CITY OF SANTA FE

Date: January 3, 2025

To: Governing Body
Finance Committee
Quality of Life Committee

Via: Randy Randall, Interim City Manager Randy Randall (Jan 3, 2025 15:40 MST)
Paul Joye, Chief of Police Paul Joye (Jan 3, 2025 15:17 MST)

From: **Ben Valdez, Deputy Chief of Police** B. Valdez, DC (Jan 3, 2025 15:13 MST)

Subject: **Adult Detention Center Agreement**

Vendor Name: **Santa Fe County**

Vendor Number: **3906**

ITEM AND ISSUE:
Request for the Approval of the Inmate Confinement Agreement with the Santa Fe County for the Incarceration, Care, and Maintenance of Persons Charged with or Arrested for a Crime in the Total Amount of $4,800,000.00 for Four Years. (Ben Valdez, Deputy Chief of Police, bpvaldez@santafenm.gov)

1. Request for Approval of a Budget Adjustment Resolution (BAR) in the Total Amount of $600,000.

Action Requested: Approval of Inmate Confinement Agreement

BACKGROUND AND SUMMARY:
The City of Santa Fe does not maintain their own detention facility and depends on the County of Santa Fe to provide a facility for the incarceration, care and maintenance of persons charged with a crime, arrested for a crime in the City's jurisdiction and awaiting indictment or trial and sentenced to a term of imprisonment for crimes.

Under New Mexico law, a municipality may use the county jail within their jurisdiction for the confinement or punishment of offenders subject to the requirements imposed by law and the board of county commissioners (NMSA 1978, section 3-18-20).

Santa Fe County owns and operates a detention facility and is willing to house City's inmates as described in the agreement.

PROCUREMENT METHOD:
This service is exempt per NMSA 1978, Section 13-1-98(A)- procurement of items of tangible personal property or services by a state agency or a local public body from a state agency, a local public body or external procurement unit except as otherwise provided in Sections 13-1-135 through 13-1-137 NMSA 1978.

Agreement No. _____

AGREEMENT
FOR INMATE CONFINEMENT
BETWEEN THE COUNTY OF SANTA FE
AND THE CITY OF SANTA FE.

THIS AGREEMENT is entered into by and between Santa Fe County, New Mexico, a political subdivision of the State of New Mexico (hereinafter referred to as the "County") and the City of Santa Fe, a political subdivision of the State of New Mexico (hereinafter referred to as the "City").

RECITALS

WHEREAS, the City is in need of a facility for the incarceration, care, and maintenance of persons charged with, arrested for a crime in the City's jurisdiction and awaiting indictment or trial or convicted and sentenced to a term of imprisonment for such a crime; and

WHEREAS, under New Mexico law, a municipality may use the county jail for the confinement or punishment of offenders subject to the requirements imposed by law and the board of county commissioners (NMSA 1978, sec. 3-18-20); and

WHEREAS, the County owns and operates the Santa Fe County Adult Detention Facility (SFCADF) which has, from time to time, vacant bed space; and

WHEREAS, the County is willing to house City's inmates from time-to- time as set forth herein;

NOW, THEREFORE, IT **IS MUTUALLY AGREED** by both parties as follows:

1. **HOUSING OF INMATES.** The County agrees to house persons awaiting indictment or trial on behalf of the City from time-to-time as space is available in the County's SFCADF, upon the conditions and terms set forth below. The City agrees that any such person so housed in the SFCADF is either a person temporarily imprisoned while awaiting indictment or trial, or a person whose life is in imminent danger in the present place of incarceration, as specified in NMSA 1978, Sections 33-3-13 (1983) and 33-3-14 (1889), or a person who has been sentenced to a term of imprisonment for violation of City law, and the City agrees in any event that any persons housed at the SFCADF meet the minimum criteria established by these statutes and laws and agrees to compensate the County for housing inmates.

   The City shall provide SFCADF with all relevant records regarding any detainee to be housed at SFCADF. Illegal items and/or contraband that are found in a detainee's possession during the booking process will be confiscated

and turned over to the City for additional charges, disposal or destruction. The acceptance of a detainee shall only be effective upon an acceptance form provided by SFCADF being signed by the representative of the City delivering the detainee and the booking officer of SFCADF. The representative of the City delivering the detainee shall remain at SFCADF until the booking process has been completed and the determination made by SFCADF regarding whether or not to accept the detainee.

2. **COMPENSATION.** The City shall pay the County a cost of $220.00 per day for each full or partial calendar day for a City's inmate. The per day rate includes transportation (Article 6), Pharmaceuticals (Article 8) and staffing required for offsite care (Article 8). A "day" is a 24-hour period that begins at 12:01 and ends at 12:00am. SFCADF has the option to review and adjust their schedule of fees, based on current costs of the SFCADF at the time of this determination. Any updated schedule of fees is effective July 1st, of each calendar year. The City will be notified of the schedule of fees by the County no later than February of each calendar year and can terminate this agreement as outlined in Section 10. The City will only be assessed these costs for the incarceration/housing of individuals who are charged with violation of City offenses while housed at SFCADF. The total amount payable to the City under this Agreement, including gross receipts tax and expenses, shall not exceed one million two hundred thousand dollars ($1,200,000.00) per fiscal year. The total amount payable to the City under this Agreement, including gross receipts tax and expenses, shall not exceed four million eight hundred thousand dollars ($4,800,000.00). The City shall be responsible for tracking total amounts paid under this contract and notifying the County that this total amount has been paid. In no event will the County be paid in excess of this total compensation amount without this Agreement being amended in writing prior to costs in excess of this total amount being incurred. In the event this total compensation amount is reached, and the County is not paid, the County will not accept inmates on behalf of the City and the City must immediately remove its inmates from SFCADF, unless otherwise agreed to by the parties.

If additional services must be provided to a detainee, which will incur a cost for the City, SFCADF shall notify the City prior to providing said services, unless the provision of services is an emergency. An "emergency" is defined as a medical or mental health situation, a situation in which the provision of services is required to avoid health or property damage, or other situation which requires immediate attention to minimize danger or loss to any concerned. In the case of emergency additional services, the City shall compensate County fully and completely for the cost of such services. In the case of non-emergency additional services, The City shall have three business days from the day it receives notice from SFCADF's intention to provide such services in which to notify County that it does not approve providing such services. If SFCADF does not receive such notice of non-approval from the City within three business days, it shall be deemed that approval has been given.

3. **CONDITIONS OF HOUSING.** The County will house all of City's inmates consistent with SFCADF's prevailing policies, post orders and other routine practices, unless additional housing policies are specified by an appendix to this Agreement.

4. **INVOICES.** The County shall invoice the City for all persons housed at the SFCADF on a monthly basis and shall provide the City with a statement containing the names of persons housed, the dates of housing, the booking number, the total number of days billed, the medical costs incurred, if any, and the total inmate costs for the month. The City shall pay the invoice in full within 30 days of receipt. If an invoice is not paid within 45 days of the billing date, a late payment charge of 1.5% of the original bill shall accrue monthly If the total compensation amount is reached without payment, the County will cease accepting inmates from the City until the outstanding balance is settled.

5. **INMATE APPROVAL.** The SFCADF Warden or designee shall have the right to refuse housing for any reason to any person proposed for housing in the SFCADF.

6. **TRANSPORTATION.** City shall be responsible for all transportation costs for its inmates to and from SFCADF. In the event medical treatment is required outside of the SFCADF, the County shall transport persons for such treatment.

7. **INMATE POSSESSIONS.** The County will store and safe keep all inmate personal property which is removed from inmates upon arrival at SFCADF. The County shall not be responsible for items determined to be contraband or not listed during the time of booking. Any contraband found shall subject the inmate to a criminal investigation by the Santa Fe County Sheriff's Office; however, in the event new charges result, the City shall still be required to pay for housing so long as the inmate's sentence from the City has not been completed, or charges remain pending in the City's County.

8. **MEDICAL CARE.**

   A. **Routine on-Site Care.** The County shall provide routine medical care, routine dental care, and routine mental health care for City's inmates at the SFCADF.

   B. **Prison Rape Elimination Act.** SFCADF will comply with provisions of the Prison Rape Elimination Act of 2003 ("PREA"), codified at 42 U.S.C. Sec. 15601 et seq., and with all applicable PREA standards for preventing, detecting, monitoring and investigating any form of sexual abuse within SFCADF.

9. **TERM.** This Agreement shall become effective as of December 12, 2024, when agreed on by both parties. The term of this Agreement is four years unless earlier terminated pursuant to Paragraph 10 below (Termination).

10. **TERMINATION.** This Agreement may be terminated by either party upon 60 days written notice to the other party. However, a termination shall not be effective until such time as all of the City's inmates have been removed from SFCADF. By such termination, neither party may nullify obligations already incurred *for* performance or failure to perform prior to the date of termination. If notice of termination is given by either party, the **City must pick up its inmates within the 60-day written notice period or be subject to the compensation amount subject to the contract or amended contract in place at the time of termination beginning on the 61st day.** Upon termination of this Agreement, the County is under no obligation to accept the City's inmates.

11. **NO THIRD PARTY BENEFICIARIES.** This Agreement does not create, nor does either party to this Agreement intend to create any right, title, or interest in or for the benefit of any person other than the County or the City, and no person shall claim any right, title, or interest under this Agreement, or seek to enforce this Agreement as a third party beneficiary of this Agreement or otherwise.

12. **INSURANCE.** The County maintains public liability insurance for its operation of the SFCADF. The City shall maintain at all times a policy of public liability insurance (or approved program of self-insurance) for its activities under this Agreement.

13. **SUBCONTRACTING.** The County may subcontract services to be performed under this Agreement with advance notice to the City. If a person housed at the SFCADF is transferred to another facility pursuant to a subcontract, the City shall be notified within 24 hours of the transfer.

14. **RECORDS AND AUDIT.**

A. **County Information.** The County shall maintain detailed records and shall endeavor to ensure that billing statements are accurate and correspond to inmate housing and booking records. Such records shall be subject to inspection by the City, the Department of Finance and Administration and the State Auditor.

B. **City Information.** The City shall provide its complete file on each person incarcerated at the SFCADF under this Agreement including, but not limited to, the incarceration file, the medical file, all court and/or arrest documents necessary to justify the City's inmate incarceration, and copies of each person's criminal history. Gang affiliations and other associations of relevance shall also be provided, if known.

15. **AMENDMENTS.** This Agreement shall not be altered, changed, or amended except by an instrument, in writing, executed and approved by both parties.

16. **MERGER.** This Agreement incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such agreements, covenants and understandings have been merged into this written Agreement. No prior agreement, covenant or understanding, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.

17. **APPLICABLE LAW.** This Agreement shall be governed by the laws of the State of New Mexico.

18. **ACCESS BY CITY.** The City, with prior approval and consent of the Director of SFCADF, may inspect the conditions under which City's inmates are housed at SFCADF. Access to SFCADF shall be coordinated through the Director of SFCADF, the Warden or their designee.

19. **SEVERABILITY.** Should any part of this Agreement be determined invalid or unenforceable by a court, the remainder of this Agreement shall not be affected and shall remain valid and enforceable to the fullest extent of the law.

20. **APPROPRIATIONS**. The terms of this Agreement, and any orders placed under it, are contingent upon sufficient appropriations and authorization being made by the Governing Body of the City for the performance of this Agreement. If sufficient appropriations and authorization are not made by the legislature, this Agreement, and any orders placed under it, shall terminate upon written notice being given by the City to the County. However, the City would be responsible for and to pay for all services rendered prior to notice being provided to the County.

[REMAINDER OF THIS PAGE LEFT BLANK INTENTIONALLY]

IN WITNESS WHEREOF, the County and the City have caused this Agreement to be executed, said Agreement to become effective as of December 12, 2024, when signed by both parties.

Subject: Determination- Inmate housing

Good morning,

Please provide a determination for the housing of inmates.

1. **HOUSING OF INMATES.** The County agrees to house persons awaiting indictment or trial on behalf of the Contractor from time-to-time as space is available in the County's SFCADF, upon the conditions and terms set forth below. The Contractor agrees that any such person so housed in the SFCADF is either a person temporarily imprisoned while being conveyed or awaiting conveyance to a jail in the Contractor's jurisdiction, or a person whose life is in imminent danger in the present place of incarceration, as specified in NMSA 1978, Sections 33-3-13 (1983), and 33-3-14 (1889), and the Contractor agrees in any event that any persons housed at the SFCADF meet the minimum criteria established by these statutes and laws and agrees to compensate the County for housing inmates

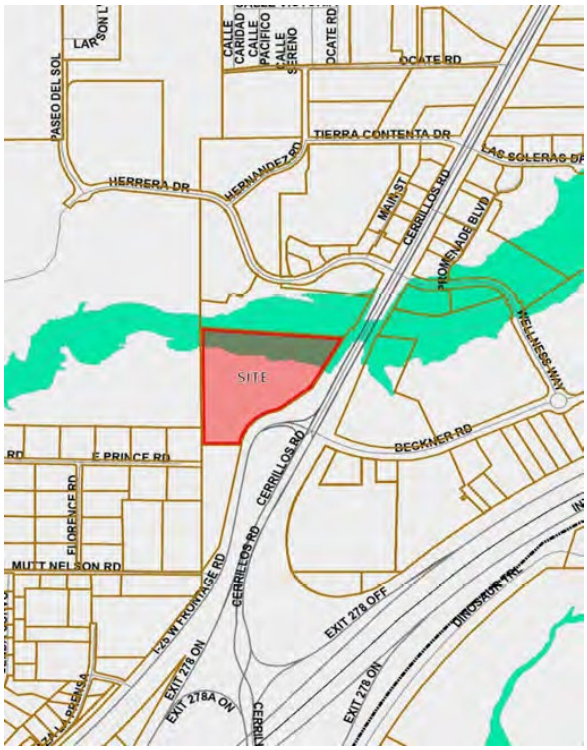
RE: **27794 W I-25 Frontage Road**
2024-8995-APPL The Bungalows on Cerrillos Setback Variance Request (Case No. 2023-7662)
2024-8996-APPL The Bungalows on Cerrillos Slope Variance Request (Case No. 2023-7662)

Appellant Advanced Acquisitions, LLC c/o Brian Nenninger, Orion-West LLC ("Appellant") appeals the Planning Commission's decision to deny variances to the City of Santa Fe's ("City's) Code requiring 45-foot setbacks in the Cerrillos Road Highway Corridor protection district (CRHC) ("Setback Variance") and prohibiting disturbances to natural 30% slopes ("Slopes Variance"). The Planning Commission ("Commission") denied both the Setback Variance and the Slopes Variance on the grounds that the requested variances did not meet the Code's mandatory criteria for variances. *See* Findings of Fact and Conclusions of Law (Setback) and Findings of Fact and Conclusions of Law (Slopes) (together, "Findings and Conclusions").



Appellant's position is that the Commission improperly denied the Setback Variance and Slopes Variance, and that Appellant satisfied all mandatory criteria. *See* Appeal Petition - 2024-8995-APPL – Setback Variance and Appeal Petition - 2024-8996-APPL - Slopes Variance.

In this "de novo" appeal, the Governing Body may uphold, reverse, or modify the Commission's decisions to deny the Setback Variance and Slope Variance. "De novo" means that the Governing Body conducts an independent review of evidence in the record and any new evidence presented during its hearing and then independently applies the law to the facts. The Governing Body may take the Commission's experience and expertise into account when deciding this appeal but is not required to do so.

I. BACKGROUND AND PROCEDURAL HISTORY

A. The Property

The subject property is an approximately 19-acre vacant lot located in the northwest quadrant of the intersection of Cerillos Road and I-25 W Frontage Road (the "Property"). *See* Staff Report to Commission, p. 6.

B. The Project

Applicant asked the Commission to approve a development plan for a 141-unit, detached, one- and two-story multi-family residential development. *See* Staff Report to Commission, p. 1. While the development plan proposes multi-family housing, it is not a dense apartment building, but rather multiple individual units. *Id.* The development plan was premised on the Commission's approval of both the Setback Variance and Slope Variance that are the subjects of this appeal, and therefore requires conditions of approval, however, no appeals regarding the development plan are currently before the Governing Body.

C. Applicable Law

Chapter 14 of the Santa Fe City Code ("SFCC" or "Code") only allows variances to be issued when special circumstances exist. "Special circumstances" are defined as "unusual physical characteristics… that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid", a pre-Code legally nonconforming lot, an unresolvable conflict between applicable Code provisions, or historic designation. *See* SFCC 1987, § 14 -3.16 (C)(1).

If the adjudicator (the land use board or Governing Body) finds that any of the special circumstances described above exist, then the Code only allows for a variance if the adjudicator also finds that:

1. "The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14." SFCC 1987, § 14 -3.16 (C)(2);

2. The variance would not exceed the intensity of development allowed on other properties in the vicinity (SFCC 1987, § 14 -3.16 (C)(3));

3. The variance is the "minimum variance that will make possible the reasonable use of the land or structure" (SFCC 1987, § 14 -3.16 (C)(4)); and

4. "The variance is not contrary to the public interest". SFCC 1987, § 14 -3.16 (C)(5)).

All four findings are required.

The Code is designed to apply uniformly to all property. Section 14-1.4, "Uniform Application" provides that "[t]he provisions of Chapter 14 are minimum requirements that apply uniformly to land within the same zoning districts and structures of the same type." Additionally, Chapter 14 states that its purposes are as follows:

> [C]reate conditions favorable to the health, safety, convenience, prosperity and general welfare of the residents of Santa Fe by coordinating streets within proposed subdivisions with existing or planned streets or other features of the general plan; providing parks and trails; providing sewer, water and other infrastructure; providing adequate open space for traffic, recreation, drainage, light and air; and providing for the appropriate distribution of population and traffic.

Consequently, the Code applies uniformly to property and structures, regardless of an applicant's intentions or product design, with the above-referenced goals in mind.

D. The Requested Variances

The Setback Variance would be an eleven (11) foot reduction to the 45 feet setback that is generally required in a Zone 4 CRHC District, which is the applicable zone for this area of the Cerrillos Road Right-of-Way. *See* Commission Exh. E, p. 11. The result of the Setback Variance approval would be a 34-foot setback for this property. *See* Commission Exh. E, p. 11

The Slope Variance would be a deviation from Section 14-8.2(D)(2)(b) ("Terrain Management"), which prohibits disturbance of thirty percent (30%) natural slopes. *See* Staff Report to Commission, p. 17. The Applicant proposes to disturb 30% slopes on the Property occupy approximately 4,800 square feet on the far northeastern edge of the Property. *See* Staff Report to Commission, p. 17. The Arroyo de los Chamisos floodplain intersects with the Property's northern portion. *See* Commission Attachment D, Maps and Photos, p. 2.

E. Planning Commission Hearing

City Land Use and Planning Department Staff ("Staff") and the Applicant presented to the Commission on May 16, 2024. *See* Planning Commission Meeting, 5/16/2024, available at https://www.youtube.com/watch?v=r91fWnnCcJw. Staff recommended that the Commission deny the variances and grant a modified version of the development plan that did not require variances. *Id.* at 33:20-34:25. The Applicant asked the Commission to grant the variances. *Id.* at 39:07-39:22. Commissioner Mirando expressed a concern about how the residents in the development would be adequately screened from Cerrillos Road if the Commission approved the Setback Variance. *Id.* at 02:30:58-02:39:04. The Applicant then stated support for postponing a decision on the requested variances in order for the Applicant to provide the Commission more information and try address Commissioner Mirando's concerns. *Id.* at 03:11:21-03:11:50. The Commission voted to postpone the remainder of the hearing until June 20, 2024. *Id.* at 03:15:55.

The June meeting was then cancelled due to a lack of a quorum. *See* Notice of Cancellation Meeting 6-20-24

The Commission reconvened to hear the case on July 11, 2024. The Applicant provided additional diagrams, videos, and information about the project. *See* Planning Commission Meeting, 7/11/2024, 00:10:03-00:29:45. In further support of the request for the Setback variance, the Applicant testified that there was another development along Cerrillos that appeared only to have a 24-foot setback. *Id.* at 00:25:34-00:25:58. The Applicant also said that the design would allow outdoor space for the residents. *Id.* at 00:28:48-00:29:14. The Applicant's attorney argued that if the setback variance were not granted, the project would lose about sixteen (16) units (*Id* at 00:32:32), due to about a third of the site being in a flood plain or on otherwise undevelopable land, thereby, he testified, making it infeasible to develop the Property without the Setback Variance and Slopes Variance (*Id* at 00:32:58-00:34:58).

Senior City Planner Dan Esquibel, responding to questions from the Commission, explained that the project's design, including the elements that deviate from the Code compliance and therefore required variances, was the result of the Applicant's choices, and that the Applicant could reduce sprawl without reducing the number of housing units by building vertically. *Id.* at 00:37:01-00:37:50. Therefore, there were options for a developer to develop the Property in compliance with the Code and without building in the setback or disturbing the natural 30% slopes.

Following discussion, the Commission voted to approve the development plan subject to conditions of approval, but denied the Setback Variance and Slopes Variance. *See* Meeting Minutes, July 11 2024, page 2. The Commission determined that there were no special circumstances, and that development was not infeasible without a variance. *See* Findings and Conclusions.

II. GROUNDS FOR APPEAL TO THE GOVERNING BODY

Under the SFCC 1987, Section 14-3.17(A)(2), an appeal of a BOA decision may be filed for one or more of the following reasons only:

> (1) The Commission's final action does not comply with SFCC 1987, Chapter 14 or the Zoning Enabling Act, NMSA 1978, Sections 3-21-1 to -14;
>
> (2) The Commission misapplied SFCC 1987, Chapter 14; or
>
> (3) The Commission's decision is not supported by substantial evidence.

III. ISSUES ON APPEAL

The Applicant asserts that the Commission misapplied Chapter 14. Therefore, the Applicant has grounds for appeal to the Governing Body.

The only issues in dispute are whether 1) there are special circumstance and 2) whether said special circumstances make it infeasible to develop the property in conformity with the Code.

On appeal, with respect to the criteria in dispute, the Applicant makes the following arguments:

That there are special circumstances because the Property "is uniquely burdened by the expansive Arroyo de los Chamisos, a naturally occurring feature that renders approximately 22% of the property undevelopable." *See* Appeal Petition - 2024-8995-APPL – Setback Variance, Exhibit A, p. 1. The Applicant further asserts that there are NMDOT improvement requirements that burden the property. *Id.* at p. 2.

That said special circumstances reduce the usable site and constrain the project (*Id.*) and that "The inability to grade the remnant of portion of this slope of the Arroyo de los Chamisos will render it infeasible to develop a substantial portion of the property because of the grade that will occur north of the remnant bank (*See* Appeal Petition - 2024-8996-APPL – Slopes Variance, Exhibit A, p. 2).

That the Setback and Slopes Variances are the minimum variances that would permit the proposed development.

That the Setback Variance and Slope Variance are in the public interest because the Applicant takes the position that they will have not impact the surrounding neighborhoods.

IV. ANALYSIS

In this case, the Governing Body should consider whether the Arroyo de Los Chamisos and the requirement to comply with NMDOT requirements constitute special circumstances. While the Arroyo de Los Chamisos is naturally occurring and the NMDOT requirements are created by government action, the Governing Body may wish to elicit testimony or other evidence from the Applicant regarding 1) whether these circumstances "distinguish the land from others in the vicinity that are subject to the same relevant provisions of Chapter 14" (*see* SFCC 1987, § 14-3.16 (C)(1)(a)) and 2) whether the Applicant received any benefit from the government in exchange for the agreement to develop the property with applicable NMDOT requirements (*Id.*).

If the Governing Body determines that special circumstances exist, then the next step is to determine whether those circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14. *See* Section 14-3.16(C)(2), Appendix I.

The Applicant argues that the existence of a floodplain and an arroyo on the northern portion of the Property make it infeasible to develop the Property with the detached-home style product that the Applicant designed.

The Applicant's arguments regarding whether development is infeasible without a variance are tied to their arguments that the requested variances are the minimum variances needed to facilitate the Applicant's planned development. The Commission need only discuss whether the Setback Variance and Slopes Variance are not in the public interest if all other criteria are met.

The record reflects Staff's conclusion that neither the Arroyo, nor any requirements from NMDOT, preclude residential development on the Property in compliance with the Code and that the same number of units could even be built by using vertical construction. Vertical

construction would be consistent with the Code and would not require the Setback Variance or Slopes Variance. If the Governing Body determines that the Property could be developed without the requested variances, then the Setback Variance and Slope Variance should be denied.

V. CONCLUSION

If the Governing Body concludes that special circumstances do exist, that the development is infeasible without a variance, and that all other Code criteria are met, the Governing Body should reverse the Commission's decision and grant the Appeal. If the Governing Body concludes that no special circumstances exist, or, that, if special circumstances do exist, they do not make it infeasible to develop the property in compliance with the Code; or that the Setback or Slopes Variance does not meet any of the other Code criteria, the Governing Body should uphold the Commission's decision, deny the Appeal and deny the variances. The Governing Body could also modify the Commission's decision in part by reaching different legal or factual conclusions, for example, by determining that special circumstances do exist, but that development remains feasible without a variance.

VI. RECOMMENDATION (MOTION OPTIONS)

There are three options for motions in this case. Sample motions follow:

Motion Option 1: I move to grant the appeal, reverse the Commission's decision to deny the variances, and direct staff to prepare Findings of Fact and Conclusions of Law consistent with this motion.

Motion Option 2: I move to deny the appeal, affirm the Commission's decision to deny the variances, and direct staff to prepare Findings of Fact and Conclusions of Law consistent with this motion.

Motion Option 3: I move deny the variances on a separate basis from the basis described in the Commission's findings of fact and conclusions of law, in particular if the Governing Body determines that the Setback Variance or Slopes Variance failed to meet Code criteria different than those the Commission identified, and direct staff to prepare Findings of Fact and Conclusions of Law consistent with this motion.

APPENDIX I: RELEVANT CODE SECTIONS

14-3.16 – Variances, approval criteria

Subsections 14-3.16(C)(1) through (5) and, if applicable, Subsection 14-3.15(C)(6), are required to grant a variance.

(1) One or more of the following special circumstances applies:

(a)unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid;

(b) the parcel is a legal nonconforming lot created prior to the adoption of the regulation from which the variance is sought, or that was created by government action for which no compensation was paid;

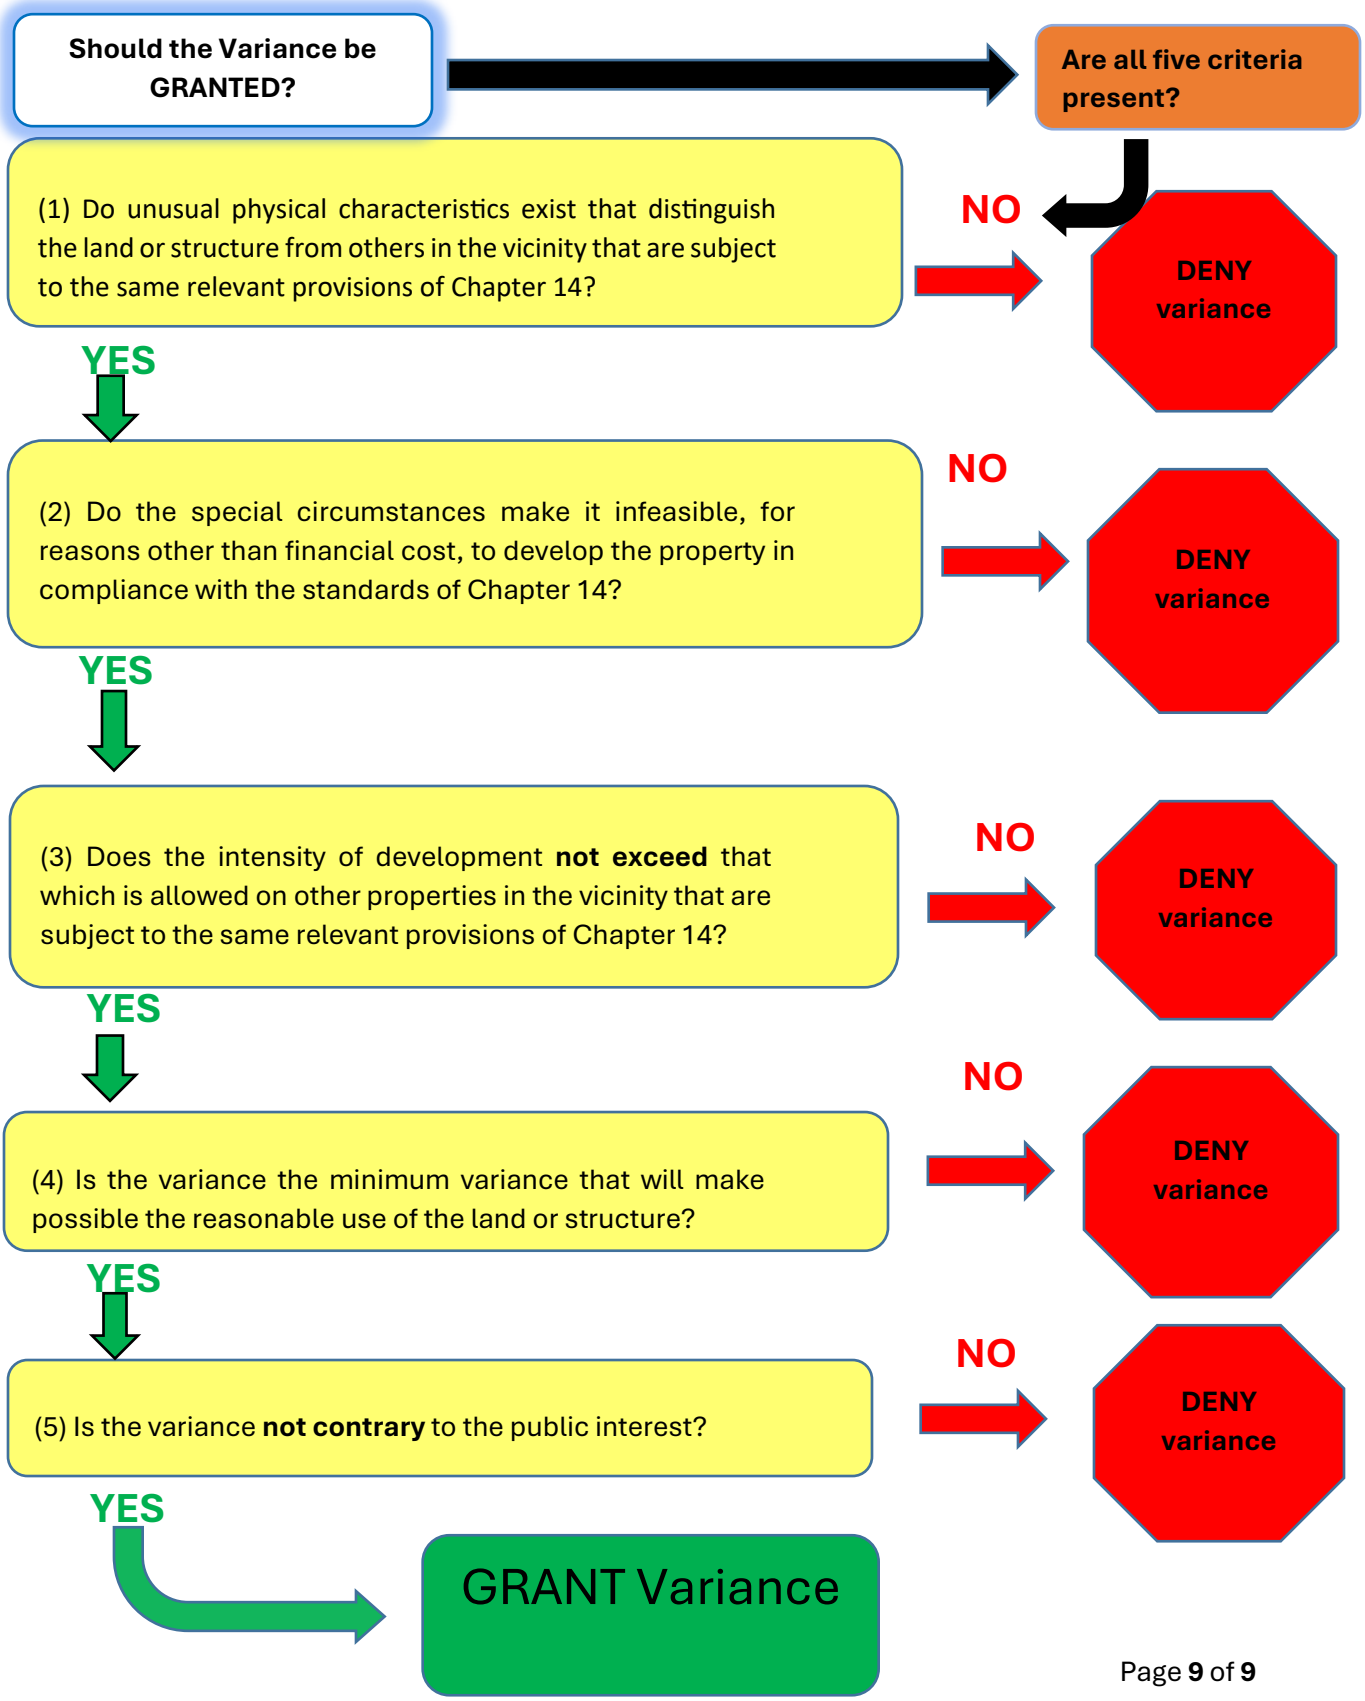
(c)there is an inherent conflict in applicable regulations that cannot be resolved by compliance with the more-restrictive provision as provided in Section 14-1.7; or

(d)the land or structure is nonconforming and has been designated as a landmark , contributing or significant property pursuant to Section 14-5.2 (Historic Districts).

(2) The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.

(3) The intensity of development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.

(4) The variance is the minimum variance that will make possible the reasonable use of the land or structure . The following factors shall be considered:



(a)whether the property has been or could be used without variances for a different category or lesser intensity of use;

(b)consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan .

(5) The variance is not contrary to the public interest.

(6) There may be additional requirements and supplemental or special findings required by other provisions of Chapter 14.

APPENDIX II: VARIANCE FLOW CHART

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2023-7662
Bungalows on Cerrillos Variance (Setback)
Applicant's Name – Advanced Acquisitions, LLC
Agent's Name – Orion-West LLC.

THIS MATTER came before the Planning Commission (Commission) for hearing on April 14, 2024, and on July 11, 2024, upon the Application (Application) of Orion-West LLC., agent for Advanced Acquisitions, LLC (Applicant).

The Applicant seeks the Commission's approval of a variance from SFCC 14-5.5 (B)(4)(iii) Cerrillos Road Highway Protection District (CRHC) of building setbacks in CRHC Zone 4 from 45 feet to no more than 34 feet (Project). The project is a 19.26-acre lot zoned C-2 (General Commercial) within the Suburban Archaeological Review District and the Cerrillos Road Highway Corridor Protection District (Property).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Applicant requested a variance from SFCC 14-5.5 (B)(4)(iii) Cerrillos Road Highway Protection District (CRHC) of building setbacks in CRHC Zone 4 from 45 feet to no more than 34 feet, pursuant to the Santa Fe City Code (SFCC) 1987 Section 14-3.16(C) "Variance".
2. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification (ENN) meeting [SFCC 1987 §1 4-3.1(F)(2)(a)(iv)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
3. The Applicant attended pre-application conference with City land use department staff (Staff) held on June 23, 2022, in accordance with SFCC 1987 Section 14-3.1(E).
4. The Applicant conducted two virtual ENN meetings one on May 03, 2023, and the second on September 14, 2023. Both ENN meetings were attended by staff, the Applicant's agent and members of the public.
5. Pursuant to the SFCC Section 14-3.16(A), "[l]and use boards may approve variances to the provisions of Chapter 14 … regulating the size, location and appearance of structures."
6. City Land Use Department staff reviewed the Application and related materials, and information submitted by the Applicant for conformity with applicable Code requirements and provided the Commission with a written report of its findings (Staff Report).
7. City staff reviewed the Applications and related materials, and information submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings (Staff Report), which evaluates the factors relevant to the Application.
8. Staff recommended that the Commission deny the variances requested in the Application.
9. SFCC Section 14-3.16(B) sets out procedures for variance applications and requires the Commission to hold a public hearing and approve, approve with conditions, or deny the variance application.

10. At the Hearing, the Commission received reports from staff, testimony and evidence from the Applicant, and testimony offered by any interested members of the public prior to making a decision.
11. SFCC Section 14-3.16(C) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before granting a variance.
12. No unusual physical characteristic exists that distinguish the land from others in the vicinity and alternative designs for the site could eliminate the need for a variance. The parcel is not legal non-conforming; there is no inherent conflict in applicable regulations that cannot be resolved by the applicant with the design of this vacant property.
13. It is feasible to develop the property without a variance and there are no special circumstances that have been identified that would prevent the property from being developed in compliance with Chapter 14.
14. The extent of development does not exceed that which is allowed on other properties within the area.

CONCLUSIONS OF LAW

Under the circumstances, and given the evidence and testimony submitted during the public hearing, the Commission CONCLUDES as follows:

1. The Commission has the authority under Chapter 14 of the SFCC to review and deny the Applicant's proposed variance request.
2.
3. Pursuant to SFCC Sections 14-2.3(C)(3) and 14-3.16(A), the Commission has the authority to review and approve or disapprove variances. The Applicant complied with the requirement to attend a preapplication conference with Staff under SFCC 1987, Section 14-3.1(E).
4. Pursuant to SFCC 1987 Section 14-3.1(H), notice of the ENN meeting was properly given.
5. Pursuant to SFCC 14-3.6(C)(1)(a-d), the Applicant has not satisfied the variance criterion required by Subsection 14-3.6(C)(1). No unusual physical characteristic exists that distinguish the land from others in the vicinity and alternative designs for the site could eliminate the need for a variance. The parcel is not legal non-conforming; there is no inherent conflict in applicable regulations that cannot be resolved by the applicant with the design of this vacant property.
6. Pursuant to SFCC 14-3.6(C)(2), the Applicant has not satisfied this variance criterion required by 14-3.6(C)(2) because it is feasible to develop the property without a variance and there are no special circumstances that have been identified that would prevent the property from being developed in compliance with Chapter 14.
7. The variance criterion required by 14-3.6(C)(3) has been addressed, and the extent of development does not exceed that which is allowed on other properties within the area.
8. Pursuant to 14-3.6(C)(4), the Applicant's conditions for the requested variance are not supported by all factors within Subsection 14-3.16(C) *"Approval Criteria."*
9. Pursuant to 14-3.6(C)(5), the requested variance is a request to construct within the setback requirement of the CRHC Protection District which is prohibited per Santa Fe City Code Chapter SFCC 14-5.5 (B)(4)(iii). This variance request does not establish the requirements necessary to

grant a variance required by Subsection 14-3.6(C). The granting of this variance is not in conjunction with the public interest.

10. Pursuant to 14-3.6(C)(4), the Applicant's conditions for the requested variance are not supported by all factors within Subsection 14-3.16(C) *"Approval Criteria."*
11. Pursuant to 14-3.6(C)(5), the requested variance is a request to construct within the setback requirement of the CRHC Protection District which is prohibited per Santa Fe City Code Chapter SFCC 14-5.5 (B)(4)(iii). This variance request does not establish the requirements necessary to grant a variance required by Subsection 14-3.6(C). The granting of this variance is not in conjunction with the public interest.

The variance to SFCC Section SFCC 14-5.5 (B)(4)(iii) Cerrillos Road Highway Protection District (CRHC) of building setbacks in CRHC Zone 4 from 45 feet to no more than 34 feet should not be granted because the Applicant has failed to meet the approval criteria for the variance.

WHEREFORE, IT IS ORDERED ON THE 5th DAY OF SEPTEMBER, 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission denies the variance to SFCC Section SFCC 14-5.5 (B)(4)(iii), as requested in Case #2023-7662. The variance request for the Project is denied.

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2023-7662

Bungalows on Cerrillos Variance (Setback)
Applicant's Name – Advanced Acquisitions, LLC
Agent's Name – Orion-West LLC.

THIS MATTER came before the Planning Commission (Commission) for hearing on April 14, 2024, and on July 11, 2024, upon the Application (Application) of Orion-West LLC., agent for Advanced Acquisitions, LLC (Applicant).

The Applicant seeks the Commission's approval of a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,800 square feet (Project). The Project is a 19.26-acre lot zoned C-2 (General Commercial) within the Suburban Archaeological Review District and the Cerrillos Road Highway Corridor Protection District (Property).

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1. The Applicant requested a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,800 square feet, pursuant to the Santa Fe City Code (SFCC) 1987 Section 14-3.16(C) (Variance).
2. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification (ENN) meeting [SFCC 1987 §1 4-3.1(F)(2)(a)(iv)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].
3. The Applicant attended pre-application conference with City land use department staff (Staff) held on June 23, 2022, in accordance with SFCC 1987 Section 14-3.1(E).
4. The Applicant conducted two virtual ENN meetings one on May 03, 2023, and the second on September 14, 2023. Both ENN meetings were attended by staff, the Applicant's agent and members of the public.
5. Pursuant to the SFCC Section 14-3.16(A), "[l]and use boards may approve variances to the provisions of Chapter 14 … regulating the size, location and appearance of structures."
6. City Land Use Department staff reviewed the Application and related materials, and information submitted by the Applicant for conformity with applicable Code requirements and provided the Commission with a written report of its findings (Staff Report).
7. SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 § 14-3.l(E)]; (b) an Early Neighborhood Notification (ENN) meeting [SFCC 1987 §1 4-3.1(F)(2)(a)(iv)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 § 14-3.1(H)-(I)].

8. A pre-application conference was held on June 23, 2022, in accordance with SFCC 1987 Section 14-3.1(E).
9. Pursuant to SFCC 1987 Section 14-3.1(H), notice of the ENN meeting was properly given.
10. The Applicant conducted two virtual ENN meetings one on May 03, 2023, and the second on September 14, 2023. Both ENN meetings were attended by staff, the Applicant's agent and members of the public.
11. Pursuant to the SFCC Section 14-3.16(A), "[l]and use boards may approve variances to the provisions of Chapter 14 … regulating the size, location and appearance of structures. "City Land Use Department staff reviewed the Application and related materials, and information submitted by the Applicant for conformity with applicable Code requirements and provided the Commission with a written report of its findings (Staff Report).
12. Pursuant to SFCC Sections 14-2.3(C) (3) and 14-3.16(A), the Commission has the authority to review and approve or disapprove variances.
13. City staff reviewed the Application and related materials, and information submitted by the Applicant for conformity with applicable SFCC requirements and provided the Commission with a written report of its findings (Staff Report), which evaluates the factors relevant to the Application.
14. Staff recommended that the Commission deny the variance requested in the Application.
15. At the Hearing, the Commission received reports from staff, testimony and evidence from the Applicant, and testimony offered by any interested members of the public prior to making a decision.
16. SFCC Section 14-3.16(B) sets out procedures for variance applications and requires the Commission to hold a public hearing and approve, approve with conditions, or deny the variance application.
17. SFCC Section 14-3.16(C) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before granting a variance.
18. No unusual physical characteristic exists that distinguish the land from others in the vicinity and alternative designs for the site could eliminate the need for a variance. The parcel is not legal non-conforming; there is no inherent conflict in applicable regulations that cannot be resolved by the applicant with the design of this vacant property.
19. It is feasible to develop the property without a variance and there are no special circumstances that have been identified that would prevent the property from being developed in compliance with Chapter 14.

The extent of development does not exceed that which is allowed on other properties within the area.

CONCLUSIONS OF LAW

Under the circumstances, and given the evidence and testimony submitted during the public hearing, the Commission CONCLUDES as follows:

1. Pursuant to SFCC Sections 14-2.3(C)(3) and 14-3.16(A), he Commission has the authority under Chapter 14 of the SFCC to review and deny the Applicant's proposed variance request.
2. Pursuant to SFCC 14-3.6(C)(1), the Applicant has not satisfied the variance criterion required by Subsection 14-3.6(C)(1). Alternative designs for the site could eliminate the need for a variance.

3. Pursuant to SFCC 14-3.6(C)(2), the Applicant has not satisfied this variance criterion required by 14-3.6(C)(2) because it is feasible to develop the property without a variance.
4. The variance criterion required by 14-3.6(C)(3) has been addressed, and the extent of development does not exceed that which is allowed on other properties within the area.
5. Pursuant to 14-3.6(C)(4), the Applicant's conditions for the requested variance are not supported by all factors within Subsection 14-3.16(C) *"Approval Criteria."*
6. Pursuant to 14-3.6(C)(5), the requested variance is a request to disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,800 square feet which is prohibited per Sant Fe City Code Chapter SFCC 14-8.2(D)(2)(b). This variance request does not establish the requirements necessary to grant a variance required by Subsection 14-3.6(C). The granting of this variance is not in conjunction with the public interest.
7. The variance to SFCC Section SFCC 14-8.2(D)(2)(b) within the Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) should not be granted because the Applicant has failed to meet the approval criteria for the variance.

WHEREFORE, IT IS ORDERED ON THE 5th DAY OF SEPTEMBER, 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission denies the variance to SFCC Section SFCC 14-8.2(D)(2)(b), as requested in Case #2023-7663. The variance request for the Project is denied.

Commission # 1126512
My Comm. Exp. July 3, 2027

Exhibit A

Description of Harm

The denial of the setback variance for Case #2023-7662 imposes significant harm on the feasibility and integrity of the proposed Bungalows on Cerrillos development. The project has been carefully designed to accommodate a 141-unit multi-family development but is severely constrained by both the natural features of the site and additional requirements from the New Mexico Department of Transportation (NMDOT). Specifically, the property is burdened by the extensive area occupied by the Arroyo de los Chamisos, which renders approximately 22 percent of the site undevelopable. Additionally, a required dedication for public roadways further reduces the developable acreage by another 25 percent.

The denial of the setback variance forces the project to either drastically reduce the number of residential units or undergo a complete redesign, both of which are burdensome but also detrimental to the overall layout and functionality of the development. The unique configuration of the site, including the required setback from the Cerrillos Road right-of-way, does not align with the intent behind the setback regulation, which aims to create adequate separation between the roadway and adjacent structures. This particular property has a unique circumstance of a substantial added distance from the roadway to the property line creating a much larger separation than the setback would otherwise provide without this circumstance.

Without approval of the variance request, the project faces significant limitations in efficiently utilizing the developable area that is critical for maintaining project viability. The loss of potential housing units due to this restriction weakens the project's feasibility and diminishes its contribution to addressing the local housing shortage. A denial of the setback variance imposes substantial developmental challenges and undermines the overall public interest by reducing the availability of much-needed housing in the community and disrupting the practical use of the property.

Basis for Appeal

The requested area variance was improperly denied by the Planning Commission because the applicant satisfied the criteria for the granting of variances as stated in its application letter and the evidence and arguments presented to the Planning Commission, and as stated below. As a result, the Planning Commission misapplied the provisions of Section 14-3.16(C) of the Santa Fe City Code.

1. ***One or more of the following special circumstances applies: (a) unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid.***

   The property is uniquely burdened by the expansive Arroyo de los Chamisos, a naturally occurring feature that renders approximately 22 percent of the site undevelopable. This natural constraint is further compounded by road improvement requirements imposed by

NMDOT, which will occupy 20 percent of the property. Additionally, the NMDOT-mandated location and design of the I-25 Frontage Road further reduces the developable area by cutting off an additional 5 percent of the property. Approximately 47 percent of the property is unavailable for development due to natural features and governmental actions for which no compensation or relief has been or will be provided. These significant physical and regulatory constraints create a set of unique and challenging conditions that distinguish this property from others in the vicinity.

2. ***The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.***

   The special circumstances described above allow approximately 53 percent of the site available for development. The requirement of a 45-foot setback further reduces the usable area, resulting in a loss of fourteen (14) residential units. This reduction severely hinders the project's ability to meet essential development standards and optimally utilize an already limited property.

3. ***The intensity of development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.***

   The property is zoned C-2 and the intensity of the development remains unaffected by the granting of the variance. The proposed multifamily development is within zoning compliance and is less intense than other properties in the vicinity. Additionally, permissible zoning height is 45 feet, the proposed project heights do not exceed 28 feet.

4. ***The variance is the minimum variance that will make possible the reasonable use of the land or structure. The following factors shall be considered: (a) whether the property has been or could be used without variances for a different category or lesser intensity of use; (b) consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan.***

   The variance request seeks to position the nearest structure 34 feet from the property line, which aligns with the intent of the Cerrillos Road overlay to maintain significant physical separation between the roadway and buildings. The separation is emphasized by the wide right-of-way in this section of Cerrillos Road; the distances from the westernmost southbound lane to the property line ranges from 87 to 200 feet, thus making the nearest structures 121 feet from the driving lane at the nearest point and 234 feet at its farthest point. This distance alongside the 34ft setback ensure substantial separation that is consistent with the purpose of the corridor objectives.

   Under the applicable standard, the variance is the minimum is required.

5. ***The variance is not contrary to the public interest.***

The purpose of the setback is to reduce the impact of development in the corridor from the drivers' perspective. The distance from the most westerly southbound lane is approximately 87 to 200 feet from outer edge of the driving lane to the property line. The approval of the variance would place the nearest structure 34 feet from the property line, thus 121 feet to 234 feet from the driving lane. The multifamily homes are no more than two stories and will setback from the travel lanes of Cerrillos Road greater than the distance of other buildings along Cerrillos Road that comply with setback requirements. The appearance of the buildings along the Cerrillos Road frontage will have the same visual perception as other buildings along Cerrillos Road. The variance applies only to Cerrillos Road and has no effect on nearby residential neighborhoods. Residential neighborhoods are limited to the western boundary of the property.

As additional grounds for this appeal, the Planning Commission failed to appropriately consider how the requested setback variance aligns with the broader goals and objectives of the CRHC Cerrillos Road Highway Corridor Protection District. The CRHC district is specifically designed to ensure that development along Cerrillos Road accommodates safe and efficient traffic and contributes to a visually attractive and cohesive entranceway into Santa Fe. This approval would achieve a balance between maintaining the district's visual and functional integrity and accommodating practical development needs.

The Planning Commission incorrectly concluded that there are no special circumstances making it infeasible to develop the project site in compliance with the standards of Chapter 14, beyond financial cost, dismissing the need for the setback variance as unnecessary. However, the unique site constraints and the project's location within the CRHC district clearly constitute special circumstances that satisfy this part of the variance criteria. Variances should be granted when they align with and support the district's intent. The same logic applies to this project site. Denying this variance request undermines the city's objectives by imposing a subjective interpretation of the variance criteria.

The Planning Commission also improperly concluded that granting the requested setback variance at the project site would be contrary to the public interest because it would set a precedent for unnecessary alterations to the district's standards. This variance request is essential in creating a logical and viable development project, demonstrating that approval is justified and beneficial to the overall planning and development within the area. Denying a setback variance that allows for a 34-foot distance instead of the required 45 feet on a property where the distance to Cerrillos Road significantly exceeds the overlay's setback requirements contradicts the established principles for evaluating variance requests. A denial of the request overlooks the broader benefits of the project, including maintaining the intent of the setback while effectively utilizing the site. By granting the variance, the project can proceed in a manner that respects both the physical constraints of the property and the goals of the Cerrillos Road overlay.

Relief Requested

The applicant requests that the decision of the Planning Commission be reversed and that the requested setback variance be granted.

* The appellant requested a copy of the Findings of Fact and Conclusions of Law for Case #2023-7662, which is scheduled for approval by the Planning Commission on September 5, 2024. However, staff are unable to provide the documents at this time. As a result, the appellant will attach the Findings of Fact and Conclusions of Law once they are received from staff.

Danyelle Valdez

NOTARY PUBLIC

My commission expires:
July 3, 2027

STATE OF NEW MEXICO
NOTARY PUBLIC
DANYELLE VALDEZ
Commission # 1126512
My Comm. Exp. July 3, 2027

Exhibit A

Description of Harm

The denial of the slope variance for Case #2023-7663 imposes significant harm on the feasibility and integrity of the proposed Bungalows on Cerrillos development. The project, which has been meticulously designed to accommodate a 141-unit multi-family development, is heavily constrained by the natural topography of the site, specifically the presence of naturally occurring slopes greater than 30%.

The denial forces the project to either significantly reduce the developable area or undergo extensive redesign, both of which are not only financially burdensome but also detrimental to the overall layout and effectiveness of the development. The unique topography of the site includes a remnant of the original bank of the Arroyo de los Chamisos, which no longer functions in its original capacity due to past alterations from nearby infrastructure developments. Preserving this isolated and now functionally obsolete slope area does not serve the intended purpose of the slope management regulations, which aim to prevent erosion and protect the natural environment.

Moreover, without the variance, the project faces severe limitations in achieving a uniform and practical grade across the development, which is essential for creating an accessible and cohesive development. The loss of potential housing units due to this restriction not only diminishes the project's viability but also reduces the much-needed housing supply in the area, exacerbating the housing shortage.

The denial of the slope variance not only imposes significant financial and developmental challenges but also undermines the overall public interest by limiting the availability of housing in the community.

Basis for Appeal

The requested area variance was improperly denied by the Planning Commission because the applicant satisfied the criteria for the granting of variances as stated in its application letter and the evidence and arguments presented to the Planning Commission, and as stated below. As a result, the Planning Commission misapplied the provisions of Section 14-3.16(C) of the Santa Fe City Code.

1. ***One or more of the following special circumstances applies: (a) unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid.***

   There are areas with naturally occurring slopes of thirty percent (30%) or greater, totaling 4,764.81 square feet, which represents only 0.006 percent of the 19.218-acre site. The majority of the property has average slopes of five percent (5%). The 30% sloped area is a

remnant of the original bank of the Arroyo de los Chamisos, left intact before the construction of the Cerrillos Road improvements and the installation of the bridge that now carries stormwaters under Cerrillos Road. When the bridge was constructed, the Arroyo de los Chamisos was realigned, redirecting stormwaters to the north of the site, leaving this remnant bank isolated. As a result, the original bank remains south of the new channel, creating a small island of 30 percent slopes. Notably, all other 30% slopes on the property were removed during previous grading of the property, making this isolated area the only portion of the slope that wasn't previously graded.

2. ***The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.***

   The inability to grade the remnant of portion of this slope of the Arroyo de los Chamisos will render it infeasible to develop a substantial portion of the property because of the grade that will occur north of the remnant bank. Much of the property is designed to be completed at a single, even grade. Attempting to design around the sloped area is not viable for any development.

3. ***The intensity of development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.***

   The property is zone C-2, and the intensity of allowable development is unaffected by the grant of the variance. C-2 zoning requirements are performance based, and the proposed development of multifamily is well below what would be allowed on this property using taller, more traditional multifamily units -- the allowed height being 45 feet and the proposed heights being no more than 28 feet.

4. ***The variance is the minimum variance that will make possible the reasonable use of the land or structure. The following factors shall be considered: (a) whether the property has been or could be used without variances for a different category or lesser intensity of use; (b) consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan.***

   A disturbance of .006% of the site containing the naturally occurring slopes of the 30% is a minimal disturbance and is the minimum variance that will make the reasonable use of the northern portion of the site for the detached, two-story multifamily structures. The variance is consistent with the purpose and intent of the terrain management restriction of prohibiting disturbances of 30% slopes, because the variance will not:
   1. Increase the threat of flooding and the hazard of improper cuts and fills, or increased erosion and sedimentation.
   2. Result in the destruction of the sensitive landscape.
   3. Harm the scenic character of Santa Fe from the visual blight of indiscriminate cuts and fills and vegetation removal resulting from extensive grading and utility scars.

4. Accelerate stormwater runoff on natural drainage ways and all structures due to increased development and impervious surfaces; or
5. Degrade arroyo channels.

Therefore, under the applicable standard, the variance is the minimum required.

5. The variance is not contrary to the public interest.

Along an arroyo, the purpose preserving 30% slopes (i.e., to prevent erosion of arroyo banks, prevent unnatural redirection of arroyo channels and storm water) is not accomplished by preserving a geographic feature that has no relevance to current conditions. Further, preserving the slopes will not protect sensitive wildlife habitat or degrade and enhance the natural aesthetics associated with arroyos. The removal of this remnant bank will not run counter to these goals; there is no storm erosion created, or water channel adversely affected, as the channel is no longer in this location, and this patch of 30 slope is neither constitute wildlife habitat nor possesses any aesthetic quality. In short, variance is not contrary to the public interest.

As additional grounds for this appeal, the Planning Commission incorrectly concluded that the variance criteria pertain only to physical characteristics of land and structures and not to the consistency of floodplain management practices across interconnected sites. In this case, the proposed modifications to the project site are inseparable from those previously approved at the 5201 Beckner site, both of which are located along the Arroyo de los Chamisos within the same regional floodplain. The physical characteristics of the project site must be considered in conjunction with those of the 5201 Beckner site to ensure coherent and effective flood management across this shared watercourse.

In addition, the Planning Commission has granted variances based on the need for consistent flood management, as evidenced by the approval of modifications at the 5201 Beckner site, which included channel improvements and the construction of a bridge that resulted in a decrease in Base Flood Elevations (BFEs) and the width of the Special Flood Hazard Area (SFHA). The project site, being part of the same hydrological system, requires similar modifications to achieve comparable flood control benefits. The Planning Commission's decision to not grant the necessary modifications at the project site is arbitrary and capricious and has resulted in selective enforcement of the variance criteria, as it disregards the established need for consistency in land-use decisions.

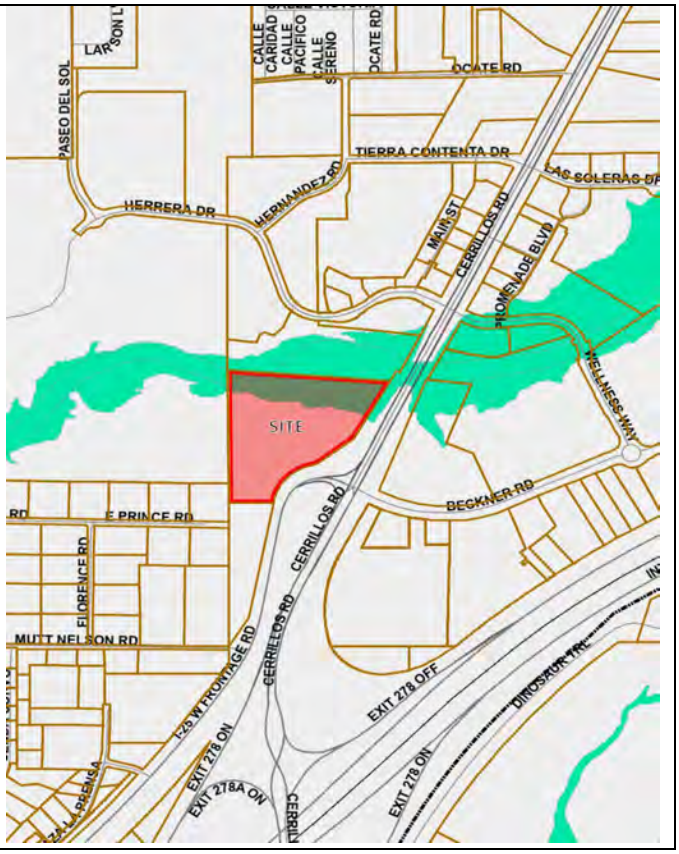
The Planning Commission also incorrectly concluded that there are no special circumstances that make it infeasible for reasons other than financial cost to develop the Project site in compliance with the standards of Chapter 14 because the site's modifications were dismissed as unnecessary. However, the hydrological continuity between the Project and 5201 Beckner sites constitutes circumstances that satisfy this part of the variance criteria. Just as the modifications at the 5201 Beckner site were deemed essential to maintaining and enhancing the flood-carrying capacity of the Arroyo de los Chamisos, the

same logic and necessity apply to this project site. Denying these modifications undermines the integrity of the flood management improvements already established by the 5201 Beckner project.

The Planning Commission also improperly concluded that the granting of the requested modifications at the Project site would be contrary to the public interest because it would set a precedent for unnecessary alterations to the floodplain. However, similar floodplain modifications, including those at the 5201 Beckner site, which involved significant changes to BFEs and SFHA widths, have been approved by the Planning Commission. These modifications have been essential for creating more logical and viable development projects, demonstrating that such changes are not only justified but also beneficial to the overall planning and development within the area. Denying the modifications at the Project site contradicts this established approach and fails to recognize the broader benefits that similar adjustments have already provided in comparable cases.

Relief Requested

The applicant requests that the decision of the Planning Commission be reversed and that the requested slope variance be granted.



* The appellant requested a copy of the Findings of Fact and Conclusions of Law for Case #2023-7662, which is scheduled for approval by the Planning Commission on September 5, 2024. However, staff are unable to provide the documents at this time. As a result, the appellant will attach the Findings of Fact and Conclusions of Law once they are received from staff.

Planning and Land Use Department
Planning Commission Staff Report

Cases Nos:	2023-(7079), (7662) & (7663)
Hearing Date:	May 2, 2024
Applicant:	Advanced Acquisitions, LLC
Requests:	Development Plan, Variance from SFCC 14-5.5 (B)(4)(iii) CRHC & Variance from SFCC 14-8.2(D)(2)(b) Terrain Management
Location:	27794 W I-25 Frontage Road
Case Mgr.:	Daniel A Esquibel
Zoning:	C-2 (General Commercial)
Overlay:	Suburban Archaeological Review District
Pre-app. Mtg.:	June 23, 2022
ENN Mtg.:	May 03, 2023 & September 14, 2023

Proposal:

Applicant requests development plan approval for a 141-dwelling multi-family development totaling 186,600 square feet of new construction with variances to SFCC 14-5.5 (B)(4)(iii) CRHC (setback) and 14-8.2(D)(2)(b) Terrain Management (30% slopes). The Property is approximately 19.26 acres.

<u>2023-7662</u> Bungalows on Cerrillos Variance (Setback). Orion-West LLC., Agent for Advanced Acquisitions LLC, Applicant, requests a variance from SFCC 14-5.5 (B)(4)(iii) Cerrillos Road Highway Protection District (CRHC) of building setbacks in CRHC Zone 4 from 45 feet to no more than 34 feet. The subject property is approx. 19.26-acres and located at 27794 W I-25 Frontage Road, within the Suburban Archaeological Review District and zoned C-2 (General Commercial).

<u>2023-7663</u> Bungalows on Cerrillos Variance (Slopes). Orion-West LLC., Agent for Advanced Acquisitions LLC, Applicant, requests a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,800 square feet. The subject property is approx. 19.26-acres and located at 27794 W I-25 Frontage Road, within the Suburban Archaeological Review District and zoned C-2 (General Commercial).

<u>2023-7079</u> Bungalows on Cerrillos Development Plan. Orion-West LLC., Agent for Advanced Acquisitions LLC, Applicant, requests Development Plan approval to construct approx. 186,600 square feet of new construction for a 141-unit multi-family one and two-story housing development. The subject property is approx. 19.26-acres and located at 27794 W I-25 Frontage Road, within the Suburban Archaeological Review District and zoned C-2 (General Commercial).

I. RECOMMENDATION

The Land Use Department recommends the Planning Commission **DENY Cases 2023-7662 Bungalows on Cerrillos variance ("Setback Variance") and 2023-7663 Bungalows on Cerrillos variance ("Slopes Variance") and APPROVE case 2023-7079** "**Bungalows on Cerrillos Development Plan",** subject to conditions of approval as outlined in this report and technical correction listed in Attachments A "Technical Conditions" and B "Development Review Team (DRT)." Should the Planning Commission follow staff's recommendations, Advanced Acquisitions, LLC (the "Applicant") will be required to revise and resubmit a development plan in compliance with the setback and slope requirements on Chapter 14 per Condition of Approval 7 in Table 1.

Three motions will be required. Should the Planning Commission Approve either of the requested variances, the Planning Commission motions will need to address new findings in compliance with SFCC 14-3.16(C) "Approval Criteria" see Tables 6 and 7 of this report for Variance Approval Criteria. The motions should be considered in the following order:

1. *Approve or deny* case #**2023-7662 Bungalows on Cerrillos Setback Variance,**
2. *Approve or deny* case #**2023-7663 Bungalows on Cerrillos Slopes Variance,**
3. *Approve or deny* case #**2023-7079 Bungalows on Cerrillos Development Plan** *subject to the conditions of approval and technical corrections recommended by staff.*

II. EXECUTIVE SUMMARY

Applicant requests approval of a Development Plan to construct approx. 186,600 square feet of new construction for a 141-unit multi-family, one- and two-story housing development, as well as infrastructure improvements and related accessory amenities. The Development Plan request includes two variance requests:

1. Variance to SFCC 14-8.2(D)(2)(b) Terrain Management standards to allow disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,800 square feet, and
2. Variance to SFCC 14-5.5 (B)(4)(iii) Cerrillos Road Highway Protection District (CRHC) to reduce the required building setbacks in zone 4 from 45 feet to no more than 34 feet from the Cerrillos Road ROW.

The three (3) cases 2023-7662, 2023-7663 and 2023-7079 make up the project (Project) discussed in this review.

The Applicant has complied with Subsections 14-3.1(E) *"Pre-Application Conferences",* 14-3.1(F) "*Early Neighborhood Notification Procedures*" and 14-3.1(H) *"Notice Requirements".*

Staff's analysis finds that the applicant has not addressed the necessary findings and recommends that the Commission **DENY** the variances.

1. SFCC Subsection 14-3.16 (C) *"Approval Criteria"* to allow a variance from SFCC 14-5.5 (B)(4)(iii) CRHC of building setbacks in zone 4 from 45 feet to no more than 34 feet, and
2. SFCC Subsection 14-3.16 (C) *"Approval Criteria"* to allow a variance from SFCC 14-8.2(D)(2)(b) Terrain Management to all disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,800 square feet.

Staff's analysis finds that the applicant has addressed the necessary findings and recommends **APPROVAL** of the development plan, subject to conditions of approval.

3. SFCC Subsection 14-3.8(D) "*Approval Criteria and Conditions*" for Development Plans, to construct approx. 186,600 square feet of new construction for a 141-unit multi-family one and two-story housing development.

III. CONDITIONS OF APPROVAL

Staff recommends the following conditions of approval:

Table 1 Conditions of Approval

#	CONDITION OF APPROVAL	DEPT/DIVISION	COMPLETED BY:
1	An archaeological clearance is required.	Land Use/Historic/ Archaeology	Prior to recordation
2	Drainage report discussion in proposed conditions section must include the total amount of impervious surface to be installed for the development, pond volume required, and pond volume provided for the site. Provide a small table here with pond information for quick reference of each pond's volume. Also include this information in the future conditions section.	Land Use/Terrain Management	Prior to recordation
3	The Application shall address parking type and detail per Table 14-8.6-1 "Parking and Loading Requirements" Note 1.	Land Use/Current Planning	Prior to recordation
4	The Applicant shall revise the architectural style to meet the intent of the Cerrillos Road Overlay, and in conformance with the Architectural Design Review standards.		
5	Should the Planning Commission deny the Variance(s) identified in this report, the applicant shall revise and resubmit their development Plan in compliance with SFCC 14-8.2(D)(2)(b) and 14-5.5 (B)(4)(iii) for staff review.		
6	The Applicant shall redistribute bicycle parking on the premises. Bicycle parking shall be included in both phase one and two. All bicycle parking shall comply with SFCC Chapter 14, Appendix, Exhibit D - Bicycle Rack Standards and Dimension.		
7	Primary access for the development is on New Mexico Department of Transportation (NMDOT) Frontage Road (see attached TIA approval letter from NMDOT with conditions to be met prior to issuance of building permit).	Wilson & Company / Leroy N. Pacheco, PE	Prior to recordation
8	The driveway on Cerrillos Road is for emergency access only. Plan Set to include a roadway signage and striping plan to be reviewed/approved by NMDOT and City Traffic Engineer for respective jurisdictions.		
9	An access permit shall be submitted to NMDOT for review and approval along with Roadway Improvement Plans for the project.		
10	Right-of-way will need to be dedicated to NMDOT by the property owner for the realignment of the Frontage Road.	NMDOT	Prior to construction

11	Extend the north/south sidewalk parallel to Cerrillos to the intersection with Herrera Drive.		
13	Illustrate on the development plan a new sidewalk on the south side of the NM I-25 Frontage Road to conform to city street design standards	Santa Fe Metropolitan Planning Organization	Prior to recordation
14	Illustrate on the development plan a 10ft sidepath along the west side of the NM I-25 Frontage Road to the property line, as detailed in the Santa Fe Bicycle Master Plan		
15	Illustrate on the development plan pedestrian crossings to each leg of the roundabout		
16	Improve pedestrian crossing safety by illustrating on the development plan high visibility crosswalk markings on all legs of the Cerrillos/Beckner/Frontage intersection and adding a pedestrian refuge island to the southern crossing of Cerrillos.		
17	Redesign the right turn slip lanes onto and off of the frontage road to limit speeds to 15mph or less.		
18	Evaluate, select, and design additional pedestrian safety countermeasures at the Cerrillos intersection such as a pedestrian signal, leading pedestrian intervals, etc.		
19	Add two bus stops (northbound/southbound) to the development plan per Santa Fe Trails request and in accordance with Santa Fe Trails design and location criteria. Coordinate with Santa Fe Trails on design & location.		
20	Ensure the trail crossing at the Cerrillos emergency access is appropriately designed with ramps, etc.; demonstrate this on the development plan.		
21	An approved Development Water Budget including a 9.8% contingency per SFCC 14-8.13(E)(1) will be required. A technical evaluation request for a Development Water Budget needs to be submitted to the City Water Division for review.		
22	An Agreement to Construct and Dedicate (ACD) from the Water Division will be required for all new public water infrastructure or fire services. An approved Development Water Budget, including Landscape Irrigation Budget and a 9.8% Contingency is required prior to processing the ACD.	City Water Resources	Prior to recordation
23	Each lot shall be served by separate water service at the time of development.		Prior to recordation

24	An agreement for metered service (AMS) will be required to install new services, including water offset fees.		Prior to building permit approval.
25	An approved Water Plan will be required for all new public water infrastructure and fire services. Water Plan shall be submitted to the City Water Division for review.		
26	An accepted application for an Agreement to Construct and Dedicate (ACD) shall be submitted to the Water Division for all new public water infrastructure and fire services.	City Water Engineering	Prior to recordation
27	An approved ACD will be required with the Water Division.		Prior to recordation
28	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.		Prior to building permit approval
29	Proposed development layout based on the requested setback variance has a conflict with the existing water main and other existing water infrastructure. Should the setback Variance be approved, this conflict will need to be resolved by either relocating the existing water infrastructure or redesigning this portion of the development to avoid the conflict. Final changes needed to resolve this conflict must be reflected on the approved water plan.		At the time of development
30	Access to sewer manhole 1 is required. The sewer discharge of the entire project discharges to the City's public sewer system through manhole 1. In the event of a stoppage in this section of the sewer system and the City needs to respond, access would be required to manhole 1.		Prior to recordation
31	Show the location and the separation distance between the existing 24-inch sewer lines and the storm water discharge pipe in all profiles of the storm water system	City Waste Water	Prior to recordation
32	The existing 20-foot-wide sewer access easement for the 24-inch public sewer line runs along a large portion of the project property line on its north side. The sewer easement in this section shall be graded and a 14-foot-wide gravel road is to be provided in this section.		
33	All 8 inch sewer pipe shall be SDR 26 PVC		
34	All 4 and 6 inch sewer pipe shall be SCH 40 PVC		
35	The existing City's 24-inch sewer line running along the north side of the project has a depth of 15 feet in areas.		

	Because of the sewer line depth and the proximity to the retaining walls, the Wastewater Division requires a detailed analysis of this area showing the depth and widths of the proposed walls and footers with respect to the required excavation required for a 15-foot-deep excavation. The same analysis is also required for the area for the proposed 16-foot-deep manhole 1 and connection to the existing public sewer line.		
36	There are several locations on the plan set that show a block retaining wall constructed on or next to a sanitary sewer easement boundary. Please place a note on each utility plan sheet that states; the City's Wastewater Management shall not be responsible for damages to any decorative or retaining wall this is constructed on or proximate to any sanitary sewer easement boundary.		
37	Identify the type and the detail location sheet for all block retaining walls to be used on each of the retaining walls in each utility plan sheet		
38	Shall verify roadway alignment slopes not to exceed 10%		
39	Shall verify roundabout can support fire apparatus access with all-weather road	Fire Marshal	Prior to recordation
40	Shall verify roundabout can support fire apparatus access with all-weather road		

The project is also subject to the technical requirements listed in Exhibit A.

IV. SITE ANALYSIS

The project is comprised of one (1) vacant +/-19.21 acre tract located in the northwest quadrant of the intersection of Cerillos Road and I-25 W Frontage Road. The property is a legal lot of record, zoned C-2 (General Commercial), located within the Suburban Archaeological Review District, and the Cerrillos Road Highway Protection District Zone 4.

Figure 1 Aerial / Lot Image

A. Adjacent Properties

The property is adjacent to Cerrillos Road, the Frontage Road, and the Arroyo de Los Chamisos, as well as land with residential uses, non-residential uses as shown in Table 2 *"Adjacent Uses and Zoning";* Figures 2 *"Zoning Map";* and 3 *"Adjoining Properties"* below.

Table 2. Adjacent Uses and Zoning

Direction	Zoning
North	R-21 (Residential: twenty-one (21) dwelling units per acre), Arroyo De Los Chamisos (Entrada Contenta Lot 1)
Northwest	PRC (Planned Residential Community) NNM School for the Deaf (Vacant Land)
South	C-2 (General Commercial) – Vacant Land
Southwest	R-1 (Residential – one (1) dwelling unit per acre
East	I-25 Frontage Road

Figure 2 Zoning Map

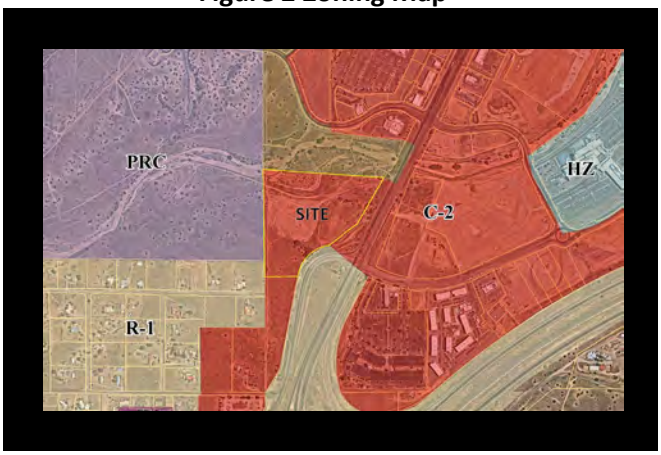


Figure 3 Adjoining Properties

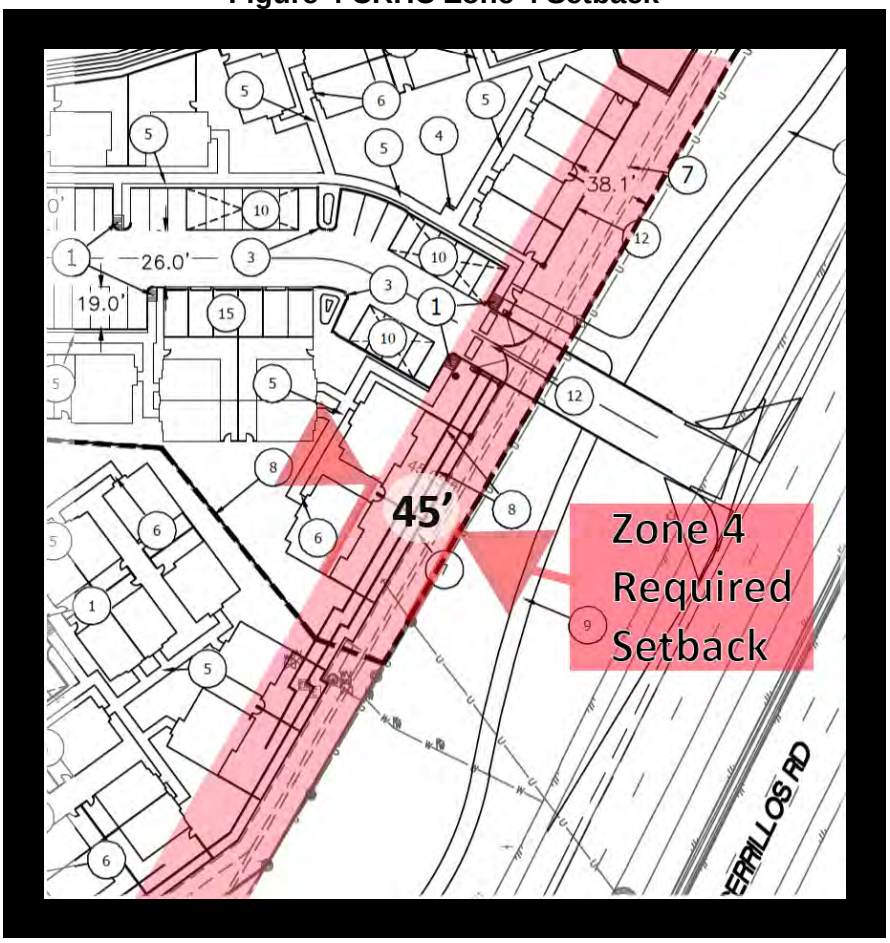


B. Overlay Districts

The property is in Zone four (4) of the CRHC, and within. The purpose of the CRHC is to accommodate safe traffic circulation, provide for a visually attractive introduction to Santa Fe, provides for a transition between more rural development and more intense development, and provide design direction regarding lot depth, height, setbacks, and lot coverage. *See* SFCC 1987, 14-5.5(B)(1). As this site is at an important gateway to Santa Fe, the expectation that this development will have the architectural character of Santa Fe. The applicant requests a variance to the setback requirement from the CRHC.

The Applicant also requests a variance to allow a 34-foot setback from the Cerrillos Road Right-Of-Way, where the required setback in a Zone 4 CRHC District is 45 feet (reference Figure 4 *"CRHC Zone 4 Setback"*). The variance is a six (6) foot reduction resulting in a 34-foot overall setback for the CRHC Zone 4 District for this property. The Planning Commission will need to determine whether to vary the regulations to accommodate the design of Development plan on a vacant tract of land or whether the design of the development plan should accommodate the regulations. The variance criteria are discussed later in this report (Table 8 *"Variance Approval Criteria– Subsection 14-3.16(C) (Variance from 14-5.5(B)(4)(iii))"*). Should the variance request be denied, staff would request the Planning Commission direct the Applicant to resubmit a new design complying with the CRHC Zone 4 Setback requirements for Staff review prior to recording the Development Plan.

The Property is in the Suburban Archaeological Review District and is required to obtain archaeological clearance prior to recording the Development Plan.

Figure 4 CRHC Zone 4 Setback

C. Parking

The Applicant is proposing a total of 141 dwelling units (DUs) constructed in 2 Phases as shown in Table 3 *"Required Vehicular Parking"* below:

Table 3 Required Vehicular Parking

PHASE 1			
DUs	SIZE	PARKING REQUIREMENT	REQUIRED PARKING
14	< 800	1.25 Parking Spaces Each	17.5 (18 required)
31	800-1,200	1.50 Parking Spaces Each	46.5 (47 required)
66	> 1,200	2 Parking Spaces Each	132 required
		Phase 1 Parking Required	197 required
		Phase 1 Parking	**237provided**
PHASE 2			
0	No DUs under 800 square feet		
20	800-1,200	1.50 Parking Spaces Each	30 required
10	>1,200	2 Parking Spaces Each	20 required
		Phase 2 Parking Required	50
		Phase 2 Parking	**63Provided**
Total parking required both Phases		247 required parking spaces	
Total Parking Provided both Phases		300 provided parking spaces	

The Applicant proposes to construct 237 parking spaces in phase one and 63 parking spaces with phase two. The Project will include fifty-three (53) vehicular parking spaces above what is required by ordinance for the Bungalows Development.

Of the 300 total parking spaces, the Applicant has identified that 144 vehicular parking spaces will contain canopies, 36 vehicular parking spaces will be garaged, and 8 parking spaces will be Americans with Disabilities Act (ADA) accessible.

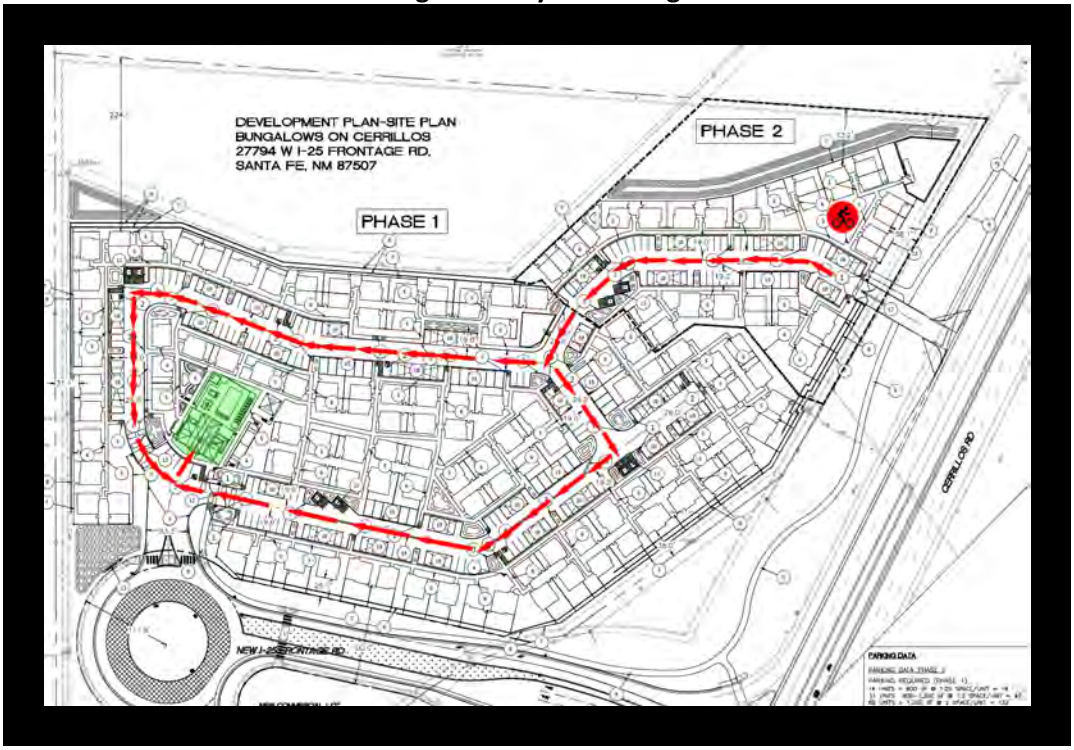
While the Development Plan provides more parking space than is required by the City Code, staff is concerned that garages may be used for personal storage and not for vehicle parking. To address this issue, Staff recommends that the Planning Commission adopt Condition 4, requiring that lease agreements include a language stating that cars must be parked in garages. The Applicant shall include a note on the Development Plan to this restriction and police condition on the property.

The applicant did not provide information to address parking type and detail. 90° parking for *"One Size Fits All" and "Small and Standard Cars"* parking requires the following dimensions:

Table 4 Parking Type

Type 90°	Minimum Width	Vehicle Projection	Aisle	Typical Module	Overhang
One Size Fits All	8'-4"	10'-0"	22'-6"	58'-4"	2'-8"
Small Car	7'-6"	15'-0"	19'-0"	50'-0"	2'-0"
Standard Cars	8"-6"	19'-0"	23'-0"	61'-0"	3'-0"

Per Chapter 14 Exhibit A - Table 14-8.6-1 "Parking and Loading Requirements" Note 1:



(1) Types of Spaces Allowed

a. All parking spaces shall be designated either "standard" or "small car" or "one size fits all," depending on the size of the car space. However, "one size fits all" spaces may not be used with "standard" or "small car" spaces.

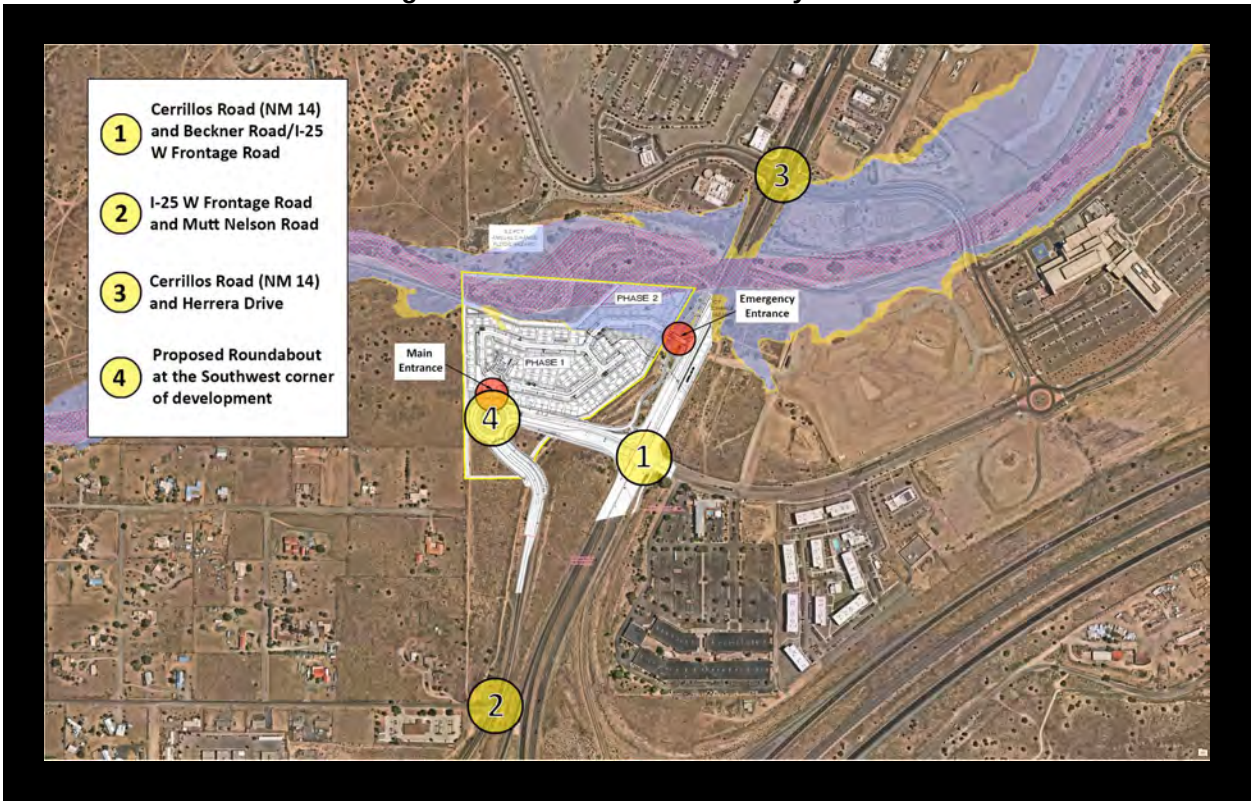
b. Parking lots with ten vehicles or more may have spaces designated for small car use. Up to 20% percent of the total spaces required of a parking lot may be designated for small car use. Small car spaces shall be clearly identified with signs or pavement markings.

The Development Plan shows one location for bicycle parking with twelve (12) proposed bicycle parking spaces in phase 2 of the development. No additional information is included in the plan sets (Reference Figure 5 *"Bicycle Parking"*). It is not clear why the Applicant chose this location for bicycle parking. Staff finds that a better solution would be to redistribute the required bicycle parking at various destinations throughout the development including the club house and pool. This would allow tenants located furthest away from the clubhouse amenities to ride a bike to use the clubhouse amenities. Bicycle parking should be distributed to be in both Phase 1 and Phase 2 of the Development Plan.

Figure 5 Bicycle Parking

The Land Use Technical Review Division has reviewed the development plan parking scheme for compliance with the ADA. Comments and conditions of approval can be found in Attachments A and B.

D. Access and Traffic



The Project proposes two driveways into the property (Reference Figure 6 *"Access and Traffic Study Area"*), and a reconfiguration of the I-25W Frontage Road to include a roundabout. The first and primary access point to the property is off the new roundabout. The second is an emergency access point to the property off Cerrillos Road (NM 14). Both the City and NM Department of Transportation have reviewed the project for access, I-25W Frontage Road upgrades and access to the property. The project is proposed as a gated community with entrance gates on both driveways. Both driveways lead directly to internal driveways and parking areas.

The Applicant submitted a traffic impact analysis (TIA). The TIA study area comprised the following intersections (Reference Figure 6 *"Traffic Study Area"*):

Table 5 Study Intersections

1.	Cerrillos Road (NM 14) and Beckner Road/I-25 W Frontage Road (Signalized)
2.	I-25 W Frontage Road and Mutt Nelson Road (Unsignalized Signalized)
3.	Cerrillos Road (NM 14) and Herrera Drive (Signalized)
4.	Proposed Roundabout at the Southwest corner of development (Roundabout)

Figure 6 Access and Traffic Study Area

The Traffic Impact Analysis (TIA) for the project addresses the development as one hundred and thirty-four (134) multi-family housing units located west of the intersection of Cerrillos Road (NM 14) and I-25 West Frontage Road and Beckner Road. However, the Applicant added seven (7) additional dwelling units with the amended submittal. The extra seven (7) dwelling units had no significant impact on the submitted TIA.

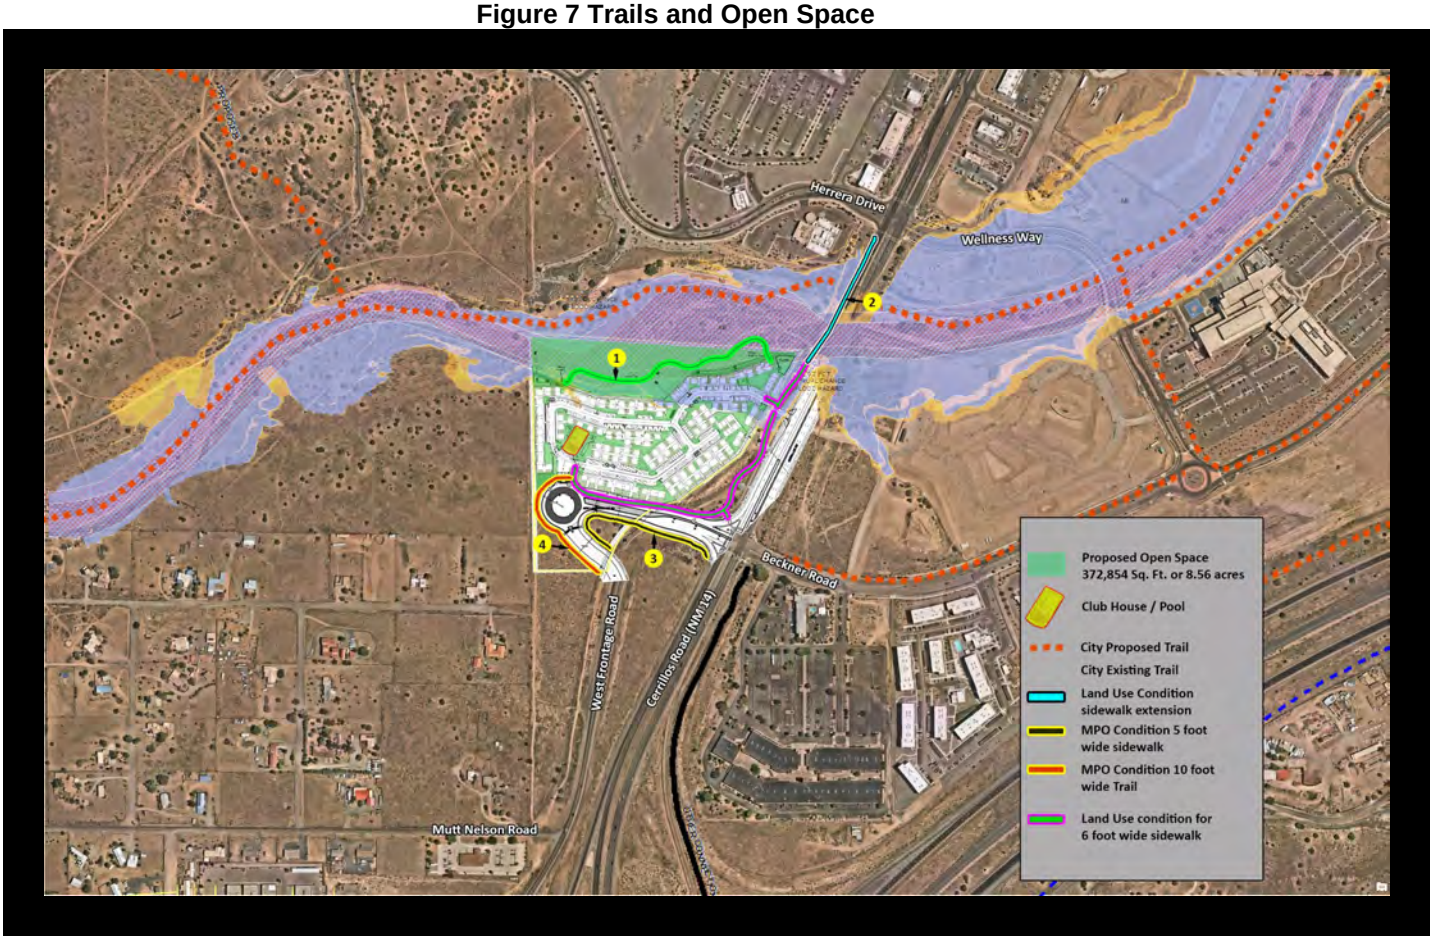
The TIAs purpose was to assess the impact of the proposed development on the surrounding road network and recommend mitigation measures if necessary.

Key findings and recommendations from the TIA include:

1. Current unsignalized intersections operate at acceptable levels of service, with no movements worse than Level of Service (LOS) C. However, certain movements at signalized intersections are below acceptable levels during peak hours.
2. By 2026, with the proposed development, the signalized intersection of Cerrillos (NM 14) and Herrera can maintain an acceptable LOS with potential improvements through signal timing adjustments.
3. The addition of dual eastbound left turn lanes at Cerrillos (NM 14) and Beckner improves LOS for certain movements. Maintaining southbound and eastbound free right turn lanes is recommended for capacity reasons.
4. A proposed roundabout at the southwest corner of the development is expected to operate effectively with a one-lane approach on each leg. If a dual lane roundabout is considered, coordination with NMDOT and the City of Santa Fe is necessary.

5. Recommendations for road infrastructure include maintaining the southbound and eastbound free right configuration for better traffic flow, potential removal of free right turns for bicycle and pedestrian safety, the construction of a deceleration lane into the site from Cerrillos Road, and the retention of a southbound deceleration lane into the West Frontage Road.

Overall, the TIA suggests that with the proposed mitigation measures and improvements, traffic flow and safety can be effectively managed around the new development.



City traffic and NMDOT concur with the Applicant's TIA for this proposed development. Conditions 9 -12 in Section II, "Table 1 "C*ondition of approval",* of this report, identify traffic conditions of approval by the City Traffic Division and NMDOT.

E. Trails

There are no existing City trails on the property. A City trail runs through the Arroyo de Los Chamisos Arroyo (Arroyo). The Arroyo is situated within the City property, adjacent to and north of the property. Trail and sidewalk development is proposed as follows and illustrated in Figure 7. Trails and Open Space:

1. The Applicant intends to create an eight-foot-wide decomposed granite trail through the proposed open space on the north side of the project, connecting the west and east portions of the property.
2. The Current Planning Division has requested a 6' sidewalk instead of a 10' wide trail along Cerrillos Road. The Applicant has committed to extending a six-foot-wide sidewalk from the main entrance, east along the Frontage Road, north along Cerrillos Road and linking to the existing sidewalk at Herrera Drive.
3. The MPO has requested a 5-foot sidewalk on the south side of the realigned West Frontage Road. The applicant will construct a five-foot-wide sidewalk on the south side of the realigned West Frontage Road.
4. The Metropolitan Planning Organization (MPO) has requested that the Applicant build a ten-foot-wide trail to the southern edge of their property. , The applicant is contesting the 10-foot wide Trail and is agreeing to an 8 -foot wide trail (see Figure 7, "Trails and Open Space").

Figure 7 Trails and Open Space

F. Lot Coverage and Open Space

The gross floor area for the project is 190,840 square feet (Phase 1 = 153,880 and Phase 2 = 36,960) with a total roofed area of 140,105 square feet. The project's roofed area equates to a total lot coverage of 21%. Subsection Table 14-7.3-1: "*Table of Dimensional Standards for Nonresidential Districts*" allows maximum lot coverage of 60%.

The proposal requires 250 square feet of common and/or private open space for each multi-family unit. For the proposed 141 units, the required open space amounts to 35,250 square feet. The Development Plan identifies 372,854 square feet or 8.56 acres. A large portion of this open space is along the north boundary of the property within the Arroyo as shown in Figure 7. The Development Plan includes sufficient open space to comply with Chapter 14-7.5 *"Open Space Standards"*.

G. Landscaping

Staff's review found that but for technical corrections, the Development Plan complies with Chapter 14 (§14-8.4 *"Landscape and Site Design").* The technical corrections to the landscape plan are required prior to recordation. The Technical Review Division comments for landscaping can be found in Attachments A and B.

H. Utilities

The proposed water plan for the development will connect to City services for water and sewer (Reference Figure

8 *"Utilities"*).

1. Water

A 16" City water line runs under Cerrillos Road and around the I-25 W Frontage Road. The Applicant's preliminary water plan identifies an 8" extension off the 16" City (Public) water lines to 6" lines around the project road network. 6" lines will connect the apartments from the 8" lines within the development. The 6" lines will connect to Master Meters. From the Master Meters, 3" private lines will provide water service to the dwelling untis. All water lines from the Master Meter to the dwellings will be maintained by the applicant. Dry utilities, such as electrical and internet were not addressed in the applicant's plans.

2. Water Budget

The applicant's water budget identifies 26.71 acre feet per year:

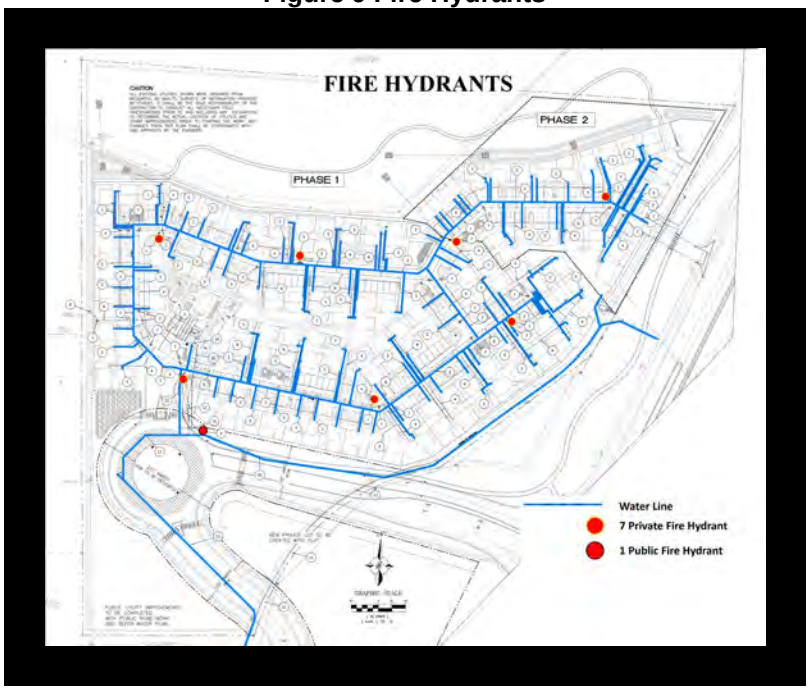
1. 22.56 - 141 x .16 ac-ft/unit,
2. 1.76 ac-ft - Irrigation years 1-3 average, and
3. 2.39 ac-ft - 9.8% line-loss contingency.

However, the Water Resources Division has not approved the final water budget and has included a condition of approval to address this item. Staff recommends adopting a condition that the final water budge be approved by the Water Resources Division prior to recordation.

3. Sewer

The Applicant will extend an 8" sewer line off an existing city (public) 8" sewer main running along the west edge of the property. From the public main the development will use 8", 6" and 4" lines to provided sewer service to the bungalow apartments. The sewer lines from the Public Main will be private and maintained by the Applicant. City Utilities Divisions comments can be found in Attachments A and B.

Figure 8 Utilities



I. Fire

The Project proposes to equip all buildings with automatic fire suppression in accordance with IFC requirements. In addition the project will proposes that:

1. All on-site driveways meet IFC standards for emergency access.
2. Gates will include Opticon gate systems for emergency access.
3. Eight (8) new fire hydrants will be installed (1 public and 7 private) at requisite intervals within the development.

Figure 9 Fire Hydrants

The Fire Marshal comments can be found in Attachments A and B.

J. Lighting

The Applicant has submitted a lighting plan with a photometric analysis. The proposal identifies three light sources for Project lighting:

1. Pole mounted LED canopy fixtures,
2. Walkway bollards, and
3. Wall packs.

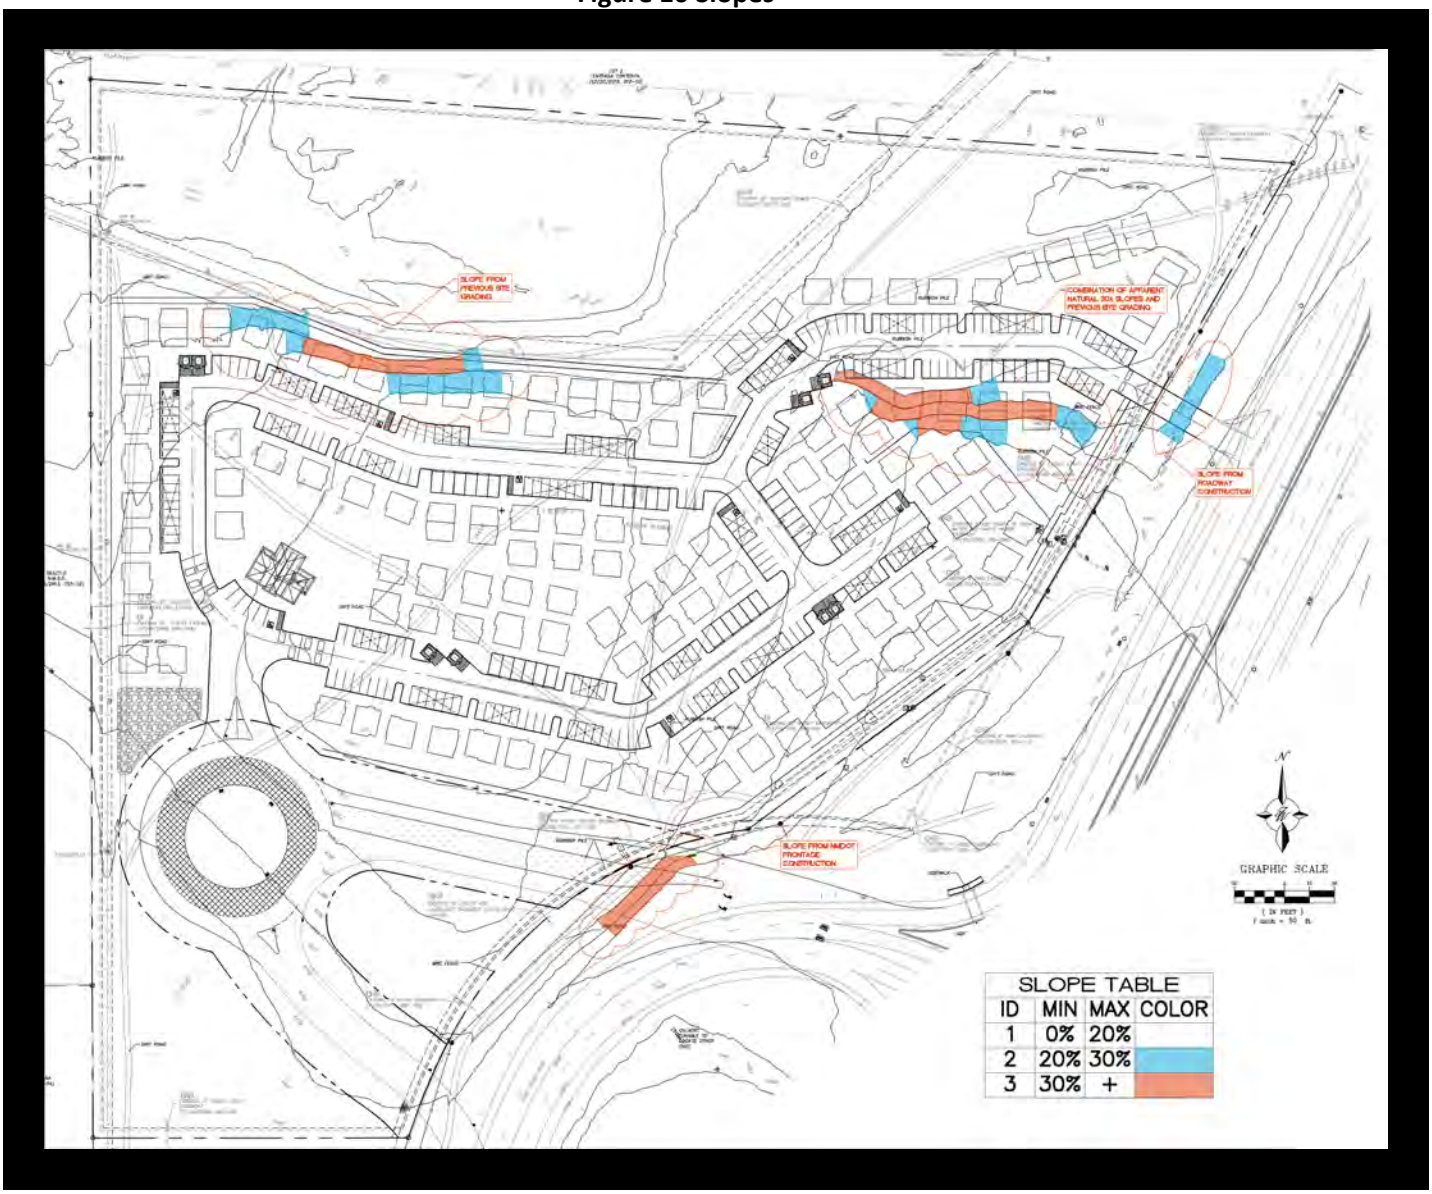
The Applicant's photometric analysis does not comply with §14-8.9 *"Outdoor Lighting"*. Many hot spots exist exceeding horizontal footcandles at grade averages throughout the project, and shielding for wall packs was not addressed. No variance is requested to modify specifications identified in Table 14-8.9-2 *"Horizontal Footcandles at Grade."*

The Technical Review Division has included technical corrections (reference Attachment A and B) requiring compliance with §14-8.9 *"Outdoor Lighting"* prior to recording the Development Plan.

K. Terrain Management

The property has varied slopes from 0 to 30%, much of which was caused by grading from a previous property owner (Toyota). However, there are some areas of native 30% slopes on the property (reference Figures 11 *"Slopes"* and 12 *"30%")*. The Applicant is requesting a variance from SFCC 14-8.2(D)(2)(b) Terrain Management which prohibits disturbance of thirty percent (30%) slopes. The slopes in question occupy an approximate area of 4,800 square feet (see Figure 10 Slopes and Figure 11 30%). The Variance is further discussed in Table 7 "Variance Approval Criteria– Subsection 14-3.16(C) (Variance from 14-8.2(D)(2)(b))."

Figure 10 Slopes



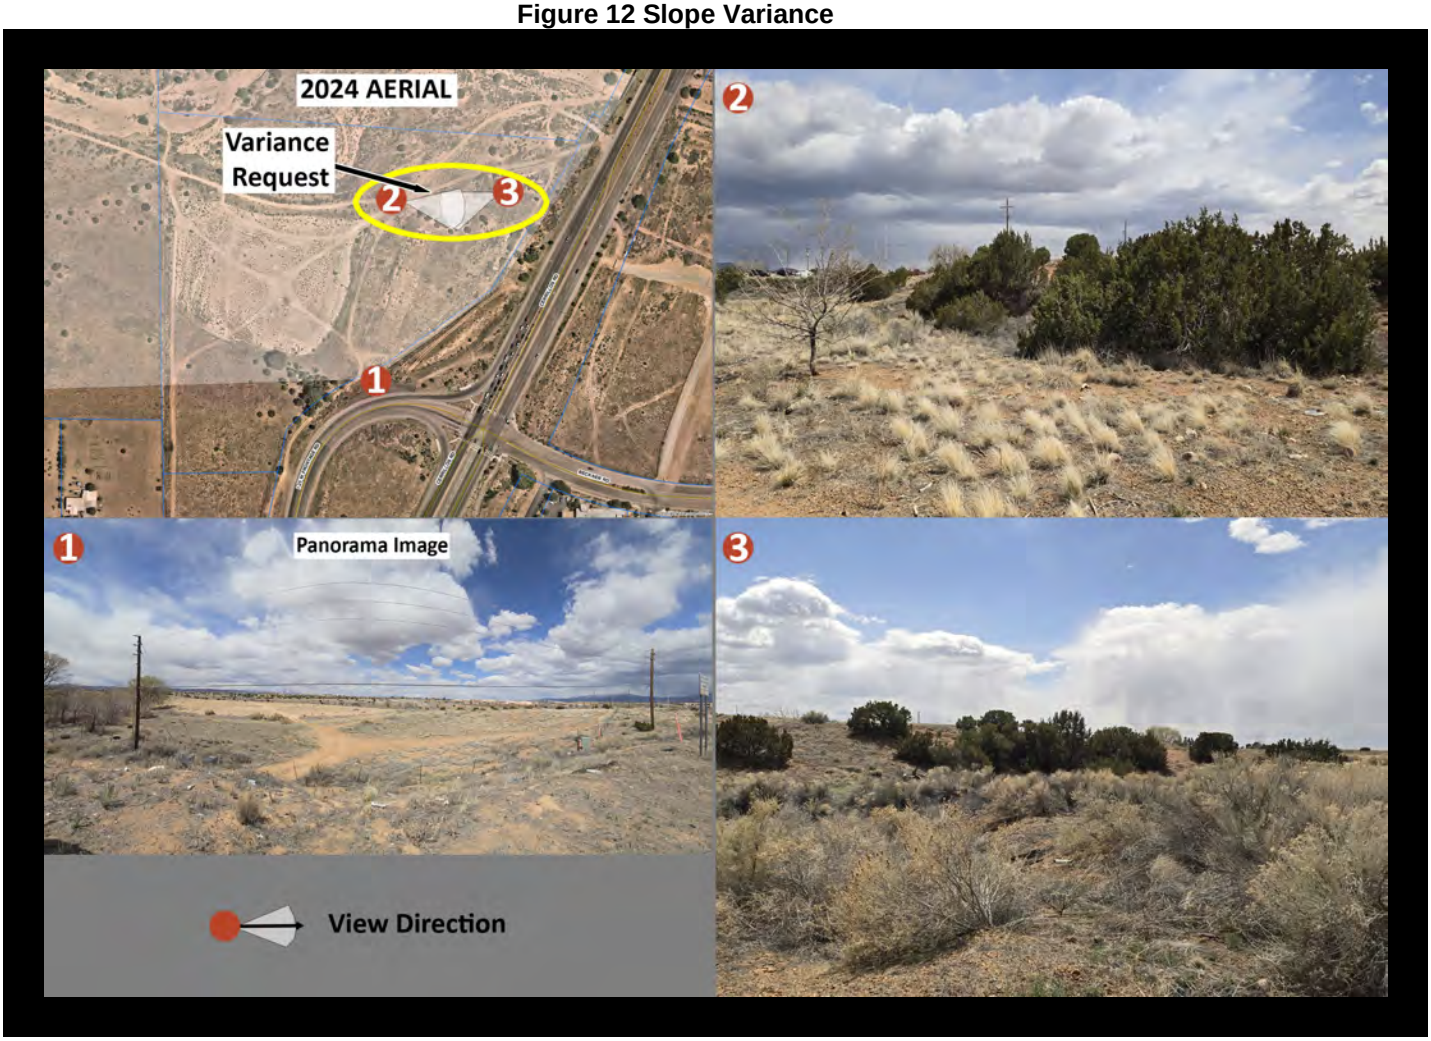


Figure 11 30 Percent Slopes

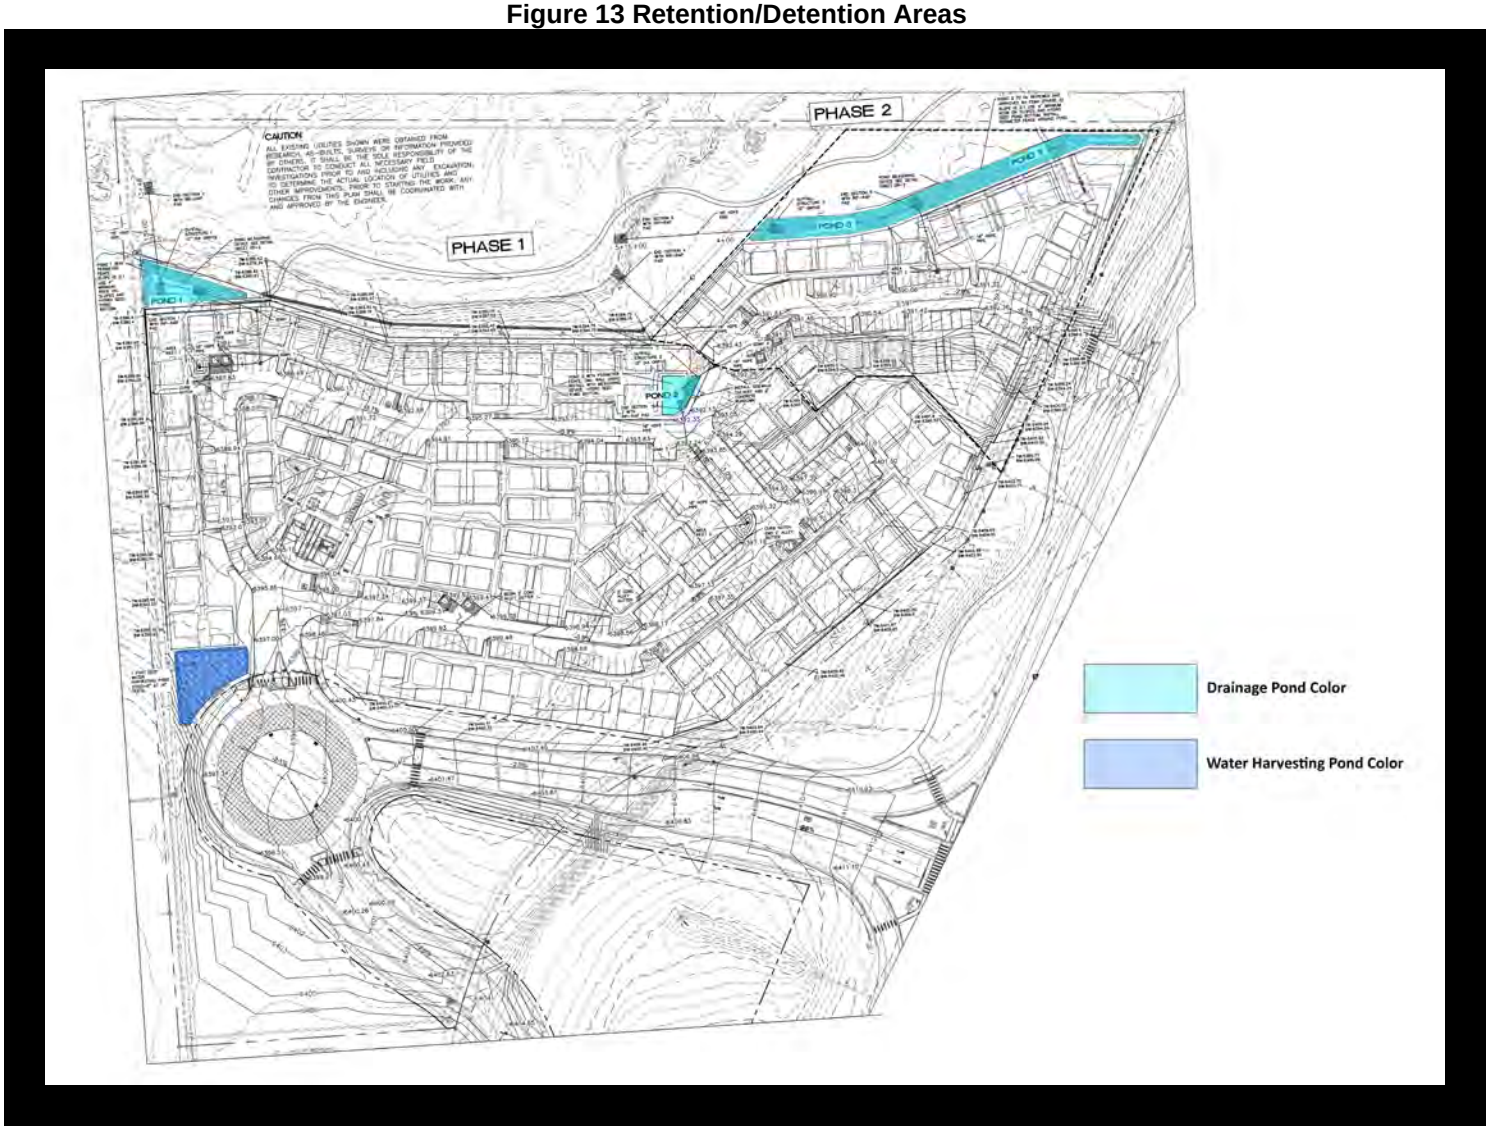

Figure 12 Slope Variance

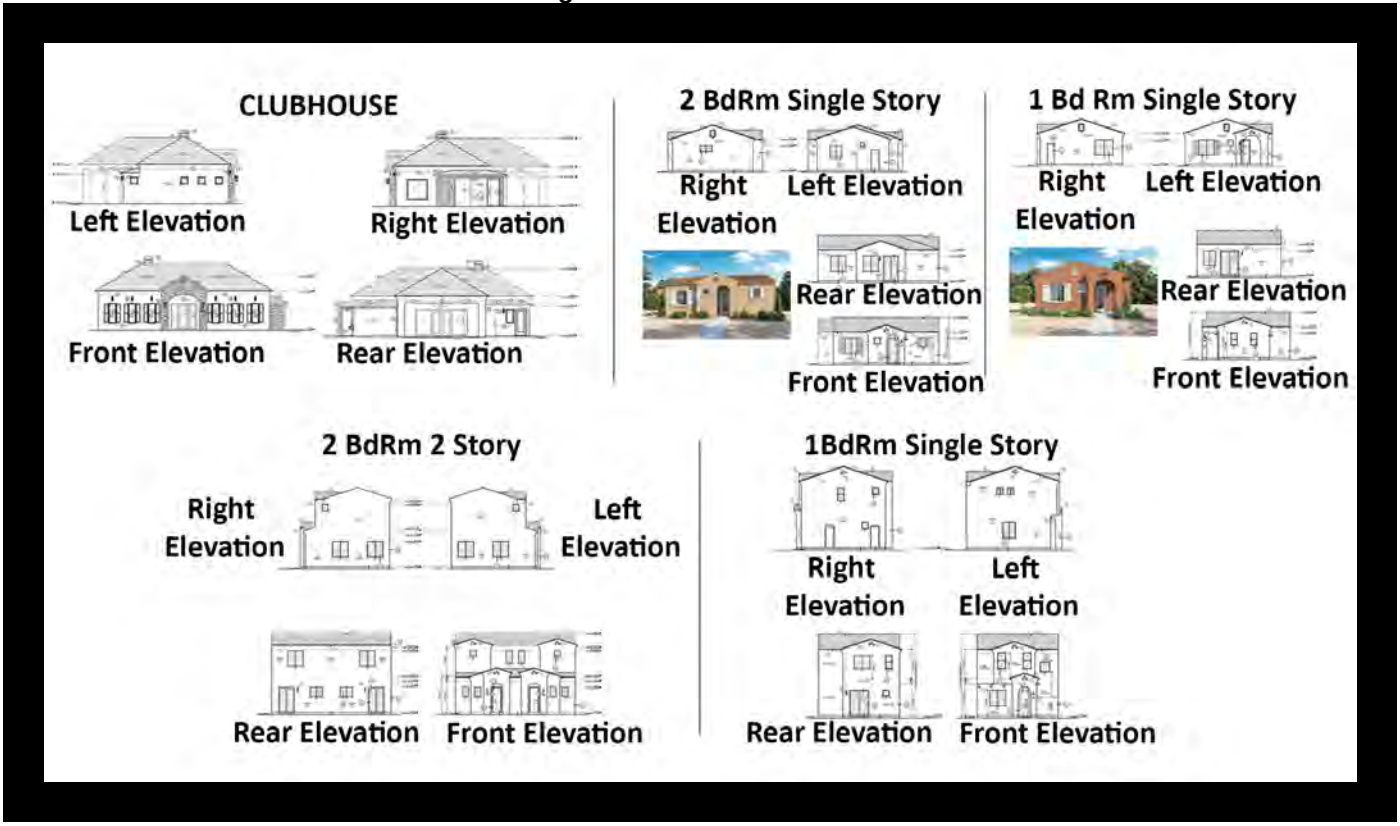
The Applicant is proposing four (4) drainage detention ponds: three (3) drainage ponds and one (1) Water Harvesting Pond Reference Figure 13.

Figure 13 Retention/Detention Areas

Technical Review Division comments can be reviewed in Attachments A and B.



L. Affordable Housing

The Applicant will be paying a fee-in-lieu of construction in order to comply with the Santa Fe Homes Program.

M. Architectural

The Applicant's proposed architecture is a mission revival style. As one of the primary entrances to the City the architectural style must be revised to be consistent with Santa Fe style architecture that is characterized by predominately flat roofs, architectural details that are found in the region including pueblo-revival and territorial revival architecture. Pitched roofs are permitted as long as the structure is of a Northern New Mexico style, but not all roofs can be pitched. While the project resembles single family detached housing, it is a multi-family development in a C-2 District, requiring 205 points on the Architectural Points Checklist. Staff has conditioned revisions to the architectural style to better reflect the local Santa Fe vernacular. The proposed massing of the project includes both one and two-story dwellings.

Figure 14 Architecture

N. VARIANCE APPROVAL CRITERIA

The variance process balances reasonable use of the Applicant's property against compliance with the letter and intent of adopted regulations. The proposed variances for Slope and setback must each be consistent with at least one of the circumstances listed in Criteria 1a through 1d and must be consistent with all of Criteria 2 through 5. The Applicant is proposing a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%), and SFCC 14-5.5 (B)(4)(iii) CRHC Cerrillos Road Highway Protection District of building setbacks.

1. SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%). The purpose of the Terrain and Stormwater Management section is to, "*protect, maintain and enhance the health safety and general welfare of the citizens and natural environment of Santa Fe."* Additionally, the following considerations shall be used during the design and planning process for all proposed developments:
   a. Ensure sound and orderly development of the natural terrain;
   b. Minimize destruction of the natural landscape;
   c. Protect the scenic character of Santa Fe from the visual blight of indiscriminate cuts and fills and vegetation removal; and
   d. Respect, protect, maintain and restore natural drainageways and steep slopes;

Table 6 Slope Variance Approval Criteria– Subsection 14-3.16(C) (Variance from 14-8.2(D)(2)(b))

Criterion 1 (Subsection 14-3.6(C)(1)) as follows: One or more of the following special circumstances applies: **(a) unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid; or** **(b) the parcel is a legal nonconforming lot created prior to the adoption of the regulation from which the variance is sought, or that was created by government action for which no compensation was paid; or** **(c) there is an inherent conflict in applicable regulations that cannot be resolved by compliance with the more restrictive provision as provided in Section 14-1.7; or** **(d) the land or structure is nonconforming and has been designated as a landmark, contributing or significant property pursuant to Section 14-5.2 (Historic Districts).**	**Criterion Met:** (YES/NO) **NO**

The Applicant's response to criterion 1 (Subsection 14-3.6(C)(1)(a-d)) states:
"There are areas with naturally occurring slopes of thirty percent (30%) or greater consisting of 4,765 square feet, which represents .006 percent of the 19.218-acre site. Much of the property has average slopes of five percent (5%). The steep sloped area is a remnant of the original bank of the Arroyo de los Chamisos prior to the construction of the Cerrillos Road improvements and the installation of the bridge carrying storm waters under Cerrillos Road. When that bridge was constructed, the Arroyo de los Chamisos was realigned so that no storm waters flow up to or close to this remnant bank. For the most part, the redirected channel now lies to the north of the site. The original bank remained south the new channel for the Arroyo del los Chamisos, creating a small island of 30 percent slopes. No other property in this zone has this unique characteristic."

Staff's Analysis:
Chapter 14 SFCC, 1987, Subsection 14-3.6(C)(1-5) establishes the approval criteria required to grant a variance. Subsection 14-3.6(C)(1)(a-d) documents the bases for qualifying circumstances particular to the need of a variance. "*The unusual characteristics that distinguish the land or structure from others in the vicinity, subject to the same relevant provisions of Chapter 14"*, allow the City to grant a minimal easing of the regulation to balance strict regulation application appropriate to qualifying circumstances unanticipated within the standards. Failure to qualify all variance criteria prevents the granting of a variance.

Terrain constraints are qualifying factors that present "unusual physical characteristics" of a property. However, the Applicant proposes a sprawling multi-family complex as opposed to vertical construction. The Commission will need to measure the constraint against the specific design of the development to determine whether the constraint poses an impediment or if an alternative design can effectively work around it, thereby eliminating the need for a variance.

Staff's analysis identifies that the Applicant has not satisfied the variance criterion required by Subsection 14-3.6(C)(1). Alternative designs for the site could eliminate the need for a variance.

Criterion 2 (Subsection 14-3.6(C)(2)):	**Criterion Met:**
The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.	(YES/NO) **NO**

The Applicant's response states that:
"The inability to grade the remnant of a portion of the old bank of the Arroyo de los Chamisos will render it infeasible to develop a substantial portion of the property because of the grade that will occur north of the remnant bank. Much of the property will be completed at a single, even grade."

Staff's Analysis:
Nothing within the Applicant's response identifies a "special circumstance" that makes it "infeasible", for reasons other than financial cost to develop the property in compliance with the standards of Chapter 14. Criterion 2 evaluates the need for a variance against compliance with the standards. The Applicant is in control of the project and project design. Alternative designs can eliminate the need to construct within 30% slopes.

Staff's analysis identifies that the Applicant has not satisfied this variance criterion and that it is feasible to develop the property without a variance.

Criterion 3 (Subsection 14-3.6(C)(3)): The intensity of the development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14	**Criterion Met:** (YES/NO) **YES**

The Applicant's response states that:
"The intensity of development does not exceed that which is allowed on other properties."

Staff's Analysis:
Intensity is defined in Chapter 14:

> *INTENSITY*
> *The extent of development per unit of area; or the level of use as determined by the number of employees and customers and degree of impact on surrounding properties such as noise and traffic.*

The Staff analysis identifies the project to be developed within the maximum extent of Chapter 14. With the exception of the slope variance request, the extent of development does not exceed that which is allowed on other properties within the area.

Staff's analysis identifies that the variance criterion required by 14-3.6(C)(3) has been addressed.

Criterion 4 (Subsection 14-3.6(C)(4)): **The variance is the minimum variance that will make possible the reasonable use of the land or structure. The following factors shall be considered:** **(a) whether the property has been or could be used without variances for a different category or lesser intensity of use; and** **(b): consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan.**	**Criterion Met:** (YES/NO) **NO**

The Applicant's response to "4a" states that:

"A disturbance of .005% of the site containing the naturally occurring slopes of the 30% is a minimal disturbance and is the minimum variance that will make the reasonable use of the northern portion of the site for the detached, two-story multifamily structures. The variance is consistent with the purpose and intent of the terrain management restriction of prohibiting disturbances of 30% slopes, because the variance will not:

1. *Increase the threat of flooding and the hazard of improper cuts and fills, or increased erosion and sedimentation;*
2. *Harm the scenic character of Santa Fe from the visual blight of indiscriminate cuts and fills and vegetation removal resulting from extensive grading and utility scars;*
3. *Accelerate stormwater runoff on natural drainage ways and all structures due to increased development and impervious surfaces; or*
4. *Degrade arroyo channels.*

Therefore, under the applicable standard, the variance is the minimum required."

Staff's Analysis (4a):

Reasonable use is not defined in Chapter 14, but it can be deduced that the zoning regulations allow for reasonable use of one's property. The criterion requires the Commission to find that the proposed "variance is the minimum variance that will make possible the reasonable use of the land or structure" using the factors of "4a" and "4b." Only one design for the development has been proposed. The proposed design necessitates the construction on 30% grade slopes where an alternative design may work around the 30% slopes.

Staff's Analysis (4b):

The factual findings necessary to support granting a variance can be inferred from the following General Plan guiding policies:

10-1 GENERAL PLAN AND ZONING CONSISTENCY

10-1-G-1 Ensure consistency between the General Plan and the city's land development laws.

14-1.3 - GENERAL PURPOSES

The purposes of Chapter 14 are to:

(A) implement the purposes of the general plan, including guiding and accomplishing a coordinated, adjusted and harmonious development of Santa Fe that will best promote health, safety, order, convenience, prosperity and the general welfare as well as efficiency and economy in the process of development, and to ensure that the regulations adopted pursuant to this chapter are in accordance with the general plan; and

(B) create conditions favorable to the health, safety, convenience, prosperity and general welfare of the residents of Santa Fe by coordinating streets within proposed subdivisions with existing or planned streets or other features of the general plan; providing parks and trails; providing sewer, water and other infrastructure; providing adequate open space for traffic, recreation, drainage, light and air; and providing for the appropriate distribution of population and traffic.

The Applicant's conditions for the requested variance are not supported by all factors within Subsection 14-

3.16(C) *"Approval Criteria."* Staff's analysis identifies that the Applicant has not satisfied this variance criterion.	
Criterion 5(Subsection 14-3.6(C)(2)): The variance is not contrary to the public interest;	**Criterion Met:** (YES/NO) **NO**
The Applicant's response: *"Along an arroyo, the purpose preserving 30% slopes (i.e., to prevent erosion of arroyo banks, prevent unnatural redirection of arroyo channels and storm water) is not accomplished by preserving a geographic feature that has no relevance to current conditions. Further, preserving the slopes will not protect sensitive wildlife habitat or degrade and enhance the natural aesthetics associated with arroyos. The removal of this remnant bank will not run counter to these goals; there is no storm erosion created or water channel adversely affected, as the channel is no longer in this location, and this patch of 30 slope is neither constitute wildlife habitat nor possesses any aesthetic quality. In short, variance is not contrary to the public interest."* Staff's Analysis: The public interest is much broader than the benefit obtained by an individual or the support or opposition from an Early Neighborhood Notification meeting. Grant any variancemay conflict with the overall public interest if the variance is inconsistent with the City's Land Development Code. The Slope Varianceis a request to construct on 30% slopes which is prohibited per Sant Fe City Code Chapter 14-8.2(D)(2)(b). The Slope Variancerequest does not establish the requirements necessary to grant a variance required by Subsection 14-3.6(C).The Slope Variance is not in the public interest. Staff's analysis identifies that the Applicant has not satisfied variance criterion Subsection 14-3.6(C)(2).	

b.

The applicant requests a variance from SFCC 14-5.5 (B)(4)(iii) CRHC Cerrillos Road Highway Protection District setback for Zone 4. Zone 4 of the CRHC is from Airport Road to the southern city limits. The minimum building setback or yard in Zone 4, as measured from any property line abutting Cerrillos Road right-of-way, shall be forty-five (45) feet. The applicant is requesting a setback of 34 feet.

Table 7 Variance Approval Criteria– Subsection 14-3.16(C) (Variance from 14-5.5(B)(4)(iii))

The applicant requests a variance from SFCC 14-5.5 (B)(4)(iii) CRHC setback for Zone 4. Zone 4 of the CRHC is from Airport Road to the southern City limits. The minimum building setback or yard in Zone 4, as measured from any property line abutting Cerrillos Road right-of-way, shall be forty-five (45) feet. The Applicant requests a setback of thirty-four (34) feet.

Criterion 1 (Subsection 14-3.6(C)(1)) as follows: One or more of the following special circumstances applies: **(a) unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid; or** **(b) the parcel is a legal nonconforming lot created prior to the adoption of the regulation from which the variance is sought, or that was created by government action for which no compensation was paid; or** **(c) there is an inherent conflict in applicable regulations that cannot be resolved by compliance with the more restrictive provision as provided in Section 14-1.7; or** **(d) the land or structure is nonconforming and has been designated as a landmark, contributing or significant property pursuant to Section 14-5.2 (Historic Districts).**	**Criterion Met:** (YES/NO) **NO**

The Applicant's response to criterion 1 (Subsection 14-3.6(C)(1)(a-d)) states:
"The distance from the most westerly southbound lane ranges from 87 to 200 feet from outer edge of the driving lane to the property line. The nearest structure will be 34 feet from the property line. This is a substantial distance when compared to other developments along Cerrillos Road. Las Soleras, as an example, measures 50 feet from the outer-most driving lane to the property line. Entrada Contenta measures 40-50 feet from the outer-most driving lane to the property line. The intent of the regulation was a greater physical separation between roadway and the buildings the further south one traveled along Cerrillos Road. In this case the separation is accomplished by the extraordinary right-of-way that occurs in this section of Cerrillos Road. In addition to the distance from the right of way boundary for Cerrillos Road, this site is burdened with vast expanse of the Arroyo de los Chamisos, which renders approximately 22 percent of the site undevelopable. This condition is a naturally occurring feature. In addition, the improvements required by the New Mexico Department of Transportation will occupy and utilize over 11 percent of the property. However, the impact of the approved I-25 Frontage Road location and design will cut off an additional 5 percent of the property from development."

Staff's Analysis:
As stated in Table 7 in this report, Chapter 14 SFCC, 1987, Subsection 14-3.6(C)(1-5) establishes the approval criteria required to grant a variance. Subsection 14-3.6(C)(1)(a-d) documents the bases for qualifying circumstances particular to the need of a variance. "*The unusual characteristics that distinguish the land or structure from others in the vicinity, subject to the same relevant provisions of Chapter 14"*, allow the City to grant a minimal easing of the regulation to balance strict regulation application appropriate to qualifying circumstances unanticipated within the standards. Failure to qualify all variance criteria prevents the granting of a variance.

Chapter 14 regulations and design standards do not qualify as "unusual physical characteristics" of a property. The applicant is proposing a sprawling multi-family complex with a design that requires waivers of the Code. There are other designs that can achieve the proposed density without requiring a variance to Variance from 14-5.5(B)(4)(iii).

Staff's analysis identifies that the Applicant has not satisfied this variance criterion required by Subsection 14-3.6(C)(1). Alternative designs can eliminate the need for a variance.

Criterion 2 (Subsection 14-3.6(C)(2)):	**Criterion Met:**
The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.	(YES/NO) **NO**

The Applicant's response states that:
The special circumstances described above leave only about 62 percent of the site subject to development for any use. The effect of the 45-foot set back will reduce the number residential units by fourteen (14). "

Staff's Analysis:
Criterion 2 (14-3.6(C)(2)) defaults to a unique qualifying circumstance identified in criterion 1 (14-3.6(C)(1)). Nothing within the Applicant's response identifies a *"special circumstance"* that makes it *"infeasible"*, for reasons other than financial cost to develop the property in compliance with the standards of Chapter 14. Criterion 2 evaluates the need for a variance against compliance with the standards. The Applicant is in control of the design. Alternative designs can eliminate the need to construct within the required setback required by Santa Fe City Code Chapter 14-5.5(B) *"CRHC Cerrillos Road Highway Corridor Protection District"* standards.

Staff's analysis identifies that the Applicant has not satisfied this variance criterion and that it is feasible to develop the property without a variance.

Criterion 3 (Subsection 14-3.6(C)(3)): The intensity of the development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14	**Criterion Met:** (YES/NO) **YES**

The Applicant's response states that:
"The property is C-2 and the intensity of allowable development is unaffected by the grant of the variance. C-2 zoning requirements are performance based, and the proposed development of multifamily is well below what would be allowed on this property using taller, more traditional multifamily units -- the allowed height being 45 feet and the proposed heights being no more than 28 feet."

Staff's Analysis:
Intensity is defined in Chapter 14:

> *INTENSITY*
> *The extent of development per unit of area; or the level of use as determined by the number of employees and customers and degree of impact on surrounding properties such as noise and traffic.*

The Staff analysis identifies the project to be developed within the maximum extent of Chapter 14. With the exception of the Setback variance request, the extent of development does not exceed that which is allowed on other properties within the area.

Staff's analysis identifies that the Project meets variance Criterion 3.

Criterion 4 (Subsection 14-3.6(C)(4)): **The variance is the minimum variance that will make possible the reasonable use of the land or structure. The following factors shall be considered:** **(a) whether the property has been or could be used without variances for a different category or lesser intensity of use; and** **(b): consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan.**	**Criterion Met:** (YES/NO) **NO**

The Applicant's response to "4a" states that:
"In addition to the distance from the right of way boundary for Cerrillos Road, this site is burdened with vast expanse of the Arroyo de los Chamisos, which renders approximately 22 percent of the site undevelopable. In addition, the improvements required by the New Mexico Department of Transportation will occupy and utilize over 11 percent of the property. A reduction of eleven (11) feet in the required set back will allow for the reasonable use of the property and will be in keeping with the intention of the corridor setback, because of the substantial distance from the driving lanes of Cerrillos Road (when compared to other developments along Cerrillos Road). The intent of the regulation was a greater physical separation between roadway and the buildings the further south one traveled along Cerrillos Road. In this case the separation is accomplished by the extraordinary right-of-way that occurs in this section of Cerrillos Road. The variance is, therefore, in keeping with the purpose and intent of the corridor protections."

Staff's Analysis (4a):
Reasonable use is not defined in Chapter 14, but it can be deduced that the zoning regulations are deemed to allow for reasonable use of one's property. The criterion requires the Planning Commission to find that the proposed "*variance is the minimum variance that will make possible the reasonable use of the land or structure"* using the factors of "4a" and "4b." Only one design for the Projecthas been proposed. The proposed design necessitates the requirements for a setback variance where an alternative design may eliminate that need.

Staff's Analysis (4b):
The findings within which a variance can be granted are supported by the general plan guiding policies:

10-1 GENERAL PLAN AND ZONING CONSISTENCY
10-1-G-1 Ensure consistency between the General Plan and the city's land development laws.

14-1.3 - GENERAL PURPOSES
The purposes of Chapter 14 are to:

(A) implement the purposes of the general plan, including guiding and accomplishing a coordinated, adjusted and harmonious development of Santa Fe that will best promote health, safety, order, convenience, prosperity and the general welfare as well as efficiency and economy in the process of development, and to ensure that the regulations adopted pursuant to this chapter are in accordance with the general plan; and
(B) create conditions favorable to the health, safety, convenience, prosperity and general welfare of the residents of Santa Fe by coordinating streets within proposed subdivisions with existing or planned streets or other features of the general plan; providing parks and trails; providing sewer, water and other infrastructure; providing adequate open space for traffic, recreation, drainage, light and air; and providing for the appropriate distribution of population and traffic.

The Applicant's conditions for the requested variance are not supported by all factors within Subsection 14-3.16(C) *"Approval Criteria."*

Staff's analysis identifies that the Applicant has not satisfied this variance criterion.	
Criterion 5(Subsection 14-3.6(C)(2)): The variance is not contrary to the public interest;	**Criterion Met:** (YES/NO) **NO**

The Applicant's response:

"The purpose of the setback was to reduce the impact of development in the corridor from the drivers' perspective. The distance from the most westerly southbound lane is approximately 87 to 200 feet from outer edge of the driving lane to the property line. The nearest structure will be 34 feet from the property line. The multifamily homes will be no more than two stories and will setback from the travel lanes of Cerrillos Road equal to and for most cases greater than the distance of other buildings along Cerrillos Road that comply with the 45-foot building setback. The appearance of the buildings along the Cerrillos Road frontage will have the same visual perception as other buildings along Cerrillos Road with a 45-foot building setback. The variance applies only to Cerrillos Road and has little or no effect on nearby residential neighborhoods, which are limited to the eastern boundary of the property.an arroyo, the purpose preserving 30% slopes (i.e., to prevent erosion of arroyo banks, prevent unnatural redirection of arroyo channels and storm water) is not accomplished by preserving a geographic feature that has no relevance to current conditions. Further, preserving the slopes will not protect sensitive wildlife habitat or degrade and enhance the natural aesthetics associated with arroyos. The removal of this remnant bank will not run counter to these goals; there is no storm erosion created or water channel adversely affected, as the channel is no longer in this location, and this patch of 30 slope is neither constitute wildlife habitat nor possesses any aesthetic quality. In short, variance is not contrary to the public interest."

Staff's Analysis:

The public interest is much broader than the benefit obtained by an individual or the support or opposition from an Early Neighborhood Notification meeting. The granting of the variance may conflict with the overall public interest if the variance is inconsistent with the city's land development laws. The requested variance is a request to construct withing the setback requirement of the CRHC Protection District which is prohibited per Sant Fe City Code Chapter SFCC 14-5.5 (B)(4)(iii). This variance request does not establish the requirements necessary to grant a variance required by Subsection 14-3.6(C). The granting of this variance is not in conjunction with the public interest.

Staff's analysis identifies that the Applicant has not satisfied variance criterion Subsection 14-3.6(C)(2).

V. DEVELOPMENT PLAN APPROVAL CRITERIA

The two pending variances (Slope and Setback) complicate the review and recommendation of the Development Plan. While staff does not recommend approval of the Variances, Staff is recommending approval of the development plan with the condition that if the variances are denied the applicant must revise their development plan and return it to staff for final review and recordation. If the variances are denied the revised Development Plan must comply with the Terrain Management standards (30% slopes) and CRHC Zone 4 setbacks. In considering the Development Plan Chapter 14 requires the Planning Commission to make findings based on the following

approval criteria:

Table 8 Approval Criteria Development Plan Necessary Findings (Section 14-3.8(D))

§14-3.8(D)(1)(a)- that it is empowered to approve the plan under the section of Chapter 14 described in the application;	Criterion Met: (Yes/No) **YES**
Applicant Response: *"Applicant Response: SFCC § 14-2.3 (C)(1) states, "the planning commission shall review and approve or disapprove various specific development plans, requests, and subdivision plats. When specifically authorized by Chapter 14, the decision of the planning commission is final subject to any appeal right provided in this chapter."* Staff Response: Staff agrees with the Applicant's response. The Santa Fe City Code (SFCC) Subsection 14-2.3(D)(1) authorizes the Planning Commission to review and approve or disapprove development plans and subdivision plans. Subsection 14-3.8(B) requires approval of a development plan for projects with a gross floor area of thirty thousand feet or more. The Applicant has addressed the §14-3.8(D)(1)(a).	
§14-3.8(D)(1)(b)- that approving the development plan will not adversely affect the public interest;	Criterion Met: (Yes/No) **YES**
Applicant Response: *"The project serves the public interest through construction of much-needed housing. The project offers benefits to tenants and the surrounding neighborhood by:* *- offering a buildout that is significantly lower in density and allowed height than allowed by right in a C-2 General Commercial District. The maximum building height under 28 ft is significantly lower than the 45 ft allowed.* *- offering high quality architectural home designs surrounded by nicely landscaped and improved, safer pedestrian ways.* *- designing in significantly more open space than required* *- providing more parking than required* *- improving the visual aesthetic along Cerrillos Road and W I-25 Frontage Roads* *- provides a unique "for lease" housing option offering typical multifamily conveniences and amenities in a detached single family and duplex home environment.* *- improving the flow of vehicular traffic by designing two left hand turn lanes onto North bound Cerrillos."* Staff Response: Staff conditionally agrees with the Applicant's response. Additionally, the term *"Public Interest"* is not specifically defined in Chapter 14; however, the Governing Body has implemented the General Plan as stated in Subsection Section 14-1.3 (General Purposes). The resulting ordinances establish minimum standards for health, safety and welfare affecting land uses and developments as a means to protect the public interest from within the municipality.	

The Applicant's mix of vernacular architecture style does not meet the unique Santa Fe Style typically pueblo or territorial or a vernacular of the two. If the Planning Commission's decision is to deny the requested variances listed in Tables 7 and 8 in this report, the Applicant shall resubmit the application in compliance with Santa Fe City code Chapter 14.

Staff has reviewed the proposed development plan application in accordance with these ordinances. Subject to staff recommended conditions of approval, the proposed development plan application complies with minimum standards of Chapter 14 SFCC and would not adversely affect the public interest.

However, while many gated communities have been approved, it should be noted that several Goals and Implementations of the General Plan discourage gated communities:

5-1-G-3
Increase the connectivity between neighborhoods and individual developments. This is addressed through design standards and guidelines included at the end of this chapter.

5-1-G-5
Improve the community orientation of new residential developments. A community orientation calls for greater attention to the relationship between residences, streets, and shared spaces, and does not require sacrifice of privacy or amenities. Gated neighborhoods isolate parts of the community from others and will not be allowed.

5-1-I-14
Do not permit any residential development with six or more units to be gated. All subdivision development must be oriented to the community, not away from it. In order to maintain a community feeling and spirit, gated enclaves should not be permitted. Work with existing residential subdivisions to remove existing gates.

6-1-G-5
Ensure that new development is more "connected" to its surroundings with an increased number of access points and pedestrian and bicycle connections to a neighborhood network. The applicant has addressed the §14-3.8(D)(1)(b).

Subject to conditions. The Applicant has addressed the SFCC §14-3.8(D)(1)(b).

14-3.8(D)(1)(c)- that the use and any associated buildings are compatible with and adaptable to buildings, structures and uses of the abutting property and other properties in the vicinity of the premises under consideration.	Criterion Met: (Yes/No) **YES**

Applicant Response:

"The developable area of the subject property is bordered by the Arroyo de Los Chamisos to the North; Cerrillos Road to the East; W I-25 Frontage Road to the South; and an undeveloped 166-acre tract to the West. Other than the 2-acre residential tract at the Southwest lot corner, no other developed parcel abuts or shares a property line with the Project parcel. As the Project is residential in nature with one

and two story detached homes and duplexes, it is compatible with the other residential uses in the area. In fact, the two-story height proposed for this project is much less than what is allowed in a C2 district. The broader area moving along the W I-25 Frontage Road, Cerrillos Road, and Beckner Road has a mix of residential and commercial uses that include apartments under construction, single family homes, light industrial, retail, auto repair, and a variety of other commercial businesses. Uses in the area enjoy easy access to Cerrillos Road, 599 and the Santa Fe Airport. The proposed use and scale of the Project is compatible with other land uses in the vicinity. The architectural design of the subject property is consistent with the surrounding structures found within the area. Surrounding structures currently employ either pitched roofs, flat roofs, or a combination of both. Existing facades employ stucco, metal and wood elements. Several of the newer residential projects are using clay tile on pitched roofs. Façades are broken up using "push-pull" design techniques, appropriate variations in color, materials, and various patio elements. This approach offers a pleasing visual effect that brings in elements currently found in the area."

Staff response:
Staff conditionally agrees with the Applicant's response. The proposed multi-family complex design mimics the residential massing within the area; However, the architecture deviates from the traditional Santa Fe Style incorporating non-Santa Fe style of vernacular incorporating a mix of vernacular, mission, and bungalow style buildings. A condition of approval has been included within Section to address architectural style.

Subject to conditions. The Applicant has addressed the §14-3.8(D)(1)(c).

VI. EARLY NEIGHBORHOOD NOTIFICATION

The Applicant conducted two ENN meetings: May 3, 2023, (Development Plan) and September 14, 2023 (Variances). The ENNs were well attended by area residents. The applicant presented the proposal in both public meetings, where questions and answers followed.

VII. EXPIRATION

Per Subsection 14-3.19(B)(4) "*Approval of a final development plan, or any development plan for which no preliminary development plan was required, shall expire three years after final action approving it unless actual development of the site or offsite improvements has begun and is continued pursuant to Subsection 14-3.19(B)(6)."*

Should the Commission approve the Development Plan today and the Findings of Facts and Conclusions of Law (FOFCOL) on June 6, 2024, the expiration date would be June 6, 2027. The official expiration date will be established in the FOFCOL.

EXHIBIT A
Technical Corrections
Cases #2023-(7662), (7663) & (7079)
Bungalows on Cerrillos Variances & Development Plan

	Technical Corrections of approval	Department	To be completed by:
1	Bike racks must be installed on a hard surface. Ensure that stabilized crusher fines meet this qualification.	Land Use/ MPO	Prior to recording the Development Plan
2	Significant tree survey, list species and quantities. Existing plant material shall be inspected prior to any demolition. Trees to remain shall be identified as existing and tree species / variety on the landscape plan.	Land Use/Terrain Management-Landscape/Irrigation Review	Prior to recordation
3	City Staff respectfully request the replacement of Pinus edulis / Pinon Pine, with another evergreen tree variety from the City approved plant list. Due to the black scale and bark beetle infestations plaguing Pinon in many areas of Santa Fe.		
4	Reduce shrub quantities by 30% for water conservation needs.		
5	Water conservation and stormwater management shall guide landscape and site planning, design, installation, and management. Landscape planning shall begin early in the development process in conjunction with the requirements of Section 14-8.2 (Terrain and Stormwater Management). Landscape design shall apply the principals of xeriscaping and achieve the highest industry standards for irrigation efficiency. Alternate sources of irrigation water shall be developed, including harvesting water from roof and site runoff. Gray water use is recommended where appropriate. Potable water shall be used only as a back-up or temporary irrigation water source to the greatest extent possible. The purpose of these strategies is to develop drought tolerant landscapes and to reduce the demand on the potable water system. Identify the primary and secondary water sources.		
6	Required open space shrub count is incorrect on sheet L-0.00.		
7	Tree and shrub calculations for retention areas as required by 14-8.4(F). Provide retention pond square footage and lineal footage for street trees. Provide calculations for street trees and spacing averages.		
8	14-8.4(F)(2)(e) stormwater detention ponds and retention ponds shall be planted with appropriate trees, shrubs and grasses, with a minimum of one tree and three shrubs per five hundred (500) square feet of required ponding area. Plants located in the bottom third of the detention pond or retention pond must be adaptable to periods of submersion and may require replacement during periodic maintenance to remove silt:		
9	A water level measuring device with zero set at finish grade located at the center of each pond is required.		
10	Retention ponds deeper than three feet require a security fence and maintenance gate. The fence shall be five in height. The following shall also apply 14-8.4(J) Screening and Buffering, 14-8.5 Walls and Fences.		
11	Storm water storage ponds are not to exceed 1 foot in depth without a verification that storm water will drain within 24 hrs. A percolation test may be required for each pond.

Cases #2023-(7662), (7663) & (7079)
Bungalows on Cerrillos Variances & Development Plan

	Technical Corrections of approval	Department	To be completed by:
12	14-8.4(I)(3) Interior Parking Lot Landscape Requirements (Ord. No. 2014-31 § 34) (a) The purpose of interior planting requirements in parking lots is to provide visual relief from large expanses of cars and pavement, provide shade to reduce heat and glare , help direct traffic flow and reduce and control stormwater runoff. (b) When forty or more off-street parking spaces are provided, interior lot landscaping shall be provided. (d) A minimum of ten (10) square feet of permeable landscaped area shall be provided per parking space. A minimum of one deciduous tree shall be planted per ninety (90) square feet of landscaped area. (e) Traffic islands shall have a minimum dimension of six (6) feet and contain a minimum of ninety (90) square feet of permeable surface, exclusive of curbing, and shall be distributed throughout the lot. As a component of a stormwater management plan, traffic islands may be combined to facilitate water harvesting and these combined islands shall be distributed within each subarea. Provide parking lot tree and shrub calculations.	Land Use/Terrain Management-Landscape/Irrigation Review	Prior to recordation
13	Provide landscape and irrigation to the Cerrillos Road Corridor per 14-5.5 - HIGHWAY CORRIDOR PROTECTION DISTRICTS.		
14	14-8.4(F)(2)(a) all required deciduous trees shall be two (2) inch caliper minimum; 14-8.4 (F)(2)(c) All required evergreen trees shall be a minimum of six (6) feet in height.		
15	City staff respectfully requests two (2) Gymnocladus diocus, Kentucky Coffee tree (Espresso or Prairie Titan varieties), or another tree chosen from the City approved plant list with trunk protection and irrigation within the northeast park. r shade structure.		
16	City Staff respectfully requests all gravel and cobble to be screened and washed.		
17	14-8.4(E)(1) The landscaping plan shall include water harvesting for landscape irrigation purposes as a minimum requirement. Water harvesting that is a primary component of stormwater management may qualify for open space reduction as provided in Section 14-7.5(D)(6). Provide strategic curb cuts at islands and planter stripes for water harvesting.		
18	14-8.4(E)(4)(g) planting beds shall be swaled, sloped or recessed below grade prevent fugitive water.		
19	Turf grass is not permitted within medians and planting strips per City Resolution 2010-66.		
20	No stop & waste valves or automatic drain valves (King Drains) permitted per COSF Irrigation Design Standards.		
21	Irrigation water lines shall not cross city water mains.

COUNTY DEVELOPMENT PERMIT NO.

MAINTENANCE OF ACCESS ROADS AND UTILITY EASEMENTS IS THE RESPONSIBILITY OF THE LAND OWNER/USER UNLESS CURRENTLY MAINTAINED BY THE SANTA FE COUNTY PUBLIC WORKS. (OR THE CITY OF SANTA FE, OR N.M.D.O.T.)

THE APPROVAL OF THIS PLAT DOES NOT CONSTITUTE THE APPROVAL OF ANY FURTHER DEVELOPMENT, INCLUDING BUILDING PERMITS.

EXISTING NATURAL DRAINAGE WAYS WILL NOT BE MODIFIED OR IMPEDED WITHOUT THE WRITTEN APPROVAL OF THE LAND USE ADMINISTRATOR OR COUNTY LAND USE ADMINISTRATOR OR COUNTY HYDROLOGIST. DEVELOPMENT SHALL NOT IMPEDE HISTORIC FLOW RATES OR PATTERNS TO OR FROM THESE LOTS.

THE LANDS SHOWN HEREON LIE WITHIN THE PLATTING JURISDICTION OF THE CITY AND COUNTY OF SANTA FE.

SANTA FE COUNTY'S APPROVAL OF THIS SURVEY PLAT DOES NOT INCLUDE THE CONSTRUCTION OF THE PRIVATE EASEMENT(S) OR ROAD(S) AS SHOWN. PRIOR TO THE CONSTRUCTION OF SAID PRIVATE EASEMENT(S) OR ROAD(S), IT IS REQUIRED THAT AN ADDITIONAL DEVELOPMENT PERMIT BE APPLIED FOR AND THEN APPROVED BY THE SANTA FE COUNTY LAND USE ADMINISTRATOR.

THESE LOTS ARE SUBJECT TO SANTA FE COUNTY FIRE AND RESCUE IMPACT FEES AT THE TIME OF APPLICATION FOR BUILDING PERMIT.

SOILS RATING: PURSUANT TO THE SANTA FE COUNTY LAND DEVELOPMENT CODE, THE SOILS RATING ON THIS PROPERTY IS DESIGNATED AS BEING MODERATE-SEVERE REGARDING LIMITATIONS TO SEPTIC TANKS. POTENTIAL BUYERS/SELLERS OF THIS PROPERTY SHOULD INQUIRE WITH THE NEW MEXICO ENVIRONMENTAL DEPARTMENT WHETHER THESE SOILS ARE SUITABLE FOR A CONVENTIONAL SEPTIC SYSTEM OR IF AN ALTERNATIVE SYSTEM IS REQUIRED.

ALL DEVELOPMENT SHALL OCCUR WITHIN BUILDABLE AREAS AS PER THE SANTA FE COUNTY LAND DEVELOPMENT CODE.

NEW DRIVEWAY/ROAD ACCESS FROM EAST FRONTAGE ROAD IS SUBJECT TO APPROVAL BY N.M.DOT. THE DIRECTOR SHALL APPROVE THE LOCATION AND INSTALLATION OF A CULVERT AS PERMITTED BY SANTA FE COUNTY PRIOR TO ISSUING A PERMIT FOR CONSTRUCTION.

THE PARCELS AS PLATTED HEREON ARE SUBJECT TO SECTION 12.1 OF THE EZO TERRAIN MANAGEMENT REGULATIONS AT THE TIME OF DEVELOPMENT.

WATER SUPPLY ON THESE TRACTS IS GOVERNED BY THE EZO, SECTION 10.1.A.

ALL DEVELOPMENT SHALL OCCUR WITHIN BUILDABLE AREAS AS PER THE SANTA FE COUNTY LAND DEVELOPMENT CODE.

THESE LOTS ARE SUBJECT TO A 30% OPEN SPACE REQUIREMENT. NO DEVELOPMENT MAY OCCUR WITHIN THE DESIGNATED OPEN SPACE.

EARLY NEIGHBORHOOD NOTIFICATION MEETING

August 30, 2023

RE: DATE: September 14, 2023.
Early Neighborhood Notification ("ENN") Meeting; 27794 W I-25 Frontage Road

Dear Neighbor:

This letter is being sent as notice of a neighborhood meeting to discuss the proposed application to the City of Santa Fe ("City") for the "Bungalows on Cerrillos" project which is requesting development plan approval to construct a 141-unit multifamily project of approximately 200,000 gross square feet to be supported by approximately 300 parking spaces as shown on the attached preliminary site plan. Although the project is "for lease" multifamily, it presents on a single-family scale with multiple one- and two-story buildings. The subject property is located at 27794 W I-25 Frontage Road on approximately 19.22 acres of undeveloped land to be platted as two separate lots. The property is zoned General Commercial ("C-2"). Please refer to the enclosed Vicinity Map and Conceptual (Site) Plan. An application has been submitted and will be amended to reflect the following:

1. Development plan of 141 units with approximately 200,000 gross square feet; and
2. A summary subdivision to accommodate relocation of the I-25 West Frontage Road; and
3. A variance request to reduce the 45 ft. building setback set back required at the two Cerrillos Road property lines to 37.5 ft. and 35 ft.
4. A variance request to grade approximately 4,800 sf. of natural 30% slope.

In accordance with the City's Early Neighborhood Notification requirements, this is to inform you that an ENN meeting is scheduled for:

When: September 14, 2023, 5:30 PM Mountain Time
Where: https://santafe.primegov.com/public/portal

Topic: Bungalows on Cerrillos Project – 27794 W I-25 Frontage Road: Development Plan/Summary Subdivision/Variance Requests

Early Neighborhood Notification is intended to provide for an exchange of information between prospective applicants for development projects and the project's neighbors before plans become too firm to respond meaningfully to community input. Enclosed, please find a vicinity map and proposed site plan as well as the responses to the ENN criteria. If you have any questions or comments, please contact me.

Persons with disabilities in need of special accommodations, are hearing impaired, or need an interpreter, please contact the Land Use Department, Geraldine Gurule, Project Administrator, at (505) 955-6820 or email at: gagurule@santafenm.gov five (5) days prior to the meeting date.

Regards,

Brian Nenninger, P.E.

Please address each of the criteria below. Each criterion is based on the Early Neighborhood Notification (ENN) guidelines for meetings, and can be found in Section 14-3.1(F)(5) SFCC 2001, as amended, of the Santa Fe City Code. A short narrative should address each criterion (if applicable) in order to facilitate discussion of the project at the ENN meeting. These guidelines should be submitted with the application for an ENN meeting to enable staff enough time to distribute to the interested parties. For additional detail about the criteria, consult the Land Development Code.

(a) EFFECT ON CHARACTER AND APPEARANCE OF THE SURROUNDING NEIGHBORHOODS For example: number of stories, average setbacks, mass and scale, landscaping, lighting, access to public places, open spaces and trails.

Project Summary: The project applicant is Gift Fund, LLC ("Applicant"). The Applicant proposes to construct a horizontal multi-family development of approximately 139 units being roughly a total of 187,200 sq ft of gross floor area, to be supported by approximately 323 parking spaces, as shown on the preliminary site plan attached. The multi-family development is proposed to be in Santa Fe, New Mexico at the northwest corner of Cerrillos Rd and Beckner Rd. The individual buildings are 1-2 stories high and the buildings will be constructed upon the issuance of building permits on an approximately 19.26-acre parcel of undeveloped land to be platted and recorded.

The average rear setbacks for the multi-family development will be 30-40 ft, with a minimum rear setback requirement of 15 ft. The project aims to provide new trails for pedestrians and maintain the adjacent arroyo. The landscaping and lighting will be in accordance with the City of Santa Fe code and regulations. Additionally, frontage will be dedicated to the New Mexico Department of Transportation to improve the existing frontage road west of Cerrillos Rd. The overall lot will be subdivided into two lots, with the multi-family lot covering 15.34 acres and the second lot covering 1.41 acres with no proposed use at present. The multi-family lot will be developed to 45% and the remaining 65% will be dedicated to open space.

The project objectives are to (i) bring premium multi-family housing to the community at a prominent location, bringing in more residents to the City of Santa Fe which can be crucial to local businesses and the economy as a whole (ii) construct a modern living community that is architecturally pleasing and enhances the brand identity in the City of Santa Fe while also reducing the need for single-family homes that contributes to urban sprawl. (iii) provide high quality housing that provides more affordable housing options for residents, especially for those who may not be able to afford or have the need for a single-family home.

(b) EFFECT ON PROTECTION OF THE PHYSICAL ENVIRONMENT For example: trees, open space, rivers, arroyo, floodplains, rock outcroppings, escarpments, trash generation, fire risk, hazardous materials, easements, etc.

The project is expected to mitigate fire risk by reducing brush. The site is zoned for commercial development and will be cleared and graded. Any hazardous materials generated by the building users will be manifested, transported, and disposed of in accordance with the law. The project site will be landscaped in conjunction with discussions with the city and the community on low water usage mandates. The project is bordered by the Arroyo De Los Chamisos to the north, there are no plans to obstruct or change the natural flow and a letter of map revision will be conducted in the event the development impacts the flood plain elevation. There are no, rivers, rock outcroppings or escarpments on the project site.

(c) IMPACTS ON ANY PREHISTORIC, HISTORIC, ARCHAEOLOGICAL OR CULTURAL SITES OR STRUCTURES, INCLUDING ACEQUIAS AND THE HISTORIC DOWNTOWN For example: the project's compatibility with historic or cultural sites located on the property where the project is proposed.

An archaeological clearance will be obtained, with any mitigation measures identified incorporated into the project. The project area is not a known cultural site and has been graded prior to the annexation of the site in the recent past. Additionally, the site is vacant land hence there are no historical building impacts.

(d) RELATIONSHIP TO EXISTING DENSITY AND LAND USE WITHIN THE SURROUNDING AREA AND WITH LAND USES AND DENSITIES PROPOSED BY THE CITY GENERAL PLAN For example: how are existing City Code requirements for annexation and rezoning, the Historic Districts, and the General Plan and other policies being met.

The development parameters are governed by the underlying C-2 general commercial zoning. The building scale, elevations, and design will echo a modern southwestern townhouse development, desert theme with respect to massing, fenestration, materials, color, texture, shading devices, and lighting. Building height, setbacks and development dimensions will be consistent with the surrounding communities.

(e) EFFECTS ON PARKING, TRAFFIC PATTERNS, CONGESTION, PEDESTRIAN SAFETY, IMPACTS OF THE PROJECT ON THE FLOW OF PEDESTRIAN OR VEHICULAR TRAFFIC AND PROVISION OF ACCESS FOR THE DISABLED, CHILDREN, LOW-INCOME AND ELDERLY TO SERVICES For example: increased access to public transportation, alternate transportation modes, traffic mitigation, cumulative traffic impacts, pedestrian access to destinations and new or improved pedestrian trails.

The project will enhance pedestrian flow and safety by creating sidewalks on Beckner Road and Cerillos Road on the project's frontage. Applicant will also build out the trails required under the Master Plan, thereby enhancing pedestrian amenities for the area. The site plan anticipates accessible parking throughout the site and will have a gated entrance. Street capacity after the implementation of any infrastructure improvements required by the Traffic Improvement Study is expected to be sufficient for the project generated traffic and traffic impacts will be validated by a Traffic Impacts Analysis to be prepared by the applicant and submitted to the city concurrently with its Development Plan approval. The project is working with the NMDOT and City of Santa Fe to work on the realignment of the frontage roadway to allow for better overall development and future extensions of Beckner Roadway to the west.

(f) IMPACT ON THE ECONOMIC BASE OF SANTA FE For example: availability of jobs to Santa Fe residents; market impacts on local businesses; and how the project supports economic development efforts to improve living standards of neighborhoods and their businesses.

In addition to creating spillover economic benefits to the community by allowing for alternate housing options, the proposed project would create jobs in the construction of new residential type developments as well as the real estate industry. The new residents of the multi-family development will also generate property sales tax revenue for the city. The development will boost local businesses, the influx of new residents can lead to increased demand for goods and services from local business, providing a boost to the local economy.

(g) EFFECT ON THE AVAILABILITY OF AFFORDABLE HOUSING AND AVAILABILITY OF HOUSING CHOICES FOR ALL SANTA FE RESIDENTS For example: creation, retention, or improvement of affordable housing; how the project contributes to serving different ages, incomes, and family sizes; the creation or retention of affordable business space.

The project will expand the base housing of the project and then assist in the overall housing need of the area. The project aims to take into consideration the needs of all Santa Fe residents, including different ages, incomes, and family sizes, to ensure a range of housing options. This is achieved by including a mix of unit types, such as one bedroom and multi-bedroom units.

(h) EFFECT UPON PUBLIC SERVICES SUCH AS FIRE, POLICE PROTECTION, SCHOOL SERVICES AND OTHER PUBLIC SERVICES OR INFRASTRUCTURE ELEMENTS SUCH AS WATER, POWER, SEWER, COMMUNICATIONS, BUS SYSTEMS, COMMUTER OR OTHER SERVICES OR FACILITIES For example: whether or how the project maximizes the efficient use or improvement of existing infrastructure; and whether the project will contribute to the improvement of existing public infrastructure and services.

The project will be served by the existing water and sewer infrastructure as well as the existing fire, police, and emergency services. The site is located within the Santa Fe Trails bus route system, with a bus stop within walking distance to the site. The project will be well supported by area Internet, schools, hospitals, and other services.

(i) IMPACTS UPON WATER SUPPLY, AVAILABILITY AND CONSERVATION METHODS For example: conservation and mitigation measures; efficient use of distribution lines and resources; effect of construction or use of the, 1 project on water quality and supplies.

The project will implement water conservation measures as mandated by City policy for landscaping and irrigation. The proposed uses will be relatively water intensive, and the tenants and end users will be encouraged to lower usage through rebates and restrictions imposed by the serving utilities.

(j) EFFECT ON THE OPPORTUNITIES FOR COMMUNITY INTEGRATION AND SOCIAL BALANCE THROUGH MIXED I LAND USE, PEDESTRIAN ORIENTED DESIGN, AND LINKAGES AMONG NEIGHBORHOODS AND RECREATIONAL ACTIVITY AND EMPLOYMENT CENTERS For example: how the project improves opportunities for community integration and balance through mixed land uses, neighborhood centers and/or pedestrian-oriented design.

The project's housing will enhance community integration of the median density development by building out and implementing the vision of the community by allowing an alternate housing mix, this will bring housing to the area and start assisting with the need for housing to support the business in the area. The project sitting next to the project site is the most significant 'employment center' of Los Soleras will be able to serve that area.

(k) EFFECT ON SANTA FE'S URBAN FORM For example: how are policies of the existing City General Plan being met? Does the project promote a compact urban form through appropriate infill development? Discuss the project's, effect on intra-city travel and between employment and residential centers.

As a multifamily infill project, the proposed development builds out an implements the realignment of Beckner as well as providing needed alternate housing. The project utilizes land and infrastructure within the city limits rather than extending development into undeveloped areas outside of the city contributing to urban sprawl. Urban Sprawl can have negative impacts to the city including, increased traffic, reduced access to public transportation, higher cost for infrastructure and decreased quality of life.

However, this project aims to avoid the issues with urban sprawl by developing in a vacant lot within city limits and with existing infrastructure. Additionally, the proximity of the project to commercial uses is a mutually symbiotic relationship, allowing employees to potentially live in close proximity to work, creating important work-life linkages.

City of Santa Fe
Land Use Department
Early Neighborhood Notification
Information & Procedures

Please refer to Section 14-3.1(F) of the Santa Fe City Code for a complete representation of all regulations pertaining to Early Neighborhood Notification

Early Neighborhood Notification
Early Neighborhood Notification (ENN) opens the lines of meaningful communication between the Applicant and impacted neighborhoods before the application process formally starts. The ENN provides an opportunity for neighbors to review, comment, and provide significant feedback on a variety of projects and proposals. The ENN can save the Applicant time and can help to build goodwill.

Projects subject to ENN requirements include:
Any project requiring public hearings before any of the following:

- Board of Adjustment
- Planning Commission

ENN meetings shall be scheduled with the Land Use Department (LUD) prior to sending notice. (Ordinance 2007-45 § 30)

As soon as possible
☐Pick up the ENN packet from the Land Use Department

21 Days before the proposed meeting date
☐ Submit the ENN packet and schedule the meeting date through the Land Use Department

No less than 15 days prior to scheduled meeting:

☐ Mail meeting notice (first class mail) to all of the following located within 300 feet of the subject property:

- •Neighborhood Associations registered with the City
- •Property owners of record
- •Physical addresses

☐ Post the property with notice posters obtained from LUD ($30 each)
☐ Email neighborhood associations registered with the City
☐ Notice shall be postmarked

No later than 10 days prior to the application:
☐ Hold ENN meeting - In a suitable "neutral" location that meets the City's accessibility requirements and has adequate parking

For additional information please contact Geraldine Gurule at 505-955-6820 or by email at gagurule@santafenm.gov

Early Neighborhood Notification
Information & Procedures

Submittals Checklist

In order to schedule an ENN meeting, the following items must accompany the completed *Request for Staff Attendance* Form

- ☐ County Parcel Map depicting properties within 300 feet of property's perimeter – *Available from County Assessor's Office, 102 Grant Avenue*
- ☐ ENN Notification Guidelines (Completed)
- ☐ Legal Lot of Record (Plat) Information indicating current ownership
- ☐ Mailing Log
- ☐ Mailing, Emailing & Posting Affidavit of ENN Notice
- ☐ Owner Authorization Letter
- ☐ Request for Staff Attendance
- ☐ Draft Notice Letter
- ☐ Santa Fe Public Schools Notification Form
- ☐ Site Plan
- ☐ Vicinity Map

Land Use Department Staff Role

Land Use Department staff is here to help, answer questions, and even facilitate or mediate the meeting if necessary.

Additional Materials Necessary for the ENN Meeting

- ☐ Copies of the Completed Early Notification Guidelines (Ord. No. 2002-12 § 10)
- ☐ Drawing(s) showing at a minimum labeled streets and structures within a 300-foot radius from the perimeter of the property or properties, excluding rights-of-way (Ord. No. 2007-45 § 30)
- ☐ Sign-In sheets
- ☐ Site Plan
- ☐ Vicinity map

Visit www.santafenm.gov to view currently scheduled ENN meetings. From the left hand menu choose Early Neighborhood Notifications.

The Santa Fe City Code is available on line at:
www.santafenm.gov >Departments>Land Use>City Zoning Code

EARLY NEIGHBORHOOD NOTIFICATION MEETING

<<Date, 2020>>

Dear Neighbor:

Applicant name is requesting (list request/proposal here including variances and waivers).

In accordance with the requirements of the City of Santa Fe's Early Neighborhood Notification regulations, this is to inform you that a meeting is scheduled for:

Time: ***5:30 PM***
When: ***Day, Date, 2020***
Where: ***Location***
Location address
Santa Fe, NM 8750_

Early Neighborhood Notification is intended to provide for an exchange of information between prospective applicants for development projects and the project's neighbors before plans become too firm to respond meaningfully to community input.

Attached, please find a vicinity map and proposed site plan. If you have any questions or comments, please contact (***Contact Name, Phone number, email address).***

Sincerely,

Your name here

Attachments:
Vicinity map

Early Neighborhood Notification Meeting Notes

Project Name	ENN: Development plan with variances
Project Location	27794 W I-25 Frontage Road
Project Description	Applicant requests development plan approval for a 141-dwelling multi-family development totaling 186,600 square feet of new construction with variances to SFCC 14-5.5 (B)(4)(iii) CRHC (setback) and 14-8.2(D)(2)(b) Terrain Management (30% slopes). The Property is approximately 19.26 acres.
Applicant / Owner	Advanced Acquisitions, LLC
Agent	Orion-West LLC.
Pre-App Meeting Date	June 23, 2022
ENN Meeting Date	May 3, 2023 (Development Plan) and September 14, 2023 (Variances)
ENN Meeting Location	Virtual meeting via Zoom
Application Type	Development Plan with two variances
Land Use Staff	Dan Esquibel
Other Staff	Maggie Moore
Attendance	The ENN meeting was virtual using Zoom. Numbers not available.

Notes/Comments:
The ENN started at 5:35 PM. The agent presented the proposal followed by a series of questions.

The Applicant conducted two ENN meetings: May 3, 2023, (Development Plan) and September 14, 2023 (Variances). The ENNs were well attended by area residents. The applicant presented the proposal in both public meetings, where questions and answers followed.

Case #2023-7079 - 27794 West I-25 Frontage Road, Bungalows on Cerrillos

Case Mgr: Dan Esquibel, AICP Senior Planner

Review of the developer's TIA and associated development plans by this division/department has determined that this application will meet applicable standards if the following are met:

Conditions of Approval:	Must be completed by:
1. Note that primary access for the development is on NMDOT Frontage Road (see attached TIA approval letter from NMDOT with conditions to be met prior to issuance of building permit). 2. Note that driveway on Cerrillos Road is for emergency access only. Plan Set to include a roadway signage and striping plan to be reviewed/approved by NMDOT and City Traffic Engineer for respective jurisdictions.	Prior to filing the Development Plan

Technical Corrections*:	Must be completed by:
1. None	N/A

*Must made prior to recording and/or permit issuance

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [None]

Re: Cavan Multi Family Development TIA Review

Dear Mr. Pacheco,

On behalf of the City of Santa Fe, Wilson & Company has completed review of Cavan Multi Family Development TIA for compliance with the New Mexico Department of Transportation State Access Management Manual and Chapter 14 Land Development Code. A traffic engineering review was performed for conformance with existing applicable codes and traffic engineering standards (e.g. MUTCD, NMDOT - State Access Management Manual, NMDOT Standard Specifications, City of Santa Fe Public Works standards, and Land Development Code - Chapter 14, etc.). This review does not replace the developer's Engineer-of-Record's professional responsibility for modeling, traffic data collection, methodology, and data analysis.

Technical Corrections*:	
	Must be completed prior to Planning Commission

* Must be completed prior to recording and/or permit issuance.

Thank you,

Philip A Gallegos

Re: Cavan Multi-Family Development in Santa Fe, on I-25 West Frontage Road

The District Five Traffic Section has reviewed the subject Traffic Impact Analysis (TIA) by Carl Vermillion, P.E. of Bohannan Huston Inc., dated July 20, 2023. The District concurs with the report's "Conclusions and Recommendations" in Section VIII in regards to the improvements to the signalized intersection, proposed Roundabout and Frontage Road realignment. The TIA has meet New Mexico Department of Transportation (NMDOT) requirements and is approved.

This development will require an access permit submitted to NMDOT along with Roadway Improvement Plans for the project. The access control line will need to be modified and approved by the NMDOT Access Control Committee. Right of Way will need to be dedicated to NMDOT by the property owner for the realignment of the Frontage Road. Your design Engineer should contact the District Five Traffic Section to discuss the access permit application. If you have any questions feel free to contact me at 505-500-2360.

SUBJECT: Cavan Multi-Family Development Traffic Generation Update

Dear Applicant:

The traffic section has reviewed your letter dated 2/12/2024 regarding the change in dwelling units for the development. We are in agreement that this change has minimal impact to the original Traffic Impact Analysis and would not create any additional improvements that are recommended in the original study.

If you have any question regarding this matter, please do not hesitate to contact me at (505) 500-2360.

Thank you,

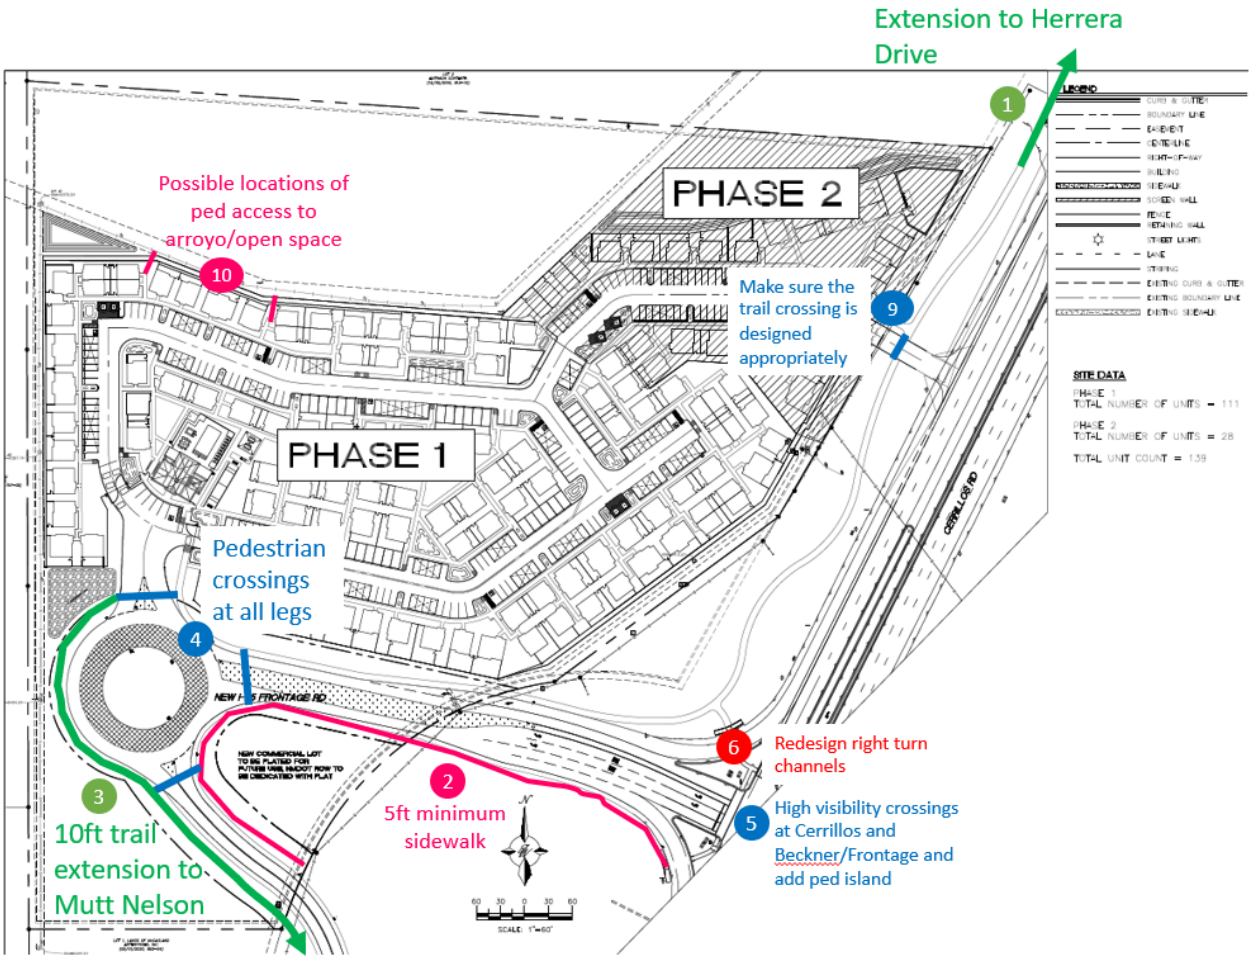
Case No.: **Case #2023-7079. 27794 West I-25 Frontage Road, Bungalows on Cerrillos Development Plan.**

Case Planner: Dan Esquibel

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	Must be completed by:	Applicant response:
1. Extend the north/south sidewalk parallel to Cerrillos to the intersection with Herrera Drive.	Prior to Public Hearing	
2. Illustrate on the development plan a new sidewalk on the south side of the NM I-25 Frontage Road to conform to city street design standards	Prior to Public Hearing	
3. Illustrate on the development plan a 10ft sidepath along the west side of the NM I-25 Frontage Road to the property line, as detailed in the Santa Fe Bicycle Master Plan	Prior to Public Hearing	
4. Illustrate on the development plan pedestrian crossings to each leg of the roundabout	Prior to Public Hearing	
5. Improve pedestrian crossing safety by illustrating on the development plan high visibility crosswalk markings on all legs of the Cerrillos/Beckner/Frontage intersection and adding a pedestrian refuge island to the southern crossing of Cerrillos.	Prior to Public Hearing	
6. Redesign the right turn slip lanes onto and off of the frontage road to limit speeds to 15mph or less.	Prior to Public Hearing	
7. Evaluate, select, and design additional pedestrian safety countermeasures at the Cerrillos intersection such as a pedestrian signal, leading pedestrian intervals, etc.	Prior to Public Hearing	
8. Add two bus stops (northbound/southbound) to the development plan per Santa Fe Trails request and in accordance with Santa Fe Trails design and location criteria. Coordinate with Santa Fe Trails on design & location.	Prior to Recordation	
9. Ensure the trail crossing at the Cerrillos emergency access is appropriately designed with ramps, etc.; demonstrate this on the development plan	Prior to Public Hearing	



Form Updated: September 2023

10. Add on the development plan a pedestrian exit to the northern property boundary to enable access to the arroyo and open space.	Prior to Public Hearing	

Technical Corrections:	Must be completed by:	Applicant Response:
1. Bicycle racks must be installed with appropriate spacing from walls and pedestrian aisles as detailed in the attached city code; demonstrate this on the development plan	Prior to Public Hearing	

Explanation of Conditions or Corrections (if needed):

Preface:
The MPO strongly believes that it is irresponsible to develop housing in an area that will channel all residents through a high speed, high volume intersection without other options to access the majority of goods, services, and employment opportunities. Our public engagement conducted for our transportation planning documents indicates that Santa Fe residents want and need a full suite of transportation options. The majority of people in Santa Fe walk and/or bike for some of their trips, as indicated by the Metropolitan Transportation plan. Therefore, we can expect that this residential development will lead to increased pedestrian and bicycle traffic in the area, where currently no bicycle or pedestrian facilities exist. This creates a necessary burden for the developer to provide, connect, and improve the infrastructure to protect the future residents.

Form Updated: September 2023

1. Extend the north/south sidewalk parallel to Cerrillos to the intersection with Herrera Drive.

Terminating the asphalt trail at the property boundary creates an environment without safe pedestrian or bicycle access to the amenities to the north of the development. The trail should be continued to the north to connect into the Herrera Drive sidewalk so that residents can access the bus stops and businesses north of the development. Without this extension, there will be no safe or accessible access to transit.

2. Illustrate on the development plan a new sidewalk on the south side of the NM I-25 Frontage Road to conform to city street design standards

City code calls for 5 foot sidewalks with a 5 foot landscape buffer on collectors (see below). The north side of the road has a trail, which satisfies this requirement, but the south side needs a sidewalk as well tying into the Cerrillos/Beckner intersection.

Table 14-9.2-1: Design Criteria for Street Types

(Ord. No. 2013-16 § 59)

TABLE 14-9.2-1: Design Criteria for Street Types

Number of Auto Lanes	6—7 Note 2	4—5 Note 2	2—3 Note 2	2	2	2	2	2	1
Width of Driving Lanes	11	11	11	10	10	9	10	9	10
Median/Turn Lane Width	18	18	14	NR	NR	NR	NR	NR	NR
Minimum Bikeway Width	5	5	5	4	NR	NR	NR	NR	NR
On-Street Parking Width	NA	NA	NA	NA	6 Note 3	NA	6 Note 4	NA	NA
Curb & Gutter	2	2	2	2	2	2	2	2	NR
Minimum Sidewalk Setback	5	5	5	5	NR	5	5	0 or 5 Note 1	NR
Minimum Sidewalk Width	6	6	5	5	7	5	5	5	NR

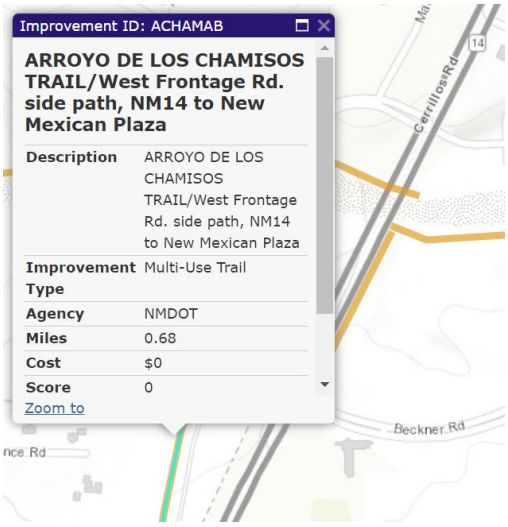
Notes:

NA - Not Applicable

NR - Not Required

1. Refer to Subsection 14-9.2(C)(8) for additional standards for lanes and *lot* access driveways. *Lot* access driveway standard applicable to access from *street* to not more than eight single family *lots*.

2. Includes Median/Turn Lane



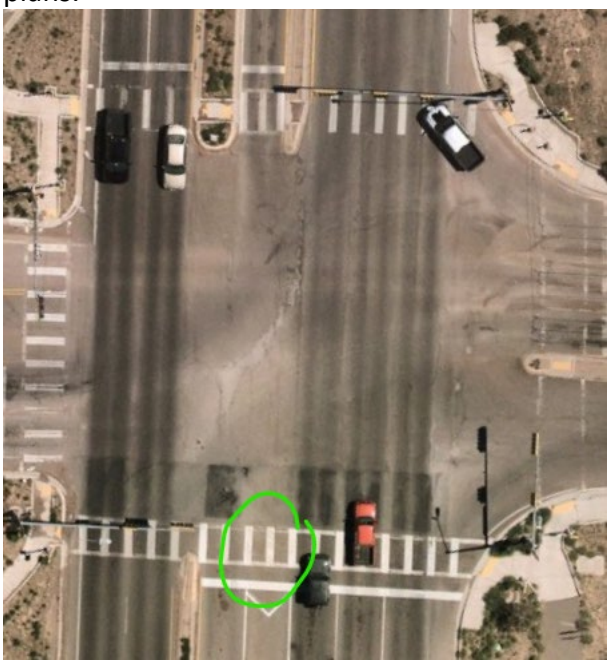
3. Parking required on both sides of *street*, except no parking on that side of a *street* adjoining the plaza.

4. Parking may be on one side or both sides of the *street*; parking lane should not be continuous.( )

All measurements in feet, unless otherwise noted.

3. Build a 10ft sidepath along the west side of the NM I-25 Frontage Road to property line, as detailed in the Santa Fe Bicycle Master Plan

The Santa Fe Bicycle Master Plan calls for a sidepath multiuse trail on the western side of the frontage road. The proposed asphalt trail should be extended through the property and along the frontage road with a proposed ending at Mutt Nelson instead of full completion of the trail at the New Mexican Plaza.



4. Add pedestrian crossings to each leg of the roundabout

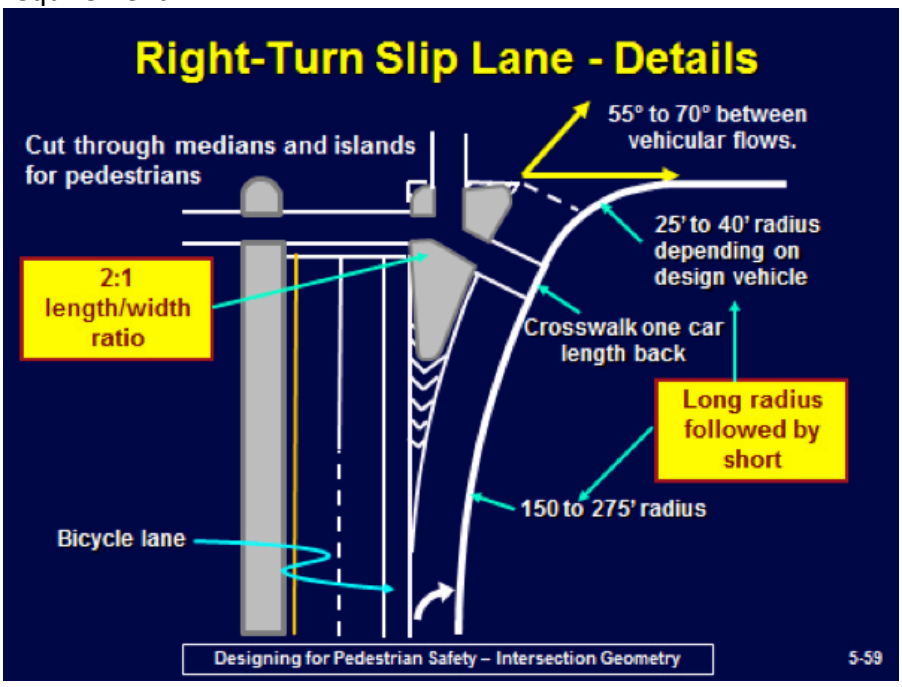
With the trail and sidewalk extensions, each leg of the roundabout should have high visibility bicycle and pedestrian crossings with refuge islands.

5. Improve pedestrian crossing safety by illustrating on the development plan high visibility crosswalk markings on all legs of the Cerrillos/Beckner/Frontage intersection, including slip lanes, and adding a pedestrian refuge island to the southern crossing of Cerrillos.

With residential density on the west side of Cerrillos and many destinations on the east side of Cerrillos, ensuring the Cerrillos crossing is safe for pedestrians is critical. High visibility continental crosswalk striping should be added and/or rehabilitated on each side of the Cerrillos and Beckner/Frontage crosswalk.

On the southern crossing on Cerrillos road, there is not a pedestrian refuge island as seen on the northern crossing. A minimum 6ft wide pedestrian island should be demonstrated on the plans.

Form Updated: September 2023



6. Redesign the right turn slip lanes onto and off of the frontage road to limit speeds to 15mph or less.

The existing channelized right turn lanes are designed to facilitate high speed right turns. In the existing context without significant bicycle or pedestrian traffic this may be appropriate, however, the addition of a residential community that necessitates residents to use this intersection for all modes of transportation creates a significant safety concern.

NACTO guidelines recommend a turning speed of 15mph or less for pedestrian safety. https://nacto.org/publication/urban-street-design-guide/intersection-design-elements/corner-radii/

The northern turning radius is approximately 140 ft and the southern turning radius is approximately 120 ft. These far exceed the minimum turning radii in the City Code (25ft) and the minimum needed to accommodate large vehicles (35 ft) (14-9.2 (c)(6)(f)). The large turning radii are dangerous for pedestrians because they allow for high speed turning which makes it more difficult for vehicles to stop if there is a pedestrian. Pedestrian likelihood of fatality and severe injury increases exponentially as vehicle speed increases. Additionally, there are not traffic control devices for this crossing relying on drivers to see the pedestrian, and the channelization increases the pedestrian crossing distance.

The right turn channels should be redesigned for safety as shown in FHWA guidance to improve visibility and reduce speeds. This should include narrowing the existing lane to the minimum requirement.

http://www.pedbikesafe.org/pedsafe/countermeasures_detail.cfm?CM_NUM=24

If designs other than the above are considered, the turning speed must still be limited to 15mph.

Curb radius resources:
https://safety.fhwa.dot.gov/older_users/fhwasa15088/ch2.cfm#ss17
https://safety.fhwa.dot.gov/saferjourney1/library/countermeasures/09.htm

Form Updated: September 2023

http://www.pedbikesafe.org/pedsafe/countermeasures_detail.cfm?CM_NUM=28#

7. Evaluate, select, design, and implement additional pedestrian safety countermeasures at the Cerrillos intersection.

Urban SDK speed data at Cerrillos and Beckner/Frontage road indicate that 85th percentile vehicle speeds are around 40mph at this intersection. Because the higher speeds are more dangerous for vulnerable road users such as pedestrians and bicyclists, additional safety countermeasures should be selected and implemented in coordination with the NMDOT to improve the safety of this intersection. These countermeasures could include:

- A pedestrian signal or rectangular rapid flashing beacon to cross the right turn slip lanes to/from the frontage road
- Leading pedestrian intervals
- Two-stage pedestrian crossings

8. Add two bus stops (northbound/southbound) to the development plan per Santa Fe Trails request and in accordance with Santa Fe Trails design and location criteria. Coordinate with Santa Fe Trails on design & location.

The TIA States on page 9 "The Santa Fe Trails bus system services parts of Santa Fe. Bus route 22 travels north and south on NM 14 in the project area, but the nearest stop is at Herrera and NM 14. As development occurs in this area of Santa Fe, coordination with the Santa Fe Trails bus system should occur to discuss the possibility of adding additional bus stops along this route."

Convenient and safe access to transit stops should be an essential requirement for this project. Rather than put the burden of providing bus stops on the City of Santa Fe, the developer should incorporate the design of two bus stops into their plans. The developer should coordinate with Santa Fe Trails directly on location and design criteria. If Santa Fe Trails is not ready to expand service at the time of development, they have committed to storing the completed shelters until service can be expanded.

9. Ensure the trail crossing at the Cerrillos emergency access is appropriately designed with ramps, etc.

The plan set is not clear on how the emergency access road from Cerrillos will cross the trail. The crossing should include ramps if they will be built at different grades and any other crossing requirements.

10. Add a pedestrian exit to the northern property boundary to enable access to the arroyo and open space.

The Santa Fe Pedestrian Master Plan includes connectivity to recreation spaces as an overarching goal. The Arroyo Chamiso north of the property can provide an opportunity for walking and recreation to the development's residents. Increasing access to this asset via a pedestrian path and gate on the north side of the property will help meet this goal.

Technical Corrections:

The plan set indicates that bicycle racks must have 1 foot clearance on all sides. The clearance is actually determined by how the rack is installed relative to nearby walls and sidewalks. See the below specifications to determine bike rack placement.

The screenshot to the right shows the placement of the bike rack (24) too close to the adjacent walls and pedestrian walkway.

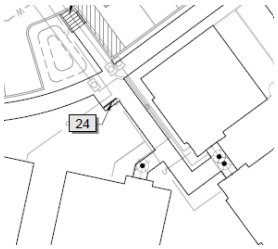


Exhibit D - Bicycle Rack Standards and Dimensions
(Subsection 14-8.6(E))

Racks:
- Inverted U type bicycle racks are the required bicycle parking rack.
- Each rack must be securely anchored and accommodate a bicycle frame where one wheel can be locked to the rack with a high security, U-shaped shackle lock if both wheels are left on the bicycle.
- A space of two (2) feet by six (6) feet (12 square feet) must be provided for each required bicycle parking space so that a bicycle six (6) feet long can be securely held with two points supported so that the bicycle cannot be pushed, or fall in a way that would damage the bicycle frame, wheel, or components.
- All racks must provide two points of contact with the frame at least 6" apart horizontally.
- If a bicycle corral is sought within a public street right-of-way, all design elements shall be developed in coordination with and approved by the city of Santa Fe public works department and parking division.

Distance to other racks:
- Racks placed parallel to each other (side by side) must be at least thirty-six (36) inches apart, this includes rack units sold as multiple units attached together.
- Racks aligned end to end must be at least ninety-six (96) inches apart.

Distance from wall:
- Racks placed perpendicular to a wall must be at least forty-eight (48) inches from the wall to the nearest vertical component of the rack.
- Racks parallel to a wall must be at least thirty-six (36) inches from the wall.

Distance from curb:
- Racks placed perpendicular to a curb must be at least forty-eight (48) inches from the curb to the nearest vertical component of the rack.
- Racks placed parallel to a curb must be at least twenty-four (24) inches from the curb to the rack.

Distance from pedestrian aisle:

- Rack units perpendicular to a pedestrian aisle must be at least forty-eight (48) inches from the rack to the edge of the aisle, and the pedestrian aisle should be at least sixty (60) inches wide.

Parking and maneuvering areas:

- Each required bicycle parking space must be accessible without needing to move another bicycle.
- There must be an aisle of at least five (5) feet wide behind all required bicycle parking to allow for maneuvering of the bicycle. Where bicycle parking is next to a sidewalk, the maneuvering area may extend into the sidewalk.
- The area devoted to bicycle parking must be hard surfaced.

Staff person: Lawrence Rivera

Dept. /Div.: Land Use/Terrain Management- Landscape/Irrigation Review

Case: #2023-7079. **27794 West I-25 Frontage Road, Bungalows on Cerrillos Development Plan.**

Case Manager: Dan Esquibel, daesquibel@santafenm.gov, 505 955-6857

Review by this division/department a site visit with applicant's representatives has determined that this application will meet applicable standards if the following are met:

Conditions of Approval:	Must be completed by:

Technical Corrections*:	Must be completed by:
1. significant tree survey, list species and quantities. Existing plant material shall be inspected prior to any demolition. Trees to remain shall be identified as existing and tree species / variety on the landscape plan.	Prior to recordation
2. City Staff respectfully request the replacement of Pinus edulis / Pinon Pine, with another evergreen tree variety from the City approved plant list. Due to the black scale and bark beetle infestations plaguing Pinon in many areas of Santa Fe.	Prior to recordation
3. Reduce shrub quantities by 30% for water conservation needs.	Prior to recordation
4. Water conservation and stormwater management shall guide landscape and site planning, design, installation, and management. Landscape planning shall begin early in the development process in conjunction with the requirements of Section 14-8.2 (Terrain and Stormwater Management). Landscape design shall apply the principals of xeriscaping and achieve the highest industry standards for irrigation efficiency. Alternate sources of irrigation water shall be developed, including harvesting water from roof and site runoff. Gray water use is recommended where appropriate. Potable water shall be used only as a back-up or temporary irrigation water source to the greatest extent possible. The purpose of these strategies is to develop drought tolerant landscapes and to reduce the demand on the potable water system. Identify the primary and secondary water sources.	Prior to recordation

5. Required open space shrub count is incorrect on sheet L-0.00.	Prior to recordation
6. Tree and shrub calculations for retention areas as required by 14-8.4(F). Provide retention pond square footage and lineal footage for street trees. Provide calculations for street trees and spacing averages.	Prior to recordation
7. 14-8.4(F)(2)(e) stormwater detention ponds and retention ponds shall be planted with appropriate trees, shrubs and grasses, with a minimum of one tree and three shrubs per five hundred (500) square feet of required ponding area. Plants located in the bottom third of the detention pond or retention pond must be adaptable to periods of submersion and may require replacement during periodic maintenance to remove silt:	Prior to recordation
8. A water level measuring device with zero set at finish grade located at the center of each pond is required.	Prior to recordation
9. Retention ponds deeper than three feet require a security fence and maintenance gate. Fence shall be five in height. The following shall also apply 14-8.4(J) Screening and Buffering, 14-8.5 Walls and Fences.	Prior to recordation
10. Storm water storage ponds are not to exceed 1 foot in depth without a verification that storm water will drain within 24 hrs. A percolation test may be required for each pond.	Prior to recordation
11. 14-8.4(I)(3) Interior Parking Lot Landscape Requirements (Ord. No. 2014-31 § 34) (a) The purpose of interior planting requirements in parking *lots* is to provide visual relief from large expanses of cars and pavement, provide shade to reduce heat and *glare* , help direct traffic flow and reduce and control stormwater runoff. (b) When forty or more *off-street parking* spaces are provided, interior *lot landscaping* shall be provided. (d) A minimum of ten (10) square feet of permeable *landscaped* area shall be provided per parking space. A minimum of one deciduous tree shall be planted per ninety (90) square feet of *landscaped* area. (e) Traffic islands shall have a minimum dimension of six (6) feet and contain a minimum of ninety (90) square feet of permeable surface, exclusive of curbing, and shall be distributed throughout the *lot*. As a component of a stormwater management plan, traffic islands may be combined to facilitate *water harvesting* and these combined islands shall be distributed within each subarea. Provide parking lot tree and shrub calculations.	Prior to recordation
12. Provide landscape and irrigation to the Cerrillos Road Corridor per 14-5.5 - HIGHWAY CORRIDOR PROTECTION DISTRICTS.	Prior to recordation
13. 14-8.4(F)(2)(a) all required deciduous trees shall be two (2) inch caliper minimum; 14-8.4 (F)(2)(c) All required evergreen trees shall be a minimum of six (6) feet in height.	Prior to recordation
14. City staff respectfully requests two (2) Gymnocladus diocus, Kentucky Coffeetree (Espresso or Prairie Titan varieties), or another tree chosen from the City approved plant list with trunk protection and irrigation within the northeast park. r shade structure.	Prior to recordation
15. City Staff respectfully requests all gravel and cobble to be screened and washed.	Prior to recordation

16. 14-8.4(E)(1) The landscaping plan shall include water harvesting for landscape irrigation purposes as a minimum requirement. Water harvesting that is a primary component of stormwater management may qualify for open space reduction as provided in Section 14-7.5(D)(6). Provide strategic curb cuts at islands and planter stripes for water harvesting.	Prior to recordation
17. 14-8.4(E)(4)(g) planting beds shall be swaled, sloped or recessed below grade prevent fugitive water.	Prior to recordation
18. Turf grass is not permitted within medians and planting strips per City Resolution 2010-66.	Prior to recordation
19. No stop & waste valves or automatic drain valves (King Drains) permitted per COSF Irrigation Design Standards.	Prior to recordation
20. Irrigation water lines shall not cross city water mains.	Prior to recordation
21. Provide irrigation to all revegetation native seed areas. (Per COSF Code 14-8.2 D(5)(c) all trees and shrubs shall be mulched and irrigated untill established. Grass seed should either be hydroseeded or covered with bio degradable material or synthetic soil erosion control blankets or matting and irrigated untill until established. Irrigation shall be pursuant to the irrigation requirements in Section 14-8.4 (Landscape and Site Design).	Prior to recordation
22. *14-8.4(E)(4)(h) irrigation systems shall be zoned by levels of water use. For the most efficient water use, plant with similar water use requirements shall be grouped together.* Trees and shrubs shall have separate zones. Drought tolerant and very low water-use tree shall have a separate zone. Native shrubs and very low water-use shrubs shall be irrigated on a separate zone. Separate zones are required for permanent and temporary irrigation lines.	Prior to recordation
23. 5.5 Emitters: Pressure compensating emitters are required for systems with lateral distances of more than 150 feet and rolling terrain per COSF Irrigation Design Standards.	Prior to recordation
24. Photometrics do not meet Code requirements. See Article 14-8.9 and revise for compliance. Building #2 has 4 points of illumination of 11+ and one point at 7. All illumination points at the property lines shall be 0.0. Outdoor light plan shows pool house. Provide an up to date lighting plan.	Prior to recordation
Engineer Estimates for landscape and irrigation financial guarantees shall be shown as installed unit cost breakdowns. Breakdown to include quantity, unit cost, and total cost. Mulch materials shall be in square foot units, square foot costs, and total cost. Plant material unit costs shall be separated into caliper sized desiduous trees, foot tall sized evergreens and gallon sized shrubs.	Prior to recordation
STAFF RESERVES THE RIGHT TO REQUIRE ADDITIONAL SUBMITTALS UPON RECEIVING REVISIONS	

*Must made prior to recording and/or permit issuance

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]

Explanation of Conditions or Corrections (if needed):

Case: **Case #2023-7079. 27794 West I-25 Frontage Road, Bungalows on Cerrillos Development Plan**

Case Mgr: Dan Esquibel

Review by this division/department has determined that this application will meet applicable standards if the following are met:

Conditions of Approval:	Must be completed by:
1 An approved Development Water Budget including a 9.8% contingency per SFCC 14-8.13(E)(1) will be required. A technical evaluation request for a Development Water Budget needs to be submitted to the City Water Division for review.	Prior to Planning Commission packet submittal.
2 An Agreement to Construct and Dedicate (ACD) from the Water Division will be required for all new public water infrastructure or fire services. An approved Development Water Budget, including Landscape Irrigation Budget and a 9.8% Contingency is required prior to processing the ACD.	Prior to Recordation of Development Plan or Plat.
3 Each lot shall be served by separate water service at the time of development.	Prior to construction permit approval.
4 An agreement for metered service (AMS) will be required to install new services, including water offset fees.	Prior to construction permit approval.

Technical Corrections*:	Must be completed by:
1	
2

Comment Form

Date: January 3, 2024

DRT Member: Taylor Jurgens

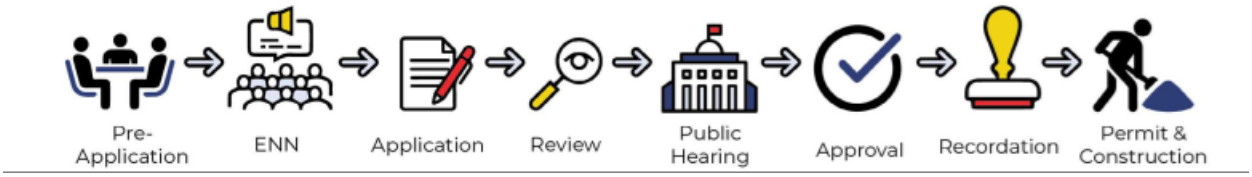
Dept/Div: Public Utilities/Water Division

Case No.: Case 2023-7079, 7662, & 7663: Bungalows on Cerrillos Development Plan, Setback Variance, and Slope Variance

Case Planner: Dan Esquibel

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response:**
1. An approved Water Plan will be required for all new public water infrastructure and fire services. Water Plan shall be submitted to the City Water Division for review.	~~Prior to Public Hearing~~ Prior to Recordation	
2. An accepted application for an Agreement to Construct and Dedicate (ACD) shall be submitted to the Water Division for all new public water infrastructure and fire services.	Prior to Recordation	
3. An approved ACD will be required with the Water Division.	Prior to building permit approval	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Proposed development layout based on the requested setback variance has a conflict with the existing water main and other existing water infrastructure. This conflict will need to be resolved by either relocating the existing water infrastructure or redesigning this portion of the development to avoid the conflict. Final changes needed to resolve this conflict must be reflected on the approved water plan.	~~Prior to Public Hearing~~ Prior to Recordation	
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response:**
1. Technical comments on the new public water infrastructure will be provided to the engineer via the water plan review.	~~Prior to Water Plan approval~~ Prior to Recordation	
2.		
3.		
4.		

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

Form Updated: September 2023

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	Must be completed by:	Applicant response**:
1. Access to sewer manhole 1 is required. The sewer discharge of the entire project discharges to the City's public sewer system through manhole 1. In the event of a stoppage in this section of the sewer system and the City needs to respond, access would be required to manhole 1.	Prior to Recordation	
2. Show the location and the separation distance between the existing 24-inch sewer lines and the storm water discharge pipe in all profiles of the storm water system	Prior to Recordation	
3. The existing 20-foot-wide sewer access easement for the 24-inch public sewer line runs along a large portion of the project property line on its north side. The sewer easement in this section shall be graded and a 14-foot-wide gravel road is to be provided in this section.	Prior to Recordation	
4. All 8 inch sewer pipe shall be SDR 26 PVC	Prior to Recordation	
5. All 4 and 6 inch sewer pipe shall be SCH 40 PVC	Prior to Recordation	
6. The existing City's 24-inch sewer line running along the north side of the project has a depth of 15 feet in areas. Because of the sewer line depth and the proximity to the retaining walls, the Wastewater Division requires a detailed analysis of this area showing the depth and widths of the proposed walls and footers with respect to the required excavation required for a 15-foot-deep excavation. The same analysis is also required for the area for the proposed 16-foot-deep manhole 1 and connection to the existing public sewer line.	Prior to Recordation	
7. There are several locations on the plan set that show a block retaining wall constructed on or next to a sanitary sewer easement boundary. Please place a note on each utility plan sheet that states; the City's Wastewater Management shall not be responsible for damages to any decorative or retaining wall this is constructed on or proximate to any sanitary sewer easement boundary.	Prior to Recordation	
8. Identify the type and the detail location sheet for all block retaining walls to be used on each of the retaining walls in each utility plan sheet	Prior to Recordation	

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1.		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall verify roadway alignment slopes not to exceed 10%	Prior to public hearing	
2. Shall verify roundabout can support fire apparatus access with all-weather road		
3. Shall verify turning radii are a minimum of 28'-0"		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1. Shall provide code analysis of project for proper occupancy classification designation as per IFC 2015. 2. Shall provide engineered (civil engineered) all weather road as per IFC 2015, 104.7.2 Technical Assistance, 503.2.3 Surface. 3. Fire apparatus access shall have an unobstructed width of not less than 20 feet exclusive of shoulders and an unobstructed vertical clearance of not less than 13 feet 6 inches (IFC 2015 Section 503.2.1) 4. Fire Department shall have 150 feet distance to any portion of the building on any new construction. (IFC 2015 section 503.1.1) 5. 503.4 Obstruction of Fire Apparatus Access Roads. Fire apparatus access roads shall not be obstructed in any manner, including the parking of vehicles. The minimum widths and clearances established in Section 503.2.1 and 503.2.2 shall be maintained at all times. 6. 507.5 Fire hydrant systems. Fire hydrant systems shall comply with Sections 507.5.1 through 507.5.6. 507.5.1 Where required. Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access	Time of permit if applicable.	

road, as measured by an approved route around the exterior of the facility or building. 7. Shall have water supply that meets fire flow requirements as per IFC (Appendix B) 8. Shall comply with Section D102.1 Access and Loading (75,000 lbs). 9. Shall comply with IFC 2015 Section D103.5 Fire apparatus access road gates. 10. Shall meet the 150 feet driveway requirements must be met as per IFC, or an emergency turn-around that meets the IFC requirements shall be provided. (as per Appendix D Table D103.4) 11. Shall comply with IFC 2015 Section D103.2 Grade. Fire apparatus access roads shall not exceed 10 percent in grade. 12. Shall comply with D105 Aerial Fire Apparatus Access Roads. (width and proximity to building) 13. Shall comply with Section D106 Multiple-Family Residential Developments. 14. D107.1 One- or two-family dwelling residential developments. Developments of one- or two-family dwellings where the number of dwelling units exceeds 30 shall be provided with two separate and approved fire apparatus access roads. 15. D107.2 Remoteness. Where two fire apparatus access roads are required, they shall be placed a distance apart equal to not less than one-half the length of the maximum overall diagonal dimension of the property or area to be served measured in a straight line between accesses. 16. Shall meet the IFC code requirements 2015 edition or the most current edition the governing body has adopted at the time of permitting. 1.		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.
2.

Explanation of Conditions or Corrections (if needed):

(see following pages for notes required)

Development Review Team
Comment Form

Date: 8/2/23

Staff person: Dee Beingessner

Dept/Div: Land Use/Terrain Management

Case: **Case #2023-7079 Bungalows on Cerrillos Development Plan**

Case Mgr: Dan Esquibel

Review by this division/department has determined that this application will meet applicable standards if the following are met:

Conditions of Approval :	Must be completed by:
1 Drainage report discussion in proposed conditions section must include the total amount of impervious surface to be installed for the development, pond volume required, and pond volume provided for the site. Provide a small table here with pond information for quick reference of each pond's volume. Also include this information in the future conditions section.	Prior to recording Development Plan

Technical Corrections*:	Must be completed by:
1 Dust Control Note Shall be placed on the Development Plan or construction plans (see attached)	Prior to recordation
2 Gunnison's Prairie dog note shall be placed on the Development Plan or construction plans (see attached)	
3 Drainage Facilities Maintenance note shall be placed on the Plat or Development Plan (see attached)	
4 Couldn't find label for Pond 3 with perimeter fence. Include label. Pond 2 does not appear to be deep, why is there a perimeter fence?	
5 Need pond details to be shown. Include inlet and outlet details. Include details for erosion control in pond. Include pond measuring device in pond (example included below)	
6 Grading plan states that all slopes are 3:1 maximum unless otherwise noted but many areas appear greater than 3:1 and are not noted.	
7 Show floodplain limits on grading plans. Not all line types have a label on the legend. There are numerous dashed lines of various thickness with no legend.	

8 Label concrete alley gutter locations. Provide flared apron into concrete alley gutters to direct flow at the start of the alley gutter.	
9 Erosion control note references topsoil disturbance permit. This will be a grading permit.	
10 A variance to construction on 30% slopes will be required and will likely not be supported by staff per code. 30% slope disturbances are only allowed for roadways and utilities.	
11 Need offsite construction plans for roadway, paving and lighting.	
12 No recycled basecourse may be used on City streets, state untreated basecourse on road cross sections for off-site plans. Rollover curbs are not to be used on City streets. Pavement on City Street must be 2" of SPIII under 2" of SPIV	
13 North arrow is incorrect on Sheet GR-5 and GR-6, please check all pages for north arrow.	
13 This Development shall comply with the most current requirements of the American with Disabilities Act (ADA). Place a note on the Plan to reflect this condition	
14 Other comments will be provided on these plans at the time of the building permit and changes may be required during permitting process	

*Must made prior to recording and/or permit issuance

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]

Explanation of Conditions or Corrections (if needed): (see following pages for notes required)

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

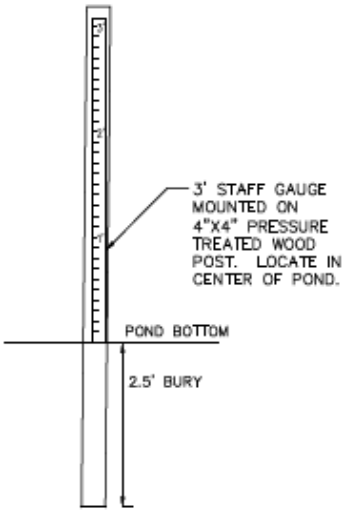
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

RE: Case #2023-7079, The Bungalows on Cerrillos – Development Plan Amendment

Dear Mr. Esquibel:

This letter is respectfully submitted on behalf of Advanced Acquisitions, LLC for the purpose of amending our Development Plan Application, Case #2023-7079 submitted July 14, 2023. This amendment offers the following updates to the original application:

UNIT COUNT: Increases the multifamily unit count by two units (139 to 141 units).

VARIANCE REQUESTS: The City of Santa Fe has confirmed previously approved set back and slope variances for this site have either expired or were specific to a different project use. As a result, the following variance applications will be made in conjunction with this Development Plan.

1. Setback: A variance from SFCC 14-5.5 (B)(4)(iii) CRHC Cerrillos Road Highway Protection District of building setbacks in zone 4 from 45 feet to no more than 34 feet; and

2. Slope: A variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,765 square feet.

SECOND ENN: A second ENN was held on September 14, 2023, to notice the change in unit count along with the variance requests noted above. The September ENN meeting notes are included with the amendment.

IMPACT OF ADDING TWO UNITS: Below is a summary of Development Plan Application Items updated:

1. Proposed Development Plan Drawings DP-1 and DP-2 are updated to reflect the additional two units. Unit mix and Phasing is now shown as:

	Phase1	**Phase2**	**Total**
One-bedroom:	38	18	56
Two-bedroom:	55	10	65
Three-bedroom:	18	2	20
Total units:	**111**	**30**	**141**

2. Development Plan Drawing DP-1 has been updated to include new Open Space requirement of 35,250 square feet (141 units times 250 sf per unit)

3. Development Plan Drawing DP-1 has been updated to include the new parking requirement of 247 spaces. 300 spaces are provided, exceeding the parking requirement by 53 spaces.

4. The projected annual water budget is now calculated to be 26.71 acre-ft. Therefore, in accordance with the requirements of SFCC § 14-8.13 (B), Development Water Budgets, water rights will be procured, designated, and deposited in the Santa Fe Water Bank to offset the project's water demand. The determination of water required is as follows:

   Proposed Multi-family Project.
   Total Units: 141
   City of Santa Fe standard for Medical Office: .16 ac-ft per Unit

   Calculation:

✓ 141 x 0.16 ac-ft/unit	22.56 ac-ft
✓ Irrigation years 1-3 average (2.03+2.03+1.21)/3	1.76 ac-ft
✓ SFCC 9.8% contingency fee	2.39 ac-ft
TOTAL WATER BUDGET	**26.71 ac-ft**

   An updated Water Division Utility Service Application has been provided with this submittal.

5. The applicant is working with Alexandra Ladd and the Santa Fe Homes Program (SFHP) to update the "Fee in Lieu" agreement. The previously submitted SFHP Rental Proposal for a "Fee in Lieu" in the amount of $334,818.24 will be updated to reflect the additional two units.

IMPACT OF VARIANCE REQUESTS:

Upon submitting the original Development Plan Application dated July 14, 2023, the applicant understood the Annexation Agreement between the City of Santa Fe and the landowner granted both a setback and slope variance that ran with the property. As a result, the applicant designed the project within this framework believing a 25-foot setback was allowed and up to 5,020 square feet of undisturbed slopes greater than 30% could be graded.

After city staff informed the applicant Variances previously granted in the annexation agreement had either expired or were applicable for a different use, the applicant opted to request a setback variance and slope variance as both had previously been recommended by staff and approved by the governing body.

No design changes to the original Development Plan application are being proposed because of the variance requests.

SUPPORTING DOCUMENTATION – Development Plan Amendment & Variance s

In support of this request, the following documentation is submitted herewith for your reference:

1. Amended Development Plan Application
2. September 14, 2023, Early Neighborhood Notification Meeting Notes
3. Amended Water Division Utility Services Application
4. Legal Lot of Record & Warranty Deed
5. Amended Development Plan Drawings:
    a. DP-1: Development Plan
    b. DP-2: Phasing Plan
6. Setback Variance Application
7. Slope Variance Application

Thanks for your consideration in review of this application. Please contact me with any questions or requests for additional information at: 832-338-0364; or via email at: brian.nenninger@orion-west.com .

Sincerely,

Brian Nenninger, P.E.

RE: Case #2023-7079, The Bungalows on Cerrillos – 30% Slope Variance Application

Dear Mr. Esquibel:

This letter is respectfully submitted on behalf of Advanced Acquisitions, LLC for the purpose of submitting a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 4,765 square feet; in conjunction with the Bungalows on Cerrillos Development Plan Application, Case #2023-7079 submitted July 14, 2023, and amended December 11, 2023.

The following is provided in/with this letter of application:

1. Variance Criteria
2. Variance Application Form
3. Legal Lot of Record
4. September 15 ENN Notes
5. Drawings: SA-1 Slope Analysis, and SA-2 Natural Slope Greater than 30%

As noted from the aerial photos below, the site has had a considerable amount of man-made slope disturbances over the years. Please refer to Plan Set drawing SA-1: Slope Analysis for a breakdown depicting slopes between 20 and 30%, along with areas having slopes greater than 30%. Most slopes greater than 30% are man-made. However, a small area of approximately 4,765 square feet contains natural slopes of 30% or greater.

The Annexation Agreement between the City of Santa Fe and landowner allowed for a variance to Santa Fe City Code around slope. Specifically, the agreement stated "A variance has been approved to Section 14-8.2(B) (3) Terrain Management Regulations allowing the disturbance of slopes thar 30 percent or greater consisting of 5,020 square feet. A variance is appropriate and have no adverse effects on neighboring properties."

Although this approved variance was project specific and has also expired, the applicant acknowledges that the City of Santa Fe staff supported, and the governing body approved the variance request at that time.

Sincerely,

Brian Nenninger, P.E.
Orion West, LLC

Photo History - Site Disturbances Over Time

VARIANCE FROM CERRILLOS ROAD HIGHWAY CORRIDOR STANDARDS

A variance to the Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) under SFCC 14-8.2(D)(2)(b) is requested pursuant to 14-3.16 as follows:

1. ***One or more of the following special circumstances applies: (a) unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid.***

   There are areas with naturally occurring slopes of thirty percent (30%) or greater consisting of 4,765 square feet, which represents .006 percent of the 19.218-acre site. Much of the property has average slopes of five percent (5%). The steep sloped area is a remnant of the original bank of the Arroyo de los Chamisos prior to the construction of the Cerrillos Road improvements and the installation of the bridge carrying storm waters under Cerrillos Road. When that bridge was constructed, the Arroyo de los Chamisos was realigned so that no storm waters flow up to or close to this remnant bank. For the most part, the redirected channel now lies to the north of the site. The original bank remained south the new channel for the Arroyo del los Chamisos, creating a small island of 30 percent slopes. No other property in this zone has this unique characteristic.

2. ***The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.***

   The inability to grade the remnant of a portion of the old bank of the Arroyo de los Chamisos will render it infeasible to develop a substantial portion of the property because of the grade that will occur north of the remnant bank. Much of the property will be completed at a single, even grade.

3. ***The intensity of development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.***

   The property is zone C-2, and the intensity of allowable development is unaffected by the grant of the variance. C-2 zoning requirements are performance based, and the proposed development of multifamily is well below what would be allowed on this property using taller, more traditional multifamily units -- the allowed height being 45 feet and the proposed heights being no more than 28 feet.

4. ***The variance is the minimum variance that will make possible the reasonable use of the land or structure. The following factors shall be considered: (a) whether the property has been or could be used without variances for a different category or lesser intensity of use; (b) consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan.***

   A disturbance of .005% of the site containing the naturally occurring slopes of the 30% is a minimal disturbance and is the minimum variance that will make the reasonable use of the northern portion of the site for the detached, two-story multifamily structures. The variance is consistent with the purpose and intent of the terrain management restriction of prohibiting disturbances of 30% slopes, because the variance will not:

1. Increase the threat of flooding and the hazard of improper cuts and fills, or increased erosion and sedimentation;
2. Result in the destruction of the sensitive landscape;
3. Harm the scenic character of Santa Fe from the visual blight of indiscriminate cuts and fills and vegetation removal resulting from extensive grading and utility scars;
4. Accelerate stormwater runoff on natural drainage ways and all structures due to increased development and impervious surfaces; or
5. Degrade arroyo channels.

Therefore, under the applicable standard, the variance is the minimum required.

5. ***The variance is not contrary to the public interest.***

Along an arroyo, the purpose preserving 30% slopes (i.e., to prevent erosion of arroyo banks, prevent unnatural redirection of arroyo channels and storm water) is not accomplished by preserving a geographic feature that has no relevance to current conditions. Further, preserving the slopes will not protect sensitive wildlife habitat or degrade and enhance the natural aesthetics associated with arroyos. The removal of this remnant bank will not run counter to these goals; there is no storm erosion created or water channel adversely affected, as the channel is no longer in this location, and this patch of 30 slope is neither constitute wildlife habitat nor possesses any aesthetic quality. In short, variance is not contrary to the public interest.

SITE DESCRIPTION

THE SITE CONSISTS OF APPROXIMATELY 19.2 ACRES OF UNDEVELOPED VACANT LAND LOCATED NORTHWEST OF WEST FRONTAGE ROAD AND CERRILLOS ROAD, NEW MEXICO. THE NORTHERN ADJOINING PROPERTY CONSISTS OF VACANT DESERT LAND FOLLOWED BY THE ARROYO DE LOS CHAMISOS WASH. THE EAST AND SOUTHEAST ADJOINING PROPERTIES CONSIST OF VACANT DESERT LAND FOLLOWED BY THE WEST FRONTAGE ROAD AND CERRILLOS ROAD ROADWAYS. VACANT LAND AND SINGLE-FAMILY RESIDENCES ARE DEPICTED ON THE WESTERN ADJOINING PROPERTIES.

BASED ON REVIEW OF HISTORICAL AERIAL PHOTOGRAPHS AVAILABLE FROM GOOGLE EARTH, THE SITE CONTAINED VACANT DESERT LAND WITH NATIVE VEGETATION FROM 1935 TO 1996. DIRT ACCESS ROADS TRAVERSING THROUGH THE NORTH-CENTRAL PORTION, WESTERN, AND EASTERN BOUNDARIES OF THE SITE APPEAR FROM 2001 TO 2008. SOME OF THESE ACCESS ROADS APPEAR TO BE RAISED FROM THE EXISTING GRADE SEEN IN PREVIOUS PHOTOGRAPHS. DURING THIS TIME, NUMEROUS STOCKPILES CONTAINING SOIL AND VARIOUS DEBRIS EXISTED IN THE NORTHEAST SECTION OF THE SITE AND APPROXIMATELY FIVE STORAGE CONTAINERS ARE SHOWN IN THE SOUTHEAST PORTION OF THE SITE. BY 2008, THE STORAGE CONTAINERS ARE NO LONGER PRESENT IN AERIAL PHOTOGRAPHS. FROM 2009 TO 2011, THE STOCKPILES NO LONGER APPEAR ON THE SITE, AND A LARGE AREA OF SPREAD FILL IS OBSERVED IN THE CENTRAL PORTION OF THE SITE. BY JUNE 2011, THERE ARE LARGE CLEARINGS OF VEGETATION ON THE EAST AND NORTHEAST PORTIONS OF THE SITE, AS WELL AS ALONGSIDE THE APPARENT ACCESS ROAD FROM CERRILLOS ROAD TO THE LARGE AREA OF SPREAD FILL ON THE CENTRAL PORTION OF THE SITE. BY OCTOBER 2013, THESE AREAS CONTAIN EITHER ADDITIONAL SPREAD FILL OR DISTURBED NATIVE SOIL. THE SITE HAS REMAINED VACANT DESERT LAND WITH NATIVE VEGETATION AND SPREAD FILL AND DISTURBED NATIVE SOIL IN RECENT PHOTOGRAPHS. ACCORDING TO GOOGLE EARTH, THE ELEVATION OF THE SITE RANGES FROM 6,378 TO 6,415 FEET ABOVE MEAN SEA LEVEL (MSL) AND TOPOGRAPHY GENERALLY DIRECTS SURFACE RUNOFF FROM SOUTH TO THE NORTH AND WEST.

ANNEXATION NOTE

ON THE 12TH OF FEBRUARY OF 2014 AN ANNEXATION AGREEMENT WAS EXECUTED BETWEEN THE CITY OF SANTA FE AND THE PREVIOUS LAND OWNER BEAVER MOTORS LLC. THE AGREEMENT SATED THAT A VARIANCE WAS APPROVED TO SECTION 14-8.2(B)(3) TERRAIN MANAGEMENT REGULATIONS ALLOWING THE DISTURBANCE OF SLOPES THAT ARE 30 PERCENT OR GREATER CONSISTING OF 5,020 SQUARE FEET, A VARIANCE WAS DEEMED APPROPRIATE AND WILL HAVE NO ADVERSE EFFECTS ON NEIGHBORING PROPERTIES.

THE DOCUMENT WAS RECORDED IN THE COUNTY OF SANTA FE ON THE 18TH DAY OF FEBRUARY, 2014 AT 02:43:49 PM AND WAS DULY RECORDED AS INSTRUMENT #1730261 .

Santa Fe, NM 87501

RE: Case #2023-7079, The Bungalows on Cerrillos – Setback Variance Application

Dear Mr. Esquibel:

This letter is respectfully submitted on behalf of Advanced Acquisitions, LLC for the purpose of submitting a variance from SFCC 14-5.5 (B)(4)(iii) CRHC Cerrillos Road Highway Protection District of building setbacks in Zone 4 from 45 feet to no more than 34 feet; in conjunction with the Bungalows on Cerrillos Development Plan Application, Case #2023-7079 submitted July 14, 2023, and amended December 11, 2023.

The following is provided in/with this letter of application:

1. Variance Criteria
2. Variance Application Form
3. Legal Lot of Record
4. September 15 ENN Notes
5. Setback Exhibit

The Annexation Agreement between the City of Santa Fe and landowner allowed for a variance to Santa Fe City Code around setback. Specifically, the agreement stated "A variance has been approved to Section 14-5-5(B)(3)(a) Cerrillos Road Highway Corridor Standards allowing the building setback from the Cerrillos Road righ-of-way from 40 feet to 25 feet. The current code requirement is now for a 45-foot setback.

Although this approved variance was project specific and has expired, the applicant acknowledges that the City of Santa Fe staff supported, and the governing body approved the variance request at that time.

Sincerely,

Brian Nenninger, P.E.
Orion West, LLC

VARIANCE FROM CERRILLOS ROAD HIGHWAY CORRIDOR STANDARDS

A request is submitted for a variance from SFCC 14-5.5 (B)(4)(iii) CRHC Cerrillos Road Highway Protection District of building setbacks in Zone 4 from 45 feet to no more than 34 feet. Please refer to the Setback Exhibit attached with this application.

1. ***One or more of the following special circumstances applies: (a) unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid.***

   The distance from the most westerly southbound lane ranges from 87 to 200 feet from outer edge of the driving lane to the property line. The nearest structure will be 34 feet from the property line.

   This is a substantial distance when compared to other developments along Cerrillos Road. Las Soleras, as an example, measures 50 feet from the outer-most driving lane to the property line. Entrada Contenta measures 40-50 feet from the outer-most driving lane to the property line. The intent of the regulation was a greater physical separation between roadway and the buildings the further south one traveled along Cerrillos Road. In this case the separation is accomplished by the extraordinary right-of-way that occurs in this section of Cerrillos Road.

   In addition to the distance from the right of way boundary for Cerrillos Road, this site is burdened with vast expanse of the Arroyo de los Chamisos, which renders approximately 22 percent of the site undevelopable. This condition is a naturally occurring feature. In addition, the improvements required by the New Mexico Department of Transportation will occupy and utilize over 11 percent of the property. However, the impact of the approved I-25 Frontage Road location and design will cut off an additional 5 percent of the property from development.

2. ***The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.***

   The special circumstances described above leave only about 62 percent of the site subject to development for any use. The effect of the 45-foot set back will reduce the number residential units by fourteen (14).

3. ***The intensity of development shall not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.***

   The property is C-2 and the intensity of allowable development is unaffected by the grant of the variance. C-2 zoning requirements are performance based, and the proposed development of multifamily is well below what would be allowed on this property using taller, more traditional multifamily units -- the allowed height being 45 feet and the proposed heights being no more than 28 feet.

4. ***The variance is the minimum variance that will make possible the reasonable use of the land or structure. The following factors shall be considered: (a) whether the property has been or could be used without variances for a different category or lesser intensity of use; (b) consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the general plan.***

   In addition to the distance from the right of way boundary for Cerrillos Road, this site is burdened with vast expanse of the Arroyo de los Chamisos, which renders approximately 22 percent of the site undevelopable. In addition, the improvements required by the New Mexico Department of Transportation will occupy and utilize over 11 percent of the property. A reduction of eleven (11) feet in the required set back will allow for the reasonable use of the property and will be in keeping with the intention of the corridor setback, because of the substantial distance from the driving lanes of Cerrillos Road (when compared to other developments along Cerrillos Road). The intent of the regulation was a greater physical separation between roadway and the buildings the further south one traveled along Cerrillos Road. In this case the separation is accomplished by the extraordinary right-of-way that occurs in this section of Cerrillos Road. The variance is, therefore, in keeping with the purpose and intent of the corridor protections.

5. ***The variance is not contrary to the public interest.***

   The purpose of the setback was to reduce the impact of development in the corridor from the drivers' perspective. The distance from the most westerly southbound lane is approximately 87 to 200 feet from outer edge of the driving lane to the property line. The nearest structure will be 34 feet from the property line. The multifamily homes will be no more than two stories and will setback from the travel lanes of Cerrillos Road equal to and for most cases greater than the distance of other buildings along Cerrillos Road that comply with the 45-foot building setback. The appearance of the buildings along the Cerrillos Road frontage will have the same visual perception as other buildings along Cerrillos Road with a 45-foot building setback. The variance applies only to Cerrillos Road and has little or no effect on nearby residential neighborhoods, which are limited to the eastern boundary of the property.

Variances from Subdivision Regulations (Section 14-3.16 (C) SFCC 1987)

(C) Approval Criteria

Subsections 14-3.16(C)(1) through (5) and, if applicable, Subsection 14-3.15(C)(6), are required to grant a variance.

(1) One or more of the following special circumstances applies:
  (a) unusual physical characteristics exist that distinguish the land or *structure* from others in the vicinity that are subject to the same relevant provisions of Chapter 14, characteristics that existed at the time of the adoption of the regulation from which the variance is sought, or that were created by natural forces or by government action for which no compensation was paid;
  (b) the *parcel* is a *legal nonconforming lot* created prior to the adoption of the regulation from which the variance is sought, or that was created by government action for which no compensation was paid;
  (c) there is an inherent conflict in applicable regulations that cannot be resolved by compliance with the more-restrictive provision as provided in Section 14-1.7; or
  (d) the land or *structure* is *nonconforming* and has been designated as a *landmark, contributing* or *significant property* pursuant to Section 14-5.2 (Historic Districts).

(2) The special circumstances make it infeasible, for reasons other than financial cost, to develop the *property* in compliance with the standards of Chapter 14.

(3) The *intensity* of *development* shall not exceed that which is allowed on other *properties* in the vicinity that are subject to the same relevant provisions of Chapter 14.

(4) The variance is the minimum variance that will make possible the reasonable use of the land or *structure*. The following factors shall be considered:
  (a) whether the *property* has been or could be used without variances for a different category or lesser *intensity* of use;
  (b) consistency with the purpose and intent of Chapter 14, with the purpose and intent of the articles and sections from which the variance is granted and with the applicable goals and policies of the *general plan.*

(5) The variance is not contrary to the public interest.

(6) There may be additional requirements and supplemental or special findings required by other provisions of Chapter 14.

Note: If application is being made for Development in Special Flood Hazard Areas, then justification must be provided with the above approval criteria and the criteria found in Section 14-3.10(E) SFCC 1987.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 2001. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning and development plan requirements.

Signature: Brian J Henninger Date: **11 December 2023**

A case manager will be assigned to your project and will notify you within 10 business days if any additional information is needed. After you application has been reviewed by City staff, you will be contacted by us regarding public notice requirements. A packet of information and instructions will be provided regarding the required mailing and sign posting. Thank you, and feel free to contact the Land Use Department staff at (505) 955-6585 with any questions.

EARLY NEIGHBORHOOD MEETING NOTES

Project Name:	Bungalows on Cerrillos
Project Location:	27794 W I-25 Frontage Rd, Santa Fe, NM 87507 (former Beaver Toyota Site)
Project Description:	Development Plan Amendment for Development Plan with Summary Plat/Lot Split for proposed 141-unit Apartment Complex with Setback and Slope Variances
Applicant:	Advanced Acquisitions LLC
Agent:	Orion West LLC
ENN Meeting Date:	September 14, 2023 – Second ENN
ENN Location:	Via Zoom
Application Type:	Development Plan Application
Land Use Planner:	Dan Esquibel
Attendance:	**City of Santa Fe:** Dan Esquibel, Maggie Moore **Developer Team:** Brian Nenninger (Agent), Maureen Mestas (Agent), Jeremy Hall, Ryan Griego, Karl Sommer **Neighborhood/Public:** 3 attendees. All three neighbors were sharing a zoom together – Two neighbors who identified themselves: Scott Chapman and Susan Cave.

Notes/Comments:

September 14, 2023/ 5:30 – 6:33 pm Meeting

The meeting started about 18 minutes late while Brian Nenninger assisted one neighbor who called in expressing, they were running behind and trying to log in. After the neighbor, Scott Chapman, successfully logged into Zoom meeting it could be seen there were two other neighbors with him – one being Dr. Susan Cave. Brian then introduced Maggie Moore and Dan Esquibel. Maggie gave a brief introduction around the ENN process and purpose.

Brian Nenninger then introduced Jeremy Hall, Director of New Development for the Cavan Company who is developing the project under the affiliate Advanced Acquisitions.

Brian Nenninger informed the group that this second ENN is for the purposes of noticing a Development Plan Amendment and request for a set back and slope variance. Highlights Brian shared during the presentation included:

- The Development Plan amendment is being submitted to increase the proposed Development Plan unit count from 139 to 141 for lease units.
- The project is requesting a variance from 14-8.2 (D)(2)(b) Terrain and Stormwater Management, 30% slope requirement. Approximately 4,800 square feet out of a 19-acre parcel is natural slope that is greater than 30%. Much of the site has been previously graded/disturbed. This variance of up to 5,020 square feet was previously granted by the City of Santa Fe for the Beaver Toyota Project in February of 2014.
- The project is requesting a variance from 14-5.5 (B)(4)(iii) CRHC Cerrillos Road Highway Protection District, 45-foot setback requirement at Cerrillos Road. 35 – 37.5' vs. 45'. A variance was previously granted by the City of Santa Fe for the Beaver Toyota Project to allow a 25' setback in February of 2014.
- W I-25 Frontage Road to be extended and relocated with a roundabout added to improve the flow and circumstance around traffic at the Cerrillos intersection.
- The city of Santa Fe and NMDOT have approved the redesigned intersection.

Brian opened the ENN for questions from the neighbors. The following is a summary of questions and feedback two of the three attending neighbors offered:

1. One neighbor was concerned about the size of roundabout so it will accommodate the larger tractor trailer traffic. Brian confirmed the roundabout size and design was modified to handle not only a tractor trailer but tractor trailer being pulled by a tractor tow rig.
2. Neighbors were concerned about more traffic and the difficulty in getting off Mutt Nelson onto the W I-25 Feeder Road. Concerned there will be more car wrecks including fatalities in the area.
3. Want to keep the "free rights off Cerrillos Road onto the Frontage Road.
4. Too many apartments are going up in the City of Santa Fe. Brian commented on the low vacancy rate and housing shortage/need in the city.
5. Developers just want to make money, and City officials are bought off.
6. Maggie asked about improvements to the Cerrillos/Frontage Road intersection and Brian responded that signal light upgrades along with two left hand turns are to be added from the frontage road turning left/North onto Cerrillos.
7. Brian confirmed that the NMDOT has approved the intersection design and the City of Santa Fe staff have indicated the design meets the City of Santa Fe requirements. However, the project is still subject to the Planning Commission approval.
8. Apartments are filling up with drug addicts. Brian indicated this project was market rate and is designed to look and feel like a single-family residential community even though it is for lease.
9. Neighbors attending indicated they lived off Mutt Nelson.
10. No concerns were raised about the Variance Requests.

I. INTRODUCTION AND SUMMARY

Advanced Acquisitions LLC is proposing to develop a 134-unit multi-family housing development west of the intersection of Cerrillos Road (NM 14) and I-25 West Frontage Road and Beckner Road in Santa Fe, New Mexico.

A. STUDY PURPOSE

The purpose of the traffic study is to determine the impacts of the proposed improvements on the surrounding roadway network, and to recommend any mitigation measures that may be necessary to support the new development.

B. EXECUTIVE SUMMARY

1. SITE LOCATION AND STUDY AREA

The site is located north of the I-25 and NM 14 interchange in Santa Fe, New Mexico. A vicinity map and site plan are shown in Figure 1. The site will consist of 134 multi-family attached housing dwellings.

The study area consists of the following existing intersections:

- Cerrillos Road (NM 14) and Beckner Road/I-25 W Frontage Road (existing signalized intersection)
- Paseo del Sol and Herrera Drive (existing roundabout)
- I-25 W Frontage Road and Mutt Nelson Road (existing unsignalized intersection)
- Cerrillos Road (NM 14) and Herrera Drive (existing signalized intersection)

The site development plan is proposing two new access points into the site:

- Proposed Roundabout at the Southwest corner of development (future roundabout) – this will modify and realign the existing frontage road.
- Proposed right-in, right-out access from Cerrillos into the site (future access)

The intersection evaluations include analysis for the AM and PM peak hours for the following traffic conditions:

- Existing traffic (2022)
- 2026 Completion Year without proposed development (2026 No Build)
- 2026 Completion Year with buildout of the site (2026 Build)
- 2036 Horizon Year without buildout of the site (2036 No Build)
- 2036 Horizon Year with buildout of the site (2036 Build)

- 2036 Horizon Year with SFMPO Model connection without buildout of the site (2036 No Build - Connection)
- 2036 Horizon Year with SFMPO Model connection with buildout of the site (2036 Build - Connection)

2. PRINCIPAL FINDINGS

The traffic analysis shows that under 2022 Existing conditions, unsignalized intersections will operate at acceptable levels of service with no movements operating worse than LOS C. All signalized intersections operate with overall acceptable LOS in the existing conditions although several movements at each intersection are not acceptable for both AM and PM peak hours.

The intersection of Cerrillos (NM 14) and Herrera operates at an overall LOS B in both AM and PM peak hours. The intersection includes movements of LOS E for the eastbound left, westbound left, and westbound through movements in the AM peak hour. In the PM peak hour the eastbound left, eastbound through, westbound left, and westbound through movements are LOS E.

The intersection of Cerrillos (NM 14) and Beckner operates at overall LOS C in the AM peak hour and LOS B in the PM peak hour. The eastbound left movement is LOS F in both the AM and PM peak hours. The eastbound through, westbound through, and westbound right experiences LOS E in both AM and PM peak hours. These movements are mainly due to the signal coordination of Cerrillos road and could be adjusted by updating signal timing plans. Coordination with the City of Santa Fe and NMDOT would be required to make any adjustments to existing signal timing.

Within the 2026 build scenario, the signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS B in the AM peak hour and LOS C in the PM peak hour. The eastbound left, westbound left, and westbound through movements will experience LOS E in both the AM and PM peak hours. This may be mitigated by signal timing adjustments although these should be coordinated with the City of Santa Fe and NMDOT prior to any work being completed.

The preferred layout of the intersection of Cerrillos (NM 14) and Beckner retains the free right turn lanes that are present at the intersection today due to capacity issues in the horizon year analysis. With the free right movements southbound and eastbound retained, the intersection operates at an overall acceptable LOS D in the AM peak hour and LOS C in the PM peak hour. The eastbound left turning movement will operate at LOS F in both peak

hours and the eastbound through movement will operate at LOS E in both peak hours. The volume to capacity ratio for the eastbound left will be above 1 which indicates that the intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

In response to the eastbound left turn movement, an analysis was completed with dual eastbound left turn lanes. In this analysis, the eastbound left movements improved to LOS D in both peak hours. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.

The south roundabout requested by the development to provide access at the southwest corner of the development will operate at acceptable conditions with a one lane approach at each leg.

In the 2036 Horizon Year build scenario, the intersection of NM 14 (Cerrillos) and Beckner continues to operate acceptably with the inclusion of dual eastbound lefts and the retention of the free right turn movements southbound and eastbound. The overall intersection will be a LOS C in both the AM and PM peak hours. The eastbound left movements improve to LOS D in both peak hours due to the dual left turn lanes, but the eastbound through movement will remain LOS E in the AM and PM peak hours. The westbound left movement will remain at LOS E in the PM peak hour. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic entering the intersection.

Implementing the Santa Fe MPO model connection by the 2036 Horizon Year will see the intersection of NM 14 (Cerrillos) and Beckner change significantly. With the retention of the free right turn lanes and the implementation of the eastbound dual left turn lanes, the intersection will result in the overall LOS D in the AM peak hour and LOS C in the PM peak hour. The northbound right movement will operate at LOS E in the AM peak hour and the northbound left will operate at LOS F in the PM peak hour. The volume to capacity ratio for the northbound left will be greater than 1 indicating this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

Adding an additional northbound left turning lane to this analysis results in the intersection operating at an overall LOS C in both the AM and PM peak hours. The only movement that remains an LOS E is the northbound right movement. All movements will retain a volume to capacity ratio of less than 1 indicating this will operate acceptably.

The south roundabout requested as part of this development to provide access at the southwest corner of the development operates at acceptable conditions into the horizon build scenario with a one lane approach at each leg. If a dual lane roundabout is desired at this location the NMDOT and the City of Santa Fe should be in agreement prior to the implementation.

3. RECOMMENDATIONS

- The developer is requesting a roundabout be built at the southwest corner of the new development. Our analysis shows that this roundabout can operate at acceptable LOS as a 1 lane roundabout with 1 lane minimum on each of the approaches. If a dual lane roundabout is desired by the developer at this location, the NMDOT and City of Santa Fe should be in agreement prior to the implementation.
- The analysis indicates the Southbound and Eastbound free right configuration provides a better level of service for these movements. NMDOT Traffic technical support may require the design to remove the free right turns and construct a right turn lane adjacent to the through lane to improve bicycle and pedestrian safety at the intersection. If the existing free right configuration is maintained, it is recommended that the eastbound lane configurations include two dedicated left turn lanes, one dedicated through lane, and one right turn lane prior to the 2026 build year.
- If the connection of the West Frontage Road and Herrera occurs, implementation of dual eastbound right movements with a signal overlap phase will be needed at Cerrillos (NM 14) and Beckner by the 2036 horizon year. An additional northbound left turning lane will also be needed prior to the 2036 horizon year if this connection is made. These recommendations are only applicable if the connection between the Frontage Road and Herrera is made.
- Deceleration lane into the site development for the East Driveway on Cerrillos Road (NM 14) should be built as part of the development. The deceleration lane length of 370 feet, and an additional taper of 150 feet, according to the State Access Management Manual (SAMM) criteria, totaling 520 feet recommended.
- Southbound deceleration lane into the West Frontage Road at Cerrillos Road (NM 14) should be retained as part of the development. The deceleration lane length of 370 feet minimum, and an additional taper of 150 feet should be verified, according to the State Access Management Manual (SAMM) criteria, totaling 520 feet recommended.

- Changes to the east leg of the intersection of Cerrillos (NM 14) and Beckner will be needed to address alignment issues that may arise as other improvements are completed.

II. PROPOSED DEVELOPMENT

A. LAND USE AND INTENSITY

The proposed development will be 134 single family detached housing units. See the vicinity map in and the site plan in Figure 2.

The surrounding area to the west includes primarily residential development, while the area to the east of NM 14 includes residential and commercial developments. To the north of the development is primarily commercial developments.

B. DEVELOPMENT PHASING AND TIMING

The project is expected to be developed by 2026. The NMDOT requires a 10-year horizon analysis for future roadway circulation and serviceability. An additional analysis for the 2036 horizon year was completed to assess a new connection between the West Frontage Road and Herrera Drive. This connection is included in the SFMPO metropolitan transportation plan as a future road extension that may be studied in the future. As a conservative approach and to capture all possible traffic connections, this traffic impact analysis will include looking at this development with and without this connection in the horizon year to assess the long-term contributions of this connection.

III. STUDY AREA CONDITIONS

A. STUDY AREA

The study area lies west of the intersection of Cerrillos Road (NM 14) and I-25 West Frontage Road and Beckner Road. The development will lie south of the existing Arroyo de los Chamisos, which is south of Herrera Drive, and north of I-25 W Frontage Road.

B. SITE ACCESSIBILITY

The developer is requesting to realign the I-25 West Frontage Road and install an access point via a new roundabout intersection as shown in Figure 4. A new right-in, right-out driveway on Cerrillos Road will provide a second access to the site which is required for emergency response. The majority of traffic will be traveling along NM 14 (Cerrillos Road) or departing from the interchange of I-25.

Additionally, the site will be near several multi-use paths that may be used by both pedestrians and bicyclists. Also, bike lanes on various roadways surrounding the

development site. All these multimodal opportunities may be used to access various parts of Santa Fe.

The Arroyo Chamiso Trail runs along the Arroyo de los Chamisos just to the north of the proposed development. The path exists to the east of NM 14 as various segments of the trail but does not have a connection to the west of NM 14 yet. Ultimately this trail will be built out in the future to connections with the Arroyo Chamiso Trail connecting to the SWAN park and the existing Tierra Contenta trail creating a complete trail system.

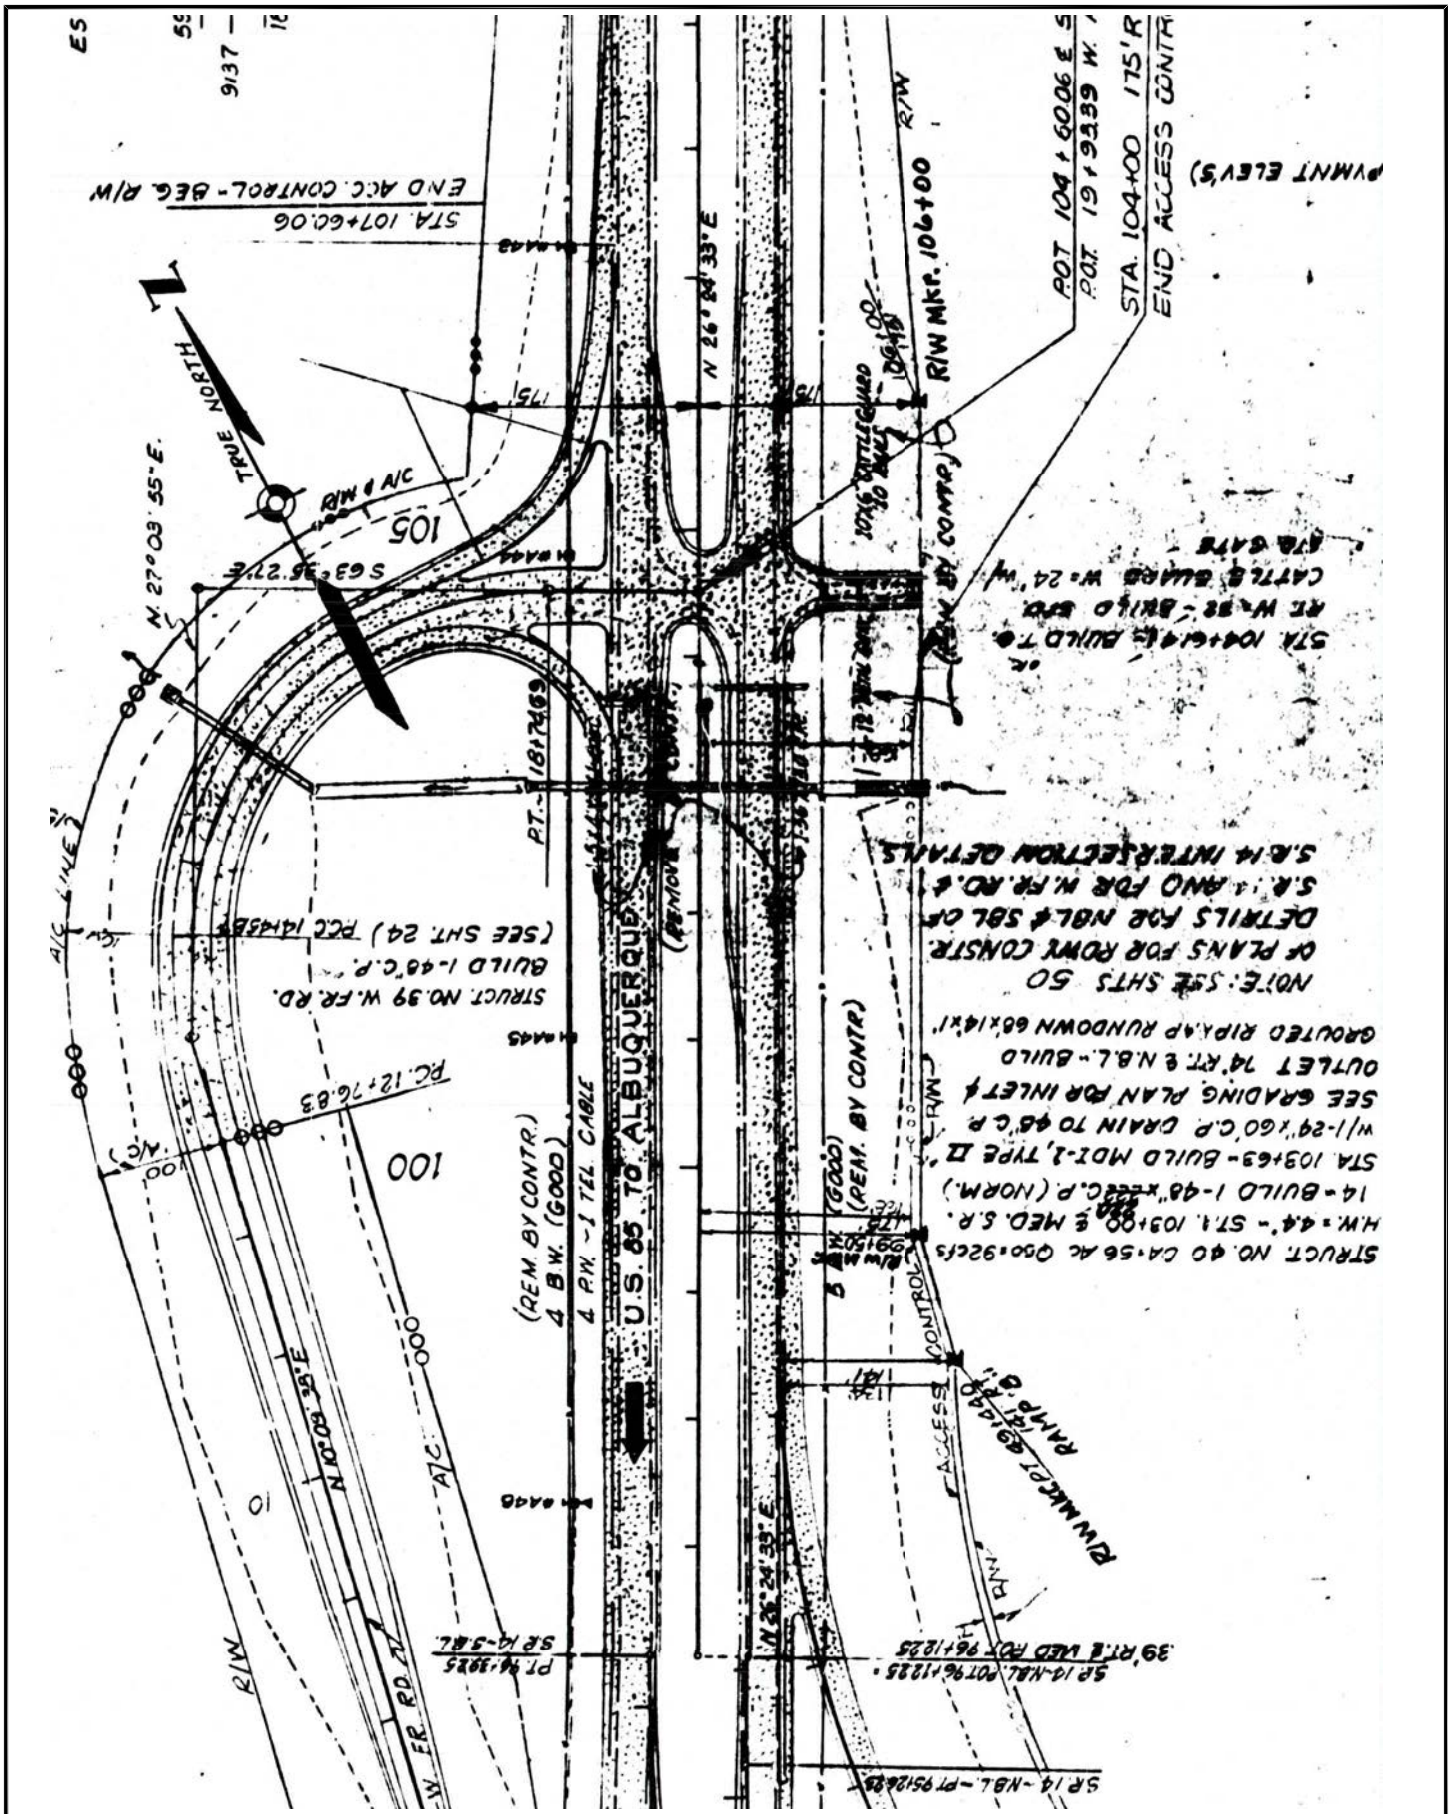
The Arroyo Hondo Trail which is located south of the I-25 interchange has access that begins at Rancho Viejo Boulevard, as well as a trail that connects the area south of I-25 to the area north of I-25 with underpasses of I-25. Rancho Viejo Boulevard is designated as a shared-higher traffic/speed roadway and NM 14 is designated as a bike lane/shoulder on the 2021 Santa Fe Bikeways and Trails Map.

The Santa Fe Trails bus system services parts of Santa Fe. Bus route 22 travels north and south on NM 14 in the project area, but the nearest stop is at Herrera and NM 14. As development occurs in this area of Santa Fe, coordination with the Santa Fe Trails bus system should occur to discuss the possibility of adding additional bus stops along this route.

C. DATA SOURCES

The data used in this report consist of the traffic counts described below, aerial photography and mapping from Google Earth®, and information provided by IDAX Data Traffic Counts, and the City of Santa Fe.

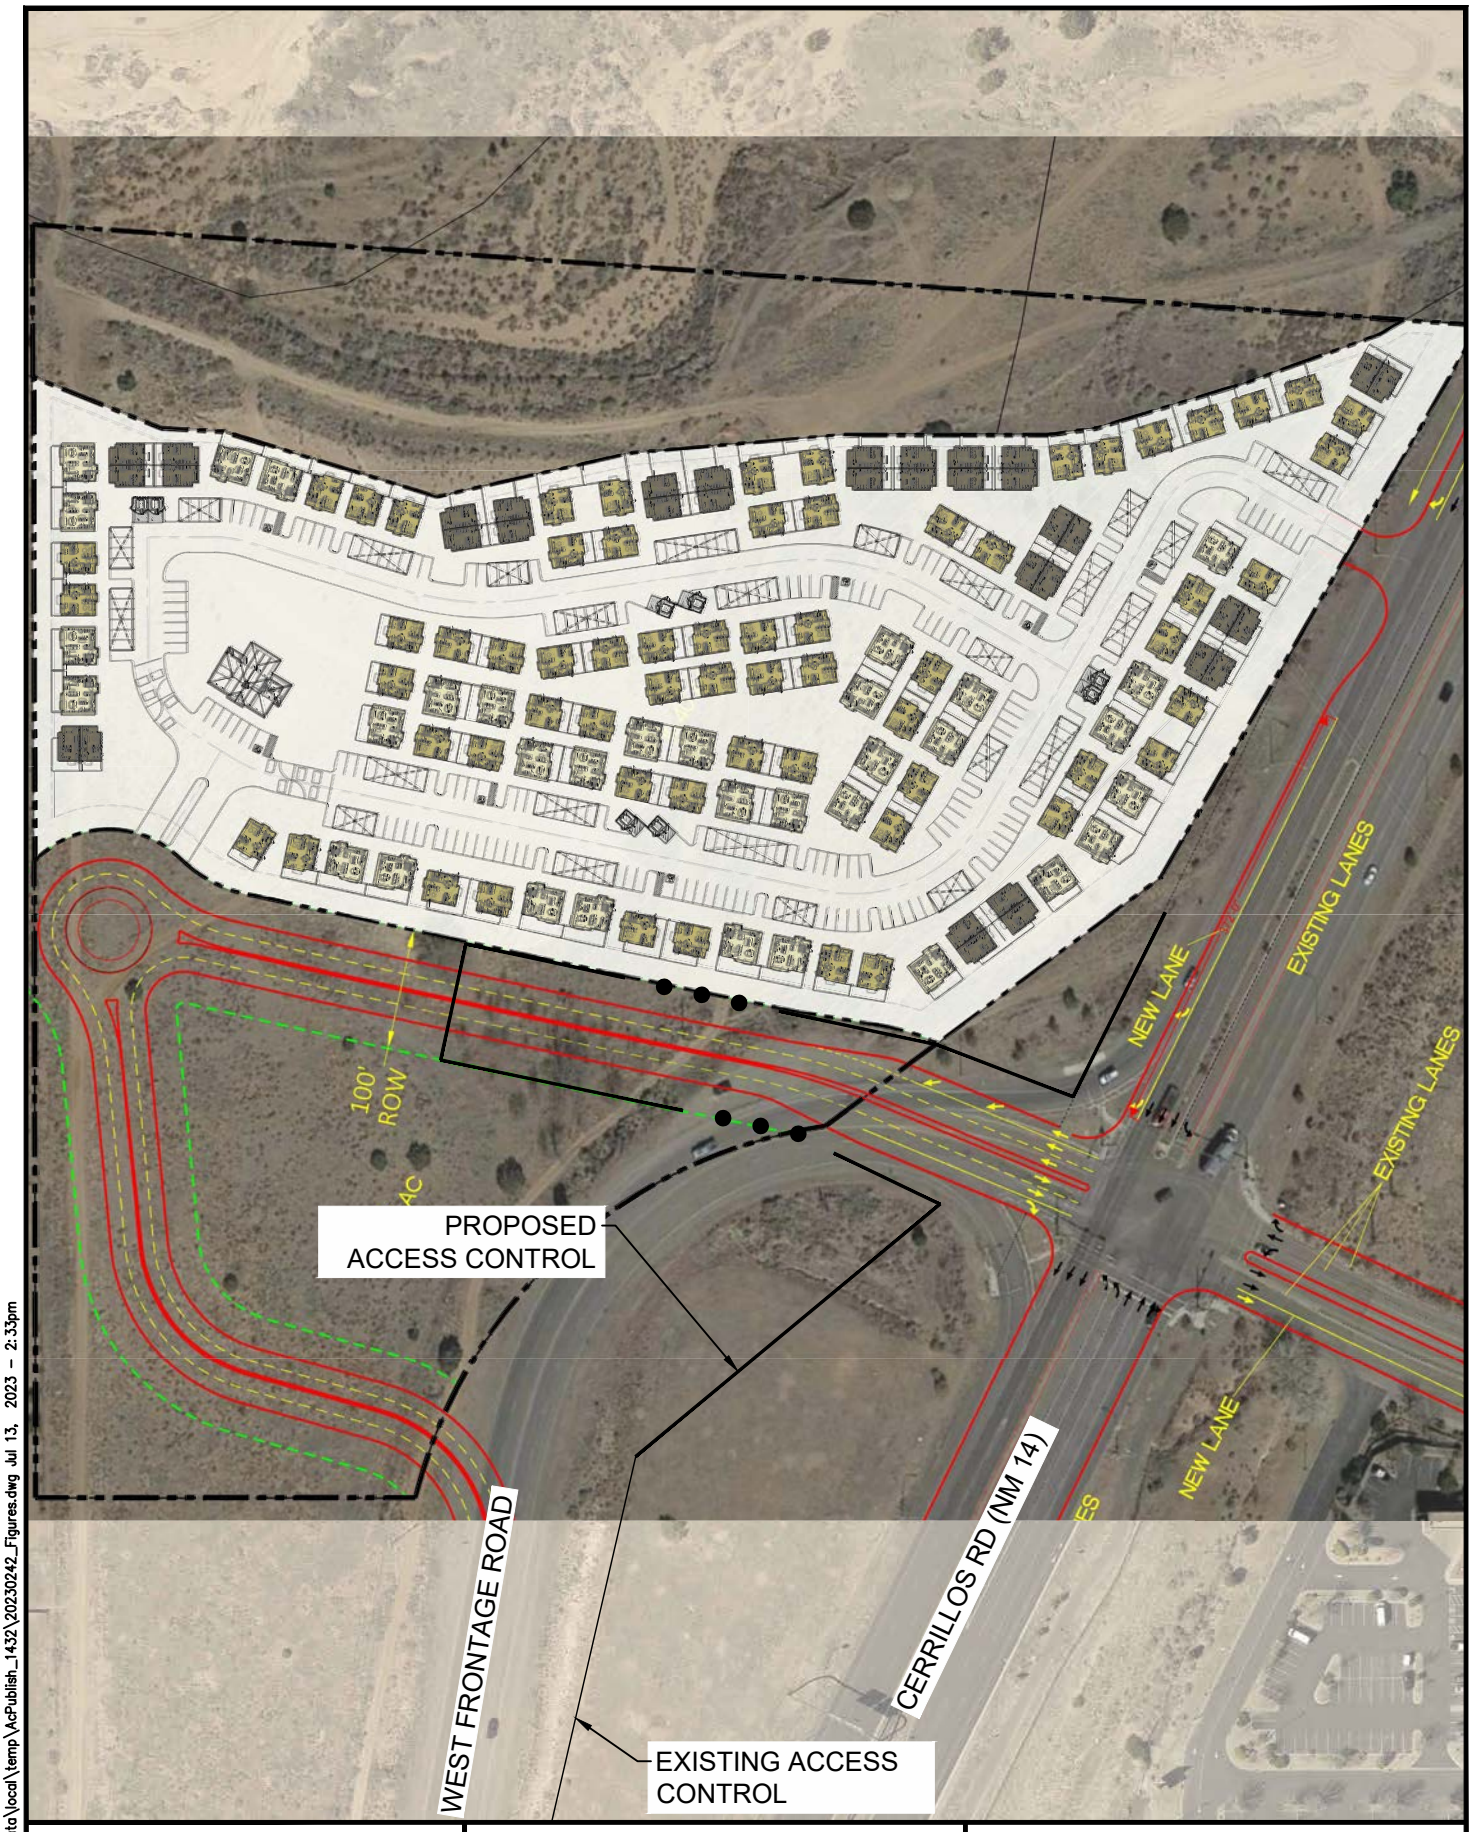
D. EXISTING SIGNAL SYSTEMS



Traffic Signal timing sheets included in Appendix A indicate the Cerrillos Road corridor has a coordinated signal system in the project area that is coordinated throughout the day, operating with a 125-second background cycle length during both the AM and PM peak periods. This coordinated system puts priority on the North and South movements to maximize traffic flow along Cerrillos. The intersections on Cerrillos have been analyzed as a coordinated system with applicable offsets for signals.

E. ACCESS CONTROL REQUIREMENTS

A portion of the west frontage road is currently access controlled and the proposed modifications will require submission to the access control committee at the NMDOT. Figure 3 is from an NMDOT as-built plan sheet and shows the existing right-of-way and access



control limits. The existing access control line crosses West Frontage Road at the point of curvature of the roadway and extends north of the intersection on the west side of Cerrillos. This access control includes the west leg of the existing intersection around the horizontal curve as shown. The proposed project improvements will modify the alignment of the west frontage road and will therefore require a change in the access control line. The proposed improvements will construct a roundabout located approximately 800 feet west of Cerrillos Road that will provide access to the proposed development and could easily be extended in the future to make a connection to Herrera. The proposed access control boundaries are shown in Figure 4. This will follow Cerrillos road and turn west to include a portion of the new West Frontage Road alignment.

The two full plan sheets of the as-builts that show the existing right-of-way and access control boundaries are also provided in Appendix J.

IV. ANALYSIS OF EXISTING CONDITIONS

A. BACKGROUND

1. ADJACENT ROADWAYS

Cerrillos Road (NM 14) is classified as a Principal Arterial by the Santa Fe Metropolitan Planning Organization (SFMPO). The posted speed limit is 45 miles per hour (MPH). Within the vicinity of the project site, Cerrillos road has two travel lanes southbound, and three travel lanes northbound, separated by a non-traversable median, and minor right-hand shoulders. According to data provided by the NMDOT Traffic Monitoring Bureau, in 2021, Cerrillos had an average annual daily traffic volume of 22,983 vehicles per day (vpd) in the vicinity of the site.

Paseo del Sol and Herrera are classified as a Major Collector by the Santa Fe Metropolitan Planning Organization (SFMPO). The posted speed limit is 25 and 35 miles per hour (MPH), respectively. Due to its location near Capital High School, the speed limit is reduced to 15 MPH during the high morning and afternoon commuting times. Within the vicinity of the project site, both roads have one lane in both directions, separated by a non-traversable median and a minor right-hand shoulder. According to data provided by the NMDOT Traffic Monitoring Bureau, in 2021, Herrera had an average annual daily traffic volume of 4,030 vehicles per day (vpd) in the vicinity of the site.

I-25 W Frontage Road is classified as a Major Collector by the Santa Fe Metropolitan Planning Organization (SFMPO). The posted speed limit is 45 miles per hour (MPH). Within the vicinity of the project site, Cerrillos road has two travel lanes in both directions. The NMDOT Traffic Monitoring Bureau does not collect average annual traffic data along this road within the vicinity of the site.

The West Frontage Road includes a horizontal curve near to the intersection of Cerrillos road in the project area. In order to make the intersection safer by improving the sight distance, the project team is proposing to reconstruct and realign the West Frontage Road to eliminate the horizontal curve and introduce a roundabout (see site plan for details on the proposed layout). These changes will eliminate the horizontal curve and replace it with a roundabout that is located 800 feet west of the Cerrillos intersection. This tangent will allow better queuing and better sight distance for traffic approaching the intersection from the west. It will require frontage road traffic to traverse through the newly constructed roundabout before they get to Cerrillos. A roundabout is proposed as a solution at the future

access point of the development and will require concurrence with the NMDOT since the West Frontage Road is inside access control limits. These items were discussed in more detail in Section III.E of this traffic impact study.

Wellness Way is not classified by the SFMPO, but given its connection to Herrera Drive, may be assumed to function as a Major Collector. Within the vicinity of the site, Wellness has two travel lanes in both directions, divided by a non-traversable median and right-hand shoulders. The NMDOT Traffic Monitoring Bureau does not collect average annual traffic data along this road within the vicinity of the site.

Beckner is not classified is not classified by the SFMPO but given its connection to I-25 W Frontage Road, may be assumed to function as a Major Collector. Within the vicinity of the site, Wellness has two travel lanes in both directions, divided by a non-traversable median and right-hand shoulders. The NMDOT Traffic Monitoring Bureau does not collect average annual traffic data along this road within the vicinity of the site.

2. ADJACENT LAND

The area near the site is primarily residential development to the west or vacant land. To the east of NM 14 includes residential and commercial developments. Background traffic has been included in this study from the Las Soleras Medical building, 5407 Beckner traffic study, 5201 Beckner traffic study, Cielo Apartments, Vista de la Sierra development, Village at Las Soleras, and Havenly Santa Fe. This background traffic was added to the existing counts as part of this TIA's future conditions.

B. EXISTING TRAFFIC CONDITIONS

2022 Traffic counts for the intersection analyzed in the study area were collected Thursday, September 19, 2022. Existing traffic counts are included in Appendix A. The 4-hour turning movement counts were collected from 7:00 AM to 9:00 AM, and in the afternoon, from 4:00 PM to 6:00 PM. These counts provide the AM and PM peak hour counts used in the analysis. These counts included lane utilization rates, right turn on red counts, saturation flow rates, percent arrivals on green, and true demand information. In addition, a queue analysis was conducted for 4 minutes out of each fifteen-minute period to determine queue levels at the signalized intersections included in this study.

Due to concerns over road closure on Beckner Road affecting vehicle trends at the time of traffic data collection, the turning movement counts for the intersection of Cerrillos (NM 14) & Beckner was substituted by data instead collected on May 19, 2022, for the neighboring Las Soleras Meridian Medical Office traffic study. This traffic count utilized the

peak 15-minute section and multiplied it by 4 for the worst-case hourly volume for the peak AM and PM traveling volumes. This traffic count information is also found in Appendix A.

C. EXISTING LEVELS OF SERVICE

1. VEHICULAR ANALYSIS

The *Highway Capacity Manual Sixth Edition* (HCM) defines Level of Service (LOS) for un-signalized intersections as follows:

Table 1 – LOS Definitions

Level of Service	Definition	Signalized (sec/veh)	Unsignalized (sec/veh)
A	Most vehicles do not stop.	<10	<10
B	Some vehicles stop.	>10 and <20	>10 and <15
C	Significant numbers of vehicles stop.	>20 and <35	>15 and <25
D	Many vehicles stop.	>35 and <55	>25 and <35
E	Limit of acceptable delay.	>55 and <80	>35 and <50
F	Unacceptable delay.	>80	>50

The City of Santa Fe and NMDOT has established LOS D as the generally acceptable level of service in urban areas and when intersections operate below this level, improvements are considered, where feasible.

The existing intersection traffic volumes as listed above were analyzed using McTrans Center's Highway Capacity Software (HCS 2023), which uses the intersection methodology and procedures from the Seventh Edition of the HCM. Individual intersection output for the existing conditions analysis is included in Appendix B.

The results are summarized in Table 2 and Table 3.

The analysis indicates the unsignalized intersections will operate at acceptable levels of service. No unsignalized movement operates worse than LOS C.

All signalized intersections operate with acceptable overall LOS in the existing conditions although several movements at each intersection are not acceptable for both AM and PM peak hours.

The intersection of Cerrillos (NM 14) and Herrera operates at an overall LOS B in both AM and PM peak hours. The intersection includes movements of LOS E for the eastbound left, westbound left, and westbound through movements in the AM peak hour. In the PM peak hour the eastbound left, eastbound through, westbound left, and westbound through movements are LOS E.

The intersection of Cerrillos (NM 14) and Beckner operates at overall LOS C in the AM peak hour and LOS B in the PM peak hour. This intersection also includes movements of LOS E and LOS F in both peak hours. The eastbound left movement is LOS F in both the AM and PM peak hours. The eastbound through, westbound through, and westbound right experiences LOS E in both AM and PM peak hours. These movements are mainly due to the signal coordination of Cerrillos road and could be adjusted by updating signal timing plans. Coordination with the City of Santa Fe and NMDOT would be required to make any adjustments to existing signal timing.

The unsignalized intersection of West Frontage Road and Mutt Nelson is operating at an overall acceptable LOS C in both AM and PM peak hours. The eastbound approach of this intersection also operates at LOS C in both AM and PM peak hours.

Table 2 – 2022 Existing Signalized Intersection Results

	2022 AM Peak			2022 PM Peak		
Intersection/Movement	**Delay**	**v/c**	**LOS**	**Delay**	**v/c**	**LOS**
Cerrillos (NM 14) & Herrera	15.3	0.795	B*	15.5	0.714	B*
NM 14 (Cerrillos) & Beckner	31.5	1.30	C**	17.2	0.980	B**

* - Individual movements at this intersection experience LOS E
** - Individual movements at this intersection experience LOS F

V. PROJECTED TRAFFIC

A. SITE TRAFFIC FORECASTING

1. TRIP GENERATION

Generated trips are broken down into three types; 1) primary, 2) pass-by trips, and 3) diverted link. The Trip Generation report defines these trips as follows:

- **Primary Trips** – These trips are made for the specific purpose of visiting the generator. The stop at that generator is the primary reason for the trip. For example, a home to shopping to home combination of trips is a primary trip set.
- **Pass-by Trips** – These trips are made as intermediate stops on the way from an origin to a primary trip generation. Pass-by trips are attracted from the traffic passing the site on an adjacent street that contains direct access to the generator site. These trips do not require a diversion from another roadway. For example, stopping at the store on the way home from work is an example of a pass-by trip. No pass-by trips were assigned to this development.
- **Diverted Linked Trips –** These trips are attracted from the traffic volume on the roadway within the vicinity of the generator, but which require a diversion from that roadway to another roadway to gain access to the site. The roadways could include streets or freeways adjacent to the generator, but without access to the generator. For this study, the diverted link trips have been included in with the primary trips.

All trips to the site were considered primary trips.

The trip generation based on the 11th Edition of the Institute of Transportation engineer's (ITE) Trip Generation Manual is shown below in Table 4.

Table 4 – Trip Generation

Land Use	Size	Daily	AM Enter	AM Exit	PM Enter	PM Exit
Single Family Housing Detached ITE Code 210	134 DU's	1321	25	72	82	49

2. TRIP DISTRIBUTION AND ASSIGNMENT

The trip distribution was determined using a modified gravity model that considered a region-wide travel shed for employment trips. As the development is residential, standard traffic analysis assumes the trips in the peak hour to be primarily employment trips, so the destinations for the AM trips are employment locations, with the origins at the site. In the PM peak hour, the destination is the site, and the origins are the employment locations.

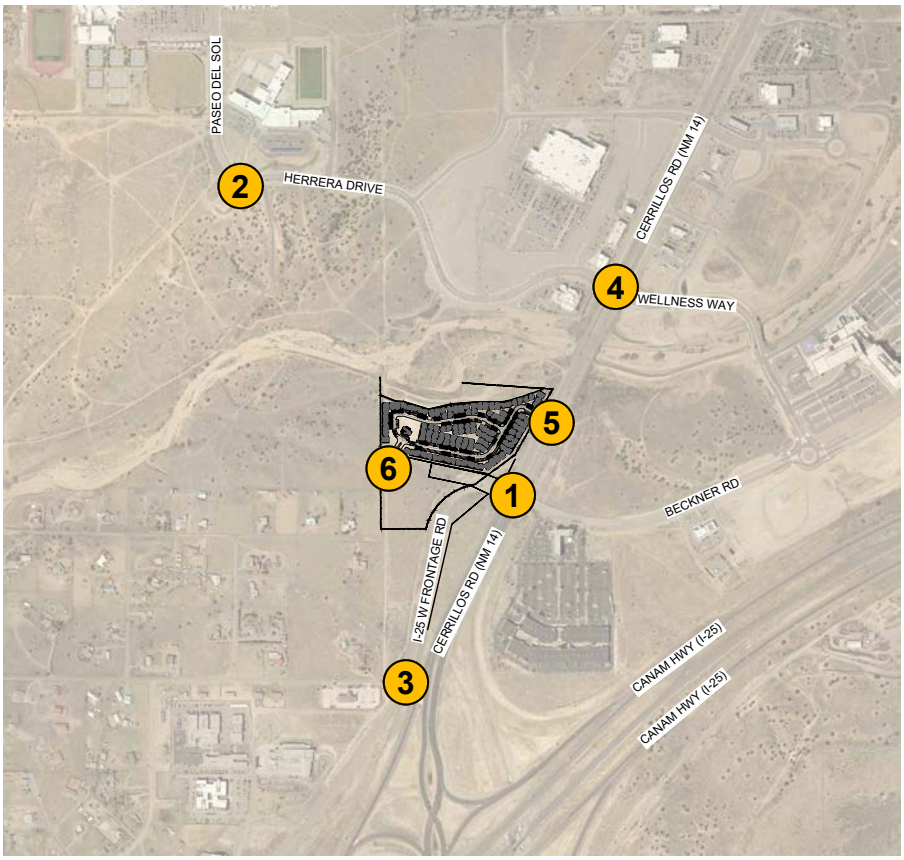
The gravity model uses the locations of employment, which are weighted by the number of jobs in the Subareas in the Santa Fe area as well as the Albuquerque Metropolitan area divided by their distance from the site. This means that employment locations closer to the site are considered more likely, with those farther away to be less likely, depending on how many jobs are in each subarea.

The gravity model utilized socioeconomic data obtained from the Santa Fe Metropolitan Planning Organization (SFMPO), which included population and employment estimates for each subarea within the Albuquerque Metropolitan Planning Area to develop the trip distribution.

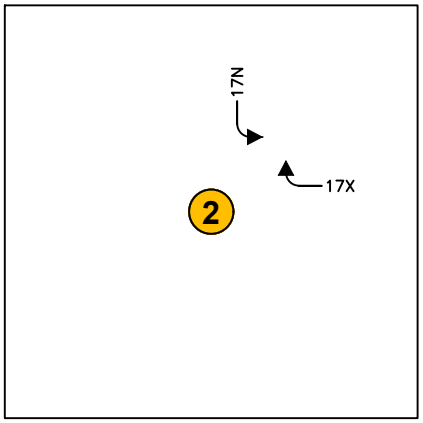
The socioeconomic data for the year 2022 was estimated by interpolating between the 2015 and 2040 socioeconomic data available for SFMPO.

Spreadsheets showing the development of the trip distribution are included in Appendix C. The trip distribution percentages and assigned traffic volumes is shown in Figure 6 and Figure 7.

3. 2026 NO BUILD TRAFFIC PROJECTIONS

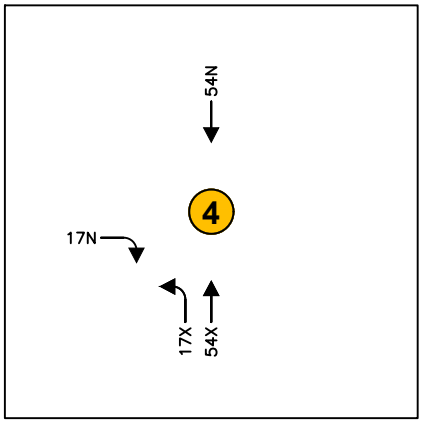


The NMDOT Transportation Data Management System (TIMS) historic traffic data along Cerrillos Road (NM 14) within the vicinity of the site shows a minimal growth rate outside of the influence of pandemic-era traffic trends. Analysis of this data presented a negative growth trend. For a conservative approach to match other TIA's that have been completed in the area, an annual growth rate of 1% was assumed.



Spreadsheets showing the development of the growth rates is included in Appendix C. The No Build analysis assumed that the proposed project is not completed.

4. BACKGROUND TRAFFIC GROWTH FROM NEIGHBORING DEVELOPMENT



This area includes several TIA's and developments that have started construction that will be included in this traffic study. The development of the Las Soleras Meridian Medical Office Building, 5407 Beckner development, 5201 Beckner development, Cielo Apartment

complex, Village at Loas Soleras, and Havenly Santa Fe development all located east of Cavan Multi-Family Development, are expected to be completed by 2024 and contribute to the amount of traffic within this traffic study development's area. Consideration to the traffic influence on the Cavan development was accounted for in the development growth, and background traffic from the buildout of these developments were included in future year conditions of the traffic study by adding it on top of the annual background growth. The intersections which include the additional traffic are the intersections of Cerrillos (NM 14) and Herrera, as well as Cerrillos (NM 14) and Beckner.

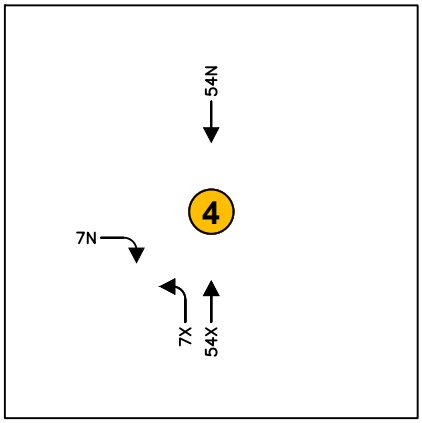
5. SANTA FE MPO MODEL ALTERNATIVE TRIP REDISTRIBUTION



An additional analysis for the 2036 horizon year was completed to assess a potential connection between the West Frontage Road and Herrera Drive. This connection is included in the SFMPO metropolitan transportation plan as a future road extension that may be studied by the MPO and added as a regional transportation link in the future. This traffic impact analysis will include this connection in the horizon year to assess the long-term contributions of this connection. This connection was included into the SFMPO model to reflect changes in the network of roadways in the area. This reroute through the new connection accounted for a large percentage of vehicles that rerouted to utilize this new connection that are traveling from west of the site to downtown Santa Fe via I-25. The connection was also taken into account for the trip distribution stemming from the Cavan development, and percentages were redistributed according to the gravity model needs to utilize this new connection.

Spreadsheets showing the development of the trip distribution for this connection are also included in Appendix C. These modified percentages and volumes can be found in Figure 8 and Figure 9.

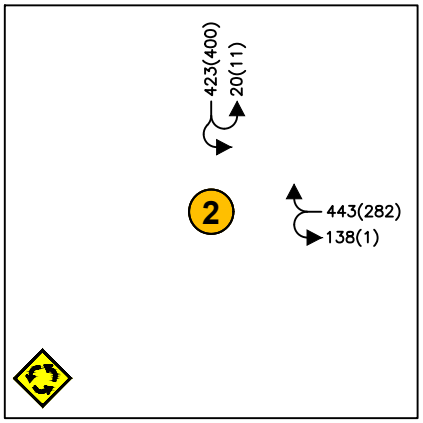
VI. TRAFFIC AND IMPROVEMENT ANALYSIS

The following section will discuss the results of the future year traffic analysis.

A. LEVEL OF SERVICE ANALYSIS

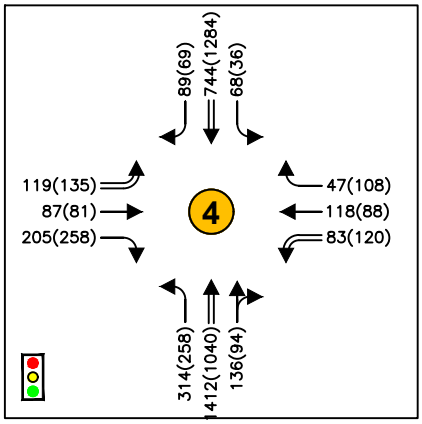
1. 2026 NO BUILD INTERSECTION CAPACITY ANALYSIS

The 2026 No Build Scenario assumes that the proposed Cavan Multi-Family development project is not implemented in this phase and that no improvements occur at any of the intersections for this development. Other traffic impact studies in the vicinity have recommendations that have been included in the no build analysis. Specifically, the 5407 Beckner TIA included an additional westbound left turning lane at the NM 14 (Cerrillos) and Beckner intersection that will be included in the no build analysis of this study. For the 2026 No Build scenario, the intersections were again analyzed using the Highway Capacity Software (HCS7), with background traffic growth from the 2022 existing scenario. Table 5 and Table 6 shows the 2026 No Build results. The HCS7 output is included in Appendix D.



The unsignalized intersections continue to operate at an acceptable level of service in the 2026 No Build scenario. Again, no unsignalized intersection operates worse than LOS C.

The signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS B in both the AM and PM Peak hours although both peak periods include LOS E in the eastbound left, westbound left, and westbound through movements. Again, these movements are mainly due to the signal coordination of Cerrillos road and could be adjusted by updating signal timing plans. Coordination with the City of Santa Fe and NMDOT would be required to make any adjustments to existing signal timing.



The Cerrillos and Beckner intersection operates at an overall acceptable LOS D in the AM and LOS C in the PM peak hour. This intersection continues to include movements of LOS E and LOS F in both peak hours. The eastbound left movement is LOS F in both the AM and PM peak hours. The eastbound through movement is LOS E in the AM peak hour and the westbound through and right movement is LOS E in the PM peak hour.

2. 2026 BUILD TRAFFIC VOLUMES

The trips generated by the site (as seen in Table 4) were assigned to the intersections. These trips were added to the 2026 No Build traffic projections. The 2026 Build summary results are shown in Table 7 and Table 8. The individual intersection output is included in Appendix E.

All unsignalized intersections and movements operate at acceptable levels of service, with no movements worse than LOS C.

The signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS B in both the AM and PM Peak hours. The eastbound left, westbound left, and westbound through movements continue to experience LOS E in both AM and PM peak hours. Again, this may be mitigated by signal timing adjustments although any adjustments should be coordinated with the City of Santa Fe and NMDOT prior to any work being completed.

The level of service analysis of the signalized intersection of Cerrillos and Beckner was completed to fully explore the option to either keep the free right movements or remove the free right movements at the intersection. Multiple alternatives were run and compared for the build scenario. All Cerrillos and Beckner intersection options are analyzed with an additional westbound left turning lane in their scenarios, stemming from a recommendation from the 5407 Beckner TIA that has been approved by the City of Santa Fe.

In the option to maintain the free right movements southbound and eastbound, the intersection operates at an overall acceptable LOS D in the AM peak hour and LOS C in the PM peak hour although movements of LOS E and LOS F are present in both peak hours. The eastbound left turn movement will operate at LOS F and the eastbound through movement will operate at LOS E in both AM and PM peak hours. The westbound through and right movements will operate at LOS E in the PM peak hour. The volume to capacity ratio for the eastbound left turn lane will be above 1 which indicates that the intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

This option was also analyzed with dual eastbound left turn lanes due to the failing movement described in the previous paragraph. In this analysis, the intersection operates at an overall acceptable LOS C in the AM peak hour and LOS B in the PM peak hour, although movements of LOS E are still present in both peak hours. The eastbound left movement improved to LOS E in the AM peak hour, and the eastbound left and through movements improved to LOS D in the PM peak hour, but all other movements remained as previously analyzed above. The worst movement volume to capacity remains under 1 which indicates

that the intersection will operate appropriately for the volume of traffic the intersection receives.

With the free right turn lanes removed, the analysis showed a similar result. The intersections of Cerrillos (NM 14) and Beckner will operate at an overall acceptable LOS F in the AM peak hour and LOS C in the PM peak hour with movements of LOS E and LOS F remaining present in both peak hours. The eastbound left turn movement operates at a LOS F and the eastbound through and eastbound right movements will operate at LOS E in both AM and PM peak hours. The westbound through and right movements operate at LOS E in the PM peak hour. The volume to capacity ratio for the eastbound left turn lane will be above 1 which indicates that the intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

This option was also analyzed with dual eastbound left turn lanes due to the failing movements as described in the previous paragraph. In this analysis, the eastbound left movements improved to LOS E in the AM peak hour and LOS D in the PM peak hour, but the eastbound through and eastbound right movements will remain at LOS E in both AM and PM peak hours. The westbound through and right movements improve to LOS D in the AM peak hour. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic entering the intersection.

As these options that were analyzed will affect the overall intersection, the westbound approach to this intersection was adjusted to align with the eastbound approach proposed mitigations. This included the aforementioned additional westbound left turning lane as recommended in the 5407 Beckner TIA, and aligning the westbound approach to the eastbound approach.

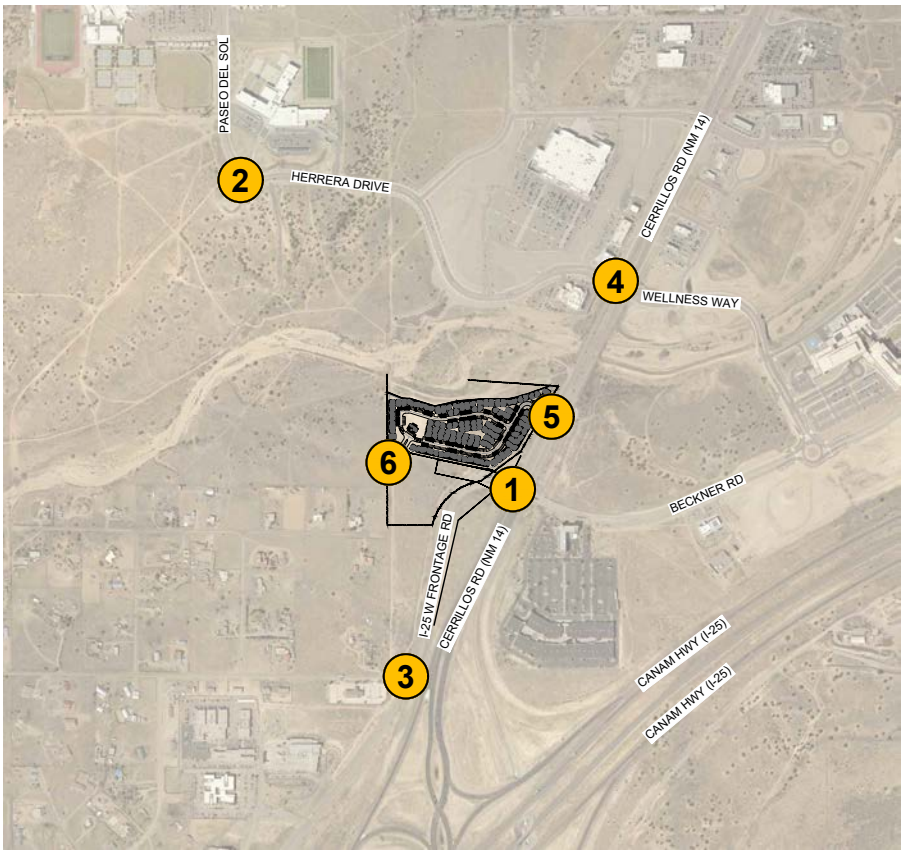
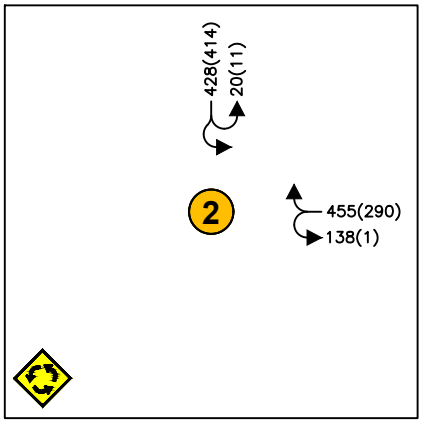
+Dual EB Left Turn lanes	23.6	0.800	C*	19.5	0.792	B*

* - Individual movements at this intersection experience LOS E
** - Individual movements at this intersection experience LOS F

The roundabout intersection of the south driveway and the I-25 West Frontage Road shows that a single lane roundabout would be sufficient for the capacity of vehicles using the roundabout. For lane balancing purposes a dual lane roundabout could be installed with the project and the LOS for a dual lane roundabout would be similar in nature to the single lane roundabout. If a dual lane roundabout is sought after, the NMDOT and the City of Santa Fe should be in agreement prior to the implementation.



Implementation of the build scenario introduces driveways to the development study. According to the State Access Management Manual (SAMM), the east right-in, right-out driveway to the development warrants a deceleration lane with the given build volumes turning into the development at this location, per SAMM Table 17.B-2 Criteria for Deceleration Lanes on Urban Multi-Lane Highways. Additionally, the intersection of Cerrillos (NM 14) and Beckner should include a southbound right deceleration lane.



As the southbound thru volumes at both of these intersections exceed 730 per hour with a turning volume greater than 5 in each of the peak hours, the implementation of this right turn deceleration lane is required based on the SAMM and recommended for installation with the development. The deceleration lane on Cerrillos Road should have a minimum length of 370 feet, and an added taper of 150 feet, per SAMM Table 18.K-1 Deceleration and Acceleration Lengths (Feet), totaling 520 feet. These SAMM Tables can be found in Appendix J.

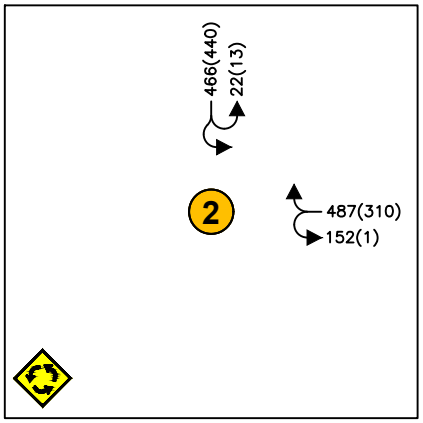
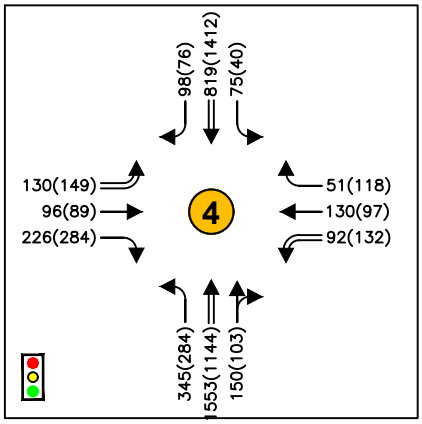
3. 2036 HORIZON YEAR NO BUILD TRAFFIC VOLUMES

The NMDOT requires a 10-year Horizon capacity analysis to determine long term traffic effects of newly established developments within the area for future network considerations. The horizon year analysis was completed in an effort to assist that development of future transportation needs and to determine what mitigation efforts may be needed down the road. This no build is considered a true no build as no improvements are included in the no build analysis. Other traffic impact studies in the vicinity have recommendations that have been included in the horizon year no build analysis. Specifically, the 5407 Beckner TIA included an additional westbound left turning lane at the NM 14 (Cerrillos) and Beckner intersection that will be included in the no build analysis of this study. A summary of results is in Table 9 and Table 10. Individual intersection output may be found in Appendix F.



All unsignalized intersections will continue to operate under acceptable conditions in the 2036 No Build scenario.

The signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS B in both the AM and PM Peak hours. This intersection experiences individual movements of LOS E in the eastbound left, westbound left and westbound through directions. This intersection operates with all movements with a volume to capacity below 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.



Cerrillos and Beckner operates at an overall acceptable LOS D in the AM peak hour and LOS C in the PM peak hour. Individual movements of LOS F occur for the eastbound left in both the AM and PM peak hours, the eastbound through movement operates at LOS E in the AM peak hours, and the westbound right movement operates at LOS E in the PM peak hour. The volume to capacity ratio for the eastbound left turn lane will be above 1 in both the AM and PM peak hours which indicates that the intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

4. 2036 HORIZON YEAR BUILD TRAFFIC VOLUMES

In the 2036 Build scenario, all unsignalized intersections and movements operate at acceptable levels of service, with no overall unsignalized intersection operating worse than LOS C. A summary of results is found in Table 11 for signalized analysis and Table 12 for unsignalized results. Individual output results may be found in Appendix G.

The signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS B in the AM peak hour and LOS C in the PM peak hour. This intersection experiences several movements of LOS E in both AM and PM peak hours including the eastbound left, westbound left, and westbound through movements. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.

The level of service analysis of the signalized intersection of Cerrillos and Beckner was again completed to fully explore the option to either keep the free right movements or remove the free right movements to improve pedestrian safety at the intersection. Multiple alternatives were run and compared for the build scenario. All Cerrillos and Beckner intersection options are analyzed with an additional westbound left turning lane in their scenarios, stemming from the recommendations in the 5407 Beckner TIA.

In the option to maintain the free right movements southbound and eastbound, Cerrillos and Beckner will operate at an overall LOS E in the AM peak hour and LOS C in the PM peak hour although movements of LOS E and LOS F are present in both peak hours. The eastbound left movements will operate at LOS F in both peak hours with a volume to capacity ratio above 1, indicating that this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing. The eastbound through movement will operate at LOS E in both AM and PM peak hours although the eastbound through movement will operate with a volume to capacity ratio below 1 which indicates that this movement will operate appropriately for the volume of traffic each movement receives. The westbound through and right movements operate at LOS E in the PM peak hour. While these specific movements continue to decline, the signalized intersections all still operate at overall acceptable conditions.

This option was also analyzed with an addition of dual eastbound left turn lanes due to the LOS F movement described in the previous paragraph. With this addition, the overall intersection was improved to a LOS C in the AM peak hour and LOS B in the PM peak hour. The eastbound left movements improved to LOS D in the PM peak hour, but the eastbound through and right movements will remain at LOS E in both AM and PM peak. The worst

movement volume to capacity remains under 1 which indicates that the intersection capacity will exceed the volume of vehicles that the intersection receives.

In the option to remove the free right movements southbound and eastbound, Cerrillos and Beckner will operate at an overall acceptable LOS E in the AM peak hour and LOS C in the PM peak hour. The eastbound left movements will operate at LOS F in the AM peak hour with a volume to capacity ratio above 1 which indicates that this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing. The eastbound through will operate at LOS E in both AM and PM peak hours. The eastbound through and right and the westbound through and right movements will operate at LOS E in the PM peak hour although these movements will operate with a volume to capacity ratio below 1 which indicates that these movements will operate appropriately for the volume of traffic the movement receives. While these specific movements continue to decline, the signalized intersections all still operate at overall acceptable conditions in the PM peak hour.

To mitigate the eastbound left traffic congestion and delays, dual eastbound lefts were included in an analysis with the removal of the free right turn movements. With this addition, the overall intersection was improved to a LOS C in the AM and LOS B in the PM peak hours. The eastbound left movements improved to LOS D in the PM peak hour, but the eastbound through movement in both peak hours, the eastbound left movement in the AM peak hour, and the eastbound right and westbound through and right movements in the PM peak hour will remain at LOS E. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic entering the intersection.

As these options that were analyzed will affect the overall intersection, the westbound approach to this intersection was adjusted to align with the eastbound approach proposed mitigations. This included the aforementioned additional westbound left turning lane as recommended in the 5407 Beckner TIA and aligning the westbound approach to the eastbound approach.

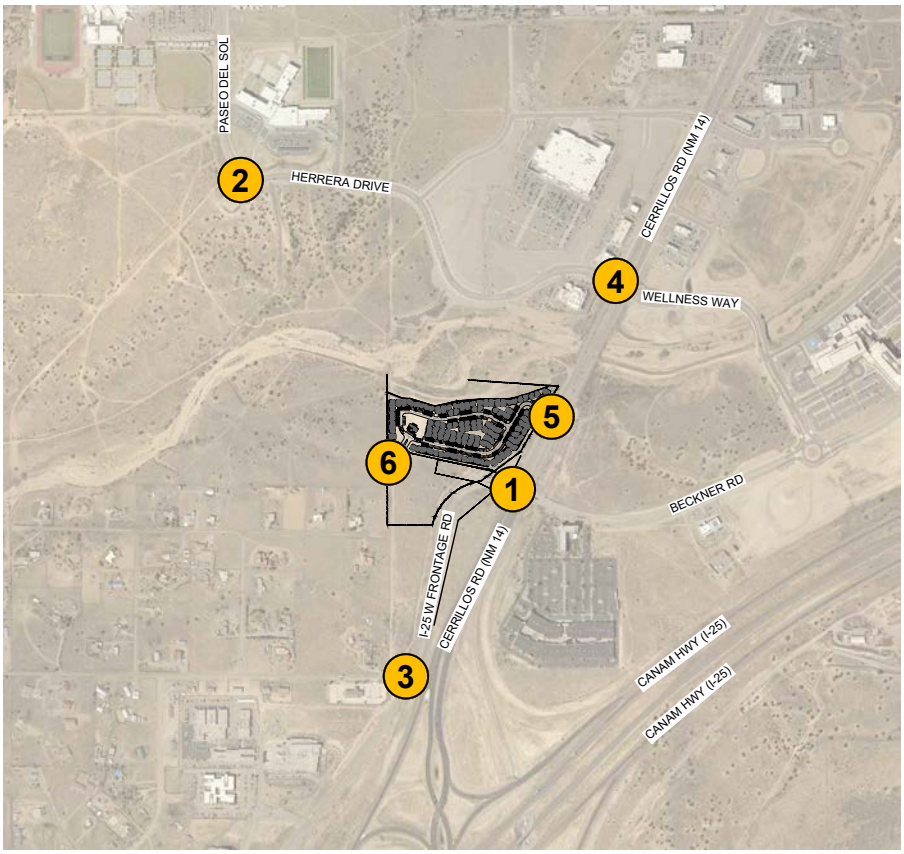

Table 11 – 2036 Horizon Year Build Signalized Intersection Results						
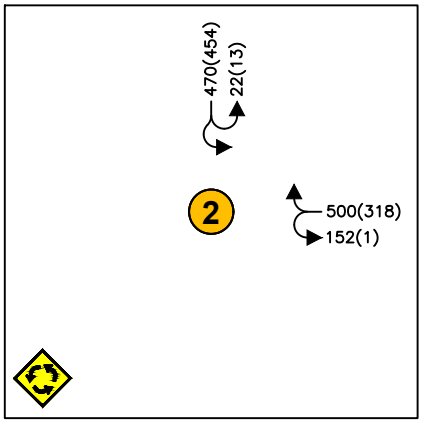
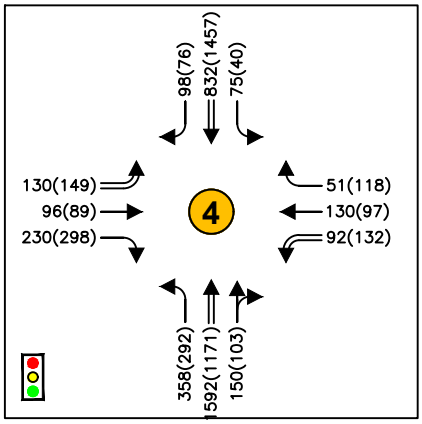
	2036 AM Peak			2036 PM Peak		
Intersection/Movement	Delay	v/c	LOS	Delay	v/c	LOS
Cerrillos (NM 14) & Herrera	19.3	0.822	B*	27.1	0.923	C*
NM 14 (Cerrillos) & Beckner	55.3	1.713	E**	31.5	1.336	C**
+Dual EB Left turn lanes	24.3	0.870	C*	19.3	0.811	B*
Beckner Channelized Right Removal	56.9	1.713	E**	31.9	1.336	C**
+Dual EB Left turn lanes	25.9	0.870	C*	19.8	0.811	B*
* - Individual movements at this intersection experience LOS E ** - Individual movements at this intersection experience LOS F						



The roundabout intersection of the south driveway and the I-25 West Frontage Road shows that a single lane roundabout would be sufficient for the capacity of vehicles using the roundabout. For lane balancing purposes a dual lane roundabout could be installed with the project and the LOS for a dual lane roundabout would be similar in nature to the single lane roundabout. If a dual lane roundabout is sought after, the NMDOT and the City of Santa Fe should be in agreement prior to the implementation.

Implementation of the build scenario introduces driveways to the development study. According to the State Access Management Manual (SAMM), the east right-in, right-out driveway to the development warrants a deceleration lane with the given build volumes turning into the development at this location, per SAMM Table 17.B-2 Criteria for Deceleration Lanes on Urban Multi-Lane Highways. Additionally, the intersection of Cerrillos (NM 14) and Beckner should include a southbound right deceleration lane.



As the southbound thru volumes at both of these intersections exceed 730 per hour with a turning volume greater than 5 in each of the peak hours, the implementation of this right turn deceleration lane is required based on the SAMM and recommended for installation with the development. The deceleration lane on Cerrillos Road should have a minimum length of 370 feet, and an added taper of 150 feet, per SAMM Table 18.K-1 Deceleration and Acceleration Lengths (Feet), totaling 520 feet. These SAMM Tables can be found in Appendix J.

5. 2036 HORIZON YEAR NO BUILD SANTA FE MPO MODEL REDISTRIBUTION

To reflect the SFMPO's vision of the future road connecting the Paseo del Sol & Herrera roundabout to the planned south roundabout entrance on West Frontage, the transportation planning software PTV Visum was used to model the resulting traffic trend changes to the surrounding area. The model demonstrated that with the connection, 81% of the traffic will chose to use the new connection from the north and 6% of the traffic will chose to take the new connection from the south. These percentages were applied to the appropriate intersections to take this alternative route. For the turning movement counts and analysis, they utilized the worst-case scenario percentages of average daily traffic (ADT) as well as intersection turning movements to generate the volumes reassigned between intersections.

Other traffic impact studies in the vicinity have recommendations that have been included in this no build analysis. Specifically, the 5407 Beckner TIA included an additional westbound left turning lane at the NM 14 (Cerrillos) and Beckner intersection that will be included in the no build analysis of this study.

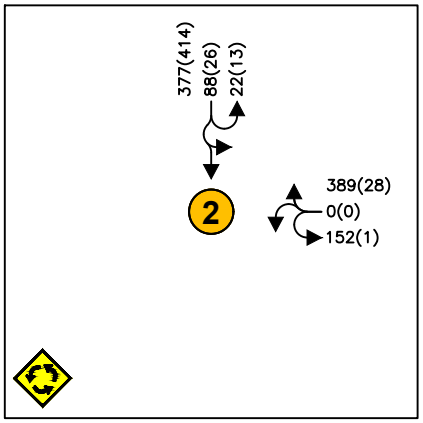
The results of the Santa Fe MPO model connection's implementation to the 2036 No Build scenario is seen in Table 13 for signalized results and Table 14 for unsignalized results. Individual output may be found in Appendix H.

All unsignalized intersections will continue to operate under acceptable conditions in the 2036 No Build scenario.

The signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS C in the AM peak hour and LOS B in the PM peak hour. This intersection includes the eastbound left, westbound left, and westbound through movements that operate at LOS E in both AM and PM peak hours and eastbound through movement in the AM peak hour. This intersection operates with all movements with a volume to capacity below 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.

The intersection of Cerrillos (NM 14) and Beckner may be upgraded as part of the SFMPO study of the future connection and was included here as a worse case no build scenario. For the 2036 horizon year no build analysis, the current lane geometry of the intersection was analyzed to reflect a true no build scenario.

Cerrillos and Beckner operates at an overall acceptable LOS C in both the AM and PM peak hours. The northbound left operates at LOS F in the PM peak hour. The volume to



capacity ratio for the northbound left turn lane will be above 1 in the PM peak hour which indicates that the intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing during the PM peak hour.

6. 2036 HORIZON YEAR BUILD SANTA FE MPO MODEL REDISTRIBUTION

Distribution of traffic generation by the Cavan development is also shifted with a new route possible to the west of the development. A sizable portion of traffic that would otherwise travel through Cerrillos (NM 14) to reach the development now has a secondary option with the Santa Fe MPO model connection. A summary of results is in Table 15 and Table 16. Individual output may be found in Appendix I.

The signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS C in the AM peak hour and LOS B in the PM peak hours. This intersection experiences several movements of LOS E in both AM and PM peak hours including the eastbound left, westbound left, and westbound through movements. The eastbound through movement also operates at LOS E but only in the PM peak hour. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.

The level of service analysis of the signalized intersection of Cerrillos and Beckner was again completed to fully explore the option to either keep the free right movements or remove the free right movements to improve pedestrian safety at the intersection. Both alternatives were run and compared for the build scenario. As indicated in the 2026 build analysis a dual eastbound left will be needed at this intersection and will be included in all analysis in the 2036 horizon year build to include the Santa Fe MPO model redistribution. As with the other build conditions, the Cerrillos and Beckner intersection options are analyzed with an additional westbound left turning lane in their scenarios as recommended in the 5407 Beckner TIA.

In the option to maintain the free right movements southbound and eastbound, Cerrillos and Beckner will operate at an overall acceptable LOS C in both the AM and PM peak hour although movements of LOS E and LOS F are present in the PM peak hour. The northbound left turning movement operates at LOS F in the PM peak hour. The northbound left turning movement volume to capacity is also above 1 in the PM peak hour which indicates that this intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing during the PM peak hour.

Adding an additional northbound left turning lane on Cerrillos will improve this movement and the overall level of service will improve to LOS C in both AM and PM peak hours. No movement will operate worse than LOS D in both the AM and PM peak hours in this scenario, which still retains a volume to capacity ratio of less than 1.

In the option to remove the free right movements southbound and eastbound, Cerrillos and Beckner will operate at an overall LOS D in the AM peak hour and LOS E in the PM peak hour, with some individual movements operating at LOS E. Because the free rights were removed, the eastbound right movement is degraded to an LOS F in both peak hours causing a volume to capacity ratio greater than 1, indicating that this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing. Additionally, the northbound left turning movement remains operating at LOS F in the PM peak hour.

Adding an overlap phase for the eastbound right improves the operation of this movement to an overall LOS D in both the AM and PM peak hour. The eastbound right operates as LOS F in the PM peak hour with this overlap phase, with a volume to capacity ratio greater than 1 which indicates that this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing. Again, the northbound left turning movement remains operating at LOS F in the PM peak hour.

Adding a dual eastbound right turn lane at the intersection will result in the overall LOS D in both the AM and PM peak hour. The eastbound left turning movement will operate at LOS F in the AM and LOS E in the PM peak hours. The eastbound right turn movement will remain at LOS F in the PM peak hour with a volume to capacity ratio greater than 1 which indicates that this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

Adding an overlap phase to this dual eastbound right turn lane and adding a dual northbound left turn lane will result in the overall LOS C in the AM and PM peak hours. These changes will also improve all the movements to acceptable level of service where all movements operate at LOS D or better in both the AM and PM peak hour. The volume to capacity ratio for this movement drops below 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.

Since the connection shown in the SFMPO model may or may not be constructed in the future, this analysis shows a worst-case scenario that may not ever be made. It is recommended at this time to require the needed improvements outlined in the analysis without the connection and may require additional analysis if this connection is ever made in the future. At this time, if the improvements outlined in Table 15 are made to the intersection, it will widen the intersection possibly causing more eastbound right lanes than necessary at this time. Due to this issue, it is recommended to retain the free right turn lanes

and construct the eastbound lanes to include two dedicated left turn lanes, one dedicated through lane, and one free right turn lane at this time.

Again, as these options that were analyzed will affect the overall intersection, the westbound approach to this intersection will be adjusted to align with the eastbound approach proposed mitigations. This will include adding additional lanes and aligning the westbound approach to the eastbound approach.

Table 15 – 2036 Horizon Year Santa Fe MPO Model Build Signalized Intersection Results

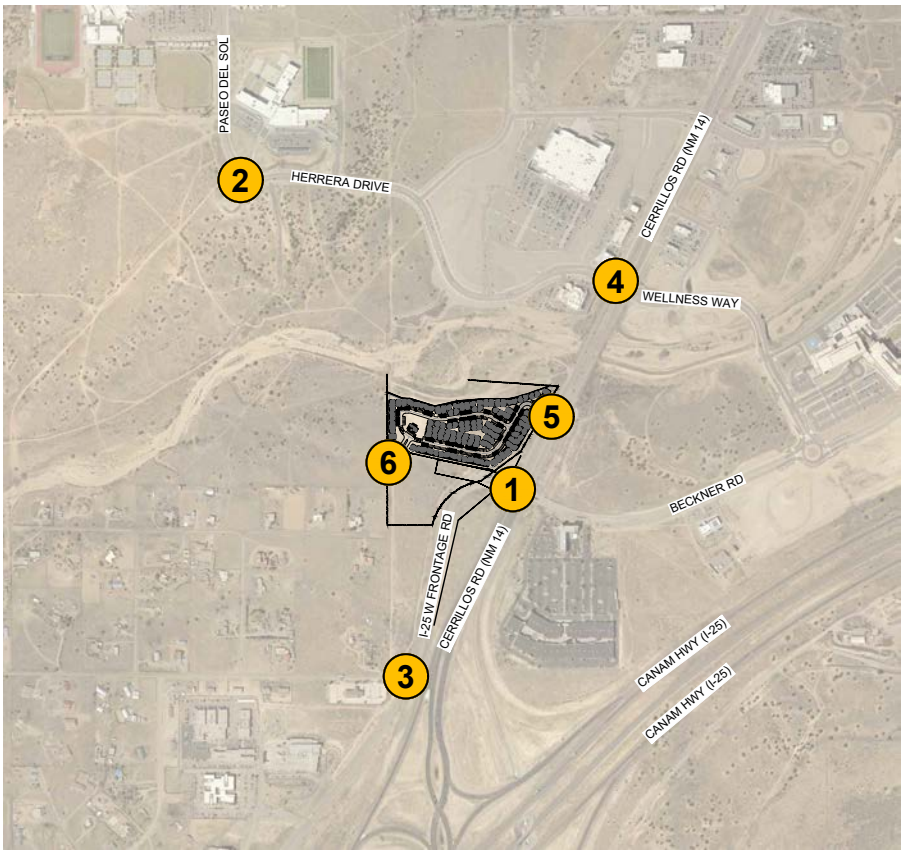
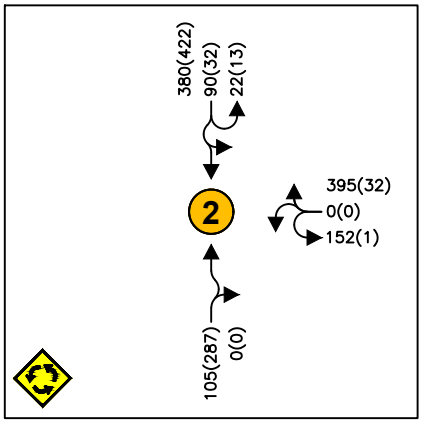
Beckner Dual EBR/NBL Overlap Phase	30.2	0.781	C	27.7	0.737	C

* - Individual movements at this intersection experience LOS E
** - Individual movements at this intersection experience LOS F



The roundabout intersection of the south driveway and the I-25 West Frontage Road shows that a single lane roundabout would be sufficient for the capacity of vehicles using the roundabout in the 2036 Horizon analysis with the connection between the West Frontage Road and Herrera. For lane balancing purposes a dual lane roundabout could be installed with the project and the LOS for a dual lane roundabout would be similar in nature as the signal lane roundabout. If a dual lane roundabout is sought after, the NMDOT and the City of Santa Fe should be in agreement prior to the implementation.



As with all the Build scenarios, the same recommendations for deceleration lanes apply to this horizon analysis. Trip entry and departure from the east driveway is not affected with the introduction of the connection according to the Santa Fe MPO model. The deceleration lane on Cerrillos Road should have a minimum length of 370 feet, and an additional taper of 150 feet, per SAMM Table 18.K-1 Deceleration and Acceleration Lengths (Feet), totaling 520 feet. These SAMM Tables can be found in Appendix J.

VII. CRASH DATA ANALYSIS

Crash history for the intersections along Cerrillos Road (NM 14) included in the study was requested through the NMDOT crash data inventory. The crash data for 2016 through 2020 was included in this analysis and is provided in Appendix K. As part of this analysis, classifications of accident types were determined in accordance with New Mexico classifications. These classifications include Class K, for an accident resulting in a fatality, Class A for an accident that involved an incapacitating injury requiring medical intervention, Class B with visible injuries sustained, and Class C with possible injuries.

Within this 4-year period, one accident involving Class K occurred, one accident of Class A occurred, eleven accidents of class B occurred, and sixty accidents of Class C occurred. A summary of these crashes with a description of crash causes are provided in Table 17.

Table 17 – Crash Summary

	Class K	Class A	Class B	Class C
West Frontage & Mutt Nelson	0	0	2	7
Cerrillos (NM 14) & West Frontage	0	1	3	30
Cerrillos (NM 14) & Herrera	1	0	6	23

Historical crash data demonstrates the majority of crashes are occurring along the major road Cerrillos (NM 14). Crashes occurring are mainly rear end collisions occurring at the main intersections, usually caused by driver inattention, or following too closely. To help mitigate the possibility of crashes due to the development, the project is including the addition of dedicated right turn lanes southbound at both the right-in/right-out and the intersection of W Frontage Road. This lane is warranted and will be included in the final design to make the intersection safer due to turning vehicles having a dedicated lane.

VIII. CONCLUSIONS AND RECOMMENDATIONS

A. CONCLUSIONS

The traffic analysis shows that under 2022 Existing conditions, unsignalized intersections will operate at acceptable levels of service with no movements operating worse than LOS C. All signalized intersections operate with overall acceptable LOS in the existing conditions although several movements at each intersection are not acceptable for both AM and PM peak hours.

The intersection of Cerrillos (NM 14) and Herrera operates at an overall LOS B in both AM and PM peak hours. The intersection includes movements of LOS E for the eastbound left, westbound left, and westbound through movements in the AM peak hour. In the PM peak hour the eastbound left, eastbound through, westbound left, and westbound through movements are LOS E.

The intersection of Cerrillos (NM 14) and Beckner operates at overall LOS C in the AM peak hour and LOS B in the PM peak hour. The eastbound left movement is LOS F in both the AM and PM peak hours. The eastbound through, westbound through, and westbound right experiences LOS E in both AM and PM peak hours. These movements are mainly due to the signal coordination of Cerrillos road and could be adjusted by updating signal timing plans. Coordination with the City of Santa Fe and NMDOT would be required to make any adjustments to existing signal timing.

Within the 2026 build scenario, the signalized intersection of Cerrillos (NM 14) and Herrera operates at an overall acceptable LOS B in the AM peak hour and LOS C in the PM peak hour. The eastbound left, westbound left, and westbound through movements will experience LOS E in both the AM and PM peak hours. This may be mitigated by signal timing adjustments although these should be coordinated with the City of Santa Fe and NMDOT prior to any work being completed.

The preferred layout of the intersection of Cerrillos (NM 14) and Beckner retains the free right turn lanes that are present at the intersection today due to capacity issues in the horizon year analysis. With the free right movements southbound and eastbound retained, the intersection operates at an overall acceptable LOS D in the AM peak hour and LOS C in the PM peak hour. The eastbound left turning movement will operate at LOS F in both peak hours and the eastbound through movement will operate at LOS E in both peak hours. The volume to capacity ratio for the eastbound left will be above 1 which indicates that the

intersection will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

In response to the eastbound left turn movement, an analysis was completed with dual eastbound left turn lanes. In this analysis, the eastbound left movements improved to LOS D in both peak hours. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic the intersection receives.

The south roundabout requested by the development to provide access at the southwest corner of the development will operate at acceptable conditions with a one lane approach at each leg.

In the 2036 Horizon Year build scenario, the intersection of NM 14 (Cerrillos) and Beckner continues to operate acceptably with the inclusion of dual eastbound lefts and the retention of the free right turn movements southbound and eastbound. The overall intersection will be a LOS C in both the AM and PM peak hours. The eastbound left movements improve to LOS D in both peak hours due to the dual left turn lanes, but the eastbound through movement will remain LOS E in the AM and PM peak hours. The westbound left movement will remain at LOS E in the PM peak hour. The worst movement volume to capacity remains under 1 which indicates that the intersection will operate appropriately for the volume of traffic entering the intersection.

Implementing the Santa Fe MPO model connection by the 2036 Horizon Year will see the intersection of NM 14 (Cerrillos) and Beckner change significantly. With the retention of the free right turn lanes and the implementation of the eastbound dual left turn lanes, the intersection will result in the overall LOS D in the AM peak hour and LOS C in the PM peak hour. The northbound right movement will operate at LOS E in the AM peak hour and the northbound left will operate at LOS F in the PM peak hour. The volume to capacity ratio for the northbound left will be greater than 1 indicating this movement will be overcapacity and not be able to accommodate all the traffic in the given phase timing.

Adding an additional northbound left turning lane to this analysis results in the intersection operating at an overall LOS C in both the AM and PM peak hours. The only movement that remains an LOS E is the northbound right movement. All movements will retain a volume to capacity ratio of less than 1 indicating this will operate acceptably.

The south roundabout requested as part of this development to provide access at the southwest corner of the development operates at acceptable conditions into the horizon build scenario with a one lane approach at each leg. If a dual lane roundabout is desired at

this location the NMDOT and the City of Santa Fe should be in agreement prior to the implementation.

B. RECOMMENDATIONS

- The developer is requesting a roundabout be built at the southwest corner of the new development. Our analysis shows that this roundabout can operate at acceptable LOS as a 1 lane roundabout with 1 lane minimum on each of the approaches. If a dual lane roundabout is desired by the developer at this location, the NMDOT and City of Santa Fe should be in agreement prior to the implementation.
- The analysis indicates the Southbound and Eastbound free right configuration provides a better level of service for these movements. NMDOT Traffic technical support may require the design to remove the free right turns and construct a right turn lane adjacent to the through lane to improve bicycle and pedestrian safety at the intersection. If the existing free right configuration is maintained, it is recommended that the eastbound lane configurations include two dedicated left turn lanes, one dedicated through lane, and one right turn lane prior to the 2026 build year.
- If the connection of the West Frontage Road and Herrera occurs, implementation of dual eastbound right movements with a signal overlap phase will be needed at Cerrillos (NM 14) and Beckner by the 2036 horizon year. An additional northbound left turning lane will also be needed prior to the 2036 horizon year if this connection is made. These recommendations are only applicable if the connection between the Frontage Road and Herrera is made.
- Deceleration lane into the site development for the East Driveway on Cerrillos Road (NM 14) should be built as part of the development. The deceleration lane length of 370 feet, and an additional taper of 150 feet, according to the State Access Management Manual (SAMM) criteria, totaling 520 feet recommended.
- Southbound deceleration lane into the West Frontage Road at Cerrillos Road (NM 14) should be retained as part of the development. The deceleration lane length of 370 feet minimum, and an additional taper of 150 feet should be verified, according to the State Access Management Manual (SAMM) criteria, totaling 520 feet recommended.
- Changes to the east leg of the intersection of Cerrillos (NM 14) and Beckner will be needed to address alignment issues that may arise as other improvements are completed.

HCS7 Roundabouts Report

General Information

Analyst	AG
Agency or Co.	BH
Date Performed	9/19/2022
Analysis Year	2022
Time Analyzed	2022 EXIST AM
Project Description	Cavan Multi-Family Develop...

Site Information

Intersection	Paseo del Sol & Herrera
E/W Street Name	Herrera Drive
N/S Street Name	Paseo del Sol
Analysis Time Period (hrs)	0.25
Peak Hour Factor	0.76
Jurisdiction	CoSF, NMDOT

Volume Adjustments and Site Characteristics

Approach	EB				WB				NB				SB			
Movement	U	L	T	R	U	L	T	R	U	L	T	R	U	L	T	R
Number of Lanes (N)	0	0	0	0	0	0	0	1	0	0	0	0	0	1	0	0
Lane Assignment							R								L	
Volume (V), veh/h					133			426					19	407		
Percent Heavy Vehicles, %					1			1					2	2		
Flow Rate (v_{PCE}), pc/h					176			564					25	546		
Right-Turn Bypass	None				None				None				None			
Conflicting Lanes					1								1			
Pedestrians Crossing, p/h					0								0			

Critical and Follow-Up Headway Adjustment

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Critical Headway (s)					4.9763						4.9763	
Follow-Up Headway (s)					2.6087						2.6087	

Flow Computations, Capacity and v/c Ratios

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Entry Flow (v_e), pc/h					740						571	
Entry Volume, veh/h					735						560	
Circulating Flow (v_c), pc/h	747			25			747			176		
Exiting Flow (v_{ex}), pc/h	722			0			589			0		
Capacity (c_{pce}), pc/h					1345						1153	
Capacity (c), veh/h					1336						1132	
v/c Ratio (x)					0.55						0.50	

Delay and Level of Service

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Lane Control Delay (d), s/veh					8.7						8.7	
Lane LOS					A						A	
95% Queue, veh					3.5						2.8	
Approach Delay, s/veh				8.7						8.7		
Approach LOS				A						A		
Intersection Delay, s/veh | LOS	8.7						A

HCS Roundabouts Report

General Information

Analyst	AG
Agency or Co.	BH
Date Performed	11/9/2022
Analysis Year	2026
Time Analyzed	2026 NO BUILD AM
Project Description	Cavan Multi-Family Development

Site Information

Intersection	Paseo del Sol & Herrera
E/W Street Name	Herrera Drive
N/S Street Name	Paseo del Sol
Analysis Time Period, hrs	0.25
Peak Hour Factor	0.76
Jurisdiction	CoSF, NMDOT

Volume Adjustments and Site Characteristics

Approach	EB				WB				NB				SB			
Movement	U	L	T	R	U	L	T	R	U	L	T	R	U	L	T	R
Number of Lanes (N)	0	0	0	0	0	0	0	1	0	0	0	0	0	1	0	0
Lane Assignment							R								L	
Volume (V), veh/h					138			455					20	428		
Percent Heavy Vehicles, %					1			1					2	2		
Flow Rate (v_{PCE}), pc/h					183			603					27	574		
Right-Turn Bypass	None				None				None				None			
Conflicting Lanes					1								1			
Pedestrians Crossing, p/h					0								0			
Proportion of CAVs	0															

Critical and Follow-Up Headway Adjustment

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Critical Headway, s					4.9763						4.9763	
Follow-Up Headway, s					2.6087						2.6087	

Flow Computations, Capacity and v/c Ratios

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Entry Flow (v_e), pc/h					786						601	
Entry Volume, veh/h					781						590	
Circulating Flow (v_c), pc/h	784			27			784			183		
Exiting Flow (v_{ex}), pc/h	757			0			630			0		
Capacity (c_{pce}), pc/h					1343						1145	
Capacity (c), veh/h					1333						1124	
v/c Ratio (x)					0.59						0.52	

Delay and Level of Service

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Lane Control Delay (d), s/veh					9.4						9.3	
Lane LOS					A						A	
95% Queue, veh					4.0						3.2	
Approach Delay, s/veh | LOS				9.4		A				9.3		A
Intersection Delay, s/veh | LOS	9.3						A

HCS Roundabouts Report

General Information

Analyst	AG
Agency or Co.	BH
Date Performed	11/9/2022
Analysis Year	2036
Time Analyzed	2036 NO BUILD AM
Project Description	Cavan Multi-Family Development

Site Information

Intersection	Paseo del Sol & Herrera
E/W Street Name	Herrera Drive
N/S Street Name	Paseo del Sol
Analysis Time Period, hrs	0.25
Peak Hour Factor	0.76
Jurisdiction	CoSF, NMDOT

Volume Adjustments and Site Characteristics

Approach	EB				WB				NB				SB			
Movement	U	L	T	R	U	L	T	R	U	L	T	R	U	L	T	R
Number of Lanes (N)	0	0	0	0	0	0	0	1	0	0	0	0	0	1	0	0
Lane Assignment							R								L	
Volume (V), veh/h					152			487					22	466		
Percent Heavy Vehicles, %					1			1					2	2		
Flow Rate (v_{PCE}), pc/h					201			645					29	625		
Right-Turn Bypass	None				None				None				None			
Conflicting Lanes					1								1			
Pedestrians Crossing, p/h					0								0			
Proportion of CAVs	0															

Critical and Follow-Up Headway Adjustment

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Critical Headway, s					4.9763						4.9763	
Follow-Up Headway, s					2.6087						2.6087	

Flow Computations, Capacity and v/c Ratios

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Entry Flow (v_e), pc/h					846						654	
Entry Volume, veh/h					840						642	
Circulating Flow (v_c), pc/h	855			29			855			201		
Exiting Flow (v_{ex}), pc/h	826			0			674			0		
Capacity (c_{pce}), pc/h					1340						1124	
Capacity (c), veh/h					1330						1103	
v/c Ratio (x)					0.63						0.58	

Delay and Level of Service

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Lane Control Delay (d), s/veh					10.4						10.6	
Lane LOS					B						B	
95% Queue, veh					4.8						3.9	
Approach Delay, s/veh | LOS				10.4		B				10.6		B
Intersection Delay, s/veh | LOS	10.5						B

HCS Roundabouts Report

General Information

Analyst	AG
Agency or Co.	BH
Date Performed	11/9/2022
Analysis Year	2036
Time Analyzed	2036 BUILD AM
Project Description	Cavan Multi-Family Development PTV Visum Model

Site Information

Intersection	Paseo del Sol & Herrera
E/W Street Name	Herrera Drive
N/S Street Name	Paseo del Sol
Analysis Time Period, hrs	0.25
Peak Hour Factor	0.76
Jurisdiction	CoSF, NMDOT

Volume Adjustments and Site Characteristics

Approach	EB				WB				NB				SB			
Movement	U	L	T	R	U	L	T	R	U	L	T	R	U	L	T	R
Number of Lanes (N)	0	0	0	0	0	0	1	0	0	0	1	0	0	0	1	0
Lane Assignment							LR				TR				LT	
Volume (V), veh/h					152	0		395	0		105	0	22	90	380	
Percent Heavy Vehicles, %					1	3		1	3		3	3	2	2	3	
Flow Rate (v_{PCE}), pc/h					201	0		523	0		142	0	29	121	515	
Right-Turn Bypass	None				None				None				None			
Conflicting Lanes					1				1				1			
Pedestrians Crossing, p/h					0				0				0			
Proportion of CAVs	0															

Critical and Follow-Up Headway Adjustment

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Critical Headway, s					4.9763			4.9763			4.9763	
Follow-Up Headway, s					2.6087			2.6087			2.6087	

Flow Computations, Capacity and v/c Ratios

Approach	EB			WB			NB			SB		
Lane	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass	Left	Right	Bypass
Entry Flow (v_e), pc/h					724			142			665	
Entry Volume, veh/h					719			138			647	
Circulating Flow (v_c), pc/h	866			171			351			201

APPENDIX J:
SAMM DECELERATION LANE CRITERIA

Table 17.B-2
Criteria for Deceleration Lanes on
URBAN MULTI-LANE HIGHWAYS

Turning Volume [1] (vph)	LEFT-TURN DECELERATION LANE			RIGHT-TURN DECELERATION LANE		
	Minimum Volume in the Adjacent Through Lane (vphpl) [2]			Minimum Volume in the Adjacent Through Lane (vphpl) [2]		
	≤ 30 mph	35 to 40 mph	45 to 55 mph	≤ 30 mph	35 to 40 mph	45 to 55 mph
< 5	Not Required	Not Required	Not Required	Not Required	Not Required	Not Required
5	Not Required	490	420	1,200	730	450
10	420	370	300	820	490	320
15	360	290	220	600	350	240
20	310	230	160	460	260	180
25	270	190	130	360	230	150
30	240	160	110	290	200	130
35	210	130	100	260	180	120
40	180	120	Required	240	170	110
45	160	110	Required	220	160	Required
50	140	Required	Required	200	Required	Required
55	120	Required	Required	190	Required	Required
≥ 56	Required	Required	Required	Required	Required	Required
	Left-turn Deceleration Lanes are Required on Urban Multi-lane Highways for the following Left-turn Volumes: • ≤ 30 mph : 56 vph or more • 35 to 40 mph : 46 vph or more • 45 to 55 mph : 36 vph or more			***Right-turn Deceleration Lanes are Required on Urban Multi-lane Highways for the following Right-turn Volumes:*** • ≤ 30 mph : 56 vph or more • 35 to 40 mph : 46 vph or more • 45 to 55 mph : 41 vph or more		

Notes:

1. *Use linear interpolation for turning volumes between 5 and 55 vph.*
2. *The volume in the adjacent through lane includes through vehicles and turning vehicles.*

K. Speed Change Lanes: Speed change lanes should be designed based on the following specifications. The criteria for determining the need for speed change lanes are described in Section 17. Schematic illustrations of speed-change lanes are included in Appendix E.

(1) Length of Deceleration Lanes: Deceleration lanes typically consist of three components: transition taper, deceleration distance, and queue storage. Each of these components are described below. Deceleration lanes should be designed so that a turning vehicle will develop a speed differential of 10 mph or less at the point it clears the through traffic lane. The length of the lane should allow the vehicle to come to a comfortable stop prior to reaching the end of the expected queue in the lane. Table 18.K-1 contains standard deceleration distances and transition tapers. Vehicle queue storage lengths are discussed in Paragraph 18.K.1.c.

Table 18.K-1
Deceleration and Acceleration Lengths (feet)

Speed Change Lane Condition	Posted Speed (mph)									
	25	30	35	40	45	50	55	60	65	70
Deceleration Distance										
Stop Condition	150	200	250	325	400	475	550	650	725	850
Slow to 15 mph	130	175	230	300	370	450	525	620	700	820
Deceleration Taper										
Length for 12-foot Lane	50	75	100	125	150	175	200	225	250	250
Straight Line Ratios (L:W)	4:1	6:1	8:1	10.5:1	12.5:1	14.5:1	16.5:1	18.5:1	21:1	21:1
Acceleration Lane Length	NA	190	270	380	550	760	960	1,170	1,380	1,590
Acceleration Taper										
Length for 12-foot Lane	NA	100	120	150	170	180	230	270	300	300
Straight Line Ratios (L:W)	NA	8:1	10:1	12.5:1	14:1	15:1	19:1	22.5:1	25:1	25:1

This table assumes level terrain and acceleration distances for the passenger car/pickup design vehicle. Refer to the text discussion of Sub-Section 18.K for additional guidance regarding the design of speed change lanes.

(a) Transition Taper: Deceleration tapers should be straight line tapers with rounded beginning and ending points. Deceleration taper lengths and ratios are provided in Table 18.K-1. Deceleration taper lengths do not require adjustment for grade. Exceptions to the deceleration tapers in Table 18.K-1 include:

i. On urban highways with posted speed limits between 45 mph and 55 mph, left-turn deceleration tapers may be designed using 300-foot radius/600-foot radius asymmetric reverse curve tapers according to the width of the speed-change lane and/or median.

EXISTING LEGAL DESCRIPTION:

TRACT A, A REPLAT OF LOTS 2, 3 AND 4 AS SHOWN ON THE PLAT OF SURVEY RECORDED IN PLAT BOOK 685, PAGE 048 OF THE RECORDS OF SANTA FE COUNTY.

DRAINAGE FACILITIES MAINTENANCE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT. INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE: ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES. WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEERS' RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORMWATER IN THE DRAINAGE STRUCTURE(S).
B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6 INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.
C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINAGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.
D. INSPECT FOR SOIL EROSION AND ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.
E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

DRAINAGE FACILITIES DESIGN NOTE

ALL STORM WATER DETENTION/RETENTION AREAS SHALL DRAIN WITHIN 24 HOURS OF A STORM EVENT AS PER ARTICLE 14-8.2 (D)(4)(C)(II)

GENERAL NOTES

A. SOLID WASTE COLLECTION WILL BE PROVIDED BY SF SOLID WASTE COLLECTION.
B. EXTERIOR LUMINARIES SHALL COMPLY WITH CHAPTER 14-8.9 SFCC. (WALL PACKS SHALL BE SHIELDED)
C. THE SITE SHALL COMPLY WITH INTERNATIONAL FIRE CODE (IFC) 2015.
D. THE FIRE DEPARTMENT ACCESS SHALL NOT BE LESS THAN 20' AND 26' AROUND THE RESIDENTIAL BUILDING.
E. THIS SITE SHALL HAVE A WATER SUPPLY THAT MEETS FIRE FLOW AND HAVE A DISTANCE TO THE NEAREST HYDRANT TO MEET IFC REQUIREMENTS.
F. ALL FIRE DEPARTMENT ACCESS SHALL HAVE A GRADE NO GREATER THAN 10%.
G. FIRE LANE SURFACE SHALL BE ALL WEATHER AND SUPPORT 75,000 POUNDS.
H. THE PROJECT IS SERVED BY A PRIVATE SANITARY SEWER COLLECTION SYSTEM.

GUNNISON'S PRAIRIE DOG NOTE

THIS PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISON'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8. 12).

NOTARIZED STORMWATER AGREEMENT

STORMWATER AGREEMENT: PROPERTY OWNER(S) HERE BY AGREE THAT ALL STORMWATER EASEMENTS AND ANY OTHER DRAINAGE AND STORMWATER MANAGEMENT IMPROVEMENTS ARE ON PRIVATE PROPERTY AND WILL BE MAINTAINED AND KEPT FULLY FUNCTIONAL AS ORIGINALLY DESIGNED AND CONSTRUCTED WITHIN PRIVATE PROPERTY BOUNDARIES BY THE PROPERTY OWNER AND SUBSEQUENT HEIRS, ASSIGNS, AND FUTURE OWNERS. THE CITY IS HERE BY GRANTED THE FOLLOWING: (1) ACCESS FOR INSPECTION OF SAID IMPROVEMENTS; (2) IN THE EVENT OF DRAINAGE AND STORMWATER MANAGEMENT IMPROVEMENT MAINTENANCE DEFICIENCY AND AFTER TEN (10) DAYS WRITTEN NOTICE TO THE RESPECTIVE PROPERTY OWNER, TO ENTER AND RESTORE FULL FUNCTIONAL CAPACITY OF THE DRAINAGE AND STORMWATER MANAGEMENT IMPROVEMENTS; AND (3) TO LIEN PROPERTY FOR BOTH DIRECT AND INDIRECT COSTS ASSOCIATED WITH SUCH WORK. BY SIGNATURE AFFIXED TO THIS INSTRUMENT, THE PROPERTY OWNER(S) APPROVE AND AGREE THAT THIS AGREEMENT IS BINDING PERPETUALLY, RUNNING WITH THE LAND, ON PRESENT AND FUTURE OWNERS, HEIRS, AND ASSIGNS.

DUST CONTROL NOTE

ALL ON-SITE SOIL DISTURBING CONSTRUCTION ACTIVITIES SHALL BE ADDRESSED AND PROVIDE MEASURES TO MITIGATE OR CONTROL DUST FROM BEING TRANSPORTED OFFSITE AND POLLUTING NEIGHBORING PROPERTIES.

ANY PERSON, OWNER, CONTRACTOR OR OPERATOR WHO CONDUCTS EARTHMOVING AND/OR DUST GENERATING ACTIVITIES IS RESPONSIBLE FOR IMPLEMENTING BEST MANAGEMENT PRACTICES (BMPS) IN ORDER TO MITIGATE OFF-PROPERTY TRANSPORT OF FUGITIVE DUST EMISSIONS.

A PLAN, OR STORM WATER PREVENTION PLAN (SWPPP) WHEN APPLICABLE, LISTING THE BEST MANAGEMENT PRACTICES (BMPS), SHALL BE PROVIDED TO THE CITY ENGINEER, OR THEIR DESIGNEE FOR REVIEW AND APPROVAL. THE APPROVED BMPS SHALL BE APPLIED TO THE GRADED AND/OR DISTURBED SOIL IN ORDER TO STABILIZE THE SITE.

THE INITIAL BMP SHALL ADDRESS HOW THE CONTRACTOR WILL MINIMIZE THE AMOUNT OF DISTURBED SOIL, AND HOW THE CONTRACTOR WILL STABILIZE THE DISTURBED SURFACE AREA EXPOSED TO WIND OR VEHICLE TRAFFIC DURING CONSTRUCTION.

SOME BMPS SHALL INCLUDE:

- THE REDUCTION OF VEHICLE SPEEDS: ESTABLISH A MAXIMUM SPEED LIMIT OR INSTALL TRAFFIC CALMING DEVICES TO REDUCE SPEEDS TO A RATE TO MITIGATE OFF-PROPERTY TRANSPORT OF DUST ENTRAINED BY VEHICLES.
- THE MINIMIZATION OF DROP HEIGHT: DRIVERS AND OPERATORS SHALL UNLOAD TRUCK BEDS AND LOADER OR EXCAVATOR BUCKETS SLOWLY, AND MINIMIZE DROP HEIGHT OF MATERIALS TO THE LOWEST HEIGHT POSSIBLE, INCLUDING SCREENING OPERATIONS.
- HIGH WINDS RESTRICTION: TEMPORARILY HALT WORK ACTIVITIES DURING HIGH WIND EVENTS GREATER THAN 30 MPH IF OPERATIONS WOULD RESULT IN OFF-PROPERTY TRANSPORT.
- RESTRICT ACCESS: RESTRICT ACCESS TO THE WORK AREA TO ONLY AUTHORIZED VEHICLES AND PERSONNEL.

IN THE EVENT THE ABOVE PRACTICES ARE INEFFECTIVE TO PREVENT OFF PROPERTY TRANSPORT, THE OWNER OR OPERATOR SHALL USE AT ONE OR MORE OF THE FOLLOWING BEST MANAGEMENT PRACTICES (BMPS):

- WET SUPPRESSION: APPLY WATER TO DISTURBED SOIL SURFACES, BACKFILL MATERIALS, SCREENINGS, AND OTHER DUST GENERATING OPERATIONS AS NECESSARY AND APPROPRIATE CONSIDERING CURRENT WEATHER CONDITIONS, AND PREVENT WATER USED FOR DUST CONTROL FROM ENTERING ANY PUBLIC RIGHT-OF-WAY, STORM WATER DRAINAGE FACILITY, OR WATERCOURSE.
- WIND BARRIER: CONSTRUCT A FENCE OR OTHER TYPE OF WIND BARRIER TO PREVENT WIND EROSION OF THE GRADED OR DISTURBED SURFACE.
- VEGETATION: PLANT VEGETATION APPROPRIATE FOR RETAINING SOILS OR CREATING A WIND BREAK.
- SURFACE ROUGHENING: STABILIZE AN ACTIVE CONSTRUCTION AREA DURING PERIODS OF INACTIVITY OR WHEN VEGETATION CANNOT BE IMMEDIATELY ESTABLISHED.
- COVER: INSTALL COVER MATERIALS SUCH AS TACKIFIERS, EROSION CONTROL BLANKETS, GRAVEL, VEGETATION (WHEN APPROPRIATE), COLD-MILLINGS, ETC. DURING PERIODS OF INACTIVITY AND PROPERLY ANCHOR THE COVER.
- SOIL RETENTION: STABILIZE DISTURBED OR EXPOSED SOIL SURFACE AREAS THAT WILL BE INACTIVE FOR MORE THAN 30 DAYS OR WHILE VEGETATION IS BEING ESTABLISHED.

SHEET 3

GENERAL NOTES

1. ALL WORK DETAILED ON THESE PLANS, EXCEPT AS OTHERWISE STATED OR PROVIDED HEREON, SHALL BE CONSTRUCTED IN ACCORDANCE WITH CITY OF SANTA FE STANDARD DRAWINGS AND SPECIFICATIONS LATEST EDITION, AND WILL BE REFERRED TO HEREIN AS "STANDARD SPECIFICATIONS"

2. ALL WORK ON THIS PROJECT SHALL BE PERFORMED IN ACCORDANCE WITH APPLICABLE FEDERAL, STATE, AND LOCAL LAWS, ORDINANCES, RULES, AND REGULATIONS CONCERNING CONSTRUCTION SAFETY AND HEALTH.

3. CONTRACTOR SHALL ASSUME THE SOLE AND COMPLETE RESPONSIBILITY FOR THE JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THIS PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY. THIS REQUIREMENT SHALL APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS. CONTRACTOR SHALL DEFEND, INDEMNIFY, AND HOLD HARMLESS THE OWNER AND ENGINEER FROM ANY AND ALL LIABILITY REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPT LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE OWNER OR ENGINEER.

4. AN EXCAVATION/CONSTRUCTION PERMIT WILL BE REQUIRED BEFORE BEGINNING ANY WORK WITHIN CITY RIGHT-OF-WAY.

5. CONTRACTOR SHALL NOTIFY THE CITY ENGINEER (OR PROJECT MANAGER) NOT LESS THAN SEVEN (7) DAYS PRIOR TO STARTING WORK IN ORDER THAT THE CITY MAY TAKE NECESSARY MEASURES TO INSURE THE PRESERVATION OF SURVEY MONUMENTS. CONTRACTOR SHALL NOT DISTURB PERMANENT SURVEY MONUMENTS WITHOUT THE CONSENT OF THE CITY ENGINEER AND SHALL NOTIFY THE CITY SURVEYOR AND BEAR THE EXPENSE OF REPLACING ANY THAT MAY BE DISTURBED WITHOUT PERMISSION. ONLY THE CITY SHALL REPLACE SURVEY MONUMENTS. WHEN A CHANGE IS MADE IN THE FINISHED ELEVATIONS OF THE PAVEMENT OF ANY ROADWAY IN WHICH A PERMANENT SURVEY MONUMENT IS LOCATED, CONTRACTOR SHALL, AT HIS OWN EXPENSE, ADJUST THE MONUMENT COVER TO THE NEW GRADE UNLESS OTHERWISE SPECIFIED.

6. EXISTING UTILITY LINE LOCATIONS ARE SHOWN IN AN APPROXIMATE MANNER ONLY, AND LINES MAY EXIST WHERE NONE ARE SHOWN. TWO (2) WORKING DAYS PRIOR TO ANY EXCAVATION, CONTRACTOR SHALL CONTACT NEW MEXICO ONE CALL SYSTEM (260-1990) FOR LOCATION OF EXISTING UTILITIES. CONTRACTOR SHALL THEN EXCAVATE AND VERIFY THE HORIZONTAL AND VERTICAL LOCATIONS OF ALL PERTINENT EXISTING UTILITIES AND/OR OBSTRUCTIONS. SHOULD A CONFLICT EXIST, THE CONTRACTOR SHALL NOTIFY THE ENGINEER SO THE CONFLICT CAN BE RESOLVED WITH A MINIMUM AMOUNT OF DELAY. CONTRACTOR SHALL THEN COORDINATE RELOCATION OF UTILITY LINES WITH UTILITY COMPANIES AS REQUIRED. ANY DAMAGE CAUSED BY FAILURE TO LOCATE, IDENTIFY, AND PRESERVE ANY EXISTING UTILITIES IS THE FULL RESPONSIBILITY OF THE CONTRACTOR.

7. CONTRACTOR SHALL ASSIST THE ENGINEER/INSPECTOR IN THE RECORDING OF DATA ON ALL UTILITY LINES AND ACCESSORIES AS REQUIRED BY THE CITY OF SANTA FE FOR THE PREPARATION OF "AS BUILT" DRAWINGS. CONTRACTOR SHALL NOT COVER UTILITY LINES AND ACCESSORIES UNTIL ALL DATA HAS BEEN RECORDED.

8. CONTRACTOR SHALL ASSUME FINANCIAL RESPONSIBILITY FOR ANY DAMAGE TO EXISTING PAVEMENT, PAVEMENT MARKINGS, SIGNAGE, CURB AND GUTTER, HANDICAP RAMPS, AND SIDEWALK DURING CONSTRUCTION APART FROM THOSE SECTIONS INDICATED ON THE PLANS, AND SHALL REPAIR OR REPLACE, PER THE STANDARD SPECIFICATIONS, ANY SUCH DAMAGE.

9. CONTRACTOR SHALL MAINTAIN A GRAFFITI-FREE WORK SITE. CONTRACTOR SHALL PROMPTLY REMOVE ANY AND ALL GRAFFITI FROM EQUIPMENT, WHETHER PERMANENT OR TEMPORARY.

10. CONTRACTOR SHALL BE RESPONSIBLE TO PROVIDE AND MAINTAIN ALL CONSTRUCTION SIGNING UNTIL THE PROJECT HAS BEEN ACCEPTED BY THE CITY AND OTHER JURISDICTIONAL AUTHORITIES WHERE APPLICABLE.

11. CONSTRUCTION ACTIVITY SHALL BE LIMITED TO THE PROPERTY AND/OR PROJECT LIMITS SHOWN. ANY DAMAGE TO ADJACENT PROPERTIES RESULTING FROM THE CONSTRUCTION PROCESS IS THE RESPONSIBILITY OF THE CONTRACTOR, INCLUDING ANY SUCH COSTS INCURRED.

12. REMOVALS SHALL BE DISPOSED OF OFF-SITE AND SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.

WATER AND SEWER

1. ALL WORK REGARDING PUBLIC WATER AND PUBLIC SANITARY SEWER INFRASTRUCTURE DETAILED ON THESE PLANS TO BE PERFORMED UNDER THIS CONTRACT SHALL, EXCEPT AS OTHERWISE STATED OR PROVIDED HERON, BE CONSTRUCTED IN ACCORDANCE WITH APWA'S NEW MEXICO STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION 1987 EDITION INCLUDING LATEST PUBLISHED AMENDMENTS.

2. ALL UTILITIES AND UTILITY SERVICE LINES SHALL BE INSTALLED PRIOR TO PAVING. EXISTING VALVES AND MANHOLES SHALL NOT BE BURIED OR PAVED OVER BUT RIMS SHALL BE ADJUSTED TO MATCH NEW GRADE PER CITY OF SANTA FE STANDARD DRAWINGS.

3. NON-RESIDENTIAL USERS SHALL COORDINATE WITH THE CITY PRETREATMENT ENGINEER TO ENSURE THE PROPER IMPROVEMENTS ARE IN PLACE FOR THE DEVELOPMENT FOR DISCHARGE INTO THE PUBLIC SANITARY SEWER COLLECTION SYSTEM.

4. NON-RESIDENTIAL USERS SHALL COORDINATE WITH THE CITY WATER DEPARTMENT TO ENSURE THE PROPER IMPROVEMENTS ARE IN PLACE FOR THE TO ENSURE PROPER BACKFLOW CONTAINMENT IS IN PLACE FOR THE WATER SYSTEM.

5. MANHOLE RIMS, FIRE HYDRANT ELEVATIONS, AND FLANGE ELEVATIONS SHOWN ARE APPROXIMATE. CONTRACTOR SHALL FIELD VERIFY AND ADJUST TO FINAL PAVEMENT OR SURFACE GRADES.

6. THE CONTRACTOR SHALL COORDINATE WITH THE CITY WATER DEPARTMENT SEVEN (7) DAYS IN ADVANCE OF PERFORMING WORK THAT WILL AFFECT THE PUBLIC WATER OR SANITARY SEWER INFRASTRUCTURE. WORK REQUIRING SHUTOFF OF FACILITIES DESIGNATED AS MASTER PLAN FACILITIES MUST BE COORDINATED WITH THE CITY WATER DEPARTMENT 14 DAYS IN ADVANCE OF PERFORMING SUCH WORK.

7. PROPOSED WATERLINE MATERIALS SHALL BE PVC PIPE MEETING AWWA C-900: DR18 REQUIREMENTS (6" – 12") OR DUCTILE IRON PIPE MEETING AWWA C-150 REQUIREMENTS (6" – 48"),

8. ALL WATERLINE FITTINGS, VALVES, BENDS, TEES, CROSSES AND APPURTENANCES SHALL HAVE RESTRAINED JOINTS UNLESS OTHERWISE NOTED ON THE PLANS. THE JOINT RESTRAINT REQUIREMENTS SHOULD BE DELINEATED WITHIN A JOINT RESTRAINT TABLE.

9. ALL SANITARY SEWER LINE STATIONING REFERS TO SANITARY SEWER CENTERLINE STATIONING, EXCEPT WHEN PROFILED WITHIN A PROPOSED OR EXISTING STREET, WHERE STREET STATIONING SHALL GOVERN.

10. ALL PROPOSED SANITARY SEWER SLOPES SHALL BE VERIFIED DURING CONSTRUCTION TO MEET THE APPROVED DESIGN. AS-BUILT SLOPES SHALL BE RECORDED FOR EACH LINE SEGMENT.

11. ALL FINAL BACKFILL FOR TRENCHES SHALL BE COMPACTED TO A MINIMUM OF 95% MAXIMUM DENSITY PER ASTM D-1557 AND AS DIRECTED BY STANDARD SPECIFICATIONS SECTION 701.14.2 AND STANDARD DRAWING NUMBER 2465.

12. ELECTRONIC MARKER SPHERES (EMS) WILL BE PLACED ACCORDING TO CITY SPECIFICATIONS. THE CONTRACTOR SHALL INSTALL A 4" X 4" X5' POST AND EMS AT THE END OF EACH SANITARY SEWER SERVICE.

13. TRACER WIRE SHALL BE INCLUDED FOR ALL PUBLIC WATER AND SEWER MAINS AND FOR WATER SERVICES IN ACCORDANCE WITH CITY DETAILS.

14. CONTRACTOR SHALL PROVIDE THE PROPOSED HYDRO TESTING PLANS TO THE CITY INSPECTORS FOR APPROVAL PRIOR TO BEGINNING TESTING OPERATIONS.

15. AT UTILITY CROSSINGS, WHERE LESS THAN 18" OF VERTICAL SEPARATION FROM STORM DRAIN PIPING OR STRUCTURES IS PROPOSED, LEAN FILL CONSTRUCTION SHALL BE USED TO PROTECT THE WATER OR SEWER LINE. LEAN FILL SHALL EXTEND A PERPENDICULAR DISTANCE OF 5 FEET ON EACH SIDE OF THE STORM PIPE OR STRUCTURE.

16. ALL WATER AND SANITARY SEWER INFRASTRUCTURE SHALL BE CONSTRUCTED UTILIZING MATERIALS LISTED IN THE APPROVED PRODUCTS LIST AND BE CONSTRUCTED PER THE MOST CURRENT CITY STANDARD DETAILS AND SPECIFICATIONS. MATERIAL SUBMITTALS SHALL BE PROVIDED PRIOR TO CONSTRUCTION FOR ENGINEER TO REVIEW PRIOR TO THE START OF CONSTRUCTION.

17. THE CONTRACTOR SHALL RECORD THE MATERIALS UTILIZED FOR WATER SERVICE CONNECTIONS INCLUDING THE PUBLIC SERVICE LINE AND THE PRIVATE SERVICE LINE. THE MATERIALS USED FOR CONSTRUCTION SHALL BE NOTED ON THE PLANS.

TRANSPORTATION

1. ANY STREET STRIPING ALTERED OR DESTROYED SHALL BE REPLACED WITH THERMO-PLASTIC REFLECTORIZED PAVEMENT MARKING BY CONTRACTOR TO THE SAME LOCATION AS EXISTING OR AS INDICATED BY THIS PLAN SET.

2. REMOVAL OF EXISTING CURB & GUTTER AND SIDEWALKS SHALL BE TO THE NEAREST JOINT.

3. OVERNIGHT PARKING OF CONSTRUCTION EQUIPMENT SHALL NOT OBSTRUCT DRIVEWAYS OR DESIGNATED TRAFFIC LANES. THE CONTRACTOR SHALL NOT STORE ANY EQUIPMENT OR MATERIAL WITHIN THE PUBLIC RIGHT-OF-WAY.

4. CURB AND GUTTER, SIDEWALKS, AND DRIVE PADS SHALL MATCH THE LINE AND GRADE OF ABUTTING EXISTING AREAS AS SHOWN ON THE PLANS OR AS DIRECTED BY THE PROJECT ENGINEER.

5. THE SUBGRADE PREP SHALL EXTEND ONE FOOT BEYOND THE FREE EDGE OF NEW CURB AND GUTTER AND SIDEWALK.

6. CONTRACTOR TO TEST SUBGRADE R-VALUE PRIOR TO CONSTRUCTION. IN THE EVENT THE R-VALUE IS LESS THAN 50, REMOVE 2 FEET OF SUBGRADE MATERIAL AND IMPORT MATERIAL WITH R-VALUE GREATER THAN 50 OR CONTACT THE ENGINEER IMMEDIATELY SO THE PAVEMENT SECTION CAN BE MODIFIED.

7. AT ALL PAVEMENT REMOVAL AND REPLACEMENTS, SAW-CUT EDGES SHALL BE STRAIGHT AND CLEAN, AND LONGITUDINAL JOINTS SHALL NOT BE PLACED WITHIN WHEEL PATHS. PATCHES SHALL BE REGULAR AND SQUARE OR RECTANGULAR, WITH FOUR STRAIGHT SIDES. FINISHED PAVEMENT SURFACE SHALL BE FLUSH WITH EXISTING PAVEMENT SURFACE, WITH NO SPILLOVER OF ASPHALT OR TACK COAT. CARE MUST BE TAKEN TO AVOID DAMAGING THE INTEGRITY OR APPEARANCE OF SURROUNDING PAVEMENTS; IF DAMAGED, THE ENTIRE SURFACE PATCH MUST BE EXPANDED TO COVER DAMAGES.

8. CONTRACTOR WILL ENSURE THE ASPHALT HAS A SMOOTH, UNIFORM EDGE WHEN REMOVING AND REPLACING CURB AND GUTTER. IF THE ASPHALT EDGE IS NOT SMOOTH AND UNIFORM, CONTRACTOR WILL SAW CUT AND REPLACE A ONE-FOOT STRIP OF ASPHALT ALONG THE FULL SECTION BEING REPLACED WITH THE APPROPRIATE PAVING SECTION BASED ON ROADWAY CLASSIFICATION.

HYDROLOGY

1. ALL STORM DRAINS SHALL BE RCP CLASS III UNLESS OTHERWISE NOTED ON THE PLANS.

2. RCP SHALL BE INSTALLED SO THAT THE JOINT GAP AT THE HOME POSITION SHALL CONFORM TO THE APPROVED MANUFACTURER'S RECOMMENDATION. MANUFACTURER'S RECOMMENDED JOINT GAP TOLERANCES FOR EACH PIPE SIZE AND TYPE SHALL BE SUBMITTED TO THE ENGINEER FOR APPROVAL PRIOR TO PLACEMENT OF PIPE. RCP JOINTS SHALL NOT BE GROUTED UNLESS DIRECTED BY THE ENGINEER AND WITH CITY APPROVAL.

OTHER COMMON NOTES

1. ALL EXCAVATION, TRENCHING, AND SHORING ACTIVITIES MUST BE ACCOMPLISHED IN ACCORDANCE WITH OSHA 29CFR 1926.650 SUBPART P.

2. WHEN DISTURBING MORE THAN ¾ ACRES,CONTRACTOR SHALL SECURE A NOTICE OF INTENT (NOI) PRIOR TO BEGINNING CONSTRUCTION.

3. IN ADVANCE OF CONSTRUCTION, CONTRACTOR SHALL DETERMINE IF OVERHEAD UTILITY LINES, SUPPORT STRUCTURES, POLES, GUYS, ETC. ARE AN OBSTRUCTION TO CONSTRUCTION OPERATIONS. IF ANY OBSTRUCTION TO CONSTRUCTION OPERATIONS IS EVIDENT, CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING WITH THE APPROPRIATE UTILITY OWNER TO REMOVE OR SUPPORT THE UTILITY OBSTRUCTION. ANY COST ASSOCIATED WITH THIS EFFORT SHALL BE THE RESPONSIBILITY OF CONTRACTOR.

4. PNM WILL PROVIDE AT NO COST TO THE CITY OR THE CONTRACTOR THE REQUIRED PERSONNEL FOR INSPECTION OR OBSERVATION DEEMED NECESSARY BY PNM WHILE THE CONTRACTOR IS EXPOSING PNM'S CABLES. HOWEVER, THE CONTRACTOR SHALL BE CHARGED THE TOTAL COST ASSOCIATED WITH REPAIRS TO ANY DAMAGED CABLES OR FOR ANY COST ASSOCIATED WITH SUPPORTING OR RELOCATING THE POLES AND CABLES DURING CONSTRUCTION.

5. CONTRACTOR SHALL SUPPORT AND PROTECT ALL EXISTING, UNDERGROUND UTILITY LINES WHICH BECOME EXPOSED DURING CONSTRUCTION. PAYMENT FOR SUPPORTING WORK SHALL BE INCIDENTAL TO WATERLINE AND/OR SEWER LINE COSTS.

6. CONTRACTOR IS TO SUPPORT, PROTECT, AND MAINTAIN THE INTEGRITY OF ALL UNDERGROUND TELEPHONE, ELECTRIC CABLES AND CABLE TELEVISION UTILITIES AT NO ADDITIONAL COST TO THE OWNER. CABLE IS TO BE SUPPORTED AT A MAXIMUM SPACING OF FIFTEEN (15) FEET. CONTRACTOR SHALL COORDINATE WITH AND MAKE NECESSARY PAYMENT (IF ANY) TO UTILITY OWNER FOR DE-ENERGIZATION OF CABLES OR SUPPORT OF CABLES BY THE UTILITY OWNER.

7. CONTRACTOR SHALL PROMPTLY CLEAN UP ANY MATERIAL EXCAVATED WITHIN THE PUBLIC RIGHT-OF-WAY OR PRIVATE ROADWAY EASEMENTS TO PREVENT ANY EXCAVATED MATERIAL BEING WASHED DOWN THE STREET OR INTO ANY PUBLIC DRAINAGE FACILITY.

8. CONTRACTOR SHALL CONDUCT ALL WORK IN A MANNER WHICH WILL MINIMIZE INTERFERENCE WITH LOCAL TRAFFIC.

9. ALL CONFLICTING EXISTING SIGNS, MARKERS, DELINEATORS, ETC., WITHIN THE CONSTRUCTION LIMITS SHALL BE REMOVED, STORED AND RE-SET BY THE CONTRACTOR.

10. DISPOSAL SITE FOR ALL EXCESS EXCAVATION MATERIAL AND UNSUITABLE MATERIAL SHALL BE ARRANGED BY THE CONTRACTOR IN COMPLIANCE WITH ALL APPLICABLE ENVIRONMENTAL REGULATIONS. NO SEPARATE MEASUREMENT OR PAYMENT WILL BE MADE FOR COSTS ASSOCIATED WITH OBTAINING A DISPOSAL SITE AND HAUL THERETO.

11. IF CULTURAL RESOURCES, SUCH AS HISTORIC OR PREHISTORIC ARTIFACTS, OR HUMAN REMAINS ARE DISCOVERED DURING EXCAVATION OR CONSTRUCTION, WORK SHALL CEASE AND THE CONSTRUCTION ENGINEER SHALL NOTIFY THE COUNTY OFFICE OF THE MEDICAL EXAMINER AT (505) 272-3053. IF THE MEDICAL EXAMINER DETERMINES THAT HUMAN REMAINS ARE NOT PRESENT, THE CONSTRUCTION ENGINEER SHALL NOTIFY THE STATE HISTORIC PRESERVATION OFFICER (SHPO) AT 827-6320.

GENERAL NOTES USED SELECTIVELY, BASED ON SCOPE OF WORK

1. WORK AFFECTING ARTERIAL ROADWAYS MAY REQUIRE TWENTY-FOUR-HOUR CONSTRUCTION.
2. TWO WEEKS PRIOR TO CONSTRUCTION, THE CONTRACTOR SHOULD NOTIFY THE TRANSIT DEPARTMENT OF ANY IMPACT THE PROPOSED PROJECT WILL HAVE ON THE TRANSIT SYSTEM SUCH AS CAUSING A DETOUR, OR CAUSE THE CLOSING OR RELOCATION OF A BUS STOP.

3. STREET NAME SIGNS, REGULATORY SIGNAGE, AND ANY NECESSARY STRIPING ON PRIVATE STREETS ARE THE DEVELOPER'S RESPONSIBILITY.

4. IN ALL AREAS WHERE PUBLIC STREETS OR INFRASTRUCTURE ARE TO BE CONSTRUCTED OVER FILLS, THE GEOTECHNICAL ENGINEER SHALL CERTIFY THAT PLACEMENT, COMPACTION, AND ALL OTHER WORK HAS BEEN COMPLETED IN ACCORDANCE WITH CITY SPECIFICATIONS. SAID CERTIFICATION, ALONG WITH SUPPORTING TESTING DOCUMENTATION, SHALL BE PROVIDED TO THE CONSTRUCTION ENGINEER PRIOR TO OR AT THE PRE-CONSTRUCTION CONFERENCE BEFORE WORK ORDER CONSTRUCTION.

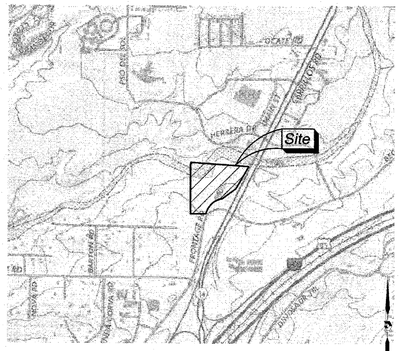
CITY CONSTRUCTION NOTES



1. All construction shall conform to the requirements of City of Santa Fe standard drawings and specifications as applicable.
2. Utility construction shall conform to applicable sections of the APWA'S New Mexico standard specifications for public works construction, 1987 edition including latest publish amendments.
3. Infrastructure construction shall conform to applicable sections of the New Mexico Department of Transportation Standard Specifications for Highway and Bridge Construction, current edition (SSHBC).
4. The order of precedence shall be, listed in order of highest precedence, the project specifications, plans, City of Santa Fe standard drawings, SSHBC, and APWA.
5. In the case of conflicts between plans and specifications resolution shall be by using the more restrictive requirements as determined by the project engineer and approved by City Planning and Land Use Department's permit and development review divisions technical review staff (P&DR).
6. The project plans shall be approved for construction by the P&DR's Engineering supervisor prior to any construction activity in scheduling a preconstruction meeting. The engineering supervisor may by written authorization, designate others to administrator duties described herein.
7. The construction project engineer shall be a New Mexico licensed professional engineer in the appropriate category for the type of work represented by the project plans. The project engineer shall arrange for a pre-construction meeting prior to the start of construction or mobilization of equipment onsite and after receipt of the financial guaranty. At the pre-construction meeting, the project engineer shall submit a letter providing the name(s) of specific individuals who will be performing what type of inspections and respective telephone contact number(s); This includes preparation of the record drawings. Call 505-955-6585 to schedule the pre-construction meeting a minimum of 10 calendar days in advance of the meeting date.
8. Attendance at the pre-construction meeting is mandatory for the project engineer (who shall conduct the meeting, contractor, P&DR technical review staff, and applicable staff from City street, water, and wastewater management divisions. The owner and subcontractors are encouraged to attend. At this meeting, a specific P&DR staff member will be assigned as the point of contact with the contractor.
9. Grading permits obtained on an "at risk" basis are not subject, nor take the place of, a pre-construction meeting required above.
10. The contractor shall provide a list of contacts to personnel responsible for site construction including position, telephone numbers, and at least one emergency telephone number active on a 24-hour basis.
11. If an EPA notice of intent (NOI) is applicable, a copy of the mailed permit application shall be presented at the pre-construction meeting along with a written statements giving the mailing date.
12. The contractor shall be responsible for maintaining the integrity of all underground utilities during the course work regardless of any location shown on the plans or other field evidence, or lack thereof. Notification to New Mexico One Call at 1-800-321-2537 for utility locates a minimum of 48 hours in advance of any excavations is required. Maintenance of utility locates shall be continued throughout the project life.
13. The owner shall be responsible for all changes in construction deemed necessary for any reason and shall have appropriate plans and/or specifications, including applicable design criteria, prepared by a New Mexico professional engineer and submitted to the City engineering supervisor for approval. Upon approval, said changes may be incorporated into the project.
14. Final record drawings reflecting substantial changes to the original design drawings, shall be submitted by the owners engineer for approval to the engineering supervisor for permanent filing in the City Planning Department. Said plans shall be approved by applicable City divisions prior to final acceptance of project work for maintenance responsibility in the beginning of the warranty period. Under no circumstances will partial acceptance and/or warranty commencement begin for any component of project scope be provided.
15. Curb cuts shown in the original, approved construction drawings will require an "access permit" issued by the City Trafficked Engineer prior to construction. Curbs cuts found to be necessary that were not included in the original approved construction drawings will require a change order that includes an "access permit" from the City Engineer. Call 505-955-6631 for information.
16. Parallel water and sanitary sewer (SAS) Utilities shall have a minimum horizontal spacing of 10 feet and vertical spacing of 3 feet wherein the waterline is above the SAS line. Installation will be in separate trenches. Should encountered field conditions exist that prevent maintaining the separation distances and relationship, a change order shall be initiated that provides for alternative protective measures and submitted for approval to the engineering supervisor via the City Water and Wastewater Management divisions.
17. Sanitary sewer lateral construction must be constructed under separate permit (secondary) for SAS hook-up. The contractor shall obtain the permit prior to any construction and must be obtained at the permit desk at City Hall; providing street address for each hook-up. Upon payment of fees the permit form will be immediately generated which shall be kept on site. Call 505-955-6945 for permit information and 505-955-6646 for inspection of each visible, connected lateral.
18. All contractor work activity shall be confined to the construction limits of the project. There shall be no encroachment onto adjacent properties, either construction or marshalling yard(s) unless legal easement(s)/agreements(s) is/are executed and approved by the engineering supervisor.
19. Grading shall be completed under the authority of a building permit, the application of which shall show the type of work as "other" with the notation of grading, landscaping, and infrastructure shown there on. Call 505-955-6945 for permit information.
20. All cut and fill slopes, including setback requirements, shall conform to the requirements of: 20.1 Santa Fe City codes article 14-8 (Development and Design Standards);
    - 20.2 Chapter 33 of the uniform building code, 1997 edition unless otherwise noted on the approved construction plans; and
    - 20.3 In the case of conflicts between these two specifications, City code shall prevail.
21. The contractor is responsible for any damage caused by construction activities to public or private property, including utilities.
22. Material quality testing shall be completed by the owner, through a recognized testing laboratory. The laboratory shall be under the auspices of a New Mexico professional engineer.
23. All material quality test reports shall be provided directly to the City Planning Department, attention Permits and Development Review Division at P.O. Box 909, Santa Fe, NM 87504-0909 within seven (7) calendar days after laboratory material testing is complete unless otherwise directed during the preconstruction meeting. Field test reports shall be provided directly to the P&DR staff at the time of field testing. In the case of P&DR staff absence, the report shall be faxed to 505-955-6829. In each case, all test reports and other communication shall carry the applicable P&DR case and building permit project numbers which will be provided at the preconstruction meeting if not noted on the approved project plans.
24. Compaction testing of soil and similar materials, including optimum moisture density relationships, shall be performed in accordance with the referenced specification and or plans. Unless specified in individual project plans, the frequency of compaction testing shall be one (1) test per 1.5 vertical feet of fill or backfill of similar material; within two (2) horizontal feet of structures; for each 500 linear feet of trench backfill or each days compactive effort, whichever results in the greatest quantity of tests; or for each 500 cubic yards of fill or similar material.
25. Portland Cement Concrete (PCC) proposed to be used for the project shall conform to a mix design prepared by a New Mexico professional engineer. The design shall be provided to P&DR staff for approval a minimum of 14 calendar days prior to scheduling the initial casting operation or, alternatively, the project plans shall define a specific mix having a prior approval by P&DR. Each mix shall have the following minimum properties:
    - 25.1. A compressive strength of 3,000 psi in 28 calendar days
    - 25.2. Seven (7) bags of cementitious material per cubic yard of concrete
    - 25.3. Twenty (20.0) percent of less of flyash material substitution for cement
    - 25.4. Maximum aggregate size ¾"
    - 25.5. Air entrainment content ranging between 4.0 and 7.0 percent at the point concrete delivery into forms.
26. Concrete sample set shall consist of a minimum of three (3) cylinders. One sample set shall be obtained for each 500 linear feet cast, 50 cast cubic yards, or one set per calendar day, whichever is greatest. Cylinders shall be tested at 7, 28, and 56 day intervals; The 56 day interval need not be tested if any previous test result exceeds the design value.
27. Traffic control devices, as per approved plan, shall be installed, maintained, and removed by the contractor. Said devices shall conform to the latest published edition of the Manual of Uniform Traffic Control Devices and two written direction from the City Traffic Engineer who may be reached at 505-955-6631.
28. Site erosion and or sediment control, as per approved plan, shall be installed, maintained, and removed by the contractor. Inspection by the P&DR staff or applicable best management practices (BMP) is required prior to any grading activity; call 505-955-6646 to arrange for said inspection. The contractor's attention is directed to the SSHBC's section 603 for other requirements relating to dust abatement and similar issues.
29. Utility lines must be bored under all existing street PCC street appurtenances. A minimum of 12" separation must be maintained between utility lines. Any curb, gutter, or other damage must be repaired before final inspection will be given.
30. Each City utility division shall provide a letter of completed installation, not necessarily accepted for warranty, at the contractor's request. Said letters shall be provided to the P&DR Staff and received written staff acceptance prior to scheduling either TV inspection of SAS and storm sewer lines or placement of roadway pavement material.
31. ASTM, ASSHTO, or independent laboratory certifications of material compliance are to be provided to P&DR staff prior to bringing applicable material onsite.
32. Aggregate Bass course material shall conform to the SSHBC's section 304 using gradation 1.
33. Hot mix asphalt proposed to be used for the project shall conform to a mixed design prepared by a New Mexico professional engineer conforming to SSHBC's section 420 using aggregate classifications called for in the project plans. The design shall be provided to P&DR Staff for approval a minimum of 14 calendar days prior to scheduling the initial paving operation or, alternatively, the project plans shall define specific mix having a prior approval by P&DR.
34. Compaction testing of subgrade, aggregate base course, and each lift of HMA material shall be completed for every 100 linear feet of roadway length except for HMA material in which case provide one test for every 100 linear feet of lay down machine pass.
35. HMA material quality test samples (wet) shall be obtained and tested for every 500 tons or fraction thereof or one (1) sample per day.
36. Utility appurtenance such as telephone pedestals, electrical transformers, gas and cable TV pedestals shall be placed outside the public right of way and within utility easements. The owner is responsible for relocating misplaced utility structures prior to requesting a pre-final inspection. Water meter boxes and fire hydrants may be placed between the sidewalk and curb. Water valve and meter boxes are not to be placed within maintenance areas of semi-improved (gravel or equal) roads.
37. Construction debris and or excess material shall be stored in an on-site area and appropriately contained. Said debris shall not be a nuisance to the surrounding neighborhood. Disposal of debris shall be either within the City limits under separate grading permit or at a designated NMED approved disposal site. The contractor shall provide written notice as to proposed debris disposal site locations. All debris and or excess material shall be removed from the site prior to scheduling a pre-final inspection with P&DR staff.
38. Interim terrain and stormwater management inspection shall be arranged for at the following events:
    - 38.1 Completion of temporary erosion control best management installations and prior to any earth work (clearing, grubbing, etc.)
    - 38.2 Final stormwater management features are constructed.
    - 38.3 Final site restoration measures are completed.
    - 38.4 Further construction or insurance of any permits shall not occur until written approval by P&DR staff for each of the above inspections has been obtained. Inspection shall be scheduled by calling 505-955-6646.
39. The contractor shall make a written request for a pre-final inspection of terrain management and infrastructure works a minimum of 14 calendar days in advance with P&DR Staff. At this inspection applicable City division staff will review the final work product. Any deficiencies will be noted in a punch list and provided to the contractor for correction. When all punch list items are completed the contractor shall file a written statement to that effect and a final inspection will be held by P&DR staff. Upon acceptance, and acceptance letter will be provided wherein all work will be excepted for maintenance by the City and the commencement of the warranty period initiated.
40. Not used.
41. Prior to the wastewater management division approval of the plan set, a letter will be required from the project engineer indicating they are providing the inspection and record drawing services for the project.
42. The contractor must obtain all sewer hookup permits from the City's building permits section (sewer lines) prior to commencing any sewer line construction. A copy of the permit must be kept at the construction site.
43. All manholes shall be constructed in accordance with the "standard manhole detail sheet" shown on the City standard drawings.
44. A copy of the approved plans shall be available at the construction site at all times during work hours.
45. All modifications to the sanitary sewer plans must be reviewed and approved by the City's wastewater management division prior to construction.
46. Additional general notes are contained in the standard City detail sheets for sanitary sewer construction.
47. All public gravity sewer lines shall be a minimum 8 inch diameter with a minimum class C bedding (2006 New Mexico American Public Works Association).
48. All 4 inch and 6 inch diameter gravity sewer pipe shall be private. No private sewer systems shall use larger than a 6 inch diameter pipe. No public gravity sewer line to be excepted by the City of Santa Fe for permanent maintenance shall be less than 8 inches diameter.
49. No concrete encasement of new or existing public sewer pipe will be allowed unless approved by the City of Santa Fe wastewater management division.
50. Core drilling is required for all new connections to an existing manhole.
51. No Public sewer mainline or manhole will be allowed under or within any storm water detention/retention pond.
52. Prior to paving over any sanitary sewer lines, submit TV tapes and logs, pressure tests, and the engineer's certification to the City's wastewater management division. After the wastewater management division reviews the above listed information, a preliminary manhole inspection will be conducted. When all the items listed above are completed to meet the standards of the wastewater management division, a letter approving paving will be issued in relation to the sanitary sewer. Note: A final manhole inspection will be conducted after the final paving is completed.
53. All sewer manholes with sewer lines 12 inches in diameter and larger are required to have approved vented and locking manholes.
54. Locate wires shall be installed for all sanitary sewers (gravity/force mains). The locate wire must be visible in the manhole or access structure. This will be verified during the preliminary manhole inspection prior to paving. The locate wire is to be a continuous, 12 gauge, solid strand insulated copper wire.
55. Off road public sewer access will be provided for all public sewer lines and manholes. Access roads are to be a minimum 12 feet wide with a driving surface of 6 inches of compacted base course. No access road shall have a grade greater than 15%. Manholes are to be aligned with the centerline of the access road. Sewer easements are to be a minimum of 20 feet in width.
56. Off-road sanitary sewer- call the wastewater management division at 505-955-4646 for a field review of the grading of all off-road sanitary sewer to ensure that the City's maintenance vehicles can access all manholes. The grades may be required to be adjusted based upon this inspection. Additional bank protection may be required based upon a final inspection by the wastewater management division and the project engineer.
57. For record drawings, tie manhole to a city of Santa Fe survey monument as part of the final record drawings. Show corrected as built bearing and distances, slopes, rim and invert elevations and sewer services along the horizontal alignment of the sanitary sewer.
58. The owner/developer will be responsible for maintaining, repairing and locating the sewer system until City acceptance for maintenance. Damages resulting from a stoppage in any gravity and or pressure sewer system will be the sole responsibility of the owner/developer until a final acceptance letter for permanent maintenance has been issued by the waste water management division.
59. Water meters will not be placed until a final acceptance letter has been issued by the waste water division for all on-site sanitary sewer needed in order for the project to connect to the sanitary sewer system.
60. 20 foot wide access gates shall be provided at all fences, walls or other obstructions that cross a public sewer line. Access gates to be located within the sanitary sewer easement.
61. The owner/developer will be responsible for locating each sewer service at the time each lot is ready to connect to the sewer. It is suggested that the owner/developer retain a copy of the TV inspection video along with the video logs. Each service shall be clearly marked for each lot at point of connection. All calls received by this division regarding the location of service will be forwarded to the owner/developer.
62. The contractor shall call the wastewater management division (Luke Gray at 505-955-4646) for a final manhole inspection. This inspection will be isolated to the manholes. The City's plumbing and mechanical inspectors will conduct all other necessary plumbing inspection. Note: The City's plumbing and mechanical inspectors and will inspect the individual sewer service taps and laterals, which connect to the public sanitary sewer.
63. The existing sanitary sewer line must be TV taped prior to a new service connection being placed as well as taped after the services have been completed. This is to ensure that the existing sanitary sewer line is not damaged and the new service is installed correctly.
64. All costs associated with the operation, maintenance, and replacement of grinder pumps for individual lots shall be the responsibility of the lot owner and or owners association. For grinder pumps that connects to a pressure sewer main, the grinder pump will be a model manufactured by environment-one or a type approved by the city of Santa Fe wastewater management division. For grinder pumps that connect to a gravity main, the grinder pump shall be a type approved by the City of Santa Fe plumbing code.
65. A minimum 12 inches of vertical clearance shall be provided between the sewer line and storm drain piping.
66. All pressure sewer systems shall be hydrostatically tested per city of Santa Fe requirements. The test is to be witnessed and certified by the project manager. Prior to being put into service and acceptance by the City of Santa Fe, all pressure sewer system main lines will be filled with water.
67. No public pressure sewer system piping may be installed in a common trench with other utilities.
68. Sewer backflow check valves will be required for all sewer service lateral connections to sewer mains 12 inches or greater in diameter. The sewer service connection must be made at an existing or new manhole. Sewer service connections to sewer mains with pipe size diameter of 12 inches and grader will not be made without approval from the wastewater management division.
69. Sewer backwater check valves shall be required on private sewer service laterals for the city of Santa Fe plumbing code.
70. Any 8 inch public sanitary sewer mainline placed with a grade of less than 0.60% shall be removed and reconstructed at the contractors expense. All public sanitary sewer main lines with slopes of less than 1% require a minimum Class C bedding with select granular material foundation.
71. All as-built sewer line and manhole data shall be obtained and certified by a licensed surveyor or engineer. As-built Data supplied by other than a licensed surveyor or engineer shall not be valid for final as-builts.
72. All existing and new public manholes within a project shall have access for City sewer maintenance equipment. All access is subject to field verification and modification as required by the wastewater division prior to final project closeout with the City of Santa Fe.
73. All sewer line crossings of rivers, streams, arroyos, drainage channels, etc. shall require a basis of design analysis prepared by a licensed engineer.
74. An approved backflow valve and isolation valve are required on all low pressure sewer service lines as per the City of Santa Fe standard sewer specification.
75. Terminal flushing connections and in-line flushing connection are required on all low pressure sewer systems. The maximum spacing between in-line flushing connections shall be 500 feet. Distances greater than 500 feet between low pressure sewer in-line flushing connections shall be approved by the wastewater division.
76. Sewer backflow check valves are required on private sewer service laterals for the City's plumbing code. Final determination shall be made by the City of Santa Fe plumbing inspection division.

Surveyor's Certificate

TO ADVANCED ACQUISITIONS, LLC AND OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 1, 2, 3, 4, 5, 7(a), 8, 9, 11(a), 11(b) AND 16 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JULY 17, 2022.

DATE OF PLAT OR MAP: NOVEMBER 30, 2022

I FURTHER CERTIFY THAT THIS SURVEY WAS PREPARED FROM FIELD NOTES OF AN ACTUAL ON THE GROUND SURVEY PERFORMED BY ME OR UNDER MY DIRECT SUPERVISION AND THAT I AM RESPONSIBLE FOR THIS SURVEY, THIS SURVEY MEETS THE MINIMUM STANDARD REQUIREMENTS FOR LAND SURVEYING IN NEW MEXICO AS ADOPTED BY THE NEW MEXICO BOARD OF LICENSURE FOR PROFESSIONAL ENGINEERS AND PROFESSIONAL SURVEYORS AND IS TRUE AND CORRECT TO THE BEST OF MY BELIEF.

TOPOGRAPHY BY BY FIELD SURVEYS USING GPS RTK MEASUREMENTS, ELEVATIONS BASED ON TRIMBLE RS NOW NETWORK (NAVD 1988). THIS SURVEY MEETS THE MINIMUM STANDARDS FOR TOPOGRAPHIC SURVEYING IN NEW MEXICO AS ADOPTED BY THE NEW MEXICO BOARD OF LICENSURE FOR PROFESSIONAL ENGINEERS AND PROFESSIONAL SURVEYORS.

PROJECT INFORMATION	
CREW/TECH: MT	DATE OF SURVEY: 07/17/2022
DRAWN BY: JK	CHECKED BY: LM
PSI JOB NO.: 228193AL	SHEET NUMBER: 2 OF 2

CAUTION

ALL EXISTING UTILITIES SHOWN WERE OBTAINED FROM RESEARCH, AS-BUILTS, SURVEYS OR INFORMATION PROVIDED BY OTHERS. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO CONDUCT ALL NECESSARY FIELD INVESTIGATIONS PRIOR TO AND INCLUDING ANY EXCAVATION, TO DETERMINE THE ACTUAL LOCATION OF UTILITIES AND OTHER IMPROVEMENTS, PRIOR TO STARTING THE WORK. ANY CHANGES FROM THIS PLAN SHALL BE COORDINATED WITH AND APPROVED BY THE ENGINEER.

GENERAL UTILITY NOTES:

1. ALL WATER AND SEWER UTILITY WORK TO BE DONE IN ACCORDANCE WITH CITY OF SANTA FE STANDARDS AND SPECIFICATIONS LATEST EDITION.
2. 4' MINIMUM BURY REQUIRED FOR ALL UTILITIES UNLESS OTHERWISE NOTED.
3. REFERENCE PLUMBING PLANS FOR WATER LINE RISER LOCATIONS. BACKFLOW PREVENTOR LOCATED INSIDE BUILDING UNLESS OTHERWISE NOTED ON THIS PLAN
4. CLEAN OUTS ARE TO BE BUILT PER UNIFORM PLUMBING CODE STANDARDS AT LOCATIONS INDICATED AND AT MID RUN IF LONGER THAN 100'
5. ALL PLUMBING PIPE MATERIAL TO BE USED PER UPC.
6. FIRE LINE AND DOMESTIC WATERLINE MUST HAVE BACKFLOW PREVENTORS PER UPC. TO BE PROVIDED IN THE BUILDING UNLESS OTHERWISE NOTED ON THIS PLAN
7. ALL EX. SD INLETS AND MH'S SHALL HAVE CONCRETE COLLARS POURED AND BE ADJUSTED TO FINISHED GRADE.
8. ALL EXCAVATION, TRENCHING AND SHORING ACTIVITIES MUST BE CARRIED-OUT IN ACCORDANCE WITH OSHA 29 CFR 1926.650 SUBPART P.
9. ALL UTILITY DISTANCES SHOWN ARE FOR REFERENCE ONLY.
10. PNM HAS NUMEROUS ELECTRIC FACILITIES AT THIS SITE CURRENTLY SERVING EXISTING CUSTOMERS. THE APPLICANT SHALL COORDINATE WITH PNM REGARDING THESE EXISTING FACILITIES. ANY RELOCATION, CHANGES OR REALIGNMENT OF EXISTING ELECTRIC UTILITIES WILL BE THE DEVELOPER EXPENSE. IN SOME CASES, RELOCATION OR CHANGES TO EXISTING FACILITIES MAY NOT BE FEASIBLE DUE TO PHYSICAL, USE OR SAFETY CLEARANCE CONSTRAINTS.
11. PNM WILL REVIEW ALL TECHNICAL NEEDS, ISSUES AND SAFETY CLEARANCES FOR ITS ELECTRIC POWER SYSTEMS. ANY EXISTING AND PROPOSED PUBLIC UTILITY EASEMENTS SHALL BE INDICATED ON THE SITE PLAN UTILITY SHEET PNM'S STANDARD FOR PUBLIC UTILITY EASEMENTS IS 10 FEET IN WIDTH TO ENSURE ADEQUATE, SAFE CLEARANCES.
12. SCREENING SHALL BE DESIGNED TO ALLOW FOR ACCESS TO UTILITY FACILITIES. IT IS NECESSARY TO PROVIDE ADEQUATE CLEARANCE OF TEN FEET SURROUNDING ALL GROUND-MOUNTED UTILITIES FOR SAFE OPERATION, MAINTENANCE AND REPAIR PURPOSES.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, THE UNDERSIGNED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO, DO HEREBY CERTIFY THAT THE RECORD INFORMATION SHOWN HEREON IS BASED ON ACTUAL FIELD MEASUREMENTS AND VISUAL INSPECTIONS PERFORMED BY MYSELF OR UNDER MY DIRECT SUPERVISION. I FURTHER CERTIFY THAT THE RECORD CONDITION AS OF _____ IS IN SUBSTANTIAL COMPLIANCE WITH THE APPROVED GRADING AND DRAINAGE PLAN PREPARED BY _____, DATED _____.

SIGNATURE NMPE#_____ DATE

EROSION CONTROL NOTES:

1. CONTRACTOR IS RESPONSIBLE FOR OBTAINING A GRADING PERMIT PRIOR TO BEGINNING WORK.
2. CONTRACTOR IS RESPONSIBLE FOR MAINTAINING RUN-OFF ON SITE DURING CONSTRUCTION.
3. CONTRACTOR IS RESPONSIBLE FOR CLEANING ALL SEDIMENT THAT GETS INTO EXISTING RIGHT-OF-WAY.
4. REPAIR OF DAMAGED FACILITIES AND CLEANUP OF SEDIMENT ACCUMULATIONS ON ADJACENT PROPERTIES AND IN PUBLIC FACILITIES IS THE RESPONSIBILITY OF THE CONTRACTOR.
5. ALL EXPOSED EARTH SURFACES MUST BE PROTECTED FROM WIND AND WATER EROSION PRIOR TO FINAL (CITY) ACCEPTANCE OF ANY PROJECT.
6. ALL SLOPES NOT STABILIZED AT THE END OF THE PROJECT SHALL BE STABILIZED IN ACCORDANCE WITH COA SPECS OR ¾" GRAVEL

NOTICE TO CONTRACTORS

1. AN EXCAVATION/CONSTRUCTION PERMIT WILL BE REQUIRED BEFORE BEGINNING ANY WORK WITHIN CITY RIGHT-OF-WAY.
2. ALL WORK DETAILED ON THESE PLANS TO BE PERFORMED, EXCEPT AS OTHERWISE STATED OR PROVIDED HERON, SHALL BE CONSTRUCTED IN ACCORDANCE WITH CITY OF SANTA FE SPECIFICATIONS
3. TWO WORKING DAYS PRIOR TO ANY EXCAVATION, CONTRACTOR MUST CONTACT LINE LOCATING SERVICE, 765-1234, FOR LOCATION OF EXISTING UTILITIES.
4. PRIOR TO CONSTRUCTION, THE CONTRACTOR SHALL EXCAVATE AND VERIFY THE HORIZONTAL AND VERTICAL LOCATIONS OF ALL CONNECTIONS. SHOULD A CONFLICT EXIST, THE CONTRACTOR SHALL NOTIFY THE ENGINEER SO THAT THE CONFLICT CAN BE RESOLVED WITH A MINIMUM AMOUNT OF DELAY.
5. BACKFILL COMPACTION SHALL BE ACCORDING TO TRAFFIC/STREET USE.
6. MAINTENANCE OF THESE FACILITIES SHALL BE THE RESPONSIBILITY OF THE OWNER OF THE PROPERTY SERVED.
7. WORK ON ARTERIAL STREETS MAY BE PERFORMED ON A 24-HOUR BASIS.

PROJECT INFORMATION	
CREW/TECH: MT	DATE OF SURVEY: 07/17/2022
DRAWN BY: JK	CHECKED BY: LM
PSI JOB NO.: 228193AL	SHEET NUMBER: 2 OF 2

SITE DESCRIPTION

THE SITE CONSISTS OF APPROXIMATELY 19.2 ACRES OF UNDEVELOPED VACANT LAND LOCATED NORTHWEST OF WEST FRONTAGE ROAD AND CERRILLOS ROAD, NEW MEXICO. THE NORTHERN ADJOINING PROPERTY CONSISTS OF VACANT DESERT LAND FOLLOWED BY THE ARROYO DE LOS CHAMISOS WASH. THE EAST AND SOUTHEAST ADJOINING PROPERTIES CONSIST OF VACANT DESERT LAND FOLLOWED BY THE WEST FRONTAGE ROAD AND CERRILLOS ROAD ROADWAYS. VACANT LAND AND SINGLE-FAMILY RESIDENCES ARE DEPICTED ON THE WESTERN ADJOINING PROPERTIES.

BASED ON REVIEW OF HISTORICAL AERIAL PHOTOGRAPHS AVAILABLE FROM GOOGLE EARTH, THE SITE CONTAINED VACANT DESERT LAND WITH NATIVE VEGETATION FROM 1935 TO 1996. DIRT ACCESS ROADS TRAVERSING THROUGH THE NORTH-CENTRAL PORTION, WESTERN, AND EASTERN BOUNDARIES OF THE SITE APPEAR FROM 2001 TO 2008. SOME OF THESE ACCESS ROADS APPEAR TO BE RAISED FROM THE EXISTING GRADE SEEN IN PREVIOUS PHOTOGRAPHS. DURING THIS TIME, NUMEROUS STOCKPILES CONTAINING SOIL AND VARIOUS DEBRIS EXISTED IN THE NORTHEAST SECTION OF THE SITE AND APPROXIMATELY FIVE STORAGE CONTAINERS ARE SHOWN IN THE SOUTHEAST PORTION OF THE SITE. BY 2008, THE STORAGE CONTAINERS ARE NO LONGER PRESENT IN AERIAL PHOTOGRAPHS. FROM 2009 TO 2011, THE STOCKPILES NO LONGER APPEAR ON THE SITE, AND A LARGE AREA OF SPREAD FILL IS OBSERVED IN THE CENTRAL PORTION OF THE SITE. BY JUNE 2011, THERE ARE LARGE CLEARINGS OF VEGETATION ON THE EAST AND NORTHEAST PORTIONS OF THE SITE, AS WELL AS ALONGSIDE THE APPARENT ACCESS ROAD FROM CERRILLOS ROAD TO THE LARGE AREA OF SPREAD FILL ON THE CENTRAL PORTION OF THE SITE. BY OCTOBER 2013, THESE AREAS CONTAIN EITHER ADDITIONAL SPREAD FILL OR DISTURBED NATIVE SOIL. THE SITE HAS REMAINED VACANT DESERT LAND WITH NATIVE VEGETATION AND SPREAD FILL AND DISTURBED NATIVE SOIL IN RECENT PHOTOGRAPHS. ACCORDING TO GOOGLE EARTH, THE ELEVATION OF THE SITE RANGES FROM 6,378 TO 6,415 FEET ABOVE MEAN SEA LEVEL (MSL) AND TOPOGRAPHY GENERALLY DIRECTS SURFACE RUNOFF FROM SOUTH TO THE NORTH AND WEST.

ANNEXATION NOTE

ON THE 12TH OF FEBRUARY OF 2014 AN ANNEXATION AGREEMENT WAS EXECUTED BETWEEN THE CITY OF SANTA FE AND THE PREVIOUS LAND OWNER BEAVER MOTORS LLC. THE AGREEMENT SATED THAT A VARIANCE WAS APPROVED TO SECTION 14-8.2(B)(3) TERRAIN MANAGEMENT REGULATIONS ALLOWING THE DISTURBANCE OF SLOPES THAT ARE 30 PERCENT OR GREATER CONSISTING OF 5,020 SQUARE FEET, A VARIANCE WAS DEEMED APPROPRIATE AND WILL HAVE NO ADVERSE EFFECTS ON NEIGHBORING PROPERTIES.

THE DOCUMENT WAS RECORDED IN THE COUNTY OF SANTA FE ON THE 18TH DAY OF FEBRUARY, 2014 AT 02:43:49 PM AND WAS DULY RECORDED AS INSTRUMENT #1730261 .

GENERAL NOTES

1. CONTRACTOR SHALL NOTIFY THE CITY OF SANTA FE WATER DIVISION (CoSFWD) FIVE (5) DAYS PRIOR TO COMMENCEMENT OF WORK.
2. CONSTRUCTION SHALL BE DONE IN ACCORDANCE WITH THE CoSFWD CONSTRUCTION STANDARDS AND SPECIFICATIONS.
3. ALL EASEMENTS SHALL BE DEDICATED, CLEARED, GRADED AND STAKED PRIOR TO WATER LINE INSTALLATION.
4. ALL STREETS SHALL BE CUT TO WITHIN ±6" OF FINAL GRADE PRIOR TO WATER LINE INSTALLATION.
5. LOT CORNERS SHALL BE STAKED PRIOR TO SERVICE LINE INSTALLATION. CURB, GUTTER AND DRIVEWAY APRON SHALL BE INSTALLED PRIOR TO SERVICE LINE INSTALLATION UNLESS OTHERWISE APPROVED, IN WRITING, BY CoSFWD.
6. CONTRACTOR (DEVELOPER) SHALL PROVIDE CONSTRUCTION STAKING UTILIZING THE APPROPRIATE RIGHT-OF-WAY MAPS, SIGNED PLATS AND CoSFWD DRAWINGS.
7. MATERIAL SUBMITTALS SHALL BE APPROVED BY CoSFWD PRIOR TO CONSTRUCTION.
8. CONTACT NEW MEXICO ONE CALL AT 811 TWO (2) WORKING DAYS IN ADVANCE OF CONSTRUCTION FOR UTILITY SPOTS.
9. PRESSURE REGULATORS SHALL BE INSTALLED ON ALL SERVICES DOWNSTREAM FROM THE METER.
10. 4 FEET COVER TO TOP OF PIPE SHALL BE MAINTAINED ON ALL WATER MAINS AND SERVICES.
11. CONTRACTOR SHALL SUBMIT AS-BUILT CONSTRUCTION PACKET WITHIN FIVE (5) DAYS OF COMPLETION OF CONSTRUCTION INCLUDING: VALVE TIES, AS-BUILT DRAWINGS (INCLUDING, BUT NOT LIMITED TO: FITTING-TO-FITTING MEASUREMENTS, SERVICE-TO-SERVICE MEASUREMENTS, CENTER OF MAIN TO CENTER OF SERVICE MEASUREMENTS, LENGTH OF MAIN INSTALLED, FITTINGS INSTALLED, ETC.) AND POTABILITY RESULTS.
12. ALL VALVE BOXES SHALL BE BROUGHT UP TO GRADE OF THE FINAL PAVING MATERIAL SO THAT THE CONCRETE IS EXPOSED.
13. FIRE HYDRANTS SHALL BE NUMBERED USING REFLECTIVE NUMERALS. THE REFLECTIVE NUMERALS SHALL BE OBTAINED BY THE CONTRACTOR FOR THE CoSFWD FIELD REPRESENTATIVE AT THE TIME THE NOTICE TO PROCEED (NTP) IS ISSUED. NUMBERS SHALL BE LEGIBLE FROM THE ROAD. PRIOR TO INSTALLING NUMBERS, FIRE HYDRANTS SHALL BE PAINTED.
14. A MECHANICAL RESTRAINT SYSTEM SHALL BE UTILIZED ON FITTINGS AND PIPING FOR THRUST RESTRAINT. CONCRETE THRUST BLOCKING SHALL BE USED ONLY FOR SPECIAL CONDITIONS (E.G. CAPS WHERE MAIN WILL BE EXTENDED IN THE FUTURE) AS SPECIFICALLY APPROVED BY CoSFWD.
15. ANY FIELD CHANGES TO THESE PLANS REQUIRE APPROVAL OF BOTH THE DESIGN ENGINEER AND CoSFWD.
16. WORK ON CoSFWD FACILITIES SHALL NOT BEGIN UNTIL CoSFWD HAS ISSUED A NTP TO THE APPROVED UTILITY CONTRACTOR.
17. ANY AND ALL EASEMENTS FOR CITY-OWNED INFRASTRUCTURE SHALL BE OBTAINED/VERIFIED AND RECORDED BY DEVELOPER BEFORE PROJECT COMMENCEMENT. CONTRACTOR SHALL VERIFY THE EASEMENT IS IN PLACE BEFORE INSTALLING ANY INFRASTRUCTURE.

KEYED NOTES

1. EXISTING CITY-COUNTY MASTER METER VAULT SHALL BE REMOVED AND RELOCATED, COORDINATE RELOCATION WITH SANTA FE WATER DIVISION. SEE SHEET 2 FOR ADDITIONAL DETAILS.
2. NEW METER VAULT WITH REDUCED PRESSURE BACKFLOW PREVENTER IN HOT BOX. SEE DETAIL SHEET 5.
3. NEW 16" DI WATER LINE (PUBLIC) TO BE BUILT WITH NEW I-25 FRONTAGE SEE SHEET 5 FOR JOINT RESTRAIN TABLES
4. EXISTING 16" DI WATER MAIN (PUBLIC)
5. REMOVE AND DISPOSE EXIST. 16" WATER MAIN.
6. 8" CLASS 250 GATE VALVE
7. 16" CLASS 250 GATE VALVE – 200 PSI MIN WORKING PRESSURE
8. 1.5" IRRIGATION METER/SERVICE PER CoSFWD DETAIL 04, INSTALL WITH REDUCED PRESSURE BACK FLOW PREVENTER
9. NEW PUBLIC FIRE HYDRANT WITH 6" DI LINE AND 6" GATE VALVE. PER CoSFWD DETAIL 07
10. NEW 8" DI WATERLINE (PUBLIC)
11. NEW INLINE 16" INSERTION GATE VALVE CLASS 250 – 200 PSI MIN WORKING PRESSURE

NOTE:
PIPE JOINTS SHALL BE MECHANICALLY RESTRAINED PER UPDATED COSF WATER DIVISION DETAIL 10A. SEE COSF WATER DIVISION STANDARD DETAIL 10B FOR DIAGRAMMATIC REPRESENTATION OF JOINT RESTRAINT LENGTHS. SEE SHEET 5 FOR 16" RESTRAIN TABLES

SEE DOM. & IRR. SERVICE TABLE	1000	85	BUNGALOW'S/CLUBHOUSE

A FIRE SERVICE IS DEDICATED FOR AUTOMATIC FIRE SPRINKLER SYSTEMS. ALL FIRE SERVICES MUST BE EQUIPPED WITH A REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTER WITH DETECTOR ASSEMBLY (RPDA). THE BACKFLOW PREVENTER MUST BE LOCATED WITHIN 30' OF THE CONNECTION TO THE WATER MAIN. BACKFLOW PREVENTERS MUST BE LISTED AS APPROVED BY THE UNIVERSITY OF SOUTHERN CALIFORNIA FOUNDATION FOR CROSS CONNECTION CONTROL AND HYDRAULIC RESEARCH

IT IS THE PROPERTY OWNER'S RESPONSIBILITY TO INSTALL, MAINTAIN AND INSPECT PRIVATE FIRE HYDRANTS AND PRIVATE FIRE MAINS IN ACCORDANCE WITH RESPONDING FIRE AGENCY'S ADOPTED FIRE CODE, NFPA 24 AND 25 AND ADDITIONAL POLICIES ISSUED BY THE RESPONDING FIRE AGENCY

*PEAK FLOW IN GALLONS PER MINUTE

*RESIDUAL PRESSURE IN POUNDS PER SQUARE INCH AT THE LISTED FIRE FLOW AT THE POINT OF CONNECTION TO MAIN

17. ANY AND ALL EASEMENTS FOR CITY-OWNED INFRASTRUCTURE SHALL BE OBTAINED/VERIFIED AND RECORDED BY DEVELOPER BEFORE PROJECT COMMENCEMENT. CONTRACTOR SHALL VERIFY THE EASEMENT IS IN PLACE BEFORE INSTALLING ANY INFRASTRUCTURE.

THE FOLLOWING TABLES WERE CREATED USING EBAA IRON INC. SOFTWARE FOR RESTRAINING JOINTS WITH THESE CRITERIA:

DEPTH OF BURY: 4.0' MINIMUM
SAFETY FACTOR: 1.5 TO 1
PIPE MATERIAL: DI
SOIL TYPE: SM-SILTY SAND
TEST PRESSURE: 150 PSI
TRENCH TYPE 3: PIPE BEDDED IN 4" MINIMUM LOOSE SOIL BACKFILL LIGHTLY CONSOLIDATED TO TOP OF PIPE

THESE LENGTHS WILL BE AFFECTED IF THE TYPE OF MATERIAL, GREATER DEPTH OF BURY, ETC. CHANGES. THESE MUST BE RECALCULATED BY THE DESIGN ENGINEER PRIOR TO CONSTRUCTION.

RESTRAINED JOINT LENGTHS FOR TEES*

SIZE	LENGTH ALONG RUN**					
	10'	8'	6'	4'	2'	0'
16x16x8	1	1	6	16	26	36
16X16X6	1	1	1	1	14	27

*RESTRAINTS ONLY PLACED ON THE BRANCH
**LENGTH ALONG RUN REFERS TO THE LENGTH OF PIPE ON EITHER SIDE OF THE TEE BEFORE THE NEXT JOINT.

RESTRAINED JOINT LENGTHS FOR HORIZONTAL BENDS, VALVES, AND DEAD ENDS (EACH SIDE)

SIZE	HORIZONTAL BENDS				VALVES
	90°	45°	22-1/2°	11-1/4°	DEAD END
16	36	15	8	4	65

16" JOINT RESTRAIN TABLE
NTS

NOTE:
PIPE JOINTS SHALL BE MECHANICALLY RESTRAINED PER UPDATED COSF WATER DIVISION DETAIL 10A. SEE COSF WATER DIVISION STANDARD DETAIL 10B FOR DIAGRAMMATIC REPRESENTATION OF JOINT RESTRAINT LENGTHS SEE SHEET 5 FOR 16" RESTRAIN TABLES

Racks:

- Inverted U type bicycle racks are the required bicycle parking rack.
- Each rack must be securely anchored and accommodate a bicycle frame where one wheel can be locked to the rack with a high security, U-shaped shackle lock if both wheels are left on the bicycle.
- A space of two (2) feet by six (6) feet (12 square feet) must be provided for each required bicycle parking space so that a bicycle six (6) feet long can be securely held with two points supported so that the bicycle cannot be pushed, or fall in a way that would damage the bicycle frame, wheel, or components.
- All racks must provide two points of contact with the frame at least 6" apart horizontally.
- If a bicycle corral is sought within a public street right-of-way, all design elements shall be developed in coordination with and approved by the city of Santa Fe public works department and parking division.

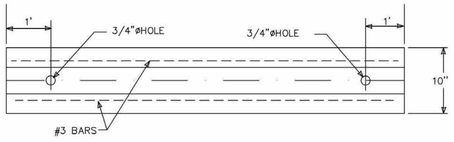
Distance to other racks:

- Racks placed parallel to each other (side by side) must be at least thirty-six (36) inches apart, this includes rack units sold as multiple units attached together.
- Racks aligned end to end must be at least ninety-six (96) inches apart.

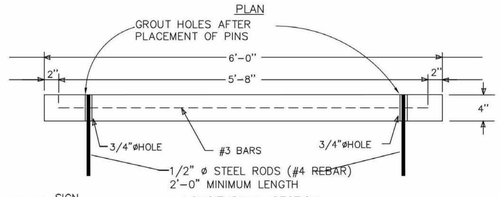
Distance from wall:

- Racks placed perpendicular to a wall must be at least forty-eight (48) inches from the wall to the nearest vertical component of the rack.
- Racks parallel to a wall must be at least thirty-six (36) inches from the wall.

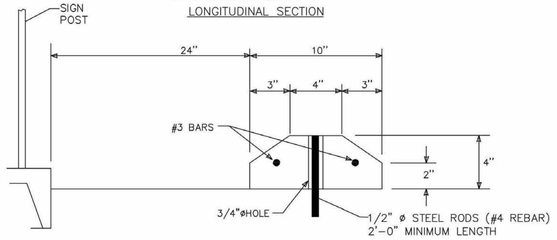
Distance from curb:



- Racks placed perpendicular to a curb must be at least forty-eight (48) inches from the curb to the nearest vertical component of the rack.
- Racks placed parallel to a curb must be at least twenty-four (24) inches from the curb to the rack.

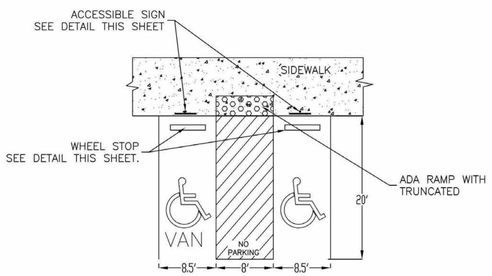


Distance from pedestrian aisle:

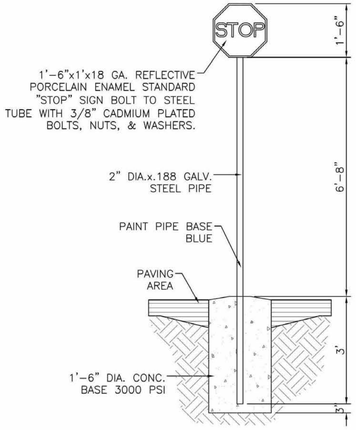


- Rack units perpendicular to a pedestrian aisle must be at least forty-eight (48) inches from the rack to the edge of the aisle, and the pedestrian aisle should be at least sixty (60) inches wide.

Parking and maneuvering areas:



- Each required bicycle parking space must be accessible without needing to move another bicycle.
- There must be an aisle of at least five (5) feet wide behind all required bicycle parking to allow for maneuvering of the bicycle. Where bicycle parking is next to a sidewalk, the maneuvering area may extend into the sidewalk.
- The area devoted to bicycle parking must be hard surfaced.



WHEEL STOP

NOTES:
1) International Symbol of Accessibility shall be painted on the pavement at rear of space, white symbol on blue background.
2) Parking space lines and diagonal striping to be painted blue.
3) Access aisle shall have the words "NO PARKING" in capital letters, each of which shall be at least one foot high and at least two inches wide, placed at the rear of the parking space so as to be close to where an adjacent vehicle's rear tires would be placed.
4) ADA parking areas – not to exceed a slope greater than 2% in any direction

VICINITY MAP:

FIRE PLAN NOTES

1. R313.1 AUTOMATIC FIRE SPRINKLERS SYSTEMS IN TOWNHOUSES AND ONE AND TWO-FAMILY DWELLINGS ARE NOT REQUIRED WHEN THE UNITS ARE NOT MORE THAN THREE STORIES ABOVE GRADE PLANE IN HEIGHT AND THAT HAVE A SEPARATE MEANS OF EGRESS AND THEIR ACCESSORY STRUCTURES.
2. 503.4 OBSTRUCTION OF FIRE APPARATUS ACCESS ROADS. FIRE APPARATUS ACCESS ROADS SHALL NOT BE OBSTRUCTED IN ANY MANNER, INCLUDING THE PARKING OF VEHICLES. THE MINIMUM WIDTHS AND CLEARANCES ESTABLISHED IN SECTION 503.2.1 AND 503.2.2 SHALL BE MAINTAINED AT ALL TIMES.
3. FIRE APPARATUS ACCESS SHALL HAVE AN UNOBSTRUCTED WIDTH NOT LESS THAN 20 FEET EXCLUSIVE OF SHOULDERS AND UNOBSTRUCTED VERTICAL CLEARANCE OF NOT LESS THAN 13 FEET 6 INCHES. (IFC 2015 SECTION 503.2.1)
4. FIRE DEPARTMENT SHALL HAVE 150 FEET DISTANCE TO ANY PORTION OF THE BUILDING OF ANY NEW CONSTRUCTION (IFC 2015 SECTION 503.1.1)
5. ON SITE FIRE LANE ROAD SHALL BE MARKED ON BOTH SIDES, AS DIRECTED BY FIRE MARSHALL
6. FIRE APPARATUS ACCESS ROADS SHALL NOT EXCEED 10 PERCENT IN GRADE AND SHALL HAVE AN ALL WEATHER DRIVING SURFACE CAPABLE OF SUPPORTING THE IMPOSED LOAD OF FIRE APPARATUS WEIGHING AT LEAST 75000 LBS
7. KEY BOX (KNOX BOX) SHALL BE MOUNTED BETWEEN 4 AND 6 FEET ABOVE GRADE AND SHALL BE ILLUMINATED.
8. MAX DWELLING UNIT HEIGHT IS 26-FT OR 2.5 STORIES HIGH.
9. 507.5 FIRE HYDRANT SYSTEMS. FIRE HYDRANT SYSTEMS SHALL COMPLY WITH SECTIONS 507.5.1 THROUGH 507.5.6.
10. 507.5.1 WHERE REQUIRED. WHERE A PORTION OF THE FACILITY O BUILDING HEREAFTER CONSTRUCTED OR MOVED INTO OR WITHIN TH JURISDICTION IS MORE THAN 400 FEET (122 M) FROM A HYDRANT ON FIRE APPARATUS ACCESS ROAD, AS MEASURED BY AN APPROVED ROUT AROUND THE EXTERIOR OF THE FACILITY OR BUILDING.
11. SHALL HAVE WATER SUPPLY THAT MEETS FIRE FLOW REQUIREMENTS A PER IFC (APPENDIX B)
12. SHALL MEET THE 150 FEET DRIVEWAY REQUIREMENTS MUST BE MET A PER IFC, OR AN EMERGENCY TURN-AROUND THAT MEETS THE IFC REQUIREMENTS SHALL BE PROVIDED. (AS PER APPENDIX D TABLE D103.4)
13. SHALL COMPLY WITH D105 AERIAL FIRE APPARATUS ACCESS ROADS (WIDTH AND PROXIMITY TO BUILDING)
14. SHALL COMPLY WITH SECTION D106 MULTIPLE-FAMILY RESIDENTIAL DEVELOPMENTS.
15. D107.1 ONE- OR TWO-FAMILY DWELLING RESIDENTIAL DEVELOPMENTS. DEVELOPMENTS OF ONE- OR TWO-FAMILY DWELLINGS WHERE THE NUMBER OF DWELLING UNITS EXCEEDS 30 SHALL BE PROVIDED WITH TWO SEPARATE AND APPROVED FIRE APPARATUS ACCESS ROADS.
16. D107.2 REMOTENESS. WHERE TWO FIRE APPARATUS ACCESS ROADS ARE REQUIRED, THEY SHALL BE PLACED A DISTANCE APART EQUAL TO NOT LESS THAN ONE-HALF THE LENGTH OF THE MAXIMUM OVERALL DIAGONAL DIMENSION OF THE PROPERTY OR AREA TO BE SERVED MEASURED IN A STRAIGHT LINE BETWEEN ACCESSES.
17. SHALL MEET THE IFC CODE REQUIREMENTS 2015 EDITION OR THE MOST CURRENT EDITION THE GOVERNING BODY HAS ADOPTED AT THE TIME OF PERMITTING.

CAUTION

ALL EXISTING UTILITIES SHOWN WERE OBTAINED FROM RESEARCH, AS-BUILTS, SURVEYS OR INFORMATION PROVIDED BY OTHERS. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO CONDUCT ALL NECESSARY FIELD INVESTIGATIONS PRIOR TO AND INCLUDING ANY EXCAVATION, TO DETERMINE THE ACTUAL LOCATION OF UTILITIES AND OTHER IMPROVEMENTS, PRIOR TO STARTING THE WORK. ANY CHANGES FROM THIS PLAN SHALL BE COORDINATED WITH AND APPROVED BY THE ENGINEER.

- SF — TEMPORARY SILT FENCE
- SS — SWPPP SIGN
- SF — SILT FENCE
- CE — CONSTRUCTION EXIT
- IP — INLET PROTECTION

SEQUENCE OF CONSTRUCTION:

1. INSTALL STABILIZED CONSTRUCTION ENTRANCES
2. POST PUBLIC NOTICE PER DETAILS
3. INSTALL DOWN GRADIENT PERIMETER CONTROLS
4. THE ENTIRE SITE WILL BE GRADED TO DRAIN TO THE PROPOSED PONDS AT ALL TIMES DURING CONSTRUCTION. INSTALL SEDIMENT BASINS PRIOR TO CLEARING REST OF THE SITE.
5. NOTIFY SWPPP COMPLIANCE INSPECTOR OF COMPLETION OF ABOVE.
6. BEGIN SOIL DISTURBING ACTIVITIES
7. PROVIDE TEMPORARY STABILIZATION OF DISTURBED AREAS OR STOCKPILES
8. INSTALL UNDERGROUND UTILITIES
9. FINISH GRADING THE SITE
10. PAVE COMMON ACCESS DRIVE AISLES AND SIDEWALKS
11. INSTALL LANDSCAPING ON SITE.

GROUND COVER (PRE-CONSTRUCTION)

THE PRE-CONSTRUCTION GROUND COVER CONSISTS OF A MIXTURE OF PREVIOUS GRADING WHICH CONSISTS OF NON NATIVE FILL, GRADING FOR UNPAVED ACCESS ROADS AND UTILITIES AS WELL AS UNCOMPACTED SOIL WITH NATIVE GRASSES, WEEDS, AND SHRUBS.

\\TWNAS\Z_Drive\2022\2022025 Cavan Santa Fe\dwg\Development Plan\2022025-SWPPP.dwg Apr 03, 2024 - 2:17pm

GENERAL EROSION NOTES:

A. THE STORMWATER POLLUTION PREVENTION PLAN (SWPPP) IS COMPRISED OF THE SWPPP BOOK, THE GENERAL CONSTRUCTION PERMIT, THIS DRAWING ("TEMPORARY EROSION CONTROL AND SEDIMENTATION PLAN"), STANDARD DETAILS ("TEMPORARY EROSION CONTROL AND SEDIMENTATION DETAILS"), EPA NOTICE OF INTENT PERMIT AND ALL SUBSEQUENT REPORTS, CORRECTIVE ACTIONS AND EROSION CONTROL RELATED DOCUMENTS.

B. ALL OPERATORS AS DESIGNATED, CONTRACTORS AND SUBCONTRACTORS INVOLVED WITH SITE ACTIVITIES RELATED TO STORM WATER POLLUTION PREVENTION SHALL REVIEW A COPY OF THE STORM WATER POLLUTION PREVENTION PLAN (SWPPP), THE CONSTRUCTION GENERAL PERMIT, THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES), THE CLEAN WATER ACT OF 1972 AND BECOME FAMILIAR WITH THEIR CONTENTS.

C. THE OPERATOR IN CONTROL OF DAILY SITE ACTIVITIES SHALL IMPLEMENT BEST MANAGEMENT PRACTICES AS REQUIRED BY THE SWPPP. ADDITIONAL BEST MANAGEMENT PRACTICES SHALL BE IMPLEMENTED AS DICTATED BY CONDITIONS THAT MAY OCCUR AT NO ADDITIONAL COST TO PROJECT OWNER THROUGHOUT ALL PHASES OF CONSTRUCTION.

D. BEST MANAGEMENT PRACTICES (BMP'S) AND CONTROLS SHALL CONFORM TO ALL FEDERAL, STATE, OR LOCAL REQUIREMENTS OR MANUAL OF PRACTICE, AS APPLICABLE. OPERATOR WITH CONTROL OF DAILY SITE ACTIVITIES SHALL IMPLEMENT ADDITIONAL CONTROLS AS DIRECTED BY PERMITTING AGENCY, LOCAL JURISDICTIONAL AUTHORITY OR SWPPP COMPLIANCE INSPECTOR.

E. THE TEMPORARY EROSION CONTROL AND SEDIMENTATION PLAN IS A WORKING DOCUMENT AND IS REQUIRED TO BE UPDATED WITHIN 24 HOURS OF ANY CHANGES WHEN BMP'S ARE REPAIRED, RELOCATED OR REMOVED BY NOTING ON THE PLAN THE AREAS AND DATES OF THE REPAIRS, RELOCATIONS OR REMOVALS. AN ACTIVE COPY OF THE PLAN SHALL BE POSTED IN THE JOB SITE TRAILER ONSITE AND MUST BE MAINTAINED CURRENT AT ALL TIMES.

F. CONTRACTOR SHALL MINIMIZE CLEARING AND EARTH DISTURBANCE TO THE MAXIMUM ACREAGE AS REQUIRED BY THE EPA CONSTRUCTION GENERAL PERMIT.

G. CONTRACTOR SHALL DENOTE ON THIS PLAN, THE LOCATION OF TEMPORARY PARKING, STORAGE, PORTABLE SANITARY FACILITIES, OFFICE TRAILERS, AND ALL SUPPORT AREAS. RELOCATIONS OF EACH SHALL ALSO BE DOCUMENTED AS THEY OCCUR.

H. ALL WASH OUT WATER USED FOR CONCRETE, MASONRY, PAINT AND OTHER MATERIALS SHALL HAVE ADEQUATE SIGNAGE WITH PROPER CONTAINMENT AND DISPOSED OF PROPERLY WHEN CAPACITY REACHES 50% OR PER VENDOR RECOMMENDATIONS. VENDORS AND TRADESMEN SHALL BE INFORMED OF THE REQUIREMENTS TO USE THE WASH OUT.

I. A SPILL KIT SHALL BE READILY AVAILABLE TO CONTAIN AND CLEAN-UP FUEL OR CHEMICAL SPILLS AND LEAKS. A DISCHARGE OF ANY MATERIAL IN A QUANTITY THAT MAY WITHIN REASONABLE PROBABILITY CAUSE, INJURE OR BE DETRIMENTAL TO HUMAN HEALTH, ANIMAL OR PLANT LIFE, OR PROPERTY; OR INTERFERE WITH THE PUBLIC WELFARE MUST BE REPORTED TO THE NEW MEXICO ENVIRONMENTAL DEPARTMENT HOTLINE AT (505) 827-9329 FOR EMERGENCIES OR FOR NON EMERGENCIES AT (866)-428-6535. IF UNSURE IF THE SPILL IS OF A SIGNIFICANT QUANTITY, THE SPILL SHOULD BE REPORTED TO THE HOTLINE AND INFORMATION PROVIDED WITH DETAILS OF THE SPILL FOR FURTHER ACTIONS.

J. DUST DURING CONSTRUCTION OPERATIONS SHALL BE FREQUENTLY CONTROLLED BY WATER SUPPRESSION METHODS ONLY, EARTH DISTURBING OPERATIONS SHALL CEASE IF HIGH WINDS ABOVE 35 MPH ARE PRESENT. THE USE OF MOTOR OILS AND OTHER PETROLEUM BASED OR TOXIC LIQUIDS IS STRICTLY PROHIBITED. OTHER CHEMICALS USED FOR DUST SUPPRESSION MUST BE APPROVED BY THE EPA PRIOR TO THEIR USE.

K. RUBBISH, TRASH, GARBAGE, LITTER, OR OTHER SUCH MATERIALS SHALL BE DEPOSITED INTO SEALED, COVERED, LEAK PROOF CONTAINERS. CONTAINERS SHALL BE DISPOSED OF PROPERLY WHEN CAPACITY IS REACHED. MATERIALS SHALL BE PREVENTED FROM LEAVING THE PREMISES THROUGH THE ACTION OF WIND OR STORMWATER.

L. ALL STORM WATER POLLUTION PREVENTION MEASURES AND CONTROLS PRESENTED ON THIS PLAN, AND IN THE STORM WATER POLLUTION PREVENTION PLAN, SHALL BE INITIATED PER THE SEQUENCE OF CONSTRUCTION AS NOTED.

M. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY HAS BEEN TEMPORARILY SUSPENDED FOR 14 DAYS, SHALL HAVE TEMPORARILY STABILIZATION IN PLACE NO LATER THAN 14 DAYS FROM THE LAST DATE OF CONSTRUCTION ACTIVITY OCCURRING THESE AREAS.

N. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY HAS PERMANENTLY STOPPED SHALL HAVE PERMANENT CONTROLS IN PLACE NO LATER THAN 14 DAYS AFTER THE LAST CONSTRUCTION ACTIVITY OCCURRING IN THESE AREAS.

O. IF THE ACTION OF VEHICLES OR EQUIPMENTS TRAVELING OVER THE CONSTRUCTION ENTRANCES IS NOT SUFFICIENT TO REMOVE THE MAJORITY OF DIRT OR MUD FROM LEAVING THE SITE, THEN THE LENGTH OF THE EXIT SHOULD BE EXTENDED TO PROVIDE ADDITIONAL TIRE ROTATIONS, LARGER ROCK MAY BE USED TO CREATE A SUFFICIENT JARRING MOTION OR INSTALL A TIRE WASH OFF WITH A SEDIMENT TRAP BEFORE LEAVING THE SITE.

P. ALL MATERIALS SPILLED, DROPPED, WASHED, OR TRACKED FROM VEHICLES ONTO ROADWAYS OR INTO STORM DRAINS MUST BE REMOVED IMMEDIATELY.

Q. THE OPERATOR IN CHARGE OF THE DAILY SITES ACTIVITIES WILL BE RESPONSIBLE FOR REMOVING SEDIMENT OR SOILS ACCUMULATING MORE THAN 50% OF THE DESIGN CAPACITY IN DETENTION PONDS, SILT FENCING OR OTHER SIMILAR EROSION CONTROLS.

R. ON-SITE & OFFSITE SOIL STOCKPILE AND BORROW AREAS SHALL BE PROTECTED FROM EROSION AND SEDIMENTATION THROUGH IMPLEMENTATION OF BEST MANAGEMENT PRACTICES, AS REQUIRED PER THE CONSTRUCTION GENERAL PERMIT. STOCKPILE AND BORROW AREA LOCATIONS SHALL BE NOTED ON THE ESC PLAN AND PERMITTED IN ACCORDANCE WITH LOCAL AUTHORITIES HAVING JURISDICTIONAL CONTROL.

S. SLOPES SHALL BE LEFT WITH CROSS SLOPE GRADING PATTERN AND IN A ROUGHENED CONDITION DURING THE GRADING PHASE TO REDUCE RUNOFF VELOCITIES AND EROSION RILLS. EXCESSIVE SLOPES MAY REQUIRE ADDITIONAL INDUSTRY STANDARD CONTROLS TO PREVENT EROSION.

T. DUE TO THE GRADE CHANGES DURING THE DEVELOPMENT OF THE PROJECT, THE OPERATOR IN CONTROL OF THE SITE'S DAILY ACTIVITIES SHALL BE RESPONSIBLE FOR ADJUSTING AND MAINTAINING ALL EROSION CONTROL TO PREVENT EROSION.

U. ALL DISTURBED AREAS SHALL BE SUPPRESSED BY WATER AND ALL CONTROLS LEFT IN GOOD WORKING CONDITION AT THE END OF EACH WORKING DAY, THIS INCLUDES REPLACEMENT OF SILT FENCING AND/OR OTHER SURFACE CONTROLS, TRACK OUT SWEPT CLEAN, BACKFILL OF OPEN TRENCHES AND ANY OTHER EROSION CONTROLS.

ESC PLAN STANDARD NOTES:

1. ALL EROSION AND SEDIMENT CONTROL (ESC WORK) ON THESE PLANS, EXCEPT AS OTHERWISE STATED OR PROVIDED HEREON SHALL BE PERMITTED, CONSTRUCTED, INSPECTED, AND MAINTAINED IN ACCORDANCE WITH:
   a. THE CITY ORDINANCE,
   b. THE EPA'S 2022 CONSTRUCTION GENERAL PERMIT (CGP), AND
2. ALL BMP'S MUST BE INSTALLED PRIOR TO BEGINNING ANY EARTH MOVING ACTIVITIES EXCEPT AS SPECIFIED HEREON IN THE PHASING PLAN. CONSTRUCTION OF EARTHEN BMPS'S SUCH AS SEDIMENT TRAPS, SEDIMENT BASINS, AND DIVERSION BERMS SHALL BE COMPLETED AND INSPECTED PRIOR TO ANY OTHER CONSTRUCTION OR EARTHWORK. SELF-INSPECTION IS REQUIRED AFTER INSTALLATION OF THE BMP'S AND PRIOR TO BEGINNING CONSTRUCTION.
3. SELF-INSPECTIONS – AT A MINIMUM A ROUTINE COMPLIANCE SELF-INSPECTION IS REQUIRED TO REVIEW THE PROJECT FOR COMPLIANCE WITH THE CONSTRUCTION GENERAL PERMIT ONCE EVERY 14 DAYS AND AFTER ANY PRECIPITATION EVENT OF ¼ INCH OR GREATER UNTIL THE SITE CONSTRUCTION HAS BEEN COMPLETED AND THE SITE DETERMINED AS STABILIZED BY THE CITY. REPORTS OF THESE INSPECTIONS SHALL BE KEPT BY THE PERSON OR ENTITY AUTHORIZED O DIRECT THE CONSTRUCTION ACTIVITIES ON THE SITE AND MADE AVAILABLE UPON REQUEST.
4. CORRECTIVE ACTION REPORTS MUST BE KEPT BY THE PERSON OR ENTITY AUTHORIZED TO DIRECT THE CONSTRUCTION ACTIVITIES ON THE SITE AND MADE AVAILABLE UPON REQUEST.
5. STABILIZATION REPORTS MUST BE KEPT BY THE PERSON OR ENTITY AUTHORIZED TO DIRECT THE CONSTRUCTION ACTIVITIES ON THE SITE AND MADE AVAILABLE UPON REQUEST. REPORTS SHOULD INCLUDE RECORDS OF WEED REMOVAL PER CITY ORDINANCE (9-8-1), STERILIZATION, SOIL TEST RESULTS AND RECOMMENDATION, MATERIALS AND MANUFACTURER'S SPECIFICATIONS FOR APPLICATION RATES, ESTIMATED FUNCTIONAL LONGEVITY, METHODS OF APPLICATION, INSPECTION AND MAINTENANCE. THE REDUCED SELF-INSPECTION SCHEDULE IN CGP 4.4.1 APPLIES TO STABILIZED AREA AND ANY DAMAGED OR WORN STABILIZATION MUST BE IDENTIFIED IN THE REPORTS ALONG WITH WEED PROBLEMS. CORRECTIVE ACTIONS FOR STABILIZATION SHALL BE DOCUMENTED IN A STABILIZATION REPORT INCLUDING ACTUAL RATES AND DATES OF STABILIZATION, AND THE MATERIALS AND MANUFACTURER'S SPECIFICATIONS USED.
6. BMP'S SHALL BE INSPECTED AND MAINTAINED UNTIL ALL DISTURBED AREAS ARE STABILIZED IN ACCORDANCE WITH THE FINAL STABILIZATION CRITERIA (CGP 2.2.14.b). GENERALLY, ALL DISTURBED AREAS, OTHER THAN STRUCTURES AND IMPERVIOUS SURFACES, MUST HAVE UNIFORM PERENNIAL VEGETATION THAT PROVIDES 70 PERCENT OR MORE OF THE COVER PROVIDED BY NATIVE VEGETATION OR SEED THE DISTURBED AREA AND PROVIDE NON-VEGETATIVE MULCH THAT PROVIDES COVER AT LEAST THREE YEARS WITHOUT ACTIVE MAINTENANCE. FINAL STABILIZATION MUST BE APPROVED BY THE CITY OF SANTA FE PRIOR TO REMOVAL OF BMP'S AND DISCONTINUATION OF INSPECTIONS.

NATURE AND EXTENT OF CONSTRUCTION ACTIVITIES:

NATURE OF CONSTRUCTION ACTIVITIES: MASS ROUGH GRADING OF THE SITE, INSTALLATION OF UTILITIES (WATER AND SANITARY SEWER) AND PAVING OF INTERNAL DRIVE AISLES, PARKING AND SIDEWALKS, BUILDING CONSTRUCTION AND LANDSCAPING AND OFFSITE IMPROVEMENTS.

PROPERTY SIZE: 16.54 ACRES

DISTURBED AREA SIZE: 15.46 ACRES

MAXIMUM DISTURBED AREA SIZE: 15.46 ACRES

PROJECT SCHEDULE: SCHEDULE LENGTHS ARE TBD, SEE SEQUENCE OF CONSTRUCTION THIS SHEET SW-1 FOR SCHEDULE TASKS DESCRIPTION.

CONSTRUCTION PHASE: THE FIRST PHASE OF CONSTRUCTION, CONSISTS OF BUILDING CONSTRUCTION, TRENCHING AND INSTALLING UTILITIES FOR SERVICE AND PAVING OF PARKING AND DRIVEWAYS TO THE PROPERTY.

BMP MAINTENANCE:

ALL MEASURES STATED IN THIS EROSION AND SEDIMENT CONTROL PLAN, AND IN THE STORM WATER POLLUTION PREVENTION PLAN, SHALL BE MAINTAINED IN FULLY FUNCTIONAL CONDITION UNTIL NO LONGER REQUIRED FOR A COMPLETED PHASE OF WORK OR UNTIL FINAL STABILIZATION OF THE SITE IS ACHIEVED. ALL EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE INSPECTED AT THE END OF THE WORKDAY BY A QUALIFIED MEMBER OF THE SWPPP COMPLIANCE TEAM.

THE OPERATOR WITH CONTROL OF THE SITES DAILY ACTIVITIES IS RESPONSIBLE TO MAINTAIN, CLEAN AND REPAIR EROSION CONTROLS IN ACCORDANCE WITH THE FOLLOWING:

1. INLET PROTECTION DEVICES AND BARRIERS SHALL BE REPAIRED OR REPLACED, IF THEY SHOW SIGNS OF UNDERMINING OR DETERIORATION. SEDIMENT SHALL BE REMOVED TO INSURE PROPER FLOWS. INLET PROTECTION TYPES MAY NEED TO BE MODIFIED DURING THE CONSTRUCTION PROGRESS.
2. ALL SEEDED AREAS SHALL BE CHECKED REGULARLY TO SEE THAT A GOOD STAND OF VEGETATION IS MAINTAINED. AREAS SHOULD BE FERTILIZED, WATERED, AND RE-SEEDED AS NEEDED.
3. SILT FENCES, WADDLES OR OTHER CONTROLS SHALL BE REPLACED OR REPAIRED TO PROPER FUNCTIONING CONDITION, IF DAMAGED. SEDIMENT AND SOIL SHALL BE REMOVED WHEN REACHES ONE-HALF THE HEIGHT OF THE CONTROL.
4. THE CONSTRUCTION EXITS SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OF SEDIMENT ONTO PUBLIC OR PRIVATE ROADWAYS. THIS MAY REQUIRE PERIODIC TOP DRESSING, EXTENDING OR OTHER MODIFICATIONS TO THE CONSTRUCTION EXITS AS CONDITIONS DEMAND. SITE TRAFFIC SHOULD BE LIMITED TO THE CONTROLLED EXITS ONLY.
5. SEDIMENTATION BASINS SHALL BE MAINTAINED IN OPERATIONAL CONDITIONS AT ALL TIMES. SEDIMENT SHALL BE REMOVED FROM SEDIMENT BASINS OR TRAPS WHEN THE DESIGN CAPACITY HAS BEEN REDUCED BY 50%
6. REFERENCE THE SWPPP BOOK FOR ALL EROSION CONTROL MAINTENANCE PROCEDURES AND FREQUENCIES. CONSULT THE SWPPP PREPARER WITH ANY QUESTIONS REGARDING THIS SWPPP AND ITS REQUIREMENTS.

EROSION CONTROL NOTES:

1. CONTRACTOR IS RESPONSIBLE FOR OBTAINING A TOPSOIL DISTURBANCE PERMIT FROM THE LOCAL JURISDICTIONAL AUTHORITY PRIOR TO BEGINNING WORK.
2. THE OPERATOR WITH CONTROL OF THE DAILY SITES ACTIVITIES IS RESPONSIBLE FOR MAINTAINING RUN-OFF AND RUN ON OF SITE DURING CONSTRUCTION.
3. THE OPERATOR WITH CONTROL OF THE DAILY SITES ACTIVITIES IS RESPONSIBLE FOR CLEANING ALL SEDIMENT THAT GETS INTO EXISTING RIGHT-OF-WAY. REPAIR OF DAMAGED FACILITIES AND CLEANUP OF SEDIMENT ACCUMULATIONS ON ADJACENT PROPERTIES AND IN PUBLIC FACILITIES IS THE RESPONSIBILITY OF THE CONTRACTOR.
4. ALL EXPOSED EARTH SURFACES MUST HAVE APPROPRIATE CONTROLS TO PROTECT FROM WIND AND WATER EROSION DURING ALL PHASES OF THE PROJECT.
5. STOCKPILES INACTIVE FOR 14 DAYS ARE REQUIRED TO HAVE TEMPORARY STABILIZATION OR APPROPRIATE COVER TO CONTROL WIND AND WATER EROSION.
6. THE OPERATOR WITH CONTROL OF THE DAILY SITES ACTIVITIES IS REQUIRED TO MAINTAIN ALL SITE BMP'S IN GOOD CONDITION FOR THE DURATION OF THE PROJECT UNTIL A NOTICE OF TERMINATION IS ACCEPTED BY THE EPA.
7. IF SITE EARTH DISTURBANCES EXCEED 5 ACRES AT ANY ONE TIME, TEMPORARY AND/OR PERMANENT STABILIZATION MUST BE COMPLETED WITHIN 7 DAYS WHEN AREA BECOMES INACTIVE OR EARTH DISTURBING ACTIVITIES ARE COMPLETE. SITE EARTH DISTURBANCES OF LESS THAN 5 ACRES, HAVE 14 DAYS TO PROVIDE TEMPORARY OR PERMANENT STABILIZATION WHEN AREA BECOMES INACTIVE OR EARTH DISTURBING ACTIVITIES ARE COMPLETE.

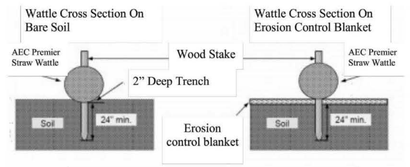
OUTLET (PERSPECTIVE)

TEMPORARY SEDIMENT TRAP (ST)
N.T.S.

ELEVATION

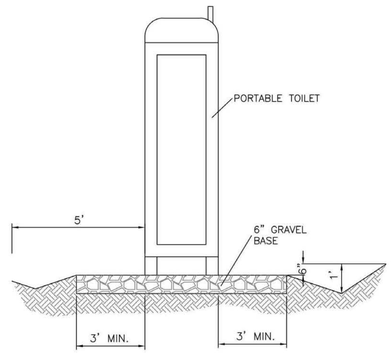
A–A–SECTION



POSTS: STEEL EITHER T OR U TYPE.

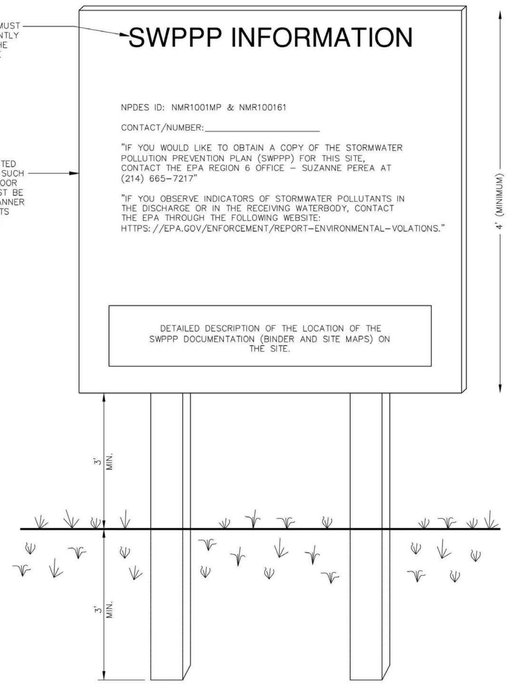
FENCE: WOVEN WIRE, 14–1/2 GA. 6" MAX. MESH OPENING

FABRIC:
1. AMOCO 1198
2. BELTECH 810
3. MIRAFI 130X
4. LING GTF 190
5. SI 915 SC



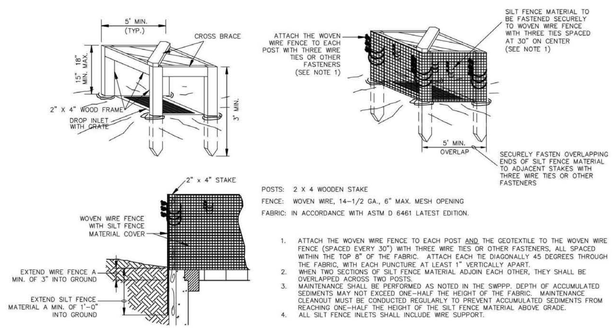
1. WOVEN WIRE FENCE TO BE FASTENED SECURELY TO FENCE POSTS WITH WIRE TIES.
2. GEOTEXTILE TO BE FASTENED SECURELY TO WOVEN WIRE FENCE WITH TIES SPACED EVERY 24" AT TOP AND MID SECTION.
3. WHEN TWO SECTIONS OF GEOTEXTILE ADJOIN EACH OTHER THEY SHALL BE OVERLAPPED BY SIX INCHES AND FOLDED.
4. MAINTENANCE SHALL BE PERFORMED AS NOTED IN THE EROSION CONTROL PLAN. COLLECTED MATERIAL SHALL BE REMOVED WHEN "BULGES" DEVELOP IN THE SILT FENCE.
5. ALL SILT FENCE SHALL INCLUDE WIRE SUPPORT UNLESS INDICATED OTHERWISE

SEDIMENTATION/SILT FENCE WITH WIRE SUPPORT (SF)
N.T.S.



Notes:
1. Ends of wattles shall be turned slightly up slope, against flow
2. Ends shall extend minimum of 6 inches above top of wattle at centerline overflow

WATTLE DETAIL
FOR LINEAR CONSTRUCTION (W)



PORTABLE TOILET CONTAINMENT DETAIL

NOTES:
1) THE SWPPP INFORMATION SIGN MUST BE LOCATED NEAR THE CONSTRUCTION EXIT OF THE SITE, SUCH THAT IT IS ACCESSIBLE AND VIEWABLE BY THE GENERAL PUBLIC, BUT NOT OBSTRUCTING VIEWS AS TO CAUSE A SAFETY HAZARD.
2) ALL POSTED DOCUMENTS MUST BE MAINTAINED IN A CLEARLY READABLE CONDITION AT ALL TIMES THROUGHOUT CONSTRUCTION AND UNTIL THE NOTICE–OF–TERMINATION (NOT) IS FILED FOR THE PERMIT.
3) CONTRACTOR SHALL POST OTHER STORM WATER AND/OR EROSION AND SEDIMENT CONTROL RELATED PERMITS ON THE SIGN AS REQUIRED BY THE GOVERNING AGENCY.
4) SIGN SHALL BE LOCATED OUTSIDE OF PUBLIC RIGHT–OF–WAY AND EASEMENTS UNLESS APPROVED BY THE GOVERNING AGENCY.
5) CONTRACTOR IS RESPONSIBLE FOR ENSURING STABILITY OF THE SWPPP INFORMATION SIGN.

SWPPP INFORMATION SIGN (SS)
N.T.S.

POSTS: 2 X 4 WOODEN STAKE

FENCE: WOVEN WIRE, 14–1/2 GA., 6" MAX. MESH OPENING

FABRIC: IN ACCORDANCE WITH ASTM D 6461 LATEST EDITION.

1. ATTACH THE WOVEN WIRE FENCE TO EACH POST AND THE GEOTEXTILE TO THE WOVEN WIRE FENCE (SPACED EVERY 30") WITH THREE WIRE TIES OR OTHER FASTENERS, ALL SPACED WITHIN THE TOP 8" OF THE FABRIC. ATTACH EACH TIE DIAGONALLY 45 DEGREES THROUGH THE FABRIC, WITH EACH PUNCTURE AT LEAST 1" VERTICALLY APART.
2. WHEN TWO SECTIONS OF SILT FENCE MATERIAL ADJOIN EACH OTHER, THEY SHALL BE OVERLAPPED ACROSS TWO POSTS.
3. MAINTENANCE SHALL BE PERFORMED AS NOTED IN THE SWPPP. DEPTH OF ACCUMULATED SEDIMENTS MAY NOT EXCEED ONE–HALF THE HEIGHT OF THE FABRIC. MAINTENANCE CLEANOUT MUST BE CONDUCTED REGULARLY TO PREVENT ACCUMULATED SEDIMENTS FROM REACHING ONE–HALF THE HEIGHT OF THE SILT FENCE MATERIAL ABOVE GRADE.
4. ALL SILT FENCE INLETS SHALL INCLUDE WIRE SUPPORT.

SILT FENCE INLET PROTECTION (IP6)

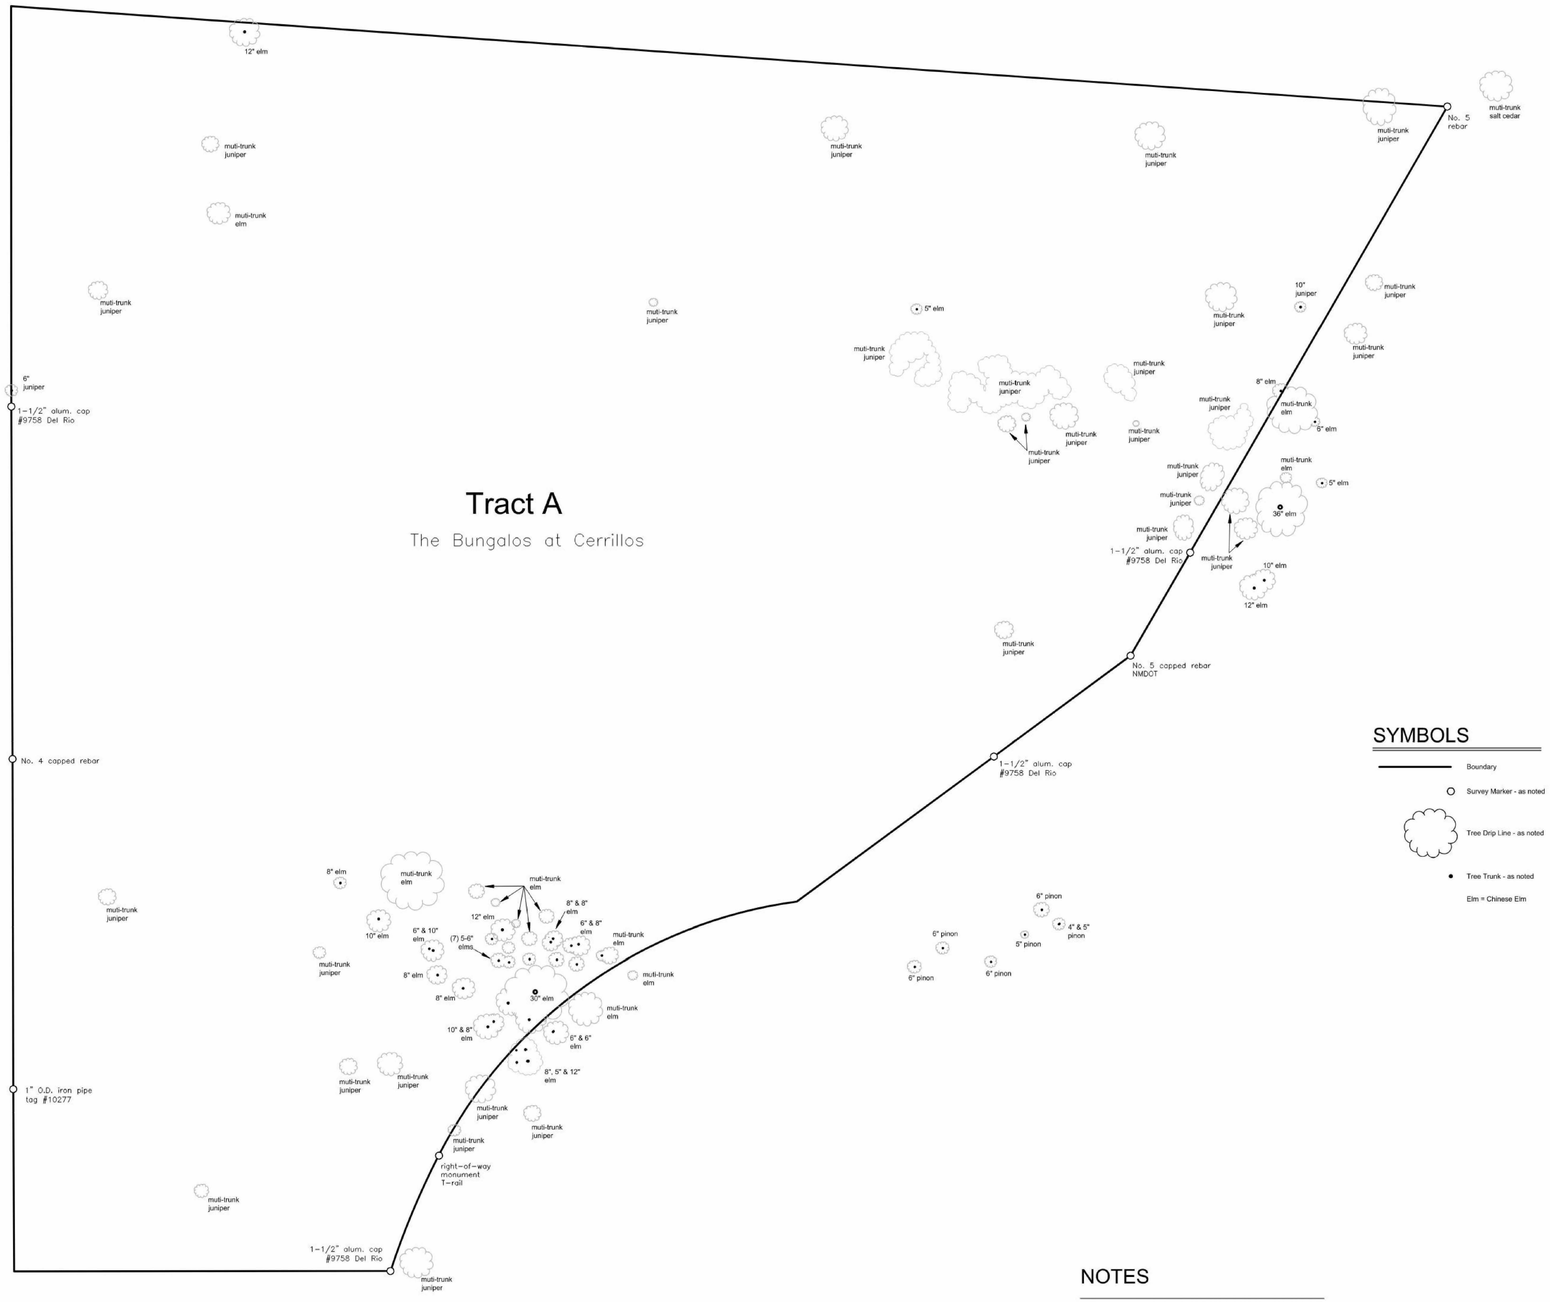
Tree Survey



Tract A of The Lands of Beaver Motors
as shown on the plat recorded in the official Santa Fe County records
in Book 685, Page 48
#8201 Cerrillos Road, City and County of Santa Fe, New Mexico
prepared for Cavan Companies
November 2023

Grid North
NM Central
NAD83(2011)

Scale: 1 inch = 60 feet

All distances are grid U.S. Survey Feet
Central Zone of the New Mexico
State Plane Coordinate System of 1983

0' 60' 120' 180'

SYMBOLS

- Boundary
- Survey Marker - as noted
- Tree Drip Line - as noted
- Tree Trunk - as noted
- Elm = Chinese Elm

SURVEYOR'S CERTIFICATE

This map has been produced according to procedures that have been demonstrated to produce data that meets or exceeds the minimum standards for a planimetric map compiled at a scale of 1"=60', prepared from field surveys by me during November 2023, and is true and correct to the best of my knowledge and belief.

Scott McCloy 11 / 17 / 2023

Scott McCloy N.M.P.S. No. 27222 Date

SCOTT MCCLOY NEW MEXICO 27222 PROFESSIONAL SURVEYOR

McCLOY LAND SURVEYING, LLC ■ 150 CENTRAL PARK SQUARE ■ LOS ALAMOS, NEW MEXICO 87544
(505) 321-7404 ■ mccloy.surveying@gmail.com

NOTES

1. Distances are expressed in grid US Survey Feet. (New Mexico State Plane Coordinate System of 1983, Central Zone)
2. Bearings are related to Grid North of the New Mexico State Plane Coordinate System of 1983, Central Zone, 2011 realization.
3. THIS IS NOT A BOUNDARY SURVEY OR A RIGHT-OF-WAY SURVEY. APPARENT PROPERTY CORNERS, RIGHT-OF-WAY LINES, OR PROPERTY LINES AS SHOWN ARE DERIVED FROM RECORD SURVEY PLATS, RIGHT-OF-WAY MAPS, OR DEEDS REFERENCED HEREON AND ARE NOT GUARANTEED OR TO BE RELIED ON FOR THE ESTABLISHMENT OF PROPERTY LINES.
4. Trees with a trunk diameter smaller than six-inches and/or a height of less than 6-feet were not included in this survey.
5. Drip lines separated by less than 24-inches could be shown as a single tree.

GENERAL CONSTRUCTION NOTES:

1. THESE NOTES ARE TO BE USED FOR GENERAL REFERENCE IN CONJUNCTION WITH, AND AS A SUPPLEMENT TO THE WRITTEN. SPECIFICATIONS, APPROVED ADDENDA, AND CHANGE ORDERS ASSOCIATED WITH THESE LANDSCAPE IMPROVEMENT DOCUMENTS.
2. CONTRACTOR SHALL BE RESPONSIBLE FOR SECURING ALL NECESSARY PERMITS AND SHALL NOTIFY ALL UTILITY COMPANIES WITH UTILITIES ON SITE PRIOR TO THE CONSTRUCTION OF THE PROJECT. CONTRACTOR SHALL ADHERE TO ALL APPLICABLE LOCAL, STATE AND/OR FEDERAL LAWS OR REGULATIONS PERTAINING TO THE PROJECT.
3. IN ALL CASES WHERE A CONFLICT MAY OCCUR, SUCH AS BETWEEN ITEMS COVERED IN SPECIFICATIONS AND NOTES ON THE DRAWINGS, OR BETWEEN GENERAL NOTES AND SPECIFIC DETAILS, THE LANDSCAPE ARCHITECT SHALL BE NOTIFIED AND HE OR SHE WILL INTERPRET THE INTENT OF THE CONTRACT DOCUMENTS.
4. A QUALIFIED SUPERVISOR SHALL BE PRESENT ON SITE AT ALL TIMES DURING CONSTRUCTION.
5. DETAILS NOTED AS "TYPICAL" SHALL APPLY IN ALL CASES UNLESS SPECIFICALLY SHOWN OR NOTED OTHERWISE.
6. LANDSCAPE CONTRACTOR SHALL INSPECT WITH THE OWNER'S AUTHORIZED REPRESENTATIVE AND/OR OWNER ALL EXISTING CONDITIONS PRIOR TO THE START OF ANY WORK. THE CONTRACTOR SHALL BE RESPONSIBLE UNDER THIS CONTRACT TO REPAIR AND/OR REPLACE, AT THEIR OWN EXPENSE, ANY STRUCTURES, FENCES, WALLS, PLANT MATERIAL, OR OTHER ITEMS DESTROYED DURING CONSTRUCTION. LIKEWISE THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRING AND/OR REPLACING ANY AND ALL DAMAGES TO ADJACENT PROPERTIES OR ANY OTHER AREAS OUTSIDE THE CONTRACT LIMITS. THE DAMAGED ITEMS/AREAS WILL BE RESTORED TO THEIR ORIGINAL CONDITION TO THE SATISFACTION OF THE OWNER'S AND/OR OWNER'S AUTHORIZED REPRESENTATIVE.
7. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO COORDINATE ALL PLANT MATERIAL LOCATIONS WITH OTHER TRADES PRIOR TO INSTALLATION. THE CONTRACTOR SHALL FAMILIARIZE THEMSELVES WITH THE LOCATIONS OF EXISTING AND FUTURE UNDERGROUND SERVICES AND IMPROVEMENTS WHICH MAY CONFLICT WITH THE WORK TO BE DONE. PRIOR TO THE START OF WORK, ALL UNDERGROUND UTILITIES ARE TO BE LOCATED AND PROTECTED. CONTRACTOR IS RESPONSIBLE FOR THE INITIAL CALL AND FUTURE UPDATES TO BLUE STAKE AT 602-263-1100. EXISTING UNDERGROUND SERVICES SHALL NOT BE DISTURBED OR REMOVED WITHOUT APPROVAL OF THE OWNER'S AND/OR OWNER'S AUTHORIZED REPRESENTATIVE, UNLESS SPECIFICALLY NOTED OTHERWISE ON DRAWINGS.
8. CONTRACTOR SHALL PROVIDE BARRICADES AND TRAFFIC CONTROL ALONG PUBLIC STREETS IF REQUIRED DURING CONSTRUCTION.
9. PLANTING AND IRRIGATION DESIGN MAY BE MODIFIED TO ADAPT TO WALK CONFIGURATIONS THAT DIFFER FROM THESE PLANS, AND DUE TO GRADE LIMITATIONS ON SITE.
10. REFER TO ENGINEERING PLANS FOR DRAINAGE FLOWS. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE THAT THESE ARE PROVIDED FOR AND NOT IMPAIRED WITH OBSTRUCTIONS.
11. NO PART OF THE CONTRACT DOCUMENTS ARE INTENDED TO BE IN VIOLATION OF CODES. IF DISCREPANCIES EXIST, NOTIFY LANDSCAPE ARCHITECT AND OWNER IMMEDIATELY.
12. COORDINATE AND COOPERATE WITH ALL CONTRACTORS OF ATTACHED, ADJOINING AND/OR INTERFACING WORK TO INSURE ORDERLY AND EFFICIENT COMPLETION OF ALL WORK.
13. ALL CONSTRUCTION SHALL CONFORM TO ALL APPLICABLE CODES AND ORDINANCES (FEDERAL, STATE, LOCAL, AND HEALTH DEPARTMENTS), EXCEPT WHERE REQUIREMENTS OF CONTRACT DOCUMENTS ARE MOST STRINGENT.
14. ALL EXISTING PLANT MATERIAL SHALL REMAIN UNLESS OTHERWISE NOTED.
15. ANY PLANT MATERIAL THAT MUST BE REMOVED DUE TO CONSTRUCTION MUST BE APPROVED BY OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE. NOTIFY OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE AT LEAST 48 HOURS PRIOR TO REMOVAL AND/OR RELOCATION OF ALL PLANTS.
16. IF ANY EXISTING PLANT MATERIAL THAT IS TO REMAIN IS DAMAGED BY CONTRACTOR, THE CONTRACTOR SHALL REPLACE THE DAMAGED PLANT WITH A NEW ONE OF THE SAME SIZE AND VARIETY AT NO COST TO THE OWNER.
17. DO NOT DISTURB SOIL WITHIN BRANCH SPREAD OF TREES OR SHRUBS TO REMAIN WITHOUT APPROVAL OF THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE.
18. ANY DISCREPANCIES BETWEEN THE PLANS AND CONDITIONS ON SITE SHALL BE REPORTED IMMEDIATELY TO THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE.
19. CONTRACTOR SHALL PROVIDE OWNER WITH ALL WARRANTY INFORMATION, INSTRUCTION MANUALS AND ANY OTHER PRODUCT INFORMATION FOR ALL NEW EQUIPMENT OR MACHINERY INSTALLED ON THE SITE WITHIN TWO WEEKS AFTER SUBSTANTIAL COMPLETION.
20. NO DESIGN MODIFICATIONS SHALL BE MADE WITHOUT THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE APPROVAL.
21. CONTRACTOR SHALL BE RESPONSIBLE FOR HAULING AND LEGALLY DISPOSING OF MATERIALS DESIGNATED TO BE REMOVED. PROVIDE RECEIPTS FOR DUMPING TO OWNER FOR THEIR FILES.
22. ALL BASE INFORMATION IS FROM OTHER PROJECT TEAM MEMBERS AS LISTED IN THE 'PROJECT TEAM' LIST ON THIS SHEET. A THOROUGH ATTEMPT HAS BEEN MADE TO KEEP UP TO DATE WITH THE MOST CURRENT BASE INFORMATION. HOWEVER, DISCREPANCIES MAY EXIST BETWEEN THESE PLANS AND OTHER TEAM MEMBERS PLANS. IN ALL CASES THE ENGINEERS PLANS SHALL HAVE PRECEDENCE OVER THE LANDSCAPE PLANS FOR FINAL PROJECT CONFIGURATION.
23. ALL SIDEWALKS SHOWN ON THESE PLANS ARE FOR REFERENCE ONLY. REFER TO CIVIL ENGINEERING PLANS FOR FINAL LAYOUT, GRADES, FINISHES, DETAILS, AND METHODS OF CONSTRUCTION. RVi UNDER NO CIRCUMSTANCES ASSUMES RESPONSIBILITY FORUNFORESEEN CONFLICTS, ENGINEERING, STRUCTURAL CALCULATIONS, OR INSTALLATION THAT IS BEYOND OUR CONTROL.
24. SIGHT LINES AND VISIBILITY TRIANGLES ARE SHOWN ON THESE PLANS FOR REFERENCE ONLY. REFER TO ENGINEERING PLANS ORGOVERNING MUNICIPALITY FOR SPECIFIC GUIDELINES. IN CASES WHERE THERE IS MORE THAN ONE GOVERNING BODY, THE MOST RESTRICTIVE GUIDELINE SHALL PREVAIL.
25. ALL WALLS AND VERTICAL SITE FEATURES DESIGNED IN THE INTEREST OF THIS PROJECT ARE SCHEMATIC IN NATURE. POTENTIAL CONSTRUCTION DETAILING AND TECHNIQUES ARE SHOWN FOR DESIGN INTENT CLARIFICATION ONLY. THE CONTRACTOR SHALL HAVE THE ULTIMATE RESPONSIBILITY TO ENSURE THAT ALL CONSTRUCTED ELEMENTS ON THIS PROJECT ARE STRUCTURALLY SOUND AND ARE BUILT WITHIN ALL APPLICABLE CITY, STATE, AND FEDERAL GUIDELINES. RVi UNDER NO CIRCUMSTANCES ASSUMES RESPONSIBILITY FOR UNFORESEEN CONFLICTS, ENGINEERING, STRUCTURAL CALCULATIONS, OR INSTALLATION.
26. SHOP DRAWING REVIEWS WILL BE DONE TO ENSURE THAT PRODUCT DATA, MATERIALS, AND SAMPLES MEET OR EXCEED THE ORIGINAL DESIGN INTENT OF THESE DRAWINGS ONLY. RVi UNDER NO CIRCUMSTANCES ASSUMES RESPONSIBILITY FOR UNFORESEEN CONFLICTS, ENGINEERING, STRUCTURAL CALCULATIONS OR INSTALLATION RESULTING FROM THE PRODUCTION OF ANY SHOP DRAWINGS.

GENERAL SCOPE OF WORK:

1. THE SCOPE OF WORK FOR THIS PROJECT INCLUDES COMPLETE LANDSCAPING IMPROVEMENTS AS SHOWN ON THE DRAWINGS AND AS SPECIFIED HEREIN. VERIFY QUESTIONS ON SCOPE OF WORK PRIOR TO SUBMITTING A BID.
2. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS INCLUDING WATER, EQUIPMENT AND INCIDENTALS AS SHOWN, SPECIFIED AND REQUIRED TO PERFORM LANDSCAPING WORK. THE EXTENT OF THE LANDSCAPING WORK IS SHOWN ON THE DRAWINGS AND IN THE SCHEDULES. THE TYPES OF LANDSCAPING REQUIRED MAY INCLUDE THE FOLLOWING:
   - A. AESTHETIC FINISH GRADING
   - B. BOULDER PLACEMENT
   - C. INSTALLATION OF TREES, SHRUBS, GROUNDCOVERS, AND ANY OTHER NURSERY STOCK
   - D. INSTALLATION OF TURF AREAS
   - E. DECOMPOSED GRANITE AND PRE-EMERGENT APPLICATIONS (2)
   - F. MULCHES, AND ALL OTHER MATERIAL NECESSARY TO COMPLETE THE PLANTING JOB AS SPECIFIED
   - G. MISCELLANEOUS LANDSCAPE MATERIALS AND IMPROVEMENTS
   - H. FERTILIZERS AND SOIL AMENDMENTS
   - I. MAINTENANCE WORK AS SPECIFIED UNTIL COMPLETION OF THE CONTRACT
   - J. GUARANTEES
3. OBTAIN ALL PERMITS AND PAY REQUIRED FEES TO ANY GOVERNMENTAL AGENCY HAVING JURISDICTION OVER THE WORK. ARRANGE INSPECTIONS REQUIRED BY LOCAL AGENCIES AND ORDINANCES DURING THE COURSE OF CONSTRUCTION AS REQUIRED.
4. COORDINATE AND COOPERATE WITH OTHER CONTRACTORS WORKING ON THE SITE FOR SUCCESSFUL COMPLETION OF THE PROJECT.
5. BEFORE COMMENCING WORK ON THE SITE, BECOME THOROUGHLY ACQUAINTED WITH LAYOUT OF ALL UNDERGROUND UTILITIES AND STRUCTURES OVER THE ENTIRE SITE. ALL REQUISITE REPAIRS TO DAMAGE CAUSED BY WORK OF THIS SECTION SHALL BE AT THE CONTRACTOR'S EXPENSE.
6. THE IRRIGATION WORK CONSISTS OF INSTALLING A COMPLETE UNDERGROUND SPRINKLER, EMITTER, AND BUBBLER SYSTEM FOR ALL TURF AND LANDSCAPED AREAS AS SHOWN ON THE DRAWINGS AND AS HEREINAFTER SPECIFIED, INCLUDING THE FURNISHING OF ALL LABOR, EQUIPMENT, APPLIANCES, AND MATERIALS INCLUDING WATER AND IN PERFORMING ALL OPERATION IN CONNECTION WITH THE CONSTRUCTION OF THE IRRIGATION SYSTEM. WORK SHALL INCLUDE FURNISHING AND INSTALLING ALL PLASTIC AND COPPER PIPE AND FITTINGS, AUTOMATIC CONTROL VALVES, VALVE ACCESS BOXES, ELECTRIC COMPUTERIZED CENTRAL CONTROLLERS, ELECTRIC WIRE, TELEPHONE ACCESS LINE (IF REQUIRED), ETC., AS REQUIRED FOR A COMPLETE SYSTEM AS SHOWN ON THE DRAWINGS AND AS CALLED FOR IN THESE SPECIFICATIONS OR AS MAY BE REQUIRED FOR PROPER OPERATION OF THE SYSTEM. THE CONTRACTOR IS RESPONSIBLE FOR ALL COSTS OF WATER USED IN CONNECTION WITH THE INSTALLATION OF THE IRRIGATION SYSTEM.
7. UNLESS OTHERWISE SPECIFIED OR INDICATED ON THE DRAWINGS, THE CONSTRUCTION OF THE IRRIGATION SYSTEM SHALL INCLUDE THE FURNISHING, INSTALLING AND TESTING OF ALL MAINS, LATERALS, RISERS, AND FITTINGS, THE FURNISHING AND INSTALLING OF IRRIGATION HEADS, CONTROL VALVES, CONTROLLERS, LOW AND HIGH VOLTAGE ELECTRIC WIRE, TELEPHONE ACCESS LINE TO CENTRAL CONTROL UNIT (IF REQUIRED), POINT OF CONNECTION, CONTROLS, RESTORATION OF EXISTING IMPROVEMENTS, EXCAVATION AND BACKFILL, AND ALL OTHER WORK IN ACCORDANCE WITH THE PLANS AND SPECIFICATIONS AS REQUIRED FOR A COMPLETE SYSTEM.
8. WHENEVER ANY MATERIAL IS SPECIFIED BY NAME AND/OR NUMBER, SUCH SPECIFICATIONS SHALL BE DEEMED TO BE USED FOR THE PURPOSE OF FACILITATING A DESCRIPTION OF THE MATERIALS AND ESTABLISHING QUALITY AND SHALL BE DEEMED AND CONSTRUED TO BE FOLLOWED BY THE WORDS "OR APPROVED EQUAL." NO SUBSTITUTIONS WILL BE PERMITTED WHICH HAVE NOT BEEN SUBMITTED FOR APPROVAL PRIOR TO BIDDING.
9. LANDSCAPE CONTRACTOR SHALL CALL FOR "BLUE STAKE" AS REQUIRED. EXERCISE EXTREME CAUTION IN ALL PLANTING OPERATIONS, AS THERE MAY BE UNDERGROUND ELECTRIC AND TELEPHONE CABLES, SEWER LINES AND WATER LINES THROUGHOUT THE ENTIRE AREA. CONTRACTOR SHALL STUDY AND BE FAMILIAR WITH THE LOCATION OF THESE OBSTRUCTIONS AND UNDERGROUND UTILITIES. PLACE PLANTINGS WHERE SHOWN ON THE PLANS. IF THERE ARE OBSTRUCTIONS OR UNDERGROUND UTILITIES, RELOCATE PLANTS CLEAR OF ANY INTERFERENCE. LANDSCAPE CONTRACTOR SHALL REPAIR ALL DAMAGES CAUSED BY THEM TO OBSTRUCTIONS AND UNDERGROUND UTILITIES AT NO EXPENSE TO THE OWNER.
10. MAINTAIN UNINTERRUPTED WATER SERVICE TO BUILDING DURING NORMAL WORKING HOURS. ARRANGE FOR TEMPORARY WATER SHUT-OFF WITH ARCHITECT/ENGINEER DURING INSTALLATION OF IRRIGATION SYSTEM, IF NECESSARY.
11. ALL WORK AND MATERIALS TO BE IN FULL ACCORDANCE WITH THE LATEST RULES AND REGULATIONS OF SAFETY ORDERS OF DIVISION OF INDUSTRIAL SAFETY; THE UNIFORM BUILDING CODE, M.A.G. SPECIFICATIONS AND OTHER APPLICABLE LAWS OR REGULATIONS, INCLUDING ALL CITY CODES. NOTHING IN THESE SPECIFICATIONS IS TO BE CONSTRUED TO PERMIT WORK NOT CONFORMING TO THESE CODES. SHOULD THE CONSTRUCTION DOCUMENTS, OR INSTRUCTION, BE AT VARIANCE WITH THE AFOREMENTIONED RULES AND REGULATIONS, NOTIFY LANDSCAPE ARCHITECT AND GET INSTRUCTIONS BEFORE PROCEEDING WITH THE WORK AFFECTED. IF LANDSCAPE ARCHITECT IS NOT NOTIFIED OF ANY VARIANCE, IT SHALL BE UNDERSTOOD THAT THE CONTRACTOR ASSUMES ANY AND ALL RESPONSIBILITY FOR THE WORK DONE.
12. CLEAN UP SHALL BE MADE DAILY AS EACH PORTION OF THE WORK PROGRESSES. REFUSE AND EXCESS DIRT SHALL BE REMOVED FROM THE SITE, AND WALKS AND PAVING SHALL BE SWEPT OR WASHED DOWN DAILY. ANY DAMAGE SHALL BE REPAIRED TO ORIGINAL CONDITIONS AT CONTRACTOR'S EXPENSE. LEAVE WORK IN CLEAN CONDITION.
13. SUBMIT DETAILED OPERATION AND MAINTENANCE DATA FOR ALL EQUIPMENT AND ACCESSORIES PROVIDED UNDER THESE PLANS INCLUDING ASSEMBLY.

PLANTING WARRANTY & MAINTENANCE NOTES

1. MAINTAIN ALL AREAS INCLUDED IN THE CONTRACT ON A WEEKLY BASIS DURING THE PROGRESS OF WORK, A 90 DAY MAINTENANCE PERIOD, AND UNTIL THE FINAL ACCEPTANCE OF WORK IS RECEIVED IN WRITING.
2. UPON ACCEPTANCE AFTER THE 90 DAY MAINTENANCE PERIOD, THE CONTRACTOR SHALL FURNISH A WRITTEN WARRANTY ON ALL PLANT MATERIAL AGREEING TO GUARANTEE THE CONTINUED GROWTH OF ACTIVE PLANT MATERIAL FOR THE SPECIFIED GUARANTEE PERIODS. ALL GUARANTEE PERIODS COMMENCE FROM THE TIME OF FINAL ACCEPTANCE AT THE END OF THE MAINTENANCE PERIOD.
3. THE CONTRACTOR SHALL WATER AND MAINTAIN ALL LANDSCAPE MATERIAL DURING THE MAINTENANCE PERIOD. THE OWNER WILL WATER AND MAINTAIN THE LANDSCAPE MATERIAL DURING THE WARRANTY PERIOD. THE CONTRACTOR SHALL INSPECT THE LANDSCAPE MATERIALS PERIODICALLY DURING THE WARRANTY PERIOD AND SHALL NOTIFY THE OWNER IN WRITING, IF, IN THE CONTRACTOR'S OPINION, THE LANDSCAPE MATERIALS ARE NOT RECEIVING PROPER CARE.
4. ALL TREES, PALMS, CACTI, ACCENTS, AND TURF SHALL BE GUARANTEED FOR A MINIMUM PERIOD OF ONE (1) YEAR AND ALL SHRUBS, GROUNDCOVERS, AND OTHER NON SPECIFIED PLANT MATERIAL SHALL BE GUARANTEED FOR A PERIOD OF 90 DAYS FROM THE DATE OF FINAL ACCEPTANCE. THE GUARANTEE SHALL BE AGAINST DEFECTS INCLUDING DEATH AND UNSATISFACTORY GROWTH, EXCEPT FOR DEFECTS RESULTING FROM NEGLECT BY OWNER, ABUSE BY OTHERS, OR UNUSUAL PHENOMENA OR INCIDENTS WHICH ARE BEYOND THE LANDSCAPE CONTRACTOR'S CONTROL.
5. ANY PLANT MATERIALS WHICH ARE NOT APPROVED PRIOR TO OCTOBER 1 OF THE CALENDAR YEAR IN WHICH THEY ARE INSTALLED, SHALL BE FURTHER GUARANTEED UNTIL MAY 15 OF THE FOLLOWING CALENDAR YEAR.
6. ALL PLANT MATERIALS MUST BE MAINTAINED IN HEALTH AND VIGOR AND BE ALLOWED TO ATTAIN NATURAL SIZE AND SHAPE IN ACCORDANCE WITH THE ORIGINALLY APPROVED LANDSCAPE PLAN.
7. REFER TO BOOK SPECIFICATIONS, IF INCLUDED IN THIS DOCUMENT SET, FOR ADDITIONAL INFORMATION ON THE SPECIFICS OF THE ANTICIPATED WARRANTY.
8. LANDSCAPE CONTRACTOR SHALL PREPARE AND SUBMIT TO THE OWNER TYPEWRITTEN MAINTENANCE GUIDELINES AT FINAL WALK-THRU AND PRIOR TO FINAL ACCEPTANCE OF WORK.
9. IF TURF IS USED ON THIS PROJECT THE LANDSCAPE CONTRACTOR SHALL REAPPLY SEED OR SOD IN ALL AREAS WHICH HAVE DEVELOPED BARE SPOTS HALFWAY THROUGH THE MAINTENANCE PERIOD. AREAS WHICH CANNOT BE RESEEDED FOR SUMMER GROWTH DUE TO CONTRACTOR'S INABILITY TO RESEED DURING PROPER GROWING SEASON SHALL BE OVERSEEDED OR SODDED WITH GRASS APPROPRIATE FOR THE CURRENT SEASON, CARED FOR THROUGHOUT THE OFF SEASON, AND PROPERLY SEEDED AT THE NEXT APPROPRIATE GROWING SEASON. THESE ARRANGEMENTS MUST BE MADE WITH THE OWNER PRIOR TO CONDITIONAL ACCEPTANCE OF THE WORK AND MAY REQUIRE A MONETARY HOLD-BACK.
10. COST FOR REPLACEMENTS DURING THE WARRANTY PERIOD IS ASSUMED PART OF THE BID QUOTATIONS AND THEREFORE WILL NOT RESULT IN ANY ADDITIONAL COST TO THE OWNER OR LANDSCAPE ARCHITECT.

EXISTING LANDSCAPE NOTES

1. BEFORE WORK BEGINS ON THE PROJECT, THE LANDSCAPE CONTRACTOR SHALL SCHEDULE A PRE-CONSTRUCTION CONFERENCE WITH OWNER AND/OR THE GENERAL CONTRACTOR TO REVIEW THE PROJECT. THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE IS TO APPROVE ANY CHANGES PRIOR TO THE START OF ANY WORK.
2. ALL DEMOLITION AREAS SHALL BE FLAGGED FOR APPROVAL PRIOR TO DEMOLITION.
3. ALL EXISTING PLANT MATERIAL SHALL REMAIN UNLESS OTHERWISE NOTED. SHOULD ANY CONFLICTS ARISE BETWEEN THE EXISTING PLANT MATERIAL ON-SITE AND PROPOSED IMPROVEMENTS SHOWN ON THE PLANS THE CONTRACTOR SHALL NOTIFY THE LANDSCAPE ARCHITECT IMMEDIATELY.

SEEDING SPECIFICATIONS (SEE TABLE BELOW RIGHT FOR SEED QUANTITIES)

1013.1 GENERAL

1013.1.1 SCOPE

FURNISH ALL LABOR, MATERIALS AND EQUIPMENT NECESSARY FOR PREPARATION OF SEEDBED, FURNISHING AND INSTALLATION OF SEED, EROSION CONTROL MEASURES, SOIL AMENDMENTS, AND RELATED WORK SPECIFIED HEREIN AND AS INDICATED ON PLANS OR AS AUTHORIZED BY THE LANDSCAPE ARCHITECT OR ENGINEER. THIS SPECIFICATION SHALL APPLY TO LARGE PONDING AREAS ON SITES WHERE A LANDSCAPE PLAN FOR BUILDING PERMIT IS NOT REQUIRED, AND ALL PONDS THAT ARE GREATER THAN OR EQUAL TO 2 ACRES IN SIZE. SMALLER WATER QUALITY PONDS SHALL INCORPORATE LOW IMPACT DEVELOPMENT STRATEGIES AS DESCRIBED IN THE CITY OF ALBUQUERQUE DEVELOPMENT PROCESS MANUAL (DPM). TREATMENTS DESCRIBED IN THIS SPECIFICATION MAY APPLY AS BEST MANAGEMENT PRACTICES WHERE DEEMED PRACTICABLE BY THE LANDSCAPE ARCHITECT OR ENGINEER.

1013.1.2 APPLICABLE STANDARDS & REFERENCES:

1013.1.2.1 DRAWINGS AND GENERAL PROVISIONS OF THE CONTRACT INCLUDING CITY OF ALBUQUERQUE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, LATEST EDITION. GENERAL CONDITIONS AND ANY SUPPLEMENTAL SPECIAL PROVISIONS, APPLY TO THIS SECTION.

1013.1.2.2 ALL SEED SHALL BE CERTIFIED BY STATE OF ORIGIN. THE CERTIFICATION AUTHORITY FOR THE STATE OF NEW MEXICO IS THE NEW MEXICO CROP IMPROVEMENT ASSOCIATION.

1013.1.2.3 RECLAMATION EFFORTS ARE CONTROLLED BY THE REQUIREMENTS STIPULATED IN THE NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM GENERAL PERMIT FOR REGION VI OF THE ENVIRONMENTAL PROTECTION AGENCY.

1013.1.3 PERFORMANCE REQUIREMENTS

1013.1.3.1 THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING AND CARING FOR SEEDED AREAS UNTIL FINAL ACCEPTANCE OF THE WORK AND SHALL REPAIR AT CONTRACTOR EXPENSE ANY DAMAGE TO SEEDED AREAS CAUSED BY PEDESTRIAN, VEHICULAR TRAFFIC, VANDALISM OR OTHER CAUSE.
1013.1.4 SUBMITTALS

1013.1.4.1 THIS PUBLICATION - SECTION 1502 - SUBMITTALS

1013.1.4.2 CERTIFICATION OF SEED: FROM SEED VENDOR FOR EACH MIXTURE, STATING THE BOTANICAL AND COMMON NAME, PERCENTAGE BY WEIGHT OF EACH SPECIES AND VARIETY, AND PERCENTAGE OF PURITY, GERMINATION, AND WEED SEED. INCLUDE THE YEAR OF PRODUCTION AND DATE OF PACKAGING. INCLUDE STATE, ORIGIN AND NAME AND TELEPHONE NUMBER OF SUPPLIER.

1013.1.4.3 PRODUCT CERTIFICATES: FOR ORGANIC AMENDMENTS
FROM MANUFACTURER.

1013.1.4.5 SOURCES OF SUPPLY, COLOR, AND SIZE FOR AGGREGATE MULCH.

1013.4.6 SOURCE OF SUPPLY AND PRODUCT INFORMATION FOR WOOD MULCH.

1013.1.5 DELIVERY, STORAGE & HANDLING

1013.1.5.1 SEED AND OTHER PACKAGED MATERIALS: DELIVER PACKAGED MATERIALS IN ORIGINAL, UNOPENED CONTAINERS SHOWING WEIGHT, CERTIFIED ANALYSIS, NAME AND ADDRESS OF MANUFACTURER, AND INDICATION OF COMPLIANCE WITH STATE AND FEDERAL LAWS, AS APPLICABLE.

1013.1.5.2 BULK MATERIALS:
A. DO NOT DUMP OR STORE BULK MATERIALS NEAR FUEL CONTAINERS, HERBICIDES, STRUCTURES, UTILITIES, WALKWAYS AND PAVEMENTS, OR ON EXISTING TURF AREAS OR PLANTS.
B. PROVIDE EROSION-CONTROL MEASURES TO PREVENT EROSION OR DISPLACEMENT OF BULK MATERIALS; DISCHARGE OF SOIL-BEARING WATER RUNOFF; AND AIRBORNE DUST REACHING ADJACENT PROPERTIES, WATER CONVEYANCE SYSTEMS, OR WALKWAYS.
C. ACCOMPANY EACH DELIVERY OF BULK MATERIALS WITH APPROPRIATE CERTIFICATES.

1013.2 PRODUCTS

1013.2.1 SEED

1013.2.1.1 SEED: THE SEED SPECIES AND RATE OF APPLICATION SHALL BE AS SHOWN BELOW AND SHALL BE USED BASED ON THE TYPE OF SOIL OR AS SPECIFIED ON THE PLANS OR IN THE SUPPLEMENTAL TECHNICAL SPECIFICATIONS.

1013.2.1.2 SEED SHALL BE FRESH, RE-CLEANED SEED OF THE LATEST CROP, MIXED IN THE PROPORTIONS BY WEIGHT, AND BE PURE LIVE SEED AS DENOTED WITHIN THESE SPECIFICATIONS OR AS PER THE PLANS.

1013.2.1.3 SEED SHALL BE DELIVERED TO THE SITE IN THE ORIGINAL UNOPENED CONTAINERS WHICH SHALL BEAR THE VENDOR'S GUARANTEE OF ANALYSIS. LABELING OF SEED SHALL BE IN ACCORDANCE WITH FEDERAL SEED LAWS AND THE NEW MEXICO DEPARTMENT OF AGRICULTURE LABELING LAWS. FEDERAL SEED LAWS REQUIRE THAT
ANALYSIS SHALL BE NO OLDER THAN FIVE MONTHS FOR SEED SHIPPED INTERSTATE AND NO OLDER THAN NINE MONTHS FOR SEED SHIPPED INTRA-STATE. SEEDS MAY BE PRE-MIXED BY A SEED DEALER. DOCUMENTATION MUST BE PROVIDED, THE SAME AS IF THE SEEDS WERE SOLD OR BAGGED SEPARATELY. THE LANDSCAPE
ARCHITECT OR ENGINEER SHALL RECEIVE ALL LABELS FROM ALL BAGS OF SEED USED FOR VERIFICATION. FOR EACH SPECIES INCLUDED IN THE MIX THE FOLLOWING INFORMATION WILL BE FOUND ON EACH BAG TAG:
A. VARIETY - SPECIFY IF CERTIFIED.
B. KIND OF SEED
C. LOT NUMBER
D. PURITY
E. GERMINATION
F. % OF CROP SEED, % INERT, % NOXIOUS WEED
G. ORIGIN
H. TEST DATE
I. POUNDS OF THIS SPECIES OR PERCENTAGE OF TOTAL LOT.

1013.2.1.4 SEED MIXTURE AND RATE: SEED SPECIES MIXTURES AND APPLICATION RATES SHALL BE AS FOLLOWS AND SHALL BE USED BASED ON THE SOIL TYPE UNLESS OTHERWISE SPECIFIED IN THE PLANS OR SUPPLEMENTAL TECHNICAL SPECIFICATIONS. (SEE TABLE TO RIGHT)

PLANTING GENERAL NOTES

1. VERIFY PLANT QUANTITIES PRIOR TO BIDDING AND INSTALLATION. QUANTITIES ARE LISTED FOR CONVENIENCE ONLY, THE ACTUAL NUMBER OF SYMBOLS INDICATED ON THE PLANTING PLANS SHALL HAVE PRIORITY OVER QUANTITIES LISTED WITHIN THE LANDSCAPE MATERIAL SCHEDULE. THE CONTRACTOR SHALL FURNISH ALL PLANT MATERIAL NECESSARY TO COMPLETE THE PLANTINGS AS SHOWN ON THE PLANS.
2. CLARIFICATION OF DISCREPANCIES BETWEEN THE CONSTRUCTION DOCUMENTS AND THE SITE SHOULD BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT AND/OR OWNER'S AUTHORIZED REPRESENTATIVE IMMEDIATELY.
3. THE LANDSCAPE ARCHITECT AND/OR OWNER'S AUTHORIZED REPRESENTATIVE IS TO APPROVE ANY PLANT MATERIAL SUBSTITUTIONS.
4. ALL PLANT MATERIAL MUST BE MAINTAINED IN HEALTH AND VIGOR, AND BE ALLOWED TO ATTAIN NATURAL SIZE AND SHAPE IN ACCORDANCE WITH ARIZONA NURSERY ASSOCIATION SPECIFICATIONS.
5. ALL PLANT MATERIAL MAY BE INSPECTED PRIOR TO ACCEPTANCE. THE LANDSCAPE ARCHITECT AND/OR OWNER'S AUTHORIZED REPRESENTATIVE RESERVES THE RIGHT TO REFUSE ANY PLANT MATERIAL DEEMED UNACCEPTABLE, EVEN AFTER DELIVERY TO SITE.
6. PLANT TREES AND SHRUBS PLUMB AND FACED TO GIVE THE BEST APPEARANCE OR RELATIONSHIP TO ADJACENT PLANTS, STRUCTURES, AND VIEWS. IF ANY SOIL NUTRIENT DEFICIENCIES EXIST, IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO AMEND THE SOIL.
7. PLANTING METHODS, SOIL AMENDMENT QUANTITIES (IF ANY), AND PREPARATION METHODS SHALL BE INSTALLED ACCORDING TO THE PLANTING SPECIFICATIONS AND DETAILS.
8. ALL PLANTING AREAS SHALL RECEIVE WEED CONTROL/PRE-EMERGENT PER THE GUIDELINES SET FORTH WITHIN THE SPECIFICATIONS AND DETAILS. REAPPLY AS NECESSARY TO COMPLETELY KILL NOXIOUS MATERIAL. REMOVE ALL DEAD AND/OR DYING DEBRIS PRIOR TO FINAL ACCEPTANCE.
9. ALL TREES LOCATED WITHIN SIGHT DISTANCE AREAS MUST BE TRIMMED TO 6'-0" CLEARANCE ABOVE FINISHED GRADE.
10. UNLESS OTHERWISE NOTED ON PLANS, ROCK/BARK MULCH SHALL EXTEND UNDER ALL PLANTINGS AND BE RAKED UNIFORMLY ALONG CONCRETE FLATWORK, CURBS AND ETC.
11. THE FINISH GRADE OF LANDSCAPE AREAS RECEIVING ROCK/BARK MULCH MUST BE GRADED 2-1/2" BELOW CONCRETE OR OTHER ADJACENT PAVED SURFACES PRIOR TO INSTALLATION OF THE MULCH. FINISH GRADE OF LANDSCAPE AREAS RECEIVING TURF MUST BE GRADED 1-1/2" BELOW CONCRETE OR OTHER PAVED SURFACES PRIOR TO INSTALLATION OF TURF.
12. BOULDERS, IF USED, TO BE SURFACE SELECT GRANITE WITH A MINIMUM OF SHARP EDGES AND/OR CRACKING. ANY EXPOSED SURFACE SCARRING THAT MAY HAVE OCCURRED DURING TRANSPORTING OR CONSTRUCTION IS TO BE EONITED WITH NO ADDITIONAL COST TO THE OWNER.
13. STAKE ALL NURSERY GROWN TREE STOCK A MINIMUM OF 12" OUT FROM EDGE OF PLANTING WELL. THE EDGE OF ALL TREE PLANTING WELLS SHALL BE A MINIMUM OF 2 FEET AWAY FROM ALL CURB AND SIDEWALKS AND A MINIMUM OF 12 FEET AWAY FROM ALL BUILDING FOUNDATIONS. THE EDGE OF ALL SHRUB PLANTING WELLS SHALL BE A MINIMUM OF 18" AWAY FROM ALL CURB AND SIDEWALKS AND A MINIMUM OF 3 FEET AWAY FROM ALL BUILDING FOUNDATIONS.
14. LANDSCAPE CONTRACTOR SHALL CONTACT THE OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO EACH APPLICATION OF PRE-EMERGENT FOR VERIFICATION. CONTRACTOR SHALL PROVIDE OWNER WITH PROOF OF PRE-EMERGENT APPLICATION NO MORE THAN 7 DAYS AFTER EACH APPLICATION WITHOUT EXCEPTION.
15. ALL TREES WITHIN TURF AREAS SHALL BE INSTALLED WITH TEMPORARY PVC ARBOR GUARDS.
16. ALL TURF AREAS SHALL BE GRADED SMOOTH AND APPROVED BY THE OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO INSTALLING SOD OR SEED. ALL AREAS TO RECEIVE TURF SHALL BE COMPLETELY FREE OF ANY RUTS, TRENCH SETTLING, OR ANY MATERIAL OVER 1/2" IN DIAMETER PRIOR TO SOD OR SEED INSTALLATION.
17. LANDSCAPE CONTRACTOR IS REQUIRED TO OBTAIN ANY REQUIRED PERMITS FOR ALL ON-SITE AND OFF-SITE IMPROVEMENTS OUTLINED WITHIN THIS SET OF PLANS AND/OR ANY OTHER ADDITIONAL WORK THEY MAY PERFORM IN THE INTEREST OF THIS PROJECT.
18. ROCK/BARK MULCH SHALL BE AS SPECIFIED IN THE LANDSCAPE MATERIAL SCHEDULE. ALL PLANTING AREAS, UNLESS OTHERWISE NOTED ON THE PLANS, SHALL RECEIVE A UNIFORM APPLICATION OF THE SPECIFIED MATERIAL. CONTRACTOR SHALL SUBMIT A SAMPLE TO THE OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO SCHEDULING MASS DELIVERY. OWNER MAY REQUEST THAT AN INITIAL LOAD OF MATERIAL BE DELIVERED TO THE SITE AND BE SPREAD BY THE LANDSCAPE CONTRACTOR FOR THE OWNER'S APPROVAL PRIOR TO MATERIAL APPLICATION ON THE REMAINDER OF THE SITE.
19. IT SHALL BE THE RESPONSIBILITY OF THE LANDSCAPE CONTRACTOR TO COORDINATE WITH THE OWNER THE FINAL LAYOUT OF ALL HARDSCAPE ITEMS FOR THIS PROJECT. OWNER MAY REQUEST ALL HARDSCAPE ITEMS (HEADERS, SIDEWALKS, FLATWORK, ETC.) BE STAKED AND/OR CHALKED OUT FOR THEIR APPROVAL PRIOR TO INITIAL POUR.
20. LANDSCAPE CONTRACTOR SHALL PRUNE ALL TREES AFTER INSTALLATION SO THAT NO BRANCH IS TOUCHING FINAL GRADE AND TRIM CANOPIES/BRANCHING TO A CLEAN AND NEAT APPEARANCE. ALL DEAD AND/OR DYING MATERIAL SHALL BE PRUNED FROM THE TREE PRIOR TO FINAL ACCEPTANCE.
21. WATER TEST ALL TREE PLANTING WELLS PRIOR TO PLANTING. IF TREE WELLS DO NOT PROPERLY DRAIN, REFER TO THE HARDPAN PLANTING DETAIL FOR ADDITIONAL INFORMATION.
22. REFER TO GENERAL CONSTRUCTION NOTES ON THE COVER SHEET FOR ADDITIONAL INFORMATION THAT RELATES TO THE SCOPE OF WORK IN THIS SECTION. ALSO REFER TO ANY WRITTEN SPECIFICATION, SHOULD THEY ACCOMPANY THESE DRAWINGS, FOR ADDITIONAL REQUIREMENTS NOT COVERED WITHIN THESE PLANS.

Sandy Soils: (Mainly Westside Areas) Seed rate is given in pounds of pure live seed (PLS) per acre. Mix shall include at least four of the wildflower species listed below at a total application rate of at least 2.0# PLS/AC.

SEED MIX FOR SANDY SOILS	#PLS/AC	NOTES
Hilaria jamesii 'Viva' Galleta	7.0	
Oryzopsis hymenoides 'Paloma' Indian Rice Grass	5.0	
Bouteloua gracilis 'Hachita' Blue Grama	2.0	
Bouteloua curtipendula 'Vaughn' Sideoats Grama	1.0	
Agropyron smithii 'Arriba' Western Wheat	1.0	
Sporobolus cryptandrus Sand Dropseed	1.0	
Sporobolus airoides 'Salado' Alkali Sacaton	1.0	
Artemisia frigida Fringed sagebush	.25	Low Shrub
Sphaeralcea ambigua Desert Globemallow	.25	Perennial wildflower
Sphaeralcea parvifolia Nelson Globemallow	.25	Perennial wildflower
Helianthus annuus	.5	Annual wildflower
Oenothera pallida White Evening Primrose	.25	Perennial wildflower
Baileya multiradiata Desert Marigold	.25	Biennial wildflower
Abronia fragrans or Abronia villosa Sand Verbena	.25	Perennial wildflower
Dalea purpurea var purpurea Purple Prairie Clover	.25	Perennial wildflower
Machaeranthera canescens Hoary transeyaster	.25	Perennial wildflower
Berlandiera lyrata Chocolate Flower	.25	Perennial wildflower
Ratibida columnifera forma pulcherrima Mexican Hat	.25	Perennial wildflower

PLANT SCHEDULE - PHASE 1 & 2

SYMBOL	QTY	BOTANICAL / COMMON NAME	SIZE (INSTALL)	H X W	WATER	COVERAGE
EXISTING TREES						
	8	Existing Tree Remain in Place	Existing			
DECIDUOUS TREES						
	44	Chilopsis linearis Desert Willow	2" + Cal	20` x 20`	Low	(20`) - 350

PLANTING NOTES

L-0.01 SHEET 02 OF 44

IRRIGATION NOTES

1. IRRIGATION CONTRACTOR GUARANTEES 100% COVERAGE IN LANDSCAPE AREAS.

2. IRRIGATION EQUIPMENT TO BE LOCATED IN LANDSCAPE AREAS WITHIN PROPERTY BOUNDARIES OF THE PROJECT - LINES AND EQUIPMENT ARE SCHEMATIC AND ARE SOMETIMES SHOWN IN ROADWAYS, SIDEWALKS, OR OUTSIDE PROPERTY LINES. THIS IS DONE FOR CLARITY PURPOSES ONLY.

3. THE DRAWINGS ARE DIAGRAMMATIC. THEREFORE, THE FOLLOWING SHOULD BE NOTED:

   A. IRRIGATION COMPONENTS MAY BE SHOWN OUTSIDE PLANTING AREAS FOR GRAPHIC CLARITY ONLY. AVOID CONFLICTS BETWEEN THE IRRIGATION SYSTEM, UTILITIES, PLANTING MATERIALS AND ARCHITECTURAL FEATURES. INSTALL IRRIGATION PIPE AND WIRING IN LANDSCAPED AREAS WHENEVER POSSIBLE.
   B. USE ONLY STANDARD TEES AND ELBOW FITTINGS. USE OF CROSS TYPE FITTINGS IS NOT PERMITTED.

4. IRRIGATION SYSTEM HAS BEEN DESIGNED FOR A STATIC WATER PRESSURE OF 60 PSI. THE IRRIGATION SYSTEM DESIGN IS BASED ON A MINIMUM OPERATING PRESSURE OF 45 PSI AND A MAXIMUM FLOW DEMAND OF 24 GPM WITH A BOOSTER PUMP PROVIDING A BOOST PRESSURE OF 20 PSI FOR A TOTAL PRESSURE RATING OF 80 PSI. THE CONTRACTOR SHALL VERIFY WATER PRESSURES PRIOR TO CONSTRUCTION AND REPORT ANY DISCREPANCIES BETWEEN THE WATER PRESSURE INDICATED ON THE DRAWINGS AND THE ACTUAL PRESSURE READING AT THE IRRIGATION POINT OF CONNECTION TO THE LANDSCAPE ARCHITECT IMMEDIATELY.

5. MATERIAL USED SHALL BE INSTALLED AS DETAILED. IRRIGATION EQUIPMENT NOT OTHERWISE DETAILED OR SPECIFIED SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS. OWNER'S REPRESENTATIVE AND/OR LANDSCAPE ARCHITECT SHALL APPROVE ANY DEVIATION FROM DRAWINGS OR MATERIALS USED.

6. THE OWNER'S REPRESENTATIVE MAY, AT ANY TIME, TAKE AND ANALYZE SAMPLES OF MATERIALS AND EQUIPMENT FOR CONFORMITY TO SPECIFICATIONS. THE CONTRACTOR SHALL MAKE SUCH SAMPLES AVAILABLE UPON REQUEST. REJECTED MATERIAL SHALL BE IMMEDIATELY REMOVED FROM THE SITE AND REPLACED AT THE CONTRACTOR'S EXPENSE.

7. INSTALL BACKFLOW PREVENTION UNIT(BPU)(S) PIPING BETWEEN THE POINT OF CONNECTION AND THE BPU PER LOCAL CODES. THE OWNER'S AUTHORIZED REPRESENTATIVE SHALL APPROVE THE FINAL LOCATION OF THE BPU. BACKFLOW PREVENTOR SHALL BE SCREENED FROM VIEW.

8. CONTRACTOR SHALL BE RESPONSIBLE FOR SUPPLYING MATERIALS AND LABOR TO PROVIDE SPECIFIED ELECTRICAL SERVICE TO CONTROLLER LOCATIONS. ELECTRICAL WORK TO BE PER MANUFACTURER'S SPECIFICATIONS AND PER LOCAL CODE.

9. 24 VOLT WIRE SHALL BE 600V, UF, UL APPROVED, #14 GAUGE, SINGLE STRAND, PLASTIC INSULATED, COPPER WIRE. COMMON WIRE IS TO BE WHITE, CONTROL WIRE IS TO BE RED (USE NO BLACK WIRE). TAPE AND BUNDLE WIRE EVERY TEN (10) FEET. DURING INSTALLATION WIRES SHALL HAVE A 24" LOOP TIED AT ALL DIRECTION CHANGES GREATER THAN 30 DEGREES & BE UNTIED PRIOR TO TRENCH FILL IN. LAY BESIDE MAINLINE. SPLICE IN VALVE BOXES ONLY, USING MANUFACTURED EPOXY OR RESIN FILLED WIRE CONNECTORS. PROVIDE 34" SLACK AT EACH ELBOW IN MAIN LINE AND AT EACH REMOTE CONTROL VALVE. IF SYSTEM IS NOT A TWO-WIRE CONTROL SYSTEM, PULL ONE ADDITIONAL SPARE WIRE TO THE MOST DISTANT VALVE LOCATION FOR POTENTIAL FUTURE USE. COLOR OF EXTRA WIRE SHALL BE YELLOW. IF IRRIGATION SPECIFICATIONS DIFFER FROM THIS PARAGRAPH, FOLLOW THE IRRIGATION SPECIFICATIONS.

10. LEVEL OF PEA GRAVEL IN IRRIGATION BOXES SHALL BE A MINIMUM OF 4" BELOW THE BOTTOM OF THE VALVE SO THAT THE VALVE IS COMPLETELY VISIBLE. PEA GRAVEL IN VALVE BOX TO BE CLEANED FROM TOP OF VALVE SO THAT VALVE IS COMPLETELY VISIBLE. LIP OF VALVE BOX IS ALSO TO BE FREE OF DEBRIS. REFERENCE IRRIGATION DETAILS.

11. LOCATE PRESSURE REGULATOR AND 'Y' STRAINER IN A VALVE BOX AS REQUIRED. REMOTE CONTROL VALVE TO BE LOCATED IN A SEPARATE (ADJACENT) VALVE BOX, OR A JUMBO VALVE BOX MAY BE USED IN LIEU OF TWO SEPARATE BOXES.

12. DRIP SYSTEMS TO BE FLUSHED THROUGH FLUSH CAPS. FLUSH CAPS TO BE LOCATED IN 6" ROUND ECONOMY BOXES AND PLACED AT THE END OF LATERALS RUNS.

13. THE CONTRACTOR SHALL PROVIDE CHECK VALVES AND AIR VACUUM RELIEF VALVES AS REQUIRED, OR AT THE DISCRETION OF THE LANDSCAPE ARCHITECT, TO EACH CIRCUIT THROUGHOUT THE IRRIGATION SYSTEM LOCATED WITHIN SLOPED AREAS TO PREVENT LOW IRRIGATION HEAD DRAINAGE.

14. PIPE SIZES SHALL CONFORM TO THE PIPE SIZING SCHEDULE ON DETAIL SHEET. NO SUBSTITUTIONS OF SMALLER PIPE SIZES SHALL BE PERMITTED BUT SUBSTITUTIONS OF LARGER SIZES MAY BE APPROVED BY THE LANDSCAPE ARCHITECT.

15. PIPE SHALL BE BEDDED ON ALL SIDES WITH FOUR INCHES OF ROCK FREE (3/8" MINUS) MATERIAL. IMPORT SAND IF NECESSARY. BACKFILL IN TWO OR MORE COMPACTED LIFTS. SETTLING OF TRENCHES BY MORE THAN AN INCH SHALL BE BROUGHT TO FINISH GRADE AT THE CONTRACTOR'S EXPENSE.

16. IRRIGATION LINES ON SLOPES OR WITHIN RETENTION BASINS SHALL BE RUN PARALLEL WITH GRADE AND ARE TO MAINTAIN THE HIGHEST ELEVATIONS POSSIBLE.

17. MULTI-OUTLET EMITTERS SHALL SERVICE ALL TREES AND SHRUBS <5' O.C. AND SINGLE POINT-SOURCE EMITTERS SHALL SERVICE ALL SHRUBS AND/OR GROUNDCOVERS >5' O.C.

18. PLANTS THAT REQUIRE MORE THAN ONE DRIP EMITTER SHALL HAVE EMITTERS DISTRIBUTED EVENLY AROUND PERIMETER OF PLANTING WELL. EMISSION POINTS AT ROOTBALLS SHALL BE LOCATED ON THE UPHILL SIDE, MIDWAY BETWEEN THE CENTER OF THE PLANT AND THE EDGE OF THE ROOTBALL.

19. LANDSCAPE CONTRACTOR IS RESPONSIBLE FOR LANDSCAPE SLEEVING REQUIRED TO COMPLETE THE PROJECT, WHETHER SHOWN OR NOT. COORDINATE INSTALLATION WITH THE GENERAL CONTRACTOR. VERIFY ANY EXISTING SLEEVES INSTALLED BY OTHER CONTRACTORS.

20. IRRIGATION AND ELECTRICAL SLEEVES TO BE SCHEDULE 40 PVC AND ALL SLEEVES SHALL CONFORM TO THE IRRIGATION SCHEDULE. ALL SLEEVING INSTALLED UNDER NEW STREETS SHALL BE DONE WITH SCHEDULE 80 PVC SLEEVING CONDUIT. INSTALL ONE 2" SLEEVE AT ALL MAINLINE SLEEVE LOCATIONS FOR ELECTRICAL WIRE. SLEEVES SHALL BE TWICE THE DIAMETER OF THE PIPE BEING SLEEVED AND EXTEND AT LEAST 24" BEYOND CONCRETE OR ANY OTHER STRUCTURES. MARK SLEEVE ENDS AT GRADE UPON INSTALLATION FOR VERIFICATION OF LOCATION AND DEPTH. ALLOW AT LEAST 4" - 6" FROM END OF SLEEVES TO FIRST FITTING ON IRRIGATION LINE. SLEEVES TO BE 24" BELOW GRADE AND/OR PER OWNER'S SPECIFICATIONS. SLEEVES UNDER PARKING LOTS, STREETS, STAGING AREAS, AND PATIOS TO BE INSTALLED BY PAVING CONTRACTOR PRIOR TO PAVING. SEE IRRIGATION SPECIFICATIONS FOR PIPE AND FITTING MATERIAL TYPE.

21. NOTIFY THE OWNER'S REPRESENTATIVE 48 HOURS PRIOR TO THE FOLLOWING REQUIRED STAGES OF OBSERVATION FOR:
   MAINLINE: INSTALLATION, DEPTH, VALVES, WIRE, LINE PRESSURE TEST
   EMITTER LATERALS: INSTALLATION, DEPTH, VALVES, EMITTERS, OUTLET TUBING, AT LINE PRESSURE
   CONTROLLER: INSTALLATION, FUNCTIONING

22. PRIOR TO OWNER'S APPROVAL, AN IRRIGATION "TUNE UP" MUST BE PERFORMED AS FOLLOWS:
   A. IRRIGATION EQUIPMENT (INCLUDING PIPELINES AND SLEEVES) TO BE DOCUMENTED FROM TWO STATIONARY POINTS.
   B. DRIP SYSTEMS TO BE FLUSHED BEGINNING WITH "Y" STRAINER, WORKING AWAY FROM THE PRESSURE REGULATOR.

IRRIGATION NOTES - CONTINUED

   C. IRRIGATION SPRINKLER HEADS TO BE FLUSHED OF DEBRIS AND FLOW CONTROLS ADJUSTED TO ACHIEVE MAXIMUM COVERAGE FOR TURF AREAS. AVOID OVER SPRAY ON STREETS, CURBS, SIDEWALKS, WALLS, AND STRUCTURES.
   D. IRRIGATION HEADS SHALL BE ADJUSTED TO PROPER HEIGHT.
   E. IRRIGATION VALVES TO BE LABELED ON A SHEET OF PAPER WITH STATIONS CORRESPONDING TO ETCHED LABELS ON TOP OF VALVE BOXES. THIS SHEET TO BE PLACED IN A PLASTIC POUCH AND ATTACHED TO INSIDE OF CONTROLLER.

23. SET BACK SPRAY AND STREAM TYPE IRRIGATION HEADS FROM BACKS OF CURBS OR SIDEWALKS AS PER IRRIGATION DETAILS TO REDUCE OVER SPRAY OR PROVIDE DESIGN ALTERNATIVES TO ACHIEVE SIMILAR RESULTS TO BE APPROVED BY LANDSCAPE ARCHITECT.

24. LOCATE VALVE BOXES IN PLANTING AREAS SO THAT THEY ARE SCREENED FROM VIEW. IRRIGATION BOXES SHALL BE TAN. NO VALVE BOXES TO BE INSTALLED IN TURF.

25. MAINLINES AND IRRIGATION EQUIPMENT SHALL BE PLACED OUTSIDE THE RIGHT-OF-WAY AND PUBLIC UTILITY EASEMENTS.

26. PRIOR TO PLACING ANY IRRIGATION SYSTEMS IN SERVICE, AN ARIZONA CERTIFIED BACKFLOW DEVICE TESTER SHALL TEST THE BACKFLOW PREVENTION DEVICE AND GIVE A COPY OF THE PASSED TEST RESULTS TO THE CITY INSPECTOR OR MAIL IT TO THE CITY DEPARTMENT OF PUBLIC WORKS INSPECTION SECTION.

27. AFTER INITIAL TESTING EACH BACKFLOW DEVICES SHALL BE TESTED AND PASSED ANNUALLY IN ACCORDANCE WITH LOCAL UTILITY REQUIREMENTS.

28. BACKFLOW PREVENTION DEVICES SHALL BE PLACED A MINIMUM OF TWO (2') FEET FROM THE WATER METER / POINT OF CONNECTION AND BE THE SAME SIZE AS THE METER / POINT OF CONNECTION SERVICE LINE.

29. BACKFLOW PREVENTION DEVICES SHALL HAVE A MINIMUM 24"X36"X4" CLASS B CONCRETE SLAB WITH PIPE SLEEVES. IF A SECURITY CAGE IS INSTALLED CONCRETE SHALL BE SIX (6") INCHES LARGER ON ALL SIDES THAN THE SECURITY CAGE.

30. PIPE CROSSINGS IN THE RIGHT-OF-WAY SHALL BE MARKED ON EACH SIDE OF THE CURB WITH A NON-DESTRUCTIBLE MARKING.

31. INSTALL GATE VALVES FOR FULL FLOW.

IRRIGATION KEY NOTES:

- IRRIGATION CONTRACTOR TO REVIEW ACTUAL SITE CONDITIONS PRIOR TO INSTALLING IRRIGATION OR ORDERING MATERIALS. SOME ADJUSTMENTS IN EQUIPMENT LOCATIONS MAY BE REQUIRED TO MATCH ACTUAL CURRENT CONDITIONS. REVIEW ANY CHANGES WITH OWNERS REPRESENTATIVE. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS..
- THE IRRIGATION SYSTEM HAS BEEN DESIGNED FOR A STATIC WATER PRESSURE OF 60 PSI. AT THE POINTS OF CONNECTION. CONTRACTOR TO CHECK WATER PRESSURE PRIOR TO STARTING CONSTRUCTION AND NOTIFY OWNER'S REPRESENTATIVE IF NOT MIN. 60 PSI.
- ALL MAINLINE FITTINGS OVER 3" SHALL BE IRON GASKETED WITH JOINT RESTRAINT HARNESSES.
- REFER TO EMITTER SCHEDULE FOR TREE, SHRUB GPH. & NUMBER OF EMITTERS. USE MULT-PORT EMITTERS ON SHRUBS WHEN SPACING ALLOWS.
- EQUIPMENT SUBMITTAL FOR APPROVAL PRIOR TO ORDERING MATERIALS.
- IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
- SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
- INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
- USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
- TREES IN TURF HAVE (1) MULTI-PORT EMITTER W/ SIX OUTLETS.
- INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
- INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
- INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
- PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (>3") UNDER ASPHALT PAVING.
- RUN 2 WIRE LOOPS FROM EACH CONTROLLER BACK TO BOOSTER PUMP, HYDROMETER/MASTER VALVE, AND FLOW SENSOR ON EACH MAIN AND SUB-MAIN LOOP AS REQUIRED PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR RESPONSIBLE FOR INSURING MASTER VALVES, FLOW SENSORS, CONTROLLERS, AND PUMP STATION ARE ALL CONNECTED AND OPERATIONAL PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS.
- ALL IRRIGATION EQUIPMENT TO BE INSTALLED IN COMMON AREA LANDSCAPE PLANTER AREAS, NOT IN PRIVATE YARDS, REGARDLESS OF WHAT IS SHOWN ON PLANS. IRRIGATION PLANS ARE SCHEMATIC AND NATURE AND DUE TO SCALE, EQUIPMENT IS SOMETIMES SHOWN IN AREAS THAT ARE NOT COMMON AREA LANDSCAPE PLANTERS. NO VALVES TO BE INSTALLED IN TURF.

RAIN BIRD TWO-WIRE NOTES:

1. ALL VALVES ARE TO BE INSTALLED WITH RAINBIRD DECODERS, 1, 2, OR 4 STATION.

2. TWO-WIRE SHALL BE RAINBIRD MAXI-WIRE BASED ON MAXIMUM DISTANCE TO DECODER.
   - 14 AWG WIRE PATH: 34,900'
   - 12 AWG WIRE PATH: 55,000'

3. INSTALL RAINBIRD SURGE ARRESTORS. PROVIDE GROUNDING OF THE TWO-WIRE PATH EVERY 8 DECODERS OR 500' OF WIRE RUN, WHICHEVER IS SHORTER, USING LSP-1 LINE SURGE DECODERS. THE LAST DECODER ON A RUN SHALL BE GROUNDED WITH 8' GROUNDING ROD. REFER TO DETAILS AND RAINBIRD SPECIFICATIONS.
4. TO COMPLY WITH PROPER INSTALLATION SPECIFICATIONS, THE FOLLOWING COMPONENTS SHOULD BE GROUNDED:
   - ESP-LX DECODER CONTROLLER
   - ESPLXD-SM75 DECODER CONTROLLER MODULE (IF NEEDED)
   - LSP-1 LIGHTNING SURGE PROTECTOR
   - SD-210 SENSOR DECODER
   - FD-401 FIELD DECODER
   - FD-601 FIELD DECODER
   - NOTE: EACH INSTALLED GROUNDING SYSTEM SHALL MAINTAIN A MAXIMUM GROUND RESISTANCE OF 10 OHMS OR LESS.

5. RAINBIRD FD-SERIES AND LSP-1 DECODER WIRE SPLICES SHALL BE 3M DBR/Y SPLICE KITS FOR ALL WIRE CONNECTIONS.

6. FOR SECONDARY WIRE RUN, THE DISTANCE BETWEEN THE FIELD DECODER AND THE SOLENOID (VALVE) CAN NOT EXCEED 450' USING 14 GAUGE WIRE.

7. USE GREY FIELD DECODERS FOR ALL SOLENOIDS AND GREEN (SD-210) SENSOR DECODERS FOR FLOW AND WEATHER SENSORS.

IRRIGATION SCHEDULE OVERALL

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION	PSI
10 ADJ 18FT	Rain Bird R-VAN18 1804-SAM-P45 Turf Rotary, 13ft.-18ft. 45-270 degrees and 360 degrees. Hand Adjustable Multi-Stream Rotary w/1800 turf spray body on 4in. pop-up, with check valve and 45 psi in-stem pressure regulator. 1/2in. NPT Female Threaded Inlet.	45
24 ADJ 24FT	Rain Bird R-VAN24 1804-SAM-P45 Turf Rotary, 17ft.-24ft. 45-270 degrees and 360 degrees. Hand Adjustable Multi-Stream Rotary w/1800 turf spray body on 4in. pop-up, with check valve and 45 psi in-stem pressure regulator. 1/2in. NPT Female Threaded Inlet.	45

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Rain Bird Drip Control Valve 1in. Ball Valve with 1in. PESBIVM Smart Valve. Add QKCHK-100 1" Basket Filter with 200 mesh stainless steel screen. 0.3-20 gpm
	Pipe Transition Point in Drip Box PVC to Drip Connection Assembly. Senninger #PSR-30 Pressure Regulator (3/4" FIPT) With Associated Drip Connection Fittings. Installed in tan 10" Round Valve Box.
	Flush Cap 3/4" Male PVC SCH 40 S/T Adapter And 3/4" Female Threaded Cap
5 7 10 12 18 24	Rain Bird PC-DIFF Emitter Single Outlet, Pressure Compensating Drip Emitters with Self-Piercing Barb Inlet and Diffuser Cap. Flow rate: 5 GPH=light brown; 7 GPH=violet; 10 GPH=green; 12 GPH=dark brown; 18 GPH=white; 24 GPH=orange.
0.5 1.0 2.0	Rain Bird Xeri-Bug Emitter Rain Bird XB-PC, Single Outlet, Pressure Compensating Drip Emitters. Flow rates of 0.5 GPH=blue, 1.0 GPH=black, and 2.0 GPH=red. Comes with a self-piercing barb inlet x barb outlet.

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Remote Control Valve Rain Bird PEB-IVM: Plastic Industrial Smart Valves w/ Factory Installed IVM-SOL. Low Flow Operating Capability, Globe Configuration.
	Quick Coupler Rain Bird 44-LRC: 1in. Brass Quick-Coupling Valve, with Corrosion-Resistant Stainless Steel Spring, Locking Thermoplastic Rubber Cover, and 2-Piece Body.

	Isolation Gate Valve (Same Size as Pipe) Nibco T-113-K: Class 125 bronze gate shut off valve with cross handle, same size as mainline pipe diameter at valve location. Size Range - 1/4in. - 3in.
MV	Master Valve 2" Rain Bird PEB-IVM: 1in., 1-1/2in., 2in. Plastic Industrial Smart Valves w/ Factory Installed IVM-SOL. Low Flow Operating Capability, Globe Configuration.
	1" Air and Vacuum Valve 1" Crispin AL Series Air and Vacuum Valve. Model #: CR-AL-10
BF	Backflow Preventer 2" Febco 825Y: Reduced Pressure Backflow Preventer
A	Pedestal Mount Controller Rain Bird ESPLXIVM-LXMMSS-LXMMSSPED: 60 Station, 2-Wire Controller w/ Smart Valve Technology. (1) ESPLXIVM 60-Station, Indoor/Outdoor, Plastic Wall-Mount Enclosure. Installed in LXMMSS-LXMMSSPED Stainless Steel Cabinet w/ Pedestal. System Requirements: Rain Bird LXIVM Integrated Valve Modules & 2-Wire Devices. Use Paige Electric Cable P7072D & Rain Bird WC20 Dry Splices ONLY. Ground System w/ LXIVMSD Surge Device in Rain Bird Round Valve Boxes. Install Per Manufacturers Recommendations.
FS	Flow Sensor Creative Sensor Technology FSI-T10-001: 1in. PVC tee type flow sensor w/socket ends, custom mounting tee and ultra-lightweight impeller enhances low flow measurement. 2 wire digital output compatible w/all irrigation controllers. Flow range: .86 GPM - 52 GPM.
BP	Booster Pump Rain Bird CLP Series: Booster Pump Pressure Increase of 20 PSI. Maximum Flow Rate of 24 GPM.
M	Water Meter 2"
⊥	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
S	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
	Irrigation Lateral Line: Toro-Blue Stripe Poly Hose Blue Stripe Drip Tubing to Trees & Shrubs. 0.75" Polyethylene Drip Tubing with 1/4" Poly DistributionTtubing - Install Rain Bird Pressure Compensating Drip Emitters.
ML	Irrigation Mainline: PVC Schedule 40 1" - 3" Diameter
	Pipe Sleeve: See Details for Pipe Sizing & Sleeve Schedule. Twice the nominal diameter of the pipe being sleeved.

Bungalows at Cerrillos - Water Budget Calculations (Phase 1 & 2):

Year 1 Water Budget Calculations

Landscape Water Demand Calculations	Quantity	Unit:	Weekly Demand in Gallons (ea)	Weekly Demand in Gallons (Total)	Monthly Demand in Gallons
Perennials	523	ea	1.25	653.75	2,615.00
Shrubs	1709	ea	2.50	4,272.50	17,090.00
Native Grasses	591	ea	1.25	738.75	2,955.00
Native Grass/Turf	3522	SF	0.50	1,761.00	7,044.00
Trees - Deciduous	198	ea	45.00	8,910.00	35,640.00
Trees - Evergreen	109	ea	30.00	3,270.00	13,080.00
Total Monthly Demand (Gallons):					78,424.00
Total Yearly Demand (Gallons):					627,392.00
Total Acre-Feet/Yr:					1.93

Demand Assumptions / Eight (8) month irrigation period
Perennials: .5 gal / hr per perennial run 1/2 hour five times a week = 1.25 gal / week
Shrubs: 1 gal / hr per shrub run 1/2 hour five times a week = 2.5 gal / week
Native Grasses: .5 gal / hr per plant run 1/2 hour five times a week - 1.25 gal / week
Native Grass / Turf: .5 gal / SF per week
Trees - Deciduous: 15 gal / hour per tree run 1.5 hours twice a week = 45 gal per week
Trees - Evergreen: 15 gal / hour per tree run 1 hour twice a week = 30 gal per week

Year 3 Water Budget Calculations

Landscape Water Demand Calculations	Quantity	Unit:	Weekly Demand in Gallons (ea)	Weekly Demand in Gallons (Total)	Monthly Demand in Gallons
Perennials	471	ea	0.63	296.73	1,186.92
Shrubs	1709	ea	1.25	2,136.25	8,545.00
Native Grasses	591	ea	0.63	372.33	1,489.32
Native Grass/Turf	3522	SF	0.00	0.00	0.00
Trees - Deciduous	198	ea	35.00	6,930.00	27,720.00
Trees - Evergreen	109	ea	20.00	2,180.00	8,720.00
Total Monthly Demand (Gallons):					47,661.24
Total Yearly Demand (Gallons):					381,289.92
Total Acre-Feet/Yr:					1.17

Demand Assumptions / Eight (8) month irrigation period
Perennials: .5 gal / hr per perennial run 25 minutes three times a week = .63 gal / week
Shrubs: 1 gal / hr per shrub run 25 minutes three times a week = 1.25 gal / week
Native Grasses: .5 gal / hr per plant run 25 minutes three times a week - .63 gal / week
Native Grass / Turf: 0 gal / SF per week
Trees - Deciduous: 15 gal / hour per tree run 70 minutes twice a week = 35 gal per week
Trees - Evergreen: 15 gal / hour per tree run 40 minutes twice a week = 20 gal per week

IRRIGATION NOTES

L-0.02 SHEET 3 OF 44

© Copyright, Coleman Design Group, PLLC. — This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

WALL NOTES

1. THESE NOTES ARE GENERAL AND MAY BE SUPERSEDED BY EITHER THE SPECIFICATIONS OR LOCAL TRADE PRACTICES.
2. FOOTINGS SHALL BEAR ON UNDISTURBED NATIVE SOIL OR COMPACTED FILL.
3. THE EXPOSED UPPERMOST SOIL TO RECEIVE FILL SHALL BE SCARIFIED 6" DEEP, MOISTURE CONDITIONED TO ±3% OF OPTIMUM DENSITY CURVE FOR EACH TYPE OF SOIL ENCOUNTERED AND COMPACTED TO 95% OF MAXIMUM DRY DENSITY PER ASTM D-2922 OR D-3017.
4. FILL MATERIAL SHALL BE PREDOMINANTLY GRANULAR, NON-EXPANSIVE, CLEAN OF ALL ORGANIC OR DETRITUS SUBSTANCES, AND HAVE A PLASTICITY INDEX LESS THAN SEVEN (7). BACKFILL SHALL BE COMPACTED TO 95% OF MAXIMUM DENSITY IN HORIZONTAL 8" LIFTS.
5. EXCAVATIONS FOR FOUNDATIONS SHALL BE NEAT TO LINES OF FOOTINGS. ALL LOOSE MATERIAL SHALL BE REMOVED FROM SURFACE TO RECEIVE CONCRETE.
6. ALLOWABLE SOIL BEARING PRESSURES AT FOOTING ON COMPACTED SOIL: 1500 PSI.
7. CONCRETE MIX DESIGN FOR FOOTINGS SHALL BE MAG CLASS 'B' (2500 PSI), UNLESS OTHERWISE NOTED ON DRAWINGS.
8. NO PIPES OR DUCTS SHALL BE PLACED IN STRUCTURAL CONCRETE UNLESS SPECIFICALLY DETAILED.
9. CONCRETE FOOTINGS SHALL BE CONTINUOUS POUR TO GREATEST EXTENT PRACTICAL. STEP FOOTINGS IN EVEN BLOCK INCREMENTS.
10. WALL CONTRACTOR TO BE RESPONSIBLE FOR STRUCTURAL CALCULATIONS OF THE WALLS.
11. SUBMIT TEST REPORTS FOR CONCRETE MIX DESIGNS TO LANDSCAPE ARCHITECT FOR REVIEW.
12. WATERPROOF AND GROUT SOLID RETAINING WALLS TO HIGH GRADE, IF APPLICABLE.
13. ALL IRON/STEEL WORK TO BE OF HIGHEST QUALITY WITH WELDS GROUND SMOOTH. ALL IRON WORK, EXCEPT WHERE NOTED, TO BE PRIMED AND PAINTED. PAINT COLOR TO BE SELECTED BY OWNER AND/OR LANDSCAPE ARCHITECT.
14. VERIFY HEIGHTS AND SLOPES AND TURNDOWNS BEFORE POURING FOOTINGS.
15. NEW WALL FINISHES SHALL MATCH EXISTING SURFACES, UNLESS OTHERWISE NOTED ON DRAWINGS.
16. GROUT SOLID ALL CMU CELLS AND VOIDS BELOW GRADE AND/OR CONTAINING REBAR.

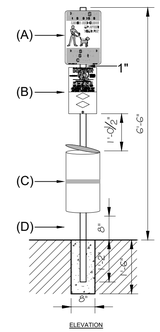
INCLUDES:
-ALUMINUM DOGIPOT PET SIGN, WITH MOUNTING HARDWARE
-ALUMINUM DOGIPOT JUNIOR BAG DISPENSER (ITEM #1002-2), WITH MOUNTING HARDWARE
-TWO KEYS FOR DISPENSER LOCKING FRONT ACCESS PANEL
-TWO ROLLS OF DOGIPOT LITTER PICK UP BAGS (ITEM #1402), INSTALLED IN DOGIPOT JUNIOR BAG DISPENSER
-10 GALLON ALUMINUM TRASH RECEPTACLE (ITEM #1206A-L) WITH ATTACHED HINGED LID AND TRASH LINER BAG RETAINER BANDS, WITH MOUNTING HARDWARE
-ONE DOGIPOT LINER TRASH BAGS (ITEM #1404)
-2" X 2" X 4'-8" GALVANIZED STEEL TELESCOPIC MOUNTING POST, WITH INSTALLATION HARDWARE

(A) DOGIPOT PET SIGN (ITEM #1203 / 1204):
-H: 18" X W: 11.5"
-14 GAUGE REFLECTIVE ALUMINUM
-WEIGHT: 1.35 LBS
-FOREST GREEN ON WHITE



(B) DOGIPOT JUNIOR BAG DISPENSER (ITEM #1002-2):
-H: 15.5" X W: 9.4" X D: 3.25"
-12 GAUGE POWDER COATED FOREST GREEN ALUMINUM
-WEIGHT: 7 LBS
-400 BAG CAPACITY
-TWO DIAMOND BAG DISPENSER SLOTS
-FRONT LOCKING ACCESS PANEL
-CLEARLY POSTED INSTRUCTIONS

(C) TRASH RECEPTACLE WITH LID (ITEM #1206A-L):
-H: 23" X 11.5" DIAMETER
-11 GAUGE POWDER COATED FOREST GREEN ALUMINUM
-WEIGHT: 9 LBS.
-10 GALLON CAPACITY WITH INTERIOR TRASH LINER BAG RETAINER BANDS
-ATTACHED ALUMINUM HINGED LID
-ONE BOX 50 COUNT DOGIPOT LINER TRASH BAGS (ITEM #1404)

(D) TELESCOPIC GALVANIZED STEEL MOUNTING POST (ITEM #1301-P):
-2" X 2" X 4'
-11 GAUGE GALVANIZED STEEL
-WEIGHT: 15 LBS.

HOLE:
-D: 18" X W: 8"
-FILL WITH 40 LBS. "READY TO USE: CEMENT

NOTES:
1. INSTALLATION TO BE COMPLETED IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.

AMERICANA - NAVAJO SHELTER GENERAL NOTES

1. SHELTER DESIGN - THIS SHELTER HAS BEEN DESIGNED AS AN OPEN STRUCTURE, THE ADDITION OF ANY ENCLOSURE SHALL BE PROHIBITED AS INCREASED WIND FORCES MAY RESULT.

2. FOUNDATION
   A. THE FOUNDATION SHALL REST ON SOUND SOIL THAT IS FREE OF ORGANIC AND DELTERIOUS MATERIALS AND CAPABLE OF SUPPORTING 1000 PSF VERTICAL BEARING PRESSURE.
   B. FOUNDATION DESIGN SHOWN IS A RECOMMENDATION ONLY. OWNER SHALL VERIFY ACTUAL SOIL CONDITIONS AT THE JOB SITE AND REQUIRED ADJUSTMENTS TO THE FOOTING DESIGN SHALL BE DESIGNED BY OTHERS.

3. CONCRETE
   A. COMPRESSION STRENGTH OF ALL REINFORCED CONCRETE SHALL NOT BE LESS THAN 2500 PSI AT 28 DAYS.
   B. REINFORCEMENT BARS SHALL BE DEFORMED BARS CONFORMING TO THE REQUIREMENTS OF MINIMUM ASTM A615 GRADE 40 FOR #4 AND SMALLER BARS AND GRADE 60 FOR BARS LARGER THAN #4.
   C. MINIMUM CONCRETE CLEAR COVER FOR REINFORCING BARS SHALL BE 3".

4. STRUCTURAL STEEL
   A. STEEL PLATE SHALL CONFORM TO THE REQUIREMENTS OF ASTM A36.
   B. HOLLOW STRUCTURAL SECTIONS (HSS) SHALL CONFORM TO THE REQUIREMENTS OF ASTM A500, GRADE B.
   C. WELDING SHALL CONFORM TO THE REQUIREMENTS OF THE AMERICAN WELDING SOCIETY'S SPECIFICATION FOR THE MATERIAL BEING WELDED.
   D. WELDING ELECTRODES SHALL BE E70XX.
   E. STRUCTURAL STEEL COMPONENTS SHALL BE COATED WITH ANTI-GRAFFITI POLYESTER TGIC POWDER COAT FINISH MEETING AAMA 2604-02 SPECIFICATION.

5. ALUMINUM
   A. EXTRUDED ALUMINUM RIDGE CAP SHALL BE FABRICATED FROM ALUMINUM ALLOY 6105-T5.
   B. EXTRUDED ALUMINUM GUTTER FASCIA AN FASCIA TRIM SHALL BE FABRICATED FROM ALLOY 6061-T6 OR 6105-T6.
   C. ALUMINUM COMPONENTS SHALL BE COATED WITH ANTI-GRAFFITI POLYESTER POWDER COAT FINISH MEETING AAMA 2604-02 SPECIFICATION.

6. ROOF DECK
   A. INTERLOCKING SEAL ALUMINUM ROOF DECK SHALL BE ROLL FORMED FROM ALUMINUM ALLOY 3004-H34.
   B. ROOF DECK SHALL BE COATED WITH HEAT REFLECTIVE BASF ULTRA-COOL COATING OR APPROVED EQUAL.

7. FASTENERS
   A. HIGH STRENGTH BOLTS SHALL CONFORM TO ASTM A325 OR A307.
   B. SCREWS ATTACJOMG TP STEE; SJA;; BE 12-24 HEX WASHER HEAD #5 POINT SELF DRILLING SCREWS.
   C. SCREWS ATTACHING TO ALUMINUM SHALL BE 8-18 HEX WASHER HEAD #2 POINT SELF DRILLING SCREWS.
   D. HIGH STRENGTH BOLTS SHALL BE HOT DIP GALVANIZED. ALL SCREWS SHALL BE STAINLESS STEEL OR COATED WITH ZINC.

5 General Shelter Notes

ADDITIONAL NOTES:

12'x12' Navajo Shelter to be provided by:
Americana Building Products
#2 Industrial Drive Salem, IL 62881
(888) 442-2928 - www.americana.com

Column Block - 2"x4" wood frame, w/backerboard & stone veneer to surround metal post.
Concrete Footing - Footing to be coordinated and constructed per shelter fabricator's or owner's representative's structural engineer. Footing and connections to post shown for graphic illustration only.

Welds - All welds to be sized per structural engineer, grind smooth.

5" thick concrete pad, with medium broom finish.

95% compacted subgrade or per soils report.

* Measurements and steel reinforcement to be specified by structural engineer.

Note: All material dimensions shown are for aesthetic value and purposes only. Shelter manufacturer's structural engineer to determine all final material dimensions, connections, construction methods and materials to be used to construct the shelter shown with these documents.

6 Additional Notes

Joist Color:	Sherwin Williams (SW0000) XXX
Beam Color:	Sherwin Williams (SW0000) XXX
Post Color:	Sherwin Williams (SW0000) XXX
Roof Color:	Sherwin Williams (SW0000) XXX

7 Material Finishing Schedule

NOTE: Contractor to provide shop drawings of all structural elements of each column and wall, including footings, rebar, cell grouting, clean-outs, etc. Contractor shall obtain all permits.

FOR REFERENCE ONLY: Must be Submitted to Building Safety for Review, Permit, and Inspection (Retaining Walls, Ramadas, Landscape Amenities, Electrical, Structural, Perimeter Walls, any wall over 6 feet tall)

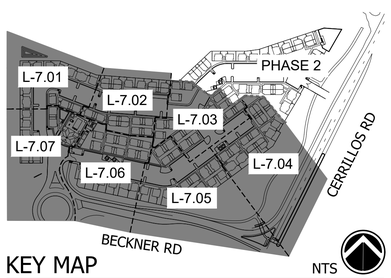
TREE REMOVAL PLAN



L-6.00 SHEET 29 OF 44

© Copyright, Coleman Design Group, PLLC. – This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

IRRIGATION KEY NOTES:

- IRRIGATION CONTRACTOR TO REVIEW ACTUAL SITE CONDITIONS PRIOR TO INSTALLING IRRIGATION OR ORDERING MATERIALS. SOME ADJUSTMENTS IN EQUIPMENT LOCATIONS MAY BE REQUIRED TO MATCH ACTUAL CURRENT CONDITIONS. REVIEW ANY CHANGES WITH OWNERS REPRESENTATIVE. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS..
- THE IRRIGATION SYSTEM HAS BEEN DESIGNED FOR A STATIC WATER PRESSURE OF 60 PSI. AT THE POINTS OF CONNECTION. CONTRACTOR TO CHECK WATER PRESSURE PRIOR TO STARTING CONSTRUCTION AND NOTIFY OWNER'S REPRESENTATIVE IF NOT MIN. 60 PSI.
- ALL MAINLINE FITTINGS OVER 3" SHALL BE IRON GASKETED WITH JOINT RESTRAINT HARNESSES.
- REFER TO EMITTER SCHEDULE FOR TREE, SHRUB GPH. & NUMBER OF EMITTERS. USE MULT-PORT EMITTERS ON SHRUBS WHEN SPACING ALLOWS.
- EQUIPMENT SUBMITTAL FOR APPROVAL PRIOR TO ORDERING MATERIALS.

KEY MAP NTS

- IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
- SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
- INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
- USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
- TREES IN TURF HAVE (1) MULTI-PORT EMITTER W/ SIX OUTLETS.
- INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
- INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
- INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
- PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (3"+) UNDER DRIVABLE SURFACES.
- RUN 2 WIRE LOOPS FROM EACH CONTROLLER BACK TO BOOSTER PUMP, HYDROMETER/MASTER VALVE, AND FLOW SENSOR ON EACH MAIN AND SUB-MAIN LOOP AS REQUIRED PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR RESPONSIBLE FOR INSURING MASTER VALVES, FLOW SENSORS, CONTROLLERS, AND PUMP STATION ARE ALL CONNECTED AND OPERATIONAL PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS.
- ALL IRRIGATION EQUIPMENT TO BE INSTALLED IN COMMON AREA LANDSCAPE PLANTER AREAS, NOT IN PRIVATE YARDS, REGARDLESS OF WHAT IS SHOWN ON PLANS. IRRIGATION PLANS ARE SCHEMATIC AND NATURE AND DUE TO SCALE, EQUIPMENT IS SOMETIMES SHOWN IN AREAS THAT ARE NOT COMMON AREA LANDSCAPE PLANTERS. NO VALVES TO BE INSTALLED IN TURF.

IRRIGATION SCHEDULE PHASE 1

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Rain Bird Drip Control Valve 1in. Ball Valve with 1in. PESBIVM Smart Valve. Add QKCHK-100 1" Basket Filter with 200 mesh stainless steel screen. 0.3-20 gpm
	Pipe Transition Point in Drip Box PVC to Drip Connection Assembly. Senninger #PSR-30 Pressure Regulator (3/4" FIPT) With Associated Drip Connection Fittings. Installed in tan 10" Round Valve Box.
	Flush Cap 3/4" Male PVC SCH 40 S/T Adapter And 3/4" Female Threaded Cap
5 7 10 12 18 24	Rain Bird PC-DIFF Emitter Single Outlet, Pressure Compensating Drip Emitters with Self-Piercing Barb Inlet and Diffuser Cap. Flow rate: 5 GPH=light brown; 7 GPH=violet; 10 GPH=green; 12 GPH=dark brown; 18 GPH=white; 24 GPH=orange.
0.5 1.0 2.0	Rain Bird Xeri-Bug Emitter Rain Bird XB-PC, Single Outlet, Pressure Compensating Drip Emitters. Flow rates of 0.5 GPH=blue, 1.0 GPH=black, and 2.0 GPH=red. Comes with a self-piercing barb inlet x barb outlet.

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Quick Coupler Rain Bird 44-LRC: 1in. Brass Quick-Coupling Valve, with Corrosion-Resistant Stainless Steel Spring, Locking Thermoplastic Rubber Cover, and 2-Piece Body.
	Isolation Gate Valve (Same Size as Pipe) Nibco T-113-K: Class 125 bronze gate shut off valve with cross handle, same size as mainline pipe diameter at valve location. Size Range - 1/4in. - 3in.
MV	Master Valve 2" Rain Bird PEB-IVM: 1in., 1-1/2in., 2in. Plastic Industrial Smart Valves w/ Factory Installed IVM-SOL. Low Flow Operating Capability, Globe Configuration.
A	1" Air and Vacuum Valve 1" Crispin AL Series Air and Vacuum Valve. Model #: CR-AL-10
BF	Backflow Preventer 2" Febco 825Y: Reduced Pressure Backflow Preventer
A	Pedestal Mount Controller Rain Bird ESPLXIVM-LXMMSS-LXMMSSPED: 60 Station, 2-Wire Controller w/ Smart Valve Technology. (1) ESPLXIVM 60-Station, Indoor/Outdoor, Plastic Wall-Mount Enclosure. Installed in LXMMSS-LXMMSSPED Stainless Steel Cabinet w/ Pedestal. System Requirements: Rain Bird LXIVM Integrated Valve Modules & 2-Wire Devices. Use Paige Electric Cable P7072D & Rain Bird WC20 Dry Splices ONLY. Ground System w/ LXIVMSD Surge Device in Rain Bird Round Valve Boxes. Install Per Manufacturers Recommendations.
FS	Flow Sensor Creative Sensor Technology FSI-T10-001: 1in. PVC tee type flow sensor w/socket ends, custom mounting tee and ultra-lightweight impeller enhances low flow measurement. 2 wire digital output compatible w/all irrigation controllers. Flow range: .86 GPM - 52 GPM.
BP	Booster Pump Rain Bird CLP Series: Booster Pump Pressure Increase of 20 PSI. Maximum Flow Rate of 24 GPM.
M	Water Meter 2"
——— ⊥ ———	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
——— S ———	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
- - - - - - -	Irrigation Lateral Line: Toro-Blue Stripe Poly Hose Blue Stripe Drip Tubing to Trees & Shrubs. 0.75" Polyethylene Drip Tubing with 1/4" Poly DistributionTtubing - Install Rain Bird Pressure Compensating Drip Emitters.
■■■■■■■■■	Irrigation Mainline: PVC Schedule 40 1" - 3" Diameter
= = = = = = =	Pipe Sleeve: See Details for Pipe Sizing & Sleeve Schedule. Twice the nominal diameter of the pipe being sleeved.

© Copyright, Coleman Design Group, PLLC. – This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

NOTES:

1. IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
2. CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS. SEE "GROUNDING FOR 2-WIRE SYSTEMS" PUBLICATION FROM RAINBIRD FOR PROPER GROUNDING FOR LXIVM SERIES CONTROLLERS.
3. INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
4. USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
5. INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
6. INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
7. INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
8. SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
9. PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (3"+) UNDER DRIVABLE SURFACES.
10. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS.

IRRIGATION SCHEDULE PHASE 1

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Rain Bird Drip Control Valve 1in. Ball Valve with 1in. PESBIVM Smart Valve. Add QKCHK-100 1" Basket Filter with 200 mesh stainless steel screen. 0.3-20 gpm
	Pipe Transition Point in Drip Box PVC to Drip Connection Assembly. Senninger #PSR-30 Pressure Regulator (3/4" FIPT) With Associated Drip Connection Fittings. Installed in tan 10" Round Valve Box.
	Flush Cap 3/4" Male PVC SCH 40 S/T Adapter And 3/4" Female Threaded Cap
5 7 10 12 18 24	Rain Bird PC-DIFF Emitter Single Outlet, Pressure Compensating Drip Emitters with Self-Piercing Barb Inlet and Diffuser Cap. Flow rate: 5 GPH=light brown; 7 GPH=violet; 10 GPH=green; 12 GPH=dark brown; 18 GPH=white; 24 GPH=orange.
0.5 1.0 2.0	Rain Bird Xeri-Bug Emitter Rain Bird XB-PC, Single Outlet, Pressure Compensating Drip Emitters. Flow rates of 0.5 GPH=blue, 1.0 GPH=black, and 2.0 GPH=red. Comes with a self-piercing barb inlet x barb outlet.

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Quick Coupler Rain Bird 44-LRC: 1in. Brass Quick-Coupling Valve, with Corrosion-Resistant Stainless Steel Spring, Locking Thermoplastic Rubber Cover, and 2-Piece Body.
	Isolation Gate Valve (Same Size as Pipe) Nibco T-113-K: Class 125 bronze gate shut off valve with cross handle, same size as mainline pipe diameter at valve location. Size Range - 1/4in. - 3in.
MV	Master Valve 2" Rain Bird PEB-IVM: 1in., 1-1/2in., 2in. Plastic Industrial Smart Valves w/ Factory Installed IVM-SOL. Low Flow Operating Capability, Globe Configuration.
A	1" Air and Vacuum Valve 1" Crispin AL Series Air and Vacuum Valve. Model #: CR-AL-10
BF	Backflow Preventer 2" Febco 825Y: Reduced Pressure Backflow Preventer
A	Pedestal Mount Controller Rain Bird ESPLXIVM-LXMMSS-LXMMSSPED: 60 Station, 2-Wire Controller w/ Smart Valve Technology. (1) ESPLXIVM 60-Station, Indoor/Outdoor, Plastic Wall-Mount Enclosure. Installed in LXMMSS-LXMMSSPED Stainless Steel Cabinet w/ Pedestal. System Requirements: Rain Bird LXIVM Integrated Valve Modules & 2-Wire Devices. Use Paige Electric Cable P7072D & Rain Bird WC20 Dry Splices ONLY. Ground System w/ LXIVMSD Surge Device in Rain Bird Round Valve Boxes. Install Per Manufacturers Recommendations.
FS	Flow Sensor Creative Sensor Technology FSI-T10-001: 1in. PVC tee type flow sensor w/socket ends, custom mounting tee and ultra-lightweight impeller enhances low flow measurement. 2 wire digital output compatible w/all irrigation controllers. Flow range: .86 GPM - 52 GPM.
BP	Booster Pump Rain Bird CLP Series: Booster Pump Pressure Increase of 20 PSI. Maximum Flow Rate of 24 GPM.
M	Water Meter 2"
——— L ———	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
——— S ———	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
- - - - - - -	Irrigation Lateral Line: Toro-Blue Stripe Poly Hose Blue Stripe Drip Tubing to Trees & Shrubs. 0.75" Polyethylene Drip Tubing with 1/4" Poly DistributionTtubing - Install Rain Bird Pressure Compensating Drip Emitters.
——— ML ———	Irrigation Mainline: PVC Schedule 40 1" - 3" Diameter
= = = = = = =	Pipe Sleeve: See Details for Pipe Sizing & Sleeve Schedule. Twice the nominal diameter of the pipe being sleeved.

© Copyright, Coleman Design Group, PLLC. – This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

NOTES:

1. IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
2. CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS. SEE "GROUNDING FOR 2-WIRE SYSTEMS" PUBLICATION FROM RAINBIRD FOR PROPER GROUNDING FOR LXIVM SERIES CONTROLLERS.
3. INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
4. USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
5. INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
6. INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
7. INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
8. SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
9. PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (3"+) UNDER DRIVABLE SURFACES.
10. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS.

IRRIGATION PLAN

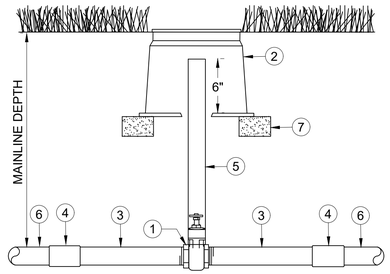
L-7.07 SHEET 37 OF 44

© Copyright, Coleman Design Group, PLLC. – This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

120V ELECTRICAL POWER:



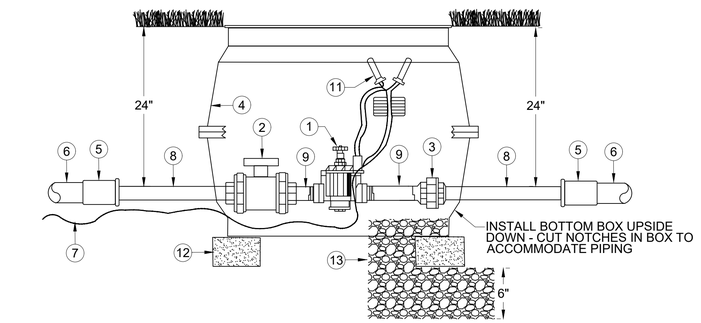
- THE CONTRACTOR SHALL PROVIDE, COORDINATE AND INSTALL THE NECESSARY CONDUITS, WIRES, BREAKERS, AND ANY OTHER MATERIALS AND LABOR AS REQUIRED TO PROVIDE 120VAC ELECTRICAL POWER FOR HEAT-TAPE FREEZE PROTECTION - INSTALL AS PER NEC AND LOCAL CODES

IMPORTANT NOTE:

- WRAP ALL EXPOSED PIPING WITH HEAT TAPE AND PROVIDE A SECURE WRAPPING OF INSULATION TO AVOID HEAT LOSS

1. REDUCED PRESSURE PRINCIPAL BACKFLOW PREVENTER (SIZE AND MODEL AS INDICATED IN LEGEND)
2. GALVANIZED NIPPLE (CLOSE LENGTH OR LENGTH AS REQUIRED)
3. GALVANIZED TEE (PROVIDE GALVANIZED REDUCER BUSHING IF NECESSARY TO ACCOMMODATE DRAIN)
4. BUCKNER #BDV 1/2" BRASS AUTOMATIC DRAIN
5. GALVANIZED NIPPLE (30" LENGTH OR LENGTH AS REQUIRED)
6. GALVENIZED UNION
7. GALVENIZED ELL
8. SCH.80 PVC TOE NIPPLE (8" LENGTH)
9. SCH.40 PVC COUPLING
10. SCH.40 PVC MAINLINE PIPING
11. 120VAC ELECTRICAL OUTLET FOR FREEZE PROTECTION HEAT TAPE - INSTALL PER ELECTRICAL CODES
12. INSULATED ENCLOSURE (SIZE AND MODEL AS INDICATED IN LEGEND)
13. 4" THICK (3000psi) CONCRETE BASE - SIZE PER ENCLOSURE MANUFACTURERS RECOMMENDATIONS
14. GALVANIZED STREET ELL

A | SCALE: NTS | RP BACKFLOW PREVENTER (1"-2")
24" - BURY



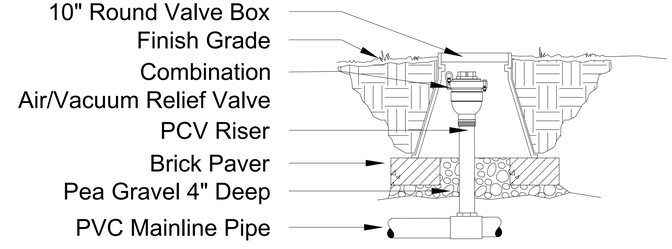
1. WATTS #WGV-X SERIES GATE VALVE (PIPE SIZE)
2. CARSON (OLDCASTLE) #910-10 WITH "T-STYLE" COVER OF APPROPRIATE COLOR
3. SCH.80 PVC TOE NIPPLE (12" LENGTH)
4. SCH.80 PVC COUPLING (SOCKET ENDS)
5. SCH.40 PVC SLEEVE PIPE (2") LENGTH AS REQUIRED
6. PVC SYSTEM PIPING (REFER TO PLANT FOR SIZE AND TYPE)
7. SOLID BRICK (2 BRICKS REQUIRED)

NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

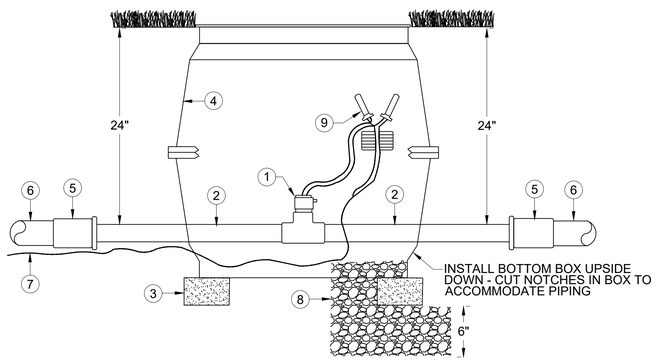
D | SCALE: NTS | ISOLATION GATE VALVE (1"-3")
3" OR SMALLER PIPE

FOR DECODER (2-WIRE) INSTALLATIONS:



- REFER TO LEGEND FOR DECODER MODULE REQUIRED - INSTALL AS PER MANUFACTURER'S INSTRUCTIONS

NON-POTABLE WATER INDICATORS:



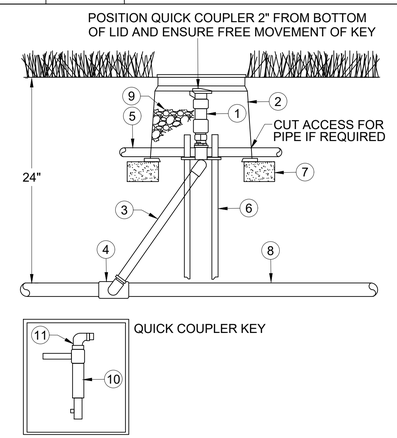
- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING, SPRINKLER TOPS, VALVE HANDLES, VALVES BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

1. AUTOMATIC MASTER VALVE (REFER TO LEGEND FOR MODEL AND SIZE)
2. SCH.80 PVC TRU-UNION BALL VALVE (REGULAR STYLE, SOCKET ENDS)
3. SCH.80 PVC UNION (SOCKET ENDS)
4. CARSON #1324-15 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
6. MAINLINE PIPING (REFER TO LEGEND FOR TYPE AND SIZE)
7. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL SLIGHTLY BELOW MAINLINE PIPE)
8. SCH.80 PVC TOE NIPPLE (PROVIDE 12" LENGTH, CUT OFF THREADS)
9. SCH.80 PVC TOE NIPPLE (PROVIDE 3" LENGTH)
10. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
11. 3M #DBRY WIRE SPLICE KIT OR AS REQUIRED BY VALVE MANUFACTURER (PROVIDE 24" COILED SLACK)
12. SOLID BRICK (SUPPORT ALL FOR CORNERS OF BOX)

B | SCALE: NTS | ELECTRIC MASTER VALVE (1"-2")
24" - BURY (1324-15 BOXES)

E | SCALE: NTS | SN: - | CRISPIN AIR/VACUUM RELIEF VALVE

NON-POTABLE WATER INDICATORS:



- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

IMPORTANT NOTE REGARDING LAMINAR FLOW THROUGH METER

- THE CONTRACTOR SHALL BE AWARE THAT THE FLOW METER MANUFACTURE MAY HAVE SPECIFIC MINIMUM DISTANCES OF UNINTERRUPTED FLOW UPSTREAM AND DOWNSTREAM OF FLOW METER TO INSURE ACCURATE FLOW REPORTING - REFER TO MANUFACTURER'S LITERATURE AND ENSURE THAT MINIMUM DISTANCE REQUIREMENTS ARE MET.

1. FLOW SENSOR (REFER TO LEGEND FOR SIZE) ASSEMBLY INCLUDES PVC PLASTIC BODY (SOCKET ENDS)
2. SCH.40 PVC PIPE (SIZE PER FLOW SENSOR CONNECTIONS) PROVIDE LENGTHS AS REQUIRED FREE OF FITTINGS
3. SOLID BRICK (SUPPORT ALL FOUR CORNERS OF BOX)
4. CARSON #1324-15 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
6. MAINLINE PIPING (REFER TO LEGEND FOR TYPE AND SIZE)
7. COMMUNICATION CABLE AS PER FLOW SENSOR MANUFACTURER (INTEFACE WITH CONTROLLER)
8. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
9. 3M #DBR WIRE SPLICE KIT (PROVIDE 24" COILED SLACK FOR EACH CONDUCTOR)

C | SCALE: NTS | FLOW SENSOR (1" THROUGH 4")
24" BURY (1324-15 BOXES)

1. 1" QUICK COUPLER VALVE - MODEL AS PER IRRIGATION LEGEND AND SPECIFICATIONS
2. CARSON (OLDCASTLE) #910-10 WITH T-STYLE COVER
3. LASCO #G17S-218-SNAPLOK - 1" DIAMETER, 24" LAY, BRASS MIPT OUTLET, LONG SPIGOT INLET
4. SCH.80 PVC FITTING WITH 1" SOCKET OUTLET
5. 1" SCH.40 PVC PIPE - CUT TO 18" LENGTH - INSTALL ON PROVIDED FITTING AT SWING-JOIN
6. 3/8" STEEL REBAR - 24" LENGTH (2 PIECES REQUIRED - SEE SWING-JOINT INSTRUCTIONS)
7. SOLID BRICK (2 BRICKS REQUIRED)
8. MAINLINE, SUB-MAIN OR LATERAL PIPING (REFER TO PLAN FOR SIZE)
9. 3/4" CRUSHED GRAVEL - TAMP AND COMPACT
10. 1" QUICK COUPLER KEY (UNLESS OTHERWISE NOTED ON PLAN, PROVIDE 3 WITH JOB)
11. 1" x 3/4" HOSE AND SWIVEL (UNLESS OTHERWISE NOTED ON PLAN, PROVIDE 3 WITH JOB)

F | SCALE: NTS | 1" QUICK COUPLER VALVE
24" BURY - 3" OR SMALLER PIPE

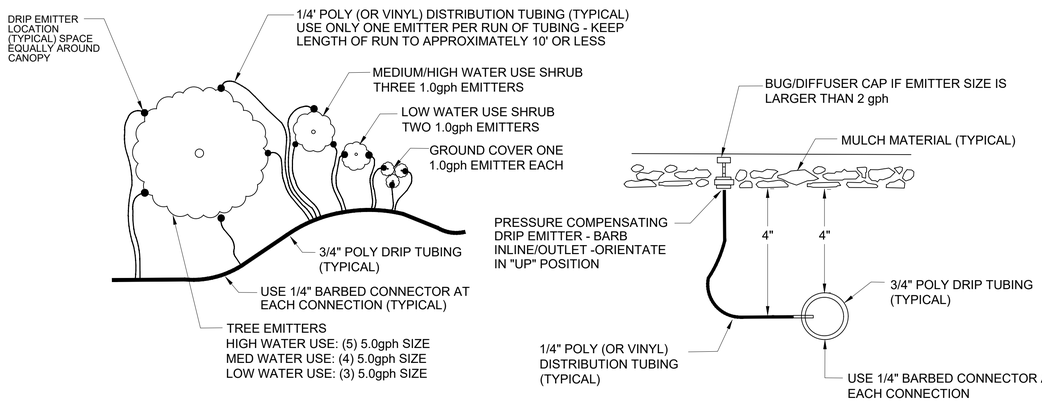
IRRIGATION DETAILS

L-8.01

SHEET 38 OF 44

1. AUTOMATIC ZONE VALVE (REFER TO LEGEND FOR MODEL AND SIZE)
2. SCH.80 PVC TRU-UNION BALL VALVE (REGULAR STYLE, SOCKET ENDS)
3. SCH.80 PVC UNION (THREAD x SOCKET ENDS)
4. CARSON #1324-12 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. MAINLINE SERVICE FITTING (USE SCH.80 PVC FOR PIPE 3" AND SMALLER, DUCTILE IRON 4" AND LARGER)
6. LATERAL PIPE (REFER TO PLAN AND SIZE TYPE)
7. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL SLIGHTLY BELOW MAINLINE PIPE)
8. SCH.80 PVC TOE NIPPLE (PROVIDE 12" LENGTH OR LENGTH AS REQUIRED TO ACCOMMODATE VALVE BOX)
9. SCH.80 PVC TOE NIPPLE (PROVIDE 3" LENGTH OR LENGTH AS REQUIRED FOR PROPER CLEARANCE)
10. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
11. 3M #DBRY WIRE SPLICE KIT OR AS REQUIRED BY VALVE MANUFACTURER (PROVIDE 24" COILED SLACK)
12. SOLID BRICK (SUPPORT ALL FOR CORNERS OF BOX)
13. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
14. SCH.80 PVC TOE NIPPLE (PROVIDE 8" LENGTH, CUT TO LENGTH REQUIRED TO MATCH DEPTH OF BURY)
15. SCH.80 PVC ELBOW (SOCKET ENDS)
16. BASKET-STYLE, NON-PRESSURE REGULATING FILTER WITH MAINTENANCE INDICATOR (200 MESH, 75 MICRON)

FOR DECODER (2-WIRE) INSTALLATIONS:



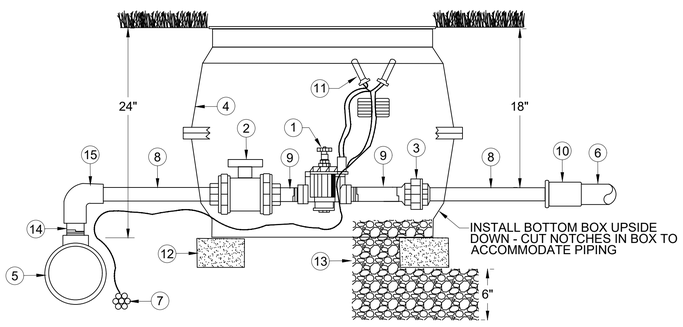
- REFER TO LEGEND FOR DECODER MODULE REQUIRED - INSTALL AS PER MANUFACTURER'S INSTRUCTIONS

NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING, SPRINKLER TOPS, VALVE HANDLES, VALVES BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

G SCALE: NTS — ELECTRIC ZONE VALVE - DRIP (1")

24" x 18" BURY (1324-12 BOXES)



IMPORTANT NOTES:

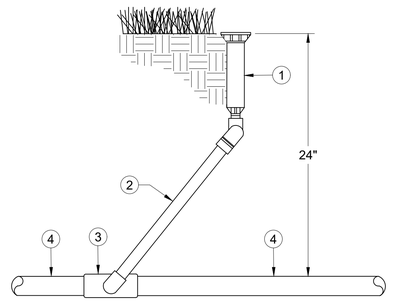
A. DRIP EMITTER MUST BE PRESSURE COMPENSATING - OTHER EMITTER TYPES ARE NOT ALLOWED
B. FOLLOW MANUFACTURER'S INSTRUCTIONS FOR INSERTING DRIP EMITTERS - NOTE INLET AND OUTLET SIDE OF EMITTER.
C. SECURE ALL TUBING IN PLACE WITH LANDSCAPE STAPLES IN 3.0" INTERVALS.
D. NEVER STRETCH ANY TUBING TIGHT - THE CONTRACTOR MUST ALLOW ADEQUATE SLACK IN ORDER FOR THE TUBING TO EXPAND AND CONTRACT WITH TEMPERATURE CHANGES.
E. EACH DRIP EMITTER SHALL USE A SEPARATE 1/4" SPAGHETTI TUBE. DO NOT INSTALL MULTIPLE EMITTERS ON 1/4" SPAGHETTI TUBING. SPACE EMITTERS EQUALLY AROUND CANOPY OF PLANT MATERIAL.
F. INSTALL EMITTERS ORIENTATED UPWARD AND JUST ABOVE THE MULCH MATERIAL SURROUNDING THE PLANT. THE EMITTER SHOULD NOT BE HIGHER THAN 1" ABOVE MULCH MATERIAL.

H SCALE: NTS — DRIP EMITTER LAYOUT - DRIP TUBING

ARRANGEMENT AT PLANTINGS

1. AUTOMATIC ZONE VALVE (REFER TO LEGEND FOR MODEL AND SIZE)
2. SCH.80 PVC TRU-UNION BALL VALVE (REGULAR STYLE, SOCKET ENDS)
3. SCH.80 PVC UNION (SOCKET ENDS)
4. CARSON #1324-12 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. MAINLINE SERVICE FITTING (USE SCH.80 PVC FOR PIPE 3" AND SMALLER, DUCTILE IRON 4" AND LARGER)
6. LATERAL PIPE (REFER TO PLAN AND SIZE TYPE)
7. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL SLIGHTLY BELOW MAINLINE PIPE)
8. SCH.80 PVC TOE NIPPLE (PROVIDE 12" LENGTH OR LENGTH AS REQUIRED TO ACCOMMODATE VALVE BOX)
9. SCH.80 PVC TOE NIPPLE (PROVIDE 3" LENGTH OR LENGTH AS REQUIRED FOR PROPER CLEARANCE)
10. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
11. 3M #DBRY WIRE SPLICE KIT OR AS REQUIRED BY VALVE MANUFACTURER (PROVIDE 24" COILED SLACK)
12. SOLID BRICK (SUPPORT ALL FOR CORNERS OF BOX)
13. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
14. SCH.80 PVC TOE NIPPLE (PROVIDE 8" LENGTH, CUT TO LENGTH REQUIRED TO MATCH DEPTH OF BURY)
15. SCH.80 PVC ELBOW (SOCKET ENDS)

FOR DECODER (2-WIRE) INSTALLATIONS:



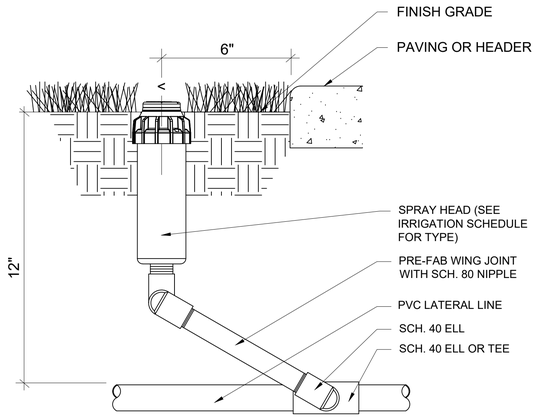
- REFER TO LEGEND FOR DECODER MODULE REQUIRED - INSTALL AS PER MANUFACTURER'S INSTRUCTIONS

NON-POTABLE WATER INDICATORS:

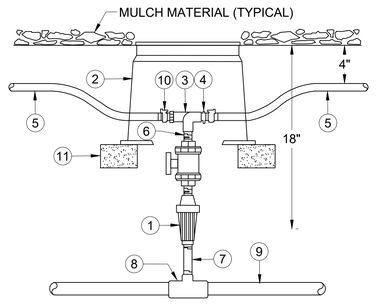
- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING, SPRINKLER TOPS, VALVE HANDLES, VALVES BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

I SCALE: NTS — ELECTRIC ZONE VALVE

24" x 18" BURY (1324-12 BOXES)



1. TYPICAL 4" OR 6" POP-UP SPRAY HEAD SPRINKLER WITH 1/2" FIPT INLET (SEE LEGEND)
2. SWING-JOINT ASSEMBLY (RIDGED OR FLEXIBLE) 1/2" INLET x 1/2" MIPT OUTLET x 18" LAY LENGTH
3. SCH. 40 PVC LATERAL FITTING WITH 1/2" OUTLET (CONNECTION DETERMINED BY SWING JOINT)
4. LATERAL PIPING (SEE LEGEND FOR SIZE AND TYPE)



NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

J SCALE: NTS — TYPICAL SPRAY HEAD 1/2" INLET (4"-6" POP)

K SCALE: NTS, SN: - — GEAR DRIVEN ROTOR

1. RAINBIRD PSI-M30X-075 30psi PRESSURE REGULATOR (3/4" NPT INLET AND OUTLET)
2. CARSON (OLDCASTLE) #910-10 WITH "T-STYLE" COVER OF APPROPRIATE COLOR
3. SCH. 40 PVC THREADED TEE OR THREADED ELL (REFER TO PLAN) - 3/4"
4. BARBED DRIP INSERT FITTING (TYPICAL) (3/4" MIPT x 3/4" BARB)
5. 3/4" POLY DRIP TUBING - MAXIMUM RUN OF 150' IN EACH DIRECTION
6. SCH.80 PVC NIPPLE - 3/4" x CLOSE
7. SCH.80 PVC NIPPLE - 3/4" x 6" (OR LENGTH AS REQUIRED)
8. SCH.40 PVC LATERAL FITTING WITH 3/4" THREADED OUTLET (SEE PLAN FOR SIZE)
9. LATERAL PIPING (SEE PLAN FOR SIZE AND TYPE)
10. 1" STAINLESS STEEL HOSE CLAMP (TYPICAL) - SECURE TUBING TO INSERT FITTING
11. SOLID BRICK (2 BRICKS REQUIRED)

NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

O | SCALE: NTS | SN: - | PIPE SIZING SCHEDULE

NOTE:

- SIMILAR TREATMENTS AT DRIVEWAYS, WALLS, WALKS OR PATIOS.
- COORDINATE SLEEVES INSTALLED BY UNDERGROUND UTILITY CONTRACTOR UNLESS OTHERWISE NOTED.

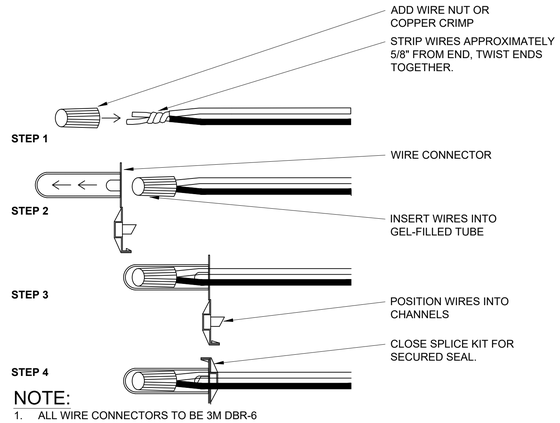
P | SCALE: NTS | SN: - | PIPE SLEEVE

1. SCH. 40 PVC SLEEVE. TWICE DIAMETER OF SERVICE PIPE, SEE SLEEVE/PIPE SCHEDULE.
2. WASHED AND GRADED MORTAR SAND BACKFILL IN ROCKY SOIL CONDITIONS.
3. WALL PER WALL DETAIL.
4. COMPACT SOIL AROUND SLEEVE TO SAME DENSITY AS UNDISTURBED ADJACENT SOIL.
5. FINISH GRADE / TOP OF DG.
6. WALL FOOTING PER WALL DETAIL. DO NOT DISTURB FOOTING OR COMPACTION FOR MINIMUM OF 12" IN ALL DIRECTIONS.
7. 36" MIN. DEPTH OR PER LOCAL CODE.
8. EXTEND SLEEVES 12" BEYOND EDGES.

NOTES:

1. CAP SLEEVES UNTIL USE.
2. MULTIPLE SLEEVES REQUIRE 4" SEPERATION WITHIN SAME SLEEVE TRENCH.
3. PROVIDE SEPERATE WATER LINE AND WIRE SLEEVES AS REQUIRED. NO WIRES IN WATER SLEEVES.

Q | SCALE: NTS | SN: - | SLEEVE UNDER WALL

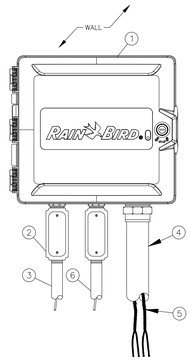


SLEEVE SCHEDULE

IRRIGATION PIPE SIZE	SLEEVE SIZE
1/2"	2"
3/4"	2"
1"	2"
1 1/2"	3"
2"	4"
2 1/2"	6"
3"	6"
4"	10"

NOTES

1. SLEEVE SIZE EQUALS THE SUM OF ALL PIPE WITHIN THE SLEEVE.
2. WIRE SLEEVES SHALL BE PROVIDED AS NOTED BELOW AND ARE NOT INDICATED ON THE PLANS.
3. ALL SLEEVES UNDER STREETS SHALL BE C 900 PVC FOR 4" & LARGER, USE SCH40 PVC FOR SMALLER SIZES. LOCATE WIRE SLEEVE ALONG ONE SIDE OF PIPE SLEEVE.
   1-24 WIRE, (1) 2" SCH. 40 SLEEVE
   25-48 WIRE, (1) 3"SCH. 40 SLEEVE
4. ALL SLEEVES SHALL EXTEND AT LEAST 2' BEYOND THE EDGE OF THE HARDSCAPE/PAVEMENT.
   SLEEVE SIDEWALKS AS REQUIRED.
5. ALL SLEEVES UNDER NEW STREETS SHALL BE SCH 80 PVC



R | SCALE: NTS | SN: - | SLEEVE SCHEDULE

NOTE:

1. ALL WIRE CONNECTORS TO BE 3M DBR-6

S | SCALE: NTS | SN: - | WIRE SPLICE

1. TWO-WIRE CONTROLLER: RAIN BIRD ESP-LXIVM/PRO IN PLASTIC CABINET WITH WALL MOUNT. INSTALL CONTROLLER AND CABINET ON WALL PER MANUFACTURER'S RECOMMENDATIONS.
2. JUNCTION BOX
3. 1-INCH CONDUIT AND FITTINGS FOR POWER SUPPLY WIRE
4. 2-INCH CONDUIT AND FITTINGS FOR TWO-WIRE CABLE
5. MAXICABLE TWO-WIRE PATH TO FIELD DEVICES USE A DIFFERENT CABLE JACKET COLOR FOR EACH PATH.
6. 1-INCH CONDUIT AND FITTINGS FOR GROUND WIRE. ONLY FOR OUTDOOR INSTALLATIONS.

NOTES:

1. ESP-LXIVM CONTROLLER IS AVAILABLE IN TWO MODELS. THE LXIVM WITH 60 STATIONS AND THE LMVM-PRO WITH 240 STATIONS. REFER TO THE CHART BELOW FOR DIFFERENCES BETWEEN THE TWO MODELS.
2. USE STEEL CONDUIT FOR ABOVE GRADE AND SCH 40 PVC CONDUIT FOR BELOW GRADE CONDITIONS.
3. PROVIDE PROPER GROUNDING COMPONENTS TO ACHIEVE GROUND RESISTANCE OF 10 OHMS OR LESS. IF CONTROLLER IS MOUNTED INDOORS, USE POWER SUPPLY GROUND.

KEY SPECIFICATIONS

SECTION 32 93 00 - LANDSCAPE

PART 1 - GENERAL

1.01 Work Included

1. Landscape Fine Grading
2. Soil Preparation
3. Tree Supports and Headers
4. Planting
5. Watering
6. Maintenance

1.02 Definitions

Plants - all shrubs and cacti other than trees, and turf.
Plant material - all trees, shrubs, succulents, cacti, ground cover, and other plants.

1.03 Related Work

Contractor: minimum 5 years experience in supply and installation of landscape materials.

1.04 Source Quality Control

Provide certificates of inspection for all materials as required by this specification and/or prevailing law or regulation.

Developer's Representative shall review plant material prior to planting. Any material deemed unacceptable shall be removed from the site and not planted.

Provide trees and shrubs grown in a recognized nursery in accordance with good horticultural practice. Provide healthy, undamaged, vigorous stock grown under climactic conditions similar to conditions at project site and free of disease, insects, eggs, larvae and defects such as sun-scald, knots, injuries, abrasions or disfigurements. Provide trees and shrubs of the sizes indicated. Trees and shrubs of sizes larger than those indicated may be used provided roots, root ball, staking and planting pits are increased proportionately.

1.05 Reference Standards

- Arizona Nursery Association plant standards for nursery stock
- ANSI 60.1 - American Standards for Nursery Stock, International Society of
- Arboriculture
- American Joint Committee on Horticultural Nomenclature

1.06 Samples

Submit samples to developer's representative a minimum of 2 weeks prior to start of work for the following material:
1. Topsoil for backfill mix
2. Mulches
3. Tree supports
4. Inert Groundcovers (1 gallon)
5. Boulders
6. Steel Edging - 6" sample length

The Developer's Representative reserves the right to take and analyze samples of materials for conformity to specification at any time. Furnish samples upon request by Developer's Representative.

1.07 Products

Submit to Developer's Representative a minimum of 2 weeks prior to start of work manufacturer's comprehensive product description, including specifications and installation instructions.

1.08 Certificates and Test Reports

Provide and pay for all materials testing. Testing agency shall be acceptable to the Developer's Representative.

Submit to Developer's Representative a minimum of 2 weeks prior to start of work 2 copies of certificates of inspection as required by these specifications, jurisdictional authorities, and vendor's certified analysis for soil amendments, fertilizer materials, and chemicals. Submit other data substantiation that materials comply with specified requirements. Certificates are required to determine the quality and quantity of all specified soil amendments.

Materials certification to be submitted include, but are not limited to:

- Topsoil source and nutrient analysis
- Mulch
- Fertilizers/soil amendments/chemicals

Test representative material samples proposed for use. Provide the following data:

- Topsoil and planting backfill
- Soil PH
- Particle size, percentage soil texture
- Percentage organic material
- Nutrient level analysis
- All macro, secondary and micronutrients
- Salinity
- Percolation rate

Recommendations on type and quantity of amendments required to bring levels into acceptable ranges as detailed in part 2 - products of materials of these specifications.

Separate recommendations to be submitted for each crop. Crop to be identified as:

- irrigated trees, shrubs, and groundcovers
- turf or lawn

1.09 Maintenance Data

Submit to Developer's Representative 2 copies of written instructions, prior to expiration of the initial maintenance period, recommending procedures to be followed by the developer for the maintenance of landscape work for one full year.

1.10 Product Delivery, Storage and Handling

Deliver packaged materials in containers showing weight, analysis and identification of manufacturer. Protect materials from environmental conditions and deterioration at all times.

Provide protective covers to plant life and trees during delivery. Do not prune trees prior to delivery. Do not bend trees or shrubs in such a manner as to cause damage or destroy shape.

Deliver materials after preparations for planting have been completed. If planting is delayed for more than 8 hours after delivery, set plant material in shade, protect from weather and mechanical damage and keep roots moist.

Do not remove container grown stock from containers until planting time.

1.11 Site Conditions

Determine location of underground utilities. Use professional services to determine locations.

Execute work as required to prevent damage.

Maintain grade stakes set by others until directed otherwise.

Protect of all existing plants to remain:
1. Do not store materials or equipment, permitted burning, or operate or park equipment under the branch of any existing plant or plant material to remain except as actually required for construction in those areas
2. Provide barricades, fences or other barriers as necessary at the drip line to protect existing plants to remain from damage during construction
3. Notify Developer's Representative in any case where contractor feels grading or other construction called for by contract documents may damage existing plants to remain
4. If existing plants to remain are damaged during construction, contractor shall replace such plants of the same species and size as those damaged at no cost to Developer. Determination of extent of damage and value of damaged plant shall rest solely with Developer's Representative

1.12 Warranty

Submit warranty to Developer's Representative.

Trees, Saguaros, Yuccas, and Ocotillos
Warrant that trees, saguaros, yuccas and ocotillos will be alive and in good health for a period of one (1) year after acceptance except for defects resulting from neglect by developer or abuse by others.

Developer must follow contractor's maintenance schedule and provide current maintenance log to Developer's Representative.

Remove and replace dead, unhealthy or girdled trees, yuccas and ocotillos that lose original form and size during warranty period with material equal to that specified. Replace any material which does not meet requirements within thirty days of notification. All replacement material shall be subject to an additional one year maintenance period.

Shrubs and Other Plantings

Guarantee all other planting will be alive and in satisfactory condition for a period of 90 days from date of acceptance or will be replaced at no additional cost to the Developer.

All plant material shall be maintained in a healthy, sturdy condition during the warranty period by the contractor. Turf shall be mowed and trimmed weekly after root establishment.

All replacement plants, including shrubs, cacti, groundcovers, vines and perennials shall be subject to an additional 90 day maintenance period.

PART 2 - PRODUCTS

2.01 Fill Materials

Provide dry, loose material for fill, backfill, planting backfill and topsoil for planter beds. Frozen or muddy soils are not acceptable. Salts are not to exceed 1500 ppm, and soils shall be free of debris, noxious weeds, ingredients or objects detrimental to healthy plant growth.

Topsoil - screened, fertile, friable, from well drained arable land, free of noxious weeds, refuse, roots, heavy clay or any material toxic to plant growth; contents shall be as follows:

- Silt: 20-45%
- Slay: 15-20%
- Sand: 30-60%
- Ph: 7.0-8.3
- Soluble Salts: 1,500 ppm
- Organic material (natural or otherwise): 2% minimum
- Nutrients: enough to bring levels of acceptable plant growth.

Percolation rate shall be between 3 to 4 inches per hour. Existing topsoil may be used provided it meets these requirements. Imported topsoil must be proven to meet these requirements.

2.02 Commercial Grade Fertilizers

Agri-Sul dispersal - use only for sulfur agriculture grade gypsum, osmacote, 'sierra-blend', apply at mfg. recommended rate for each planting type.

2.03 Soil Amendments

Wood shavings: nitrogen stabilized fir or pine shavings containing 0.75% total nitrogen and 0.1 to 0.15% total iron, and under 60 ppm total manganese; composted, leached and aged for a minimum of 10 to 12 months; ph factor, 4.0 to 4.5. No soil amendments are required for salvaged plant material and cacti unless otherwise specified.

2.04 Tree Supports

Tree stakes: copper naphthenate impregnated lodge pole 12 feet in length for trees 15 gallon to 36" box, 2 lodge poles per tree, 3 poles for multi-trunk trees. Tree stakes are not required for salvaged plant material or 48" box trees or larger, unless determined otherwise by Landscape Architect due to high wind conditions. Tree ties: provide a minimum of two per tree, 18" tree strap by star nursery (www.Starnursery.Com) or approved equal, beige, with grommets. No. 10 gauge pliable zinc coated iron wire to be threaded through grommets and connected to tree stakes. Wire will not make contact with tree.

2.05 Pesticides and Herbicides

Pre-emergent herbicide shall be Surflan as manufactured by Dow/Elanco chemical company or equal.

Pesticides shall be ortho "Lindane Borer and Leaf Miner Spray" by Ortho, Consumer Products Division, Chevron Chemical Company, San Francisco, CA 94119, or "Borer Killer", by Greenlight Company, San Antonio, TX 78217. Contact herbicide shall be submitted by contractor to Developer's Representative.

Types of herbicides to be used and the methods of application will conform to Environmental Protection Agency, state and location requirements and labeling instructions.

2.06 Plant Material

Plant material shall be healthy, shapely and well-rooted. Roots shall show no evidence of having been restricted or deformed at any time. All plants shall have normally developed branching. Plants shall be free from disfiguring knots, sun scald injuries and abrasions of bark.

Plants not meeting these requirements shall be considered defective and shall be replaced immediately. All plants shall be true to name and shall be tagged, one of each variety. All plant material shall be grown in nurseries inspected by the State Department of Agriculture.

Specimen plant material shall be selected and tagged at the growers nursery prior to shipment.

Plants shall be measured when branches are in their normal position. Height and spread dimensions specified refer to main body of plant and not branch tip to tip. Caliper measurement shall be taken at a point on the trunk 6" above natural ground line for trees up to 4" in caliper and at a point 12" above the natural ground line for trees over 4" in caliper. If a range of size is given, no plant shall be less than the minimum size and not less than 40% of the plants shall be large as the maximum size specified. The measurements specified are the minimum size acceptable and are the measurements after pruning, where pruning is required. Plants that meet the measurements specified, but do not possess a normal balance between height and spread shall be rejected.

Container stock, when specified, shall have grown in the containers in which delivered for at least 6 months, but not over 2 years. Samples must prove no rootbound conditions exist. No container plants that have cracked or broken balls of earth when taken from container shall be planted except upon special approval by Developer's Representative.

Container stock shall not be pruned before delivery. Field grown plants recently transplanted into containers will not be accepted.
Sod shall be dense with the grass having been mowed at a height of 1" prior to removal from field. All grass shall be grown on fumigated fields. Sod shall not be stacked for more than 24 hours between time of cutting and time of delivery.

2.07 Inert Groundcover

Inert groundcovers, including but not limited to, decomposed granite (DG), crushed rock, and river rock shall have a minimum 2" coverage depth, unless noted otherwise on plans. Inerts shall be the size and color as per plan, and shall be taken from a single quarry. DG shall be from a single source approved by the Developer's Representative. Screened DG shall be uniform, free of clay lumps, calcareous coatings, caliche, organic matter or deleterious
substances.

Boulders will be from a single source approved by the Developer's Representative. Surface Select Boulders to be free of broken areas, scars and scrapes. Boulders for seating shall have a flattened top.

2.08 Edging

Edging, including but not limited to, poly or steel product, shall be of the size (gauge and depth) specified on plans and drawings. Samples shall be submitted by contractor for approval.

PART 3 - EXECUTION

3.01 General

Install all material in accordance with the methods, techniques and specifications of each manufacturer and these specifications.

Do not begin planting until completion of the site grading and installation of a fully functional underground irrigation system is in place.

The Contractor will, prior to the start of construction activities on the site, define the limit boundaries of all areas designated as off-limits to the Contractor. Provide protective fencing for existing landscaped plants from construction activities as noted per drawings.

3.02 Backfill, Imported Fill or Artificial Soil and Gravel

Inspect the integrity of all damp-proofing and water proofing membranes which occur over, on or against any construction to be fully or partially concealed by earthwork prior to the placement of any imported soil, backfill, gravel fill or sub-base.

3.03 Topsoil

Import additional topsoil only as required to bring planting areas up to finish grade or per turf or planting bed requirements. Spread and cultivate soil so that no settling takes place at any time.

3.04 Landscape Fine Grading

Allow for the addition of soil amendments, conditioners and any specified top dressing when determining and executing finish grade.

Set finish grade 2-1/2 inches below adjacent paving, curb and headers to allow for decomposed granite, groundcover mulch or turf sod.

Complete all finish grading prior to commencing landscape operations. Surface drainage will be away from the building foundation and walls, and will ensure proper drainage of the site as indicated on the drawings. Grade all planting areas to a smooth, even and uniform plane with no abrupt changes to surface, and the area drains as designed. Grade and maintain all flow lines, designated or not, to allow free flow of surface water. Cultivate entire area to a depth of 6 inches minimum and remove all rock in excess if 1-1/2 inches, all building rubble, building construction material, waste and any other material that may impair satisfactory growth.

Dispose of any unacceptable or excess soil or other materials at a legal offsite disposal area and pay all dumping fees and charges.

3.05 Inert Groundcovers

Apply inert groundcovers to a 2 inch minimum depth within 1/2 inch of the top of adjacent curb or sidewalk.

Exercise care when placing inert groundcover around plant materials so as not to choke, cover or damage plant. Inert groundcovers will be kept out of the crowns of the plants.

Areas of installation will be completely weed-free before the placement of inert groundcover.

Apply pre-emergent according to manufacturer's recommendations before and after groundcover installation. Feather granite to provide a smooth transition to areas not receiving DG. After placing and grading DG, the Contractor will lightly water the granite to remove fine material from the surface.

3.06 Herbicide Application

All areas shall be maintained weed-free at all times during construction. Do not apply pre-emergent herbicides at locations of revegetation seeding. The contractor shall manually remove invasive weeds within these areas.

3.07 Tree Support

Only stake trees which are delivered with nursery stakes. Remove nursery stakes and install lodgepole per specifications. Install tree supports as shown on the drawings within 48 hours of planting. Bracing stakes will be driven vertically into firm ground and outside the rootball. Tree supports shall be installed to prevent rubbing and girdling, yet allow for trunk movement. Tree ties that encircle trunks shall be large enough to allow for normal growth of the trunk during the first year without girdling.

3.08 Plant Placement

Layout plant locations with stakes or flags prior to planting. Coordinate with developer's representative to assure appropriate location.

Place shrubs no closer than 20 inches from foundations, fences, walls and walks or as far as character of growth demands, whichever is greater unless directed otherwise by the Developer's Representative.

Place trees no closer than 6 feet to foundations, fences, walls and walks unless directed otherwise by the Developer's Representative.

All plants which settle deeper than the surrounding grade will be rejected and must be raised to correct level.

Where rock, underground construction or other detrimental conditions are encountered at plant pits, Developer's Representative may selective alternate location.

3.09 Container Stock

Test drainage of plant beds and pits by filling with water. Notify developer's representative of areas where water is retained more than 24 hours and request a hardpan planting detail. Any drainage problem must be rectified prior to planting.

Do not expose roots to air except during transplanting.

Dig pits with perpendicular sides to a minimum of 2 to 3 times the width (see details) of the root ball for containerized trees and shrubs. Dig pits only as deep as the root ball to prevent settling of the tree or shrub.

Unless otherwise specified, place all plants in the center of planting pits, plant upright and face to give the best appearance and relationship to the adjacent plants for structures.

Plants will be set in relation to surrounding grade so they are even with depth at which they were grown in nursery or container.

After removing plant from container, scarify sides of rootball to eliminate root bound condition. Do not plant stock if rootball is cracked or broken.

3.10 Boxed Trees

Branches and rootballs must not be damaged.

Top of rootball will be one ince (1") above adjacent finished grade.

Add soil backfill under the tree if needed to bring rootball to proper height.

Planting pit will be backfilled with clean topsoil as box sides are progressively removed to minimize damage to the rootball and to prevent it from collapsing.

Backfill in bottom of planting pit will be to prevent undue settling.

Water the trees at planting as needed until the permanent automatic irrigation system is installed and operating.

3.11 Backfilling

Backfill plant pits and form a temporary shallow basin around the plant to hold enough water to saturate the root ball and backfill. Water plants immediately after planting and allow backfill to settle in plant pit. Do not water ocotillos after planting. Remove basin prior to installation of inert groundcovers or turf.

Treat all planting areas with a pre-emergent, with the exception of the revegetated seed areas.

3.12 Annuals

At time of transplanting, soil in flats shall be sufficiently moist so as not to fall apart when lifting plants. Plant each plant with its proportionate amount of the flat soil in a manner that will ensure a minimum disturbance to the root structure.

Plant flat material sufficiently deep to cover all roots. Firmly tamp the earth around each plant to force out large air pockets.

3.13 Sod

Soil Preparation

Provide soil with an organic matter content of 25 percent to 30 percent. Incorporate into soil by tilling the soil to a depth of 6 inches thoroughly remove debris, weeds and rocks from soil.

Soil Amendments

Prior to tilling, apply gypsum at a rate of 100 pounds per 1,000 square feet, phosphate at a rate of two pounds per 1,000 square feet and soil sulfur at five pounds per 1,000 square feet.

Sod Installation

Install sod along the straightest edge of turf area. Stagger joints in a brick- like pattern. Avoid gaps and overlapping. Place sod diagonally across slopes, so it cannot slide, and so that it provides complete cover with no brown sections or cracks showing. Water sod at least every thirty minutes. After installation, water lightly and roll in two directions with a sod roller.

3.14 Watering

Water all plants immediately after planting to avoid drying out, to the full depth, saturating the root ball of each plant hole repeat watering as often as necessary to keep the ground moist but not soaked, well below the root system of the plants.

3.15 Clean Up

Keep all areas clean and orderly during and after execution of work.

3.16 Pruning

Prune shrubs and trees upon completion of the work, according to standard horticultural practices to preserve the natural character of the species and to repair or replace injured plants at directed. Limit pruning only to remove dead or injured twigs and branches and to compensate for loss of roots as a result of planting operations

3.17 Maintenance Period

Upon substantial completion, as determined by the Developer's Representative, in accordance with the conditions of the contract, the contractor shall be notified in writing that the maintenance period is to begin.

Landscape contractor shall be responsible for maintenance of landscaped areas for a period of 90 days. Maintenance includes watering trees and grasses, monitoring and adjusting the irrigation system as necessary, mowing and trimming lawn areas, pruning and trimming plant material, weed removal, and cultivating plant beds.

Landscape contractor shall be responsible for maintenance of the sprinkler irrigation system, including monitoring and adjusting the duration and frequency of the watering schedule, adjustment of heads for coverage and elevation, repair of leaks in both main and lateral lines, and all other work required to establish a complete working sprinkler irrigation system.

Landscape contractor shall be responsible for maintenance of new planting, including watering, cultivating, weeding, mulching, re-staking, tightening and repairing guys, resetting plants to proper grades and position, maintenance of temporary tree wells, and furnishing and supplying all fertilizers, herbicides, and pesticides to maintain a thriving landscape. Landscape contractor, in order to protect his guarantee, shall give typewritten to developer, a complete maintenance manual in the care, maintenance and fertilization of the landscape.

Maintenance manual may include, but is not limited to the following: irrigation, fertilization, weeding, pesticide and herbicide application, pruning, resetting unstable plants, mowing, repairing, adjusting or replacing stake and guying, repair damage caused by weather, wildlife and vandalism or other hazards, perform maintenance operations necessary to assure healthy plant growth.

Landscape contractor shall request, in writing, a final inspection at the completion of the maintenance period. If the developer's representative determines the work is satisfactory, the maintenance period will end on the date of the final inspection. If the maintenance is unsatisfactory, the maintenance period will be extended, at the contractor's expense, until such time as all corrections are made and the work is inspected and approved by the developer's representative. Retention will not be released until final inspection is made and approval issued by the developer's representative.

3.18 Field Quality Control

Notify Developer's Representative of the requirement for inspections at least 48 hours in advance. Inspections are required, but not limited to, the following:

- Inspection and acceptance of plant material prior to shipping.
- At completion of rough grade prior to boulder placement.
- At completion of landscape finish grading and soil preparation, prior to planting.
- At layout of irrigation system, prior to installation of irrigation system.
- A installation of irrigation system, prior to backfilling trenches and planting
- During installation of specimen tree, palm or other specimen plant material.
- After staking locations for plant holes, but prior to planting.
- During the planting process.
- During the placement and aiming of all light fixtures
- At substantial completion of the work.
- During warranty period to observe maintenance procedures.
- At final completion of the work.

SECTION 32 84 00 - PLANTING IRRIGATION

PART 1 - GENERAL

1.01 SUMMARY:

A. Work Included: Provide a provision for an underground irrigation system including the following:

1. Trenching, stockpiling, excavation of materials, and refilling trenches.
2. Complete systems including but not limited to piping, pump station, backflow preventer, assemblies, valves, fittings, heads, controller wiring, and final adjustments to ensure efficient coverage as determined by Consultant.

1. 02 REFERENCES:

A. Perform Work in accordance with requirement of Conditions of the Contract and Division 01-General Requirements as well as provisions of all applicable laws, codes, ordinances, rules and regulations. Conform to requirements of reference information listed below, except where more stringent requirements are shown or specified in Contract Documents.

1. American Society for Testing and Materials (ASTM) - Specifications and Test Methods specifically referenced in this section.
2. Underwriters Laboratories (UL) - UL wires and Cables.

1.03 QUALITY ASSURANCE:

A. Installer Qualifications: Installer shall have had considerable experience and demonstrated ability in the installation of irrigation system(s) of specified type(s) in a neat, orderly, and responsible manner in accordance with recognized standards of workmanship.

B. Special Requirements:

1. Tolerances - Specified depths and separations of pressure supply lines and laterals and pitch of pipes are minimums. Settlement of trenches is cause for removal of finish grade treatment and repair of finished grade treatment.
2. Coordination with Other Contracts - Protect, maintain, and coordinate Work with Tasks under other sections.
3. Damage to Other Improvements - Contractor shall replace or repair damage to grading, soil preparation, seeding, sodding, or planting done under other Sections during work associated with installation of irrigation system at no additional cost to the Owner.
4. Work involving substantial plumbing for installation of pump station, backflow preventers, copper service, and related work shall be executed by licensed and bonded plumber(s), performed in accordance with all prevailing codes and regulations.
5. Work involving connection to, installation, or extension of 120-volt or greater electrical service shall be executed by a licensed and bonded electrician, performed in accordance with all prevailing codes and regulations.

D. Irrigation Control System Procedures:

1. Contractor shall be responsible to provide and install all specified control equipment to result in a complete and working system, whether or not all appurtenances are shown on plans. System shall include controllers; all grounding and surge protection; master valves; and weather communication source.

1.04 SUBMITTALS:

A. Submittals: Prepare and make submittals in accordance with conditions of the Contract prior to installation.

B. Construction Record Drawings:

1. Contractor shall draw lateral piping, controller station numbers, and all other record information on the Field Record. The Field Record plan(s) shall be available at the Project Site for review. Upon completion of Project, Contractor shall submit Field Record Plan for review, prior to final acceptance. Dimension from two permanent points of reference, (building corners, sidewalks, road intersections, or permanent structures), location of the following items:
   a. Routing of pressure supply lines (dimension every 100 feet along the routing).
   b. Electric control valves.
   c. Control wire routing (if not with pressure supply line).
   d. Record plans shall be to same scale and in the same format as designed plans.
2. Prior to scheduling walk-through for substantial completion, Contractor is to submit all Field Record information to the Owner for approval.
3. Contractor shall also provide both a hard copy and Electronic Form version of the Controller Data Sheets to the Consultant.

C. Controller Charts: Do not prepare controller charts until record (as-built) drawings have been approved by the Consultant.

1. Provide controller chart, automatic controller.

   a. Controller drawing may be same size reproduction of the record drawing, if scale permits fitting them inside the controller door without folding drawing. If photo reduction prints are required, keep reproduction to maximum size possible to retain full legibility. Chart may also be Controller Data Sheet as for central-satellite systems, if approved by Consultant.
   b. Controller chart shall be bond print of actual as-built system, showing area covered by that controller; or Controller Data Sheet showing information on each station, and with complete description of each station's location.
   c. Identify area of coverage of each remote control valve, using a distinctly different pastel color for each zone. Highlight heads, lateral piping, and control valves.
   d. Following review of controller drawings by Consultant, hermetically seal each chart between two layers of 20 mm thick clear plastic.
   e. Controller chart shall be completed and approved by Consultant prior to final completion walk-through of irrigation system.
   f. Attach approved controller chart to inside of each controller door using self adhesive Velcro strips.
2. Following installation of each controller, contractor shall record all station data on a "Data Sheet" provided by the Consultant. This data shall include the type and quantity of irrigation devices on each station, nozzle type, arc, area of control (turf, trees, shrubs, etc), valve size, gpm, location, etc. as shown on the Data Sheet.
3. Prior to final walk-through for each area of the project, Contractor shall confirm that the following has been accomplished:
   a. Construction record drawings per 1.04.1.
   b. Data Sheets for Controllers.

E. Operational Manual: Submit 3 sets of Operations Manual to Consultant for approval, prior to scheduling the final completion walk-through. Manual is to include the following in a 1 x 3 ring binder:

1. Index sheet stating project name, and listing Contractor name, address, phone number, and contact person. Include same information for Primary Sub-Contractors.
2. Manufacturer cut sheets for all material components of irrigation system. Highlight or circle specific models or items.

1.05 DELIVERY, STORAGE and HANDLING:

A. Deliver, unload, store and handle materials, packaging, bundling, products, in dry conditions, or a weatherproof manner, to prevent damage, breakage, deterioration, intrusion, ignition, and vandalism. Deliver in original unopened packaging containers prominently displaying manufacturer name, volume, quantity, contents, instructions, and conformance to local, state, and federal law. Remove and replace cracked, broken, or contaminated items or elements prematurely exposed to moisture, inclement weather, snow, ice, temperature extremes, fire, or job site damage.

B. Handling of PVC Pipe: Exercise care in handling, loading and storing of PVC pipe. All PVC pipe shall be transported in a vehicle which allows the entire length of pipe to lie flat so as not to subject it to undue bending or concentrated external loads. All sections of pipe that have been dented or damaged shall be discarded, and if installed, shall be removed and replaced with new piping.

1.06 JOBSITE CONDITIONS:

A. Protection of Property:

1. Preserve and protect all trees, plants, monuments, structures, and paved areas from damage due to Work in this Section. In the event damage does occur, all damage to inanimate items shall be completely repaired or replaced to the satisfaction of the Owner. All injuries to living plants shall be repaired by the Owner, and all costs of such repairs shall be charged to and paid by the Contractor.
2. Protect buildings, walks, walls, and other property from damage. Flare and barricade open ditches. Damage caused to asphalt, concrete, or other building material surfaces shall be repaired or replaced at no cost to the Owner. Restore disturbed areas to original condition.

B. Existing trees:

1. All trenching or other Work under limb spread of any and all evergreens or low branching deciduous material shall be done by hand or by other methods so as to prevent damage to limbs or branches.

C. Protection and Repair of Underground Lines: Request proper utility company to stake exact location (including depth) of all underground utilities. Take whatever precautions necessary to protect these underground lines from damage. In the event damage does occur, all damages shall be repaired by Contractor unless other arrangements have been made.

D. Replacement of Paving and Curbs: Where trenches and lines cross existing roadways, paths, curbing, etc., damage to these shall be kept to a minimum and shall be restored to original condition.

1.07 WARRANTY / GUARANTEE:

A. Contractor shall warrant materials against defects for a period of one year from the date of Substantial Completion. Contractor shall guarantee workmanship for similar period. Contractor shall be responsible for coordinating material warranty items with the manufacturer / distributor.
B. Settling of backfilled trenches which may occur during guaranty period shall be repaired by Contractor at no expense to the Owner, including complete restoration of damaged property.
C. Expenses due to vandalism before substantial completion shall be borne by Contractor.
D. Owner or representative maintenance company will maintain turf and planting areas during warranty period, so as not to hamper proper operation of the irrigation system.

1.08 MAINTENANCE:

A. Furnish the following maintenance items to Owner prior to final Acceptance:

1. 2 sets of special tools required for moving, disassembling, and adjusting each type of sprinkler head and valve supplied on this project.
2. 2 keys for each automatic controller.

1.09 EXTRA STOCK:

A. In addition to installed system furnish the following items to Owner:
1. 4 per 100 installed drip emitters of each type used.
2. 2 pop-up heads of each type used.

PART 2 - PRODUCTS

2.01 MATERIALS:

A. General piping:

Note: All piping for reclaimed water systems shall be purple colored, or wrapped with reclaimed "sock" or reclaimed marking tape, and main lines shall have detectable reclaimed marking tape in trench 12" above top of pipe continuously.

1. Pressure Supply Lines (downstream of Pump Station) - Sch. 40 PVC, Solvent Weld Belled End for 2-1/2" or smaller, and rubber-ring joint for 3" and larger with ductile iron fittings and taps.
2. Non-pressure lines - Sch. PVC, Solvent Weld Belled End.
3. Drip Piping - ¾" Sch. 40, Solvent Weld unless otherwise specified on plans.
4. Emitter Tubing - by emitter manufacturer.

B. Plastic Pipe and Fittings:

1. Identification Markings:
   a. All pipe to be identified with following indelible markings:
      1) Manufacturer's Name.
   b. All fittings including valve taps for rubber-ring pipe shall be cast or ductile iron, rubber-ring for PVC.
2. Solvent Weld Pipe - Manufactured from virgin polyvinyl chloride (PVC) compound in accordance with ASTM D2241 and ASTM D1784; cell classification 12245-B, Type 1, Grade 1.

   a. Fittings - Standard weight, Schedule 40, injection molded PVC; complying with ASTM D1784 and D2466, cell classification 12454-B.
      1) Threads - Injection molded type (where required).
      2) Tees and ells - Side gated.
   b. Threaded Nipples - ASTM D2464, Schedule 80 with molded threads.
   c. Joint Cement and Primer - Type as recommended by manufacturer of pipe and fittings.

C. Low Pressure / Volume Systems:

1. Emitters as indicated on drawings.
2. Drip Piping - manufactured of polyvinyl chloride compound conforming to ASTM D2241 and ASTM D1784, Type 1, Grade 1.
3. Fittings - Schedule 40 PVC, or as recommended by piping manufacturer.
4. Drip Valve Assembly - Type and size shown on drawings.
   a. Wye Strainer - Plastic / Fiberglass construction with 150 mesh nylon screen and blow out assembly.
   b. Control Valve - 2-way, solenoid pilot operated type made of synthetic, non-corrosive material; diaphragm-activated and slow closing. Include freely pivoted seat seal; retained (mounted) without attachment to diaphragm.
   c. Pressure Regulator - Plastic / Fiberglass construction, preset type with pressure setting per drawings.

D. Copper Pipe and Fittings:

1. Copper Pipe - Type K hard tempered.
2. Fittings - Wrought copper, solder joint type.
3. Joints - Soldered with solder, 45% silver, 15% copper, 16% zinc, and 24% cadmium and solids at 1125 F and liquids at 1145 F.

E. Brass Pipe and Fittings:

1. Fittings - Medium brass, screwed 125 pound class.
2. Brass Pipe - 85% red brass, AMSI Schedule 40 screwed pipe.

G. Valve Boxes:

1) Note: All box covers for reclaimed water systems shall be purple colored, and marked for reclaimed. Nominal pipe size.
2) Schedule or class.
3) Pressure Rating.
4) NSF (National Sanitation Foundation) seal of approval.
5) Date of extrusion.

Otherwise, valve box color to be selected based upon a review of the location and adjacent material by Owner and Landscape Architect prior to installation.

1. Drip Line Blow-out Stubs, and Wire Stub Box - Carson #910-12.
2. 1-inch through 2-inch Control Valves - Carson #1419-13B.
3. Drip Valve Assemblies - Carson #1419-13B.
4. Control Wiring Splices - Carson #910-12.
5. Main Line Gate Valves - Carson #910-12.
6. Air-Relief Valves - Carson #1419-13B.
7. Manual Drain Valves - Carson #1419-13B.
8. Master Control Valve - As shown on detail.

H. Electrical Control Wiring:
1. Low Voltage:
   a. Electrical Control Wire - Hunter two-wire.
   b. If multiple controllers are utilized, a different two wire for each controller.
2. High Voltage: Type required by local codes and ordinances, of proper size to accommodate needs of equipment serviced.

I. Sprinkler Heads: As shown on drawings. Use Purple caps or nozzles for Reclaimed Water use.
K. Electric Control Valves: As noted on drawings. Purple handles for Reclaimed Water use. Install pressure regulating devices where specified on plans.
L. Pipe Bedding Material: Construction grade sand approved by Consultant.
M. Automatic Controller: As shown on drawings. Provide two (2) remote control units (compatible as specified by Owner) as part of the work.
N. Manual Drain Valve: As shown on drawings.
O. Air-Relief Valve: As shown on drawings.
P. Master Control Valve: As shown on drawings.
Q. Pump Station: As shown on drawings.

PART 3 - EXECUTION

3.01 INSPECTION:

A. Examine areas and conditions under which Work of this Section is to be performed. Do not proceed with Work until unsatisfactory conditions have been corrected.
B. Grading operations, with the exception of final grading, shall be completed and approved by Owner prior to staking or installation of any portion of irrigation system except sleeving.

3.02 PREPARATION:

A. Staking Shall Occur as Follows:
1. Mark with powdered lime or marking paint routing of pressure supply lines, and flag heads and control valve locations for first series of zones for approval.
B. Sleeving: Install sleeving under all asphalt paving and concrete walks, prior to the installation of concrete or paving operations, to accommodate piping and wiring. Compact backfill around sleeves to 95% Standard Proctor Density within 2% of optimum moisture content in accordance with ASTM D1557.
C. Trenching: Trench excavation shall follow, as much as possible, layout shown on Drawings. Dig trenches straight, and support the pipe continuously on the bottom of trench. Trench bottom shall be clean and smooth with all rock and organic debris removed. Pressure supply line trenches shall be over-excavated as required to allow for bedding material. Trench depth shall be uniform as required to meet minimum depth requirements for the type of piping being installed.

1. Clearances:
   a. Piping smaller than 3 inches - Trenches shall have a minimum width of 7 inches. 12 inches for 3" and larger pipe.
   b. Line clearance - Provide not less than 6 inches of clearance between each line, and not less than 12 inches of clearance between lines of other trades.
   c. For Reclaimed Water systems, 2-foot vertical (below) and 6-foot horizontal separations from potable lines are required per MAG and industry standards.

2. Pipe and Wire Depth:
   a. Pressure Supply Piping - 24 inches from top of pipe (30 inches where 6" and larger pipe is on project).
   b. Non-pressure piping - 12 inches from top of pipe.
   c. Two-wire - Side and bottom of pressure supply line.
   d. Drip Piping - 12 inches from top of pipe.
   e. Emitter tubing - 12 inches from top of pipe (non slope plantings). 4 inches from the top of pipe (slopes 2:1 of greater).

3.03 INSTALLATION:

A. Other Equipment: Locate other equipment as near as possible to location designated on construction drawings. Deviations shall be approved by Consultant prior to installation.
B. PVC Piping:
1. Snake pipe in trench as much as possible to allow for expansion and contraction.
2. When pipe laying is not in progress, or at end of each day, close pipe ends with tight plug or cap. (Perform work in accordance with good practices prevailing in piping trades).
3. Coordinate pressure supply line installation with required bedding operations. Concrete thrust blocks or steel joint restraints shall be utilized for all rubber-ring joint fittings per industry standards. In sandy soil, mechanical joint fittings shall be used with thrust blocks.
4. Stake all above-grade PVC piping per details.
5. Use 45-degree ells when making perpendicular crossings of above-grade PVC piping, to depress bottom pipe.
6. Lay pipe and make all plastic-to-plastic joints in accordance with manufacturer's recommendations.

C. Drip Piping:
1. Install fitting connections per manufacturer's recommendations.
2. Use threaded risers and Sch. 40 or Sch. 80 fittings per details when making connections in drip piping for emitters and fittings.
3. Install drip line blow-out stubs at all dead ends of drip piping.
4. Any deviations from drip pipe routing shown on drawings must be approved by Consultant prior to installation.

D. Control Wiring:
1. Low Voltage Wiring (Two Wire):
   a. Bury control wiring between controller and electric valves in pressure supply

(1-800-321-ALERT)
Know what's below. Call before you dig.

SPECIFICATIONS

L-9.02 SHEET 43 OF 44

line trenches, with wires consistently located to one side of pipe, on top of initial pipe bedding, or in separate trench.

a. Provide an expansion loop at pressure supply line angle fittings, every electric control valve location (in valve box), and at minimum 500 feet intervals. Form expansion loop by wrapping wire at least 8 times around a 1-inch pipe and withdrawing pipe.
b. Make splices and electric control valve connections using DBY connectors or similar dry splice method.
c. Install two wire splices not occurring at control valve in a separate splice valve box.

2. High Voltage Wiring for Automatic Controller:
   a. Provide 120-volt power connection to automatic controller.

E. Automatic Controller:
1. Install controller in accordance with manufacturer's instructions as detailed and where shown on Drawings.
2. Connect remote control valves to controller in numerical sequence as shown on Drawings.
3. Final location of controller shall be approved by Consultant prior to installation.
4. Each controller shall have a dedicated separate ground wire and surge protection.
5. Above-ground conduit shall be rigid galvanized steel with appropriate fittings. Below-ground conduit shall be Schedule 40 PVC.

F. Drip Valve Assemblies: Install drip valve assembly as detailed.

G. Drip Emitters: Install drip emitters as detailed.

H. Valve Boxes:
1. Install one valve box for each type of valve installed as detailed flush with grade for all sodded areas, and above-grade for all seeded areas.
2. Valve box extensions are not acceptable, except for master valve.
3. Install gravel sump after compaction of all trenches. Valve box to rest on gravel sump. Place final portion of gravel inside valve box after valve box is backfilled and compacted.
4. Install “Christy” stainless steel or 2.5” x 5” plastic valve label tags for each valve box (1-800-258-4583). Entire controller & station number shall be printed on each tag. Letter and number size shall be no smaller than 1/8 inch and no greater than ¼ inches. Label each valve box as follows:
   a. Control valves - Controller letter and station number.
   b. Quick Coupler Valves - Label “QCV.”
   c. Wire Splices - Label wire splices with the letters “W.S.”
   d. Drip Piping Blow-our Stubs - Controller letter and station number of each drip piping blow-out.
   e. Gate Valves - Label with letters “GV” typical.
   f. Air-Relief Valves - Label with letters “ARV” typical.
   g. Manual Drain Valve - Label with letters “MDV.”
5. Valve box color to be selected based upon a review of the location and adjacent material by Owner and Landscape Architect prior to installation. These guidelines are typical of all installations unless water source is effluent. In that case all valve boxes no matter the location are to be purple in color and meet all applicable codes and ordinances.

I. Pump Station: Install as detailed on Drawings.

J. Electric Control Valves:

1. Install top of cross handle a maximum of 3 inches below finished grade where shown on Drawings and as detailed.
2. When grouped together, allow a minimum of 12 inches between valve box sides.
3. Space control valves accordingly.
4. Install each remote control valve in a separate valve box.
5. Install valve boxes flush with grade.
6. When parallel to roadway, sidewalk or other permanent element or structure, control valve and box are to be installed perpendicular to element or structure, spaced equally.
7. For athletic areas such as football fields where concrete curbs exist, place the electric valves within one foot of the curb (no further into the playfield).

K. Main Line Gate Valves: Install as detailed on Drawings.

L. Air-Relief Valves: Install as detailed on Drawings.

M. Control Wiring:

1. All control wiring to be laid to bottom and side of pressure supply line trench. Separate wire trenches will not be allowed unless approved by Consultant prior to installation.

N. Backfilling: Do not begin backfilling operation until required system tests have been completed. Backfill shall not be done in freezing weather except with prior written approval by Consultant. Leave trenches slightly mounded to allow for settlement after backfilling is complete. Trenches shall be finished graded prior to walk-through of system by Consultant.

1. All pressure supply lines shall be bedded with construction grade sand 4 inches below invert of pipe, to 6” above top of pipe and width of trench when site conditions are rocky or otherwise unfavorable.
2. Materials: Excavated material is generally considered satisfactory for backfilling purposes after completing bedding requirements. Backfill materials shall be free of rubbish, vegetative matter, frozen materials, and stones larger than 2 inches in maximum dimension. Do not mix subsoil with topsoil. Material not suitable for backfill shall be hauled away. Contractor shall be responsible for providing suitable backfill if excavated material is unacceptable, or not sufficient to meet backfill, compaction, and final grade requirements.
3. Do not leave trenches open for a period of more than 48 hours. Open excavations shall be protected in accordance with OSHA regulations.
4. Compact backfill to 90% maximum density in 6” lifts, determined in accordance with ASTM D155-7 utilizing the following methods:

   a. Mechanical tamping.
   b. Puddling or ponding. Puddling or ponding and/or jetting is prohibited within 10’-0” of building or foundation walls.

S. Piping Under Paving:

1. Provide for a minimum cover of 24 inches between the top of the pipe and the bottom of the aggregate base for all pressure and non-pressure piping installed under asphalt concrete or concrete paving. Provide sleeving as required by municipality, or as shown on plans.
2. Piping shall be bedded with construction grade sand - 6 inches below pipe to 6 inches above pipe and the width of the trench.
3. Compact backfill material in 6-inch lifts at 95% maximum density determined in accordance with ASTM D1557 using manual or mechanical tamping devices.
4. Set in place, cap, and pressure test all piping under paving, in presence of Consultant or Owner prior to backfilling and paving operations.
5. Piping under existing walk or concrete pavement shall be done by jacking, boring, or hydraulic driving, but where cutting or breaking of walks and/or concrete is necessary, it shall be done and replaced at no cost to the Owner. Obtain permission and prior approval from Owner to cut or break walks and / or concrete.

3.04 FIELD QUALITY CONTROL:

A. Flushing: After piping, risers, and valves are in place and connected, but prior to installation of emitter heads, quick coupler valves, and air relief valves, thoroughly flush piping system under full head of water pressure from dead end fittings. Maintain flushing for 5 minutes through furthestmost valves. Cap riser after flushing.

B. Testing: Conduct tests in presence of Consultant. Arrange for presence of Consultant a minimum of 48 hours in advance of testing. Supply force pump and all other test equipment.

1. After backfilling, and installation of all control valves & quick coupler valves, fill pressure supply line with water, and pressurize to 40 PSI over the designated static pressure or 120 PSI, whichever is greater, for a period of 2 hours.
2. Leakage, Pressure Loss: Test is acceptable if no leakage or loss of pressure is evident during test period.
3. Leaks: Detect and repair leaks.
4. Retest system until pressure can be maintained for the duration of the test.
5. Before final acceptance, pressure supply line shall remain under pressure for a period of 48 hours.

C. Walk-Through for Substantial Completion:

1. Arrange for Consultant's presence a minimum of 48 hours in advance of walk-through.
2. Entire System shall be completely installed and operational prior to scheduling of walk-through. All sodded areas are to be complete with head height and valve boxes adjusted accordingly.
3. Operate each zone in its entirety for Consultant at time of walk-through, and open all valve boxes.
4. Consultant shall generate a list of items to be corrected prior to Final Completion (“Punch List”).
5. Furnish all materials and perform all Work required to correct all inadequacies due to deviations from Contract Documents, and as directed by Consultant.
6. During walk-through, expose all drip emitters and sprinklers under operations for observation by Consultant to demonstrate that they are performing and installed as designed; prior to placing of all mulch material. Schedule separate walk-through if necessary.

D. Walk-Through for Final Completion:

1. Arrange for Consultant's presence a minimum of 48 hours in advance of walk-through.
2. Show evidence to Consultant that Owner has received all accessories, charts, record drawings, and equipment as required before Final Completion walk-through is scheduled.
3. Operate each zone identified as deficient at substantial completion walk-through for Consultant to review at time of final completion walk-through to ensure correction of all incomplete items.
4. Items deemed not acceptable by Consultant shall be reworked to the complete satisfaction of Consultant.
5. If after request to Consultant for a walk-through for Final Completion of the irrigation system, Consultant finds items during walk-through to be deficient, Contractor shall be charged for all subsequent walk-throughs. Funds will be withheld from final payment and/or retainage to Contractor, in amount equal to additional time and expenses required by Consultant to conduct and document further walk-throughs as deemed necessary to ensure compliance with Contract Documents.

3.05 ADJUSTING:

A. Upon substantial completion of installation, fine-tune entire system by regulating valves, adjusting spray patterns and break-up arms/screws, and setting pressure reducing valves or throttling electric valve flow control stems to proper pressure settings to provide optimum and efficient coverage. Flush and adjust all sprinkler heads for optimum performance and to prevent overspray onto walks, roadways, and buildings as much as possible. Heads of same type shall be operating at same pressure +/- 7%.
B. If it is determined that irrigation adjustments will provide proper and more adequate coverage, make such adjustments prior to Final Acceptance, as directed, at no additional cost to Owner. Adjustments may also include changes in nozzle sizes, degrees of arc, and control valve throttling.
C. All sprinkler heads shall be set perpendicular to finish grade unless otherwise designated.
D. Areas which do not conform to designated operation requirements due to unauthorized changes or poor installation practices shall be immediately corrected at no additional cost to the Owner.

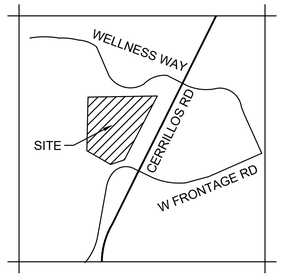
SPECIFICATIONS

L-9.03

SHEET 44 OF 44



LANDSCAPE PLANS
FOR
BUNGALOWS
AT CERRILLOS - PHASE 2
SANTA FE, NEW MEXICO

GENERAL CONSTRUCTION NOTES:

1. THESE NOTES ARE TO BE USED FOR GENERAL REFERENCE IN CONJUNCTION WITH, AND AS A SUPPLEMENT TO THE WRITTEN. SPECIFICATIONS, APPROVED ADDENDA, AND CHANGE ORDERS ASSOCIATED WITH THESE LANDSCAPE IMPROVEMENT DOCUMENTS.
2. CONTRACTOR SHALL BE RESPONSIBLE FOR SECURING ALL NECESSARY PERMITS AND SHALL NOTIFY ALL UTILITY COMPANIES WITH UTILITIES ON SITE PRIOR TO THE CONSTRUCTION OF THE PROJECT. CONTRACTOR SHALL ADHERE TO ALL APPLICABLE LOCAL, STATE AND/OR FEDERAL LAWS OR REGULATIONS PERTAINING TO THE PROJECT.
3. IN ALL CASES WHERE A CONFLICT MAY OCCUR, SUCH AS BETWEEN ITEMS COVERED IN SPECIFICATIONS AND NOTES ON THE DRAWINGS, OR BETWEEN GENERAL NOTES AND SPECIFIC DETAILS, THE LANDSCAPE ARCHITECT SHALL BE NOTIFIED AND HE OR SHE WILL INTERPRET THE INTENT OF THE CONTRACT DOCUMENTS.
4. A QUALIFIED SUPERVISOR SHALL BE PRESENT ON SITE AT ALL TIMES DURING CONSTRUCTION.
5. DETAILS NOTED AS "TYPICAL" SHALL APPLY IN ALL CASES UNLESS SPECIFICALLY SHOWN OR NOTED OTHERWISE.
6. LANDSCAPE CONTRACTOR SHALL INSPECT WITH THE OWNER'S AUTHORIZED REPRESENTATIVE AND/OR OWNER ALL EXISTING CONDITIONS PRIOR TO THE START OF ANY WORK. THE CONTRACTOR SHALL BE RESPONSIBLE UNDER THIS CONTRACT TO REPAIR AND/OR REPLACE, AT THEIR OWN EXPENSE, ANY STRUCTURES, FENCES, WALLS, PLANT MATERIAL, OR OTHER ITEMS DESTROYED DURING CONSTRUCTION. LIKEWISE THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRING AND/OR REPLACING ANY AND ALL DAMAGES TO ADJACENT PROPERTIES OR ANY OTHER AREAS OUTSIDE THE CONTRACT LIMITS. THE DAMAGED ITEMS/AREAS WILL BE RESTORED TO THEIR ORIGINAL CONDITION TO THE SATISFACTION OF THE OWNER'S AND/OR OWNER'S AUTHORIZED REPRESENTATIVE.
7. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO COORDINATE ALL PLANT MATERIAL LOCATIONS WITH OTHER TRADES PRIOR TO INSTALLATION. THE CONTRACTOR SHALL FAMILIARIZE THEMSELVES WITH THE LOCATIONS OF EXISTING AND FUTURE UNDERGROUND SERVICES AND IMPROVEMENTS WHICH MAY CONFLICT WITH THE WORK TO BE DONE. PRIOR TO THE START OF WORK, ALL UNDERGROUND UTILITIES ARE TO BE LOCATED AND PROTECTED. CONTRACTOR IS RESPONSIBLE FOR THE INITIAL CALL AND FUTURE UPDATES TO BLUE STAKE AT 602-263-1100. EXISTING UNDERGROUND SERVICES SHALL NOT BE DISTURBED OR REMOVED WITHOUT APPROVAL OF THE OWNER'S AND/OR OWNER'S AUTHORIZED REPRESENTATIVE, UNLESS SPECIFICALLY NOTED OTHERWISE ON DRAWINGS.
8. CONTRACTOR SHALL PROVIDE BARRICADES AND TRAFFIC CONTROL ALONG PUBLIC STREETS IF REQUIRED DURING CONSTRUCTION.
9. PLANTING AND IRRIGATION DESIGN MAY BE MODIFIED TO ADAPT TO WALK CONFIGURATIONS THAT DIFFER FROM THESE PLANS, AND DUE TO GRADE LIMITATIONS ON SITE.
10. REFER TO ENGINEERING PLANS FOR DRAINAGE FLOWS. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE THAT THESE ARE PROVIDED FOR AND NOT IMPAIRED WITH OBSTRUCTIONS.
11. NO PART OF THE CONTRACT DOCUMENTS ARE INTENDED TO BE IN VIOLATION OF CODES. IF DISCREPANCIES EXIST, NOTIFY LANDSCAPE ARCHITECT AND OWNER IMMEDIATELY.
12. COORDINATE AND COOPERATE WITH ALL CONTRACTORS OF ATTACHED, ADJOINING AND/OR INTERFACING WORK TO INSURE ORDERLY AND EFFICIENT COMPLETION OF ALL WORK.
13. ALL CONSTRUCTION SHALL CONFORM TO ALL APPLICABLE CODES AND ORDINANCES (FEDERAL, STATE, LOCAL, AND HEALTH DEPARTMENTS), EXCEPT WHERE REQUIREMENTS OF CONTRACT DOCUMENTS ARE MOST STRINGENT.
14. ALL EXISTING PLANT MATERIAL SHALL REMAIN UNLESS OTHERWISE NOTED.
15. ANY PLANT MATERIAL THAT MUST BE REMOVED DUE TO CONSTRUCTION MUST BE APPROVED BY OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE. NOTIFY OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE AT LEAST 48 HOURS PRIOR TO REMOVAL AND/OR RELOCATION OF ALL PLANTS.
16. IF ANY EXISTING PLANT MATERIAL THAT IS TO REMAIN IS DAMAGED BY CONTRACTOR, THE CONTRACTOR SHALL REPLACE THE DAMAGED PLANT WITH A NEW ONE OF THE SAME SIZE AND VARIETY AT NO COST TO THE OWNER.
17. DO NOT DISTURB SOIL WITHIN BRANCH SPREAD OF TREES OR SHRUBS TO REMAIN WITHOUT APPROVAL OF THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE.
18. ANY DISCREPANCIES BETWEEN THE PLANS AND CONDITIONS ON SITE SHALL BE REPORTED IMMEDIATELY TO THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE.
19. CONTRACTOR SHALL PROVIDE OWNER WITH ALL WARRANTY INFORMATION, INSTRUCTION MANUALS AND ANY OTHER PRODUCT INFORMATION FOR ALL NEW EQUIPMENT OR MACHINERY INSTALLED ON THE SITE WITHIN TWO WEEKS AFTER SUBSTANTIAL COMPLETION.
20. NO DESIGN MODIFICATIONS SHALL BE MADE WITHOUT THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE APPROVAL.
21. CONTRACTOR SHALL BE RESPONSIBLE FOR HAULING AND LEGALLY DISPOSING OF MATERIALS DESIGNATED TO BE REMOVED. PROVIDE RECEIPTS FOR DUMPING TO OWNER FOR THEIR FILES.
22. ALL BASE INFORMATION IS FROM OTHER PROJECT TEAM MEMBERS AS LISTED IN THE 'PROJECT TEAM' LIST ON THIS SHEET. A THOROUGH ATTEMPT HAS BEEN MADE TO KEEP UP TO DATE WITH THE MOST CURRENT BASE INFORMATION. HOWEVER, DISCREPANCIES MAY EXIST BETWEEN THESE PLANS AND OTHER TEAM MEMBERS PLANS. IN ALL CASES THE ENGINEERS PLANS SHALL HAVE PRECEDENCE OVER THE LANDSCAPE PLANS FOR FINAL PROJECT CONFIGURATION.
23. ALL SIDEWALKS SHOWN ON THESE PLANS ARE FOR REFERENCE ONLY. REFER TO CIVIL ENGINEERING PLANS FOR FINAL LAYOUT, GRADES, FINISHES, DETAILS, AND METHODS OF CONSTRUCTION. RVi UNDER NO CIRCUMSTANCES ASSUMES RESPONSIBILITY FORUNFORESEEN CONFLICTS, ENGINEERING, STRUCTURAL CALCULATIONS, OR INSTALLATION THAT IS BEYOND OUR CONTROL.
24. SIGHT LINES AND VISIBILITY TRIANGLES ARE SHOWN ON THESE PLANS FOR REFERENCE ONLY. REFER TO ENGINEERING PLANS ORGOVERNING MUNICIPALITY FOR SPECIFIC GUIDELINES. IN CASES WHERE THERE IS MORE THAN ONE GOVERNING BODY, THE MOST RESTRICTIVE GUIDELINE SHALL PREVAIL.
25. ALL WALLS AND VERTICAL SITE FEATURES DESIGNED IN THE INTEREST OF THIS PROJECT ARE SCHEMATIC IN NATURE. POTENTIAL CONSTRUCTION DETAILING AND TECHNIQUES ARE SHOWN FOR DESIGN INTENT CLARIFICATION ONLY. THE CONTRACTOR SHALL HAVE THE ULTIMATE RESPONSIBILITY TO ENSURE THAT ALL CONSTRUCTED ELEMENTS ON THIS PROJECT ARE STRUCTURALLY SOUND AND ARE BUILT WITHIN ALL APPLICABLE CITY, STATE, AND FEDERAL GUIDELINES. RVi UNDER NO CIRCUMSTANCES ASSUMES RESPONSIBILITY FOR UNFORESEEN CONFLICTS, ENGINEERING, STRUCTURAL CALCULATIONS, OR INSTALLATION.
26. SHOP DRAWING REVIEWS WILL BE DONE TO ENSURE THAT PRODUCT DATA, MATERIALS, AND SAMPLES MEET OR EXCEED THE ORIGINAL DESIGN INTENT OF THESE DRAWINGS ONLY. RVi UNDER NO CIRCUMSTANCES ASSUMES RESPONSIBILITY FOR UNFORESEEN CONFLICTS, ENGINEERING, STRUCTURAL CALCULATIONS OR INSTALLATION RESULTING FROM THE PRODUCTION OF ANY SHOP DRAWINGS.

Number of Evergreen Shrubs Provided:	882

GENERAL SCOPE OF WORK:

1. THE SCOPE OF WORK FOR THIS PROJECT INCLUDES COMPLETE LANDSCAPING IMPROVEMENTS AS SHOWN ON THE DRAWINGS AND AS SPECIFIED HEREIN. VERIFY QUESTIONS ON SCOPE OF WORK PRIOR TO SUBMITTING A BID.
2. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS INCLUDING WATER, EQUIPMENT AND INCIDENTALS AS SHOWN, SPECIFIED AND REQUIRED TO PERFORM LANDSCAPING WORK. THE EXTENT OF THE LANDSCAPING WORK IS SHOWN ON THE DRAWINGS AND IN THE SCHEDULES. THE TYPES OF LANDSCAPING REQUIRED MAY INCLUDE THE FOLLOWING:
   A. AESTHETIC FINISH GRADING
   B. BOULDER PLACEMENT
   C. INSTALLATION OF TREES, SHRUBS, GROUNDCOVERS, AND ANY OTHER NURSERY STOCK
   D. INSTALLATION OF TURF AREAS
   E. DECOMPOSED GRANITE AND PRE-EMERGENT APPLICATIONS (2)
   F. MULCHES, AND ALL OTHER MATERIAL NECESSARY TO COMPLETE THE PLANTING JOB AS SPECIFIED
   G. MISCELLANEOUS LANDSCAPE MATERIALS AND IMPROVEMENTS
   H. FERTILIZERS AND SOIL AMENDMENTS
   I. MAINTENANCE WORK AS SPECIFIED UNTIL COMPLETION OF THE CONTRACT
   J. GUARANTEES
3. OBTAIN ALL PERMITS AND PAY REQUIRED FEES TO ANY GOVERNMENTAL AGENCY HAVING JURISDICTION OVER THE WORK. ARRANGE INSPECTIONS REQUIRED BY LOCAL AGENCIES AND ORDINANCES DURING THE COURSE OF CONSTRUCTION AS REQUIRED.
4. COORDINATE AND COOPERATE WITH OTHER CONTRACTORS WORKING ON THE SITE FOR SUCCESSFUL COMPLETION OF THE PROJECT.
5. BEFORE COMMENCING WORK ON THE SITE, BECOME THOROUGHLY ACQUAINTED WITH LAYOUT OF ALL UNDERGROUND UTILITIES AND STRUCTURES OVER THE ENTIRE SITE. ALL REQUISITE REPAIRS TO DAMAGE CAUSED BY WORK OF THIS SECTION SHALL BE AT THE CONTRACTOR'S EXPENSE.
6. THE IRRIGATION WORK CONSISTS OF INSTALLING A COMPLETE UNDERGROUND SPRINKLER, EMITTER, AND BUBBLER SYSTEM FOR ALL TURF AND LANDSCAPED AREAS AS SHOWN ON THE DRAWINGS AND AS HEREINAFTER SPECIFIED, INCLUDING THE FURNISHING OF ALL LABOR, EQUIPMENT, APPLIANCES, AND MATERIALS INCLUDING WATER AND IN PERFORMING ALL OPERATION IN CONNECTION WITH THE CONSTRUCTION OF THE IRRIGATION SYSTEM. WORK SHALL INCLUDE FURNISHING AND INSTALLING ALL PLASTIC AND COPPER PIPE AND FITTINGS, AUTOMATIC CONTROL VALVES, VALVE ACCESS BOXES, ELECTRIC COMPUTERIZED CENTRAL CONTROLLERS, ELECTRIC WIRE, TELEPHONE ACCESS LINE (IF REQUIRED), ETC., AS REQUIRED FOR A COMPLETE SYSTEM AS SHOWN ON THE DRAWINGS AND AS CALLED FOR IN THESE SPECIFICATIONS OR AS MAY BE REQUIRED FOR PROPER OPERATION OF THE SYSTEM. THE CONTRACTOR IS RESPONSIBLE FOR ALL COSTS OF WATER USED IN CONNECTION WITH THE INSTALLATION OF THE IRRIGATION SYSTEM.
7. UNLESS OTHERWISE SPECIFIED OR INDICATED ON THE DRAWINGS, THE CONSTRUCTION OF THE IRRIGATION SYSTEM SHALL INCLUDE THE FURNISHING, INSTALLING AND TESTING OF ALL MAINS, LATERALS, RISERS, AND FITTINGS, THE FURNISHING AND INSTALLING OF IRRIGATION HEADS, CONTROL VALVES, CONTROLLERS, LOW AND HIGH VOLTAGE ELECTRIC WIRE, TELEPHONE ACCESS LINE TO CENTRAL CONTROL UNIT (IF REQUIRED), POINT OF CONNECTION, CONTROLS, RESTORATION OF EXISTING IMPROVEMENTS, EXCAVATION AND BACKFILL, AND ALL OTHER WORK IN ACCORDANCE WITH THE PLANS AND SPECIFICATIONS AS REQUIRED FOR A COMPLETE SYSTEM.
8. WHENEVER ANY MATERIAL IS SPECIFIED BY NAME AND/OR NUMBER, SUCH SPECIFICATIONS SHALL BE DEEMED TO BE USED FOR THE PURPOSE OF FACILITATING A DESCRIPTION OF THE MATERIALS AND ESTABLISHING QUALITY AND SHALL BE DEEMED AND CONSTRUED TO BE FOLLOWED BY THE WORDS "OR APPROVED EQUAL." NO SUBSTITUTIONS WILL BE PERMITTED WHICH HAVE NOT BEEN SUBMITTED FOR APPROVAL PRIOR TO BIDDING.
9. LANDSCAPE CONTRACTOR SHALL CALL FOR "BLUE STAKE" AS REQUIRED. EXERCISE EXTREME CAUTION IN ALL PLANTING OPERATIONS, AS THERE MAY BE UNDERGROUND ELECTRIC AND TELEPHONE CABLES, SEWER LINES AND WATER LINES THROUGHOUT THE ENTIRE AREA. CONTRACTOR SHALL STUDY AND BE FAMILIAR WITH THE LOCATION OF THESE OBSTRUCTIONS AND UNDERGROUND UTILITIES. PLACE PLANTINGS WHERE SHOWN ON THE PLANS. IF THERE ARE OBSTRUCTIONS OR UNDERGROUND UTILITIES, RELOCATE PLANTS CLEAR OF ANY INTERFERENCE. LANDSCAPE CONTRACTOR SHALL REPAIR ALL DAMAGES CAUSED BY THEM TO OBSTRUCTIONS AND UNDERGROUND UTILITIES AT NO EXPENSE TO THE OWNER.
10. MAINTAIN UNINTERRUPTED WATER SERVICE TO BUILDING DURING NORMAL WORKING HOURS. ARRANGE FOR TEMPORARY WATER SHUT-OFF WITH ARCHITECT/ENGINEER DURING INSTALLATION OF IRRIGATION SYSTEM, IF NECESSARY.
11. ALL WORK AND MATERIALS TO BE IN FULL ACCORDANCE WITH THE LATEST RULES AND REGULATIONS OF SAFETY ORDERS OF DIVISION OF INDUSTRIAL SAFETY; THE UNIFORM BUILDING CODE, M.A.G. SPECIFICATIONS AND OTHER APPLICABLE LAWS OR REGULATIONS, INCLUDING ALL CITY CODES. NOTHING IN THESE SPECIFICATIONS IS TO BE CONSTRUED TO PERMIT WORK NOT CONFORMING TO THESE CODES. SHOULD THE CONSTRUCTION DOCUMENTS, OR INSTRUCTION, BE AT VARIANCE WITH THE AFOREMENTIONED RULES AND REGULATIONS, NOTIFY LANDSCAPE ARCHITECT AND GET INSTRUCTIONS BEFORE PROCEEDING WITH THE WORK AFFECTED. IF LANDSCAPE ARCHITECT IS NOT NOTIFIED OF ANY VARIANCE, IT SHALL BE UNDERSTOOD THAT THE CONTRACTOR ASSUMES ANY AND ALL RESPONSIBILITY FOR THE WORK DONE.
12. CLEAN UP SHALL BE MADE DAILY AS EACH PORTION OF THE WORK PROGRESSES. REFUSE AND EXCESS DIRT SHALL BE REMOVED FROM THE SITE, AND WALKS AND PAVING SHALL BE SWEPT OR WASHED DOWN DAILY. ANY DAMAGE SHALL BE REPAIRED TO ORIGINAL CONDITIONS AT CONTRACTOR'S EXPENSE. LEAVE WORK IN CLEAN CONDITION.
13. SUBMIT DETAILED OPERATION AND MAINTENANCE DATA FOR ALL EQUIPMENT AND ACCESSORIES PROVIDED UNDER THESE PLANS INCLUDING ASSEMBLY.

PLANTING WARRANTY & MAINTENANCE NOTES

1. MAINTAIN ALL AREAS INCLUDED IN THE CONTRACT ON A WEEKLY BASIS DURING THE PROGRESS OF WORK, A 90 DAY MAINTENANCE PERIOD, AND UNTIL THE FINAL ACCEPTANCE OF WORK IS RECEIVED IN WRITING.
2. UPON ACCEPTANCE AFTER THE 90 DAY MAINTENANCE PERIOD, THE CONTRACTOR SHALL FURNISH A WRITTEN WARRANTY ON ALL PLANT MATERIAL AGREEING TO GUARANTEE THE CONTINUED GROWTH OF ACTIVE PLANT MATERIAL FOR THE SPECIFIED GUARANTEE PERIODS. ALL GUARANTEE PERIODS COMMENCE FROM THE TIME OF FINAL ACCEPTANCE AT THE END OF THE MAINTENANCE PERIOD.
3. THE CONTRACTOR SHALL WATER AND MAINTAIN ALL LANDSCAPE MATERIAL DURING THE MAINTENANCE PERIOD. THE OWNER WILL WATER AND MAINTAIN THE LANDSCAPE MATERIAL DURING THE WARRANTY PERIOD. THE CONTRACTOR SHALL INSPECT THE LANDSCAPE MATERIALS PERIODICALLY DURING THE WARRANTY PERIOD AND SHALL NOTIFY THE OWNER IN WRITING, IF, IN THE CONTRACTOR'S OPINION, THE LANDSCAPE MATERIALS ARE NOT RECEIVING PROPER CARE.
4. ALL TREES, PALMS, CACTI, ACCENTS, AND TURF SHALL BE GUARANTEED FOR A MINIMUM PERIOD OF ONE (1) YEAR AND ALL SHRUBS, GROUNDCOVERS, AND OTHER NON SPECIFIED PLANT MATERIAL SHALL BE GUARANTEED FOR A PERIOD OF 90 DAYS FROM THE DATE OF FINAL ACCEPTANCE. THE GUARANTEE SHALL BE AGAINST DEFECTS INCLUDING DEATH AND UNSATISFACTORY GROWTH, EXCEPT FOR DEFECTS RESULTING FROM NEGLECT BY OWNER, ABUSE BY OTHERS, OR UNUSUAL PHENOMENA OR INCIDENTS WHICH ARE BEYOND THE LANDSCAPE CONTRACTOR'S CONTROL.
5. ANY PLANT MATERIALS WHICH ARE NOT APPROVED PRIOR TO OCTOBER 1 OF THE CALENDAR YEAR IN WHICH THEY ARE INSTALLED, SHALL BE FURTHER GUARANTEED UNTIL MAY 15 OF THE FOLLOWING CALENDAR YEAR.
6. ALL PLANT MATERIALS MUST BE MAINTAINED IN HEALTH AND VIGOR AND BE ALLOWED TO ATTAIN NATURAL SIZE AND SHAPE IN ACCORDANCE WITH THE ORIGINALLY APPROVED LANDSCAPE PLAN.
7. REFER TO BOOK SPECIFICATIONS, IF INCLUDED IN THIS DOCUMENT SET, FOR ADDITIONAL INFORMATION ON THE SPECIFICS OF THE ANTICIPATED WARRANTY.
8. LANDSCAPE CONTRACTOR SHALL PREPARE AND SUBMIT TO THE OWNER TYPEWRITTEN MAINTENANCE GUIDELINES AT FINAL WALK-THRU AND PRIOR TO FINAL ACCEPTANCE OF WORK.
9. IF TURF IS USED ON THIS PROJECT THE LANDSCAPE CONTRACTOR SHALL REAPPLY SEED OR SOD IN ALL AREAS WHICH HAVE DEVELOPED BARE SPOTS HALFWAY THROUGH THE MAINTENANCE PERIOD. AREAS WHICH CANNOT BE RESEEDED FOR SUMMER GROWTH DUE TO CONTRACTOR'S INABILITY TO RESEED DURING PROPER GROWING SEASON SHALL BE OVERSEEDED OR SODDED WITH GRASS APPROPRIATE FOR THE CURRENT SEASON, CARED FOR THROUGHOUT THE OFF SEASON, AND PROPERLY SEEDED AT THE NEXT APPROPRIATE GROWING SEASON. THESE ARRANGEMENTS MUST BE MADE WITH THE OWNER PRIOR TO CONDITIONAL ACCEPTANCE OF THE WORK AND MAY REQUIRE A MONETARY HOLD-BACK.
10. COST FOR REPLACEMENTS DURING THE WARRANTY PERIOD IS ASSUMED PART OF THE BID QUOTATIONS AND THEREFORE WILL NOT RESULT IN ANY ADDITIONAL COST TO THE OWNER OR LANDSCAPE ARCHITECT.

EXISTING LANDSCAPE NOTES

1. BEFORE WORK BEGINS ON THE PROJECT, THE LANDSCAPE CONTRACTOR SHALL SCHEDULE A PRE-CONSTRUCTION CONFERENCE WITH OWNER AND/OR THE GENERAL CONTRACTOR TO REVIEW THE PROJECT. THE OWNER AND/OR OWNER'S AUTHORIZED REPRESENTATIVE IS TO APPROVE ANY CHANGES PRIOR TO THE START OF ANY WORK.
2. ALL DEMOLITION AREAS SHALL BE FLAGGED FOR APPROVAL PRIOR TO DEMOLITION.
3. ALL EXISTING PLANT MATERIAL SHALL REMAIN UNLESS OTHERWISE NOTED. SHOULD ANY CONFLICTS ARISE BETWEEN THE EXISTING PLANT MATERIAL ON-SITE AND PROPOSED IMPROVEMENTS SHOWN ON THE PLANS THE CONTRACTOR SHALL NOTIFY THE LANDSCAPE ARCHITECT IMMEDIATELY.

SEEDING SPECIFICATIONS (SEE TABLE BELOW RIGHT FOR SEED QUANTITIES)

1013.1 GENERAL

1013.1.1 SCOPE

FURNISH ALL LABOR, MATERIALS AND EQUIPMENT NECESSARY FOR PREPARATION OF SEEDBED, FURNISHING AND INSTALLATION OF SEED, EROSION CONTROL MEASURES, SOIL AMENDMENTS, AND RELATED WORK SPECIFIED HEREIN AND AS INDICATED ON PLANS OR AS AUTHORIZED BY THE LANDSCAPE ARCHITECT OR ENGINEER. THIS SPECIFICATION SHALL APPLY TO LARGE PONDING AREAS ON SITES WHERE A LANDSCAPE PLAN FOR BUILDING PERMIT IS NOT REQUIRED, AND ALL PONDS THAT ARE GREATER THAN OR EQUAL TO 2 ACRES IN SIZE. SMALLER WATER QUALITY PONDS SHALL INCORPORATE LOW IMPACT DEVELOPMENT STRATEGIES AS DESCRIBED IN THE CITY OF ALBUQUERQUE DEVELOPMENT PROCESS MANUAL (DPM). TREATMENTS DESCRIBED IN THIS SPECIFICATION MAY APPLY AS BEST MANAGEMENT PRACTICES WHERE DEEMED PRACTICABLE BY THE LANDSCAPE ARCHITECT OR ENGINEER.

1013.1.2 APPLICABLE STANDARDS & REFERENCES:

1013.1.2.1 DRAWINGS AND GENERAL PROVISIONS OF THE CONTRACT INCLUDING CITY OF ALBUQUERQUE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION, LATEST EDITION. GENERAL CONDITIONS AND ANY SUPPLEMENTAL SPECIAL PROVISIONS, APPLY TO THIS SECTION.

1013.1.2.2 ALL SEED SHALL BE CERTIFIED BY STATE OF ORIGIN. THE CERTIFICATION AUTHORITY FOR THE STATE OF NEW MEXICO IS THE NEW MEXICO CROP IMPROVEMENT ASSOCIATION.

1013.1.2.3 RECLAMATION EFFORTS ARE CONTROLLED BY THE REQUIREMENTS STIPULATED IN THE NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM GENERAL PERMIT FOR REGION VI OF THE ENVIRONMENTAL PROTECTION AGENCY.

1013.1.3 PERFORMANCE REQUIREMENTS

1013.1.3.1 THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING AND CARING FOR SEEDED AREAS UNTIL FINAL ACCEPTANCE OF THE WORK AND SHALL REPAIR AT CONTRACTOR EXPENSE ANY DAMAGE TO SEEDED AREAS CAUSED BY PEDESTRIAN, VEHICULAR TRAFFIC, VANDALISM OR OTHER CAUSE.
1013.1.4 SUBMITTALS

1013.1.4.1 THIS PUBLICATION - SECTION 1502 - SUBMITTALS

1013.1.4.2 CERTIFICATION OF SEED: FROM SEED VENDOR FOR EACH MIXTURE, STATING THE BOTANICAL AND COMMON NAME, PERCENTAGE BY WEIGHT OF EACH SPECIES AND VARIETY, AND PERCENTAGE OF PURITY, GERMINATION, AND WEED SEED. INCLUDE THE YEAR OF PRODUCTION AND DATE OF PACKAGING. INCLUDE STATE, ORIGIN AND NAME AND TELEPHONE NUMBER OF SUPPLIER.

1013.1.4.3 PRODUCT CERTIFICATES: FOR ORGANIC AMENDMENTS
FROM MANUFACTURER.

1013.1.4.5 SOURCES OF SUPPLY, COLOR, AND SIZE FOR AGGREGATE MULCH.

1013.4.6 SOURCE OF SUPPLY AND PRODUCT INFORMATION FOR WOOD MULCH.

1013.1.5 DELIVERY, STORAGE & HANDLING

1013.1.5.1 SEED AND OTHER PACKAGED MATERIALS: DELIVER PACKAGED MATERIALS IN ORIGINAL, UNOPENED CONTAINERS SHOWING WEIGHT, CERTIFIED ANALYSIS, NAME AND ADDRESS OF MANUFACTURER, AND INDICATION OF COMPLIANCE WITH STATE AND FEDERAL LAWS, AS APPLICABLE.

1013.1.5.2 BULK MATERIALS:
A. DO NOT DUMP OR STORE BULK MATERIALS NEAR FUEL CONTAINERS, HERBICIDES, STRUCTURES, UTILITIES, WALKWAYS AND PAVEMENTS, OR ON EXISTING TURF AREAS OR PLANTS.
B. PROVIDE EROSION-CONTROL MEASURES TO PREVENT EROSION OR DISPLACEMENT OF BULK MATERIALS; DISCHARGE OF SOIL-BEARING WATER RUNOFF; AND AIRBORNE DUST REACHING ADJACENT PROPERTIES, WATER CONVEYANCE SYSTEMS, OR WALKWAYS.
C. ACCOMPANY EACH DELIVERY OF BULK MATERIALS WITH APPROPRIATE CERTIFICATES.

1013.2 PRODUCTS

1013.2.1 SEED

1013.2.1.1 SEED: THE SEED SPECIES AND RATE OF APPLICATION SHALL BE AS SHOWN BELOW AND SHALL BE USED BASED ON THE TYPE OF SOIL OR AS SPECIFIED ON THE PLANS OR IN THE SUPPLEMENTAL TECHNICAL SPECIFICATIONS.

1013.2.1.2 SEED SHALL BE FRESH, RE-CLEANED SEED OF THE LATEST CROP, MIXED IN THE PROPORTIONS BY WEIGHT, AND BE PURE LIVE SEED AS DENOTED WITHIN THESE SPECIFICATIONS OR AS PER THE PLANS.

1013.2.1.3 SEED SHALL BE DELIVERED TO THE SITE IN THE ORIGINAL UNOPENED CONTAINERS WHICH SHALL BEAR THE VENDOR'S GUARANTEE OF ANALYSIS. LABELING OF SEED SHALL BE IN ACCORDANCE WITH FEDERAL SEED LAWS AND THE NEW MEXICO DEPARTMENT OF AGRICULTURE LABELING LAWS. FEDERAL SEED LAWS REQUIRE THAT
ANALYSIS SHALL BE NO OLDER THAN FIVE MONTHS FOR SEED SHIPPED INTERSTATE AND NO OLDER THAN NINE MONTHS FOR SEED SHIPPED INTRA-STATE. SEEDS MAY BE PRE-MIXED BY A SEED DEALER. DOCUMENTATION MUST BE PROVIDED, THE SAME AS IF THE SEEDS WERE SOLD OR BAGGED SEPARATELY. THE LANDSCAPE
ARCHITECT OR ENGINEER SHALL RECEIVE ALL LABELS FROM ALL BAGS OF SEED USED FOR VERIFICATION. FOR EACH SPECIES INCLUDED IN THE MIX THE FOLLOWING INFORMATION WILL BE FOUND ON EACH BAG TAG:
A. VARIETY - SPECIFY IF CERTIFIED.
B. KIND OF SEED
C. LOT NUMBER
D. PURITY
E. GERMINATION
F. % OF CROP SEED, % INERT, % NOXIOUS WEED
G. ORIGIN
H. TEST DATE
I. POUNDS OF THIS SPECIES OR PERCENTAGE OF TOTAL LOT.

1013.2.1.4 SEED MIXTURE AND RATE: SEED SPECIES MIXTURES AND APPLICATION RATES SHALL BE AS FOLLOWS AND SHALL BE USED BASED ON THE SOIL TYPE UNLESS OTHERWISE SPECIFIED IN THE PLANS OR SUPPLEMENTAL TECHNICAL SPECIFICATIONS. (SEE TABLE TO RIGHT)

PLANTING GENERAL NOTES

1. VERIFY PLANT QUANTITIES PRIOR TO BIDDING AND INSTALLATION. QUANTITIES ARE LISTED FOR CONVENIENCE ONLY, THE ACTUAL NUMBER OF SYMBOLS INDICATED ON THE PLANTING PLANS SHALL HAVE PRIORITY OVER QUANTITIES LISTED WITHIN THE LANDSCAPE MATERIAL SCHEDULE. THE CONTRACTOR SHALL FURNISH ALL PLANT MATERIAL NECESSARY TO COMPLETE THE PLANTINGS AS SHOWN ON THE PLANS.
2. CLARIFICATION OF DISCREPANCIES BETWEEN THE CONSTRUCTION DOCUMENTS AND THE SITE SHOULD BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT AND/OR OWNER'S AUTHORIZED REPRESENTATIVE IMMEDIATELY.
3. THE LANDSCAPE ARCHITECT AND/OR OWNER'S AUTHORIZED REPRESENTATIVE IS TO APPROVE ANY PLANT MATERIAL SUBSTITUTIONS.
4. ALL PLANT MATERIAL MUST BE MAINTAINED IN HEALTH AND VIGOR, AND BE ALLOWED TO ATTAIN NATURAL SIZE AND SHAPE IN ACCORDANCE WITH ARIZONA NURSERY ASSOCIATION SPECIFICATIONS.
5. ALL PLANT MATERIAL MAY BE INSPECTED PRIOR TO ACCEPTANCE. THE LANDSCAPE ARCHITECT AND/OR OWNER'S AUTHORIZED REPRESENTATIVE RESERVES THE RIGHT TO REFUSE ANY PLANT MATERIAL DEEMED UNACCEPTABLE, EVEN AFTER DELIVERY TO SITE.
6. PLANT TREES AND SHRUBS PLUMB AND FACED TO GIVE THE BEST APPEARANCE OR RELATIONSHIP TO ADJACENT PLANTS, STRUCTURES, AND VIEWS. IF ANY SOIL NUTRIENT DEFICIENCIES EXIST, IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO AMEND THE SOIL.
7. PLANTING METHODS, SOIL AMENDMENT QUANTITIES (IF ANY), AND PREPARATION METHODS SHALL BE INSTALLED ACCORDING TO THE PLANTING SPECIFICATIONS AND DETAILS.
8. ALL PLANTING AREAS SHALL RECEIVE WEED CONTROL/PRE-EMERGENT PER THE GUIDELINES SET FORTH WITHIN THE SPECIFICATIONS AND DETAILS. REAPPLY AS NECESSARY TO COMPLETELY KILL NOXIOUS MATERIAL. REMOVE ALL DEAD AND/OR DYING DEBRIS PRIOR TO FINAL ACCEPTANCE.
9. ALL TREES LOCATED WITHIN SIGHT DISTANCE AREAS MUST BE TRIMMED TO 6'-0" CLEARANCE ABOVE FINISHED GRADE.
10. UNLESS OTHERWISE NOTED ON PLANS, ROCK/BARK MULCH SHALL EXTEND UNDER ALL PLANTINGS AND BE RAKED UNIFORMLY ALONG CONCRETE FLATWORK, CURBS AND ETC.
11. THE FINISH GRADE OF LANDSCAPE AREAS RECEIVING ROCK/BARK MULCH MUST BE GRADED 2-1/2" BELOW CONCRETE OR OTHER ADJACENT PAVED SURFACES PRIOR TO INSTALLATION OF THE MULCH. FINISH GRADE OF LANDSCAPE AREAS RECEIVING TURF MUST BE GRADED 1-1/2" BELOW CONCRETE OR OTHER PAVED SURFACES PRIOR TO INSTALLATION OF TURF.
12. BOULDERS, IF USED, TO BE SURFACE SELECT GRANITE WITH A MINIMUM OF SHARP EDGES AND/OR CRACKING. ANY EXPOSED SURFACE SCARRING THAT MAY HAVE OCCURRED DURING TRANSPORTING OR CONSTRUCTION IS TO BE EONITED WITH NO ADDITIONAL COST TO THE OWNER.
13. STAKE ALL NURSERY GROWN TREE STOCK A MINIMUM OF 12" OUT FROM EDGE OF PLANTING WELL. THE EDGE OF ALL TREE PLANTING WELLS SHALL BE A MINIMUM OF 2 FEET AWAY FROM ALL CURB AND SIDEWALKS AND A MINIMUM OF 12 FEET AWAY FROM ALL BUILDING FOUNDATIONS. THE EDGE OF ALL SHRUB PLANTING WELLS SHALL BE A MINIMUM OF 18" AWAY FROM ALL CURB AND SIDEWALKS AND A MINIMUM OF 3 FEET AWAY FROM ALL BUILDING FOUNDATIONS.
14. LANDSCAPE CONTRACTOR SHALL CONTACT THE OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO EACH APPLICATION OF PRE-EMERGENT FOR VERIFICATION. CONTRACTOR SHALL PROVIDE OWNER WITH PROOF OF PRE-EMERGENT APPLICATION NO MORE THAN 7 DAYS AFTER EACH APPLICATION WITHOUT EXCEPTION.
15. ALL TREES WITHIN TURF AREAS SHALL BE INSTALLED WITH TEMPORARY PVC ARBOR GUARDS.
16. ALL TURF AREAS SHALL BE GRADED SMOOTH AND APPROVED BY THE OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO INSTALLING SOD OR SEED. ALL AREAS TO RECEIVE TURF SHALL BE COMPLETELY FREE OF ANY RUTS, TRENCH SETTLING, OR ANY MATERIAL OVER 1/2" IN DIAMETER PRIOR TO SOD OR SEED INSTALLATION.
17. LANDSCAPE CONTRACTOR IS REQUIRED TO OBTAIN ANY REQUIRED PERMITS FOR ALL ON-SITE AND OFF-SITE IMPROVEMENTS OUTLINED WITHIN THIS SET OF PLANS AND/OR ANY OTHER ADDITIONAL WORK THEY MAY PERFORM IN THE INTEREST OF THIS PROJECT.
18. ROCK/BARK MULCH SHALL BE AS SPECIFIED IN THE LANDSCAPE MATERIAL SCHEDULE. ALL PLANTING AREAS, UNLESS OTHERWISE NOTED ON THE PLANS, SHALL RECEIVE A UNIFORM APPLICATION OF THE SPECIFIED MATERIAL. CONTRACTOR SHALL SUBMIT A SAMPLE TO THE OWNER'S AUTHORIZED REPRESENTATIVE PRIOR TO SCHEDULING MASS DELIVERY. OWNER MAY REQUEST THAT AN INITIAL LOAD OF MATERIAL BE DELIVERED TO THE SITE AND BE SPREAD BY THE LANDSCAPE CONTRACTOR FOR THE OWNER'S APPROVAL PRIOR TO MATERIAL APPLICATION ON THE REMAINDER OF THE SITE.
19. IT SHALL BE THE RESPONSIBILITY OF THE LANDSCAPE CONTRACTOR TO COORDINATE WITH THE OWNER THE FINAL LAYOUT OF ALL HARDSCAPE ITEMS FOR THIS PROJECT. OWNER MAY REQUEST ALL HARDSCAPE ITEMS (HEADERS, SIDEWALKS, FLATWORK, ETC.) BE STAKED AND/OR CHALKED OUT FOR THEIR APPROVAL PRIOR TO INITIAL POUR.
20. LANDSCAPE CONTRACTOR SHALL PRUNE ALL TREES AFTER INSTALLATION SO THAT NO BRANCH IS TOUCHING FINAL GRADE AND TRIM CANOPIES/BRANCHING TO A CLEAN AND NEAT APPEARANCE. ALL DEAD AND/OR DYING MATERIAL SHALL BE PRUNED FROM THE TREE PRIOR TO FINAL ACCEPTANCE.
21. WATER TEST ALL TREE PLANTING WELLS PRIOR TO PLANTING. IF TREE WELLS DO NOT PROPERLY DRAIN, REFER TO THE HARDPAN PLANTING DETAIL FOR ADDITIONAL INFORMATION.
22. REFER TO GENERAL CONSTRUCTION NOTES ON THE COVER SHEET FOR ADDITIONAL INFORMATION THAT RELATES TO THE SCOPE OF WORK IN THIS SECTION. ALSO REFER TO ANY WRITTEN SPECIFICATION, SHOULD THEY ACCOMPANY THESE DRAWINGS, FOR ADDITIONAL REQUIREMENTS NOT COVERED WITHIN THESE PLANS.

Sandy Soils: (Mainly Westside Areas) Seed rate is given in pounds of pure live seed (PLS) per acre. Mix shall include at least four of the wildflower species listed below at a total application rate of at least 2.0# PLS/AC.

SEED MIX FOR SANDY SOILS	#PLS/AC	NOTES
Hilaria jamesii 'Viva' Galleta	7.0	
Oryzopsis hymenoides 'Paloma' Indian Rice Grass	5.0	
Bouteloua gracilis 'Hachita' Blue Grama	2.0	
Bouteloua curtipendula 'Vaughn' Sideoats Grama	1.0	
Agropyron smithii 'Arriba' Western Wheat	1.0	
Sporobolus cryptandrus Sand Dropseed	1.0	
Sporobolus airoides 'Salado' Alkali Sacaton	1.0	
Artemisia frigida Fringed sagebush	.25	Low Shrub
Sphaeralcea ambigua Desert Globemallow	.25	Perennial wildflower
Sphaeralcea parvifolia Nelson Globemallow	.25	Perennial wildflower
Helianthus annuus	.5	Annual wildflower
Oenothera pallida White Evening Primrose	.25	Perennial wildflower
Baileya multiradiata Desert Marigold	.25	Biennial wildflower
Abronia fragrans or Abronia villosa Sand Verbena	.25	Perennial wildflower
Dalea purpurea var purpurea Purple Prairie Clover	.25	Perennial wildflower
Machaeranthera canescens Hoary transeyaster	.25	Perennial wildflower
Berlandiera lyrata Chocolate Flower	.25	Perennial wildflower
Ratibida columnifera forma pulcherrima Mexican Hat	.25	Perennial wildflower

PLANT SCHEDULE - PHASE 1 & 2

SYMBOL	QTY	BOTANICAL / COMMON NAME	SIZE (INSTALL)	H X W	WATER	COVERAGE
EXISTING TREES						
	8	Existing Tree Remain in Place	Existing			
DECIDUOUS TREES						
	44	Chilopsis linearis Desert Willow	2" + Cal	20` x 20`	Low	(20`) - 350

PLANTING NOTES

L-0.01 SHEET 02 OF 25

IRRIGATION NOTES

1. IRRIGATION CONTRACTOR GUARANTEES 100% COVERAGE IN LANDSCAPE AREAS.

2. IRRIGATION EQUIPMENT TO BE LOCATED IN LANDSCAPE AREAS WITHIN PROPERTY BOUNDARIES OF THE PROJECT - LINES AND EQUIPMENT ARE SCHEMATIC AND ARE SOMETIMES SHOWN IN ROADWAYS, SIDEWALKS, OR OUTSIDE PROPERTY LINES. THIS IS DONE FOR CLARITY PURPOSES ONLY.

3. THE DRAWINGS ARE DIAGRAMMATIC. THEREFORE, THE FOLLOWING SHOULD BE NOTED:

   A. IRRIGATION COMPONENTS MAY BE SHOWN OUTSIDE PLANTING AREAS FOR GRAPHIC CLARITY ONLY. AVOID CONFLICTS BETWEEN THE IRRIGATION SYSTEM, UTILITIES, PLANTING MATERIALS AND ARCHITECTURAL FEATURES. INSTALL IRRIGATION PIPE AND WIRING IN LANDSCAPED AREAS WHENEVER POSSIBLE.
   B. USE ONLY STANDARD TEES AND ELBOW FITTINGS. USE OF CROSS TYPE FITTINGS IS NOT PERMITTED.

4. IRRIGATION SYSTEM HAS BEEN DESIGNED FOR A STATIC WATER PRESSURE OF 60 PSI. THE IRRIGATION SYSTEM DESIGN IS BASED ON A MINIMUM OPERATING PRESSURE OF 45 PSI AND A MAXIMUM FLOW DEMAND OF 24 GPM WITH A BOOSTER PUMP PROVIDING A BOOST PRESSURE OF 20 PSI FOR A TOTAL PRESSURE RATING OF 80 PSI. THE CONTRACTOR SHALL VERIFY WATER PRESSURES PRIOR TO CONSTRUCTION AND REPORT ANY DISCREPANCIES BETWEEN THE WATER PRESSURE INDICATED ON THE DRAWINGS AND THE ACTUAL PRESSURE READING AT THE IRRIGATION POINT OF CONNECTION TO THE LANDSCAPE ARCHITECT IMMEDIATELY.

5. MATERIAL USED SHALL BE INSTALLED AS DETAILED. IRRIGATION EQUIPMENT NOT OTHERWISE DETAILED OR SPECIFIED SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS. OWNER'S REPRESENTATIVE AND/OR LANDSCAPE ARCHITECT SHALL APPROVE ANY DEVIATION FROM DRAWINGS OR MATERIALS USED.

6. THE OWNER'S REPRESENTATIVE MAY, AT ANY TIME, TAKE AND ANALYZE SAMPLES OF MATERIALS AND EQUIPMENT FOR CONFORMITY TO SPECIFICATIONS. THE CONTRACTOR SHALL MAKE SUCH SAMPLES AVAILABLE UPON REQUEST. REJECTED MATERIAL SHALL BE IMMEDIATELY REMOVED FROM THE SITE AND REPLACED AT THE CONTRACTOR'S EXPENSE.

7. INSTALL BACKFLOW PREVENTION UNIT(BPU)(S) PIPING BETWEEN THE POINT OF CONNECTION AND THE BPU PER LOCAL CODES. THE OWNER'S AUTHORIZED REPRESENTATIVE SHALL APPROVE THE FINAL LOCATION OF THE BPU. BACKFLOW PREVENTOR SHALL BE SCREENED FROM VIEW.

8. CONTRACTOR SHALL BE RESPONSIBLE FOR SUPPLYING MATERIALS AND LABOR TO PROVIDE SPECIFIED ELECTRICAL SERVICE TO CONTROLLER LOCATIONS. ELECTRICAL WORK TO BE PER MANUFACTURER'S SPECIFICATIONS AND PER LOCAL CODE.

9. 24 VOLT WIRE SHALL BE 600V, UF, UL APPROVED, #14 GAUGE, SINGLE STRAND, PLASTIC INSULATED, COPPER WIRE. COMMON WIRE IS TO BE WHITE, CONTROL WIRE IS TO BE RED (USE NO BLACK WIRE). TAPE AND BUNDLE WIRE EVERY TEN (10) FEET. DURING INSTALLATION WIRES SHALL HAVE A 24" LOOP TIED AT ALL DIRECTION CHANGES GREATER THAN 30 DEGREES & BE UNTIED PRIOR TO TRENCH FILL IN. LAY BESIDE MAINLINE. SPLICE IN VALVE BOXES ONLY, USING MANUFACTURED EPOXY OR RESIN FILLED WIRE CONNECTORS. PROVIDE 34" SLACK AT EACH ELBOW IN MAIN LINE AND AT EACH REMOTE CONTROL VALVE. IF SYSTEM IS NOT A TWO-WIRE CONTROL SYSTEM, PULL ONE ADDITIONAL SPARE WIRE TO THE MOST DISTANT VALVE LOCATION FOR POTENTIAL FUTURE USE. COLOR OF EXTRA WIRE SHALL BE YELLOW. IF IRRIGATION SPECIFICATIONS DIFFER FROM THIS PARAGRAPH, FOLLOW THE IRRIGATION SPECIFICATIONS.

10. LEVEL OF PEA GRAVEL IN IRRIGATION BOXES SHALL BE A MINIMUM OF 4" BELOW THE BOTTOM OF THE VALVE SO THAT THE VALVE IS COMPLETELY VISIBLE. PEA GRAVEL IN VALVE BOX TO BE CLEANED FROM TOP OF VALVE SO THAT VALVE IS COMPLETELY VISIBLE. LIP OF VALVE BOX IS ALSO TO BE FREE OF DEBRIS. REFERENCE IRRIGATION DETAILS.

11. LOCATE PRESSURE REGULATOR AND 'Y' STRAINER IN A VALVE BOX AS REQUIRED. REMOTE CONTROL VALVE TO BE LOCATED IN A SEPARATE (ADJACENT) VALVE BOX, OR A JUMBO VALVE BOX MAY BE USED IN LIEU OF TWO SEPARATE BOXES.

12. DRIP SYSTEMS TO BE FLUSHED THROUGH FLUSH CAPS. FLUSH CAPS TO BE LOCATED IN 6" ROUND ECONOMY BOXES AND PLACED AT THE END OF LATERALS RUNS.

13. THE CONTRACTOR SHALL PROVIDE CHECK VALVES AND AIR VACUUM RELIEF VALVES AS REQUIRED, OR AT THE DISCRETION OF THE LANDSCAPE ARCHITECT, TO EACH CIRCUIT THROUGHOUT THE IRRIGATION SYSTEM LOCATED WITHIN SLOPED AREAS TO PREVENT LOW IRRIGATION HEAD DRAINAGE.

14. PIPE SIZES SHALL CONFORM TO THE PIPE SIZING SCHEDULE ON DETAIL SHEET. NO SUBSTITUTIONS OF SMALLER PIPE SIZES SHALL BE PERMITTED BUT SUBSTITUTIONS OF LARGER SIZES MAY BE APPROVED BY THE LANDSCAPE ARCHITECT.

15. PIPE SHALL BE BEDDED ON ALL SIDES WITH FOUR INCHES OF ROCK FREE (3/8" MINUS) MATERIAL. IMPORT SAND IF NECESSARY. BACKFILL IN TWO OR MORE COMPACTED LIFTS. SETTLING OF TRENCHES BY MORE THAN AN INCH SHALL BE BROUGHT TO FINISH GRADE AT THE CONTRACTOR'S EXPENSE.

16. IRRIGATION LINES ON SLOPES OR WITHIN RETENTION BASINS SHALL BE RUN PARALLEL WITH GRADE AND ARE TO MAINTAIN THE HIGHEST ELEVATIONS POSSIBLE.

17. MULTI-OUTLET EMITTERS SHALL SERVICE ALL TREES AND SHRUBS <5' O.C. AND SINGLE POINT-SOURCE EMITTERS SHALL SERVICE ALL SHRUBS AND/OR GROUNDCOVERS >5' O.C.

18. PLANTS THAT REQUIRE MORE THAN ONE DRIP EMITTER SHALL HAVE EMITTERS DISTRIBUTED EVENLY AROUND PERIMETER OF PLANTING WELL. EMISSION POINTS AT ROOTBALLS SHALL BE LOCATED ON THE UPHILL SIDE, MIDWAY BETWEEN THE CENTER OF THE PLANT AND THE EDGE OF THE ROOTBALL.

19. LANDSCAPE CONTRACTOR IS RESPONSIBLE FOR LANDSCAPE SLEEVING REQUIRED TO COMPLETE THE PROJECT, WHETHER SHOWN OR NOT. COORDINATE INSTALLATION WITH THE GENERAL CONTRACTOR. VERIFY ANY EXISTING SLEEVES INSTALLED BY OTHER CONTRACTORS.

20. IRRIGATION AND ELECTRICAL SLEEVES TO BE SCHEDULE 40 PVC AND ALL SLEEVES SHALL CONFORM TO THE IRRIGATION SCHEDULE. ALL SLEEVING INSTALLED UNDER NEW STREETS SHALL BE DONE WITH SCHEDULE 80 PVC SLEEVING CONDUIT. INSTALL ONE 2" SLEEVE AT ALL MAINLINE SLEEVE LOCATIONS FOR ELECTRICAL WIRE. SLEEVES SHALL BE TWICE THE DIAMETER OF THE PIPE BEING SLEEVED AND EXTEND AT LEAST 24" BEYOND CONCRETE OR ANY OTHER STRUCTURES. MARK SLEEVE ENDS AT GRADE UPON INSTALLATION FOR VERIFICATION OF LOCATION AND DEPTH. ALLOW AT LEAST 4" - 6" FROM END OF SLEEVES TO FIRST FITTING ON IRRIGATION LINE. SLEEVES TO BE 24" BELOW GRADE AND/OR PER OWNER'S SPECIFICATIONS. SLEEVES UNDER PARKING LOTS, STREETS, STAGING AREAS, AND PATIOS TO BE INSTALLED BY PAVING CONTRACTOR PRIOR TO PAVING. SEE IRRIGATION SPECIFICATIONS FOR PIPE AND FITTING MATERIAL TYPE.

21. NOTIFY THE OWNER'S REPRESENTATIVE 48 HOURS PRIOR TO THE FOLLOWING REQUIRED STAGES OF OBSERVATION FOR:
   MAINLINE: INSTALLATION, DEPTH, VALVES, WIRE, LINE PRESSURE TEST
   EMITTER LATERALS: INSTALLATION, DEPTH, VALVES, EMITTERS, OUTLET TUBING, AT LINE PRESSURE
   CONTROLLER: INSTALLATION, FUNCTIONING

22. PRIOR TO OWNER'S APPROVAL, AN IRRIGATION "TUNE UP" MUST BE PERFORMED AS FOLLOWS:
   A. IRRIGATION EQUIPMENT (INCLUDING PIPELINES AND SLEEVES) TO BE DOCUMENTED FROM TWO STATIONARY POINTS.
   B. DRIP SYSTEMS TO BE FLUSHED BEGINNING WITH "Y" STRAINER, WORKING AWAY FROM THE PRESSURE REGULATOR.

IRRIGATION NOTES - CONTINUED

   C. IRRIGATION SPRINKLER HEADS TO BE FLUSHED OF DEBRIS AND FLOW CONTROLS ADJUSTED TO ACHIEVE MAXIMUM COVERAGE FOR TURF AREAS. AVOID OVER SPRAY ON STREETS, CURBS, SIDEWALKS, WALLS, AND STRUCTURES.
   D. IRRIGATION HEADS SHALL BE ADJUSTED TO PROPER HEIGHT.
   E. IRRIGATION VALVES TO BE LABELED ON A SHEET OF PAPER WITH STATIONS CORRESPONDING TO ETCHED LABELS ON TOP OF VALVE BOXES. THIS SHEET TO BE PLACED IN A PLASTIC POUCH AND ATTACHED TO INSIDE OF CONTROLLER.

23. SET BACK SPRAY AND STREAM TYPE IRRIGATION HEADS FROM BACKS OF CURBS OR SIDEWALKS AS PER IRRIGATION DETAILS TO REDUCE OVER SPRAY OR PROVIDE DESIGN ALTERNATIVES TO ACHIEVE SIMILAR RESULTS TO BE APPROVED BY LANDSCAPE ARCHITECT.

24. LOCATE VALVE BOXES IN PLANTING AREAS SO THAT THEY ARE SCREENED FROM VIEW. IRRIGATION BOXES SHALL BE TAN. NO VALVE BOXES TO BE INSTALLED IN TURF.

25. MAINLINES AND IRRIGATION EQUIPMENT SHALL BE PLACED OUTSIDE THE RIGHT-OF-WAY AND PUBLIC UTILITY EASEMENTS.

26. PRIOR TO PLACING ANY IRRIGATION SYSTEMS IN SERVICE, AN ARIZONA CERTIFIED BACKFLOW DEVICE TESTER SHALL TEST THE BACKFLOW PREVENTION DEVICE AND GIVE A COPY OF THE PASSED TEST RESULTS TO THE CITY INSPECTOR OR MAIL IT TO THE CITY DEPARTMENT OF PUBLIC WORKS INSPECTION SECTION.

27. AFTER INITIAL TESTING EACH BACKFLOW DEVICES SHALL BE TESTED AND PASSED ANNUALLY IN ACCORDANCE WITH LOCAL UTILITY REQUIREMENTS.

28. BACKFLOW PREVENTION DEVICES SHALL BE PLACED A MINIMUM OF TWO (2') FEET FROM THE WATER METER / POINT OF CONNECTION AND BE THE SAME SIZE AS THE METER / POINT OF CONNECTION SERVICE LINE.

29. BACKFLOW PREVENTION DEVICES SHALL HAVE A MINIMUM 24"X36"X4" CLASS B CONCRETE SLAB WITH PIPE SLEEVES. IF A SECURITY CAGE IS INSTALLED CONCRETE SHALL BE SIX (6") INCHES LARGER ON ALL SIDES THAN THE SECURITY CAGE.

30. PIPE CROSSINGS IN THE RIGHT-OF-WAY SHALL BE MARKED ON EACH SIDE OF THE CURB WITH A NON-DESTRUCTIBLE MARKING.

31. INSTALL GATE VALVES FOR FULL FLOW.

IRRIGATION KEY NOTES:

- IRRIGATION CONTRACTOR TO REVIEW ACTUAL SITE CONDITIONS PRIOR TO INSTALLING IRRIGATION OR ORDERING MATERIALS. SOME ADJUSTMENTS IN EQUIPMENT LOCATIONS MAY BE REQUIRED TO MATCH ACTUAL CURRENT CONDITIONS. REVIEW ANY CHANGES WITH OWNERS REPRESENTATIVE. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS..
- THE IRRIGATION SYSTEM HAS BEEN DESIGNED FOR A STATIC WATER PRESSURE OF 60 PSI. AT THE POINTS OF CONNECTION. CONTRACTOR TO CHECK WATER PRESSURE PRIOR TO STARTING CONSTRUCTION AND NOTIFY OWNER'S REPRESENTATIVE IF NOT MIN. 60 PSI.
- ALL MAINLINE FITTINGS OVER 3" SHALL BE IRON GASKETED WITH JOINT RESTRAINT HARNESSES.
- REFER TO EMITTER SCHEDULE FOR TREE, SHRUB GPH. & NUMBER OF EMITTERS. USE MULT-PORT EMITTERS ON SHRUBS WHEN SPACING ALLOWS.
- EQUIPMENT SUBMITTAL FOR APPROVAL PRIOR TO ORDERING MATERIALS.
- IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
- SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
- INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
- USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
- TREES IN TURF HAVE (1) MULTI-PORT EMITTER W/ SIX OUTLETS.
- INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
- INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
- INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
- PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (>3") UNDER ASPHALT PAVING.
- RUN 2 WIRE LOOPS FROM EACH CONTROLLER BACK TO BOOSTER PUMP, HYDROMETER/MASTER VALVE, AND FLOW SENSOR ON EACH MAIN AND SUB-MAIN LOOP AS REQUIRED PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR RESPONSIBLE FOR INSURING MASTER VALVES, FLOW SENSORS, CONTROLLERS, AND PUMP STATION ARE ALL CONNECTED AND OPERATIONAL PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS.
- ALL IRRIGATION EQUIPMENT TO BE INSTALLED IN COMMON AREA LANDSCAPE PLANTER AREAS, NOT IN PRIVATE YARDS, REGARDLESS OF WHAT IS SHOWN ON PLANS. IRRIGATION PLANS ARE SCHEMATIC AND NATURE AND DUE TO SCALE, EQUIPMENT IS SOMETIMES SHOWN IN AREAS THAT ARE NOT COMMON AREA LANDSCAPE PLANTERS. NO VALVES TO BE INSTALLED IN TURF.

RAIN BIRD TWO-WIRE NOTES:

1. ALL VALVES ARE TO BE INSTALLED WITH RAINBIRD DECODERS, 1, 2, OR 4 STATION.

2. TWO-WIRE SHALL BE RAINBIRD MAXI-WIRE BASED ON MAXIMUM DISTANCE TO DECODER.
   - 14 AWG WIRE PATH: 34,900'
   - 12 AWG WIRE PATH: 55,000'

3. INSTALL RAINBIRD SURGE ARRESTORS. PROVIDE GROUNDING OF THE TWO-WIRE PATH EVERY 8 DECODERS OR 500' OF WIRE RUN, WHICHEVER IS SHORTER, USING LSP-1 LINE SURGE DECODERS. THE LAST DECODER ON A RUN SHALL BE GROUNDED WITH 8' GROUNDING ROD. REFER TO DETAILS AND RAINBIRD SPECIFICATIONS.
4. TO COMPLY WITH PROPER INSTALLATION SPECIFICATIONS, THE FOLLOWING COMPONENTS SHOULD BE GROUNDED:
   - ESP-LX DECODER CONTROLLER
   - ESPLXD-SM75 DECODER CONTROLLER MODULE (IF NEEDED)
   - LSP-1 LIGHTNING SURGE PROTECTOR
   - SD-210 SENSOR DECODER
   - FD-401 FIELD DECODER
   - FD-601 FIELD DECODER
   - NOTE: EACH INSTALLED GROUNDING SYSTEM SHALL MAINTAIN A MAXIMUM GROUND RESISTANCE OF 10 OHMS OR LESS.

5. RAINBIRD FD-SERIES AND LSP-1 DECODER WIRE SPLICES SHALL BE 3M DBR/Y SPLICE KITS FOR ALL WIRE CONNECTIONS.

6. FOR SECONDARY WIRE RUN, THE DISTANCE BETWEEN THE FIELD DECODER AND THE SOLENOID (VALVE) CAN NOT EXCEED 450' USING 14 GAUGE WIRE.

7. USE GREY FIELD DECODERS FOR ALL SOLENOIDS AND GREEN (SD-210) SENSOR DECODERS FOR FLOW AND WEATHER SENSORS.

IRRIGATION SCHEDULE OVERALL

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION	PSI
10 ADJ 10FT	Rain Bird R-VAN18 1804-SAM-P45 Turf Rotary, 13ft.-18ft. 45-270 degrees and 360 degrees. Hand Adjustable Multi-Stream Rotary w/1800 turf spray body on 4in. pop-up, with check valve and 45 psi in-stem pressure regulator. 1/2in. NPT Female Threaded Inlet.	45
24 ADJ 24FT	Rain Bird R-VAN24 1804-SAM-P45 Turf Rotary, 17ft.-24ft. 45-270 degrees and 360 degrees. Hand Adjustable Multi-Stream Rotary w/1800 turf spray body on 4in. pop-up, with check valve and 45 psi in-stem pressure regulator. 1/2in. NPT Female Threaded Inlet.	45

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Rain Bird Drip Control Valve 1in. Ball Valve with 1in. PESBIVM Smart Valve. Add QKCHK-100 1" Basket Filter with 200 mesh stainless steel screen. 0.3-20 gpm
	Pipe Transition Point in Drip Box PVC to Drip Connection Assembly. Senninger #PSR-30 Pressure Regulator (3/4" FIPT) With Associated Drip Connection Fittings. Installed in tan 10" Round Valve Box.
	Flush Cap 3/4" Male PVC SCH 40 S/T Adapter And 3/4" Female Threaded Cap
5 7 10 12 18 24	Rain Bird PC-DIFF Emitter Single Outlet, Pressure Compensating Drip Emitters with Self-Piercing Barb Inlet and Diffuser Cap. Flow rate: 5 GPH=light brown; 7 GPH=violet; 10 GPH=green; 12 GPH=dark brown; 18 GPH=white; 24 GPH=orange.
0.5 1.0 2.0	Rain Bird Xeri-Bug Emitter Rain Bird XB-PC, Single Outlet, Pressure Compensating Drip Emitters. Flow rates of 0.5 GPH=blue, 1.0 GPH=black, and 2.0 GPH=red. Comes with a self-piercing barb inlet x barb outlet.

SYMBOL	MANUFACTURER/MODEL/DESCRIPTION
	Remote Control Valve Rain Bird PEB-IVM: Plastic Industrial Smart Valves w/ Factory Installed IVM-SOL. Low Flow Operating Capability, Globe Configuration.
	Quick Coupler Rain Bird 44-LRC: 1in. Brass Quick-Coupling Valve, with Corrosion-Resistant Stainless Steel Spring, Locking Thermoplastic Rubber Cover, and 2-Piece Body.

	Isolation Gate Valve (Same Size as Pipe) Nibco T-113-K: Class 125 bronze gate shut off valve with cross handle, same size as mainline pipe diameter at valve location. Size Range - 1/4in. - 3in.
MV	Master Valve 2" Rain Bird PEB-IVM: 1in., 1-1/2in., 2in. Plastic Industrial Smart Valves w/ Factory Installed IVM-SOL. Low Flow Operating Capability, Globe Configuration.
	1" Air and Vacuum Valve 1" Crispin AL Series Air and Vacuum Valve. Model #: CR-AL-10
BF	Backflow Preventer 2" Febco 825Y: Reduced Pressure Backflow Preventer
A	Pedestal Mount Controller Rain Bird ESPLXIVM-LXMMSS-LXMMSSPED: 60 Station, 2-Wire Controller w/ Smart Valve Technology. (1) ESPLXIVM 60-Station, Indoor/Outdoor, Plastic Wall-Mount Enclosure. Installed in LXMMSS-LXMMSSPED Stainless Steel Cabinet w/ Pedestal. System Requirements: Rain Bird LXIVM Integrated Valve Modules & 2-Wire Devices. Use Paige Electric Cable P7072D & Rain Bird WC20 Dry Splices ONLY. Ground System w/ LXIVMSD Surge Device in Rain Bird Round Valve Boxes. Install Per Manufacturers Recommendations.
FS	Flow Sensor Creative Sensor Technology FSI-T10-001: 1in. PVC tee type flow sensor w/socket ends, custom mounting tee and ultra-lightweight impeller enhances low flow measurement. 2 wire digital output compatible w/all irrigation controllers. Flow range: .86 GPM - 52 GPM.
BP	Booster Pump Rain Bird CLP Series: Booster Pump Pressure Increase of 20 PSI. Maximum Flow Rate of 24 GPM.
M	Water Meter 2"
⊥	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
S	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
	Irrigation Lateral Line: PVC Class 200 SDR 21 3/4" unless otherwise noted.
	Irrigation Lateral Line: Toro-Blue Stripe Poly Hose Blue Stripe Drip Tubing to Trees & Shrubs. 0.75" Polyethylene Drip Tubing with 1/4" Poly DistributionTtubing - Install Rain Bird Pressure Compensating Drip Emitters.
ML	Irrigation Mainline: PVC Schedule 40 1" - 3" Diameter
	Pipe Sleeve: See Details for Pipe Sizing & Sleeve Schedule. Twice the nominal diameter of the pipe being sleeved.

Bungalows at Cerrillos - Water Budget Calculations (Phase 1 & 2):

Year 1 Water Budget Calculations

Landscape Water Demand Calculations	Quantity	Unit:	Weekly Demand in Gallons (ea)	Weekly Demand in Gallons (Total)	Monthly Demand in Gallons
Perennials	523	ea	1.25	653.75	2,615.00
Shrubs	1709	ea	2.50	4,272.50	17,090.00
Native Grasses	591	ea	1.25	738.75	2,955.00
Native Grass/Turf	3522	SF	0.50	1,761.00	7,044.00
Trees - Deciduous	198	ea	45.00	8,910.00	35,640.00
Trees - Evergreen	109	ea	30.00	3,270.00	13,080.00
Total Monthly Demand (Gallons):					78,424.00
Total Yearly Demand (Gallons):					627,392.00
Total Acre-Feet/Yr:					1.93

Demand Assumptions / Eight (8) month irrigation period

Perennials: .5 gal / hr per perennial run 1/2 hour five times a week = 1.25 gal / week
Shrubs: 1 gal / hr per shrub run 1/2 hour five times a week = 2.5 gal / week
Native Grasses: .5 gal / hr per plant run 1/2 hour five times a week - 1.25 gal / week
Native Grass / Turf: .5 gal / SF per week
Trees - Deciduous: 15 gal / hour per tree run 1.5 hours twice a week = 45 gal per week
Trees - Evergreen: 15 gal / hour per tree run 1 hour twice a week = 30 gal per week

Year 3 Water Budget Calculations

Landscape Water Demand Calculations	Quantity	Unit:	Weekly Demand in Gallons (ea)	Weekly Demand in Gallons (Total)	Monthly Demand in Gallons

Shrubs	1709	ea	1.25	2,136.25	8,545.00
Native Grasses	591	ea	0.63	372.33	1,489.32
Native Grass/Turf	3522	SF	0.00	0.00	0.00
Trees - Deciduous	198	ea	35.00	6,930.00	27,720.00
Trees - Evergreen	109	ea	20.00	2,180.00	8,720.00
Total Monthly Demand (Gallons):					47,661.24
Total Yearly Demand (Gallons):					381,289.92
Total Acre-Feet/Yr:					1.17

Demand Assumptions / Eight (8) month irrigation period

Perennials: .5 gal / hr per perennial run 25 minutes three times a week = .63 gal / week
Shrubs: 1 gal / hr per shrub run 25 minutes three times a week = 1.25 gal / week
Native Grasses: .5 gal / hr per plant run 25 minutes three times a week - .63 gal / week
Native Grass / Turf: 0 gal / SF per week
Trees - Deciduous: 15 gal / hour per tree run 70 minutes twice a week = 35 gal per week
Trees - Evergreen: 15 gal / hour per tree run 40 minutes twice a week = 20 gal per week

IRRIGATION NOTES

L-0.02 SHEET 03 OF 25

© Copyright, Coleman Design Group, PLLC. – This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

WALL NOTES

1. THESE NOTES ARE GENERAL AND MAY BE SUPERSEDED BY EITHER THE SPECIFICATIONS OR LOCAL TRADE PRACTICES.
2. FOOTINGS SHALL BEAR ON UNDISTURBED NATIVE SOIL OR COMPACTED FILL.
3. THE EXPOSED UPPERMOST SOIL TO RECEIVE FILL SHALL BE SCARIFIED 6" DEEP, MOISTURE CONDITIONED TO ±3% OF OPTIMUM DENSITY CURVE FOR EACH TYPE OF SOIL ENCOUNTERED AND COMPACTED TO 95% OF MAXIMUM DRY DENSITY PER ASTM D-2922 OR D-3017.
4. FILL MATERIAL SHALL BE PREDOMINANTLY GRANULAR, NON-EXPANSIVE, CLEAN OF ALL ORGANIC OR DETRITUS SUBSTANCES, AND HAVE A PLASTICITY INDEX LESS THAN SEVEN (7). BACKFILL SHALL BE COMPACTED TO 95% OF MAXIMUM DENSITY IN HORIZONTAL 8" LIFTS.
5. EXCAVATIONS FOR FOUNDATIONS SHALL BE NEAT TO LINES OF FOOTINGS. ALL LOOSE MATERIAL SHALL BE REMOVED FROM SURFACE TO RECEIVE CONCRETE.
6. ALLOWABLE SOIL BEARING PRESSURES AT FOOTING ON COMPACTED SOIL: 1500 PSI.
7. CONCRETE MIX DESIGN FOR FOOTINGS SHALL BE MAG CLASS 'B' (2500 PSI), UNLESS OTHERWISE NOTED ON DRAWINGS.
8. NO PIPES OR DUCTS SHALL BE PLACED IN STRUCTURAL CONCRETE UNLESS SPECIFICALLY DETAILED.
9. CONCRETE FOOTINGS SHALL BE CONTINUOUS POUR TO GREATEST EXTENT PRACTICAL. STEP FOOTINGS IN EVEN BLOCK INCREMENTS.
10. WALL CONTRACTOR TO BE RESPONSIBLE FOR STRUCTURAL CALCULATIONS OF THE WALLS.
11. SUBMIT TEST REPORTS FOR CONCRETE MIX DESIGNS TO LANDSCAPE ARCHITECT FOR REVIEW.
12. WATERPROOF AND GROUT SOLID RETAINING WALLS TO HIGH GRADE, IF APPLICABLE.
13. ALL IRON/STEEL WORK TO BE OF HIGHEST QUALITY WITH WELDS GROUND SMOOTH. ALL IRON WORK, EXCEPT WHERE NOTED, TO BE PRIMED AND PAINTED. PAINT COLOR TO BE SELECTED BY OWNER AND/OR LANDSCAPE ARCHITECT.
14. VERIFY HEIGHTS AND SLOPES AND TURNDOWNS BEFORE POURING FOOTINGS.
15. NEW WALL FINISHES SHALL MATCH EXISTING SURFACES, UNLESS OTHERWISE NOTED ON DRAWINGS.
16. GROUT SOLID ALL CMU CELLS AND VOIDS BELOW GRADE AND/OR CONTAINING REBAR.

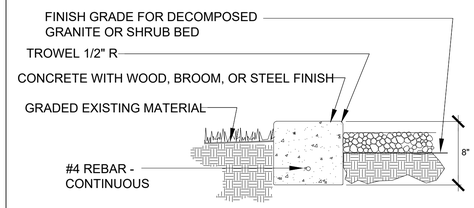
H1 Sidewalk Intersections & Grading at walks/headers

Scale: N.T.S.

Planting Details

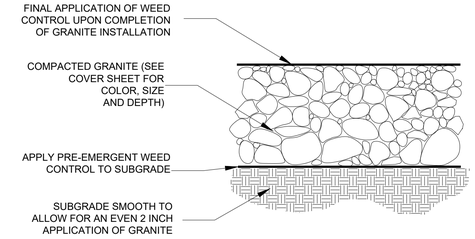


NOTE: FINISH GRADE TO BE 3" BELOW TOP OF WALK BEFORE INSTALLATION OF DECOMPOSED GRANITE 3" FOR SOD OR SEED).
TOP OF DG OR TURF TO BE 1 1/2" BELOW TOP OF CONCRETE WALK.

H2 Swale at walk or curb

Scale: N.T.S.

Planting Details



1. LANDSCAPE ARCHITECT TO APPROVE FORM WORK PRIOR TO PLACING CONCRETE.
2. HEADER SHOULD BE FLUSH WITH ADJOINING WALK OR CURB.
3. CONCRETE TO BE CLASS A (3000 PSI).
4. EXPANSION JOINTS AT 20' O.C.
5. STRAIGHT SECTIONS TO BE FORMED WITH MIN. OF 2"X6" LUMBER.
6. CURVED SECTIONS TO BE FORMED IN SMOOTH, EVEN CURVES AS SHOWN ON PLAN - FORM WITH 5/8"X6" PLYWOOD.
7. FORM STAKING SHALL NOT ALLOW DEFORMING OR LEAKING - ALL SPILL OR EXCESS CONCRETE SHALL BE CLEANED UP AND REMOVED FROM SITE BY CURB CONTRACTOR.
8. GRADING AT CURB SHALL BE BY CURB CONTRACTOR.

H3 Concrete Header Detail

Scale: N.T.S.

Planting Details

NOTE: PROVIDE GRANITE SAMPLE TO LANDSCAPE ARCHITECT FOR APPROVAL PRIOR TO INSTALLATION.

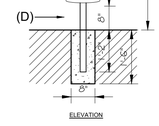
INCLUDES:
-ALUMINUM DOGIPOT PET SIGN, WITH MOUNTING HARDWARE
-ALUMINUM DOGIPOT JUNIOR BAG DISPENSER (ITEM #1002-2), WITH MOUNTING HARDWARE
-TWO KEYS FOR DISPENSER LOCKING FRONT ACCESS PANEL
-TWO ROLLS OF DOGIPOT LITTER PICK UP BAGS (ITEM #1402), INSTALLED IN DOGIPOT JUNIOR BAG DISPENSER
-10 GALLON ALUMINUM TRASH RECEPTACLE (ITEM #1206A-L) WITH ATTACHED HINGED LID AND TRASH LINER BAG RETAINER BANDS, WITH MOUNTING HARDWARE
-ONE DOGIPOT LINER TRASH BAGS (ITEM #1404)
-2" X 2" X 4'-8" GALVANIZED STEEL TELESCOPIC MOUNTING POST, WITH INSTALLATION HARDWARE

(A) DOGIPOT PET SIGN (ITEM #1203 / 1204):
-H: 18" X W: 11.5"
-14 GAUGE REFLECTIVE ALUMINUM
-WEIGHT: 1.35 LBS
-FOREST GREEN ON WHITE



(B) DOGIPOT JUNIOR BAG DISPENSER (ITEM #1002-2):
-H: 15.5" X W: 9.4" X D: 3.25"
-12 GAUGE POWDER COATED FOREST GREEN ALUMINUM
-WEIGHT: 7 LBS
-400 BAG CAPACITY
-TWO DIAMOND BAG DISPENSER SLOTS
-FRONT LOCKING ACCESS PANEL
-CLEARLY POSTED INSTRUCTIONS

(C) TRASH RECEPTACLE WITH LID (ITEM #1206A-L):
-H: 23" X 11.5" DIAMETER
-11 GAUGE POWDER COATED FOREST GREEN ALUMINUM
-WEIGHT: 9 LBS.
-10 GALLON CAPACITY WITH INTERIOR TRASH LINER BAG RETAINER BANDS
-ATTACHED ALUMINUM HINGED LID
-ONE BOX 50 COUNT DOGIPOT LINER TRASH BAGS (ITEM #1404)

(D) TELESCOPIC GALVANIZED STEEL MOUNTING POST (ITEM #1301-P):
-2" X 2" X 8'
-11 GAUGE GALVANIZED STEEL
-WEIGHT: 15 LBS.

HOLE:
-D: 18" X W: 8"
-FILL WITH 40 LBS. "READY TO USE: CEMENT

NOTES:

PHASE 2 LANDSCAPE CONSTRUCTION DOCUMENTS

DATE: DECEMBER 04, 2023

REVISIONS:

NO.	DATE	ITEM

CITY NUMBERS:

PLANTING DETAILS

L-5.01 SHEET 16 OF 25

IRRIGATION KEY NOTES:

- IRRIGATION CONTRACTOR TO REVIEW ACTUAL SITE CONDITIONS PRIOR TO INSTALLING IRRIGATION OR ORDERING MATERIALS. SOME ADJUSTMENTS IN EQUIPMENT LOCATIONS MAY BE REQUIRED TO MATCH ACTUAL CURRENT CONDITIONS. REVIEW ANY CHANGES WITH OWNERS REPRESENTATIVE. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS..
- THE IRRIGATION SYSTEM HAS BEEN DESIGNED FOR A STATIC WATER PRESSURE OF 60 PSI. AT THE POINTS OF CONNECTION. CONTRACTOR TO CHECK WATER PRESSURE PRIOR TO STARTING CONSTRUCTION AND NOTIFY OWNER'S REPRESENTATIVE IF NOT MIN. 60 PSI.
- ALL MAINLINE FITTINGS OVER 3" SHALL BE IRON GASKETED WITH JOINT RESTRAINT HARNESSES.
- REFER TO EMITTER SCHEDULE FOR TREE, SHRUB GPH. & NUMBER OF EMITTERS. USE MULT-PORT EMITTERS ON SHRUBS WHEN SPACING ALLOWS.
- EQUIPMENT SUBMITTAL FOR APPROVAL PRIOR TO ORDERING MATERIALS.
- IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
- SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
- INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
- USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
- TREES IN TURF HAVE (1) MULTI-PORT EMITTER W/ SIX OUTLETS.
- INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
- INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
- INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
- PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (3"+) UNDER DRIVABLE SURFACES.
- RUN 2 WIRE LOOPS FROM EACH CONTROLLER BACK TO BOOSTER PUMP, HYDROMETER/MASTER VALVE, AND FLOW SENSOR ON EACH MAIN AND SUB-MAIN LOOP AS REQUIRED PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR RESPONSIBLE FOR INSURING MASTER VALVES, FLOW SENSORS, CONTROLLERS, AND PUMP STATION ARE ALL CONNECTED AND OPERATIONAL PER MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS.
- ALL IRRIGATION EQUIPMENT TO BE INSTALLED IN COMMON AREA LANDSCAPE PLANTER AREAS, NOT IN PRIVATE YARDS, REGARDLESS OF WHAT IS SHOWN ON PLANS. IRRIGATION PLANS ARE SCHEMATIC AND NATURE AND DUE TO SCALE, EQUIPMENT IS SOMETIMES SHOWN IN AREAS THAT ARE NOT COMMON AREA LANDSCAPE PLANTERS. NO VALVES TO BE INSTALLED IN TURF.

IRRIGATION PLAN

L-6.01 SHEET 18 OF 25

© Copyright, Coleman Design Group, PLLC. – This plan document set is the sole property of CDG. No alterations to these plans, other than adding "as-built" information, are allowed by anyone other than authorized CDG employees.

NOTES:

1. IRRIGATION LAYOUT IS SCHEMATIC IN NATURE. ALL IRRIGATION EQUIPMENT LOCATIONS ARE SHOWN FOR GRAPHIC CLARITY ONLY. CONTRACTOR SHALL INSTALL ALL IRRIGATION EQUIPMENT IN LANDSCAPE AREAS ONLY. IF THERE IS A DISCREPANCY IN THE FIELD, CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR RESOLUTION.
2. CONTRACTOR TO PROVIDE ELECTRICAL POWER TO CONTROLLER LOCATION PER MANUFACTURE'S SPECIFICATIONS. LOCATION MAY VARY FROM LOCATION SHOWN ON PLANS. SEE "GROUNDING FOR 2-WIRE SYSTEMS" PUBLICATION FROM RAINBIRD FOR PROPER GROUNDING FOR LXIVM SERIES CONTROLLERS.
3. INSTALL ALL EMITTERS UP-SLOPE FROM PLANT MATERIAL.
4. USE RIGID PVC AS EMITTER LATERALS THROUGHOUT.
5. INSTALL FLUSH END CAPS AT ALL ENDS OF DRIP LATERALS.
6. INSTALL BOWSMITH LINE PLUGS AT THE END OF ALL DRIP TUBING TO KEEP INSECTS OR DEBRIS FROM CLOGGING TUBING.
7. INSTALL ALL EQUIPMENT AS PER MANUFACTURER'S INSTRUCTIONS AND SPECIFICATIONS.
8. SEE PLANTING PLAN FOR PLANT LOCATIONS AND SPECIES INFORMATION.
9. PROVIDE SCH 40 PVC SLEEVES UNDER ALL HARDSCAPE SURFACES AND PVC SCH 80 (<3") & C900 (3"+) UNDER DRIVABLE SURFACES.
10. METER LOCATIONS SHOWN ARE APPROXIMATE. SEE CIVIL PLANS FOR EXACT LOCATIONS.

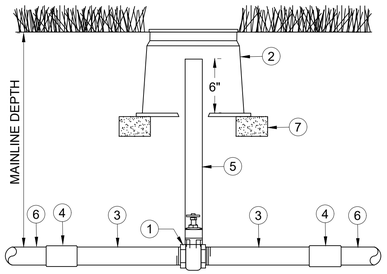
120V ELECTRICAL POWER:



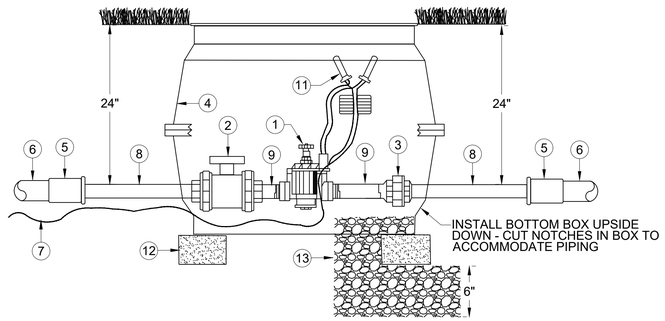
- THE CONTRACTOR SHALL PROVIDE, COORDINATE AND INSTALL THE NECESSARY CONDUITS, WIRES, BREAKERS, AND ANY OTHER MATERIALS AND LABOR AS REQUIRED TO PROVIDE 120VAC ELECTRICAL POWER FOR HEAT-TAPE FREEZE PROTECTION - INSTALL AS PER NEC AND LOCAL CODES

IMPORTANT NOTE:

- WRAP ALL EXPOSED PIPING WITH HEAT TAPE AND PROVIDE A SECURE WRAPPING OF INSULATION TO AVOID HEAT LOSS

1. REDUCED PRESSURE PRINCIPAL BACKFLOW PREVENTER (SIZE AND MODEL AS INDICATED IN LEGEND)
2. GALVANIZED NIPPLE (CLOSE LENGTH OR LENGTH AS REQUIRED)
3. GALVANIZED TEE (PROVIDE GALVANIZED REDUCER BUSHING IF NECESSARY TO ACCOMMODATE DRAIN)
4. BUCKNER #BDV 1/2" BRASS AUTOMATIC DRAIN
5. GALVANIZED NIPPLE (30" LENGTH OR LENGTH AS REQUIRED)
6. GALVENIZED UNION
7. GALVENIZED ELL
8. SCH.80 PVC TOE NIPPLE (8" LENGTH)
9. SCH.40 PVC COUPLING
10. SCH.40 PVC MAINLINE PIPING
11. 120VAC ELECTRICAL OUTLET FOR FREEZE PROTECTION HEAT TAPE - INSTALL PER ELECTRICAL CODES
12. INSULATED ENCLOSURE (SIZE AND MODEL AS INDICATED IN LEGEND)
13. 4" THICK (3000psi) CONCRETE BASE - SIZE PER ENCLOSURE MANUFACTURERS RECOMMENDATIONS
14. GALVANIZED STREET ELL

A SCALE: NTS — RP BACKFLOW PREVENTER (1"-2") - REFERENCE ONLY (SEE PHASE 1)
24" - BURY



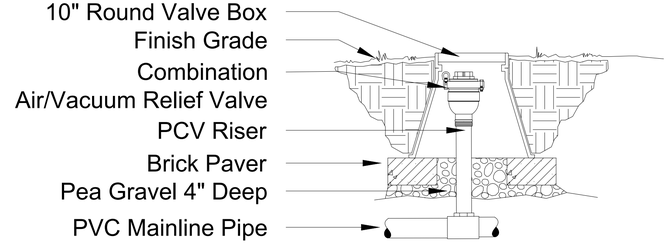
NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

1. WATTS #WGV-X SERIES GATE VALVE (PIPE SIZE)
2. CARSON (OLDCASTLE) #910-10 WITH "T-STYLE" COVER OF APPROPRIATE COLOR
3. SCH.80 PVC TOE NIPPLE (12" LENGTH)
4. SCH.80 PVC COUPLING (SOCKET ENDS)
5. SCH.40 PVC SLEEVE PIPE (2") LENGTH AS REQUIRED
6. PVC SYSTEM PIPING (REFER TO PLANT FOR SIZE AND TYPE)
7. SOLID BRICK (2 BRICKS REQUIRED)

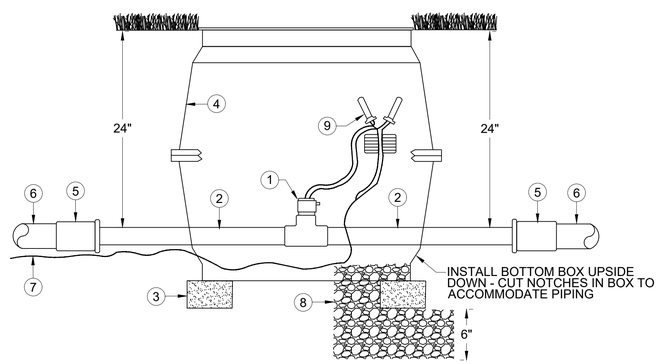
D SCALE: NTS — ISOLATION GATE VALVE (1"-3")
3" OR SMALLER PIPE

FOR DECODER (2-WIRE) INSTALLATIONS:



- REFER TO LEGEND FOR DECODER MODULE REQUIRED - INSTALL AS PER MANUFACTURER'S INSTRUCTIONS

NON-POTABLE WATER INDICATORS:



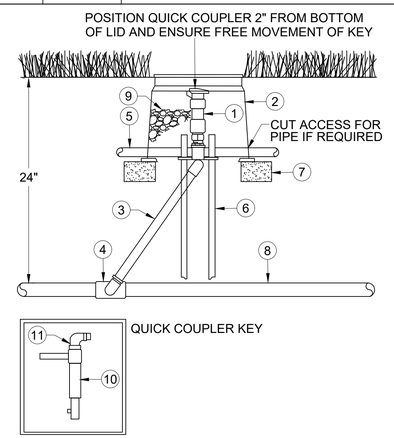
- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING, SPRINKLER TOPS, VALVE HANDLES, VALVES BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

1. AUTOMATIC MASTER VALVE (REFER TO LEGEND FOR MODEL AND SIZE)
2. SCH.80 PVC TRU-UNION BALL VALVE (REGULAR STYLE, SOCKET ENDS)
3. SCH.80 PVC UNION (SOCKET ENDS)
4. CARSON #1324-15 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
6. MAINLINE PIPING (REFER TO LEGEND FOR TYPE AND SIZE)
7. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL SLIGHTLY BELOW MAINLINE PIPE)
8. SCH.80 PVC TOE NIPPLE (PROVIDE 12" LENGTH, CUT OFF THREADS)
9. SCH.80 PVC TOE NIPPLE (PROVIDE 3" LENGTH)
10. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
11. 3M #DBRY WIRE SPLICE KIT OR AS REQUIRED BY VALVE MANUFACTURER (PROVIDE 24" COILED SLACK)
12. SOLID BRICK (SUPPORT ALL FOR CORNERS OF BOX)

B SCALE: NTS — ELECTRIC MASTER VALVE (1"-2") - REFERENCE ONLY (SEE PHASE 1)
24" - BURY (1324-15 BOXES)

E SCALE: NTS, SN: - — CRISPIN AIR/VACUUM RELIEF VALVE

NON-POTABLE WATER INDICATORS:



- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

IMPORTANT NOTE REGARDING LAMINAR FLOW THROUGH METER

- THE CONTRACTOR SHALL BE AWARE THAT THE FLOW METER MANUFACTURE MAY HAVE SPECIFIC MINIMUM DISTANCES OF UNINTERRUPTED FLOW UPSTREAM AND DOWNSTREAM OF FLOW METER TO INSURE ACCURATE FLOW REPORTING - REFER TO MANUFACTURER'S LITERATURE AND ENSURE THAT MINIMUM DISTANCE REQUIREMENTS ARE MET.

1. FLOW SENSOR (REFER TO LEGEND FOR SIZE) ASSEMBLY INCLUDES PVC PLASTIC BODY (SOCKET ENDS)
2. SCH.40 PVC PIPE (SIZE PER FLOW SENSOR CONNECTIONS) PROVIDE LENGTHS AS REQUIRED FREE OF FITTINGS
3. SOLID BRICK (SUPPORT ALL FOUR CORNERS OF BOX)
4. CARSON #1324-15 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
6. MAINLINE PIPING (REFER TO LEGEND FOR TYPE AND SIZE)
7. COMMUNICATION CABLE AS PER FLOW SENSOR MANUFACTURER (INTEFACE WITH CONTROLLER)
8. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
9. 3M #DBR WIRE SPLICE KIT (PROVIDE 24" COILED SLACK FOR EACH CONDUCTOR)

C SCALE: NTS — FLOW SENSOR (1" THROUGH 4") - REFERENCE ONLY (SEE PHASE 1)
24" BURY (1324-15 BOXES)

1. 1" QUICK COUPLER VALVE - MODEL AS PER IRRIGATION LEGEND AND SPECIFICATIONS
2. CARSON (OLDCASTLE) #910-10 WITH T-STYLE COVER
3. LASCO #G17S-218-SNAPLOK - 1" DIAMETER, 24" LAY, BRASS MIPT OUTLET, LONG SPIGOT INLET
4. SCH.80 PVC FITTING WITH 1" SOCKET OUTLET
5. 1" SCH.40 PVC PIPE - CUT TO 18" LENGTH - INSTALL ON PROVIDED FITTING AT SWING-JOIN
6. 3/8" STEEL REBAR - 24" LENGTH (2 PIECES REQUIRED - SEE SWING-JOINT INSTRUCTIONS)
7. SOLID BRICK (2 BRICKS REQUIRED)
8. MAINLINE, SUB-MAIN OR LATERAL PIPING (REFER TO PLAN FOR SIZE)
9. 3/4" CRUSHED GRAVEL - TAMP AND COMPACT
10. 1" QUICK COUPLER KEY (UNLESS OTHERWISE NOTED ON PLAN, PROVIDE 3 WITH JOB)
11. 1" x 3/4" HOSE AND SWIVEL (UNLESS OTHERWISE NOTED ON PLAN, PROVIDE 3 WITH JOB)

F SCALE: NTS — 1" QUICK COUPLER VALVE
24" BURY - 3" OR SMALLER PIPE

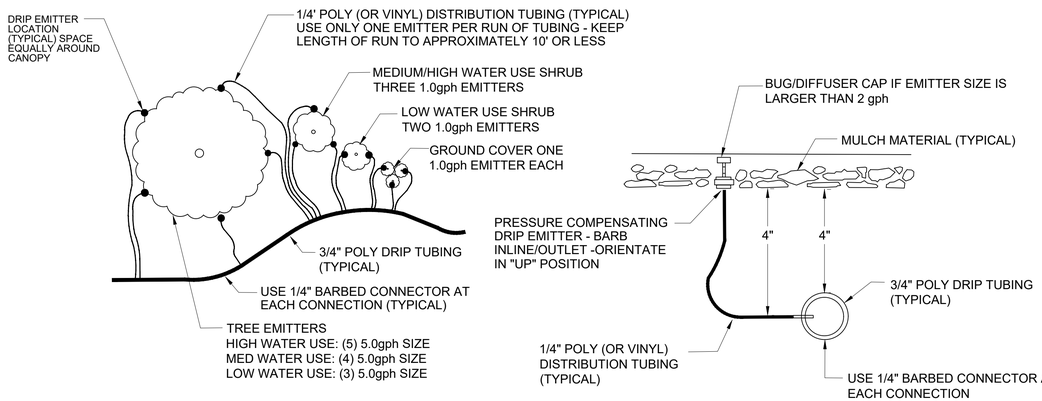
IRRIGATION DETAILS

L-7.01 SHEET 20 OF 25

1. AUTOMATIC ZONE VALVE (REFER TO LEGEND FOR MODEL AND SIZE)
2. SCH.80 PVC TRU-UNION BALL VALVE (REGULAR STYLE, SOCKET ENDS)
3. SCH.80 PVC UNION (THREAD x SOCKET ENDS)
4. CARSON #1324-12 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. MAINLINE SERVICE FITTING (USE SCH.80 PVC FOR PIPE 3" AND SMALLER, DUCTILE IRON 4" AND LARGER)
6. LATERAL PIPE (REFER TO PLAN AND SIZE TYPE)
7. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL SLIGHTLY BELOW MAINLINE PIPE)
8. SCH.80 PVC TOE NIPPLE (PROVIDE 12" LENGTH OR LENGTH AS REQUIRED TO ACCOMMODATE VALVE BOX)
9. SCH.80 PVC TOE NIPPLE (PROVIDE 3" LENGTH OR LENGTH AS REQUIRED FOR PROPER CLEARANCE)
10. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
11. 3M #DBRY WIRE SPLICE KIT OR AS REQUIRED BY VALVE MANUFACTURER (PROVIDE 24" COILED SLACK)
12. SOLID BRICK (SUPPORT ALL FOR CORNERS OF BOX)
13. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
14. SCH.80 PVC TOE NIPPLE (PROVIDE 8" LENGTH, CUT TO LENGTH REQUIRED TO MATCH DEPTH OF BURY)
15. SCH.80 PVC ELBOW (SOCKET ENDS)
16. BASKET-STYLE, NON-PRESSURE REGULATING FILTER WITH MAINTENANCE INDICATOR (200 MESH, 75 MICRON)

FOR DECODER (2-WIRE) INSTALLATIONS:



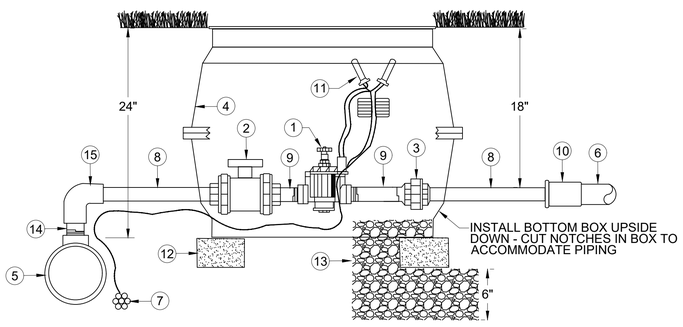
- REFER TO LEGEND FOR DECODER MODULE REQUIRED - INSTALL AS PER MANUFACTURER'S INSTRUCTIONS

NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING, SPRINKLER TOPS, VALVE HANDLES, VALVES BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

G SCALE: NTS — ELECTRIC ZONE VALVE - DRIP (1")

24" x 18" BURY (1324-12 BOXES)



IMPORTANT NOTES:

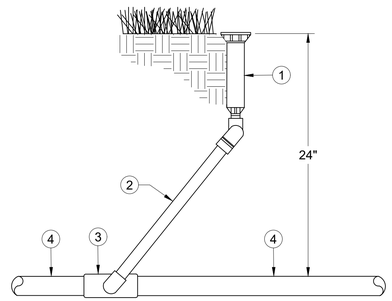
A. DRIP EMITTER MUST BE PRESSURE COMPENSATING - OTHER EMITTER TYPES ARE NOT ALLOWED
B. FOLLOW MANUFACTURER'S INSTRUCTIONS FOR INSERTING DRIP EMITTERS - NOTE INLET AND OUTLET SIDE OF EMITTER.
C. SECURE ALL TUBING IN PLACE WITH LANDSCAPE STAPLES IN 3.0" INTERVALS.
D. NEVER STRETCH ANY TUBING TIGHT - THE CONTRACTOR MUST ALLOW ADEQUATE SLACK IN ORDER FOR THE TUBING TO EXPAND AND CONTRACT WITH TEMPERATURE CHANGES.
E. EACH DRIP EMITTER SHALL USE A SEPARATE 1/4" SPAGHETTI TUBE. DO NOT INSTALL MULTIPLE EMITTERS ON 1/4" SPAGHETTI TUBING. SPACE EMITTERS EQUALLY AROUND CANOPY OF PLANT MATERIAL.
F. INSTALL EMITTERS ORIENTATED UPWARD AND JUST ABOVE THE MULCH MATERIAL SURROUNDING THE PLANT. THE EMITTER SHOULD NOT BE HIGHER THAN 1" ABOVE MULCH MATERIAL.

H SCALE: NTS — DRIP EMITTER LAYOUT - DRIP TUBING

ARRANGEMENT AT PLANTINGS

1. AUTOMATIC ZONE VALVE (REFER TO LEGEND FOR MODEL AND SIZE)
2. SCH.80 PVC TRU-UNION BALL VALVE (REGULAR STYLE, SOCKET ENDS)
3. SCH.80 PVC UNION (SOCKET ENDS)
4. CARSON #1324-12 VALVE BOX (2 REQUIRED) - PROVIDE (1) "T-STYLE" LID OF APPROPRIATE COLOR
5. MAINLINE SERVICE FITTING (USE SCH.80 PVC FOR PIPE 3" AND SMALLER, DUCTILE IRON 4" AND LARGER)
6. LATERAL PIPE (REFER TO PLAN AND SIZE TYPE)
7. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL SLIGHTLY BELOW MAINLINE PIPE)
8. SCH.80 PVC TOE NIPPLE (PROVIDE 12" LENGTH OR LENGTH AS REQUIRED TO ACCOMMODATE VALVE BOX)
9. SCH.80 PVC TOE NIPPLE (PROVIDE 3" LENGTH OR LENGTH AS REQUIRED FOR PROPER CLEARANCE)
10. SCH.40 PVC COUPLING (WITH REDUCER BUSHING IF NECESSARY)
11. 3M #DBRY WIRE SPLICE KIT OR AS REQUIRED BY VALVE MANUFACTURER (PROVIDE 24" COILED SLACK)
12. SOLID BRICK (SUPPORT ALL FOR CORNERS OF BOX)
13. 3/4" CRUSHED GRAVEL (TAMP AND LEVEL) PROVIDE 6" BASE AND PARTIALLY FILL BOX INTERIOR
14. SCH.80 PVC TOE NIPPLE (PROVIDE 8" LENGTH, CUT TO LENGTH REQUIRED TO MATCH DEPTH OF BURY)
15. SCH.80 PVC ELBOW (SOCKET ENDS)

FOR DECODER (2-WIRE) INSTALLATIONS:



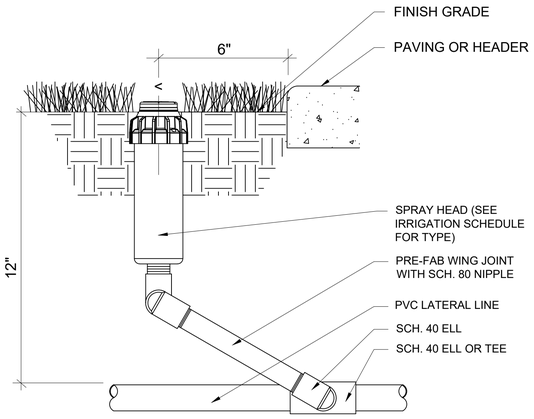
- REFER TO LEGEND FOR DECODER MODULE REQUIRED - INSTALL AS PER MANUFACTURER'S INSTRUCTIONS

NON-POTABLE WATER INDICATORS:

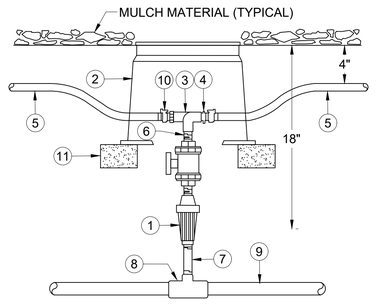
- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING, SPRINKLER TOPS, VALVE HANDLES, VALVES BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

I SCALE: NTS — ELECTRIC ZONE VALVE

24" x 18" BURY (1324-12 BOXES)



1. TYPICAL 4" OR 6" POP-UP SPRAY HEAD SPRINKLER WITH 1/2" FIPT INLET (SEE LEGEND)
2. SWING-JOINT ASSEMBLY (RIDGED OR FLEXIBLE) 1/2" INLET x 1/2" MIPT OUTLET x 18" LAY LENGTH
3. SCH. 40 PVC LATERAL FITTING WITH 1/2" OUTLET (CONNECTION DETERMINED BY SWING JOINT)
4. LATERAL PIPING (SEE LEGEND FOR SIZE AND TYPE)



NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

J SCALE: NTS — TYPICAL SPRAY HEAD 1/2" INLET (4"-6" POP)

K SCALE: NTS, SN: - — GEAR DRIVEN ROTOR

1. RAINBIRD PSI-M30X-075 30psi PRESSURE REGULATOR (3/4" NPT INLET AND OUTLET)
2. CARSON (OLDCASTLE) #910-10 WITH "T-STYLE" COVER OF APPROPRIATE COLOR
3. SCH. 40 PVC THREADED TEE OR THREADED ELL (REFER TO PLAN) - 3/4"
4. BARBED DRIP INSERT FITTING (TYPICAL) (3/4" MIPT x 3/4" BARB)
5. 3/4" POLY DRIP TUBING - MAXIMUM RUN OF 150' IN EACH DIRECTION
6. SCH.80 PVC NIPPLE - 3/4" x CLOSE
7. SCH.80 PVC NIPPLE - 3/4" x 6" (OR LENGTH AS REQUIRED)
8. SCH.40 PVC LATERAL FITTING WITH 3/4" THREADED OUTLET (SEE PLAN FOR SIZE)
9. LATERAL PIPING (SEE PLAN FOR SIZE AND TYPE)
10. 1" STAINLESS STEEL HOSE CLAMP (TYPICAL) - SECURE TUBING TO INSERT FITTING
11. SOLID BRICK (2 BRICKS REQUIRED)

NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

L SCALE: NTS — PVC TO DRIP TUBING CONNECTION

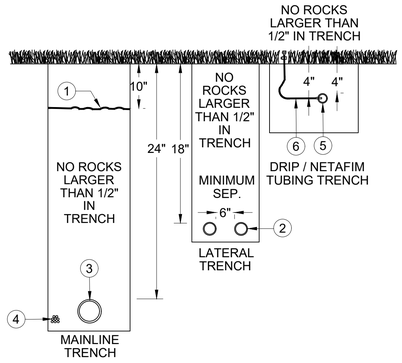
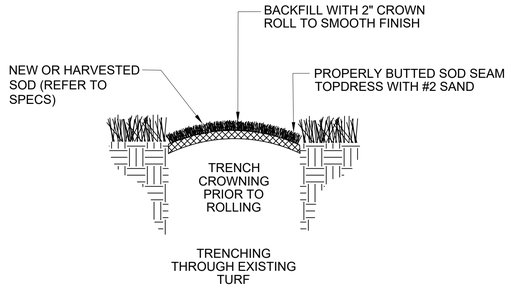
IRRIGATION DETAILS

L-7.02 SHEET 21 OF 25



1. COMPRESSION FLUSH CAP FOR 3/4" POLYETHYLENE DRIP TUBING
2. CARSON (OLDCASTLE) #910-10 WITH "T-STYLE" COVER OF APPROPRIATE COLOR
3. 3/4" POLYETHYLENE DROP TUBING
4. COMPRESSION ELBOW FOR 3/4" POLYETHYLENE DRIP TUBING
5. SOLID BRICK (2 BRICKS REQUIRED)



NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

M DRIP TUBING FLUSH CAP

SCALE: NTS

1. 3" WIDE, NON-DETECTABLE "BURIED IRRIGATION PIPING" WARNING TAPE - 10" BURY
2. LATERAL OR SUBMAIN PIPING - 18" BURY
3. MAINLINE PIPING - 24" BURY
4. 24V WIRE BUNDLE OR COMMUNICATION CABLE (INSTALL WIRES ON ONE SIDE OF AND SLIGHTLY BELOW MAINLINE PIPE)
5. 3/4" POLYETHYLENE DRIP TUBING OR NETAFIM SUBSURFACE TUBING - 4" BURY
6. 1/4" POLY OR VINYL DISTRIBUTION TUBING - 4" BURY

NON-POTABLE WATER INDICATORS:

- THE CONTRACTOR SHALL INSTALL PURPLE (VIOLET) COLORED PIPING. SPRINKLER TOPS, VALVE HANDLES, VALVE BOXES AND LIDS IF USING NON-POTABLE WATER OR IF REQUESTED BY THE OWNER OR IF OTHERWISE INDICATED ON PLAN.

N DEPTH OF BURY - TRENCHING

SCALE: NTS

MAINLINE, LATERAL & DRIP TUBING

NOTE:
ALL PIPE SLEEVES UNDER ALL HARDSCAPE SHALL BE SCHEDULE 40 PVC AND UNDER NEW STREETS SHALL BE SCHEDULE 80 PVC. THEY SHALL BE INSTALLED WITH A MINIMUM OFFSET AT THE JOINTS TO PERMIT EASY INSTALLATION AND REMOVAL OF THE IRRIGATION LINES. ALL PLASTIC LINES SHALL BE INSTALLED IN SLEEVES UNDER PAVED AREAS. SLEEVES SHALL EXTEND AT LEAST 12" BEYOND THE EDGES OF THE PAVEMENT. SIZE OF SLEEVES SHALL BE AS FOLLOWS:

SLEEVING SCHEDULE

PIPE SIZE	MIN. SLEEVE SIZE	PIPE SIZE	MIN. SLEEVE SIZE
1/2", 3/4", 1"	2"	3", 4"	6", 10"
1-1/2"	3"	8"	16"
2", 2-1/4"	4", 6"	10"	16"

PIPE SIZING SCHEDULE

PIPE SIZE	FLOW (GPM)		PIPE SIZE	FLOW (GPM)	
	SCH 40	CL 200		SCH 40	CL 200

(1-800-321-ALERT)
Know what's below. Call before you dig.

SECTION 32 93 00 - LANDSCAPE

PART 1 - GENERAL

1.01 Work Included

1. Landscape Fine Grading
2. Soil Preparation
3. Tree Supports and Headers
4. Planting
5. Watering
6. Maintenance

1.02 Definitions

Plants - all shrubs and cacti other than trees, and turf.
Plant material - all trees, shrubs, succulents, cacti, ground cover, and other plants.

1.03 Related Work

Contractor: minimum 5 years experience in supply and installation of landscape materials.

1.04 Source Quality Control

Provide certificates of inspection for all materials as required by this specification and/or prevailing law or regulation.

Developer's Representative shall review plant material prior to planting. Any material deemed unacceptable shall be removed from the site and not planted.

Provide trees and shrubs grown in a recognized nursery in accordance with good horticultural practice. Provide healthy, undamaged, vigorous stock grown under climactic conditions similar to conditions at project site and free of disease, insects, eggs, larvae and defects such as sun-scald, knots, injuries, abrasions or disfigurements. Provide trees and shrubs of the sizes indicated. Trees and shrubs of sizes larger than those indicated may be used provided roots, root ball, staking and planting pits are increased proportionately.

1.05 Reference Standards

- Arizona Nursery Association plant standards for nursery stock
- ANSI 60.1 - American Standards for Nursery Stock, International Society of
- Arboriculture
- American Joint Committee on Horticultural Nomenclature

1.06 Samples

Submit samples to developer's representative a minimum of 2 weeks prior to start of work for the following material:
1. Topsoil for backfill mix
2. Mulches
3. Tree supports
4. Inert Groundcovers (1 gallon)
5. Boulders
6. Steel Edging - 6" sample length

The Developer's Representative reserves the right to take and analyze samples of materials for conformity to specification at any time. Furnish samples upon request by Developer's Representative.

1.07 Products

Submit to Developer's Representative a minimum of 2 weeks prior to start of work manufacturer's comprehensive product description, including specifications and installation instructions.

1.08 Certificates and Test Reports

Provide and pay for all materials testing. Testing agency shall be acceptable to the Developer's Representative.

Submit to Developer's Representative a minimum of 2 weeks prior to start of work 2 copies of certificates of inspection as required by these specifications, jurisdictional authorities, and vendor's certified analysis for soil amendments, fertilizer materials, and chemicals. Submit other data substantiation that materials comply with specified requirements. Certificates are required to determine the quality and quantity of all specified soil amendments.

Materials certification to be submitted include, but are not limited to:

- Topsoil source and nutrient analysis
- Mulch
- Fertilizers/soil amendments/chemicals

Test representative material samples proposed for use. Provide the following data:

- Topsoil and planting backfill
- Soil PH
- Particle size, percentage soil texture
- Percentage organic material
- Nutrient level analysis
- All macro, secondary and micronutrients
- Salinity
- Percolation rate

Recommendations on type and quantity of amendments required to bring levels into acceptable ranges as detailed in part 2 - products of materials of these specifications.

Separate recommendations to be submitted for each crop. Crop to be identified as:

- irrigated trees, shrubs, and groundcovers
- turf or lawn

1.09 Maintenance Data

Submit to Developer's Representative 2 copies of written instructions, prior to expiration of the initial maintenance period, recommending procedures to be followed by the developer for the maintenance of landscape work for one full year.

1.10 Product Delivery, Storage and Handling

Deliver packaged materials in containers showing weight, analysis and identification of manufacturer. Protect materials from environmental conditions and deterioration at all times.

Provide protective covers to plant life and trees during delivery. Do not prune trees prior to delivery. Do not bend trees or shrubs in such a manner as to cause damage or destroy shape.

Deliver materials after preparations for planting have been completed. If planting is delayed for more than 8 hours after delivery, set plant material in shade, protect from weather and mechanical damage and keep roots moist.

Do not remove container grown stock from containers until planting time.

1.11 Site Conditions

Determine location of underground utilities. Use professional services to determine locations.

Execute work as required to prevent damage.

Maintain grade stakes set by others until directed otherwise.

Protect of all existing plants to remain:
1. Do not store materials or equipment, permitted burning, or operate or park equipment under the branch of any existing plant or plant material to remain except as actually required for construction in those areas
2. Provide barricades, fences or other barriers as necessary at the drip line to protect existing plants to remain from damage during construction
3. Notify Developer's Representative in any case where contractor feels grading or other construction called for by contract documents may damage existing plants to remain
4. If existing plants to remain are damaged during construction, contractor shall replace such plants of the same species and size as those damaged at no cost to Developer. Determination of extent of damage and value of damaged plant shall rest solely with Developer's Representative

1.12 Warranty

Submit warranty to Developer's Representative.

Trees, Saguaros, Yuccas, and Ocotillos
Warrant that trees, saguaros, yuccas and ocotillos will be alive and in good health for a period of one (1) year after acceptance except for defects resulting from neglect by developer or abuse by others.

Developer must follow contractor's maintenance schedule and provide current maintenance log to Developer's Representative.

Remove and replace dead, unhealthy or girdled trees, yuccas and ocotillos that lose original form and size during warranty period with material equal to that specified. Replace any material which does not meet requirements within thirty days of notification. All replacement material shall be subject to an additional one year maintenance period.

Shrubs and Other Plantings

Guarantee all other planting will be alive and in satisfactory condition for a period of 90 days from date of acceptance or will be replaced at no additional cost to the Developer.

All plant material shall be maintained in a healthy, sturdy condition during the warranty period by the contractor. Turf shall be mowed and trimmed weekly after root establishment.

All replacement plants, including shrubs, cacti, groundcovers, vines and perennials shall be subject to an additional 90 day maintenance period.

PART 2 - PRODUCTS

2.01 Fill Materials

Provide dry, loose material for fill, backfill, planting backfill and topsoil for planter beds. Frozen or muddy soils are not acceptable. Salts are not to exceed 1500 ppm, and soils shall be free of debris, noxious weeds, ingredients or objects detrimental to healthy plant growth.

Topsoil - screened, fertile, friable, from well drained arable land, free of noxious weeds, refuse, roots, heavy clay or any material toxic to plant growth; contents shall be as follows:

- Silt: 20-45%
- Slay: 15-20%
- Sand: 30-60%
- Ph: 7.0-8.3
- Soluble Salts: 1,500 ppm
- Organic material (natural or otherwise): 2% minimum
- Nutrients: enough to bring levels of acceptable plant growth.

Percolation rate shall be between 3 to 4 inches per hour. Existing topsoil may be used provided it meets these requirements. Imported topsoil must be proven to meet these requirements.

2.02 Commercial Grade Fertilizers

Agri-Sul dispersal - use only for sulfur agriculture grade gypsum, osmacote, 'sierra-blend', apply at mfg. recommended rate for each planting type.

2.03 Soil Amendments

Wood shavings: nitrogen stabilized fir or pine shavings containing 0.75% total nitrogen and 0.1 to 0.15% total iron, and under 60 ppm total manganese; composted, leached and aged for a minimum of 10 to 12 months; ph factor, 4.0 to 4.5. No soil amendments are required for salvaged plant material and cacti unless otherwise specified.

2.04 Tree Supports

Tree stakes: copper naphthenate impregnated lodge pole 12 feet in length for trees 15 gallon to 36" box, 2 lodge poles per tree, 3 poles for multi-trunk trees. Tree stakes are not required for salvaged plant material or 48" box trees or larger, unless determined otherwise by Landscape Architect due to high wind conditions. Tree ties: provide a minimum of two per tree, 18" tree strap by star nursery (www.Starnursery.Com) or approved equal, beige, with grommets. No. 10 gauge pliable zinc coated iron wire to be threaded through grommets and connected to tree stakes. Wire will not make contact with tree.

2.05 Pesticides and Herbicides

Pre-emergent herbicide shall be Surflan as manufactured by Dow/Elanco chemical company or equal.

Pesticides shall be ortho "Lindane Borer and Leaf Miner Spray" by Ortho, Consumer Products Division, Chevron Chemical Company, San Francisco, CA 94119, or "Borer Killer", by Greenlight Company, San Antonio, TX 78217. Contact herbicide shall be submitted by contractor to Developer's Representative.

Types of herbicides to be used and the methods of application will conform to Environmental Protection Agency, state and location requirements and labeling instructions.

2.06 Plant Material

Plant material shall be healthy, shapely and well-rooted. Roots shall show no evidence of having been restricted or deformed at any time. All plants shall have normally developed branching. Plants shall be free from disfiguring knots, sun scald injuries and abrasions of bark.

Plants not meeting these requirements shall be considered defective and shall be replaced immediately. All plants shall be true to name and shall be tagged, one of each variety. All plant material shall be grown in nurseries inspected by the State Department of Agriculture.

Specimen plant material shall be selected and tagged at the growers nursery prior to shipment.

Plants shall be measured when branches are in their normal position. Height and spread dimensions specified refer to main body of plant and not branch tip to tip. Caliper measurement shall be taken at a point on the trunk 6" above natural ground line for trees up to 4" in caliper and at a point 12" above the natural ground line for trees over 4" in caliper. If a range of size is given, no plant shall be less than the minimum size and not less than 40% of the plants shall be large as the maximum size specified. The measurements specified are the minimum size acceptable and are the measurements after pruning, where pruning is required. Plants that meet the measurements specified, but do not possess a normal balance between height and spread shall be rejected.

Container stock, when specified, shall have grown in the containers in which delivered for at least 6 months, but not over 2 years. Samples must prove no rootbound conditions exist. No container plants that have cracked or broken balls of earth when taken from container shall be planted except upon special approval by Developer's Representative.

Container stock shall not be pruned before delivery. Field grown plants recently transplanted into containers will not be accepted.
Sod shall be dense with the grass having been mowed at a height of 1" prior to removal from field. All grass shall be grown on fumigated fields. Sod shall not be stacked for more than 24 hours between time of cutting and time of delivery.

2.07 Inert Groundcover

Inert groundcovers, including but not limited to, decomposed granite (DG), crushed rock, and river rock shall have a minimum 2" coverage depth, unless noted otherwise on plans. Inerts shall be the size and color as per plan, and shall be taken from a single quarry. DG shall be from a single source approved by the Developer's Representative. Screened DG shall be uniform, free of clay lumps, calcareous coatings, caliche, organic matter or deleterious
substances.

Boulders will be from a single source approved by the Developer's Representative. Surface Select Boulders to be free of broken areas, scars and scrapes. Boulders for seating shall have a flattened top.

2.08 Edging

Edging, including but not limited to, poly or steel product, shall be of the size (gauge and depth) specified on plans and drawings. Samples shall be submitted by contractor for approval.

PART 3 - EXECUTION

3.01 General

Install all material in accordance with the methods, techniques and specifications of each manufacturer and these specifications.

Do not begin planting until completion of the site grading and installation of a fully functional underground irrigation system is in place.

The Contractor will, prior to the start of construction activities on the site, define the limit boundaries of all areas designated as off-limits to the Contractor. Provide protective fencing for existing landscaped plants from construction activities as noted per drawings.

3.02 Backfill, Imported Fill or Artificial Soil and Gravel

Inspect the integrity of all damp-proofing and water proofing membranes which occur over, on or against any construction to be fully or partially concealed by earthwork prior to the placement of any imported soil, backfill, gravel fill or sub-base.

3.03 Topsoil

Import additional topsoil only as required to bring planting areas up to finish grade or per turf or planting bed requirements. Spread and cultivate soil so that no settling takes place at any time.

3.04 Landscape Fine Grading

Allow for the addition of soil amendments, conditioners and any specified top dressing when determining and executing finish grade.

Set finish grade 2-1/2 inches below adjacent paving, curb and headers to allow for decomposed granite, groundcover mulch or turf sod.

Complete all finish grading prior to commencing landscape operations. Surface drainage will be away from the building foundation and walls, and will ensure proper drainage of the site as indicated on the drawings. Grade all planting areas to a smooth, even and uniform plane with no abrupt changes to surface, and the area drains as designed. Grade and maintain all flow lines, designated or not, to allow free flow of surface water. Cultivate entire area to a depth of 6 inches minimum and remove all rock in excess if 1-1/2 inches, all building rubble, building construction material, waste and any other material that may impair satisfactory growth.

Dispose of any unacceptable or excess soil or other materials at a legal offsite disposal area and pay all dumping fees and charges.

3.05 Inert Groundcovers

Apply inert groundcovers to a 2 inch minimum depth within 1/2 inch of the top of adjacent curb or sidewalk.

Exercise care when placing inert groundcover around plant materials so as not to choke, cover or damage plant. Inert groundcovers will be kept out of the crowns of the plants.

Areas of installation will be completely weed-free before the placement of inert groundcover.

Apply pre-emergent according to manufacturer's recommendations before and after groundcover installation. Feather granite to provide a smooth transition to areas not receiving DG. After placing and grading DG, the Contractor will lightly water the granite to remove fine material from the surface.

3.06 Herbicide Application

All areas shall be maintained weed-free at all times during construction. Do not apply pre-emergent herbicides at locations of revegetation seeding. The contractor shall manually remove invasive weeds within these areas.

3.07 Tree Support

Only stake trees which are delivered with nursery stakes. Remove nursery stakes and install lodgepole per specifications. Install tree supports as shown on the drawings within 48 hours of planting. Bracing stakes will be driven vertically into firm ground and outside the rootball. Tree supports shall be installed to prevent rubbing and girdling, yet allow for trunk movement. Tree ties that encircle trunks shall be large enough to allow for normal growth of the trunk during the first year without girdling.

3.08 Plant Placement

Layout plant locations with stakes or flags prior to planting. Coordinate with developer's representative to assure appropriate location.

Place shrubs no closer than 20 inches from foundations, fences, walls and walks or as far as character of growth demands, whichever is greater unless directed otherwise by the Developer's Representative.

Place trees no closer than 6 feet to foundations, fences, walls and walks unless directed otherwise by the Developer's Representative.

All plants which settle deeper than the surrounding grade will be rejected and must be raised to correct level.

Where rock, underground construction or other detrimental conditions are encountered at plant pits, Developer's Representative may selective alternate location.

3.09 Container Stock

Test drainage of plant beds and pits by filling with water. Notify developer's representative of areas where water is retained more than 24 hours and request a hardpan planting detail. Any drainage problem must be rectified prior to planting.

Do not expose roots to air except during transplanting.

Dig pits with perpendicular sides to a minimum of 2 to 3 times the width (see details) of the root ball for containerized trees and shrubs. Dig pits only as deep as the root ball to prevent settling of the tree or shrub.

Unless otherwise specified, place all plants in the center of planting pits, plant upright and face to give the best appearance and relationship to the adjacent plants for structures.

Plants will be set in relation to surrounding grade so they are even with depth at which they were grown in nursery or container.

After removing plant from container, scarify sides of rootball to eliminate root bound condition. Do not plant stock if rootball is cracked or broken.

3.10 Boxed Trees

Branches and rootballs must not be damaged.

Top of rootball will be one ince (1") above adjacent finished grade.

Add soil backfill under the tree if needed to bring rootball to proper height.

Planting pit will be backfilled with clean topsoil as box sides are progressively removed to minimize damage to the rootball and to prevent it from collapsing.

Backfill in bottom of planting pit will be to prevent undue settling.

Water the trees at planting as needed until the permanent automatic irrigation system is installed and operating.

3.11 Backfilling

Backfill plant pits and form a temporary shallow basin around the plant to hold enough water to saturate the root ball and backfill. Water plants immediately after planting and allow backfill to settle in plant pit. Do not water ocotillos after planting. Remove basin prior to installation of inert groundcovers or turf.

Treat all planting areas with a pre-emergent, with the exception of the revegetated seed areas.

3.12 Annuals

At time of transplanting, soil in flats shall be sufficiently moist so as not to fall apart when lifting plants. Plant each plant with its proportionate amount of the flat soil in a manner that will ensure a minimum disturbance to the root structure.

Plant flat material sufficiently deep to cover all roots. Firmly tamp the earth around each plant to force out large air pockets.

3.13 Sod

Soil Preparation

Provide soil with an organic matter content of 25 percent to 30 percent. Incorporate into soil by tilling the soil to a depth of 6 inches thoroughly remove debris, weeds and rocks from soil.

Soil Amendments

Prior to tilling, apply gypsum at a rate of 100 pounds per 1,000 square feet, phosphate at a rate of two pounds per 1,000 square feet and soil sulfur at five pounds per 1,000 square feet.

Sod Installation

Install sod along the straightest edge of turf area. Stagger joints in a brick- like pattern. Avoid gaps and overlapping. Place sod diagonally across slopes, so it cannot slide, and so that it provides complete cover with no brown sections or cracks showing. Water sod at least every thirty minutes. After installation, water lightly and roll in two directions with a sod roller.

3.14 Watering

Water all plants immediately after planting to avoid drying out, to the full depth, saturating the root ball of each plant hole repeat watering as often as necessary to keep the ground moist but not soaked, well below the root system of the plants.

3.15 Clean Up

Keep all areas clean and orderly during and after execution of work.

3.16 Pruning

Prune shrubs and trees upon completion of the work, according to standard horticultural practices to preserve the natural character of the species and to repair or replace injured plants at directed. Limit pruning only to remove dead or injured twigs and branches and to compensate for loss of roots as a result of planting operations

3.17 Maintenance Period

Upon substantial completion, as determined by the Developer's Representative, in accordance with the conditions of the contract, the contractor shall be notified in writing that the maintenance period is to begin.

Landscape contractor shall be responsible for maintenance of landscaped areas for a period of 90 days. Maintenance includes watering trees and grasses, monitoring and adjusting the irrigation system as necessary, mowing and trimming lawn areas, pruning and trimming plant material, weed removal, and cultivating plant beds.

Landscape contractor shall be responsible for maintenance of the sprinkler irrigation system, including monitoring and adjusting the duration and frequency of the watering schedule, adjustment of heads for coverage and elevation, repair of leaks in both main and lateral lines, and all other work required to establish a complete working sprinkler irrigation system.

Landscape contractor shall be responsible for maintenance of new planting, including watering, cultivating, weeding, mulching, re-staking, tightening and repairing guys, resetting plants to proper grades and position, maintenance of temporary tree wells, and furnishing and supplying all fertilizers, herbicides, and pesticides to maintain a thriving landscape. Landscape contractor, in order to protect his guarantee, shall give typewritten to developer, a complete maintenance manual in the care, maintenance and fertilization of the landscape.

Maintenance manual may include, but is not limited to the following: irrigation, fertilization, weeding, pesticide and herbicide application, pruning, resetting unstable plants, mowing, repairing, adjusting or replacing stake and guying, repair damage caused by weather, wildlife and vandalism or other hazards, perform maintenance operations necessary to assure healthy plant growth.

Landscape contractor shall request, in writing, a final inspection at the completion of the maintenance period. If the developer's representative determines the work is satisfactory, the maintenance period will end on the date of the final inspection. If the maintenance is unsatisfactory, the maintenance period will be extended, at the contractor's expense, until such time as all corrections are made and the work is inspected and approved by the developer's representative. Retention will not be released until final inspection is made and approval issued by the developer's representative.

3.18 Field Quality Control

Notify Developer's Representative of the requirement for inspections at least 48 hours in advance. Inspections are required, but not limited to, the following:

- Inspection and acceptance of plant material prior to shipping.
- At completion of rough grade prior to boulder placement.
- At completion of landscape finish grading and soil preparation, prior to planting.
- At layout of irrigation system, prior to installation of irrigation system.
- A installation of irrigation system, prior to backfilling trenches and planting
- During installation of specimen tree, palm or other specimen plant material.
- After staking locations for plant holes, but prior to planting.
- During the planting process.
- During the placement and aiming of all light fixtures
- At substantial completion of the work.
- During warranty period to observe maintenance procedures.
- At final completion of the work.

SPECIFICATIONS

L-8.01 SHEET 23 OF 25

SECTION 32 84 00 - PLANTING IRRIGATION

PART 1 - GENERAL

1.01 SUMMARY:

A. Work Included: Provide a provision for an underground irrigation system including the following:

1. Trenching, stockpiling, excavation of materials, and refilling trenches.
2. Complete systems including but not limited to piping, pump station, backflow preventer, assemblies, valves, fittings, heads, controller wiring, and final adjustments to ensure efficient coverage as determined by Consultant.

1. 02 REFERENCES:

A. Perform Work in accordance with requirement of Conditions of the Contract and Division 01-General Requirements as well as provisions of all applicable laws, codes, ordinances, rules and regulations. Conform to requirements of reference information listed below, except where more stringent requirements are shown or specified in Contract Documents.

1. American Society for Testing and Materials (ASTM) - Specifications and Test Methods specifically referenced in this section.
2. Underwriters Laboratories (UL) - UL wires and Cables.

1.03 QUALITY ASSURANCE:

A. Installer Qualifications: Installer shall have had considerable experience and demonstrated ability in the installation of irrigation system(s) of specified type(s) in a neat, orderly, and responsible manner in accordance with recognized standards of workmanship.

B. Special Requirements:

1. Tolerances - Specified depths and separations of pressure supply lines and laterals and pitch of pipes are minimums. Settlement of trenches is cause for removal of finish grade treatment and repair of finished grade treatment.
2. Coordination with Other Contracts - Protect, maintain, and coordinate Work with Tasks under other sections.
3. Damage to Other Improvements - Contractor shall replace or repair damage to grading, soil preparation, seeding, sodding, or planting done under other Sections during work associated with installation of irrigation system at no additional cost to the Owner.
4. Work involving substantial plumbing for installation of pump station, backflow preventers, copper service, and related work shall be executed by licensed and bonded plumber(s), performed in accordance with all prevailing codes and regulations.
5. Work involving connection to, installation, or extension of 120-volt or greater electrical service shall be executed by a licensed and bonded electrician, performed in accordance with all prevailing codes and regulations.

D. Irrigation Control System Procedures:

1. Contractor shall be responsible to provide and install all specified control equipment to result in a complete and working system, whether or not all appurtenances are shown on plans. System shall include controllers; all grounding and surge protection; master valves; and weather communication source.

1.04 SUBMITTALS:

A. Submittals: Prepare and make submittals in accordance with conditions of the Contract prior to installation.

B. Construction Record Drawings:

1. Contractor shall draw lateral piping, controller station numbers, and all other record information on the Field Record. The Field Record plan(s) shall be available at the Project Site for review. Upon completion of Project, Contractor shall submit Field Record Plan for review, prior to final acceptance. Dimension from two permanent points of reference, (building corners, sidewalks, road intersections, or permanent structures), location of the following items:
   a. Routing of pressure supply lines (dimension every 100 feet along the routing).
   b. Electric control valves.
   c. Control wire routing (if not with pressure supply line).
   d. Record plans shall be to same scale and in the same format as designed plans.
2. Prior to scheduling walk-through for substantial completion, Contractor is to submit all Field Record information to the Owner for approval.
3. Contractor shall also provide both a hard copy and Electronic Form version of the Controller Data Sheets to the Consultant.

C. Controller Charts: Do not prepare controller charts until record (as-built) drawings have been approved by the Consultant.

1. Provide controller chart, automatic controller.

   a. Controller drawing may be same size reproduction of the record drawing, if scale permits fitting them inside the controller door without folding drawing. If photo reduction prints are required, keep reproduction to maximum size possible to retain full legibility. Chart may also be Controller Data Sheet as for central-satellite systems, if approved by Consultant.
   b. Controller chart shall be bond print of actual as-built system, showing area covered by that controller; or Controller Data Sheet showing information on each station, and with complete description of each station's location.
   c. Identify area of coverage of each remote control valve, using a distinctly different pastel color for each zone. Highlight heads, lateral piping, and control valves.
   d. Following review of controller drawings by Consultant, hermetically seal each chart between two layers of 20 mm thick clear plastic.
   e. Controller chart shall be completed and approved by Consultant prior to final completion walk-through of irrigation system.
   f. Attach approved controller chart to inside of each controller door using self adhesive Velcro strips.
2. Following installation of each controller, contractor shall record all station data on a "Data Sheet" provided by the Consultant. This data shall include the type and quantity of irrigation devices on each station, nozzle type, arc, area of control (turf, trees, shrubs, etc), valve size, gpm, location, etc. as shown on the Data Sheet.
3. Prior to final walk-through for each area of the project, Contractor shall confirm that the following has been accomplished:
   a. Construction record drawings per 1.04.1.
   b. Data Sheets for Controllers.

E. Operational Manual: Submit 3 sets of Operations Manual to Consultant for approval, prior to scheduling the final completion walk-through. Manual is to include the following in a 1 x 3 ring binder:

1. Index sheet stating project name, and listing Contractor name, address, phone number, and contact person. Include same information for Primary Sub-Contractors.
2. Manufacturer cut sheets for all material components of irrigation system. Highlight or circle specific models or items.

1.05 DELIVERY, STORAGE and HANDLING:

A. Deliver, unload, store and handle materials, packaging, bundling, products, in dry conditions, or a weatherproof manner, to prevent damage, breakage, deterioration, intrusion, ignition, and vandalism. Deliver in original unopened packaging containers prominently displaying manufacturer name, volume, quantity, contents, instructions, and conformance to local, state, and federal law. Remove and replace cracked, broken, or contaminated items or elements prematurely exposed to moisture, inclement weather, snow, ice, temperature extremes, fire, or job site damage.

B. Handling of PVC Pipe: Exercise care in handling, loading and storing of PVC pipe. All PVC pipe shall be transported in a vehicle which allows the entire length of pipe to lie flat so as not to subject it to undue bending or concentrated external loads. All sections of pipe that have been dented or damaged shall be discarded, and if installed, shall be removed and replaced with new piping.

1.06 JOBSITE CONDITIONS:

A. Protection of Property:

1. Preserve and protect all trees, plants, monuments, structures, and paved areas from damage due to Work in this Section. In the event damage does occur, all damage to inanimate items shall be completely repaired or replaced to the satisfaction of the Owner. All injuries to living plants shall be repaired by the Owner, and all costs of such repairs shall be charged to and paid by the Contractor.
2. Protect buildings, walks, walls, and other property from damage. Flare and barricade open ditches. Damage caused to asphalt, concrete, or other building material surfaces shall be repaired or replaced at no cost to the Owner. Restore disturbed areas to original condition.

B. Existing trees:

1. All trenching or other Work under limb spread of any and all evergreens or low branching deciduous material shall be done by hand or by other methods so as to prevent damage to limbs or branches.

C. Protection and Repair of Underground Lines: Request proper utility company to stake exact location (including depth) of all underground utilities. Take whatever precautions necessary to protect these underground lines from damage. In the event damage does occur, all damages shall be repaired by Contractor unless other arrangements have been made.

D. Replacement of Paving and Curbs: Where trenches and lines cross existing roadways, paths, curbing, etc., damage to these shall be kept to a minimum and shall be restored to original condition.

1.07 WARRANTY / GUARANTEE:

A. Contractor shall warrant materials against defects for a period of one year from the date of Substantial Completion. Contractor shall guarantee workmanship for similar period. Contractor shall be responsible for coordinating material warranty items with the manufacturer / distributor.
B. Settling of backfilled trenches which may occur during guaranty period shall be repaired by Contractor at no expense to the Owner, including complete restoration of damaged property.
C. Expenses due to vandalism before substantial completion shall be borne by Contractor.
D. Owner or representative maintenance company will maintain turf and planting areas during warranty period, so as not to hamper proper operation of the irrigation system.

1.08 MAINTENANCE:

A. Furnish the following maintenance items to Owner prior to final Acceptance:

1. 2 sets of special tools required for moving, disassembling, and adjusting each type of sprinkler head and valve supplied on this project.
2. 2 keys for each automatic controller.

1.09 EXTRA STOCK:

A. In addition to installed system furnish the following items to Owner:
1. 4 per 100 installed drip emitters of each type used.
2. 2 pop-up heads of each type used.

PART 2 - PRODUCTS

2.01 MATERIALS:

A. General piping:

Note: All piping for reclaimed water systems shall be purple colored, or wrapped with reclaimed "sock" or reclaimed marking tape, and main lines shall have detectable reclaimed marking tape in trench 12" above top of pipe continuously.

1. Pressure Supply Lines (downstream of Pump Station) - Sch. 40 PVC, Solvent Weld Belled End for 2-1/2" or smaller, and rubber-ring joint for 3" and larger with ductile iron fittings and taps.
2. Non-pressure lines - Sch. PVC, Solvent Weld Belled End.
3. Drip Piping - ¾" Sch. 40, Solvent Weld unless otherwise specified on plans.
4. Emitter Tubing - by emitter manufacturer.

B. Plastic Pipe and Fittings:

1. Identification Markings:
   a. All pipe to be identified with following indelible markings:
      1) Manufacturer's Name.
   b. All fittings including valve taps for rubber-ring pipe shall be cast or ductile iron, rubber-ring for PVC.
2. Solvent Weld Pipe - Manufactured from virgin polyvinyl chloride (PVC) compound in accordance with ASTM D2241 and ASTM D1784; cell classification 12245-B, Type 1, Grade 1.

   a. Fittings - Standard weight, Schedule 40, injection molded PVC; complying with ASTM D1784 and D2466, cell classification 12454-B.
      1) Threads - Injection molded type (where required).
      2) Tees and ells - Side gated.
   b. Threaded Nipples - ASTM D2464, Schedule 80 with molded threads.
   c. Joint Cement and Primer - Type as recommended by manufacturer of pipe and fittings.

C. Low Pressure / Volume Systems:

1. Emitters as indicated on drawings.
2. Drip Piping - manufactured of polyvinyl chloride compound conforming to ASTM D2241 and ASTM D1784, Type 1, Grade 1.
3. Fittings - Schedule 40 PVC, or as recommended by piping manufacturer.
4. Drip Valve Assembly - Type and size shown on drawings.
   a. Wye Strainer - Plastic / Fiberglass construction with 150 mesh nylon screen and blow out assembly.
   b. Control Valve - 2-way, solenoid pilot operated type made of synthetic, non-corrosive material; diaphragm-activated and slow closing. Include freely pivoted seat seal; retained (mounted) without attachment to diaphragm.
   c. Pressure Regulator - Plastic / Fiberglass construction, preset type with pressure setting per drawings.

D. Copper Pipe and Fittings:

1. Copper Pipe - Type K hard tempered.
2. Fittings - Wrought copper, solder joint type.
3. Joints - Soldered with solder, 45% silver, 15% copper, 16% zinc, and 24% cadmium and solids at 1125 F and liquids at 1145 F.

E. Brass Pipe and Fittings:

1. Fittings - Medium brass, screwed 125 pound class.
2. Brass Pipe - 85% red brass, AMSI Schedule 40 screwed pipe.

G. Valve Boxes:

1) Note: All box covers for reclaimed water systems shall be purple colored, and marked for reclaimed. Nominal pipe size.
2) Schedule or class.
3) Pressure Rating.
4) NSF (National Sanitation Foundation) seal of approval.
5) Date of extrusion.

Otherwise, valve box color to be selected based upon a review of the location and adjacent material by Owner and Landscape Architect prior to installation.

1. Drip Line Blow-out Stubs, and Wire Stub Box - Carson #910-12.
2. 1-inch through 2-inch Control Valves - Carson #1419-13B.
3. Drip Valve Assemblies - Carson #1419-13B.
4. Control Wiring Splices - Carson #910-12.
5. Main Line Gate Valves - Carson #910-12.
6. Air-Relief Valves - Carson #1419-13B.
7. Manual Drain Valves - Carson #1419-13B.
8. Master Control Valve - As shown on detail.

H. Electrical Control Wiring:
1. Low Voltage:
   a. Electrical Control Wire - Hunter two-wire.
   b. If multiple controllers are utilized, a different two wire for each controller.
2. High Voltage: Type required by local codes and ordinances, of proper size to accommodate needs of equipment serviced.

I. Sprinkler Heads: As shown on drawings. Use Purple caps or nozzles for Reclaimed Water use.
K. Electric Control Valves: As noted on drawings. Purple handles for Reclaimed Water use. Install pressure regulating devices where specified on plans.
L. Pipe Bedding Material: Construction grade sand approved by Consultant.
M. Automatic Controller: As shown on drawings. Provide two (2) remote control units (compatible as specified by Owner) as part of the work.
N. Manual Drain Valve: As shown on drawings.
O. Air-Relief Valve: As shown on drawings.
P. Master Control Valve: As shown on drawings.
Q. Pump Station: As shown on drawings.

PART 3 - EXECUTION

3.01 INSPECTION:

A. Examine areas and conditions under which Work of this Section is to be performed. Do not proceed with Work until unsatisfactory conditions have been corrected.
B. Grading operations, with the exception of final grading, shall be completed and approved by Owner prior to staking or installation of any portion of irrigation system except sleeving.

3.02 PREPARATION:

A. Staking Shall Occur as Follows:
1. Mark with powdered lime or marking paint routing of pressure supply lines, and flag heads and control valve locations for first series of zones for approval.
B. Sleeving: Install sleeving under all asphalt paving and concrete walks, prior to the installation of concrete or paving operations, to accommodate piping and wiring. Compact backfill around sleeves to 95% Standard Proctor Density within 2% of optimum moisture content in accordance with ASTM D1557.
C. Trenching: Trench excavation shall follow, as much as possible, layout shown on Drawings. Dig trenches straight, and support the pipe continuously on the bottom of trench. Trench bottom shall be clean and smooth with all rock and organic debris removed. Pressure supply line trenches shall be over-excavated as required to allow for bedding material. Trench depth shall be uniform as required to meet minimum depth requirements for the type of piping being installed.

1. Clearances:
   a. Piping smaller than 3 inches - Trenches shall have a minimum width of 7 inches. 12 inches for 3" and larger pipe.
   b. Line clearance - Provide not less than 6 inches of clearance between each line, and not less than 12 inches of clearance between lines of other trades.
   c. For Reclaimed Water systems, 2-foot vertical (below) and 6-foot horizontal separations from potable lines are required per MAG and industry standards.

2. Pipe and Wire Depth:
   a. Pressure Supply Piping - 24 inches from top of pipe (30 inches where 6" and larger pipe is on project).
   b. Non-pressure piping - 12 inches from top of pipe.
   c. Two-wire - Side and bottom of pressure supply line.
   d. Drip Piping - 12 inches from top of pipe.
   e. Emitter tubing - 12 inches from top of pipe (non slope plantings). 4 inches from the top of pipe (slopes 2:1 of greater).

3.03 INSTALLATION:

A. Other Equipment: Locate other equipment as near as possible to location designated on construction drawings. Deviations shall be approved by Consultant prior to installation.
B. PVC Piping:
1. Snake pipe in trench as much as possible to allow for expansion and contraction.
2. When pipe laying is not in progress, or at end of each day, close pipe ends with tight plug or cap. (Perform work in accordance with good practices prevailing in piping trades).
3. Coordinate pressure supply line installation with required bedding operations. Concrete thrust blocks or steel joint restraints shall be utilized for all rubber-ring joint fittings per industry standards. In sandy soil, mechanical joint fittings shall be used with thrust blocks.
4. Stake all above-grade PVC piping per details.
5. Use 45-degree ells when making perpendicular crossings of above-grade PVC piping, to depress bottom pipe.
6. Lay pipe and make all plastic-to-plastic joints in accordance with manufacturer's recommendations.

C. Drip Piping:
1. Install fitting connections per manufacturer's recommendations.
2. Use threaded risers and Sch. 40 or Sch. 80 fittings per details when making connections in drip piping for emitters and fittings.
3. Install drip line blow-out stubs at all dead ends of drip piping.
4. Any deviations from drip pipe routing shown on drawings must be approved by Consultant prior to installation.

D. Control Wiring:
1. Low Voltage Wiring (Two Wire):
   a. Bury control wiring between controller and electric valves in pressure supply

1-800-321-2537
(1-800-321-ALERT)
Know what's below. Call before you dig.

PLANTING IRRIGATION CONTINUED

line trenches, with wires consistently located to one side of pipe, on top of initial pipe bedding, or in separate trench.

a. Provide an expansion loop at pressure supply line angle fittings, every electric control valve location (in valve box), and at minimum 500 feet intervals. Form expansion loop by wrapping wire at least 8 times around a 1-inch pipe and withdrawing pipe.
b. Make splices and electric control valve connections using DBY connectors or similar dry splice method.
c. Install two wire splices not occurring at control valve in a separate splice valve box.

2. High Voltage Wiring for Automatic Controller:
   a. Provide 120-volt power connection to automatic controller.

E. Automatic Controller:
1. Install controller in accordance with manufacturer's instructions as detailed and where shown on Drawings.
2. Connect remote control valves to controller in numerical sequence as shown on Drawings.
3. Final location of controller shall be approved by Consultant prior to installation.
4. Each controller shall have a dedicated separate ground wire and surge protection.
5. Above-ground conduit shall be rigid galvanized steel with appropriate fittings. Below-ground conduit shall be Schedule 40 PVC.

F. Drip Valve Assemblies: Install drip valve assembly as detailed.

G. Drip Emitters: Install drip emitters as detailed.

H. Valve Boxes:
1. Install one valve box for each type of valve installed as detailed flush with grade for all sodded areas, and above-grade for all seeded areas.
2. Valve box extensions are not acceptable, except for master valve.
3. Install gravel sump after compaction of all trenches. Valve box to rest on gravel sump. Place final portion of gravel inside valve box after valve box is backfilled and compacted.
4. Install “Christy” stainless steel or 2.5” x 5” plastic valve label tags for each valve box (1-800-258-4583). Entire controller & station number shall be printed on each tag. Letter and number size shall be no smaller than 1/8 inch and no greater than ¼ inches. Label each valve box as follows:
   a. Control valves - Controller letter and station number.
   b. Quick Coupler Valves - Label “QCV.”
   c. Wire Splices - Label wire splices with the letters “W.S.”
   d. Drip Piping Blow-our Stubs - Controller letter and station number of each drip piping blow-out.
   e. Gate Valves - Label with letters “GV” typical.
   f. Air-Relief Valves - Label with letters “ARV” typical.
   g. Manual Drain Valve - Label with letters “MDV.”
5. Valve box color to be selected based upon a review of the location and adjacent material by Owner and Landscape Architect prior to installation. These guidelines are typical of all installations unless water source is effluent. In that case all valve boxes no matter the location are to be purple in color and meet all applicable codes and ordinances.

I. Pump Station: Install as detailed on Drawings.

J. Electric Control Valves:

1. Install top of cross handle a maximum of 3 inches below finished grade where shown on Drawings and as detailed.
2. When grouped together, allow a minimum of 12 inches between valve box sides.
3. Space control valves accordingly.
4. Install each remote control valve in a separate valve box.
5. Install valve boxes flush with grade.
6. When parallel to roadway, sidewalk or other permanent element or structure, control valve and box are to be installed perpendicular to element or structure, spaced equally.
7. For athletic areas such as football fields where concrete curbs exist, place the electric valves within one foot of the curb (no further into the playfield).

K. Main Line Gate Valves: Install as detailed on Drawings.

L. Air-Relief Valves: Install as detailed on Drawings.

M. Control Wiring:

1. All control wiring to be laid to bottom and side of pressure supply line trench. Separate wire trenches will not be allowed unless approved by Consultant prior to installation.

N. Backfilling: Do not begin backfilling operation until required system tests have been completed. Backfill shall not be done in freezing weather except with prior written approval by Consultant. Leave trenches slightly mounded to allow for settlement after backfilling is complete. Trenches shall be finished graded prior to walk-through of system by Consultant.

1. All pressure supply lines shall be bedded with construction grade sand 4 inches below invert of pipe, to 6” above top of pipe and width of trench when site conditions are rocky or otherwise unfavorable.
2. Materials: Excavated material is generally considered satisfactory for backfilling purposes after completing bedding requirements. Backfill materials shall be free of rubbish, vegetative matter, frozen materials, and stones larger than 2 inches in maximum dimension. Do not mix subsoil with topsoil. Material not suitable for backfill shall be hauled away. Contractor shall be responsible for providing suitable backfill if excavated material is unacceptable, or not sufficient to meet backfill, compaction, and final grade requirements.
3. Do not leave trenches open for a period of more than 48 hours. Open excavations shall be protected in accordance with OSHA regulations.
4. Compact backfill to 90% maximum density in 6” lifts, determined in accordance with ASTM D155-7 utilizing the following methods:

   a. Mechanical tamping.
   b. Puddling or ponding. Puddling or ponding and/or jetting is prohibited within 10’-0” of building or foundation walls.

S. Piping Under Paving:

1. Provide for a minimum cover of 24 inches between the top of the pipe and the bottom of the aggregate base for all pressure and non-pressure piping installed under asphalt concrete or concrete paving. Provide sleeving as required by municipality, or as shown on plans.
2. Piping shall be bedded with construction grade sand - 6 inches below pipe to 6 inches above pipe and the width of the trench.
3. Compact backfill material in 6-inch lifts at 95% maximum density determined in accordance with ASTM D1557 using manual or mechanical tamping devices.
4. Set in place, cap, and pressure test all piping under paving, in presence of Consultant or Owner prior to backfilling and paving operations.
5. Piping under existing walk or concrete pavement shall be done by jacking, boring, or hydraulic driving, but where cutting or breaking of walks and/or concrete is necessary, it shall be done and replaced at no cost to the Owner. Obtain permission and prior approval from Owner to cut or break walks and / or concrete.

3.04 FIELD QUALITY CONTROL:

A. Flushing: After piping, risers, and valves are in place and connected, but prior to installation of emitter heads, quick coupler valves, and air relief valves, thoroughly flush piping system under full head of water pressure from dead end fittings. Maintain flushing for 5 minutes through furthestmost valves. Cap riser after flushing.

B. Testing: Conduct tests in presence of Consultant. Arrange for presence of Consultant a minimum of 48 hours in advance of testing. Supply force pump and all other test equipment.

1. After backfilling, and installation of all control valves & quick coupler valves, fill pressure supply line with water, and pressurize to 40 PSI over the designated static pressure or 120 PSI, whichever is greater, for a period of 2 hours.
2. Leakage, Pressure Loss: Test is acceptable if no leakage or loss of pressure is evident during test period.
3. Leaks: Detect and repair leaks.
4. Retest system until pressure can be maintained for the duration of the test.
5. Before final acceptance, pressure supply line shall remain under pressure for a period of 48 hours.

C. Walk-Through for Substantial Completion:

1. Arrange for Consultant's presence a minimum of 48 hours in advance of walk-through.
2. Entire System shall be completely installed and operational prior to scheduling of walk-through. All sodded areas are to be complete with head height and valve boxes adjusted accordingly.
3. Operate each zone in its entirety for Consultant at time of walk-through, and open all valve boxes.
4. Consultant shall generate a list of items to be corrected prior to Final Completion (“Punch List”).
5. Furnish all materials and perform all Work required to correct all inadequacies due to deviations from Contract Documents, and as directed by Consultant.
6. During walk-through, expose all drip emitters and sprinklers under operations for observation by Consultant to demonstrate that they are performing and installed as designed; prior to placing of all mulch material. Schedule separate walk-through if necessary.

D. Walk-Through for Final Completion:

1. Arrange for Consultant's presence a minimum of 48 hours in advance of walk-through.
2. Show evidence to Consultant that Owner has received all accessories, charts, record drawings, and equipment as required before Final Completion walk-through is scheduled.
3. Operate each zone identified as deficient at substantial completion walk-through for Consultant to review at time of final completion walk-through to ensure correction of all incomplete items.
4. Items deemed not acceptable by Consultant shall be reworked to the complete satisfaction of Consultant.
5. If after request to Consultant for a walk-through for Final Completion of the irrigation system, Consultant finds items during walk-through to be deficient, Contractor shall be charged for all subsequent walk-throughs. Funds will be withheld from final payment and/or retainage to Contractor, in amount equal to additional time and expenses required by Consultant to conduct and document further walk-throughs as deemed necessary to ensure compliance with Contract Documents.

3.05 ADJUSTING:

A. Upon substantial completion of installation, fine-tune entire system by regulating valves, adjusting spray patterns and break-up arms/screws, and setting pressure reducing valves or throttling electric valve flow control stems to proper pressure settings to provide optimum and efficient coverage. Flush and adjust all sprinkler heads for optimum performance and to prevent overspray onto walks, roadways, and buildings as much as possible. Heads of same type shall be operating at same pressure +/- 7%.
B. If it is determined that irrigation adjustments will provide proper and more adequate coverage, make such adjustments prior to Final Acceptance, as directed, at no additional cost to Owner. Adjustments may also include changes in nozzle sizes, degrees of arc, and control valve throttling.
C. All sprinkler heads shall be set perpendicular to finish grade unless otherwise designated.
D. Areas which do not conform to designated operation requirements due to unauthorized changes or poor installation practices shall be immediately corrected at no additional cost to the Owner.

BUNGALOWS AT CERRILLOS PHASE 1

CERRILLOS RD & W FRONTAGE RD
SANTA FE, NEW MEXICO
ELECTRICAL SITE PLAN

THESE DRAWINGS AND SPECIFICATIONS ARE THE SOLE PROPERTY OF WRIGHT ENGINEERING CORPORATION AND MAY NOT BE REPRODUCED OR MODIFIED FOR ANY USE WITHOUT THE EXPRESS WRITTEN PERMISSION OF WRIGHT ENGINEERING CORPORATION.

GENERAL ELECTRICAL NOTES

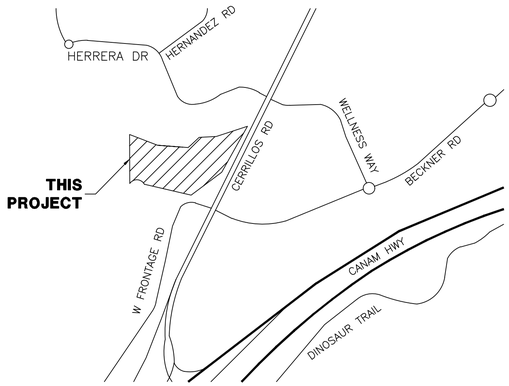
1. ELECTRICAL WORK SHALL COMPLY WITH THE NATIONAL ELECTRIC CODE (2017), FEDERAL, STATE AND LOCAL JURISDICTION CODES.
2. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION.
3. VISIT THE SITE PRIOR TO BIDDING TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK. INCLUDE ALL RELATED COSTS IN THE INITIAL BID PROPOSAL.
4. CONTRACTOR IS RESPONSIBLE FOR VERIFYING LOCATIONS OF ALL EXISTING UTILITIES AND AVOIDING DAMAGE TO SAME. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO UTILITIES CAUSED AS A RESULT OF HIS WORK. CALL (602) 263-1100 FOR BLUE STAKES. IRRIGATION LINES LESS THAN 2" WILL NOT BE MARKED AND SHALL BE REPAIRED IN KIND BY THE CONTRACTOR.
5. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO EXISTING WALKS, WALLS, DRIVES, CURBS, ETC. DAMAGES SHALL BE REPAIRED BY THE CONTRACTOR TO THE SATISFACTION OF THE OWNER AT NO ADDITIONAL COST TO THE OWNER.
6. PROPER PROTECTION OF THE CONSTRUCTION AREA FOR SAFETY SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. COVER ALL TRENCHES AT THE END OF EACH WORK DAY. BARRICADES SHALL BE INSTALLED AS DIRECTED BY THE OWNER OR THE PROJECT INSPECTOR. THE SITE AND ALL WORK SHALL CONFORM TO OSHA REQUIREMENTS.
7. ALL EXISTING LANDSCAPE, HARDSCAPE AND SPRINKLER SYSTEMS DAMAGED OR DISTURBED DURING THE CONSTRUCTION OF THIS PROJECT BY THE CONTRACTOR SHALL BE REPLACED IN KIND.
8. CONTRACTOR SHALL PAY FOR PERMITS AND INSPECTIONS AS MAY BE REQUIRED AND PROVIDE A CERTIFICATE OF INSPECTION TO THE OWNER.
9. PROTECT ALL MATERIAL AND EQUIPMENT INSTALLED AGAINST DAMAGE BY OTHER TRADES, WEATHER CONDITIONS OR ANY OTHER CAUSES. EQUIPMENT FOUND DAMAGED OR IN OTHER THAN NEW CONDITION WILL BE REJECTED AS DEFECTIVE. ALL COMPONENTS SHALL BE FREE OF DUST, GRIT AND FOREIGN MATERIALS, AND LEFT AS NEW BEFORE FINAL ACCEPTANCE OF WORK.
10. LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRUTILITY COMPANY AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION.
11. IT IS THE OBLIGATION OF THE CONTRACTOR TO ORGANIZE HIS WORK SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND/OR CONTROL SYSTEM FOR THE FACILITY WILL BE PROVIDED AND SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND ALL O & M MANUALS.
12. ALL UNDERGROUND CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS.
13. PROVIDE EMT INDOOR AND GRS OUTDOOR FOR ABOVE GROUND CONDUIT, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS. WHERE METALLIC CONDUITS COME IN CONTACT WITH DIRT, THEY SHALL BE HALF LAP WRAPPED WITH SCOTCH 50 TAPE TO 12" AFG. FITTINGS SHALL BE STEEL, THREADED TYPE WITH INSULATED THROATS. SECURELY ATTACH ALL SURFACE MOUNTED CONDUIT EVERY 10 FEET AND WITHIN 3 FEET OF EACH JUNCTION BOX, PER NEC ARTICLE 344.30.
14. MINIMUM CONDUIT SIZE SHALL BE 3/4" UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS.
15. ALL FEEDERS AND BRANCH CIRCUIT WIRE SHALL BE COPPER TYPE XHHW (75 DEGREE C) FOR BELOW GRADE INSTALLATIONS (AND CONDUIT RISERS) AND THHN/THWN (75 DEGREE C) FOR ABOVE GRADE INSTALLATIONS. MINIMUM SIZE SHALL BE #12 AWG, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS. ALL WIRING SHALL BE IN CONDUIT. PER MARICOPA COUNTY AMENDMENT TO NEC ARTICLE 334.10 AND 334.12, MARICOPA COUNTY DOES NOT PERMIT TYPES NM, NMC, NMS (ROMEX) CABLES IN COMMERCIAL APPLICATIONS.
16. A SEPARATE GREEN INSULATED EQUIPMENT GROUNDING CONDUCTOR (BOND) SHALL BE INSTALLED, SIZED PER NEC CODE 250.122, WITHIN EACH RACEWAY TYPE, INCLUDING EMT.
17. WHEN A PANEL IS SUPPLIED BY A FEEDER OR BRANCH CIRCUIT, ANY INSTALLED GROUNDED CONDUCTOR SHALL NOT BE CONNECTED TO THE EQUIPMENT GROUNDING CONDUCTOR (GEC) OR TO THE GROUNDING ELECTRODE(S) PER NEC ARTICLE 250.32(B)(1).
18. BOND ALL ENCLOSURES PER NEC ARTICLE 250.96.
19. CONTRACTOR SHALL PLAN AND INSTALL WORK IN SUCH A MANNER AS TO CONFORM TO THE STRUCTURE, AVOID OBSTRUCTIONS, PRESERVE HEADROOM AND KEEP OPENINGS AND PASSAGEWAYS CLEAR.
20. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIAL, ETC. NECESSARY FOR A COMPLETE AND WORKABLE ELECTRICAL SYSTEM WHETHER OR NOT THESE ITEMS ARE SPECIFICALLY NOTED ON THESE DRAWINGS. INCIDENTAL ITEMS NOT INDICATED ON THE DRAWINGS, NOR MENTIONED IN SPECIFICATIONS THAT CAN BE LEGITIMATELY AND REASONABLY INFERRED TO BELONG TO THE WORK DESCRIBED OR BE NECESSARY IN GOOD PRACTICE TO PROVIDE A COMPLETE SYSTEM, SHALL BE FURNISHED AND INSTALLED AS THOUGH ITEMIZED HERE IN EVERY DETAIL.
21. CONTRACTOR IS RESPONSIBLE FOR AND SHALL PROVIDE ALL LABOR, MATERIAL, TRENCHING, CONDUIT, TRANSFORMER PAD AND OTHER REQUIRED EQUIPMENT PER UTILITY COMPANY PLANS AND SPECIFICATIONS NECESSARY FOR A COMPLETE UNDERGROUND CONDUIT SYSTEM FROM THE UTILITY POINT OF SERVICE TO THE UTILITY CO. TRANSFORMER AND FROM THE UTILITY CO. TRANSFORMER TO THE ELECTRICAL SERVICE ENTRANCE SECTION.
22. ALL TRENCHING, CONDUITS, ETC. SHALL BE ROUTED AND INSTALLED IN SUCH A MANNER THAT WILL NOT DAMAGE EXISTING FACILITIES. SHOULD DAMAGE OCCUR, IT WILL BE THE CONTRACTORS RESPONSIBILITY TO REPAIR DAMAGE TO THE SATISFACTION OF THE OWNER OR INSPECTOR.
23. ALL CONDUIT RUNS SHOWN ON THIS PLAN ARE SCHEMATIC IN NATURE. THE CONTRACTOR SHALL MAKE SURE THAT ALL CONDUIT, ETC. FALLS WITHIN THE CONSTRUCTION AREA/RIGHT OF WAY. (THIS INCLUDES MAINTAINING ALL REQUIRED CLEARANCES.)
24. WHEN CROSSING PATHWAYS OR SIDEWALKS, CONTRACTOR SHALL BORE UNDER EXISTING CONCRETE WALKS AND SAWCUT ASPHALT WALKS. ASPHALT WALKS SHALL BE REPLACED IN KIND.
25. CONTRACTOR SHALL GUARANTEE WORK INSTALLED UNDER THE CONTRACT TO BE FREE FROM DEFECTIVE WORKMANSHIP AND MATERIALS, USUAL WEAR EXPECTED, AND SHOULD ANY SUCH DEFECTS DEVELOP WITHIN A PERIOD OF ONE YEAR ACCEPTANCE OF THE PROJECT BY THE OWNER, THE CONTRACTOR SHALL REPAIR AND/OR REPLACE ANY DEFECTIVE ITEMS AND DAMAGE RESULTING FROM FAILURE OF THESE ITEMS, AT NO EXPENSE WHATSOEVER TO THE OWNER.
26. CONTRACTOR SHALL IDENTIFY SERVICE ENTRANCE SECTION MAIN SERVICE DISCONNECT(S) WITH 3/32-INCH THICK LAMINATED PHENOLIC TYPE NAMEPLATES WITH 1/4-INCH MINIMUM HEIGHT LETTERS. NAMEPLATE TO BE BLACK MATTE FINISH SURFACE WITH WHITE LETTER ENGRAVING. ATTACH NAMEPLATE TO THE OUTSIDE PANEL FACE WITH TWO STAINLESS STEEL SELF-TAPPING SCREWS. NAMEPLATE SHALL READ "SERVICE DISCONNECT" PER NEC ARTICLE 230.70(B).
27. ALL CIRCUITS SHALL BE LEGIBLY IDENTIFIED AT THE PANEL, JUNCTION BOXES AND AT ALL EQUIPMENT IN A PERMANENT MANNER (I.E. ETCHED PLATES, CONDUCTOR TAG, PERMANENT MARKER, ETC.). THE LABELING SHALL INCLUDE PANEL CIRCUIT NUMBER, "TO" AND "FROM" IDENTIFICATION, AND MARKED "SPARE" WHERE APPLICABLE.
28. CONTRACTOR SHALL TEST ELECTRICAL SYSTEM FOR SHORT CIRCUITS AND MEGGER TEST FEEDERS AND BRANCH CIRCUIT WIRING. INSURE LOW IMPEDANCE GROUND PATH SYSTEM. PERFORM HIPOT TESTING WHEN REQUIRED BY LOCAL JURISDICTION.
29. ALL CONDUIT AND J-BOXES SHOWN SHALL BE CONCEALED WHEN POSSIBLE. WHEN NOT POSSIBLE, CONDUIT AND J-BOXES MAY BE SURFACE MOUNTED WITH PERMISSION OF THE OWNER OR OWNER'S REPRESENTATIVE.
30. CONTRACTOR SHALL COORDINATE ALL EQUIPMENT CONNECTIONS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN. PROVIDE ADDITIONAL FUSED DISCONNECT SWITCHES AND CONTROLS IF OVERCURRENT PROTECTION OR CONTROLS IS NOT INTEGRAL WITH UNITS.
31. ALL EQUIPMENT SHALL BE FUSE SIZED PER MANUFACTURES RECOMMENDATIONS AND U.L. APPROVAL.
32. ELECTRICAL DEVICES, DISCONNECT SWITCHES, ETC., SHALL BE SUPPORTED INDEPENDENT OF AND ISOLATED FROM EQUIPMENT VIBRATIONS.
33. FULL LOAD AMPS (FLA) SIZES, AS NOTED IN THESE DRAWINGS, ARE BASED ON SPECIFIED EQUIPMENT DATA. CONTRACTOR SHALL VERIFY NAMEPLATE FLA OF EQUIPMENT SUPPLIED AND COORDINATE ACCORDINGLY PER EQUIPMENT SUPPLIERS RECOMMENDATIONS.
34. ALL OUTDOOR ELECTRICAL EQUIPMENT SHALL BE NEMA-3R OR NEMA-4 ENCLOSURES.
35. CONDUITS OR RACEWAYS ROUTED FROM INDOORS TO OUTDOORS OR AS DESCRIBED IN NEC 300.7(A), SHALL BE SEALED WITH A PLIABLE SEALING COMPOUND AT A CONDUIT BODY OR AT A JUNCTION BOX BEFORE THE CONDUIT ENTERS THE COLDER ENVIRONMENT.
36. CONDUITS OR RACEWAYS INSTALLED IN AREAS WHERE ELEVATION CHANGES MAY CAUSE WATER OR MOISTURE TO ENTER THE ELECTRICAL EQUIPMENT THROUGH THE CONDUIT SHALL BE SEALED WITH A HERMETIC CONDUIT SEAL AT BOTH ENDS OF THE CONDUIT OR RACEWAY.
37. ALL POLE LIGHTS SHALL BE PROVIDED WITH A TWO POLE FUSE HOLDER BUSSMANN #HEX OR A SINGLE POLE FUSE HOLDER BUSSMANN #HEB OR EQUAL FOR INLINE FUSING, PROVIDE 5A FUSING IN FUSEHOLDER.
38. CONTRACTOR TO INSTALL PULL BOX ADJACENT TO EACH PATHWAY, AREA AND PARKING LOT LIGHT, SEE PULL BOX INSTALLATION DETAIL. PULL BOXES MAY NOT BE SHOWN AT ALL LOCATIONS ON PLANS.
39. PRIOR TO POURING THE POLE BASES OR COVERING ANY ELECTRICAL CONDUITS, CONTACT THE INSPECTION DEPARTMENT 24 HOURS IN ADVANCE FOR APPROVAL.
40. MATERIALS SHALL BE NEW AND OF THE BEST QUALITY WITH MANUFACTURER'S NAME PRINTED THEREON. MATERIALS SHALL BE MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, UNDERWRITER'S LABORATORY OR OTHER APPLICABLE STANDARDS AND RATED FOR HEAVY DUTY SERVICE.
41. ALL WIRING DEVICES SHALL BE SPECIFICATION GRADE. ALL 15 AND 20 AMP, 125 AND 250 VOLT, NONLOCKING RECEPTACLES INSTALLED OUTDOORS SHALL BE LISTED WEATHER-RESISTANT TYPE. ALL WEATHERPROOF WHILE IN-USE RECEPTACLE COVERS SHALL BE METAL.
42. SELECTION OF MATERIALS SHALL BE IN STRICT ACCORDANCE WITH THE DRAWINGS AND/OR SPECIFICATIONS. THE USE OF MANUFACTURER'S NAME, MODEL, AND NUMBER IS INTENDED TO ESTABLISH STYLE, QUALITY, APPEARANCE, USEFULNESS AND BID PRICE. CONTRACTOR SHALL SUBMIT TO THE OWNER OR OWNER'S REPRESENTATIVE FOR REVIEW AND APPROVAL (PRIOR TO ORDERING MATERIALS) COPIES OF EQUIPMENT SHOP DRAWINGS AS FOLLOWS: 1) LIGHT FIXTURES, 2) POLES, 3) POLE BASES, 4) SERVICE ENTRANCE SECTION, 5) ELECTRICAL EQUIPMENT, 6) DISCONNECT SWITCHES, 7) TIME CLOCKS AND OTHER CONTROLS, 8) LIGHTING CONTACTORS AND 9) PULL BOXES. AT THE TIME OF EACH SUBMITTAL, THE CONTRACTOR SHALL DEFINE AND DELINEATE IN WRITING ANY DEVIATIONS FROM THE CONTRACT DOCUMENTS. THE REVIEW WILL BE ONLY FOR CONFORMANCE WITH THE DESIGN CONCEPT OF THE WORK AND FOR COMPLIANCE WITH THE INFORMATION CONTAINED IN THE CONTRACT DOCUMENTS. THE REVIEW OF A SPECIFIED ITEM, AS SUCH, WILL NOT INDICATE REVIEW OF THE ASSEMBLY IN WHICH THE ITEM FUNCTIONS. REVIEW BY THE OWNER OR OWNER'S REPRESENTATIVE WILL NOT RELIEVE THE CONTRACTOR FROM RESPONSIBILITY FOR ANY ERRORS OR OMISSIONS IN THE SUBMITTALS NOR FROM HIS RESPONSIBILITY FOR COMPLYING WITH THE CONTRACT DOCUMENTS.
43. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTIONS, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
44. CONTRACTOR SHALL COORDINATE WITH POWER COMPANY REGARDING METERING EQUIPMENT PRIOR TO BIDDING AND ORDERING EQUIPMENT. CONTRACTOR SHALL VERIFY POWER COMPANY METERING REQUIREMENTS INCLUDING WHICH SERVICES NEED TO BE COMMERCIALLY RATED WITH APPROVED BY-PASS TEST BLOCKS. SERVICES THAT FEED SITE LIGHTING/"LIFE SAFETY" MAY NEED BY-PASS TEST BLOCKS DEPENDING ON POWER COMPANY STANDARDS.

CONSTRUCTION NOTES

1. EACH UNIT SHALL HAVE A SEPARATE AND INDIVIDUAL CONDUIT AND CIRCUIT FROM THE POINT OF DELIVERY. THE CONDUIT TAG AT THE UNIT IS THE SIZE FROM THE POINT OF DELIVERY TO THE SERVICE PER UNIT.
2. PROPOSED LOCATION OF UTILITY COMPANY TRANSFORMER. FINAL LOCATION PER UTILITY COMPANY PLANS.

LEGEND

- 1ø UTILITY COMPANY TRANSFORMER. COORDINATE WITH UTILITY COMPANY FOR EXACT LOCATION AND POWER CONNECTION TO NEW SERVICE. DUE TO SINGLE-PHASE TRANSFORMERS BEING RATED 100KVA OR SMALLER, MAINTAIN 10' CLEARANCE FROM ALL COMBUSTIBLE STRUCTURES. COORDINATE WITH POWER COMPANY IF LIQUID STORAGE IS MORE THAN 100 GALLONS TO ENSURE PROPER 25' CLEARANCE.
- WALL MOUNTED 200A METER/MAIN/PANEL 120/240V 1ø 3W NEMA 3R PANEL BOARD, BY OTHERS. SEE SINGLE LINE DIAGRAMS ON SHEET SE4.1 FOR ADDITIONAL DETAILS.
- WALL MOUNTED 125A METER/MAIN/PANEL 120/240V 1ø 3W NEMA 3R PANEL BOARD, BY OTHERS. SEE SINGLE LINE DIAGRAMS ON SHEET SE4.1 FOR ADDITIONAL DETAILS.
- WALL MOUNTED 200A DUPLEX METER WITH (2) 125A MAINS, 120/240V 1ø 3W NEMA 3R, BY OTHERS. SEE SINGLE LINE DIAGRAMS ON SHEET SE4.1 FOR ADDITIONAL DETAILS. PANELBOARDS MAY BE INSTALLED INDOORS PER ARCHITECT PLANS.
- UNDERGROUND CONDUIT. CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE UNLESS SPECIFICALLY NOTED OTHERWISE IN NOTES OR DETAILS. SEE GENERAL NOTES 12 & 13 ON SHEET SE1.1. SEE CONDUIT TAG AND TABLE ON SHEET SE2.1 FOR CONDUIT SIZE AND CONDUCTORS.



SCOPE OF WORK

1) PROVIDE PREFERRED LOCATIONS OF TRANSFORMERS, PULL-BOXES AND CONDUIT RUNS TO BUILDING PANELS (NO NEW PANEL BOARDS IN THIS SCOPE)

2) PROVIDE AND INSTALL EXTERIOR LIGHTING (NON-BUILDING), AND SITE ELECTRICAL.

3) PROVIDE AND INSTALL CIRCUIT BREAKERS IN PANEL BOARD, BY OTHERS, FOR SITE LIGHTING/ELECTRICAL.

4) COORDINATION ITEMS THAT NEED TO BE SHOWN FOR ELECTRICAL LOAD SUMMARIES AND THAT NEED TO HAVE ELECTRICAL CONNECTIONS ARE SHOWN FOR REFERENCE ONLY, BY OTHERS, UNDER SEPARATE PERMIT.

THESE DRAWINGS AND SPECIFICATIONS ARE THE SOLE PROPERTY OF WRIGHT ENGINEERING CORPORATION AND MAY NOT BE REPRODUCED OR MODIFIED FOR ANY USE WITHOUT THE EXPRESS WRITTEN PERMISSION OF WRIGHT ENGINEERING CORPORATION.

CONSTRUCTION NOTES

1. INSTALL A 3" SLEEVE UNDER ROADWAY FROM LANDSCAPE AREA TO LANDSCAPE AREA FOR LOW VOLTAGE CABLE
2. ELECTRICAL CONTRACTOR SHALL INSTALL POWER FEED TO IRRIGATION CONTROLLER & MAKE ALL 120V CONNECTIONS. COORDINATE WORK WITH IRRIGATION CONTRACTOR.
3. INSTALL LOOP DETECTOR. COORDINATE WITH GATE CONTRACTOR CONSULTANT FOR CONNECTION TO GATE MOTOR/KEY PAD.
4. INSTALL WALL MOUNTED 30A DISCONNECT FOR MONUMENT LIGHT. COORDINATE EXACT LOCATION WITH SIGN CONTRACTOR.
5. COORDINATE WITH GENERAL CONTRACTOR FOR EXACT LOCATION OF FLAGPOLE. INSTALL UPLIGHT PER DETAIL 4 ON SHEET SE5.1.
6. STUB UP AND CAP CONDUIT FOR FIRE TABLE IGNITER. COORDINATE WITH GENERAL CONTRACTOR FOR EXACT LOCATION AND INSTALLATION DETAILS.
7. INSTALL PUSH BUTTON FOR AREA LIGHT, PER DETAIL 14 ON SHEET SE5.3.
8. INSTALL PUSH BUTTON PER DETAIL 15 ON SHEET SE5.3, COORDINATE WITH OWNER FOR EXACT LOCATION. SEE DETAIL 6 ON SHEET SE5.1 FOR CONTROL SCHEMATIC.

LEGEND

- ELECTRICAL PANELBOARD. SEE SHEETS SE2.1 THROUGH SE2.6 FOR ADDITIONAL DETAILS.
- ELECTRICAL PANELBOARD. SEE SHEETS SE2.1 THROUGH SE2.6 FOR ADDITIONAL DETAILS.
- LVX — LOW VOLTAGE TRANSFORMER FOR ACCENT LIGHTING PER LANDSCAPE ARCHITECT PLANS. SEE DETAIL 5 ON SHEET SE5.1. COORDINATE FINAL LOCATION AND SIZE WITH LANDSCAPE ARCHITECT.
- G1–2 — CIRCUIT NUMBER. EXAMPLE, PANEL 'G1' CIRCUIT '2'.
- UNDERGROUND CONDUIT. CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE. SEE GENERAL NOTES 12, 13 & 15 ON SHEET SE1.1 FOR ADDITIONAL DETAILS ON CONDUIT INSTALLATIONS.
- ABOVE GROUND CONDUIT. CONDUIT SHALL BE GRS UNLESS OTHERWISE INDICATED. SEE GENERAL NOTES 12, 13 & 15 ON SHEET SE1.1 FOR ADDITIONAL DETAILS ON CONDUIT INSTALLATIONS.
- J — WEATHERPROOF JUNCTION BOX.
- 200 — CONDUIT TAG. SEE CONDUIT AND WIRE TABLE FOR CONDUIT AND WIRE DETAILS.

NOTES

1. SUBMIT SHOP DRAWINGS TO POWER COMPANY FOR APPROVAL PRIOR TO ORDERING EQUIPMENT. THIS APPLIES TO ALL SERVICES.
2. SES SHALL BE INSTALLED IN AN ACCORDANCE WITH ALL NEC CODE AND POWER COMPANY CLEARANCE REQUIREMENTS. THIS APPLIES TO ALL SERVICES.
3. COMMERCIAL SES SHALL BE COMMERCIAL RATED WITH APPROVED TEST BLOCKS PER POWER COMPANY REQUIREMENTS. THIS APPLIES TO ALL COMMERCIAL SERVICES (I.E. GARAGES, OFFICES, NON-RESIDENTIAL SERVICES, ETC.)
4. ELECTRICAL CONTRACTOR SHALL LABEL PANELS PER TENANT NUMBER UNLESS NOTED OTHERWISE ON PLANS. THIS APPLIES TO ALL SERVICES.
5. REFER TO PANEL SCHEDULES ON SHEET SE4.3 THROUGH SE4.4 FOR CIRCUIT DESIGNATIONS.
6. *ELECTRICAL CONTRACTOR SHALL REFER TO SITE PLAN FOR CIRCUIT BREAKER SIZES ON SHEETS SE2.1 THROUGH SE2.6.
7. SERIES RATING AND LABELS PER NEC 240.86, 110.9, 110.22, 240.86. THIS APPLIES TO ALL SERVICES.
8. PER NEC 250.32(B)(1) NEUTRAL AND GROUND CONNECTION IS NOT PERMITTED IN PANELS DOWNSTREAM OF METERS. THIS APPLIES TO ALL SERVICES.

SANTA FE, NEW MEXICO
ELECTRICAL SITE PLAN

THESE DRAWINGS AND SPECIFICATIONS ARE THE SOLE PROPERTY OF WRIGHT ENGINEERING CORPORATION AND MAY NOT BE REPRODUCED OR MODIFIED FOR ANY USE WITHOUT THE EXPRESS WRITTEN PERMISSION OF WRIGHT ENGINEERING CORPORATION.

GENERAL ELECTRICAL NOTES

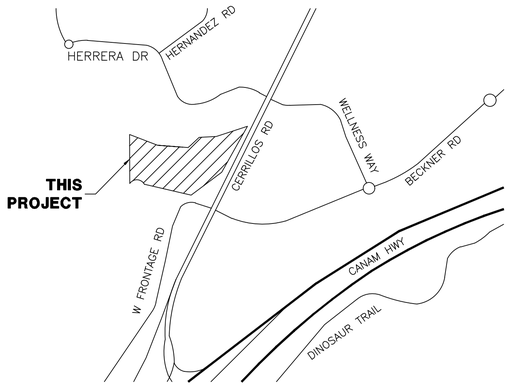
1. ELECTRICAL WORK SHALL COMPLY WITH THE NATIONAL ELECTRIC CODE (2017), FEDERAL, STATE AND LOCAL JURISDICTION CODES.
2. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION.
3. VISIT THE SITE PRIOR TO BIDDING TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK. INCLUDE ALL RELATED COSTS IN THE INITIAL BID PROPOSAL.
4. CONTRACTOR IS RESPONSIBLE FOR VERIFYING LOCATIONS OF ALL EXISTING UTILITIES AND AVOIDING DAMAGE TO SAME. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO UTILITIES CAUSED AS A RESULT OF HIS WORK. CALL (602) 263-1100 FOR BLUE STAKES. IRRIGATION LINES LESS THAN 2" WILL NOT BE MARKED AND SHALL BE REPAIRED IN KIND BY THE CONTRACTOR.
5. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO EXISTING WALKS, WALLS, DRIVES, CURBS, ETC. DAMAGES SHALL BE REPAIRED BY THE CONTRACTOR TO THE SATISFACTION OF THE OWNER AT NO ADDITIONAL COST TO THE OWNER.
6. PROPER PROTECTION OF THE CONSTRUCTION AREA FOR SAFETY SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. COVER ALL TRENCHES AT THE END OF EACH WORK DAY. BARRICADES SHALL BE INSTALLED AS DIRECTED BY THE OWNER OR THE PROJECT INSPECTOR. THE SITE AND ALL WORK SHALL CONFORM TO OSHA REQUIREMENTS.
7. ALL EXISTING LANDSCAPE, HARDSCAPE AND SPRINKLER SYSTEMS DAMAGED OR DISTURBED DURING THE CONSTRUCTION OF THIS PROJECT BY THE CONTRACTOR SHALL BE REPLACED IN KIND.
8. CONTRACTOR SHALL PAY FOR PERMITS AND INSPECTIONS AS MAY BE REQUIRED AND PROVIDE A CERTIFICATE OF INSPECTION TO THE OWNER.
9. PROTECT ALL MATERIAL AND EQUIPMENT INSTALLED AGAINST DAMAGE BY OTHER TRADES, WEATHER CONDITIONS OR ANY OTHER CAUSES. EQUIPMENT FOUND DAMAGED OR IN OTHER THAN NEW CONDITION WILL BE REJECTED AS DEFECTIVE. ALL COMPONENTS SHALL BE FREE OF DUST, GRIT AND FOREIGN MATERIALS, AND LEFT AS NEW BEFORE FINAL ACCEPTANCE OF WORK.
10. LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRUTILITY COMPANY AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION.
11. IT IS THE OBLIGATION OF THE CONTRACTOR TO ORGANIZE HIS WORK SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND/OR CONTROL SYSTEM FOR THE FACILITY WILL BE PROVIDED AND SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND ALL O & M MANUALS.
12. ALL UNDERGROUND CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS.
13. PROVIDE EMT INDOOR AND GRS OUTDOOR FOR ABOVE GROUND CONDUIT, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS. WHERE METALLIC CONDUITS COME IN CONTACT WITH DIRT, THEY SHALL BE HALF LAP WRAPPED WITH SCOTCH 50 TAPE TO 12" AFG. FITTINGS SHALL BE STEEL, THREADED TYPE WITH INSULATED THROATS. SECURELY ATTACH ALL SURFACE MOUNTED CONDUIT EVERY 10 FEET AND WITHIN 3 FEET OF EACH JUNCTION BOX, PER NEC ARTICLE 344.30.
14. MINIMUM CONDUIT SIZE SHALL BE 3/4" UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS.
15. ALL FEEDERS AND BRANCH CIRCUIT WIRE SHALL BE COPPER TYPE XHHW (75 DEGREE C) FOR BELOW GRADE INSTALLATIONS (AND CONDUIT RISERS) AND THHN/THWN (75 DEGREE C) FOR ABOVE GRADE INSTALLATIONS. MINIMUM SIZE SHALL BE #12 AWG, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS. ALL WIRING SHALL BE IN CONDUIT. PER MARICOPA COUNTY AMENDMENT TO NEC ARTICLE 334.10 AND 334.12, MARICOPA COUNTY DOES NOT PERMIT TYPES NM, NMC, NMS (ROMEX) CABLES IN COMMERCIAL APPLICATIONS.
16. A SEPARATE GREEN INSULATED EQUIPMENT GROUNDING CONDUCTOR (BOND) SHALL BE INSTALLED, SIZED PER NEC CODE 250.122, WITHIN EACH RACEWAY TYPE, INCLUDING EMT.
17. WHEN A PANEL IS SUPPLIED BY A FEEDER OR BRANCH CIRCUIT, ANY INSTALLED GROUNDED CONDUCTOR SHALL NOT BE CONNECTED TO THE EQUIPMENT GROUNDING CONDUCTOR (GEC) OR TO THE GROUNDING ELECTRODE(S) PER NEC ARTICLE 250.32(B)(1).
18. BOND ALL ENCLOSURES PER NEC ARTICLE 250.96.
19. CONTRACTOR SHALL PLAN AND INSTALL WORK IN SUCH A MANNER AS TO CONFORM TO THE STRUCTURE, AVOID OBSTRUCTIONS, PRESERVE HEADROOM AND KEEP OPENINGS AND PASSAGEWAYS CLEAR.
20. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIAL, ETC. NECESSARY FOR A COMPLETE AND WORKABLE ELECTRICAL SYSTEM WHETHER OR NOT THESE ITEMS ARE SPECIFICALLY NOTED ON THESE DRAWINGS. INCIDENTAL ITEMS NOT INDICATED ON THE DRAWINGS, NOR MENTIONED IN SPECIFICATIONS THAT CAN BE LEGITIMATELY AND REASONABLY INFERRED TO BELONG TO THE WORK DESCRIBED OR BE NECESSARY IN GOOD PRACTICE TO PROVIDE A COMPLETE SYSTEM, SHALL BE FURNISHED AND INSTALLED AS THOUGH ITEMIZED HERE IN EVERY DETAIL.
21. CONTRACTOR IS RESPONSIBLE FOR AND SHALL PROVIDE ALL LABOR, MATERIAL, TRENCHING, CONDUIT, TRANSFORMER PAD AND OTHER REQUIRED EQUIPMENT PER UTILITY COMPANY PLANS AND SPECIFICATIONS NECESSARY FOR A COMPLETE UNDERGROUND CONDUIT SYSTEM FROM THE UTILITY POINT OF SERVICE TO THE UTILITY CO. TRANSFORMER AND FROM THE UTILITY CO. TRANSFORMER TO THE ELECTRICAL SERVICE ENTRANCE SECTION.
22. ALL TRENCHING, CONDUITS, ETC. SHALL BE ROUTED AND INSTALLED IN SUCH A MANNER THAT WILL NOT DAMAGE EXISTING FACILITIES. SHOULD DAMAGE OCCUR, IT WILL BE THE CONTRACTORS RESPONSIBILITY TO REPAIR DAMAGE TO THE SATISFACTION OF THE OWNER OR INSPECTOR.
23. ALL CONDUIT RUNS SHOWN ON THIS PLAN ARE SCHEMATIC IN NATURE. THE CONTRACTOR SHALL MAKE SURE THAT ALL CONDUIT, ETC. FALLS WITHIN THE CONSTRUCTION AREA/RIGHT OF WAY. (THIS INCLUDES MAINTAINING ALL REQUIRED CLEARANCES.)
24. WHEN CROSSING PATHWAYS OR SIDEWALKS, CONTRACTOR SHALL BORE UNDER EXISTING CONCRETE WALKS AND SAWCUT ASPHALT WALKS. ASPHALT WALKS SHALL BE REPLACED IN KIND.
25. CONTRACTOR SHALL GUARANTEE WORK INSTALLED UNDER THE CONTRACT TO BE FREE FROM DEFECTIVE WORKMANSHIP AND MATERIALS, USUAL WEAR EXPECTED, AND SHOULD ANY SUCH DEFECTS DEVELOP WITHIN A PERIOD OF ONE YEAR ACCEPTANCE OF THE PROJECT BY THE OWNER, THE CONTRACTOR SHALL REPAIR AND/OR REPLACE ANY DEFECTIVE ITEMS AND DAMAGE RESULTING FROM FAILURE OF THESE ITEMS, AT NO EXPENSE WHATSOEVER TO THE OWNER.
26. CONTRACTOR SHALL IDENTIFY SERVICE ENTRANCE SECTION MAIN SERVICE DISCONNECT(S) WITH 3/32-INCH THICK LAMINATED PHENOLIC TYPE NAMEPLATES WITH 1/4-INCH MINIMUM HEIGHT LETTERS. NAMEPLATE TO BE BLACK MATTE FINISH SURFACE WITH WHITE LETTER ENGRAVING. ATTACH NAMEPLATE TO THE OUTSIDE PANEL FACE WITH TWO STAINLESS STEEL SELF-TAPPING SCREWS. NAMEPLATE SHALL READ "SERVICE DISCONNECT" PER NEC ARTICLE 230.70(B).
27. ALL CIRCUITS SHALL BE LEGIBLY IDENTIFIED AT THE PANEL, JUNCTION BOXES AND AT ALL EQUIPMENT IN A PERMANENT MANNER (I.E. ETCHED PLATES, CONDUCTOR TAG, PERMANENT MARKER, ETC.). THE LABELING SHALL INCLUDE PANEL CIRCUIT NUMBER, "TO" AND "FROM" IDENTIFICATION, AND MARKED "SPARE" WHERE APPLICABLE.
28. CONTRACTOR SHALL TEST ELECTRICAL SYSTEM FOR SHORT CIRCUITS AND MEGGER TEST FEEDERS AND BRANCH CIRCUIT WIRING. INSURE LOW IMPEDANCE GROUND PATH SYSTEM. PERFORM HIPOT TESTING WHEN REQUIRED BY LOCAL JURISDICTION.
29. ALL CONDUIT AND J-BOXES SHOWN SHALL BE CONCEALED WHEN POSSIBLE. WHEN NOT POSSIBLE, CONDUIT AND J-BOXES MAY BE SURFACE MOUNTED WITH PERMISSION OF THE OWNER OR OWNER'S REPRESENTATIVE.
30. CONTRACTOR SHALL COORDINATE ALL EQUIPMENT CONNECTIONS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN. PROVIDE ADDITIONAL FUSED DISCONNECT SWITCHES AND CONTROLS IF OVERCURRENT PROTECTION OR CONTROLS IS NOT INTEGRAL WITH UNITS.
31. ALL EQUIPMENT SHALL BE FUSE SIZED PER MANUFACTURES RECOMMENDATIONS AND U.L. APPROVAL.
32. ELECTRICAL DEVICES, DISCONNECT SWITCHES, ETC., SHALL BE SUPPORTED INDEPENDENT OF AND ISOLATED FROM EQUIPMENT VIBRATIONS.
33. FULL LOAD AMPS (FLA) SIZES, AS NOTED IN THESE DRAWINGS, ARE BASED ON SPECIFIED EQUIPMENT DATA. CONTRACTOR SHALL VERIFY NAMEPLATE FLA OF EQUIPMENT SUPPLIED AND COORDINATE ACCORDINGLY PER EQUIPMENT SUPPLIERS RECOMMENDATIONS.
34. ALL OUTDOOR ELECTRICAL EQUIPMENT SHALL BE NEMA-3R OR NEMA-4 ENCLOSURES.
35. CONDUITS OR RACEWAYS ROUTED FROM INDOORS TO OUTDOORS OR AS DESCRIBED IN NEC 300.7(A), SHALL BE SEALED WITH A PLIABLE SEALING COMPOUND AT A CONDUIT BODY OR AT A JUNCTION BOX BEFORE THE CONDUIT ENTERS THE COLDER ENVIRONMENT.
36. CONDUITS OR RACEWAYS INSTALLED IN AREAS WHERE ELEVATION CHANGES MAY CAUSE WATER OR MOISTURE TO ENTER THE ELECTRICAL EQUIPMENT THROUGH THE CONDUIT SHALL BE SEALED WITH A HERMETIC CONDUIT SEAL AT BOTH ENDS OF THE CONDUIT OR RACEWAY.
37. ALL POLE LIGHTS SHALL BE PROVIDED WITH A TWO POLE FUSE HOLDER BUSSMANN #HEX OR A SINGLE POLE FUSE HOLDER BUSSMANN #HEB OR EQUAL FOR INLINE FUSING, PROVIDE 5A FUSING IN FUSEHOLDER.
38. CONTRACTOR TO INSTALL PULL BOX ADJACENT TO EACH PATHWAY, AREA AND PARKING LOT LIGHT, SEE PULL BOX INSTALLATION DETAIL. PULL BOXES MAY NOT BE SHOWN AT ALL LOCATIONS ON PLANS.
39. PRIOR TO POURING THE POLE BASES OR COVERING ANY ELECTRICAL CONDUITS, CONTACT THE INSPECTION DEPARTMENT 24 HOURS IN ADVANCE FOR APPROVAL.
40. MATERIALS SHALL BE NEW AND OF THE BEST QUALITY WITH MANUFACTURER'S NAME PRINTED THEREON. MATERIALS SHALL BE MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, UNDERWRITER'S LABORATORY OR OTHER APPLICABLE STANDARDS AND RATED FOR HEAVY DUTY SERVICE.
41. ALL WIRING DEVICES SHALL BE SPECIFICATION GRADE. ALL 15 AND 20 AMP, 125 AND 250 VOLT, NONLOCKING RECEPTACLES INSTALLED OUTDOORS SHALL BE LISTED WEATHER-RESISTANT TYPE. ALL WEATHERPROOF WHILE IN-USE RECEPTACLE COVERS SHALL BE METAL.
42. SELECTION OF MATERIALS SHALL BE IN STRICT ACCORDANCE WITH THE DRAWINGS AND/OR SPECIFICATIONS. THE USE OF MANUFACTURER'S NAME, MODEL, AND NUMBER IS INTENDED TO ESTABLISH STYLE, QUALITY, APPEARANCE, USEFULNESS AND BID PRICE. CONTRACTOR SHALL SUBMIT TO THE OWNER OR OWNER'S REPRESENTATIVE FOR REVIEW AND APPROVAL (PRIOR TO ORDERING MATERIALS) COPIES OF EQUIPMENT SHOP DRAWINGS AS FOLLOWS: 1) LIGHT FIXTURES, 2) POLES, 3) POLE BASES, 4) SERVICE ENTRANCE SECTION, 5) ELECTRICAL EQUIPMENT, 6) DISCONNECT SWITCHES, 7) TIME CLOCKS AND OTHER CONTROLS, 8) LIGHTING CONTACTORS AND 9) PULL BOXES. AT THE TIME OF EACH SUBMITTAL, THE CONTRACTOR SHALL DEFINE AND DELINEATE IN WRITING ANY DEVIATIONS FROM THE CONTRACT DOCUMENTS. THE REVIEW WILL BE ONLY FOR CONFORMANCE WITH THE DESIGN CONCEPT OF THE WORK AND FOR COMPLIANCE WITH THE INFORMATION CONTAINED IN THE CONTRACT DOCUMENTS. THE REVIEW OF A SPECIFIED ITEM, AS SUCH, WILL NOT INDICATE REVIEW OF THE ASSEMBLY IN WHICH THE ITEM FUNCTIONS. REVIEW BY THE OWNER OR OWNER'S REPRESENTATIVE WILL NOT RELIEVE THE CONTRACTOR FROM RESPONSIBILITY FOR ANY ERRORS OR OMISSIONS IN THE SUBMITTALS NOR FROM HIS RESPONSIBILITY FOR COMPLYING WITH THE CONTRACT DOCUMENTS.
43. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTIONS, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
44. CONTRACTOR SHALL COORDINATE WITH POWER COMPANY REGARDING METERING EQUIPMENT PRIOR TO BIDDING AND ORDERING EQUIPMENT. CONTRACTOR SHALL VERIFY POWER COMPANY METERING REQUIREMENTS INCLUDING WHICH SERVICES NEED TO BE COMMERCIALLY RATED WITH APPROVED BY-PASS TEST BLOCKS. SERVICES THAT FEED SITE LIGHTING/"LIFE SAFETY" MAY NEED BY-PASS TEST BLOCKS DEPENDING ON POWER COMPANY STANDARDS.

CONSTRUCTION NOTES

1. EACH UNIT SHALL HAVE A SEPARATE AND INDIVIDUAL CONDUIT AND CIRCUIT FROM THE POINT OF DELIVERY. THE CONDUIT TAG AT THE UNIT IS THE SIZE FROM THE POINT OF DELIVERY TO THE SERVICE PER UNIT.
2. PROPOSED LOCATION OF UTILITY COMPANY TRANSFORMER. FINAL LOCATION PER UTILITY COMPANY PLANS.

LEGEND

- 1ø UTILITY COMPANY TRANSFORMER. COORDINATE WITH UTILITY COMPANY FOR EXACT LOCATION AND POWER CONNECTION TO NEW SERVICE. DUE TO SINGLE-PHASE TRANSFORMERS BEING RATED 100KVA OR SMALLER, MAINTAIN 10' CLEARANCE FROM ALL COMBUSTIBLE STRUCTURES. COORDINATE WITH POWER COMPANY IF LIQUID STORAGE IS MORE THAN 100 GALLONS TO ENSURE PROPER 25' CLEARANCE.
- WALL MOUNTED 200A METER/MAIN/PANEL 120/240V 1ø 3W NEMA 3R PANEL BOARD, BY OTHERS. SEE SINGLE LINE DIAGRAMS ON SHEET SE4.1 FOR ADDITIONAL DETAILS.
- WALL MOUNTED 125A METER/MAIN/PANEL 120/240V 1ø 3W NEMA 3R PANEL BOARD, BY OTHERS. SEE SINGLE LINE DIAGRAMS ON SHEET SE4.1 FOR ADDITIONAL DETAILS.
- WALL MOUNTED 200A DUPLEX METER WITH (2) 125A MAINS, 120/240V 1ø 3W NEMA 3R, BY OTHERS. SEE SINGLE LINE DIAGRAMS ON SHEET SE4.1 FOR ADDITIONAL DETAILS. PANELBOARDS MAY BE INSTALLED INDOORS PER ARCHITECT PLANS.
- UNDERGROUND CONDUIT. CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE UNLESS SPECIFICALLY NOTED OTHERWISE IN NOTES OR DETAILS. SEE GENERAL NOTES 12 & 13 ON SHEET SE1.1. SEE CONDUIT TAG AND TABLE ON SHEET SE2.1 FOR CONDUIT SIZE AND CONDUCTORS.



SCOPE OF WORK

1) PROVIDE PREFERRED LOCATIONS OF TRANSFORMERS, PULL-BOXES AND CONDUIT RUNS TO BUILDING PANELS (NO NEW PANEL BOARDS IN THIS SCOPE)

2) PROVIDE AND INSTALL EXTERIOR LIGHTING (NON-BUILDING), AND SITE ELECTRICAL.

3) PROVIDE AND INSTALL CIRCUIT BREAKERS IN PANEL BOARD, BY OTHERS, FOR SITE LIGHTING/ELECTRICAL.

4) COORDINATION ITEMS THAT NEED TO BE SHOWN FOR ELECTRICAL LOAD SUMMARIES AND THAT NEED TO HAVE ELECTRICAL CONNECTIONS ARE SHOWN FOR REFERENCE ONLY, BY OTHERS, UNDER SEPARATE PERMIT.

AARON D. KUTCHINSKY NEW MEXICO 19615 PROFESSIONAL ENGINEER

DRAWING NO:
SE2.3
OF 13

H:\2023\23176-Bungalows at Cerrillos\23176-SE-Phase 2.dwg

THESE DRAWINGS AND SPECIFICATIONS ARE THE SOLE PROPERTY OF WRIGHT ENGINEERING CORPORATION AND MAY NOT BE REPRODUCED OR MODIFIED FOR ANY USE WITHOUT THE EXPRESS WRITTEN PERMISSION OF WRIGHT ENGINEERING CORPORATION.

CONSTRUCTION NOTES

1. INSTALL A 3" SLEEVE UNDER ROADWAY FROM LANDSCAPE AREA TO LANDSCAPE AREA FOR LOW VOLTAGE CABLE
2. INSTALL LOOP DETECTOR. COORDINATE WITH GATE CONTRACTOR CONSULTANT FOR CONNECTION TO GATE MOTOR/KEY PAD.
3. INSTALL PUSH BUTTON FOR AREA LIGHT, PER DETAIL 4 ON SHEET SE5.3.
4. INSTALL PUSH BUTTON PER DETAIL 5 ON SHEET SE5.3, COORDINATE WITH OWNER FOR EXACT LOCATION. SEE DETAIL 5A ON SHEET SE5.3 FOR CONTROL SCHEMATIC.

LEGEND

- ELECTRICAL PANELBOARD. SEE SHEETS SE2.1 THROUGH SE2.3 FOR ADDITIONAL DETAILS.
- LVX — LOW VOLTAGE TRANSFORMER FOR ACCENT LIGHTING PER LANDSCAPE ARCHITECT PLANS. SEE DETAIL 5 ON SHEET SE5.1. COORDINATE FINAL LOCATION AND SIZE WITH LANDSCAPE ARCHITECT.
- G1–2 — CIRCUIT NUMBER. EXAMPLE, PANEL 'G1' CIRCUIT '2'.
- UNDERGROUND CONDUIT. CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE. SEE GENERAL NOTES 12, 13 & 15 ON SHEET SE1.1 FOR ADDITIONAL DETAILS ON CONDUIT INSTALLATIONS.
- ABOVE GROUND CONDUIT. CONDUIT SHALL BE GRS UNLESS OTHERWISE INDICATED. SEE GENERAL NOTES 12, 13 & 15 ON SHEET SE1.1 FOR ADDITIONAL DETAILS ON CONDUIT INSTALLATIONS.
- J — WEATHERPROOF JUNCTION BOX.
- 200 — CONDUIT TAG. SEE CONDUIT AND WIRE TABLE FOR CONDUIT AND WIRE DETAILS.
- LED AREA LIGHT MOUNTED 15' ABOVE FINISHED GRADE. SEE DETAIL 1 ON SHEET SE5.1 FOR INSTALLATION DETAILS. SEE LIGHTING FIXTURE SCHEDULE ON SE3.1 FOR ADDITIONAL INFORMATION.
- LED CANOPY MOUNTED LIGHT. SEE DETAIL 2 ON SHEET SE5.1 FOR INSTALLATION DETAILS. SEE LIGHTING FIXTURE SCHEDULE ON SE3.1 FOR ADDITIONAL INFORMATION.
- PUSH BUTTON. SEE DETAIL 5 ON SHEET SE5.3 FOR INSTALLATION DETAILS.
- GATE OPERATOR TO BE INSTALLED PER MANUFACTURERS SPECIFICATIONS.

LIGHTING FIXTURE SCHEDULE

LABEL	SYMBOL	MANUFACTURER	CATALOG #	WATTS	VOLTS	LAMP(S)	LAMP TEMPERATURE	QUANTITY	COLOR FINISH	MOUNTING	LUMENS
A		LITHONIA LIGHTING	DSXO–LED–P1–30K–70CRI–T5W–MVOLT–DDBXD	33W	120	LED	3000K	3	DARK BRONZE	15'	4,878
B		HOLOPHANE	PPSQL2–HP10–30K–XX–FC–T5W	25W	240	LED	3000K	10	BRONZE	8.5' SURFACE	2,843

CONTRACTOR SHALL VERIFY ALL QUANTITIES. CONTRACTOR MAY SUBMIT ALTERNATIVES FOR AN ENGINEER APPROVED EQUAL
LIGHTS A–B SHALL BE DARK SKY RATED "FULL CUT OFF"
GENERAL GARAGE LIGHTING CONTROL SCHEMATICS SHOWN ON SHEET SE5.1.

Specifications

EPA:	0.44 ft² (0.04 m²)
Length:	26.18" (66.5 cm)
Width:	14.06" (35.7 cm)
Height H1:	2.26" (5.7 cm)
Height H2:	7.46" (18.9 cm)
Weight:	23 lbs (10.4 kg)

Introduction

The modern styling of the D-Series features a highly refined aesthetic that blends seamlessly with its environment. The D-Series offers the benefits of the latest LED technology into a high performance, high efficacy, long-life luminaire.

The photometric performance results in sites with excellent uniformity, greater pole spacing and lower power density. D-Series outstanding photometry aids in reducing the number of poles required in area lighting applications, with typical energy savings of 70% and expected service life of over 100,000 hours.

Ordering Information

EXAMPLE: DSX0 LED P6 40K 70CRI T3M MVOLT SPA NLTAIR2 PIRHN DDBXD

DSX0 LED

Series	LEDs	Color temperature[2]	Color Rendering Index[1]	Distribution	Voltage	Mounting
DSX0 LED	**Forward optics**	(this section 20CRI only)		AFR Automotive front row	MVOLT (120V-277V)[3,4]	**Shipped included**
	P1 P5	30K 3000K	70CRI	T1S Type I short	HVOLT (347V-480V)[3,4]	SPA Square pole mounting (4@ drilling, 3.5" min. SQ pole)
	P2 P6	40K 4000K	70CRI	T2M Type II medium	XVOLT (277V-480V)[3,4]	RPA Round pole mounting (4@ drilling, 3" min. RND pole)
	P3 P7	50K 5000K	70CRI	T3M Type III medium		SPAS Square pole mounting (4@ drilling, 3" min. SQ pole)[5]
	P4	(this section 80CRI only, extended lead times apply)		T3LG Type III low glare[1]		RPAS Round pole mounting (4@ drilling, 3" min. RND pole)[5]
	Rotated optics			T4M Type IV medium		SPABW Square narrow pole mounting (4@ drilling, 3" min. SQ pole)
	P10[1] P12[1]	27K 2700K	80CRI	T4LG Type IV low glare[1]		WBA Wall bracket[6]
	P11[1] P13[1]	30K 3000K	80CRI	TFTM Forward throw medium		MA Mast arm adapter (mounts on 2 3/8" OD horizontal tenon)
		35K 3500K	80CRI	T5M Type V medium		
		40K 4000K	80CRI	T5LG Type V low glare		
		50K 5000K	80CRI	T5VM Type V wide		
				BLC3 Type VII backlight control[1]		
				BLC4 Type IV backlight control[1]		
				LCCO Left corner cutoff[1]		
				RCCO Right corner cutoff[1]		

Control options		Other options		Finish (required)	
Shipped installed		**Shipped installed**		DDBXD	Dark Bronze
NLTAIR2 PIRHN	nLight AIR generation 2 enabled with bi-level motion / ambient sensor, 8–40' mounting height, ambient sensor enabled at 2fc.[7,8,12,13,14]	HS	Houseside shield (black finish standard)[10]	DBLXD	Black
PIR	High/low, motion/ambient sensor, 8–40' mounting height, ambient sensor enabled at 2fc.[12,13,14]	L90	Left rotated optics[1]	DNAXD	Natural Aluminum
PER	NEMA twist-lock receptacle only (controls ordered separately)[14]	R90	Right rotated optics[1]	DWHXD	White
PERS	Five-pin receptacle only (controls ordered separately)[14,15]	CCE	Coastal Construction[11]	DBTXD	Textured dark bronze
PER7	Seven-pin receptacle only (controls ordered separately)[14,15]	HA	50°C ambient operation[11]	DBLBXD	Textured black
FAO	Field adjustable output.[1,16]	**Shipped separately**		DNATXD	Textured natural aluminum
BL30	Bi-level switched dimming, 30%.[16,17]	EGSR	External Glare Shield (reversible, field install required, maximizes housing finish)	DWHGXD	Textured white
BL50	Bi-level switched dimming, 50%.[16,17]	BSDB	Bird Spikes (field install required)		
DMG	0–10v dimming wires pulled outside fixture (for use with an external control, ordered separately)[17]

Performance Data

Lumen Output

Lumens values are from photometric tests performed in accordance with IESNA LM-79-08. Data is considered to be representative of configurations shown within the tolerances described within LM-79. Contact factory for performance data on any configurations not shown here.

1A - POLE-MOUNTED AREA LIGHT

HOLOPHANE
LEADER IN LIGHTING SOLUTIONS

Catalog Number

Notes

Type

Parkpak® LED

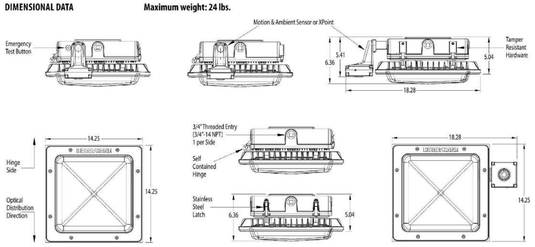
Mechanical
- Heavy grade A360 cast aluminum coupled with a rigorous 5-stage pretreatment, epoxy basecoat and polyester topcoat yield a finish that achieves a scribe creepage rating of 8 after 5,000 hours of salt spray.
- Mounts to a standard junction box
- Provide a swivel kit for pendant mount applications that is secured to a 4 inch square electrical box
- Wet location listed
- IP66 rating
- ¾" threaded plug (¾" - 14 NPT) on each side, accepts ¾" and ½" conduit.
- Vibe rating for surface mount: 3G
- Vibe rating for pendant mount: 3G at 1.5 feet, excludes swivel kit
- Pendant mount: ¾" - 14 NPT in center of housing
- Bird Shroud (Accessory)

Electrical
- Electrical harness for quick and safe disconnect / connect of power and options
- Rated for -40°C / -40°F minimum ambient
- Programmable electronic driver with 0-10V control leads
- Available in: 120-277V 50/60 Hz and 347-480V 50/60 Hz
- Standard: 3000K, 4000K and 5000K CCT (>70 CRI)
- Optional >80 CRI, 8 week lead-time
- Internal mounted emergency battery backup for operation in an ambient temperature ranging from -20°C / -4°F to 30°C / 86°F for P10 thru P40 performance packages, non CEC compliant
- All surge protection meets ANSI/IEEE C62.41.2 10kV/10kA
- Standard surge protection is 20kV/10kA with indicator light per ANSI C136.2
- Optional surge protection is 10kV/5kA per ANSI C136.2
- The emergency battery option surge protection is 10kV/5kA per ANSI C136.2

Optical
- The light engine shall be IP66
- Type V; E (entry), M (medium), R (rectangle) & W(wide)
- Asymmetric

Optical Material Options
- Borosilicate glass lens (GL)
- Polycarbonate lens (PY)
- Zero uplight option (FC)

Controls
- Field adjustable output
- Button style photocontrol
- XPoint™ Wireless control
- Motion Sensor / Ambient Photocontrol with mounting options ranging from (8-15') and (15-30')
- Title 24 compliance options available



Certification and Standards
- Luminaire is CSA listed, US and Canada
- Suitable for operation in an ambient temperature up to 40°C / 104°F for standard product
- DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at www.designlights.org/QPL to confirm which versions are qualified.
- LM-79 compliant
- The projected LED Lumen Maintenance shall be based only on IES LM-80-08 and TM-21

Warranty

5-year limited warranty. Complete warranty terms located at: www.acuitybrands.com/resources/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application.
All values are design or typical values, measured under laboratory conditions at 25 °C.
Specifications subject to change without notice.

DIMENSIONAL DATA **Maximum weight: 24 lbs.**

SPECIFICATIONS

Certifications/Qualifications	
	www.kichler.com/warranty
Dimensions	
Base Backplate	4.75 X 11.75
Extension	3.75"
Weight	2.96 LBS
Height from center of Wall opening (Spec Sheet)	6.00"
Height	12.00"
Width	3.00"
Electrical	
Input Voltage	Single(120)V
Light Source	
Delivered Lumens	880
Dimmable	Yes
Dimmable Notes	This LED is compatible with most standard incandescent dimmers, LED dimmers, and electronic low voltage dimmers. For more information, go to Kichler.com/dimming.
Equivalent Light Source	Incandescent
Expected Life Span (Hours)	35000
Lamp Included	Integrated
Light Source	LED
Max or Nominal Watt	16W
# of Bulbs/LED Modules	2
Mounting/Installation	
Interior/Exterior	Exterior
Location Rating	Wet
Mounting Style	Wall Mount
Mounting Weight	4.60 LBS
Photometrics	
Color Rendering Index	90
Color Temperature Range	3000
Delivered Efficacy (Lumens/Watt)	650
Kelvin Temperature	3000K

FIXTURE ATTRIBUTES

Housing	
Diffuser Description	Clear Tempered Glass With Inside Etch
Primary Material	ALUMINUM

3 - GENERIC PORCH LIGHT

PINNACLE ARCHITECTURAL LIGHTING®

Project Name _____ Date _____ Type _____

EDGE EX3WET

3" Suspended Direct Linear WET

Key Features

- Approved for wet location unless otherwise noted. IP65 and IK10 rated
- 6063-T5 Extruded aluminum housing
- Highly reflective die-formed white painted reflector
- All-inclusive module houses all LED system components in one compact unit
- Unit easily releases from the housing for room-side maintenance
- Wiring access available through bottom of housing
- 5-year limited warranty covers LED, driver and fixture
- UL and cUL listed
- Buy American Act compliant

Example Part #: EX3-WET-N-830HO-8'-IND-AC48GI-U-OL2-1-0-W

OCEANWALK ROUND Bollard LED Specifications

Project Name:

Catalog Number: OWK-2-L_COG_20LC_3_3K

Type:

The **OceanWalk - Round LED** series of architectural bollards combines contemporary styling with durable, vandal-resistant construction and smooth, low-level, 360-degree symmetrical illumination with available cutoff optics; and is an excellent choice for walkways, entrances, promenades, plazas, courtyards, driveways and landscaped areas.

FLOOR PLAN NOTES

1. ALL WINDOW HEADER HEIGHTS ARE AT 8'–0", U.NO.
2. ALL BEDROOM WINDOWS SHALL HAVE A MINIMUM NET CLEAR OPENING OF 5.7 SQ. FT. WITH A MINIMUM NET HEIGHT DIMENSION OF 24" AND NET WIDTH DIMENSION OF 20". CLEAR OPENING HEIGHT SHALL NOT EXCEED 44" A.F.F.
3. PROVIDE A CONTINUOUS 3'–0" WIDE (MINIMUM) PATH OF EGRESS FROM ALL BEDROOM WINDOWS/DOORS TO A PUBLIC WAY.
4. APPLICABLE I.C.C. REPORTS AND MANUFACTURER'S INSTALLATION INSTRUCTIONS TO BE PROVIDED TO INSPECTOR AT ROUGH–IN.
5. TO ACHIEVE PROPER INSULATION INSTALLATION, PROVIDE HORIZ. AND/OR VERT. AIR BARRIER (O.S.B., GYP. BD. OR EQ.) AT MAIN ATTIC LINE (BOT. CHORD OF TRUSS), KNEE WALLS, GAPS, ETC.
6. ALL WINDOWS TO COMPLY WITH LIGHT AND VENTING REQUIREMENTS PER 2018 I.R.C. SECTION R303.1

ⓧ FLOOR PLAN KEYNOTES

1. DISHWASHER – SEE BUILDER'S SELECTION SHEET
2. KITCHEN SINK W/ DISPOSAL – SEE BUILDER'S SELECTION SHEET
3. STANDARD 38" WIDE REFRIGERATOR OPENING W/ RECESSED BOX AND BIBB FOR ICEMAKER
4. RANGE W/ MICROWAVE EXHAUST HOOD – SEE BUILDER'S SELECTION SHEET
   8"W. X 8"H. RECESS @ +6" A.F.F. FOR GAS STUB (WHERE APPLICABLE)
5. PANTRY – PROVIDE BLOCKING AND INSTALL SHELVING PER BUILDERS SPECIFICATIONS
6. LINEN – PROVIDE BLOCKING AND INSTALL SHELVING PER BUILDERS SPECIFICATIONS
7. DROPPED INTERIOR SOFFIT – 12" DOWN FROM LOWEST ADJACENT CEILING, U.N.O.
8. EXTERIOR STUCCO SOFFIT – SEE ELEVATIONS FOR HEIGHT
9. WATER HEATER SHALL BE INSTALLED ON 18" HIGH PLATFORM
10. T&P RELIEF VALVE AND DRAIN TO EXTERIOR – MIN. 6" ABOVE FINISHED GRADE
11. CEMENT, FIBER CEMENT OR GLASS MAT GYPSUM BOARD & IMPERMEABLE SURFACE AT THREE SIDES OF TUB OR SHOWER TO MIN. +72" A.F.F.
12. FIBERGLASS SHOWER UNIT OR TUB/SHOWER UNIT W/ MARBLE PANELS (OR EQ.) TO 7'–6" MIN. ABV. DRAIN AT SHOWER, FOR GYP. BOARD REQ. – SEE BUYER'S SELECTION SHEET
13. 2X6 WALL FOR WASHER BOX AND 14 1/2"W. X 12"H. RECESS @ +6" A.F.F. FOR DRYER VENT (AND GAS STUB WHERE APPLICABLE)
14. TEMPERED GLASS SHOWER SURROUND
15. 2X KNEE WALL – HEIGHT AS NOTED OR +34 1/2" AT FLUSH KITCHEN COUNTER CONDITION
16. 1/2" SAG RESISTANT EXTERIOR GYPSUM SOFFIT BOARD (ESR #1338)
17. 1 ROD/1 SHELF PER DETAIL 8/A4.2
18. 2 RODS/2 SHELVES PER DETAIL 8/A4.2
19. SLOPE STUCCO SHELF FOR POSITIVE DRAINAGE, MIN. 1" P.L.F. (PROVIDE THERMO–PLASTIC WATERPROOFING MEMBRANE OR EQUAL UNDER STUCCO)
20. VANITY W/ MIRROR ABOVE – SEE BUILDER'S SELECTION SHEET
21. LOWER CABINETS
22. UPPER CABINETS
23. RECESSED MEDICINE CABINET – BLOCKING AT +4'–4" AND +6'–4", U.N.O.
24. HOSE BIBB WITH BACKFLOW PREVENTER;
    SHUT–OFF VALVE AND HOSE BIBB LOC. AT FRONT DETERMINED BY STREET SERVICE
25. 22"x32" ATTIC ACCESS 30" MIN. HEADROOM; SEE DETAIL 12/A4.2

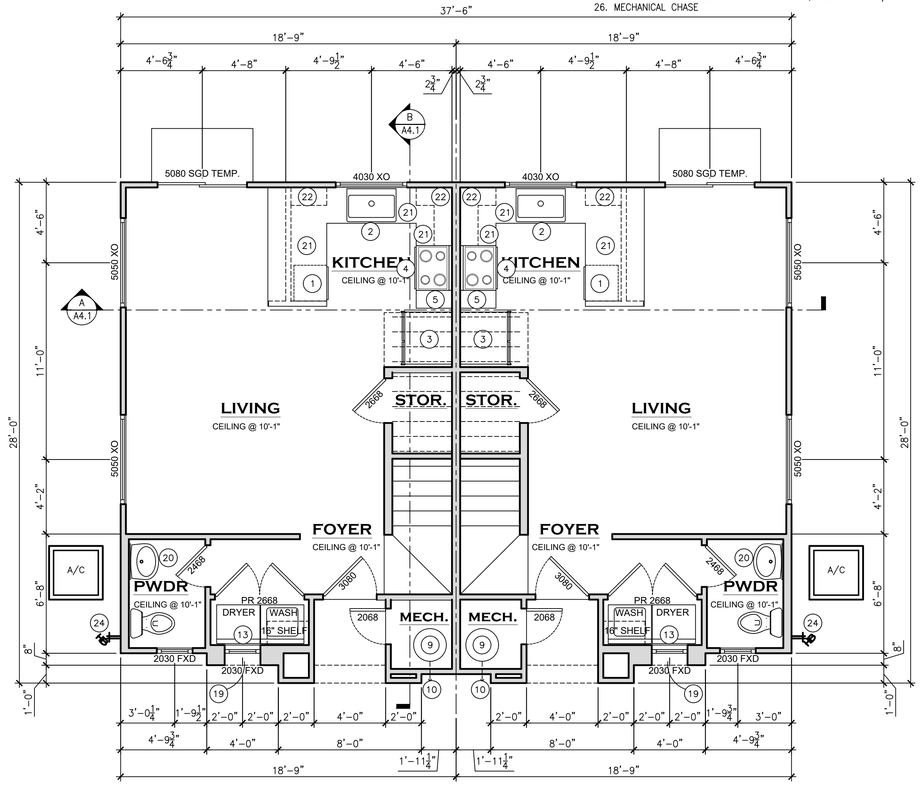
FLOOR PLAN NOTES

1. ALL WINDOW HEADER HEIGHTS ARE AT 8'-0", U.NO.
2. ALL BEDROOM WINDOWS SHALL HAVE A MINIMUM NET CLEAR OPENING OF 5.7 SQ. FT. WITH A MINIMUM NET HEIGHT DIMENSION OF 24" AND NET WIDTH DIMENSION OF 20". CLEAR OPENING HEIGHT SHALL NOT EXCEED 44" A.F.F.
3. PROVIDE A CONTINUOUS 3'-0" WIDE (MINIMUM) PATH OF EGRESS FROM ALL BEDROOM WINDOWS/DOORS TO A PUBLIC WAY.
4. APPLICABLE I.C.C. REPORTS AND MANUFACTURER'S INSTALLATION INSTRUCTIONS TO BE PROVIDED TO INSPECTOR AT ROUGH-IN.
5. TO ACHIEVE PROPER INSULATION INSTALLATION, PROVIDE HORIZ. AND/OR VERT. AIR BARRIER (O.S.B., GYP. BD. OR EQ.) AT MAIN ATTIC LINE (BOT. CHORD OF TRUSS), KNEE WALLS, GAPS, ETC.
6. ALL WINDOWS TO COMPLY WITH LIGHT AND VENTING REQUIREMENTS PER 2018 I.R.C. SECTION R303.1



(XX) FLOOR PLAN KEYNOTES

1. DISHWASHER – SEE BUILDER'S SELECTION SHEET
2. KITCHEN SINK W/ DISPOSAL – SEE BUILDER'S SELECTION SHEET
3. STANDARD 38" WIDE REFRIGERATOR OPENING W/ RECESSED BOX AND BIBB FOR ICEMAKER
4. RANGE W/ MICROWAVE EXHAUST HOOD – SEE BUILDER'S SELECTION SHEET 8"W. X 8"H. RECESS @ +6" A.F.F. FOR GAS STUB (WHERE APPLICABLE)
5. PANTRY – PROVIDE BLOCKING AND INSTALL SHELVING PER BUILDERS SPECIFICATIONS
6. LINEN – PROVIDE BLOCKING AND INSTALL SHELVING PER BUILDERS SPECIFICATIONS
7. DROPPED INTERIOR SOFFIT – 12" DOWN FROM LOWEST ADJACENT CEILING, U.N.O.
8. EXTERIOR STUCCO SOFFIT – SEE ELEVATIONS FOR HEIGHT
9. WATER HEATER SHALL BE INSTALLED ON 18" HIGH PLATFORM
10. T&P RELIEF VALVE AND DRAIN TO EXTERIOR – MIN. 6" ABOVE FINISHED GRADE
11. CEMENT, FIBER CEMENT OR GLASS MAT GYPSUM BOARD & IMPERMEABLE SURFACE AT THREE SIDES OF TUB OR SHOWER TO MIN. +72" A.F.F.
12. FIBERGLASS SHOWER UNIT OR TUB/SHOWER UNIT W/ MARBLE PANELS (OR EQ.) TO 7'-6" MIN. ABV. DRAIN AT SHOWER, FOR GYP. BOARD REQ. – SEE BUYER'S SELECTION SHEET
13. 2X6 WALL FOR WASHER BOX AND 14 1/2"W. X 12"H. RECESS @ +6" A.F.F. FOR DRYER VENT (AND GAS STUB WHERE APPLICABLE)
14. TEMPERED GLASS SHOWER SURROUND
15. 2X KNEE WALL – HEIGHT AS NOTED OR +34 1/2" AT FLUSH KITCHEN COUNTER CONDITION
16. 1/2" SAG RESISTANT EXTERIOR GYPSUM SOFFIT BOARD (ESR #1338)
17. 1 ROD/1 SHELF PER DETAIL 8/A4.2
18. 2 RODS/2 SHELVES PER DETAIL 8/A4.2
19. SLOPE STUCCO SHELF FOR POSITIVE DRAINAGE, MIN. 1" P.L.F. (PROVIDE THERMO-PLASTIC WATERPROOFING MEMBRANE OR EQUAL UNDER STUCCO)
20. VANITY W/ MIRROR ABOVE – SEE BUILDER'S SELECTION SHEET
21. LOWER CABINETS
22. UPPER CABINETS
23. RECESSED MEDICINE CABINET – BLOCKING AT +4'-4" AND +6'-4", U.N.O.
24. HOSE BIBB WITH BACKFLOW PREVENTER; SHUT-OFF VALVE AND HOSE BIBB LOC. AT FRONT DETERMINED BY STREET SERVICE
25. 22"x32" ATTIC ACCESS 30" MIN. HEADROOM; SEE DETAIL 12/A4.2
26. MECHANICAL CHASE

FARMHOUSE

FLOOR PLAN KEYNOTES

1. ICE MAKER, "EDGESTAR" IB450SSP, OR EQUAL, TO FIT UNDER A 34" COUNTERTOP. PROVIDE FLOOR DRAIN BELOW.
2. 33" STAINLESS STEEL FARMHOUSE SINK, W/ DISPOSAL.
3. UNDER COUNTER REFRIGERATOR, "EDGESTAR" CBR1501SLD, OR EQUAL, TO FIT UNDER A 34" COUNTERTOP.
4. PROVIDE EXIT DEVICE AT DOOR. SEE A5.2 FOR THRESHOLD DETAIL.
5. WATER HEATER SHALL BE INSTALLED ON 18" HIGH PLATFORM, SEE DETAIL 1/A5.4.
6. T&P RELIEF VALVE AND DRAIN TO EXTERIOR – MIN. 6" ABOVE FINISHED GRADE.
7. PROVIDE SIGN ABOVE DOOR TO READ, "THIS DOOR TO REMAIN UNLOCKED WHEN BUILDING IS OCCUPIED" OR " THIS DOOR MUST REMAIN UNLOCKED DURING BUSINESS HOURS".
8. 72" LINEAR GAS FIREPLACE – "ACUCRAFT" SIGNATURE SERIES, WITHOUT GLASS, OR EQUAL. INSTALL PER MANUFACTURER'S WRITTEN INSTRUCTIONS INCLUDING NON-COMBUSTIBLE FINISHES AROUND OPENING.
9. NOT USED
10. ATTIC ACCESS LADDER, PROVIDE BLOCKING IN WALL FOR BRACKET CONNECTION.
11. NOT USED
12. 36" TALL ISLAND, OPEN BELOW WITH WATERFALL ENDS. PROVIDE ELECTRICAL OUTLETS BELOW.
13. NOT USED
14. MICROWAVE DRAWER, "SHARP" SMD2470ASY, OR EQUAL.
15. "ELKAY" LZWS-EDFP217K (OR SIM.) BOTTLE FILLING STATION WITH HI-LOW WATER FOUNTAINS.
16. PROVIDE KNOX BOX AT DOOR.
17. NOT USED
18. 42" X 30" CLEAR SPACE FOR PARALLEL APPROACH
19. WALL MOUNTED TELEVISION. PROVIDE POWER, DATA, & CABLE CONNECTION AT +5'-0".
20. "LARSEN'S" OCCULT FULLY RECESSED FIRE EXTINGUISHER CABINET WITH 304 STAINLESS STEEL WITH #4 FINISH. PROVIDE WITH A 2A-10B:C FIRE EXTINGUISER. MOUNT WITH TOP OF CABINET AT +48"
21. MAXIMUM OCCUPANCY SIGN AT +9'-0" A.F.F. SIGN SHALL READ "MAXIMUM OCCUPANCY SHALL NOT EXCEED 100 PERSONS". SIGN SHALL BE LEGIBLE FROM ANY LOCATION WITHIN THE GATHERING ROOM, TEXT HEIGHT SHALL BE A MINIMUM OF 1" TALL BLOCK LETTER.
22. FDC LOCATION
23. SA-C GUIDE FOR SLIDING BARNDOOR. ALIGN WITH DOOR TO KEEP DOOR HANGING PLUMB.

FLOOR PLAN NOTES

1. ALL WINDOW HEADER HEIGHTS ARE AT +8'-0", U.O.N.
2. APPLICABLE I.C.C. REPORTS AND MANUFACTURER'S INSTALLATION INSTRUCTIONS TO BE PROVIDED TO INSPECTOR AT ROUGH-IN.
3. TO ACHIEVE PROPER INSULATION INSTALLATION, PROVIDE HORIZ. AND/OR VERT. AIR BARRIER (O.S.B., GYP. BD. OR EQ.) AT MAIN ATTIC LINE (BOT. CHORD OF TRUSS), KNEE WALLS, GAPS, ETC.
4. ALL INTERIOR FINISHES SHALL HAVE A MINUMUM CLASS C FLAME SPREAD AND A SMOKE DEVELOPED INDEX OF 0-450.
5. ALL OPERABLE PARTS, INCLUDING SWITCHES, SHALL BE NO HIGHER THAN 48" ABOVE FINISH FLOOR.

Bungalows on Cerrillos

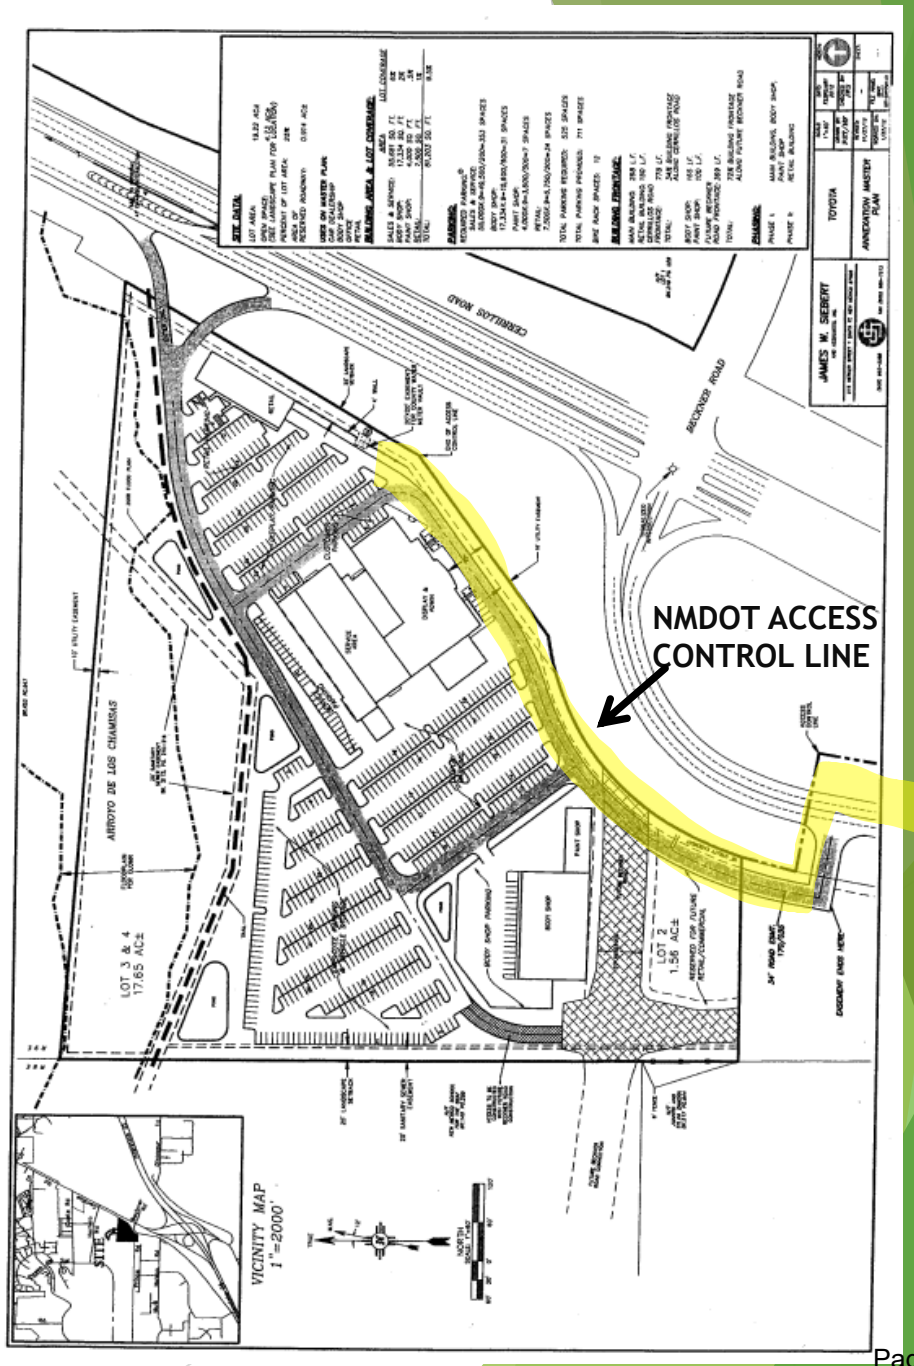
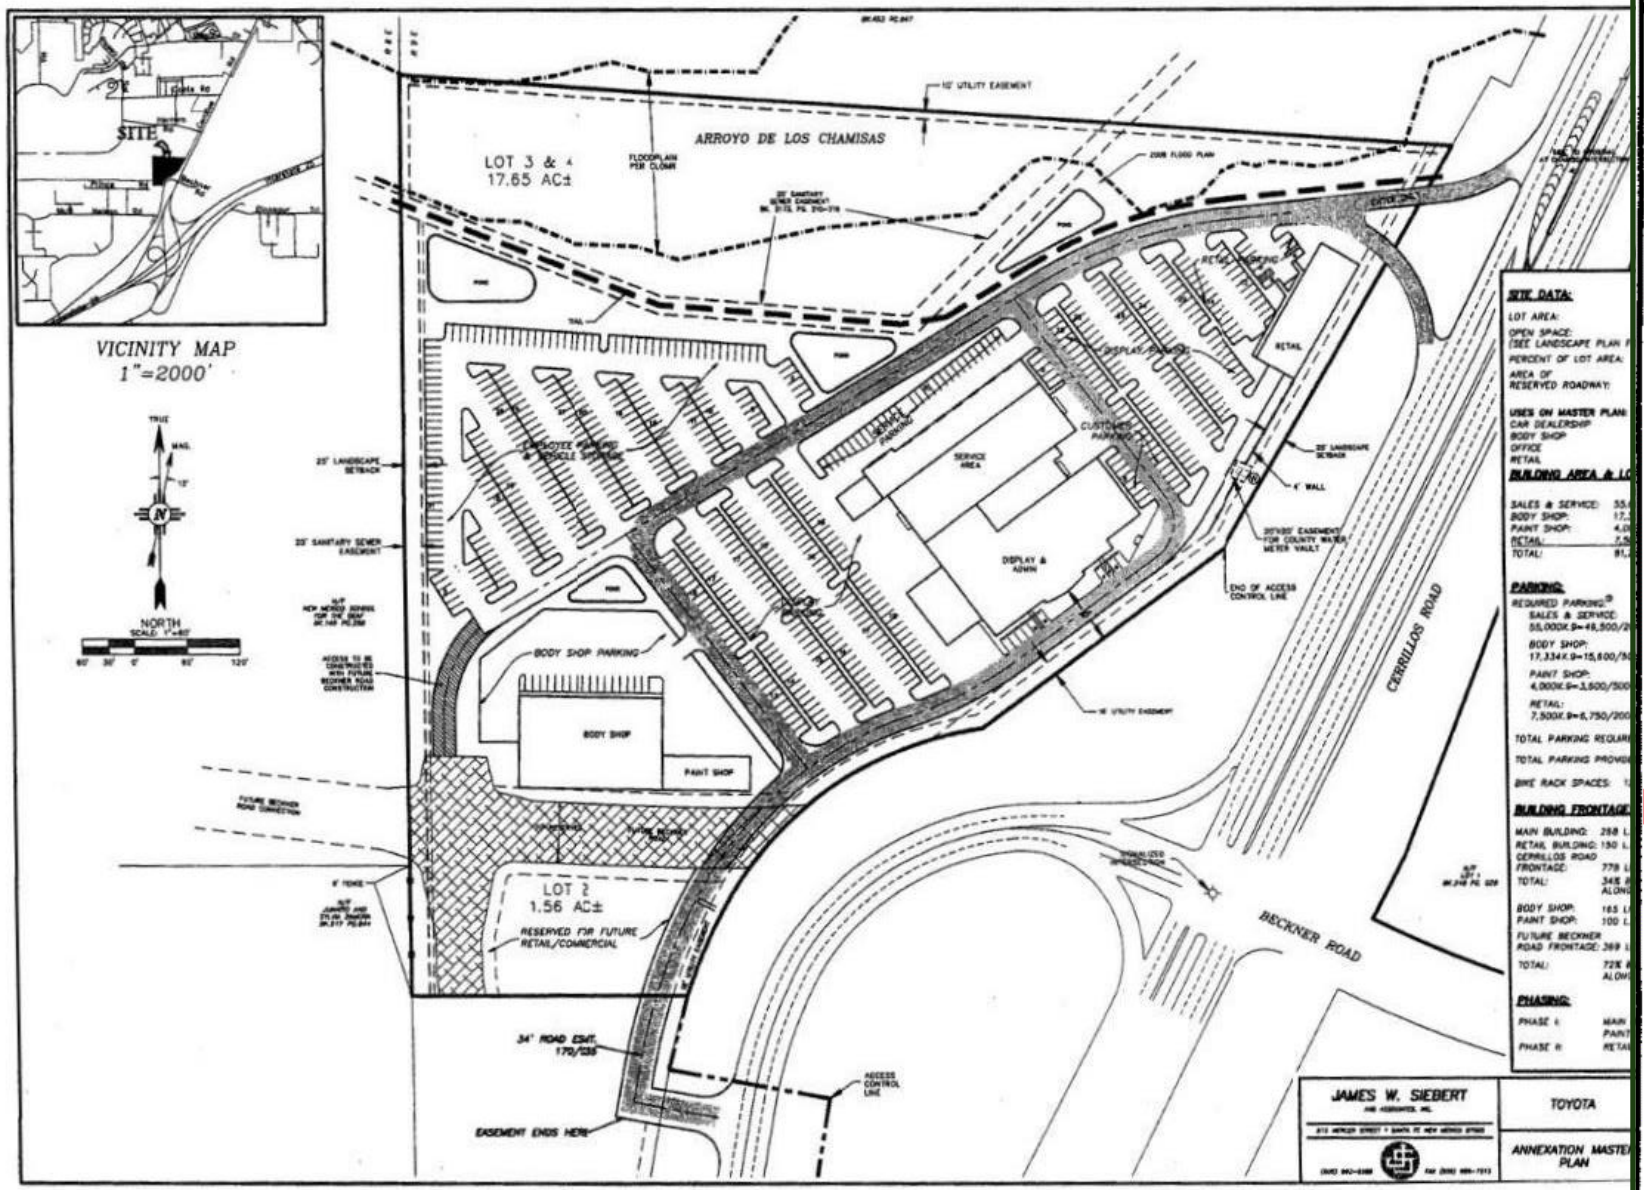
Site Background and History

- 2014 Annexation Agreement with Beavers Motors LLC and Santa Fe included approval of car dealership and body shop Master Plan and two variances:
  - **Slope variance**: allowed 5,020 sf of disturbance to natural slopes exceeding 30%
  - **Set back variance**: reduced required set back to 25 feet



Variances and Master Plan were supported by staff, the Planning Commission, and approved by the Santa Fe City Council April 25, 2012.

- Car Dealership and Body Shop Master Plan has since expired.
- Pulte Homes subsequently looked at property but dropped over access issues.
- Access has been a challenge for over 10 years given the poor configuration of the W I-25 Frontage road.
- Current applicant has worked with the NMDOT to redesign roadways to improve access as well as the function and safety of the Cerrillos/W I-25 interchange.
- NMDOT and the City of Santa Fe's Traffic division have approved the design.



Bungalows on Cerrillos

Site Background and History

- The current NMDOT access control line and ROW severely restricts access to the property.
- W I-25 Frontage Rd. northbound queuing lengths can stack up south well beyond the curve.
- NMDOT did not approve Beaver Motors' access plan off the W IH-25 frontage Rd.
- NMDOT did not approve Pulte's plan for their proposed access/design.
- MPO also required access to future roadway connections to the west.

Bungalows on Cerrillos

Key Design Considerations

- Design for future road connections to Herrera Drive and Paseo Del Sol North.
- Allow ample queueing by extending the W I-25 Frontage Road West and straighten approach to Cerrillos.
- Expand W I-25 east bound queuing lengths for those turning north by adding additional left turn lane.
- Roadway geometry to accommodate truck traffic.
- Provide additional access options to the site by modifying the existing control line.
- Neighbors support keeping the existing free rights at Beckner and Cerrillos Rd which accommodates large truck and trailer movements referenced above.

Cerrillos (NM 14) & West Frontage	0	1	3	30
Cerrillos (NM 14) & Herrera	1	0	6	23

Bungalows on Cerrillos

Significant Public Safety and Infrastructure Benefits

- At roughly $2.5 million dollars, the applicant is making a significant investment in Public Infrastructure to improve the W I-25 Frontage and Cerrillos Road intersection. These improvements will make the interchange safer and improve traffic flow.
  - *Note: Without this project, public dollars would have to be used for these improvements.*
- Significant improvements to the pedestrian experience - adding over 3000 feet of trails and sidewalks including Herrera Drive connection.
- New W I-25 Frontage Road bus stop (pending NMDOT approval)
- Roundabout design to accommodate future road connections to Paseo del Sol and Herrera.

Bungalows on Cerrillos

Development Plan Considerations

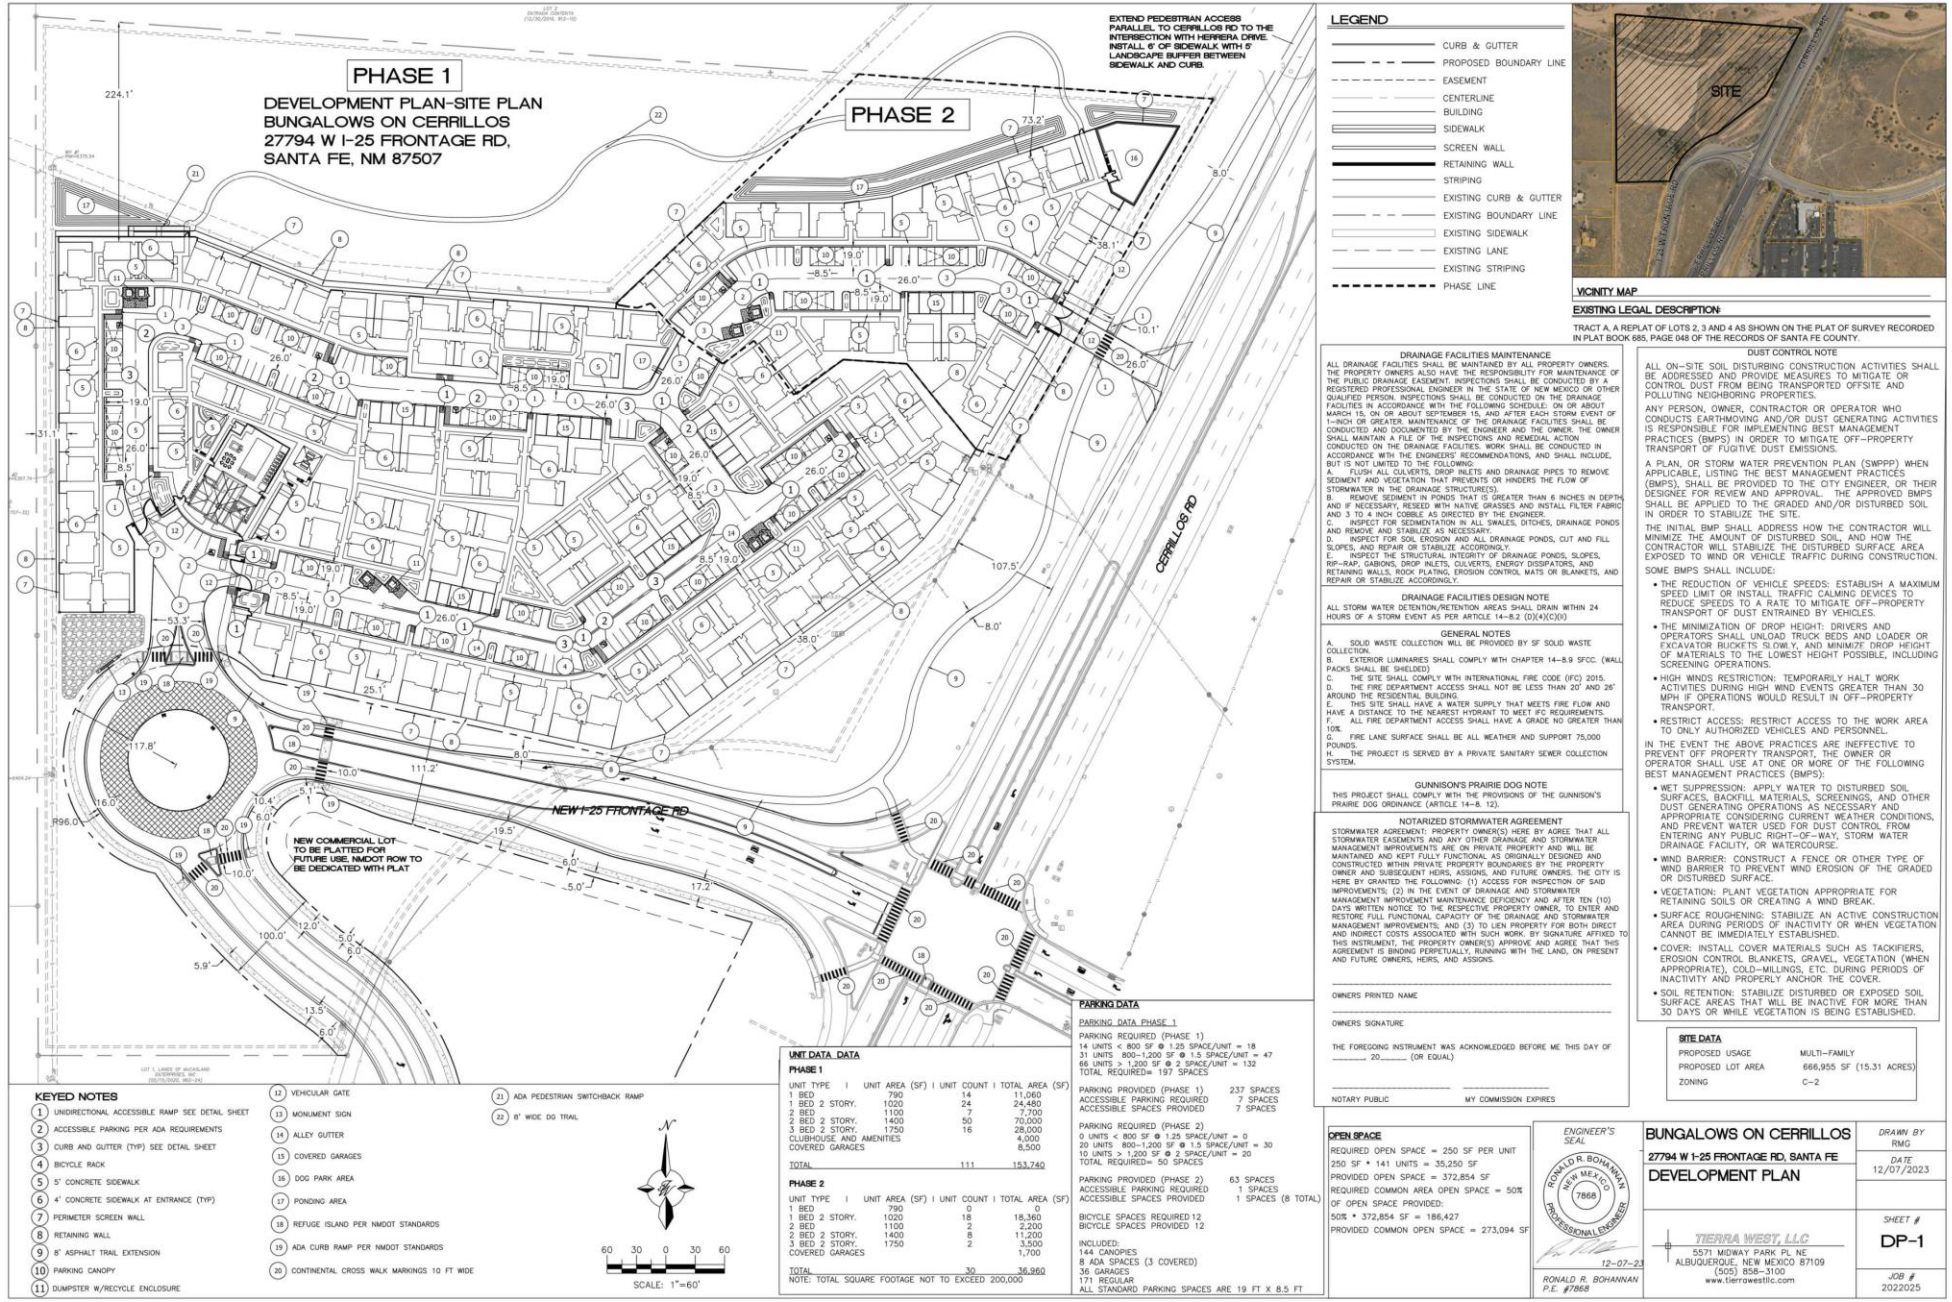
- *Housing Needed in Santa Fe*

Santa Fe continues to experience a shortage of rental housing across all segments. Multifamily projects are operating at or below a 3% vacancy. A lagging housing supply is driving higher home prices negatively impacting availability of moderately priced housing for Santa Fe's workforce. An estimated 30,000 people commute to Santa Fe in part due to lack of housing.

- *Compatibility with Surrounding Neighborhood*

The residential nature of the project with one and two story detached homes is compatible with other residential uses in the area. The broader area moving North and East along Cerrillos Road and Beckner Road offers a mix of residential and commercial uses including apartments, single family homes, light industrial, retail, and a variety of commercial businesses.

- *Lot Split*



A lot split will be required to accommodate the road improvements. This future lot split will be done administratively post Development Plan approval. When combined with the flood plain area on the sites North side, the lot split will reduce the developable area of the multifamily project to approximately 10 acres.

Development Plan Considerations, *continued*

- Affordable Housing - The project will contribute a “fee in lieu” assessment to the City of Santa Fe’s Affordable Housing Trust Fund. An SFHP Rental Proposal is in process.
- Water
  - A Water Plan has been completed and approved by the City of Santa Fe’s Water Division.
  - A proposed water budget of 26.71 acre-feet has been submitted for approval with the Development Plan application. The project will acquire and deposit water rights per the approved budget into the Santa Fe Water Bank.
- Dark Skies Ordinance – Exterior site lighting will comply with SFCC
- Archaeology – An archaeological survey has been completed and clearance received by the previous owners and will be furnished to the City of Santa Fe.
- Prairie Dog Relocation - No Gunnison's prairie dog colonies have been observed at the site.

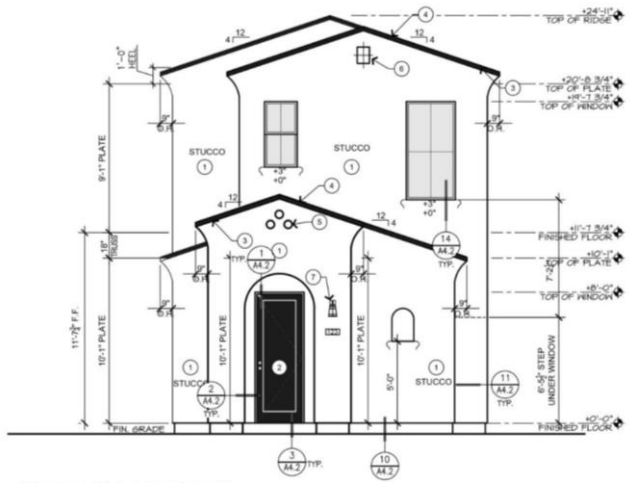
Bungalows on Cerrillos

Development Plan

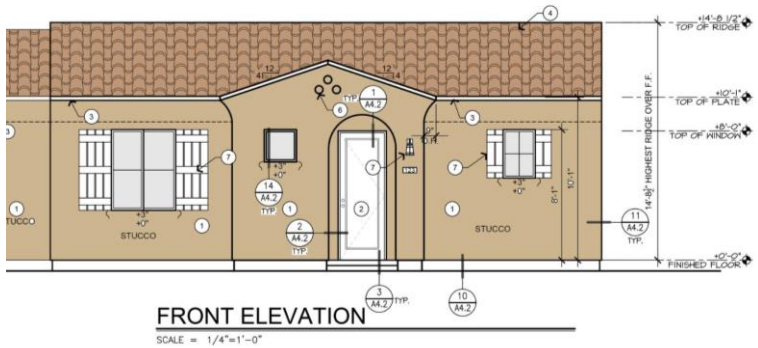
Bungalows on Cerrillos

Conditions of Approval - Applicant Clarifications, Objections

Except for items clarified below, applicant accepts, has addressed, or will address the conditions of approval summarized by staff.

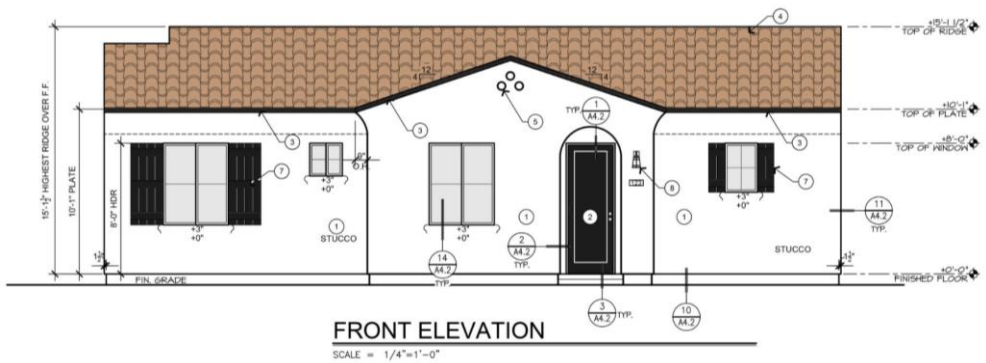


- **Land Use (page 10 of 36 in staff report):** Staff recommendation to restrict with lease the 36 garage spaces as for parking only. *At 300 parking spaces provided, the applicant is providing 53 spaces above and beyond the SFCC required parking calculation of 247 spaces. Without the garages, the site still has 17 spaces of excess parking beyond the code requirement. The applicant respectfully request that the Planning Commission recognize the project meets the parking requirements of SFCC without this condition.*



- MPO
  - **Condition 14:** *The applicant respectfully requests the asphalt trail be maintained at an 8' width as has been typical for projects in Santa Fe.*
  - **Condition 17:** *The applicant notes the road and traffic design is by Professional Engineers and approved by the NMDOT and the City of Santa Fe Traffic Division. The NMDOT has jurisdiction over this road Right Of Way and has determined the current design including the existing free rights is the approved design.*
  - **Conditions 16, 18, 20:** These items are within the NMDOT purview, applicant will comply to the extent the NMDOT will approve/allow these conditions.
  - **Condition 19:** Please correct this condition to *one North bound bus* stop per Santa Fe Trails request. The applicant is working directly with Thomas Martinez/Santa Fe Trails to provide this bus stop South of the new Roundabout as requested. The location and approval of this bus stop is also subject to the NMDOT approval.

- Architecture
  - **Condition 4:** Land Use (page 20 of 36): The applicant's architect has achieved the required 205 architectural points with the current design and notes pitched roofs are an accepted design element within Santa Fe Style. Although applicant does not wish to change to flat roofs for this project, it is willing to consider additional modifications to reinforce a Santa Fe style design.



Bungalows on Cerrillos

Slope Variance - Background

The Bungalows on Cerrillos project, has had a considerable amount of man-made slope disturbances over the years. Most slopes greater than 30% are man-made. However, a small area of approximately 4,765 square feet contains natural slopes of 30% or greater. *The applicant is requesting approval to allow 4,765 square feet of natural slope greater than 30% area to be graded.*

The annexation agreement between the Beavers Motors LLC and the City of Santa Fe dated February 12, 2014, allowed for a variance to Santa Fe City Code around slope. Specifically, the agreement stated:

"A variance has been approved to Section 14-8.2(B) (3) Terrain Management Regulations allowing the disturbance of slopes thar 30 percent or greater consisting of 5,020 square feet. A variance is appropriate and has no adverse effects on neighboring properties."

Although this approved variance was project specific and has expired, the City of Santa Fe staff supported, and the governing body approved the variance request at that time.

Bungalows on Cerrillos

30% Slope, Variance Criteria

1) **Physical Characteristic:** The area is anomaly created by the change in the arroyo course. It is not part of a large, steep or high slope usually associated with thirty-percent slopes. This condition is unique to this property.

2) **Infeasibility:** This already limited property cannot be feasibly developed at single grade without the variance.

3) **Intensity Unaffected:** The property is C-2 and the intensity of allowable development is unaffected by the grant of the variance.

4) **Minimum Necessary:** A disturbance of .006% of the site containing the naturally occurring slopes of the 30% is a minimal disturbance and is the minimum variance that will make the reasonable use of the northern portion of the site for the detached, one- and two-story multifamily structures.

5) **Not Contrary to Public Interest:** Further, preserving the slopes will not protect sensitive wildlife habitat or degrade and enhance the natural aesthetics associated with arroyos. The removal of this remnant bank is not counter to these goals; there is no storm erosion created or water channel adversely affected, as the channel is no longer in this location, and this patch of 30 slope neither constitutes wildlife habitat nor possesses any aesthetic quality. In short, variance is not contrary to the public interest.

Variance – Set Back, Case# 2023-7662

Planning Commission Hearing
May 16, 2024 6:00 pm

Bungalows on Cerrillos

Setback Variance - Background

The Bungalows on Cerrillos project is in the Cerrillos Road Highway Corridor Protection District - Zone 4 which requires a 45 feet set back. *The applicant is requesting approval of a 34-foot set back.*

The annexation agreement between the Beavers Motors LLC and the City of Santa Fe dated February 12, 2014, approved a variance allowing the set back to be 25 feet. Specifically, the agreement stated:

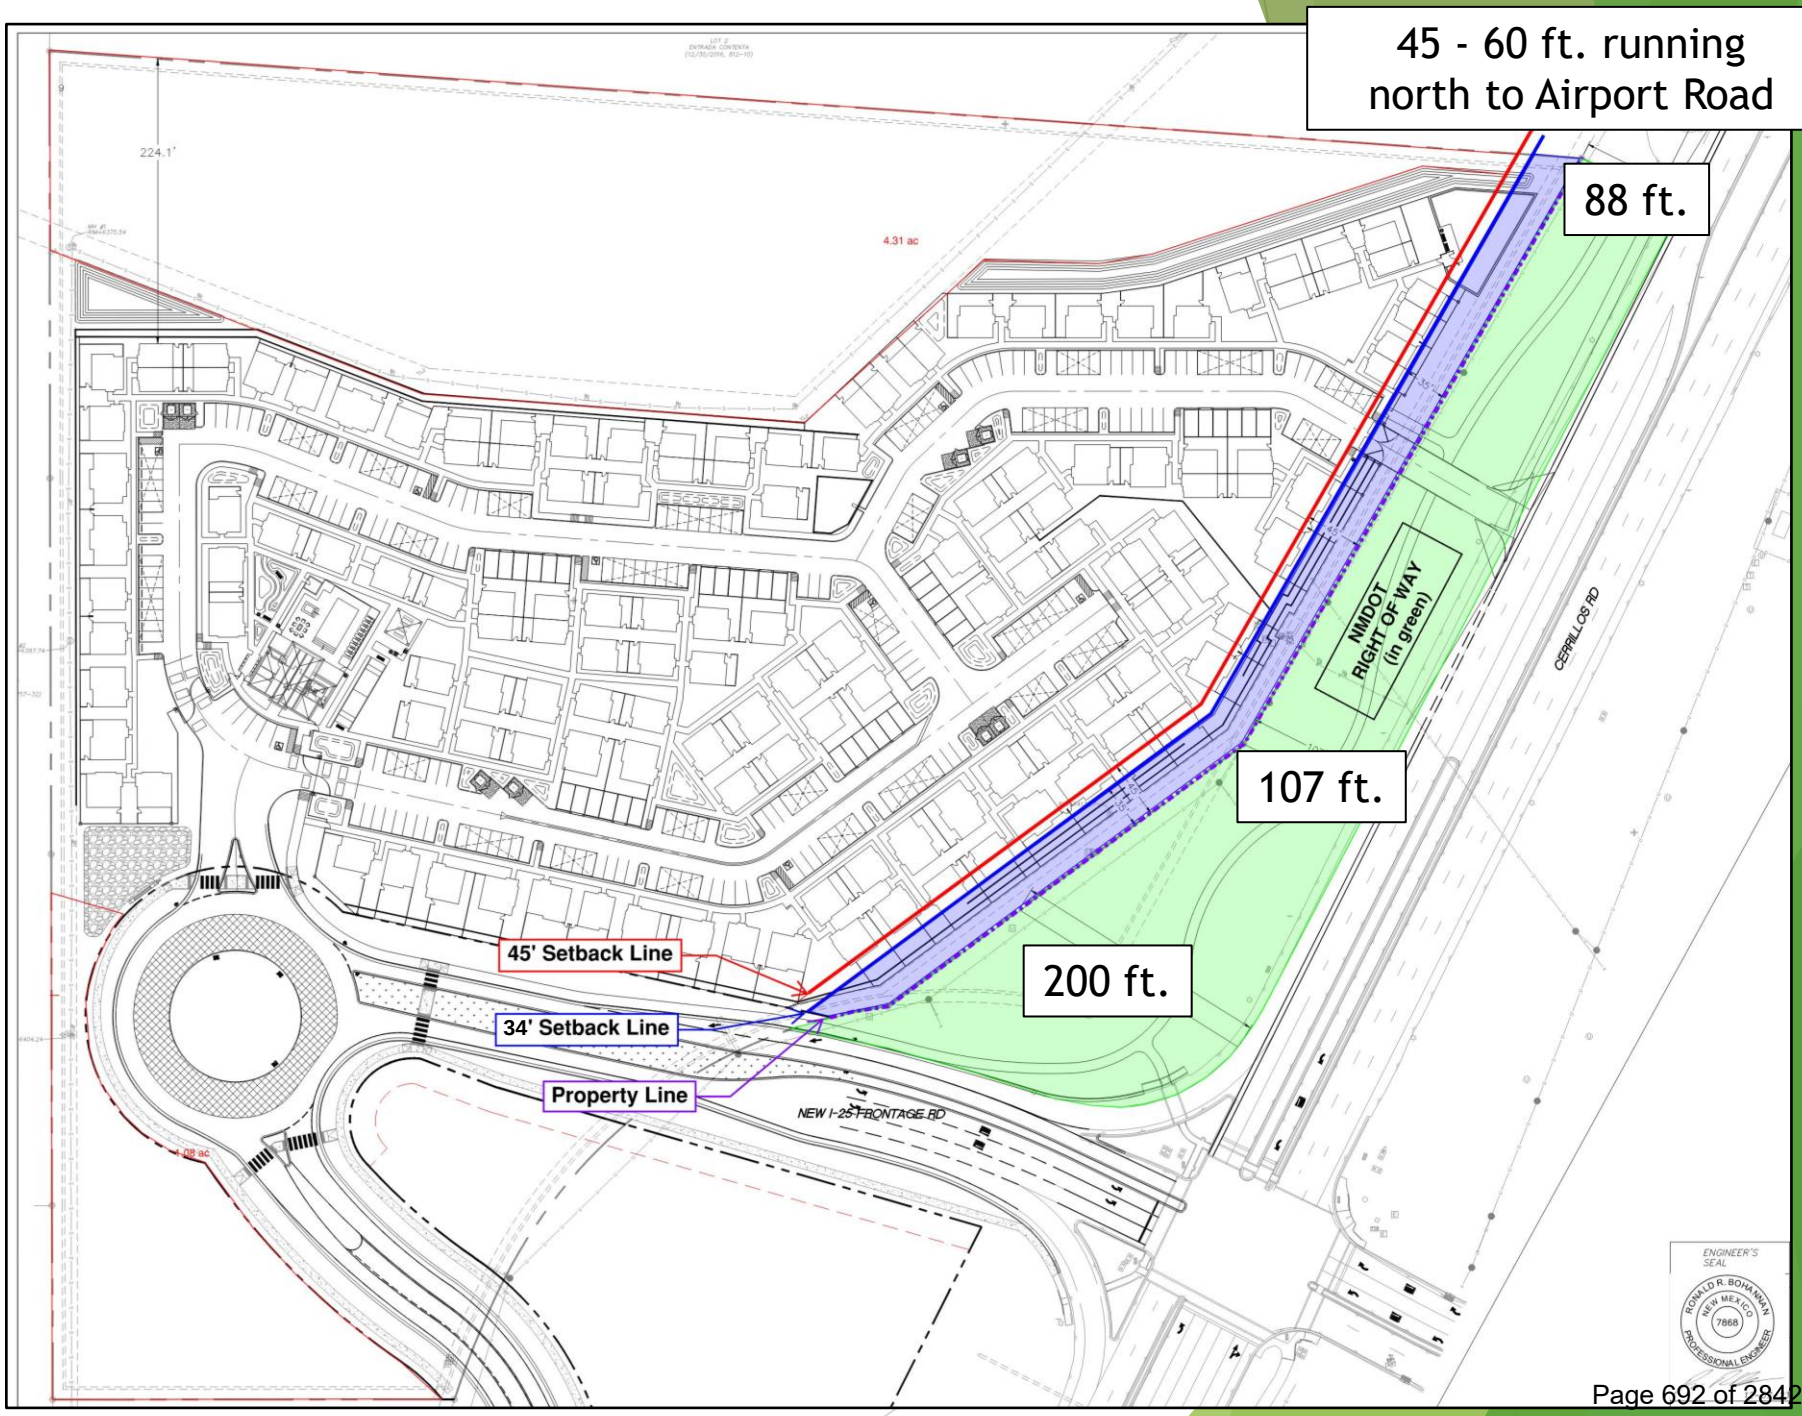
"A variance has been approved to Section 14-5-5(B)(3)(a) Cerrillos Road Highway Corridor Standards allowing the building setback from the Cerrillos Road right-of-way from 40 feet to 25 feet."

Although this variance has expired, the City of Santa Fe staff supported, and the governing body approved the variance request at that time.

This site is unique in that the surplus Cerrillos corridor ROW is a much larger at 88 to 200 feet (measured from the Cerrillos Road curb to property line).

Bungalows on Cerrillos

Portion of
Cerrillos Road Highway Corridor
(CRHC) - Zone 4



Herrera Drive to Airport Road - surplus Right of Way range: 45 - 60 ft.

Herrera Drive to W I-25 Frontage Road - surplus Right of Way ranges: 58 - 200 ft.

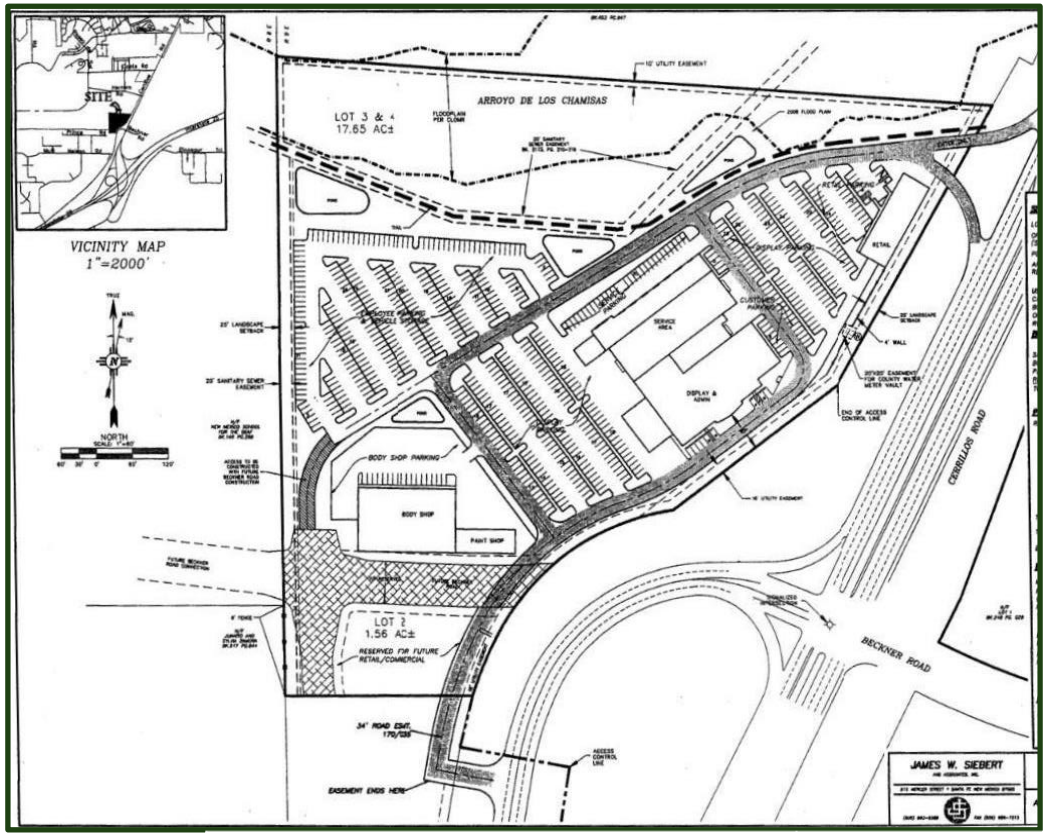
Bungalows on Cerrillos

Site Plan w/set back lines

Bungalows on Cerrillos

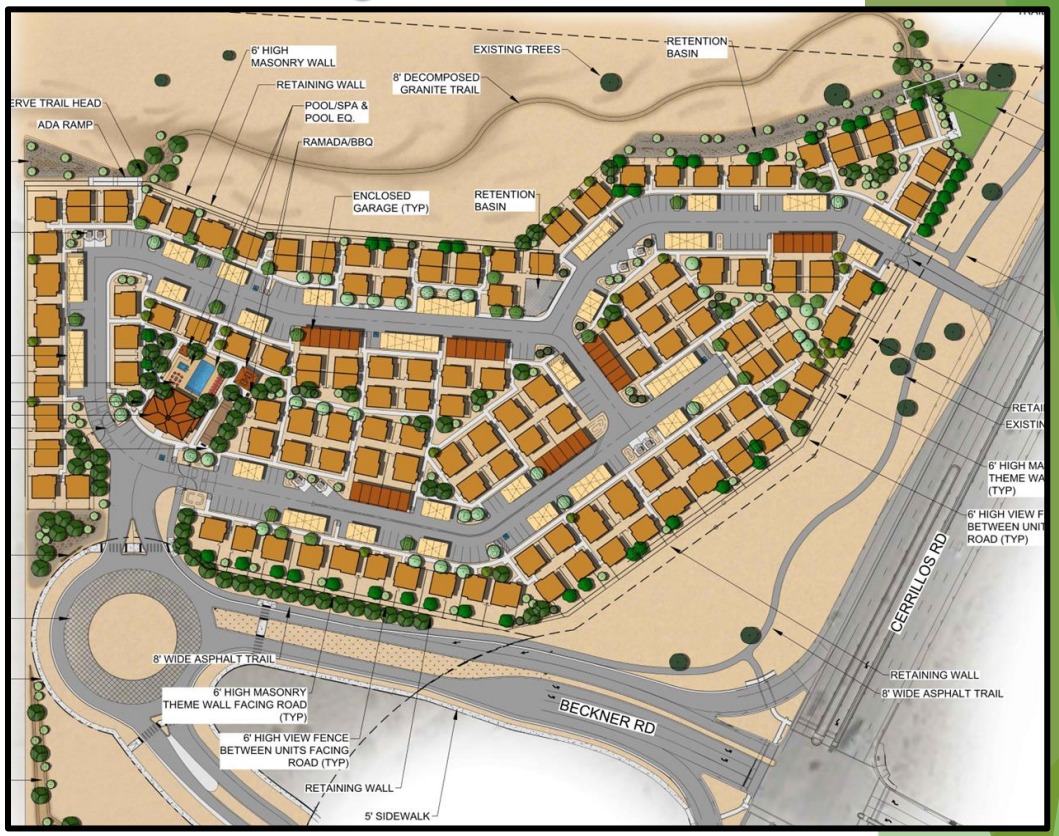
Setback, Variance Criteria

1) **Physical Characteristic:** The property is subject to the unusually large Right of Way setback as compared to the average corridor set back due to the condemnation by the State of New Mexico for Cerrillos Road.



2) **Infeasibility:** The set-back here at 45 feet would reduce the feasibility of the design by necessarily reducing the number badly needed units by 16 and result in a significant reduction in density caused by a redesign.

3) **Intensity Unaffected:** The property is C-2, and the intensity of allowable development is unaffected by the grant of the variance.



4) **Minimum Necessary:** The 34 feet vs. 45 feet is a minimum variation, particularly given the much greater distance to the actual edge of the roadway and shoulder.

5) **Not Contrary to Public Interest:** The impact will be imperceptible from the roadway, and no neighbors are affected. The goals of the corridor are still maintained.

Proposed Findings of Fact and Conclusions of Law for variances:

1. Set Back Variance:
    a. Findings of Fact:
        i. The western boundary line of the property is located unusual large distance from the edge of Cerrillos Road curb ranging from 88 feet to 220 feet.
        ii. This physical characteristic distinguishes the land from others in the vicinity that are subject to the same relevant provisions of Chapter 14.
        iii. Las Soleras, as an example, measures 50 feet from the outer-most driving lane to the property line. Entrada Contenta measures 40-50 feet from the outer-most driving lane to the property line.
        iv. In addition, approximately one-third of the property is burdened by a flood plain, greatly reducing the feasibility of developing the property for the multifamily purpose.
        v. The property is C-2 and the intensity of allowable development is unaffected by the grant of the variance.
        vi. A reduction of 20 feet in the required set back is the minimum necessary to will allow for the reasonable use of the property, and will be in keeping with the intention of the corridor setback, because a substantial distance from the driving lanes of Cerrillos Road (when compared to other developments along Cerrillos Road).
        vii. The multifamily homes will be no more than two stories and will setback from the travel lanes of Cerrillos Road equal to and for most cases greater than the distance of other buildings along Cerrillos Road that comply with the 40 foot building setback. The appearance of the buildings along the Cerrillos Road frontage will have the same visual perception as other buildings along Cerrillos Road with a 40 foot building setback.
    b. Conclusions of Law:
        i. An unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14;
        ii. The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.
        iii. The intensity of development will not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.
        iv. The variance is the minimum variance that will make possible the reasonable use of the land or structure
        v. The variance is not contrary the public interest.
2. Slope Variance:
    a. Findings of Fact:
        i. The steep sloped area is a remnant the original bank of the Arroyo de los Chamisos prior to the construction of the Cerrillos Road improvements and the installation of the bridge carrying storm waters under Cerrillos Road.

ii. When that bridge was constructed, the Arroyo de los Chamisos was realigned so that no storm waters flow up to or close to this remnant bank. For the most part, the redirected channel now lies to the north of the site.
iii. The original bank remained south the new channel for the Arroyo del los Chamisos, creating a small island of 30 percent slopes.
iv. No other property in this zone has this unique characteristic.
v. The inability to grade the remnant of a portion of the old bank of the Arroyo de los Chamisos will render it infeasible to develop a substantial portion of the property because of the grade that will occur north of the remnant bank.
vi. The C-2 zoning requirements are performance based, and the proposed development of multifamily is well below what would be allowed on this property using taller, more traditional multifamily units -- the allowed height being 45 feet.
vii. A disturbance of .005% of the site containing the naturally occurring slopes of the 30% is a minimal disturbance.
viii. The variance will not:
    1. Increase the threat of flooding and the hazard of improper cuts and fills, or increased erosion and sedimentation;
    2. Result in the destruction of the sensitive landscape;
    3. Harm the scenic character of Santa Fe from the visual blight of indiscriminate cuts and fills and vegetation removal resulting from extensive grading and utility scars;
    4. Accelerate stormwater runoff on natural drainage ways and all structures due to increased development and impervious surfaces; or
    5. Degrade arroyo channels.
ix. Along an arroyo, the purpose preserving 30% slopes (i.e., to prevent erosion of arroyo banks, prevent unnatural redirection of arroyo channels and storm water) is not accomplished by preserving a geographic feature that has no relevance to current conditions.
x. Further, preserving the slopes will not protect sensitive wildlife habitat or degrade and enhance the natural aesthetics associated with arroyos.

b. Conclusions of Law
i. An unusual physical characteristics exist that distinguish the land or structure from others in the vicinity that are subject to the same relevant provisions of Chapter 14;
ii. The special circumstances make it infeasible, for reasons other than financial cost, to develop the property in compliance with the standards of Chapter 14.
iii. The intensity of development will not exceed that which is allowed on other properties in the vicinity that are subject to the same relevant provisions of Chapter 14.
iv. The variance is the minimum variance that will make possible the reasonable use of the land or structure
v. The variance is not contrary the public interest.

Case Information Page 1

Appellant: Advanced Acquisitions, LLC
Agent: Brian Nenninger, Orion-West, LLC.
Case Name: Appeal Case #2024-8996
Project Address: 27794 W I-25 Frontage Road
Enforcement Action Appealed: Denial of Slope Variance Case #2023-7663

Witness List for Testimony: Appeal Case 2024-8996 Page 2 - 3

Witness List for Testimony: Appeal Case 2024-8996

Witness Name: Karl Sommer
Role: Land Use Attorney, Partner at Sommer Karnes & Associates
Basis of Testimony: Karl Sommer is a land use attorney representing the applicant, with extensive experience in Santa Fe land use law and regulatory processes.
Summary of Testimony: Mr. Sommer will testify on how the variance meets the criteria outlined in Section 14-3.16(C) of the Santa Fe City Code. He will emphasize that the Planning Commission's denial undermines the purpose of the variance process, as it implies that no variance would ever be granted due to the possibility of alternative developments.

Witness Name: Brian Nenninger
Role: Project Planner, President/Owner of Orion-West
Basis of Testimony: Brian Nenninger is the owner's agent with in-depth knowledge of the Bungalows on Cerrillos development plans and regulatory compliance requirements.
Summary of Testimony: Mr. Nenninger will testify on the planning considerations impacted by the denial of the slope variance, focusing on how the unique site constraints affect the project layout and reduce the developable area. His testimony will discuss the necessity of the variance to maintain the project's functionality and viability.

Witness Name: Ron Bohannan, PE
Role: Project Engineer, President/Owner of Tierra West
Basis of Testimony: Ron Bohannan is a professional engineer with expertise in the project and historical knowledge of the original construction of Cerrillos Road.
Summary of Testimony: Mr. Bohannan will testify regarding the challenges posed by the denial of the slope variance. He will explain the site's unique physical constraints, regarding the isolated 30% slope, which is a remnant bank of the Arroyo de los Chamisos. Mr. Bohannan will emphasize that preserving these slopes does not align with the intent of terrain management regulations. As the area surrounding the remnant bank was graded during the construction of Cerrillos Road, the slopes no longer serve their intended environmental or erosion-control purposes. Additionally, previous modifications to the area have rendered these slopes functionally obsolete. He will testify that grading these slopes is essential to achieving a practical and uniform grade for the site, which is critical for effective terrain management. Additionally, he will highlight that the variance is vital for site development and aligns with both the public interest and the purpose of terrain management standards.

Witness Name: Jeremy Hall
Role: Owner/Developer, Advanced Acquisition's LLC
Basis of Testimony: Jeremy Hall is the owner and developer of the Bungalows on Cerrillos project, representing Advanced Acquisition's LLC. He has extensive experience in multifamily development.
Summary of Testimony: Mr. Hall will testify about the high-quality standards of the Bungalows on Cerrillos development and the significant challenges posed by the NMDOT-mandated right-of-way (ROW) requirements. He will explain how the project has been designed to prioritize community value through thoughtful design and construction. However, the ROW dedication imposes a substantial burden, requiring valuable land and incurring significant expenses for improvements, all without compensation from NMDOT. This creates a unique circumstance that directly impacts the viability of the project. Mr. Hall will emphasize that the requested variances are essential to offset the losses, allowing the development to achieve the necessary unit count to ensure feasibility while maintaining the high-quality standards and community benefits central to the project.

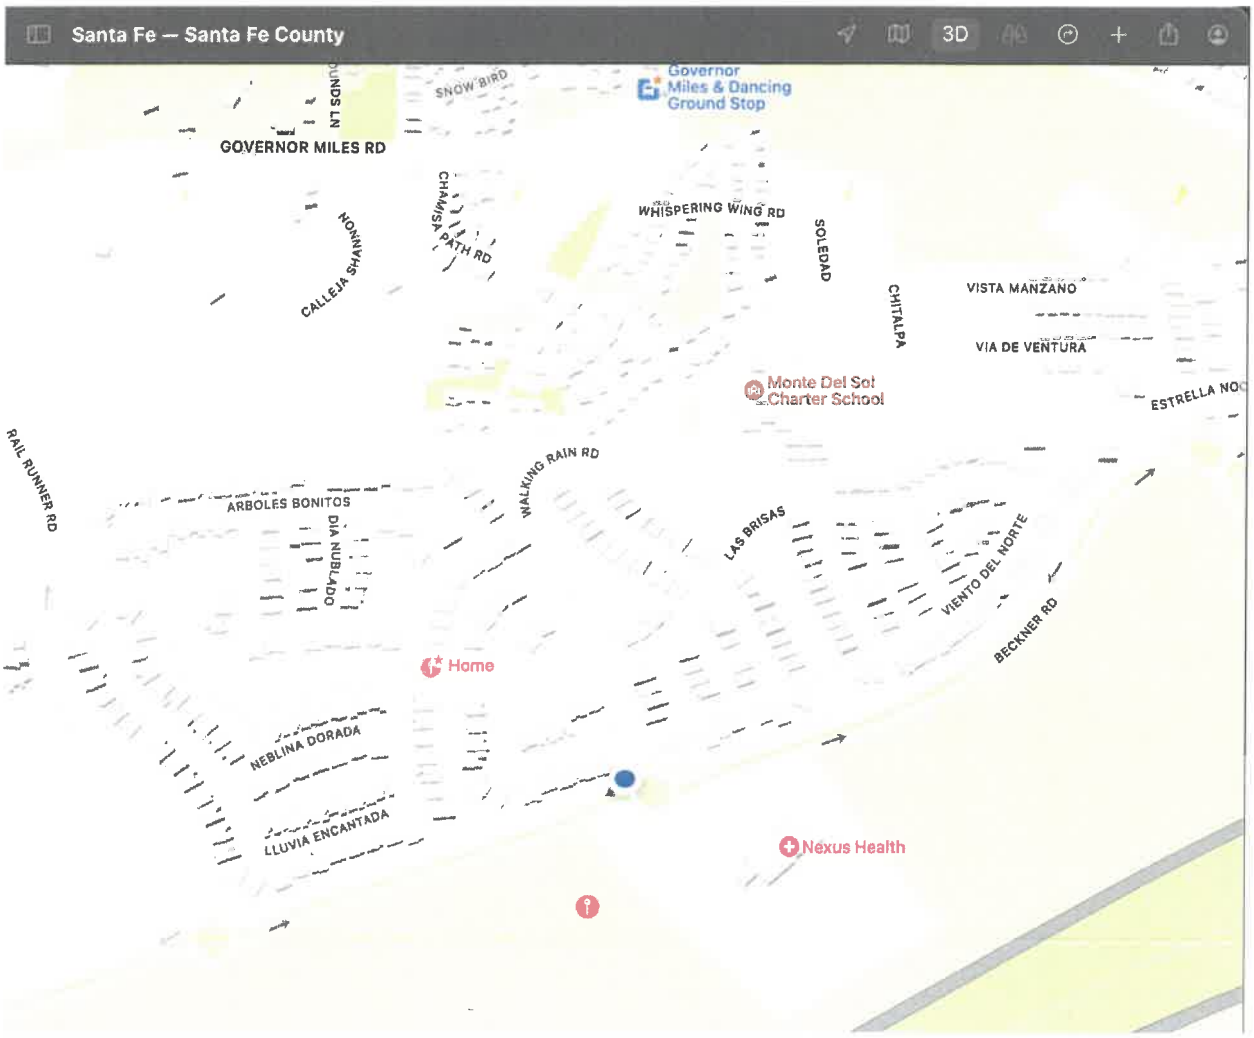
Case Information Page 1

Appellant: Advanced Acquisitions, LLC
Agent: Brian Nenninger, Orion-West, LLC.
Case Name: Appeal Case #2024-8995
Project Address: 27794 W I-25 Frontage Road
Enforcement Action Appealed: Denial of Setback Variance Case #2023-7662

Witness List for Testimony: Appeal Case 2024-8995 Page 2 - 3

Witness List for Testimony: Appeal Case 2024-8995

Witness Name: Karl Sommer
Role: Land Use Attorney, Partner at Sommer Karnes & Associates
Basis of Testimony: Karl Sommer is a land use attorney representing the applicant, with extensive experience in Santa Fe land use law and regulatory processes.
Summary of Testimony: Mr. Sommer will testify on the justification for the setback variance fulfill the criteria for variance under Section 14-3.16(C) of the Santa Fe City Code. He will emphasize that the Planning Commission's denial undermines the purpose of the variance process, as it implies that no variance would ever be granted due to the possibility of alternative developments. Mr. Sommer will argue that the setback variance is essential to achieve the project's development and that the variance aligns with the intent of the Cerrillos Road Highway Corridor Protection District's objectives.



Witness Name: Brian Nenninger
Role: Project Planner, President/Owner of Orion-West
Basis of Testimony: Brian Nenninger is the owner's agent with in-depth knowledge of the Bungalows on Cerrillos development plans and regulatory compliance requirements.
Summary of Testimony: Mr. Nenninger will testify on the planning considerations impacted by the denial of the setback variance, focusing on how the unique site constraints affect the project layout and reduce the developable area. His testimony will explain the project and highlight the necessity of the setback variance to maintain the project's functionality and viability within the Cerrillos Road Highway Corridor Protection District. He will explain how the variance request aligns with the corridor's intent by ensuring adequate separation from Cerrillos Road while enabling efficient use of the limited developable space to contribute to the local housing supply. The variance allows the project to offset these constraints and achieve the necessary unit count to maintain its viability.

Witness Name: Ron Bohannan, PE
Role: Project Engineer, President/Owner of Tierra West
Basis of Testimony: Ron Bohannan is a professional engineer with expertise in the project and historical knowledge of the original construction of Cerrillos Road.
Summary of Testimony: Mr. Bohannan will testify on the findings of the traffic impact analysis for the project, focusing on how NMDOT-mandated road improvements and the dedicated right-of-way benefit the city and surrounding communities while significantly constraining the site's developable area. He will emphasize how improvements enhance public safety and transportation efficiency, but create significant constraints with the owners developable land.

Witness Name: Jeremy Hall
Role: Owner/Developer, Advanced Acquisition's LLC
Basis of Testimony: Jeremy Hall is the owner and developer of the Bungalows on Cerrillos project, representing Advanced Acquisition's LLC. He has extensive experience in multifamily development.
Summary of Testimony: Mr. Hall will testify about the high-quality standards of the Bungalows on Cerrillos development and the significant challenges posed by the NMDOT-mandated right-of-way (ROW) requirements. He will explain how the project has been designed to prioritize community value through thoughtful design and construction. However, the ROW dedication imposes a substantial burden, requiring valuable land and incurring significant expenses for improvements, all without compensation from NMDOT. This creates a unique circumstance that directly impacts the viability of the project. Mr. Hall will emphasize that the requested setback variance is essential to offset the losses, allowing the development to achieve the necessary unit count to ensure feasibility while maintaining the high-quality standards and community benefits central to the project.

Packet Contents:

1. "Neighborhood Alert" card - hand delivered to homeowners of Estancias de Las Soleras, a quiet and peaceful subdivision with 302 single-family homes (north of Beckner Road between Rail Runner Road on the West and Calle de Alegria on the East).
2. Petition with 107 signatures — nearly 100% of the homeowners and over 30% of the 302 homes, which were canvassed on the perimeter of Beckner Road and Rail Runner Road
3. Signed statement of concerns from the Home Owner Association Board regarding Amendments and Resolutions to the Las Soleras subdivision Master plan and General Plan and Rezoning Bills.
4. "NOTICE OF GOVERNING BODY PUBLIC HEARING" - January 9, 2024 at 7:30 PM

NEIGHBORHOOD ALERT: Are you concerned about rezoning along Beckner Road?

Where:

- ALL Parcels along the south side of Beckner from Walking Rain west to Las Soleras Drive.

What:

- Parcels will be rezoned to C-2 General Commercial, which will allow almost *any type* of business activity, such as bars, liquor stores, gas stations, large apartment complexes, motels/hotels, and other establishments that operate 24-hours or late into the night.
- The zoning change moves away from the mixed uses originally allowed such as medical office and small retail and provides guard rails against 24-hour operations or other less desirable business activities.
- Beckner Road will be *expanded to four lanes* from Rail Runner Road east to Richards, inviting increased street racing, and noise and light pollution.

When:

- The Planning Commission has already approved the zoning change and the City Council Governing Body will take this matter up in the very near future.

What can you do?:

- For questions and information, contact us at – LasSolerasPetition@gmail.com
- Sign our petition. We'll come to you! Send us an email with your house address.
- Contact your District 4 City council members:
  - Jamie Cassutt, jcassutt@santafenm.gov
  - Amanda Chavez, acchavez@santafenm.gov
- **Tell City Council we oppose a zoning change that significantly departs from the original stated use of this neighboring property and the widening of Beckner.**

This petition effort has been organized by concerned neighbors in the Estancias de Las Soleras neighborhood.

PETITION Against Estancias de Las Soleras Rezoning

The undersigned, who represent concerned residents of the Estancias de Las Soleras subdivision, oppose the widening of Beckner and rezoning of parcels of land along the south side of Beckner Road from Rail Runner to Walking Rain.

1.) We are concerned about the haphazard notification process and incorrect meeting Agenda information provided for the September 5, 2024, Planning Commission meeting. This prevented some residents from joining and providing live comment during the decision-making process.

2.) The proposed rezoning to C-2 General Commercial would allow almost any type of business activity, including gas stations, bars, big box stores, apartment complexes, and motels/hotels. We do not want business activities across the street from our neighborhood that involve alcohol sales and consumption and 24-hour, 7-day per week operations. These types of business draw increased crime potential and create noise and light pollution.

3.) We strongly oppose the expansion of Beckner Road from two lanes to four lanes. We already have serious problems with traffic speeding and illegal street racing. Police response is slow to non-existent and expanding Beckner will only make matters worse.

PETITION Against Estancias de Las Soleras Rezoning

The undersigned, who represent concerned residents of the Estancias de Las Soleras subdivision, oppose the widening of Beckner and rezoning of parcels of land along the south side of Beckner Road from Rail Runner to Walking Rain.

1.) We are concerned about the haphazard notification process and incorrect meeting Agenda information provided for the September 5, 2024, Planning Commission meeting. This prevented some residents from joining and providing live comment during the decision-making process.

2.) The proposed rezoning to C-2 General Commercial would allow almost any type of business activity, including gas stations, bars, big box stores, apartment complexes, and motels/hotels. We do not want business activities across the street from our neighborhood that involve alcohol sales and consumption and 24-hour, 7-day per week operations. These types of business draw increased crime potential and create noise and light pollution.

3.) We strongly oppose the expansion of Beckner Road from two lanes to four lanes. We already have serious problems with traffic speeding and illegal street racing. Police response is slow to non-existent and expanding Beckner will only make matters worse.

The Estancias de las Soleras Community Association would like to express its concerns regarding the possible re-zoning of properties along Beckner Road, being those tracts south of Beckner, east of Las Soleras and west of Walking Rain. The proposed amendments to the Las Soleras Master Plan and associated re-zoning represent conceptual ideas at this point and developers provide very little specificity as to the business activities that will be brought into this development. The developers said, "trust us" and that they wanted to bring in "desirable businesses" like a Kaune's-style grocery, but this could just as easily turn out to be a 24-hour convenience store with a gas station. The developers mentioned the possibility of restaurants like Rustica or The Ranch House, but this could be an establishment that serves alcohol and operates late into the night or a 24-hour Denny's-type establishment sitting next to a motel or hotel. The developers mentioned hotel(s) but gave no indication of which lots would be impacted, their size, design, or height. What they really failed to mention is that a C-2 zoning could allow most any kind of business - gas stations, auto repair shops, bars, liquor stores, hotels, you-name-it.

The developers also expressed a desire to build workforce housing and hundreds of units of affordable housing. There is no guidance provided which would indicate their design or height level. While Santa Fe certainly needs this type of housing, the area between Cerillos and Las Soleras is already being saturated with new, mega-size apartment complexes.

They have also expressed a desire to expand Beckner Road to four lanes east of Rail Runner, extending to Richards. The original zoning allowed for offices and some mixed-use space; residents in this community used that information when they made their decision to buy homes here. We didn't expect and didn't desire willy-nilly development along Beckner, nor a four-lane road akin to Cerillos next to our backyards. We believe a Mixed Use (MU) zoning, as indicated on the original Master Plan, is adequate to bring in the "desirable businesses" the developers envision while providing the adjacent neighborhoods with some guard rails as to the type of development and hours of operation.

Finally, we are very concerned with the haphazard notification process. To the best of our knowledge, our HOA did not receive notification of the ENN meeting in November 2023 and the recent Planning Commission meeting (September 5, 2024). Many residents in our community did not receive notification of the September 5 meeting, even though they live well within the 300-foot zone from the subject project. Additionally, the Zoom link originally provided in the agenda did not work and required a refresh of the agenda to obtain a proper link. A City neighborhood notification sign only appeared west of Rail Runner but not immediately across from the subdivision, nor in the direction many residents routinely travel, and not in a convenient location that could easily be read without parking and walking a good distance.

We therefore oppose a zoning change that significantly departs from the original stated use of this neighboring property and the widening of Beckner Road, which already carries speeding drivers (above 45 MPH) and drag racers. The City's resources are stretched thin and are not adequate to enforce the law in this area – we expect a significant rise in crime in our neighborhood should this zoning change be approved.

NOTICE OF GOVERNING BODY PUBLIC HEARING

Notice is hereby given that the Planning Commission of the City of Santa Fe will hold a public hearing at the City Council Chambers, 200 Lincoln Avenue (City Hall) on January 9, 2025 **at 7:30 PM,** to consider the following request:

Orion-West, LLC, Agent for Applicant Beckner Road Partnerships, LLC, requests that the Governing Body of the City of Santa Fe, New Mexico, grant approval of the following project consisting of seven (7) cases for land located on Las Soleras Drive between Beckner Road and I-25, within the Las Soleras Master Plan Area:

Turn page for case information

Questions may be directed to the City of Santa Fe Current Planning Division staff at gagurule@santafenm.gov. Any and all interested parties are invited to attend the public hearing and will be heard prior to the Planning Commission taking action. Members of the Public may join and participate in the meeting in person or online by Zoom.

Members of the Public may join and participate in the meeting in person or online by Zoom: To access the Zoom link please find it on the HTML Agenda posted at https://santafenm.portal.civicclerk.com/

Viewing: Members of the public may stream the meeting live on the City of Santa Fe's YouTube channel at https://www.youtube.com/user/cityofsantafe . The YouTube live stream can be accessed at this address from most smartphones, tablets, or computers.

Members of the public may submit public comments, including attachments by 5 p.m. on the Monday before the meeting via the virtual comment "button" at https://santafenm.portal.civicclerk.com/. Comments and attachments will then be published after this deadline.

*Persons with disabilities in need of special accommodations or the hearing impaired needing an interpreter please contact the Land Use Department gagurule@santafenm.gov 5 days prior to the hearing date.

Case #2024-7899. Las Soleras Master Plan Amendment changing land use designations for Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) to from 90 feet to 45 feet, subject to the Master Plan conditions listed in Section III, Table 1 "Master Plan Conditions" and Master Plan Technical Corrections listed in attachment "A".
Case #2024-7898. General Plan Amendment for Las Soleras Tracts 21, 23, 24, and 26 from Commercial Office Use to Community Commercial.
Case #2024-7900. Rezoning for Las Soleras Tracts 21, 23, 24 and 26 from C-1 (General Office) to C-2 (General Commercial).
Case #2024-8852. General Plan Amendment for Las Soleras Tract 19, from Transitional Mixed Use to Community Commercial.
Case #2024-8853. Rezoning for Las Soleras Tract 19, from MU (Mixed Use) to C-2 (General Commercial).
Case #2024-8854. General Plan Amendment for Las Soleras Tract 20, from Commercial Business Use to Community Commercial.
Case #2024-8855. Rezoning for Las Soleras Tract 20, from BIP (Business Industrial Park) to C-2 (General Commercial).

CONSIDERATION OF A RESOLUTION. **Master Plan Amendment.** Case #2024-7899. A Resolution to amend the Las Soleras Master Plan land use designations on Tracts 19, 20, 21, 23, 24 and 26, to be consistent with the proposed rezonings from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and to reduce the width of the Utility, Access, and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet. 1. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-7898. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use Map designation for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres, from Commercial Office Use to Community Commercial.

2. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8852. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from Transitional Mixed Use to Community Commercial.

3. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2024-8854. Orion-West LLC, agent for Applicant, Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use designation for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop from Commercial Business Use to Community Commercial.

4. CONSIDERATION OF A RESOLUTION

Master Plan Amendment. Case #2024-7899. Orion-West LLC, Agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt a Resolution to amend the Las Soleras Master Plan land use designations on Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to a uniform classification of C-2 (General Commercial), and to reduce the width of the Utility and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet on the south side of Beckner Road.

5. CONSIDERATION OF BILL NO. 2025-1
   Rezoning. Case #2024-7900. Orion-West LLC, Agent for Applicant, Beckner Road Partnership, asks the Governing Body to adopt Bill 2025-01 to rezone Las Soleras Tracts 21 and 26, +/- 8.18 acres, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) to C-2 (General Commercial).

6. CONSIDERATION OF BILL NO. 2025-2
   Rezoning. Case #2024-8853. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, ask the Governing Body to adopt Bill 2025-2 to rezone Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout, from MU (Mixed Use) to C-2 (General Commercial).

7. CONSIDERATION OF BILL NO. 2025-3
   Rezoning. Case #2024-8855. Orion-West LLC, agent for Applicant Beckner Road Partnership, LLC, asks the Governing Body to adopt Bill 2025-3 to rezone Las Soleras Tract 20, +/-10.70 acres located southwest of the Walking Rain Road / Beckner Road roundabout, from BIP (Business Industrial Park) to C-2 (General Commercial).

I. Planning Commission Recommendations:

On September 5, 2024, the Planning Commission ("Commission") recommended the Governing Body take the following actions:

1. **APPROVE** Case #2024-7899. Las Soleras Master Plan Amendment, changing land use designations for Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26, from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) from 90 feet to 45 feet, subject to the Master Plan conditions listed in Section III, Table 1 "Master Plan Conditions" and Master Plan Technical Corrections listed in attachment "A".
2. **APPROVE** Case #2024-7898. General Plan Amendment for Las Soleras Tracts 21, 23, 24, and 26 from Commercial Office Use to Community Commercial.
3. **APPROVE** Case #2024-7900. Rezoning for Las Soleras Tracts 21, 23, 24 and 26 from C-1 (General Office) to C-2 (General Commercial).
4. **APPROVE** Case #2024-8852**.** General Plan Amendment for Las Soleras Tract 19, from Transitional Mixed Use to Community Commercial.

5. **APPROVE** Case #2024-8853. Rezoning for Las Soleras Tract 19, from MU (Mixed Use) to C-2 (General Commercial).
6. **APPROVE** Case #2024-8854. General Plan Amendment for Las Soleras Tract 20, from Commercial Business Use to Community Commercial.
7. **APPROVE** Case #2024-8855. Rezoning for Las Soleras Tract 20, from BIP (Business Industrial Park) to C-2 (General Commercial).

II. Sample Motions:

Seven (7) motions will be required. Land Use recommends the motions in the following order:

1. **Move to approve or deny** Case #2024-7898, adopting a resolution amending the General Plan Future Land Use Map designation from Commercial Office Use to Community Commercial, for Las Soleras Tracts 21 and 26, +/- 8.18 acres, and for Tracts 23 and 24, +/- 13.45 acres.

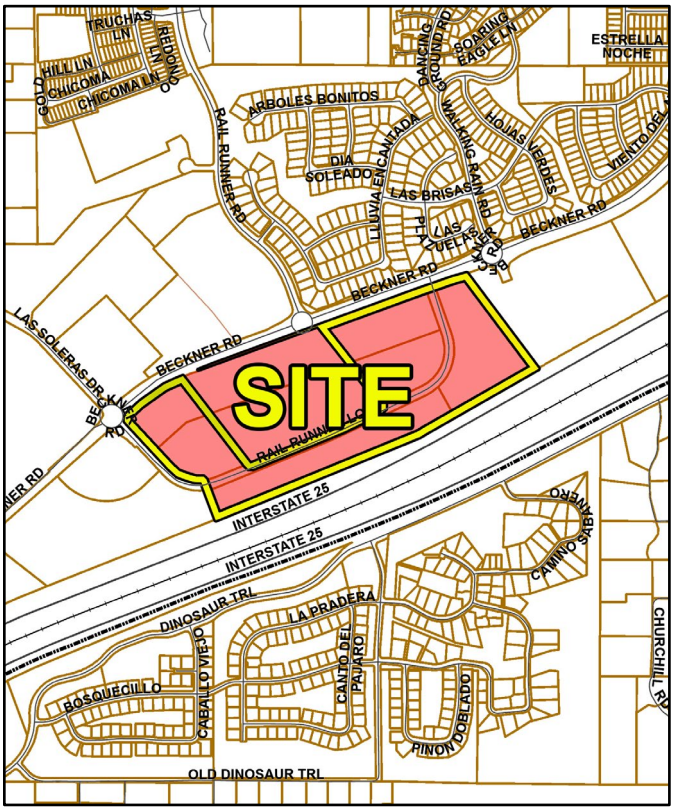
2. **Move to approve or deny** Case #2024-8852**,** adopting a resolution amending the General Plan Future Land Use designation from Transitional Mixed Use to Community Commercial, for Las Soleras Tract 19, +/- 9.11 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

3. **Move to approve or deny** Case #2024-8854, adopting a resolution amending the General Plan Future Land Use designation from Commercial Business Use to Community Commercial, for Las Soleras Tract 20, +/-10.70 acres, located south of the Rail Runner Loop.

4. **Move to approve or deny** Case #2024-7899, adopting a resolution amending the Las Soleras Master Plan land use designations for Tracts 19, 20, 21, 23, 24 and 26 from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the Utility, Access, and Trail Corridor (La Rambla Trail) to from 90 feet to 45 feet, subject to conditions of approval and technical corrections.

5. **Move to approve or deny** Case #2024-7900, adopting Bill 2025-01, changing the official Zoning Map designation from C-1 (General Office) to C-2 (General Commercial) for Las Soleras Tracts 21 and 26, +/- 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and Tracts 23 and 24, +/-13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout.

6. **Move to approve or deny** Case #2024-8853, adopting Bill 2025-02 changing the official Zoning Map designation from MU (Mixed Use) to C-2 (General Commercial), for Las Soleras Tract 19, +/-9.11 acres, located southwest of the Walking Rain Road/ Beckner Road roundabout.



7. **Move to approve or deny** Case #2024-8855. adopting Bill 2025-03 changing the official Zoning Map designation from BIP (Business Industrial Park) to C-2 (General Commercial) Las Soleras Tract 20, +/-10.70 acres, located southwest of the Walking Rain Road / Beckner Road roundabout.

III. Executive Summary

Beckner Road Partnership, LLC, Owner, (the "Applicant"), through its agent, Orion-West LLC, requests a master plan amendment ("Master Plan Amendment"), three (3) general plan amendments ("GP Amendments"), and three (3) Rezonings ("Rezonings") for Tracts 19, 20, 21, 23, 24, and 26 ("Tracts") within the Las Soleras Master Plan area (Master Plan) (see Figure 1) (together, the "Project"). The Applicant's goal is to amend the land use designations and zoning on the six (6) tracts from their current zoning designations of General Office (C-1), Mixed Use (MU) and Business Industrial Park (BIP) to Community Commercial (C-2). The Rezonings must be consistent with the Master Plan and General Plan.

On February 11, 2009, the Governing Body approved the Master Plan when it annexed the area, encompassing +/- 539 acres with a mix of uses including low, medium, and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The Master Plan included a walkable neighborhood supported by an anticipated Rail Runner transit stop, which has since been postponed indefinitely by the state. The mix of uses was intended to encourage a citywide balance of residential and nonresidential uses and to set those uses among extensive open spaces, parks and trail networks.

Since approval in 2009, the Governing Body amended the Master Plan four (4) times:

1. September 9, 2015, which realigned roads, reconfigured open space and trails, reduced park land and reconfigured certain tracts of land.
2. September 24, 2016, which established alternative height and setback standards for the R-6 and R-12 residentially zoned districts for Estancias de Las Soleras and Ross's Peak developments.
3. September 12, 2018, which changed the land use designation from "Transitional Mixed Use" to "High Density Residential" to reflect contemporaneous zoning and General Plan amendments, reduced a 90-foot utility, access, and trail corridor to 45 feet (La Rambla) on the north side of Beckner Road, and amended a condition related to dust control.
4. May 31, 2023, which increased the density from six units per acre to ten units per acre for land located at 4601 Rail Runner Road (pending recordation).

The proposed three (3) GP Amendments, Master Plan Amendment, and three (3) Rezonings, (together, the "Project") will allow the Applicant to develop Las Soleras Tracts 19, 20, 21, 23, 24, and 26 under the Community Commercial (C-2) zoning district. The Tracts

are currently zoned C-1 (General Office), MU (mixed use), and BIP (Business Industrial Park) (see Figure 2). A uniform C-2 designation for the project area will allow amenities such as neighborhood grocery stores to exist side-by side with residences. (Grocery stores and residences could not exist side-by-side in the existing BIP and C-1 districts.) In addition, the rezoning will remove restrictions on ratios for housing versus commercial development (as currently required in the Mixed Use districts). Staff anticipates that these changes will result in more cohesive and pedestrian friendly mixed use development.

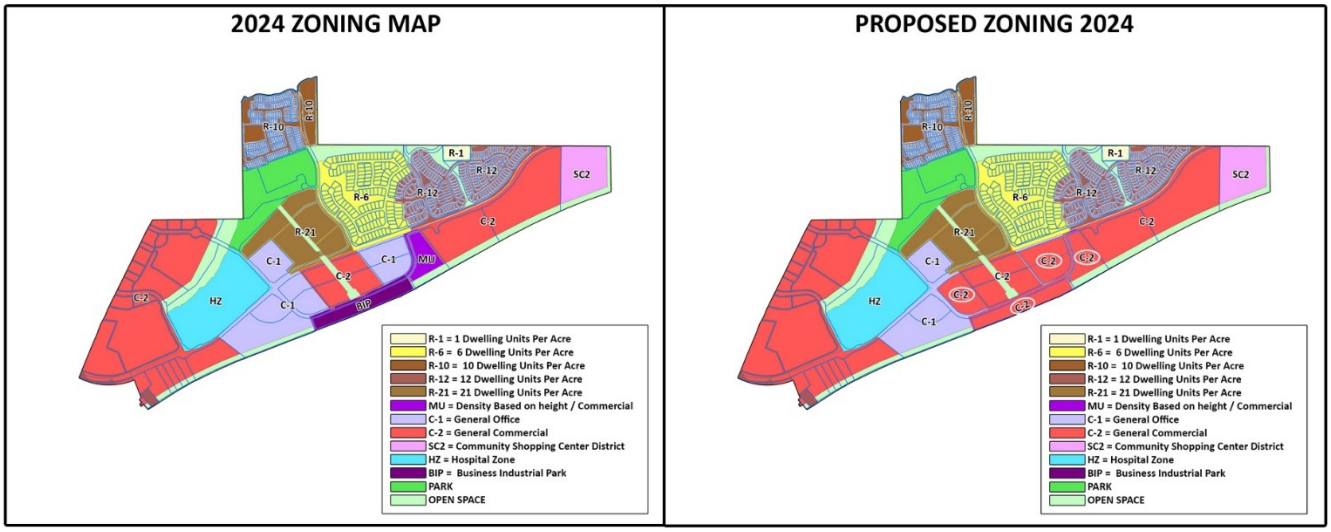


Figure 1 Existing (left) and Proposed Zoning (right)

The Applicant conducted a pre-application conference on September 28, 2023, and an Early Neighborhood Notification (ENN) meeting on November 14, 2023. On September 5, 2024, the Commission held a public hearing to review Case #2024-7899, Case #2024-7898, Case #2024-7900, Case #2024-8852, Case #2024-8853, Case #2024-8854, and Case #2024-8855 during which the Commission heard reports from City Planning and Land Use Department staff ("Staff"), testimony and evidence from the Applicant, and public comments by interested members of the public. The Commission found that the Master Plan Amendment, three (3) GP Amendments and three (3) Rezonings were consistent with the General Plan and that all approval criteria had been met.

The Commission voted to recommend that the Governing Body *approve* the Project on September 5th, 2024, subject to a condition of approval for the Master Plan Amendment. On October 3, 2024, the Commission adopted Findings of Fact and Conclusions of Law, (Attachment B, "Planning Commission Approved Findings of Fact and Conclusions of Law") and Commission Minutes (Attachment C, "Planning Commission Minutes"), reflecting its holdings from the public hearing.

IV. General Plan Amendment Approval Criteria

Table 2 analyzes all three (3) proposed General Plan Amendment according to approval criteria as set forth in the Santa Fe City Code, 14-3.2 "Amendments to the General Plan" for Case #2024-7879, Case #2024-8852, and Case #2024-8854.

Table 1 General Plan Amendment Approval Criteria Analysis

General Plan Amendment Criterion 1 [14-3.2(E)(1)(a)]: consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (General Plan Amendment):

"The requested General Plan Amendment to allow a uniform Land Use Classification of Community Commercial across Las Soleras Master Plan parcels 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following General Plan policy goals[1] are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan, it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

[Staff has removed three (3) paragraphs here. The Applicant's full response may be found in Attachment E, Applicant's materials]

[1] Staff Commentary: the policies referenced in this response are described in the City of Santa Fe 1999 General Plan, *available at* https://santafenm.gov/land-use/current-planning/long-range-planning/general-plan-1999.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of parcels 19 – 26 with a uniform Land Use classification of Community Commercial.

Growth Projections, Economic Diversification, and Community Development are also addressed within this amendment. The proposed amendment is consistent with the goals and policies of community services outlined in the General Plan, which states the guiding policies for economic development are to: 1) Promote diversification of the Santa Fe economy, 2) Promote increased job opportunities with higher wages for Santa Fe residents, 3) Support services that serve the needs of Santa Fe residents and workers, 4) Develop and maintain an attractive climate for conducting business in Santa Fe, and 5) Promote small businesses.

Santa Fe County's population is projected to reach approximately 156,151 in 2024, reflecting a growth rate of 0.13% over the past year according to the most recent United States Census data. This projected growth highlights the need for adaptive planning and development to accommodate increasing residential and commercial demands.

The Angelou Report[2] further emphasizes the importance of diversifying Santa Fe's economic base to ensure sustained growth within the community (p. 15) and advocates for community development strategies that enhance both the local economic landscape and the quality of life for residents (p. 40). Aligning with these goals, the Economic Development Division Strategy for Implementation outlines objectives to attract high-wage jobs and develop a workforce capable of supporting innovative sectors (p. 3-4).

The proposed amendment enables the land to support these economic development policies by allowing for a greater variety of developments, which would better meet the needs of different ages, incomes, and family sizes. Additionally, it is strategically designed to create space for diverse industries to expand and prosper, encouraging the creation of community hubs that attract investment and generate high-quality employment opportunities. This supports Santa Fe's growth projections and the targeted diversification of its economic base, facilitating development that enhances the economic landscape and community well-being."

Staff Response (General Plan Amendment): Staff finds that the General Plan Amendments meet Criterion 1.

Staff agrees with the Applicant's response. The General Plan Amendments for the Tracts align with Santa Fe's growth and economic development strategies. The Applicant cites two (2) strategic documents that are reliable sources for understanding Santa Fe's future growth: the Angelou Plan ("Cultivating Santa Fe's Future Economy Economic Development Strategy, April 2004, by Angelou

[2] The "Angelou Plan" (referred to by the Applicant as the "Angelou Report") is a 2004 economic report from Angelou Economics. The Angelou Plan proposes a roadmap for Santa Fe's future economic development efforts based on economic analysis and community input. The Angelou Plan is included as Attachment C, "Economic Strategy".

Economics) and the 2008 Economic Development Strategy (included here as Attachment C, "Economic Strategy"). The General Plan Amendments are likely to allow for the type of neighborhood and community planning that are encouraged in the 1999 General Plan (*see* General Plan Themes, I-5). Specifically, the General Plan Amendments will allow for development designed to serve the immediate community, which helps reduce car-dependence and encourages community-oriented development (*see* General Plan Themes, I-13). Staff agrees that the Applicant's requested General Plan Amendments are consistent with projected growth patterns as described in both the Angelou Plan and the 2008 Economic Development Strategy.

General Plan Amendment Criterion 2 [14-3.2(E)(1)(b)]: Consistency with other parts of the General Plan;	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response: *"This request is consistent with other General Plan Land Use Classification in the immediate Las Soleras Master Plan area (See City of Santa Fe Future Land Use Map included with this application).*

Las Soleras Master Plan Tracts 19 – 26 are immediately adjacent to Community Commercial Tracts to the East. In addition, Tracts 22 and 25 are already designated Community Commercial. More Community Commercial along with Regional Commercial Land Use designations can be found a short distance to the West between I-25 and Beckner Road and then again North of Beckner Road just West of the Presbyterian hospital tract.

In fact, it could be observed that the existing land use classifications for Tracts 19 and 20 currently designated as Transitional Mixed Use and Business Park are the designations not consistent with the adjacent General Plan classifications which are a majority Community Commercial and Office.

The infrastructure serving Las Soleras is relatively new and it is also designed to accommodate the build out of the Master Plan including expansion of roads, trails and utilities as vacant Tracts are developed."

Staff Response: Staff agrees that Criterion 2 is met.

Staff agrees with the Applicant's response. The 1999 General Plan Policy Overlay designates the land at issue as an "infill area" (*see* 1999 General Plan, Chapter 3, "Land Use", p. 4). Guiding Policy 3-G-3 provides that "[t]here shall be infill development at densities that support the construction of affordable housing and a designated mix of land uses that provide an adequate balance of service retail and employment opportunities to address residential growth throughout the Urban Area".

1999 General Plan Guiding Policy 3-G-2 encourages mixed commercial/residential development throughout the City "[t]here shall be a mix of uses and housing types in all parts of the city." Additionally, much of the land near the Project site, along Cerrillos Road and I-25, is already

designated Community Commercial by the Future Land Use Map[3]. The General Plan Amendments will uniformly classify Las Soleras Master Plan Tracts 19 – 26 as Community Commercial, which will allow for development throughout the Project site that is consistent with the General Plan goal of encouraging mixed uses in all parts of the City.

General Plan Amendment Criterion 3 [14-3.2(E)(1)(c)]: the amendment does not: **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public**	**Criterion Met: (Yes/No)** **Yes**

Applicant Response (General Plan Amendment):

***"(i) Response**:*

"With the exception of the Transitional Mixed Use and Business Park Classifications of Tracts 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

"(ii) Response:

The site and Tracts in question exceed 2 acres both individually and collectively, thereby satisfying this requirement.

(iii) Response:

As noted above, the Community Commercial land use classification is consistent with land use designations and patterns already assigned to adjacent Tracts within the Las Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Tracts 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response (General Plan Amendment): Criterion 3 is met.

The Applicant's response does not contain enough detail to fully address all subsections of this criterial. However, based on Staff's own investigation, which included review of the applicant's submittals, and all other material included in the attachments to this Report, Staff is able to conclude that the Amendment does not allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area, does not affect an area of less than two acres, and does not benefit one or a few landowners at the expense of the surrounding landowners or the general public.

[3] See City of Santa Fe Future Land Use Map, *available at* https://santafenm.gov/FutureLandUse.pdf (12/30/2024).

General Plan Amendment Criterion 4 [14-3.2(E)(1)(d)]: an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;	**Criterion Met: (Yes/No) N/A**
Applicant's Response: *"The proposed amendment conforms with the requirements of 14-3.2(E)(1)(c), but also offers public advantage as the effective and accelerated development offered by this amendment will result in the completion of additional Las Soleras infrastructure including the Las Soleras Bridge crossing Arroyo de Los Chamisos."* **Staff Response:** Criterion 14-3.2(E)(1)(c) is met, and therefore no further justification is needed at this time.	
General Plan Amendment Criterion 5 [14-3.2(E)(1)(e)]: compliance with extraterritorial zoning ordinances and extraterritorial plans; **Staff Response:** There are no extraterritorial zoning ordinances or extraterritorial plans that affect the Property.	**Not Applicable**
General Plan Amendment Criterion 6 [14-3.2(E)(1)(f)]: contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;	**Criterion Met: (Yes/No) Yes**
Applicant's Response: *"A consistent land use designation of Community Commercial for Tracts 19-26 along with allowable uses found in a C-2 Zoning District is more consistent with the adjacent land uses. It will further provide for a more thoughtful and accelerated development necessary to expand the Las Soleras trails system, deliver the Las Soleras Bridge, and offer the potential of an expanded job base and additional retail and/or food and beverage service to the surrounding neighborhood.* *In addition, approval of this application will increase the chances a Rail Runner rail stop may one day serve the Las Soleras Master Plan."* **Staff Response:** Staff finds that Criterion 6[14-3.2(E)(1)(f)] is met. Staff agrees with the applicant's response, in that a Community Commercial designation across the entire Project site would provide an opportunity for growth that is consistent with 1999 General Plan Guiding Policy 3-G-2 ("[t]here shall be a mix of uses and housing types in all parts of the city") and allow development that, aligns well with the adjacent land uses. The Amendment promotes more coordinated and harmonious development of the Las Solares Master Plan within Santa Fe area, consistent with past discussions under Criteria 1, 2, and 4. Furthermore, the potential for increased job opportunities and additional retail and food services directly supports the economic and social prosperity of the neighborhood.	

General Plan Amendment Criterion 7 [14-3.2(E)(1)(g)]: consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.	Criterion Met: (Yes/No) YES
Applicant's Response: *"Development resulting from the approval of the proposed amendment will conform with the City of Santa Fe land use policies and the conditions of development as set forth in the Las Soleras Master Plan. Approval of this amendment does not set any new precedent and is compatible with the spirit and intent of the Las Soleras Master Plan and community as currently developed."* **Staff Response:** Staff agrees with the Applicant's response. The General Plan Amendments are consistent with multiple City policies that support the proposed change. The General Plan Amendments do not conflict with any existing city ordinances or regulations. Additionally, the Project meets all applicable Code criteria. The General Plan Amendments foster a harmonious development strategy, promote general welfare, and correspond with adjacent land uses and broader city policies, ensuring there are no conflicts with existing regulations. Staff finds that Criterion 7[14-3.2(E)(1)(g)] is met.	
General Plan Amendment Criterion 8 [14-3.2(E)(2)] Additional Criteria for Amendments to Land Use Policies **In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:** **(a) the growth and economic projections contained within the general plan are erroneous or have changed;** **(b) no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or** **(c) conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.**	**Not Applicable**
Staff Response: The Applicant is not required to document compliance with Criterion 8, since the application does not amend land use policies.	

V. APPROVAL CRITERIA – MASTER PLAN AMENDMENT

Table 2 provides the Applicant's responses and staff's analysis of the Master Plan approval criteria, 14-3.9 "Master Plan", for Case #2024-7899 Las Soleras Master Plan Amendment.

According to City Code Section 14-3.9 (B)(3), "[f]inal actions by the governing body… concerning rezonings… shall include a specific finding or determination that the action complies with all applicable provisions of the master plan." Consequently, it is Staff's recommendation that the Governing Body consider the Master Plan Amendment before considering the Applicant's proposed Rezonings.

Staff recommends *conditional approval* of the Master Plan Amendment, effective upon approval of the relevant rezonings and an additional condition. As further discussed in the Planning Commission Staff Report, Staff finds that the Master Plan Amendment meets the criteria for approval, subject to a condition that the Master Plan Amendment include a "Master Sign Plan" that comprehensively addresses the design, placement, and specifications of all signs within the project area that are compatible with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. (*See* Attachment A, p. 4). Staff proposes that the Applicant must complete this condition prior to recording the Master Plan Amendment.

Table 2 Master Plan Amendment Approval Criteria Analysis

Criterion 1 (14-3.9(D)(1)(a)): the master plan is consistent with the general plan;	**Criterion Met: (Yes/No) YES**
Applicant's Response (Master Plan): *The requested Master Plan amendment to allow a uniform Land Use Classification of Community Commercial and a Uniform C-2 District across Las Soleras Master Plan Tracts 19 – 26 is consistent with the City of Santa Fe growth projections and economic development goals.* *Specifically, the following General Plan policy goals are supported:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.* *Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.* *Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and* *Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.* *Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and* *Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.* *Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and* *Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and* *Policy 9-2-G-5: Promote small business.* *The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the*	

local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road.

The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial.

Staff Response (Master Plan): Staff finds that the Master Plan meets Criterion 1 is met.

Staff agrees that the Master Plan Amendment is consistent with the proposed General Plan Amendments. The Master Plan Amendment still maintains the potential for a diverse range of uses as allowed within the C-2 District and allows for neighborhood-focused development as described in the policies referenced in the Applicant's response, above.

Criterion 2 (14-3.9(D)(1)(b)): the master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):
"This Master Plan amendment is consistent with Zoning patterns and districts already in the immediate area. Except for the MU District and BIP District of Tracts 19 and 20 respectively, and the SC2 District of parcel 17 at Richards Road; the Las Soleras Master Plan Zoning between I-25 and Beckner is predominately C-2, General Commercial with some C-1, Office and Related Commercial. This application's request a uniform C-2 District across Tracts 19-26 is consistent with adjacent Zoning Districts and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses. The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

Staff Response (Master Plan): Staff finds that Criterion 2 is met.

Staff agrees with the Applicant's response. The Master Plan Amendment is consistent with the Rezonings proposed for the area. . The variety of C-2 uses, ranging from residential to light industrial, are consistent with the Las Soleras Master Plan's original scheme to foster a mix of uses, by allowing for a more cohesive, neighborhood-focused development scheme across the Project site than Mixed Use, BIP, and C1, which restrict certain types of development to certain parts of Project site. . .

Criterion 3 (14-3.9(D)(1)(c)): development of the master plan area will contribute to the coordinated and efficient development of the community;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Master Plan):
"This Master Plan amendment will significantly enhance the site's ability to deliver an efficient, thoughtful development via a uniform C-2 Zoning District as it will offer flexibility in establishing meaningful lot configurations and the location of various services (including full-service dining) within the site. These services will benefit not only the users of Tracts 19-26 but also the surrounding neighborhood as it continues to grow. This will also attract interested businesses and companies in search of a new office. Finally, this development will trigger the completion of the Las Soleras Bridge and the expansion of the Las Soleras Trails System."

Staff Response (Master Plan): Criterion 3 is met.

Staff agrees with the applicant's response. The Master Plan Amendment provides enhanced flexibility in site design, enabling optimal lot configurations and the strategic placement of various services, such as full-service dining throughout the entire Project site, and more, which would not be allowed with the current combination of zoning restrictions. This approach addresses the evolving needs of the surrounding neighborhood. The diverse mix of uses is likely to stimulate local economic growth.

Criterion 4 (14-3.9(D)(1)(d)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development:	**Criterion Met: (Yes/No) YES**

Applicant Response (Master Plan):

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application. The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response (Master Plan): Staff finds that Criterion 4 is met.

Staff generally agrees with the Applicant's response regarding the minimal impact of the Master Plan Amendment on utility systems and the adequacy of existing infrastructure to support the proposed changes. Although the Applicant's "Conceptual Test Fit" land plan, included in the application, evaluates the amendment's impact on area traffic, water, and sewer utilities, the Applicant's test is not an actionable item on the agenda and cannot be used to establish compliance with the criteria.

While the Traffic Division agrees with the Applicant's Traffic Analysis, the Traffic Division has raised certain points for consideration regarding future phases of the project (*See* Attachment B, Development Review Team (DRT) Comments):
1. Per the original approved Master Plan note 46A, Beckner Road must be constructed as a four-lane major arterial in accordance with Chapter 14 of the City Code, unless otherwise approved by the City of Santa Fe Public Works Department, consistent with an approved or amended Traffic Impact Analysis.
2. The updated traffic study supports the eventual completion of a 4-lane facility on Beckner Road, as stipulated in the original Master Plan.

Additionally, Fire Preventions comments have outlined necessary precautions and requirements for future development:
1. A comprehensive assessment of fire service capacity and requirements should be conducted for all substantial new master plan developments.
2. Before construction begins, the water division and fire department must approve all infrastructure, including hydrants and water lines.
3. An all-weather access road capable of supporting a 75,000-pound fire apparatus must be provided before any combustible materials are brought onto the site.

The Water Division did not "have any concerns at this time from a water engineering standpoint", however, it noted that "the specific requirements for new public water infrastructure will be evaluated at the time of application for each phase of the project." *See* Attachment B, DRT Comments.

The Wastewater Division has "determined that the existing and proposed sewer system infrastructure will be able to accommodate the impacts of the proposed development." *See* Attachment B, DRT Comments.

The Parks Division raised no concerns for the project. *See* Attachment B, DRT Comments.

VI. Rezoning Approval Criteria

SFCC 1987, Sec. 14-3.5(C) requires the Governing Body to consider approval criteria for all rezoning proposals, and make complete findings of fact with respect to each criterion "sufficient to show that these criteria have been met", before the Governing Body approves a rezoning. Table 3, below, contains analysis of the three (3) Rezoning requests for Case #2024-7900, Case #2024-8853, and Case #2024-8855.

Table 3 Rezoning Las Soleras Master Plan Tracts 19, 20, 21, 23, 24 and 26

Rezoning Criterion 1 (14-3.5(C)(1)(a)) one or more of the following conditions exist: **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met: (Yes/No)** **YES**
Applicant's Response (Rezoning from C-1, MU, and BIP to C-2): *(i) "Not applicable"* *(ii) "As noted in the application letter, the location of Rail Runner Road was constructed almost 900 feet west of its originally planned termination onto Beckner. Per the Las Soleras Master Plan this will necessitate relocation of the Rail Runner Loop Road at Beckner and within Tracts 19 -26. This loop road realignment has left the lot configurations of Tracts 19 – 26 contrary to efficient development.* *Las Soleras Tracts 19-26 have been referenced collectively as triggers for various infrastructure development – most notable the Las Soleras Bridge. It can also be argued that the existing zoning districts of MU and BIP for Tracts 19 and 20 are not consistent with the adjacent zoning districts that are primarily C-2 with some C-1. MU and BIP are found nowhere else within the Las Soleras Master Plan. To address the change in location of Rail Runner Roads negative impact on Master Plan Tracts 19-26, employing a uniform C-2 Zoning would be consistent with adjacent uses and an appropriate solution for addressing the issue."* *(iii) "As noted in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across Tracts 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:* *Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.*	

Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

The Las Soleras Master Planned community has had a significant amount of residential development since its inception in 2009. While this residential expansion has been much needed and generally in keeping with the intent of the Master Plan it has also created a need for local services in support the local Las Soleras community. The uniform classification to Community Commercial will provide greater flexibility to address the market demand for these services that could include neighborhood focused retail and restaurants. It is also consistent with the intent of the Las Soleras Master Plan for this area.

Conversely, this residential base has also created a capacity to support new business and health care service providers that offer higher wages for Santa Fe residents. The most recent example of this is the Nexus Health Medical Office and Cancer Center immediately east and adjacent to parcel 19. This project will open in July of 2024 bringing higher paying medical related jobs to the area. The Presbyterian Hospital that opened in 2019 is another recent example. The expectation is that this trend toward medical focused practices and related services could continue – and indeed be enhanced if the level of development as offered with Community Commercial is allowed. Several of these medical practices and services will qualify as small businesses.

The development of Tracts 19 – 26 will be subject to a set of established design guidelines offering consistent design elements addressing architecture, landscaping, and lighting to name a few. The intent is to create a sense of place along with health-oriented community activity across the entire 57.63 acres. The guidelines will of course be consistent with SFCC requirements.

Access to the site is good from both a vehicular, bike, or pedestrian point of view. However, allowing a uniform Community Commercial classification will accelerate the development of Tracts 19 – 26 and thereby the delivery of both expanded Las Soleras trails and the Las Soleras Bridge that will cross the Arroyo de Los Chamisos offering another option to access the area to and from Cerrillos Road. The existing infrastructure for water and sewer installed in Beckner Road along with future infrastructure prescribed in the Las Soleras Master Plan will support the build out of Tracts 19 – 26 with a uniform Land Use classification of Community Commercial."

Staff Response: Criterion 1 is met.

Staff agrees that a different use category (here, Community Commercial/ C2) is more advantageous to the community as articulated in the General Plan policy sections cited in the Applicant's response. The Rezonings support a variety of uses, enhance walkability, and promote economic self-sufficiency within the master planned area by balancing residential and commercial development opportunities, which provides opportunities for shopping and employment in the immediate area. The Rezonings are designed to meet increasing local service demands due to residential growth since 2009, supporting sectors like healthcare and retail that provide higher-wage jobs and meet community needs.

Rezoning Criterion 2 (14-3.5(C)(1)(b)): all the rezoning requirements of Chapter 14 have been met;	**Criterion Met: (Yes/No) YES**

Applicant's Response:
"Yes, all zoning requirements of Chapter 14 have been met."

Staff Response: Staff agrees with the Applicant's response, above. The Rezonings meet all applicable Chapter 14 requirements. The proposed Rezonings therefore meets Criterion 2.

Rezoning Criterion 3 (14-3.5(C)(1)(c)): the rezoning is consistent with the applicable policies of the general plan, including the future land use map;	**Criterion Met: (Yes/No) Yes**

Applicant's Response (Rezoning):
As previously noted and in the companion application requesting a General Plan Amendment rezoning to a uniform Community Commercial C-2 district across parcels 19-26 is consistent with the City of Santa Fe growth projections and economic development goals. Specifically, the following policy goals are achieved:

Policy 3-G-2: There shall be a mix of uses and housing types in all parts of the city.
Policy 4-1-G-2: Concentrate population at greater densities in developing areas with centrally located neighborhood centers to encourage pedestrian scale development, reduce auto dependence, and provide central transit nodes.
Policy 4-4-G-4: Promote a balance between residential development and new employment opportunities in detailed plans prepared for future growth areas; and
Policy 4-4-G-6: Promote a balance between residential and employment-based development in order to achieve self-sufficiency within larger projects.
Policy 9-2-G-1: Promote diversification of the Santa Fe economy; and
Policy 9-2-G-2: Promote increased job opportunities with higher wages for Santa Fe residents; and.
Policy 9-2-G-3: Support retail uses that serve the needs of Santa Fe residents and workers; and
Policy 9-2-G-4: Develop and maintain an attractive climate for conducting business in Santa Fe; and
Policy 9-2-G-5: Promote small business.

This rezoning request will be consistent with the General Plan upon approval of the companion General Plan Amendment application.

Staff Response (Rezoning): Staff finds that Criterion 3 is met.

Staff agrees with the Applicant's response that rezoning the Tracts to a uniform Community Commercial C-2 district across aligns with the City of Santa Fe's General Plan as proposed to be amended, and economic development goals. The proposal matches City policies on diverse land uses, reduced auto dependence, and balanced growth, supporting the Future Land use Map, which designates the area Community Commercial.

Rezoning Criterion 4 (14-3.5(C)(1)(d)): the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city;	**Criterion Met: (Yes/No) YES**

Applicant's Response (Rezoning):

"The total acreage under consideration is 57.63, which is in conformance with the criteria set forth in the City Code. Once again, the rezoning application is consistent with the General Plans Goals for Growth Management."

Staff Response (Rezoning from R-3 to C-2): Staff finds that Criterion 4 is met.

For City policy regarding the amount of land sufficient to meet Rezoning Criterion 4, Staff looks to City Code General Plan Amendment Criteria, Section 14-3.2(E)(1)(c), which requires in part that an amendment does not "affect an area of less than two acres, except when adjusting boundaries between districts."

Based on this requirement, Staff concludes that the amount of land proposed for rezoning will not create a pocket of inconsistent development and is sufficient to help meet the City's land use goals of creating neighborhood-focused communities that include opportunities for both residential and commercial development.

Rezoning Criterion 5 (14-3.5(C)(1)(e)): the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.	**Criterion Met: (Yes/No) YES**

Applicant's Response:

"The net impact of this amendment on the utility system infrastructure is minimal and the existing infrastructure is more than adequate to accommodate this request. To demonstrate this, the applicant has developed a Conceptual Test Fit land plan included with this application.

The Conceptual Test Fit has been used to evaluate the impact of this requested Master Plan amendment on area Traffic, as well as Water and Sewer Utilities. A TIA, Sewer and Water Evaluation Letter, Conceptual Water Plan and Conceptual Sanitary Sewer Plan are all included with this application to show the existing infrastructure can accommodate this amendment request."

Staff Response: Staff finds that Criterion 5 is met.

Staff agrees with the Applicant's response the "subject property can be served by existing roadways and public water and sewer infrastructure."

Staff agrees with the Applicant's response that the existing infrastructure is adequate for the proposed development. However, the "Conceptual Test Fit" that the Applicant referenced is not from the City Code and is not a test that the City uses to evaluate projects. Additionally, DRT evaluations have outlined necessary precautions and requirements for future development to ensure that the infrastructure can adequately handle the proposed development, which will be reviewed at the permitting or development plan stage.

Rezoning Criterion 6 (14-3.5(C)(2)): Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to: **(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;** **(b) affect an area of less than two acres, unless adjusting boundaries between districts; or** **(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met: (Yes/No)** **Yes**

Applicant's Response:

14-3.5(C)(2)(a):

"With the exception of the Transitional Mixed Use and Business Park Classifications of Parcels 19 and 20 respectively, the Land Use Classifications in the Las Soleras Master Plan between I-25 and Beckner are predominately Community Commercial and with some Office. This applications request is consistent with adjacent land use and meets the intent of the original intent Las Soleras Master Plan to develop a variety of mixed commercial uses.

The two projects currently open or under construction boarding the East and West side of the site are both Medical Office projects."

14-3.5(C)(2)(b):

"The site and parcels in question exceed 2 acres both individually and collectively, thereby satisfying this requirement."

14-3.5(C)(2)(c):

"As noted, the Community Commercial land use classification in concert with a C-2 Zoning District is consistent with land use designations and patterns already assigned to adjacent parcels within the Las

Soleras Master Plan and does not favor one or a few landowners at the expense of surrounding landowners or the public.

On the contrary, classifying Parcels 19-26 as Community Commercial will provide economic benefit to the public through a variety of potential development options bringing employment, an increased sales and property tax base along with expanded services."

Staff Response: Staff finds that Criterion 6 [14- (14-3.5(C)(2)] is met.

The Rezonings are consistent with applicable 1999 General Plan policies referenced in detail in the analysis of the previous criteria. The Rezonings are anticipated to bring broader economic benefits, such as increased employment, higher property and sales tax revenues, and expanded services, all of which would serve the general public interest.

VII. CONCLUSION

The Applicant has complied with all application process requirements of Santa Fe City Code 1987, Chapter 14 as follows:

a) The Applicant complied with the following steps required by the Santa Fe City Code:
   1) Pursuant to 14-3.1(E) "Pre-application", the Applicant conducted a pre-application on September 28, 2023.
   2) Pursuant to 14-3.1(F) "Early Neighborhood Notification" (ENN) the Applicant conducted one ENN on November 14, 2023.
   3) The Applicant has addressed the Master Plan Approval Criteria per Section 14-3.9(D)(1) *"Necessary Findings."*
   4) The Applicant has addressed the General Plan Amendment Approval Criteria per Section 14.3-9(E)(1) *"Criteria for All Amendments to the General Plan."*
   5) The Applicant has addressed the Rezoning Approval Criteria per Section 14-3.5(C) *"Approval Criteria."*

Staff and the DRT have analyzed the Project and found that it meets all applicable Code criteria. The Land Use Department recommends APPROVAL of the Project, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A."

CITY OF SANTA FE

Planning and Land Use Department
Planning Commission Staff Report

Case Nos:	2024-(7899)(898)(7900)(8852)(8853)(8854)(8855)
Hearing Date:	September 5, 2024
Applicant:	Beckner Road Partnership, LLC
Request:	Master Plan Amendment, General Plan Amendments & Rezonings
Location:	The property is located SE of the Las Soleras/Beckner Rd roundabout & South of the Rail Runner Rd/Beckner Rd roundabout, & on the South side of Beckner Rd, being Tracts 19-26, within the Las Solares Master Plan.
Case Mgr.:	Daniel A. Esquibel
Existing Zoning:	C-1 (General Office), MU (Mixed Use), and BIP (Business Industrial Park)
Overlay:	Suburban Archaeological Review District
Pre-app. Mtg.:	September 28, 2023
ENN Mtg.:	November 14, 2023

Proposal: The Applicant's project includes 7 applications: an amendment to the Las Soleras Master Plan, 3 General Plan Amendments, (GPA) 3 rezonings (RZ), and a request to reduce the La Rambla Trail easement width from 90 feet to 45 feet. The GPAs change the Future Land Use Map designations from "Transitional Mixed Use, Business Commercial, and Commercial Office" to "Community Commercial". The RZs change the Official City Zoning Map designations from MU, BIP, and C-1, to C-2.

Case #2024-7899. Las Soleras Master Plan Amendment. Orion-West LLC, Agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a Master Plan Amendment to the Las Soleras Master Plan, changing the zoning from MU (Mixed Use), BIP (Business Industrial Park), and C-1 (General Office) to C-2 (General Commercial), and reducing the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet, on a property located southeast of the Las Soleras / Beckner Rd roundabout, south of the Rail Runner Rd / Beckner Rd roundabout on the south side of Beckner Rd, encompassing Tracts 19-26 within the Las Soleras Master Plan. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-7898. Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and also that the Planning Commission recommend that the Governing Body approve an additional General Plan Amendment changing the existing General Plan Future Land Use Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from Commercial Office Use to Community Commercial. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case # 2024-7900. Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning. Orion-West LLC, Agent for Beckner Road Partnership, Owner, asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Tracts 21 and 26, comprising approximately 8.18 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, and that the Planning Commission also recommend the Governing Body to change the existing Official Zoning Map designation for Tracts 23 and 24, comprising 13.45 acres, located at the southeast quadrant of the Las Soleras / Beckner Road roundabout, from C-1 (General Office) Use to C-2 (General Commercial). (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8852. Las Soleras Master Plan Tract 19 General Plan Amendment. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 9.11 acres from Transitional Mixed Use to Community Commercial, for a property, described as Tract 19 on the Las Soleras Master Plan located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8853. Las Soleras Master Plan Tract 19 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, requests approval of a Rezoning to change the existing Official Zoning Land Use Map designation for approximately 9.11 acres from MU (Mixed Use) Use to C-2 (General Commercial). The property, known as Tract 19 of the Las Soleras Master Plan, and is located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8854. Las Soleras Master Plan Tract 20 General Plan Amendment. Orion-West LLC., agent for

Beckner Road Partnership, LLC, Owner, asks the Planning Commission to recommend the Governing Body approve a General Plan Amendment changing the existing General Plan Future Land Use designation for approximately 10.70 acres from Commercial Business Use to Community Commercial, on a property described as Tract 20 on the Las Soleras Master Plan, and located south of the Rail Runner Loop. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

Case #2024-8855. Las Soleras Master Plan Tract 20 Rezoning. Orion-West LLC, agent for Beckner Road Partnership, LLC, Owner, ask the Planning Commission to recommend the Governing Body approve a rezoning changing the existing Official Zoning Land Use Map designation for approximately 10.70 acres from BIP (Business Industrial Park) to C-2 (General Commercial) on a property described as Tract 20 on the Las Soleras Master Plan, and located southwest of the Walking Rain Road / Beckner Road roundabout. (Dan Esquibel, Case Manager, daesquibel@santafenm.gov)

I. RECOMMENDATION

The Land Use Department recommends **APPROVAL** of the following cases, subject to the Master Plan conditions listed in Section II, Table 1 "Master Plan Conditions", and Master Plan Technical Corrections listed in attachment "A":

1. Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Case #2024-7898: Las Soleras Tracts 21, 23, 24, and 26 General Plan Amendment,
3. Case #2024-7900: Las Soleras Tracts 21, 23, 24, and 26 Rezoning,
4. Case #2024-8852: Tract 19 General Plan Amendment,
5. Case #2024-8853: Las Soleras Tract 19 Rezoning,
6. Case #2024-8854: Las Soleras Tract 20 General Plan Amendment, and
7. Case #2024-8855: Las Soleras Tract 20 Rezoning

Seven motions are required for these Cases:

1. Recommend the Governing Body approve or deny Case #2024-7899: Las Soleras Master Plan Amendment allowing General Plan Amendments and Rezonings for Las Soleras Tracts 21, 23, 24, and 26,
2. Recommend the Governing Body approve or deny Case #2024-7898: Las Soleras Master Plan Tracts 21, 23, 24, and 26 General Plan Amendment, subject to the Master Plan conditions listed in Section II, Table 1 *"Master Plan Conditions"*, and Master Plan Technical Corrections listed in attachment "*A*",
3. Recommend the Governing Body approve or deny Case #2024-7900: Las Soleras Master Plan Tracts 21, 23, 24, and 26 Rezoning,
4. Recommend the Governing Body approve or deny Case #2024-8852: Tract 19 General Plan Amendment
5. Recommend the Governing Body approve or deny Case #2024-8853: Las Soleras Master Plan Tract 19 Rezoning,
6. Recommend the Governing Body approve or deny Case #2024-8854: Las Soleras Master Plan Tract 20 General Plan Amendment, and
7. Recommend the Governing Body approve or deny Case #2024-8855: Las Soleras Master Plan Tract 20 Rezoning

II. Master Plan Conditions

Table 1 Master Plan Conditions

#	Condition of approval	Dept/Division	Completed By:
1	The Applicant shall submit a Master Sign Plan to be included with the Master Plan amendment as a permanent component of future development of the Project. This Master Sign Plan must comprehensively address the design, placement, and specifications of all signs within the project area to ensure compatibility with the historic and rural character and visual openness of the Historic Route 66 (I-25) corridor and acknowledge the significance of development of the project along the primary entrance into Santa Fe. This requirement shall apply to the entire project area, irrespective of any future subdivision or ownership change, and must be adhered to by all current and subsequent owners or developers.	Land Use/ Current Planning Division	Prior to recording the Master Plan

III. EXECUTIVE SUMMARY

The Governing Body approved the Las Soleras Master Plan (Master Plan) on February 11, 2009, encompassing approximately 539 acres with a mix of uses including low, medium and high-density residential; community and regional commercial; business industrial park; mixed-use; institutional uses; office and open space. The original master plan concept proposed a walkable mixed-use neighborhood focused on an anticipated Rail Runner transit stop. The mix of uses was intended to approximate the citywide balance of residential and nonresidential uses, set among extensive open spaces.

Since adoption in 2009, there have been 4 amendments to the Las Solares Master Plan:

A. September 9, 2015
   i. Realignment of roads, reconfiguration of open space and trail, reconfiguration and reduction of park land and the reconfiguration of land tracts.
B. September 24, 2016
   i. Establish alternative height and setback standards for the R-6 and R-12 residentially zoned districts of Las Soleras for Estancias de Las Soleras and Ross's Peak.
C. September 12, 2018

i. Rezoning from MU (Mixed Use) to R-21 (Residential-twenty-one dwelling units per acre) and a reduction in the 90-foot utility, access, and trail corridor to 45 feet (La Rambla).

ii. Amending Las Soleras Master Plan condition related to dust control

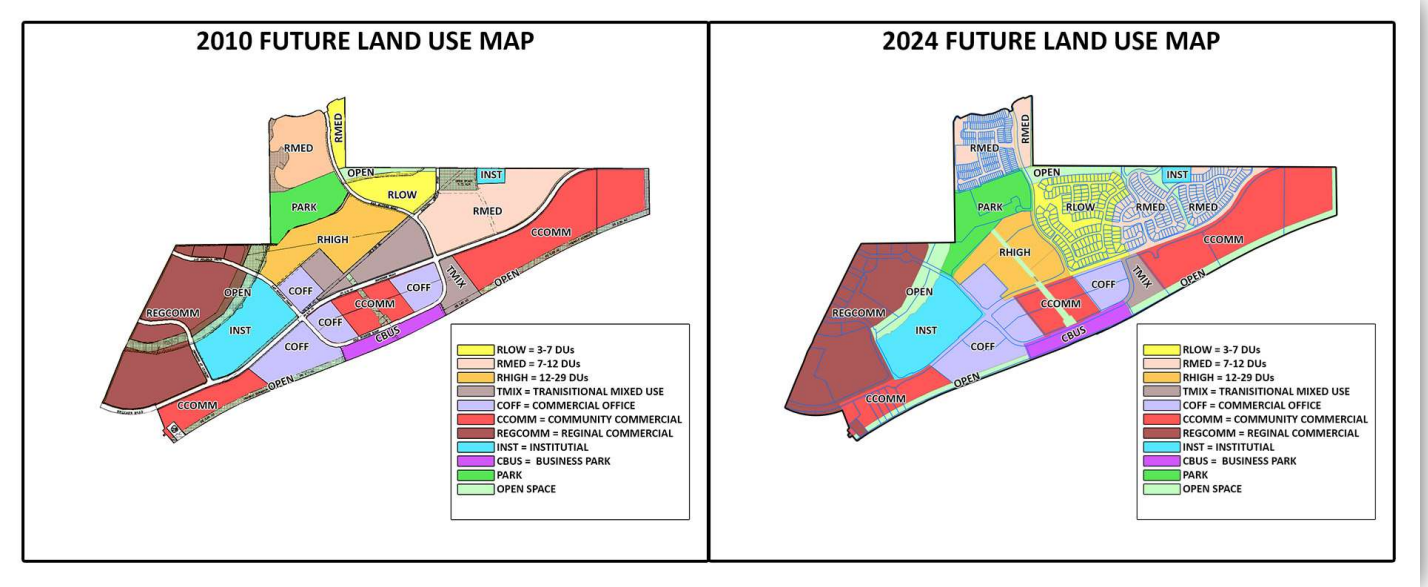
D. October 31, 2019

i. Rezoning from R-6 to R-10 for Las Solares Tract 13

IV. COMPARISON MAPS OF ZONING AND THE FUTURE LAND USE MAP

Figure 1 depicts a comparison between the 2010 Future Land Use Map (left), illustrating the land uses at the time of adoption of the Master Plan and Annexation into the City, and the current 2024 Future Land Use Map designations (right). The primary differences being within the project area where 4 lots (lots 21,23,24 and 26) were annexed in as Community Commercial (red) and are now designated as commercial office (light purple). There has also been an expansion of residential low density (yellow) and residential high density (goldenrod) and a reduction in Transitional Mixed Use (mauve) north of Beckner Road.

Figure 1 2010 / 2024 Future Land Use Map Comparison



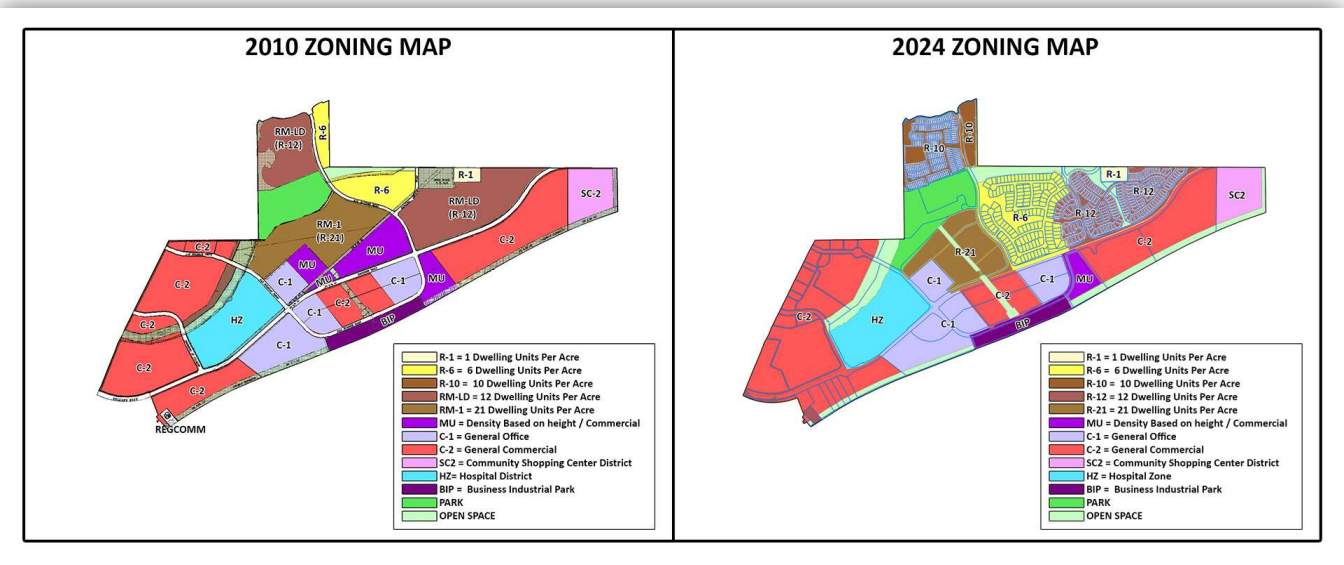


Figure 2 depicts a comparison between the 2010 Zoning Map established at annexation and the 2024 Zoning Map. The primary difference being a reduction in Mixed Use zoning (purple) in favor of more residential uses north of Beckner Road.

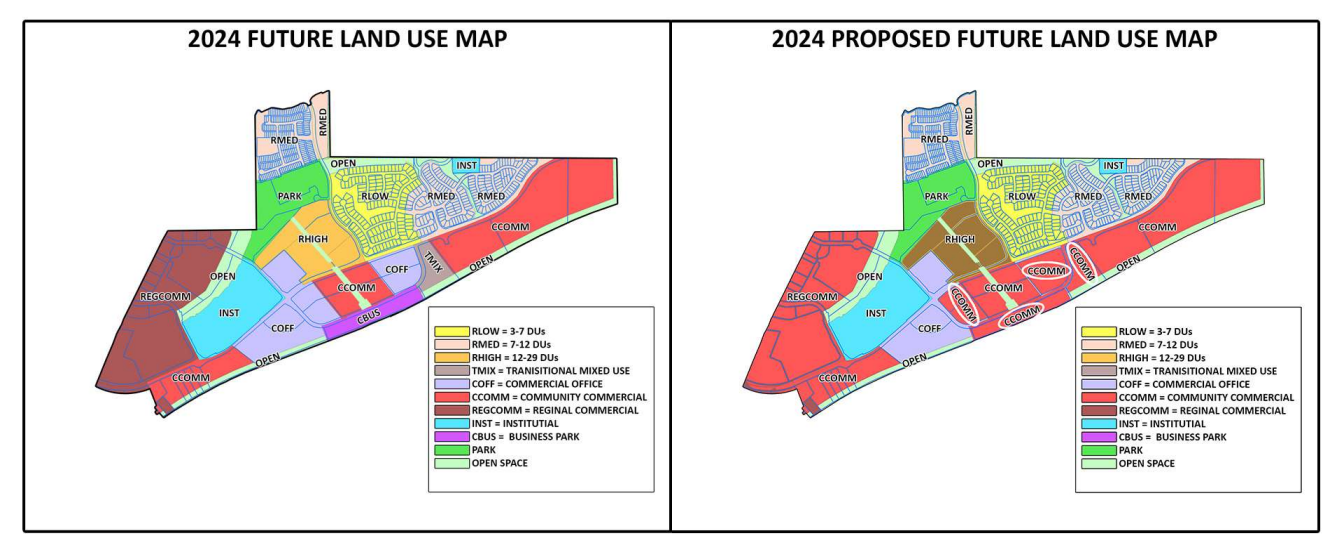

Figure 2 2010 Master Plan Zoning and 2024 Zoning Map Comparison

The Applicant's Proposed Changes

Figure 3 compares the existing 2024 Future Land Use Map and the applicant's proposed changes, from Commercial office (light purple), Business Park (dark purple), and Transitional Mixed Use (mauve) to Community Commercial (red).

Figure 3 2024 Future Land Use Map Comparison

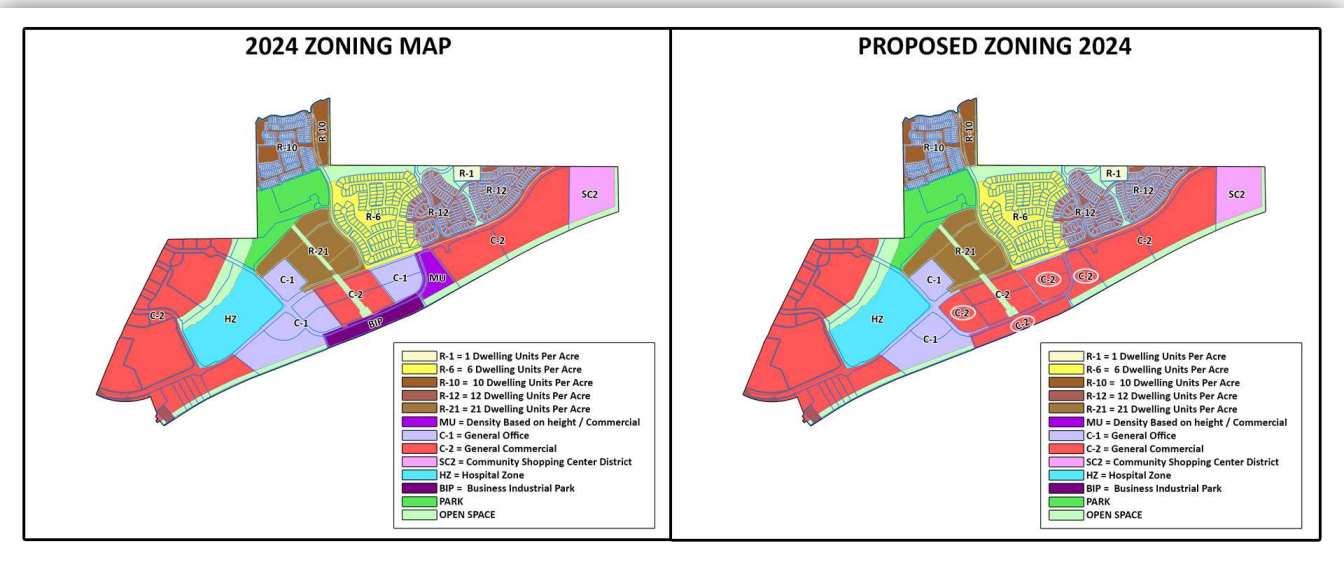
The General Plan describes Community Commercial Office as providing:

> *Sites for retail shopping areas, focus on a plaza, containing a wide variety of businesses, including retail stores; eating and drinking establishments; commercial recreation; service stations; automobile sales and repair services; financial, business, and personal services; and educational and social services.*

The General Plan describes Business Park as:

> *Business Parks shall provide areas appropriate for moderate- to low-intensity industrial and business park uses capable of being located next to commercial and residential areas with minimum buffering. Allowable uses include research and development related uses, light manufacturing, wholesaling, distribution and storage, retailing and small-scale restaurants as a related use only, and offices in a master planned landscaped setting. No raw materials processing or bulk handling would be allowed.*
>
> *The Business Park designation on the Future Land Use Map of the General Plan is intended to encompass the 11, Light Industrial District, and the IP, Industrial Park District, existing zoning categories. It is recommended that both districts be re-examined for allowable uses and appropriate standards. It is further recommended that the IP zoning district be restructured with a stronger emphasis on research and development, offices, and related uses, to be developed in a master planned landscaped setting, and that the district name be modified to Business and Industrial Park in order to reflect these changes.*
>
> *For new development and for rezonings within the Business Park designation, the appropriateness of 1 versus BIP (IP) is determined by the nature of adjacent land uses. Where an area designated Business Park on the Future Land Use map is adjacent to non-residential zoning, an existing non-residential use, or non-residential Future Land Use, then that area may be considered for 11 zoning. Where an area designated Business Park on the Future Land Use map is adjacent to residential zoning, an existing residential use, or residential Future Land Use, then that area may be considered for IP (BIP) zoning.*

The General Plan describes Transition Mixed Use as:



> *…mixed-use development, providing a variety of commercial (specific locations for big box retail), residential, and institutional opportunities.*

The General Plan describes Office as:

> *This classification provides sites for administrative, financial, business, professional, medical, and public offices, and small-scale restaurants (as a related use only) in areas where retail and other community commercial uses are not appropriate*.

Figure 4 compares the Applicant's proposed changes to the City Zoning Map, namely replacing C-1 (General Office), BIP (Business Industrial Park) and MU (Mixed Use) with C2 (General Commercial).

Figure 4 Existing and Proposed Zoning Map Comparison

Zoning Modifications

Table 2 *"Zoning Acreage Change"* depicts acreage changes affected by Master Plan Amendments for Las Solares Master.

Table 2 Zoning Acreage Change

Zoning	2010 Annexation (Acreages+/-)	2024 Current Zoning (Acreages +/-)	Proposed Changes (Acreages+/-)
R-1	3.02	3.02	3.02
R-6	28.96	46.9	46.9
RM-LD (R-10 & R-12)	102.66	81.19	81.19
RM-1 (R-21)	43.69	28.59	28.59
MU	37.49	9.11	0
C-1	50.29	50.45	30.75
C-2	171.5	171.5	~~239.47~~ 211.01
SC-2	20.21	20.21	20.21
HZ	39.03	39.03	39.03
BIP	10.7	10.7	0

Park	21.4	31.1	31.1

Figure 5 Line Graph

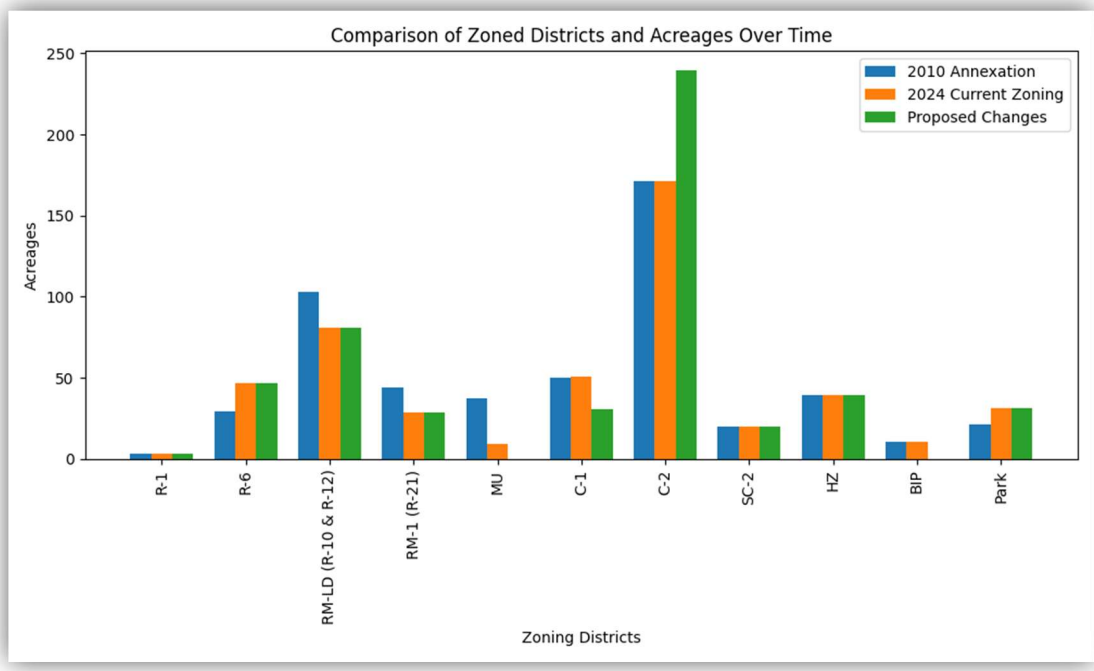


Figure 5, together with Figures 1-4 and Table 2 present an overview of modifications across various zoning categories, from the annexation agreement established in 2010 to the present year, and the applicants requested amendments. Figures 1-5 offer a general view of how acreages within the Master Plan area have changed across different zoning categories over time. The Master Plan amendment proposes modifications to the Master Plan zoning designations for Tracts 19, 21, 23, 24, and 26. The Master Plan amendment eliminates two zoning categories—MU (Mixed Use) from 9.11 acres to 0; and BIP (Business Industrial Park) from 10.7 acres to 0 acres—while reducing the area zoned as C-1 (General Office) from 50.45 acres to 30.75; and increasing those areas zoned as C-2 (General Commercial) from 171.5 acres to 239.47. In addition to the zoning changes, the applicant seeks to reduce the width of the 90-foot Utility, Access, and Trail Corridor (La Rambla Trail) to 45 feet.

Relevant Chapter 14 Zoning District purpose statements:

14-4.3(A) C-1 Office and Related Commercial District

The purpose of the C-1 office and related commercial district is to provide areas for government offices; professional and business offices; medical and dental offices or clinics; personal care facilities for the elderly ; and hospitals , laboratories, pharmacies and related complementary businesses that provide sales or service of office equipment, medical and dental supplies and office supplies. This

district serves as a transitional buffer between more intense commercial use districts and residential districts.

14-4.3(B) C-2 General Commercial District

The C-2 general commercial district includes areas along streets carrying large volumes of traffic where commercial uses are appropriate. Regulations are designed to guide future additions or changes so as to discourage extension of existing and formation of future strip commercial development , to preserve the carrying capacity of the streets and to provide for off-street parking and loading.

14-4.3(H) BIP Business and Industrial Park District

1) Purpose

(a) The purpose of the BIP district is to provide locations for the development of jobs in research and development activities and in offices, institutions and limited light industrial settings. The BIP district regulations intend to ensure that district locations may be adjacent to residential and commercial areas with minimum buffering.

(b) It is also the purpose of the BIP district to allow related uses that complement or support the primary employment-based uses to create a functional and pedestrian-friendly development.

2) Rezoning Requirements

(a) Property is eligible for rezoning to BIP if the property is a minimum of four acres in size and all other applicable requirements of Chapter 14 are satisfied.

(b) Rezoning to BIP requires consideration and approval by the planning commission and governing body of a master plan or development plan for the property as provided in Sections 14-3.8 and 14-3.9."

14-4.3(L) MU Mixed-Use District

1) Purpose

It is the purpose of the MU mixed-use district to provide for the creative infill and development of underused and vacant land and buildings in Santa Fe. This zoning category allows office, commercial and residential uses in the same building or on the same property . MU zoning should accomplish the following goals:

(a) control sprawl by creating a more efficient use of land and more opportunities for infill ;

(b) promote affordable housing and economic development by emphasizing a variety of land uses

(c) promote creative and flexible land uses within Santa Fe;

(d) foster alternative means of transportation, including transit, bicycles and walking;

(e) promote infill development and pedestrian-oriented streetscapes in currently underused parking areas and along existing roadway corridors; and

(f) promote shared parking areas in the design and development of mixed-use projects.

(2) Rezoning Requirements
