hesitate to contact me.

Sincerely,

Ronald R. Bohannan P.E

PO Box 5744, Santa Fe, NM 87502-5744

EARLY NEIGHBORHOOD MEETING NOTES

Project Name:	Las Soleras
Project Location:	4200 Beckner Road
Project Description:	Development Plan Amendment for Development Plan with Summary Plat/Lot Split for proposed 141-unit Apartment Complex
Applicant:	
Agent:	Orion West LLC
ENN Meeting Date:	14 November 2023
ENN Location:	Via Zoom
Application Type:	General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.
Land Use Planner:	Dan Esquibel
Attendance:	**City of Santa Fe:** Dan Esquibel **Developer Team:** Brian Nenninger (Agent), Maureen Mestas (Agent), Scott Herbert, Dave Delgado, Karl Sommer, Esq. **Neighborhood/Public:** 1 attendee. An unidentified neighbor who was on a non-video tile but did not identify him/herself or speak.

Notes/Comments:

14 November 2023/ 5:30 – 6:12pm Meeting

The meeting started at approximately 5:39pm. Roll call and introduction of those attending was held. Dan Esquivel indicated that he would like to wait an additional few minutes to allow others to log in. After a brief wait, the meeting continued without any additional attendees.

Brian Nenninger then introduced the Developer Team.

Brian Nenninger informed the group that this ENN is for the purposes of noticing a General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5 of all parcels in the Las Soleras Master Plan; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.

Highlights Brian shared during the presentation included:

The property is located within the 545 acre Las Soleras Master Plan Subdivision that was first created via an annexation ordinance in 2009. Since 2009 the Master Plan has been amended multiple times – the most recent being October 2019.

- Eight (8) existing legal parcels that together comprise 57.63-acres.
- Existing Zoning:

C-2: Two parcels
C-1: Four parcels
MU: One parcel
BIP: One parcel

- Master Plan Items that need to be "Cleaned Up."

Rail Runner Loop Road realignment to meet Rail Runner Road
Lot Line adjustments and resizing of parcels to better accommodate Commercial Users
Rambla open space design including location of "parklet."

The Applications that are being shared in the ENN are:

- General Plan Amendment Application
- Master Plan Amendment Application

Address Realignment of Rail Runner Loop Road
Propose modification to Rambla width.
Propose flexibility of "parklet" location along the Rambla
Discussion of Master Plat/Parcel Realignment

- Rezoning Application

Propose C-2 Zoning for eight parcels.

- Planned Unit Development (PUD) Application under consideration/discussion.

with City of Santa Fe

Brian wanted to take particular note that this is not an application for Development Plan Per the Santa Fe City Code. Qualified development/building construction will require separate Development Plan Applications, ENNs and Planning Commission Hearings.

He further stated that the proposed rezoning, along with the General Plan and Master Plan amendments lay the groundwork for better development needed to meet local market demands.

Those possible mix of uses for local market demand are:

- Neighborhood Commercial Retail, such as, Restaurants, Bakeries, Pubs, Coffee Shops, Marketplace/Grocery Coop, Copy/Printing, Dry Cleaning, Pharmacy
- Office (including Medical Office)
- Medical Education
- Multifamily Residential
- Hotel

Las Soleras Junction has transit-oriented improvements, specifically:

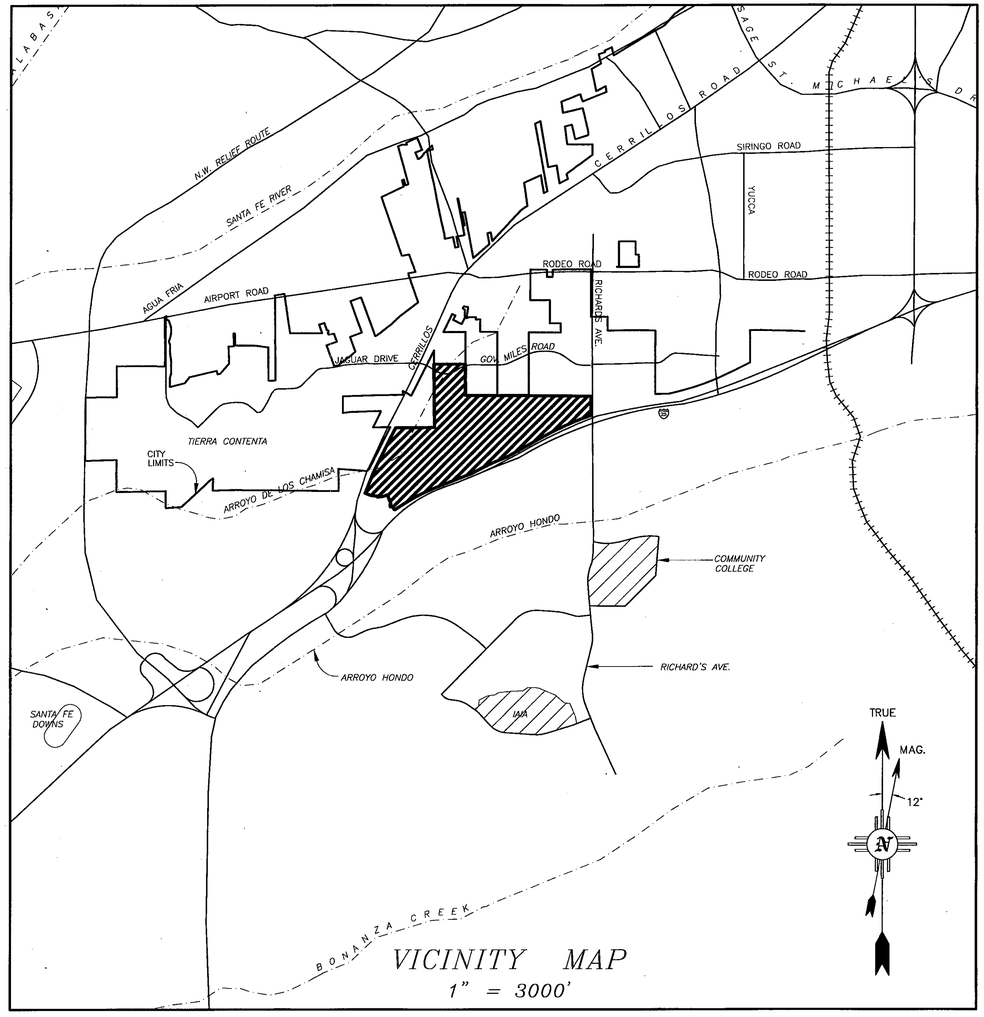
- Completion of Las Soleras bridge (triggered by 20 acres and 300,000 sf of development of parcels 19-26.)
- Further build out of Las Soleras trails system including the Rambla and "Parklet"
- Additional Bus stop/access on Rail Runner Loop Road
- Place holder for future Rail Runner Stop

Las Soleras Junction is a work in progress. Conceptual test fits to understand options for flow of pedestrians and vehicles within the site. Engineering and Design of Las Soleras Bridge to complete Las Soleras Drive from Cerrillos to Beckner. Utility and Traffic Study activity will be required. Design Guidelines are being developed to provide a cohesive, responsible, and pleasing experience for those who use and access the site. Guidelines will stay within the Santa Fe City Code and address, Architecture Concepts, Landscape Design, Lighting, Trails, Sidewalk and Roadway Connectivity to and within the site.

Brian then summarized the intention of the applications for this ENN, those key points being:

- Clean up issues in the Master Plan created from past developments/amendments. including the realignment of Rail Runner Loop Road with the relocated Rail Runner Road.
- Lay the groundwork for more effective use of parcels 19-26 through consistent zoning to allow for administrative lot line adjustments.
- Provide greater flexibility in providing neighborhood retail services including Food and Beverage. Uses brought to the site will be driven by the local and area market.
- Facilitate the completion of Las Soleras Drive and Bridge connecting Cerrillos to Beckner.

Brian opened the ENN for questions from the City Staff and neighbors. No one in attendance who was believed to be a neighbor asked to speak. No neighbor or other interested party was on the CHAT feature to ask questions.



There was a brief discussion between Dan Esquivel and Brian Nenninger about the status of the applications after the meeting. The meeting was then adjourned by Dan Esquivel.

ANNEXATION, ROAD DEDICATION AND VACATION PLAT

PREPARED FOR

LAS SOLERAS

WITHIN SECTIONS 7, 17, AND 18, T.16N., R.9E., N.M.P.M.
SANTA FE COUNTY, NEW MEXICO.

NOTE:
ROAD DEDICATION MAY INCLUDE TEMPORARY OR PERMANENT CONSTRUCTION MAINTENANCE EASEMENTS FOR SLOPES, DRAINAGE STRUCTURES AND ANCILLARY IMPROVEMENTS AS DETERMINED BY FINAL ENGINEERING PLANS. OWNERS ACKNOWLEDGE THAT REASONABLE ADJUSTMENTS TO THE PRECISE LIMITS OF RIGHT–OF–WAY MAY BE REQUIRED BY THE PLANNING COMMISSION AT THE TIME OF SUBDIVISION PLAT APPROVAL.

ROADWAYS DEDICATED BY THIS PLAT MAY BE ADJUSTED TO ALIGN WITH CROSS STREET INTERSECTIONS AND TO SATISFY ENGINEERING STANDARDS PROVIDED THAT SUCH RE–ALIGNMENT DOES NOT DECREASE THE AREA OF DEDICATION AND IS ACCEPTED BY THE CITY AS EVIDENCED BY THE APPROVAL OF THE PUBLIC WORKS AND LAND USE DEPARTMENTS AND RECORDED AS A PLAT AMENDMENT.

LEGEND

BEARINGS ARE REFERRED TO THE NEW MEXICO STATE PLANE COORDINATE SYSTEM, NAD83 CENTRAL ZONE. DISTANCES SHOWN ARE GROUND LEVEL. REFERRED TO 6600' AMSL DATUM. TO CONVERT DISTANCES TO GRID DISTANCES MULTIPLY BY A SCALE FACTOR OF 0.999598.

- ●F DENOTES REBAR, OR AS SHOWN, FOUND.
- ● DENOTES 1/2" REBAR WITH CAP 7014 TO BE SET UPON RECORDING.
- • DENOTES CALCULATED POINT, NOT SET.
- DENOTES NEW LOT LINE.
- (#) DENOTES TRACT NUMBER.
- DENOTES BOUNDARY OF LANDS DEALT WITH BY THIS PLAT. INFORMATION OUTSIDE OF THIS BOUNDARY IS BACKGROUND INFORMATION ONLY, NOT VERIFIED FOR ACCURACY AND IS NOT PART OF THIS PLAT.

Title of Office: Notary Public

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2024-7898
Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment ("General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tracts 21 and 26, comprising approximately 8.18 acres and Tracts 23 and 24, comprising 13.45 acres from Commercial Office to Community Commercial ("Project"). The property is located at the southeast quadrant of the Las Soleras / Beckner Road roundabout ("Property") and is zoned C-1 (General Office).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7898.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. The Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan Amendment.
10. The Planning Commission heard Case #2024-7898 concurrently with Cases #2024-7899, 2024-7900, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tracts 21, 23, 24 and 26.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for General Plan amendments, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing.
16. The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment the proposal is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
18. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    The General Plan Amendment affects an area greater than two acres. Tracts 21 and 26 encompass 8.18 acres, and Tracts 23 and 24 encompass 13.45 acres (+/-21.63 total acres), both of which exceed the minimum size requirement for land use amendments.
19. General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
20. With the necessary infrastructure improvements as required by the conditions of approval, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
21. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
22. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
23. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the

Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing. All applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the General Plan Amendment is consistent with growth projections for Santa Fe, and that the project The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
7. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
8. The General Plan Amendment complies with SFCC 1987 Section 14-3.2(E)(1)(c), because it:
    a. does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby;
    b. affects an area greater than two acres. Tracts 21 and 26 encompass 8.18 acres, and Tracts 23 and 24 encompass 13.45 acres (+/-21.63 total acres), both of which exceed the minimum size requirement for land use amendments; and
    c. does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
9. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
13. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.
14. The Commission recommends approval of the requested General Plan amendment because the

applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-7898 to the Governing Body, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report.

Findings of Fact and Conclusions of Law

Case #2024-8852
Las Soleras Master Plan Tract 19 General Plan Amendment
Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment (the "General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tract 19, comprising approximately 9.11 acres from Transitional Mixed Use to Community Commercial ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned MU (Mixed Use).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8852.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023,virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan Amendment.
10. The Planning Commission heard Case #2024-8852 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8853, 2024-8854 and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tract 19.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for general plan approval, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. Based on the Staff Report and exhibits and the testimony and evidence presented at the hearing, the Planning Commission finds that all applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
16. The General Plan Amendment is consistent with growth projections for Santa Fe, and the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.).
    i. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
    ii. The General Plan Amendment affects an area greater than two acres. Tract 19 encompass 9.11 acres, and which exceeds the minimum size requirement for land use amendments.
    iii. The General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
18. With the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
19. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
20. The General Plan Amendment does not conflict with any existing City policies, or ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
21. The additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
5. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(c), the Commission finds that:
   iv. The amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
   v. The amendment affects an area greater than two acres. Tract 19 encompass 9.11 acres, and which exceeds the minimum size requirement for land use amendments.
   vi. The amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
7. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the Commission finds that with the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
8. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
9. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the Commission finds that the proposed amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(g), the Commission finds that the proposed amendment does not conflict with any existing City policies, or ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan
12. The Applicant met the applicable Submittal Requirements.
13. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING

COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-8852 to the Governing Body, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report.

Findings of Fact and Conclusions of Law

Case #2024-8854
Las Soleras Master Plan Tract 20 General Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a general plan amendment ("General Plan Amendment") to change the Future Land Use Map designation for Las Soleras Master Plan Tract 20, comprising approximately 10.7 acres from Commercial Business Use to Community Commercial ("Project"). The property is located south of the Rail Runner Loop ("Property") and is zoned BIP (Business Industrial Park).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.2(E) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body to approve the General Plan Amendment.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8854.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. The Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. City staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.
9. Staff recommended that the Commission recommend approval of the Las Soleras General Plan

Amendment.

10. The Planning Commission heard Case #2024-8854 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8852, 2024-8853, and 2024-8855.
11. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras General Plan Amendment for Tract 20.
12. Pursuant to SFCC 1987 Sections14-2.3(C)(7)(a) and 14-3.2(D)(2), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
13. SFCC 1987 Section 14-3.2 establishes certain procedures for General Plan amendments, including, without limitation, a public hearing by the Commission and recommendation to the Governing Body based on the criteria set out in SFCC 1987 Section 14-3.2(D).
14. SFCC 1987 Section 14-3.2(E)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
15. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing.
16. The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
17. The General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
18. The General Plan Amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby.
19. The General Plan Amendment affects an area greater than two acres. Tract 20 (+/-10.70 acres), exceeds the minimum size requirement for land use amendments.
20. General Plan Amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
21. With the necessary infrastructure improvements as required by the conditions of approval, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
22. The General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
23. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
24. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the General plan.
3. The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. The record before the Planning Commission includes a Staff report and corresponding exhibits, as well as testimony and evidence presented at the hearing. All applicable criteria in SFCC 1987 Section 14-3.2(E) *"Approval Criteria"* have been met.
6. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the General Plan Amendment is consistent with growth projections for Santa Fe, and that the project The General Plan Amendment accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
7. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the General Plan Amendment is consistent with other parts of the General Plan, aligning with several policies, including but not limited to, commercial and community-serving land uses such as those articulated in Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, and Policy 9-2-G-4.
8. The General Plan Amendment complies with SFCC 1987 Section 14-3.2(E)(1)(c), because it:
    a. does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation aligns with existing and planned commercial developments nearby;
    b. affects an area greater than two acres. Tract 20 encompass 10.70 which exceed the minimum size requirement for land use amendments; and
    c. does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change provides commercial services that benefit the community at large, promoting economic development and supporting community needs.
9. Pursuant to SFCC 1987 Section 14-3.2(1)(d), the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11. Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the General Plan Amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12. The General Plan Amendment does not conflict with any existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's goals to balance growth with community-serving commercial developments, supporting local economic and infrastructural development.
13. Pursuant to SFCC 1987 Section 14-3.2(E)(2), the Commission finds that the additional criteria specific to amendments to the Land Use Policies section of the General Plan are not applicable to this case because the proposal does not amend the land use policies section of the General Plan.
14. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends approval of the General Plan Amendment Case #2024-8854 to the Governing Body.

Findings of Fact and Conclusions of Law

Case #2024-7899
Las Soleras Master Plan Amendment Master Plan Amendment

Owner's/Applicant's Name- Beckner Road Partnership, LLC
Agent's Name- Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a master plan amendment ("Master Plan Amendment") to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Project).

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission hereby FINDS and CONCLUDES as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987, Section 14-3.9(C) sets out procedures for the creation of a Master Plan and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7899.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
4. "SFCC") 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.9(C) sets out procedures for master plan approval and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body,

together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.

8. Staff recommended that the Commission recommend approval of the Las Soleras Master Plan Amendment, subject to conditions and technical corrections identified in the Staff Report.
9. The Planning Commission heard Case #2024-7899 concurrently with Cases #2024-7898, 2024-7900, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
10. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Master Plan Amendment.
11. Pursuant to SFCC 1987 Sections 14-3.9(C)(4), the Commission has the authority to review and make recommendations to the Governing Body regarding amendments to the General Plan.
12. SFCC 1987 Section 14-3.9(D)(1) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending approval of an amendment to a master plan to the Governing Body.
13. The Master Plan Amendment consistent with the City of Santa Fe growth projections and economic development goals.
14. . The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development.
15. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.), maintaining a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan. The amendment to C-2 zoning provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining and more. The Master Plan amendment will facilitate future development that is expected to trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System, further enhancing the area's coordinated development.
16. The amendment aligns with the predominant zoning patterns in the area, which primarily are uses (multifamily and nonresidential) allowed within a C-2 District. The variety of C-2 uses, ranging from residential to light industrial, adheres to the Las Soleras Master Plan's original intent to foster a mix of uses, despite the proposed elimination of both Mixed Use and Business Industrial Park Districts, while also responding to current market demands. The master plan continues to maintain a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan.
17. This Master Plan amendment will significantly enhance the site’s ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System.
18. The net impact of the Master Plan Amendment on the utility system infrastructure is minimal and the existing infrastructure, water, wastewater, and parks are adequate to accommodate the Master Plan Amendment. Inadequacies in roads and fire service capacity can be adequately addressed as conditions of approval during the development of this project such that health and safety goals are met.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose an amendment to the Master plan Amendment.
3. Pursuant to SFCC 1987, 14-3.9(C)(4) the Planning Commission has the authority to review and recommend approve of a Master Plan to the Governing Body.
4. The Applicant met the applicable Submittal Requirements.
5. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community.
6. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several policies (Policy 3-G-2, Policy 4-1-G-2, Policy 4-4-G-4, Policy 4-4-G-6, Policy 9-2-G-1, Policy 9-2-G-2, Policy 9-2-G-3, Policy 9-2-G-4.).
7. Pursuant to 14-3.9(D)(1)(b), the Master Plan Amendment is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts.
8. Pursuant to 14-3.9(D)(1)(c)), the Master Plan Amendment will contribute to the coordinated and efficient development of the community.
9. Pursuant to SFCC 1987 Section 14-3.9(D)(1)(d), the necessary infrastructure improvements as proposed, including road realignments and utility upgrades, the existing and proposed infrastructure will be able to accommodate the impacts of the development.
10. The Commission recommends approval of the requested General Plan amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:
Considering the foregoing findings and conclusions, the Planning Commission approves the Master Plan, subject to conditions of approval and the technical corrections set forth in the Staff Report and the exhibits to the Staff Report for Case #2024-7899.

Findings of Fact and Conclusions of Law

Case #2024-7900
Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024 (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tracts 21 and 26, comprising approximately 8.18 acres and Tracts 23 and 24, comprising 13.45 acres from General Office (C-1) to General Commercial (C-2) ("Project"). The property is located at the southeast quadrant of the Las Soleras / Beckner Road roundabout ("Property") and is zoned C-1.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-7900.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).

9. Staff reviewed the Application and related materials submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.
10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from C-1 to C-2.
11. The Planning Commission heard Case #2024-7900 concurrently with Cases #2024-7899, 2024-7898, 2024-8852, 2024-8853, 2024-8854 and 2024-8855.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tracts 21, 23, 24, and 26 Rezoning from C-1 to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from C-1 (General Office Use) to C-2 (General Commercial) for Tracts 21, 23, 24, and 26.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe;

and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tracts 21 and 26 (8.18 acres) and Tracts 23 and 24 (13.45 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 21.63 acres across Tracts 21, 23, 24, and 26.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tracts 21, 23, 24, and 26. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from C-1 (General Office Use) to C-2 (General Commercial) for Tracts 21, 23, 24, and 26.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tracts 21 and 26 (8.18 acres) and Tracts 23 and 24 (13.45 acres), which meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or

general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from C-1 to C-2, as requested in the Application for Case #2024-7900.

Case #2024-8853
Las Soleras Master Plan Tract 19 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024, (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tract 19, comprising approximately 9.11 acres from Mixed Use (MU) to General Commercial (C-2) ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned MU.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8853.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).
9. Staff reviewed the Application and related materials submitted by the Applicant for conformity

with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from MU to C-2.
11. The Planning Commission heard Case #2024-8853 concurrently with Cases #2024-7900, 2024-7898 2024-7899, 2024-7900, 2024-8852, 2024-8855, 2024-8854, and 2024-8855.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tract 19 Rezoning from MU to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from MU (Mixed Use) to C-2 (General Commercial) for Tract 19.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tract19 (9.11 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 9.11 acres for Tract 19.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tract 19. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from MU (Mixed Use) to C-2 (General Commercial) for Tract 19.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tract 19 (9.11 acres) meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from MU to C-2, as requested in the Application for Case #2024-8853.

Case #2024-8855
Las Soleras Master Plan Tract 20 Rezoning
Owner's/Applicant's Name - Beckner Road Partnership, LLC
Agent's Name - Orion West, LLC

THIS MATTER came before the Planning Commission (Commission) for public hearing on September 5, 2024, (Hearing) upon the application (Application) of Orion-West LLC as agent for Beckner Road Partnership, LLC (Applicant).

The Applicant requested a rezoning ("Rezoning") to change the official Zoning Map designation for Las Soleras Master Plan Tract 20, comprising approximately 10.70 acres from Business Industrial Park (BIP) to General Commercial (C-2) ("Project"). The property is located southwest of the Walking Rain Road / Beckner Road roundabout ("Property") and is zoned BIP.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Santa Fe City Code ("SFCC") 1987 Section 14-3.5(C) sets out approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2. On September 5, 2024, the Planning Commission recommended the Governing Body approve Case #2024-8855.
3. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public
4. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(v)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
5. The Applicant attended a preapplication conference with City Land Use Department Staff ("Staff") on September 28, 2023.
6. Pursuant to SFCC 1987 Section 14-3.1(F), the Applicant conducted an ENN meeting on November 14, 2023, virtually via Zoom. The ENN meeting was attended by a representative of the Applicant, Staff, and one (1) member of the public.
7. SFCC 1987, Section 14-3.2(D) sets out procedures for amendments to the General Plan and requires the Planning Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and shall transmit the application, including any plan, to the governing body, together with a recommendation as to findings and conditions, desirable changes and recommendations for approval or disapproval.
8. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 (Submittal Requirements).
9. Staff reviewed the Application and related materials submitted by the Applicant for conformity

with applicable SFCC requirements and provided the Commission with a written report of its findings, which evaluated the factors relevant to the Application.

10. Staff recommended that the Commission recommend approval of the Las Soleras rezoning from BIP to C-2.
11. The Planning Commission heard Case #2024-8855 concurrently with Cases #2024-7898, 2024-7899, 2024-7900, 2024-8852, 2024-8853, and 2024-8854.
12. Pursuant to SFCC 1987 TABLE 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Planning Commission has the authority to review and recommend the Governing Body approve the rezoning request.
13. At the hearing on September 5, 2024, the Planning Commission received reports from staff, testimony, and evidence from the Applicant, and testimony offered by any interested members of the public.
14. On September 5, 2024, the Planning Commission voted to recommend that the Governing Body approve the Las Soleras Tract 20 Rezoning from BIP to C-2.
15. SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Planning Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
16. SFCC 1987 Section 14-3.5(C) sets out the approval criteria and requires the Planning Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending a rezoning.
17. There has been a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from BIP (Business Industrial Park) to C-2 (General Commercial) for Tract 20.
18. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.
19. The Rezoning is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:
    (a) Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
    (b) Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
    (c) Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
    (d) Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
    (e) Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
    (f) Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
    (g) Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
20. Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

21. Policy 9-2-G-5: Promote small business.
22. The Rezoning request affects an area of more than two acres. The Rezoning impacts Tract 20 (10.70 acres).
23. The existing infrastructure is adequate for the proposed development, and necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development will be addressed as conditions of approval.
24. The prevailing use and character of the surrounding area are generally commercial and mixed-use, consistent with the rezoning to C-2 (General Commercial).
25. The land proposed for rezoning is greater than two acres, with the total affected area comprising approximately 10.70 acres for Tract 20.
26. The rezoning is consistent with adjacent land use patterns and the General Plan Policy, promoting balanced commercial development supported by Policies 3-G-2, 4-1-G-2, 4-4-G-4, 4-4-G-6, 9-2-G-1, 9-2-G-2, 9-2-G-3, and 9-2-G-4. The rezoning is not at the expense of surrounding landowners but benefits the community by increasing commercial services

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC 1987 Section 14-3.1, all procedures regarding the pre-application conference, ENN meeting, notice, and public hearing requirements have been followed.
2. The Applicant has the right under the SFCC to propose a request for rezoning.
3. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Planning Commission finds:
    i. There is no mistake in the original zoning.
    ii. There is not a conflict between the General Plan's Future Land Use Map and the existing zoning for Tract 20. The proposed rezoning is consistent with the General Plan's Future Land Use Map, which supports the shift from BIP (Business Industrial Park) to C-2 (General Commercial) for Tract 20.
    iii. The rezoning reflects the City's long-term land use and growth patterns as provided for in the General Plan, promoting efficient land and infrastructure use.
27. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Planning Commission finds that the Applicant's submittal is a complete application as required by SFCC 1987 Chapter 14, and the rezoning request meets all applicable rezoning approval criteria.
28. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Rezoning is consistent with the Future Land Use Map and City policy as articulated in the General Plan, supporting community and economic growth.
29. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Rezoning request affects an area of more than two acres. The rezoning impacts Tract 19 (9.11 acres) meets the minimum requirement.
30. Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the existing and proposed infrastructure, including roads, utilities, and public services, will be able to accommodate the impacts of the proposed rezoning and support future development.
31. Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Rezoning:
    (a) *does not* allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area prevailing use and character of the surrounding area;
    (b) *does not* affect an area of less than two acres; and
    (c) *does not* benefit one or a few landowners at the expense of the surrounding landowners or general public.

4. The Planning Commission has the power and authority at law and under the SFCC to review the proposed rezoning of the Property and to recommend approval of the proposed rezoning to the Governing Body.
5. The Applicant met the applicable Submittal Requirements.
6. The Planning Commission recommends that the Governing Body Approve the requested rezoning because the application met all applicable code criteria for recommendation of approval of the proposed rezoning.

WHEREFORE, IT IS ORDERED ON THE 3rd DAY OF OCTOBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Planning Commission recommends the Governing Body approve the rezoning as requested from BIP to C-2, as requested in the Application for Case #2024-8855.

**REGULAR MEETING OF
THE PLANNING COMMISSION
SEPTEMBER 05, 2024 AT
6:00 PM**

A. ROLL CALL

Members Present:
Chair Janet Clow
Vice Chair Jessica Eaton Lawrence
Member Gurushabad Mirando
Member Peter Smith
Member Thomas (TJ) Reiland

Members Excused:
Member Phil Lucero
Member Sasha McGhee

B. PLEDGE OF ALLEGIANCE

C. APPROVAL OF AGENDA

MOTION: Vice Chair Eaton Lawrence moved, seconded by Commissioner Reiland, to approved the agenda as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Smith, Member Reiland

Against: None

Abstain: Member Mirando

D. APPROVAL OF MINUTES:

1. August 1, 2024

MOTION: Vice Chair Eaton Lawrence moved, seconded by Commissioner Reiland, to approve as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Smith, Member Reiland

Against: None

Abstain: Member Mirando

E. APPROVAL OF FINDINGS/CONCLUSIONS

1. Case #2023-7079. Bungalows on Cerrillos Development Plan. AMENDED

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

2. Case #2023-7662. Bungalows on Cerrillos variance (Setback). AMENDED

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

3. **Case #2023-7663. Bungalows on Cerrillos variance (Slopes). AMENDED**

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

6. OLD BUSINESS

G. NEW BUSINESS

1. **Case #2024-7899. Las Soleras Master Plan Amendment.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Owner, requests a Master Plan Amendment to the Las Soleras Master Plan to change the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial). Additionally, they seek to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet. The property is located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout, and on the south side of Beckner Rd, encompassing

Parcels 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

2. **Case # 2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a General Plan Amendment is requested to change the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

3. **Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a rezoning to change the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a rezoning is requested to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

4. **Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial. The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the informational as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

5. **Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

   MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

   VOTE: The motion was approved on the following Roll Call vote:

   For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

   Against: Member Reiland

   Abstain: None

6. **Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial. The property, known as Tract 20 of the Las Soleras Master Plan, and is located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

7. **Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) Use to C-2 (General Commercial). The property, known as Tract 20 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

8. **Case #2024-8523. 235 West San Francisco Street, Variance.** Sommer Karnes & Associates LLP, Agent for G.E. Senlic, LLC., owners and applicant requests a variance to SFCC 1987, Section 14.8-6(C)(2)b to allow off-site parking more than 600 feet from the property within the Business Commercial District. The property

is zoned Business Commercial District, within the Lensic Subdistrict, with an approved 70 room hotel (Case #2019-1535) on .99-acre property. (Carly Venditti, Case Manager, cavenditti@santafenm.gov)

Postponed to October 3, 2024

9. **Case #2024-8342. 4851 Hart Road Development Plan.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a development plan to establish development standards for 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

10. **Case #2024-8343. 4851 Hart Road Terrain Management Variance.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a variance to the Terrain Management standards located in SFCC Ch. 14-8.2(D)(2)(b) to disturb natural slopes of thirty-percent or greater to develop 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to deny the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

CITY OF SANTA FE, NEW MEXICO

BILL NO. 2025-01

A BILL

REZONING LAS SOLERAS TRACTS 21 AND 26, APPROXIMATELY 8.18 ACRES OF LAND, AND TRACTS 23 AND 24, APPROXIMATELY 13.45 ACRES OF LAND, LOCATED AT THE SOUTHEAST QUADRANT OF THE LAS SOLERAS/BECKNER ROAD ROUNDABOUT, FROM C-1 (GENERAL OFFICE) TO C-2 (GENERAL COMMERCIAL) (CASE NO. 2024-7900).

BE IT ORDAINED BY THE GOVERNING BODY OF THE CITY OF SANTA FE:

Section 1. The real property located within the municipal boundaries of the city of Santa Fe, which is restricted to and classified as C-1, more particularly described as consisting of Tracts 21 and 26 in Attachment A, incorporated herein, and Tracts 23 and 24 in Attachment B, incorporated herein, (the "Property"), is now restricted to and reclassified as C-2.

Section 2. The official zoning map of the city of Santa Fe, adopted by Ordinance No. 2001-27, is amended to conform to the change of zoning classification for the Property set forth in Section 1 of this Ordinance.

Section 3. Pursuant to SFCC 1987, Section 2-2.4, this Ordinance shall be published by title and general summary and shall become effective five (5) days after publication.

MINUTES

**REGULAR MEETING OF
THE PLANNING COMMISSION
SEPTEMBER 05, 2024 AT
6:00 PM**

A. ROLL CALL

Members Present:
Chair Janet Clow
Vice Chair Jessica Eaton Lawrence
Member Gurushabad Mirando
Member Peter Smith
Member Thomas (TJ) Reiland

Members Excused:
Member Phil Lucero
Member Sasha McGhee

B. PLEDGE OF ALLEGIANCE

C. APPROVAL OF AGENDA

MOTION: Vice Chair Eaton Lawrence moved, seconded by Commissioner Reiland, to approved the agenda as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Smith, Member Reiland

Against: None

Abstain: Member Mirando

D. APPROVAL OF MINUTES:

1. August 1, 2024

MOTION: Vice Chair Eaton Lawrence moved, seconded by Commissioner Reiland, to approve as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Smith, Member Reiland

Against: None

Abstain: Member Mirando

E. APPROVAL OF FINDINGS/CONCLUSIONS

1. Case #2023-7079. Bungalows on Cerrillos Development Plan. AMENDED

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

2. Case #2023-7662. Bungalows on Cerrillos variance (Setback). AMENDED

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

3. **Case #2023-7663. Bungalows on Cerrillos variance (Slopes). AMENDED**

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the findings of fact and conclusions of law as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

6. OLD BUSINESS

G. NEW BUSINESS

1. **Case #2024-7899. Las Soleras Master Plan Amendment.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Owner, requests a Master Plan Amendment to the Las Soleras Master Plan to change the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial). Additionally, they seek to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet. The property is located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout, and on the south side of Beckner Rd, encompassing

Parcels 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

2. **Case # 2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a General Plan Amendment is requested to change the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

3. **Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning.** Orion-West LLC., Agent for Beckner Road Partnership, LLC, Orion-West LLC., agent for Beckner Road Partnership, LLC, Owner, requests approval of a rezoning to change the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout. Additionally, a rezoning is requested to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

4. **Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial. The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to approve the informational as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

5. **Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

   MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

   VOTE: The motion was approved on the following Roll Call vote:

   For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

   Against: Member Reiland

   Abstain: None

6. **Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a General Plan Amendment to change the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial. The property, known as Tract 20 of the Las Soleras Master Plan, and is located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

7. **Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning.** Orion-West LLC., agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) Use to C-2 (General Commercial). The property, known as Tract 20 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith

Against: Member Reiland

Abstain: None

8. **Case #2024-8523. 235 West San Francisco Street, Variance.** Sommer Karnes & Associates LLP, Agent for G.E. Senlic, LLC., owners and applicant requests a variance to SFCC 1987, Section 14.8-6(C)(2)b to allow off-site parking more than 600 feet from the property within the Business Commercial District. The property

is zoned Business Commercial District, within the Lensic Subdistrict, with an approved 70 room hotel (Case #2019-1535) on .99-acre property. (Carly Venditti, Case Manager, cavenditti@santafenm.gov)

Postponed to October 3, 2024

9. **Case #2024-8342. 4851 Hart Road Development Plan.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a development plan to establish development standards for 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Smith, to approve the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

10. **Case #2024-8343. 4851 Hart Road Terrain Management Variance.** NM Land Solutions LLC, Agent, for ODY- HFS Partners LLP, Owner, requests approval of a variance to the Terrain Management standards located in SFCC Ch. 14-8.2(D)(2)(b) to disturb natural slopes of thirty-percent or greater to develop 2 warehouses totaling 63,920 SF on a 9.755 Acre lot located at 4851 Hart Road. The property is zoned I-1 (Light Industrial) and is within the River and Trails Archeological Review District. (Daniel Alvarado, Case Manager, djalvarado@santafenm.gov, 955-6670).

MOTION: Vice Chair Eaton Lawrence moved, seconded by Member Mirando, to deny the land use case as presented.

VOTE: The motion was approved on the following Roll Call vote:

For: Vice Chair Eaton Lawrence, Member Mirando, Member Smith, Member Reiland

Against: None

Abstain: None

1. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-7898. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use Map designation for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres, from Commercial Office Use to Community Commercial.

2. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8852. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from Transitional Mixed Use to Community Commercial.

3. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8854. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop from Commercial Business Use to Community Commercial.

4. CONSIDERATION OF A RESOLUTION

Master Plan Amendment. Case #2024-7899. Orion-West LLC, Agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the Las Soleras Master Plan land use designations on Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to a uniform classification of C-2 (General Commercial), and to reduce the width of the Utility and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet on the south side of Beckner Road.

5. CONSIDERATION OF BILL NO. 2025-1
   Rezoning. Case #2024-7900. Orion-West LLC, Agent for Applicant, Beckner Road Partnership, asks the Governing Body to adopt Bill 2025-01 to rezone Las Soleras Tracts 21 and 26, +/- 8.18 acres, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) to C-2 (General Commercial).

6. CONSIDERATION OF BILL NO. 2025-2
   Rezoning. Case #2024-8853. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, ask the Governing Body to adopt Bill 2025-2 to rezone Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from MU (Mixed Use) to C-2 (General Commercial).

7. CONSIDERATION OF BILL NO. 2025-3
   Rezoning. Case #2024-8855. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt Bill 2025-3 to rezone Las Soleras Tract 20, +/-10.70 acres located southwest of the Walking Rain Road / Beckner Road roundabout, from BIP (Business Industrial Park) to C-2 (General Commercial).

I. Planning Commission Recommendations:

On September 5, 2024, the Planning Commission ("Commission") recommended the Governing Body take the following actions:

1. **APPROVE** Case #2024-7899. Las Soleras Master Plan Amendment, changing land use designations for Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet, subject to the Master Plan conditions listed in Section III, Table 1 "Master Plan Conditions" and Master Plan Technical Corrections listed in attachment "A".
2. **APPROVE** Case #2024-7898. General Plan Amendment for Las Soleras Tracts 21, 23, 24, and 26 from Commercial Office Use to Community Commercial.
3. **APPROVE** Case #2024-7900. Rezoning for Las Soleras Tracts 21, 23, 24 and 26 from C-1 (General Office) to C-2 (General Commercial).
4. **APPROVE** Case #2024-8852**.** General Plan Amendment for Las Soleras Tract 19, from Transitional Mixed Use to Community Commercial.

5. **APPROVE** Case #2024-8853. Rezoning for Las Soleras Tract 19, from MU (Mixed Use) to C-2 (General Commercial).
6. **APPROVE** Case #2024-8854. General Plan Amendment for Las Soleras Tract 20, from Commercial Business Use to Community Commercial.
7. **APPROVE** Case #2024-8855. Rezoning for Las Soleras Tract 20, from BIP (Business Industrial Park) to C-2 (General Commercial).

II. Sample Motions:

Seven (7) motions will be required. Land Use recommends the motions in the following order:

1. **Move to approve or deny** Case #2024-7898, adopting a resolution amending the General Plan Future Land Use Map designation from Commercial Office Use to Community Commercial, for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres.

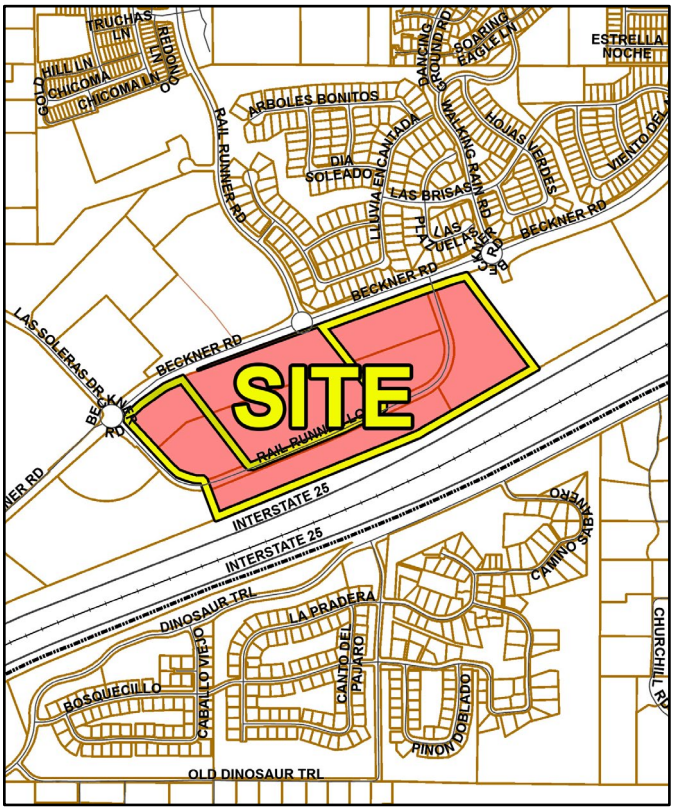
2. **Move to approve or deny** Case #2024-8852**,** adopting a resolution amending the General Plan Future Land Use designation from Transitional Mixed Use to Community Commercial, for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

3. **Move to approve or deny** Case #2024-8854, adopting a resolution amending the General Plan Future Land Use designation from Commercial Business Use to Community Commercial, for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop.

4. **Move to approve or deny** Case #2024-7899, adopting a resolution amending the Las Soleras Master Plan land use designations for Tracts 19, 20, 21, 23, 24 and 26 from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) to from 90 feet to 45 feet, subject to conditions of approval and technical corrections.

5. **Move to approve or deny** Case #2024-7900, adopting Bill 2025-01, changing the official Zoning Map designation from C-1 (General Office) to C-2 (General Commercial) for Las Soleras Tracts 21 and 26, +/- 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout.

6. **Move to approve or deny** Case #2024-8853, adopting Bill 2025-02 changing the official Zoning Map designation from MU (Mixed Use) to C-2 (General Commercial), for Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road/ Beckner Road roundabout.



7. **Move to approve or deny** Case #2024-8855. adopting Bill 2025-03 changing the official Zoning Map designation from BIP (Business Industrial Park) to C-2 (General Commercial) Las Soleras Tract 20, +/-10.70 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

III. Executive Summary

Beckner Road Partnership, LLC, Owner, (the "Applicant"), through its agent, Orion-West LLC, requests a master plan amendment ("Master Plan Amendment"), three (3) general plan amendments ("GP Amendments"), and three (3) Rezonings ("Rezonings") for Tracts 19, 20, 21, 23, 24, and 26 ("Tracts") within the Las Soleras Master Plan area (Master Plan) (see Figure 1) (together, the "Project"). The Applicant's goal is to amend the land use designations and zoning on the six (6) tracts from their current zoning designations of General Office (C-1), Mixed Use (MU) and Business Industrial Park (BIP) to Community Commercial (C-2). The Rezonings must be consistent with the Master Plan and General Plan.

On February 11, 2009, the Governing Body approved the Master Plan when it annexed the area, encompassing +/- 539 acres with a mix of uses including low, medium, and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The Master Plan included a walkable neighborhood supported by an anticipated Rail Runner transit stop, which has since been postponed indefinitely by the state. The mix of uses was intended to encourage a citywide balance of residential and nonresidential uses and to set those uses among extensive open spaces, parks and trail networks.

Since approval in 2009, the Governing Body amended the Master Plan four (4) times:

1. September 9, 2015, which realigned roads, reconfigured open space and trails, reduced park land and reconfigured certain tracts of land.
2. September 24, 2016, which established alternative height and setback standards for the R-6 and R-12 residentially zoned districts for Estancias de Las Soleras and Ross's Peak developments.
3. September 12, 2018, which changed the land use designation from "Transitional Mixed Use" to "High Density Residential" to reflect contemporaneous zoning and General Plan amendments, reduced a 90-foot utility, access, and trail corridor to 45 feet (La Rambla) on the north side of Beckner Road, and amended a condition related to dust control.
4. May 31, 2023, which increased the density from six units per acre to ten units per acre for land located at 4601 Rail Runner Road (pending recordation).

The proposed three (3) GP Amendments, Master Plan Amendment, and three (3) Rezonings, (together, the "Project") will allow the Applicant to develop Las Soleras Tracts 19, 20, 21, 23, 24, and 26 under the Community Commercial (C-2) zoning district. The Tracts

are currently zoned C-1 (General Office), MU (mixed use), and BIP (Business Industrial Park) (see Figure 2). A uniform C-2 designation for the project area will allow amenities such as neighborhood grocery stores to exist side-by side with residences. (Grocery stores and residences could not exist side-by-side in the existing BIP and C-1 districts.) In addition, the rezoning will remove restrictions on ratios for housing versus commercial development (as currently required in the Mixed Use districts). Staff anticipates that these changes will result in more cohesive and pedestrian friendly mixed use development.

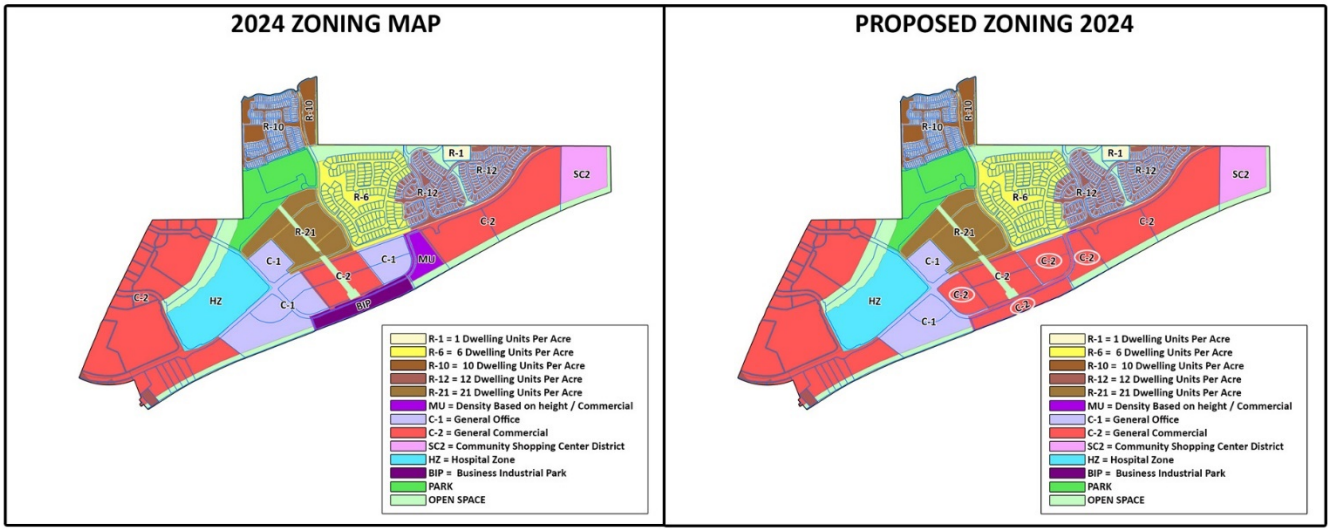


Figure 1 Existing (left) and Proposed Zoning (right)

The Applicant conducted a pre-application conference on September 28, 2023, and an Early Neighborhood Notification (ENN) meeting on November 14, 2023. On September 5, 2024, the Commission held a public hearing to review Case #2024-7899, Case #2024-7898, Case #2024-7900, Case #2024-8852, Case #2024-8853, Case #2024-8854, and Case #2024-8855 during which the Commission heard reports from City Planning and Land Use Department staff ("Staff"), testimony and evidence from the Applicant, and public comments by interested members of the public. The Commission found that the Master Plan Amendment, three (3) GP Amendments and three (3) Rezonings were consistent with the General Plan and that all approval criteria had been met.

The Commission voted to recommend that the Governing Body *approve* the Project on September 5th, 2024, subject to a condition of approval for the Master Plan Amendment. On October 3, 2024, the Commission adopted Findings of Fact and Conclusions of Law, (Attachment B, "Planning Commission Approved Findings of Fact and Conclusions of Law") and Commission Minutes (Attachment C, "Planning Commission Minutes"), reflecting its holdings from the public hearing.

IV. General Plan Amendment Approval Criteria

Table 2 analyzes all three (3) proposed General Plan Amendment according to approval criteria as set forth in the Santa Fe City Code, 14-3.2 "Amendments to the General Plan" for Case #2024-7879, Case #2024-8852, and Case #2024-8854.

Table 1 General Plan Amendment Approval Criteria Analysis

General Plan Amendment Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (General Plan Amendment):

"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals[1] are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan, it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

[Staff has removed three (3) paragraphs here. The Applicant's full response may be found in Attachment E, Applicant's materials]

[1] Staff Commentary: the policies referenced in this response are described in the City of Santa Fe 1999 General Plan, *available at* https://santafenm.gov/land-use/current-planning/long-range-planning/general-plan-1999.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report[2] further emphasizes the importance of diversifying Santa Fe's economic base to ensure sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment): Staff finds that the General Plan Amendments meet Criterion 1.

Staff agrees with the Applicant's response. The General Plan Amendments for the Tracts align with Santa Fe's growth and economic development strategies. The Applicant cites two (2) strategic documents that are reliable sources for understanding Santa Fe's future growth: the Angelou Plan ("Cultivating Santa Fe's Future Economy Economic Development Strategy, April 2004, by Angelou

[2] The "Angelou Plan" (referred to by the Applicant as the "Angelou Report") is a 2004 economic report from Angelou Economics. The Angelou Plan proposes a roadmap for Santa Fe's future economic development efforts based on economic analysis and community input. The Angelou Plan is included as Attachment C, "Economic Strategy".

Economics) and the 2008 Economic Development Strategy (included here as Attachment C, "Economic Strategy"). The General Plan Amendments are likely to allow for the type of neighborhood and community planning that are encouraged in the 1999 General Plan (*see* General Plan Themes, I-5). Specifically, the General Plan Amendments will allow for development designed to serve the immediate community, which helps reduce car-dependence and encourages community-oriented development (*see* General Plan Themes, I-13). Staff agrees that the Applicant's requested General Plan Amendments are consistent with projected growth patterns as described in both the Angelou Plan and the 2008 Economic Development Strategy.

General Plan Amendment Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response: *"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).*

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response: Staff agrees that Criterion 2 is met.

Staff agrees with the Applicant's response. The 1999 General Plan Policy Overlay designates the land at issue as an "infill area" (*see* 1999 General Plan, Chapter 3, "Land Use", p. 4). Guiding Policy 3-G-3 provides that "[t]here shall be infill development at densities that support the construction of affordable housing and a designated mix of land uses that provide an adequate balance of service retail and employment opportunities to address residential growth throughout the Urban Area".

1999 General Plan Guiding Policy 3-G-2 encourages mixed commercial/residential development throughout the City "[t]here shall be a mix of uses and housing types in all parts of the city." Additionally, much of the land near the Project site, along Cerrillos Road and I-25, is already

designated Community Commercial by the Future Land Use Map[3]. The General Plan Amendments will uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial, which will allow for development throughout the Project site that is consistent with the General Plan goal of encouraging mixed uses in all parts of the City.	
General Plan Amendment Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **Yes**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

"With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (General Plan Amendment): Criterion 3 is met.

The Applicant's response does not contain enough detail to fully address all subsections of this criterial. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the Amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public.

[3] See City of Santa Fe Future Land Use Map, *available at* https://santafenm.gov/FutureLandUse.pdf (12/30/2024).

General Plan Amendment Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No) N/A**
Applicant's Response: *"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."* **Staff Response:** Criterion 14-3.2(E)(1)(c) is met, and therefore no further justification is needed at this time.	
General Plan Amendment Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans; **Staff Response:** There are no extraterritorial zoning ordinances or extraterritorial plans that affect the Property.	**Not Applicable**
General Plan Amendment Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) Yes**
Applicant's Response: *"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.* *In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."* **Staff Response:** Staff finds that Criterion 6[14-3.2(E)(1)(f)] is met. Staff agrees with the applicant's response, in that a Community Commercial designation across the entire Project site would provide an opportunity for growth that is consistent with 1999 General Plan Guiding Policy 3-G-2 ("[t]here shall be a mix of uses and housing types in all parts of the city") and allow development that, aligns well with the adjacent land uses. The Amendment promotes more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.	

General Plan Amendment Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	Criterion Met: (Yes/No) YES
Applicant's Response: *"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."* **Staff Response:** Staff agrees with the Applicant's response. The General Plan Amendments are consistent with multiple City policies that support the proposed change. The General Plan Amendments do not conflict with any existing city ordinances or regulations. Additionally, the Project meets all applicable Code criteria. The General Plan Amendments foster a harmonious development strategy, promote general welfare, and correspond with adjacent land uses and broader city policies, ensuring there are no conflicts with existing regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
General Plan Amendment Criterion 8 [14-3.2(E)(2)] Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a) the growth and economic projections contained within the general plan are erroneous or have changed;** **(b) no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or** **(c) conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Not Applicable**
Staff Response: The Applicant is not required to document compliance with Criterion 8, since the application does not amend land use policies.	

V. APPROVAL CRITERIA – MASTER PLAN AMENDMENT

Table 2 provides the Applicant's responses and staff's analysis of the Master Plan approval criteria, 14-3.9 "Master Plan", for Case #2024-7899 Las Soleras Master Plan Amendment.

According to City Code Section 14-3.9 (B)(3), "[f]inal actions by the governing body… concerning rezonings… shall include a specific finding or determination that the action complies with all applicable provisions of the master plan." Consequently, it is Staff's recommendation that the Governing Body consider the Master Plan Amendment before considering the Applicant's proposed Rezonings.

Staff recommends *conditional approval* of the Master Plan Amendment, effective upon approval of the relevant rezonings and an additional condition. As further discussed in the Planning Commission Staff Report, Staff finds that the Master Plan Amendment meets the criteria for approval, subject to a condition that the Master Plan Amendment include a "Master Sign Plan" that comprehensively addresses the design, placement, and specifications of all signs within the project area that are compatible with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. (*See* Attachment A, p. 4). Staff proposes that the Applicant must complete this condition prior to recording the Master Plan Amendment.

Table 2 Master Plan Amendment Approval Criteria Analysis

Criterion 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**
Applicant's Response (Master Plan): *The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals.* *Specifically, the following General Plan policy goals are supported:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.* *Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and* *Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.* *Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and* *Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and* *Policy 9-2-G-5: Promote small business.* *The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the*	

local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial.

Staff Response (Master Plan): Staff finds that the Master Plan meets Criterion 1 is met.

Staff agrees that the Master Plan Amendment is consistent with the proposed General Plan Amendments. The Master Plan Amendment still maintains the potential for a diverse range of uses as allowed within the C-2 District and allows for neighborhood-focused development as described in the policies referenced in the Applicant's response, above.

Criterion 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):
"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan): Staff finds that Criterion 2 is met.

Staff agrees with the Applicant's response. The Master Plan Amendment is consistent with the Rezonings proposed for the area. . The variety of C-2 uses, ranging from residential to light industrial, are consistent with the Las Soleras Master Plan's original scheme to foster a mix of uses, by allowing for a more cohesive, neighborhood-focused development scheme across the Project site than Mixed Use, BIP, and C1, which restrict certain types of development to certain parts of Project site. . .

Criterion 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):
"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan): Criterion 3 is met.

Staff agrees with the applicant's response. The Master Plan Amendment provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining throughout the entire Project site, and more, which would not be allowed with the current combination of zoning restrictions. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth.

Criterion 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No) YES**

Applicant Response (Master Plan):

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan): Staff finds that Criterion 4 is met.

Staff generally agrees with the Applicant's response regarding the minimal impact of the Master Plan Amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the Applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, the Applicant's test is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Applicant's Traffic Analysis, the Traffic Division has raised certain points for consideration regarding future phases of the project (*See* Attachment B, Development Review Team (DRT) Comments):
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended Traffic Impact Analysis.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for future development:
1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not "have any concerns at this time from a water engineering standpoint", however, it noted that "the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project." *See* Attachment B, DRT Comments.

The Wastewater Division has "determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development." *See* Attachment B, DRT Comments.

The Parks Division raised no concerns for the project. *See* Attachment B, DRT Comments.

VI. Rezoning Approval Criteria

SFCC 1987, Sec. 14-3.5(C) requires the Governing Body to consider approval criteria for all rezoning proposals, and make complete findings of fact with respect to each criterion "sufficient to show that these criteria have been met", before the Governing Body approves a rezoning. Table 3, below, contains analysis of the three (3) Rezoning requests for Case #2024-7900, Case #2024-8853, and Case #2024-8855.

Table 3 Rezoning Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26

Rezoning Criterion 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning from C-1, MU, and BIP to C-2): *(i) "Not applicable"* *(ii) "As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development – most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."* *(iii) "As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.*	

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response: Criterion 1 is met.

Staff agrees that a different use category (here, Community Commercial/ C2) is more advantageous to the community as articulated in the General Plan policy sections cited in the Applicant's response. The Rezonings support a variety of uses, enhance walkability, and promote economic self-sufficiency within the master planned area by balancing residential and commercial development opportunities, which provides opportunities for shopping and employment in the immediate area. The Rezonings are designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs.

Rezoning Criterion 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response:
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response: Staff agrees with the Applicant's response, above. The Rezonings meet all applicable Chapter 14 requirements. The proposed Rezonings therefore meets Criterion 2.

Rezoning Criterion 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning): Staff finds that Criterion 3 is met.

Staff agrees with the Applicant's response that rezoning the Tracts to a uniform Community Commercial C-2 district across aligns with the City of Santa Fe's General Plan as proposed to be amended, and economic development goals. The proposal matches City policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the Future Land use Map, which designates the area Community Commercial.

Rezoning Criterion 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):

"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff finds that Criterion 4 is met.

For City policy regarding the amount of land sufficient to meet Rezoning Criterion 4, Staff looks to City Code General Plan Amendment Criteria, Section 14-3.2(E)(1)(c), which requires in part that an amendment does not "affect an area of less than two acres, except when adjusting boundaries between districts."

Based on this requirement, Staff concludes that the amount of land proposed for rezoning will not create a pocket of inconsistent development and is sufficient to help meet the City's land use goals of creating neighborhood-focused communities that include opportunities for both residential and commercial development.

Rezoning Criterion 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response:

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response: Staff finds that Criterion 5 is met.

Staff agrees with the Applicant's response the "subject property can be served by existing roadways and public water and sewer infrastructure."

Staff agrees with the Applicant's response that the existing infrastructure is adequate for the proposed development. However, the "Conceptual Test Fit" that the Applicant referenced is not from the City Code and is not a test that the City uses to evaluate projects. Additionally, DRT evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development, which will be reviewed at the permitting or development plan stage.

Rezoning Criterion 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response:

14-3.5(C)(2)(a):

"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

14-3.5(C)(2)(b):

"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

14-3.5(C)(2)(c):

"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las

Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response: Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

The Rezonings are consistent with applicable 1999 General Plan policies referenced in detail in the analysis of the previous criteria. The Rezonings are anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

VII. CONCLUSION

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on September 28, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

Staff and the DRT have analyzed the Project and found that it meets all applicable Code criteria. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

CITY OF SANTA FE

Planning and Land Use Department
Planning Commission Staff Report

Case Nos:	2024-(7899)(898)(7900)(8852)(8853)(8854)(8855)
Hearing Date:	September 5, 2024
Applicant:	Beckner Road Partnership, LLC
Request:	Master Plan Amendment, General Plan Amendments & Rezonings
Location:	The property is located SE of the Las Soleras/Beckner Rd roundabout & South of the Rail Runner Rd/Beckner Rd roundabout, & on the South side of Beckner Rd, being Tracts 19-26, within the Las Solares Master Plan.
Case Mgr.:	Daniel A. Esquibel
Existing Zoning:	C-1 (General Office), MU (Mixed Use), and BIP (Business Industrial Park)
Overlay:	Suburban Archaeological Review District
Pre-app. Mtg.:	September 28, 2023
ENN Mtg.:	November 14, 2023

Proposal: The Applicant's project includes 7 applications: an amendment to the Las Soleras Master Plan, 3 General Plan Amendments, (GPA) 3 rezonings (RZ), and a request to reduce the La Rambla Trail easement width from 90 feet to 45 feet. The GPAs change the Future Land Use Map designations from "Transitional Mixed Use, Business Commercial, and Commercial Office" to "Community Commercial". The RZs change the Official City Zoning Map designations from MU, BIP, and C-1, to C-2.

Case #2024-7899. Las Soleras Master Plan Amendment. Orion-West LLC, Agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a Master Plan Amendment to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and also that the Planning Commission recommend that the Governing Body approve an additional General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning. Orion-West LLC, Agent for Beckner Road Partnership, Owner, asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and that the Planning Commission also recommend the Governing Body to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial, for a property, described as Tract 19 on the Las Soleras Master Plan located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment. Orion-West LLC., agent for

Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial, on a property described as Tract 20 on the Las Soleras Master Plan, and located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, ask the Planning Commission to recommend the Governing Body approve a rezoning changing the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) to C-2 (General Commercial) on a property described as Tract 20 on the Las Soleras Master Plan, and located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

I. RECOMMENDATION

The Land Use Department recommends **APPROVAL** of the following cases, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A":

1. Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Case #2024-7898: Las Soleras Tracts 21, 23, 24, and 26 General Plan Amendment,
3. Case #2024-7900: Las Soleras Tracts 21, 23, 24, and 26 Rezoning,
4. Case #2024-8852: Tract 19 General Plan Amendment,
5. Case #2024-8853: Las Soleras Tract 19 Rezoning,
6. Case #2024-8854: Las Soleras Tract 20 General Plan Amendment, and
7. Case #2024-8855: Las Soleras Tract 20 Rezoning

Seven motions are required for these Cases:

1. Recommend the Governing Body approve or deny Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Recommend the Governing Body approve or deny Case #2024-7898: Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment, subject to the Master Plan conditions listed in Section II, Table 1 *"Master Plan Conditions"*, and Master Plan Technical Corrections listed in attachment "*A*",
3. Recommend the Governing Body approve or deny Case #2024-7900: Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning,
4. Recommend the Governing Body approve or deny Case #2024-8852: Tract 19 General Plan Amendment
5. Recommend the Governing Body approve or deny Case #2024-8853: Las Soleras Master Plan Tract 19 Rezoning,
6. Recommend the Governing Body approve or deny Case #2024-8854: Las Soleras Master Plan Tract 20 General Plan Amendment, and
7. Recommend the Governing Body approve or deny Case #2024-8855: Las Soleras Master Plan Tract 20 Rezoning

II. Master Plan Conditions

Table 1 Master Plan Conditions

#	Condition of approval	Dept/Division	Completed By:
1	The Applicant shall submit a Master Sign Plan to be included with the Master Plan amendment as a permanent component of future development of the Project. This Master Sign Plan must comprehensively address the design, placement, and specifications of all signs within the project area to ensure compatibility with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. This requirement shall apply to the entire project area, irrespective of any future subdivision or ownership change, and must be adhered to by all current and subsequent owners or developers.	Land Use/ Current Planning Division	Prior to recording the Master Plan

III. EXECUTIVE SUMMARY

The Governing Body approved the Las Soleras Master Plan (Master Plan) on February 11, 2009, encompassing approximately 539 acres with a mix of uses including low, medium and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The original master plan concept proposed a walkable mixed-use neighborhood focused on an anticipated Rail Runner transit stop. The mix of uses was intended to approximate the citywide balance of residential and nonresidential uses, set among extensive open spaces.

Since adoption in 2009, there have been 4 amendments to the Las Solares Master Plan:

A. September 9, 2015
   i. Realignment of roads, reconfiguration of open space and trail, reconfiguration and reduction of park land and the reconfiguration of land tracts.
B. September 24, 2016
   i. Establish alternative height and setback standards for the R-6 and R-12 residentially zoned districts of Las Soleras for Estancias de Las Soleras and Ross's Peak.
C. September 12, 2018

i. Rezoning from MU (Mixed Use) to R-21 (Residential-twenty-one dwelling units per acre) and a reduction in the 90-foot utility, access, and trail corridor to 45 feet (La Rambla).

ii. Amending Las Soleras Master Plan condition related to dust control

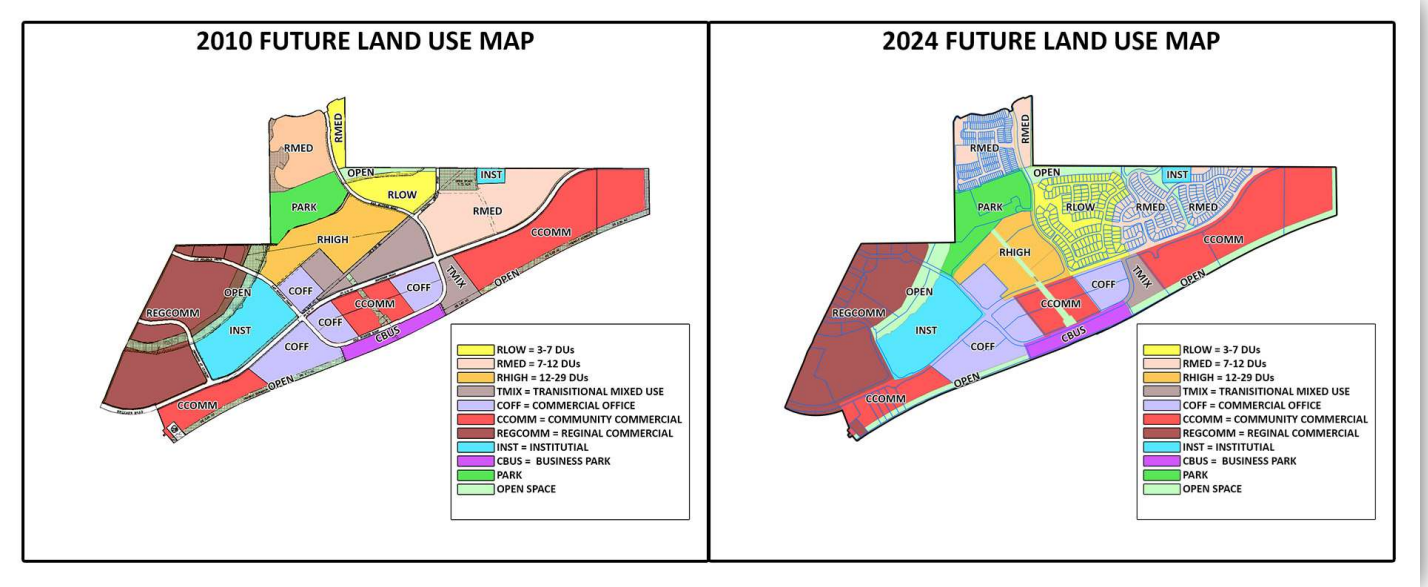
D. October 31, 2019

i. Rezoning from R-6 to R-10 for Las Solares Tract 13

IV. COMPARISON MAPS OF ZONING AND THE FUTURE LAND USE MAP

Figure 1 depicts a comparison between the 2010 Future Land Use Map (left), illustrating the land uses at the time of adoption of the Master Plan and Annexation into the City, and the current 2024 Future Land Use Map designations (right). The primary differences being within the project area where 4 lots (lots 21,23,24 and 26) were annexed in as Community Commercial (red) and are now designated as commercial office (light purple). There has also been an expansion of residential low density (yellow) and residential high density (goldenrod) and a reduction in Transitional Mixed Use (mauve) north of Beckner Road.

Figure 1 2010 / 2024 Future Land Use Map Comparison



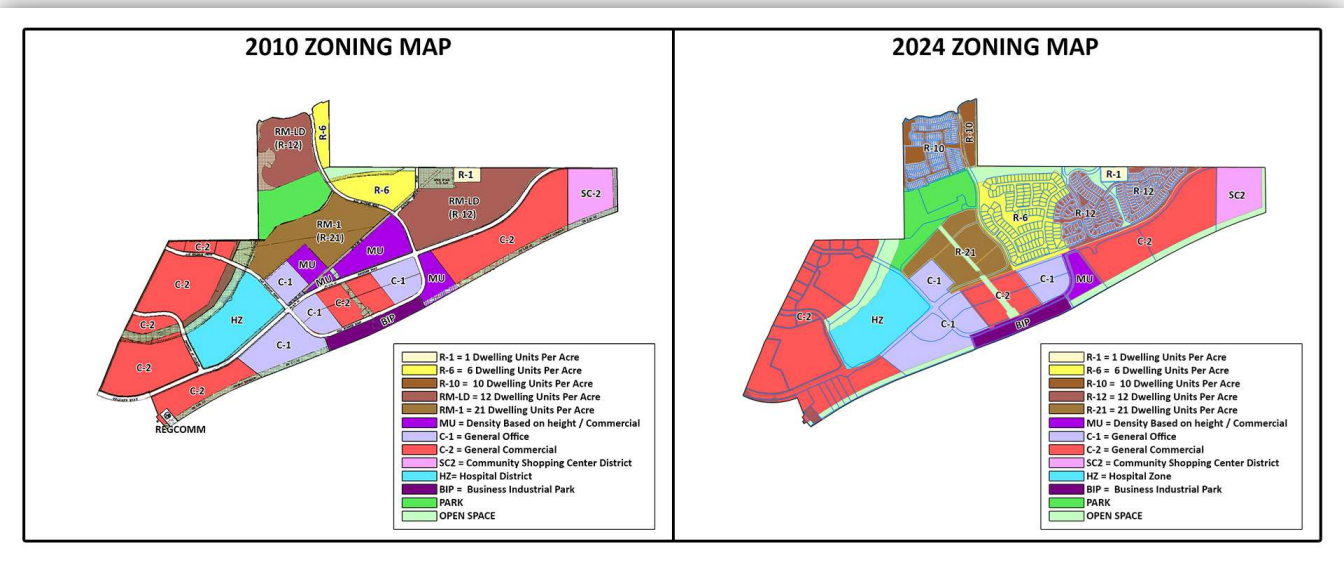


Figure 2 depicts a comparison between the 2010 Zoning Map established at annexation and the 2024 Zoning Map. The primary difference being a reduction in Mixed Use zoning (purple) in favor of more residential uses north of Beckner Road.

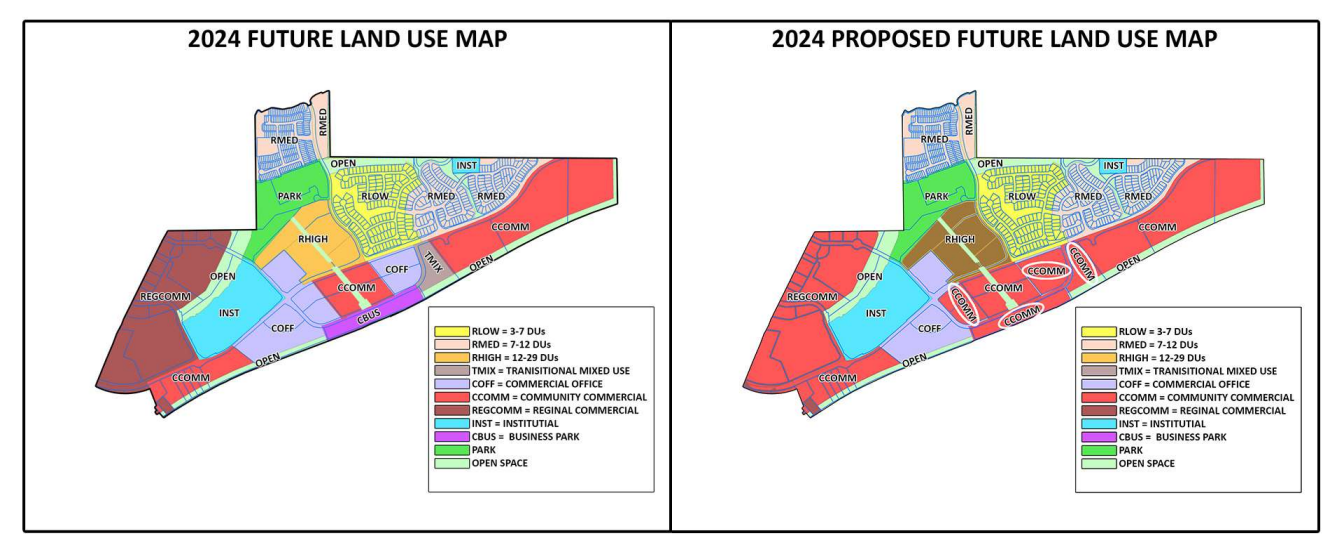

Figure 2 2010 Master Plan Zoning and 2024 Zoning Map Comparison

The Applicant's Proposed Changes

Figure 3 compares the existing 2024 Future Land Use Map and the applicant's proposed changes, from Commercial office (light purple), Business Park (dark purple), and Transitional Mixed Use (mauve) to Community Commercial (red).

Figure 3 2024 Future Land Use Map Comparison

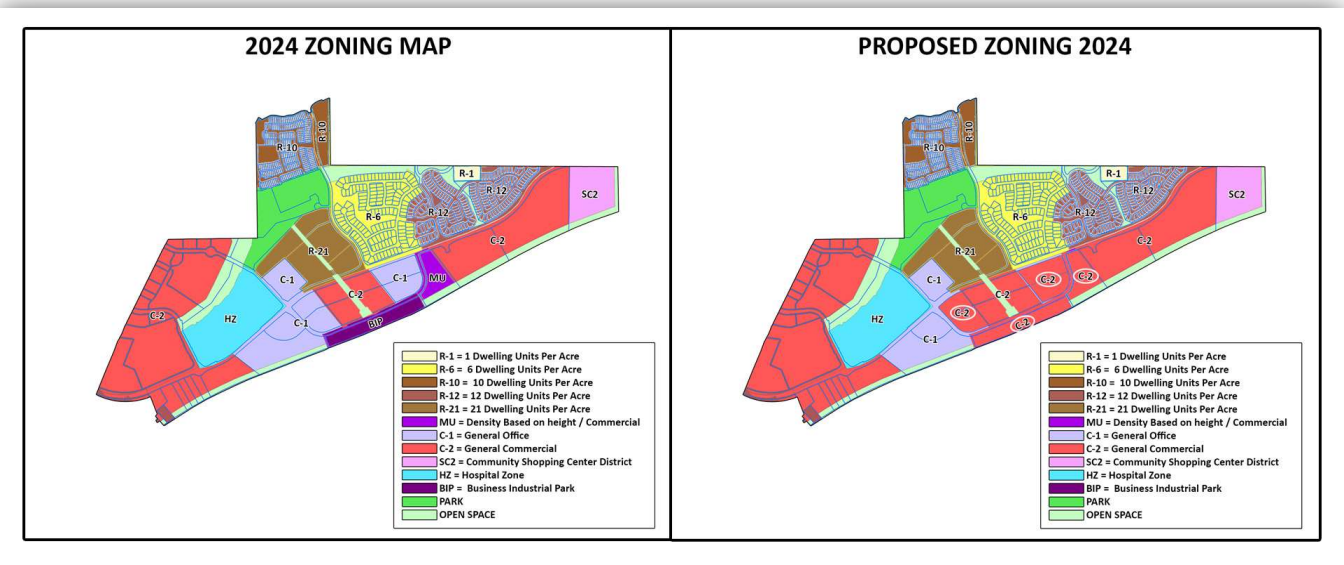
The General Plan describes Community Commercial Office as providing:

> *Sites for retail shopping areas, focus on a plaza, containing a wide variety of businesses, including retail stores; eating and drinking establishments; commercial recreation; service stations; automobile sales and repair services; financial, business, and personal services; and educational and social services.*

The General Plan describes Business Park as:

> *Business Parks shall provide areas appropriate for moderate- to low-intensity industrial and business park uses capable of being located next to commercial and residential areas with minimum buffering. Allowable uses include research and development related uses, light manufacturing, wholesaling, distribution and storage, retailing and small-scale restaurants as a related use only, and offices in a master planned landscaped setting. No raw materials processing or bulk handling would be allowed.*
>
> *The Business Park designation on the Future Land Use Map of the General Plan is intended to encompass the 11, Light Industrial District, and the IP, Industrial Park District, existing zoning categories. It is recommended that both districts be re-examined for allowable uses and appropriate standards. It is further recommended that the IP zoning district be restructured with a stronger emphasis on research and development, offices, and related uses, to be developed in a master planned landscaped setting, and that the district name be modified to Business and Industrial Park in order to reflect these changes.*
>
> *For new development and for rezonings within the Business Park designation, the appropriateness of 1 versus BIP (IP) is determined by the nature of adjacent land uses. Where an area designated Business Park on the Future Land Use map is adjacent to non-residential zoning, an existing non-residential use, or non-residential Future Land Use, then that area may be considered for 11 zoning. Where an area designated Business Park on the Future Land Use map is adjacent to residential zoning, an existing residential use, or residential Future Land Use, then that area may be considered for IP (BIP) zoning.*

The General Plan describes Transition Mixed Use as:



> *…mixed-use development, providing a variety of commercial (specific locations for big box retail), residential, and institutional opportunities.*

The General Plan describes Office as:

> *This classification provides sites for administrative, financial, business, professional, medical, and public offices, and small-scale restaurants (as a related use only) in areas where retail and other community commercial uses are not appropriate*.

Figure 4 compares the Applicant's proposed changes to the City Zoning Map, namely replacing C-1 (General Office), BIP (Business Industrial Park) and MU (Mixed Use) with C2 (General Commercial).

Figure 4 Existing and Proposed Zoning Map Comparison

Zoning Modifications

Table 2 *"Zoning Acreage Change"* depicts acreage changes affected by Master Plan Amendments for Las Solares Master.

Table 2 Zoning Acreage Change

Zoning	2010 Annexation (Acreages+/-)	2024 Current Zoning (Acreages +/-)	Proposed Changes (Acreages+/-)
R-1	3.02	3.02	3.02
R-6	28.96	46.9	46.9
RM-LD (R-10 & R-12)	102.66	81.19	81.19
RM-1 (R-21)	43.69	28.59	28.59
MU	37.49	9.11	0
C-1	50.29	50.45	30.75
C-2	171.5	171.5	~~239.47~~ 211.01
SC-2	20.21	20.21	20.21
HZ	39.03	39.03	39.03
BIP	10.7	10.7	0

Park	21.4	31.1	31.1

Figure 5 Line Graph

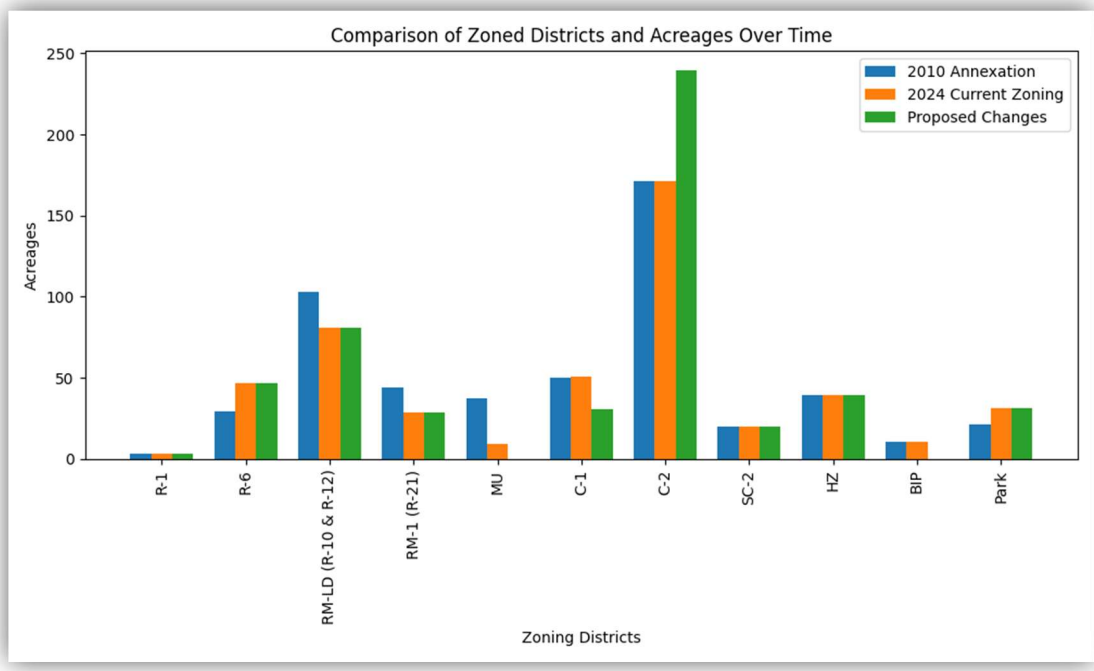


Figure 5, together with Figures 1-4 and Table 2 present an overview of modifications across various zoning categories, from the annexation agreement established in 2010 to the present year, and the applicants requested amendments. Figures 1-5 offer a general view of how acreages within the Master Plan area have changed across different zoning categories over time. The Master Plan amendment proposes modifications to the Master Plan zoning designations for Tracts 19, 21, 23, 24, and 26. The Master Plan amendment eliminates two zoning categories—MU (Mixed Use) from 9.11 acres to 0; and BIP (Business Industrial Park) from 10.7 acres to 0 acres—while reducing the area zoned as C-1 (General Office) from 50.45 acres to 30.75; and increasing those areas zoned as C-2 (General Commercial) from 171.5 acres to 239.47. In addition to the zoning changes, the applicant seeks to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet.

Relevant Chapter 14 Zoning District purpose statements:

14-4.3(A) C-1 Office and Related Commercial District

The purpose of the C-1 office and related commercial district is to provide areas for government offices; professional and business offices; medical and dental offices or clinics; personal care facilities for the elderly ; and hospitals , laboratories, pharmacies and related complementary businesses that provide sales or service of office equipment, medical and dental supplies and office supplies. This

district serves as a transitional buffer between more intense commercial use districts and residential districts.

14-4.3(B) C-2 General Commercial District

The C-2 general commercial district includes areas along streets carrying large volumes of traffic where commercial uses are appropriate. Regulations are designed to guide future additions or changes so as to discourage extension of existing and formation of future strip commercial development , to preserve the carrying capacity of the streets and to provide for off-street parking and loading.

14-4.3(H) BIP Business and Industrial Park District

1) Purpose

(a) The purpose of the BIP district is to provide locations for the development of jobs in research and development activities and in offices, institutions and limited light industrial settings. The BIP district regulations intend to ensure that district locations may be adjacent to residential and commercial areas with minimum buffering.

(b) It is also the purpose of the BIP district to allow related uses that complement or support the primary employment-based uses to create a functional and pedestrian-friendly development.

2) Rezoning Requirements

(a) Property is eligible for rezoning to BIP if the property is a minimum of four acres in size and all other applicable requirements of Chapter 14 are satisfied.

(b) Rezoning to BIP requires consideration and approval by the planning commission and governing body of a master plan or development plan for the property as provided in Sections 14-3.8 and 14-3.9."

14-4.3(L) MU Mixed-Use District

1) Purpose

It is the purpose of the MU mixed-use district to provide for the creative infill and development of underused and vacant land and buildings in Santa Fe. This zoning category allows office, commercial and residential uses in the same building or on the same property . MU zoning should accomplish the following goals:

(a) control sprawl by creating a more efficient use of land and more opportunities for infill ;

(b) promote affordable housing and economic development by emphasizing a variety of land uses

(c) promote creative and flexible land uses within Santa Fe;

(d) foster alternative means of transportation, including transit, bicycles and walking;

(e) promote infill development and pedestrian-oriented streetscapes in currently underused parking areas and along existing roadway corridors; and

(f) promote shared parking areas in the design and development of mixed-use projects.

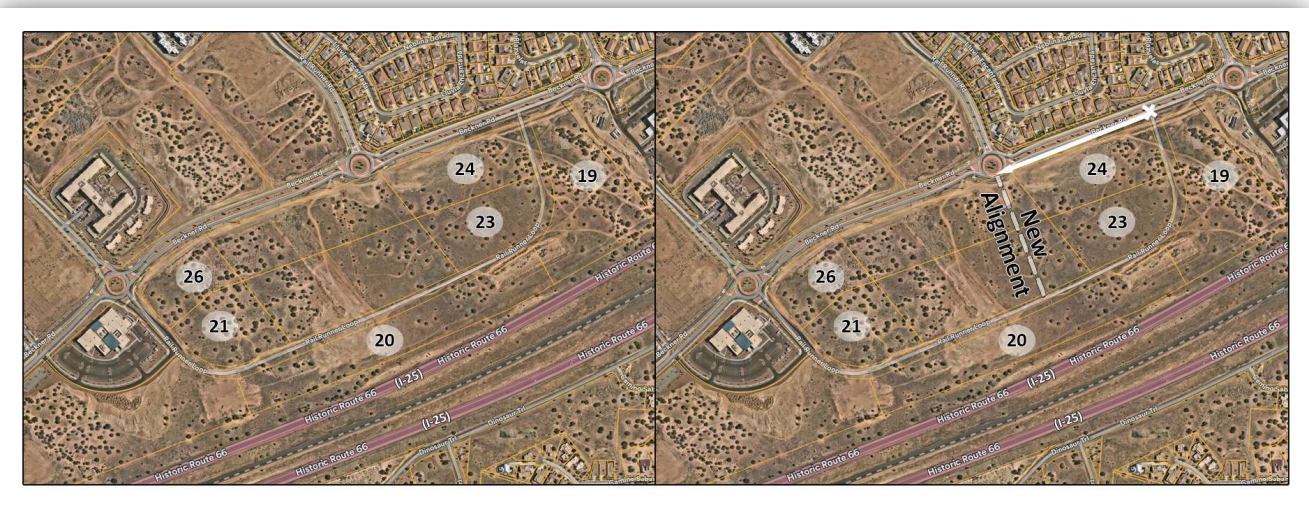
(2) Rezoning Requirements

(a) Application for rezoning to MU is not allowed for residentially zoned properties located in historic districts, as shown on the official zoning map.

(b) *Rezoning to MU requires consideration and approval by the planning commission and governing-body of preliminary or final development plans for the property as provided in Section 14-3.8.*

As districts expand, contract, or are eliminated, the urban fabric of the Los Soleras Master Plan area shifts. Expansion of C-2 zones might encourage more robust commercial development but could risk higher traffic and reduced pedestrian safety and less open space. Shrinking or eliminating MU districts could undermine efforts to increase urban density and mixed-use developments, potentially leading to greater vehicle dependence and loss of vibrant, multi-functional urban areas. Changes in BIP zoning could affect the availability of land for high-tech and industrial jobs, impacting local employment landscapes. Conversely, growth in C-1 areas could promote quieter, service-based environments but might limit opportunities for larger commercial ventures. Each adjustment to these zoning districts needs to be considered carefully to balance growth, community needs, and infrastructure capabilities.

The Applicant complied with Subsections 14-3.1(E) *"Pre-Application Conferences,"* 14-3.1(F) "Early Neighborhood Notification Procedures," and 14-3.1(H) *"Notice Requirements."*



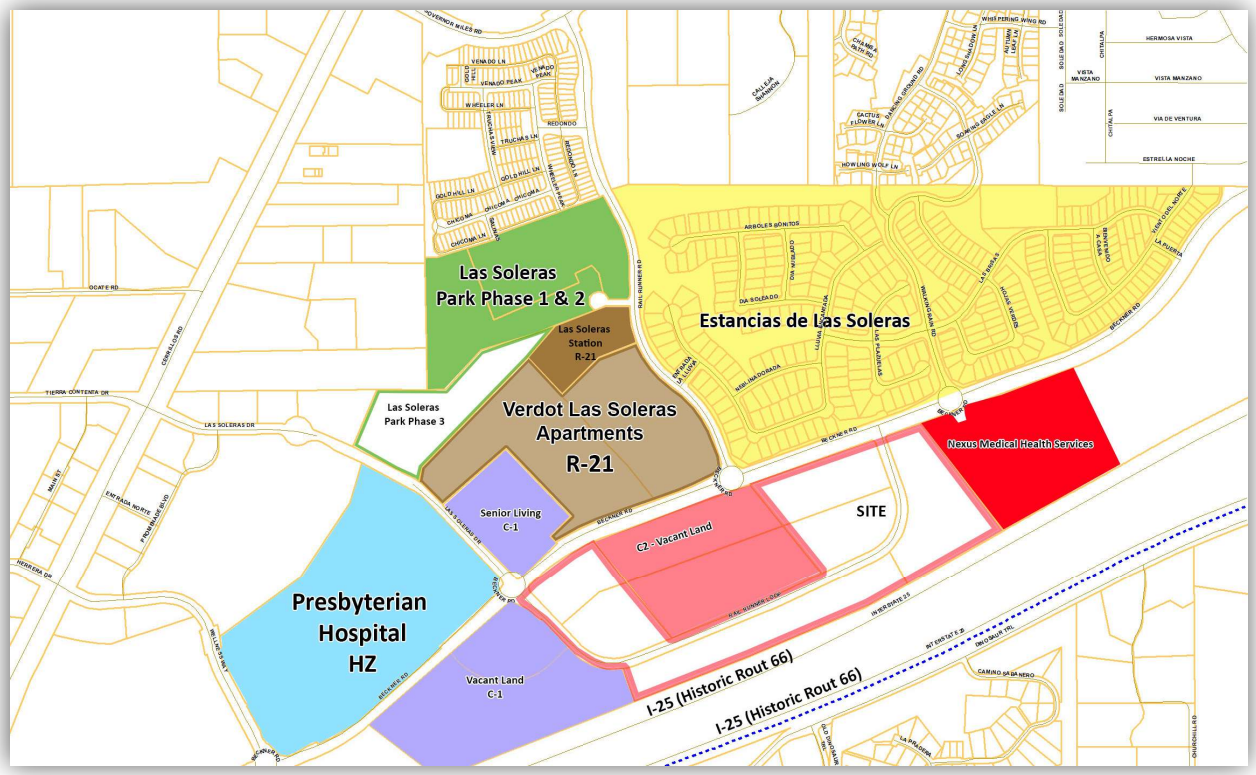
Staff's analysis finds that the Applicant met the approval criteria as outlined in Subsection 14-3.9(D) for Master Plans, Subsection 14-3.2(E) for amendments to the General Plan, and Subsection 14-3.5(C) for the rezoning request across all 7 case requests.

V. PROJECT ANALYSIS

A. Property Information:

Tracts 19, 20, 21, 23, 24, and 26 are vacant tracts of land measuring 9.11, 10.70, 4.70, 7.27, 6.18, and 3.48 acres, respectively, totaling approximately 41.44 acres. Tracts 19-23 are located off Rail Runner Loop. Per the approved Las Soleras Master Plan the Applicant will align Railrunner Loop to with the Railrunner Road Roundabout. Currently, Rail Runner Loop aligns with the Solares Drive/Beckner Road intersection at a roundabout on the west end and lies between the intersections of Rail Runner Road and Walking Rain Road/Beckner Road, each featuring roundabouts, at the east juncture. The eastern intersection will be realigned with the Rail Runner Road and Beckner Road intersection roundabout. Tracts 24 and 26 are located off Beckner Road (Reference Figure 6 *"Tract Location"*).

Figure 6 Tract Location



B. Adjacent Uses

Table 3 Nearby Development (Reference Figure 7 "Adjoining Uses")

Direction	Zoning
North	C-1 (General Office) 5011 Las Soleras Dr, R-21 (Residential - 21 dwelling units per acre) Verdot apartments, R-6 (Residential – dwelling units per acre) Estancias De Las Soleras
West	C-1 (General Office) vacant land
East	C-2 (General Commercial) - Nexus Medical Health Services
South	I-25 (Historic Rout 66)

Figure 7 Adjoining Uses

C. La Rambla Trail Easement

In addition to general plan amendments and rezoning requests, the application includes the realignment of Rail Runner Loop. The realignment is required as a condition of the Las Solares Master Plan, and the Applicant is adhearing to the required realignment condition. The applicant also seeks approval to reduce the La Rambla that traverses across Los Solares Tracts 22 and 25,. Tracts 22 and 25 are also currently owned by the applicant and will be integrated into future development, but they are not part of the current application as they are already zoned C2. The Master Plan amendment proposes reducing the La Rambla, originally established in 2010 as 90 feet wide, to 45 feet to align with the Rambla Trail width set by a previous Las Soleras Master Plan Amendment approved in 2019. Additionally, the applicant proposes the flexibility to adjust the location of the larger Plaza open space area anywhere along the Rambla between Beckner Road and Rail Runner Loop Road (Reference Figure 7 *"La Rambla Trail Easement.").*

Figure 8 La Rambla Trail Easement

VI. PROPOSED INFRASTRUCTURE

The City Code requires that proposed infrastructure can accommodate the impacts of the proposed development. "[T]he existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development." SFCC 1987, § 14-3.5(C)(1)(e). The Development Review Team ("DRT") concluded that City resources and infrastructure can accommodate the proposed request. *See* Attachment a, "DRT Comments".

VII. EARLY NEIGHBORHOOD NOTIFICATION MEETING

The Applicant conducted a virtual Early Neighborhood Notification Meeting (ENN) via Zoom on November 14, 2023. No members of the public attended the ENN. The Applicant complied with all notice and other procedural requirements as per City Code Section 14-3.1(F).

VIII. APPROVAL CRITERIA – MASTER PLAN

Section 14-3.9 Necessary Findings: (A) and (D):

Table 4 Master Plan

Criteria 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):

"The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals are supported:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the

Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response (Master Plan):

Staff agrees with the Applicant's response. The proposed Master Plan is consistent with several policy goals of the City of Santa Fe General Plan. Despite the elimination two zoned districts (Mixed Use and Business Industrial Park) originally envisioned in the Las Soleras Master Plan, the Master Plan still maintains the potential for a diverse range of uses as allowed within the C-2 District.

Staff finds that the Master Plan meets Criterion 1 (14-3.9(D)(1)(a).

Criteria 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):

"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan):

Staff agrees with the applicant's response. The amendment aligns with the predominant zoning patterns in the area, which primarily are uses (multifamily and nonresidential) allowed within a C-2 District. The variety of C-2 uses, ranging from residential to light industrial, adheres to the Las Soleras Master Plan's original intent to foster a mix of uses, despite the proposed elimination of both Mixed Use and Business Industrial Park Districts, while also responding to current market demands. The master plan continues to maintain a broad spectrum of uses within the C-2 District, supporting the potential for a coherent and strategically planned environment that accommodates both commercial and residential developments within the Master Plan.

Staff finds that the Master Plan meets Criterion 2 (14-3.9(D)(1)(b).

Criteria 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Master Plan):

"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan):

Staff agrees with the applicant's response. The amendment to C-2 zoning provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such

as full-service dining and more. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth. Moreover, the rezoning of the property will facilitate future development that is expected to trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System, further enhancing the area's coordinated development. The Las Soleras Master Plan originally contained a Rail Runner Stop. However, the Rail Runner stop was canceled during Governor Martinez's Term in office. It is unclear if the Rail Runner Stop will occur at Las Soleras in the Future.

Staff finds that the Master Plan meets Criterion 3 (14-3.9(D)(1)(c)].

Criteria 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No)** **YES**

Applicant Response (Master Plan):
"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan):
Staff generally agrees with the applicant's response regarding the minimal impact of the proposed amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Traffic Analysis provided by the applicant, it has raised certain points for consideration regarding future phases of the project:
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended TIA.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for

future development:

1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not *"have any concerns at this time from a water engineering standpoint. The existing 12" main in Beckner should be able to accommodate the changes being proposed with no issues. For the future developments that come in under the general plan and master plan, the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project."*

The Wastewater Division has *"determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development."*

The Parks Division raised no concerns for the project.

Staff finds that the Master Plan meets Criterion 4 (14-3.9(D)(1)(d).

IX. General Plan

14-3.2 *"Amendments to the General Plan"* establishes approval criteria for amendments to the General Plan.

Table 5 General Plan Amendment Criteria

Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) YES**
Applicant's Response (General Plan Amendment): *"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*	

Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report further emphasizes the importance of diversifying Santa Fe's economic base to ensure

sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment):
Staff agrees with the Applicant's response. The proposed amendment for Las Soleras Tracts 19-26 aligns with Santa Fe's growth and economic development strategies. By citing strategic documents like the Angelou Report and the 2008 Economic Development Strategy, the response demonstrates that the amendment supports city policies on economic diversification and infrastructure development. The Applicant's use of demographic data underscores the amendment's relevance to current and future community needs, ensuring it contributes to Santa Fe's long-term prosperity and resilience.

Staff finds that the proposed amendment meets Criterion 1 [14-3.2(E)(1)(a)].

Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response (General Plan Amendment):
Staff agrees with the applicant's response. The applicant's request is to uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial. A Community Commercial classification aligns with the existing land use patterns nearby, where adjacent and nearby Tracts are already designated as Community Commercial. Eliminating the Transitional Mixed Use and Business Park designations for Tracts 19 and 20 resolves inconsistencies with the surrounding areas, streamlining the land use classifications and enhancing urban coherence.

As illustrated in this report (Figures 3 and 4) the Future Land Use Map, Tracts immediately adjacent to the east of Tracts 19 – 26 are already designated as Community Commercial. Additionally, Tracts 22 and 25 within the targeted area are currently classified as Community Commercial. Furthermore, there are areas designated Community and Regional Commercial only a short distance from the subject property to the west between I-25 and Beckner Road and to the north near the Presbyterian hospital.

The fact that Tracts 19 and 20 are currently designated as Transitional Mixed Use and Business Park, respectively, seems inconsistent with the predominantly Community Commercial and Office designations in the vicinity. This suggests that the proposed amendment to Community Commercial could harmonize the land use classifications in this part of the Las Soleras Master Plan area.

Moreover, the infrastructure in place serving Las Soleras—including roads, trails, and utilities has been designed to support the Master Plan as vacant Tracts are developed.

Staff finds that the proposed amendment meets Criterion 2 [14-3.2(E)(1)(b)].

Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **YES**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services.

Staff Response (General Plan Amendment):

Response to (i):

The applicant's response to item "(i)" of Criterion 3 focuses on reclassifying Tracts 19 and 20 from Transitional Mixed Use and Business Park to Community Commercial, matching the existing nearby uses of Community Commercial and Office. This standardizes land use according to the area's predominant commercial orientation. However, the response lacks specific details on how the changes for additional tracts (21, 23, 24, and 26) fit with their existing land use or if they conflict with the prevailing use and character of their surroundings.

The lack of detailed information on tracts 21, 23, 24, and 26 leaves a gap in determining full compliance with this criterion.

Response to (ii):
Staff agrees with the applicant response to item "(ii)." The Tracts involved in the amendment collectively exceed 2 acres.

Response to (iii):
Staff agrees with the applicant response to item "(iii)." The proposal to classify these Tracts as Community Commercial reflects the existing land use designations of adjacent areas and does not disproportionately benefit a single or small group of landowners at the expense of others. Instead, it is likely to provide broader economic benefits through job creation, enhanced tax revenues, and expanded service offerings, thus serving the general public interest.

Staff did not find sufficient detail within in the Applicant's response to address Criterion 3 [14-3.2(E)(1)(c)]. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the proposed amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public. Therefore, it is Staff's conclusion that the proposed amendment is consistent with Criterion 3.

Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (General Plan Amendment):
"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."

Staff Response (General Plan Amendment):
Staff agrees with the Applicant's response. The proposed amendment promotes general welfare by accelerating development in the Las Soleras area, which includes completing the Las Soleras Bridge over Arroyo de Los Chamisos. This infrastructure enhancement directly benefits the public.

Staff agrees with the Applicant's response. The proposed a General Plan Amendment that offers significant public advantages. Specifically, the Applicant highlights that the effective and accelerated development resulting from the amendment will facilitate the completion of critical infrastructure, notably the Las Soleras Bridge crossing Arroyo de Los Chamisos. This critical infrastructure is as a benefit to the general welfare, indicating that the amendment provides substantial public advantages beyond mere compliance, thereby satisfying the conditions set forth in Criterion 4.

Staff finds that the proposed amendment meets Criterion 4 [14-3.2(E)(1)(d)].

Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans;	**Not Applicable**
Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.

In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."

Staff Response (General Plan Amendment): Staff agrees with the applicant's response. The applicant's proposal for a uniform Community Commercial land use designation across Tracts 19-26, combined with the uses allowed under C-2 Zoning, aligns well with the adjacent land uses. This alignment promotes a more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4.

The application outlines several key benefits that contribute to the overall welfare of the community. These include the expansion of the Las Soleras trails system and the construction of the Las Soleras Bridge, which are anticipated to improve local infrastructure and connectivity significantly. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.

Staff finds that the Criterion 6[14-3.2(E)(1)(f)] is met.

Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	**Criterion Met: (Yes/No) YES**

Applicant's Response (General Plan Amendment):
"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."

Staff Response (General Plan Amendment):
Staff agrees with the applicant's response. The applicant has referenced multiple policies that support the proposed change, which is in line with the criteria for a General Plan amendment. This proposed change does not conflict with any existing city ordinances or regulations. The applicant asserts that the development from this amendment will conform to the City of Santa Fe's land use policies and adhere to the conditions outlined in the Las Soleras Master Plan.

The applicant's response aligns with the discussions under Criteria 1, 2, 4, and 6. These criteria collectively highlight that the amendment fosters a harmonious development strategy, promotes general welfare, and corresponds with adjacent land uses and broader city policies, ensuring there are no conflicts with existing

regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
Criterion 8 [14-3.2(E)(2) Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a)the growth and economic projections contained within the general plan are erroneous or have changed;(b)no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or(c)conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Criterion Met: (Yes/No)** **Not Applicable**
The Applicant is not required to document compliance with Criterion 2, since the application does not amend land use policies.	

X. ZONING APPROVAL CRITERIA

Section 14-3.5(A) and (C) SFCC 2001 sets forth approval criteria for rezoning as follows:

(1) The Planning Commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

Table 6 Rezoning from R-3 to C-2

Criteria 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning): ***Response to Criterion (1)(a)(i):*** *"Not applicable"* ***Response to Criterion (1)(a)(ii):*** *"As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -* *26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development –*	

most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."

Response to criterion (1)(a)(iii):

"As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.

Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and

Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.

Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and

Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.

Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and

Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and

Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response (Rezoning):

(i) The applicant addressed the first criteria "(i)" as "Not Applicable." Staff analysis found that there was no mistake in the original zoning.

(ii) Staff partially agrees with the Applicant's response. The Applicant, along with the information provided in this report, effectively demonstrates a significant change in the character of the Las Soleras neighborhood since 2010, which may justify the proposed zoning changes. The Applicant's response acknowledges all the Tracts in the context of the infrastructure project, but it primarily focuses on Tracts 19 and 20 in terms of zoning inconsistencies. However, the response does not provide a detailed justification for the zoning changes across all the mentioned tracts (19-26). This lack of comprehensive detail results in an incomplete response to the criteria.

(iii) Staff agrees with the Applicant's response regarding the rezoning of Tracts 19-26 to a uniform Community Commercial C-2 district, which is in line with Santa Fe's growth and economic development plans. This rezoning supports a variety of uses, enhances pedestrian environments, and promotes economic self-sufficiency by balancing residential and employment opportunities. The rezoning is designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs. Furthermore, the development aligns with the Las Soleras Master Plan, ensuring consistency in community design and infrastructure. Notable infrastructure improvements like the Las Soleras Bridge and trail expansions are also planned, enhancing community access and supporting the overall benefits of this rezoning proposal.

Staff finds that the Criterion 1 [14-3.5(C)(1)(a)] is met.

Criteria 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response (Rezoning): Staff Agrees with the applicant. The application provides all components to address the criteria for a rezoning request. Criterion 2 [14-3.5(C)(1)(b)] is met.

Criteria 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers;
and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning):
Staff agrees with the Applicant's response that the rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 aligns with the City of Santa Fe's General Plan and economic development goals. The proposal matches city policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the future land use map.

Staff finds that Criterion 3 [14-3.5(C)(1)(c)] is met.

Criteria 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff agrees with the Applicant's response, the land proposed for rezoning is greater than 2 acres.

Staff finds that Criterion 4 [14-3.5(C)(1)(d)] is met.

Criteria 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):
"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Rezoning):
Staff agrees with the Applicant's response that the existing infrastructure is claimed to be adequate for the proposed development. However, this assertion is primarily based on comments from the Traffic Division, Fire Prevention, Water and Sewer Divisions and Parks Division. It is important to note that the "Conceptual Test Fit" land plan, while included, cannot be used to establish compliance with the criteria since it is not an actionable item on the agenda. Additionally, Development Review Team (DRT) evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development.

Staff finds that Criterion 5 [14-3.5(C)(1)(e)] is met.

Criteria 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **YES**

Applicant's Response (Rezoning):
Response to 14-3.5(C)(2)(a):
"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Response to 14-3.5(C)(2)(b):
"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

Response to 14-3.5(C)(2)(c):
"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (Rezoning):

Response to 14-3.5(C)(2)(a):

The Applicant's response mainly focuses on Tracts 19 and 20, discussing their current zoning and the proposal to change them to Community Commercial. Although the response mentions that the broader area predominantly features Community Commercial and Office zones, it does not provide detailed information on the land use classifications for each of the other tracts from 19 to 26. Thus, the response does not comprehensively address all the tracts involved in the rezoning proposal.

Response to 14-3.5(C)(2)(b):

Staff agrees with the applicant response to item "(b)." The Tracts involved in the amendment collectively exceed 2 acres.

Response to 14-3.5(C)(2)(c):

Staff agrees with the Applicant's response. The C-2 Zoning for Tracts 19-26 is consistent with the existing land use patterns in adjacent areas within the Las Soleras Master Plan. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, it is anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

XI. CONCLUSION:

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on March 9, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

The Land Use Department together with the DRT have analyzed the project. The Applicant has addressed all criteria necessary to submit an amendment for review to the Las Soleras Master Plan, Amendment to the General Plan Future Land Use Map and a rezoning for Las Soleras Tracts 19, 21, 23, 24, and 26. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

DRT Member: Leroy N. Pacheco, PE

Phil Gallegos, PE (Wilson & Company)

Dept/Div: Public Works Department – Traffic Engineering

Case No.: Las Soleras GP, Rezoning & Master Plan, Parcels 19 – 26

Case Planner: Dan Esquibel, Planner and Case Manager

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response:**
1. N/A	N/A	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response:**
1. As described and listed in the attached email from Wilson & Co. dated 3/7/24	Prior to Filing Master Plan	
2.		
3.		
4.		

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. The original approved Master Plan note 46A states: "… Beckner Road shall be constructed as a four lane major arterial consistent with Chapter 14 of the City Code unless otherwise approved by the City of Santa Fe Public Works Department (consistent with approved or amended TIA).
2. Note that the updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road as described as a condition of approval in the original Master Plan.

Explanation of Conditions or Corrections (if needed):

(see following pages for notes required)

Las Soleras Tracts 19 through 26 Traffic Study for Zone Change REVISED

From Gallegos, Phil <Philip.Gallegos@wilsonco.com>

To engineer@leroypacheco.com<Engineer@leroypacheco.com>

CC Audra Gallegos (audra.gallegos@wilsonco.com)<Audra.Gallegos@wilsonco.com>

Date Thursday, March 7th, 2024 at 11:52 AM

Leroy, I have reviewed the Las Soleras Tracts 19 through 26 Traffic Study for Zone Change and have the following comments.

It should be noted and updated in the Executive Summary and Report that the proposed zone change indicates that a four lane facility on Beckner is required between Las Soleras to east of Rail Runner Road with a dual lane roundabout at Beckner and Rail Runner. Beckner should be expanded to a 4-lane facility from Cerrillos Road to East of Rail Runner Road with a dual lane roundabout at Beckner and Wellness Way as well for system continuity. As development in the area progresses Beckner may in the future be required to expand to a 4-lane facility from Cerrillos Road to Richards Ave. with dual lane roundabouts.

In general, I concur with the findings and recommendations in the report with the following comments. The markups can be viewed on the link below. Please let me know if you have any questions or need more information. Thanks, Phil

On page 12, 16 and 19 indicate page number for the 9 other proposed development projects

On page 28 the intersection of Beckner and Las Soleras should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 30 the intersection of Beckner and Rail Runner should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 32 the intersection Number 9 Walking Rain Road should be referenced as an unsignalized roundabout instead of a signalized roundabout

On page 35 intersection number 10 Beckner and Calle de Alegria is referenced as roundabout but on page 34 is referenced as an unsignalized intersection right in/right out.

On page 36 Beckner road/Calle de Alegria is reference instead of Governor Miles/Rail Runner

DRT Member: Geronimo Griego, Fire Marshal

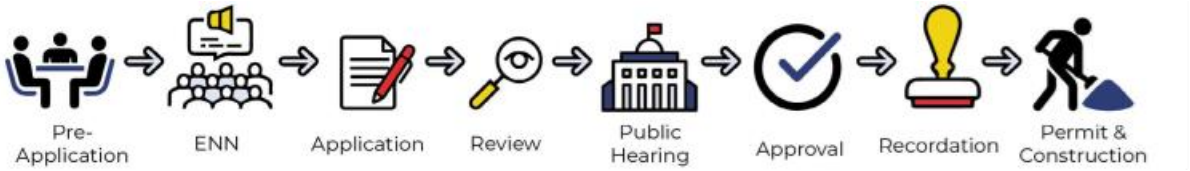
Dept/Div: Fire Prevention Divisions

Case No.: 2024-7898, 7900, 7899 Las Soleras GP, Rezoning & Master Plan, Parcels 19 – 26

Case Planner: Daniel Esquibel

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of Construction* – these conditions/technical corrections can be addressed during the construction and inspection processes.

Form Updated: March 2024

Development Review Process Flow Chart

*See the *2024 Development Review Schedule* for details

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. code provisions or other requirements below.		
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1.		
2.		
3.		
4.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. A comprehensive assessment of the fire service's capacity and requirements should be conducted for all substantial new masterplan developments.

2. Prior to the commencement of any construction, the water division and fire department must provide the approval of all infrastructure hydrants and waterlines.

3. Prior to the arrival of any combustible materials, a suitable all-weather access road capable of accommodating a 75,000-pound fire apparatus shall be provided

Explanation of Conditions or Corrections (if needed):

Subject: Case 2024-7898, 7899, 7900 - Las Soleras General Plan Amendment, Master Plan Amendment, and Rezoning

Dan,

For the subject cases, we don't have any concerns at this time from a water engineering standpoint. The existing 12" main in Beckner should be able to accommodate the changes being proposed with no issues. For the future developments that come in under the general plan and master plan, the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project.

Let me know if you have any questions.

Thanks,
Taylor

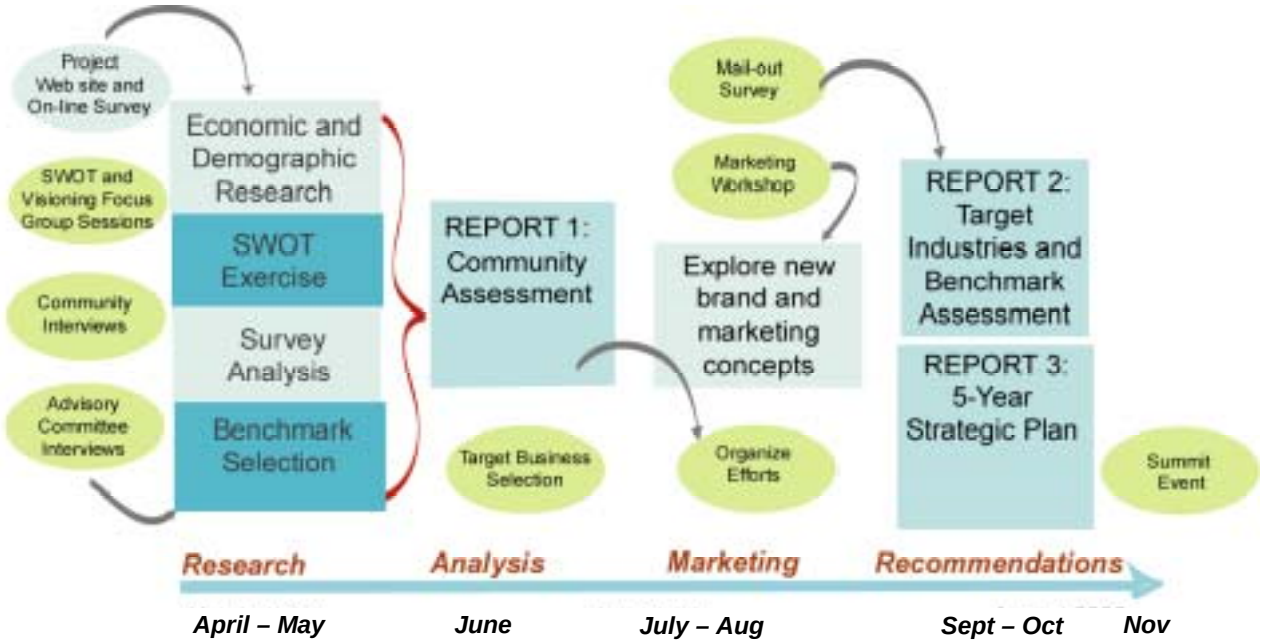
Introduction

This report contains a roadmap for Santa Fe's future economic development efforts. It reflects a planning process that has spanned the past seven months, involved hundreds of hours of research, and collected input from approximately 1,500 people in Santa Fe.



The strategic planning process began with an analysis of Santa Fe's current economic situation. This analysis, contained in *Report One: Community Assessment*, examines the strengths and challenges that Santa Fe faces in five areas that impact the city's effectiveness in economic development: business climate, infrastructure, workforce and education, quality of life, and economic development efforts. For each topic, several issues were examined and Santa Fe's performance was ranked. This report was the first step toward identifying the city's future opportunities and major areas for improvement.

Based on the results of the *Community Assessment* and input received from the community, AngelouEconomics (AE) identified seven major business sectors on which Santa Fe should focus its economic development efforts. These industries are: **Arts and Culture; Design; Hospitality; Water Conservation and Clean Energy Technologies; Software Development; Publishing and New Media; and Outdoor Gear and Apparel**. These industries should become the primary audience for future marketing efforts, and their needs should be considered in all community development activities. A description of the methodology used to identify these targets, a profile of each targeted business sector, and descriptions of the economic development efforts of several benchmark communities are provided in the second report of this project*, the Target Industry Report*. Secondary Target Industries were also identified, and included Health Services (both traditional and non-traditional), Retiree Services and Food and Beverage products.

This is the final report of the strategic planning process. It contains specific recommendations to (1) improve the city's economic health; (2) improve conditions for cultivating new target sector businesses, small entrepreneurial businesses; and (3) provide new opportunities for all Santa Fe families.

An illustration of the strategic planning process is provided on the following page.

Strategic Planning Process

Acknowledgements

The project team conducted interviews and focus groups with more than 200 individuals and organizations from the Santa Fe region, including those listed below. Their input shaped this strategy, and their future support will be critical to the implementation of the City's economic development initiative and achievement of long-term economic health.

In addition to the individuals listed above, the consulting team received **survey responses from 1,352 individuals and businesses located in the city**. The survey was a valuable tool used to measure impressions of the city's strengths and challenges and learn more about what residents believe makes Santa Fe special. We offer our gratitude to each individual who took the time to fill out the survey. Your comments helped mold the recommendations we offer in this report.

AngelouEconomics' core team for this project included Angelos Angelou, Amy Holloway, Chris Engle, Nicole Urbis, and Daniel Kah.

Executive Summary

What does Economic Development mean for Santa Fe?

How economic development is defined differs among communities. For many years, cities' economic development activities were focused on recruiting new employers. Recently, the focus of economic development in many cities has shifted, placing a stronger emphasis on community development activities that improve local workforce, infrastructure, and business climate to help local companies grow and new ones to emerge. This latter definition is more appropriate for Santa Fe.

The term "economic cultivation" has been chosen to describe Santa Fe's economic development practices. **The city's focus should be more on creating a climate that is ripe for entrepreneurship and small business success than on recruiting large companies.** The ultimate goal of economic cultivation in Santa Fe is to achieve long-term economic health. A healthy economy benefits all residents and businesses in the region, from the business community to not-for-profit organizations to the arts and to the native populations.

Overview of the Economic Development Plan

During the past seven months, AE has worked closely with Santa Fe leaders to compose an economic development strategy for the region. The driving objective of this strategy is to generate sustainable economic health and prosperity for the citizens of Santa Fe and the surrounding region.

Based on extensive research, the consulting team has developed a series of recommendations to accomplish this objective. All recommendations offered in this report are both (1) sustainable (creating consistent long-term economic growth in a non-damaging way) and (2) strategic (tailored and coordinated for meeting the city's long-term objectives).

The *Economic Development Plan* should be viewed as a living document. The New Mexico Media Strategies Report and the University of New Mexico's Bureau of Business & Economic Research's report on the cultural industries, for example, will be used to develop specific work plans for those clusters when they become available. The *Economic Development Plan* offers guidelines and techniques designed to improve the city's economic health. It provides Santa Fe with a structure to incorporate other activities, particularly specific initiatives within each targeted business sector. Other recommendations might be added or current ones eliminated as economic conditions change.

Recommendations fall into five categories:

- **Workforce development and education**
- **Entrepreneurship**
- **Sites and infrastructure**
- **Community development**

- **Marketing**

Santa Fe suffers from an increasing gap between local wages and cost of living. The gap can be narrowed through a variety of techniques – from increasing the minimum wage to assisting residents to find and finance affordable housing. These activities have already begun in Santa Fe. The Living Wage Ordinance (Ordinances 2002-12 and 2003-8) demonstrates the City's commitment to improving the incomes and wage rates of Santa Fe's citizens.

Economic development provides another approach to making it easier for Santa Feans to afford to live and work in the region. A strong economic development initiative has been laid out in this strategy. It focuses on diversifying Santa Fe's employment base through new business recruitment, expanding local companies, and supporting entrepreneurship. It contains tools that the City, the Community Development Division, and a wide range of regional organizations can use to increase the range of job opportunities available to Santa Feans. With a greater diversity of employment options comes a greater opportunity for residents to improve and employ their unique talents, generating new wealth for every Santa Fe family.

Themes of Santa Fe's Economic Development Plan

During the course of this project, several important themes have emerged in our discussions with the community. First, Santa Fe is a unique city and any new development should reflect its creative character. Second, Santa Fe wants to attract a targeted audience of visitors and businesses to the community. Tourists, for example, must come to Santa Fe with the intention (and financial wherewithal) to shop in local galleries, eat in locally-owned restaurants, and stay overnight in downtown and locally-owned accommodations. Third, Santa Feans feel a strong connection to the region's heritage. Many people who participated in focus groups and interviews, for example, have a deep desire to preserve the downtown space so that it does not become overly congested and lose its historical presence.

These themes appear throughout the Economic Development Plan. Based on these themes, we offer four overarching recommendations:

1. To be successful in economic development, Santa Fe's leaders should strive to foster a culture that creates jobs that complement the community's unique character.
2. Santa Fe cannot avoid change. The City should aggressively direct how those changes occur.
3. The key to economic development in Santa Fe is to ensure that new developments – whether it is a new civic center, new infrastructure project, or new educational program – retain the essence of the community. The essence of Santa Fe lies in its creative people, its strong history, and its core of arts and culture.
4. For the City to support a project, the project must provide new opportunities to Santa Fe's workforce.

Summary of Recommendations

To be successful, Santa Fe must develop highly integrated networks of businesses, training programs, capital providers, educational institutions, non-profit organizations, labor organizations, and government agencies. Economic development cannot be successful unless these groups work in a coordinated, collaborative fashion.

It is important that City officials adopt a more focused approach to economic development. It starts with City leaders identifying and agreeing to long-term goals. All future City decisions should be checked against these aforementioned overarching goals. Only initiatives that work toward accomplishing the City's long-term goals should be adopted. To jump-start the City's goal-setting activities, we have proposed specific goals for workforce development and education, entrepreneurship, sites and infrastructure, community development, and marketing.

A summary of recommendations is provided below. We have provided detailed action items for each recommendation within the body of the strategy.

I. Workforce Development and Education

Goal One: The community will place an increased value on education, realizing that education performance increases the quality of life for all Santa Fe residents and makes the community better able to retain a talented workforce. Pre-K - 12 education will be as strong as possible because the community invests in it. (p.15)

Strategies:

1. Help parents place a greater value on education.
2. Promote the value of quality education within the community. Turn Pre-K - 12 education into a "cause" around which the community can rally.

Goal Two: Educational and workforce development programs will be well-coordinated and in tune with the needs of the city's targeted business sectors. (p.19)

Strategies:

1. Develop an inventory of all workforce training programs in Santa Fe that prepare individuals for skills demanded by the city's targeted business sectors.
2. Closely link local Workforce Development One-Stop Centers with economic development efforts.
3. Enhance Santa Fe Community College's existing programs and start new programs aimed at the needs of Santa Fe's targeted business sectors.
4. Ensure the College of Santa Fe, the Institute of American Indian Arts, St. John's College, the University of Phoenix and branches of

Highlands University and UNM are kept up-to-date and involved in economic development.

II. Entrepreneurship

GOAL: Infrastructure, capital, and educational resources for entrepreneurs will be well networked both at the local and state level. (p.24)

Strategies:

1. Financially support the Santa Fe Business Incubator. Help the Incubator expand by offering more customized business resources. Help start-up companies by linking them to local and state financial capital.
2. Make information and training about starting businesses widely available. Celebrate entrepreneurial success stories as inspiration to potential entrepreneurs.
3. Motivate Santa Feans to start new companies.
4. Keep Santa Fe's existing small businesses strong.

III. Sites and Infrastructure

GOAL: Improvements to sites and infrastructure will consider the long-term needs of Santa Fe's targeted business sectors and small, entrepreneurial businesses. (p.32)

Strategies:

1. Take steps to make Santa Fe the water conservation and clean energy capital of the U.S.
2. Provide better infrastructure and processes to support creative activities.
3. Partner with Santa Fe County to solve infrastructure and site issues.
4. Approve and construct a new convention center that showcases the unique character of Santa Fe.

IV. Community Development

GOAL: Santa Fe's community and economic development activities support an environment that is favorable to (1) talented residents, (2) small, locally-owned businesses, and (3) targeted business sectors. (p.39)

Strategies:

1. Adopt a more business friendly attitude within City government.
2. Santa Fe's City Council should set goals for future development and allow those goals to drive decisions.
3. Provide greater support to the Community Development Division, and, particularly the Economic Development section.

4. Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.
5. Ensure that Santa Fe contains an atmosphere that is fun and attractive to young, creative people.

V. Marketing and Public Relations

GOAL: Santa Fe will engage in a targeted marketing campaign that builds local and national awareness of the city as a place to do business. (p.46)

Strategies:

1. Establish specific marketing roles for each organization currently involved in economic development.
2. Create and adopt a single economic development brand.
3. Better understand the target audiences.
4. Gain local media support.
5. Launch internal marketing.
6. Implement external campaigns.

Within these strategies, many individual action items are offered. Among these, we would like to point out five activities that are of particular significance:

1. **Construct a new civic center to replace the Sweeney Center.** The new civic center will support all of Santa Fe's target industries. The civic center should be designed to host executive level events, attracting those events that will bring the greatest benefit to Santa Fe's economy. In addition, the City should consider integrating high-end workforce training capacity within the civic center. The workforce training resources, from classrooms to high-tech audio/visual equipment, should be made available to local workforce service activities as well as to executive training events.
2. **Create a National Center for Art and Design Center and an arts incubator.** The National Center for Arts and Design will provide a single location in which multiple arts and design organizations could collaborate on projects of national significance. The one-of-a-kind concept would be modeled after national research consortia or laboratories, only with arts, rather than science, as its focus. As its first major project, the Center should consider developing a first-rate on-line Santa Fe Arts Market for selling locally produced artistic and handmade objects.

   This Center should be home to a variety of related activities, with educational programs at the core. Other activities that should be co-located within the facility include: office space for professional arts organizations and guilds; studios; exhibit space; retail shop for selling art. In the future, the campus could also contain loft apartments, a café, and an entrepreneurial resources center.

3. **Lobby the State to pass proposed legislation to create a certification program and network of small-business incubators.** The currently

proposed incubator certification program will possibly increase State funding to the Santa Fe Business Incubator. Lobby State legislators to pass this legislation. Long-term, Santa Fe leaders should work with the State to create a network of entrepreneurship one-stop shops, similar to the system utilized by the New Mexico Department of Labor. This would probably be more of a network of collaborating agencies and programs rather than an additional set of facilities. Santa Fe's leaders should work with the State to create a statewide network of small business incubators. The network of certified incubators could serve as a funnel of investment opportunities for the New Mexico Venture Capital Fund and as a built-in system of due diligence for State investment.

4. **Santa Fe should become the water conservation and clean energy capital of the U.S.** Water conservation technology companies locating in Santa Fe will be in a market with high internal demand for their products and will, therefore, be in close proximity to their customers. Santa Fe should create programs that promote the adoption of energy conservation while promoting a "buy local" campaign that would attract new clean energy providers to Santa Fe. Credits and incentives for consumers can be tied to their purchase from local suppliers. Santa Fe is an ideal pilot market for several technologies and should do what it can to bring those suppliers to the region.

5. **Santa Fe's leaders should agree to goals that will promote the long-term health of the local economy**. The community is widely known as a place that is unfriendly and difficult for business. This distinction makes it difficult for Santa Fe to remedy its suffering economic conditions. The City must take several initial steps before any economic recovery can occur. First, City leaders must agree that all decisions will be driven by one simple goal: To attain healthy economic conditions that will preserve Santa Fe's unique character and open opportunities for all Santa Fe families.

   Within City government, several actions will help the city create an easier environment in which to expand and start businesses. First, the City should strengthen and expand the Small Business Ombudsman position. Second, the City should provide strong support to the Community Development Division and Economic Development section. Economic development cannot occur unless this division is stable and well funded. Finally, the City should support a strong internal and external marketing effort. Marketing activities will require financial and human power resources from the City as well as other Santa Fe organizations.

The activities outlined in this strategy will require five years to complete, and the results of these activities may not be immediately apparent. Santa Fe's leaders must stay committed to the overarching goal of creating a healthy economy.

1. Workforce Development and Education

This project marks the beginning of a long-term economic development effort to improve the atmosphere in Santa Fe for growth of small to medium-sized businesses. Workforce development and education recommendations have been developed to help Santa Fe achieve the following three goals:

1. **The community will place an increased value on education, realizing that education performance increases the quality of life for Santa Fe residents and makes the community better able to retain a talented workforce.**

2. **Educational and workforce development programs will be well-coordinated, providing services that are in tune with the needs of the city's targeted business sectors.**

3. **Santa Fe's workforce development programs will offer advancement opportunities for individuals from all socioeconomic backgrounds.**

Santa Fe's workforce development programs should offer advancement opportunities for individuals from all socioeconomic backgrounds. Santa Fe's recommended targeted business sectors (see p. one)were selected, in part, because they contain a wide variety of occupations and ample opportunity for workers to advance their careers. (See the Target Industries Report for more detail on the target industries and how they were identified.)

Workforce development and economic development are closely linked. A strong workforce leads to business recruitment. A strong industry base generates a workforce that leads to entrepreneurship and long-term economic growth. Considering Santa Fe's current economic conditions, community leaders should make workforce development a top priority. A strong pool of workers is critical to business expansion and recruitment to the region, industrial diversification, and growing the population of young professionals.

For Santa Fe to experience the greatest possible benefit, education and workforce development activities must be viewed as an integrated continuum that spans from infant care to adult education. We encourage Santa Fe to communicate the workforce skill needs of the targeted business sectors to all educators. Show them how entrepreneurial skills, for example, will help students succeed once they graduate. Provide them with examples of other communities that have integrated entrepreneurship education into the early education curriculum.

Businesses in the targeted business sectors that have been recommended by AE demand that the best possible Pre-K - 12 education system, workforce training, and college programs are in place to prepare the workforce to succeed in targeted industry businesses. This ensures that they will be able to retain and recruit skilled workers, managers and executives who demand that their children

receive an excellent education. It also shows them that the community is willing to invest in itself, its future, and therefore will support them into the future. Goal One: The community will place an increased value on education, realizing that education performance increases the quality of life for all Santa Fe residents and makes the community better able to retain a talented workforce. Pre-K - 12 education will be as strong as possible because the community invests in it.

Basic education should be considered the foundation of successful economic development. Those regions across the U.S. that have invested in basic education are also the most successful in growing high tech, high wage employers. The two go hand-in-hand.

Before an aggressive economic development campaign is launched, it is essential that Santa Fe invest in the core of the community: local Pre-K - 12 education, the downtown, and infrastructure developed to support new economy businesses. This investment will have much greater pay off in the long term by helping the city retain its current employers and high skilled workers, as well as renew a positive spirit across the community.

Strategy One: Help parents place greater value on public education.

Actions

1. Get parents involved in the schools

- Adopt a take-home computer program. In this program, schools lend computers to parents for 4-6 weeks at a time. To be eligible for the program, parents are required to take an orientation workshop that teaches them the basics of operating a computer, common software packages, and how to use the Internet.
- Use local school facilities for evening community college or university classes. Courses could be for-credit or continuing education, ranging from computer literacy, self esteem, English as a second language, or literacy. Teachers or other parents can teach classes. Invite a local non-profit to fund a babysitter to be on-site for the duration of the class period.
- Start a cultural orientation program to help parents, teachers, and students understand and appreciate the culture of their peers.
- Use art exhibits and performances by students to attract parents to the schools and enhance cultural understanding.

2. Provide parents the tools to support learning at home

- Offer workshops, hands-on training, and home visits that train parents how to teach kids at home. Parents can make educational materials such as flash cards and board games at the workshops that they take home and use with their children. Alamo Navajo Community School provides excellent examples of effective programs:
    - Parents and Teachers as Partners Program – regularly scheduled meal shared by teachers and parents including a workshop on language/math skills development, reading, cooking with children, etc.

- Parent-Teacher meetings and open houses are scheduled at the same time as other community events (e.g. sports events) to attract more parents
- Bilingual home school liaisons make about 25 home visits per month to personalize school communications

Strategy Two: Promote the value of quality education within the community. Turn Pre-K - 12 education into a "cause" around which the community can rally.

Action:

1. ***Launch an internal marketing campaign to inform parents (and students) about the value of Pre-K - 12 education.***
   - Each school should adopt a program aimed at keeping parents informed about school events. Consider the following examples that have worked for other communities:
     - Weekly take-home folders that include a parent participation sheet, information on upcoming events, recent curriculum activities, and graded tests. Parents sign and students return to school. One single format could be developed for the Santa Fe School District- with easy ways for each school to customize it. Ideally, take home information would be available in both English and Spanish.
     - Ask for parent volunteers to serve on a phone chain to call other parents with updates about school events, get feedback, and answer questions.
   - Create a series of public service announcements aimed at instilling the value of public education in Santa Fe residents.
     - Work with school district to assign an internal marketing task force that meets for six months to one year. The task force will be responsible for organizing and overseeing the communication campaign. Task force members should include: representatives from the local school district, the parent-teacher organizations, education-related non-profit organizations, Santa Fe Community College, and other workforce service providers.
     - The internal marketing task force should seek a local advertising or public relations agency that will provide services pro bono or for a reduced rate.
     - Funding for the communications campaign could come from grants from local, state, or national education-related non-profit organizations and foundations.
     - Announcements should be based around a central theme, but available in various media forms, including radio spots, newspaper advertisements, posters and fliers, or television spots. Both English and Spanish language announcements are necessary.
     - Possible themes include: (1) the importance of staying in school; (2) opportunities for high school graduates other than attending a four-year university; (3) how students can help their families even more in the long term by continuing education or training after high school; (4) post-high school work, training, and education opportunities located in Santa Fe to retain young people; (5) the

benefits of investing in Santa Fe's schools to residents who do not have children in the school system.

- Start a school-by-school campaign to show middle school and high school students the range of alternatives to attending a four-year university.
    - Ask representatives from Santa Fe Community College, apprenticeship programs, SER Jobs for Progress and non-profit organizations to present their programs / non-university alternatives during classes or at after-school events
    - Ask representatives from Santa Fe Community College, apprenticeship programs, SER Jobs for Progress, and non-profit organizations to compile a short, easily understandable brochure on the programs they offer to high schoolers and recent graduates. Provide this brochure to all high school and junior high school guidance councilors. Place in locations where students congregate: libraries, after-school hangouts, shopping malls.
    - Over time, develop a Web site containing resources for non-university bound youth. The Web site should contain information about non-college options, links with training organizations, apprenticeship programs, and the community college. It could also contain job postings.
- Launch an Annual Education Day, a one-day outreach and educational event at which parents, teachers, non-profits, and community leaders share information about local schools, programs, services, and successes. The event could provide training to parents about how to continue the educational process at home.

Possible Funding Sources for Pre-K - 12 Education Improvements

- G&T Dropout Demonstration, Indian Health Services, Title IX
- Parent-Teacher Organization fundraising http://www.ptotoday.com/fundraising.html
- US Department of Health and Human Services GrantNet http://www.hhs.gov/grantsnet/
- State of New Mexico Department of Education http://164.64.166.11/fedpro/programs/index.html
- Edna McConnell Clark Foundation (http://www.emcf.org/)
- This site contains links to several good drop-out prevention programs: http://www.dropoutprevention.org/resource/grant/funding.htm
- The Foundation Center is a good overall Web site for researching grant funding available in the U.S. for a wide variety of causes. Their education page is at http://fdncenter.org/research/grants_class/taxb.html

Other resources:

- This site contains a listing of and links to a variety of non-college options for high school students: http://www.nohum.k12.ca.us/ahs/career/non_col.html

Goal Two: Educational and workforce development programs will be well coordinated and in tune with the needs of the city's targeted business sectors.

The recommended targeted business sectors will determine more than Santa Fe's audience for its marketing efforts. Rather, the needs of targeted business sectors should drive the infrastructure that Santa Fe develops, the business climate that it fosters, and the workforce development and educational programs that it supports. Economic development efforts will be most successful if all aspects of community development are in tune with targeted business sectors' needs and are well coordinated.

To target workforce development programs and educational programs, it is important to first understand the skill sets that are required by Santa Fe's targeted business sectors. The *Target Industry Report* provided a list of each targeted business sector's predominant occupations. The end of the workforce development recommendations section of this report (page 24) contains a table summarizes the workforce needs of Santa Fe's target industries and illustrates how they overlap with one another.

In the following section, we offer recommendations for programs at Santa Fe Community College that would help the College, and the community, better train people for targeted business-appropriate occupations. These programs also provide opportunities for Santa Fe residents of all skill levels to improve their education and become better qualified for the city's targeted business sectors.

Strategy One: Develop an inventory of all workforce training and college programs in Santa Fe that prepare individuals for skills demanded by the city's targeted business sectors.

During public input sessions, one predominant issue that emerged was the difficulty in finding information on workforce development and educational options. Individually, while the community college, College of Santa Fe, the Institute of American Indian Arts, St. John's College, University of Phoenix, one-stop center, and not-for-profits offer good information about their own programs: no single source of information is currently available.

To involve all Santa Feans in workforce development and education, this single source of information should be available in both print and on-line formats, and available in both English and Spanish.

Actions:

1. ***Develop the inventory and make available in print and on-line formats.***
    - The inventory should contain a listing of programs. Within each program, include information on eligibility requirements, cost, time required to complete the program, and possible career tracks for individuals completing the program.
    - The on-line inventory should allow users to sort based on all criteria: by eligibility requirements, by time to complete and cost, and by potential career tracks.

- Ensure that the inventory's Web site address is simple and memorable. (The inventory could also be made available on SFEDI's Web site. http://www.sfedi.org/workforce, for example.)
- Distribute the inventory and Web site address to a wide range of organizations in Santa Fe, including: One-Stop Centers; local high schools; Santa Fe Community College; the City of Santa Fe; local libraries; faith-based organizations, and; non-profit organizations.

2. ***Begin a series of informational sessions on workforce training options in Santa Fe neighborhoods and community organizations.***
   - Community outreach may be a more effective way to provide workforce service information to Santa Fe residents. Plan a series of informational sessions at local schools, faith-based organizations, and recreation centers.
   - Ask attendees to fill out a brief survey to determine their educational and employment background.
   - Bring one-stop shop employees to the event to provide one-to-one counseling on career opportunities.
   - Follow up with attendees after the session to provide them with additional information. Review survey responses to estimate what services may be more appropriate for each individual, and use this profile to determine the most appropriate course of action.

Strategy Two: Closely connect local Workforce Development One-Stop Centers with economic development efforts.

Actions:

1. ***Train One-Stop Center employees on the occupational and skill needs of Santa Fe's targeted business sectors.***

2. ***One-Stop Center career councilors should direct clients to programs at Santa Fe Community College and other workforce service providers that train workers for targeted business sectors' skills.***
   - Core skill requirements for all targeted business sectors fall into several broad categories, including computer training, design skills, creative skills, small business management, and hospitality.
   - One-Stop Centers should utilize the inventory of targeted skills programs as a tool to assist their clients.

3. ***Widely promote One-Stop Center services across Santa Fe. Local residents may not be aware that those services are available.***
   - Links to the One-Stop Center and future inventory of targeted businesses' training program Web sites should be widely available on all major community Web sites; including, for example, the City, County, Chamber of Commerce, SFEDI, Santa Fe Community College, public schools, and non-profit organizations.
   - Include the One-Stop Center (http://www.dol.state.nm.us/wdc15.htm) and/or targeted businesses' training programs Web site in the (earlier recommended) public service announcements. Consider simplifying the

Web site address to Santa Fe's One-Stop Centers. (www.santafejobs.com, www.worksantafe.com, or www.traintowork.com)

Strategy Three: Enhance Santa Fe Community College (SFCC)'s existing programs and start new programs aimed at the needs of Santa Fe's targeted business sectors.

Actions

1. Target SFCC programs around the design industry.

- The SFCC's campus plan calls for building a performing arts facility on campus. The facility should include a multi-purpose auditorium for theater and musical productions, exhibit, and studio space. Invite the community to utilize the center for Santa Fe film and music festivals, and offer free shuttles to auditorium from downtown during those events.
- Develop a core "design curriculum" that serves all design-related majors.
  - Currently, programs in interior design, introductory architecture, studio arts, and fine woodworking, for example, share similar skill sets.
  - The core design curriculum starts all design-related majors with the same coursework. Electives are used to refine the individual's skills into specific design fields as they progress through the program.
  - The core curriculum helps students engage with other creative individuals and provides them with a set of design skills that are transferable between industries.
  - Illustrate the new economic development marketing theme at the new performing facility by incorporating the theme "Creative Spirit of Santa Fe" into its design.
- Adopt a new curriculum / professional development courses to train film crews and pre- and post- production workers.
  - Identify what infrastructure is needed to support Santa Fe's burgeoning film industry.
  - Meet with Garson Studios and other local film support businesses and ask them what services / training they would like to see emerge at SFCC.
  - The curriculum should be coordinated with advanced film support courses offered at the College of Santa Fe.
  - Explore the potential for SFCC to host a pre- and post-production house. The center would provide on-the-job training for students and would be a valuable resource to professional film crews coming to the Santa Fe area. Between the SFCC, the College of Santa Fe and private business, a full range of pre- and post-production facilities should be available in Santa Fe.

2. Create innovative programs for the hospitality industry.

- Connect SFCC's hotel and restaurant management and culinary arts programs to growing needs in the film industry. Set catering and limousine services, for example, could be provided to film crews through the community college, providing students with good on-the-job training experience and would meet a demand.
- SFCC could develop a small hotel and restaurant next to the campus.

- Room rates and meal prices would be offered at a discount.
- The hotel and restaurant would employ students, providing training ground for hotel and restaurant management and culinary arts students. It could also offer guests alternative health care and spa services, which could be provided by individuals just entering the field.
- The design of the hotel should integrate water and energy conservation technologies and allow students to contribute to its design.
- Clients of other workforce training providers, such as SER Jobs for Progress, could also work at the SFCC hotel "incubator."
- If a SFCC hotel "incubator" is not feasible, develop an intensive internship program with local hotels, restaurants and caterers.

4. ***Develop curricula that help Santa Fe become a water and energy conservation role model for other cities.***
   - Create a water conservation curriculum.
     - The curriculum would combine water policy studies, a knowledge of water conservation techniques, and tools for students to design their own water conservation methods / technologies.
     - SFCC could reserve space on or off campus for a light manufacturing center or laboratory in which students could develop their own water conservation products.
     - Connect the program to the SBDC so that students with good business ideas can receive entrepreneurial support.
   - Adopt an alternative fuels curriculum.
   - Professors and students of the program should offer free community workshops that instruct homeowners, business owners, and Pre-K - 12 students about simple methods of conserving water and energy. This EPA Web site provides a good starting point for established curricula: http://www.epa.gov/teachers/curriculumconservation.htm
   - Encourage local real estate developers and businesses to engage students of the program in design of future developments. As part of the curriculum, require one class in which students form teams and are assigned to local businesses and developers to develop an innovative water or energy conservation technique for their facility.
   - Examine top conservation curricula at other US community colleges as models for the SFCC program. This link contains a ranking of the top 50 conservation and natural resource programs at communities and universities across the U.S. http://www.ccweek.com/top100/pdf/2001/topassoc-9900-cons&rnr.pdf
     - Tailor Santa Fe's program to the needs of water conservation and alternative fuels.

5. ***Enhance software and information technology classes to meet the needs of Santa Fe's targeted business sectors.***
   - Survey or organize a forum of Santa Fe bioinformatics and other information technology companies. Ask these businesses to describe the types of workers that they need. Ask them to participate in designing an ideal curriculum for an Associate's Degree and continuing education programs.

- Entice individuals with high tech skills to serve as part-time instructors. The Community College has a difficult time offering the high salaries demanded by individuals with high-tech skills and computer science knowledge, yet Santa Fe has a large population of these individuals. Rather than seeking full-time professors, ask young professionals and new retirees to teach one class per semester.
- Build computer training programs that teach desktop publishing, commercial design, film and sound editing, graphic design, and animation. These courses can be offered as part of a formal Associate's Degree curriculum and continuing education. These skills will be in demand by Santa Fe's targets, particularly in the arts and culture, design / film, and publishing and new media fields.

Strategy Four: Ensure that the four-year and graduate colleges and universities in the region, e.g. the College of Santa Fe, the Institute of American Indian Arts, St. John's College, the University of Phoenix and branches of Highlands University and UNM, are kept up-to-date and involved in economic development.

Actions

1. Inform the four-year and graduate colleges of the workforce needs of each targeted business sector.

- Identify degree programs within each College that fit with target business requirements.
- Include a description of these degree programs within future economic development marketing efforts

2. ***Work with the four-year and graduate colleges to retain graduates in Santa Fe.***
   - Each semester, meet with students within those degree programs to inform them of the opportunities within Santa Fe for graduates of their programs. Ask local target sector business executives to speak to the students.
   - Ensure the College's career placement centers are fully aware of job opportunities within Santa Fe.
   - One to two times each year, speak at a faculty meeting at all three colleges. Inform professors of economic development activities. Give them information about Santa Fe that increases the attractiveness of the community to 18-25 year olds.

3. ***Invite representatives from the four-year and graduate colleges to participate in prospect visits.***
   - When economic development prospects come to Santa Fe, invite College representatives to meet with the prospect or organize a brief tour of the Colleges' campuses.

4. ***Invite representatives from the four-year and graduate colleges to participate on economic development-related committees and task forces.***

Occupational Comparison of Santa Fe's Target Industries

Major Occupations	General Work Skills	Technical	Industry: Art and Culture	Design	Hospitality	Conservation Technologies	Software Development	Publishing and New Media	Outdoor Gear and Equipment

2. Entrepreneurship

GOAL: Infrastructure, capital, and educational resources for entrepreneurs will be well networked both at the local and state level.

A critical aspect of building sustainable economic competitiveness is linking economic performance to social cohesion. The stimulation of entrepreneurship through the formation and development of new commercial businesses and social enterprises can play a key role in creating a diversity of new jobs and bridging the gap between income levels and cost of living. The entrepreneur in the community is a primary contributor and mobilizer of resources to develop the economy, a provider of employment for others, and a stabilizing factor in the society.

Improvements to the entrepreneurial climate, both in Santa Fe and the state of New Mexico, will benefit not only potential business owners, but also the small businesses that are already in operation. An entrepreneurial climate is well suited for Santa Fe's creative, independent-minded population.

AE recommends that entrepreneurship drive all future economic development activities for the following reasons:

- Entrepreneurial activities are a productive outlet for energies of enterprising and enthusiastic people.
- Small businesses create jobs at relatively low capital cost and low environmental impact, especially in the fast-growing service sector.
- Small businesses develop a pool of skilled and semi-skilled workers who are the base for industrial expansion.
- Small businesses are a source of innovation in products, services and techniques.
- Entrepreneurs can contribute new ideas to economic development initiatives.
- Small businesses serve a social function by creating career opportunities and upward social mobility, and by preserving, in many instances, a set of values.
- Provide information at One-Stop Centers related to entrepreneurship as a career option – linking One-Stop Centers to local SBDC, providing "guide to starting a business in Santa Fe" at one-stop center.
- An entrepreneurial approach to economic development also benefits larger businesses that will be attracted to Santa Fe's unique character.

Small businesses are currently the crux of the Santa Fe economy, and local leaders should support them. The following section offers recommendations for boosting entrepreneurship and small business growth in Santa Fe.

Strategy One: Financially support Santa Fe's business incubator. Help the incubator expand by offering more customized business resources. Help start-up companies by linking them into local and state financial capital.

Actions:

1. ***Expand the Santa Fe Business Incubator to provide business resources appropriate to the targeted business sectors.***

   The most successful business incubators are those that provide more than just reduced rent office space and furniture for tenants. Like the current Santa Fe Business Incubator, they combine office space with knowledge – such as an SBDC office or other mentoring organizations - and are closely connected with local community colleges and universities. They provide first-rate telecommunications infrastructure, conference facilities, business services, and shared laboratory or manufacturing space. A good incubator will become a gathering place for the community for after hours networking events.

   The Santa Fe Business Incubator should also expand its connection to professional business services firms. For example, the incubator could assign volunteer task forces of service providers (e.g. comprised of one accountant, one attorney, and one marketing/advertising firm) to mentor companies during their time at the incubator. This benefits the companies as well as the volunteers, who can view their work with the incubator as business development. Marketing assistance, in particular, should be offered to incubator companies. Assistance should come from local advertising or marketing agencies that offer their services at a pro-bono or reduced rate, or by teams of students from SFCC or the College of Santa Fe.

2. ***Lobby State legislators to pass the current proposed legislation (embedded within the SBDC bill) to certify incubators and to match funding from the State to local incubators.***
   - The successful Santa Fe Business Incubator could serve as a model around which other incubators in New Mexico could be developed.
   - Incubators should be used as a place that sets standards for small business development.
   - The network of certified incubators could serve as a funnel of investment opportunities for the New Mexico Venture Capital Fund as well as serving as a built-in system of due diligence for State investment.

3. ***Work with the State, UNM, the Santa Fe Business Incubator, SFCC-SBDC and SCORE to set up an entrepreneurship one-stop shop center similar to workforce development centers.***
   - A one-stop shop entrepreneurship center would offer the same coaching and information services such as an SBDC combined with the business incubator services of the Santa Fe Business Incubator.
   - The one-stop shop should be established in a central location to provide the greatest access to all Santa Fe residents.

4. ***Establish a Small Business Enterprise Director within the Community Development Division.***
    - This individual should be responsible for: overseeing the entrepreneurship center; working with the SBDC and Incubator in keeping the community informed about how to start a company in Santa Fe; promoting Santa Fe as a good location for entrepreneurship; working with SFIBCA on creating a strong "buy local" campaign; developing and maintaining a searchable on-line inventory of all entrepreneurship resources in the region; and helping entrepreneurs and local small businesses navigate City processes and regulations.

5. ***Establish an arts incubator at a central location in Santa Fe.***
    - The campus should be home to a variety of related activities, with educational programs at the core. Other activities that should be co-located within the facility include: office space for professional arts organizations and guilds; studios; exhibit space; retail shop for selling art. In the future, the campus could also contain loft apartments, a café, and an entrepreneurial resources center.

Strategy Two: Make information and training about starting businesses widely available. Celebrate entrepreneurial success stories as inspiration to potential entrepreneurs.

Actions:

1. ***Involve The Santa Fe New Mexican in covering success stories of local business startups.***
    - Potential entrepreneurs will find inspiration from other individuals who have successfully started businesses.
    - Celebrate the success of local small businesses by featuring them in local news publications. Propose a schedule of small businesses to feature each month to make it easier for The Santa Fe New Mexican.

2. ***Santa Fe's numerous non-profit organizations are entrepreneurial businesses. Provide these organizations with good information to help them increase their financial capacity.***
    - Numbering almost 500 in Santa Fe, non-profits make up an important part of employment and activity in the community.
    - Non-profit organizations should be viewed as entrepreneurial small businesses.
    - Provide information to non-profits to help them learn how to increase their financial capacity.
    - Fund a series of 501c3 training seminars that train managers of non-profits how to be better business people. There are numerous consulting companies that provide non-profit training, as well as on-line guides that provide non-profits with helpful business tools. Check out sites such as: www.onPhilanthropy.com; www.npguides.org; or www.charitiesusa.com which links non-profit to service providers across the U.S.

- Encourage participation in *NGO New Mexico*, New Mexico's central non-profit business association.
- Collaborate with NGO New Mexico to sponsor monthly networking and training events. The training events should be the main vehicle for distributing information about how to make a non-profit profitable.
- NGO New Mexico could create a Web site listing all non-profit organizations, sortable by their service, and containing links to and contact information for each organization's Web site. Examine sites such as www.GuideStar.org and www.envirolink.org as examples of structuring a database of non-profit organizations.

3. ***Develop a single Web site containing an inventory of Santa Fe's entrepreneurship resources. Make the Web site name simple and memorable. Market the Web site address across the community.***
   - The Web site could be developed and maintained by several organizations, such as the Santa Fe Incubator, SCORE, the SBDC, or the (possible future) entrepreneurship one-stop shop.
   - Possible Web site names: www.etools.com or www.santafestartup.com

Strategy Three: Motivate Santa Feans to start new companies.

Actions:

2. ***Streamline the City's permitting process for events, new construction, and new business expansions in Santa Fe.***
   - Focus groups, interviews, and surveys have revealed that many businesses and individuals have experienced difficulty from the City in getting permits for new ventures – from construction or expansion of new facilities to permits for small weekend festivals.
   - Santa Fe's permitting process needs to be thoroughly reviewed and compared against the requirements of targeted business sectors.
   - Santa Fe's City government should commit to easing and shortening the permitting process within one year.
   - The City of Santa Fe's Web site should contain a page dedicated to simply outlining the permitting process and providing downloadable versions of permitting applications.
   - The City of Santa Fe's web site should be reliable and offer current and accurate information.

3. ***Consider waiving permitting fees for small businesses locating in targeted areas of Santa Fe (fees are already waived for certain affordable housing projects).***
   - Small businesses are interested in saving money at every possible point.
   - Waiving permitting fees is not a cost, but foregone revenue for the City.
   - Waiving permitting fees for small businesses moving into key areas of the city, downtown for example, will help small businesses and make a statement that the City supports them.

4. Expand the City of Santa Fe's Small Business Loan program.

- The Small Business Loan program is an important tool for encouraging the growth of local businesses and companies targeted in this economic development plan.
- Leverage the program with additional state and federal funding.
- Restore the program to its original funding levels.
- Take steps to ensure that the entire community is aware of the program and has easy access to it.
- Provide information about the program in the (proposed) entrepreneur resource center.

4. Utilize the results of the New Mexico Media Strategy Report to develop a work plan for the digital and new media industry cluster.

- Look at cities that have fostered the film industry. Identify targeted infrastructure improvements, permitting processes, training programs and other incentives that are geared to the needs of the industry. Draft necessary ordinances to implement those inducements in Santa Fe.
- Austin Film Commission and North Carolina (Advantage West) are models.
- Model a one-stop shop permitting process for the film industry after other good examples, such as Rio Rancho, New Mexico (http://www.rioranchonm.org/film_industry/#One); Film in Florida (http://www.filminflorida.com/prl/perm.asp);

Strategy Four: Keep Santa Fe's existing small businesses strong.

Santa Fe's future economic health will largely be determined by the amount of local spending at local businesses. Every transaction involving a business outside of the area causes money to leak out of the local economy. While seemingly insignificant when considering a single purchase, the sum of these effects is huge across an economy the size of Santa Fe's. *For more information, see AE's Small Business Report, completed for the Santa Fe Independent and Community Alliance.*

A strong tourism economy and large base of unique cultural assets require that city leaders pay particular attention to the role that small businesses play. Eighty-five percent of all businesses in Santa Fe employ fewer than 20 workers. Of these small businesses, over 90 percent are locally-owned. According to the U.S. Small Business Association, 3,900 Santa Fe companies employ fewer than 20 people. This is almost five times the number of all other companies combined.

The last five years, however, have seen a downward shift in the percentage of independently-owned companies in Santa Fe. Almost all industries experienced a decline in independents' share of both employment and number of establishments. The largest percentage drop was in retail, where current levels of independence (approximately 50 percent of all retail firms) are well below that

of the nation (almost 90 percent) and has dropped 40 percent in the past five years. This industry, more than any other, directly affects households and quality-of-life indicators. The change threatens the local diversity found in Santa Fe shopping and endangers the unique character of the area.

Actions:

1. Initiate a "buy local" campaign.

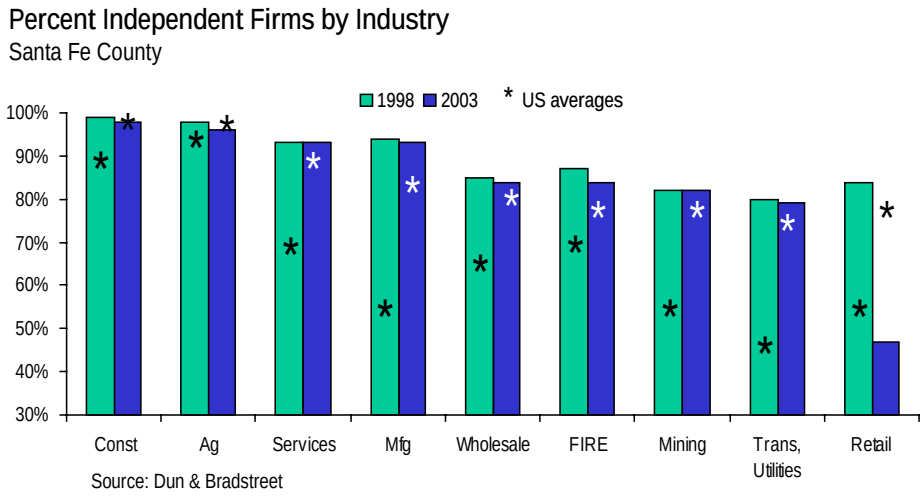
- Support the Santa Fe Independent Business and Community Alliance (SFIBCA).
- Provide funding or other resources to the SFIBCA for launching a "buy local" campaign.
- The campaign should educate local residents and businesses on the importance of buying from other local businesses.
- Each campaign piece should contain a different factoid pointing out the economic and cultural benefit of purchasing products and services from independently-owned small businesses.
- AE's *Santa Fe Small Business Report* provides data and survey results that support the notion of buying local (prepared for the SFIBCA in November 2003).
- To kick off the campaign, prepare a press release highlighting the results of AE's Small Business Report. Distribute the press release to local newspapers, alternative magazines, radio stations, and television stations. Print a series of flyers and direct mail postcards highlighting the main points of the study. Ask local business owners and community organizations to post the flyers in their establishments and to mail out the postcards to their clients.

2. Make downtown and other Santa Fe business districts more accessible to patrons of small businesses.

- The City should make supporting the needs of small, locally owned business a goal against which future decisions are measured.
- The best way to encourage residents to buy locally is to make access to independently-owned businesses convenient. Allow for mixed use developments where retail and small service businesses are intermingled among residences.
- Make downtown more pedestrian- and cyclist-friendly. Repair sidewalks so that shoppers and business people have a safe place to walk. Create a network of bike paths and lanes. This will encourage more pedestrian traffic and reduce automobile traffic in downtown Santa Fe. It will improve access to small downtown businesses and encourage residents who may have been frustrated by limited downtown parking to start shopping in downtown again.
- Improve parking in downtown. Struggles with parking often drive shoppers from downtown and towards big-box retail and malls. Offer free parking, enhance existing parking, and provide free shuttles around town. Encourage business practices that make parking less important, like home delivery of groceries and large bulky items.
- During the weekdays, most household shopping occurs after work, between 7 and 10 p.m. Encourage downtown businesses to stay open until 9 p.m. If it is difficult for small businesses to stay open that late

every night of the week, ask shop owners to agree to the same one or two evenings a week in which they stay open later.

- Start a monthly downtown celebration. In Austin, for example, every first Thursday of the month, stores in one shopping district stay open until 10 p.m. The sidewalks are filled with local artists and merchant booths selling wares. Local bands provide live music in the street. First Thursday now attracts more than 10,000 people every month.
- Provide adequate security downtown to help nighttime shoppers feel comfortable.



3. Identify business, historical and cultural districts that are suitable for economic development initiatives.

- Recommendations for downtown can be applied to any business or cultural districts.
- Support neighborhood/business events such as the Second Street Experience and explore developing similar events in other districts.
- Initiate planning with two districts per year.
- Link "buy local" initiative to district planning.
- Develop programs that highlight the economic benefits of historic preservation and historic districts.

4. Establish metrics for tracking the success of the "buy local" initiative.

By determining a set of tangible goals, communities establish clear priorities and are able to assess the performance of their programs, allowing more efficient use of resources. Metrics could include the following:

- *Sales receipts of downtown merchants.* Sales of downtown shops and service providers should increase a minimum of 10 percent each year if the buy local initiative is successful.
- *Percentage of independent businesses in Santa Fe.* For most industries, Santa Fe exceeds the national average in the percent of independently-owned businesses (see below chart). Increasing the percentage of locally-owned retail establishments could become a goal for the city.

- *Percentage of major employers headquartered in Santa Fe.* This figure points to the importance of home-grown successes. These companies tend to be more philanthropic and provide greater

economic independence for the region. The information for this metric could be measured from annual reports of local business activity.

- *Duration of local businesses*. This factor could be measured by counting the number of businesses that were established three years ago and are still in business. This method explicitly measures the ability of local businesses to survive in Santa Fe's economy. Santa Fe will know that it is supporting local, small businesses when the number of businesses surviving longer than three years increases. The City's data on business licenses provides this information.
- *Percentage of companies adding employees in the past year*. Expanding companies are as important to the economic health of a region as new companies. This metric can be easily obtained through government employment statistics and surveys.

Strategy Three: Sites and Infrastructure

GOAL: Improvements to sites and infrastructure will consider the long-term needs of Santa Fe's targeted business sectors and small, entrepreneurial businesses.

When companies are asked to rank the factors that most affect which state or region they select to locate in, workforce and education considerations are the most important, followed by access to customers and suppliers and business climate. The only infrastructure that is often mentioned in a regional context is transportation.

When choosing a specific development location within a state or region, however, the availability of infrastructure grows in importance. As infrastructure is available in almost every city, business prospects will compare a region or city's infrastructure (availability and pricing.)

The reason for the apparent contradiction in the importance of regional infrastructure versus specific sites is that larger areas such as regions or states possess sufficient infrastructure somewhere, so it is not a major corporate consideration until after the general location is picked. Therefore, although not the top priority to get a company to choose a region, once they have chosen the Santa Fe region, it is imperative that adequate infrastructure - water, sewers, streets and mass transit – be available to support business growth and development and that this infrastructure fare competitively with that of another region.

Santa Fe's most significant infrastructure issue (and economic development issue) is the region's water shortage. All economic development activities must consider the area's severe water constraints. The Mayor has stated that "water" is his number one goal and the City is in the process of trying to secure funding for the Diversion Plan, which will address this concern. The purpose of the Diversion Plan is to redirect surface water from the Rio Grande river into Santa Fe. Though the Diversion Plan will provide some relief to the city, preserving water and the area's unique environmental characteristics will be a goal of the city for many years to come. In turn, the target businesses recommended for Santa Fe in the *Target Industry Report*, will be environmentally sound and will require minimal water.

Strategy One: Take steps to make Santa Fe the water conservation and clean energy capital of the U.S.

Actions:

1. Incorporate water conservation and clean energy technologies into the design of all current and future public buildings.

2. Begin an annual student competition for design of water conservation innovations.

- The winner could receive funding for further development of the innovation, an internship with a local building contractor, or an opportunity to implement it on a test site.

3. Promote Santa Fe to expanding and relocating water conservation technology companies.

- The long process of developing the Diversion Plan and tackling the water issue has created a network of local water conservation expertise.
- The desperate water situation provides a good environment in which companies can test new water conservation technologies and techniques.
- Water conservation technology companies locating in Santa Fe will be locating in a market with high internal demand for their products and will, therefore, be in close proximity to their customers.
- Develop a marketing package highlighting Santa Fe's dedication to water conservation, its assets, and incentives.
- Organize a delegation of Santa Fe and State representatives to visit 1-2 communities that have successfully supported water conservation and clean energy usage. Use these trips to learn and to promote Santa Fe to businesses.

4. ***Offer incentives for water conservation and clean energy use.***

- Communities around the U.S. are offering incentives to businesses and consumers to adopt clean energy practices. Many utilities already offer their customers rebates or credits for installing energy-efficient equipment for HVAC, lighting, insulation, and windows. In addition, utilities are starting to offer consumers the option to purchase electricity from Green Energy sources such as wind power, solar, and biomass.
- Santa Fe should create programs that promote the adoption of energy conservation while promoting a "buy local" campaign that would attract new clean energy providers to Santa Fe. Credits and incentives for consumers can be tied to their purchase from local suppliers. Santa Fe is an ideal pilot market for several technologies and should do what it can to bring those suppliers to the region.
- Work with State officials to create a package of statewide incentives for clean energy and water conservation companies.
- Good examples include:
    - Austin, Texas has openly announced its intention to grow the consumption of renewable power and also to promote the development and attraction of clean energy companies and providers. Already, the city-owned utility, Austin Energy, sells 500 million KW-hours to local businesses and consumers and has a goal of fulfilling 5 percent of its energy needs with clean power. In addition, Austin is discussing ways of tying conservation incentives to the use of locally-developed services or products. This connection is the real key to promoting the city's Environmental Technologies cluster.
    - The state of New York currently offers incentives to both the producers of clean energy and its consumers. By leveraging state funding for energy conservation projects, the state's agency NYSERDA has promoted local job creation. Funding for this program reaches about $16.5 million per year and funds

approximately 150 projects annually for businesses, municipalities, institutions, and universities. Since 1991, NYSERDA's R&D program has stimulated new product sales of $200 million for New York companies, created 1,174 permanent jobs, developed 141 new products, processes, or services for commercial use, and leveraged nearly $2 of funding from outside sources for every dollar invested by NYSERDA.

- In August 2001, NYSERDA announced the creation of the Saratoga Energy Technology Park, specifically devoted to promoting the development of new, clean energy technologies. NYSERDA, working jointly with the University at Albany and the Saratoga Economic Development Corporation (SEDC), hopes to attract between 1,000 and 1,500 jobs to the Capital Region when emerging, environmentally-friendly energy companies take advantage of the park's resources.

Strategy Two: Provide better infrastructure and processes to support creative activities.

Actions:

1. Create a National Center for Arts and Design in Santa Fe.

- The National Center for Arts and Design will provide a single location in which multiple arts and design organizations could collaborate on projects of national significance. The one-of-a-kind concept would be modeled after national research consortia or laboratories, only with arts, rather than science, as its focus.
- The center would include educational resources, high quality studio space, design-oriented companies and non-profit organizations, exhibit space, and retail.
- The (possible future) arts incubator should become a core component of the Center.
- Consider locating the Center at the Railyards or other central site.
- The Center would invite national and international experts to teach seminars or guide teams of designers and artists on projects.
  - The Center would provide an environment in which teams of designers or artists could form to, for example:
  - Bid on architectural design for major projects within the U.S.
  - Provide creative support to the film industry
  - Create new artistic works
  - Provide design services for New Mexico public sector projects
  - Design unique water and energy conservation techniques
  - Create a one-of-a-kind program to promote Santa Fe's arts, culture, and design products

2. Find ways to centralize internet-based information aimed at promoting arts and culture in Santa Fe.

- Currently, many Web sites – from the Chamber of Commerce to individual galleries – contain information about arts and cultural events in Santa Fe. This is confusing to residents and obscures Santa Fe's image to outsiders.

- Promote links to existing central sites such as santafe.org and nmculturenet.org that are running the statewide calendar of events powered by NM CultureNet.
- Develop one Web site portal for all Santa Fe arts and cultural amenities. Host a contest where local artists and Web design companies submit Web URLs. Promote this contest to the community. Make the Web site name simple and memorable.
- The Web site could contain the following: events calendar; map of galleries and museums; and a searchable database of Santa Fe galleries and arts retail shops by "product" and genre (links to the Web sites of all galleries and shops in the database would be provided).
- Eventually, the Web site could also include a virtual market in which local artists could sell their wares.

Strategy Three: Partner with Santa Fe County to solve infrastructure and site issues.

Actions:

1. ***Develop a joint City / County strategy focused on the Redevelopment District of the Metro Area Highway Corridor Plan.***
   - The Metro Area Highway Corridor Plan was adopted by both the City and County and designates an area to be redeveloped to accommodate economic development around the NM 599 / Airport Road intersection.

2. ***Develop a joint City / County economic development strategy focused on the Community College District to implement programs outlined in this report.***
   - The Santa Fe Community College District includes the Santa Fe Community College, housing, and non-residential development.
   - The District represents an important outlet for providing more affordable housing to Santa Feans.
   - The future development of the District will impact both the City and County.

3. ***Develop a shared City / County business park.***
   - Long-term, the City of Santa Fe will run out of developable land for larger business expansions. Most larger businesses will be locating in the County.
   - Jointly develop a business park with the County. The City and County will share the cost of infrastructure improvements and land acquisition. In turn, the City and County will share tax revenue that is generated from the site.

4. ***Jointly improve the Santa Fe Airport.***
   - The expansion of the Santa Fe Airport will make Santa Fe more accessible to tourists, allow residents easier transportation into and out of the region, and give local companies better travel options.
   - A 1-hour or less drive time from an airport is a common site selection requirement for small and large businesses alike. The Airport can

become a major marketing tool for attracting and retaining companies in both the City and the County.

- Upgrade the Airport to Part 139 standards as soon as possible. The Santa Fe City Council should approve the application for Park 139 certification.
- Both the City and County should provide funding for expanding the Airport fire station (shared with the national guard) and upgrading security along the perimeter of the property.

5. Develop wireless Internet infrastructure in core population centers in the City and in the County.

- Encourage local entrepreneurs to develop wireless infrastructure for downtown Santa Fe and countywide in core neighborhoods and future developments such as the community college district.
- The process of wiring Santa Fe with the latest telecommunications infrastructure is already underway. The Santa Fe Light Trail fiber optic network is expected to be completed in 2004. The Plaza renovation (planned to begin in the spring of 2004) will include the installation of a wireless network for the central downtown area of Santa Fe.

Strategy Four: Approve and construct a new civic center that represents the unique character of Santa Fe.

The Sweeney Center does not serve the needs of the community and does not convey the high-end image of the city. While the existing facility could be renovated, it is more appropriate that the current building is torn down and a new civic center is built in its place.

The Santa Fe City Council is considering a one percent increase to occupancy taxes and a bond to fund a new civic center. This decision will have an important, positive impact on the City for many years to come. A new civic center will support each Santa Fe targeted business sector while providing a valuable asset to local residents.

Consider the civic center a tool for economic development. It draws visitors into the community. If marketed to the appropriate events, it can attract executives from Santa Fe's targeted business sectors, allowing the City to market on its doorstep. Those individuals visiting the civic center will also spend money in Santa Fe – dining out, staying in hotels, and shopping. Indirectly, these activities inject more money into the local economy and gives a boost to job creation.

As a tool for economic development, and an entry to the city, the design of the new civic center can be used to convey a message. It should embody the city's artistic and cultural heritage, history, and connection to the natural environment. It should reflect the community's strong desire to target the type of higher-end tourist that visits the city. The facility should incorporate modern architectural elements and high-tech equipment into traditional Santa Fe style to help counteract a perception that Santa Fe is unwilling to progress. Finally, the facility should incorporate cutting-edge water and renewable energy technologies to show Santa Fe's dedication to conserving natural resources.

The civic center will benefit Santa Fe's workforce in several ways. First, it creates both direct and indirect jobs. In the beginning, designing, building, and completing the civic center will generate employment. Once construction is complete, entry-level positions will be established in event catering, room set-up, and facility maintenance. Middle- and upper-level positions will be created in audio-visual support, facility management, marketing, and event planning.

In addition to the job impact, the civic center can play another very important role for workforce development. It can provide much-needed, centrally-located space for local workforce training activities. Imagine: A civic center that is fully equipped with the latest in audio visual technology from the central, large auditorium space to smaller classrooms and conference rooms. Not only are these amenities highly attractive to executive level conferences and industry events, but they are also a much-needed resource for local workforce training providers and companies. The community college, the workforce development center, and non-profit workforce organizations could share the civic center for their programs, ensuring that Santa Fe's workforce is being trained in world-class facilities.

Action:

Revisit the proposed civic center design. Ensure that the design adheres to the following guidelines:

- The new civic center should be designed to appeal to smaller, executive-level conferences. A larger capacity facility will not necessarily lead to a larger indirect job benefit for Santa Fe. As the size of the event gets larger, a higher portion of attendees will either not be able to find hotel rooms in downtown Santa Fe or will not be able to afford them. These individuals will stay in hotels outside of the central district; eat at restaurants outside of the central district (often large chains); and, with so much commuting, have little time to shop at local stores while congesting Santa Fe's roads.
- The true benefit of the civic center is generated when visitors (both from outside events and Santa Fe functions) spend time and money in locally-owned shops, restaurants, and hotels. This injection of money drives business for local proprietors, who then spend their own revenue hiring additional staff, buying locally-made goods, or shopping for themselves. These funds continue to trickle throughout the economy, driving business, and creating new jobs. Smaller, more targeted events attended by executive-level individuals are much more likely to attract attendees who stay in downtown Santa Fe, bring their families, extend their stay, and spend their money with local merchants.
- A new civic center locating in downtown Santa Fe, targeting executive level conferences, and providing attendees technologically-sophisticated audio / visual equipment will allow the City to charge higher rates for use of the facility.
- Santa Fe prides itself on being the "city different;" therefore, the new civic center should radiate what is distinct about Santa Fe. To do so, consider incorporating the following elements into the design of the facility:
    - Arts and culture are the cornerstones of the building design.

- The center includes gallery and / or exhibit space for local artists.
- The center incorporates the latest water and energy conservation technologies.
- The center contains modern elements in combination with traditional Santa Fe style to communicate the City's deep roots yet willingness to progress to the future.
- The center contains high-tech workforce training spaces of various sizes to make the facility truly community-oriented. Consider a facility that, in addition to a large event room (500 person capacity), also contains one large auditorium-style classroom (e.g. 100-200 seats), two-three classrooms (e.g. 30-50 seats), two conference rooms (25-30 seats), and several small breakout rooms (5-10 people).

Strategy Four: Community Development

GOAL: Santa Fe's community and economic development activities support an environment that is favorable to (1) talented residents, (2) small, locally-owned businesses, and (3) targeted business sectors.

The Community Development recommendations offered in this section center on two major topics: improving Santa Fe's business climate and improving the city's quality-of-life amenities, particularly for young and creative individuals.

The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens.

A high quality of life is also directly connected to the region's ability to attract tourists. Through the choice of investments in quality-of-life amenities, the region will be able to target the specific type of tourist that visits. Tourists should be considered an economic development audience, and they are actual prospects coming directly to you. Ensure that they overlap with the audience you have for your economic development efforts.

One of the easiest ways for Santa Fe to become top of mind for businesses and entrepreneurs in its targeted business sectors is for those individuals to visit the region and enjoy the time they spend there. Therefore, tourist activities should portray a certain image of the city, one that is appealing to those executives and other decision makers. Make sure all tourist attractions showcase the "Creative Spirit of Santa Fe."

Strategy One: Adopt a more business-friendly attitude within City departments.

Santa Fe's unique character has sometimes been a hindrance to business activity. The city is well known externally for its tough ordinances and unfriendly business leadership, characteristics that will damage Santa Fe as it pursues economic development. Even small businesses and entrepreneurs (the city's primary target audience) will not move to a city where it is not welcoming or affordable to conduct business.

Actions:

1. ***Ensure the permitting process is consistent and efficient.***
    - During this planning process, numerous businesses criticized the city's permitting process for being too complicated, inconsistent, and time-consuming.
    - Consider expediting permits for standard requests. Applying for and receiving permits for, for example, small, after hours or weekend

downtown events should be made as easy as possible with standard application forms and a quick turn around process.

- Be specific and open about permitting requirements. Make this information readily available on City Web sites and in handouts available at City offices.
- Look at other cities' permitting processes for good examples of ways to make Santa Fe's more efficient and consistent.
- Burlington, Vermont's award winning "Doing Business in Burlington" publication offers new and expanding businesses a comprehensive and easy-to-use guide to permitting and city regulations. Sections from this guide are available on the following Web site: http://www.cedoburlington.org/business/doing_business_in_burlington/dbb.htm
- Look at the City of Surrey, located outside of Vancouver, Canada, for a good example of creating a step-by-step guide for local residents on starting their own businesses. http://www.city.surrey.bc.ca/Doing+Business/Business+Development/Starting+Your+Own+Business/default.htm
- Specifically look at other cities that are fostering the film industry – Los Angeles, New York, Toronto, Austin, for example. How have these cities structured their permitting processes to make it easy for and attractive to film production? Apply these best practices in Santa Fe.

5. ***Strengthen the Small Business Ombudsman Position within the City of Santa Fe offices.***
   - The focus of the current Small Business Ombudsman position should be expanded to serve all sizes of businesses.
   - The services of the Ombudsman should be expanded to visiting local businesses on a regular basis, listening to their concerns, and reporting back to City officials.
   - The Ombudsman should also be the single point of contact for a business having trouble navigating city regulations. He/she should walk businesses through the permitting process and help resolve conflicts between City departments and local businesses.
   - The benefits of expanding the role of the Ombudsman are numerous. First, strengthening this position makes a statement that the City is truly interested in supporting local businesses. Second, by regularly visiting with local businesses, the Ombudsman can communicate back to City leaders the current needs of local businesses, giving the City good information on which to base decisions. Finally, it provides a valuable resource to local businesses and helps navigate the permitting processes and acts as a voice for them to City leaders.

6. ***Provide periodic customer service training to City employees who regularly interact with local businesses and residents.***
   - Ask the Small Business Ombudsman to lead the customer service training sessions or hire a professional firm to conduct the training.
   - Training should include not only customer service training, but also an explanation of Santa Fe's new economic development brand and the role City employees play in economic development.

- A customer service guide containing quick tips on customer service should be developed and distributed among City staff.

7. Establish incentives that encourage local businesses to expand in Santa Fe.

- Consider waiving permit and impact fees for local companies that want to expand.
- Incentives should come from both the State and the City, particularly in helping with infrastructure improvements. When Dell was expanding in Tennessee, for example, the State paid 80 percent of the roadway improvement costs while the City of Nashville paid 20 percent.
- Promote incentives to local businesses. Ask the local utility company to help "spread the word" by referring local companies to a Web site with updates on incentives.

Strategy Two: Santa Fe's City Council should set broad goals for future development and allow those goals to drive decisions.

Actions:

1. Invite a moderator to lead a City Council retreat. The retreat should accomplish the following:

- Identify the positive assets of Santa Fe that cause each individual to feel passionate.
- Identify common threads among all council members. List Santa Fe's top assets.
- Agree that these common threads represent the essence of the community. Preserving the community's essence should be the principle that guides all future decisions.
- Set several overarching goals for the city.
- Agree to rules of etiquette among council members that are adhered to in and outside of council meetings.
- Conduct a city council study session prior to each meeting to allow councilors to state their positions on topics that are up for discussion during the upcoming meeting. City Council meetings should not be the first time that councilors hear each other's positions on topics being addressed.

2. The first retreat should occur after the spring 2004 election and occur at least every two years, following the election of new city councilors.

Strategy Three: Provide greater support to the Community Development Division and Economic Development Section.

Although only a few organizations in Santa Fe are directly charged with economic development, the community contains many more groups that impact the effectiveness of economic development programs. More than many other communities, Santa Fe is home to a rich diversity of not-for-profit, government, and business organizations, each perceived to have its own unique vision for the

future of the community. The city, and surrounding region, have become polarized into different "camps" of opinions. Each group seems to view itself as being fiercely independent from the others. This often results in a breakdown of internal communication, the very foundation of strong economic development campaigns.

Communication and cooperation in Santa Fe will improve if these various, and seemingly contradictory, opinion groups realize that they have a common bond: their success depends on Santa Fe's sustained economic health.

Santa Fe's ability to remain economically healthy is important to every organization and individual in the city and region. For example, while local businesses depend on a healthy economy to create a market for their products, non-profit organizations depend on a strong economy so that they can raise funds from local businesses and residents to keep their programs going. Second homeowners rely on a healthy economy so that their property values are retained and that the City can afford to maintain the quality-of-life attributes that originally attracted them to the region. Ethnic and Native American populations rely on a healthy economy that provides them with job opportunities, a market for their products, and ultimately provides them with income to continue living in Santa Fe. (A complete table of Santa Fe opinion groups and their reasons for supporting a healthy economy is provided in the appendix to this report.)

Improved economic health should be important to every Santa Fe resident and business. Santa Fe's elected officials should, therefore, ensure that their decisions lead to stronger economic conditions within the city and surrounding region.

A critical component of a healthy economy is ensuring that a strong economic development team serves the City. This team should be supported with financial and staffing resources that provide it the freedom to implement smart, aggressive community development and economic development activities. A strong economic development team will be required to implement many of the recommendations in this strategy. City leaders should view the economic development team as its task force for managing the day-to-day improvement of Santa Fe's economic conditions.

Actions:

1. ***Increase funding to Santa Fe's Community Development Division.***
    - Funding should be increased incrementally each year for the next five years. Draw additional funding from the Economic Development Fund.
    - Additional funding will be used to do the following:
        - Expand the Small Business Ombudsman position and responsibilities (described in the Entrepreneurship strategies).
        - Establish a Small Business Enterprise Director position that will be responsible for setting up and managing an entrepreneurship one-stop shop in coordination with the Santa Fe Business Incubator, the SBDC, and other small business support organizations.
        - Fund an entrepreneurship resource center. The purpose of the facility is to provide a centrally located office where all Santa

Feans can access a library of helpful information and talk with knowledgeable individuals about starting a business.
    - Increase the City's funding to the Santa Fe Business Incubator (for operations or facility expansions).
    - Provide funding for future incubators, such as an arts incubator.
- Commit funding for a minimum of five years. Longer-term budgets allow the department to conduct better planning and act progressively.

2. Set specific performance objectives for marketing subcontractors.

- Continue to set and monitor annual performance benchmarks for marketing contractors.
- Use the marketing recommendations in this report as a guide for establishing performance benchmarks.
- Agree to a three-year or longer contract with the marketing subcontractor. Include terms that allow the city to cancel the contract if the subcontractor repeatedly misses performance benchmarks. Otherwise, do not make the subcontractor re-apply for funding every year.

3. Clearly define and better coordinate the economic development roles of SFEDI, the Chamber, and the City's economic development team.

- The Chamber's primary role is that of an advocate organization for existing Santa Fe businesses.
- The Chamber should work closely with the (possible future) business liaison within the City's Community Development Division. The Chamber should introduce the liaison to its members and facilitate meetings between the liaison and local companies.
- SFEDI's role should be external and internal marketing. SFEDI should be responsible for polishing the brand identity and core marketing themes recommended in this strategy and incorporating the brand and themes into its Web site, collateral, and public relations activities.
- SFEDI and the Chamber are both responsible for handling visits by site selectors and potential business recruits. SFEDI should be responsible for managing the prospect's itinerary, while the Chamber should assist in setting up meetings between leading Santa Fe businesses and the prospect.
- Santa Fe's economic development team should be responsible for managing the marketing subcontractor contract, initiating community development activities that will support an overall economic development plan, and facilitating the information flow between City government and local businesses, prospects, and business organizations.

Strategy Four: Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.

Santa Fe's essence revolves around the core of arts and cultural activities occurring within the city. Arts and culture define the city's image and quality of life. Its unique character is founded in its tradition of arts and culture. It is what distinguishes Santa Fe around the world, and it is why creative, intelligent individuals are drawn to the city.

Arts and culture have long been the engine for much of Santa Fe's economic development. Although the "industry" of arts and culture is difficult to define, and even more difficult to quantify, it is undeniable that artistic and cultural activities have a tremendous impact on every aspect of Santa Fe, from its international image to its local products to its workforce skills. Arts and culture are the common threads that run throughout the entire region.

Because arts and culture have such a large impact on the local economy, it is critical that artists and artistic organizations are invited to participate in economic development activities. The City must consider the needs of the cultural sector when implementing this Plan. In addition, the City and cultural sector must work together to ensure that the results of the BBER study and the New Mexico New Media Industries Strategy project are incorporated into future activities to grow and promote arts and culture.

Actions:

1. ***Make arts and culture the cornerstone of the new civic center.***
   - Involve local artists in designing the facility.
   - Throughout the facility, integrate space for exhibiting work by local artists.
   - (Additional recommendations have been provided in the Infrastructure section of this strategy.)

2. ***Take steps to ensure Santa Fe's arts and culture will be sustained for generations to come. Ensure that the arts sector is accessible to young people.***
   - Endorse young professionals' arts organizations such as Avant Guard and Intermezzo. Make information on these organizations widely available. Promote these organizations to companies considering Santa Fe as a future business location.
   - Make Santa Fe open and accessible to all New Mexico students. Work with State leaders to initiate a new program in which all New Mexico high school seniors take a senior trip to Santa Fe. The trip would involve a visit to the capital and an introduction to Santa Fe's heritage, artistic and cultural amenities.

3. ***Make Santa Fe's artistic amenities accessible to all Santa Fe residents.***
   - Continue taking steps to make the traditional performing arts more open to the general population, for example, rock operas or free concerts.
   - Ask local businesses to invite local performing and visual artists to perform or display their work at business functions and other community events.

4. ***Increase occupancy tax revenue to support the arts.***
   - Santa Fe provides approximately $950,000 to arts programs annually.
   - Private foundations fund the bulk of arts and cultural activities in Santa Fe.
   - The city's support for the arts could be increased to support one of many activities, such as funding a future arts incubator or National Center for Art and Design or contributing to the cost of a unified national marketing

campaign to promote Santa Fe's arts and culture to collectors, artists, and cultural tourists.

Strategy Five: Ensure that Santa Fe maintains an atmosphere that is entertaining and attractive to young, creative people.

Actions:

1. ***Affordable housing is necessary for retaining young and creative individuals. Make it easy for people to purchase and upgrade their homes.***
   - Continue to offer inducements such as down payment assistance or tax abatements / decreases for individuals within a certain age or income bracket.
   - Consider establishing a fund similar to Austin, Texas' Mayor's Challenge Fund to help young people and people in need of affordable housing to get loans for home improvements and expansions.

2. ***Establish new festivals, expand existing festivals, and widely promote these events.***
   - Santa Fe is an ideal location for festivals, and numerous festivals already take place each year.
   - Festivals help create an entertaining atmosphere in Santa Fe. They provide entertainment for residents from all socioeconomic backgrounds. They also attract people from outside of the region and are, therefore, a good marketing tool for the city.
   - Standardize permitting process for event organizers. Be expedient in responding to their requests.
   - Waive the permit requirement to play music on the plaza.
   - Bolster the annual jazz festival and film festivals. These two events have potential to draw an international audience.
   - Support the new International Folk Art Market. Make it an annual event that compliments Indian Market and Spanish Market. This has the potential to grow to be another important event that extends the tourism season.

3. ***Start an annual winter sports competition for college students in Santa Fe and the surrounding region.***
   - Seven colleges are located in the Santa Fe area. Initially start the competition for students at these colleges.
   - Within five years, begin inviting college students from all New Mexico colleges.
   - Within ten years, begin promoting the competition nationwide.

5. Marketing and Public Relations

GOAL: Santa Fe will engage in a targeted marketing campaign to create local and national awareness of the city as a place to do business.

Santa Fe faces two marketing challenges. First, the City faces internal communications issues. Throughout this report, we have recommended ways to consolidate information sources about educational, workforce development, entrepreneurship, and economic development activities to make it easier for Santa Fe residents to access. In this section, we recommend techniques for spreading the word about why improved economic conditions benefit all Santa Feans.

Outside of the region, Santa Fe is faced with another issue. While Santa Fe is well-known throughout the world for its southwestern style and arts, little is known about Santa Fe as a business location. The external marketing recommendations in this section are designed to provide the city with a more business-friendly appearance to outside businesses and entrepreneurs. We have suggested a new brand theme under which Santa Fe can promote itself to business investors. The brand theme we recommend ties closely to the city's arts and cultural strengths and existing tourism promotions.

Santa Fe has many opinion groups that serve as a good starting point for addressing internal communication problems. As discussed throughout this report, before the city can launch an effective economic development campaign - whether its focus is local entrepreneurship, expanding current businesses, or recruiting new ones - all organizations related to economic development must commit to a single strategy for the community. Communities benefit from a well-orchestrated marketing strategy that is managed by one organization.

Once Santa Fe opinion groups improve communication and collaboration, the city will be ready to market within the community. Internal marketing informs citizens and business leaders of the economic development vision and trains individuals to promote the community with a single message, rather than numerous ones that may dilute or confuse the core message. Internal marketing builds local awareness and buy-in so that when Santa Fe markets outside of its region, it has a strong team in place to augment its message. The most effective communities not only have a well-integrated economic development organization leading the marketing efforts, but they also have hundreds of community ambassadors as part of the team.

The use of local media and personal meetings are good avenues for "building local awareness." **With strong internal support, the chances of successful external marketing increase considerably.**

Once Santa Fe succeeds in its internal marketing efforts, it should incorporate external marketing activities aimed at growing targeted businesses and entrepreneurial activity. External marketing, for most communities, should begin one to two years after internal efforts have begun. The trick is then to balance

both internal and external activities to get the most return – awareness and business.

External marketing is vital to diversifying an economy.

It can significantly improve a community's economic health by creating new, higher paying jobs and increasing the tax base. For communities today, it is important to have a Web site as primary collateral and to also have material to distribute at conferences and meetings. An integrated approach to external marketing that includes the right combination and frequency of word-of-mouth, publicity, and personal meetings is the key to successful marketing.

For the city and surrounding region to retain local businesses and cultivate prospects for economic growth, a more proactive targeted campaign is required.

Strong marketing activities will help accomplish the following economic development goals:

- Improve internal knowledge of the resources that are currently available in the city for residents seeking education and training, for expanding businesses, and for potential entrepreneurs.
- Improve external knowledge of Santa Fe as a top location for young, creative individuals and innovative businesses.
- Increase the number of businesses approaching SFEDI, the Chamber, or the City for information about expanding their business in Santa Fe.
- Cultivate target businesses, helping them create new jobs at all skill levels.
- Increase the amount of positive, national and international publicity that Santa Fe receives.

AE is providing a Marketing Guide (MG) that contains information to assist Santa Fe in implementing the economic development strategies over the next five years. It is meant to be used in conjunction with this report and specifically to support leaders who will execute the marketing campaigns.

Strategy One: Establish specific marketing roles for each organization currently involved in economic development.

The strong opinions, energy, and culture of activism in Santa Fe should become the foundation for unified change and new direction. All Santa Feans have a common goal for their city: **to retain the qualities that make it unique by creating a vibrant and healthy economy.**

Santa Fe is fortunate to have several organizations marketing the city. Santa Fe Economic Development Inc. (SFEDI), Santa Fe Chamber of Commerce, and Santa Fe Convention & Visitors Bureau have made tremendous strides in building a highly recognized tourism brand and in cultivating businesses. External marketing activities, however, should continue to be overseen by one

single organization. All other economic development entities should support this entity's marketing efforts and avoid launching other external efforts that could dilute the city's primary marketing message.

For Santa Fe to reach its desired goals, the city must adopt a marketing strategy and provide specific marketing tasks to the single economic development marketing organization (currently SFEDI). Additional funding of approximately $50,000 will be required to fully implement this marketing plan.

Actions

1. ***The City and SFEDI should adopt the marketing strategy.***
2. ***The City should commit to a minimum of a three-year contract for its marketing subcontractor (currently SFEDI). Provide SFEDI (or other future marketing contractors) with a set budget for as many years as possible under city law. This provides the organization with the ability to focus on marketing rather than continually concerning themselves with contract renewal.***
3. ***Provide the marketing contractor with specific marketing expectations and goals.***
4. ***Tie the marketing contract to the accomplishment of specific marketing objectives. (Recruiting X number of companies per year, for example, is not a realistic marketing objective. Organizing two to three annual marketing missions to other communities, on the other hand, is a realistic marketing objective. Tie objectives to action rather than quantitative results. Action will yield results.)***

Strategy Two: Create and adopt a single economic development brand

Communities that establish an economic development marketing theme that differentiates them have a greater chance of being recognized and trusted. Santa Fe is marketing to build awareness and clarify that it welcomes creative, entrepreneurial people and is a good place for starting new businesses.

Santa Fe should promote a single economic development brand that complements the recognized tourism brand, creates community-wide buy-in and ambassadors, and reaches targeted businesses through a mix of publicity, direct marketing, and collateral. Direct marketing includes one-to-one meetings, targeted electronic campaign messages, missions, and conferences.

To create an economic development theme, AE reviewed Santa Fe's current brands, unique strengths and characteristics, and analyzed target audience requirements. A marketing focus group was also conducted to gain public input. The proposed theme is meant for all organizations involved in economic development-including the City, SFEDI, Chamber and arts and cultural organizations- to use. A logo that communicates Santa Fe's marketing identity and tag line should be developed and incorporated into all print and on-line collateral materials. The marketing contractor should hire an advertising firm to develop professional logos and marketing collateral.

As the *Community Assessment Report,* the first report of this project, states, one of Santa Fe's biggest strengths is its internationally-recognized tourism brand. Several marketing themes and tag lines have been developed and utilized in marketing promotions in the past, including: "Away. To Santa Fe," "The City Different," and "Untamed." These themes, in conjunction with the State's brand, "Land of Enchantment," have very strong and positive connotations. Santa Fe is already known worldwide as being a "different" destination to visit, as well as a place for distinctive culture and arts.

Because awareness of Santa Fe is so high, and its perception is so deeply rooted, the city's business-oriented theme should complement the existing tourism-related themes.

A brand theme conveys "who," "where," and "what" the city offers. Local leaders describe Santa Fe as being "creative" and "spiritual," having a "rich culture," strong "history," and "distinct" personality. These core themes should be communicated through the economic development brand.

Arts and Culture are the cornerstones of Santa Fe's economy, and they also contribute to its exceptional environment. Santa Fe is an economic engine and attractor of creative people. With Arts and Culture, Design, Hospitality, and Software Development being recommended targeted business sectors, and "creativity" being a key descriptor of the city, we recommend that the new brand theme be the "**Creative Spirit of Santa Fe**."

When tourists think of Santa Fe, they think of a center of culture and world-class art within a beautiful and spiritual setting. It is truly a "different" place. When business leaders think of Santa Fe, they think of a city with outstanding quality of life amenities, a rich heritage, and a diverse workforce. Most business professionals live in Santa Fe because of the rare and special quality of life they enjoy.

Using the "Creative Spirit" theme in every marketing activity that promotes economic development for the City of Santa Fe, will promote the city's most differentiating characteristic and will appeal to the targeted audiences.

A positioning pyramid is a technique used to determine a community's brand theme. It answers three questions: What is the community's product? What are its unique benefits? What does the community represent? This simple tool lays the foundation for a community's marketing communication program. This diagram illustrates Santa Fe's positioning pyramid.

Secondary messaging tailors a statement for a specific audience and dictates audience-related benefits. For information about the site selection needs of Santa Fe's marketing audiences, refer to the *Target Industry Report,* the second report of this project.

Actions:

1. ***The City and SFEDI (or future marketing contractor) should discuss and approve the branding theme.***
2. ***The City should ask the future marketing contractor to hire an advertising or graphic design firm to develop a logo and style guide.***
3. ***The future marketing contractor) should distribute the style guide to the City and the Chamber. The style guide should also be made widely available to other community organizations, including schools, not-for-profit organizations, local media, businesses, workforce service providers, and arts and cultural organizations. Encourage as many organizations in Santa Fe as possible to adopt the style guidelines in their own external promotions. The more consistent that Santa Fe's look appears from the outside, the more effective the new business brand will be.***

Strategy Three: Gain a thorough understanding of the target audience

Understanding the internal and external target audiences' needs will help Santa Fe's economic development team in crafting effective secondary messaging. A secondary message occurs after initial inquiry (audience has received primary message), touts quality, and provides detailed information that the target audience desires.

It is important for Santa Fe to first understand the needs of internal audiences and inform them of the city's economic development vision. **Local employers, the current workforce, influencers, and entrepreneurs** are key assets for economic development, and recognizing these sectors as a target audience and understanding their needs is sometimes overlooked. The City, SFEDI, and the Chamber should continue to improve relationships with local businesses and provide additional services that can help them to become more successful. Local media and personal meetings are effective mediums for building awareness and demand for economic development services.

Once the City successfully addresses internal audiences' needs, it should become familiar with targeted business sectors. **The target business sectors include: arts and culture, hospitality and tourism, design, conservation technologies, software development, publishing and new media, and outdoor gear and apparel companies.** Identify target business champions, business leaders with expert knowledge of a particular industry. These individuals understand industry players, trends, challenges and opportunities, and they have powerful connections within an industry. They may also be willing

to meet with site selectors, volunteer to speak at events promoting the county, and share industry knowledge with economic development leaders.

SFEDI has already begun organizing regular meetings of executives from its target clusters. These meetings should continue and expand to include industries that are recommended in this study but are not currently target clusters for SFEDI. Santa Fe should have at least three industry champions for each target business. The *Marketing Guide* (a supplemental report included as part of this project) lists industry associations that can be a resource for target business trends and prospects.

Santa Fe can use the targeted messaging and main "proof points" contained in the MG when crafting secondary messaging for marketing communication.

Each target business will be interested in the following:

- Extremely high quality of life
- Ample supply of artistic, technical, and scientific workers
- Proximity to customers and manufactures
- Workforce development programs and incubators
- Close proximity (1 hour) to the Albuquerque International Airport

Art and Culture, **Design,** and **Hospitality** firms will be interested in the following:

- Embedded artistic community and strong local support for the arts
- World-famous art galleries, museums, Indian Market, Spanish Market and flea markets
- World famous performing arts organizations such as the Santa Fe Opera, the Santa Fe Chamber Music Festival and many other music, dance and theater companies
- Educational offerings in performing and visual artistic disciplines through the College of Santa Fe, the Santa Fe Art Institute, and Santa Fe Community College

Design, Software Development and Publishing companies will be interested in the following:

- Santa Fe's image as an artistic and cultural capital of the Southwest
- Santa Fe's large cluster of software development, film businesses, and publishing companies
- Renowned southwestern culture, architecture, and cuisine
- The successful Santa Fe Business Incubator
- Federal research facilities at Los Alamos, Sandia, and Kirtland AFB are pioneers in many of the world's most advanced software development fields
- The College of Santa Fe's Moving Image Arts Department provides students with access to full range of film production experience
- Santa Fe Institute is a pioneer in the burgeoning complexity systems field
- The National Center for Genome Resources is a leader in bioinformatics research

Conservation Technology companies will be interested in the following:

- Santa Fe makes conservation a top priority
- Santa Fe's strong local market for water conservation and clean energy products
- Santa Fe's high quality workforce and area research facilities

Hospitality businesses will be interested in the following:

- Santa Fe is known as one the top 10 cities in the world to visit, *Travel + Leisure*
- Santa Fe is investing in a new civic center
- Santa Fe has a dedicated bilingual workforce

Outdoor Gear and Apparel companies will be interested in the following:

- Santa Fe offers a creative, active, and artistic workforce
- Santa Fe's mild climate and countless outdoor recreational opportunities make it a strong market for product testing
- Proximity to manufactures and suppliers

Actions:

1. ***Based on the results of the Target Industry Report, the marketing contractor and its advertising partner should develop an audience profile for each target business. The audience profile will detail the specific marketing technique that will most effectively reach each audience.***
2. ***The marketing conatractor and its advertising partner should consider the audience profiles when developing a new logo and collateral and revamping the Web site. The images, messages, and copy contained in collateral must address the industry needs contained in the Target Industry Report and audience profiles.***
3. ***The marketing contractor, SFEDI should work with the City and the Chamber to identify target business "champions."***
4. ***Invite champions to share their industry knowledge and prospects and assist with economic development improvements.***
5. ***Champions may already exist. SFEDI's board members already serve as leaders for each SFEDI cluster industry. These individuals should be involved in the additional target businesses recommended in this strategy.***

Strategy Four: Gain local media support.

As mentioned throughout this project, the need to improve communication throughout the city is an immediate priority. Members of the Advisory Committee of the Cultivate Santa Fe initiative have committed to being media champions.

As the Cultivate Santa Fe project is finalized, Advisory Committee members should **kick off an internal press relations campaign**. Media champions should write and "tell stories" related to economic development to local newspapers, radio stations, company newsletters, and Web sites to inform citizens about Santa Fe's vision. It is imperative that local newspapers, radio,

and television stations provide coverage and speak positively about the city's efforts. This will first create excitement within Santa Fe and will then spread throughout New Mexico. Local media is the first avenue for creating local "buzz**."**

Santa Fe's internal press relations (PR) campaign should focus on stories that discuss what economic cultivation means to Santa Feans. Advisory Committee members are encouraged to contribute articles and editorials (and speaking engagements / interviews) on the following topics: "Growing from Within," "Stay in Santa Fe," "Value of Education," and "The Creative Spirit." Communicate the message that, "for Santa Fe, economic cultivation is focusing on activities that improve workforce services, economic health, and overall community cooperation to help local companies succeed and new job opportunities to emerge for all Santa Fe families."

Additional PR campaigns should discuss Santa Fe's vision, characteristics of target businesses, start-up successes, economic development marketing achievements, and community ambassadors. Over time, the City, SFEDI, and the Chamber should host appreciation and celebration events for small businesses that have made big impacts on the economy.

Economic development leaders should focus additional internal marketing efforts on communicating information about actions the City is taking to improve those issues survey respondents rated as "least satisfactory." Among these issues, the cost of living, housing, growth management, and business growth topics should be continuously discussed so that citizens are informed of progress that is being made in these areas. Supplementary campaign topics should include what Santa Fe is doing to preserve the city "different." Local college professors should be asked to write articles and editorials on new college programs that will provide training for target businesses, and leaders from arts and cultural organizations should be asked to write articles on the importance of culture to Santa Fe's economy. The MG provides more detail on PR campaign topics and contains a media list.

Actions:

1. ***Following the completion of this report, the City and SFEDI should reconvene the project Advisory Committee. Ask Committee members to volunteer to serve as "media champions." Assign each volunteer with a topic on which they should write an editorial or conduct a radio interview.***
2. ***Ideally, two volunteers will partner on writing the editorial or conducting the radio interview, with each volunteer coming from an "opposite" field. A local real estate developer could partner, for example, with a representative from an environmental conservation organization. By partnering with an opposite, the community will understand that regaining Santa Fe's economic health is an issue that transcends traditional rivalries.***
3. ***Local media champions should help garner local publicity by personally meeting with editorial boards of local news companies. Present the editorial boards with background information on the Cultivate Santa Fe plan and the subjects on which the volunteer teams will be writing.***

4. ***Encourage local media companies to dedicate a section of their paper or broadcast to one or more of the following topics: (1) news updates on Santa Fe economic development; (2) how to start a company in Santa Fe or what resources are available to entrepreneurs; (3) profile of each target business and current Santa Fe businesses in those industries.***

Strategy Five: Launch an internal marketing campaign.

With strong internal community support, the likelihood of successful external marketing increases considerably. **For Santa Fe, approximately 70 percent of efforts should be invested in internal activities**. The main goal of internal marketing is to inform citizens of economic development efforts and successes, to garner the community's support for the plan, and to act as promoters. It may take up to two years to see substantial impacts from internal marketing, and Santa Fe should continue this effort indefinitely. City leaders cannot expect overnight results.

Internal marketing began when AE started this project and has occurred each time AE has presented the Cultivate Santa Fe reports to Santa Fe audiences. The next major activity will be the project Roll Out Event in April 2004. During the event, AE and the Advisory Committee will unveil the new economic development vision, theme, and goals to the community. The roll out event should be used to communicate both the purpose and benefits of the new goals as well as the next steps in the process, and to request support.

Publicity, promotion, and collateral are the three vehicles recommended to reach Santa Fe's internal audiences. The goal is to build awareness within each target audience in a quick, cost-effective manner.

Publicity is one of the best vehicles to cost-effectively reach internal audiences and generate interest. To reach its target businesses, Santa Fe should strive to appear in publications and newspapers read by these industries. To reach local businesses, Santa Fe should focus on local and regional newspapers, newsletters, and business publications. To reach businesses outside of Santa Fe, concentrate on industry trade, general business, and lifestyle publications. **Within the next year, a professional public relations firm or new public relations position created within SFEDI should be hired to manage this initiative.**

Other ways to communicate to the public include: delivering newsletters, similar to what is currently done by the Santa Fe Chamber of Commerce; posting news in church bulletins, high school and college papers, regional business journals, on community Web sites and at local business establishments. For instance, SFEDI could create banners with the new logo and Web site address that local establishments can post so that their clientele is informed of the new message and is directed to a Web site to get more information.

A "media outreach" is another PR service SFEDI should consider. It provides economic development leaders with a target media list, press pitch content, and

a distribution list. An excellent PR activity that gains awareness is a bylined article**,** which incorporates both press stories and advertising into one activity. Lastly, since economic development leaders are in the public eye, it is wise to consider press communication skills training, which teaches individuals how to work with reporters to get the most from your marketing investment.

Being rated by *Travel + Leisure* in August 2003, as the Top 10th World's Best City, is an outstanding accomplishment. This is a strong start to generating awareness with many of Santa Fe's targeted audiences – both internal and external.

Promotion includes spreading information by word-of-mouth and through one-to-one meetings, attending regional industry events with local businesses, speaking at business networking events with key influencers, forming relationships with regional economic development teams to sell Santa Fe as a place to do business. It also includes calling prospects to provide information on Santa Fe's unique business climate, available business park space, and the benefits of operating or expanding a business in the city.

The primary **collateral** piece used to promote Santa Fe should be SFEDI's Web site. By revamping the Web site to contain the new marketing message, this can be a strong piece to reach both internal and external audiences. The current Web site offers relevant content for most of the defined target audiences. Santa Fe should ask local businesses to mention the Web site to employees via local business Intranets and in their corporate marketing material when appropriate. These efforts will help build awareness.

SFEDI should consider adding or updating the following components on its Web site:

- Economic and Industry Information
- How to Start a Business in Santa Fe
- Local Company Database
- Sites and Business Parks
- Economic Development Projects
- Job Postings
- News Wire
- Local Company Testimonials
- Quality of Life
- Incentives and Permitting
- Annual Report

The MG provides an explanation of each of these components and also includes examples.

Actions:

1. ***The City and the marketing contractor should review and approve the internal marketing recommendations offered in this report.***
2. ***Identify local volunteers to assist with implementation.***
3. ***Ask individuals from the community with a passion for economic development and Santa Fe's future to volunteer and join the marketing team.***

Please refer to the MG for more detailed recommendations on internal activities.

In 2004 and 2005, SFEDI should implement activities that increase local awareness and improve internal communication. Local campaign ideas are provided below:

1. **Publicity**
   a. Education – "Stay in Santa Fe," "Value of Education," "Take Home Computer Program," and "Make & Take High School Learning Tools Program." SFEDI should involve local Pre-K - 12 schools and SFCC in this internal communications campaign.
   b. Workforce Development – One-Stop Shop for workforce training and new workforce development program Web site
   c. Entrepreneurship – New Web site database of Santa Fe's entrepreneurial resources, business incubator expansion, and creation of a Santa Fe arts incubator
   d. Local business success stories – Feature a new company in each issue
   e. Local Businesses – "Buy Local" campaign
   f. Tourism – Address the issue of the importance of tourism to a healthy Santa Fe economy
   g. New Marketing Strategy and Message – Showcase the new brand theme, logo, and new collateral
   h. Press Relations - Conduct training on working with the media, negotiate for reduced rates and budget $30,000 a year to hire a PR firm.

2. **Collateral - Web sites**
   a. Revamp the marketing contractor's Web site to incorporate new marketing theme (logo) and targeted messaging (*cost of approximately $10,000*).
   b. Assist other economic development-related organizations in incorporating the new logo (and marketing style) into their own Web sites.
   c. Encourage other economic development-related organizations, hospitality businesses, and on-line arts and cultural resources to include a link to SFEDI on their Web sites.
   d. The City and marketing contractor, together with local economic development-related organizations, should develop new Web sites that are mentioned throughout this strategy. New Web sites would include:
      i. An Arts & Culture portal to link all local artists' Web sites and act as a central resource and listing of festivals and events
      ii. A Santa Fe specific workforce development resource portal
      iii. A Web site resource for entrepreneurs, containing all information necessary for starting a business in Santa Fe
      iv. A Santa Fe specific film promotion Web site, e.g. http://www.wncfilm.net/

v. A Santa Fe non-profit organization Web site, containing a searchable database of all non-profit organizations in Santa Fe

3. **Collateral – brochures**
    a. A user-friendly guide to workforce training and educational resources in the Santa Fe region to be made available at schools and public gathering places such as libraries, churches, or social organizations
    b. A simple guide containing entrepreneurial resources. Similar to the Web site, the guide would provide step-by-step instructions on starting a business in Santa Fe. (Examples were provided earlier in this Strategy.)
    c. A SFEDI annual report

    Estimated cost: $10,000

4. **Promotion - Speak at regional business association events**
    a. Project Advisory Committee and / or newly created Implementation Committee.
    b. Support such as the Santa Fe film festival, Russian Summer 2004 Exhibit, International Folk Arts Festival, and Annual Jazz Festival and other events throughout the year.

5. **Promotion – Host an annual Economic Development Forum.** During the event, regional leaders can provide an overview of the year's successful economic development activities and an update of economic data for the Santa Fe and the larger region surrounding the city. The project roll-out event (April 2004) can be the first annual Santa Fe Economic Development Forum.

6. **Promotion – Create a welcome package** for newcomers. Send to new residents when they sign up for utilities.

7. **Promotion - Speak at local business associations** and provide update on Santa Fe's economic development and marketing efforts.

8. **Promotion - Establish a high school group** to gain a better understanding of what factors are important to teens when considering working in Santa Fe in five years. Consider calling the group "Teens Talk."

Strategy Six: Implement external campaigns

External marketing promotes Santa Fe to identified targeted businesses that reside outside of Santa Fe, complement the current economy and help the city meet its economic development vision. External marketing should begin in year 2006.

Web sites, publicity, and targeted direct marketing and selling are the most cost-effective methods for communities to convey their messages. Santa Fe should balance these activities, be consistent in the message it conveys, and

focus on campaigns that will directly reach prospects. The primary vehicle, and one that should be used throughout external efforts, is publicity. Santa Fe should then begin to incorporate collateral (Web site and brochure), marketing missions, and industry associations and conferences.

Publicity

Publicity may be the most effective form of economic development promotion. Santa Fe could significantly increase the amount of publicity it receives in publications, and ultimately reach the city's target business companies by having a PR firm on retainer to develop and distribute releases and bylined articles.

Collateral (Web site and Brochures)

Resources should be invested to redevelop the primary Web site that promotes economic development in Santa Fe to more effectively link it with regional economic development Web sites. The main economic development organization's URL and phone number should be incorporated into every activity that promotes the city. See the MG for more Web site recommendations.

Marketing Missions

Santa Fe leaders need to engage in marketing missions to recruit target business companies from other regions and to see first hand benchmark communities' efforts. Santa Fe can learn from benchmark communities by visiting these cities. Schedule marketing missions each year to a region with a high concentration of its target businesses and visit benchmark cities to observe what is effective and what is not within these business communities. *For example, visit regional neighbor benchmark cities such as Boulder, CO and Albuquerque, NM. In the second year, consider visiting national benchmark communities such as Asheville, NC and Santa Cruz, CA. In the third year, visit a large benchmark site such as Savannah, GA.* Volunteer representatives from business, government, and academia should attend marketing missions, which can involve a series of meetings with local companies to sell Santa Fe as an ideal business location.

Industry Associations and Conferences

Industry associations, a trusted source of information for member companies, offer an opportunity to track trends and prospects. SFEDI should consider joining the leading associations of its target businesses, place articles in industry association newsletters and sponsor two industry conferences per year. Industry conferences provide a unique opportunity for Santa Fe representatives to promote business development, and face-to-face marketing is recommended to supplement other marketing efforts. Santa Fe can attend, sponsor, and exhibit at conferences.

Actions:

1. ***The City and the marketing contractor approve the external marketing component of this strategy.***
2. ***Identify Industry Champions, board members, and other volunteers to assist with implementation. Individuals from the community with a***

passion for economic development and Santa Fe's future can volunteer and become part of the marketing team

3. Volunteers can assist by attending marketing missions or industry events on behalf of Santa Fe, to respond to calls from media, to distribute collateral, and to promote the marketing contractor's Web site.

Santa Fe should consider implementing activities that increase awareness among external audiences.

1. **Publicity campaign** to targeted national publications
    a. *Lifestyle publications*
    b. *Industry trade publications*
    c. *General business publications (e.g. Business Week, Forbes)*
    d. *Travel publications*
    e. CNBC's Odyssey Media feature**.** One 5-7 minute story costs $20,000 and is aired 50 times on national and regional news channels.

    Launch an advertising campaign to support publicity. $4,000 to develop an ad, ad placement costs between $5,000 - $15,000
2. **Direct marketing** – Obtain target business databases and send electronic campaign mail.
3. **Direct marketing** – Sponsor and/or attend 2-3 industry events per year.
4. **Direct marketing** – Once the civic center is complete, promote the facility to executive-level target industry events and training courses.
5. **Direct marketing** – Film a documentary about a well-known Santa Fe artist and submit it to film festivals and public television networks.

6. Direct marketing – Partner Economic Development teams with Albuquerque and other New Mexico economic development groups and take a mission to a market with a high concentration of target businesses.

Appendix: Performance Metrics

An important component of the implementation of Santa Fe's Economic Cultivation Plan is a monitoring system to track the success of the plan in the years to come. AngelouEconomics has identified several data sets that have been used during the strategic planning process that we believe will be good measures of economic performance. These data are easily found at state and national sources, are available at the city and county level, and should be considered good indicators of the overall economic health of Santa Fe and its citizens.

Many state and local economic development organizations already use performance metrics. These data are also called "benchmarks," as local data is usually placed side-by-side state or national data for comparison. By committing to measuring its achievements, Santa Fe will be joining the ranks of communities in Oregon, North Carolina, Minnesota, and Indiana who have developed successful benchmarking systems to monitor their economic performance. The performance metrics proposed in this plan provides Santa Fe's leaders with an excellent opportunity to demonstrate positive results of their efforts and policies and build confidence among the general public that the economy is heading in the right direction.

AngelouEconomics recommends several performance metrics for each major topic of the Cultivation Plan that could be used by Santa Fe's leaders to track progress:

Workforce Development and Education

- Increased job growth in target industry sectors
- Increased household income
- Increased percentage of population with 2- year degree or higher
- Increased average SAT scores for Santa Fe high school students
- Decreased high school drop out rate

Entrepreneurship

- Increased net annual new firm creation
- Increased percentage of companies at Santa Fe incubator classified within a target business sector
- Increased total venture capital funding in Santa Fe
- Decreased retail spending leakage

Infrastructure & Sites

- Successful annual progress and on-time completion of the Water Diversion Plan
- Construction progress and completion of the new Santa Fe convention center
- Increased percentage of new homes and buildings built in Santa Fe that classify as affordable living and/or "green"

Quality of Life

- Increased percentage of total population aged 25-44
- Increased percentage of total graduates from Santa Fe higher education institutions living in Santa Fe 1 year after graduation
- Decreased poverty rate
- Stable cost of living ratio (ratio between Santa Fe's average cost of living and average wage remains stable or decreases)

Marketing

- Increased state or national media mentions related to Santa Fe business activity
- Increased number of qualified target industry leads contacting SFEDI or other economic development-related organization about business expansion, relocation, or start up in Santa Fe (e.g. the City of Santa Fe, Santa Fe County, the Chamber of Commerce, or local real estate agency)
- Increased hotel occupancy, increased hotel occupancy in hotels located in downtown Santa Fe
- Increased visitor spending

AngelouEconomics recommends that performance be measured on a city basis. Benchmark data should be collected for the City of Santa Fe, Santa Fe County, the State of New Mexico, and the U.S. Santa Fe may also choose to include one or more of the comparison communities included in the *Community Assessment* report (Flagstaff, Boulder, Asheville, and Raleigh). Metrics are best used when they are calculated as a share of the U.S. average. For example, Santa Fe's average wage is currently $27,644 or 76.6% of the U.S. average. Santa Fe will know that it is successfully meeting the objectives of this *Economic Cultivation Plan* as this percentage increases over the next 5-10 years.

Performance metrics should be updated by the city's lead economic development organization on a bi-annual or yearly basis. The following page provides a sample format for tracking performance. This table can be expanded to include other performance metrics within each topic, additional historical data, and information on competitor communities.

Sample Performance Benchmarks
Santa Fe, New Mexico

		Workforce & Education	Entrepreneurship	Infrastructure & Sites	Quality of Life	Quality of Life	Marketing & ED
		Household income County	Venture Capital Funding to SF area companies County	Successful annual progress and completion of Water Diversion Plan City/County/State	Percentage of population 25-44 years old County	Cost of Housing Ratio City	Number of qualified target industry leads contacting SF ED orgs about biz expansion, relocation, or startup County

	2015	105.0%	$100 million (30%+)		33.0%	115	▼

Master List of Recommendations

Cultivate Santa Fe
Summary of Workforce Development and Education Recommendations

Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Supporting*
1. Help Parents place greater value on public education					
a. Get parents involved in schools					
Adopt a take home computer program	Mid term	2005	ongoing	SFPS	SF Bus., Dona
Use local school facilities for evening adult ed classes	Mid term	2005	ongoing	SFPS, SFCC	Other training p
Start a cultural education program	Mid term	2006	ongoing	SFPS	
b. Provide parents tools to support learning at home					
Hands-on teaching training for parents	Mid term	2005	ongoing	SFPS	Parent/Teache
Create "make and take" educational materials	Mid term	2005	ongoing	SFPS	Volunteer
Adopt a Parents and Teachers as Partners program	Long term	2007	ongoing	SFPS	Parent/Teache
Bilingual school liaisons to make home visits	Long term	2007	ongoing	SFPS	Volunteer
2. Promote the value of quality education within the community. Turn K-12 education into a "cause."					
a. Launch an internal marketing campaign to promote the value of public education	Short term	2004	2005	SFEDI, City, SFPS	
Schools create weekly take-home folders to inform parents	Mid term	2005	weekly	SFPS	
Start a volunteer phone chain to provide parents with school info	Mid term	2005	ongoing	SFPS	Parent/Teache
b. Create PSAs aimed at promoting the value of public education	Short term	2004	2005	SFEDI, SFPS	Volunteers, Loca
Organize an internal marketing task force	Short term	2004	2004	SFEDI, SFPS	
Seek local ad agencies who will provide service pro bono	Short term	2004	2004	SFEDI, SFPS	Local Agenc
Seek funding from non-profits and foundations to support program	Short term	2004	2004	SFPS, Chamber, SFEDI	Non profits, Fou
Identify a single message for the campaign and use multiple media sources	Short term	2004	2005	SFPS, SFEDI, Local Media	
c. Start a campaign to show students non-college career options	Mid term	2005	2008	SFPS	One Stop Ce
Invite local workforce development programs to present at school functions	Mid term	2005	ongoing	SFPS	One Stop Ce
Create a Web site containing resources for non-university bound youth	Mid term	2006	2006	One Stop Center	SFPS
d. Start an annual Education Day - outreach and educational event	Mid term	2006	annually	SFPS, City, Chamber	Workforce deve

Summary of Entrepreneurship Recommendations

Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Su*
1. Financially support the Santa Fe Incubator					
a. Expand the Incubator to provide resources for SF's target business sectors	Mid term	2005	2008	Incubator	
b. Lobby legislators to pass incubator certification and funding match program	*** Top 5 ***	2004	2004	Chamber, Incubator	Ci
The SF Incubator could be used as a model for incubators in other parts of NM					
The network for certified incubators could be a funnel of investment opps for the NM VC Fund					
c. Work with the State, UNM, the Santa Fe Incubator, and the SFCC-SBDC and SCORE to set up an entrepreneurship one-stop shop center similar to workforce development centers.	Long term	2007	2007	City Sm.Bus.Enterprise Director	SBD
The centrally located center would be a library of info about setting up a business in the region					
d. Set up an entrepreneurship center similar to workforce development centers	Long term	2007	2007	City	SBD
The centrally located center would offer coaching and a library of information					
Use funding from the pending Kaufman grant to help fund the center	Long term	2006	2007	City Sm.Bus.Enterprise Director	SBD
e. Establish a Small Enterprise Director position within the Community Dev. Division	Mid term	2005	ongoing	City	SBD
f. Establish an Arts Incubator at a central location in Santa Fe	***Top 5***	2006	2008	City	SFCC,
2. Make information and training about starting a business widely available - encourage local success.					
a. Involve the New Mexican in covering stories about local business startups	Short term	ongoing		New Mexican	
Potential entrepreneurs will find inspiration from the success of others					
Propose a schedule of small businesses to regularly feature	Short term	2004	ongoing	New Mexican	
Invite successful local entrepreneurs to speak at community events	Long term	ongoing		All SF organizations	
b. Provide Santa Fe non-profits with information to help themincrease their financial capacity					
Non-profits should be viewed as entrepreneurial small businesses					
Encourage participation in NGO New Mexico, New Mexico's central non-profit business organization.	Short term	2004	2005	Chamber	
Provide information and training to non-profits to help them learn how to increase their financial capacity	Mid term	2005	ongoing	Non Profit Business Assoc	Fo
The association should create a searchable Web site listing all non-profits in the region	Mid term	2005	2006	Non Profit Business Assoc	
c. Develop a single Web site containing an inventory resources for entrepreneurs	Mid term	2005	2005	City Sm.Bus.Enterprise Director	
3. Motivate Santa Feans to start new companies.					
a. Streamline the City's permitting process	Short term	2004	2005	City	
Review the current permitting process and compare to the needs of startups and target industries	Short term	2004	2004	City	
City government should commit to easing and shortening the process within one year	Short term	2004	2005	City	
The City Web site should contain easy to use permitting info and applications	Mid term	2005	2005	City	
b. Consider waiving permitting fees for small businesses locating in targeted areas	Mid term	2006	ongoing	City	
c. Expand the City's Small Business Loan Program					
Restore the program to its original funding level	Short term	2005		City	
Take steps to ensure that there is broad awareness of the program across the community	Short term	ongoing		City

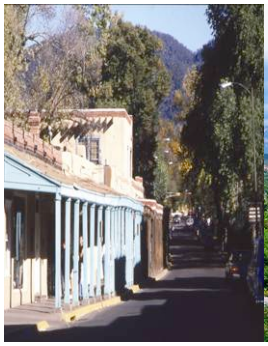
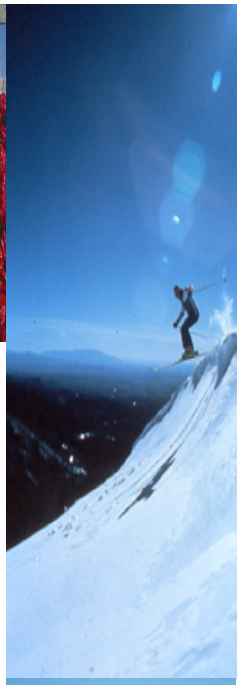
Summary of Sites and Infrastructure Recommendations



Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Sup*
1. Make Santa Fe the water conservation and clean energy capital of the U.S.	*** Top 5 ***	2004	ongoing	City	Enti
a. Incorporate clean energy and water conservation into the design of all public buildings	Mid term	2005	ongoing	City, County	
b. Begin an annual student competition for design of water conservation innovations	Long term	2007	annually	SFCC, City	Dev
c. Promote Santa Fe to expanding and relocating water conservation companies	Mid term	2005	ongoing	SFEDI, City	Cl
Promote the city's water shortage as an ideal test market for conservation tech and service firms					
Develop a marketing package highlighting SF's dedication to water conservation	Short term	2005	2006	SFEDI	
Organize a delegation to visit other cities that have successfully tackled the water issue	Short term	2004	2005	City, County	
d. Incentivize water conservation and clean energy use					
Expand programs in which utility companies offer rebates or credits to customers of clean energy	Mid term	2005	ongoing	Utilities, City	
Offer incentives to consumers that purchase energy/water or conservation technologies from local businesses	Long term	2007	ongoing	City, Utilities	
Work with State officials to create statewide incentives for energy and water conservation companies	Long term	2006	2008	City, County	
2. Provide better infrastructure and processes to support creative activities.					
a. Create a National Center for Art and Design in Santa Fe	*** Top 5 ***	2005	2008+	City	Ar
The Center is a single location where arts and design organizations can collaborate					
The Center should provide education, studios, small offices, exhibit space, and retail					
Consider placing the Center at the Rail Yards development or other central site, integrate proposed arts incubator					
The Center should invite international experts to teach seminars or lead local collaborative efforts					
b. Create a single Web site aimed at promoting arts and culture in Santa Fe	Short term	2004	2005	Arts Organizations	
One portal for all SF arts and cultural amenities, sets a single distinct image for SF					
Host a contest in which locals submit Web URLs or site design ideas	Short term	2004	2004	Arts Organizations	
Include an events calendar, map, and searchable database of SF arts / culture organizations					
Eventually, include a virtual market on the site in which local artists can sell their wares	Long term	2007	2008	Arts Organizations	
3. Partner with Santa Fe County to solve infrastructure and site issues.					
a. Develop a shared city / county business park	Long term	2006	2008+	City, County	
Share the cost of infrastructure, land, and tax revenue					
b. Jointly improve the Santa Fe Airport	Mid term	2004	2007	City, County	
SF City Council should approve the application for Park 139 certification	Short term	2004	2004	City Council	
Share funding for expanding the airport fire station and upgrading security along the perimeter	Mid term	2005	2006	City, County	
c. Develop wireless Internet infrastructure in core population centers in the city and county	Short term	2004	ongoing	City	L
4. Approve and construct a new convention center that represents the unique character of Santa Fe	*** Top 5 ***	2004	2008	City	Civic
a. Revisit the proposed design	Short term	2004	2005	City	Civic

Cultivate Santa Fe
Summary of Community Development Recommendations



Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibility*	*Supporting*
1. Adopt a more business friendly attitude within City departments.					
a. Ensure the permitting process is consistent and efficient	Short term	2004	2004	City	
b. Strengthen the Small Business Ombudsman Position within the City of Santa Fe offices.	Short term	2005	2005	City	
c. Provide periodic customer service training to City employees	Mid term	2005	ongoing	City Bus.Ombudsman	City
Ask the Business Ombudsman to organize regular training seminars	Mid term	2005	ongoing	City Bus.Ombudsman	City
Train City employees not only in customer service, but about SF's marketing effort and new brand	Mid term	2005	ongoing	City Bus.Ombudsman	City, SFED
Develop a customer service guide and distribute it among City staff	Mid term	2005	2005	City Bus.Ombudsman	City
2. Santa Fe's City Council should set broad goals for future development and allow those goals to drive decisions.					
a. Invite a moderator to lead a City Council retreat	Short term	Summer 2004	annually	City Council	
Identify common thread among all councilors, identify SF's top assets and essence					
Set several overarching goals for the city	*** Top 5 ***				
Agree to rules of etiquette that are adhered to inside and outside of council meetings					
Conduct a city council study session prior to each formal meeting to discuss topics up for discussion	Short term	Spring 2004	weekly	City Council	
b. Conduct the first retreat after the Spring 2004 election and repeat every year	Short term	Summer 2004	annually	City Council	
3. Provide greater support to Santa Fe's Community Development Division					
a. Increase funding to the Community Development Division	Mid term	2005	2008	City	
Commit to incrementally increase funding each year for the next five years					
b. Set specific performance metrics for marketing subcontractors	Short term	2004	ongoing	City CD Division	SFEDI
Agree to a minimum 3-year contract with marketing subcontractors if they meet performance metrics					
c. Clearly define the ED roles of the Chamber, SFEDI, and the City	Short term	2004	2004	City, Chamber, SFEDI	
4. Recognize the importance of arts and culture to Santa Fe's economy. Involve arts and culture in economic development.					
a. Make arts and culture the cornerstone of the new convention center	Short term	2004	2008	City	Arts organizat
b. Ensure that the arts sector is accessible to young people					
Endorse young professionals' arts organizations and make info about them widely available	Short term	ongoing		Arts organizations	Chamber
Work with the State to start a program in which all NM high school seniors take an educational trip to SF	Long term	2008	annually	City, State gov't	NM school dis
c. Make Santa Fe arts amenities accessible to all residents					
Continue taking steps to make traditional arts events to be made open to the public, e.g. free public concerts	Mid term	ongoing		Arts organizations	
Invite local artists or performers to exhibit at business functions and community events	Mid term	ongoing		Entire SF community	
d. Increase occupancy tax revenue to support the arts.	Long term	2006	2008	City	Arts organizat
5. Ensure that Santa Fe maintains an atmosphere that is entertaining and attractive to young, creative people.					

Cultivate Santa Fe
Summary of Marketing Recommendations

Recommendation	*Priority*	*Start Timing*	*End Timing*	*Primary Responsibi*
1. Establish specific marketing roles for each organization involved in economic development.	Short term	2004	2004	City, SFEDI, Cha
a. The City and the marketing contractor should adopt this marketing strategy	Short term	2004	2004	City, SFED
b. The City should commit to a minimum 3-year contract with its marketing contractor	Short term	2004	ongoing	City
c. The City should tie the contract with the marketing contractor to specific performance metrics	Short term	2004	annually	City
2. Create and adopt a single economic development brand.	Short term	2004	2004	City, SFED
a. The City should strongly consider the brand identity "Creative Spirit of Santa Fe"	Short term	2004	2004	City, SFED
b. The City should ask its marketing contractor to hire a design firm to develop a logo and style guide	Short term	2004	2005	City, SFED
c. Distribute the style guide to all city departments, schools, media, non-profits, and arts organizations	Short term	2004	2005	City, SFED
Encourage as many organizations as possible to adopt the style guidelines in their own marketing				
The more organizations adopting the same marketing, the more powerful Santa Fe's brand will become				
3. Gain a thorough understanding of the target audiences.	Short term	2004	ongoing	City, SFED
a. Based on the Target Industry Report, develop an audience profile for each target	Short term	2004	ongoing	SFEDI
b. The City, its marketing contractor, and design firm should consider th audience profiles when developing the logo, style	Short term	2004	2005	SFEDI, City
c. The marketing contractor, SFEDI and the Chamber should identify target industry "champions"	Short term	2004	ongoing	SFEDI, City, Cha
d. Invite target industry champions to share their industry knowledge with the economic development team	Short term	2004	ongoing	SFEDI, Cham
4. Gain local media support for economic development.	Short - Mid	2004	2006	City, SFEDI, Cha
a. Reconvene the project advisory committee	Short term	2004	2004	City
b. Ask committee members to volunteer to become media champions, to write an article, or interview	Short term	2004	2004	Advisory Comm
c. Meet with local newspaper editorial boards and schedule a series of op/ed pieces on ED	Short term	2004	2005	Advisory Comm
5. Launch an internal economic development marketing campaign.	Short - Mid	2004	2006	SFEDI, City
a. The City and its marketing conatractor should review the internal marketing recommendations and Marketing Guide	Short term	2004	2004	SFEDI, City
b. Identify local volunteers to comprise an internal marketing team	Short term	2004	2004	SFEDI, City
c. Design marketing contractor's Web site to incorporate new brand identity, logo, style, and target industries	Short term	2005	2005	SFEDI

ECONOMIC DEVELOPMENT DIVISION
Strategy for Implementation

Mission:

The mission of the Economic Development (ED) Division of the City of Santa Fe is to achieve long-term sustainable and focused economic growth by building a diverse, innovative economy with high-wage, high-impact jobs that provide opportunity and prosperity for the City's residents, businesses and entrepreneurs.

Objectives:

-Diversify the Santa Fe Economy with an emphasis on high wage jobs[1] and career paths.
-Pursue overall affordability where local wages can support living in Santa Fe (reduce leakage[2]).
-Bolster Santa Fe's leadership position and/or potential in innovation.

Background:

More than four years ago Angelou Economics produced a report for "Cultivating Santa Fe's Future Economy." The implementation strategies in this plan are principally derived from that report. In order to effectively institute the recommendations contained in the Angelou Plan the Economic Development Division has worked to outline a process for vetting potential projects. The process is designed to be fair, easily understood and transparent to members of the community.

Angelou Economics calls for the plan to be a 'living document,' and updated as conditions change. To that end, the Economic Development Division has held a series of key informant interviews and a series of professionally facilitated seminar meetings with input from members of the local business and economic community. The values and priorities outlined in this implementation plan were discussed and approved by attendees at these meetings. The implementation plan is designed to be driven by measurable, achievable outcomes in several of the target industries identified in the Angelou Plan.

Desired Outcomes:

The Economic Development Division will work to foster a creative and innovative cultural economy. Specific economic goals that have been identified are as follows:

- Create and attract a greater number of high-wage jobs. This will not be to the exclusion of supporting emerging business opportunities in focused sectors that would lead to high wage jobs, but may not start out with high paying jobs. This will give more of Santa Fe's population the ability to live and work in the community.
- Ensure that Santa Fe has a skilled and competitive workforce to support innovation and key economic base jobs[3] and primary industries[4]. This includes creating and expanding accessible career paths for local youth. Economic base jobs and primary industries are jobs and industries that derive fifty percent or more of their sales from outside of New Mexico and thus expand the local economy.
- Recruit and retain local talent by making professional opportunities in the area available and better understood in the community.
- Improve the climate for doing business in Santa Fe. This includes streamlining the processes of permitting, licensing and other regulatory requirements. The ED division also intends to celebrate innovation and success in leading local businesses.
- Improve the business infrastructure[5] in Santa Fe. This means working regionally to ensure easy, low-cost access to services, utilities, transportation and other key means of support for success in business and community development.
- Develop stronger working partnerships in the region. This means actively engaging key partners in projects and initiatives on a regular basis in order to maximize community input, expertise, support and communication.
- Promote a green and sustainable Santa Fe.
    - Actively promote and stimulate businesses and services consistent with the Sustainable Santa Fe Plan. This will include clean renewable energy, water conservation and waste reduction technologies.
    - Promote and support projects, developments, and initiatives with sustainable infrastructure[6] and that are consistent with the Sustainable Santa Fe Plan.
    - Cultivate and work to develop a green collar workforce[7] to support the clean renewable energy industry as well as both the new and retrofitting of buildings, sites and infrastructure to be more sustainable.

Division Work:

Staff will work consistently with partners on a regional and collaborative approach to economic development. The Chamber of Commerce, Santa Fe Business Alliance, Santa Fe County, the Museum Foundation of New Mexico, Creative Santa Fe, the Santa Fe Community College, SCORE, the Santa Fe incubator and local venture capital firms will all be key partnerships to maintain and strengthen. A responsive, cooperative, customer service oriented approach will be the guiding principle behind all work done by staff.

Staff work will include:

- Project Management (Site development, workforce training program development, business support program development and management, etc.)
- Business Retention, Expansion[8] and Passive Recruitment[9] (Incentive analysis, site location, funding facilitation consultation, strategic assistance, program referral, etc.)
- Marketing (Outreach, production of collateral materials, workshops, etc.)
- Actively Soliciting Proposals to meet community needs. (Proposals can come via our partners including the SF Chamber, the SF Alliance, the State Economic Development Department, staff, Councilors or from other sources.)
- Streamlining Business Processes (Licensing, permitting, etc.)
- Contract Management (Business support services, advocacy, etc.)
- Community and Business Relations (Staff will make regular visits to businesses to gain a firsthand understanding of the industries operating in the region and the challenges they face. During these visits staff will promote awareness of City and State economic development opportunities, policies and capabilities.)

Staff will visit approximately 50 businesses per year or approximately two businesses per week to discuss potential business development resources with each company. The resources that will be discussed will be but not limited to alternative financing programs (i.e. City's Small Business Loan Fund), technical assistance programs (i.e. SF Incubator, SCORE and SBDC programs) and State incentives. Staff will provide a quarterly report containing the following information:

- Number of Companies Visited
- Size of Portfolio (Number of Potential Company Expansions, Start-ups and Recruitments)
- Number of Companies Expanded, Started or Recruited
- Overview of Companies Expanded in Target Sectors, Number of Jobs, Average Wage and Capital Investment
- Progress on the Infrastructure Project implementation.

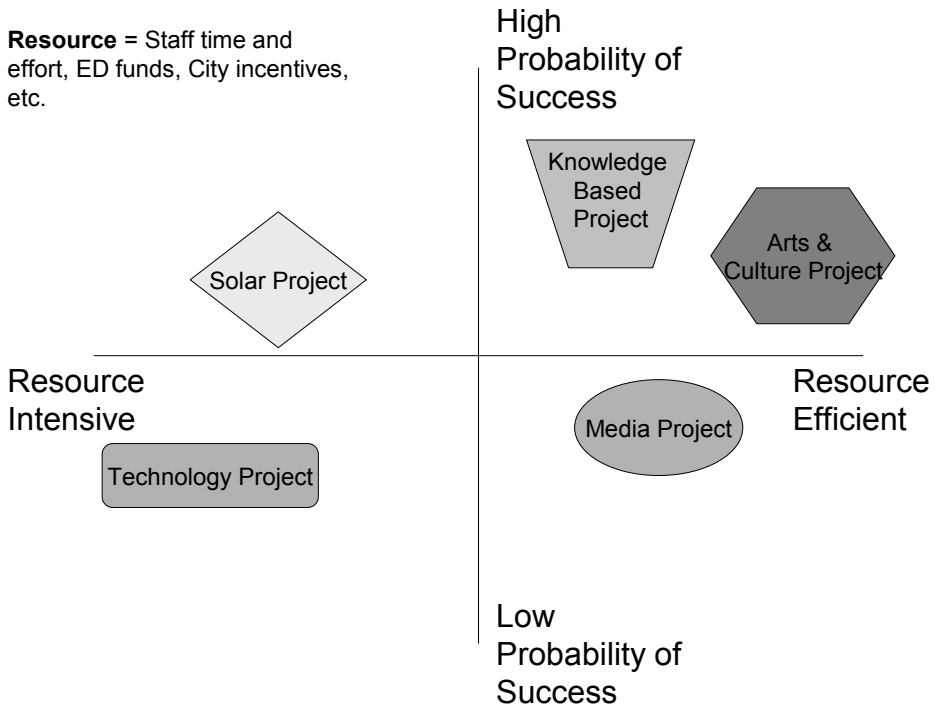
The Economic Development Division will take a proactive role in engaging a wide range of regional partners in collaborative efforts to benefit the economy. Emphasis will be placed on getting the right partners to cooperate on each project so that work can be focused on achieving measurable outcomes. For example, the Santa Fe Community College will be a key partner in workforce development and the Santa Fe Chamber of Commerce will be a key partner in business development.

Methodology:

The implementation strategy outlines a process for evaluating projects and proposals that meet agreed upon Economic Development Goals. Staff work will be focused along these guidelines:

- The Economic Development Division will focus efforts in a few strategic areas in order to effectively use limited resources. Projects will be outcome driven[10] with an emphasis on getting the greatest return for the investment of City resources.

- Work will be focused along three tracks – business development, workforce development and site & infrastructure development.



- Staff will work to streamline the process of providing services. Duties and provision of services will be aligned to best utilize resources, time and knowledge of staff.

- Significant effort will be made to provide good customer service and communication. The Division will be accessible to the community and work to ensure clear communication.

- Economic development activities will be regionally oriented with an emphasis on working in partnerships. Anticipated partners will include organizations such as the State of NM, the New Mexico Economic Development Partnership, the Santa Fe Community College, Santa Fe County, the Santa Fe Chamber of Commerce, the Santa Fe Alliance and the Santa Fe Incubator.

- The portfolio of projects will be organized with an investment/venture capital approach[11]. The portfolio will endeavor to balance safe bets and risky bets with an understanding that risky projects have a greater chance of failure but may yield the greatest returns. It is expected that applications for economic development projects, which may or may not solicit funding from the Economic Development fund, will be made throughout the year. All projects will be evaluated within the context of the current portfolio, as well as by taking into consideration pending applications. As staff will be working consistently with potential applications, there will be some preliminary assessment of where new applications will fall within the portfolio management spectrum. It is expected that the investment by the City will fall largely into projects with a high probability of success and efficient use of resources. To manage this portfolio, staff will work closely with projects and continually assess their progress toward meeting agreed upon objectives.

Venture Capital Portfolio

- Projects will be outcome driven and aligned with SMART Goals whenever possible. That is, goals that are - Specific, Measurable (data), Aggressive but Achievable, Relevant to Mission, and Timebound (not just open ended).

- During the working period and upon completion, each project will be assessed in order to make adjustments and improve outcomes. There will be a continuous feedback loop where project impact, strengths and weaknesses will be analyzed and any necessary corrections will be made.

Goals & Measures:

The goals and measures will be cumulative and cover a three year period.

1) Facilitate and assist in the creation of 900 high wage, economic base jobs (see definitions).

2) Facilitate the creation of 36 business expansions, startups, retention or recruitments to the Santa Fe region.
3) Increase the average wage in the Santa Fe region from $14.90 per hour to $15.90. This approach acknowledges and emerging trend in employment where employees contract to work on specific projects and may not be in salaried positions.
4) Complete or develop at least one infrastructure project per year. For example, an Arts & Cultural District[12], Mainstreet Program[13], telecommunications network plan, implementation of an Airport Master Plan, and expansion of solar industry capacity.
5) Facilitate and assist with the increase and/or creation of workforce career pathways and skill levels in targeted industry sectors by developing up to two workforce development programs. This will largely be accomplished by working with our local partners, including the SFCC, Santa Fe Public School District and the Northern Area Workforce Development Board.

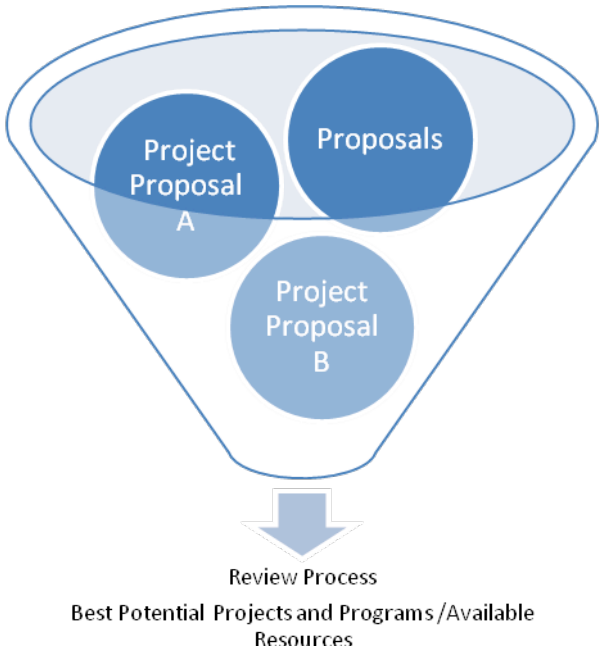
Targeted Sectors for Growth and Development:

Economic development activities will focus on targeted industries identified in the Angelou Plan and refined through the recent economic development seminar meetings. Targeted sectors are identified as follows:

- Media (Film, Publishing, Journalism, Video Game Production, etc.)
- Green – Consistent with Sustainable Santa Fe Plan and including: Clean renewable energy (with a focus on the solar industry), water conservation, waste reduction technologies and outdoor and recreational activities and equipment.
- Technology (Biotech, Nanotech, Software design, etc.)
- Knowledge Based Enterprise (Research and Development, Think Tanks, Financial Services, Consulting, Public Policy, etc.)
- Arts & Culture (Artisans, Fine Artists, and Cultural Heritage as described in the City's Cultural, Arts and Tourism Plan.)

Request for Proposal Versus Unsolicited Proposals:

The Economic Development Division anticipates two processes to generate projects and programs that will meet the Economic Development Implementation Strategy. These two processes reflect the nature of economic development work. The first will rely on generating proposals in response to an annual request for proposal and the second will allow for unsolicited proposals for economic development projects that may emerge during the course of a year.



1. *Request for Proposals* – Each year the staff will prepare a Request for Proposal (RFP) for services and/or programs that support local economic development efforts. Typically, these RFP's will allow for three years worth of contracting, subject to funding availability and successfully meeting the agreed upon outcomes

for a particular Scope of Work. These types of RFP's will focus on support services, such as those provided through the Santa Fe Incubator and SCORE and the management of the Santa Fe Loan Fund. These are services paid through the Economic Development Fund, which uses the 1% of the State's share of the GRT as its funding source.

2. *Unsolicited Proposals* – At any time, proposals may be submitted for projects that must meet the Local Economic Development Act. Such proposals may request funding through the EDF, below market rate rent for buildings and/or other types of incentives. These incentives may include fast tracking through the City's various review processes and/or favorable financing or other incentives such as Industrial Revenue Bonds (IRB's). Staff will work closely with organizations and/or entities seeking such support well in advance of an actual application for assistance. The process for evaluating these applications is the same as for those submitting proposals in response to a Request for Proposal.

Process for Evaluating Projects, Proposals and Incentives:

The process is designed to make project, proposal and incentive evaluation fast, easily understandable, transparent and accessible to the community. It is a way for staff to fully vet projects or incentive proposals and thereby determine the allocation of money, staff time and effort. The following illustrates how the evaluation process will consider multiple projects and focus efforts to those with the best potential outcome.

Stage 1 – Economic Development Target and Values Assessment

Staff will assess the project/proposal by applying the following values filters:

A. Environmental Footprint[14] (water, power, emissions etc)
B. Wages and Benefits[15] (Is it possible to live and work in Santa Fe?)
C. Innovative Position/Potential[16]
D. Local[17] (Does it fit with the City Different? Does it enhance the cultural fabric? Is it homegrown? Doest it provide positive impacts to local Santa Fe residents)

The project targets will be assessed qualitatively using a check mark system. When reviewing the project, each target met will be assessed and checked in the project evaluation chart below.

•

Stage 2 – Initial Business Plan/Proposal Review

- Staff will meet with representatives of a project/proposal and work to understand the proposed business plan and/or proposal, identify potential problems, discuss potential resources, and answer any questions.

- Staff will perform an initial evaluation to ascertain the plan strengths and weaknesses. Financial solvency, community need, growth potential and environmental footprint will also be evaluated.

- Staff will work with representatives to match them with appropriate economic development resources. Staff will also ensure that all proposals are in compliance with the State's enabling legislation the Local Economic Development Act[18] which in Santa Fe is the Economic Development Plan Ordinance.

Cost-Benefit Analysis: Economic Development projects will also include a cost-benefit analysis as required by the city's (11-11.1) Economic Development Plan Ordinance. In accordance with the Economic Development Plan ordinance, the projects and/or incentive proposal must provide a return on investment over a 10-year period that recoups the value of the assistance provided by the city to the project. The return on investment shall be of value and may be paid in money, in-kind services, jobs, expanded tax base, property or other thing or service of value for the expansion or improvement of the economy.

The cost-benefit analysis or impact analysis will measure both direct and indirect impacts in accordance with 11-11.9 of the Economic Development Plan ordinance which will include but is not limited to the following:

- Jobs
- Pay scale of jobs
- Anticipated impact of project on local tax base
- Anticipated impact of project on local school system

- Assistance in providing affordable housing to employees or to the community at large may qualify

If a proposal requires funds of less than $30,000 staff will make a recommendation to the City Manager and move forward. Quarterly reports will be made to the BQL on these projects. If the proposal requires funds of more than $30,000 staff will refer the project/proposal to the Economic Development Review Sub-Committee (EDRC) with a recommendation.

Staff will utilize the following target industry evaluation chart to map the benefits and impacts of a project/proposal, The system of checkmarks is designed to provide a quick overview of the project's applicability to the target industry areas and the types of program and/or assistance needed for a particular business plan:

Target Industry Evaluation Chart:

	Business Development	Workforce Development	Sites & Infrastructure
Targets			
Media			
Green			
Tech			
Knowledge Based Enterprise			
Arts & Culture			

The project will also be assessed whether it meets the city's values as defined in the city values filters chart below. The values will be assessed using the following quantitative measures on a scale of 1-3 where three is exceeds values and 1 does not meet values. Use of this scale will provide a quantitative comparison between projects and provide an initial assessment of a proposed project's ability to address agreed upon local values:

3- Exceeds Values Criteria
2 – Meets Values Criteria
1 – Does Not Meet Values Criteria

City's Values Filters Chart:

	Business Development	Workforce Development	Sites & Infrastructure
Values			
Low Environmental Footprint			
High Wages & Benefits			
Innovative Position/Potential			
Local			

Stage 3 – EDRC Review
The EDRC will review the staff recommendation and assess the project/proposal against the values filters, desired outcomes and financial feasibility. The EDRC will then make its recommendation to the Business and Quality of Life Committee (BQL).

Stage 4 – BQL Review
BQL will review the EDRC recommendation and assess the project/proposal against the values filters[19], desired outcomes and financial feasibility. BQL will then make its recommendation to the City Council OR reject the project/proposal.

Stage 5 – Council Review
The City Council will assess the project/proposal against the values filters, desired outcomes and financial feasibility. The City Council will approve or reject the project/proposal.

Project/Proposal Evaluation Flow Diagram

Requests for Proposals:

RFPs will be focused on getting results rather than outlining step by step procedures. This will allow for maximum input and creativity from RFP responders. Staff will evaluate RFP responses according to how well each proposal will meet the desired economic development outcomes.

The timeline for RFPs to be issued will be no more than 30 days after approval of the implementation plan by City Council. The RFPs will be reviewed and evaluated by a committee as required under the City's procurement code. The RFPs will be evaluated on how the respondents will meet the desired outcomes. RFP awardees will receive a contract for one year and two one year extensions.

Staff will work with RFP respondents to get more information, clarify how the work will be done and what outcomes need to be reached. For RFPs greater than $30,000 respondents will present their proposal to the EDRC. Staff will provide the EDRC with a funding recommendation.

Staff will administer contracts according to the scope of work and timeframe agreed upon in each contract. If necessary, at the discretion of the Division Director and Department Director, timeframe extensions and contract revisions may be made.

DEFINITIONS

[1] **High Wage Jobs** – In the State of New Mexico these are defined as jobs that pay a salary of $40,000 and above.

[2] **Leakage** – The loss of revenue in taxes and spending and the loss of talent that occurs when people cannot afford to work and live in the community.

[3] **Economic Base Jobs -** Economic base jobs are jobs in primary industries. An economic base job is any job that produces a product or service that is sold outside the community and thus brings in outside money. Most economists believe that the economic base job is the most important factor to a healthy economy.

[4] **Primary Industries** – Primary industries are defined on the same principle as economic base jobs. They are industries that derive fifty percent or more of their sales from outside of New Mexico and thus bring in new money expand the local economy. Businesses that bring in outside money are called primary industries, and they produce the coveted "economic base" jobs.

[5] **Business Infrastructure** – The basic facilities, services, and installations needed for the effective functioning of businesses in the area. This can include transportation and communications systems, water and power lines, as well as public institutions including schools and post offices.

[6] **Sustainable Infrastructure** – Basic facilities, services and installations which take care of the needs of the present generation without compromising the needs of future generations.

[7] **Green Collar Workforce** – A workforce employed in the environmental segment of the economy. Green collar workers include professionals such as conservation movement workers, environmental consultants, environmental or biological systems engineers, LEED's certified building architects, holistic passive solar building designers, solar energy and wind energy engineers, alternative energy vehicle engineers, organic farmers, environmental lawyers, ecology educators, and eco-technology workers. They also include vocational or trade-level employment: electricians who install solar panels, plumbers who install solar water heaters, and construction workers who build energy-efficient LEED certifed buildings, wind power farms, or other clean, renewable, sustainable future energy developments.

[8] **Business Retention and Expansion** – The retention of local businesses located in the Santa Fe region that may leave the community. Expansion is assisting local businesses in the Santa Fe region in growing their operations, employment or sales which results in more jobs and capital investment in Santa Fe.

[9] **Passive Recruitment** – Responding to inquiries and opportunities from businesses considering locating in the Santa Fe area but not actively marketing businesses to locate in Santa Fe from outside of Santa Fe.

[10] **Outcome Driven** – Guided by what results are or can be achieved rather than the method or process of working towards results.

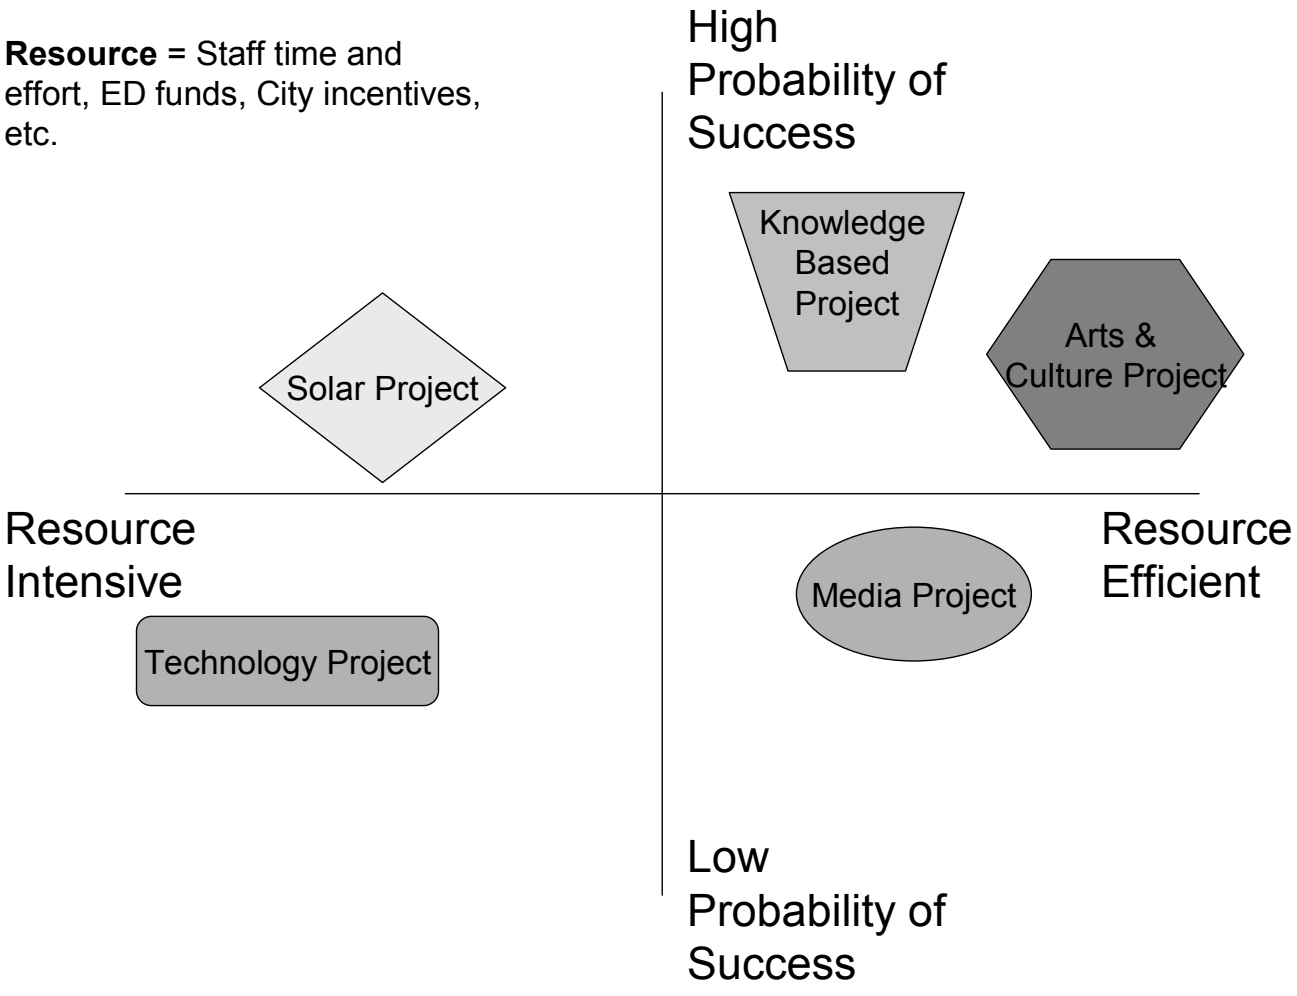
[11]**Investment/Venture Capital Approach** - An approach similar to that taken by investment and venture capital managers wherein resources are balanced between calculated risky and safe ventures where safe ventures produces lower returns on investment and higher risk ventures produces higher returns on investment. Investments are also spread across different areas to achieve stability through diversity.

[12] **Arts & Cultural District** – A State program administered by the Mainstreet program which is designed to enhance local economic development opportunities, in designated districts, by placing an emphasis on indigenous arts and culture. Applying communities develop a plan to support, develop and enhance the selected district's arts and cultural opportunities as a niche for economic development.

[13] **Mainstreet Program** - New Mexico's MainStreet Program is a grassroots economic development program that assists communities in revitalizing their traditional commercial neighborhoods. Mainstreet works to create an economically viable business environment while preserving local cultural and historic resources.

[14] **Environmental Footprint** – A project/proposal's potential impact on the local environment and ecology including water and power use, emissions, amount of solid waste generated, impact on local vegetation and wildlife and traffic impact.

[15] **Wages and Benefits** – A project/proposal's potential impact on or offering of employee pay and benefits including but not limited to retirement, healthcare, educational benefits, flexible scheduling, community service, support and involvement.



[16] **Innovation Position/Potential** – A project/proposal's potential impact on Santa Fe's innovation in an industry or the possibility of increasing the creative and/or innovative impact on the industry.

[17] **Local** – A project/proposal's homegrown origin or its impact on the cultural fabric, identity i.e. how it fits with the 'City Different,' and/or provides positive economic impacts to residents of Santa Fe,

[18] **Local Economic Development Act** – The State of New Mexico's enabling legislation which allows local governments the ability to use public money for private enterprises (including non-profits) in the form of land, building and infrastructure in order to foster economic development. This legislation allows public investment in private enterprises without violating the anti-donation clause of the New Mexico State Constitution

[19] **Values Filters** – The method for evaluating projects according to what is important to the local community's priorities.

RE: Las Soleras <u>Master Plan Amendment</u> Application – change Zoning Districts for Master Plan Parcels 19, 20, 21, 23, 24 and 26 to a uniform C-2 District and make adjustments to Rambla width in keeping with the North side of Beckner Road.

Dear Mr. Esquibel,

This letter is respectfully submitted on behalf of Nexus BRPJV LLC (100% owners of Beckner Road Partners) for the purpose of applying for an amendment to the Las Soleras Master Plan per the SFCC 14-3.9 – MASTER PLANS. This application is a companion to both a General Plan Amendment and Rezoning application needed to facilitate the thoughtful development of Las Soleras Master Plan Parcels 19-26.

Parcels 19-26 are located between Beckner Road, and I-25 as shown in the aerial map below:

PURPOSE AND INTENT:

The current Master Plan zoning districts along with the zoning districts proposed with this application are found in the table below. The combined area of Parcels 19 – 26 is 57.63 acres.

Table I. ***Las Soleras Parcels 19-26 proposed Land Use Classification/Zoning District***

Parcel	Acres	Current Land Use Classification/Zoning District	Proposed Land Use Classification/Zoning District	Address Santa Fe, 87507
19	9.11	Transitional Mixed Use/MU	Community Commercial/C-2	5021 Rail Runner Loop
20	10.70	Business Park/BIP	Community Commercial/C-2	5091 Rail Runner Loop
21	4.70	Office/C-1	Community Commercial/C-2	5140 Rail Runner Loop
22*	9.12	Community Commercial/C-2	Community Commercial/C-2	5090 Rail Runner Loop
23	7.27	Office/C-1	Community Commercial/C-2	5040 Rail Runner Loop
24	6.18	Office/C-1	Community Commercial/C-2	4354 Beckner Road
25*	7.37	Community Commercial/C-2	Community Commercial/C-2	4552 Beckner Road
26	3.48	Office/C-1	Community Commercial/C-2	5210 Rail Runner Loop

**No change in Land Use Classification or Zoning requested*

The purpose of this application is to amend the Las Soleras Master Plan Zoning designations for Parcels 19, 20, 21, 23, 24, and 26 allowing for a uniform C-2, General Commercial Zoning District across parcels 19-26. The intent is to allow for the adjustment of existing lot lines as to accommodate future development in a thoughtful and organized manner as opportunities present themselves. The consistent C-2 zoning will also accommodate three story office and retail services including restaurants. This flexibility in use will provide an opportunity to attract business and commercial uses offering higher salaries and services to the surrounding neighborhood.

No Development Plan approval is requested with this application. However, the applicant anticipates a range of possible uses as allowed in a C-2 General Commercial Zoning District. These possible uses include medical office, office, retail/services, food & beverage, residential and hospitality projects. Per the Las Soleras Master Plan, a defined amount of development within parcels 19-26 will also trigger construction of the Las Soleras bridge crossing at Arroyo de Los Chamisos.

The rezoning of parcels to a C-2 District will not significantly change the range of uses originally conceived for these parcels, but instead allow for additional density and needed flexibility in how these uses are located and arranged.

Finally, this amendment also proposes a house keeping item in reducing the Rambla width from 90’ to 45’ to match the Rambla width as granted in the most recent Las Soleras Master Plan Amendment approved in 2019. The larger Plaza open space area will remain as is but this amendment request flexibility to locate the plaza anywhere along the Rambla between Beckner Road and Rail Runner Loop Road. See the Conceptual Test Fit for more perspective on this request.

BACKGROUND:

Since first approved in 2009, the Las Soleras Master Plan has seen a significant amount of much needed residential construction with more in the works. This emerging residential community is driving a need for expanded commercial and retail services necessary to serve the local community. Conversely, this residential base has the capacity to support new business growth that will bring employment opportunities to the area. The Presbyterian Hospital is one example of this. Another example is the new Nexus Medical Office and Cancer Center opening July 2024 - just east of parcel 19. Allowing parcels 19, 20, 21, 23, 24 and 26 to be zoned as C-2 General Commercial

will provide needed flexibility across the site in attracting additional employment, commercial uses and services desired for the area.

It is also important to note portions of the Master Plan did not materialize as originally conceived - including the location of Rail Runner Road which was constructed almost 900 ft. west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within parcels 19 -26. This loop road realignment has left the lot configurations of parcels 19 – 26 contrary to efficient development. A uniform C-2 zoning across parcels 19-26 will make the relocation of lot lines an administrative process enabling the site parcels to be easily configured to the needs and sizes of a variety of uses.

A future Rail Runner rail stop was envisioned on Las Soleras Master Plan parcel 20 to serve area residents and businesses. However, for the New Mexico Department of Transportation to support such a stop, a base level of ridership demand must be established. A uniform C-2 zoning district could accommodate uses that eventually establish this base level of ridership.

ADJACENT USES:

Las Soleras Parcel 18B is immediately East of the site and is zoned C-2 General Commercial. The Nexus Medical Office Building that includes a Cancer Center is currently under construction on 18B and will be open for business in July of this year. More Medical Office Development is likely and especially within a C-2 Zoning district.

Las Soleras Parcel 27 is immediately to the West of the site and is classified as C-1. It is partially developed with the Presbyterian Medical Services Office Building recently opened in late 2023.

Interstate Highway 25 and its associated Right of Way borders the entire southern boundary of the site.

Beckner Road borders the entire northern edge of the site. Uses North of Beckner Road include the Spectrum Senior Living; the approved, but not yet constructed, Havenly multi-family project; and the southwest corner of the Estancias de Las Soleras residential neighborhood developed by Pulte Homes. These developments are classified as C-1; R21; and R-6 respectively.

Please see the aerial on Page 1 of this application letter for more information.

CONCEPTUAL TEST FITS:

The applicant has developed and included with this application a Conceptual Test Fit land plan. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities.

The Conceptual Test Fit also illustrates the type of potential development that could result from this request.

UTILITIES:

Water Supply – An existing 12" water line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual water plan based on the Conceptual Test Fit and the Las Soleras Master Water Plan is included with this application.

Sanitary Sewer - An existing 10" sewer line is installed in Beckner Road and is more than adequate to accommodate the proposed amendment. A conceptual sanitary sewer plan based on the Conceptual Test Fit and the Las Soleras Master Sewer Plan is included with this application.

Dry Utilities – Electric, communication, and gas lines are all available with adequate capacity to serve the site. Thanks for your review and consideration of this application.

Please contact me with any questions or additional requests for information at 832-338-0364 or brian.nenninger@orion-west.com.

Sincerely,

Brian Nenninger, P.E.

Las Soleras Parcels 19-26 - Master Plan Amendment Application
Approval Criteria Responses
February 12, 2024

The proposed amendment to reclassify Las Soleras Master Plan parcels from Transitional Mixed Use/MU, Business Park/BIP, and Office/C1 to Community Commercial/C-2 is summarized in Table I. by parcel.

Table I. ***Las Soleras Parcels 19-26 proposed Land Use Classification/Zoning District***

Parcel	Acres	Current Land Use Classification/Zoning District	Proposed Land Use Classification/Zoning District	Address Santa Fe, 87507
19	9.11	Transitional Mixed Use/MU	Community Commercial/C-2	5021 Rail Runner Loop
20	10.70	Business Park/BIP	Community Commercial/C-2	5091 Rail Runner Loop
21	4.70	Office/C-1	Community Commercial/C-2	5140 Rail Runner Loop
22*	9.12	Community Commercial/C-2	Community Commercial/C-2	5090 Rail Runner Loop
23	7.27	Office/C-1	Community Commercial/C-2	5040 Rail Runner Loop
24	6.18	Office/C-1	Community Commercial/C-2	4354 Beckner Road
25*	7.37	Community Commercial/C-2	Community Commercial/C-2	4552 Beckner Road
26	3.48	Office/C-1	Community Commercial/C-2	5210 Rail Runner Loop

**No change in Land Use Classification or Zoning requested*

SFCC 14-3.9 (D) MASTER PLAN AMENDMENT APROVAL CRITERIA; CONDITIONS

(1) Necessary Findings
(Ord. No. 2014-31 § 5)
Approval or amendment of a master plan requires the following findings:

(a) the master plan is consistent with the general plan;

Response: The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals are supported:

Policy 3-G-2: *There shall be a mix of uses and housing types in all parts of the city.*
Policy 4-1-G-2: *Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.*
Policy 4-4-G-4: *Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and*
Policy 4-4-G-6: *Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.*
Policy 9-2-G-1: *Promote diversification of the Santa Fe economy; and*
Policy 9-2-G-2: *Promote increased job opportunities with higher wages for Santa Fe residents; and.*
Policy 9-2-G-3: *Support retail uses that serve the needs of Santa Fe residents and workers; and*
Policy 9-2-G-4: *Develop and maintain an attractive climate for conducting business in Santa Fe; and*

Policy 9-2-G-5: *Promote small business.*

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of parcels 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of parcels 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

(b) the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;

Response: This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Parcels 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across parcels 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to

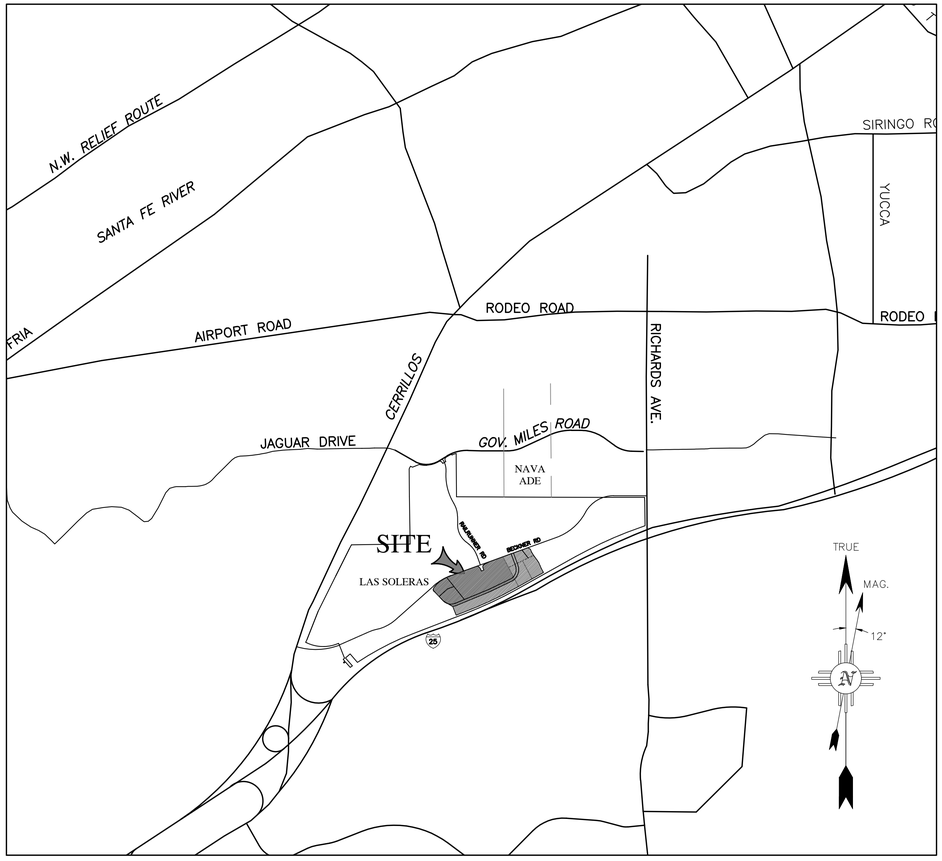
develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects.

(c) development of the master plan area will contribute to the coordinated and efficient development of the community; and

Response: This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of parcels 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System.

(d) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.

Response: The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.



The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request.

Las Soleras Core

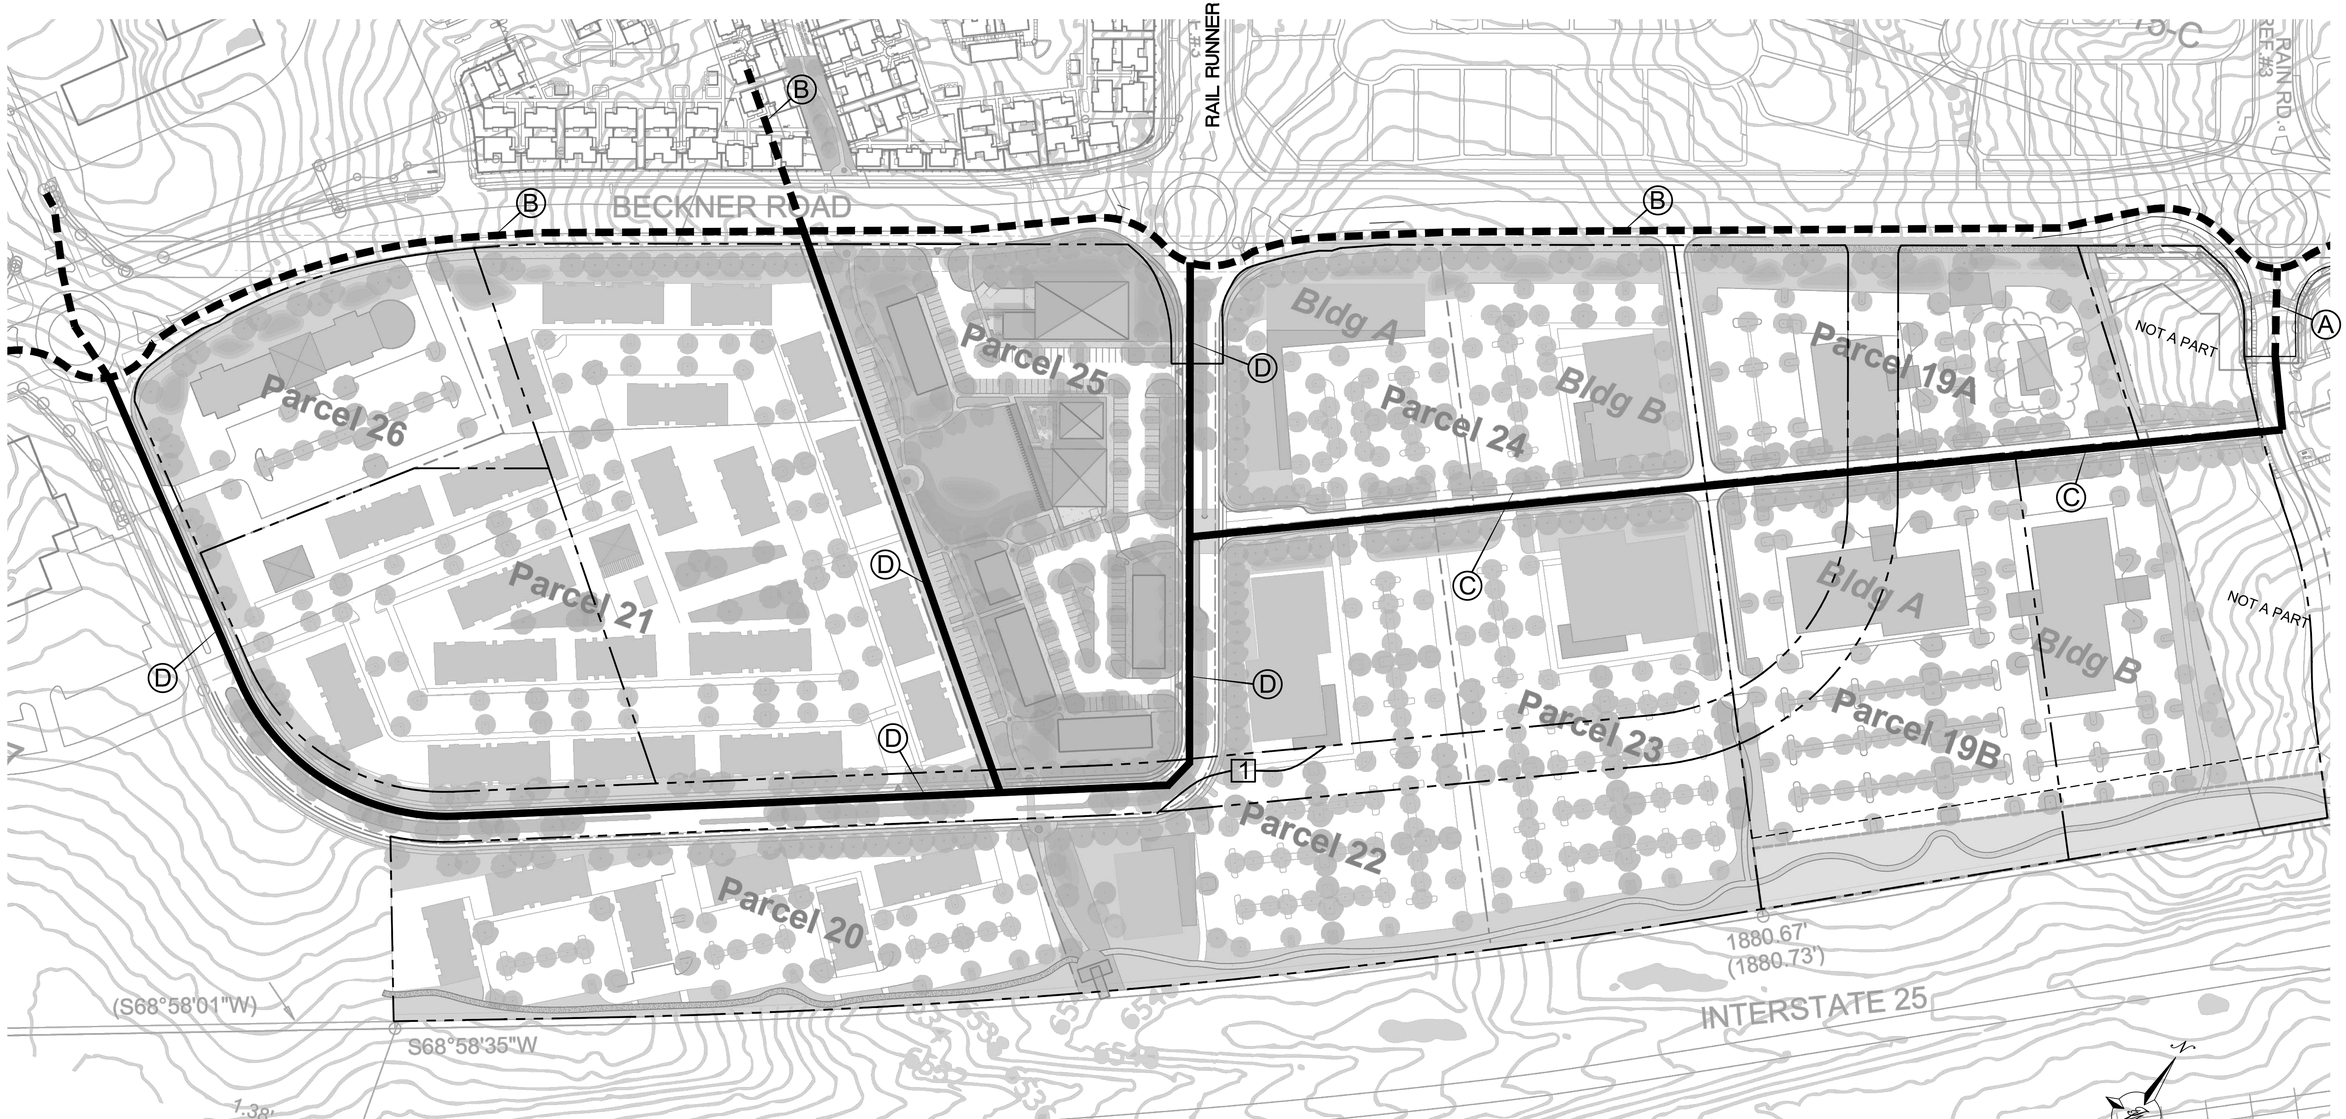
The Las Soleras Core is uniquely able to become the vibrant heart of southern Santa Fe. The Las Soleras Core is in an optimal location and size to host a variety of iconic neighborhood needs--a market, a restaurant, food-beverage outlets, neighborhood retail and commercial. Here is a conceptual look what the Core could be.

- Water harvesting along Becker and along Rail Runner Loop to capture stormwater to support a green edge of trees and native plants.
- Neighborhood Scale Market *(Size example: Kaune Market)*
- Food & Beverage *(Size example: Iconic Coffee)*
- Possible future road connection to east parcels would support an active engagement with lively Core
- Restaurant oriented toward "The Green" *(Size example: Rustica Resturant/SF Brewery)*
- The Long Zaguan would be a shady connector across the Green. An iconic feature with photovoltaic panels--conveying an embrace of art and environment.
- The Green repositions the required Master Plan parklet to be the heart of the Las Soleras Core. Where people can come to meet, eat, relax, and engage in small-scale community events such as music or recreation.
- Two-story buildings at the southern end of the Core would provide retail-commercial services spaces from which to serve the Las Soleras neighborhoods and south Santa Fe.
- The Rambla Trail system connects the Core with the surrounding residential neighborhoods, condominiums, senior living, apartments, office complexes, the regional hospital to the west. possible medical and education facilities, and a potential future rail raod station at I-25.

Las Solares Development Prototypes Data

Sept. 1, 2023

Notes: A. Test based on program and product prototypes



B. Applies CoSF development ordinance requirements

C. Test is for single story development.

D. Parking based on net lease (NL) of 10% reduction of gross square footage (GSF)

Opportunity: Consider asking CoSF to use a shared parking plan to increase density. Target would be for 10% shared of total provided.

Santa Fe, NM. 87501

RE: LAS SOLERAS 57 ACRE DEVELOPMENT
LAS SOLERAS PARCELS 19-26
WATER AND WASTEWATER LETTER

Dear Mr. Esquibel:

To ensure that the proposed General Plan land use classification of Community Commercial and associated proposed rezoning to a uniform C-2 district of the 57.63 acres of Las Soleras Master Plan parcels19-26 (located along the Southern edge of Beckner Rd between Las Soleras Dr and Walking Rain Rd) will not produce excessive demand on the existing water and sanitary sewer infrastructure in Beckner Rd, Tierra West LLC has prepared the following summary of existing water and sewer capacities and water and sewer flowrates for a conceptual design we are referencing as "Conceptual Test Fit A" for your review.

Sanitary sewer capacities were calculated assuming gravity flow along two of its segments – the segment from the roundabout at Las Soleras Dr to the roundabout at Rail Runner (along which the minimum slope is 0.73%), and another segment from Rail Runner to the roundabout at Walking Rain (along which the minimum slope is 1.05%). The capacity of the existing water main was calculated assuming an 11 ft/s flow velocity.

The capacity of both existing pipes was found to be sufficient to serve the property if developed per either the existing or proposed zoning, and the water and sewer flowrates for these conditions are summarized below.

For the first segment mentioned above (from Las Soleras Dr to Rail Runner), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 843 gpm with velocity 3.44 ft/s.

For the second segment mentioned above (from Rail Runner to Walking Rain), the capacity of the existing 10" SDR 26 PVC sewer was calculated at 1,011 gpm with velocity 4.13 ft/s.

The peak sanitary sewer flowrate calculated for the development assuming development per the existing zoning was 150 gpm, For design Test Fit Concept "A" it is 191 gpm,

Water discharge was assessed for the existing 12" ductile iron main in Beckner using an assumed velocity of 11 ft/s and was calculated at 2,693 gpm.

The peak water flowrate calculated for the development assuming development per the existing zoning was 167 gpm with average irrigation flowrate 5.79 gpm, for design Test Fit Concept "A" it is 212 gpm with average irrigation flows at 5.52 gpm,

If you have any questions or need additional information regarding this matter, please do not hesitate to contact me.

Sincerely,

Ronald R. Bohannan P.E

EARLY NEIGHBORHOOD MEETING NOTES

Project Name:	Las Soleras
Project Location:	4200 Beckner Road
Project Description:	Development Plan Amendment for Development Plan with Summary Plat/Lot Split for proposed 141-unit Apartment Complex
Applicant:	
Agent:	Orion West LLC
ENN Meeting Date:	14 November 2023
ENN Location:	Via Zoom
Application Type:	General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.
Land Use Planner:	Dan Esquibel
Attendance:	**City of Santa Fe:** Dan Esquibel **Developer Team:** Brian Nenninger (Agent), Maureen Mestas (Agent), Scott Herbert, Dave Delgado, Karl Sommer, Esq. **Neighborhood/Public:** 1 attendee. An unidentified neighbor who was on a non-video tile but did not identify him/herself or speak.

Notes/Comments:

14 November 2023/ 5:30 – 6:12pm Meeting

The meeting started at approximately 5:39pm. Roll call and introduction of those attending was held. Dan Esquivel indicated that he would like to wait an additional few minutes to allow others to log in. After a brief wait, the meeting continued without any additional attendees.

Brian Nenninger then introduced the Developer Team.

Brian Nenninger informed the group that this ENN is for the purposes of noticing a General Plan Amendment per SFCC 14-3.2; Las Soleras Master Plan Amendment per SFCC 14-3.9; Rezoning to a C-2 District per SFCC 14-3.5 of all parcels in the Las Soleras Master Plan; and a possible Planned Unit Development per SFCC 14-5.7 is proposed for Las Soleras Master Plan parcels 19 -26.

Highlights Brian shared during the presentation included:

The property is located within the 545 acre Las Soleras Master Plan Subdivision that was first created via an annexation ordinance in 2009. Since 2009 the Master Plan has been amended multiple times – the most recent being October 2019.

- Eight (8) existing legal parcels that together comprise 57.63-acres.
- Existing Zoning:

C-2: Two parcels
C-1: Four parcels
MU: One parcel
BIP: One parcel

- Master Plan Items that need to be "Cleaned Up."

Rail Runner Loop Road realignment to meet Rail Runner Road
Lot Line adjustments and resizing of parcels to better accommodate Commercial Users
Rambla open space design including location of "parklet."

The Applications that are being shared in the ENN are:

- General Plan Amendment Application
- Master Plan Amendment Application

Address Realignment of Rail Runner Loop Road
Propose modification to Rambla width.
Propose flexibility of "parklet" location along the Rambla
Discussion of Master Plat/Parcel Realignment

- Rezoning Application

Propose C-2 Zoning for eight parcels.

- Planned Unit Development (PUD) Application under consideration/discussion.

with City of Santa Fe

Brian wanted to take particular note that this is not an application for Development Plan Per the Santa Fe City Code. Qualified development/building construction will require separate Development Plan Applications, ENNs and Planning Commission Hearings.

He further stated that the proposed rezoning, along with the General Plan and Master Plan amendments lay the groundwork for better development needed to meet local market demands.

Those possible mix of uses for local market demand are:

- Neighborhood Commercial Retail, such as, Restaurants, Bakeries, Pubs, Coffee Shops, Marketplace/Grocery Coop, Copy/Printing, Dry Cleaning, Pharmacy
- Office (including Medical Office)
- Medical Education
- Multifamily Residential
- Hotel

Las Soleras Junction has transit-oriented improvements, specifically:

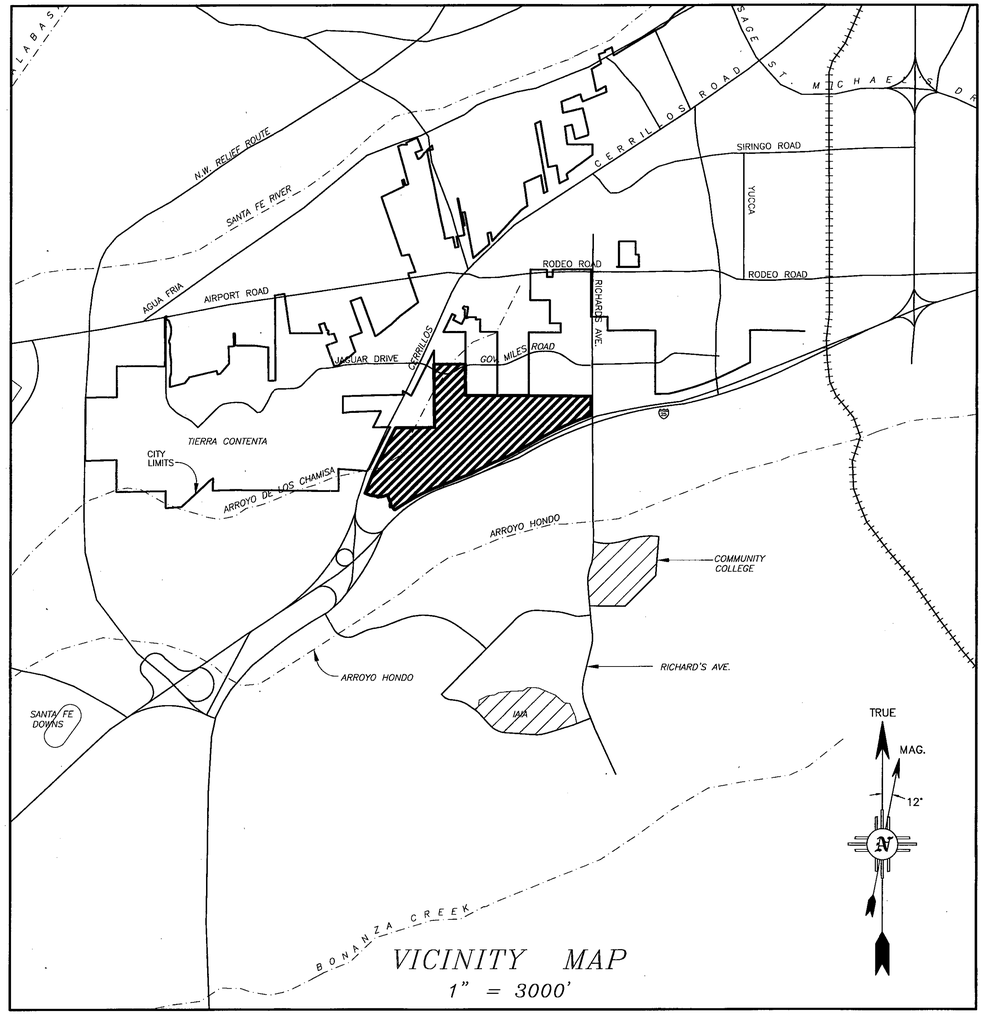
- Completion of Las Soleras bridge (triggered by 20 acres and 300,000 sf of development of parcels 19-26.)
- Further build out of Las Soleras trails system including the Rambla and "Parklet"
- Additional Bus stop/access on Rail Runner Loop Road
- Place holder for future Rail Runner Stop

Las Soleras Junction is a work in progress. Conceptual test fits to understand options for flow of pedestrians and vehicles within the site. Engineering and Design of Las Soleras Bridge to complete Las Soleras Drive from Cerrillos to Beckner. Utility and Traffic Study activity will be required. Design Guidelines are being developed to provide a cohesive, responsible, and pleasing experience for those who use and access the site. Guidelines will stay within the Santa Fe City Code and address, Architecture Concepts, Landscape Design, Lighting, Trails, Sidewalk and Roadway Connectivity to and within the site.

Brian then summarized the intention of the applications for this ENN, those key points being:

- Clean up issues in the Master Plan created from past developments/amendments. including the realignment of Rail Runner Loop Road with the relocated Rail Runner Road.
- Lay the groundwork for more effective use of parcels 19-26 through consistent zoning to allow for administrative lot line adjustments.
- Provide greater flexibility in providing neighborhood retail services including Food and Beverage. Uses brought to the site will be driven by the local and area market.
- Facilitate the completion of Las Soleras Drive and Bridge connecting Cerrillos to Beckner.

Brian opened the ENN for questions from the City Staff and neighbors. No one in attendance who was believed to be a neighbor asked to speak. No neighbor or other interested party was on the CHAT feature to ask questions.



There was a brief discussion between Dan Esquivel and Brian Nenninger about the status of the applications after the meeting. The meeting was then adjourned by Dan Esquivel.
