For the 2038 Build condition, the study found that the Rufina and Rufina Circle (West) intersection saw a LOS F in the northbound approach and the Rufina and Calle del Cielo unsignalized intersection saw: LOS E on the northbound left movement. All other intersections operate overall acceptably in the AM and PM peak hours.

For the Rufina and Rufina Circle (West) intersection, the northbound approach will operate at LOS F during the PM peak hour. All other movements during both peak hours will operate at LOS D or better. This deficiency is also noted in the 2038 No Build condition and therefore is not caused by the development traffic.

The Rufina and Rufina Circle (East) intersection is expected to operate with all movements at LOS D or better in the AM and PM peak hour.

The northbound left turn movement at the Rufina Circle and Calle del Cielo intersection is expected to operate at LOS C in the AM peak hour and LOS E in the PM peak hour. Since this event only occurs for one hour out of the entire day in the future 2038 Build condition, the City should monitor this movement to determine the need for improvements.

The movements at both access driveways on Rufina Circle are expected to operate at LOS B or better in the AM and PM peak hour for the 2038 Build scenario.

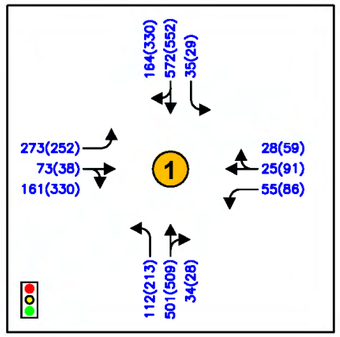

Table 19 summarizes the 2038 Build Unsignalized Intersection Results with the HCS outputs included in Appendix H.

B. AUXILIARY LANE EVALUATION

Analyses of the Transportation Impact Analysis (TIA) Guidelines by the City of Santa Fe, were completed to determine the need to install new right turn or left turn lanes at any intersection as part of this study. Information to check these warrants is provided in Table 20 and Table 21.

The intersection of Rufina and Siler includes dedicated left turn lanes in all directions. Based on the volumes seen at the intersection during the peak hours, all left turn lanes are warranted and should remain. As discussed in the level of service analysis, the eastbound through movement falls to LOS E which indicates that mitigation may be required for this movement. As the volume of eastbound right turning traffic is high at this location, adding a dedicated eastbound right turning lane will improve the operations of this movement. Even though the right turn criteria is not met, it is recommended to install a dedicated right turning lane. This should be completed by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The Calle del Cielo and Cerrillos intersection currently includes all dedicated left turning lanes as shown in existing conditions. Additionally, all right turn lanes are warranted based on the volume of the major roadway (Cerrillos) in this area. Because the through movements northbound and southbound at this intersection are very minimal during both peak hours it is not necessary to add dedicated right turn lanes northbound or southbound. They are not warranted based on the operations of the signalized intersection.

At the intersection of Rufina and Richards, no additional turning lanes are warranted based on the warrant evaluation. The left turn lanes should remain in place at the intersection.

Rufina Street and Rufina Circle (West) includes an eastbound/westbound two way left turn lane on Rufina Street. This lane satisfies the warrant for the eastbound and westbound turn lanes at this intersection. The northbound and southbound left turn lanes are warranted but only the northbound is considered in this report due to the development having no additional trips associated with this movement. The northbound approach to this intersection should be restriped to include a dedicated left turning lane and a shared through/right turn lane to address the left turn lane warrant criteria. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

Rufina Street and Rufina Circle (East) also includes the eastbound/westbound two way left turn lane on Rufina Street. This lane satisfies the warrant for the westbound turn lane at this intersection. The northbound left turn lane is warranted and should be restriped to include a dedicated left turning lane and a shared through/right turn lane to address the left turn lane warrant criteria. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

Rufina Circle does not have a posted speed limit; however, the assumed speed limit is 25 MPH. The entire circle does not include any turn lanes at any of the driveways or intersections along it. Rufina Street includes a two-way left turn lane that operates as a dedicated left at both the intersections with Rufina Circle.

Rufina Circle and Calle del Cielo warrants a northbound left turn lane and a westbound left turn lane in the build scenario. The intersection has two lanes entering northbound which effectively makes one a dedicated left turn lane and the other a dedicated right turn lane based on the existing volumes at the intersection. A westbound left turn lane should be included at this intersection by restriping this area. On street parking would be effected as this area would end approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a 5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The development will see a maximum of 70 southbound vehicles turning left into Access 1 and a maximum of 20 vehicles turning northbound right. For Access 2, a maximum of 100 vehicles are expected to turn right into the site and a maximum of 10 vehicles are anticipated to turn left into the site. Based on the Santa Fe TIA Guidelines a right turn lane is not typically provided for speeds of 25 mph, which is the posted speed limit on Rufina Street. Additionally, because Rufina Circle includes bike lanes and on street parking it would impact these features to include right turn lanes. Right turn lanes are not recommended at these accesses. Based on The Santa Fe TIA Guidelines, a southbound left turn lane is warranted at Access 1 due to the southbound left turning volumes being greater than 30 vehicles during both peak hours. Therefore, it is recommended that a southbound left turn lane be striped and designated at Access 1 with project construction.

The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.

The applicable tables from Santa Fe TIA Guidelines criteria are included in Appendix I for reference.

VII. CRASH ANALYSIS

Crash data was collected for the years 2019 to 2023 for all intersections included in the scope of this study.

A. CERRILLOS AND CALLE DEL CIELO

The intersection of Cerrillos and Calle Del Cielo shows a total of 88 crashes occurring in the 5-year span. Crash trends were relatively consistent across the years, with the highest number occurring in 2019. Rear-end collisions were the most common crash type accounting for 31% of all crashes although a large portion of crash types were listed as not available. Crash severity was predominantly property damage only crashes with 39 crashes involving injury. No reports documented fatalities at this intersection during these years. The majority of the crashes occurred during daylight hours, while night time crashes were relatively infrequent.

Contributing factors suggest that following too closely and failure to yield right-of-way were the leading causes. Overall, the crash history indicates that congestion related behaviors, particularly rear-end collisions and right-of-way conflicts are the most significant safety concerns at this intersection.

A summary of these crash statistics for this intersection are included in Table 22.

Table 22 | Cerrillos and Calle Del Cielo Crash Summary		
Category	**Description**	**No. Crashes**
	Total Crashes	88

	Avoid Contact	3
	Driver Inattention	14
	Pedestrian Error	1
	Following too Closely	35

B. RUFINA AND SILER

The Rufina and Siler intersection saw a total of 33 crashes during the 5-year span. The majority of the crashes were rear-end collisions while sideswipes and front-to-side crashes were relatively infrequent although a notable number did not specify the crash type. Most crashes resulted in property damage only while 8 crashes involved injuries with no fatalities reported at the intersection. The majority of crashes occurred

during the daylight. Contributing factor data indicates that following too closely and driver inattention were the most frequent causes.

Overall, the crash data suggests that congestion related driver behaviors, particularly tailgating and inattention, are the primary safety issues at this intersection.

A summary of these crash statistics for this intersection are included in Table 23

Table 23 | Rufina and Siler Crash Summary

	Other , No Driver Error	21
	Driver Inattention	13

C. RUFINA AND RICHARDS

Between 2019 and 2023, a total of 42 crashes occurred at the intersection of Rufina and Richards. The highest year was 2021 which included 12 crashes. The most common crash types were rear-end collisions. There were also two pedestrian crashes and one crash with a fixed object, while 18 crashes were reported with unspecified

crash types. Overall, 29% of crashes involved angle collisions, 7% involved a pedestrian or fixed object, and 10% were rear-end collisions. In terms of severity, most crashes were property damage only, while 15 crashes resulted in injuries, and no fatalities were recorded. Lighting conditions indicate that the majority of crashes occurred in daylight, with fewer crashes reported at night, dawn, or in unlit conditions. Contributing factors highlight following too closely, driver inattention, and failure to yield right-of-way as the primary causes, with smaller contributions from improper driving, excessive speed, and traffic signal violations.

Overall, the crash history suggests that driver behavior-related issues, particularly tailgating, inattention, and right-of-way conflicts, are the main safety concerns at this location.

A summary of these crash statistics for this intersection are included in Table 24.

D. RUFINA STREET AND RUFINA CIRCLE (EAST)

The intersection of Rufina Street and Rufina Circle had 3 crashes that occurred in the 5-year time frame. The only documented crash type was one crash with a fixed object. Two crashes occurred with property damage only and one occurred with injury. All crashes occurred during daylight.

A summary of these crash statistics for this intersection are included in Table 25.

Table 25 | Rufina Street and Rufina Circle (East) Crash Summary

Category	Description	No. Crashes
	Total Crashes	3

Contributing Factors*	Other Improper Driving	1
	Not Available	2

E. RUFINA STREET AND RUFINA CIRCLE (WEST)

From 2019 to 2023, a total of 16 crashes were reported at the intersection of Rufina Street and Rufina Circle (West). The most common crash type was front-to-side collisions, followed by sideswipe collisions and one rear-end collision, while 6 crashes were reported with no crash type available. There was also one pedestrian crash, representing 6% of all crashes. Overall, half of all crashes (50%) involved angle collisions, while rear-end crashes were relatively rare (6%). Most crashes resulted in property damage only while 4 crashes involved injuries, and no fatalities were recorded. The majority occurred during daylight with a smaller number happening at

night under both lighted and unlighted conditions. Contributing factors show that failure to yield right-of-way and improper overtaking/driving were the leading causes, with additional contributions from driver inattention, following too closely, speeding, and stop sign violations.

Overall, the crash history suggests that angle-related conflicts and right-of-way issues are the primary safety concerns at this intersection, with driver errors and aggressive maneuvers contributing to crash risk.

A summary of these crash statistics for this intersection are included in Table 26.

F. RUFINA CIRCLE AND CALLE DEL CIELO

The intersection of Rufina Circle and Calle Del Cielo had no reported traffic collisions from 2019 to 2023.

VIII. CONCLUSIONS AND RECOMMENDATIONS

A. CONCLUSIONS

The traffic analysis found that all intersections operate acceptably overall in the 2028 Build scenario. The eastbound left, eastbound thru/right, and the northbound left turning movements at the signalized intersection of Rufina Street and Siler Road operate at LOS E in the PM peak hour. To improve the eastbound movement, this approach should be restriped to remove on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

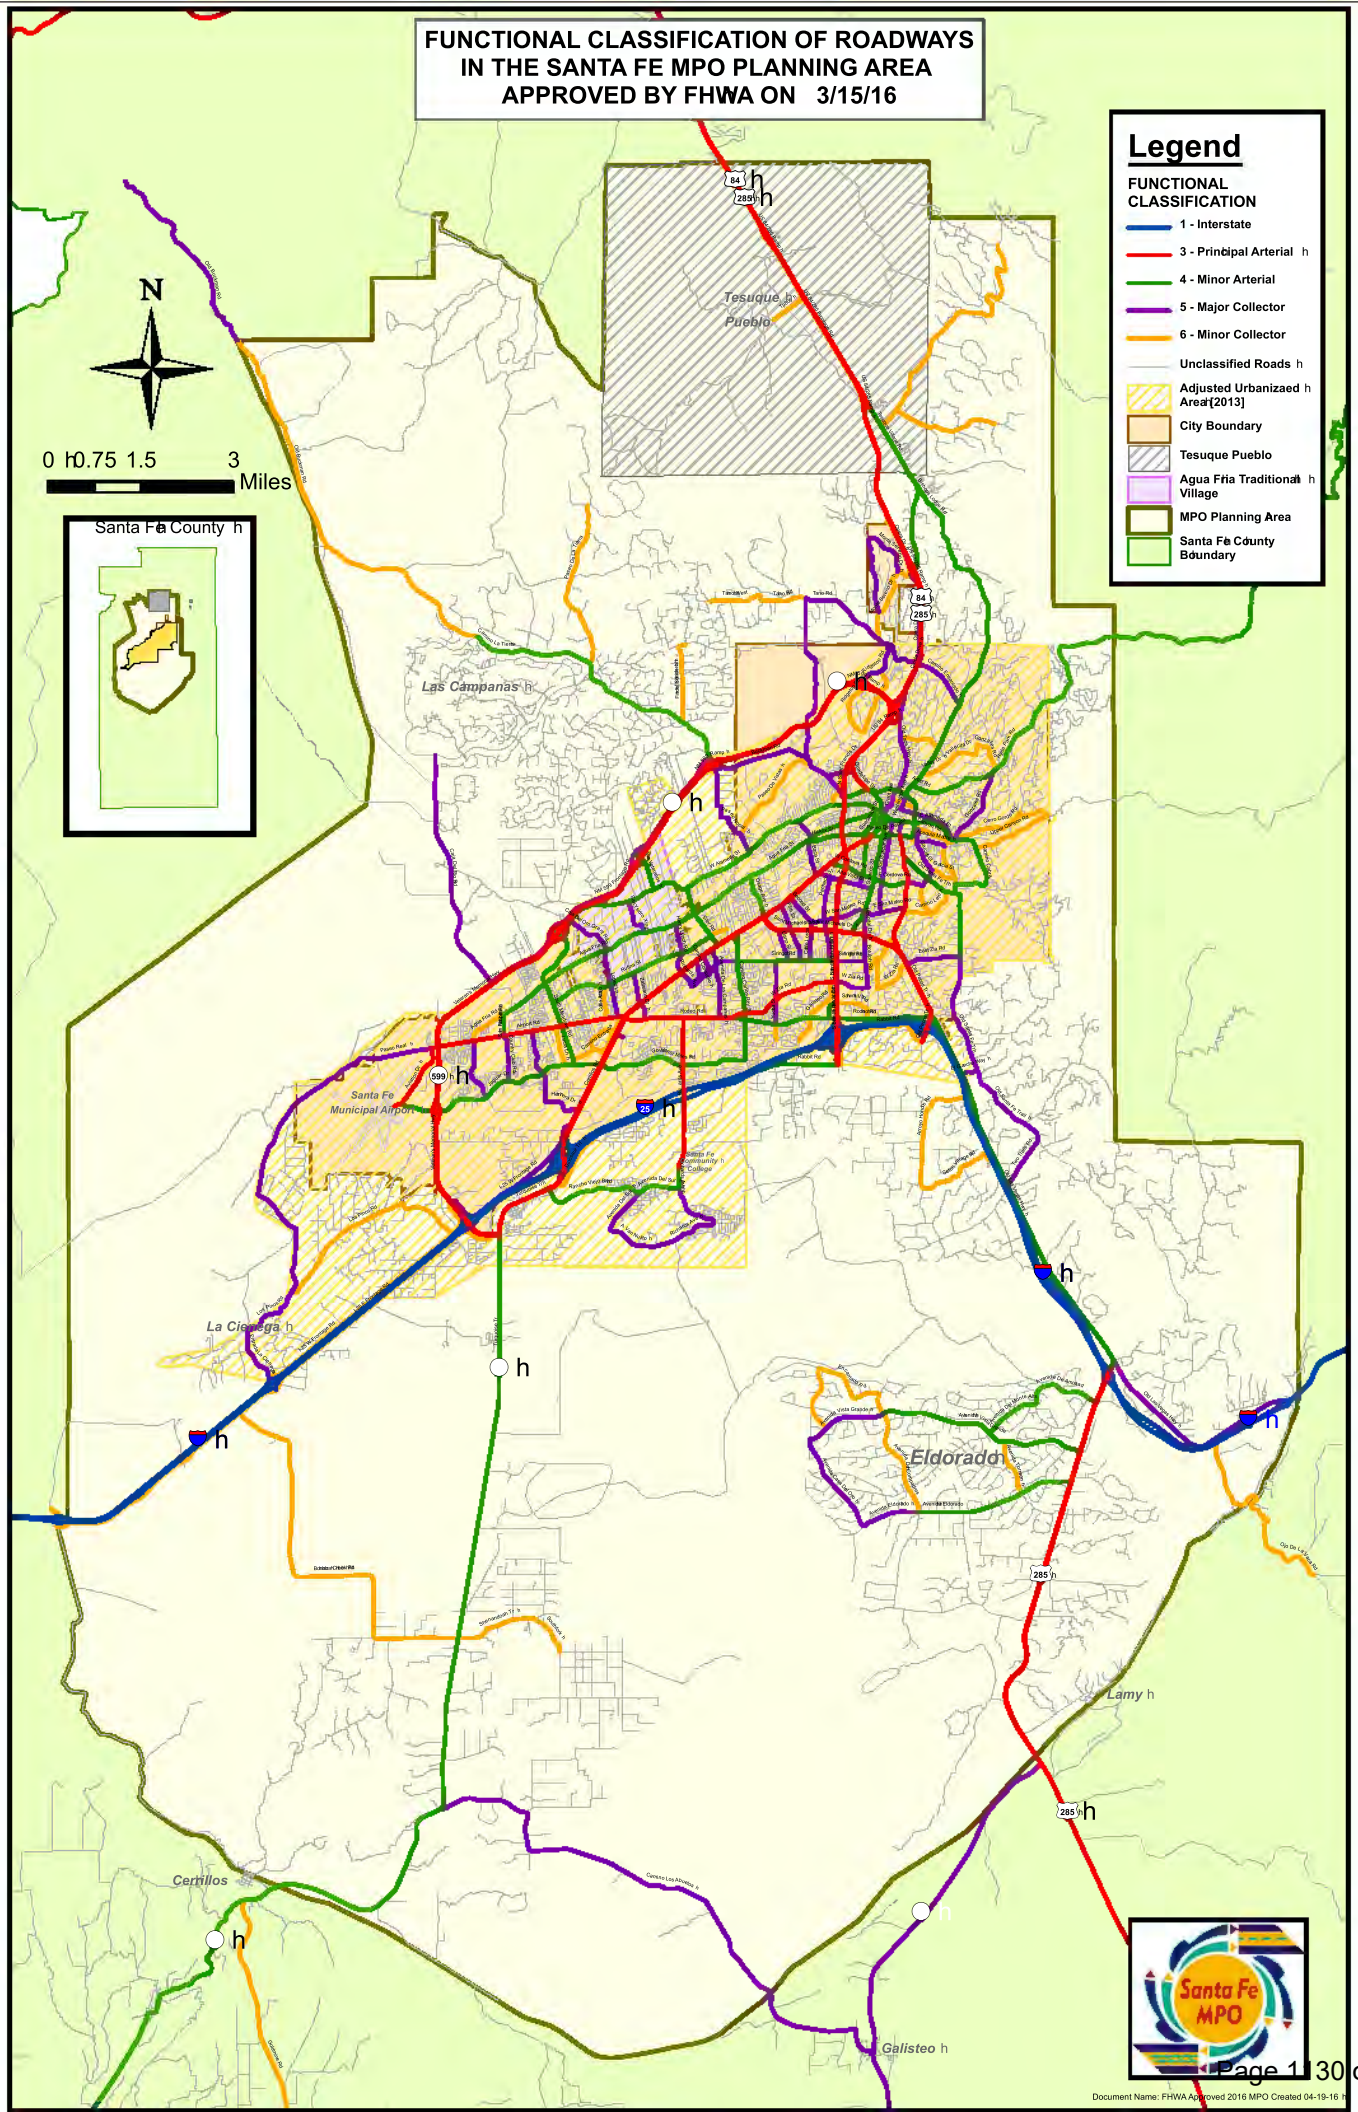
The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at LOS E during both peak hours, while the southbound left turn movement degrades to LOS E in the AM peak hour due to the development traffic. With this decline and increase in queue distance needed, it is recommended to complete median modifications on the north side of this intersection along Calle del Cielo to adequately store the queue that will develop. The median should be a maximum of 5' with a 10' left turn lane, a 10' southbound through lane, and a 10' dedicated right turn lane. Additionally, traffic signal timing adjustments should be completed at the intersection to help address this issue. As this storage length was not adequate prior to the development, a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares.

In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and the two new access driveways on Rufina Circle will operate overall acceptably. The northbound left turn lane at both the East and West intersections of Rufina Street and Rufina Circle is recommended to be installed to address City of Santa Fe turn lane warrants.

At the Rufina Circle and Calle del Cielo the westbound left turn lane is warranted and should be installed. This lane should be a minimum of 50' and include a taper length as determined by the MUTCD and prescribed in the City of Sanat Fe standards.

Lastly, Rufina Circle and Access 1 meets warrants for a left turn lane at the entrance to the development. This left turn lane should be 50 feet in length for storage with a

taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.



B. RECOMMENDATIONS

- Install a southbound left turn lane at Rufina Circle and Access 1 with striping modifications. This will include removal of on-street parking and installation of the left turn lane by shifting the northbound lane, southbound lane, and bike lanes to incorporate an 11 foot left turning lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as prescribed in the City of Santa Fe standards.
- Install an Eastbound dedicated right turn lane at the intersection of Rufina Street and Siler Road. This lane should be accomplished by striping by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 225 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards
- Median modifications should be completed at the Cerrillos and Calle de Cielo intersection. The median should be a maximum of 5 feet and the southbound lanes should include a 10' right turn lane, a 10' through lane, and a 10' left turn lane. These lanes should extend the full length of Calle de Cielo from Cerrillos to Rufina Circle.
- The northbound approach at the intersection of Rufina Street and Rufina Circle (West) should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- At the intersection of Rufina Street and Rufina Circle (East), the northbound approach should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the

taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

- Rufina Circle and Calle del Cielo warrants a westbound left turn lane. This lane should be included at this intersection through restriping. On street parking would be removed approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a 5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- All designs shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.

GENERAL NOTES

1. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH APPLICABLE PROVISIONS OF CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
2. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF EACH APPLICABLE CITY OF SANTA FE ORDINANCE ADOPTED PRIOR TO SUBMITTAL WITH BUILDING PERMIT APPLICATION THAT MODIFIES ANY PROVISIONS OR REQUIREMENTS CALLED FOR IN CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
3. THE PROJECT SHALL COMPLY WITH THE CURRENTLY ADOPTED INTERNATIONAL FIRE CODE, INCLUDING SECTION 903 AUTOMATIC SPRINKLER SYSTEM & SECTION D105 AERIAL FIRE APPARATUS ACCESS ROADS.
4. PROPERTY WILL BE SUBJECT TO THE WATER ALLOCATION AND/ OR WATER OFFSET RETROFIT PROVISIONS OF ORDINANCE NO 2002-29 AND RESOLUTION 2002-55 AT THE TIME OF PERMIT APPLICATION OR WATER HOOKUP REQUEST. COMPLIANCE SHALL BE ACHIEVED BY USE OF RETROFIT CREDITS OR WATER TRANSFERS, IF APPLICABLE.
5. COMPLIANCE WITH PROVISIONS OF GUNNISON'S PRAIRIE DOG ORDINANCE SHALL BE COMPLETED PRIOR TO GRADING OPERATIONS.
6. AMERICANS WITH DISABILITIES ACT (ADA) INSPECTION SHALL BE CONDUCTED PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY. THE CONTRACTOR SHALL CONTACT CITY STAFF TO SCHEDULE AN INSPECTION.
7. FENCES, WALLS, OR OTHER OBSTRUCTIONS SHALL NOT BE PLACED OR CONSTRUCTED ACROSS PUBLIC SANITARY SEWER EASEMENTS, EXCEPT WHERE SHOWN AS NEEDED.
8. UTILITY EXPANSION CHARGES (UEC) SHALL BE PAID AT THE TIME OF BUILDING PERMIT APPLICATION FOR EACH LOT BY CONTACTING THE CITY OF SANTA FE PERMIT AND DEVELOPMENT REVIEW DIVISION.
9. ALL PROPOSED CHANGES TO THE APPROVED IMPROVEMENTS PLANS SHALL RECEIVE PRIOR APPROVAL BY THE CITY OF SANTA FE.
10. ALL PROPOSED IMPROVEMENTS WILL COMPLY WITH THE CURRENT CoSF WATER CONSERVATION STAGE.
11. LANDSCAPE DESIGN SHALL COMPLY WITH APPLICABLE PROVISIONS OF SFCC SECTION 14-8.4.
12. PROPERTY DEVELOPMENT MAY BE SUBJECT TO THE PROVISIONS OF SECTION 14-8.4(F)(5) "PRESERVATION OF EXISTING TREES" PER THE LAND USE DIRECTOR.
13. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF COSF ORD. NO. 2008-02 (IMPACT FEES).
14. PROPERTY DEVELOPMENT, BOTH PUBLIC AND PRIVATE OWNERSHIP, SHALL COMPLY WITH THE COSF ORDINANCE NO 2002-20 (TERRAIN AND STORMWATER MANAGEMENT) AT THE TIME OF BUILDING PERMIT APPLICATION.
15. FIRE DEPARTMENT ACCESS SHALL BE MAINTAINED THROUGHOUT ALL DEVELOPMENT CONSTRUCTION PHASES, PER IFC 1410.1.
16. AN APPROVED WATER SUPPLY FOR FIRE PROTECTION, EITHER TEMPORARY OR PERMANENT, SHALL BE MADE AVAILABLE AS SOON AS COMBUSTIBLE MATERIAL ARRIVES ON THE SITE, PER IFC 1412.1.
17. PERMANENT TRAFFIC CONTROL DEVICES SHALL BE INSTALLED BY THE DEVELOPER PER APPROVED PLAN.
18. THIS DEVELOPMENT LIES OUTSIDE OF A CITY OF SANTA FE HISTORIC DISTRICT.
19. THE LAYOUT SHOWN HEREON IS CONCEPTUAL AND MAY BE MODIFIED AS PART OF THE DEVELOPMENT PLAN PROCESS WITHOUT THE NEED FOR A MASTER PLAN AMENDMENT.

General Plan 1999 Chapter 1

Introduction and General Plan Themes

1

INTRODUCTION AND GENERAL PLAN THEMES

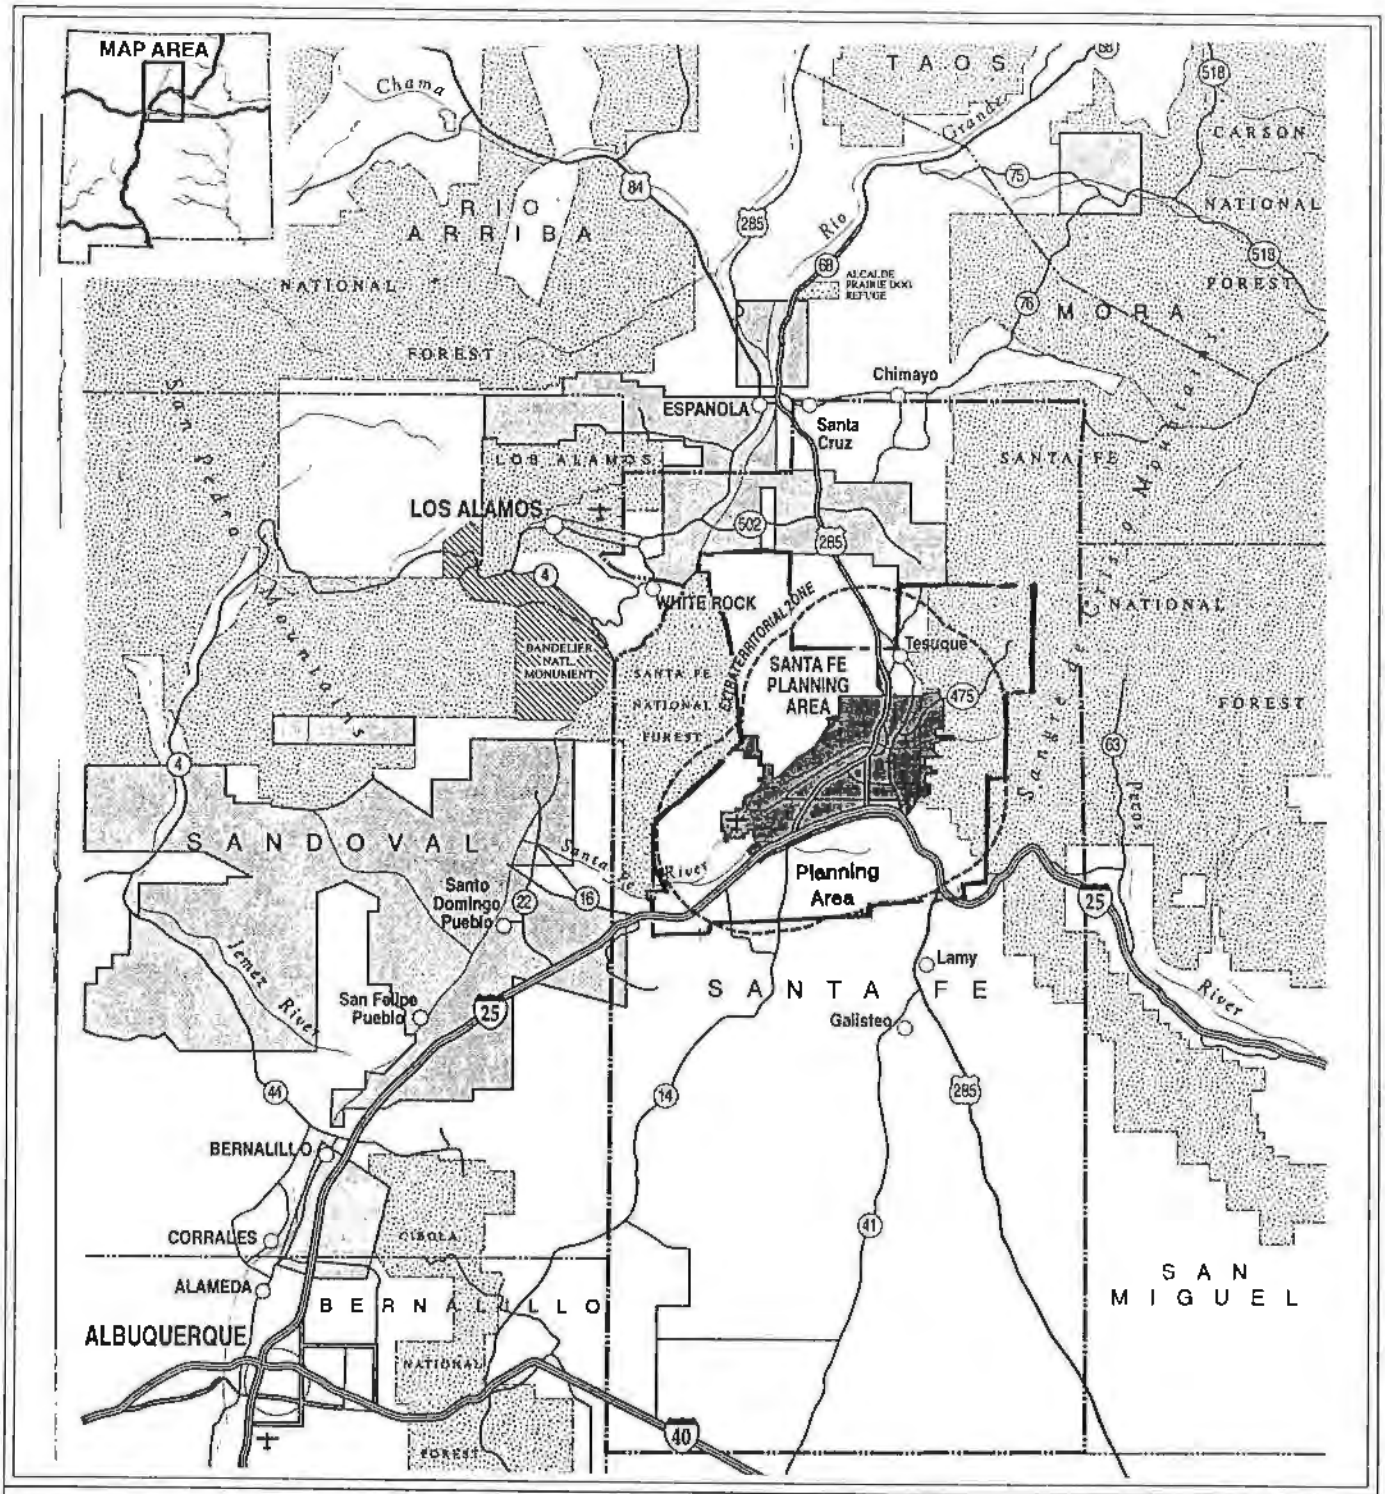
1 INTRODUCTION AND GENERAL PLAN THEMES

The City of Santa Fe and its surrounding region face many pressing planning challenges—from protecting a rich cultural heritage and magnificent physical setting to meeting the demand for affordable housing and reducing traffic congestion. This document attempts to embrace all segments of the city's population and guide the city toward its four-hundredth anniversary. This document replaces the *1983 General Plan* as amended and serves as the city's statement of direction for physical development and conservation.

1.1 SCOPE AND PURPOSE

Because this is a comprehensive, long-term plan for the physical development and conservation of Santa Fe, it lies at the heart of community decisionmaking. It provides guidance for development proposals, capital improvements, annexation, and extension of services.

This General Plan:



- Outlines a vision through the Plan themes that reflects the aspirations of the community;
- Establishes a basis for judging whether development proposals and public projects are consistent with the Plan themes;
- Provides for projects that will enhance the character of the community, preserve critical environmental resources, and minimize hazards;
- Provides the basis for establishing and setting priorities for implementing programs and regulations; and
- Provides the basis for nurturing a vital community and reaching out to all segments of the population.

To ensure that a variety of city actions are consistent with the General Plan, regular on-going use of the Plan is essential. Because the Plan is both general and long-range, there will be circumstances and instances when detailed studies are necessary to implement it.

This document represents the goals and desires of the Santa Fe community as a whole and should be recognized as the city's foremost public statement about Santa Fe's future.

1.2 PLANNING AREA BOUNDARIES

- Figure 1-1 depicts the regional location of the planning area, and Figure 1-2 depicts the urban planning area and urban growth boundary which includes:
- All land within the current city limits;
- Land to the north adjacent to Highway 285;
- Land to the east between the city limits and Santa Fe National Forest;
- Land to the south between the city limits and along Interstate-25; and

- Land to the west including the Municipal Airport, Regional Landfill, Municipal Recreation Complex, and along the Santa Fe Relief Route, Agua Fria Area, excluding the Agua Fria Traditional Historic Community.

1.3 PLAN ORGANIZATION

- **Themes.** The policies within this document reflect 14 overall themes that closely track public comments. The themes are representative of citywide concerns and lay the foundations for the guiding and implementing policies.
- **Guiding Policies** are at the beginning of each chapter and state the city's goals and philosophy. The guiding policies describe ways or methods that the themes listed in each chapter can be achieved.
- **Implementing Policies** are at the end of each chapter and represent commitments to specific actions. They may refer to existing programs or call for establishment of new ones.
- **Standards** are set out in certain chapters and represent policies that can be mapped or measured.

  Together, themes, guiding and implementing policies, and standards articulate the vision for the City of Santa Fe.
- **Policy Numbering System.** Policies in this document are organized using a numbering system tied to sections, with a letter designation to distinguish guiding policies from implementing policies. For example, the first guiding policy in Section 3.4 is numbered 3-4-G-1 and the first implementing policy is 3-4-I-1. Thus, each policy in the General Plan has a discrete number. Where the same topic is addressed in more than one chapter, sections and policies are cross-referenced.
- **Explanatory Material or Commentary**, set in *italic*, accompanies some policies. This explanatory material provides background information or guides General Plan implementation.

1.4 PLANNING PROCESS

The city's planning process includes monitoring and updating the General Plan and preparing more detailed plans, such as resource management plans, neighborhood plans, and other special plans. An Annual General Plan Report will provide an overview of the status of the General Plan and its implementation programs.

Amendments to the General Plan

This document is the heart of the planning process. It is intended to be a living document and, as such, will be subject to more site-specific and comprehensive amendments over time. Amendments also may be needed from time to time to conform to state or federal law passed since adoption and to eliminate or modify policies that may have become obsolete or unrealistic because of changed conditions (such as completion of a task or project, development on a site, or adoption of an ordinance or plan). This document may also incorporate by reference other detailed studies and plans that may be prepared.

While the General Plan should be flexible enough to respond to changed conditions and amended over time to keep it current, it should not be amended so frequently as to diminish its authority. Amendments to the Plan should be limited to twice a year, although each amendment may include more than one change.

Neighborhood and Community Planning

To provide specific direction for development in certain geographic areas, this document calls for preparation of detailed community plans and neighborhood plan districts.

Community plans and neighborhood plan districts will provide specific design guidelines and standards for the conservation and enhancement of neighborhoods and other areas possessing distinctive features, opportunities, or characters. Community plans and neighborhood plan districts would be tailored to individual areas and needs. All community plans will have authority only upon adoption by the City Council and will still be required to be consistent with the General Plan. A neighborhood plan district requires considerable community consensus and planning effort with regulatory power.

Resource Management Plans

To protect sensitive environmental resources, this document requires preparation of resource management plans before any subdivision or development may be approved that would affect certain sensitive biological resources. The locations of these resources are mapped in Chapter 8, Natural Resource Management and Conservation. If these plans are prepared as part of specific plans, the City Council may establish fees to recoup plan preparation costs.

Annual General Plan Report

An annual progress report focusing on implementation of the Plan will be prepared by the Planning and Land Use Department and submitted to the Planning Commission, the Joint Planning Policy Commission, and City Council. The Annual Report should include a summary of all General Plan amendments adopted during the preceding year, an outline of upcoming projects, and General Plan issues to be addressed in the coming year, along with a work program and budget.

Public review and comment on the Annual Report can be heard by the Planning Commission and City Council at regularly scheduled public hearings.

Five-year Review

The city will undertake a comprehensive review of the General Plan every five years after adoption. The five-year review will include:

- Comprehensive evaluation of General Plan policies;
- Analysis of the effectiveness of implementation programs and strategies initiated to carry out the Plan;
- Review of five-year growth trends and reassessment of future urban land needs in light of the Urban Area's carrying capacity and available land inventory; and

- Systematic assessment of the resource based threshold, environmental standards, and resource management plans.

The focus of this Five-year Review will be to determine how well the General Plan has performed—whether policies related to development and environmental conservation have been effective. A report summarizing city staff findings and recommendations will be circulated for public comment and then presented to the Planning Commission. The Planning Commission will review the Five-year Review report and make a recommendation to the City Council. Public review and comment on the Five-year Review can be heard by the Planning Commission and City Council at regularly scheduled public hearings.

1.5 BACKGROUND STUDIES

A comprehensive analysis of existing conditions and major planning options for the City of Santa Fe Urban Area, and the Extraterritorial Zone was performed prior to the preparation of this document (1994 - 1995). Major documents produced as a result of the process leading to the General Plan include:

- *Public Outreach and Issues Identification: Summaries of Public Meetings and Survey Responses for the Urban Area*, August 1994;
- *Public Outreach and Issues Identification: Summaries of Public Meetings and Survey Responses for the Extraterritorial Area*, December 1994;
- *Working Paper: Existing Conditions and Planning Issues – Urban Area and Extraterritorial Zone,* June 1995. This 600-page illustrated report provides an evaluation of existing conditions and planning issues in the Urban Area and the Extraterritorial Zone. Analysis and conclusions in the *Working Paper* are based on technical work, including original data collection and fieldwork, and an extensive process of public outreach. Results of the public outreach process are also summarized. A summary version of the *Working Paper* is also available from the city.
- *Sketch Plans,* October 1995. This document includes three sketch plans showing how alternative scenarios or sets of development policies would be reflected in a future land use pattern. It also includes an analysis of the transportation impacts of the alternatives and estimates of infrastructure costs. The *Sketch Plans* were presented to the public in a series of five meetings, some of which were also televised on local cable channel 6.

While these background studies and working papers have guided General Plan preparation, **they do not represent adopted city policy.**

1.6 PUBLIC PARTICIPATION

Throughout the preparation of the General Plan, the city has been committed to active public outreach and participation. Plan policies have been shaped by comments made in public surveys and meetings. Public participation has included:

- **Community Meetings.** At the outset of the General Plan process, in the summer and fall of 1994, 20 public meetings were held (some televised) to receive residents' priorities for the General Plan. Five meetings were held in the fall of 1995 to present the alternative

Sketch Plans to the public. These meetings were attended by over 2,000 people. Comments made at these meetings were recorded and published, and forwarded to the City Council, Planning Commission, and appropriate city departments.

- **Newsletters and Survey.** Newsletters were prepared periodically and distributed to all households and other groups and interested parties. A postage-paid survey questionnaire was sent to each household in the Urban Area and the Extraterritorial Zone as part of the first newsletter, to which over 3,800 households (representing over 9,000 people) responded. The results of the survey were summarized, and all responses collected and made available at libraries and City Hall.
- **Open Houses.** These provided information about the Plan update and were held throughout the process. All public meetings were preceded by open houses, which were also held at high visibility locations such as Villa Linda and De Vargas malls.
- **Cable TV and Video.** Many public meetings were broadcast on local cable channel 6. Tapes of meetings were also made available at libraries and City Hall.
- **Meetings and Hearings.** The public participation process for the General Plan has been extensive. Public meetings were held to receive comments on the draft document; in addition, a public hearing regarding the Plan was held by the Planning Commission and City Council.

1.6.1 RESIDENTS' PRIORITIES FOR THE GENERAL PLAN

Policies have been shaped by active public participation and have resulted from the concerns and ideas presented at numerous public forums. Responses to the survey sent to all addresses in the city and the five-mile Extraterritorial Zone expressed the concerns of the residents. The following tables summarize residents' likes and dislikes about Santa Fe (Tables 1.1 and 1.2), trends that concern them (Table 1.3), and priorities for the General Plan (Table 1.4).

1.6.2 ROUNDTABLE REPORT, VISION SANTA FE, AND URBAN DESIGN GUIDELINES

The issues of concern to Santa Feans today are quite similar to those raised eight years ago when an update to the 1983 Comprehensive Plan was being considered. A brief review of these issues, and questions raised by Vision Santa Fe, a set of goals and policies for the Comprehensive Plan adopted in 1990, provided a useful perspective. These issues along with the Visual Preference Study for the Urban Design Guidelines are used through this document. The Vision Santa Fe states that:

> We must assure that the community's resources and opportunities are distributed more equitably; and that adequate employment opportunities, decent shelter, excellent education, ample recreational opportunities, and other basic human services are provided to nurture all of us. We believe that the beauty and visual resources of our natural environment need to be preserved, protected, enhanced, and made more accessible to all. The tolerance with which we have lived together must be nurtured as part of our great social legacy. We believe it to be essential that growth in and around our city should be complemented by the preservation of neighborhoods and traditional social and cultural patterns.
>
> In conjunction with Santa Fe County and our regional neighbors, diversification of economic resources must be pursued; fulfilling jobs must be created. We want to involve more people in community decision-making, planning, and leadership. We ask to give our children the strength of our traditions as well as broad options for future personal opportunity. Implicit in these concerns is a vision for Santa Fe of what we cherish and wish to preserve.

1.7 GENERAL PLAN THEMES

The policies of this document reflect 14 overall themes that track the results of the public survey. These themes are followed by discussion in *italics*. For purposes of this section the themes are equally weighted. However, the Planning Commission and the governing body have the right to prioritize these themes, either within specific cases or as a matter of general policy.

1.7.1 AFFORDABLE HOUSING

Actively participate in the creation of affordable housing.

Opportunities are provided for housing for all income segments of the population in all areas of the city, while restricting the supply of large lot housing, which belongs in rural areas outside the city and not inside it. Housing affordability will also be aided by not artificially limiting the supply of land or the rate of growth. Active efforts to increase the supply of affordable housing are outlined. Affordable housing is provided close to jobs to promote transit use.

1.7.2 QUALITY OF LIFE

Enhance the quality of life of the community and ensure the availability of community services for residents.

The General Plan seeks to promote interests of the community-at-large over private ones. Tools are provided for the public to be meaningfully involved in ongoing planning and decision making.

1.7.3 TRANSPORTATION ALTERNATIVES

Reduce automobile dependence and dominance.

The General Plan outlines a comprehensive strategy, including structuring of land uses to reduce automobile dependence and policies for neighborhood design which promote transit and alternative modes. The Plan delineates Transit Intensive Corridors that will have high frequency bus service, and locates sites for two intermodal (rail and bus) stations. The Plan also calls for preparation of a Transportation Demand Management Program and parking policies that make Downtown more accessible to local residents.

1.7.4 ECONOMIC DIVERSITY

Develop and implement a comprehensive strategy to increase job opportunities, diversify the economy, and promote arts and small businesses.

The General Plan includes policies to promote economic development and the arts; a strategy is outlined in the Community Economic Development Plan, a separate document maintained by the city. Themes of the strategy include regionalism, sustainability, quality of life, equity of education, economic opportunities, and diversification. The General Plan locates sites for arts and new businesses in a variety of settings.

1.7.5 SUSTAINABLE GROWTH

Ensure that development is sustainable and that growth, conservation, redevelopment, and natural resource protection are balanced.

There is clear consensus that growth should not diminish the quality and diversity of natural resources. Sensitive resources that require protection are mapped in the Plan, and resource-based development standards and project review procedures are established. The General Plan seeks to permit development only upon known and certain availability of water, and requires new growth to pay the costs of securing additional water rights. The Plan calls for adoption of an adequate public facilities ordinance.

1.7.6 REGIONAL PERSPECTIVE

Maintain a regional growth management perspective and work with other private and governmental entities towards that goal.

The destinies of the city and the surrounding areas are intertwined. The General Plan encourages city and other local, state, and federal agencies to work together on policies that are mutually supportive and to maintain consistent standards in the area surrounding the city. The Plan outlines a structure for long-range planning to be anticipatory and for the phasing of growth to minimize infrastructure costs. The Plan calls for preparation and implementation of a Growth Monitoring Program with both short-term and long-term elements.

1.7.7 WATER

Undertake comprehensive efforts to conserve water and ensure adequate supplies with growth.

Growth is likely to increase reliance on imported surface water and require active steps to increase the available water supply. The Plan provides a comprehensive strategy to promote conservation, recycling, and recharge. In addition, the Plan requires the adoption of a Comprehensive Impact Fees Program to pay the costs of capital facilities including water supply. Alternative methods of allocating the costs of securing and providing additional water to new water system customers will be examined in terms of those alternatives' projected impact on existing and new residents and businesses, impacts on affordability and other growth management objectives expressed in this plan, requirements for additional customers, and ways cost impacts could be mitigated.

1.7.8 CHARACTER

Maintain and respect Santa Fe's unique personality, sense of place, and character.

Increasing travel and communication have diminished the remoteness that Santa Fe's high desert location once afforded. One of the country's oldest cities, the city today faces the prospect of being overwhelmed by run-of-the-mill late twentieth century development. Residents have unequivocally stated that new growth should not erode the qualities that contribute to Santa Fe's unique character and ambiance. The General Plan delineates an Urban Growth Boundary and calls for stronger urban/rural edges. Land use and urban design standards, and guidelines for new and infill development are also included.

1.7.9 URBAN FORM

Promote a compact urban form and encourage sensitive/compatible infill development.

Promotion of a compact urban form has been a major criteria in selecting new growth areas. Growth and reintensification areas have been selected to minimize distances between different parts of the city, and between job centers and residential areas. Incentives are provided to promote infill development.

1.7.10 COMMUNITY-ORIENTED DOWNTOWN

Put community activities back into Downtown.

The loss of the Plaza area as a center of community activity and services is a major concern of many residents. While establishments such as drug, grocery, and small-scale service stores serve residents and office workers, they are unable to survive given the high rents that proliferation of tourism-oriented establishments have caused. The Plan outlines economic development components and steps to ensure that these vital activities can return to and survive in Downtown and are easily accessible to residents. Creation of a Public Market in Downtown is also identified.

1.7.11 COMMUNITY-ORIENTED DEVELOPMENT

Orient new development to the community; foster public life, vitality, and community spirit.

Plan policies call for new development to be oriented to established neighborhoods, to urban context, to pedestrians, and to promote active street and outdoor life. Urban design standards are offered that seek to prevent neighborhoods from being isolated from each other but to maintain a continuum of urban fabric, particularly regarding public access and vehicular/pedestrian circulation. Parks, open space, and neighborhood services are located within neighborhoods.

1.7.12 MIXED USE

Provide a mix of land uses in all areas of the city.

The General Plan provides a mix of compatible uses that fulfill everyday retail and service needs in existing and new neighborhoods. This urban structure affirms Santa Fe's traditional development pattern.

1.7.13 REVIEW PROCESS

Streamline the planning and development review processes.

Greater certainty in the planning process will benefit residents and project proponents, and facilitate long-range capital improvements planning. The General Plan proposes establishing thresholds and procedures for detailed environmental and neighborhood impact analysis. The approval process for small and routine projects that do not exceed the minimum thresholds will be "streamlined" by requiring only administrative review tracks rather than public hearings.

Neighborhood participation in the planning process is assured through public review and approval of projects by the Planning Commission, Summary Committee, Board of Adjustment, and the Governing Body.

1.7.14 IMPLEMENTATION

Ensure consistency between the General Plan, implementing ordinances (including zoning and impact fees), and the Capital Improvements Program (CIP).

With this General Plan, the city is committing itself to consistency between the General Plan and the implementing programs and regulations, including zoning and subdivision regulations and the CIP. Criteria and procedures to ensure consistency between the General Plan and Zoning Ordinance are also established, including an orderly process for General Plan amendments.

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2025-11028
2904 Rufina St General Plan Amendment
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, changing the Future Land Use designation from Industrial and Business Park to Community Commercial.

In related Case #2025-11029, the Applicant requests a rezoning for Lot 3 at 2904 Rufina St, comprising approximately 3.87-acres, from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).

Additionally, in related Case #2025-11030, the Applicant requests approval of a Master Plan to construct a youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.2(E) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the General Plan Amendment request.
2) The Planning Commission heard Case #2025-11028 concurrently with Cases #2025-11029 and #2025-11030.
3) SFCC 1987 Section 14-3.2(D) sets out procedures for amendments to the general plan and requires the Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
4) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
5) The Applicant attended a pre-application conference on December 12, 2024.
6) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.

7) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
8) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve a General Plan Amendment.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose an amendment to the general plan, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 ("Submittal Requirements").
4) Pursuant to SFCC 1987 Section 14-3.2(B)(2)(b), the general plan must first be amended before approval of a change in zoning district designation that is inconsistent with the land use classification shown on the general plan's future land use map.
5) The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
6) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development with improvements by the Applicant.
7) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several themes and policies, including but not limited to, quality of life, economic diversity, community-oriented development, and infill development.
8) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(c), the Commission finds that:
   a) The amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation creates uniformity with nearby parcels.
   b) The amendment affects an area greater than two acres. The subject parcel is 3.87-acres.
   c) The amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change allows for a rezoning of the parcel to C-2 (Case #2025-11029) and a Master Plan for a youth center (Case #2025-11030); encouraging redevelopment of the infill site which is anticipated to bring

broader economic benefits such as employment and expanded services to serve the general public.

9) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(d), the Commission finds the amendment to align with the requirements of 14-3.2(E)(1)(c) while also promoting general welfare.
10) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the Commission finds that the proposed amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(g), the Commission finds that the proposed amendment does not conflict with existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's themes and policies.
13) Pursuant to SFCC 1987 Section 14-3.2(E)(2)-(3), the Commission finds that the additional criteria specific to amendments to the Land Use Policies sections of the General Plan and Neighborhood Plans are not applicable to this case because the proposal does not amend the land use policies section of the General Plan nor adopt a Neighborhood Plan.
14) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
15) The Applicant met the applicable Submittal Requirements.
16) The Commission recommends approval of the requested General Plan Amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the general plan amendment as requested in the Application for Case #2025-11028.

Case #2025-11029
2904 Rufina St Rezoning from I-1 and I-2 to C-2
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests rezoning from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) on Lot 3 at 2904 Rufina St, approximately 3.87-acres ("Project").

In related Case #2025-11028, the Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, to change the Future Land Use designation from Industrial and Business Park to Community Commercial.

Additionally, in related Case #2025-11030, the Applicant requests approval of a Master Plan to construct a youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres.

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission ("Commission") hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.5(C) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2) The Planning Commission heard Case #2025-11029 concurrently with Cases #2025-11028 and #2024-11030.
3) SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
4) The property is approximately 3.9-acres, located at 2904 Rufina St.
5) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
6) The Applicant attended a pre-application conference on December 12, 2024.
7) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.

8) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
9) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve an Ordinance for a Rezoning from I-1 and I-2 to C-2.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose the rezoning of the Property. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 ("Submittal Requirements").
4) Pursuant to SFCC 1987 Table 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Commission has the authority to review and recommend the Governing Body approve or deny the rezoning request.
5) SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and transmit the application, including any plans, to the Governing Body, together with a recommendation as to findings and conclusions, desirable changes and recommendations for approval or disapproval.
6) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Commission finds:
   a) There is no mistake in the original zoning.
   b) The Siler-Rufina area has seen increasing rezonings from industrial to commercial that have changed the character of the area.
   c) A rezoning from I-1 and I-2 to C-2 zoning would align with the intent of the General Plan and the Future Land Use of the parcel as "Community Commercial," as proposed in the General Plan Amendment for this site (Case #2025-11028).
7) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Commission finds that the Applicant submittal is a complete application as required by Chapter SFCC 1987, 14-3.5(C) "Approval Criteria," and the rezoning request does meet all rezoning approval criteria required by Chapter 14 SFCC 1987, Subsection 14-3.5(C).
8) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Commission finds that the applicant addressed compliance to General Plan Themes and Policies to allow for a change from I-1 and I-2 to C-2. The Rezoning request satisfies all rezoning approval criteria.

9) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Commission finds the Rezoning request provides sufficient information to address 14-3.5(C)(1)(d): the Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposed to meet the needs of the community while being served by sufficient infrastructure.
10) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the Commission finds that the existing and proposed infrastructure in the associated Master Plan (Case #2025-11030), such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the proposed youth center use with improvements by the Applicant.
11) Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Commission finds:
    a) The prevailing use and character of the Rufina St area is a mix of industrial, commercial, and multi-family developments. The rezoning from industrial to commercial creates consistency with adjacent parcels to the south while aligning with general plan themes and policies.
    b) The subject property is 3.87-acres, greater than the 2-acres required.
    c) C-2 zoning creates consistency with parcels to the south, indicating that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Further, redevelopment of this site for a future youth center (Case #2025-11030), as proposed, is anticipated to bring broader economic benefits such as employment and expanded services to serve the general public interest.
12) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
13) The Commission has the power and authority to review and recommend the Governing Body approve Case #2025-11029 2904 Rufina St Rezoning from I-1 and I-2 to C-2.
14) The Applicant met the applicable Submittal Requirements.
15) The Commission recommended the Governing Body approve the requested rezoning because the application met all applicable code criteria for approval.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2025, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the rezoning as requested from I-1 and I-2 to C-2, as requested in the Application for Case #2025-11029.

Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests a Master Plan to develop an approximate 55,478 square foot youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres ("Project").

In related Case #2025-11028, the Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, to change the Future Land Use designation from Industrial and Business Park to Community Commercial.

Additionally, in related Case #2025-11029, the Applicant requests a rezoning for Lot 3 at 2904 Rufina St, comprising approximately 3.87-acres, from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission ("Commission") hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.9(D) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the Master Plan.
2) The Planning Commission heard Case #2025-11030 concurrently with Cases #2025-11028 and #2024-11029.
3) SFCC 1987 Section 14-3.9(B) sets out applicability standards, that a Master Plan is required in conjunction with rezoning applications in certain districts as provided in Article 14-4 (Zoning Districts). Case #2025-11029 is the associated rezoning application, which requested to rezone an approximate 3.87-acre parcel at 2904 Rufina St from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).
4) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
5) The Applicant attended a pre-application conference on December 12, 2024.

6) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.
7) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
8) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve a Master Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose the Master Plan of the Property. Pursuant to SFCC 1987 Section 14-3.9(B)(1), A master plan is required in conjunction with rezoning applications in certain districts as provided in Article 14-4 (Zoning Districts).
4) Pursuant to SFCC 1987 Table 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.9(B)(3), All use and development of land within a master-planned area must comply with the provisions of the adopted master plan. Final actions by the governing body, land use boards and the land use director concerning rezonings, subdivisions, special use permits, development plans and construction permits shall include a specific finding or determination that the action complies with all applicable provisions of the master plan.
5) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a-d), the Commission finds:
   a) The master plan is consistent with the general plan;.
   b) development of the master plan area will contribute to the coordinated and efficient development of the community;
   c) development of the master plan area will contribute to the coordinated and efficient development of the community; and
   d) the existing and proposed infrastructure , such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.
6) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a-d), the Commission finds that the Applicant submittal is a complete application as required by Chapter SFCC 1987, 14-3.9(D)(1) “Approval Criteria,” and the Master Plan request does meet all approval criteria required by Chapter 14 SFCC 1987, Subsection 14-3.9(D)(1).
7) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(d), the Commission finds that the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities,

such as fire stations and parks, will be able to accommodate the proposed youth center use with improvements to be completed by the Applicant.

8) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
9) The Commission has the power and authority to review and recommend the Governing Body approve Case #2025-11030 2904 Rufina St Master Plan.
10) The Applicant met the applicable Submittal Requirements.
11) The Commission recommended the Governing Body approve the requested Master Plan because the application met all applicable code criteria for approval, subject to the conditions and technical corrections recommended by staff.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2025, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the Master Plan as requested in the Application for Case #2025-11030, subject to the Conditions of Approval and Technical Corrections listed in Attachment A of Staff's Report, with the following additional condition: "Applicant shall include a phasing plan at the time of Development Plan submittal, should the applicant wish to phase this project."

Conditions of Approval and Technical Corrections

1. Table of Conditions of Approval
2. Table of Technical Corrections
3. Development Review Team Compiled Comments

Conditions of Approval & Technical Corrections

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
1	Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects: All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres All city projects over two (2) acres in size. All city park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Archaeology	Prior to building permit approval
2	Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Current Planning	Prior to public hearing (COMPLETED)
3	~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review.	Current Planning	~~Prior to public hearing~~ Prior to development plan approval
4	Add Case #2025-11030 to Master Plan sheets	Current Planning	Prior to public hearing (COMPLETED)
5	Shall comply with the most currently adopted International Fire Code	Fire	Prior to public hearing (COMPLETED)
6	Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021	Fire	Prior to public hearing (COMPLETED)

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
7	Shall verify compliance with section D105 Aerial Fire Apparatus Access Road as per IFC 2021	Fire	Prior to public hearing (COMPLETED)
8	Historic drainage calcs should include offsite flows onto property (if applicable)	Rivers and Watershed	Prior to Development Plan approval (In drainage report)
9	Provide a full drainage report	Engineering	Prior to Development Plan approval
10	Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.	Engineering	Prior to Development Plan approval
11	Include pond sections and show how ponds will overflow.	Engineering	Prior to Development Plan approval
12	Include lighting plan with photometrics	Engineering	Prior to Development Plan approval
13	A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.	Engineering	Prior to Development Plan approval
14	The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Wastewater	Prior to recordation
15	All 4-inch sewer lines shall connect directly to the public sewer lines	Wastewater	Prior to recordation
16	The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Wastewater	Prior to recordation
17	An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Water	Prior to building permit approval
18	An approved Water Plan will be required for all new public water infrastructure and fire services.	Water	Prior to development plan approval
19	A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	Water	At time of development

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
20	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	Water	At time of development
21	Each lot shall be served by a separate City water service.	Water	At time of development
22	See attached comments response letter dated 9/25/25 from Wilson & Company regarding Bohannon Huston, initial draft Traffic Impact Study dated 8/725	Traffic	Prior to public hearing (COMPLETED)
23	See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25	Traffic	Prior to Development Plan Approval
24	Elevations submitted for the development plan shall include a detailed Points analysis that is intergraded with the Elevations for review.	Current Planning	At time of Development Plan

Technical Corrections			
#	**Technical Correction**	**Dept. or Division**	**To be completed:**
1	Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
2	Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
3	Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
4	Include attached notes on development plan.	Engineering	Prior to recordation of Development Plan
5	The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe	Wastewater	-
6	Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property	Water	Prior to water plan approval

Cases #2025-11028, 2025-11029, and 2025-110330. 2904 Rufina St General Plan Amendment, Rezoning, and Master Plan. JenkinsGavin, Inc, Agent, for Girls Inc of Santa Fe, Applicant, requests a General Plan Amendment, Rezoning, and Master Plan for the property at 2904 Rufina St. This property is comprised of 2 parcels totaling approximately 4.85 acres, currently zoned I-1 (Light Industrial), I-2 (General Industrial), and C-2 (General Commercial).

This application was received on August 11, 2025 and has been reviewed by Planning Division staff (Staff) and the City's Development Review Team (DRT). Attached are the initial DRT review comments including conditions of approval and technical corrections. I would like to highlight and summarize the following key items:

A. Initial Planning Division Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by Planning Division staff and the following necessary revisions have been identified:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Submit a parking analysis at time of Development Plan
5. All utilities shall be underground

Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review or place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review

B. Initial DRT Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by the DRT and the following necessary revisions have been identified:

1. Shall comply with the most currently adopted International Fire Code
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
4. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services
5. An approved Water Plan will be required for all new public water infrastructure and fire services.
6. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service
7. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.
8. Each lot shall be served by a separate City water service.
9. Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.
10. Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.
11. Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.
12. Archaeological review will be required if the applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc.
    a. 14-3.13(B)(3) Suburban Archaeological Review District
        i. In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects:
        ii. All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres
        iii. All city projects over two (2) acres in size.
        iv. All city park projects over one (1) acre in size.
    b. Utility Mains:
        i. An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.
13. Provide full drainage report.

14. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.
15. Include pond sections and show how ponds will overflow
16. Include lighting plan with photometrics
17. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.
18. Include attached notes.
19. Historic drainage calcs should include offsite flows onto property (if applicable)
20. The 6-inch sewer service line(s) will be required to connect to a sewer manhole
21. All 4-inch sewer lines shall connect directly to the public sewer lines
22. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field
23. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe

The following DRT members did not have comments at this time:

- Parks and Open Space
- Water resources
- Metropolitan Planning organization
- Traffic

The following DRT comments are pending at this time:

- ADA
- Santa Fe Public Schools

C. Prior to Planning Commission, the following DRT comments must be satisfied:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Shall comply with the most currently adopted International Fire Code
5. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
6. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
7. An approved Water Plan will be required for all new public water infrastructure and fire services.
8. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.

The full DRT memos are attached for your review. Once revised submittals to the application are accepted, a public hearing date may be scheduled. Please let me know if you have any questions or concerns.

Thank you,

Alexa Hempel

Comment Form for
Planning Commission

Date: August 19, 2025

DRT Member: Fire Marshal Geronimo Griego

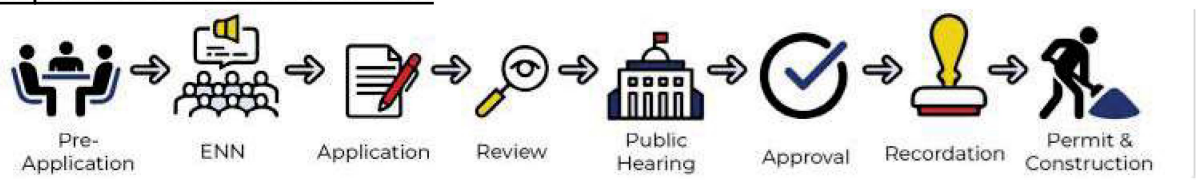
Dept/Div: Fire Marshal's Office

Case No.: 2025-11028,11029, & 11030

Case Planner: Alexa Hempel, Senior Planner

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall comply with the most currently adopted International Fire Code.	*Prior to Public Hearing*	
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021.		
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.

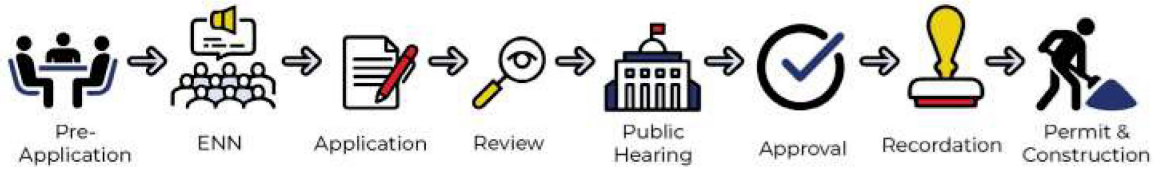
Explanation of Conditions or Corrections (if needed):

1. Verify that the right city adopted code is reference in documents for submission. International Fire Code (IFC) 2021.
2. Shall verify that building is provided with automatic fire sprinklers for proposed layout.
3. Shall verify two points of access to ladder building for proposed site layout conditions.

Development Review Team (DRT)
Comment Form

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Development Review Process Flow Chart

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. Provide full drainage report.	Prior to Development Plan approval	
2. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.		
3. Include pond sections and show how ponds will overflow.		
4. Include lighting plan with photometrics		
5. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1. Include attached notes.		
2.		
3.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

Form Updated: March 2024

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

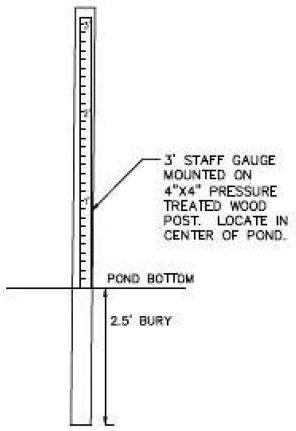
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Historic drainage calcs should include offsite flows onto property (if applicable)	Include in drainage report with development plan	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1.		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Existing vs Proposed Drainage Areas: looks like some ponding and drainages will be filled due to proposed building sites and new amenities; how is the developer planning to accommodate the excess water created by both the increase in imperviousness and the filling of these ponds? How do they plan to get the water to the new ponds, will it be piped? Will buildings have gutters and cisterns? Will landscaped areas be swaled to hold water? Etc…

Historical drainage: are they making sure to account for the entire basin in their drainage calcs, including offsite flows entering the property, esp. off the parking lot behind the school to the south if there is any?

CC: Robert Luna, PE, PTOE, Traffic Engineering Practice Lead, SW Region

Date: 10/17/2025

Re: Girl's Inc. TIA Review

Wilson and Company has reviewed the Revised DRAFT TIA dated October 6, 2025 for the Girl's Inc. Development prepared by Bohannan Huston and have the following comments. Please let me know if you have any questions or require further information.

REPORT COMMENTS

- All original Comments have been addressed
- On page 48 the report states that the common crash type was rear-end collisions for Richards and Rufina however on table 24 the highest crash type is Another Vehicle at an Angle. This should be corrected in the narrative.
- There is a large percentage of crashes that were not classified by Crash Type. The Crash Summary Tables shall also include the percentage of crash types with the "not available or not classified" crash types removed from the total number of crashes. Therefore, showing percentages of total known crash types.
- All developer mitigations shall be shown on the developments site plan.
- For the intersection of Calle del Cielo and Cerrillos Road the report recommends evaluation of a cost share with the COSF due to the spillover occurring in existing condition. Since this LOS is made worse by the added traffic by the developer this mitigation shall be implemented by the developer.

Sincerely,

Philip A Gallegos, PE
Senior Transportation Engineer

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case # 2025-11028/11029/11030

Conditions of Approval:	Must be completed by:	Applicant response**:
1. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Prior to Building Permit Approval	
2. An approved Water Plan will be required for all new public water infrastructure and fire services.	Prior to approval of Development Plan	
3. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	At the time of development	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Each lot shall be served by a separate City water service.	At the time of development	

Technical Corrections:	Must be completed by:	Applicant response**:
1. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.	Prior to Water Plan Approval	

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

MINUTES

REGULAR MEETING OF THE PLANNING COMMISSION
November 6, 2025, AT 6:00 PM

A. ROLL CALL

Commissioners Present:
Chair Janet Clow
Commissioner Scott Barber
Commissioner Matt Embry
Commissioner Sasha McGhee
Commissioner Gurushabad Mirando
Commissioner Thomas (TJ) Rieland

B. PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Commissioner Barber.

C. APPROVAL OF AGENDA

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve the agenda with postponement of the minutes from October 2, 2025, to November 20, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

D. APPROVAL OF MINUTES

1. July 17, 2025

MOTION: Commissioner Embry moved, seconded by Commissioner Rieland, to approve the minutes from the Planning Commission meeting on July 17, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

2. September 4, 2025

MOTION: Commissioner McGhee moved, seconded by Commissioner Mirando, to approve the minutes from Study Session of the Planning Commission on September 4, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

3. September 4, 2025

MOTION: Commissioner McGhee moved, seconded by Commissioner Mirando, to approve the minutes from the Planning Commission meeting on September 4, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

4. September 18, 2025

MOTION: Commissioner Mirando moved, seconded by Commissioner Barber, to approve the minutes from the Planning Commission meeting on September 18, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes

Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

5. October 2, 2025 (Postponed)

MOTION: No motion or vote.

VOTE: None

6. October 16, 2025

MOTION: Commissioner Mirando moved, seconded by Commissioner Rieland, to approve the minutes from the Planning Commission meeting on October 16, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

E. APPROVAL OF FINDINGS/CONCLUSIONS

1. **Case #2024-9320. 7205 Plaza Central Development Plan:** Pax Consulting, Agent, for Zydeco LLC, owner and applicant ("Applicant"), requests approval of a Development Plan for up to 165 units, a clubhouse, swimming pool and neighborhood coffee shop at property address located at 7205 Plaza Central and is zoned C-1 (office and related commercial). It consists of a 7.9-acre lot as the result of a lot line adjustment, zoned C-1 (Alexa Hempel, Case Manager, anhemple@santafenm.gov).

MOTION: Commissioner Mirando moved, seconded by Commissioner Barber, to approve Findings for Case #2024-9320 without changes or corrections.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

F. NEW BUSINESS

1. **Case #2025-11028. 2904 Rufina General Plan Amendment:** JenkinsGavin, Agent, for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a General Plan amendment changing the Future Land Use Map designation for Lot 3, comprising approximately 3.87-acres, located at 2904 Rufina Street, from a duel mapped area of "Industrial" and "Business Park" to "Community Commercial." (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11028, 2904 Rufina General Plan Amendment, as is.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

---

2. **Case #2025-11029. 2904 Rufina Rezoning:** JenkinsGavin, Agent, for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Lot 3 at 2904 Rufina Street, comprising approximately 3.87-acres, from a duel mapped area of "Light Industrial" (I-1) and "General Industrial" (I-2) to "General Commercial" (C-2). (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11029, 2904 Rufina Rezoning, as is.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

3. **Case #2025-11030. 2904 Rufina Master Plan:** JenkinsGavin, Agent, for Girls, Inc., of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a Master Plan of a proposed youth center at 2904 Rufina Street on Lots 3 and 2A, 2-2, totaling approximately 4.27-acres. Lot 3 is approximately 3.87-acres, and Lot 2A, 2-2 is approximately 0.399-acres and is located adjacent to the southwest side of Lot 3. (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

PUBLIC COMMENTS: Seven (7) members of the public were sworn in and gave comments in favor of the 2904 Rufina Street Master Plan.

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11030, 2904 Rufina Master Plan, as is.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

4. **Case #2025-10685. Tierra Contenta Preliminary Subdivision Plat:** JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant"), requests review and approval of a Preliminary Subdivision Plat for 16 development tracts and six open space tracts for a total of 22 tracts and Innovative Street Design. The subject lots are 216.5 acres and are located at 6120, 6130, 6150, and 6135 Paseo del Sol. The lots are zoned Planned Residential Community District (PRC) and lie within the Suburban Archaeological Review District. (Rebekah Clouser, Case Manager, reclouser@santafenm.gov).

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve Case #2025-10685, Tierra Contenta Preliminary Subdivision Plat, subject to conditions of approval and technical corrections, and on the condition that the neighborhood park design and drainage ponding fencing shall be postponed in order to allow the Applicant and staff to discuss and resolve prior to final subdivision plat.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

---

5. **Case #2025-10688. Tierra Contenta Preliminary Subdivision Plat Variance (Slopes):** JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant"), requests a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 27,179 square feet. The subject lots are approximately 216.5 acres and located at 6120, 6130, 6150, and 6135 Paseo del Sol, zoned Planned Residential Community District (PRC). (Rebekah Clouser, Case Manager, reclouser@santafenm.gov).

PUBLIC COMMENTS: One (1) member of the public was sworn in and gave comment not in favor of the Tierra Contenta Preliminary Subdivision Plat Variance.

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve Case #2025-10688, Tierra Contenta Preliminary Subdivision Plat Variance (Slopes), subject to conditions of approval and technical corrections.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

---

6. **Case #2025-10690. Tierra Contenta Preliminary Subdivision Plat Variance (Significant Trees):** The request for a variance from SFCC 14-8.4(F)(5) for the removal and preservation of significant trees was withdrawn by JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant").

---

7. **Case #2025-11006. Vistas de la Sierra Phase 3:** Liaison Planning Services, Inc., Agent, for Forestar (USA) Real Estate Group, Inc., owner and applicant ("Applicant"), requests review and approval of a Preliminary Subdivision Plat, per § 14-3.7(B)(3) of the Land Development Code, for a 128-lot residential subdivision. The subject property is a 24.423-acre parcel located at 3800 Governor Miles Road and west of Richards Avenue. The proposed subdivision is Phase 3 and consists of 2 separate lots. Tract #A3 is 16.653 acres and Tract 3A4 is 7.77 acres. The subject property is zoned R-5 (residential 5 units per acre). (Claudia Kath, Case Manager, cmkath@santafenm.gov).

PUBLIC COMMENTS: Seven (7) members of the public were sworn in and gave comments not in favor of Vistas de la Sierra Phase 3.

MOTION: Commissioner McGhee moved, seconded by Commissioner Rieland, to approve Case #2025-11006, Vistas de la Sierra Phase 3, subject to conditions of approval and technical corrections, as well as the additional four conditions outlined by staff in discussion with the Applicant, and on the condition that the Applicant agree to limit the seven houses abutting Nava Ade Homeowners Association to single-story homes.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes

Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

CITY OF SANTA FE, NEW MEXICO

RESOLUTION NO. 2026-

A RESOLUTION

AMENDING THE GENERAL PLAN'S FUTURE LAND USE MAP DESIGNATION FROM INDUSTRIAL AND BUSINESS PARK TO COMMUNITY COMMERCIAL FOR AN APPROXIMATELY 3.87 ACRE PROPERTY OWNED BY GIRLS, INC., OF SANTA FE, AT 2904 RUFINA STREET (CASE NO. 2025-11028).

WHEREAS, the agent for the owner of Lot 3 at 2904 Rufina Street (the "Subject Property"), as shown in Attachment A, submitted an application to the City of Santa Fe ("City") to amend the General Plan Future Land Use Map from "Industrial" and "Business Park" to "Community Commercial"; and

WHEREAS, pursuant to SFCC 1987, Section 14-3.2(B)(2)(b)[1], the Governing Body must amend the General Plan before approving a change to a zoning district designation that is inconsistent with the land use classification shown on the General Plan's Future Land Use Map; and

WHEREAS, pursuant to NMSA 1978, Section 3-19-9(A), and SFCC 1987, Section 14-3.2(E)(1)(f)[2], the City may amend its General Plan with the general purpose of guiding and

[1] The provisions now appear at SFCC 1987, Section 14-2.1C.2(II), effective January 1, 2026, following recodification.
[2] The provisions now appear at SFCC 1987, Section 14-2.1C.5(I)(f), effective January 1, 2026, following recodification.

accomplishing a coordinated, adjusted, and harmonious development of the City which will, in accordance with existing and future needs, best promote health, safety, morals, order, convenience, prosperity or the general welfare as well as efficiency and economy in the process of development; and

WHEREAS, SFCC 1987, Table 14-2.1-1[3] requires the Planning Commission to review and recommend proposed revisions and amendments to the General Plan to the Governing Body; and

WHEREAS, the Planning Commission at its November 6, 2025, meeting voted to recommend to the Governing Body a change in the General Plan Future Land Use Map from Industrial and Business Park to Community Commercial; and

WHEREAS, on February 25, 2026, the Governing Body held a public hearing on the proposed amendment; reviewed the staff report, the recommendation of the Planning Commission, the evidence presented at the public hearing; and the public testimonies in support of Girls, Inc., of Santa Fe and its impact on the community; and determined that the proposed amendment to the General Plan, as recommended by the Planning Commission, meets the approval criteria set forth in SFCC 1987, Section 14-3.2(E)[4]; and

WHEREAS, reclassification of the Subject Property would allow for uses that are consistent with the General Plan, as amended by Resolution No. 2001-82, and the prevailing uses and character of the area; and

WHEREAS, the Subject Property has suitable access to and availability of necessary infrastructure; and

WHEREAS, reclassification of the Subject Property will enable future development of uses that will serve the surrounding neighborhood.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF SANTA FE that the General Plan Future Land Use Map designation for the Subject Property

[3] The provisions now appear at SFCC 1987, Section 14-2.1A, effective January 1, 2026, following recodification.
[4] The provisions now appear at SFCC 1987, Section 14-2.1C.5, effective January 1, 2026, following recodification.

described is amended to change the designation from Industrial and Business Park to Community Commercial, as shown in Exhibit A, attached hereto.

PASSED, APPROVED, and ADOPTED this ___ day of_____, 2026.

DATE: January 16, 2026

TO: Governing Body

VIA: Heather L. Lamboy, Planning and Land Use Director
Maggie Moore, Assistant Land Use Director MRM
Dan Esquibel, Planning Manager

FROM: Alexa Hempel, Planner Senior, Current Planning Division AH

1. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2025-11028. JenkinsGavin, LLC, Agent for Applicant Girls, Inc., of Santa Fe, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use Map designation for +/- 3.87 acres, located at 2904 Rufina St (Lot 3) from Industrial and Business Park to Community Commercial.

2. CONSIDERATION OF BILL NO. 2025-27
Rezoning. Case #2025-11029. JenkinsGavin, LLC, Agent for Applicant Girls, Inc., of Santa Fe, asks the Governing Body to adopt Bill No. 2025-27 to rezone +/- 3.87 acres located at 2904 Rufina St (Lot 3) from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial).

3. CONSIDERATION OF A RESOLUTION
Master Plan. Case #2025-11030. JenkinsGavin, LLC, Agent for Applicant Girls, Inc., of Santa Fe, asks the Governing Body to adopt a Resolution creating a Master Plan for a +/- 55,478 sq ft youth center on +/- 4.27 acres located at 2904 Rufina St (Lots 3 and 2A, 2-2).

I. Planning Commission Recommendations:

On November 6, 2025, the Planning Commission recommended the Governing Body take the following actions:

1. **APPROVE** Case #2025-11028. 2904 Rufina St Lot 3 General Plan Amendment from Industrial and Business Park to Community Commercial.
2. **APPROVE** Case #2025-11029. 2904 Rufina St Lot 3 Rezoning from I-1 and I-2 to C-2.
3. **APPROVE** Case #2025-11030. 2904 Rufina St Lots 3 and 2A, 2-2 Master Plan, subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of Staff's report.

II. Sample Motions:

Three (3) motions will be required, in the following order:

1. **Move to approve or deny** Case #2025-11028, adopting a resolution (the "Future Land Use Map Amendment Resolution") to amend the General Plan Future Land Use Map designation from Industrial and Business Park to Community Commercial for +/- 3.87 acres (Lot 3) located at 2904 Rufina St.

2. **Move to approve or deny** Case #2025-11029, adopting Bill No. 2025-27, changing the official Zoning Map designation from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) for +/- 3.87 acres (Lot 3) located at 2904 Rufina St.

3. **Move to approve or deny** Case #2025-11030, adopting a resolution (the "Master Plan Resolution") for a Master Plan of a +/- 55,478 sq ft youth center on +/- 4.27 acres (Lots 3 and 2A, 2-2) at 2904 Rufina St., subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of Staff's report.

III. Executive Summary

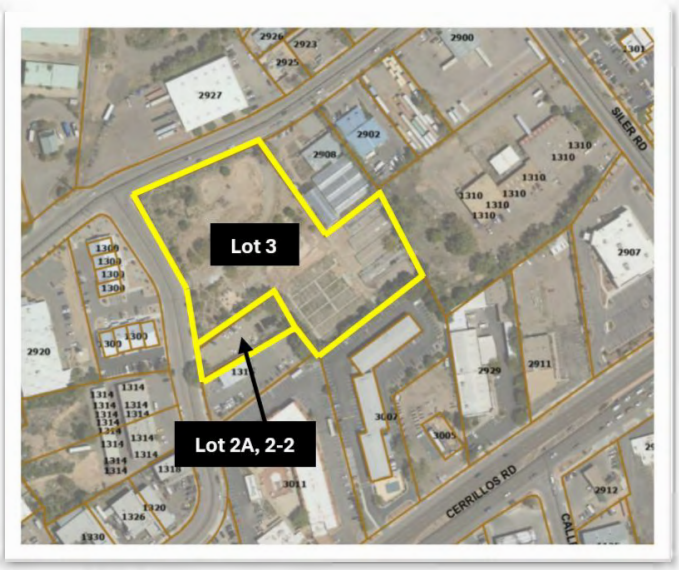

Figure 1 - Site Location

Girls, Inc., of Santa Fe (the "Applicant" or "GISF"), is a non-profit educational institution requesting a general plan amendment, rezoning, and master plan to construct a new educational facility at 2904 Rufina St. Through its agent, JenkinsGavin, LLC, the Applicant requests the general plan amendment (the "Future Lan Use Map Amendment") to change the General Plan Future Land Use Map (the "FLUM") designation on a 3.87-acre parcel (Lot 3 -see Figure 1 – Site Location) from Industrial and Business Park to Community Commercial. The rezoning request is to change the zoning of Lot 3 from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) (the "Rezoning").

Approval of the General Plan Amendment and Rezoning will allow for consideration of a master plan of Lots 3 and 2A, 2-2, totaling +/- 4.27 acres (the "Master Plan"). The Master Plan proposes a +/- 55,478 sq ft youth center including classrooms, a gymnasium, a gathering space, a teen entrepreneurship center, administrative offices, a caretaker's residence, play areas, a greenhouse, a chicken coop, gardens, and forested pathways on the former Santa Fe Greenhouses nursery site.

The Applicant conducted a pre-application conference on December 12, 2024, and an Early Neighborhood Notification ("ENN") meeting on July 23, 2025. No members of the public were

present at the ENN meeting. On November 6, 2025, the Planning Commission held a public hearing to review Cases #2025-11028, 2025-11029, and 2025-11030, during which the Planning Commission heard reports from City Planning and Land Use Department staff (the "Staff"), testimony and evidence from the Applicant, and public comments by interested members of the public. All comments from members of the public were in support of the application and generally expressed gratitude for the impact of Girls, Inc., on uplifting and supporting the Santa Fe community, as well as excitement for the opportunity for Girls, Inc., to expand their services. The Planning Commission found that the Future Land Use Map Amendment, Rezoning, and Master Plan were consistent with the General Plan and City of Santa Fe Code (SFCC), and that all approval criteria had been met.

The Planning Commission recommended that the Governing Body approve Case #2025-11028, the Future Land Use Map Amendment, Case #2025-11029, the Rezoning, and Case #2025-11030, the Master Plan (see Attachment A, "Planning Commission Packet"). On December 4, 2025, the Planning Commission adopted Findings of Fact and Conclusions of Law (Attachments B, C, and D), and Planning Commission Minutes (Attachment E, "Planning Commission Minutes November 6, 2025").

IV. General Plan Amendment Approval Criteria

The City Code requires the Governing Body to review all amendment proposals on the basis of the criteria addressed below and make complete findings of fact "sufficient to show that these criteria have been met" before it recommends approval of any amendment to the general plan. See SFCC 1987, Sec. 14-3.2(E)(1).

Table 1 General Plan Amendment Approval Criteria Analysis

14-3.2(E)(1)(a): **Consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Economic development goals are upheld by the provision of quality childcare programs that support working parents. The 2004 report, Cultivating Santa Fe's Future Economy, by Angelou Economics, recognizes the important role of quality of life in economic development. In Strategy Four: Economic Development, the report states, "The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens." The GISF program is a quality-of-life amenity serving the Santa Fe community and young families, enhancing the attractiveness of Santa Fe for existing residents and newcomers, alike. In addition, GISF will employ approximately 45 staff persons. The new facility will serve the growing southwest part of town, home to a majority of Santa Fe's families. Lastly, the site has existing access via two public rights-of-way and is currently served by public utility infrastructure.*	
Staff Response: Staff concurs that the proposed amendment is consistent with Santa Fe's growth management and economic development goals as outlined in the General Plan, Angelou Report, and the 2008 Economic Development Strategy. The amendment supports the City's efforts to direct growth toward areas with existing infrastructure and services and encourages balanced economic development. Overall, the proposal aligns with the General Plan's vision for sustainable coordinated urban growth and is consistent with Criterion 1.	

14-3.2(E)(1)(b): **Consistency with other parts of the general plan;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment conforms to the following General Plan Themes and Policies:* ***Themes***	

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.
Staff Response: Staff finds that reclassifying Lot 3 as 'Community Commercial' is consistent with the General Plan Themes and Policies listed by the Applicant. The reclassification will allow for a youth center that promotes quality of life for Santa Fe residents and economic diversity for the Siler-Rufina area. Additionally, this project will provide infill development consistent with General Plan Themes and Policies.

14-3.2(E)(1)(c): **The amendment does not:**	**Criterion Met:** (Yes/No)
(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;**	**YES**
Applicant Response: *(i) The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.* *(ii) The subject parcel comprises 3.87 acres. Nevertheless, the property is adjacent to the Community Commercial designation along its south boundary.* *(iii) Contrary to harming surrounding landowners or the general public, this General Plan Amendment, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: (i) The Siler-Rufina neighborhood is home to a mix of industrial, commercial, and non-profit organizations. Reclassifying Lot 3 will allow for continued infill development consistent with the character of this area. This reclassification will also create consistency with lots south of this property that are currently classified 'Community Commercial.' (ii) Staff finds that the subject parcel is 3.87-acres, exceeding the required 2-acres. (iii) The General Plan Amendment to reclassify the lot to "Community Commercial" will create the ability to rezone the lot to "General Commercial," which allows for a variety of uses that have potential to serve the community at large, including the proposed youth center in the Master	

Plan. Reclassifying this lot can also encourage the redevelopment of the infill site, stated as a priority in the General Plan under policy 3-G-3.

14-3.2(E)(1)(d): **An amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment promotes the general welfare, because it will enable the construction of a new GISF youth center, offering after school and summer programs for school-age girls and much-needed support for working parents.*	
Staff Response: The proposed amendment conforms to the requirements of 14-3.2(E)(1)(c), while also promoting general welfare by allowing for the proposed Master Plan use of a youth center, offering quality care to school aged children and accelerating infill development of this site.	

14-3.2(E)(1)(e): **Compliance with extraterritorial zoning ordinances and extraterritorial plans;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *N/A*	
Staff Response: N/A	

14-3.2(E)(1)(f): **Contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Redevelopment of this infill site provides for efficient and economic development, leveraging existing infrastructure, and supporting the harmonious development of Santa Fe. This request not only supports the general welfare of the community by providing Santa Fe families with a safe and reliable place to send their children but is the sole motivation for this effort.*	
Staff Response: Staff agrees with the applicant and finds that reclassifying Lot 3 to 'Community Commercial' supports harmonious infill development that is efficient and consistent with properties in the vicinity which have been rezoned from industrial to commercial and subsequently redeveloped (Ord. #2016-44, #2022-4).	

14-3.2(E)(1)(g): **Consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The City of Santa Fe Land Use and Urban Design Plan recognizes the Siler Neighborhood as a Mixed-Use Corridor, stating, "Development and redevelopment along these corridors should be encouraged to provide greater density of commercial uses…". Furthermore, the Plan encourages the re–use of blighted or failing buildings and businesses. The redevelopment of a former, dilapidated nursery on an infill site in the Siler Neighborhood thoroughly aligns with these objectives. Furthermore, the City of Santa Fe Economic Development Department branded the subject neighborhood as the Siler-Rufina Nexus in a recent report issued to spur investment in the City's Opportunity Zones. In keeping with this effort, the proposed GISF facility is a significant investment in the neighborhood, increasing job opportunities and redeveloping a deteriorated site.*	
Staff Response: Staff agrees with the Applicant's response while additionally acknowledging the previous references to the City's General Plan policies. The proposed change does not conflict with existing city ordinances or regulations and the applicant's Master Plan and future development plan of the site will conform with the City of Santa Fe's Land Use Code and Policies.	

V. Rezoning Approval Criteria

The City Code requires the Governing Body to review all rezoning proposals on the basis of the criteria addressed below, and make complete findings of fact "sufficient to show that these criteria have been met" before it approves a rezoning. See SFCC 1987, Sec. 14-3.5(C).

Table 2 Rezoning Approval Criteria Analysis

14-3.5(C)(1)(a):	**Criterion Met:**
The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning: **(a) one or more of the following conditions exist:** **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	(Yes/No) **YES**

Applicant Response:

(i) *N/A*

(ii) *This area has evolved over the years into a diverse, mixed-use neighborhood of recreational uses, non-profit institutions, a mix of housing types, and various commercial enterprises. The rezone will support the construction of the proposed GISF facility, which aligns well with this current pattern of development.*

(iii) *Rezoning the property to C-2 is more advantageous to the community. A vacant site falling into disrepair creates no community benefit. Redevelopment of this infill site vitalizes the neighborhood and supports the provision of critical community services. Furthermore, the rezone request aligns with the Themes and Policies of the General Plan, as summarized below:*

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

(i) Staff did not find a mistake in the original zoning.

(ii) In recent years, the Siler-Rufina area has seen increasing multifamily residential developments and rezonings from industrial to commercial that have changed the character of

the area (Ord. #2016-44, #2022-4). Commercial establishments and non-profit institutions have also come to occupy many industrial spaces surrounding the property. Staff recognizes a change in the character of the area.
(iii) Staff finds the rezoning of this parcel to "General Commercial" to be more advantageous than the currently vacant industrial site. This change encourages redevelopment of the infill site, and the associated Master Plan proposes a quality-of-life amenity to the community, supported by the General Plan.

14-3.5(C)(1)(b): **All the rezoning requirements of Chapter 14 have been met.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *All the rezoning requirements of Chapter 14 have been met. A Pre-Application Conference was conducted with the Development Review Team on December 12, 2024, and the Early Neighborhood Notification Meeting was held on July 23, 2025*.	
Staff Response: Staff finds that the rezoning requirements of Chapter 14 have been met, including SFCC 14-3.1 "*Applicable General Provisions*," and SFCC 14-3.5 "*Rezonings*." This rezoning application has also been reviewed by the Development review Team (DRT) for compliance with Chapter 14.	

14-3.5(C)(1)(c): **The rezoning is consistent with the applicable policies of the general plan, including the future land use map.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *A Request to amend the General Plan Future Land Use Map to Community Commercial accompanies this rezone application, which aligns with the requested C-2 zoning. Furthermore, the project conforms to the General Plan as outlined below:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.* *1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.* *1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.* *1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban*	

sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

The rezoning alone does not align with the Future Land Use designation of this parcel which currently includes "Industrial" and "Business Park." However, the applicant is requesting a General Plan Amendment to designate the Future Land Use of this parcel "Community Commercial," which would align with the rezoning and proposed Master Plan use of a youth center. The project aligns with other themes and policies of the General Plan including but not limited to quality of life, sustainable growth, urban form, and community-oriented development.

14-3.5(C)(1)(d):	**Criterion Met:**
The amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of	(Yes/No) **YES**

urban land sufficient to meet the amount, rate and geographic location of the growth of the city.	
Applicant Response: *General Plan Figure 4-4, Urban Sub-Areas, designates the 3.87-acre subject property and surrounding area as an "Infill Area." The Growth Management Chapter of the General Plan specifically calls for prioritization of infill development in Santa Fe in order to maximize the efficient use of public infrastructure, while meeting the demand for urban land for development and directing new growth towards the historic core of the city rather than on the undeveloped fringes. The proposed infill project is in alignment with these strategic directives and is responsive to community needs for public services and community engagement in this area of the City. General Plan Section 4.1 states, "In both 'infill' and 'future growth' areas, the city must encourage higher densities of residential and commercial development than existing zoning often allows" to help "create efficient use of already existing roads and utilities, help ensure cost-efficient public transit, and provide the type of housing that will be in demand...".*	
Staff Response: SFCC Section 14-3.5(C)(2)(b) prohibits a rezoning if the rezoning will "affect an area of less than two acres." This Parcel is 3.87-acres and therefore exceeds the required 2-acres. The Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposes to meet the needs of the community while being served by sufficient infrastructure.	

14-3.5(C)(1)(e): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject property is served by existing roadways and public water and sewer infrastructure. Since the program includes the development of over 2.7 acres of outdoor recreational space, the GISF facility will not affect the capacity of area parks.*	
Staff Response: Staff from the relevant City departments, including water, wastewater, and traffic engineering have reviewed the zoning criteria as it relates to the Master Plan and determined that the property is sufficiently served by infrastructure so long as the Applicant meets the Conditions of Approval and Technical Corrections identified in Attachment A of this report.	

14-3.5(C)(2)(a): **Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:**	**Criterion Met:** (Yes/No) **YES**

Allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;	
Applicant Response: *The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.*	
Staff Response: The Applicant stated in response to (1)(a)(iii) the General Plan Themes and Policies that this project aligns with. Staff finds that this use fits the surrounding Siler neighborhood which is currently a mix of industrial, commercial, and multi-family dwellings.	

14-3.5(C)(2)(b): **Affect an area of less than two acres, unless adjusting boundaries between districts; or**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject parcel is 3.87 acres.*	
Staff Response: The subject parcel is 3.87-acres, therefore exceeding the required 2-acres for a rezoning.	

14-3.5(C)(2)(c): **Benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Contrary to harming surrounding landowners or the general public, this rezone, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: The C-2 Zoning for Lot 3 is consistent with the existing land use patterns in adjacent areas south of the parcel. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, the Master Plan of a youth center for this site is anticipated to bring broader economic benefits, such as increased employment and expanded services, which would serve the general public interest.	

SFCC 14-3.5(D): Additional Applicant Requirements

14-3.5(D)(1): **If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response: *The property is currently served by existing public roadway and utility infrastructure. The Applicant is prepared to construct any necessary infrastructure upgrades at the time of property development, and these improvements will be documented in the approved development plans.*
Staff Response: The Traffic Impact Analysis (TIA) submitted by the Applicant identified the need for various streets improvements to the area surrounding the proposed development due to the increased traffic volume a youth center will cause. The Applicant understands these infrastructure improvements and acknowledges that the City may require the developer to construct necessary infrastructure improvements.

14-3.5(D)(2): **If the proposed rezoning creates a need for additional streets , sidewalks or curbs necessitated by and attributable to the new development , the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Traffic Impact Analysis identifies the need for a southbound left-turn lane on Rufina Circle serving the north access drive. No other off-site improvements are warranted. The developer is aware that required upgrades by the City of Santa Fe will be at the expense of the developer.*	
Staff Response: Additional streets, sidewalks, and curb improvements shall be determined when the Applicant submits a Development Plan for this site. The Applicant acknowledges this criterion.	

VI. MASTER PLAN APPROVAL CRITERIA

The City Code requires that approval of a master plan be based on the following findings, and that actions taken by Planning Commission and Governing Body must be at a public hearing. See SFCC 1987, Sec. 14-3.9.

Table 3 Master Plan Approval Criteria Analysis

14-3.9(D)(1)(a): **The master plan is consistent with the general plan**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
The proposed Master Plan aligns with various Themes and Polices in the General Plan, as summarized below.

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler- Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls, Inc., youth center directly fulfills these objectives.

Staff Response:
The Master Plan is consistent with the General Plan themes and policies listed by the applicant, including quality of life, economic diversity, sustainable growth, urban Form, community oriented development, and mixed use. The proposed use is currently not supported on the Future Land Use Map, but would be if the General Plan Amendment to change Lot 3 to "Community Commercial" is approved.

14-3.9(D)(1)(b): **The master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
The C-2 zoning district is a robust mixed-use zoning category that supports both commercial uses and residential development at higher densities. The proposed GISF youth center is a permissible use in the C-2 district and an appropriate commercial development in the Siler-Rufina neighborhood. Furthermore, the Master Plan demonstrates compliance with C-2 development standards with respect to height, lot coverage, open space, terrain management, and landscaping.

Staff Response:
The Master Plan is consistent with the purpose and intent of the proposed C-2 zoning district and has been conditioned to meet specific design criteria that shall apply when a Development Plan application is submitted. The Master Plan conforms with dimensional standards for C-2 zoning including height, lot coverage, setbacks, and lot size.

14-3.9(D)(1)(c): **Development of the master plan area will contribute to the coordinated and efficient development of the community; and**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Master Plan includes provisions for pedestrian and vehicular connectivity to the surrounding area, as called for in the General Plan. In addition, the subject property makes efficient use of existing infrastructure as an infill site – a value repeatedly emphasized in the General Plan*.	
Staff Response: The Master Plan proposes efficient use of an infill parcel within the diverse Siler-Rufina area, utilizing existing infrastructure and improving connectivity. This use is an asset to the general welfare of the community as it will allow a quality-of-life amenity to be in a more accessible location for the growing Santa Fe community.	

14-3.9(D)(1)(d): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The existing roadway and utility infrastructure are adequate to serve the project. The Traffic Impact Analysis (TIA) demonstrates that the roadway network has the capacity for the proposed development, with the inclusion of a new left-turn lane serving the north access drive on Rufina Circle*.	
Staff Response: The proposed infrastructure has been reviewed based on the regulations established in Chapter 14 by Land Use Staff and the Development Review Team (DRT) encompassing fire, water, wastewater, public works, terrain management, traffic, and landscaping. Existing and proposed infrastructure can accommodate the development of this site as proposed, with street modifications as described in the Applicant's Traffic Impact Analysis. Individual DRT comments can be found in Attachment A of this report.	

VII. CONCLUSION

Upon review of the Applicant's request, submittal, and written findings, Staff has determined the Applicant has met the approval criteria for the Amendment, Rezoning, and Master Plan established in SFCC 1987, Sections 14-3.2(E), 14-3.5(C) and (D), and 14-3.9(D). Staff also finds that the Applicant has satisfied the requirements of 14-3.1(E), "Pre-Application Conferences," 14-3.1(F) "Early Neighborhood Notification Procedures," and 14-3.1(H) "Notice Requirements."

CITY OF SANTA FE
PLANNING & LAND USE

Planning and Land Use Department
Planning Commission Staff Report

Case Numbers	#2025-11028 #2025-11029 #2025-11030
Hearing Date	November 6, 2025
Agent	JenkinsGavin, Inc
Applicant	Girls, Inc of Santa Fe
Request	General Plan Amendment, Rezoning, Master Plan
Location	2904 Rufina St, Santa Fe, NM 87507
Case Manager	Alexa Hempel
Current Zoning	Light Industrial (I-1), General Industrial (I-2), General Commercial (C-2)
Overlay	Suburban Archeological Review District
Pre-App Meeting	December 12, 2024
ENN Meeting	July 23, 2025
Proposal	Applicant requests approval of a General Plan Amendment to change the Future Land Use of a parcel, a Rezoning of a parcel from I-1 and I-2 to C-2, and a Master Plan for a youth center.

Site Map

Case #2025-11028: 2904 Rufina General Plan Amendment. JenkinsGavin, "Agent," for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission recommend the Governing Body approve a General Plan amendment changing the Future Land Use Map designation for Lot 3, comprising approximately 3.87-acres, located at 2904 Rufina St., from a dual mapped area of "Industrial" and "Business Park" to "Community Commercial." (Alexa Hempel, Case Manager, anhempel@santafenm.gov)

Case #2025-11029: 2904 Rufina Rezoning. JenkinsGavin, "Agent," for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Lot 3 at 2904 Rufina St., comprising approximately 3.87-acres, from a duel mapped area of "Light Industrial" (I-1) and "General Industrial" (I-2) to "General Commercial" (C-2). (Alexa Hempel, Case Manager, anhempel@santafenm.gov)

Case #2025-11030: 2904 Rufina Master Plan. JenkinsGavin, "Agent," for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend the Governing Body approve a Master Plan of a proposed youth center at 2904 Rufina St on Lots 3 and 2A, 2-2, totaling approximately 4.27-acres. Lot 3 is approximately 3.87-acres, and Lot 2A, 2-2 is approximately 0.399-acres and is located adjacent to the southwest side of Lot 3. (Alexa Hempel, Case Manager, anhempel@santafenm.gov)

I. RECOMMENDATION

Staff recommends that the **Planning Commission recommend the Governing Body APPROVE** the following cases, subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of this report.

1. **Case #2025-11028:** 2904 Rufina Lot 3 General Plan Amendment
2. **Case #2025-11029:** 2904 Rufina Lot 3 Rezoning
3. **Case #2025-11030:** 2904 Rufina Lot 2A, 2-2 and Lot 3 Master Plan

Three motions will be required for this case:

1. **Recommend the Governing Body APPROVE** or **DENY** Case #2025-11028, "*2904 Rufina Lot 3 General Plan Amendment.*"
2. **Recommend the Governing Body APPROVE** or **DENY** Case #2025-11029, "*2904 Rufina Lot 3 Rezoning.*"
3. **Recommend the Governing Body APPROVE** or **DENY** Case #2025-11030, "*2904 Rufina Lot 2A, 2-2 and Lot 3 Master Plan,*" subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of Staff's report.

II. EXECUTIVE SUMMARY

The subject property is located at 2904 Rufina St, at the intersection of Rufina St and Rufina Circle, north of Cerrillos Rd and west of Siler Rd (the "Property"). The Property is the site of a former retail plant nursery and greenhouse and is comprised of two (2) lots, totaling approximately 4.27-acres. The first lot, described as "Lot 3" is 3.877-acres, dually zoned I-1, "Light Industrial," and I-2, "General Industrial." The second lot, described as "Lot 2A, 2-2" is 0.398-acres, zoned C-2, "General Commercial."

Lot 3 has two (2) General Plan Future Land Use Map (FLUM) designations, "Industrial" and "Business Park." The applicant requests a general plan amendment to designate the entirety of Lot 3 to "Community Commercial" on the FLUM ("General Plan Amendment"). This General Plan Amendment supports the Applicant's concurrent application to rezone Lot 3 from I-1 and I-2 to C-2, "General Commercial" ("Rezoning"). This Rezoning would create zoning uniformity between Lots 3 and 2A, 2-2.

Collectively on the two (2) lots, Girls, Inc of Santa Fe (GISF), acting through its agent, JenkinsGavin (the "Applicant") proposes a master plan for a youth center. GISF is a non-profit corporation based at 310 Hillside Ave that provides educational, recreational, and mentorship activities to school-age children in Santa Fe. The proposed master plan ("Master Plan") of Lots 3 and 2A, 2-2 includes a 55,478 sq ft youth center including classrooms, a gymnasium, a gathering space, an entrepreneurship training center, a caretakers residence, and administrative offices. The Master Plan also designates 2.7-acres of the lot for open space, including areas for recreational activities, gardens, shade and fruit trees, a greenhouse, chicken coop, pavilion, and pathways. If the Master Plan is approved, the Applicant would be required to submit a Development Plan that provides further details for the youth center development, which would be reviewed and approved/denied by the Planning Commission.

The Applicant has complied with Subsections SFCC 14-3.1(E) "*Pre-Application Conferences*", SFCC 14-3.1(F) "*Early Neighborhood Notification Procedures,*" and SFCC 14-3.1(H) "*Notice Requirements*."

Staff's analysis finds that the Applicant has addressed the necessary "*Approval Criteria*" per Subsections SFCC 14-3.2(E), SFCC 14-3.5(C), and SFCC 14-3.9(D) and **recommends that the Planning Commission recommend approval of all three (3) cases to the Governing Body,** with the Master Plan being subject to the "*Conditions of Approval" & "Technical Corrections*" identified in in Attachment A.

III. PROJECT ANALYSIS: GENERAL PLAN AMENDMENT & REZONING

Project Overview

The 1999 General Plan is a comprehensive, long-term plan for physical development and conservation in Santa Fe. It was intended to be a living document subject to amendments over time. The General Plan established the Future Land Use for parcels in the City in alignment with the themes of the plan. The two (2) parcels owned by GISF are designated "Industrial" and "Business Park" on the Future Land Use Map (FLUM).

Lot 3 is currently zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2A, 2-2 is currently zoned General Commercial (C-2). See future land use and current zoning maps in Figures 1 and 2.

Figure 1: Future Land Use. *Gray is Industrial, Purple is Business Park, Red is Community Commercial.*

Figure 2: Current Zoning. *Gray is I-2, Light Purple is I-1, Red is C-2.*

The Applicant requests to rezone Lot 3, 3.877-acres, from I-1 and I-2 to C-2 to create zoning uniformity with Lot 2A, 2-2 which is currently zoned C-2. This uniformity is needed for their project because the use proposed in the Master Plan, a youth center, is permitted in C-2 zoning, but not in I-1 or I-2 zoning (See table 1).

CATEGORY Specific Use	RR	R-1 - R-6	R-7 - R-9	R-7 - I	RC-5, - RC-8	R-10 - R-29	MHP	RAC	AC**	C-1	C-2	C-4	HZ	BCD	I-1	I-2
Community Centers and Institutions																
Neighborhood and community centers, including youth and senior centers	S	S	S		S	S		S		P	P	P	P	P		

Table 1: SFCC Table 14-6.1-1*, Table of Permitted Uses. "S" indicates Special Use Permit, "P" indicates Permitted, and a blank cell indicates Prohibited.*

Due to the rezoning of Lot 3 going from Industrial to Commercial, the General Plan Amendment is first required because the Code requires that any rezoning be consistent with the General Plan, per SFCC 14-3.2(B)(2)(b):

"*The general plan must first be amended before: approval of a change in zoning district designation that is inconsistent with the land use classification shown on the general plan's future land use map.*"

In compliance with this requirement, the applicant requests that the Future Land Use of Lot 3 be changed to "Community Commercial" to match the C-2 Rezoning request. A general plan amendment is not required for Lot 2A, 2-2 because a rezoning is not proposed for that parcel. See the General Plan Future Land Use definitions for Industrial, Business Park, and Community Commercial in Table 2.

Future Land Use Classification	General Plan Definition
Industrial	This classification provides and protects industrial lands for the full range of manufacturing, agricultural and industrial processing, general service, and distribution uses. Unrelated retail and commercial uses that could be more appropriately located elsewhere in the city would not be permitted. Performance standards in the Zoning Ordinance will minimize potential environmental impacts.
Business Park	Business Parks shall provide areas appropriate for moderate- to low-intensity industrial and business park uses capable of being located next to commercial and residential areas with minimum buffering. Allowable uses include research and development related uses, light manufacturing, wholesaling, distribution and storage, retailing and small-scale restaurants as a related use only, and offices in a master planned landscaped setting. No raw materials processing or bulk handling would be allowed. The Business Park designation on the Future Land Use Map of the General Plan is intended to encompass the 11, Light Industrial District, and the IP, Industrial Park District, existing zoning categories. It is recommended that both districts be re-examined for allowable uses and appropriate standards. It is further recommended that the IP zoning district be restructured with a stronger emphasis on research and development, offices, and related uses, to be developed in a master planned landscaped setting, and that the district name be modified to Business and Industrial Park in order to reflect these changes. For new development and for rezonings within the Business Park designation, the appropriateness of 1 versus BIP (IP) is determined by the nature of adjacent land uses. Where an area designated Business Park on the Future Land Use map is adjacent to non-residential zoning, an existing non-residential use, or non-residential Future Land Use, then that area may be considered for 11 zoning. Where an area designated Business Park on the Future Land Use map is adjacent to residential zoning, an existing residential use, or residential Future Land Use, then that area may be considered for IP (BIP) zoning.
Community Commercial	This classification provides sites for retail shopping areas, focus on a plaza, containing a wide variety of businesses, including retail stores; eating and drinking establishments; commercial recreation; service stations; automobile sales and repair services; financial, business, and personal services; and educational and social services.

Table 2: *General Plan Future Land Use Classification Definitions*

Figures 3 and 4 below demonstrate what the future land use and zoning of the property would look like if the Rezoning and General Plan Amendment are approved for Lot 3.

Figure 3: Future Land Use after General Plan Amendment. *Gray is Industrial, Purple is Business Park, Red is Community Commercial.*

Figure 4: Zoning after Rezoning. *Red is C-2, Gray is I-2.*

Review and Recommendation

Staff reviews General Plan Amendment and Rezoning applications for compliance with associated approval criteria (see SFCC 14-3.2(E)) and14-3.5(C)) and make recommendations to Planning Commission based on this compliance. Following a hearing, the Planning Commission makes a recommendation to Governing Body, who shall take final action to approve or deny cases. Conditions of Approval and Technical Corrections shall not be imposed on general plan amendments or rezonings.

IV. PROJECT ANALYSIS: MASTER PLAN

Project Description

The Applicant's plan for the Property includes constructing a 55,478 square foot GISF youth center building including classrooms, gathering spaces, a gymnasium, and administrative offices (the "Project"). The Project also includes a separate teen enterprise space and caretaker's residence. Outside, the space will house gardens, forested areas, a play field, greenhouse, chicken coop, pavilion, and connected pathways on 2.7-acres of the site. The main building is situated on the southeast corner of the property and parking is proposed off two (2) entrances along Rufina Circle.

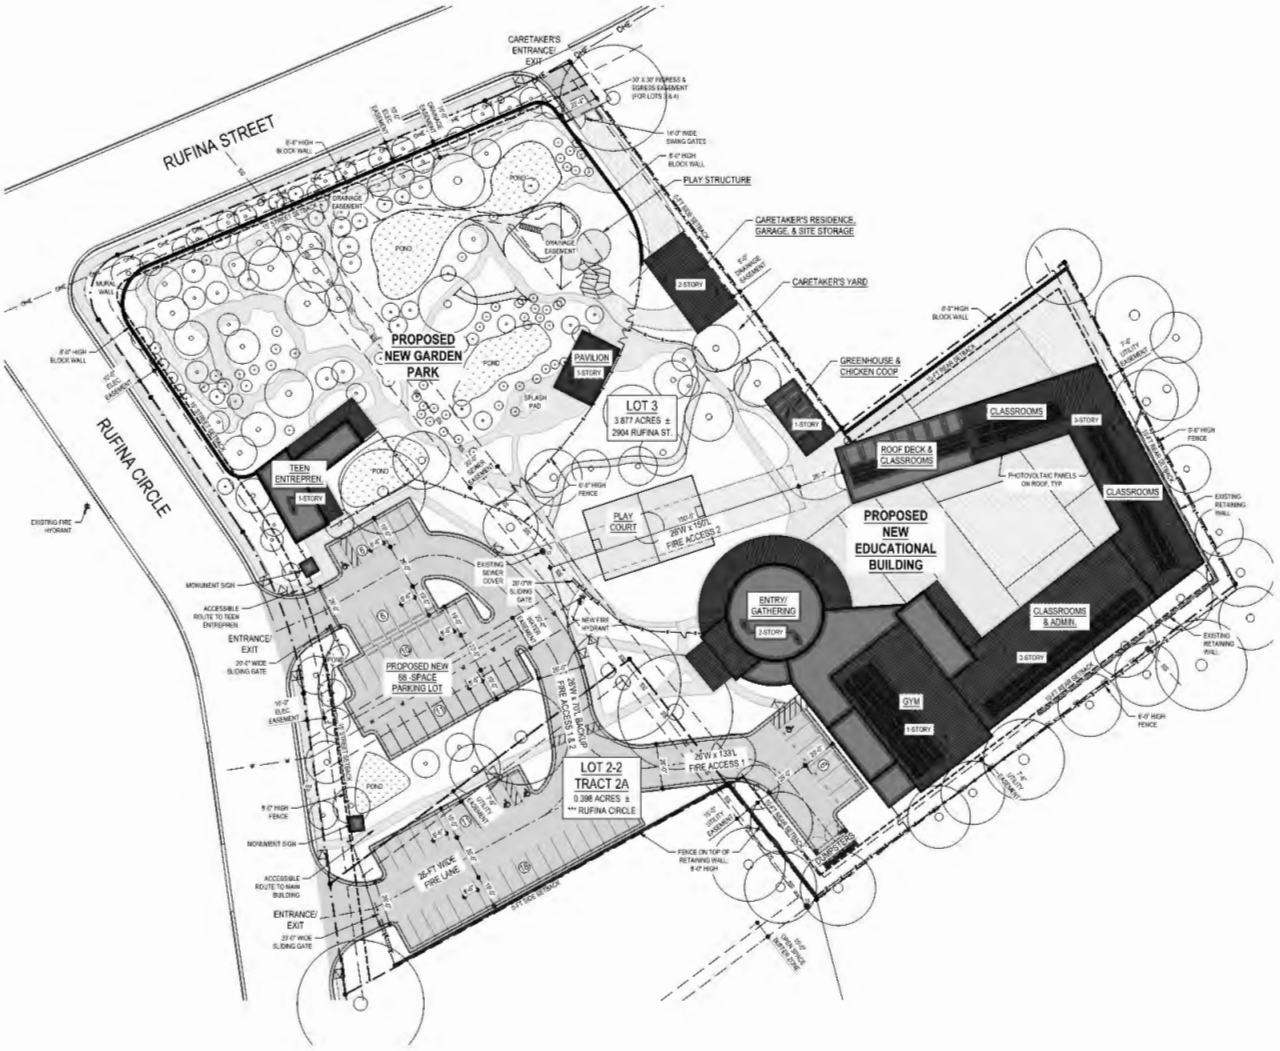

Figure 5: Proposed Site Master Plan. *See full site plans in Attachment C-6.*

Project Zoning

The Property is split between two (2) parcels. Lot 2A, 2-2 is currently zoned General Commercial (C-2) while Lot 3 is currently zoned Light Industrial (I-1) and General Industrial (I-2). This Project includes a rezoning request to change Lot 3 to C-2 to create uniformity between both parcels. This change will allow for the proposed youth center use. The Applicant has a Condition of Approval to either consolidate the two lots or ensure appropriate easements are in place in perpetuity at the time of Development Plan for this project.

For more information on the Rezoning request and General Plan Amendment, reference Section III of this Staff Report, *supra*.

In accordance with the rezoning request, the Project will meet all dimensional standards for C-2 zoning shown in Table 3.

Requirement	C-2	Proposed
Height	45 feet maximum	45 feet
Lot Coverage	60% maximum	24%
Open Space	25% non-residential and mixed use 0.25 x 186,291 sq ft = 46,555 sq ft	118,563 sq ft (63.7%)
Setbacks	Street: 15 feet Rear: 10 feet Side: 0 feet	Street: 15 feet + Rear: 10 feet + Side: 0 feet +

Table 3: *C-2 Dimensional Standards*

Surrounding Zoning and Land Use

The GISF site is outlined in yellow in Figure 6. Surrounding zoning includes primarily General Industrial (I-2) (Gray), with some areas of Light Industrial (I-1) (Purple) and General Commercial (C-2) (Red). The uses adjacent to the east of the Property include a variety of appliance, repair, and welding shops. South of the property are hotels along Cerrillos Rd and an auto repair shop along Rufina Circle. West of the property are mixed office buildings, and north is a bottling warehouse.

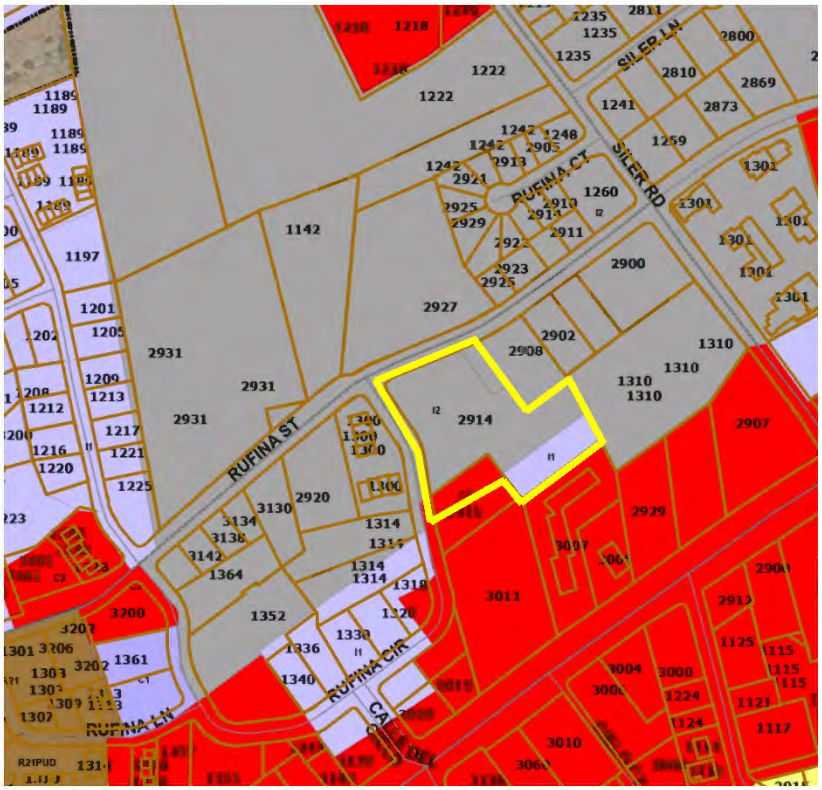

Figure 6: *Surrounding zoning. 2904 Rufina outlined in yellow.*

Existing Conditions and Terrain Management

The Property was previously used as a plant nursery but is currently vacant except for a few remaining greenhouses in the southeast of the Property (see Figure 7). The site slopes from southeast to northwest, with an overall grade change of approximately thirty-two (32) feet. There are no floodplains on the site and the Project includes passive storm water harvesting systems.

Figure 7: *Oblique view of existing conditions. Yellow border approximates property boundaries.*

In the past this area of town served as the industrial center for the community. Over time, many of the heavy industrial uses have moved from this area as it has urbanized in response to demand for more flex office, warehousing, and other commercial uses due to the site's proximity to Cerrillos Road and adjacency to properties in the General Commercial (C-2) zone district.

The applicant included a preliminary landscaping plan (Attachment C-6) that identifies the preservation of as many existing trees as feasible. The Applicant plans to incorporate landscaping into stormwater harvesting systems and included the planting of new trees on site and along adjacent streets.

Conditions of Approval and Technical Corrections for terrain management and landscaping can be found in Attachment A.

Traffic, Access, and Parking

The Project proposes the main entrances to the site be via two (2) driveways along Rufina Circle. A third access will exist along Rufina St to serve the caretakers residence.

A Traffic Impact Analysis (TIA) was completed by Bohannan Huston, Inc for this Project. In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and two (2) new access driveways onto the property will operate acceptably. To mitigate the overall traffic impacts of this development, the TIA made the following recommendations:

- *Installation of a southbound left turn lane into the property off Rufina Circle,*
- *Installation of an eastbound right turn lane at the intersection of Rufina St and Siler Rd,*
- *Installation of a westbound left turn lane at Rufina Circle and Calle de Cielo,*

- *Median modifications to the Cerrillos Rd and Calle de Cielo intersection,*
- *Restriping at the intersections of Rufina St and Rufina Cir E and Rufina St and Rufina Cir W,*
- *All designs for street improvements shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.*

The applicant has conditions of approval from the Traffic Division to address at the time of Development Plan for this site (Attachment A). To view the TIA, see Attachment C-5.

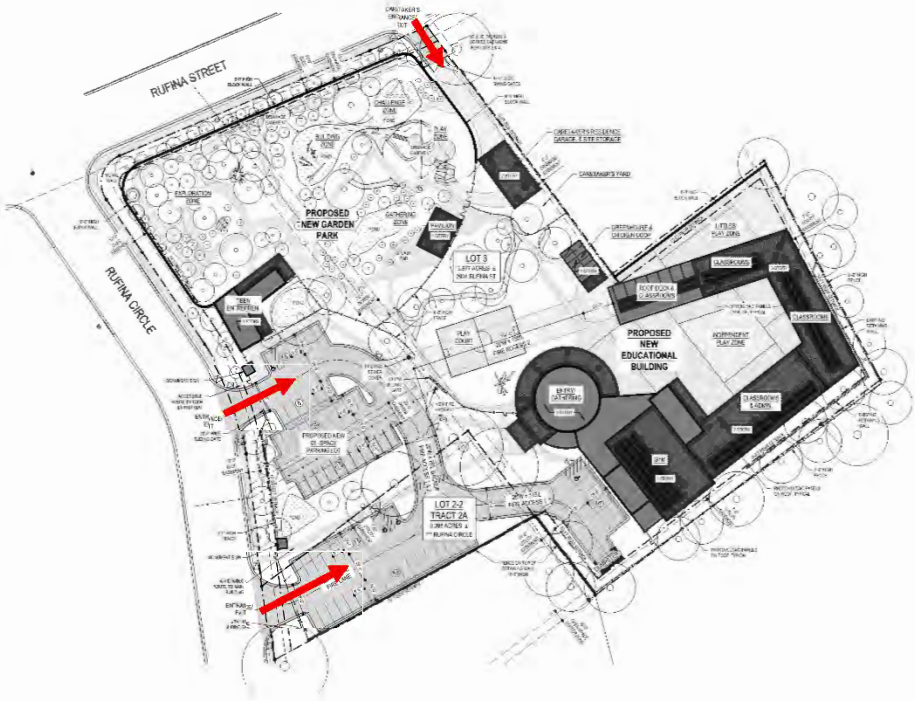

Figure 8: *Red arrows showing site access. For more details view the TIA and Master Plan in Attachments C-5 and C-6.*

The Master Plan proposes dedicated pickup and drop-off areas for students along the eastern edge of the parking area. To limit access and enhance safety of students, a mix of 8-foot-tall block walls, fences, and retaining walls with fences on top are proposed along the exterior of the property. Within the property, areas of 6-foot-tall fences are proposed to separate various spaces.

SFCC Table 14-8.6-1 does not define parking requirements for a youth center use. The applicant approximated a parking demand of 68 spaces, broken down in Table 4. To confirm the parking requirements for this development, a parking analysis will be required at time of Development Plan.

Parking Demand	Estimated Required Spaces
Peak Daily Staff Demand	42 spaces
Facility Vehicles	5 spaces
Guests/Overflow	21 spaces
Total Estimated Required Spaces	68 spaces
Total Parking Provided (Inc. 4 ADA)	**68 spaces**

Table 4: *Estimated Parking Needs*

Utilities

Water: There are existing 6-inch water mains along Rufina St and Rufina Circle. This property is serviced via a 2-inch water service line off Rufina Cir. The existing 5/8-inch water meter on the property is to be replaced by a double 1-inch meter. Additionally, a 6-inch public fire line will be connected off Rufina Cir into a new fire hydrant on the Property. The applicant has submitted a preliminary water budget and water plan with the City, subject to the Conditions of Approval from the City's Water Division in Attachment A.

Existing Girls Inc. Hillside Facilty - Average Annual Water Consumption	**101,570**	**GPY**
Exisitng Facility: Hillside Drive (GFA)	**4,886**	**SF**
Exisitng Facility Annual Usage:	**20.8**	**Gal/SF**
Proposed Facility: Rufina Street (GFA) =	**55,478**	**Square Feet**
Projected Annual Water Usage (20.8 Gal/SF) =	**1,153,275**	**GPY**
	3.54	**AFY**
Landscape Irrigation =	**TBD**	**GPY**
	TBD	**AFY**
Water Budget Subtotal =	**3.54**	**AFY**
Existing Rufina Water Usage Credit =	**5.27**	**AFY**
Per SFCC §14-8.13(B)(3)		
DEVELOPMENT WATER BUDGET =	**(1.73)**	**AFY**
9.8% Contingency per SFCC §14-8.13(E)(1)=	**(0.17)**	**AFY**
TOTAL WATER DEMAND OFFSET =	**(1.90)**	**AFY**

Figure 9: *Preliminary Water Budget*

Sewer: The Property is served by an existing 8-inch public sewer line that cuts north-south through the property via a 10-foot utility easement. The Applicant proposes installing a service connection to the main building and a 4-inch service line for the other structures. The City's Wastewater Division has Conditions of Approval the applicant must satisfy Prior to Recordation of a future Development Plan for this Property (Attachment A).

Fire Prevention and Emergency Access

Fire and emergency access requirements will be satisfied by the project's compliance with the International Fire Code 2021. All structures within the proposed development plan include fire alarm systems and sprinklers. The site access road is capable of supporting the load of a 75,000 lb fire apparatus and provides two remote exits. Two (2) fire hydrants (1 existing, 1 new) will serve the site.

Archaeology
The Project is within the Suburban Archaeological Review District, and will require archaeological clearance if the installation of subsurface utility lines will exceed 550-linear feet including water, gas, electric, power, sewer, etc (this may change to 200 linear feet with the adoption of the Land Development Code update).

Architecture, Lighting, and Signage
The Project does not include descriptions of the proposed architecture or elevations. Should the Master Plan be approved, the Applicant will be required to submit architectural drawings and descriptions detailing compliance with SFCC 14-8.7 at the time of Development Plan.

An outdoor lighting plan was not included with the Master Plan either, but the Applicant has a Condition of Approval to do so in compliance with SFCC 14-8.9(C), "*Outdoor Lighting*," Prior to Recordation of a Development Plan for this site (Attachment A).

Signage was not included in the Master Plan but is reviewed during the Building Permitting process – after the Master Plan and future Development Plan.

Review and Recommendation
Staff reviews Master Plan applications for compliance with associated approval criteria (see SFCC 14-3.9(D)) and completeness of submission requirements (see SFCC 14-3.9(C)). Based on this, Staff makes a recommendation to Planning Commission who then makes a recommendation to Governing Body. Governing Body takes final action to approve or deny Master Plan cases subject to Conditions of Approval and Technical Corrections.

V. GENERAL PLAN AMENDMENT APPROVAL CRITERIA SECTION SFCC 14-3.2(E)(1)

SFCC Section 14-3.2 governs the authority, procedures, and restrictions for amendments to the general plan. Prior to recommending approval of an amendment to the general plan, the Planning Commission must make certain findings based off the approval criteria. The Criteria for approval of General Plan Amendment are detailed below:

14-3.2(E)(1)(a): **Consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Economic development goals are upheld by the provision of quality childcare programs that support working parents. The 2004 report, Cultivating Santa Fe's Future Economy, by Angelou Economics, recognizes the important role of quality of life in economic development. In Strategy Four: Economic Development, the report states, "The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens." The GISF program is a quality-of-life amenity serving the Santa Fe community and young families, enhancing the attractiveness of Santa Fe for existing residents and newcomers, alike. In addition, GISF will employ approximately 45 staff persons. The new facility will serve the growing southwest part of town, home to a majority of Santa Fe's families. Lastly, the site has existing access via two public rights-of-way and is currently served by public utility infrastructure.*	
Staff Response: Staff concurs that the proposed amendment is consistent with Santa Fe's growth management and economic development goals as outlined in the General Plan, Angelou Report, and the 2008 Economic Development Strategy. The amendment supports the City's efforts to direct growth toward areas with existing infrastructure and services and encourages balanced economic development. Overall, the proposal aligns with the General Plan's vision for sustainable coordinated urban growth and is consistent with Criterion 1.	

14-3.2(E)(1)(b): **Consistency with other parts of the general plan;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment conforms to the following General Plan Themes and Policies:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer*	

programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:
Staff finds that reclassifying Lot 3 as 'Community Commercial' is consistent with the General Plan Themes and Policies listed by the Applicant. The reclassification will allow for a youth center that promotes quality of life for Santa Fe residents and economic diversity for the Siler-Rufina area. Additionally, this project will provide infill development consistent with General Plan Themes and Policies.

14-3.2(E)(1)(c): **The amendment does not:** **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
(i) The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.

(ii) The subject parcel comprises 3.87 acres. Nevertheless, the property is adjacent to the Community Commercial designation along its south boundary.

(iii) Contrary to harming surrounding landowners or the general public, this General Plan Amendment, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.

Staff Response:
(i) The Siler-Rufina neighborhood is home to a mix of industrial, commercial, and non-profit organizations. Reclassifying Lot 3 will allow for continued infill development consistent with the character of this area. This reclassification will also create consistency with lots south of this property that are currently classified 'Community Commercial.'

(ii) Staff finds that the subject parcel is 3.87-acres, exceeding the required 2-acres.

(iii) The General Plan Amendment to reclassify the lot to "Community Commercial" will create the ability to rezone the lot to "General Commercial," which allows for a variety of uses that have potential to serve the community at large, including the proposed youth center in the Master Plan. Reclassifying this lot can also encourage the redevelopment of the infill site, stated as a priority in the General Plan under policy 3-G-3.

14-3.2(E)(1)(d): **An amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment promotes the general welfare, because it will enable the construction of a new GISF youth center, offering after school and summer programs for school-age girls and much-needed support for working parents.*	
Staff Response: The proposed amendment conforms to the requirements of 14-3.2(E)(1)(c), while also promoting general welfare by allowing for the proposed Master Plan use of a youth center, offering quality care to school aged children and accelerating infill development of this site.	

14-3.2(E)(1)(e): **Compliance with extraterritorial zoning ordinances and extraterritorial plans;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *N/A*	
Staff Response: N/A	

14-3.2(E)(1)(f): **Contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Redevelopment of this infill site provides for efficient and economic development, leveraging existing infrastructure, and supporting the harmonious development of Santa Fe. This request not only supports the general welfare of the community by providing Santa Fe families with a safe and reliable place to send their children but is the sole motivation for this effort.*	
Staff Response: Staff agrees with the applicant and finds that reclassifying Lot 3 to 'Community Commercial' supports harmonious infill development that is efficient and consistent with properties in the vicinity which have been rezoned from industrial to commercial and subsequently redeveloped (Ord. #2016-44, #2022-4).	

14-3.2(E)(1)(g): **Consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The City of Santa Fe Land Use and Urban Design Plan recognizes the Siler Neighborhood as a Mixed-Use Corridor, stating, "Development and redevelopment along these corridors should be encouraged to*	

provide greater density of commercial uses…". Furthermore, the Plan encourages the re–use of blighted or failing buildings and businesses. The redevelopment of a former, dilapidated nursery on an infill site in the Siler Neighborhood thoroughly aligns with these objectives. Furthermore, the City of Santa Fe Economic Development Department branded the subject neighborhood as the Siler-Rufina Nexus in a recent report issued to spur investment in the City's Opportunity Zones. In keeping with this effort, the proposed GISF facility is a significant investment in the neighborhood, increasing job opportunities and redeveloping a deteriorated site.
Staff Response: Staff agrees with the Applicant's response while additionally acknowledging the previous references to the City's General Plan policies. The proposed change does not conflict with existing city ordinances or regulations and the applicant's Master Plan and future development plan of the site will conform with the City of Santa Fe's Land Use Code and Policies.

VI. REZONING APPROVAL CRITERIA SECTION SFCC 14-3.5(C)

SFCC Section 14-3.5 governs the authority, procedures, and restrictions for Rezonings. Prior to recommending approval of a Rezoning, the Planning Commission must make certain findings based off the approval criteria. The Criteria for approval of Rezoning's are detailed below:

14-3.5(C)(1)(a): **The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:** **(a) one or more of the following conditions exist:** **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *(i) N/A* *(ii) This area has evolved over the years into a diverse, mixed-use neighborhood of recreational uses, non-profit institutions, a mix of housing types, and various commercial enterprises. The rezone will support the construction of the proposed GISF facility, which aligns well with this current pattern of development.* *(iii) Rezoning the property to C-2 is more advantageous to the community. A vacant site falling into disrepair creates no community benefit. Redevelopment of this infill site vitalizes the neighborhood and supports the provision of critical community services. Furthermore, the rezone request aligns with the Themes and Policies of the General Plan, as summarized below:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.* *1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.* *1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.*	

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

(i) Staff did not find a mistake in the original zoning.

(ii) In recent years, the Siler-Rufina area has seen increasing multifamily residential developments and rezonings from industrial to commercial that have changed the character of the area (Ord. #2016-44, #2022-4). Commercial establishments and non-profit institutions have also come to occupy many industrial spaces surrounding the property. Staff recognizes a change in the character of the area.

(iii) Staff finds the rezoning of this parcel to "General Commercial" to be more advantageous than the currently vacant industrial site. This change encourages redevelopment of the infill site, and the

associated Master Plan proposes a quality-of-life amenity to the community, supported by the General Plan.

14-3.5(C)(1)(b): **All the rezoning requirements of Chapter 14 have been met.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *All the rezoning requirements of Chapter 14 have been met. A Pre-Application Conference was conducted with the Development Review Team on December 12, 2024, and the Early Neighborhood Notification Meeting was held on July 23, 2025*.	
Staff Response: Staff finds that the rezoning requirements of Chapter 14 have been met, including SFCC 14-3.1 "*Applicable General Provisions*," and SFCC 14-3.5 "*Rezonings*." This rezoning application has also been reviewed by the Development review Team (DRT) for compliance with Chapter 14.	

14-3.5(C)(1)(c): **The rezoning is consistent with the applicable policies of the general plan, including the future land use map.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *A Request to amend the General Plan Future Land Use Map to Community Commercial accompanies this rezone application, which aligns with the requested C-2 zoning. Furthermore, the project conforms to the General Plan as outlined below:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.* *1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.* *1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.* *1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.* *1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the*	

community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

The rezoning alone does not align with the Future Land Use designation of this parcel which currently includes "Industrial" and "Business Park." However, the applicant is requesting a General Plan Amendment to designate the Future Land Use of this parcel "Community Commercial," which would align with the rezoning and proposed Master Plan use of a youth center. The project aligns with other themes and policies of the General Plan including but not limited to quality of life, sustainable growth, urban form, and community-oriented development.

14-3.5(C)(1)(d): **The amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city.**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:

General Plan Figure 4-4, Urban Sub-Areas, designates the 3.87-acre subject property and surrounding area as an "Infill Area." The Growth Management Chapter of the General Plan specifically calls for prioritization of infill development in Santa Fe in order to maximize the efficient use of public infrastructure, while meeting the demand for urban land for development and directing new growth towards the historic core of the city rather than on the undeveloped fringes. The proposed infill project is in alignment with

these strategic directives and is responsive to community needs for public services and community engagement in this area of the City. General Plan Section 4.1 states, "In both 'infill' and 'future growth' areas, the city must encourage higher densities of residential and commercial development than existing zoning often allows" to help "create efficient use of already existing roads and utilities, help ensure cost-efficient public transit, and provide the type of housing that will be in demand…".
Staff Response: SFCC Section 14-3.5(C)(2)(b) prohibits a rezoning if the rezoning will "affect an area of less than two acres." This Parcel is 3.87-acres and therefore exceeds the required 2-acres. The Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposes to meet the needs of the community while being served by sufficient infrastructure.

14-3.5(C)(1)(e): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject property is served by existing roadways and public water and sewer infrastructure. Since the program includes the development of over 2.7 acres of outdoor recreational space, the GISF facility will not affect the capacity of area parks.*	
Staff Response: Staff from the relevant City departments, including water, wastewater, and traffic engineering have reviewed the zoning criteria as it relates to the Master Plan and determined that the property is sufficiently served by infrastructure so long as the Applicant meets the Conditions of Approval and Technical Corrections identified in Attachment A of this report.	

14-3.5(C)(2)(a): **Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:** **Allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.*	
Staff Response: The Applicant stated in response to (1)(a)(iii) the General Plan Themes and Policies that this project aligns with. Staff finds that this use fits the surrounding Siler neighborhood which is currently a mix of industrial, commercial, and multi-family dwellings.	

14-3.5(C)(2)(b): **Affect an area of less than two acres, unless adjusting boundaries between districts; or**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject parcel is 3.87 acres.*	
Staff Response: The subject parcel is 3.87-acres, therefore exceeding the required 2-acres for a rezoning.	

14-3.5(C)(2)(c): **Benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Contrary to harming surrounding landowners or the general public, this rezone, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: The C-2 Zoning for Lot 3 is consistent with the existing land use patterns in adjacent areas south of the parcel. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, the Master Plan of a youth center for this site is anticipated to bring broader economic benefits, such as increased employment and expanded services, which would serve the general public interest.	

SFCC 14-3.5(D): Additional Applicant Requirements

14-3.5(D)(1): **If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The property is currently served by existing public roadway and utility infrastructure. The Applicant is prepared to construct any necessary infrastructure upgrades at the time of property development, and these improvements will be documented in the approved development plans.*	
Staff Response: The Traffic Impact Analysis (TIA) submitted by the Applicant identified the need for various streets improvements to the area surrounding the proposed development due to the increased traffic volume a youth center will cause. The Applicant understands these infrastructure improvements and acknowledges that the City may require the developer to construct necessary infrastructure improvements.	

14-3.5(D)(2): **If the proposed rezoning creates a need for additional streets , sidewalks or curbs necessitated by and attributable to the new development , the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Traffic Impact Analysis identifies the need for a southbound left-turn lane on Rufina Circle serving the north access drive. No other off-site improvements are warranted. The developer is aware that required upgrades by the City of Santa Fe will be at the expense of the developer.*	
Staff Response: Additional streets, sidewalks, and curb improvements shall be determined when the Applicant submits a Development Plan for this site. The Applicant acknowledges this criterion.	

VII. MASTER PLAN APPROVAL CRITERIA SECTION SFCC 14-3.9(D)(1)

SFCC Section 14-3.9 governs the authority, procedures, and restrictions for Master Plans. Prior to recommending approval of a Master Plan, the Planning Commission must make certain findings based off the approval criteria. Per SFCC 14-3.9(D)(2), approval of the Master Plan may specify conditions of approval that are necessary to ensure compliance with the provisions of Chapter 14 and implement the policies of the general plan, including:

(a) requirements for construction and funding of private or public infrastructure, including utilities, municipal buildings, roads, parks and trails;
(b) provisions for the use and protection of areas of special hazards or environmental sensitivity;
(c) modifications to the proposed plan, including changes to the boundaries of land use tracts, patterns of land uses, infrastructure plans, phasing plans and special development standards and guidelines.

The Criteria for approval of Master Plans are detailed below:

14-3.9(D)(1)(a): **The master plan is consistent with the general plan**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
The proposed Master Plan aligns with various Themes and Polices in the General Plan, as summarized below.

Themes
1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the

community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

The Master Plan is consistent with the General Plan themes and policies listed by the applicant, including quality of life, economic diversity, sustainable growth, urban Form, community oriented development, and mixed use. The proposed use is currently not supported on the Future Land Use Map, but would be if the General Plan Amendment to change Lot 3 to "Community Commercial" is approved.

14-3.9(D)(1)(b): **The master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:

The C-2 zoning district is a robust mixed-use zoning category that supports both commercial uses and residential development at higher densities. The proposed GISF youth center is a permissible use in the C-2 district and an appropriate commercial development in the Siler-Rufina neighborhood. Furthermore, the Master Plan demonstrates compliance with C-2 development standards with respect to height, lot coverage, open space, terrain management, and landscaping.

Staff Response:

The Master Plan is consistent with the purpose and intent of the proposed C-2 zoning district and has been conditioned to meet specific design criteria that shall apply when a Development Plan application is

submitted. The Master Plan conforms with dimensional standards for C-2 zoning including height, lot coverage, setbacks, and lot size.

14-3.9(D)(1)(c): **Development of the master plan area will contribute to the coordinated and efficient development of the community; and**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Master Plan includes provisions for pedestrian and vehicular connectivity to the surrounding area, as called for in the General Plan. In addition, the subject property makes efficient use of existing infrastructure as an infill site – a value repeatedly emphasized in the General Plan.*	
Staff Response: The Master Plan proposes efficient use of an infill parcel within the diverse Siler-Rufina area, utilizing existing infrastructure and improving connectivity. This use is an asset to the general welfare of the community as it will allow a quality-of-life amenity to be in a more accessible location for the growing Santa Fe community.	

14-3.9(D)(1)(d): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The existing roadway and utility infrastructure are adequate to serve the project. The Traffic Impact Analysis (TIA) demonstrates that the roadway network has the capacity for the proposed development, with the inclusion of a new left-turn lane serving the north access drive on Rufina Circle.*	
Staff Response: The proposed infrastructure has been reviewed based on the regulations established in Chapter 14 by Land Use Staff and the Development Review Team (DRT) encompassing fire, water, wastewater, public works, terrain management, traffic, and landscaping. Existing and proposed infrastructure can accommodate the development of this site as proposed, with street modifications as described in the Applicant's Traffic Impact Analysis. Individual DRT comments can be found in Attachment A of this report.	

VIII. EARLY NEIGHBORHOOD NOTIFICATION

The Applicant conducted an Early Neighborhood Notification (ENN) meeting on July 23, 2025. Members of the Applicant's team, City Staff, and a local news reporter were in attendance. The Applicant team presented an overview of the Project and did not receive any questions or comments. Meeting notes from the Early Neighborhood Notification meeting can be found in Attachment C-4.

IX. EXPIRATION

SFCC Section 14-3.19 sets expiration, extension, and amendment criteria for certain development approvals. Both General Plan Amendments and Rezonings are not included in this section and are therefore not associated with any expirations. Master Plans, however, are subject to SFCC 14-3.19(B)(1) which states:

"*Approval of a master plan shall expire five years after all applicable appeal periods, and any appeals of the final action approving it unless:*

(a) approval is granted for a development plan or subdivision plat within the master plan boundaries; or

(b) *actual development of the site or off-site improvements is begun and is continued pursuant to Subsection 14-3.19(B)(6).*"

Conditions of Approval & Technical Corrections

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
1	Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects: All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres All city projects over two (2) acres in size. All city park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Archaeology	Prior to building permit approval
2	Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Current Planning	Prior to public hearing (COMPLETED)
3	~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review.	Current Planning	~~Prior to public hearing~~ Prior to development plan approval
4	Add Case #2025-11030 to Master Plan sheets	Current Planning	Prior to public hearing (COMPLETED)
5	Shall comply with the most currently adopted International Fire Code	Fire	Prior to public hearing (COMPLETED)
6	Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021	Fire	Prior to public hearing (COMPLETED)

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
7	Shall verify compliance with section D105 Aerial Fire Apparatus Access Road as per IFC 2021	Fire	Prior to public hearing (COMPLETED)
8	Historic drainage calcs should include offsite flows onto property (if applicable)	Rivers and Watershed	Prior to Development Plan approval (In drainage report)
9	Provide a full drainage report	Engineering	Prior to Development Plan approval
10	Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.	Engineering	Prior to Development Plan approval
11	Include pond sections and show how ponds will overflow.	Engineering	Prior to Development Plan approval
12	Include lighting plan with photometrics	Engineering	Prior to Development Plan approval
13	A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.	Engineering	Prior to Development Plan approval
14	The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Wastewater	Prior to recordation
15	All 4-inch sewer lines shall connect directly to the public sewer lines	Wastewater	Prior to recordation
16	The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Wastewater	Prior to recordation
17	An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Water	Prior to building permit approval
18	An approved Water Plan will be required for all new public water infrastructure and fire services.	Water	Prior to development plan approval
19	A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	Water	At time of development

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
20	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	Water	At time of development
21	Each lot shall be served by a separate City water service.	Water	At time of development
22	See attached comments response letter dated 9/25/25 from Wilson & Company regarding Bohannon Huston, initial draft Traffic Impact Study dated 8/725	Traffic	Prior to public hearing (COMPLETED)
23	See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25	Traffic	Prior to Development Plan Approval
24	Elevations submitted for the development plan shall include a detailed Points analysis that is intergraded with the Elevations for review.	Current Planning	At time of Development Plan

Technical Corrections			
#	**Technical Correction**	**Dept. or Division**	**To be completed:**
1	Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
2	Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
3	Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
4	Include attached notes on development plan.	Engineering	Prior to recordation of Development Plan
5	The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe	Wastewater	-
6	Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property	Water	Prior to water plan approval

From: Alexa Hempel, Senior Planner

Cases #2025-11028, 2025-11029, and 2025-110330. 2904 Rufina St General Plan Amendment, Rezoning, and Master Plan. JenkinsGavin, Inc, Agent, for Girls Inc of Santa Fe, Applicant, requests a General Plan Amendment, Rezoning, and Master Plan for the property at 2904 Rufina St. This property is comprised of 2 parcels totaling approximately 4.85 acres, currently zoned I-1 (Light Industrial), I-2 (General Industrial), and C-2 (General Commercial).

This application was received on August 11, 2025 and has been reviewed by Planning Division staff (Staff) and the City's Development Review Team (DRT). Attached are the initial DRT review comments including conditions of approval and technical corrections. I would like to highlight and summarize the following key items:

A. Initial Planning Division Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by Planning Division staff and the following necessary revisions have been identified:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Submit a parking analysis at time of Development Plan
5. All utilities shall be underground

Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review or place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review

B. Initial DRT Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by the DRT and the following necessary revisions have been identified:

1. Shall comply with the most currently adopted International Fire Code
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
4. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services
5. An approved Water Plan will be required for all new public water infrastructure and fire services.
6. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service
7. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.
8. Each lot shall be served by a separate City water service.
9. Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.
10. Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.
11. Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.
12. Archaeological review will be required if the applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc.
    a. 14-3.13(B)(3) Suburban Archaeological Review District
        i. In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects:
        ii. All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres
        iii. All city projects over two (2) acres in size.
        iv. All city park projects over one (1) acre in size.
    b. Utility Mains:
        i. An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.
13. Provide full drainage report.

14. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.
15. Include pond sections and show how ponds will overflow
16. Include lighting plan with photometrics
17. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.
18. Include attached notes.
19. Historic drainage calcs should include offsite flows onto property (if applicable)
20. The 6-inch sewer service line(s) will be required to connect to a sewer manhole
21. All 4-inch sewer lines shall connect directly to the public sewer lines
22. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field
23. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe

The following DRT members did not have comments at this time:

- Parks and Open Space
- Water resources
- Metropolitan Planning organization
- Traffic

The following DRT comments are pending at this time:

- ADA
- Santa Fe Public Schools

C. Prior to Planning Commission, the following DRT comments must be satisfied:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Shall comply with the most currently adopted International Fire Code
5. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
6. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
7. An approved Water Plan will be required for all new public water infrastructure and fire services.
8. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.

The full DRT memos are attached for your review. Once revised submittals to the application are accepted, a public hearing date may be scheduled. Please let me know if you have any questions or concerns.

Thank you,

Alexa Hempel
Senior Planner, Planning and Land Use Department

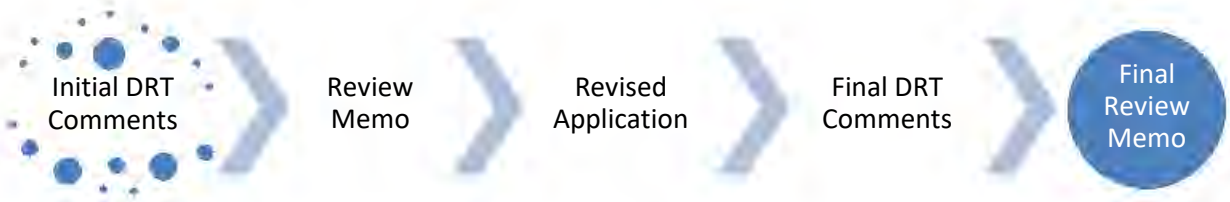
Comment Form for
Planning Commission

Date: August 19, 2025

DRT Member: Fire Marshal Geronimo Griego



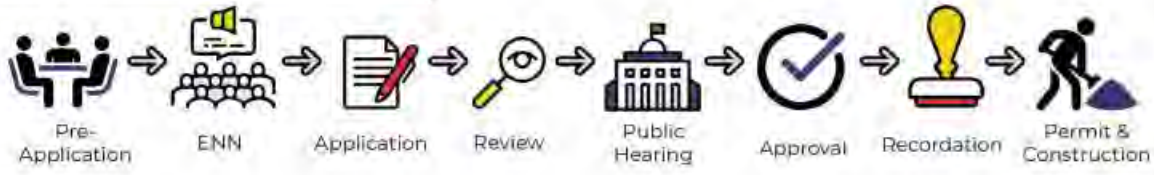
Dept/Div: Fire Marshal's Office

Case No.: 2025-11028,11029, & 11030

Case Planner: Alexa Hempel, Senior Planner

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Development Review Process Flow Chart

Form Updated: September 2023

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

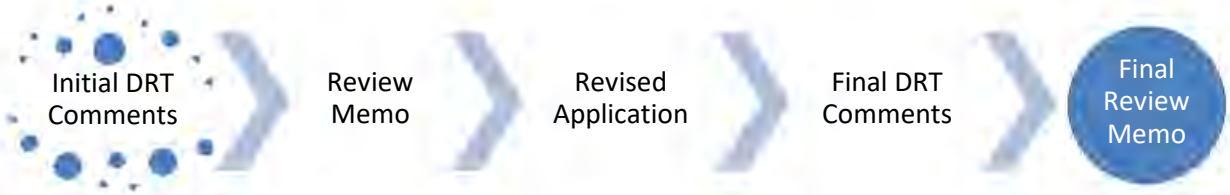
Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall comply with the most currently adopted International Fire Code.	*Prior to Public Hearing*	
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021.		
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.



Explanation of Conditions or Corrections (if needed):

1. Verify that the right city adopted code is reference in documents for submission. International Fire Code (IFC) 2021.
2. Shall verify that building is provided with automatic fire sprinklers for proposed layout.
3. Shall verify two points of access to ladder building for proposed site layout conditions.

Form Updated: March 2024

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

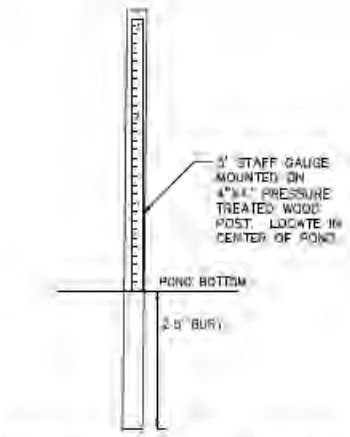
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

Signature NMPE #_____ Date

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Historic drainage calcs should include offsite flows onto property (if applicable)	Include in drainage report with development plan	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1.		
2.		
3.		
4.		

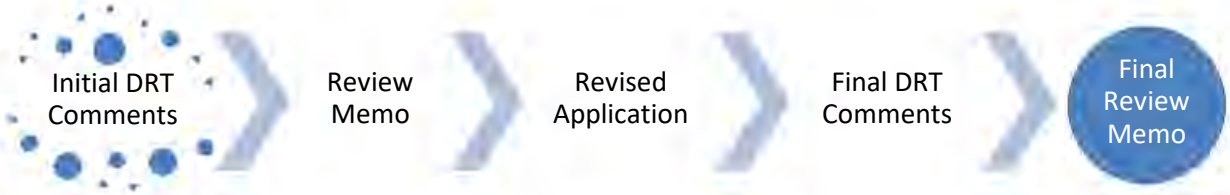
**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Existing vs Proposed Drainage Areas: looks like some ponding and drainages will be filled due to proposed building sites and new amenities; how is the developer planning to accommodate the excess water created by both the increase in imperviousness and the filling of these ponds? How do they plan to get the water to the new ponds, will it be piped? Will buildings have gutters and cisterns? Will landscaped areas be swaled to hold water? Etc…



Historical drainage: are they making sure to account for the entire basin in their drainage calcs, including offsite flows entering the property, esp. off the parking lot behind the school to the south if there is any?

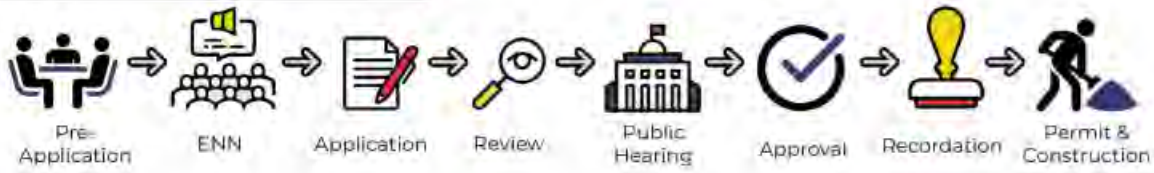
Development Review Team (DRT)
Comment Form

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Prior to Recordation	
2. All 4-inch sewer lines shall connect directly to the public sewer lines	Prior to Recordation	
3. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Prior to Recordation	
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Conditions of Approval and Technical Corrections Tables
Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response:**

Technical Corrections:	**Must be completed by:**	**Applicant Response:**
See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25.	Prior to Development Plan Approval	

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. Any and all future proposed improvements of this site that affect public infrastructure will be subject to **City Code Chapter 23** and additional reviews and possible corrections to meet Public Works Standards for roadways, ADA, signing, striping, lighting, etc. may be required at that time.

   City Code Chapter 23-3.18 City construction and assessment.
   Nothing in subsections 23-3.12 and 23-3.15 SFCC 1987 prevents the city from ordering construction of curbs, gutters and sidewalks and assessing the cost thereof against the property benefited in any manner provided by the laws of the state. (Code 1953, § 24-28; Code 1973, § 30-29; SFCC 1981, § 4-13-18; Ord. #38-1987, § 8).

Memorandum

To: Leroy Pacheco, PE COSF

From: Philip A. Gallegos, PE, Senior Transportation Engineer

CC: Robert Luna, PE, PTOE, Traffic Engineering Practice Lead, SW Region

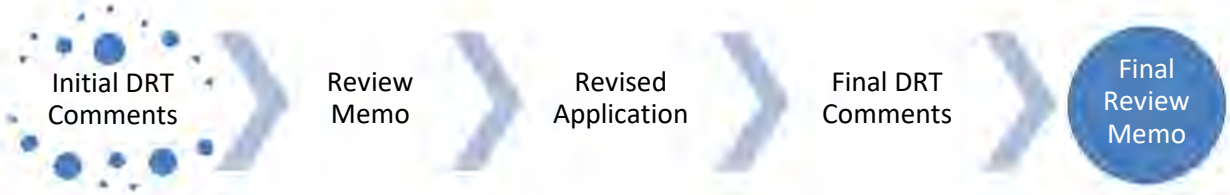
Date: 10/17/2025

Re: Girl's Inc. TIA Review

Wilson and Company has reviewed the Revised DRAFT TIA dated October 6, 2025 for the Girl's Inc. Development prepared by Bohannan Huston and have the following comments. Please let me know if you have any questions or require further information.

REPORT COMMENTS

- All original Comments have been addressed
- On page 48 the report states that the common crash type was rear-end collisions for Richards and Rufina however on table 24 the highest crash type is Another Vehicle at an Angle. This should be corrected in the narrative.
- There is a large percentage of crashes that were not classified by Crash Type. The Crash Summary Tables shall also include the percentage of crash types with the "not available or not classified" crash types removed from the total number of crashes. Therefore, showing percentages of total known crash types.
- All developer mitigations shall be shown on the developments site plan.
- For the intersection of Calle del Cielo and Cerrillos Road the report recommends evaluation of a cost share with the COSF due to the spillover occurring in existing condition. Since this LOS is made worse by the added traffic by the developer this mitigation shall be implemented by the developer.



Sincerely,

Philip A Gallegos, PE
Senior Transportation Engineer

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case # 2025-11028/11029/11030

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Prior to Building Permit Approval	
2. An approved Water Plan will be required for all new public water infrastructure and fire services.	Prior to approval of Development Plan	
3. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	At the time of development	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Each lot shall be served by a separate City water service.	At the time of development	

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.	Prior to Water Plan Approval	

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

City of Santa Fe, New Mexico

Attachment B
Maps and Photos

1. Aerial View
2. Existing Conditions Photos
3. Current Zoning Map
4. Future Land Use Map

Aerial View

The property is at the intersection of Rufina St and Rufina Cir E, nearby the Cerrillos Rd and Siler Rd intersection. It is the site of a former greenhouse and nursery, totaling approximately 4.27-acres.

Existing Conditions

Photo standing on the property looking east at the existing greenhouses where the main facility is proposed.

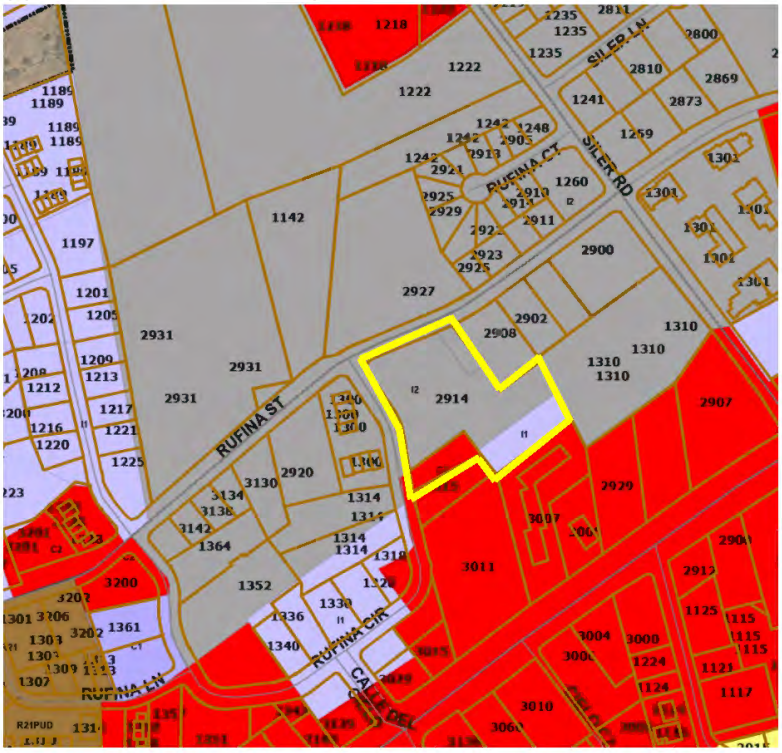
Photo in same spot as previous, but facing west toward the current and proposed parking area.

Looking north into forested parts of lot.

Looking towards north side of property at manmade 30% or greater slopes.

Existing walkways on site.

Forested area on north side of property.



Current site access off Rufina St that is planned to be used for the caretakers residence.

Area planned to be used for parking.

Current Zoning Map

2904 Rufina is currently zoned I-1 (Light Industrial), I-2 (general Industrial), and C-2 (General Commercial. The application includes a request to rezone Lot 3 to C-2.

Future Land Use Map

The Future Land Use Map (FLUM) designates the parcels as “Industrial” (Gray) and “Business Park” (Purple). The applicant requests to change Lot 3’s designation to “Community Commercial” (Red) in order to support the rezone and master plan proposed.

☐ *Six (6) 24"x36" plan sets and one (1) CD are required. Please include the following:*

☒	Letter of Application (intent, location, acreage)	☒	Statement addressing approval criteria	☒	Legal Lot of Record, Legal Description	☒	Development Plan (as defined by Section 14-3.8 SFCC 1987, if applicable)	☐	Proof of Compliance with Conditions of Annexation Approval (if applicable)
☐	Letter of Water and Sewer Availability	☐		☐		☐		☐	

General Plan Amendment Approval Criteria (Section 14-3.2(E) SFCC 1987)

(1) Criteria for All Amendments to the General Plan

The planning commission and the governing body shall review all general plan amendment proposals on the basis of the following criteria, and shall make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any amendment to the general plan:

(a) consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;
(b) consistency with other parts of the general plan;
(c) the amendment does not:
  (i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or
  (ii) affect an area of less than two acres, except when adjusting boundaries between districts; or
  (iii) benefit one or few landowners at the expense of the surrounding landowners or the general public;
(d) an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;
(e) compliance with the extraterritorial zoning ordinances and extraterritorial plans;
(f) contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development; and
(g) consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.

(2) Additional Criteria for Amendments to Land Use Policies

In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:

(a) the growth and economic projections contained within the general plan are erroneous or have changed;
(b) no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or
(c) conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning and annexation requirements.

Submittal Checklist (Requirements found in Section 14-3.5 SFCC 1987)

Six (6) 24"x36" or 11"x17" scalable plan sets and 1 CD with a PDF copy are required. Submittal requirements may vary based on the individual application and the requested zoning district. The City reserves the right to request additional information at any time during the review process. See Section 14-4 and 14-5 SFCC 1987 for rezoning regulations related to specific zones. Please include the following and check box to indicate submittal:

☑	Letter of Application (intent, location, acreage)	☑	Narrative addressing approval criteria (see below)	☑	Legal Lot of Record, Legal Description	☐	Development Plan (see Section 14-3.8 SFCC 1987)	☐	Landscape, Parking and Lighting Plan, Signage Specifications
☐	Terrain Management Plans (as required by Section 14-8.2 SFCC 1987)	☑	Traffic Impact Analysis (if required)	☐	Archaeological Clearance (if applicable)	☐	Sewer and Water Plan (including profiles and details), letter of availability (if applicable)	☐	Phasing Plan (if applicable)

Rezoning Approval Criteria, Sections 14-3.5(C) and (D) SFCC 1987

(C) Approval Criteria

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) one or more of the following conditions exist:
  (i) there was a mistake in the original zoning;
  (ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or
  (iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;

(b) all the rezoning requirements of Chapter 14 have been met;

(c) the rezoning is consistent with the applicable policies of the general plan, including the future land use map;

(d) the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city; and

(e) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.

(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.

(D) Additional Applicant Requirements

(1) If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;

(2) If the proposed rezoning creates a need for additional streets, sidewalks or curbs necessitated by and attributable to the new development, the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning requirements.

☐ *Six (6) 24"x36" plan sets and one (1) CD are required. Please include the following:*

☒	Letter of Application (intent, location, acreage)	☒	Statement addressing approval criteria	☒	Legal Lot of Record, Legal Description	☒	Los Prados Master Plan Set	☐	
☒	Archaeological Clearance (if applicable)	☒	Traffic Impact Analysis (if required)	☒	Proof of Compliance with Conditions of Annexation Approval (if applicable)	☒	Sewer and Water Plan (including profiles and details)	☐	
☐									

Master Plan Submittal Requirements, as defined by Section 14-3.9(C) SFCC 1987:

Applicants for developments that require master plans under this section shall submit plans and other documentation as required by the land use director that show compliance with the applicable provisions of the Santa Fe City Code as provided in Section 14-3.1(C) (Form of Application), including plans that show:

(a) existing conditions on the site and within the vicinity;
(b) proposed modifications to the site, including the locations of existing and new structures, grading, landscaping, lighting, pedestrian and vehicular circulation, parking and loading facilities;
(c) proposed changes to the zoning of land within the master plan area and the types, extent and intensity of land uses that are proposed;
(d) the proposed boundaries of tracts comprising the various land use areas and development phases;
(e) proposed modifications to the infrastructure serving the site, including locations of utilities and public and private streets and driveways and traffic control measures;
(f) the phases of development, if applicable;
(g) if public or private infrastructure is proposed to be constructed in phases, a plan for the timing, financing and responsibility for infrastructure construction;
(h) a development water budget as required by Section 14-8.13;
(i) for master plans involving five or more acres of land, the land use director may require an analysis of the fiscal impact to the city of providing utility and other municipal services to the area.

RE: Letter of Application
Girls Inc. of Santa Fe
General Plan Amendments, Rezone & Master Plan

Dear Alexa:

This letter is respectfully submitted on behalf of Girls Inc. of Santa Fe (the "Applicant") in application for a General Plan Amendment, Rezone and Master Plan of the property located at 2904 Rufina Street, comprising two parcels – Lot 3, Parcel #18206951,00000000 and Tract 2A, Lot 2 ("Lot 2"), Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial). This submittal includes the following requests:

1. General Plan Amendment to change the designations of Lot 3 from Industrial and Business Park to Community Commercial
2. Rezone of Lot 3 from I-1(Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial)
3. Master Plan of Lots 2 and 3 for a 55,478-square foot Girls Inc. Youth Center

These applications will establish zoning conformity between the two subject parcels, allowing them to be consolidated as part of the overall development of the property.

Girls Inc. of Santa Fe

For more than 70 years, Girls Inc. of Santa Fe (GISF), a non-profit corporation, has been a beacon of empowerment for young people in the community. While inspiring all girls to be Strong, Smart, and Bold through programs that promote healthy living, academic enrichment, and life skills development, GISF equips girls with the tools and support they need to succeed in life.

GISF provides quality out-of-school time programs in a safe, nurturing environment that meets the needs of working parents. Additionally, GISF engages in advocacy efforts to address issues like bullying, sexual harassment, mental health support, and reproductive justice - all of which are essential to empowering girls and creating a more equitable future. GISF works closely with

the Santa Fe Public Schools, Santa Fe Indian School, and other community partners to provide this comprehensive support.

GISF's current home - the historic Hurley House on Hillside Ave., is bursting at the seams, with limited space and functionality to support the broad range of educational, recreational, and mentorship activities provided. The facility can no longer meet the growing demand for services, the building is not ADA-accessible, and its aging infrastructure requires constant maintenance. Additionally, the facility's location in north Santa Fe poses difficulties for families on the southside with limited transportation options. These challenges limit inclusivity and prevent GISF from reaching all community members. GISF is poised to address the urgent and growing needs of girls in our community and an additional facility is essential to meet the increasing demand for services and expand their impact within the City of Santa Fe.

Project Description

The 4.27-acre property, located at the corner of Rufina Street and Rufina Circle, is the site of a former nursery. This segment of Rufina Street is at the heart of the Siler-Rufina Nexus, a diverse, mixed-use neighborhood that is home to Meow Wolf, several non-profit institutions, a variety of housing, light manufacturing/maker spaces, and offices. This central location is proximate to the families and schools that GISF serves, creating convenience for parents and a more inclusive program for the community. The proposed Master Plan addresses the potential future development of a new 55,478-square foot Girls Inc. youth center, including outdoor recreational areas and a small retail/food service space to provide entrepreneurial training for teenage girls. The program includes a two and three-story building housing classrooms, a gymnasium, gathering space, and administrative offices. Over 2.7 acres of open space will be established, densely vegetated due to the previous nursery use, providing outdoor recreational and educational opportunities. The open space will consist of lush gardens, shade and fruit trees, a play field, greenhouse, chicken coop, pavilion, and connected pathways throughout the site.

General Plan Amendment

Lot 3 has two Future Land Use designations – Industrial and Business Park. An amendment to the Future Land Use Map is requested to designate the entire parcel Community Commercial, in support of the request to rezone the property to C-2. Responses to the approval criteria in SFCC §14-3.2(E)(1) are below.

(a) consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure ;

Applicant Response: Economic development goals are upheld by the provision of quality childcare programs that support working parents. The 2004 report, *Cultivating Santa Fe's Future Economy*, by Angelou Economics, recognizes the important role of quality of life in economic development. In Strategy Four: Economic Development, the report states, *"The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation,*

arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens." The GISF program is a quality-of-life amenity serving the Santa Fe community and young families, enhancing the attractiveness of Santa Fe for existing residents and newcomers, alike. In addition, GISF will employ approximately 45 staff persons. The new facility will serve the growing southwest part of town, home to a majority of Santa Fe's families. Lastly, the site has existing access via two public rights-of-way and is currently served by public utility infrastructure.

(b) consistency with other parts of the general plan ;

Applicant Response: This General Plan Amendment conforms to the following General Plan Themes and Policies:

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(c) the amendment does not:

(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or

Applicant Response: The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.

(ii) affect an area of less than two acres, except when adjusting boundaries between districts;

Applicant Response: The subject parcel comprises 3.87 acres. Nevertheless, the property is adjacent to the Community Commercial designation along its south boundary.

(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;

Applicant Response: Contrary to harming surrounding landowners or the general public, this General Plan Amendment, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service

organization that mentors school-age girls with dynamic after school and summer programs.

(d) an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;

Applicant Response: This General Plan Amendment promotes the general welfare, because it will enable the construction of a new GISF youth center, offering after school and summer programs for school-age girls and much-needed support for working parents.

(e) compliance with extraterritorial zoning ordinances and extraterritorial plans;

Applicant Response: N/A

(f) contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development ;

Applicant Response: Redevelopment of this infill site provides for efficient and economic development, leveraging existing infrastructure, and supporting the harmonious development of Santa Fe. This request not only supports the general welfare of the community, but is the sole motivation for this effort.

(g) consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.

Applicant Response: The *City of Santa Fe Land Use and Urban Design Plan* recognizes the Siler Neighborhood as a Mixed-Use Corridor, stating, "Development and redevelopment along these corridors should be encouraged to provide greater density of commercial uses…". Furthermore, the Plan encourages the re–use of blighted or failing buildings and businesses. The redevelopment of a former, dilapidated nursery on an infill site in the Siler Neighborhood thoroughly aligns with these objectives. Furthermore, the City of Santa Fe Economic Development Department branded the subject neighborhood as the *Siler-Rufina Nexus* in a recent report issued to spur investment in the City's Opportunity Zones. In keeping with this effort, the proposed GISF facility is a significant investment in the neighborhood, increasing job opportunities and redeveloping a deteriorated site.

Rezone Request

Lot 3 is zoned I-1 (Light Industrial) and I-2 (General Industrial), and we are requesting to rezone the parcel to C-2 (General Commercial) to create uniformity with Lot 2, which is currently zoned C-2. Responses to the rezoning approval criteria in SFCC §14-3.5(C) and (D) are detailed below.

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete

findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) *One or more of the following conditions exist:*

(i) there was a mistake in the original zoning. N/A

(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning.

Applicant Response: This area has evolved over the years into a diverse, mixed-use neighborhood of recreational uses, non-profit institutions, a mix of housing types, and various commercial enterprises. The rezone will support the construction of the proposed GISF facility, which aligns well with this current pattern of development.

(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans.

Applicant Response: Rezoning the property to C-2 is more advantageous to the community. A vacant site falling into disrepair creates no community benefit. Redevelopment of this infill site vitalizes the neighborhood and supports the provision of critical community services. Furthermore, the rezone request aligns with the Themes and Policies of the General Plan, as summarized below:

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(b) *all the rezoning requirements of Chapter 14 have been met.*

Applicant Response: All the rezoning requirements of Chapter 14 have been met. A Pre-Application Conference was conducted with the Development Review Team on December 12, 2024, and the Early Neighborhood Notification Meeting was held on July 23, 2025.

(c) *the rezoning is consistent with the applicable policies of the general plan, including the future land use map.*

Applicant Response: A Request to amend the General Plan Future Land Use Map to Community Commercial accompanies this rezone application, which aligns with the requested C-2 zoning. Furthermore, the project conforms to the General Plan as outlined below:

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality

of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(d) *the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city.*

Applicant Response: General Plan Figure 4-4, Urban Sub-Areas, designates the subject property and surrounding area as an "Infill Area." The Growth Management Chapter of the General Plan specifically calls for prioritization of infill development in Santa Fe in order to maximize the efficient use of public infrastructure, while meeting the demand for urban land for development and directing new growth towards the historic core of the city rather than on the undeveloped fringes. The proposed infill project is in alignment with these strategic directives and is responsive to community needs for public services and community engagement in this area of the City. General Plan Section 4.1 states, *"In both 'infill' and 'future growth' areas, the city must encourage higher densities of residential and commercial development than existing zoning often allows" to help "create efficient use of already existing roads and utilities, help ensure cost-efficient public transit, and provide the type of housing that will be in demand…"*.

(e) *the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.*

Applicant Response: The subject property is served by existing roadways and public water and sewer infrastructure. Since the program includes the development of over 2.7 acres of outdoor recreational space, the GISF facility will not affect the capacity of area parks.

(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

Applicant Response: The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

Applicant Response. The subject parcel is 3.87 acres.

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.

Applicant Response: Contrary to harming surrounding landowners or the general public, this rezone, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.

SFCC §14-3.5 (D): Additional Applicant Requirements

(1) If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;

Applicant Response: The property is currently served by existing public roadway and utility infrastructure. The Applicant is prepared to construct any necessary infrastructure upgrades at the time of property development, and these improvements will be documented in the approved development plans.

(2) If the proposed rezoning creates a need for additional streets , sidewalks or curbs necessitated by and attributable to the new development , the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.

Applicant Response: The Traffic Impact Analysis identifies the need for a southbound left-turn lane on Rufina Circle serving the north access drive. No other off-site improvements are warranted.

Master Plan

A Master Plan is submitted with this application addressing the conceptual development program for a proposed youth facility for Girls Inc. of Santa Fe. The 55,478-square foot facility will be surrounded by lush gardens, trees, walking trails, and kid-friendly activities. A single main building is proposed with a combination of two and three stories. Additional structures include an outdoor pavilion, a small commercial teen enterprise space, a sport court, and a caretaker's residence. In keeping with the previous nursery use and working to preserve as many significant trees as possible, the building is sited in the back southeast corner, with the garden/open space occupying areas to the north/northwest, providing a buffer from the adjacent roadways.

Access and Traffic. The project has two proposed points of access via Rufina Circle, with a third access on Rufina St. to serve the caretaker's residence. Per the attached Traffic Impact Analysis, a southbound left-turn land serving the north access drive is warranted. There is adequate existing right-of-way to accommodate the proposed turn lane.

Parking. SFCC Table 14-8.6-1, Parking and Loading Requirements, does not include "youth center" as a land use category. Therefore, parking is provided in accordance with the needs of the proposed facility as outlined below:

Peak Daily Staff Demand	45 spaces
Facility Vehicles	5 spaces
Guests/Overflow	18 spaces
Total Required Parking	*68 spaces*
Total Provided Parking	**68 spaces**

Utilities

Water. The property is served by an existing 2-inch service line connected to the 6-inch main in Rufina Circle. The existing 5/8-inch water meter will be replaced with a new double 1-inch meter. In addition, a new 6-inch public fire line will be extended into the property from the same existing main, terminating in a new fire hydrant adjacent to the building.

Sewer. An existing 8-inch public sewer line within a 10-foot utility easement extends across the property from Rufina St. to the south boundary. A new 6-inch service connection will be installed to serve the main building and 4-inch service lines will serve the outdoor pavilion and the teen enterprise/commercial structure.

Terrain Management. The site slopes gently from the southeast to northwest. A series of decentralized stormwater detention ponds are proposed, with the most significant storage occurring at the north end of the site. The ponding will be incorporated into the landscaping to maximize passive stormwater harvesting/irrigation. Please refer to the attached Conceptual Terrain Management Plan for more information.

Landscaping. The Preliminary Landscaping Plan includes preservation of as many existing trees as is feasible, while enhancing the space with a palette of new deciduous trees, evergreens, and shrubs. Additional improvements include street trees along Rufina St. and Rufina Circle and walking paths throughout the open space. Please refer to the Preliminary Landscaping Plan for further details.

Master Plan Approval Criteria

The Master Plan approval criteria in §14-3.9(D) are addressed below:

(a) The master plan is consistent with the general plan;

Applicant Response: The proposed Master Plan aligns with various Themes and Polices in the General Plan, as summarized below.

1.7.2 Quality of Life. GISF provides an important community service, offering after-school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Sile-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life

through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(b) *The master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;*

Applicant Response: The C-2 zoning district is a robust mixed-use zoning category that supports both commercial uses and residential development at higher densities. The proposed GISF youth center is a permissible use in the C-2 district and an appropriate commercial development in the Siler-Rufina neighborhood. Furthermore, the Master Plan demonstrates compliance with C-2 development standards with respect to height, lot coverage, open space, terrain management, and landscaping.

(c) *Development of the master plan area will contribute to the coordinated and efficient development of the community; and*

Applicant Response: The Master Plan includes provisions for pedestrian and vehicular connectivity to the surrounding area, as called for in the General Plan. In addition, the subject property makes efficient use of existing infrastructure as an infill site – a value repeatedly emphasized in the General Plan.

(d) *The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.*

Applicant Response: The existing roadway and utility infrastructure are adequate to serve the project. The Traffic Impact Analysis (TIA) demonstrates that the roadway network has the capacity for the proposed development, with the inclusion of a new left-turn lane serving the north access drive on Rufina Circle.

Archaeology

The subject parcel is located in the Suburban Archaeological Review District. As the property is less than 10 acres, an archaeological survey is not required.

Water Budget

A Preliminary Water Budget is submitted herewith for reference. The water usage for the proposed facility is based upon the usage at the existing GISF Hillside location. The gallons per square foot of current usage is then extrapolated based on the proposed square footage of the new

facility. In addition, since the project is the redevelopment of a former nursery, historic water usage is credited per the provisions of SFCC §14-8.13(E)(1).

Early Neighborhood Notification

The Early Neighborhood Notification Meetings were held on January 23, 2025. City staff, Applicant, consultants, and a member of the press were in attendance. Please refer to the attached meeting notes for details.

In support of this request, the following documentation is submitted herewith for your reference:

1. Master Plan Application
2. Rezone Application
3. General Plan Amendment Application
4. Agent Authorization Letter
5. Warranty Deed
6. Legal Lot of Record
7. Utility Service Application
8. Preliminary Water Budget
9. ENN Meeting Notes
10. Traffic Impact Analysis
11. Master Plan Submittal Set

The Development Review Fees are calculated as follows:

General Plan Amendment	$1,000.00
Rezone	$1,000.00
Master Plan:	$ 500.00
TOTAL	**- $2,500.00**

Please contact me should you have any questions or require additional information.

Thank you for your consideration.

Sincerely,

Jennifer Jenkins, Principal

RE: Girls Inc of Santa Fe
Lot Consolidation of Lot 3 and Lot 2A-2

Dear Alexa:

This letter is respectfully submitted on behalf of Girls Inc. of Santa Fe (the "Applicant") as part of the application for a General Plan Amendment, Rezone and Master Plan of the property located at 2904 Rufina Street, comprising two parcels – Lot 3, Parcel #18206951,00000000 and Tract 2A, Lot 2 ("Lot 2"), Parcel #99309296.

While Lot 3 and Lot 2-2 are currently separate parcels with different zoning, following approval of the General Plan Amendment, Rezone and Master Plan applications, we plan to consolidate these parcels and will submit a Lot Consolidation Plat with the Development Plan application.

In lieu of the current Condition of Approval stating, "Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity, we request an amended Condition of Approval stating, "Applicant shall consolidate Lots 3 and 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2-2 in perpetuity concurrent with Development Plan review.

Respectfully,

Kim Brown

Kim Brown, Executive Director

JENKINSGAVIN
LAND USE | PROJECT MANAGEMENT

NOTICE OF EARLY NEIGHBORHOOD NOTIFICATION MEETING

July 8, 2025

Dear Neighbor:

This letter is being sent as notice of a neighborhood meeting to discuss pending development review applications to be submitted to the City of Santa Fe. The 4.28-acre subject property at 2904 Rufina St. comprises two parcels – Lot 3 totaling 3.877 acres and Lot 2-2 totaling 0.399 acres. Lot 3 is zoned I-1 & I-2 (Industrial), and Lot 2-2 is zoned C-2 (General Commercial). The applications will include a request to rezone Lot 3 to C-2 (General Commercial), along with amendments to the General Plan Future Land Use Map to change the Lot 3 land use designations from Industrial and Business Park to Community Commercial. In addition, a Master Plan will be submitted addressing the redevelopment of the property as a youth center for Girl's Inc. of Santa Fe. The facility will include approximately 49,000 sf of buildings and significant open space/outdoor recreation areas. Please refer to the attached Vicinity Map, Site Plan, and ENN Guidelines for more information.

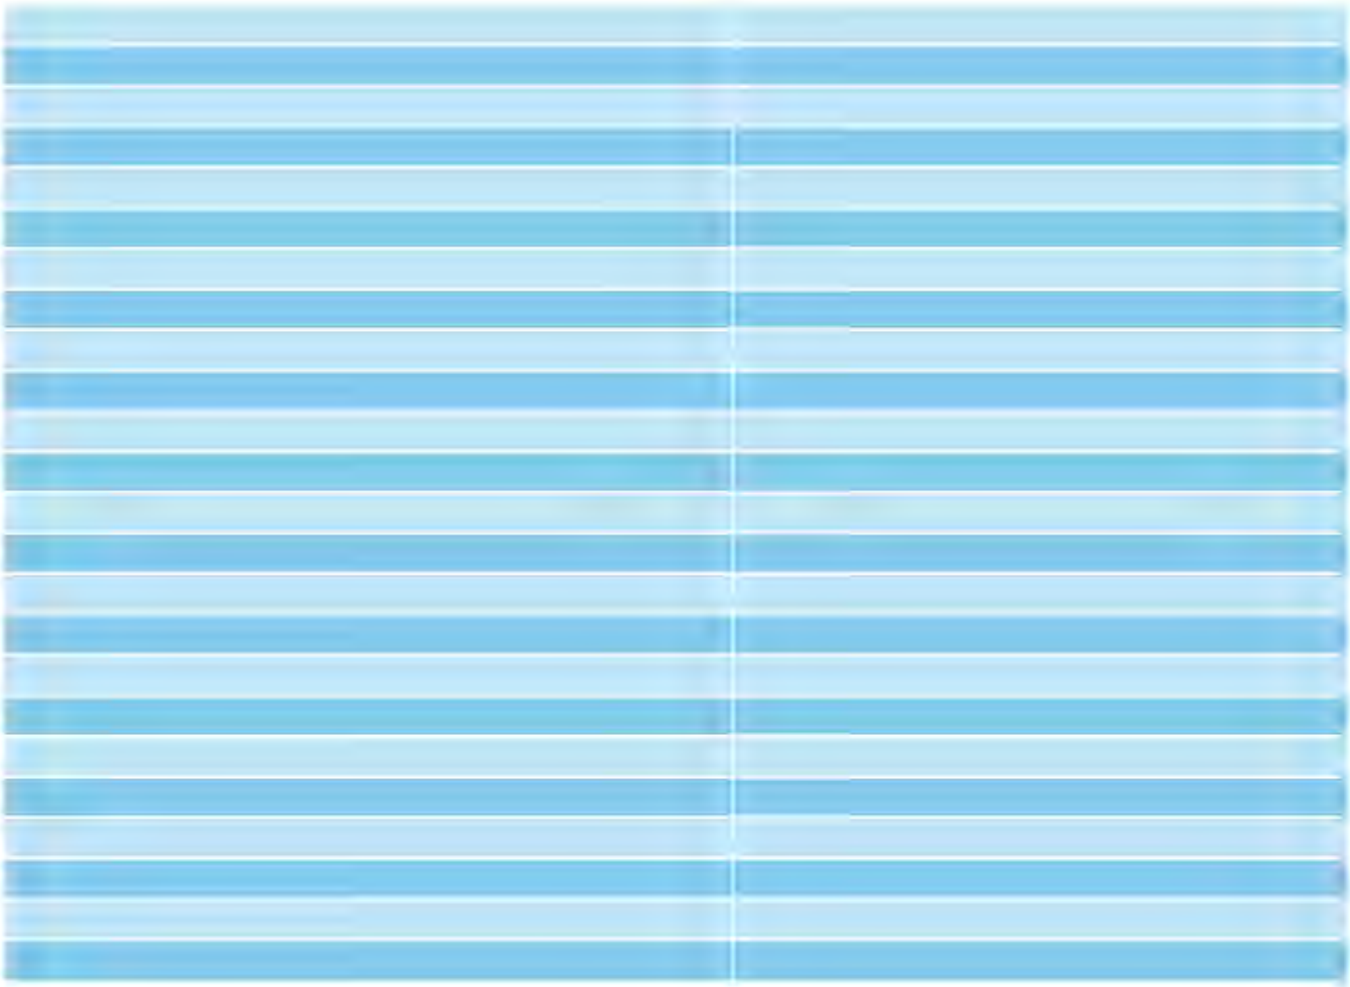
In accordance with the requirements of the City of Santa Fe's Early Neighborhood Notification regulations, this is to inform you that a virtual meeting is scheduled for **July 23, 2025 at 5:30 pm.**

The meeting link is below and can be accessed on the City's website at
https://santafenm.portal.civicclerk.com/

Join Zoom Meeting
https://us02web.zoom.us/j/87370280781?pwd=mbc3ddQPerH2OnXcoIsltRgFBia68a.1

Meeting ID: 873 7028 0781; Passcode: 529568
Call-in number: (669) 444 9171

Early Neighborhood Notification is intended to provide for an exchange of information between prospective applicants for development projects and the project's neighbors before plans become too firm to respond meaningfully to community input. If you have any questions or comments, please contact Jennifer Jenkins at 505-820-7444 or jennifer@jenkinsgavin.com. Persons with disabilities in need of special accommodations, or the hearing impaired needing an interpreter, please contact the Land Use Department at 505-955-6820 or gagurule@santafenm.gov 5 days prior to the meeting date.



Sincerely,

Jennifer Jenkins

Meeting assets for Girls Inc. ENN Meeting are ready!

Hi Jennifer Jenkins

The following assets for the meeting - Girls Inc. ENN Meeting are now available.

Meeting summary

Quick recap

The meeting served as an early neighborhood notification session for a proposed rezoning and master plan for Girls Inc.'s new facility in Santa Fe, with introductions made between the project team and Alexa Hempel, a senior city planner. The team presented plans for developing a new 3.8-acre campus with various facilities including a gathering space, gymnasium, and classrooms, while Jennifer explained the proposed zoning changes and traffic impact analysis. The conversation ended with an invitation for public questions and comments, with next steps including submitting applications to the city and moving through various review processes if approved.

Next steps

- Jennifer to submit applications to the city next month for the Girls Inc. project.
- Alexa to review the submitted application once received on August 11th.
- Tyler to complete the traffic study for the project.
- Kim to follow up with Lily to schedule a time to talk tomorrow.
- Alexi to continue refining the conceptual design of the Girls Inc. facility.
- Jennifer to prepare for the Planning Commission hearing, likely in early November.
- Girls Inc. team to proceed with detailed project design after obtaining approvals for rezoning and master plan.
- Jennifer to prepare for a future early neighborhood notification meeting for the development plan.

Summary

New Senior Planner Team Introduction

The meeting began with introductions, where Alexa, a new senior planner from the city, met the project team consisting of Kim, Jennifer, Alexander, Oralynn, and Tyler. Alexa shared her background working for the National Park Service in Santa Fe. The team discussed the possibility of having a low attendance for the meeting, with Jennifer noting that the protocol is to wait for 15 minutes before calling the meeting if there are no external attendees.

Girls Inc. Rezoning Community Meeting

The meeting served as an early neighborhood notification session for a proposed rezoning and master plan for Girls Inc.'s new facility in Santa Fe. Alexa Hempel, a senior planner with the city, explained the purpose of the meeting, emphasizing the importance of community input before the project advances. Jennifer Jenkins and Angelica Wolf, representing Jenkins Gavin, introduced the project and highlighted Girls Inc.'s mission to empower girls through educational and life skills programs. Kim Brown, the executive director of Girls Inc., expressed excitement about expanding their services to a new, more central location to address their extensive waitlist and meet community needs. The team also introduced Alexa Dzurek, the architect, Orlin Gurutis, the civil engineer, and Tyler Smith, who provided traffic engineering services. The conversation ended with an invitation for public questions and comments, which attendees could submit via chat or the raise-hand feature.

Girls Inc. Campus Zoning Proposal

Jennifer presented a proposal for Girls Inc. to develop a new campus on a 3.8-acre property located at the southeast corner of Rufina and Rufina Circle. She explained the current zoning and land use designations of the property and outlined the requested changes, including a rezone from I-1 and I-2 to C-2 zoning and an amendment to the general plan to change the designation to community commercial. The proposed changes aim to align with neighboring zoning and support the development of the new youth center facility.

Girls Inc. Campus Site Plan

Jennifer presented a site plan for the former nursery property, which will be redeveloped as the new Girls Inc. campus. She explained the proposed layout, including preserved areas for an outdoor classroom and recreational space, as well as areas suitable for development. Jennifer outlined the master plan, which will be submitted alongside a general plan amendment and rezone request, detailing the conceptual development intent. The plan includes two access points off Rufina Circle, parking areas for buses and staff, and a drop-off/pickup zone for parents.

Girls Inc. Facility Expansion Plan

Jennifer presented a plan for expanding Girls Inc.'s facility, which would include a gathering space, gymnasium, classrooms, and potential entrepreneurial training space. The project would cover 4.2 acres, with 3 acres of preserved open space, and would require rezoning of Lot 3 to C2 General Commercial. The facility would serve more families in the community by expanding program offerings and centralizing operations, making it more financially sustainable.

Traffic Study and Approval Process

Jennifer presented a traffic study for a proposed development, explaining how intersections are analyzed using a level of service grading system. She reported that most intersections showed good levels of service, with the exception of Rufina and Sila during the afternoon rush hour. Jennifer outlined the next steps in the approval process, including submitting applications to the city, going through reviews, and holding public hearings at the planning commission and city council levels. If approved, the project would move to the development plan phase, involving further design work and additional public meetings.

Project Submission and Follow-Up Discussion

Jennifer opened the meeting by inviting questions and offering to address any concerns, both during and after the meeting. She clarified that Alexa, who handles city processes, would be unable to answer detailed questions about the project until a submission is made, which is planned for August 11th. Alexa confirmed she had no immediate questions and expressed

anticipation for the submission. Kim concluded by arranging a follow-up conversation with Lily and mentioned she would be in touch via text or email. The conversation ended with expressions of gratitude and goodbyes.

I. INTRODUCTION AND SUMMARY

Girl's Inc. proposes developing a youth center, situated southeast of the Rufina Street and Rufina Circle (east) intersection. The proposed development will include a 5,000 square-foot facility with the ability to enroll 250 children.

A. STUDY PURPOSE

The purpose of the traffic study is to determine the impacts of the proposed development on the surrounding roadway network, evaluate the operation of the proposed site accesses, and to recommend any mitigation measures that may be necessary to support additional traffic generated by the new development.

B. EXECUTIVE SUMMARY

1. SITE LOCATION AND STUDY AREA

The site is located at 2904 Rufina Street on the southeast corner of the Rufina Street and Rufina Circle intersection in Santa Fe, New Mexico. A vicinity map is shown in Figure 1.

The study area consists of the following intersections:

- Siler Road and Rufina Street (existing 4-way signalized intersection)
- Calle del Cielo and Cerrillos Road (existing 4-way signalized intersection)
- Rufina Street and Parkway Drive/Rufina Circle (west) (existing 4-way unsignalized intersection)
- Rufina Street and Rufina Circle (east) (existing 4-way unsignalized intersection)
- Rufina Street & Richards Avenue (existing 4-way signalized intersection)
- Rufina Circle and Calle del Cielo (existing 4-way unsignalized intersection)
- Rufina Circle and Access 1 (future 3-way unsignalized intersection)
- Rufina Circle and Access 2 (future 3-way unsignalized intersection)

The intersection evaluations include analysis for the AM and PM peak hours for the following traffic conditions:

- Existing traffic (2025)
- 2028 Completion Year without the proposed site development (2028 No Build)
- 2028 Completion Year with the proposed site development (2028 Build)

- 2038 Horizon Year without the proposed site development (2038 No Build)
- 2038 Horizon Year with the proposed side development (2038 Build)

2. PRINCIPAL FINDINGS

The traffic analysis found that all intersections operate acceptably overall in the 2028 Build scenario. The eastbound left, eastbound thru/right, and the northbound left turning movements at the signalized intersection of Rufina Street and Siler Road operate at LOS E in the PM peak hour. To improve the eastbound movement, this approach should be restriped to remove on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at LOS E during both peak hours, while the southbound left turn movement degrades to LOS E in the AM peak hour due to the development traffic. With this decline and increase in queue distance needed, it is recommended to complete median modifications on the north side of this intersection along Calle del Cielo to adequately store the queue that will develop. The median should be a maximum of 5' with a 10' left turn lane, a 10' southbound through lane, and a 10' dedicated right turn lane. Additionally, traffic signal timing adjustments should be completed at the intersection to help address this issue. As this storage length was not adequate prior to the development, a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares.

In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and the two new access driveways on Rufina Circle will operate overall acceptably. The northbound left turn lane at both the East and West intersections of Rufina Street and Rufina Circle is recommended to be installed to address City of Santa Fe turn lane warrants.

At the Rufina Circle and Calle del Cielo the westbound left turn lane is warranted and should be installed. This lane should be a minimum of 50' and include a taper length as determined by the MUTCD and prescribed in the City of Sanat Fe standards.

Lastly, Rufina Circle and Access 1 meets warrants for a left turn lane at the entrance to the development. This left turn lane should be 50 feet in length for storage with a taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.

3. RECOMMENDATIONS

- Install a southbound left turn lane at Rufina Circle and Access 1 with striping modifications. This will include removal of on-street parking and installation of the left turn lane by shifting the northbound lane, southbound lane, and bike lanes to incorporate an 11 foot left turning lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as prescribed in the City of Santa Fe standards.
- Install an Eastbound dedicated right turn lane at the intersection of Rufina Street and Siler Road. This lane should be accomplished by striping by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 225 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- Median modifications should be completed at the Cerrillos and Calle de Cielo intersection. The median should be a maximum of 5 feet and the southbound lanes should include a 10' right turn lane, a 10' through lane, and a 10' left turn lane. These lanes should extend the full length of Calle de Cielo from Cerrillos to Rufina Circle.
- The northbound approach at the intersection of Rufina Street and Rufina Circle (West) should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- At the intersection of Rufina Street and Rufina Circle (East), the northbound approach should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- Rufina Circle and Calle del Cielo warrants a westbound left turn lane. This lane should be included at this intersection through restriping. On street parking would be removed approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a

5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

- All designs shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.

II. PROPOSED DEVELOPMENT

A. LAND USE AND INTENSITY

The proposed development is a 5,000 square-foot facility.

The development is located southeast of the Rufina Street and Rufina Circle (east) intersection. The study area is partially developed.

B. DEVELOPMENT PHASING AND TIMING

The project is expected to be developed by 2028.

III. STUDY AREA CONDITIONS

A. STUDY AREA

The study area consists of the following intersections:

- Siler Road and Rufina Street (existing 4-way signalized intersection)
- Calle del Cielo and Cerrillos Road (existing 4-way signalized intersection)
- Rufina Street and Parkway Drive/Rufina Circle (west) (existing 4-way unsignalized intersection)
- Rufina Street and Rufina Circle (east) (existing 4-way unsignalized intersection)
- Rufina Street & Richards Avenue (existing 4-way signalized intersection)
- Rufina Circle and Calle del Cielo (existing 4-way unsignalized intersection)
- Rufina Circle and Access 1 (future 3-way unsignalized intersection)
- Rufina Circle and Access 2 (future 3-way unsignalized intersection)

B. SITE ACCESSIBILITY

The development will include two accesses on Rufina Circle, approximately 300 feet and 550 feet south of the Rufina Street and Rufina Circle (east) intersection. The site access locations being proposed on Rufina Circle are existing driveways and the development plan to utilize these as their future access points.

The primary routes to the site are anticipated to be either Cerrillos Road, Siler Road or Rufina Road.

C. DATA SOURCES

The data used in this report consists of the traffic volumes described below, aerial photography and mapping from Google Earth®, as well as information provided by IDAX Traffic Counts.

IV. EXISTING CONDITIONS ANALYSIS

A. BACKGROUND

Roadway federal classification is updated approximately every four years. The classification process involves local governments, the Santa Fe Metropolitan Planning Organization (SFMPO), New Mexico Department of Transportation (NMDOT), and the Federal Highway Administration (FHWA). The SFMPO Roadway Functional Classification Map classifies roadways based on their function. Roadways are subject to design guidance based on their functional classification, design speed, or based on Comprehensive Plan corridor designations.

1. ADJACENT ROADWAYS

The following are adjacent roadways:

- Cerrillos Road is a principal arterial with three lanes in each direction and dedicated left and right turn lanes. Cerrillos Road has a posted speed limit of 40 miles per hour (MPH). Cerrillos Road provides regional connectivity within the greater Santa Fe area, serving as a link between major/minor roadways which travel in north-south directions, including Highway 285 and I-25. Sidewalks and bicycle lanes exist along Cerrillos Road in this area.
- Siler Road is a minor arterial, with one lane in each direction and a two-way left turn lane. Siler Road has a posted speed limit of 30 MPH. Siler Road provides regional connectivity within Santa Fe, serving as a crossing of the Santa Fe river to the north. Sidewalks exist along Siler Road in this area as well as designated bike lanes/shoulders.
- Richards Avenue is a major collector roadway with one lane in each direction. Richards Avenue has a posted speed limit of 35 MPH. Richards Avenue has sidewalks and bicycle lanes in this area.
- Calle del Cielo is classified as a local roadway by the SFMPO. Calle del Cielo doesn't have a posted speed limit within the section of roadway of the study although the City of Santa Fe statute states if unposted, the speed limit is 25 MPH. To the south of Cerrillos this roadway is classified as a major collector that is posted at 25 MPH, although this portion of the roadway was not included in this study limits. Calle del Cielo has sidewalks, curb, and gutter. Calle del Cielo intersects Cerrillos Road approximately 200-ft south of the Rufina Circle intersection.
- Rufina Street is a minor arterial roadway with one lane in each direction and a posted speed limit of 30 MPH. Sidewalks and bicycle lanes exist along Rufina Street in this area.

- Rufina Circle is a local roadway with speed humps and one lane in each direction. Rufina Circle does not have a posted speed limit; however, the City of Santa Fe statutes state if unposted, the speed limit is 25 MPH. Additional advisory signs designating speed humps ahead specify a 20 MPH advisory speed. Sidewalks and bicycle lanes exist along Rufina Circle in this area.

The City of Santa Fe Roadway Classification map is included in Appendix A.

Additionally, bike lanes, pedestrian facilities, and bus stop locations were assessed based on existing conditions.

2. MULTI-MODAL CONDITIONS

The Santa Fe Bikeways and Trails map includes designated bicycle lanes on many of the roadways as noted in the roadways section. This map also notes Richards Road, and Clark include either a bike lane or designated as a shared-lower traffic/speed corridor.

The Santa Fe trails bus system also runs through the area of the development. Route 2 runs along Cerrillos Road with the nearest stop near the intersection of Calle del Cielo and Cerrillos Road. This route will take a rider to the Santa Fe Place transit Center as well as the Downtown Transit Center, with stops at several rail runner locations.

B. EXISTING TRAFFIC CONDITIONS

Traffic counts for the intersections analyzed in the study area were collected on July 9, 2025. Existing traffic counts are included in Appendix B. The counts included 6-hour turning movement counts. Build traffic for the proposed facility was estimated by taking the maximum enrollment for the new facility, developing trip generation, and distributing those trips onto the Build roadway network.

C. LEVEL OF SERVICE DEFINITIONS

The *Highway Capacity Manual Seventh Edition* (HCM) defines Level of Service (LOS) for signalized and unsignalized intersections in Table 1 as follows:

Table 1 | LOS Definitions			
Level of Service	**Definition**	**Signalized (sec/veh)**	**Unsignalized (sec/veh)**
A	Most vehicles do not stop	<10	<10
B	Some vehicles stop	>10 and <20	>10 and <15
C	Significant numbers of vehicles stop	>20 and <35	>15 and <25
D	Many vehicles stop	>35 and <55	>25 and <35
E	Limit of acceptable delay	>55 and <80	>35 and <50
F	Unacceptable delay	>80	>50

The City of Santa Fe has established LOS D as the generally acceptable level of service in urban areas. When intersections operate below this level, improvements are considered where feasible. Other critical movements are also desired to have LOS D or better if possible.

D. EXISTING INTERSECTION CAPACITY ANALYSIS

The traffic volume for all existing intersections were analyzed using Highway Capacity Software version 8.4 (HCS 2025), which uses the intersection methodology from the Seventh Edition of the Highway Capacity Manual (HCM). Existing traffic volumes are shown in Figure 2. Individual intersection output for the existing conditions analysis is included in Appendix C. The results for the signalized intersections are summarized in Table 2.

All signalized intersections operate at an overall acceptable level of service in the AM and PM peak hours. The northbound through/right turn movement at the Calle del Cielo and Cerrillos Road intersection operates at a LOS E in both the AM and PM peak hours.

At the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue resulting from the analysis using the HCS software is 85 feet during the AM peak hour and 140 feet during the PM peak hour. The 95th percentile queue lengths are included in the results in Appendix C. The available queue storage for this movement is approximately 75 feet which results in queue spillover for this movement during both peak hours. The City of Santa Fe should review this movement and make adjustments to lengthen this queue storage space since this occurs in existing conditions.

Table 2 | Existing Signalized Intersection Results						
Intersection	2025 AM Peak			2025 PM Peak

Southbound Approach	N/A	9.8	0.01	0	A	10.9	0.04	25	B
* - HCM 95th percentile queue rounded to next 25-foot increment									

The existing access points that will be utilized by the proposed development are in place although no traffic was documented leaving or entering this lot during traffic counting. Therefore access 1 and access 2 are not documented in the operational tables due to no turning movements into the existing site.

V. PROJECTED TRAFFIC

A. SITE TRAFFIC FORECASTING

1. TRIP GENERATION

Generated trips are broken down into three types; 1) primary, 2) pass-by trips, and 3) diverted link. The Trip Generation report defines these trips as follows:

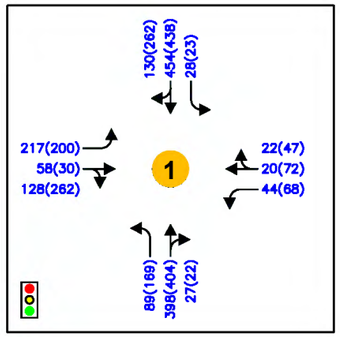
- **Primary Trips** – These trips are made for the specific purpose of visiting the generator. The stop at that generator is the primary reason for the trip. For example, a home to shopping to home combination of trips is a primary trip set.
- **Pass-by Trips** – These trips are made as intermediate stops on the way from an origin to a primary trip generation. Pass-by trips are attracted from the traffic passing the site on an adjacent street that contains direct access to the generator site. These trips do not require a diversion from another roadway. For example, stopping at the store on the way home from work is an example of a pass-by trip. No pass-by trips we used in this analysis.
- **Diverted Linked Trips –** These trips are attracted from the traffic volume on the roadway within the vicinity of the generator, but which require a diversion from that roadway to another roadway to gain access to the site. The roadways could include streets or freeways adjacent to the generator, but without access to the generator. For this study, the diverted link trips have been included in with the primary trips.

This study evaluates primary trips only.

The trip generation is generally based on the 11th Edition of the Institute of Transportation engineer's (ITE) Trip Generation Manual which estimates trips by land use characteristics. Trip generation for this study was determined by counting the existing trips to the existing location of Girl's Inc. in Santa Fe. The existing Girl's Inc has an enrollment of 85 students, whereas the proposed Girl's Inc will have a maximum enrollment of 250 students. Therefore, the existing trips at the existing Girl's Inc were multiplied by a factor of 2.94 (250/85). Based on this it is anticipated that there will be 388 AM peak hour trips (200 entering and 188 exiting) and 388 PM peak hour trips (188 entering and 200 exiting). The site-specific trip generation is shown in Table 5.

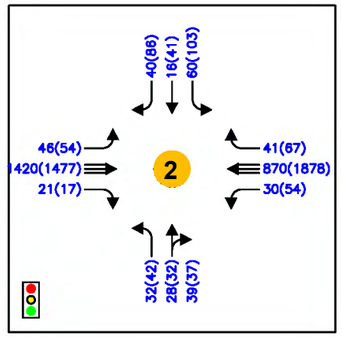
Table 5 | Trip Generation						
Land Use	AM Peak Hour			PM Peak Hour		
	Enter	Exit	Total	Enter	Exit	Total
Existing Girl's Inc	68	64	132	64	68	132
Proposed Girl's Inc	**200**	**188**	**388**	**188**	**200**	**388**

2. TRIP DISTRIBUTION AND ASSIGNMENT



The trip distribution was determined within the existing roadway network to and from the development based on the proportions of existing turning movement counts.

Spreadsheets showing the development of the trip distribution are included in Appendix D. Trip assignment percentages are shown in Figure 3 with the trip assignment volumes shown in Figure 4.



3. TRAFFIC PROJECTIONS

A background growth rate of 2% was applied to provide an estimate of potential future growth of traffic at all intersections evaluated. The growth rate determination and data are summarized in the spreadsheets included in Appendix D.

VI. TRAFFIC AND IMPROVEMENT ANALYSIS

A. LEVEL OF SERVICE ANALYSIS

The following section discusses the results of the future year traffic analysis. The intersection capacity analysis was completed using HCS 2025 which implements the Highway Capacity Manual procedures.

1. 2028 NO BUILD INTERSECTION CAPACITY ANALYSIS

The 2028 No Build analysis assumes that the proposed development is not completed in the 2028 time period. Figure 5 shows the 2028 No Build Peak Hour Traffic Volumes. The HCS outputs are included in Appendix E.

For the 2028 No Build scenario all signalized intersections operate at an acceptable level of service in the AM and PM peak hours. The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at a level of service E in both the AM and PM peak hours. Table 6 summarizes the 2028 No Build Signalized Results.

During this scenario, the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue continues to lengthen to 100 feet during the AM peak hour and 150 feet during the PM peak hour. Again, the available queue storage for this movement is approximately 75 feet which results in queue spillover for this movement during both peak hours. As this continues to occur during no build scenarios, the City of Santa Fe should review this movement and make adjustments to lengthen this queue storage space since this is first shown in existing conditions. If the development does move forward mitigation measures are shown in the build scenario.

Table 6 | 2028 No Build Signalized Intersection Results						
Intersection	2028 AM Peak			2028 PM Peak

Southbound Left	90	25	25
* - HCM 95th percentile queue rounded to next 25-foot increment			

The study found that all unsignalized intersections operate at acceptable levels of service in the 2028 No Build condition with all movements at LOS C or better for both AM and PM peak hours.

For the 2028 No Build condition, the Rufina Street and Rufina Circle (west) intersection has eastbound and westbound approaches that are expected to operate at LOS A in the AM and PM peak hours. The northbound and southbound approaches are expected to operate at a LOS C in the AM and PM peak hours.

The Rufina Street and Rufina Circle (east) intersection has eastbound and westbound approaches that are expected to operate at LOS A in the AM and PM peak hours while the northbound approach operates at LOS B in the AM and PM peak hours. The southbound approach operates at a LOS B in the AM peak hour and LOS A in the PM peak hour.

The Rufina Circle and Calle del Cielo intersection is expected to operate at a LOS A for the eastbound approach, westbound approach, and northbound thru/right movement in both the AM and PM peak hours. The northbound left turning movement operates at LOS B in the AM and PM peak hours. The southbound approach operates at LOS A in the AM peak hour and LOS B in the PM peak hour. Table 8 shows the 2028 No Build Unsignalized Results.

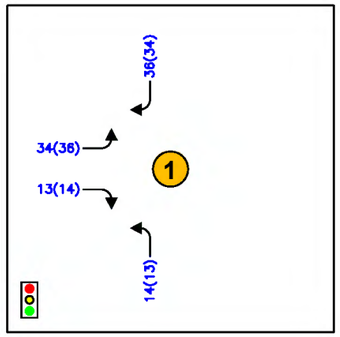

Table 8 | 2028 No Build Unsignalized Intersection Results									
Intersection	Provided Queue	2028 AM Peak				2028 PM Peak			
		Delay (sec)	V/C	Queue* (ft)	LOS	Delay (sec)	V/C	Queue* (ft)	LOS
Rufina St & Rufina Circle (West)									
Eastbound Approach	TWLT	7.7	0.01	0	A	8.3	0.01	0	A
Westbound Approach	TWLT	9.0	0.02	25	A	8.2	0.01	0	A
Northbound Approach	N/A	17.3	0.16	25	C	20.2	0.34	50	C

Southbound Approach	N/A	13.2	0.01	0	B	0.0	0.00	0	A
Rufina Circle & Calle del Cielo									
Eastbound Approach	N/A	7.3	0.00	0	A	7.3	0.00	0	A
Westbound Approach	N/A	7.5	0.03	25	A	7.7	0.05	25	A
Northbound Left	210	10.4	0.10	25	B	12.6	0.23	25	B
Northbound Thru/Right	210	9.0	0.07	25	A	9.2	0.05	25	A
Southbound Approach	N/A	9.9	0.01	0	A	11.1	0.05	25	B
* - HCM 95th percentile queue rounded to next 25-foot increment									

Again, the existing access points that will be utilized by the proposed development are in place in existing conditions although no traffic was documented leaving or entering this lot during traffic counting. Therefore access 1 and access 2 are not documented in the operational table above due to no turning movements into the existing site.

FIGURE 4
TRIP ASSIGNMENT VOLUMES

C:\Users\CWERMILLION\appdata\local\temp\AcPublish_8836\20260085_Figures.dwg Oct 06, 2025 - 4:47pm

2. 2028 BUILD INTERSECTION CAPACITY ANALYSIS

The trips generated by the site (Table 5) were assigned to the intersections using the trip assignment volumes shown in Figure 4. These trips were added to the 2028 No Build traffic projections to calculate the 2028 Build volumes. The 2028 Build Traffic Volumes are illustrated in Figure 6.

The study found that all signalized intersections operate at an overall acceptable level of service in the AM and PM peak hours. While the intersections operate at overall acceptable conditions, some individual movements see LOS E in the 2028 Build condition.

The Rufina Street and Siler Road intersection continues to operate with acceptable level of service with overall LOS B in the AM peak hour and LOS D during the PM peak hour. This intersection will see the eastbound left, eastbound through/right and northbound left turn movements decline in operation to LOS E during the PM peak hour. The northbound left turning movement 95th percentile queues extend past the developed left turn lane although a two way left turn lane exists for another 200 feet which can hold this queue.

Mitigation efforts were completed for the Rufina Street and Siler Road intersection by adding a dedicated eastbound right turn lane at the intersection. A summary of the mitigation operations is included in Table 10. This improved the overall operations to LOS C in the PM peak hour. The addition of this eastbound right turn lane is recommended for the future of this intersection. Additionally, signal timing adjustment should be considered to further improve the intersections operations.

The intersection of Calle del Cielo and Cerrillos Road also is expected to have turning movements that operate at LOS E and LOS F. The northbound thru/right turn movement continues to operate at LOS E in both the AM and PM peak hours and the southbound left movement declines to LOS E in the AM peak hour and LOS F during the PM peak hour for the 2028 Build condition. All other movements operate at LOS D or better. Even though the southbound left turning movement declined to LOS E, the 95th percentile queueing length was 94 feet in the AM peak hour and 229 feet during the PM peak hour. This is still comparable to the existing 95th percentile queue lengths associated with this movement. Because queue spillover occurred during the existing conditions, the development is not fully responsible although a portion is added to this movement through the intersection. It is recommended to redesign the median on Calle del Cielo to lengthen the southbound left turn movement storage. If the median is adjusted to be four to five feet for the entire length of the roadway, the southbound left turn lane could be lengthened to approximately 200 feet in length which would accommodate and AM peak 95th percentile queue but leave some of the PM peak queue beyond this storage lane.

Additional signal timing adjustments were completed on the PM peak hour of this intersection which is shown in Table 10. This signal adjustment helped to improve the southbound left turning 95th percentile queue length to a length of 200 feet. It is recommended to update the median on Calle del Cielo and complete signal timing adjustments at this intersection prior to the 2028 build scenario.

The Rufina Street and Richards Avenue intersection operates at an overall LOS B in the AM and PM peak hours for the 2028 Build condition. All movements at this intersection will operate at LOS C or better for both the AM and PM peak hours.

The 2028 Build capacity analysis for the signalized intersections is shown in Table 9 with the full intersection output included in Appendix F.

SITE TRAFFIC ANALYSIS

FIGURE 5
2028 AM(PM) NO BUILD
PEAK HOUR TRAFFIC VOLUMES

3. 2038 NO BUILD INTERSECTION CAPACITY ANALYSIS

The 2038 Horizon Year No Build analysis assumes the proposed development is not completed. Figure 7 shows the 2038 Horizon Year No Build peak hour volumes.

The traffic analysis found that all signalized intersections, except for the Rufina and Siler intersection, are expected to operate at an acceptable level of service in both the AM and PM peak hours. While these intersections operate overall acceptably, some individual movements are expected to operate at LOS E in the 2038 No Build conditions due to background traffic growth.

The Rufina and Siler intersection is expected to operate at an overall LOS C in the AM peak hour and LOS F in the PM peak hour. During the AM peak hour all movements will operate at LOS D or better. The PM peak hour contains the eastbound left, eastbound through/right, westbound left, northbound left, and southbound through that will operate at LOS F. The westbound through/right will also operate at LOS E during the PM peak hour. Due to these deficiencies occurring in the no build scenario, the decline in operation is not due to the development traffic. The main issue driving this decline is the significant volume of northbound and southbound traffic at the intersection. In the no build a dedicated southbound right turn lane is warranted.

With this southbound right turn lane included in the no build scenario, all movements return to acceptable level which shows that if this was done prior to this development, no additional mitigations would need to be considered. In this area, Siler Road is fully developed on either side of the roadway and right-of-way appears to be exhausted by the roadway and sidewalks. If the City of Santa Fe desires to improve the operations of this intersection, additional right-of-way will be required. Because this all occurs prior to the development, this is the responsibility of the City. If the City requires the development to participate, it should be evaluated by all participants to determine the amount each party should contribute. This report shows that in 2028 build conditions, existing traffic makes up approximately 79% of this and development traffic adds 21%.

The intersection of Calle del Cielo and Cerrillos Road will continue to see the northbound through/right movement operate at LOS E during both peak hours. Recall that this movement in existing conditions was operating at LOS E.

At the Rufina and Richards intersection, all movements during both peak hours will operate at LOS D or better.

During the 2038 No build scenario, the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue continues to lengthen to 117 feet during the AM peak hour and 181 feet during the PM peak hour. Again, the available queue storage for this movement is approximately 75 feet which results in queue spillover for this movement during both peak hours. If the development moves

forward mitigation strategies will improve this issue. If the development does not move forward, the City of Santa Fe should review this movement and make adjustments to lengthen this queue storage space since this is present in existing conditions and no build scenarios. If the development does move forward mitigations are shown in the build scenario of this report.

Table 13 summarizes the results for the 2038 No Build Signalized Intersection Results. The HCS outputs are included in Appendix G.

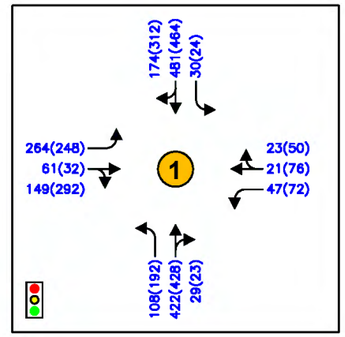
The traffic analysis found in the 2038 No Build condition all unsignalized intersections operate at acceptable Levels of Service in both the AM and PM peak hours. While all unsignalized intersections are expected to operate overall acceptably in the horizon no build, the northbound approach for the Rufina Street and Rufina Circle (West) intersection is expected to operate at LOS E in the PM peak hour. Due to this deficiency occurring in the no build scenario, the decline in operation is not due to the development traffic.

All other movements for unsignalized intersection will operate at LOS C or better.

Table 15 summarizes the results for the 2038 No Build Unsignalized Intersection Results. The HCS outputs are included in Appendix G.



Again, the existing access points that will be utilized by the proposed development are in place in existing conditions although no traffic was documented leaving or entering this lot during traffic counting. Therefore access 1 and access 2 are not documented in the operational table above due to no turning movements into the existing site.

4. 2038 BUILD INTERSECTION CAPACITY ANALYSIS

The trips generated by the site (Table 5) were assigned to the intersections using the trip assignment volumes, shown in Figure 4. These trips were added to the 2038 Horizon Year No Build traffic projections to calculate the 2038 Build volumes. Figure 8 shows the 2038 Build Traffic Volumes.

The traffic analysis found that all signalized intersections, except for the Rufina and Siler intersection, are expected to operate at an overall acceptable level of service in both the AM and PM peak hours. While these intersections operate overall acceptably, some individual movements continue to operate at LOS E in the 2038 Build conditions, some due to background traffic growth that was introduced for the horizon year.

The Rufina and Siler intersection continues to operate at an overall LOS C in the AM peak hour and LOS F in the PM peak hour. During the AM peak hour all movements operate at LOS D or better. The PM peak hour contains the eastbound left, eastbound through/right, westbound left, northbound left, and southbound through that will operate at LOS F. The westbound through/right will operate at LOS E during the PM peak hour. Due to these deficiencies presenting themselves in the no build scenario, the decline in operation is from the background traffic and not due to the development traffic. Mitigation was presented in the 2028 build scenario that added a dedicated eastbound right turn lane. This mitigation will be analyzed here as well.

The intersection of Calle del Cielo and Cerrillos Road will continue to see the northbound through/right movement operate at LOS E during both peak hours. The southbound left will decline to LOS E as well during the AM peak hour.

At the Rufina and Richards intersection all movements will operate at LOS D or better during both AM and PM peak hours.

During the 2038 build scenario, the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue continues to lengthen to 229 feet during the AM peak hour and 269 feet during the PM peak hour. Mitigation was completed which improved the PM peak hour 95th percentile queue to 225 which is an improvement although additional improvements would require analysis of the Cerrillos Road signal system. Since the horizon year includes estimates of growth, these mitigation measures should be verified as this time gets closer. To improve the southbound left turn queue, additional queue storage should be constructed by adjustments to the existing median along Calle Del Cielo. As this storage length was not adequate prior to the development a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares. This report shows that in 2028 build conditions, existing traffic makes up approximately 47% of this and development traffic adds 53%.

The 2038 Build capacity analysis summary for the signalized intersections is shown in Table 16 with the individual intersection output included in Appendix H.

For the 2038 Build condition, the study found that the Rufina and Rufina Circle (West) intersection saw a LOS F in the northbound approach and the Rufina and Calle del Cielo unsignalized intersection saw: LOS E on the northbound left movement. All other intersections operate overall acceptably in the AM and PM peak hours.

For the Rufina and Rufina Circle (West) intersection, the northbound approach will operate at LOS F during the PM peak hour. All other movements during both peak hours will operate at LOS D or better. This deficiency is also noted in the 2038 No Build condition and therefore is not caused by the development traffic.

The Rufina and Rufina Circle (East) intersection is expected to operate with all movements at LOS D or better in the AM and PM peak hour.

The northbound left turn movement at the Rufina Circle and Calle del Cielo intersection is expected to operate at LOS C in the AM peak hour and LOS E in the PM peak hour. Since this event only occurs for one hour out of the entire day in the future 2038 Build condition, the City should monitor this movement to determine the need for improvements.

The movements at both access driveways on Rufina Circle are expected to operate at LOS B or better in the AM and PM peak hour for the 2038 Build scenario.

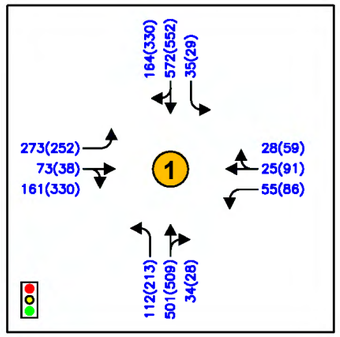

Table 19 summarizes the 2038 Build Unsignalized Intersection Results with the HCS outputs included in Appendix H.

B. AUXILIARY LANE EVALUATION

Analyses of the Transportation Impact Analysis (TIA) Guidelines by the City of Santa Fe, were completed to determine the need to install new right turn or left turn lanes at any intersection as part of this study. Information to check these warrants is provided in Table 20 and Table 21.

The intersection of Rufina and Siler includes dedicated left turn lanes in all directions. Based on the volumes seen at the intersection during the peak hours, all left turn lanes are warranted and should remain. As discussed in the level of service analysis, the eastbound through movement falls to LOS E which indicates that mitigation may be required for this movement. As the volume of eastbound right turning traffic is high at this location, adding a dedicated eastbound right turning lane will improve the operations of this movement. Even though the right turn criteria is not met, it is recommended to install a dedicated right turning lane. This should be completed by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The Calle del Cielo and Cerrillos intersection currently includes all dedicated left turning lanes as shown in existing conditions. Additionally, all right turn lanes are warranted based on the volume of the major roadway (Cerrillos) in this area. Because the through movements northbound and southbound at this intersection are very minimal during both peak hours it is not necessary to add dedicated right turn lanes northbound or southbound. They are not warranted based on the operations of the signalized intersection.

At the intersection of Rufina and Richards, no additional turning lanes are warranted based on the warrant evaluation. The left turn lanes should remain in place at the intersection.

Rufina Street and Rufina Circle (West) includes an eastbound/westbound two way left turn lane on Rufina Street. This lane satisfies the warrant for the eastbound and westbound turn lanes at this intersection. The northbound and southbound left turn lanes are warranted but only the northbound is considered in this report due to the development having no additional trips associated with this movement. The northbound approach to this intersection should be restriped to include a dedicated left turning lane and a shared through/right turn lane to address the left turn lane warrant criteria. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

Rufina Street and Rufina Circle (East) also includes the eastbound/westbound two way left turn lane on Rufina Street. This lane satisfies the warrant for the westbound turn lane at this intersection. The northbound left turn lane is warranted and should be restriped to include a dedicated left turning lane and a shared through/right turn lane to address the left turn lane warrant criteria. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

Rufina Circle does not have a posted speed limit; however, the assumed speed limit is 25 MPH. The entire circle does not include any turn lanes at any of the driveways or intersections along it. Rufina Street includes a two-way left turn lane that operates as a dedicated left at both the intersections with Rufina Circle.

Rufina Circle and Calle del Cielo warrants a northbound left turn lane and a westbound left turn lane in the build scenario. The intersection has two lanes entering northbound which effectively makes one a dedicated left turn lane and the other a dedicated right turn lane based on the existing volumes at the intersection. A westbound left turn lane should be included at this intersection by restriping this area. On street parking would be effected as this area would end approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a 5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The development will see a maximum of 70 southbound vehicles turning left into Access 1 and a maximum of 20 vehicles turning northbound right. For Access 2, a maximum of 100 vehicles are expected to turn right into the site and a maximum of 10 vehicles are anticipated to turn left into the site. Based on the Santa Fe TIA Guidelines a right turn lane is not typically provided for speeds of 25 mph, which is the posted speed limit on Rufina Street. Additionally, because Rufina Circle includes bike lanes and on street parking it would impact these features to include right turn lanes. Right turn lanes are not recommended at these accesses. Based on The Santa Fe TIA Guidelines, a southbound left turn lane is warranted at Access 1 due to the southbound left turning volumes being greater than 30 vehicles during both peak hours. Therefore, it is recommended that a southbound left turn lane be striped and designated at Access 1 with project construction.

The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.

The applicable tables from Santa Fe TIA Guidelines criteria are included in Appendix I for reference.

VII. CRASH ANALYSIS

Crash data was collected for the years 2019 to 2023 for all intersections included in the scope of this study.

A. CERRILLOS AND CALLE DEL CIELO

The intersection of Cerrillos and Calle Del Cielo shows a total of 88 crashes occurring in the 5-year span. Crash trends were relatively consistent across the years, with the highest number occurring in 2019. Rear-end collisions were the most common crash type accounting for 31% of all crashes although a large portion of crash types were listed as not available. Crash severity was predominantly property damage only crashes with 39 crashes involving injury. No reports documented fatalities at this intersection during these years. The majority of the crashes occurred during daylight hours, while night time crashes were relatively infrequent.

Contributing factors suggest that following too closely and failure to yield right-of-way were the leading causes. Overall, the crash history indicates that congestion related behaviors, particularly rear-end collisions and right-of-way conflicts are the most significant safety concerns at this intersection.

A summary of these crash statistics for this intersection are included in Table 22.

Table 22 | Cerrillos and Calle Del Cielo Crash Summary		
Category	**Description**	**No. Crashes**
	Total Crashes	88

	Avoid Contact	3
	Driver Inattention	14
	Pedestrian Error	1
	Following too Closely	35

B. RUFINA AND SILER

The Rufina and Siler intersection saw a total of 33 crashes during the 5-year span. The majority of the crashes were rear-end collisions while sideswipes and front-to-side crashes were relatively infrequent although a notable number did not specify the crash type. Most crashes resulted in property damage only while 8 crashes involved injuries with no fatalities reported at the intersection. The majority of crashes occurred

during the daylight. Contributing factor data indicates that following too closely and driver inattention were the most frequent causes.

Overall, the crash data suggests that congestion related driver behaviors, particularly tailgating and inattention, are the primary safety issues at this intersection.

A summary of these crash statistics for this intersection are included in Table 23

Table 23 | Rufina and Siler Crash Summary

Category	Description	No. Crashes
	Total Crashes	32

	Driver Inattention	13

C. RUFINA AND RICHARDS

Between 2019 and 2023, a total of 42 crashes occurred at the intersection of Rufina and Richards. The highest year was 2021 which included 12 crashes. The most common crash types were rear-end collisions. There were also two pedestrian crashes and one crash with a fixed object, while 18 crashes were reported with unspecified

crash types. Overall, 29% of crashes involved angle collisions, 7% involved a pedestrian or fixed object, and 10% were rear-end collisions. In terms of severity, most crashes were property damage only, while 15 crashes resulted in injuries, and no fatalities were recorded. Lighting conditions indicate that the majority of crashes occurred in daylight, with fewer crashes reported at night, dawn, or in unlit conditions. Contributing factors highlight following too closely, driver inattention, and failure to yield right-of-way as the primary causes, with smaller contributions from improper driving, excessive speed, and traffic signal violations.

Overall, the crash history suggests that driver behavior-related issues, particularly tailgating, inattention, and right-of-way conflicts, are the main safety concerns at this location.

A summary of these crash statistics for this intersection are included in Table 24.

Table 24 | Rufina and Richards Crash Summary

D. RUFINA STREET AND RUFINA CIRCLE (EAST)

The intersection of Rufina Street and Rufina Circle had 3 crashes that occurred in the 5-year time frame. The only documented crash type was one crash with a fixed object. Two crashes occurred with property damage only and one occurred with injury. All crashes occurred during daylight.

A summary of these crash statistics for this intersection are included in Table 25.

Table 25 | Rufina Street and Rufina Circle (East) Crash Summary

Category	Description	No. Crashes

Contributing Factors*	Other Improper Driving	1
	Not Available	2

E. RUFINA STREET AND RUFINA CIRCLE (WEST)

From 2019 to 2023, a total of 16 crashes were reported at the intersection of Rufina Street and Rufina Circle (West). The most common crash type was front-to-side collisions, followed by sideswipe collisions and one rear-end collision, while 6 crashes were reported with no crash type available. There was also one pedestrian crash, representing 6% of all crashes. Overall, half of all crashes (50%) involved angle collisions, while rear-end crashes were relatively rare (6%). Most crashes resulted in property damage only while 4 crashes involved injuries, and no fatalities were recorded. The majority occurred during daylight with a smaller number happening at

night under both lighted and unlighted conditions. Contributing factors show that failure to yield right-of-way and improper overtaking/driving were the leading causes, with additional contributions from driver inattention, following too closely, speeding, and stop sign violations.

Overall, the crash history suggests that angle-related conflicts and right-of-way issues are the primary safety concerns at this intersection, with driver errors and aggressive maneuvers contributing to crash risk.

A summary of these crash statistics for this intersection are included in Table 26.

F. RUFINA CIRCLE AND CALLE DEL CIELO

The intersection of Rufina Circle and Calle Del Cielo had no reported traffic collisions from 2019 to 2023.

VIII. CONCLUSIONS AND RECOMMENDATIONS

A. CONCLUSIONS

The traffic analysis found that all intersections operate acceptably overall in the 2028 Build scenario. The eastbound left, eastbound thru/right, and the northbound left turning movements at the signalized intersection of Rufina Street and Siler Road operate at LOS E in the PM peak hour. To improve the eastbound movement, this approach should be restriped to remove on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

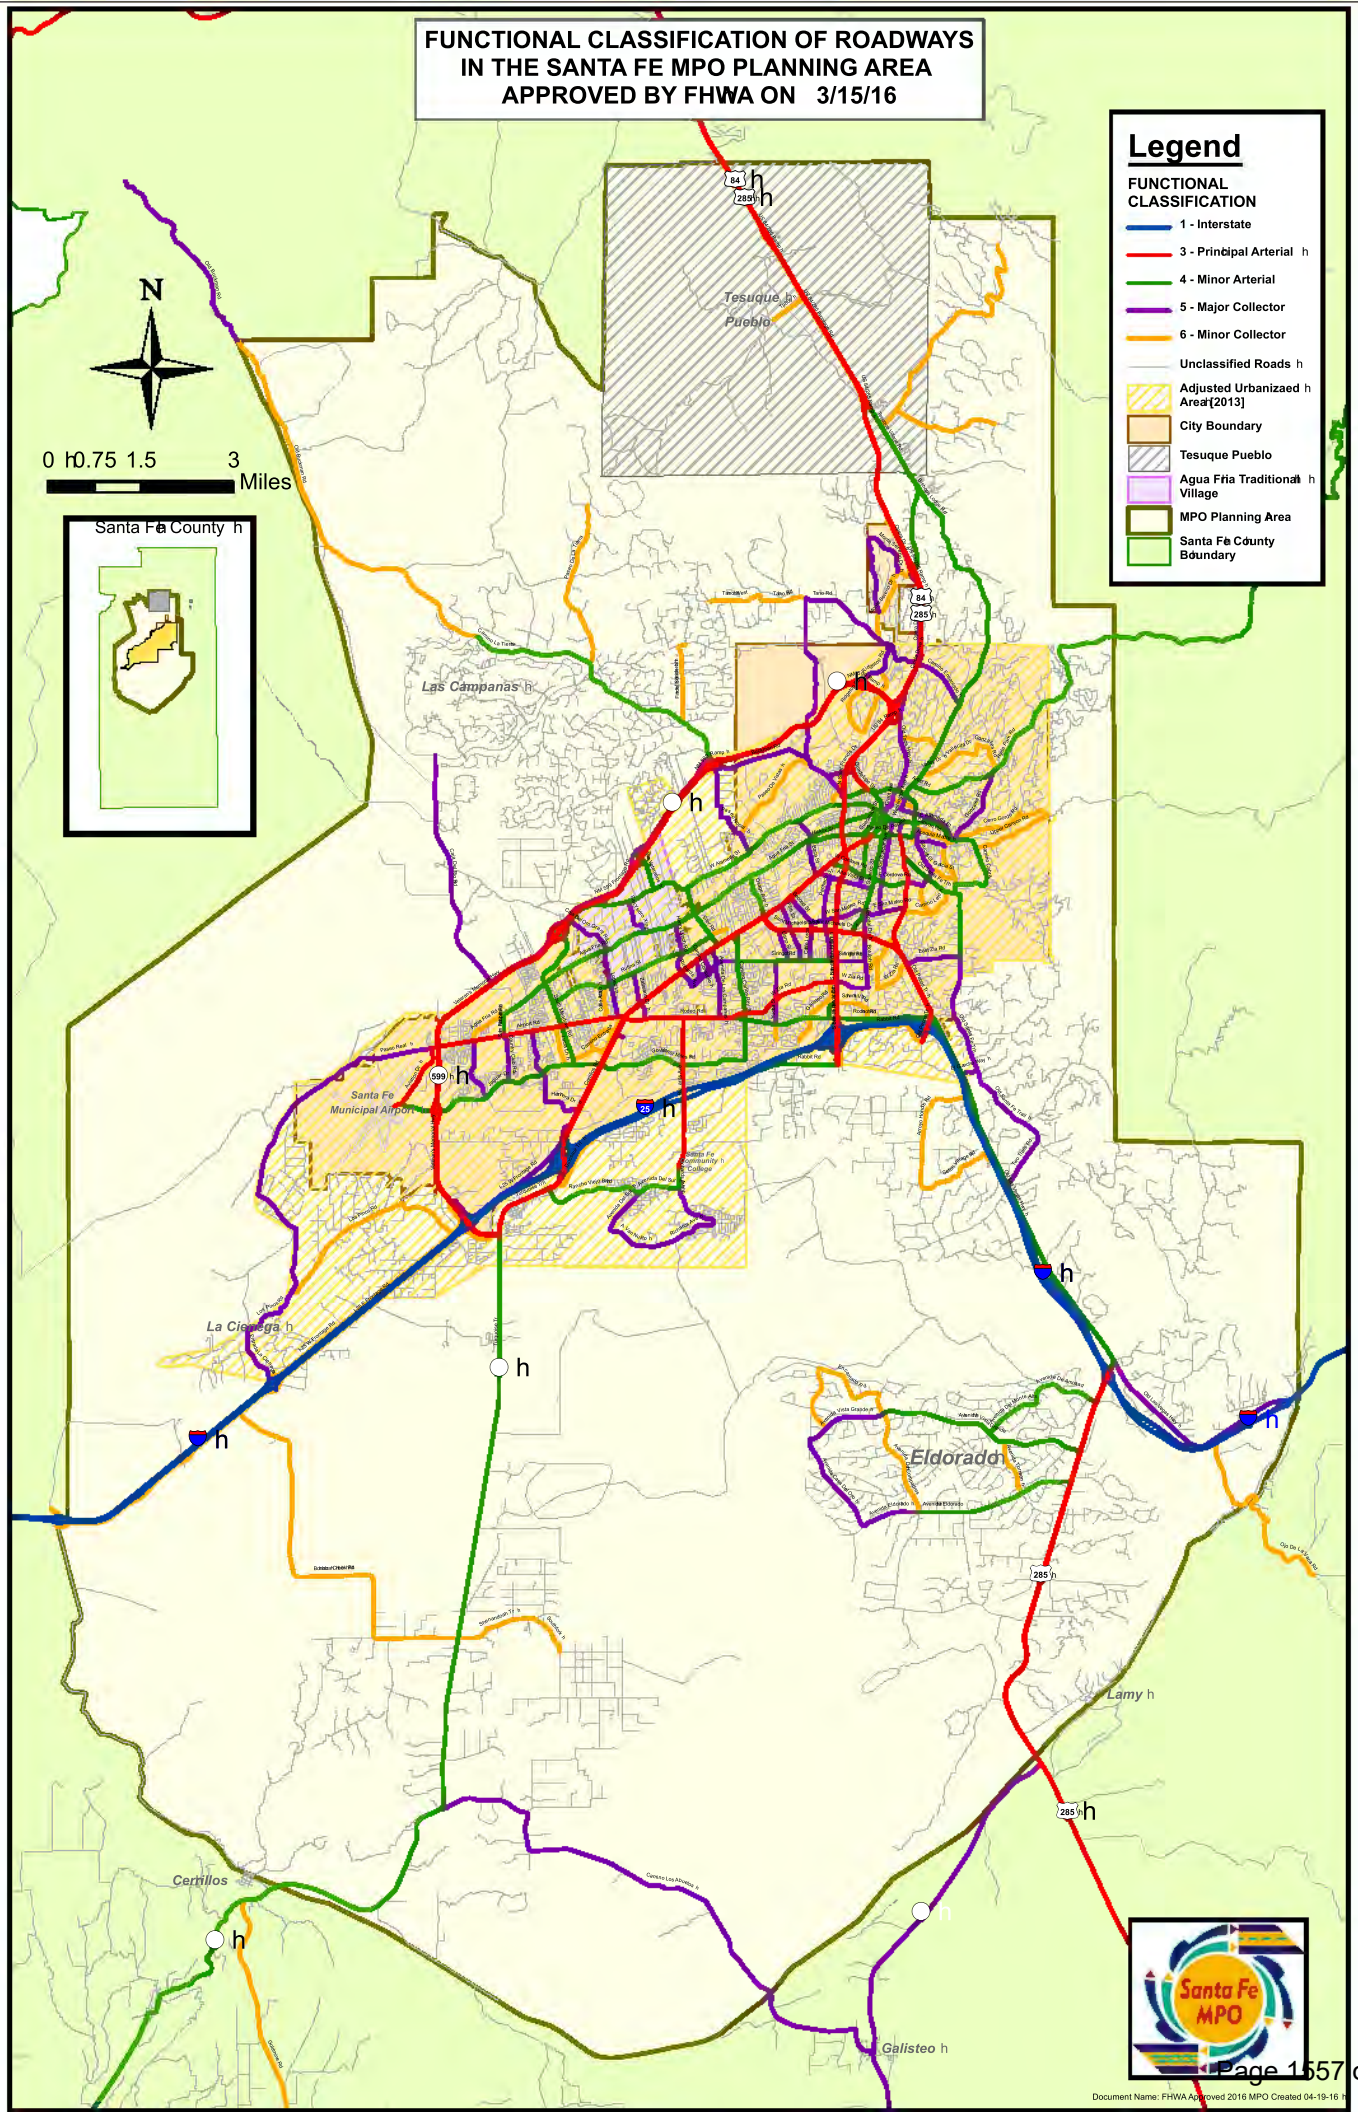
The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at LOS E during both peak hours, while the southbound left turn movement degrades to LOS E in the AM peak hour due to the development traffic. With this decline and increase in queue distance needed, it is recommended to complete median modifications on the north side of this intersection along Calle del Cielo to adequately store the queue that will develop. The median should be a maximum of 5' with a 10' left turn lane, a 10' southbound through lane, and a 10' dedicated right turn lane. Additionally, traffic signal timing adjustments should be completed at the intersection to help address this issue. As this storage length was not adequate prior to the development, a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares.

In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and the two new access driveways on Rufina Circle will operate overall acceptably. The northbound left turn lane at both the East and West intersections of Rufina Street and Rufina Circle is recommended to be installed to address City of Santa Fe turn lane warrants.

At the Rufina Circle and Calle del Cielo the westbound left turn lane is warranted and should be installed. This lane should be a minimum of 50' and include a taper length as determined by the MUTCD and prescribed in the City of Sanat Fe standards.

Lastly, Rufina Circle and Access 1 meets warrants for a left turn lane at the entrance to the development. This left turn lane should be 50 feet in length for storage with a

taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.



B. RECOMMENDATIONS

- Install a southbound left turn lane at Rufina Circle and Access 1 with striping modifications. This will include removal of on-street parking and installation of the left turn lane by shifting the northbound lane, southbound lane, and bike lanes to incorporate an 11 foot left turning lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as prescribed in the City of Santa Fe standards.
- Install an Eastbound dedicated right turn lane at the intersection of Rufina Street and Siler Road. This lane should be accomplished by striping by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 225 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards
- Median modifications should be completed at the Cerrillos and Calle de Cielo intersection. The median should be a maximum of 5 feet and the southbound lanes should include a 10' right turn lane, a 10' through lane, and a 10' left turn lane. These lanes should extend the full length of Calle de Cielo from Cerrillos to Rufina Circle.
- The northbound approach at the intersection of Rufina Street and Rufina Circle (West) should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- At the intersection of Rufina Street and Rufina Circle (East), the northbound approach should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the

taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

- Rufina Circle and Calle del Cielo warrants a westbound left turn lane. This lane should be included at this intersection through restriping. On street parking would be removed approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a 5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- All designs shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.

GENERAL NOTES

1. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH APPLICABLE PROVISIONS OF CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
2. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF EACH APPLICABLE CITY OF SANTA FE ORDINANCE ADOPTED PRIOR TO SUBMITTAL WITH BUILDING PERMIT APPLICATION THAT MODIFIES ANY PROVISIONS OR REQUIREMENTS CALLED FOR IN CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
3. THE PROJECT SHALL COMPLY WITH THE CURRENTLY ADOPTED INTERNATIONAL FIRE CODE, INCLUDING SECTION 903 AUTOMATIC SPRINKLER SYSTEM & SECTION D105 AERIAL FIRE APPARATUS ACCESS ROADS.
4. PROPERTY WILL BE SUBJECT TO THE WATER ALLOCATION AND/ OR WATER OFFSET RETROFIT PROVISIONS OF ORDINANCE NO 2002-29 AND RESOLUTION 2002-55 AT THE TIME OF PERMIT APPLICATION OR WATER HOOKUP REQUEST. COMPLIANCE SHALL BE ACHIEVED BY USE OF RETROFIT CREDITS OR WATER TRANSFERS, IF APPLICABLE.
5. COMPLIANCE WITH PROVISIONS OF GUNNISON'S PRAIRIE DOG ORDINANCE SHALL BE COMPLETED PRIOR TO GRADING OPERATIONS.
6. AMERICANS WITH DISABILITIES ACT (ADA) INSPECTION SHALL BE CONDUCTED PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY. THE CONTRACTOR SHALL CONTACT CITY STAFF TO SCHEDULE AN INSPECTION.
7. FENCES, WALLS, OR OTHER OBSTRUCTIONS SHALL NOT BE PLACED OR CONSTRUCTED ACROSS PUBLIC SANITARY SEWER EASEMENTS, EXCEPT WHERE SHOWN AS NEEDED.
8. UTILITY EXPANSION CHARGES (UEC) SHALL BE PAID AT THE TIME OF BUILDING PERMIT APPLICATION FOR EACH LOT BY CONTACTING THE CITY OF SANTA FE PERMIT AND DEVELOPMENT REVIEW DIVISION.
9. ALL PROPOSED CHANGES TO THE APPROVED IMPROVEMENTS PLANS SHALL RECEIVE PRIOR APPROVAL BY THE CITY OF SANTA FE.
10. ALL PROPOSED IMPROVEMENTS WILL COMPLY WITH THE CURRENT CoSF WATER CONSERVATION STAGE.
11. LANDSCAPE DESIGN SHALL COMPLY WITH APPLICABLE PROVISIONS OF SFCC SECTION 14-8.4.
12. PROPERTY DEVELOPMENT MAY BE SUBJECT TO THE PROVISIONS OF SECTION 14-8.4(F)(5) "PRESERVATION OF EXISTING TREES" PER THE LAND USE DIRECTOR.
13. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF COSF ORD. NO. 2008-02 (IMPACT FEES).
14. PROPERTY DEVELOPMENT, BOTH PUBLIC AND PRIVATE OWNERSHIP, SHALL COMPLY WITH THE COSF ORDINANCE NO 2002-20 (TERRAIN AND STORMWATER MANAGEMENT) AT THE TIME OF BUILDING PERMIT APPLICATION.
15. FIRE DEPARTMENT ACCESS SHALL BE MAINTAINED THROUGHOUT ALL DEVELOPMENT CONSTRUCTION PHASES, PER IFC 1410.1.
16. AN APPROVED WATER SUPPLY FOR FIRE PROTECTION, EITHER TEMPORARY OR PERMANENT, SHALL BE MADE AVAILABLE AS SOON AS COMBUSTIBLE MATERIAL ARRIVES ON THE SITE, PER IFC 1412.1.
17. PERMANENT TRAFFIC CONTROL DEVICES SHALL BE INSTALLED BY THE DEVELOPER PER APPROVED PLAN.
18. THIS DEVELOPMENT LIES OUTSIDE OF A CITY OF SANTA FE HISTORIC DISTRICT.
19. THE LAYOUT SHOWN HEREON IS CONCEPTUAL AND MAY BE MODIFIED AS PART OF THE DEVELOPMENT PLAN PROCESS WITHOUT THE NEED FOR A MASTER PLAN AMENDMENT.

General Plan 1999 Chapter 1

Introduction and General Plan Themes

1

INTRODUCTION AND GENERAL PLAN THEMES

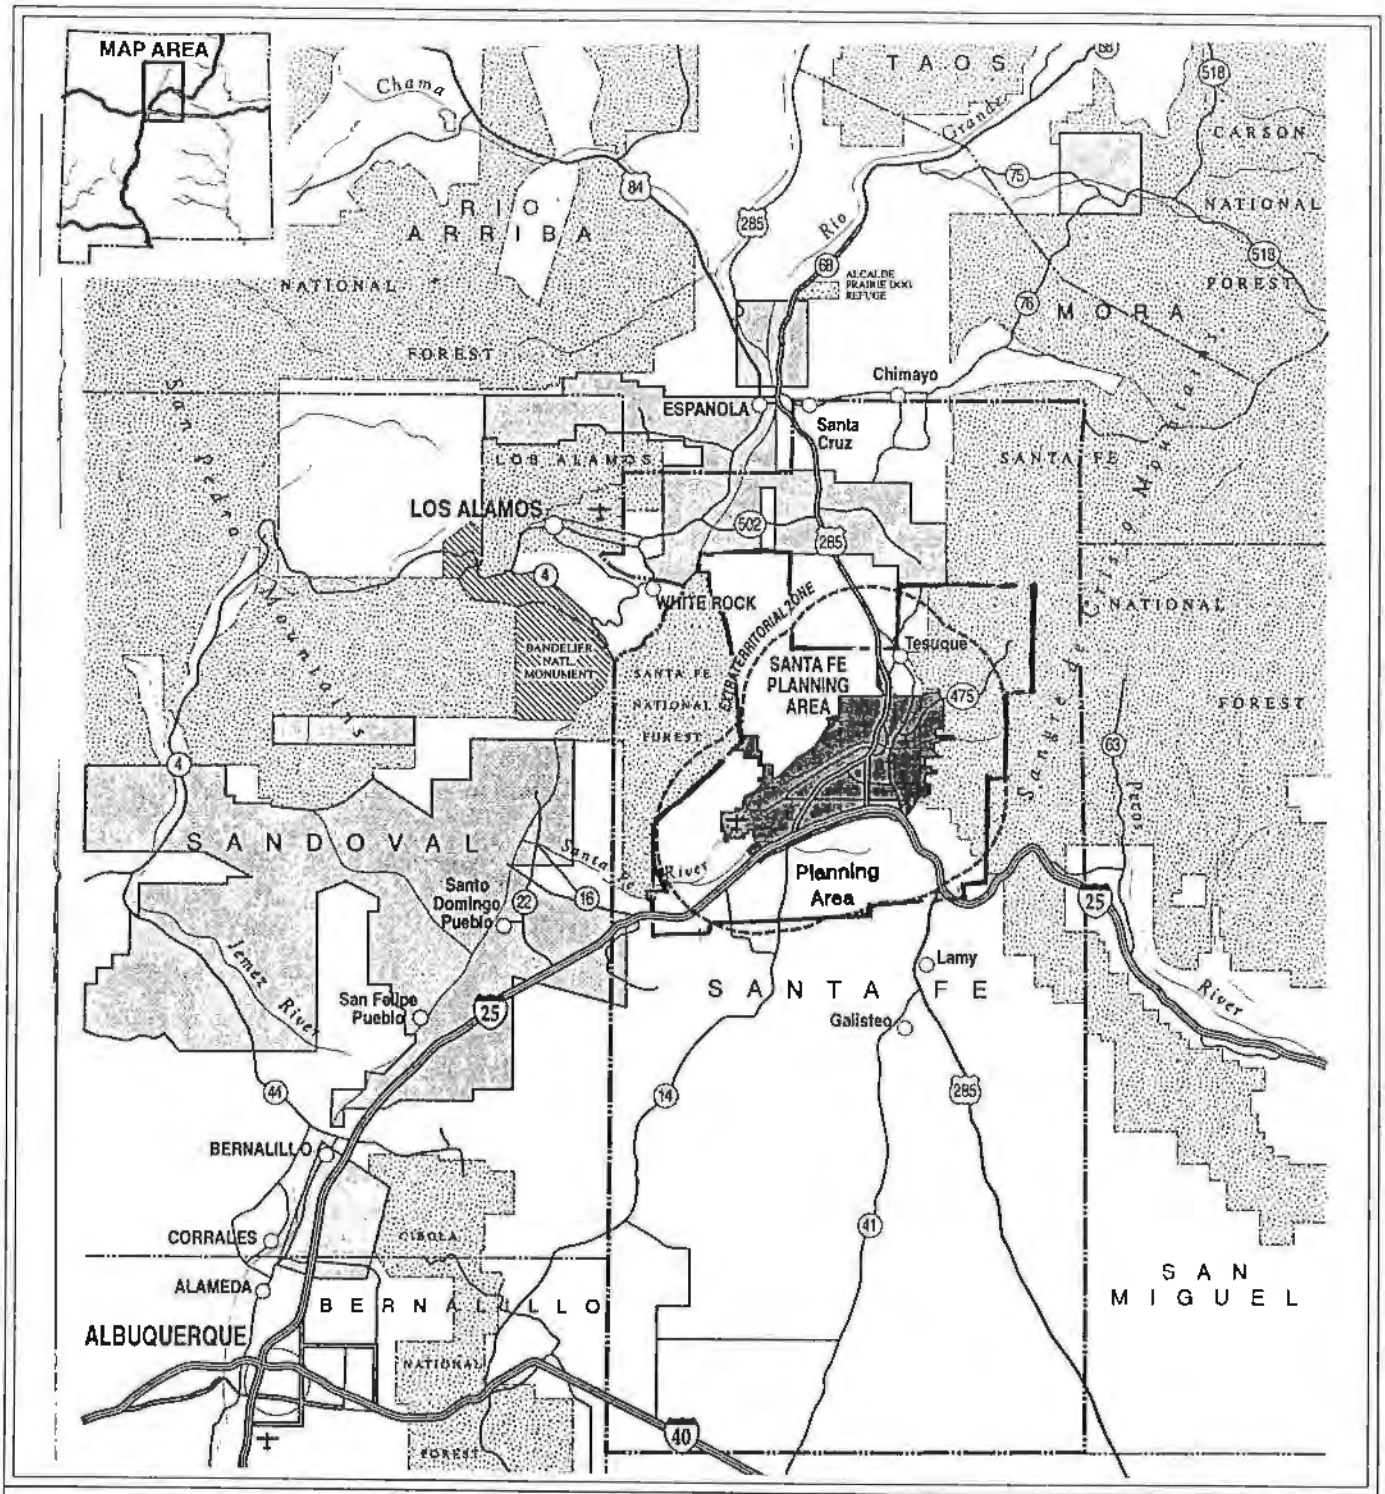
1 INTRODUCTION AND GENERAL PLAN THEMES

The City of Santa Fe and its surrounding region face many pressing planning challenges—from protecting a rich cultural heritage and magnificent physical setting to meeting the demand for affordable housing and reducing traffic congestion. This document attempts to embrace all segments of the city's population and guide the city toward its four-hundredth anniversary. This document replaces the *1983 General Plan* as amended and serves as the city's statement of direction for physical development and conservation.

1.1 SCOPE AND PURPOSE

Because this is a comprehensive, long-term plan for the physical development and conservation of Santa Fe, it lies at the heart of community decisionmaking. It provides guidance for development proposals, capital improvements, annexation, and extension of services.

This General Plan:



- Outlines a vision through the Plan themes that reflects the aspirations of the community;
- Establishes a basis for judging whether development proposals and public projects are consistent with the Plan themes;
- Provides for projects that will enhance the character of the community, preserve critical environmental resources, and minimize hazards;
- Provides the basis for establishing and setting priorities for implementing programs and regulations; and
- Provides the basis for nurturing a vital community and reaching out to all segments of the population.

To ensure that a variety of city actions are consistent with the General Plan, regular on-going use of the Plan is essential. Because the Plan is both general and long-range, there will be circumstances and instances when detailed studies are necessary to implement it.

This document represents the goals and desires of the Santa Fe community as a whole and should be recognized as the city's foremost public statement about Santa Fe's future.

1.2 PLANNING AREA BOUNDARIES

- Figure 1-1 depicts the regional location of the planning area, and Figure 1-2 depicts the urban planning area and urban growth boundary which includes:
- All land within the current city limits;
- Land to the north adjacent to Highway 285;
- Land to the east between the city limits and Santa Fe National Forest;
- Land to the south between the city limits and along Interstate-25; and

1.3 PLAN ORGANIZATION

- **Themes.** The policies within this document reflect 14 overall themes that closely track public comments. The themes are representative of citywide concerns and lay the foundations for the guiding and implementing policies.
- **Guiding Policies** are at the beginning of each chapter and state the city's goals and philosophy. The guiding policies describe ways or methods that the themes listed in each chapter can be achieved.
- **Implementing Policies** are at the end of each chapter and represent commitments to specific actions. They may refer to existing programs or call for establishment of new ones.
- **Standards** are set out in certain chapters and represent policies that can be mapped or measured.

  Together, themes, guiding and implementing policies, and standards articulate the vision for the City of Santa Fe.
- **Policy Numbering System.** Policies in this document are organized using a numbering system tied to sections, with a letter designation to distinguish guiding policies from implementing policies. For example, the first guiding policy in Section 3.4 is numbered 3-4-G-1 and the first implementing policy is 3-4-I-1. Thus, each policy in the General Plan has a discrete number. Where the same topic is addressed in more than one chapter, sections and policies are cross-referenced.
- **Explanatory Material or Commentary**, set in *italic*, accompanies some policies. This explanatory material provides background information or guides General Plan implementation.

1.4 PLANNING PROCESS

The city's planning process includes monitoring and updating the General Plan and preparing more detailed plans, such as resource management plans, neighborhood plans, and other special plans. An Annual General Plan Report will provide an overview of the status of the General Plan and its implementation programs.

Amendments to the General Plan

This document is the heart of the planning process. It is intended to be a living document and, as such, will be subject to more site-specific and comprehensive amendments over time. Amendments also may be needed from time to time to conform to state or federal law passed since adoption and to eliminate or modify policies that may have become obsolete or unrealistic because of changed conditions (such as completion of a task or project, development on a site, or adoption of an ordinance or plan). This document may also incorporate by reference other detailed studies and plans that may be prepared.

While the General Plan should be flexible enough to respond to changed conditions and amended over time to keep it current, it should not be amended so frequently as to diminish its authority. Amendments to the Plan should be limited to twice a year, although each amendment may include more than one change.

Neighborhood and Community Planning

To provide specific direction for development in certain geographic areas, this document calls for preparation of detailed community plans and neighborhood plan districts.

Community plans and neighborhood plan districts will provide specific design guidelines and standards for the conservation and enhancement of neighborhoods and other areas possessing distinctive features, opportunities, or characters. Community plans and neighborhood plan districts would be tailored to individual areas and needs. All community plans will have authority only upon adoption by the City Council and will still be required to be consistent with the General Plan. A neighborhood plan district requires considerable community consensus and planning effort with regulatory power.

Resource Management Plans

To protect sensitive environmental resources, this document requires preparation of resource management plans before any subdivision or development may be approved that would affect certain sensitive biological resources. The locations of these resources are mapped in Chapter 8, Natural Resource Management and Conservation. If these plans are prepared as part of specific plans, the City Council may establish fees to recoup plan preparation costs.

Annual General Plan Report

An annual progress report focusing on implementation of the Plan will be prepared by the Planning and Land Use Department and submitted to the Planning Commission, the Joint Planning Policy Commission, and City Council. The Annual Report should include a summary of all General Plan amendments adopted during the preceding year, an outline of upcoming projects, and General Plan issues to be addressed in the coming year, along with a work program and budget.

Public review and comment on the Annual Report can be heard by the Planning Commission and City Council at regularly scheduled public hearings.

Five-year Review

The city will undertake a comprehensive review of the General Plan every five years after adoption. The five-year review will include:

- Comprehensive evaluation of General Plan policies;
- Analysis of the effectiveness of implementation programs and strategies initiated to carry out the Plan;
- Review of five-year growth trends and reassessment of future urban land needs in light of the Urban Area's carrying capacity and available land inventory; and

- Systematic assessment of the resource based threshold, environmental standards, and resource management plans.

The focus of this Five-year Review will be to determine how well the General Plan has performed—whether policies related to development and environmental conservation have been effective. A report summarizing city staff findings and recommendations will be circulated for public comment and then presented to the Planning Commission. The Planning Commission will review the Five-year Review report and make a recommendation to the City Council. Public review and comment on the Five-year Review can be heard by the Planning Commission and City Council at regularly scheduled public hearings.

1.5 BACKGROUND STUDIES

A comprehensive analysis of existing conditions and major planning options for the City of Santa Fe Urban Area, and the Extraterritorial Zone was performed prior to the preparation of this document (1994 - 1995). Major documents produced as a result of the process leading to the General Plan include:

- *Public Outreach and Issues Identification: Summaries of Public Meetings and Survey Responses for the Urban Area*, August 1994;
- *Public Outreach and Issues Identification: Summaries of Public Meetings and Survey Responses for the Extraterritorial Area*, December 1994;
- *Working Paper: Existing Conditions and Planning Issues – Urban Area and Extraterritorial Zone,* June 1995. This 600-page illustrated report provides an evaluation of existing conditions and planning issues in the Urban Area and the Extraterritorial Zone. Analysis and conclusions in the *Working Paper* are based on technical work, including original data collection and fieldwork, and an extensive process of public outreach. Results of the public outreach process are also summarized. A summary version of the *Working Paper* is also available from the city.
- *Sketch Plans,* October 1995. This document includes three sketch plans showing how alternative scenarios or sets of development policies would be reflected in a future land use pattern. It also includes an analysis of the transportation impacts of the alternatives and estimates of infrastructure costs. The *Sketch Plans* were presented to the public in a series of five meetings, some of which were also televised on local cable channel 6.

While these background studies and working papers have guided General Plan preparation, **they do not represent adopted city policy.**

1.6 PUBLIC PARTICIPATION

Throughout the preparation of the General Plan, the city has been committed to active public outreach and participation. Plan policies have been shaped by comments made in public surveys and meetings. Public participation has included:

- **Community Meetings.** At the outset of the General Plan process, in the summer and fall of 1994, 20 public meetings were held (some televised) to receive residents' priorities for the General Plan. Five meetings were held in the fall of 1995 to present the alternative

Sketch Plans to the public. These meetings were attended by over 2,000 people. Comments made at these meetings were recorded and published, and forwarded to the City Council, Planning Commission, and appropriate city departments.

- **Newsletters and Survey.** Newsletters were prepared periodically and distributed to all households and other groups and interested parties. A postage-paid survey questionnaire was sent to each household in the Urban Area and the Extraterritorial Zone as part of the first newsletter, to which over 3,800 households (representing over 9,000 people) responded. The results of the survey were summarized, and all responses collected and made available at libraries and City Hall.
- **Open Houses.** These provided information about the Plan update and were held throughout the process. All public meetings were preceded by open houses, which were also held at high visibility locations such as Villa Linda and De Vargas malls.
- **Cable TV and Video.** Many public meetings were broadcast on local cable channel 6. Tapes of meetings were also made available at libraries and City Hall.
- **Meetings and Hearings.** The public participation process for the General Plan has been extensive. Public meetings were held to receive comments on the draft document; in addition, a public hearing regarding the Plan was held by the Planning Commission and City Council.

1.6.1 RESIDENTS' PRIORITIES FOR THE GENERAL PLAN

Policies have been shaped by active public participation and have resulted from the concerns and ideas presented at numerous public forums. Responses to the survey sent to all addresses in the city and the five-mile Extraterritorial Zone expressed the concerns of the residents. The following tables summarize residents' likes and dislikes about Santa Fe (Tables 1.1 and 1.2), trends that concern them (Table 1.3), and priorities for the General Plan (Table 1.4).

1.6.2 ROUNDTABLE REPORT, VISION SANTA FE, AND URBAN DESIGN GUIDELINES

The issues of concern to Santa Feans today are quite similar to those raised eight years ago when an update to the 1983 Comprehensive Plan was being considered. A brief review of these issues, and questions raised by Vision Santa Fe, a set of goals and policies for the Comprehensive Plan adopted in 1990, provided a useful perspective. These issues along with the Visual Preference Study for the Urban Design Guidelines are used through this document. The Vision Santa Fe states that:

> We must assure that the community's resources and opportunities are distributed more equitably; and that adequate employment opportunities, decent shelter, excellent education, ample recreational opportunities, and other basic human services are provided to nurture all of us. We believe that the beauty and visual resources of our natural environment need to be preserved, protected, enhanced, and made more accessible to all. The tolerance with which we have lived together must be nurtured as part of our great social legacy. We believe it to be essential that growth in and around our city should be complemented by the preservation of neighborhoods and traditional social and cultural patterns.
>
> In conjunction with Santa Fe County and our regional neighbors, diversification of economic resources must be pursued; fulfilling jobs must be created. We want to involve more people in community decision-making, planning, and leadership. We ask to give our children the strength of our traditions as well as broad options for future personal opportunity. Implicit in these concerns is a vision for Santa Fe of what we cherish and wish to preserve.

1.7 GENERAL PLAN THEMES

The policies of this document reflect 14 overall themes that track the results of the public survey. These themes are followed by discussion in *italics*. For purposes of this section the themes are equally weighted. However, the Planning Commission and the governing body have the right to prioritize these themes, either within specific cases or as a matter of general policy.

1.7.1 AFFORDABLE HOUSING

Actively participate in the creation of affordable housing.

Opportunities are provided for housing for all income segments of the population in all areas of the city, while restricting the supply of large lot housing, which belongs in rural areas outside the city and not inside it. Housing affordability will also be aided by not artificially limiting the supply of land or the rate of growth. Active efforts to increase the supply of affordable housing are outlined. Affordable housing is provided close to jobs to promote transit use.

1.7.2 QUALITY OF LIFE

Enhance the quality of life of the community and ensure the availability of community services for residents.

The General Plan seeks to promote interests of the community-at-large over private ones. Tools are provided for the public to be meaningfully involved in ongoing planning and decision making.

1.7.3 TRANSPORTATION ALTERNATIVES

Reduce automobile dependence and dominance.

The General Plan outlines a comprehensive strategy, including structuring of land uses to reduce automobile dependence and policies for neighborhood design which promote transit and alternative modes. The Plan delineates Transit Intensive Corridors that will have high frequency bus service, and locates sites for two intermodal (rail and bus) stations. The Plan also calls for preparation of a Transportation Demand Management Program and parking policies that make Downtown more accessible to local residents.

1.7.4 ECONOMIC DIVERSITY

Develop and implement a comprehensive strategy to increase job opportunities, diversify the economy, and promote arts and small businesses.

The General Plan includes policies to promote economic development and the arts; a strategy is outlined in the Community Economic Development Plan, a separate document maintained by the city. Themes of the strategy include regionalism, sustainability, quality of life, equity of education, economic opportunities, and diversification. The General Plan locates sites for arts and new businesses in a variety of settings.

1.7.5 SUSTAINABLE GROWTH

Ensure that development is sustainable and that growth, conservation, redevelopment, and natural resource protection are balanced.

There is clear consensus that growth should not diminish the quality and diversity of natural resources. Sensitive resources that require protection are mapped in the Plan, and resource-based development standards and project review procedures are established. The General Plan seeks to permit development only upon known and certain availability of water, and requires new growth to pay the costs of securing additional water rights. The Plan calls for adoption of an adequate public facilities ordinance.

1.7.6 REGIONAL PERSPECTIVE

Maintain a regional growth management perspective and work with other private and governmental entities towards that goal.

The destinies of the city and the surrounding areas are intertwined. The General Plan encourages city and other local, state, and federal agencies to work together on policies that are mutually supportive and to maintain consistent standards in the area surrounding the city. The Plan outlines a structure for long-range planning to be anticipatory and for the phasing of growth to minimize infrastructure costs. The Plan calls for preparation and implementation of a Growth Monitoring Program with both short-term and long-term elements.

1.7.7 WATER

Undertake comprehensive efforts to conserve water and ensure adequate supplies with growth.

Growth is likely to increase reliance on imported surface water and require active steps to increase the available water supply. The Plan provides a comprehensive strategy to promote conservation, recycling, and recharge. In addition, the Plan requires the adoption of a Comprehensive Impact Fees Program to pay the costs of capital facilities including water supply. Alternative methods of allocating the costs of securing and providing additional water to new water system customers will be examined in terms of those alternatives' projected impact on existing and new residents and businesses, impacts on affordability and other growth management objectives expressed in this plan, requirements for additional customers, and ways cost impacts could be mitigated.

1.7.8 CHARACTER

Maintain and respect Santa Fe's unique personality, sense of place, and character.

Increasing travel and communication have diminished the remoteness that Santa Fe's high desert location once afforded. One of the country's oldest cities, the city today faces the prospect of being overwhelmed by run-of-the-mill late twentieth century development. Residents have unequivocally stated that new growth should not erode the qualities that contribute to Santa Fe's unique character and ambiance. The General Plan delineates an Urban Growth Boundary and calls for stronger urban/rural edges. Land use and urban design standards, and guidelines for new and infill development are also included.

1.7.9 URBAN FORM

Promote a compact urban form and encourage sensitive/compatible infill development.

Promotion of a compact urban form has been a major criteria in selecting new growth areas. Growth and reintensification areas have been selected to minimize distances between different parts of the city, and between job centers and residential areas. Incentives are provided to promote infill development.

1.7.10 COMMUNITY-ORIENTED DOWNTOWN

Put community activities back into Downtown.

The loss of the Plaza area as a center of community activity and services is a major concern of many residents. While establishments such as drug, grocery, and small-scale service stores serve residents and office workers, they are unable to survive given the high rents that proliferation of tourism-oriented establishments have caused. The Plan outlines economic development components and steps to ensure that these vital activities can return to and survive in Downtown and are easily accessible to residents. Creation of a Public Market in Downtown is also identified.

1.7.11 COMMUNITY-ORIENTED DEVELOPMENT

Orient new development to the community; foster public life, vitality, and community spirit.

Plan policies call for new development to be oriented to established neighborhoods, to urban context, to pedestrians, and to promote active street and outdoor life. Urban design standards are offered that seek to prevent neighborhoods from being isolated from each other but to maintain a continuum of urban fabric, particularly regarding public access and vehicular/pedestrian circulation. Parks, open space, and neighborhood services are located within neighborhoods.

1.7.12 MIXED USE

Provide a mix of land uses in all areas of the city.

The General Plan provides a mix of compatible uses that fulfill everyday retail and service needs in existing and new neighborhoods. This urban structure affirms Santa Fe's traditional development pattern.

1.7.13 REVIEW PROCESS

Streamline the planning and development review processes.

Greater certainty in the planning process will benefit residents and project proponents, and facilitate long-range capital improvements planning. The General Plan proposes establishing thresholds and procedures for detailed environmental and neighborhood impact analysis. The approval process for small and routine projects that do not exceed the minimum thresholds will be "streamlined" by requiring only administrative review tracks rather than public hearings.

Neighborhood participation in the planning process is assured through public review and approval of projects by the Planning Commission, Summary Committee, Board of Adjustment, and the Governing Body.

1.7.14 IMPLEMENTATION

Ensure consistency between the General Plan, implementing ordinances (including zoning and impact fees), and the Capital Improvements Program (CIP).

With this General Plan, the city is committing itself to consistency between the General Plan and the implementing programs and regulations, including zoning and subdivision regulations and the CIP. Criteria and procedures to ensure consistency between the General Plan and Zoning Ordinance are also established, including an orderly process for General Plan amendments.

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2025-11028
2904 Rufina St General Plan Amendment
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, changing the Future Land Use designation from Industrial and Business Park to Community Commercial.

In related Case #2025-11029, the Applicant requests a rezoning for Lot 3 at 2904 Rufina St, comprising approximately 3.87-acres, from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).

Additionally, in related Case #2025-11030, the Applicant requests approval of a Master Plan to construct a youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.2(E) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the General Plan Amendment request.
2) The Planning Commission heard Case #2025-11028 concurrently with Cases #2025-11029 and #2025-11030.
3) SFCC 1987 Section 14-3.2(D) sets out procedures for amendments to the general plan and requires the Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
4) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
5) The Applicant attended a pre-application conference on December 12, 2024.
6) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.

7) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
8) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve a General Plan Amendment.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose an amendment to the general plan, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 ("Submittal Requirements").
4) Pursuant to SFCC 1987 Section 14-3.2(B)(2)(b), the general plan must first be amended before approval of a change in zoning district designation that is inconsistent with the land use classification shown on the general plan's future land use map.
5) The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
6) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development with improvements by the Applicant.
7) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several themes and policies, including but not limited to, quality of life, economic diversity, community-oriented development, and infill development.
8) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(c), the Commission finds that:
   a) The amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation creates uniformity with nearby parcels.
   b) The amendment affects an area greater than two acres. The subject parcel is 3.87-acres.
   c) The amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change allows for a rezoning of the parcel to C-2 (Case #2025-11029) and a Master Plan for a youth center (Case #2025-11030); encouraging redevelopment of the infill site which is anticipated to bring

broader economic benefits such as employment and expanded services to serve the general public.

9) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(d), the Commission finds the amendment to align with the requirements of 14-3.2(E)(1)(c) while also promoting general welfare.
10) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the Commission finds that the proposed amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(g), the Commission finds that the proposed amendment does not conflict with existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's themes and policies.
13) Pursuant to SFCC 1987 Section 14-3.2(E)(2)-(3), the Commission finds that the additional criteria specific to amendments to the Land Use Policies sections of the General Plan and Neighborhood Plans are not applicable to this case because the proposal does not amend the land use policies section of the General Plan nor adopt a Neighborhood Plan.
14) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
15) The Applicant met the applicable Submittal Requirements.
16) The Commission recommends approval of the requested General Plan Amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the general plan amendment as requested in the Application for Case #2025-11028.

Case #2025-11029
2904 Rufina St Rezoning from I-1 and I-2 to C-2
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests rezoning from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) on Lot 3 at 2904 Rufina St, approximately 3.87-acres ("Project").

In related Case #2025-11028, the Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, to change the Future Land Use designation from Industrial and Business Park to Community Commercial.

Additionally, in related Case #2025-11030, the Applicant requests approval of a Master Plan to construct a youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres.

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission ("Commission") hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.5(C) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2) The Planning Commission heard Case #2025-11029 concurrently with Cases #2025-11028 and #2024-11030.
3) SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
4) The property is approximately 3.9-acres, located at 2904 Rufina St.
5) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
6) The Applicant attended a pre-application conference on December 12, 2024.
7) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.

8) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
9) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve an Ordinance for a Rezoning from I-1 and I-2 to C-2.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose the rezoning of the Property. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 ("Submittal Requirements").
4) Pursuant to SFCC 1987 Table 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Commission has the authority to review and recommend the Governing Body approve or deny the rezoning request.
5) SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and transmit the application, including any plans, to the Governing Body, together with a recommendation as to findings and conclusions, desirable changes and recommendations for approval or disapproval.
6) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Commission finds:
   a) There is no mistake in the original zoning.
   b) The Siler-Rufina area has seen increasing rezonings from industrial to commercial that have changed the character of the area.
   c) A rezoning from I-1 and I-2 to C-2 zoning would align with the intent of the General Plan and the Future Land Use of the parcel as "Community Commercial," as proposed in the General Plan Amendment for this site (Case #2025-11028).
7) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Commission finds that the Applicant submittal is a complete application as required by Chapter SFCC 1987, 14-3.5(C) "Approval Criteria," and the rezoning request does meet all rezoning approval criteria required by Chapter 14 SFCC 1987, Subsection 14-3.5(C).
8) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Commission finds that the applicant addressed compliance to General Plan Themes and Policies to allow for a change from I-1 and I-2 to C-2. The Rezoning request satisfies all rezoning approval criteria.

9) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Commission finds the Rezoning request provides sufficient information to address 14-3.5(C)(1)(d): the Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposed to meet the needs of the community while being served by sufficient infrastructure.
10) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the Commission finds that the existing and proposed infrastructure in the associated Master Plan (Case #2025-11030), such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the proposed youth center use with improvements by the Applicant.
11) Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Commission finds:
    a) The prevailing use and character of the Rufina St area is a mix of industrial, commercial, and multi-family developments. The rezoning from industrial to commercial creates consistency with adjacent parcels to the south while aligning with general plan themes and policies.
    b) The subject property is 3.87-acres, greater than the 2-acres required.
    c) C-2 zoning creates consistency with parcels to the south, indicating that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Further, redevelopment of this site for a future youth center (Case #2025-11030), as proposed, is anticipated to bring broader economic benefits such as employment and expanded services to serve the general public interest.
12) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
13) The Commission has the power and authority to review and recommend the Governing Body approve Case #2025-11029 2904 Rufina St Rezoning from I-1 and I-2 to C-2.
14) The Applicant met the applicable Submittal Requirements.
15) The Commission recommended the Governing Body approve the requested rezoning because the application met all applicable code criteria for approval.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2025, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the rezoning as requested from I-1 and I-2 to C-2, as requested in the Application for Case #2025-11029.

Findings of Fact and Conclusions of Law

Case #2025-11030
2904 Rufina St Master Plan
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests a Master Plan to develop an approximate 55,478 square foot youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres ("Project").

In related Case #2025-11028, the Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, to change the Future Land Use designation from Industrial and Business Park to Community Commercial.

Additionally, in related Case #2025-11029, the Applicant requests a rezoning for Lot 3 at 2904 Rufina St, comprising approximately 3.87-acres, from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission ("Commission") hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.9(D) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the Master Plan.
2) The Planning Commission heard Case #2025-11030 concurrently with Cases #2025-11028 and #2024-11029.
3) SFCC 1987 Section 14-3.9(B) sets out applicability standards, that a Master Plan is required in conjunction with rezoning applications in certain districts as provided in Article 14-4 (Zoning Districts). Case #2025-11029 is the associated rezoning application, which requested to rezone an approximate 3.87-acre parcel at 2904 Rufina St from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).
4) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
5) The Applicant attended a pre-application conference on December 12, 2024.

6) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.
7) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
8) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve a Master Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose the Master Plan of the Property. Pursuant to SFCC 1987 Section 14-3.9(B)(1), A master plan is required in conjunction with rezoning applications in certain districts as provided in Article 14-4 (Zoning Districts).
4) Pursuant to SFCC 1987 Table 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.9(B)(3), All use and development of land within a master-planned area must comply with the provisions of the adopted master plan. Final actions by the governing body, land use boards and the land use director concerning rezonings, subdivisions, special use permits, development plans and construction permits shall include a specific finding or determination that the action complies with all applicable provisions of the master plan.
5) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a-d), the Commission finds:
   a) The master plan is consistent with the general plan;.
   b) development of the master plan area will contribute to the coordinated and efficient development of the community;
   c) development of the master plan area will contribute to the coordinated and efficient development of the community; and
   d) the existing and proposed infrastructure , such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.
6) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a-d), the Commission finds that the Applicant submittal is a complete application as required by Chapter SFCC 1987, 14-3.9(D)(1) “Approval Criteria,” and the Master Plan request does meet all approval criteria required by Chapter 14 SFCC 1987, Subsection 14-3.9(D)(1).
7) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(d), the Commission finds that the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities,

such as fire stations and parks, will be able to accommodate the proposed youth center use with improvements to be completed by the Applicant.

8) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
9) The Commission has the power and authority to review and recommend the Governing Body approve Case #2025-11030 2904 Rufina St Master Plan.
10) The Applicant met the applicable Submittal Requirements.
11) The Commission recommended the Governing Body approve the requested Master Plan because the application met all applicable code criteria for approval, subject to the conditions and technical corrections recommended by staff.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2025, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the Master Plan as requested in the Application for Case #2025-11030, subject to the Conditions of Approval and Technical Corrections listed in Attachment A of Staff's Report, with the following additional condition: "Applicant shall include a phasing plan at the time of Development Plan submittal, should the applicant wish to phase this project."

Conditions of Approval and Technical Corrections

1. Table of Conditions of Approval
2. Table of Technical Corrections
3. Development Review Team Compiled Comments

Conditions of Approval & Technical Corrections

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
1	Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects: All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres All city projects over two (2) acres in size. All city park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Archaeology	Prior to building permit approval
2	Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Current Planning	Prior to public hearing (COMPLETED)
3	~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review.	Current Planning	~~Prior to public hearing~~ Prior to development plan approval
4	Add Case #2025-11030 to Master Plan sheets	Current Planning	Prior to public hearing (COMPLETED)
5	Shall comply with the most currently adopted International Fire Code	Fire	Prior to public hearing (COMPLETED)
6	Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021	Fire	Prior to public hearing (COMPLETED)

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
7	Shall verify compliance with section D105 Aerial Fire Apparatus Access Road as per IFC 2021	Fire	Prior to public hearing (COMPLETED)
8	Historic drainage calcs should include offsite flows onto property (if applicable)	Rivers and Watershed	Prior to Development Plan approval (In drainage report)
9	Provide a full drainage report	Engineering	Prior to Development Plan approval
10	Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.	Engineering	Prior to Development Plan approval
11	Include pond sections and show how ponds will overflow.	Engineering	Prior to Development Plan approval
12	Include lighting plan with photometrics	Engineering	Prior to Development Plan approval
13	A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.	Engineering	Prior to Development Plan approval
14	The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Wastewater	Prior to recordation
15	All 4-inch sewer lines shall connect directly to the public sewer lines	Wastewater	Prior to recordation
16	The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Wastewater	Prior to recordation
17	An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Water	Prior to building permit approval
18	An approved Water Plan will be required for all new public water infrastructure and fire services.	Water	Prior to development plan approval
19	A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	Water	At time of development

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
20	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	Water	At time of development
21	Each lot shall be served by a separate City water service.	Water	At time of development
22	See attached comments response letter dated 9/25/25 from Wilson & Company regarding Bohannon Huston, initial draft Traffic Impact Study dated 8/725	Traffic	Prior to public hearing (COMPLETED)
23	See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25	Traffic	Prior to Development Plan Approval
24	Elevations submitted for the development plan shall include a detailed Points analysis that is intergraded with the Elevations for review.	Current Planning	At time of Development Plan

Technical Corrections			
#	**Technical Correction**	**Dept. or Division**	**To be completed:**
1	Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
2	Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
3	Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
4	Include attached notes on development plan.	Engineering	Prior to recordation of Development Plan
5	The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe	Wastewater	-
6	Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property	Water	Prior to water plan approval

Cases #2025-11028, 2025-11029, and 2025-110330. 2904 Rufina St General Plan Amendment, Rezoning, and Master Plan. JenkinsGavin, Inc, Agent, for Girls Inc of Santa Fe, Applicant, requests a General Plan Amendment, Rezoning, and Master Plan for the property at 2904 Rufina St. This property is comprised of 2 parcels totaling approximately 4.85 acres, currently zoned I-1 (Light Industrial), I-2 (General Industrial), and C-2 (General Commercial).

This application was received on August 11, 2025 and has been reviewed by Planning Division staff (Staff) and the City's Development Review Team (DRT). Attached are the initial DRT review comments including conditions of approval and technical corrections. I would like to highlight and summarize the following key items:

A. Initial Planning Division Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by Planning Division staff and the following necessary revisions have been identified:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Submit a parking analysis at time of Development Plan
5. All utilities shall be underground

Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review or place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review

B. Initial DRT Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by the DRT and the following necessary revisions have been identified:

1. Shall comply with the most currently adopted International Fire Code
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
4. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services
5. An approved Water Plan will be required for all new public water infrastructure and fire services.
6. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service
7. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.
8. Each lot shall be served by a separate City water service.
9. Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.
10. Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.
11. Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.
12. Archaeological review will be required if the applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc.
    a. 14-3.13(B)(3) Suburban Archaeological Review District
        i. In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects:
        ii. All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres
        iii. All city projects over two (2) acres in size.
        iv. All city park projects over one (1) acre in size.
    b. Utility Mains:
        i. An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.
13. Provide full drainage report.

14. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.
15. Include pond sections and show how ponds will overflow
16. Include lighting plan with photometrics
17. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.
18. Include attached notes.
19. Historic drainage calcs should include offsite flows onto property (if applicable)
20. The 6-inch sewer service line(s) will be required to connect to a sewer manhole
21. All 4-inch sewer lines shall connect directly to the public sewer lines
22. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field
23. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe

The following DRT members did not have comments at this time:

- Parks and Open Space
- Water resources
- Metropolitan Planning organization
- Traffic

The following DRT comments are pending at this time:

- ADA
- Santa Fe Public Schools

C. Prior to Planning Commission, the following DRT comments must be satisfied:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Shall comply with the most currently adopted International Fire Code
5. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
6. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
7. An approved Water Plan will be required for all new public water infrastructure and fire services.
8. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.

The full DRT memos are attached for your review. Once revised submittals to the application are accepted, a public hearing date may be scheduled. Please let me know if you have any questions or concerns.

Thank you,

Alexa Hempel

Comment Form for
Planning Commission

Date: August 19, 2025

DRT Member: Fire Marshal Geronimo Griego

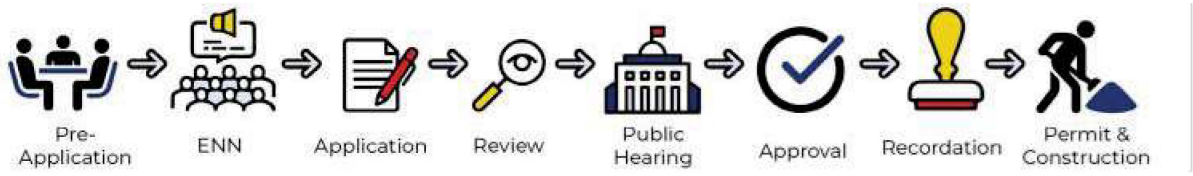
Dept/Div: Fire Marshal's Office

Case No.: 2025-11028,11029, & 11030

Case Planner: Alexa Hempel, Senior Planner

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall comply with the most currently adopted International Fire Code.	*Prior to Public Hearing*	
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021.		
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.

Explanation of Conditions or Corrections (if needed):

1. Verify that the right city adopted code is reference in documents for submission. International Fire Code (IFC) 2021.
2. Shall verify that building is provided with automatic fire sprinklers for proposed layout.
3. Shall verify two points of access to ladder building for proposed site layout conditions.

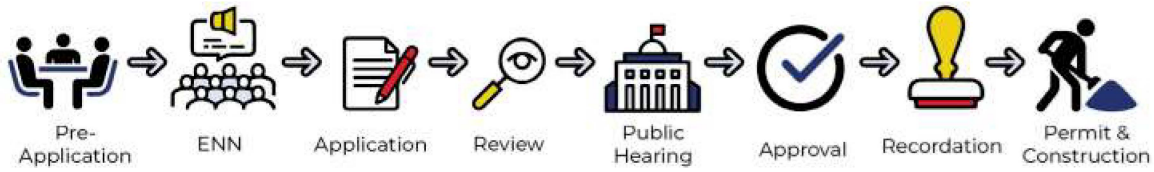
The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Case Planner: Alexa Hempel

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	Must be completed by:	Applicant response**:
1. Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance *permit* shall be required prior to approval of the final *development* plan or *plat* for the following projects: All annexations, rezonings, subdivisions, planned unit *developments* , or other *development* requiring approval by the Planning Commission, having over ten (10) acres All *city* projects over two (2) acres in size. All *city* park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance *permit* is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Building permitting	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	Must be completed by:	Applicant response**:

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. Provide full drainage report.	Prior to Development Plan approval	
2. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.		
3. Include pond sections and show how ponds will overflow.		
4. Include lighting plan with photometrics		
5. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1. Include attached notes.		
2.		
3.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

Explanation of Conditions or Corrections (if needed):

See following pages for notes required on plat or plans

Form Updated: March 2024

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

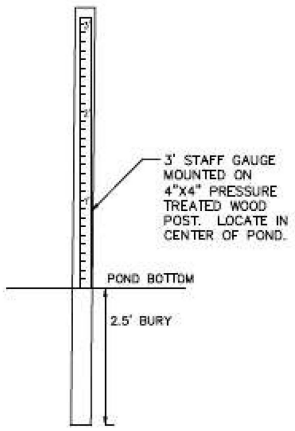
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Historic drainage calcs should include offsite flows onto property (if applicable)	Include in drainage report with development plan	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1.		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Existing vs Proposed Drainage Areas: looks like some ponding and drainages will be filled due to proposed building sites and new amenities; how is the developer planning to accommodate the excess water created by both the increase in imperviousness and the filling of these ponds? How do they plan to get the water to the new ponds, will it be piped? Will buildings have gutters and cisterns? Will landscaped areas be swaled to hold water? Etc…

Historical drainage: are they making sure to account for the entire basin in their drainage calcs, including offsite flows entering the property, esp. off the parking lot behind the school to the south if there is any?

CC: Robert Luna, PE, PTOE, Traffic Engineering Practice Lead, SW Region

Date: 10/17/2025

Re: Girl's Inc. TIA Review

Wilson and Company has reviewed the Revised DRAFT TIA dated October 6, 2025 for the Girl's Inc. Development prepared by Bohannan Huston and have the following comments. Please let me know if you have any questions or require further information.

REPORT COMMENTS

- All original Comments have been addressed
- On page 48 the report states that the common crash type was rear-end collisions for Richards and Rufina however on table 24 the highest crash type is Another Vehicle at an Angle. This should be corrected in the narrative.
- There is a large percentage of crashes that were not classified by Crash Type. The Crash Summary Tables shall also include the percentage of crash types with the "not available or not classified" crash types removed from the total number of crashes. Therefore, showing percentages of total known crash types.
- All developer mitigations shall be shown on the developments site plan.
- For the intersection of Calle del Cielo and Cerrillos Road the report recommends evaluation of a cost share with the COSF due to the spillover occurring in existing condition. Since this LOS is made worse by the added traffic by the developer this mitigation shall be implemented by the developer.

Sincerely,

Philip A Gallegos, PE
Senior Transportation Engineer

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case # 2025-11028/11029/11030

Conditions of Approval:	Must be completed by:	Applicant response**:
1. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Prior to Building Permit Approval	
2. An approved Water Plan will be required for all new public water infrastructure and fire services.	Prior to approval of Development Plan	
3. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	At the time of development	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Each lot shall be served by a separate City water service.	At the time of development	

Technical Corrections:	Must be completed by:	Applicant response**:
1. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.	Prior to Water Plan Approval	

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

The Pledge of Allegiance was led by Commissioner Barber.

C. APPROVAL OF AGENDA

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve the agenda with postponement of the minutes from October 2, 2025, to November 20, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

D. APPROVAL OF MINUTES

1. July 17, 2025

MOTION: Commissioner Embry moved, seconded by Commissioner Rieland, to approve the minutes from the Planning Commission meeting on July 17, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

2. September 4, 2025

MOTION: Commissioner McGhee moved, seconded by Commissioner Mirando, to approve the minutes from Study Session of the Planning Commission on September 4, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

3. September 4, 2025

MOTION: Commissioner McGhee moved, seconded by Commissioner Mirando, to approve the minutes from the Planning Commission meeting on September 4, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

4. September 18, 2025

MOTION: Commissioner Mirando moved, seconded by Commissioner Barber, to approve the minutes from the Planning Commission meeting on September 18, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes

Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

5. October 2, 2025 (Postponed)

MOTION: No motion or vote.

VOTE: None

6. October 16, 2025

MOTION: Commissioner Mirando moved, seconded by Commissioner Rieland, to approve the minutes from the Planning Commission meeting on October 16, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

E. APPROVAL OF FINDINGS/CONCLUSIONS

1. **Case #2024-9320. 7205 Plaza Central Development Plan:** Pax Consulting, Agent, for Zydeco LLC, owner and applicant ("Applicant"), requests approval of a Development Plan for up to 165 units, a clubhouse, swimming pool and neighborhood coffee shop at property address located at 7205 Plaza Central and is zoned C-1 (office and related commercial). It consists of a 7.9-acre lot as the result of a lot line adjustment, zoned C-1 (Alexa Hempel, Case Manager, anhemple@santafenm.gov).

MOTION: Commissioner Mirando moved, seconded by Commissioner Barber, to approve Findings for Case #2024-9320 without changes or corrections.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

F. NEW BUSINESS

1. **Case #2025-11028. 2904 Rufina General Plan Amendment:** JenkinsGavin, Agent, for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a General Plan amendment changing the Future Land Use Map designation for Lot 3, comprising approximately 3.87-acres, located at 2904 Rufina Street, from a duel mapped area of "Industrial" and "Business Park" to "Community Commercial." (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11028, 2904 Rufina General Plan Amendment, as is.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

---

2. **Case #2025-11029. 2904 Rufina Rezoning:** JenkinsGavin, Agent, for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Lot 3 at 2904 Rufina Street, comprising approximately 3.87-acres, from a duel mapped area of "Light Industrial" (I-1) and "General Industrial" (I-2) to "General Commercial" (C-2). (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11029, 2904 Rufina Rezoning, as is.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

3. **Case #2025-11030. 2904 Rufina Master Plan:** JenkinsGavin, Agent, for Girls, Inc., of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a Master Plan of a proposed youth center at 2904 Rufina Street on Lots 3 and 2A, 2-2, totaling approximately 4.27-acres. Lot 3 is approximately 3.87-acres, and Lot 2A, 2-2 is approximately 0.399-acres and is located adjacent to the southwest side of Lot 3. (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

PUBLIC COMMENTS: Seven (7) members of the public were sworn in and gave comments in favor of the 2904 Rufina Street Master Plan.

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11030, 2904 Rufina Master Plan, as is.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

4. **Case #2025-10685. Tierra Contenta Preliminary Subdivision Plat:** JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant"), requests review and approval of a Preliminary Subdivision Plat for 16 development tracts and six open space tracts for a total of 22 tracts and Innovative Street Design. The subject lots are 216.5 acres and are located at 6120, 6130, 6150, and 6135 Paseo del Sol. The lots are zoned Planned Residential Community District (PRC) and lie within the Suburban Archaeological Review District. (Rebekah Clouser, Case Manager, reclouser@santafenm.gov).

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve Case #2025-10685, Tierra Contenta Preliminary Subdivision Plat, subject to conditions of approval and technical corrections, and on the condition that the neighborhood park design and drainage ponding fencing shall be postponed in order to allow the Applicant and staff to discuss and resolve prior to final subdivision plat.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

---

5. **Case #2025-10688. Tierra Contenta Preliminary Subdivision Plat Variance (Slopes):** JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant"), requests a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 27,179 square feet. The subject lots are approximately 216.5 acres and located at 6120, 6130, 6150, and 6135 Paseo del Sol, zoned Planned Residential Community District (PRC). (Rebekah Clouser, Case Manager, reclouser@santafenm.gov).

PUBLIC COMMENTS: One (1) member of the public was sworn in and gave comment not in favor of the Tierra Contenta Preliminary Subdivision Plat Variance.

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve Case #2025-10688, Tierra Contenta Preliminary Subdivision Plat Variance (Slopes), subject to conditions of approval and technical corrections.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

---

6. **Case #2025-10690. Tierra Contenta Preliminary Subdivision Plat Variance (Significant Trees):** The request for a variance from SFCC 14-8.4(F)(5) for the removal and preservation of significant trees was withdrawn by JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant").

---

7. **Case #2025-11006. Vistas de la Sierra Phase 3:** Liaison Planning Services, Inc., Agent, for Forestar (USA) Real Estate Group, Inc., owner and applicant ("Applicant"), requests review and approval of a Preliminary Subdivision Plat, per § 14-3.7(B)(3) of the Land Development Code, for a 128-lot residential subdivision. The subject property is a 24.423-acre parcel located at 3800 Governor Miles Road and west of Richards Avenue. The proposed subdivision is Phase 3 and consists of 2 separate lots. Tract #A3 is 16.653 acres and Tract 3A4 is 7.77 acres. The subject property is zoned R-5 (residential 5 units per acre). (Claudia Kath, Case Manager, cmkath@santafenm.gov).

PUBLIC COMMENTS: Seven (7) members of the public were sworn in and gave comments not in favor of Vistas de la Sierra Phase 3.

MOTION: Commissioner McGhee moved, seconded by Commissioner Rieland, to approve Case #2025-11006, Vistas de la Sierra Phase 3, subject to conditions of approval and technical corrections, as well as the additional four conditions outlined by staff in discussion with the Applicant, and on the condition that the Applicant agree to limit the seven houses abutting Nava Ade Homeowners Association to single-story homes.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes

Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

memo

DATE: January 16, 2026

TO: Governing Body

VIA: Heather L. Lamboy, Planning and Land Use Director
Maggie Moore, Assistant Land Use Director MRM
Dan Esquibel, Planning Manager

FROM: Alexa Hempel, Planner Senior, Current Planning Division AH

1. CONSIDERATION OF A RESOLUTION
General Plan Amendment. Case #2025-11028. JenkinsGavin, LLC, Agent for Applicant Girls, Inc., of Santa Fe, asks the Governing Body to adopt a Resolution to amend the General Plan Future Land Use Map designation for +/- 3.87 acres, located at 2904 Rufina St (Lot 3) from Industrial and Business Park to Community Commercial.

2. CONSIDERATION OF BILL NO. 2025-27
Rezoning. Case #2025-11029. JenkinsGavin, LLC, Agent for Applicant Girls, Inc., of Santa Fe, asks the Governing Body to adopt Bill No. 2025-27 to rezone +/- 3.87 acres located at 2904 Rufina St (Lot 3) from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial).

3. CONSIDERATION OF A RESOLUTION
Master Plan. Case #2025-11030. JenkinsGavin, LLC, Agent for Applicant Girls, Inc., of Santa Fe, asks the Governing Body to adopt a Resolution creating a Master Plan for a +/- 55,478 sq ft youth center on +/- 4.27 acres located at 2904 Rufina St (Lots 3 and 2A, 2-2).

I. Planning Commission Recommendations:

On November 6, 2025, the Planning Commission recommended the Governing Body take the following actions:

1. **APPROVE** Case #2025-11028. 2904 Rufina St Lot 3 General Plan Amendment from Industrial and Business Park to Community Commercial.
2. **APPROVE** Case #2025-11029. 2904 Rufina St Lot 3 Rezoning from I-1 and I-2 to C-2.
3. **APPROVE** Case #2025-11030. 2904 Rufina St Lots 3 and 2A, 2-2 Master Plan, subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of Staff's report.

II. Sample Motions:

Three (3) motions will be required, in the following order:

1. **Move to approve or deny** Case #2025-11028, adopting a resolution (the "Future Land Use Map Amendment Resolution") to amend the General Plan Future Land Use Map designation from Industrial and Business Park to Community Commercial for +/- 3.87 acres (Lot 3) located at 2904 Rufina St.

2. **Move to approve or deny** Case #2025-11029, adopting Bill No. 2025-27, changing the official Zoning Map designation from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) for +/- 3.87 acres (Lot 3) located at 2904 Rufina St.

3. **Move to approve or deny** Case #2025-11030, adopting a resolution (the "Master Plan Resolution") for a Master Plan of a +/- 55,478 sq ft youth center on +/- 4.27 acres (Lots 3 and 2A, 2-2) at 2904 Rufina St., subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of Staff's report.

III. Executive Summary

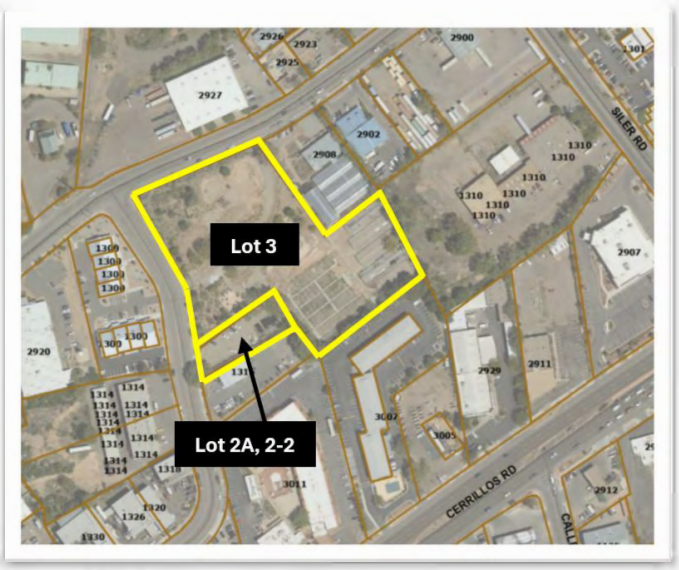

Figure 1 - Site Location

Girls, Inc., of Santa Fe (the "Applicant" or "GISF"), is a non-profit educational institution requesting a general plan amendment, rezoning, and master plan to construct a new educational facility at 2904 Rufina St. Through its agent, JenkinsGavin, LLC, the Applicant requests the general plan amendment (the "Future Lan Use Map Amendment") to change the General Plan Future Land Use Map (the "FLUM") designation on a 3.87-acre parcel (Lot 3 -see Figure 1 – Site Location) from Industrial and Business Park to Community Commercial. The rezoning request is to change the zoning of Lot 3 from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) (the "Rezoning").

Approval of the General Plan Amendment and Rezoning will allow for consideration of a master plan of Lots 3 and 2A, 2-2, totaling +/- 4.27 acres (the "Master Plan"). The Master Plan proposes a +/- 55,478 sq ft youth center including classrooms, a gymnasium, a gathering space, a teen entrepreneurship center, administrative offices, a caretaker's residence, play areas, a greenhouse, a chicken coop, gardens, and forested pathways on the former Santa Fe Greenhouses nursery site.

The Applicant conducted a pre-application conference on December 12, 2024, and an Early Neighborhood Notification ("ENN") meeting on July 23, 2025. No members of the public were

present at the ENN meeting. On November 6, 2025, the Planning Commission held a public hearing to review Cases #2025-11028, 2025-11029, and 2025-11030, during which the Planning Commission heard reports from City Planning and Land Use Department staff (the "Staff"), testimony and evidence from the Applicant, and public comments by interested members of the public. All comments from members of the public were in support of the application and generally expressed gratitude for the impact of Girls, Inc., on uplifting and supporting the Santa Fe community, as well as excitement for the opportunity for Girls, Inc., to expand their services. The Planning Commission found that the Future Land Use Map Amendment, Rezoning, and Master Plan were consistent with the General Plan and City of Santa Fe Code (SFCC), and that all approval criteria had been met.

The Planning Commission recommended that the Governing Body approve Case #2025-11028, the Future Land Use Map Amendment, Case #2025-11029, the Rezoning, and Case #2025-11030, the Master Plan (see Attachment A, "Planning Commission Packet"). On December 4, 2025, the Planning Commission adopted Findings of Fact and Conclusions of Law (Attachments B, C, and D), and Planning Commission Minutes (Attachment E, "Planning Commission Minutes November 6, 2025").

IV. General Plan Amendment Approval Criteria

The City Code requires the Governing Body to review all amendment proposals on the basis of the criteria addressed below and make complete findings of fact "sufficient to show that these criteria have been met" before it recommends approval of any amendment to the general plan. See SFCC 1987, Sec. 14-3.2(E)(1).

Table 1 General Plan Amendment Approval Criteria Analysis

14-3.2(E)(1)(a): **Consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Economic development goals are upheld by the provision of quality childcare programs that support working parents. The 2004 report, Cultivating Santa Fe's Future Economy, by Angelou Economics, recognizes the important role of quality of life in economic development. In Strategy Four: Economic Development, the report states, "The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens." The GISF program is a quality-of-life amenity serving the Santa Fe community and young families, enhancing the attractiveness of Santa Fe for existing residents and newcomers, alike. In addition, GISF will employ approximately 45 staff persons. The new facility will serve the growing southwest part of town, home to a majority of Santa Fe's families. Lastly, the site has existing access via two public rights-of-way and is currently served by public utility infrastructure.*	
Staff Response: Staff concurs that the proposed amendment is consistent with Santa Fe's growth management and economic development goals as outlined in the General Plan, Angelou Report, and the 2008 Economic Development Strategy. The amendment supports the City's efforts to direct growth toward areas with existing infrastructure and services and encourages balanced economic development. Overall, the proposal aligns with the General Plan's vision for sustainable coordinated urban growth and is consistent with Criterion 1.	

14-3.2(E)(1)(b): **Consistency with other parts of the general plan;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment conforms to the following General Plan Themes and Policies:* ***Themes***	

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.
Staff Response: Staff finds that reclassifying Lot 3 as 'Community Commercial' is consistent with the General Plan Themes and Policies listed by the Applicant. The reclassification will allow for a youth center that promotes quality of life for Santa Fe residents and economic diversity for the Siler-Rufina area. Additionally, this project will provide infill development consistent with General Plan Themes and Policies.

14-3.2(E)(1)(c): **The amendment does not:**	**Criterion Met:** (Yes/No)
(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;**	**YES**
Applicant Response: *(i) The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.* *(ii) The subject parcel comprises 3.87 acres. Nevertheless, the property is adjacent to the Community Commercial designation along its south boundary.* *(iii) Contrary to harming surrounding landowners or the general public, this General Plan Amendment, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: (i) The Siler-Rufina neighborhood is home to a mix of industrial, commercial, and non-profit organizations. Reclassifying Lot 3 will allow for continued infill development consistent with the character of this area. This reclassification will also create consistency with lots south of this property that are currently classified 'Community Commercial.' (ii) Staff finds that the subject parcel is 3.87-acres, exceeding the required 2-acres. (iii) The General Plan Amendment to reclassify the lot to "Community Commercial" will create the ability to rezone the lot to "General Commercial," which allows for a variety of uses that have potential to serve the community at large, including the proposed youth center in the Master	

Plan. Reclassifying this lot can also encourage the redevelopment of the infill site, stated as a priority in the General Plan under policy 3-G-3.

14-3.2(E)(1)(d): **An amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment promotes the general welfare, because it will enable the construction of a new GISF youth center, offering after school and summer programs for school-age girls and much-needed support for working parents.*	
Staff Response: The proposed amendment conforms to the requirements of 14-3.2(E)(1)(c), while also promoting general welfare by allowing for the proposed Master Plan use of a youth center, offering quality care to school aged children and accelerating infill development of this site.	

14-3.2(E)(1)(e): **Compliance with extraterritorial zoning ordinances and extraterritorial plans;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *N/A*	
Staff Response: N/A	

14-3.2(E)(1)(f): **Contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Redevelopment of this infill site provides for efficient and economic development, leveraging existing infrastructure, and supporting the harmonious development of Santa Fe. This request not only supports the general welfare of the community by providing Santa Fe families with a safe and reliable place to send their children but is the sole motivation for this effort.*	
Staff Response: Staff agrees with the applicant and finds that reclassifying Lot 3 to 'Community Commercial' supports harmonious infill development that is efficient and consistent with properties in the vicinity which have been rezoned from industrial to commercial and subsequently redeveloped (Ord. #2016-44, #2022-4).	

14-3.2(E)(1)(g): **Consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The City of Santa Fe Land Use and Urban Design Plan recognizes the Siler Neighborhood as a Mixed-Use Corridor, stating, "Development and redevelopment along these corridors should be encouraged to provide greater density of commercial uses…". Furthermore, the Plan encourages the re–use of blighted or failing buildings and businesses. The redevelopment of a former, dilapidated nursery on an infill site in the Siler Neighborhood thoroughly aligns with these objectives. Furthermore, the City of Santa Fe Economic Development Department branded the subject neighborhood as the Siler-Rufina Nexus in a recent report issued to spur investment in the City's Opportunity Zones. In keeping with this effort, the proposed GISF facility is a significant investment in the neighborhood, increasing job opportunities and redeveloping a deteriorated site.*	
Staff Response: Staff agrees with the Applicant's response while additionally acknowledging the previous references to the City's General Plan policies. The proposed change does not conflict with existing city ordinances or regulations and the applicant's Master Plan and future development plan of the site will conform with the City of Santa Fe's Land Use Code and Policies.	

V. Rezoning Approval Criteria

The City Code requires the Governing Body to review all rezoning proposals on the basis of the criteria addressed below, and make complete findings of fact "sufficient to show that these criteria have been met" before it approves a rezoning. See SFCC 1987, Sec. 14-3.5(C).

Table 2 Rezoning Approval Criteria Analysis

14-3.5(C)(1)(a):	**Criterion Met:**
The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning: **(a) one or more of the following conditions exist:** **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	(Yes/No) **YES**

Applicant Response:

(i) *N/A*

(ii) *This area has evolved over the years into a diverse, mixed-use neighborhood of recreational uses, non-profit institutions, a mix of housing types, and various commercial enterprises. The rezone will support the construction of the proposed GISF facility, which aligns well with this current pattern of development.*

(iii) *Rezoning the property to C-2 is more advantageous to the community. A vacant site falling into disrepair creates no community benefit. Redevelopment of this infill site vitalizes the neighborhood and supports the provision of critical community services. Furthermore, the rezone request aligns with the Themes and Policies of the General Plan, as summarized below:*

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

(i) Staff did not find a mistake in the original zoning.

(ii) In recent years, the Siler-Rufina area has seen increasing multifamily residential developments and rezonings from industrial to commercial that have changed the character of

the area (Ord. #2016-44, #2022-4). Commercial establishments and non-profit institutions have also come to occupy many industrial spaces surrounding the property. Staff recognizes a change in the character of the area.
(iii) Staff finds the rezoning of this parcel to "General Commercial" to be more advantageous than the currently vacant industrial site. This change encourages redevelopment of the infill site, and the associated Master Plan proposes a quality-of-life amenity to the community, supported by the General Plan.

14-3.5(C)(1)(b): **All the rezoning requirements of Chapter 14 have been met.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *All the rezoning requirements of Chapter 14 have been met. A Pre-Application Conference was conducted with the Development Review Team on December 12, 2024, and the Early Neighborhood Notification Meeting was held on July 23, 2025*.	
Staff Response: Staff finds that the rezoning requirements of Chapter 14 have been met, including SFCC 14-3.1 "*Applicable General Provisions*," and SFCC 14-3.5 "*Rezonings*." This rezoning application has also been reviewed by the Development review Team (DRT) for compliance with Chapter 14.	

14-3.5(C)(1)(c): **The rezoning is consistent with the applicable policies of the general plan, including the future land use map.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *A Request to amend the General Plan Future Land Use Map to Community Commercial accompanies this rezone application, which aligns with the requested C-2 zoning. Furthermore, the project conforms to the General Plan as outlined below:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.* *1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.* *1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.* *1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban*	

sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

The rezoning alone does not align with the Future Land Use designation of this parcel which currently includes "Industrial" and "Business Park." However, the applicant is requesting a General Plan Amendment to designate the Future Land Use of this parcel "Community Commercial," which would align with the rezoning and proposed Master Plan use of a youth center. The project aligns with other themes and policies of the General Plan including but not limited to quality of life, sustainable growth, urban form, and community-oriented development.

14-3.5(C)(1)(d):	**Criterion Met:**
The amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of	(Yes/No) **YES**

urban land sufficient to meet the amount, rate and geographic location of the growth of the city.	
Applicant Response: *General Plan Figure 4-4, Urban Sub-Areas, designates the 3.87-acre subject property and surrounding area as an "Infill Area." The Growth Management Chapter of the General Plan specifically calls for prioritization of infill development in Santa Fe in order to maximize the efficient use of public infrastructure, while meeting the demand for urban land for development and directing new growth towards the historic core of the city rather than on the undeveloped fringes. The proposed infill project is in alignment with these strategic directives and is responsive to community needs for public services and community engagement in this area of the City. General Plan Section 4.1 states, "In both 'infill' and 'future growth' areas, the city must encourage higher densities of residential and commercial development than existing zoning often allows" to help "create efficient use of already existing roads and utilities, help ensure cost-efficient public transit, and provide the type of housing that will be in demand...".*	
Staff Response: SFCC Section 14-3.5(C)(2)(b) prohibits a rezoning if the rezoning will "affect an area of less than two acres." This Parcel is 3.87-acres and therefore exceeds the required 2-acres. The Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposes to meet the needs of the community while being served by sufficient infrastructure.	

14-3.5(C)(1)(e): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject property is served by existing roadways and public water and sewer infrastructure. Since the program includes the development of over 2.7 acres of outdoor recreational space, the GISF facility will not affect the capacity of area parks.*	
Staff Response: Staff from the relevant City departments, including water, wastewater, and traffic engineering have reviewed the zoning criteria as it relates to the Master Plan and determined that the property is sufficiently served by infrastructure so long as the Applicant meets the Conditions of Approval and Technical Corrections identified in Attachment A of this report.	

14-3.5(C)(2)(a): **Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:**	**Criterion Met:** (Yes/No) **YES**

Allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;	
Applicant Response: *The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.*	
Staff Response: The Applicant stated in response to (1)(a)(iii) the General Plan Themes and Policies that this project aligns with. Staff finds that this use fits the surrounding Siler neighborhood which is currently a mix of industrial, commercial, and multi-family dwellings.	

14-3.5(C)(2)(b): **Affect an area of less than two acres, unless adjusting boundaries between districts; or**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject parcel is 3.87 acres.*	
Staff Response: The subject parcel is 3.87-acres, therefore exceeding the required 2-acres for a rezoning.	

14-3.5(C)(2)(c): **Benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Contrary to harming surrounding landowners or the general public, this rezone, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: The C-2 Zoning for Lot 3 is consistent with the existing land use patterns in adjacent areas south of the parcel. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, the Master Plan of a youth center for this site is anticipated to bring broader economic benefits, such as increased employment and expanded services, which would serve the general public interest.	

SFCC 14-3.5(D): Additional Applicant Requirements

14-3.5(D)(1): **If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response: *The property is currently served by existing public roadway and utility infrastructure. The Applicant is prepared to construct any necessary infrastructure upgrades at the time of property development, and these improvements will be documented in the approved development plans.*
Staff Response: The Traffic Impact Analysis (TIA) submitted by the Applicant identified the need for various streets improvements to the area surrounding the proposed development due to the increased traffic volume a youth center will cause. The Applicant understands these infrastructure improvements and acknowledges that the City may require the developer to construct necessary infrastructure improvements.

14-3.5(D)(2): **If the proposed rezoning creates a need for additional streets , sidewalks or curbs necessitated by and attributable to the new development , the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Traffic Impact Analysis identifies the need for a southbound left-turn lane on Rufina Circle serving the north access drive. No other off-site improvements are warranted. The developer is aware that required upgrades by the City of Santa Fe will be at the expense of the developer.*	
Staff Response: Additional streets, sidewalks, and curb improvements shall be determined when the Applicant submits a Development Plan for this site. The Applicant acknowledges this criterion.	

VI. MASTER PLAN APPROVAL CRITERIA

The City Code requires that approval of a master plan be based on the following findings, and that actions taken by Planning Commission and Governing Body must be at a public hearing. See SFCC 1987, Sec. 14-3.9.

Table 3 Master Plan Approval Criteria Analysis

14-3.9(D)(1)(a): **The master plan is consistent with the general plan**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
The proposed Master Plan aligns with various Themes and Polices in the General Plan, as summarized below.

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler- Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls, Inc., youth center directly fulfills these objectives.

Staff Response:
The Master Plan is consistent with the General Plan themes and policies listed by the applicant, including quality of life, economic diversity, sustainable growth, urban Form, community oriented development, and mixed use. The proposed use is currently not supported on the Future Land Use Map, but would be if the General Plan Amendment to change Lot 3 to "Community Commercial" is approved.

14-3.9(D)(1)(b): **The master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
The C-2 zoning district is a robust mixed-use zoning category that supports both commercial uses and residential development at higher densities. The proposed GISF youth center is a permissible use in the C-2 district and an appropriate commercial development in the Siler-Rufina neighborhood. Furthermore, the Master Plan demonstrates compliance with C-2 development standards with respect to height, lot coverage, open space, terrain management, and landscaping.

Staff Response:
The Master Plan is consistent with the purpose and intent of the proposed C-2 zoning district and has been conditioned to meet specific design criteria that shall apply when a Development Plan application is submitted. The Master Plan conforms with dimensional standards for C-2 zoning including height, lot coverage, setbacks, and lot size.

14-3.9(D)(1)(c): **Development of the master plan area will contribute to the coordinated and efficient development of the community; and**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Master Plan includes provisions for pedestrian and vehicular connectivity to the surrounding area, as called for in the General Plan. In addition, the subject property makes efficient use of existing infrastructure as an infill site – a value repeatedly emphasized in the General Plan*.	
Staff Response: The Master Plan proposes efficient use of an infill parcel within the diverse Siler-Rufina area, utilizing existing infrastructure and improving connectivity. This use is an asset to the general welfare of the community as it will allow a quality-of-life amenity to be in a more accessible location for the growing Santa Fe community.	

14-3.9(D)(1)(d): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The existing roadway and utility infrastructure are adequate to serve the project. The Traffic Impact Analysis (TIA) demonstrates that the roadway network has the capacity for the proposed development, with the inclusion of a new left-turn lane serving the north access drive on Rufina Circle*.	
Staff Response: The proposed infrastructure has been reviewed based on the regulations established in Chapter 14 by Land Use Staff and the Development Review Team (DRT) encompassing fire, water, wastewater, public works, terrain management, traffic, and landscaping. Existing and proposed infrastructure can accommodate the development of this site as proposed, with street modifications as described in the Applicant's Traffic Impact Analysis. Individual DRT comments can be found in Attachment A of this report.	

VII. CONCLUSION

Upon review of the Applicant's request, submittal, and written findings, Staff has determined the Applicant has met the approval criteria for the Amendment, Rezoning, and Master Plan established in SFCC 1987, Sections 14-3.2(E), 14-3.5(C) and (D), and 14-3.9(D). Staff also finds that the Applicant has satisfied the requirements of 14-3.1(E), "Pre-Application Conferences," 14-3.1(F) "Early Neighborhood Notification Procedures," and 14-3.1(H) "Notice Requirements."

CITY OF SANTA FE
PLANNING & LAND USE

Planning and Land Use Department
Planning Commission Staff Report

Case Numbers	#2025-11028 #2025-11029 #2025-11030
Hearing Date	November 6, 2025
Agent	JenkinsGavin, Inc
Applicant	Girls, Inc of Santa Fe
Request	General Plan Amendment, Rezoning, Master Plan
Location	2904 Rufina St, Santa Fe, NM 87507
Case Manager	Alexa Hempel
Current Zoning	Light Industrial (I-1), General Industrial (I-2), General Commercial (C-2)
Overlay	Suburban Archeological Review District
Pre-App Meeting	December 12, 2024
ENN Meeting	July 23, 2025
Proposal	Applicant requests approval of a General Plan Amendment to change the Future Land Use of a parcel, a Rezoning of a parcel from I-1 and I-2 to C-2, and a Master Plan for a youth center.

Site Map

Case #2025-11028: 2904 Rufina General Plan Amendment. JenkinsGavin, "Agent," for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission recommend the Governing Body approve a General Plan amendment changing the Future Land Use Map designation for Lot 3, comprising approximately 3.87-acres, located at 2904 Rufina St., from a dual mapped area of "Industrial" and "Business Park" to "Community Commercial." (Alexa Hempel, Case Manager, anhempel@santafenm.gov)

Case #2025-11029: 2904 Rufina Rezoning. JenkinsGavin, "Agent," for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Lot 3 at 2904 Rufina St., comprising approximately 3.87-acres, from a duel mapped area of "Light Industrial" (I-1) and "General Industrial" (I-2) to "General Commercial" (C-2). (Alexa Hempel, Case Manager, anhempel@santafenm.gov)

Case #2025-11030: 2904 Rufina Master Plan. JenkinsGavin, "Agent," for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend the Governing Body approve a Master Plan of a proposed youth center at 2904 Rufina St on Lots 3 and 2A, 2-2, totaling approximately 4.27-acres. Lot 3 is approximately 3.87-acres, and Lot 2A, 2-2 is approximately 0.399-acres and is located adjacent to the southwest side of Lot 3. (Alexa Hempel, Case Manager, anhempel@santafenm.gov)

I. RECOMMENDATION

Staff recommends that the **Planning Commission recommend the Governing Body APPROVE** the following cases, subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of this report.

1. **Case #2025-11028:** 2904 Rufina Lot 3 General Plan Amendment
2. **Case #2025-11029:** 2904 Rufina Lot 3 Rezoning
3. **Case #2025-11030:** 2904 Rufina Lot 2A, 2-2 and Lot 3 Master Plan

Three motions will be required for this case:

1. **Recommend the Governing Body APPROVE** or **DENY** Case #2025-11028, "*2904 Rufina Lot 3 General Plan Amendment.*"
2. **Recommend the Governing Body APPROVE** or **DENY** Case #2025-11029, "*2904 Rufina Lot 3 Rezoning.*"
3. **Recommend the Governing Body APPROVE** or **DENY** Case #2025-11030, "*2904 Rufina Lot 2A, 2-2 and Lot 3 Master Plan,*" subject to the Conditions of Approval and Technical Corrections outlined in Attachment A of Staff's report.

II. EXECUTIVE SUMMARY

The subject property is located at 2904 Rufina St, at the intersection of Rufina St and Rufina Circle, north of Cerrillos Rd and west of Siler Rd (the "Property"). The Property is the site of a former retail plant nursery and greenhouse and is comprised of two (2) lots, totaling approximately 4.27-acres. The first lot, described as "Lot 3" is 3.877-acres, dually zoned I-1, "Light Industrial," and I-2, "General Industrial." The second lot, described as "Lot 2A, 2-2" is 0.398-acres, zoned C-2, "General Commercial."

Lot 3 has two (2) General Plan Future Land Use Map (FLUM) designations, "Industrial" and "Business Park." The applicant requests a general plan amendment to designate the entirety of Lot 3 to "Community Commercial" on the FLUM ("General Plan Amendment"). This General Plan Amendment supports the Applicant's concurrent application to rezone Lot 3 from I-1 and I-2 to C-2, "General Commercial" ("Rezoning"). This Rezoning would create zoning uniformity between Lots 3 and 2A, 2-2.

Collectively on the two (2) lots, Girls, Inc of Santa Fe (GISF), acting through its agent, JenkinsGavin (the "Applicant") proposes a master plan for a youth center. GISF is a non-profit corporation based at 310 Hillside Ave that provides educational, recreational, and mentorship activities to school-age children in Santa Fe. The proposed master plan ("Master Plan") of Lots 3 and 2A, 2-2 includes a 55,478 sq ft youth center including classrooms, a gymnasium, a gathering space, an entrepreneurship training center, a caretakers residence, and administrative offices. The Master Plan also designates 2.7-acres of the lot for open space, including areas for recreational activities, gardens, shade and fruit trees, a greenhouse, chicken coop, pavilion, and pathways. If the Master Plan is approved, the Applicant would be required to submit a Development Plan that provides further details for the youth center development, which would be reviewed and approved/denied by the Planning Commission.

The Applicant has complied with Subsections SFCC 14-3.1(E) "*Pre-Application Conferences*", SFCC 14-3.1(F) "*Early Neighborhood Notification Procedures,*" and SFCC 14-3.1(H) "*Notice Requirements*."

Staff's analysis finds that the Applicant has addressed the necessary "*Approval Criteria*" per Subsections SFCC 14-3.2(E), SFCC 14-3.5(C), and SFCC 14-3.9(D) and **recommends that the Planning Commission recommend approval of all three (3) cases to the Governing Body,** with the Master Plan being subject to the "*Conditions of Approval" & "Technical Corrections*" identified in in Attachment A.

III. PROJECT ANALYSIS: GENERAL PLAN AMENDMENT & REZONING

Project Overview

The 1999 General Plan is a comprehensive, long-term plan for physical development and conservation in Santa Fe. It was intended to be a living document subject to amendments over time. The General Plan established the Future Land Use for parcels in the City in alignment with the themes of the plan. The two (2) parcels owned by GISF are designated "Industrial" and "Business Park" on the Future Land Use Map (FLUM).

Lot 3 is currently zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2A, 2-2 is currently zoned General Commercial (C-2). See future land use and current zoning maps in Figures 1 and 2.

Figure 1: Future Land Use. *Gray is Industrial, Purple is Business Park, Red is Community Commercial.*

Figure 2: Current Zoning. *Gray is I-2, Light Purple is I-1, Red is C-2.*

The Applicant requests to rezone Lot 3, 3.877-acres, from I-1 and I-2 to C-2 to create zoning uniformity with Lot 2A, 2-2 which is currently zoned C-2. This uniformity is needed for their project because the use proposed in the Master Plan, a youth center, is permitted in C-2 zoning, but not in I-1 or I-2 zoning (See table 1).

CATEGORY Specific Use	RR	R-1 - R-6	R-7 - R-9	R-7 - I	RC-5, - RC-8	R-10 - R-29	MHP	RAC	AC**	C-1	C-2	C-4	HZ	BCD	I-1	I-2
Community Centers and Institutions																
Neighborhood and community centers, including youth and senior centers	S	S	S		S	S		S		P	P	P	P	P		

Table 1: SFCC Table 14-6.1-1*, Table of Permitted Uses. "S" indicates Special Use Permit, "P" indicates Permitted, and a blank cell indicates Prohibited.*

Due to the rezoning of Lot 3 going from Industrial to Commercial, the General Plan Amendment is first required because the Code requires that any rezoning be consistent with the General Plan, per SFCC 14-3.2(B)(2)(b):

"*The general plan must first be amended before: approval of a change in zoning district designation that is inconsistent with the land use classification shown on the general plan's future land use map.*"

In compliance with this requirement, the applicant requests that the Future Land Use of Lot 3 be changed to "Community Commercial" to match the C-2 Rezoning request. A general plan amendment is not required for Lot 2A, 2-2 because a rezoning is not proposed for that parcel. See the General Plan Future Land Use definitions for Industrial, Business Park, and Community Commercial in Table 2.

Future Land Use Classification	General Plan Definition
Industrial	This classification provides and protects industrial lands for the full range of manufacturing, agricultural and industrial processing, general service, and distribution uses. Unrelated retail and commercial uses that could be more appropriately located elsewhere in the city would not be permitted. Performance standards in the Zoning Ordinance will minimize potential environmental impacts.
Business Park	Business Parks shall provide areas appropriate for moderate- to low-intensity industrial and business park uses capable of being located next to commercial and residential areas with minimum buffering. Allowable uses include research and development related uses, light manufacturing, wholesaling, distribution and storage, retailing and small-scale restaurants as a related use only, and offices in a master planned landscaped setting. No raw materials processing or bulk handling would be allowed. The Business Park designation on the Future Land Use Map of the General Plan is intended to encompass the 11, Light Industrial District, and the IP, Industrial Park District, existing zoning categories. It is recommended that both districts be re-examined for allowable uses and appropriate standards. It is further recommended that the IP zoning district be restructured with a stronger emphasis on research and development, offices, and related uses, to be developed in a master planned landscaped setting, and that the district name be modified to Business and Industrial Park in order to reflect these changes. For new development and for rezonings within the Business Park designation, the appropriateness of 1 versus BIP (IP) is determined by the nature of adjacent land uses. Where an area designated Business Park on the Future Land Use map is adjacent to non-residential zoning, an existing non-residential use, or non-residential Future Land Use, then that area may be considered for 11 zoning. Where an area designated Business Park on the Future Land Use map is adjacent to residential zoning, an existing residential use, or residential Future Land Use, then that area may be considered for IP (BIP) zoning.
Community Commercial	This classification provides sites for retail shopping areas, focus on a plaza, containing a wide variety of businesses, including retail stores; eating and drinking establishments; commercial recreation; service stations; automobile sales and repair services; financial, business, and personal services; and educational and social services.

Table 2: *General Plan Future Land Use Classification Definitions*

Figures 3 and 4 below demonstrate what the future land use and zoning of the property would look like if the Rezoning and General Plan Amendment are approved for Lot 3.

Figure 3: Future Land Use after General Plan Amendment. *Gray is Industrial, Purple is Business Park, Red is Community Commercial.*

Figure 4: Zoning after Rezoning. *Red is C-2, Gray is I-2.*

Review and Recommendation

Staff reviews General Plan Amendment and Rezoning applications for compliance with associated approval criteria (see SFCC 14-3.2(E)) and14-3.5(C)) and make recommendations to Planning Commission based on this compliance. Following a hearing, the Planning Commission makes a recommendation to Governing Body, who shall take final action to approve or deny cases. Conditions of Approval and Technical Corrections shall not be imposed on general plan amendments or rezonings.

IV. PROJECT ANALYSIS: MASTER PLAN

Project Description

The Applicant's plan for the Property includes constructing a 55,478 square foot GISF youth center building including classrooms, gathering spaces, a gymnasium, and administrative offices (the "Project"). The Project also includes a separate teen enterprise space and caretaker's residence. Outside, the space will house gardens, forested areas, a play field, greenhouse, chicken coop, pavilion, and connected pathways on 2.7-acres of the site. The main building is situated on the southeast corner of the property and parking is proposed off two (2) entrances along Rufina Circle.

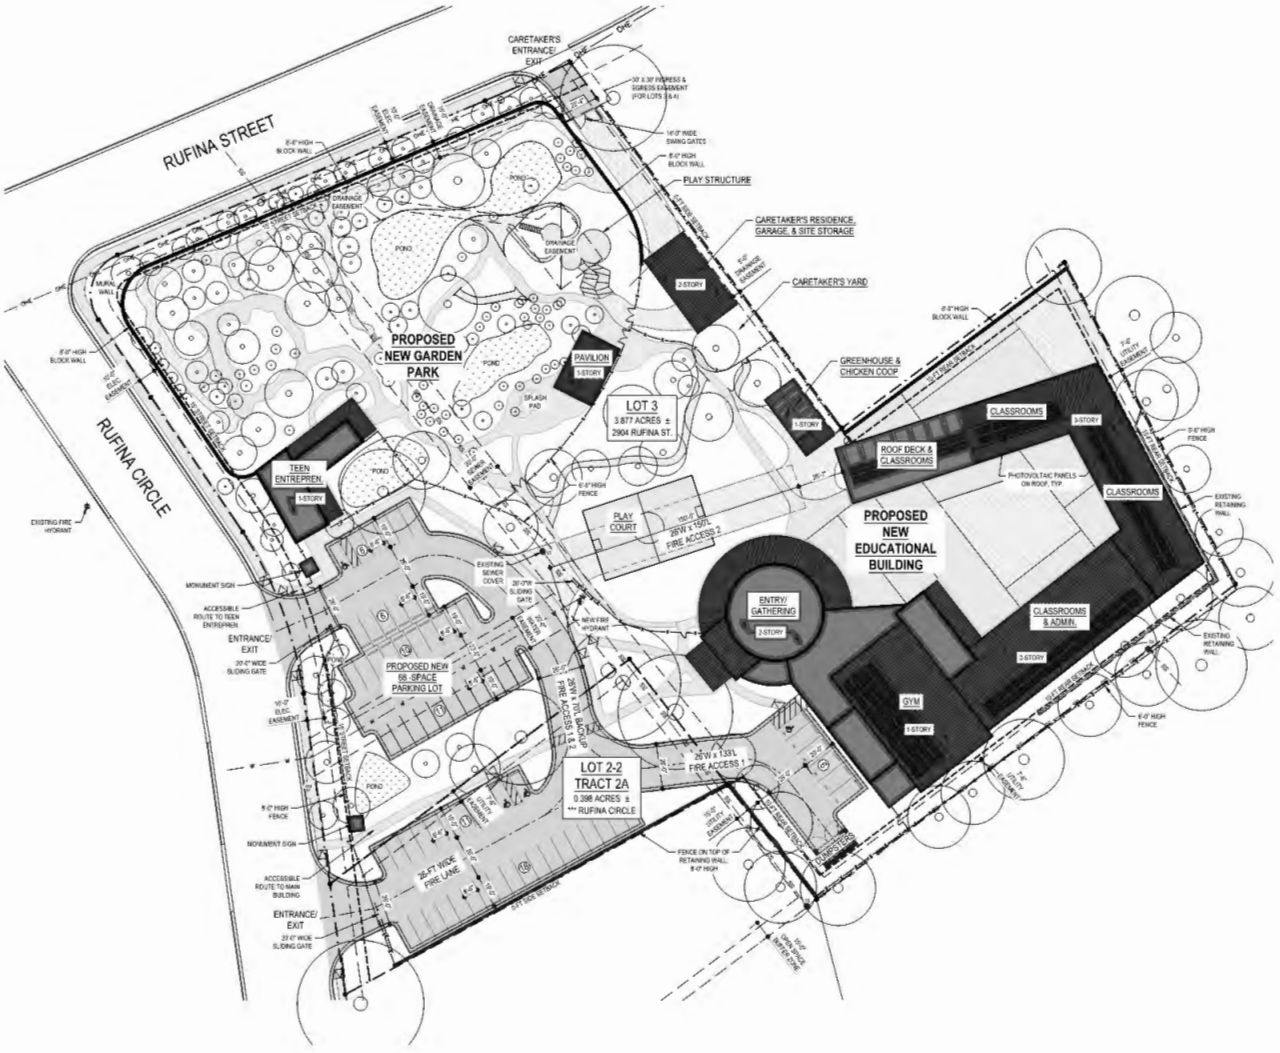

Figure 5: Proposed Site Master Plan. *See full site plans in Attachment C-6.*

Project Zoning

The Property is split between two (2) parcels. Lot 2A, 2-2 is currently zoned General Commercial (C-2) while Lot 3 is currently zoned Light Industrial (I-1) and General Industrial (I-2). This Project includes a rezoning request to change Lot 3 to C-2 to create uniformity between both parcels. This change will allow for the proposed youth center use. The Applicant has a Condition of Approval to either consolidate the two lots or ensure appropriate easements are in place in perpetuity at the time of Development Plan for this project.

For more information on the Rezoning request and General Plan Amendment, reference Section III of this Staff Report, *supra*.

In accordance with the rezoning request, the Project will meet all dimensional standards for C-2 zoning shown in Table 3.

Requirement	C-2	Proposed
Height	45 feet maximum	45 feet
Lot Coverage	60% maximum	24%
Open Space	25% non-residential and mixed use 0.25 x 186,291 sq ft = 46,555 sq ft	118,563 sq ft (63.7%)
Setbacks	Street: 15 feet Rear: 10 feet Side: 0 feet	Street: 15 feet + Rear: 10 feet + Side: 0 feet +

Table 3: *C-2 Dimensional Standards*

Surrounding Zoning and Land Use

The GISF site is outlined in yellow in Figure 6. Surrounding zoning includes primarily General Industrial (I-2) (Gray), with some areas of Light Industrial (I-1) (Purple) and General Commercial (C-2) (Red). The uses adjacent to the east of the Property include a variety of appliance, repair, and welding shops. South of the property are hotels along Cerrillos Rd and an auto repair shop along Rufina Circle. West of the property are mixed office buildings, and north is a bottling warehouse.

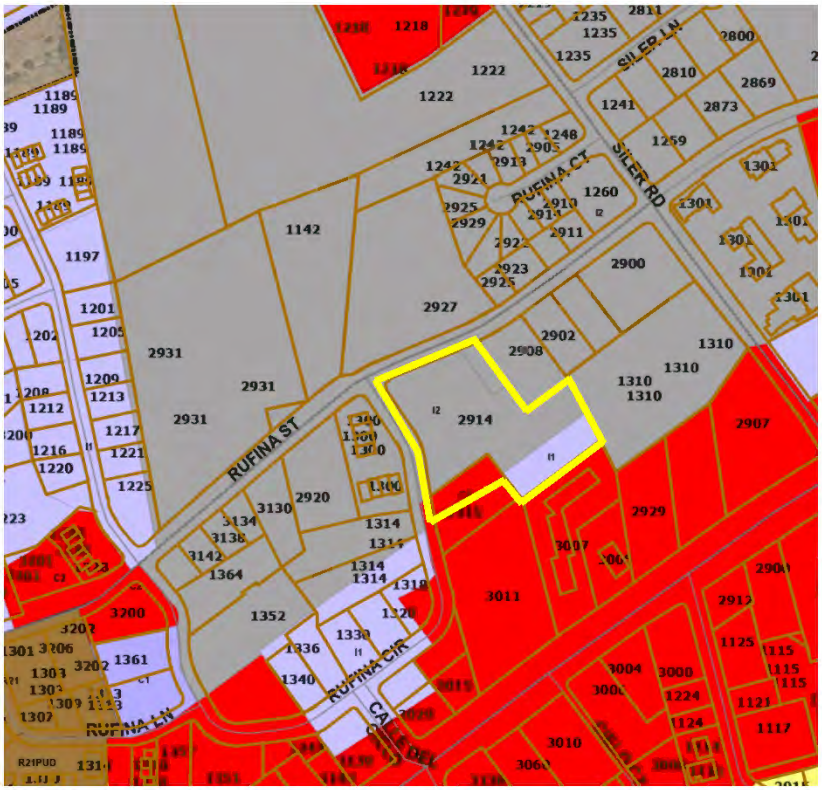

Figure 6: *Surrounding zoning. 2904 Rufina outlined in yellow.*

Existing Conditions and Terrain Management

The Property was previously used as a plant nursery but is currently vacant except for a few remaining greenhouses in the southeast of the Property (see Figure 7). The site slopes from southeast to northwest, with an overall grade change of approximately thirty-two (32) feet. There are no floodplains on the site and the Project includes passive storm water harvesting systems.

Figure 7: *Oblique view of existing conditions. Yellow border approximates property boundaries.*

In the past this area of town served as the industrial center for the community. Over time, many of the heavy industrial uses have moved from this area as it has urbanized in response to demand for more flex office, warehousing, and other commercial uses due to the site's proximity to Cerrillos Road and adjacency to properties in the General Commercial (C-2) zone district.

The applicant included a preliminary landscaping plan (Attachment C-6) that identifies the preservation of as many existing trees as feasible. The Applicant plans to incorporate landscaping into stormwater harvesting systems and included the planting of new trees on site and along adjacent streets.

Conditions of Approval and Technical Corrections for terrain management and landscaping can be found in Attachment A.

Traffic, Access, and Parking

The Project proposes the main entrances to the site be via two (2) driveways along Rufina Circle. A third access will exist along Rufina St to serve the caretakers residence.

A Traffic Impact Analysis (TIA) was completed by Bohannan Huston, Inc for this Project. In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and two (2) new access driveways onto the property will operate acceptably. To mitigate the overall traffic impacts of this development, the TIA made the following recommendations:

- *Installation of a southbound left turn lane into the property off Rufina Circle,*
- *Installation of an eastbound right turn lane at the intersection of Rufina St and Siler Rd,*
- *Installation of a westbound left turn lane at Rufina Circle and Calle de Cielo,*

- *Median modifications to the Cerrillos Rd and Calle de Cielo intersection,*
- *Restriping at the intersections of Rufina St and Rufina Cir E and Rufina St and Rufina Cir W,*
- *All designs for street improvements shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.*

The applicant has conditions of approval from the Traffic Division to address at the time of Development Plan for this site (Attachment A). To view the TIA, see Attachment C-5.

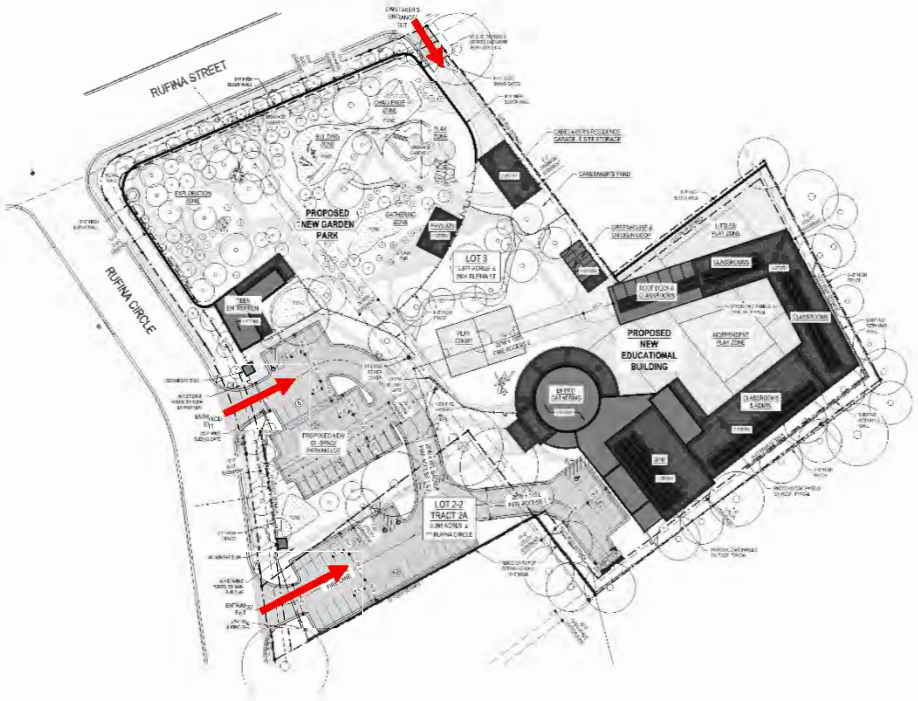

Figure 8: *Red arrows showing site access. For more details view the TIA and Master Plan in Attachments C-5 and C-6.*

The Master Plan proposes dedicated pickup and drop-off areas for students along the eastern edge of the parking area. To limit access and enhance safety of students, a mix of 8-foot-tall block walls, fences, and retaining walls with fences on top are proposed along the exterior of the property. Within the property, areas of 6-foot-tall fences are proposed to separate various spaces.

SFCC Table 14-8.6-1 does not define parking requirements for a youth center use. The applicant approximated a parking demand of 68 spaces, broken down in Table 4. To confirm the parking requirements for this development, a parking analysis will be required at time of Development Plan.

Parking Demand	Estimated Required Spaces
Peak Daily Staff Demand	42 spaces
Facility Vehicles	5 spaces
Guests/Overflow	21 spaces
Total Estimated Required Spaces	68 spaces
Total Parking Provided (Inc. 4 ADA)	**68 spaces**

Table 4: *Estimated Parking Needs*

Utilities

Water: There are existing 6-inch water mains along Rufina St and Rufina Circle. This property is serviced via a 2-inch water service line off Rufina Cir. The existing 5/8-inch water meter on the property is to be replaced by a double 1-inch meter. Additionally, a 6-inch public fire line will be connected off Rufina Cir into a new fire hydrant on the Property. The applicant has submitted a preliminary water budget and water plan with the City, subject to the Conditions of Approval from the City's Water Division in Attachment A.

Existing Girls Inc. Hillside Facilty - Average Annual Water Consumption	**101,570**	**GPY**
Exisitng Facility: Hillside Drive (GFA)	**4,886**	**SF**
Exisitng Facility Annual Usage:	**20.8**	**Gal/SF**
Proposed Facility: Rufina Street (GFA) =	**55,478**	**Square Feet**
Projected Annual Water Usage (20.8 Gal/SF) =	**1,153,275**	**GPY**
	3.54	**AFY**
Landscape Irrigation =	**TBD**	**GPY**
	TBD	**AFY**
Water Budget Subtotal =	**3.54**	**AFY**
Existing Rufina Water Usage Credit =	**5.27**	**AFY**
Per SFCC §14-8.13(B)(3)		
DEVELOPMENT WATER BUDGET =	**(1.73)**	**AFY**
9.8% Contingency per SFCC §14-8.13(E)(1)=	**(0.17)**	**AFY**
TOTAL WATER DEMAND OFFSET =	**(1.90)**	**AFY**

Figure 9: *Preliminary Water Budget*

Sewer: The Property is served by an existing 8-inch public sewer line that cuts north-south through the property via a 10-foot utility easement. The Applicant proposes installing a service connection to the main building and a 4-inch service line for the other structures. The City's Wastewater Division has Conditions of Approval the applicant must satisfy Prior to Recordation of a future Development Plan for this Property (Attachment A).

Fire Prevention and Emergency Access

Fire and emergency access requirements will be satisfied by the project's compliance with the International Fire Code 2021. All structures within the proposed development plan include fire alarm systems and sprinklers. The site access road is capable of supporting the load of a 75,000 lb fire apparatus and provides two remote exits. Two (2) fire hydrants (1 existing, 1 new) will serve the site.

Archaeology
The Project is within the Suburban Archaeological Review District, and will require archaeological clearance if the installation of subsurface utility lines will exceed 550-linear feet including water, gas, electric, power, sewer, etc (this may change to 200 linear feet with the adoption of the Land Development Code update).

Architecture, Lighting, and Signage
The Project does not include descriptions of the proposed architecture or elevations. Should the Master Plan be approved, the Applicant will be required to submit architectural drawings and descriptions detailing compliance with SFCC 14-8.7 at the time of Development Plan.

An outdoor lighting plan was not included with the Master Plan either, but the Applicant has a Condition of Approval to do so in compliance with SFCC 14-8.9(C), "*Outdoor Lighting*," Prior to Recordation of a Development Plan for this site (Attachment A).

Signage was not included in the Master Plan but is reviewed during the Building Permitting process – after the Master Plan and future Development Plan.

Review and Recommendation
Staff reviews Master Plan applications for compliance with associated approval criteria (see SFCC 14-3.9(D)) and completeness of submission requirements (see SFCC 14-3.9(C)). Based on this, Staff makes a recommendation to Planning Commission who then makes a recommendation to Governing Body. Governing Body takes final action to approve or deny Master Plan cases subject to Conditions of Approval and Technical Corrections.

V. GENERAL PLAN AMENDMENT APPROVAL CRITERIA SECTION SFCC 14-3.2(E)(1)

SFCC Section 14-3.2 governs the authority, procedures, and restrictions for amendments to the general plan. Prior to recommending approval of an amendment to the general plan, the Planning Commission must make certain findings based off the approval criteria. The Criteria for approval of General Plan Amendment are detailed below:

14-3.2(E)(1)(a): **Consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Economic development goals are upheld by the provision of quality childcare programs that support working parents. The 2004 report, Cultivating Santa Fe's Future Economy, by Angelou Economics, recognizes the important role of quality of life in economic development. In Strategy Four: Economic Development, the report states, "The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation, arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens." The GISF program is a quality-of-life amenity serving the Santa Fe community and young families, enhancing the attractiveness of Santa Fe for existing residents and newcomers, alike. In addition, GISF will employ approximately 45 staff persons. The new facility will serve the growing southwest part of town, home to a majority of Santa Fe's families. Lastly, the site has existing access via two public rights-of-way and is currently served by public utility infrastructure.*	
Staff Response: Staff concurs that the proposed amendment is consistent with Santa Fe's growth management and economic development goals as outlined in the General Plan, Angelou Report, and the 2008 Economic Development Strategy. The amendment supports the City's efforts to direct growth toward areas with existing infrastructure and services and encourages balanced economic development. Overall, the proposal aligns with the General Plan's vision for sustainable coordinated urban growth and is consistent with Criterion 1.	

14-3.2(E)(1)(b): **Consistency with other parts of the general plan;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment conforms to the following General Plan Themes and Policies:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer*	

programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response: Staff finds that reclassifying Lot 3 as 'Community Commercial' is consistent with the General Plan Themes and Policies listed by the Applicant. The reclassification will allow for a youth center that promotes quality of life for Santa Fe residents and economic diversity for the Siler-Rufina area. Additionally, this project will provide infill development consistent with General Plan Themes and Policies.

14-3.2(E)(1)(c): **The amendment does not:** **(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or** **(ii) affect an area of less than two acres, except when adjusting boundaries between districts; or** **(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *(i) The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.* *(ii) The subject parcel comprises 3.87 acres. Nevertheless, the property is adjacent to the Community Commercial designation along its south boundary.* *(iii) Contrary to harming surrounding landowners or the general public, this General Plan Amendment, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: (i) The Siler-Rufina neighborhood is home to a mix of industrial, commercial, and non-profit organizations. Reclassifying Lot 3 will allow for continued infill development consistent with the character of this area. This reclassification will also create consistency with lots south of this property that are currently classified 'Community Commercial.' (ii) Staff finds that the subject parcel is 3.87-acres, exceeding the required 2-acres. (iii) The General Plan Amendment to reclassify the lot to "Community Commercial" will create the ability to rezone the lot to "General Commercial," which allows for a variety of uses that have potential to serve the community at large, including the proposed youth center in the Master Plan. Reclassifying this lot can also encourage the redevelopment of the infill site, stated as a priority in the General Plan under policy 3-G-3.	

14-3.2(E)(1)(d): **An amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *This General Plan Amendment promotes the general welfare, because it will enable the construction of a new GISF youth center, offering after school and summer programs for school-age girls and much-needed support for working parents.*	
Staff Response: The proposed amendment conforms to the requirements of 14-3.2(E)(1)(c), while also promoting general welfare by allowing for the proposed Master Plan use of a youth center, offering quality care to school aged children and accelerating infill development of this site.	

14-3.2(E)(1)(e): **Compliance with extraterritorial zoning ordinances and extraterritorial plans;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *N/A*	
Staff Response: N/A	

14-3.2(E)(1)(f): **Contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Redevelopment of this infill site provides for efficient and economic development, leveraging existing infrastructure, and supporting the harmonious development of Santa Fe. This request not only supports the general welfare of the community by providing Santa Fe families with a safe and reliable place to send their children but is the sole motivation for this effort.*	
Staff Response: Staff agrees with the applicant and finds that reclassifying Lot 3 to 'Community Commercial' supports harmonious infill development that is efficient and consistent with properties in the vicinity which have been rezoned from industrial to commercial and subsequently redeveloped (Ord. #2016-44, #2022-4).	

14-3.2(E)(1)(g): **Consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The City of Santa Fe Land Use and Urban Design Plan recognizes the Siler Neighborhood as a Mixed-Use Corridor, stating, "Development and redevelopment along these corridors should be encouraged to*	

provide greater density of commercial uses…". Furthermore, the Plan encourages the re–use of blighted or failing buildings and businesses. The redevelopment of a former, dilapidated nursery on an infill site in the Siler Neighborhood thoroughly aligns with these objectives. Furthermore, the City of Santa Fe Economic Development Department branded the subject neighborhood as the Siler-Rufina Nexus in a recent report issued to spur investment in the City's Opportunity Zones. In keeping with this effort, the proposed GISF facility is a significant investment in the neighborhood, increasing job opportunities and redeveloping a deteriorated site.
Staff Response: Staff agrees with the Applicant's response while additionally acknowledging the previous references to the City's General Plan policies. The proposed change does not conflict with existing city ordinances or regulations and the applicant's Master Plan and future development plan of the site will conform with the City of Santa Fe's Land Use Code and Policies.

VI. REZONING APPROVAL CRITERIA SECTION SFCC 14-3.5(C)

SFCC Section 14-3.5 governs the authority, procedures, and restrictions for Rezonings. Prior to recommending approval of a Rezoning, the Planning Commission must make certain findings based off the approval criteria. The Criteria for approval of Rezoning's are detailed below:

14-3.5(C)(1)(a): **The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:** **(a) one or more of the following conditions exist:** **(i) there was a mistake in the original zoning;** **(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or** **(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *(i) N/A* *(ii) This area has evolved over the years into a diverse, mixed-use neighborhood of recreational uses, non-profit institutions, a mix of housing types, and various commercial enterprises. The rezone will support the construction of the proposed GISF facility, which aligns well with this current pattern of development.* *(iii) Rezoning the property to C-2 is more advantageous to the community. A vacant site falling into disrepair creates no community benefit. Redevelopment of this infill site vitalizes the neighborhood and supports the provision of critical community services. Furthermore, the rezone request aligns with the Themes and Policies of the General Plan, as summarized below:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.* *1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.* *1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.*	

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

(i) Staff did not find a mistake in the original zoning.

(ii) In recent years, the Siler-Rufina area has seen increasing multifamily residential developments and rezonings from industrial to commercial that have changed the character of the area (Ord. #2016-44, #2022-4). Commercial establishments and non-profit institutions have also come to occupy many industrial spaces surrounding the property. Staff recognizes a change in the character of the area.

(iii) Staff finds the rezoning of this parcel to "General Commercial" to be more advantageous than the currently vacant industrial site. This change encourages redevelopment of the infill site, and the

associated Master Plan proposes a quality-of-life amenity to the community, supported by the General Plan.

14-3.5(C)(1)(b): **All the rezoning requirements of Chapter 14 have been met.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *All the rezoning requirements of Chapter 14 have been met. A Pre-Application Conference was conducted with the Development Review Team on December 12, 2024, and the Early Neighborhood Notification Meeting was held on July 23, 2025*.	
Staff Response: Staff finds that the rezoning requirements of Chapter 14 have been met, including SFCC 14-3.1 "*Applicable General Provisions*," and SFCC 14-3.5 "*Rezonings*." This rezoning application has also been reviewed by the Development review Team (DRT) for compliance with Chapter 14.	

14-3.5(C)(1)(c): **The rezoning is consistent with the applicable policies of the general plan, including the future land use map.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *A Request to amend the General Plan Future Land Use Map to Community Commercial accompanies this rezone application, which aligns with the requested C-2 zoning. Furthermore, the project conforms to the General Plan as outlined below:* ***Themes*** *1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.* *1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.* *1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.* *1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.* *1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the*	

community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

The rezoning alone does not align with the Future Land Use designation of this parcel which currently includes "Industrial" and "Business Park." However, the applicant is requesting a General Plan Amendment to designate the Future Land Use of this parcel "Community Commercial," which would align with the rezoning and proposed Master Plan use of a youth center. The project aligns with other themes and policies of the General Plan including but not limited to quality of life, sustainable growth, urban form, and community-oriented development.

14-3.5(C)(1)(d): **The amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city.**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:

General Plan Figure 4-4, Urban Sub-Areas, designates the 3.87-acre subject property and surrounding area as an "Infill Area." The Growth Management Chapter of the General Plan specifically calls for prioritization of infill development in Santa Fe in order to maximize the efficient use of public infrastructure, while meeting the demand for urban land for development and directing new growth towards the historic core of the city rather than on the undeveloped fringes. The proposed infill project is in alignment with

these strategic directives and is responsive to community needs for public services and community engagement in this area of the City. General Plan Section 4.1 states, "In both 'infill' and 'future growth' areas, the city must encourage higher densities of residential and commercial development than existing zoning often allows" to help "create efficient use of already existing roads and utilities, help ensure cost-efficient public transit, and provide the type of housing that will be in demand…".
Staff Response: SFCC Section 14-3.5(C)(2)(b) prohibits a rezoning if the rezoning will "affect an area of less than two acres." This Parcel is 3.87-acres and therefore exceeds the required 2-acres. The Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposes to meet the needs of the community while being served by sufficient infrastructure.

14-3.5(C)(1)(e): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject property is served by existing roadways and public water and sewer infrastructure. Since the program includes the development of over 2.7 acres of outdoor recreational space, the GISF facility will not affect the capacity of area parks.*	
Staff Response: Staff from the relevant City departments, including water, wastewater, and traffic engineering have reviewed the zoning criteria as it relates to the Master Plan and determined that the property is sufficiently served by infrastructure so long as the Applicant meets the Conditions of Approval and Technical Corrections identified in Attachment A of this report.	

14-3.5(C)(2)(a): **Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:** **Allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.*	
Staff Response: The Applicant stated in response to (1)(a)(iii) the General Plan Themes and Policies that this project aligns with. Staff finds that this use fits the surrounding Siler neighborhood which is currently a mix of industrial, commercial, and multi-family dwellings.	

14-3.5(C)(2)(b): **Affect an area of less than two acres, unless adjusting boundaries between districts; or**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The subject parcel is 3.87 acres.*	
Staff Response: The subject parcel is 3.87-acres, therefore exceeding the required 2-acres for a rezoning.	

14-3.5(C)(2)(c): **Benefit one or a few landowners at the expense of the surrounding landowners or general public.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *Contrary to harming surrounding landowners or the general public, this rezone, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.*	
Staff Response: The C-2 Zoning for Lot 3 is consistent with the existing land use patterns in adjacent areas south of the parcel. This alignment indicates that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Furthermore, the Master Plan of a youth center for this site is anticipated to bring broader economic benefits, such as increased employment and expanded services, which would serve the general public interest.	

SFCC 14-3.5(D): Additional Applicant Requirements

14-3.5(D)(1): **If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The property is currently served by existing public roadway and utility infrastructure. The Applicant is prepared to construct any necessary infrastructure upgrades at the time of property development, and these improvements will be documented in the approved development plans.*	
Staff Response: The Traffic Impact Analysis (TIA) submitted by the Applicant identified the need for various streets improvements to the area surrounding the proposed development due to the increased traffic volume a youth center will cause. The Applicant understands these infrastructure improvements and acknowledges that the City may require the developer to construct necessary infrastructure improvements.	

14-3.5(D)(2): **If the proposed rezoning creates a need for additional streets , sidewalks or curbs necessitated by and attributable to the new development , the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Traffic Impact Analysis identifies the need for a southbound left-turn lane on Rufina Circle serving the north access drive. No other off-site improvements are warranted. The developer is aware that required upgrades by the City of Santa Fe will be at the expense of the developer.*	
Staff Response: Additional streets, sidewalks, and curb improvements shall be determined when the Applicant submits a Development Plan for this site. The Applicant acknowledges this criterion.	

VII. MASTER PLAN APPROVAL CRITERIA SECTION SFCC 14-3.9(D)(1)

SFCC Section 14-3.9 governs the authority, procedures, and restrictions for Master Plans. Prior to recommending approval of a Master Plan, the Planning Commission must make certain findings based off the approval criteria. Per SFCC 14-3.9(D)(2), approval of the Master Plan may specify conditions of approval that are necessary to ensure compliance with the provisions of Chapter 14 and implement the policies of the general plan, including:

(a) requirements for construction and funding of private or public infrastructure, including utilities, municipal buildings, roads, parks and trails;
(b) provisions for the use and protection of areas of special hazards or environmental sensitivity;
(c) modifications to the proposed plan, including changes to the boundaries of land use tracts, patterns of land uses, infrastructure plans, phasing plans and special development standards and guidelines.

The Criteria for approval of Master Plans are detailed below:

14-3.9(D)(1)(a): **The master plan is consistent with the general plan**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:
The proposed Master Plan aligns with various Themes and Polices in the General Plan, as summarized below.

Themes
1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the

community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood. Current zoning comprises Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial).

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

Staff Response:

The Master Plan is consistent with the General Plan themes and policies listed by the applicant, including quality of life, economic diversity, sustainable growth, urban Form, community oriented development, and mixed use. The proposed use is currently not supported on the Future Land Use Map, but would be if the General Plan Amendment to change Lot 3 to "Community Commercial" is approved.

14-3.9(D)(1)(b): **The master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;**	**Criterion Met:** (Yes/No) **YES**

Applicant Response:

The C-2 zoning district is a robust mixed-use zoning category that supports both commercial uses and residential development at higher densities. The proposed GISF youth center is a permissible use in the C-2 district and an appropriate commercial development in the Siler-Rufina neighborhood. Furthermore, the Master Plan demonstrates compliance with C-2 development standards with respect to height, lot coverage, open space, terrain management, and landscaping.

Staff Response:

The Master Plan is consistent with the purpose and intent of the proposed C-2 zoning district and has been conditioned to meet specific design criteria that shall apply when a Development Plan application is

submitted. The Master Plan conforms with dimensional standards for C-2 zoning including height, lot coverage, setbacks, and lot size.

14-3.9(D)(1)(c): **Development of the master plan area will contribute to the coordinated and efficient development of the community; and**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The Master Plan includes provisions for pedestrian and vehicular connectivity to the surrounding area, as called for in the General Plan. In addition, the subject property makes efficient use of existing infrastructure as an infill site – a value repeatedly emphasized in the General Plan.*	
Staff Response: The Master Plan proposes efficient use of an infill parcel within the diverse Siler-Rufina area, utilizing existing infrastructure and improving connectivity. This use is an asset to the general welfare of the community as it will allow a quality-of-life amenity to be in a more accessible location for the growing Santa Fe community.	

14-3.9(D)(1)(d): **The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.**	**Criterion Met:** (Yes/No) **YES**
Applicant Response: *The existing roadway and utility infrastructure are adequate to serve the project. The Traffic Impact Analysis (TIA) demonstrates that the roadway network has the capacity for the proposed development, with the inclusion of a new left-turn lane serving the north access drive on Rufina Circle.*	
Staff Response: The proposed infrastructure has been reviewed based on the regulations established in Chapter 14 by Land Use Staff and the Development Review Team (DRT) encompassing fire, water, wastewater, public works, terrain management, traffic, and landscaping. Existing and proposed infrastructure can accommodate the development of this site as proposed, with street modifications as described in the Applicant's Traffic Impact Analysis. Individual DRT comments can be found in Attachment A of this report.	

VIII. EARLY NEIGHBORHOOD NOTIFICATION

The Applicant conducted an Early Neighborhood Notification (ENN) meeting on July 23, 2025. Members of the Applicant's team, City Staff, and a local news reporter were in attendance. The Applicant team presented an overview of the Project and did not receive any questions or comments. Meeting notes from the Early Neighborhood Notification meeting can be found in Attachment C-4.

IX. EXPIRATION

SFCC Section 14-3.19 sets expiration, extension, and amendment criteria for certain development approvals. Both General Plan Amendments and Rezonings are not included in this section and are therefore not associated with any expirations. Master Plans, however, are subject to SFCC 14-3.19(B)(1) which states:

"*Approval of a master plan shall expire five years after all applicable appeal periods, and any appeals of the final action approving it unless:*

(a) approval is granted for a development plan or subdivision plat within the master plan boundaries; or

(b) *actual development of the site or off-site improvements is begun and is continued pursuant to Subsection 14-3.19(B)(6).*"

Conditions of Approval & Technical Corrections

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
1	Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects: All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres All city projects over two (2) acres in size. All city park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Archaeology	Prior to building permit approval
2	Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Current Planning	Prior to public hearing (COMPLETED)
3	~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review.	Current Planning	~~Prior to public hearing~~ Prior to development plan approval
4	Add Case #2025-11030 to Master Plan sheets	Current Planning	Prior to public hearing (COMPLETED)
5	Shall comply with the most currently adopted International Fire Code	Fire	Prior to public hearing (COMPLETED)
6	Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021	Fire	Prior to public hearing (COMPLETED)

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
7	Shall verify compliance with section D105 Aerial Fire Apparatus Access Road as per IFC 2021	Fire	Prior to public hearing (COMPLETED)
8	Historic drainage calcs should include offsite flows onto property (if applicable)	Rivers and Watershed	Prior to Development Plan approval (In drainage report)
9	Provide a full drainage report	Engineering	Prior to Development Plan approval
10	Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.	Engineering	Prior to Development Plan approval
11	Include pond sections and show how ponds will overflow.	Engineering	Prior to Development Plan approval
12	Include lighting plan with photometrics	Engineering	Prior to Development Plan approval
13	A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.	Engineering	Prior to Development Plan approval
14	The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Wastewater	Prior to recordation
15	All 4-inch sewer lines shall connect directly to the public sewer lines	Wastewater	Prior to recordation
16	The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Wastewater	Prior to recordation
17	An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Water	Prior to building permit approval
18	An approved Water Plan will be required for all new public water infrastructure and fire services.	Water	Prior to development plan approval
19	A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	Water	At time of development

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
20	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	Water	At time of development
21	Each lot shall be served by a separate City water service.	Water	At time of development
22	See attached comments response letter dated 9/25/25 from Wilson & Company regarding Bohannon Huston, initial draft Traffic Impact Study dated 8/725	Traffic	Prior to public hearing (COMPLETED)
23	See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25	Traffic	Prior to Development Plan Approval
24	Elevations submitted for the development plan shall include a detailed Points analysis that is intergraded with the Elevations for review.	Current Planning	At time of Development Plan

Technical Corrections			
#	**Technical Correction**	**Dept. or Division**	**To be completed:**
1	Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
2	Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
3	Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
4	Include attached notes on development plan.	Engineering	Prior to recordation of Development Plan
5	The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe	Wastewater	-
6	Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property	Water	Prior to water plan approval

Cases #2025-11028, 2025-11029, and 2025-110330. 2904 Rufina St General Plan Amendment, Rezoning, and Master Plan. JenkinsGavin, Inc, Agent, for Girls Inc of Santa Fe, Applicant, requests a General Plan Amendment, Rezoning, and Master Plan for the property at 2904 Rufina St. This property is comprised of 2 parcels totaling approximately 4.85 acres, currently zoned I-1 (Light Industrial), I-2 (General Industrial), and C-2 (General Commercial).

This application was received on August 11, 2025 and has been reviewed by Planning Division staff (Staff) and the City's Development Review Team (DRT). Attached are the initial DRT review comments including conditions of approval and technical corrections. I would like to highlight and summarize the following key items:

A. Initial Planning Division Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by Planning Division staff and the following necessary revisions have been identified:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Submit a parking analysis at time of Development Plan
5. All utilities shall be underground

Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review or place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review

B. Initial DRT Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by the DRT and the following necessary revisions have been identified:

1. Shall comply with the most currently adopted International Fire Code
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
4. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services
5. An approved Water Plan will be required for all new public water infrastructure and fire services.
6. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service
7. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.
8. Each lot shall be served by a separate City water service.
9. Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.
10. Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.
11. Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.
12. Archaeological review will be required if the applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc.
    a. 14-3.13(B)(3) Suburban Archaeological Review District
        i. In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects:
        ii. All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres
        iii. All city projects over two (2) acres in size.
        iv. All city park projects over one (1) acre in size.
    b. Utility Mains:
        i. An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.
13. Provide full drainage report.

14. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.
15. Include pond sections and show how ponds will overflow
16. Include lighting plan with photometrics
17. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.
18. Include attached notes.
19. Historic drainage calcs should include offsite flows onto property (if applicable)
20. The 6-inch sewer service line(s) will be required to connect to a sewer manhole
21. All 4-inch sewer lines shall connect directly to the public sewer lines
22. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field
23. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe

The following DRT members did not have comments at this time:

- Parks and Open Space
- Water resources
- Metropolitan Planning organization
- Traffic

The following DRT comments are pending at this time:

- ADA
- Santa Fe Public Schools

C. Prior to Planning Commission, the following DRT comments must be satisfied:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Shall comply with the most currently adopted International Fire Code
5. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
6. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
7. An approved Water Plan will be required for all new public water infrastructure and fire services.
8. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.

The full DRT memos are attached for your review. Once revised submittals to the application are accepted, a public hearing date may be scheduled. Please let me know if you have any questions or concerns.

Thank you,

Alexa Hempel
Senior Planner, Planning and Land Use Department

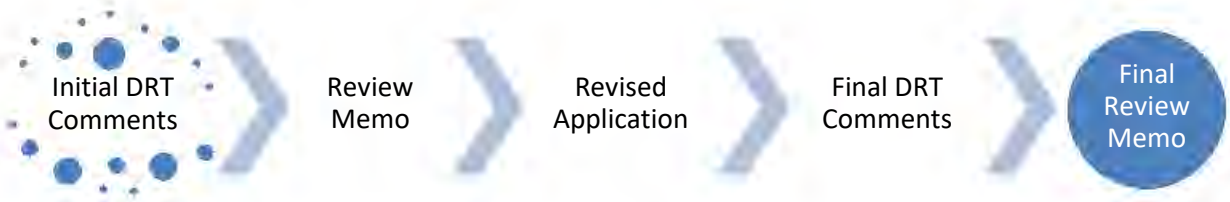
Development Review Team (DRT)
Comment Form for
Planning Commission

Date: August 19, 2025

DRT Member: Fire Marshal Geronimo Griego



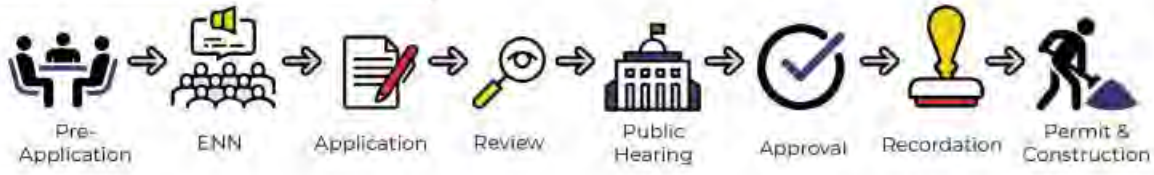
Dept/Div: Fire Marshal's Office

Case No.: 2025-11028,11029, & 11030

Case Planner: Alexa Hempel, Senior Planner

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Form Updated: September 2023

*See the *2024 Development Review Schedule* for details

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

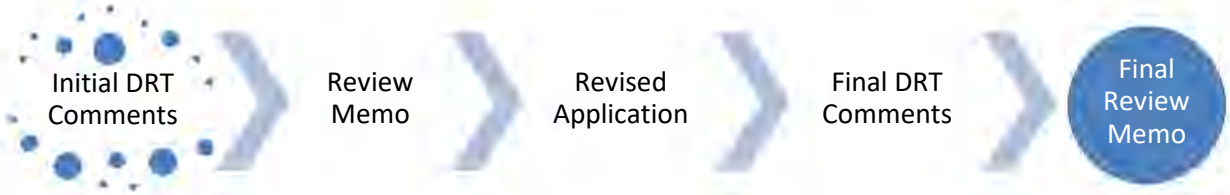
Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall comply with the most currently adopted International Fire Code.	*Prior to Public Hearing*	
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021.		
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.



Explanation of Conditions or Corrections (if needed):

1. Verify that the right city adopted code is reference in documents for submission. International Fire Code (IFC) 2021.
2. Shall verify that building is provided with automatic fire sprinklers for proposed layout.
3. Shall verify two points of access to ladder building for proposed site layout conditions.

Form Updated: March 2024

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

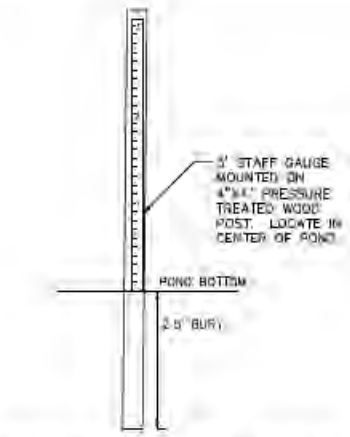
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

Signature NMPE #_____ Date

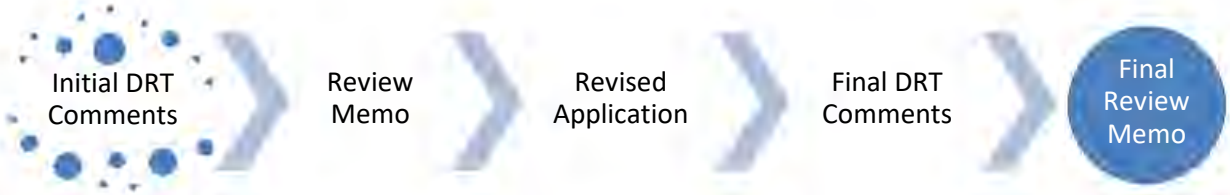
The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Existing vs Proposed Drainage Areas: looks like some ponding and drainages will be filled due to proposed building sites and new amenities; how is the developer planning to accommodate the excess water created by both the increase in imperviousness and the filling of these ponds? How do they plan to get the water to the new ponds, will it be piped? Will buildings have gutters and cisterns? Will landscaped areas be swaled to hold water? Etc…



Historical drainage: are they making sure to account for the entire basin in their drainage calcs, including offsite flows entering the property, esp. off the parking lot behind the school to the south if there is any?

Dept/Div: Utilities/Wastewater Division

Case No.: 2025/11030

Case Planner: Alexa N. Hempel

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Prior to Recordation	
2. All 4-inch sewer lines shall connect directly to the public sewer lines	Prior to Recordation	
3. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Prior to Recordation	
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Case Planner: Land Use Department - Alexa Hempel, Senior Planner

Conditions of Approval and Technical Corrections Tables
Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response:**

Technical Corrections:	**Must be completed by:**	**Applicant Response:**
See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25.	Prior to Development Plan Approval	

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. Any and all future proposed improvements of this site that affect public infrastructure will be subject to **City Code Chapter 23** and additional reviews and possible corrections to meet Public Works Standards for roadways, ADA, signing, striping, lighting, etc. may be required at that time.

   City Code Chapter 23-3.18 City construction and assessment.
   Nothing in subsections 23-3.12 and 23-3.15 SFCC 1987 prevents the city from ordering construction of curbs, gutters and sidewalks and assessing the cost thereof against the property benefited in any manner provided by the laws of the state. (Code 1953, § 24-28; Code 1973, § 30-29; SFCC 1981, § 4-13-18; Ord. #38-1987, § 8).

Memorandum

To: Leroy Pacheco, PE COSF

From: Philip A. Gallegos, PE, Senior Transportation Engineer

CC: Robert Luna, PE, PTOE, Traffic Engineering Practice Lead, SW Region

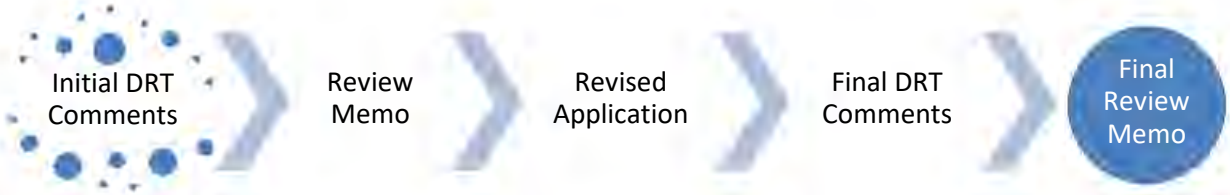
Date: 10/17/2025

Re: Girl's Inc. TIA Review

Wilson and Company has reviewed the Revised DRAFT TIA dated October 6, 2025 for the Girl's Inc. Development prepared by Bohannan Huston and have the following comments. Please let me know if you have any questions or require further information.

REPORT COMMENTS

- All original Comments have been addressed
- On page 48 the report states that the common crash type was rear-end collisions for Richards and Rufina however on table 24 the highest crash type is Another Vehicle at an Angle. This should be corrected in the narrative.
- There is a large percentage of crashes that were not classified by Crash Type. The Crash Summary Tables shall also include the percentage of crash types with the "not available or not classified" crash types removed from the total number of crashes. Therefore, showing percentages of total known crash types.
- All developer mitigations shall be shown on the developments site plan.
- For the intersection of Calle del Cielo and Cerrillos Road the report recommends evaluation of a cost share with the COSF due to the spillover occurring in existing condition. Since this LOS is made worse by the added traffic by the developer this mitigation shall be implemented by the developer.



Sincerely,

Philip A Gallegos, PE
Senior Transportation Engineer

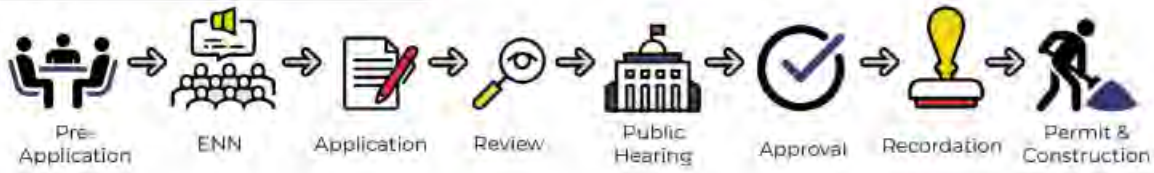
Comment Form

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Planning Commission. Complete	
~~2. Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review	Planning Commission Development Plan. Applicant submitted affidavit acknowledging condition.	
3. Add Case #2025-11030 to Master Plan sheets	Planning Commission. Complete	
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1. Submit a parking analysis at time of Development Plan	Development Plan	
2. All utilities shall be underground	Development Plan	
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case # 2025-11028/11029/11030

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Prior to Building Permit Approval	
2. An approved Water Plan will be required for all new public water infrastructure and fire services.	Prior to approval of Development Plan	
3. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	At the time of development	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Each lot shall be served by a separate City water service.	At the time of development	

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.	Prior to Water Plan Approval	

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

City of Santa Fe, New Mexico

Attachment B
Maps and Photos

1. Aerial View
2. Existing Conditions Photos
3. Current Zoning Map
4. Future Land Use Map

Aerial View

The property is at the intersection of Rufina St and Rufina Cir E, nearby the Cerrillos Rd and Siler Rd intersection. It is the site of a former greenhouse and nursery, totaling approximately 4.27-acres.

Existing Conditions

Photo standing on the property looking east at the existing greenhouses where the main facility is proposed.

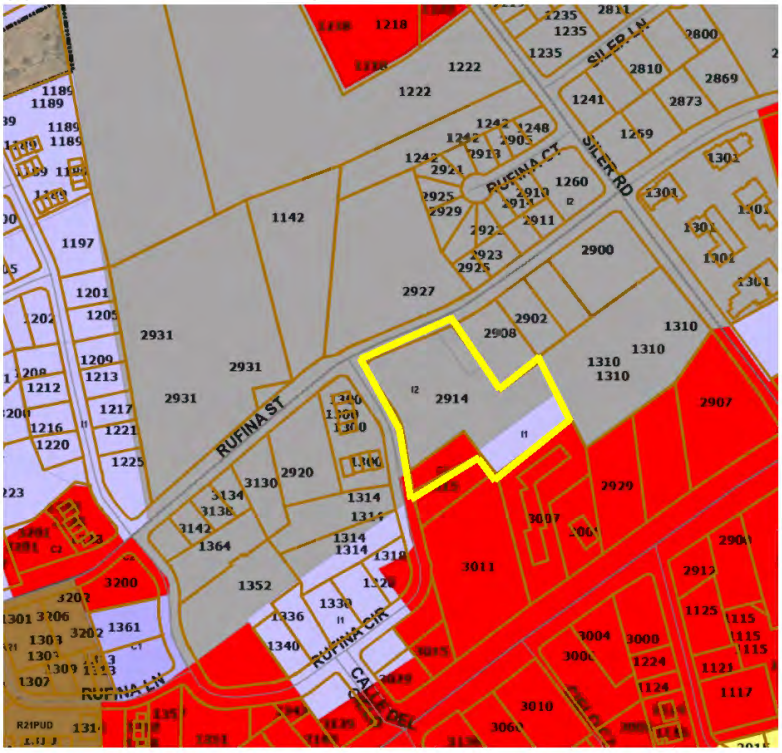
Photo in same spot as previous, but facing west toward the current and proposed parking area.

Looking north into forested parts of lot.

Looking towards north side of property at manmade 30% or greater slopes.

Existing walkways on site.

Forested area on north side of property.



Current site access off Rufina St that is planned to be used for the caretakers residence.

Area planned to be used for parking.

Current Zoning Map

2904 Rufina is currently zoned I-1 (Light Industrial), I-2 (general Industrial), and C-2 (General Commercial. The application includes a request to rezone Lot 3 to C-2.

Future Land Use Map

The Future Land Use Map (FLUM) designates the parcels as “Industrial” (Gray) and “Business Park” (Purple). The applicant requests to change Lot 3’s designation to “Community Commercial” (Red) in order to support the rezone and master plan proposed.

Submittal Checklist (Requirements found in Section 14-3.2 SFCC 1987)

☐ *Six (6) 24"x36" plan sets and one (1) CD are required. Please include the following:*

☒	Letter of Application (intent, location, acreage)	☒	Statement addressing approval criteria	☒	Legal Lot of Record, Legal Description	☒	Development Plan (as defined by Section 14-3.8 SFCC 1987, if applicable)	☐	Proof of Compliance with Conditions of Annexation Approval (if applicable)
☐	Letter of Water and Sewer Availability	☐		☐		☐		☐	

General Plan Amendment Approval Criteria (Section 14-3.2(E) SFCC 1987)

(1) Criteria for All Amendments to the General Plan

The planning commission and the governing body shall review all general plan amendment proposals on the basis of the following criteria, and shall make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any amendment to the general plan:

(a) consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure;
(b) consistency with other parts of the general plan;
(c) the amendment does not:
  (i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or
  (ii) affect an area of less than two acres, except when adjusting boundaries between districts; or
  (iii) benefit one or few landowners at the expense of the surrounding landowners or the general public;
(d) an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;
(e) compliance with the extraterritorial zoning ordinances and extraterritorial plans;
(f) contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development; and
(g) consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.

(2) Additional Criteria for Amendments to Land Use Policies

In addition to complying with the general criteria set forth in Subsection 14-3.2(E)(1), amendments to the land use policies section of the general plan shall be made only if evidence shows that the effect of the proposed change in land use shown on the future land use map of the general plan will not have a negative impact on the surrounding properties. The proposed change in land use must be related to the character of the surrounding area or a provision must be made to separate the proposed change in use from adjacent properties by a setback, landscaping or other means, and a finding must be made that:

(a) the growth and economic projections contained within the general plan are erroneous or have changed;
(b) no reasonable locations have been provided for certain land uses for which there is a demonstrated need; or
(c) conditions affecting the location or land area requirements of the proposed land use have changed, for example, the cost of land space requirements, consumer acceptance, market or building technology.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning and annexation requirements.

Submittal Checklist (Requirements found in Section 14-3.5 SFCC 1987)

Six (6) 24"x36" or 11"x17" scalable plan sets and 1 CD with a PDF copy are required. Submittal requirements may vary based on the individual application and the requested zoning district. The City reserves the right to request additional information at any time during the review process. See Section 14-4 and 14-5 SFCC 1987 for rezoning regulations related to specific zones. Please include the following and check box to indicate submittal:

☑	Letter of Application (intent, location, acreage)	☑	Narrative addressing approval criteria (see below)	☑	Legal Lot of Record, Legal Description	☐	Development Plan (see Section 14-3.8 SFCC 1987)	☐	Landscape, Parking and Lighting Plan, Signage Specifications
☐	Terrain Management Plans (as required by Section 14-8.2 SFCC 1987)	☑	Traffic Impact Analysis (if required)	☐	Archaeological Clearance (if applicable)	☐	Sewer and Water Plan (including profiles and details), letter of availability (if applicable)	☐	Phasing Plan (if applicable)

Rezoning Approval Criteria, Sections 14-3.5(C) and (D) SFCC 1987

(C) Approval Criteria

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) one or more of the following conditions exist:
  (i) there was a mistake in the original zoning;
  (ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning; or
  (iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans;

(b) all the rezoning requirements of Chapter 14 have been met;

(c) the rezoning is consistent with the applicable policies of the general plan, including the future land use map;

(d) the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city; and

(e) the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.

(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.

(D) Additional Applicant Requirements

(1) If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;

(2) If the proposed rezoning creates a need for additional streets, sidewalks or curbs necessitated by and attributable to the new development, the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning requirements.

☐									

Master Plan Submittal Requirements, as defined by Section 14-3.9(C) SFCC 1987:

Applicants for developments that require master plans under this section shall submit plans and other documentation as required by the land use director that show compliance with the applicable provisions of the Santa Fe City Code as provided in Section 14-3.1(C) (Form of Application), including plans that show:

(a) existing conditions on the site and within the vicinity;
(b) proposed modifications to the site, including the locations of existing and new structures, grading, landscaping, lighting, pedestrian and vehicular circulation, parking and loading facilities;
(c) proposed changes to the zoning of land within the master plan area and the types, extent and intensity of land uses that are proposed;
(d) the proposed boundaries of tracts comprising the various land use areas and development phases;
(e) proposed modifications to the infrastructure serving the site, including locations of utilities and public and private streets and driveways and traffic control measures;
(f) the phases of development, if applicable;
(g) if public or private infrastructure is proposed to be constructed in phases, a plan for the timing, financing and responsibility for infrastructure construction;
(h) a development water budget as required by Section 14-8.13;
(i) for master plans involving five or more acres of land, the land use director may require an analysis of the fiscal impact to the city of providing utility and other municipal services to the area.

Signature

I hereby certify that the documents submitted for review and consideration by the City of Santa Fe have been prepared to meet the minimum standards outlined in the Land Development Code, Chapter 14 SFCC 1987. Failure to meet these standards may result in the rejection of my application. I also certify that I have met with the City's Current Planning staff in a preapplication meeting to verify that the attached proposal is in compliance with the City's zoning and development plan requirements.

Signature: Angelica Wolff Date: 8/11/2025

A case manager will be assigned to your project and will notify you within 10 business days if any additional information is needed. After your application has been reviewed by City staff, you will be contacted by us regarding public notice requirements. A packet of information and instructions will be provided regarding the required mailing and sign posting. Thank you, and feel free to contact the [Type text] Department staff at (505) 955-6585 with any questions.

RE: Letter of Application
Girls Inc. of Santa Fe
General Plan Amendments, Rezone & Master Plan

Dear Alexa:

This letter is respectfully submitted on behalf of Girls Inc. of Santa Fe (the "Applicant") in application for a General Plan Amendment, Rezone and Master Plan of the property located at 2904 Rufina Street, comprising two parcels – Lot 3, Parcel #18206951,00000000 and Tract 2A, Lot 2 ("Lot 2"), Parcel #99309296. Lot 3, totaling 3.87 acres, is zoned Light Industrial (I-1) and General Industrial (I-2), and Lot 2, comprising 0.978 acres, is zoned C-2 (General Commercial). This submittal includes the following requests:

1. General Plan Amendment to change the designations of Lot 3 from Industrial and Business Park to Community Commercial
2. Rezone of Lot 3 from I-1(Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial)
3. Master Plan of Lots 2 and 3 for a 55,478-square foot Girls Inc. Youth Center

These applications will establish zoning conformity between the two subject parcels, allowing them to be consolidated as part of the overall development of the property.

Girls Inc. of Santa Fe

For more than 70 years, Girls Inc. of Santa Fe (GISF), a non-profit corporation, has been a beacon of empowerment for young people in the community. While inspiring all girls to be Strong, Smart, and Bold through programs that promote healthy living, academic enrichment, and life skills development, GISF equips girls with the tools and support they need to succeed in life.

GISF provides quality out-of-school time programs in a safe, nurturing environment that meets the needs of working parents. Additionally, GISF engages in advocacy efforts to address issues like bullying, sexual harassment, mental health support, and reproductive justice - all of which are essential to empowering girls and creating a more equitable future. GISF works closely with

the Santa Fe Public Schools, Santa Fe Indian School, and other community partners to provide this comprehensive support.

GISF's current home - the historic Hurley House on Hillside Ave., is bursting at the seams, with limited space and functionality to support the broad range of educational, recreational, and mentorship activities provided. The facility can no longer meet the growing demand for services, the building is not ADA-accessible, and its aging infrastructure requires constant maintenance. Additionally, the facility's location in north Santa Fe poses difficulties for families on the southside with limited transportation options. These challenges limit inclusivity and prevent GISF from reaching all community members. GISF is poised to address the urgent and growing needs of girls in our community and an additional facility is essential to meet the increasing demand for services and expand their impact within the City of Santa Fe.

Project Description

The 4.27-acre property, located at the corner of Rufina Street and Rufina Circle, is the site of a former nursery. This segment of Rufina Street is at the heart of the Siler-Rufina Nexus, a diverse, mixed-use neighborhood that is home to Meow Wolf, several non-profit institutions, a variety of housing, light manufacturing/maker spaces, and offices. This central location is proximate to the families and schools that GISF serves, creating convenience for parents and a more inclusive program for the community. The proposed Master Plan addresses the potential future development of a new 55,478-square foot Girls Inc. youth center, including outdoor recreational areas and a small retail/food service space to provide entrepreneurial training for teenage girls. The program includes a two and three-story building housing classrooms, a gymnasium, gathering space, and administrative offices. Over 2.7 acres of open space will be established, densely vegetated due to the previous nursery use, providing outdoor recreational and educational opportunities. The open space will consist of lush gardens, shade and fruit trees, a play field, greenhouse, chicken coop, pavilion, and connected pathways throughout the site.

General Plan Amendment

Lot 3 has two Future Land Use designations – Industrial and Business Park. An amendment to the Future Land Use Map is requested to designate the entire parcel Community Commercial, in support of the request to rezone the property to C-2. Responses to the approval criteria in SFCC §14-3.2(E)(1) are below.

(a) consistency with growth projections for Santa Fe, economic development goals as set forth in a comprehensive economic development plan for Santa Fe and existing land use conditions such as access and availability of infrastructure ;

Applicant Response: Economic development goals are upheld by the provision of quality childcare programs that support working parents. The 2004 report, *Cultivating Santa Fe's Future Economy*, by Angelou Economics, recognizes the important role of quality of life in economic development. In Strategy Four: Economic Development, the report states, *"The most successful economic development regions in the U.S. also contain very high quality-of-life amenities. Quality of life encompasses many attributes, including healthcare, safety, parks and recreation,*

arts and culture, and environmental cleanliness. A quality environment plays a large part in the choice of young, skilled professionals in deciding where to locate. It also plays a significant role in retaining good citizens." The GISF program is a quality-of-life amenity serving the Santa Fe community and young families, enhancing the attractiveness of Santa Fe for existing residents and newcomers, alike. In addition, GISF will employ approximately 45 staff persons. The new facility will serve the growing southwest part of town, home to a majority of Santa Fe's families. Lastly, the site has existing access via two public rights-of-way and is currently served by public utility infrastructure.

(b) consistency with other parts of the general plan ;

Applicant Response: This General Plan Amendment conforms to the following General Plan Themes and Policies:

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(c) the amendment does not:

(i) allow uses or a change that is significantly different from or inconsistent with the prevailing use and character in the area; or

Applicant Response: The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.

(ii) affect an area of less than two acres, except when adjusting boundaries between districts;

Applicant Response: The subject parcel comprises 3.87 acres. Nevertheless, the property is adjacent to the Community Commercial designation along its south boundary.

(iii) benefit one or a few landowners at the expense of the surrounding landowners or the general public;

Applicant Response: Contrary to harming surrounding landowners or the general public, this General Plan Amendment, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service

organization that mentors school-age girls with dynamic after school and summer programs.

(d) an amendment is not required to conform with Subsection 14-3.2(E)(1)(c) if it promotes the general welfare or has other adequate public advantage or justification;

Applicant Response: This General Plan Amendment promotes the general welfare, because it will enable the construction of a new GISF youth center, offering after school and summer programs for school-age girls and much-needed support for working parents.

(e) compliance with extraterritorial zoning ordinances and extraterritorial plans;

Applicant Response: N/A

(f) contribution to a coordinated, adjusted and harmonious development of Santa Fe that in accordance with existing and future needs best promotes health, safety, morals, order, convenience, prosperity or the general welfare, as well as efficiency and economy in the process of development ;

Applicant Response: Redevelopment of this infill site provides for efficient and economic development, leveraging existing infrastructure, and supporting the harmonious development of Santa Fe. This request not only supports the general welfare of the community, but is the sole motivation for this effort.

(g) consideration of conformity with other city policies, including land use policies, ordinances, regulations and plans.

Applicant Response: The *City of Santa Fe Land Use and Urban Design Plan* recognizes the Siler Neighborhood as a Mixed-Use Corridor, stating, "Development and redevelopment along these corridors should be encouraged to provide greater density of commercial uses…". Furthermore, the Plan encourages the re–use of blighted or failing buildings and businesses. The redevelopment of a former, dilapidated nursery on an infill site in the Siler Neighborhood thoroughly aligns with these objectives. Furthermore, the City of Santa Fe Economic Development Department branded the subject neighborhood as the *Siler-Rufina Nexus* in a recent report issued to spur investment in the City's Opportunity Zones. In keeping with this effort, the proposed GISF facility is a significant investment in the neighborhood, increasing job opportunities and redeveloping a deteriorated site.

Rezone Request

Lot 3 is zoned I-1 (Light Industrial) and I-2 (General Industrial), and we are requesting to rezone the parcel to C-2 (General Commercial) to create uniformity with Lot 2, which is currently zoned C-2. Responses to the rezoning approval criteria in SFCC §14-3.5(C) and (D) are detailed below.

(1) The planning commission and the governing body shall review all rezoning proposals on the basis of the criteria provided in this section, and the reviewing entities must make complete

findings of fact sufficient to show that these criteria have been met before recommending or approving any rezoning:

(a) *One or more of the following conditions exist:*

(i) there was a mistake in the original zoning. N/A

(ii) there has been a change in the surrounding area, altering the character of the neighborhood to such an extent as to justify changing the zoning.

Applicant Response: This area has evolved over the years into a diverse, mixed-use neighborhood of recreational uses, non-profit institutions, a mix of housing types, and various commercial enterprises. The rezone will support the construction of the proposed GISF facility, which aligns well with this current pattern of development.

(iii) a different use category is more advantageous to the community, as articulated in the general plan or other adopted city plans.

Applicant Response: Rezoning the property to C-2 is more advantageous to the community. A vacant site falling into disrepair creates no community benefit. Redevelopment of this infill site vitalizes the neighborhood and supports the provision of critical community services. Furthermore, the rezone request aligns with the Themes and Policies of the General Plan, as summarized below:

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(b) *all the rezoning requirements of Chapter 14 have been met.*

Applicant Response: All the rezoning requirements of Chapter 14 have been met. A Pre-Application Conference was conducted with the Development Review Team on December 12, 2024, and the Early Neighborhood Notification Meeting was held on July 23, 2025.

(c) *the rezoning is consistent with the applicable policies of the general plan, including the future land use map.*

Applicant Response: A Request to amend the General Plan Future Land Use Map to Community Commercial accompanies this rezone application, which aligns with the requested C-2 zoning. Furthermore, the project conforms to the General Plan as outlined below:

Themes

1.7.2 Quality of Life. GISF provides an important community service, offering after school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality

of life through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(d) *the amount of land proposed for rezoning and the proposed use for the land is consistent with city policies regarding the provision of urban land sufficient to meet the amount, rate and geographic location of the growth of the city.*

Applicant Response: General Plan Figure 4-4, Urban Sub-Areas, designates the subject property and surrounding area as an "Infill Area." The Growth Management Chapter of the General Plan specifically calls for prioritization of infill development in Santa Fe in order to maximize the efficient use of public infrastructure, while meeting the demand for urban land for development and directing new growth towards the historic core of the city rather than on the undeveloped fringes. The proposed infill project is in alignment with these strategic directives and is responsive to community needs for public services and community engagement in this area of the City. General Plan Section 4.1 states, *"In both 'infill' and 'future growth' areas, the city must encourage higher densities of residential and commercial development than existing zoning often allows" to help "create efficient use of already existing roads and utilities, help ensure cost-efficient public transit, and provide the type of housing that will be in demand…"*.

(e) *the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the proposed development.*

Applicant Response: The subject property is served by existing roadways and public water and sewer infrastructure. Since the program includes the development of over 2.7 acres of outdoor recreational space, the GISF facility will not affect the capacity of area parks.

(2) Unless the proposed change is consistent with applicable general plan policies, the planning commission and the governing body shall not recommend or approve any rezoning, the practical effect of which is to:

(a) allow uses or a change in character significantly different from or inconsistent with the prevailing use and character in the area;

Applicant Response: The proposed youth center is consistent with the character of the diverse Siler-Rufina neighborhood, which is home to several non-profit community organizations, including The Food Depot, Kitchen Angels, and Homewise.

(b) affect an area of less than two acres, unless adjusting boundaries between districts; or

Applicant Response. The subject parcel is 3.87 acres.

(c) benefit one or a few landowners at the expense of the surrounding landowners or general public.

Applicant Response: Contrary to harming surrounding landowners or the general public, this rezone, and the new GISF youth center it will enable, provides numerous benefits. The redevelopment of the vacant site with a new, modern facility, inclusive of 2.7 acres of open space, will revitalize the property and beautify the neighborhood. Furthermore, GISF is an important community service organization that mentors school-age girls with dynamic after school and summer programs.

SFCC §14-3.5 (D): Additional Applicant Requirements

(1) If the impacts of the proposed development or rezoning cannot be accommodated by the existing infrastructure and public facilities, the city may require the developer to participate wholly or in part in the cost of construction of off-site facilities in conformance with any applicable city ordinances, regulations or policies;

Applicant Response: The property is currently served by existing public roadway and utility infrastructure. The Applicant is prepared to construct any necessary infrastructure upgrades at the time of property development, and these improvements will be documented in the approved development plans.

(2) If the proposed rezoning creates a need for additional streets , sidewalks or curbs necessitated by and attributable to the new development , the city may require the developer to contribute a proportional fair share of the cost of the expansion in addition to impact fees that may be required pursuant to Section 14-8.14.

Applicant Response: The Traffic Impact Analysis identifies the need for a southbound left-turn lane on Rufina Circle serving the north access drive. No other off-site improvements are warranted.

Master Plan

A Master Plan is submitted with this application addressing the conceptual development program for a proposed youth facility for Girls Inc. of Santa Fe. The 55,478-square foot facility will be surrounded by lush gardens, trees, walking trails, and kid-friendly activities. A single main building is proposed with a combination of two and three stories. Additional structures include an outdoor pavilion, a small commercial teen enterprise space, a sport court, and a caretaker's residence. In keeping with the previous nursery use and working to preserve as many significant trees as possible, the building is sited in the back southeast corner, with the garden/open space occupying areas to the north/northwest, providing a buffer from the adjacent roadways.

Access and Traffic. The project has two proposed points of access via Rufina Circle, with a third access on Rufina St. to serve the caretaker's residence. Per the attached Traffic Impact Analysis, a southbound left-turn land serving the north access drive is warranted. There is adequate existing right-of-way to accommodate the proposed turn lane.

Parking. SFCC Table 14-8.6-1, Parking and Loading Requirements, does not include "youth center" as a land use category. Therefore, parking is provided in accordance with the needs of the proposed facility as outlined below:

Peak Daily Staff Demand	45 spaces
Facility Vehicles	5 spaces
Guests/Overflow	18 spaces
Total Required Parking	*68 spaces*
Total Provided Parking	**68 spaces**

Utilities

Water. The property is served by an existing 2-inch service line connected to the 6-inch main in Rufina Circle. The existing 5/8-inch water meter will be replaced with a new double 1-inch meter. In addition, a new 6-inch public fire line will be extended into the property from the same existing main, terminating in a new fire hydrant adjacent to the building.

Sewer. An existing 8-inch public sewer line within a 10-foot utility easement extends across the property from Rufina St. to the south boundary. A new 6-inch service connection will be installed to serve the main building and 4-inch service lines will serve the outdoor pavilion and the teen enterprise/commercial structure.

Terrain Management. The site slopes gently from the southeast to northwest. A series of decentralized stormwater detention ponds are proposed, with the most significant storage occurring at the north end of the site. The ponding will be incorporated into the landscaping to maximize passive stormwater harvesting/irrigation. Please refer to the attached Conceptual Terrain Management Plan for more information.

Landscaping. The Preliminary Landscaping Plan includes preservation of as many existing trees as is feasible, while enhancing the space with a palette of new deciduous trees, evergreens, and shrubs. Additional improvements include street trees along Rufina St. and Rufina Circle and walking paths throughout the open space. Please refer to the Preliminary Landscaping Plan for further details.

Master Plan Approval Criteria

The Master Plan approval criteria in §14-3.9(D) are addressed below:

(a) The master plan is consistent with the general plan;

Applicant Response: The proposed Master Plan aligns with various Themes and Polices in the General Plan, as summarized below.

1.7.2 Quality of Life. GISF provides an important community service, offering after-school and summer programming and enrichment for school age girls throughout Santa Fe.

1.7.4 Economic Diversity. GISF supports economic diversity goals through sustainable development, enhancing quality of life for Santa Fe's families, and educational equity that supports economic opportunities for local youth.

1.7.5 Sustainable Growth. The establishment of over 2.7 acres of open space within a dense existing neighborhood supports sustainability goals through preservation of natural outdoor space, enabling best practices with respect to stormwater management.

1.7.9 Urban Form. The rezone request supports the redevelopment of this infill site, which has access to existing transportation and utility infrastructure, maintaining a compact urban form. The requested rezone to C-2 maximizes land use efficiency in an urban setting, reducing urban sprawl. By promoting higher-density commercial development, the rezoning aligns with the city's vision of creating a more sustainable urban environment.

1.7.11 Community-Oriented Development. As a community service organization, the proposed GISF facility exemplifies community-oriented development. GISF plays an important role for families in the community, by providing quality out-of-school programs that meet the needs of working parents.

1.7.12 Mixed-Use. The proposed rezone is compatible with and expands the existing mix of uses in the Sile-Rufina neighborhood.

Policies

3-G-2 There shall be a mix of uses and housing types in all parts of the City. The proposed rezone is compatible with and expands the existing mix of uses in the Siler-Rufina neighborhood.

3-G-3 There shall be infill development at densities that support the construction of … a designated mix of land uses that provide an adequate balance of service retail and employment opportunities…". The Siler-Rufina neighborhood exemplifies this policy through a vibrant mix of commercial, institutional, and residential uses, and the proposed GISF will contribute to this existing diversity.

4-1-G-3 Use a full range of growth management methods to achieve a superior quality of life to ensure a financially and environmentally sustainable community. As a local community service organization, GISF contributes to the community's quality of life

through mentoring school-age girls and serving working parents with quality after school and summer programming.

9-3-G5 through 9-3-G7 explicitly calls for programs and facilities that "enhance the quality of life" for children and youth, including grants and spaces for after-school, education, life-skills, and recreation. A Girls Inc. youth center directly fulfills these objectives.

(b) *The master plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the master plan area, and with the applicable use regulations and development standards of those districts;*

Applicant Response: The C-2 zoning district is a robust mixed-use zoning category that supports both commercial uses and residential development at higher densities. The proposed GISF youth center is a permissible use in the C-2 district and an appropriate commercial development in the Siler-Rufina neighborhood. Furthermore, the Master Plan demonstrates compliance with C-2 development standards with respect to height, lot coverage, open space, terrain management, and landscaping.

(c) *Development of the master plan area will contribute to the coordinated and efficient development of the community; and*

Applicant Response: The Master Plan includes provisions for pedestrian and vehicular connectivity to the surrounding area, as called for in the General Plan. In addition, the subject property makes efficient use of existing infrastructure as an infill site – a value repeatedly emphasized in the General Plan.

(d) *The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.*

Applicant Response: The existing roadway and utility infrastructure are adequate to serve the project. The Traffic Impact Analysis (TIA) demonstrates that the roadway network has the capacity for the proposed development, with the inclusion of a new left-turn lane serving the north access drive on Rufina Circle.

Archaeology

The subject parcel is located in the Suburban Archaeological Review District. As the property is less than 10 acres, an archaeological survey is not required.

Water Budget

A Preliminary Water Budget is submitted herewith for reference. The water usage for the proposed facility is based upon the usage at the existing GISF Hillside location. The gallons per square foot of current usage is then extrapolated based on the proposed square footage of the new

facility. In addition, since the project is the redevelopment of a former nursery, historic water usage is credited per the provisions of SFCC §14-8.13(E)(1).

Early Neighborhood Notification

The Early Neighborhood Notification Meetings were held on January 23, 2025. City staff, Applicant, consultants, and a member of the press were in attendance. Please refer to the attached meeting notes for details.

In support of this request, the following documentation is submitted herewith for your reference:

1. Master Plan Application
2. Rezone Application
3. General Plan Amendment Application
4. Agent Authorization Letter
5. Warranty Deed
6. Legal Lot of Record
7. Utility Service Application
8. Preliminary Water Budget
9. ENN Meeting Notes
10. Traffic Impact Analysis
11. Master Plan Submittal Set

The Development Review Fees are calculated as follows:

General Plan Amendment	$1,000.00
Rezone	$1,000.00

RE: Girls Inc of Santa Fe
Lot Consolidation of Lot 3 and Lot 2A-2

Dear Alexa:

This letter is respectfully submitted on behalf of Girls Inc. of Santa Fe (the "Applicant") as part of the application for a General Plan Amendment, Rezone and Master Plan of the property located at 2904 Rufina Street, comprising two parcels – Lot 3, Parcel #18206951,00000000 and Tract 2A, Lot 2 ("Lot 2"), Parcel #99309296.

While Lot 3 and Lot 2-2 are currently separate parcels with different zoning, following approval of the General Plan Amendment, Rezone and Master Plan applications, we plan to consolidate these parcels and will submit a Lot Consolidation Plat with the Development Plan application.

In lieu of the current Condition of Approval stating, "Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity, we request an amended Condition of Approval stating, "Applicant shall consolidate Lots 3 and 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2-2 in perpetuity concurrent with Development Plan review.

Respectfully,

Kim Brown

Kim Brown, Executive Director
Girls Inc. of Santa Fe

ACKNOWLEDGMENT

COMMENTS: Service connections to be made with existing City Utility lines via Rufina Street and Camino Vista Aurora.

APPLICANTS, PLEASE NOTE:

- Ordinance 2008-53, prohibits new connections outside the presumptive city limits including the Agua Fria traditional historic community (AFTHC) unless specific conditions are met. Applications for service outside the presumptive city limits and AFTHC must include documentation showing these conditions are met or the application will be rejected. The documents required are shown below.
- A map of the proposed project in relation to the existing city limits and the presumptive city limits
- A detailed description of the proposed develop0ment including the type and size of proposed land uses
- The health, safety and welfare or other legal reason for the connection
- A site water budget
- Documentation from the County of Santa Fe that county water service is not available
- Documentation from the wastewater division regarding sewer availability
- A certified Santa Fe Homes Proposal as set forth in Section 14-8.11 SFCC 1987 if applicable

4. Early Neighborhood Notification Meeting Notes and Posting

JENKINSGAVIN
LAND USE | PROJECT MANAGEMENT

NOTICE OF EARLY NEIGHBORHOOD NOTIFICATION MEETING

July 8, 2025

Dear Neighbor:

This letter is being sent as notice of a neighborhood meeting to discuss pending development review applications to be submitted to the City of Santa Fe. The 4.28-acre subject property at 2904 Rufina St. comprises two parcels – Lot 3 totaling 3.877 acres and Lot 2-2 totaling 0.399 acres. Lot 3 is zoned I-1 & I-2 (Industrial), and Lot 2-2 is zoned C-2 (General Commercial). The applications will include a request to rezone Lot 3 to C-2 (General Commercial), along with amendments to the General Plan Future Land Use Map to change the Lot 3 land use designations from Industrial and Business Park to Community Commercial. In addition, a Master Plan will be submitted addressing the redevelopment of the property as a youth center for Girl's Inc. of Santa Fe. The facility will include approximately 49,000 sf of buildings and significant open space/outdoor recreation areas. Please refer to the attached Vicinity Map, Site Plan, and ENN Guidelines for more information.

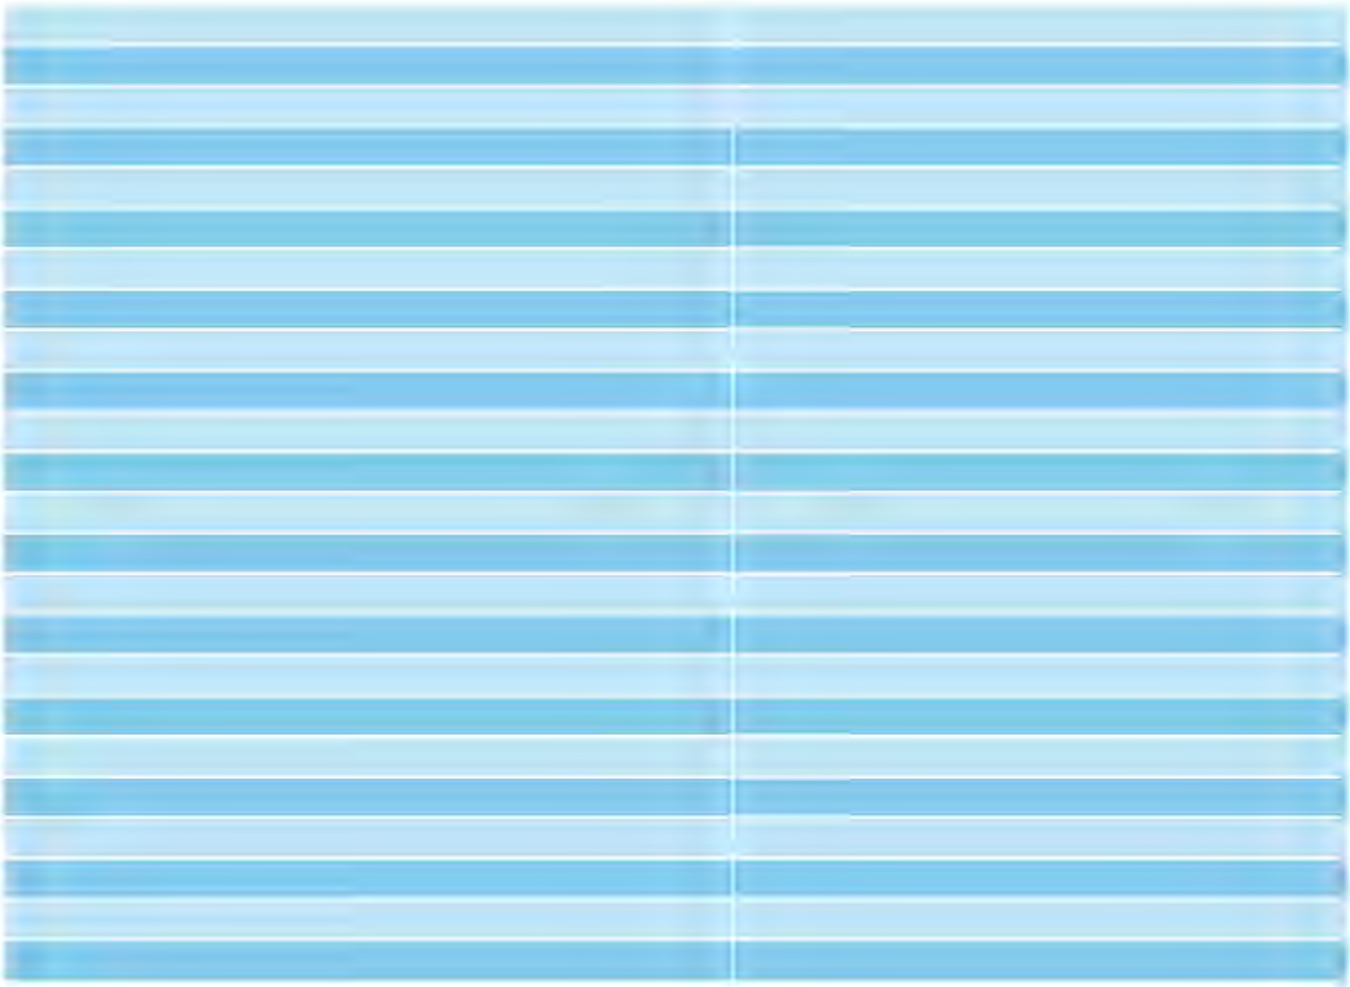
In accordance with the requirements of the City of Santa Fe's Early Neighborhood Notification regulations, this is to inform you that a virtual meeting is scheduled for **July 23, 2025 at 5:30 pm.**

The meeting link is below and can be accessed on the City's website at
https://santafenm.portal.civicclerk.com/

Join Zoom Meeting
https://us02web.zoom.us/j/87370280781?pwd=mbc3ddQPerH2OnXcoIsltRgFBia68a.1

Meeting ID: 873 7028 0781; Passcode: 529568
Call-in number: (669) 444 9171

Early Neighborhood Notification is intended to provide for an exchange of information between prospective applicants for development projects and the project's neighbors before plans become too firm to respond meaningfully to community input. If you have any questions or comments, please contact Jennifer Jenkins at 505-820-7444 or jennifer@jenkinsgavin.com. Persons with disabilities in need of special accommodations, or the hearing impaired needing an interpreter, please contact the Land Use Department at 505-955-6820 or gagurule@santafenm.gov 5 days prior to the meeting date.



Sincerely,

Jennifer Jenkins

Subject: Meeting assets for Girls Inc. ENN Meeting are ready!

Meeting assets for Girls Inc. ENN Meeting are ready!

Hi Jennifer Jenkins

The following assets for the meeting - Girls Inc. ENN Meeting are now available.

Meeting summary

Quick recap

The meeting served as an early neighborhood notification session for a proposed rezoning and master plan for Girls Inc.'s new facility in Santa Fe, with introductions made between the project team and Alexa Hempel, a senior city planner. The team presented plans for developing a new 3.8-acre campus with various facilities including a gathering space, gymnasium, and classrooms, while Jennifer explained the proposed zoning changes and traffic impact analysis. The conversation ended with an invitation for public questions and comments, with next steps including submitting applications to the city and moving through various review processes if approved.

Next steps

- Jennifer to submit applications to the city next month for the Girls Inc. project.
- Alexa to review the submitted application once received on August 11th.
- Tyler to complete the traffic study for the project.
- Kim to follow up with Lily to schedule a time to talk tomorrow.
- Alexi to continue refining the conceptual design of the Girls Inc. facility.
- Jennifer to prepare for the Planning Commission hearing, likely in early November.
- Girls Inc. team to proceed with detailed project design after obtaining approvals for rezoning and master plan.
- Jennifer to prepare for a future early neighborhood notification meeting for the development plan.

Summary

New Senior Planner Team Introduction

The meeting began with introductions, where Alexa, a new senior planner from the city, met the project team consisting of Kim, Jennifer, Alexander, Oralynn, and Tyler. Alexa shared her background working for the National Park Service in Santa Fe. The team discussed the possibility of having a low attendance for the meeting, with Jennifer noting that the protocol is to wait for 15 minutes before calling the meeting if there are no external attendees.

Girls Inc. Rezoning Community Meeting

The meeting served as an early neighborhood notification session for a proposed rezoning and master plan for Girls Inc.'s new facility in Santa Fe. Alexa Hempel, a senior planner with the city, explained the purpose of the meeting, emphasizing the importance of community input before the project advances. Jennifer Jenkins and Angelica Wolf, representing Jenkins Gavin, introduced the project and highlighted Girls Inc.'s mission to empower girls through educational and life skills programs. Kim Brown, the executive director of Girls Inc., expressed excitement about expanding their services to a new, more central location to address their extensive waitlist and meet community needs. The team also introduced Alexa Dzurek, the architect, Orlin Gurutis, the civil engineer, and Tyler Smith, who provided traffic engineering services. The conversation ended with an invitation for public questions and comments, which attendees could submit via chat or the raise-hand feature.

Girls Inc. Campus Zoning Proposal

Jennifer presented a proposal for Girls Inc. to develop a new campus on a 3.8-acre property located at the southeast corner of Rufina and Rufina Circle. She explained the current zoning and land use designations of the property and outlined the requested changes, including a rezone from I-1 and I-2 to C-2 zoning and an amendment to the general plan to change the designation to community commercial. The proposed changes aim to align with neighboring zoning and support the development of the new youth center facility.

Girls Inc. Campus Site Plan

Jennifer presented a site plan for the former nursery property, which will be redeveloped as the new Girls Inc. campus. She explained the proposed layout, including preserved areas for an outdoor classroom and recreational space, as well as areas suitable for development. Jennifer outlined the master plan, which will be submitted alongside a general plan amendment and rezone request, detailing the conceptual development intent. The plan includes two access points off Rufina Circle, parking areas for buses and staff, and a drop-off/pickup zone for parents.

Girls Inc. Facility Expansion Plan

Jennifer presented a plan for expanding Girls Inc.'s facility, which would include a gathering space, gymnasium, classrooms, and potential entrepreneurial training space. The project would cover 4.2 acres, with 3 acres of preserved open space, and would require rezoning of Lot 3 to C2 General Commercial. The facility would serve more families in the community by expanding program offerings and centralizing operations, making it more financially sustainable.

Traffic Study and Approval Process

Jennifer presented a traffic study for a proposed development, explaining how intersections are analyzed using a level of service grading system. She reported that most intersections showed good levels of service, with the exception of Rufina and Sila during the afternoon rush hour. Jennifer outlined the next steps in the approval process, including submitting applications to the city, going through reviews, and holding public hearings at the planning commission and city council levels. If approved, the project would move to the development plan phase, involving further design work and additional public meetings.

Project Submission and Follow-Up Discussion

Jennifer opened the meeting by inviting questions and offering to address any concerns, both during and after the meeting. She clarified that Alexa, who handles city processes, would be unable to answer detailed questions about the project until a submission is made, which is planned for August 11th. Alexa confirmed she had no immediate questions and expressed

anticipation for the submission. Kim concluded by arranging a follow-up conversation with Lily and mentioned she would be in touch via text or email. The conversation ended with expressions of gratitude and goodbyes.

I. INTRODUCTION AND SUMMARY

Girl's Inc. proposes developing a youth center, situated southeast of the Rufina Street and Rufina Circle (east) intersection. The proposed development will include a 5,000 square-foot facility with the ability to enroll 250 children.

A. STUDY PURPOSE

The purpose of the traffic study is to determine the impacts of the proposed development on the surrounding roadway network, evaluate the operation of the proposed site accesses, and to recommend any mitigation measures that may be necessary to support additional traffic generated by the new development.

B. EXECUTIVE SUMMARY

1. SITE LOCATION AND STUDY AREA

The site is located at 2904 Rufina Street on the southeast corner of the Rufina Street and Rufina Circle intersection in Santa Fe, New Mexico. A vicinity map is shown in Figure 1.

The study area consists of the following intersections:

- Siler Road and Rufina Street (existing 4-way signalized intersection)
- Calle del Cielo and Cerrillos Road (existing 4-way signalized intersection)
- Rufina Street and Parkway Drive/Rufina Circle (west) (existing 4-way unsignalized intersection)
- Rufina Street and Rufina Circle (east) (existing 4-way unsignalized intersection)
- Rufina Street & Richards Avenue (existing 4-way signalized intersection)
- Rufina Circle and Calle del Cielo (existing 4-way unsignalized intersection)
- Rufina Circle and Access 1 (future 3-way unsignalized intersection)
- Rufina Circle and Access 2 (future 3-way unsignalized intersection)

The intersection evaluations include analysis for the AM and PM peak hours for the following traffic conditions:

- Existing traffic (2025)
- 2028 Completion Year without the proposed site development (2028 No Build)
- 2028 Completion Year with the proposed site development (2028 Build)

- 2038 Horizon Year without the proposed site development (2038 No Build)
- 2038 Horizon Year with the proposed side development (2038 Build)

2. PRINCIPAL FINDINGS

The traffic analysis found that all intersections operate acceptably overall in the 2028 Build scenario. The eastbound left, eastbound thru/right, and the northbound left turning movements at the signalized intersection of Rufina Street and Siler Road operate at LOS E in the PM peak hour. To improve the eastbound movement, this approach should be restriped to remove on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at LOS E during both peak hours, while the southbound left turn movement degrades to LOS E in the AM peak hour due to the development traffic. With this decline and increase in queue distance needed, it is recommended to complete median modifications on the north side of this intersection along Calle del Cielo to adequately store the queue that will develop. The median should be a maximum of 5' with a 10' left turn lane, a 10' southbound through lane, and a 10' dedicated right turn lane. Additionally, traffic signal timing adjustments should be completed at the intersection to help address this issue. As this storage length was not adequate prior to the development, a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares.

In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and the two new access driveways on Rufina Circle will operate overall acceptably. The northbound left turn lane at both the East and West intersections of Rufina Street and Rufina Circle is recommended to be installed to address City of Santa Fe turn lane warrants.

At the Rufina Circle and Calle del Cielo the westbound left turn lane is warranted and should be installed. This lane should be a minimum of 50' and include a taper length as determined by the MUTCD and prescribed in the City of Sanat Fe standards.

Lastly, Rufina Circle and Access 1 meets warrants for a left turn lane at the entrance to the development. This left turn lane should be 50 feet in length for storage with a taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.

3. RECOMMENDATIONS

- Install a southbound left turn lane at Rufina Circle and Access 1 with striping modifications. This will include removal of on-street parking and installation of the left turn lane by shifting the northbound lane, southbound lane, and bike lanes to incorporate an 11 foot left turning lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as prescribed in the City of Santa Fe standards.
- Install an Eastbound dedicated right turn lane at the intersection of Rufina Street and Siler Road. This lane should be accomplished by striping by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 225 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- Median modifications should be completed at the Cerrillos and Calle de Cielo intersection. The median should be a maximum of 5 feet and the southbound lanes should include a 10' right turn lane, a 10' through lane, and a 10' left turn lane. These lanes should extend the full length of Calle de Cielo from Cerrillos to Rufina Circle.
- The northbound approach at the intersection of Rufina Street and Rufina Circle (West) should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- At the intersection of Rufina Street and Rufina Circle (East), the northbound approach should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- Rufina Circle and Calle del Cielo warrants a westbound left turn lane. This lane should be included at this intersection through restriping. On street parking would be removed approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a

5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

- All designs shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.

II. PROPOSED DEVELOPMENT

A. LAND USE AND INTENSITY

The proposed development is a 5,000 square-foot facility.

The development is located southeast of the Rufina Street and Rufina Circle (east) intersection. The study area is partially developed.

B. DEVELOPMENT PHASING AND TIMING

The project is expected to be developed by 2028.

III. STUDY AREA CONDITIONS

A. STUDY AREA

The study area consists of the following intersections:

- Siler Road and Rufina Street (existing 4-way signalized intersection)
- Calle del Cielo and Cerrillos Road (existing 4-way signalized intersection)
- Rufina Street and Parkway Drive/Rufina Circle (west) (existing 4-way unsignalized intersection)
- Rufina Street and Rufina Circle (east) (existing 4-way unsignalized intersection)
- Rufina Street & Richards Avenue (existing 4-way signalized intersection)
- Rufina Circle and Calle del Cielo (existing 4-way unsignalized intersection)
- Rufina Circle and Access 1 (future 3-way unsignalized intersection)
- Rufina Circle and Access 2 (future 3-way unsignalized intersection)

B. SITE ACCESSIBILITY

The development will include two accesses on Rufina Circle, approximately 300 feet and 550 feet south of the Rufina Street and Rufina Circle (east) intersection. The site access locations being proposed on Rufina Circle are existing driveways and the development plan to utilize these as their future access points.

The primary routes to the site are anticipated to be either Cerrillos Road, Siler Road or Rufina Road.

C. DATA SOURCES

The data used in this report consists of the traffic volumes described below, aerial photography and mapping from Google Earth®, as well as information provided by IDAX Traffic Counts.

IV. EXISTING CONDITIONS ANALYSIS

A. BACKGROUND

Roadway federal classification is updated approximately every four years. The classification process involves local governments, the Santa Fe Metropolitan Planning Organization (SFMPO), New Mexico Department of Transportation (NMDOT), and the Federal Highway Administration (FHWA). The SFMPO Roadway Functional Classification Map classifies roadways based on their function. Roadways are subject to design guidance based on their functional classification, design speed, or based on Comprehensive Plan corridor designations.

1. ADJACENT ROADWAYS

The following are adjacent roadways:

- Cerrillos Road is a principal arterial with three lanes in each direction and dedicated left and right turn lanes. Cerrillos Road has a posted speed limit of 40 miles per hour (MPH). Cerrillos Road provides regional connectivity within the greater Santa Fe area, serving as a link between major/minor roadways which travel in north-south directions, including Highway 285 and I-25. Sidewalks and bicycle lanes exist along Cerrillos Road in this area.
- Siler Road is a minor arterial, with one lane in each direction and a two-way left turn lane. Siler Road has a posted speed limit of 30 MPH. Siler Road provides regional connectivity within Santa Fe, serving as a crossing of the Santa Fe river to the north. Sidewalks exist along Siler Road in this area as well as designated bike lanes/shoulders.
- Richards Avenue is a major collector roadway with one lane in each direction. Richards Avenue has a posted speed limit of 35 MPH. Richards Avenue has sidewalks and bicycle lanes in this area.
- Calle del Cielo is classified as a local roadway by the SFMPO. Calle del Cielo doesn't have a posted speed limit within the section of roadway of the study although the City of Santa Fe statute states if unposted, the speed limit is 25 MPH. To the south of Cerrillos this roadway is classified as a major collector that is posted at 25 MPH, although this portion of the roadway was not included in this study limits. Calle del Cielo has sidewalks, curb, and gutter. Calle del Cielo intersects Cerrillos Road approximately 200-ft south of the Rufina Circle intersection.
- Rufina Street is a minor arterial roadway with one lane in each direction and a posted speed limit of 30 MPH. Sidewalks and bicycle lanes exist along Rufina Street in this area.

- Rufina Circle is a local roadway with speed humps and one lane in each direction. Rufina Circle does not have a posted speed limit; however, the City of Santa Fe statutes state if unposted, the speed limit is 25 MPH. Additional advisory signs designating speed humps ahead specify a 20 MPH advisory speed. Sidewalks and bicycle lanes exist along Rufina Circle in this area.

The City of Santa Fe Roadway Classification map is included in Appendix A.

Additionally, bike lanes, pedestrian facilities, and bus stop locations were assessed based on existing conditions.

2. MULTI-MODAL CONDITIONS

The Santa Fe Bikeways and Trails map includes designated bicycle lanes on many of the roadways as noted in the roadways section. This map also notes Richards Road, and Clark include either a bike lane or designated as a shared-lower traffic/speed corridor.

The Santa Fe trails bus system also runs through the area of the development. Route 2 runs along Cerrillos Road with the nearest stop near the intersection of Calle del Cielo and Cerrillos Road. This route will take a rider to the Santa Fe Place transit Center as well as the Downtown Transit Center, with stops at several rail runner locations.

B. EXISTING TRAFFIC CONDITIONS

Traffic counts for the intersections analyzed in the study area were collected on July 9, 2025. Existing traffic counts are included in Appendix B. The counts included 6-hour turning movement counts. Build traffic for the proposed facility was estimated by taking the maximum enrollment for the new facility, developing trip generation, and distributing those trips onto the Build roadway network.

C. LEVEL OF SERVICE DEFINITIONS

The *Highway Capacity Manual Seventh Edition* (HCM) defines Level of Service (LOS) for signalized and unsignalized intersections in Table 1 as follows:

Table 1 | LOS Definitions			
Level of Service	**Definition**	**Signalized (sec/veh)**	**Unsignalized (sec/veh)**
A	Most vehicles do not stop	<10	<10
B	Some vehicles stop	>10 and <20	>10 and <15
C	Significant numbers of vehicles stop	>20 and <35	>15 and <25
D	Many vehicles stop	>35 and <55	>25 and <35
E	Limit of acceptable delay	>55 and <80	>35 and <50
F	Unacceptable delay	>80	>50

The City of Santa Fe has established LOS D as the generally acceptable level of service in urban areas. When intersections operate below this level, improvements are considered where feasible. Other critical movements are also desired to have LOS D or better if possible.

D. EXISTING INTERSECTION CAPACITY ANALYSIS

The traffic volume for all existing intersections were analyzed using Highway Capacity Software version 8.4 (HCS 2025), which uses the intersection methodology from the Seventh Edition of the Highway Capacity Manual (HCM). Existing traffic volumes are shown in Figure 2. Individual intersection output for the existing conditions analysis is included in Appendix C. The results for the signalized intersections are summarized in Table 2.

All signalized intersections operate at an overall acceptable level of service in the AM and PM peak hours. The northbound through/right turn movement at the Calle del Cielo and Cerrillos Road intersection operates at a LOS E in both the AM and PM peak hours.

At the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue resulting from the analysis using the HCS software is 85 feet during the AM peak hour and 140 feet during the PM peak hour. The 95th percentile queue lengths are included in the results in Appendix C. The available queue storage for this movement is approximately 75 feet which results in queue spillover for this movement during both peak hours. The City of Santa Fe should review this movement and make adjustments to lengthen this queue storage space since this occurs in existing conditions.

Table 2 | Existing Signalized Intersection Results						
Intersection	2025 AM Peak			2025 PM Peak		
	Delay (sec)	V/C	LOS	Delay (sec)	V/C	LOS

Southbound Approach	N/A	9.8	0.01	0	A	10.9	0.04	25	B
* - HCM 95th percentile queue rounded to next 25-foot increment									

The existing access points that will be utilized by the proposed development are in place although no traffic was documented leaving or entering this lot during traffic counting. Therefore access 1 and access 2 are not documented in the operational tables due to no turning movements into the existing site.

V. PROJECTED TRAFFIC

A. SITE TRAFFIC FORECASTING

1. TRIP GENERATION

Generated trips are broken down into three types; 1) primary, 2) pass-by trips, and 3) diverted link. The Trip Generation report defines these trips as follows:

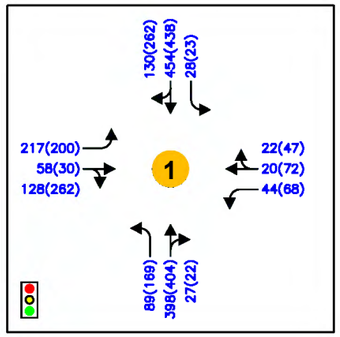
- **Primary Trips** – These trips are made for the specific purpose of visiting the generator. The stop at that generator is the primary reason for the trip. For example, a home to shopping to home combination of trips is a primary trip set.
- **Pass-by Trips** – These trips are made as intermediate stops on the way from an origin to a primary trip generation. Pass-by trips are attracted from the traffic passing the site on an adjacent street that contains direct access to the generator site. These trips do not require a diversion from another roadway. For example, stopping at the store on the way home from work is an example of a pass-by trip. No pass-by trips we used in this analysis.
- **Diverted Linked Trips –** These trips are attracted from the traffic volume on the roadway within the vicinity of the generator, but which require a diversion from that roadway to another roadway to gain access to the site. The roadways could include streets or freeways adjacent to the generator, but without access to the generator. For this study, the diverted link trips have been included in with the primary trips.

This study evaluates primary trips only.

The trip generation is generally based on the 11th Edition of the Institute of Transportation engineer's (ITE) Trip Generation Manual which estimates trips by land use characteristics. Trip generation for this study was determined by counting the existing trips to the existing location of Girl's Inc. in Santa Fe. The existing Girl's Inc has an enrollment of 85 students, whereas the proposed Girl's Inc will have a maximum enrollment of 250 students. Therefore, the existing trips at the existing Girl's Inc were multiplied by a factor of 2.94 (250/85). Based on this it is anticipated that there will be 388 AM peak hour trips (200 entering and 188 exiting) and 388 PM peak hour trips (188 entering and 200 exiting). The site-specific trip generation is shown in Table 5.

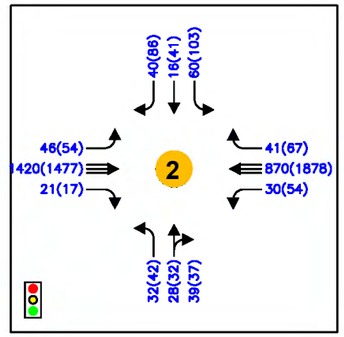
Table 5 | Trip Generation						
Land Use	AM Peak Hour			PM Peak Hour		
	Enter	Exit	Total	Enter	Exit	Total
Existing Girl's Inc	68	64	132	64	68	132
Proposed Girl's Inc	**200**	**188**	**388**	**188**	**200**	**388**

2. TRIP DISTRIBUTION AND ASSIGNMENT



The trip distribution was determined within the existing roadway network to and from the development based on the proportions of existing turning movement counts.

Spreadsheets showing the development of the trip distribution are included in Appendix D. Trip assignment percentages are shown in Figure 3 with the trip assignment volumes shown in Figure 4.



3. TRAFFIC PROJECTIONS

A background growth rate of 2% was applied to provide an estimate of potential future growth of traffic at all intersections evaluated. The growth rate determination and data are summarized in the spreadsheets included in Appendix D.

VI. TRAFFIC AND IMPROVEMENT ANALYSIS

A. LEVEL OF SERVICE ANALYSIS

The following section discusses the results of the future year traffic analysis. The intersection capacity analysis was completed using HCS 2025 which implements the Highway Capacity Manual procedures.

1. 2028 NO BUILD INTERSECTION CAPACITY ANALYSIS

The 2028 No Build analysis assumes that the proposed development is not completed in the 2028 time period. Figure 5 shows the 2028 No Build Peak Hour Traffic Volumes. The HCS outputs are included in Appendix E.

For the 2028 No Build scenario all signalized intersections operate at an acceptable level of service in the AM and PM peak hours. The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at a level of service E in both the AM and PM peak hours. Table 6 summarizes the 2028 No Build Signalized Results.

During this scenario, the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue continues to lengthen to 100 feet during the AM peak hour and 150 feet during the PM peak hour. Again, the available queue storage for this movement is approximately 75 feet which results in queue spillover for this movement during both peak hours. As this continues to occur during no build scenarios, the City of Santa Fe should review this movement and make adjustments to lengthen this queue storage space since this is first shown in existing conditions. If the development does move forward mitigation measures are shown in the build scenario.

Table 6 | 2028 No Build Signalized Intersection Results						
Intersection	2028 AM Peak			2028 PM Peak		
	Delay (sec)	V/C	LOS	Delay (sec)	V/C	LOS

Southbound Left	90	25	25
* - HCM 95th percentile queue rounded to next 25-foot increment			

The study found that all unsignalized intersections operate at acceptable levels of service in the 2028 No Build condition with all movements at LOS C or better for both AM and PM peak hours.

For the 2028 No Build condition, the Rufina Street and Rufina Circle (west) intersection has eastbound and westbound approaches that are expected to operate at LOS A in the AM and PM peak hours. The northbound and southbound approaches are expected to operate at a LOS C in the AM and PM peak hours.

The Rufina Street and Rufina Circle (east) intersection has eastbound and westbound approaches that are expected to operate at LOS A in the AM and PM peak hours while the northbound approach operates at LOS B in the AM and PM peak hours. The southbound approach operates at a LOS B in the AM peak hour and LOS A in the PM peak hour.

The Rufina Circle and Calle del Cielo intersection is expected to operate at a LOS A for the eastbound approach, westbound approach, and northbound thru/right movement in both the AM and PM peak hours. The northbound left turning movement operates at LOS B in the AM and PM peak hours. The southbound approach operates at LOS A in the AM peak hour and LOS B in the PM peak hour. Table 8 shows the 2028 No Build Unsignalized Results.

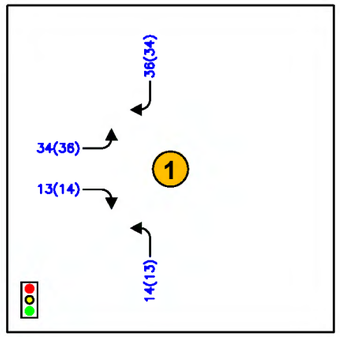

Table 8 | 2028 No Build Unsignalized Intersection Results									
Intersection	Provided Queue	2028 AM Peak				2028 PM Peak			
		Delay (sec)	V/C	Queue* (ft)	LOS	Delay (sec)	V/C	Queue* (ft)	LOS
Rufina St & Rufina Circle (West)									
Eastbound Approach	TWLT	7.7	0.01	0	A	8.3	0.01	0	A
Westbound Approach	TWLT	9.0	0.02	25	A	8.2	0.01	0	A

Rufina Circle & Calle del Cielo									
Eastbound Approach	N/A	7.3	0.00	0	A	7.3	0.00	0	A
Westbound Approach	N/A	7.5	0.03	25	A	7.7	0.05	25	A
Northbound Left	210	10.4	0.10	25	B	12.6	0.23	25	B
Northbound Thru/Right	210	9.0	0.07	25	A	9.2	0.05	25	A
Southbound Approach	N/A	9.9	0.01	0	A	11.1	0.05	25	B
* - HCM 95th percentile queue rounded to next 25-foot increment									

Again, the existing access points that will be utilized by the proposed development are in place in existing conditions although no traffic was documented leaving or entering this lot during traffic counting. Therefore access 1 and access 2 are not documented in the operational table above due to no turning movements into the existing site.

2. 2028 BUILD INTERSECTION CAPACITY ANALYSIS

The trips generated by the site (Table 5) were assigned to the intersections using the trip assignment volumes shown in Figure 4. These trips were added to the 2028 No Build traffic projections to calculate the 2028 Build volumes. The 2028 Build Traffic Volumes are illustrated in Figure 6.

The study found that all signalized intersections operate at an overall acceptable level of service in the AM and PM peak hours. While the intersections operate at overall acceptable conditions, some individual movements see LOS E in the 2028 Build condition.

The Rufina Street and Siler Road intersection continues to operate with acceptable level of service with overall LOS B in the AM peak hour and LOS D during the PM peak hour. This intersection will see the eastbound left, eastbound through/right and northbound left turn movements decline in operation to LOS E during the PM peak hour. The northbound left turning movement 95th percentile queues extend past the developed left turn lane although a two way left turn lane exists for another 200 feet which can hold this queue.

Mitigation efforts were completed for the Rufina Street and Siler Road intersection by adding a dedicated eastbound right turn lane at the intersection. A summary of the mitigation operations is included in Table 10. This improved the overall operations to LOS C in the PM peak hour. The addition of this eastbound right turn lane is recommended for the future of this intersection. Additionally, signal timing adjustment should be considered to further improve the intersections operations.

The intersection of Calle del Cielo and Cerrillos Road also is expected to have turning movements that operate at LOS E and LOS F. The northbound thru/right turn movement continues to operate at LOS E in both the AM and PM peak hours and the southbound left movement declines to LOS E in the AM peak hour and LOS F during the PM peak hour for the 2028 Build condition. All other movements operate at LOS D or better. Even though the southbound left turning movement declined to LOS E, the 95th percentile queueing length was 94 feet in the AM peak hour and 229 feet during the PM peak hour. This is still comparable to the existing 95th percentile queue lengths associated with this movement. Because queue spillover occurred during the existing conditions, the development is not fully responsible although a portion is added to this movement through the intersection. It is recommended to redesign the median on Calle del Cielo to lengthen the southbound left turn movement storage. If the median is adjusted to be four to five feet for the entire length of the roadway, the southbound left turn lane could be lengthened to approximately 200 feet in length which would accommodate and AM peak 95th percentile queue but leave some of the PM peak queue beyond this storage lane.

Additional signal timing adjustments were completed on the PM peak hour of this intersection which is shown in Table 10. This signal adjustment helped to improve the southbound left turning 95th percentile queue length to a length of 200 feet. It is recommended to update the median on Calle del Cielo and complete signal timing adjustments at this intersection prior to the 2028 build scenario.

The Rufina Street and Richards Avenue intersection operates at an overall LOS B in the AM and PM peak hours for the 2028 Build condition. All movements at this intersection will operate at LOS C or better for both the AM and PM peak hours.

The 2028 Build capacity analysis for the signalized intersections is shown in Table 9 with the full intersection output included in Appendix F.

SITE TRAFFIC ANALYSIS

FIGURE 5
2028 AM(PM) NO BUILD
PEAK HOUR TRAFFIC VOLUMES

3. 2038 NO BUILD INTERSECTION CAPACITY ANALYSIS

The 2038 Horizon Year No Build analysis assumes the proposed development is not completed. Figure 7 shows the 2038 Horizon Year No Build peak hour volumes.

The traffic analysis found that all signalized intersections, except for the Rufina and Siler intersection, are expected to operate at an acceptable level of service in both the AM and PM peak hours. While these intersections operate overall acceptably, some individual movements are expected to operate at LOS E in the 2038 No Build conditions due to background traffic growth.

The Rufina and Siler intersection is expected to operate at an overall LOS C in the AM peak hour and LOS F in the PM peak hour. During the AM peak hour all movements will operate at LOS D or better. The PM peak hour contains the eastbound left, eastbound through/right, westbound left, northbound left, and southbound through that will operate at LOS F. The westbound through/right will also operate at LOS E during the PM peak hour. Due to these deficiencies occurring in the no build scenario, the decline in operation is not due to the development traffic. The main issue driving this decline is the significant volume of northbound and southbound traffic at the intersection. In the no build a dedicated southbound right turn lane is warranted.

With this southbound right turn lane included in the no build scenario, all movements return to acceptable level which shows that if this was done prior to this development, no additional mitigations would need to be considered. In this area, Siler Road is fully developed on either side of the roadway and right-of-way appears to be exhausted by the roadway and sidewalks. If the City of Santa Fe desires to improve the operations of this intersection, additional right-of-way will be required. Because this all occurs prior to the development, this is the responsibility of the City. If the City requires the development to participate, it should be evaluated by all participants to determine the amount each party should contribute. This report shows that in 2028 build conditions, existing traffic makes up approximately 79% of this and development traffic adds 21%.

The intersection of Calle del Cielo and Cerrillos Road will continue to see the northbound through/right movement operate at LOS E during both peak hours. Recall that this movement in existing conditions was operating at LOS E.

At the Rufina and Richards intersection, all movements during both peak hours will operate at LOS D or better.

During the 2038 No build scenario, the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue continues to lengthen to 117 feet during the AM peak hour and 181 feet during the PM peak hour. Again, the available queue storage for this movement is approximately 75 feet which results in queue spillover for this movement during both peak hours. If the development moves

forward mitigation strategies will improve this issue. If the development does not move forward, the City of Santa Fe should review this movement and make adjustments to lengthen this queue storage space since this is present in existing conditions and no build scenarios. If the development does move forward mitigations are shown in the build scenario of this report.

Table 13 summarizes the results for the 2038 No Build Signalized Intersection Results. The HCS outputs are included in Appendix G.

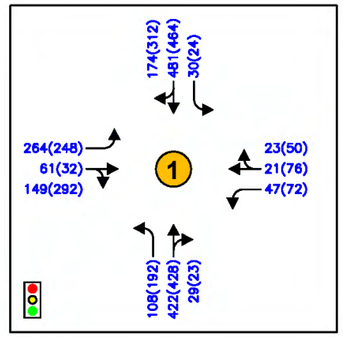
The traffic analysis found in the 2038 No Build condition all unsignalized intersections operate at acceptable Levels of Service in both the AM and PM peak hours. While all unsignalized intersections are expected to operate overall acceptably in the horizon no build, the northbound approach for the Rufina Street and Rufina Circle (West) intersection is expected to operate at LOS E in the PM peak hour. Due to this deficiency occurring in the no build scenario, the decline in operation is not due to the development traffic.

All other movements for unsignalized intersection will operate at LOS C or better.

Table 15 summarizes the results for the 2038 No Build Unsignalized Intersection Results. The HCS outputs are included in Appendix G.



Again, the existing access points that will be utilized by the proposed development are in place in existing conditions although no traffic was documented leaving or entering this lot during traffic counting. Therefore access 1 and access 2 are not documented in the operational table above due to no turning movements into the existing site.

FIGURE 6
2028 AM(PM) BUILD
PEAK HOUR TRAFFIC VOLUMES

C:\Users\CVERMILLION\appdata\local\temp\AcPublish_8836\20260085_Figures.dwg Oct 06, 2025 - 4:47pm

4. 2038 BUILD INTERSECTION CAPACITY ANALYSIS

The trips generated by the site (Table 5) were assigned to the intersections using the trip assignment volumes, shown in Figure 4. These trips were added to the 2038 Horizon Year No Build traffic projections to calculate the 2038 Build volumes. Figure 8 shows the 2038 Build Traffic Volumes.

The traffic analysis found that all signalized intersections, except for the Rufina and Siler intersection, are expected to operate at an overall acceptable level of service in both the AM and PM peak hours. While these intersections operate overall acceptably, some individual movements continue to operate at LOS E in the 2038 Build conditions, some due to background traffic growth that was introduced for the horizon year.

The Rufina and Siler intersection continues to operate at an overall LOS C in the AM peak hour and LOS F in the PM peak hour. During the AM peak hour all movements operate at LOS D or better. The PM peak hour contains the eastbound left, eastbound through/right, westbound left, northbound left, and southbound through that will operate at LOS F. The westbound through/right will operate at LOS E during the PM peak hour. Due to these deficiencies presenting themselves in the no build scenario, the decline in operation is from the background traffic and not due to the development traffic. Mitigation was presented in the 2028 build scenario that added a dedicated eastbound right turn lane. This mitigation will be analyzed here as well.

The intersection of Calle del Cielo and Cerrillos Road will continue to see the northbound through/right movement operate at LOS E during both peak hours. The southbound left will decline to LOS E as well during the AM peak hour.

At the Rufina and Richards intersection all movements will operate at LOS D or better during both AM and PM peak hours.

During the 2038 build scenario, the intersection of Calle del Cielo and Cerrillos in the southbound left turn lane, the 95th percentile queue continues to lengthen to 229 feet during the AM peak hour and 269 feet during the PM peak hour. Mitigation was completed which improved the PM peak hour 95th percentile queue to 225 which is an improvement although additional improvements would require analysis of the Cerrillos Road signal system. Since the horizon year includes estimates of growth, these mitigation measures should be verified as this time gets closer. To improve the southbound left turn queue, additional queue storage should be constructed by adjustments to the existing median along Calle Del Cielo. As this storage length was not adequate prior to the development a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares. This report shows that in 2028 build conditions, existing traffic makes up approximately 47% of this and development traffic adds 53%.

The 2038 Build capacity analysis summary for the signalized intersections is shown in Table 16 with the individual intersection output included in Appendix H.

For the 2038 Build condition, the study found that the Rufina and Rufina Circle (West) intersection saw a LOS F in the northbound approach and the Rufina and Calle del Cielo unsignalized intersection saw: LOS E on the northbound left movement. All other intersections operate overall acceptably in the AM and PM peak hours.

For the Rufina and Rufina Circle (West) intersection, the northbound approach will operate at LOS F during the PM peak hour. All other movements during both peak hours will operate at LOS D or better. This deficiency is also noted in the 2038 No Build condition and therefore is not caused by the development traffic.

The Rufina and Rufina Circle (East) intersection is expected to operate with all movements at LOS D or better in the AM and PM peak hour.

The northbound left turn movement at the Rufina Circle and Calle del Cielo intersection is expected to operate at LOS C in the AM peak hour and LOS E in the PM peak hour. Since this event only occurs for one hour out of the entire day in the future 2038 Build condition, the City should monitor this movement to determine the need for improvements.

The movements at both access driveways on Rufina Circle are expected to operate at LOS B or better in the AM and PM peak hour for the 2038 Build scenario.

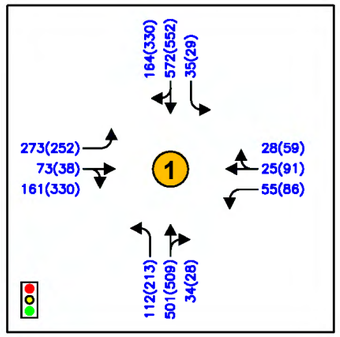

Table 19 summarizes the 2038 Build Unsignalized Intersection Results with the HCS outputs included in Appendix H.

B. AUXILIARY LANE EVALUATION

Analyses of the Transportation Impact Analysis (TIA) Guidelines by the City of Santa Fe, were completed to determine the need to install new right turn or left turn lanes at any intersection as part of this study. Information to check these warrants is provided in Table 20 and Table 21.

The intersection of Rufina and Siler includes dedicated left turn lanes in all directions. Based on the volumes seen at the intersection during the peak hours, all left turn lanes are warranted and should remain. As discussed in the level of service analysis, the eastbound through movement falls to LOS E which indicates that mitigation may be required for this movement. As the volume of eastbound right turning traffic is high at this location, adding a dedicated eastbound right turning lane will improve the operations of this movement. Even though the right turn criteria is not met, it is recommended to install a dedicated right turning lane. This should be completed by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The Calle del Cielo and Cerrillos intersection currently includes all dedicated left turning lanes as shown in existing conditions. Additionally, all right turn lanes are warranted based on the volume of the major roadway (Cerrillos) in this area. Because the through movements northbound and southbound at this intersection are very minimal during both peak hours it is not necessary to add dedicated right turn lanes northbound or southbound. They are not warranted based on the operations of the signalized intersection.

At the intersection of Rufina and Richards, no additional turning lanes are warranted based on the warrant evaluation. The left turn lanes should remain in place at the intersection.

Rufina Street and Rufina Circle (West) includes an eastbound/westbound two way left turn lane on Rufina Street. This lane satisfies the warrant for the eastbound and westbound turn lanes at this intersection. The northbound and southbound left turn lanes are warranted but only the northbound is considered in this report due to the development having no additional trips associated with this movement. The northbound approach to this intersection should be restriped to include a dedicated left turning lane and a shared through/right turn lane to address the left turn lane warrant criteria. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

Rufina Street and Rufina Circle (East) also includes the eastbound/westbound two way left turn lane on Rufina Street. This lane satisfies the warrant for the westbound turn lane at this intersection. The northbound left turn lane is warranted and should be restriped to include a dedicated left turning lane and a shared through/right turn lane to address the left turn lane warrant criteria. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

Rufina Circle does not have a posted speed limit; however, the assumed speed limit is 25 MPH. The entire circle does not include any turn lanes at any of the driveways or intersections along it. Rufina Street includes a two-way left turn lane that operates as a dedicated left at both the intersections with Rufina Circle.

Rufina Circle and Calle del Cielo warrants a northbound left turn lane and a westbound left turn lane in the build scenario. The intersection has two lanes entering northbound which effectively makes one a dedicated left turn lane and the other a dedicated right turn lane based on the existing volumes at the intersection. A westbound left turn lane should be included at this intersection by restriping this area. On street parking would be effected as this area would end approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a 5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

The development will see a maximum of 70 southbound vehicles turning left into Access 1 and a maximum of 20 vehicles turning northbound right. For Access 2, a maximum of 100 vehicles are expected to turn right into the site and a maximum of 10 vehicles are anticipated to turn left into the site. Based on the Santa Fe TIA Guidelines a right turn lane is not typically provided for speeds of 25 mph, which is the posted speed limit on Rufina Street. Additionally, because Rufina Circle includes bike lanes and on street parking it would impact these features to include right turn lanes. Right turn lanes are not recommended at these accesses. Based on The Santa Fe TIA Guidelines, a southbound left turn lane is warranted at Access 1 due to the southbound left turning volumes being greater than 30 vehicles during both peak hours. Therefore, it is recommended that a southbound left turn lane be striped and designated at Access 1 with project construction.

The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.

The applicable tables from Santa Fe TIA Guidelines criteria are included in Appendix I for reference.

VII. CRASH ANALYSIS

Crash data was collected for the years 2019 to 2023 for all intersections included in the scope of this study.

A. CERRILLOS AND CALLE DEL CIELO

The intersection of Cerrillos and Calle Del Cielo shows a total of 88 crashes occurring in the 5-year span. Crash trends were relatively consistent across the years, with the highest number occurring in 2019. Rear-end collisions were the most common crash type accounting for 31% of all crashes although a large portion of crash types were listed as not available. Crash severity was predominantly property damage only crashes with 39 crashes involving injury. No reports documented fatalities at this intersection during these years. The majority of the crashes occurred during daylight hours, while night time crashes were relatively infrequent.

Contributing factors suggest that following too closely and failure to yield right-of-way were the leading causes. Overall, the crash history indicates that congestion related behaviors, particularly rear-end collisions and right-of-way conflicts are the most significant safety concerns at this intersection.

A summary of these crash statistics for this intersection are included in Table 22.

Table 22 | Cerrillos and Calle Del Cielo Crash Summary		
Category	**Description**	**No. Crashes**
	Total Crashes	88
Year	2019	22
	2020	17
	2021	21

	Avoid Contact	3
	Driver Inattention	14
	Pedestrian Error	1
	Following too Closely	35

B. RUFINA AND SILER

The Rufina and Siler intersection saw a total of 33 crashes during the 5-year span. The majority of the crashes were rear-end collisions while sideswipes and front-to-side crashes were relatively infrequent although a notable number did not specify the crash type. Most crashes resulted in property damage only while 8 crashes involved injuries with no fatalities reported at the intersection. The majority of crashes occurred

during the daylight. Contributing factor data indicates that following too closely and driver inattention were the most frequent causes.

Overall, the crash data suggests that congestion related driver behaviors, particularly tailgating and inattention, are the primary safety issues at this intersection.

A summary of these crash statistics for this intersection are included in Table 23

Table 23 | Rufina and Siler Crash Summary

Category	Description	No. Crashes
	Total Crashes	32

	Driver Inattention	13

C. RUFINA AND RICHARDS

Between 2019 and 2023, a total of 42 crashes occurred at the intersection of Rufina and Richards. The highest year was 2021 which included 12 crashes. The most common crash types were rear-end collisions. There were also two pedestrian crashes and one crash with a fixed object, while 18 crashes were reported with unspecified

crash types. Overall, 29% of crashes involved angle collisions, 7% involved a pedestrian or fixed object, and 10% were rear-end collisions. In terms of severity, most crashes were property damage only, while 15 crashes resulted in injuries, and no fatalities were recorded. Lighting conditions indicate that the majority of crashes occurred in daylight, with fewer crashes reported at night, dawn, or in unlit conditions. Contributing factors highlight following too closely, driver inattention, and failure to yield right-of-way as the primary causes, with smaller contributions from improper driving, excessive speed, and traffic signal violations.

Overall, the crash history suggests that driver behavior-related issues, particularly tailgating, inattention, and right-of-way conflicts, are the main safety concerns at this location.

A summary of these crash statistics for this intersection are included in Table 24.

Table 24 | Rufina and Richards Crash Summary

D. RUFINA STREET AND RUFINA CIRCLE (EAST)

The intersection of Rufina Street and Rufina Circle had 3 crashes that occurred in the 5-year time frame. The only documented crash type was one crash with a fixed object. Two crashes occurred with property damage only and one occurred with injury. All crashes occurred during daylight.

A summary of these crash statistics for this intersection are included in Table 25.

Table 25 | Rufina Street and Rufina Circle (East) Crash Summary

Category	Description	No. Crashes
	Total Crashes	3

Contributing Factors*	Other Improper Driving	1
	Not Available	2

E. RUFINA STREET AND RUFINA CIRCLE (WEST)

From 2019 to 2023, a total of 16 crashes were reported at the intersection of Rufina Street and Rufina Circle (West). The most common crash type was front-to-side collisions, followed by sideswipe collisions and one rear-end collision, while 6 crashes were reported with no crash type available. There was also one pedestrian crash, representing 6% of all crashes. Overall, half of all crashes (50%) involved angle collisions, while rear-end crashes were relatively rare (6%). Most crashes resulted in property damage only while 4 crashes involved injuries, and no fatalities were recorded. The majority occurred during daylight with a smaller number happening at

night under both lighted and unlighted conditions. Contributing factors show that failure to yield right-of-way and improper overtaking/driving were the leading causes, with additional contributions from driver inattention, following too closely, speeding, and stop sign violations.

Overall, the crash history suggests that angle-related conflicts and right-of-way issues are the primary safety concerns at this intersection, with driver errors and aggressive maneuvers contributing to crash risk.

A summary of these crash statistics for this intersection are included in Table 26.

F. RUFINA CIRCLE AND CALLE DEL CIELO

The intersection of Rufina Circle and Calle Del Cielo had no reported traffic collisions from 2019 to 2023.

VIII. CONCLUSIONS AND RECOMMENDATIONS

A. CONCLUSIONS

The traffic analysis found that all intersections operate acceptably overall in the 2028 Build scenario. The eastbound left, eastbound thru/right, and the northbound left turning movements at the signalized intersection of Rufina Street and Siler Road operate at LOS E in the PM peak hour. To improve the eastbound movement, this approach should be restriped to remove on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 200 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

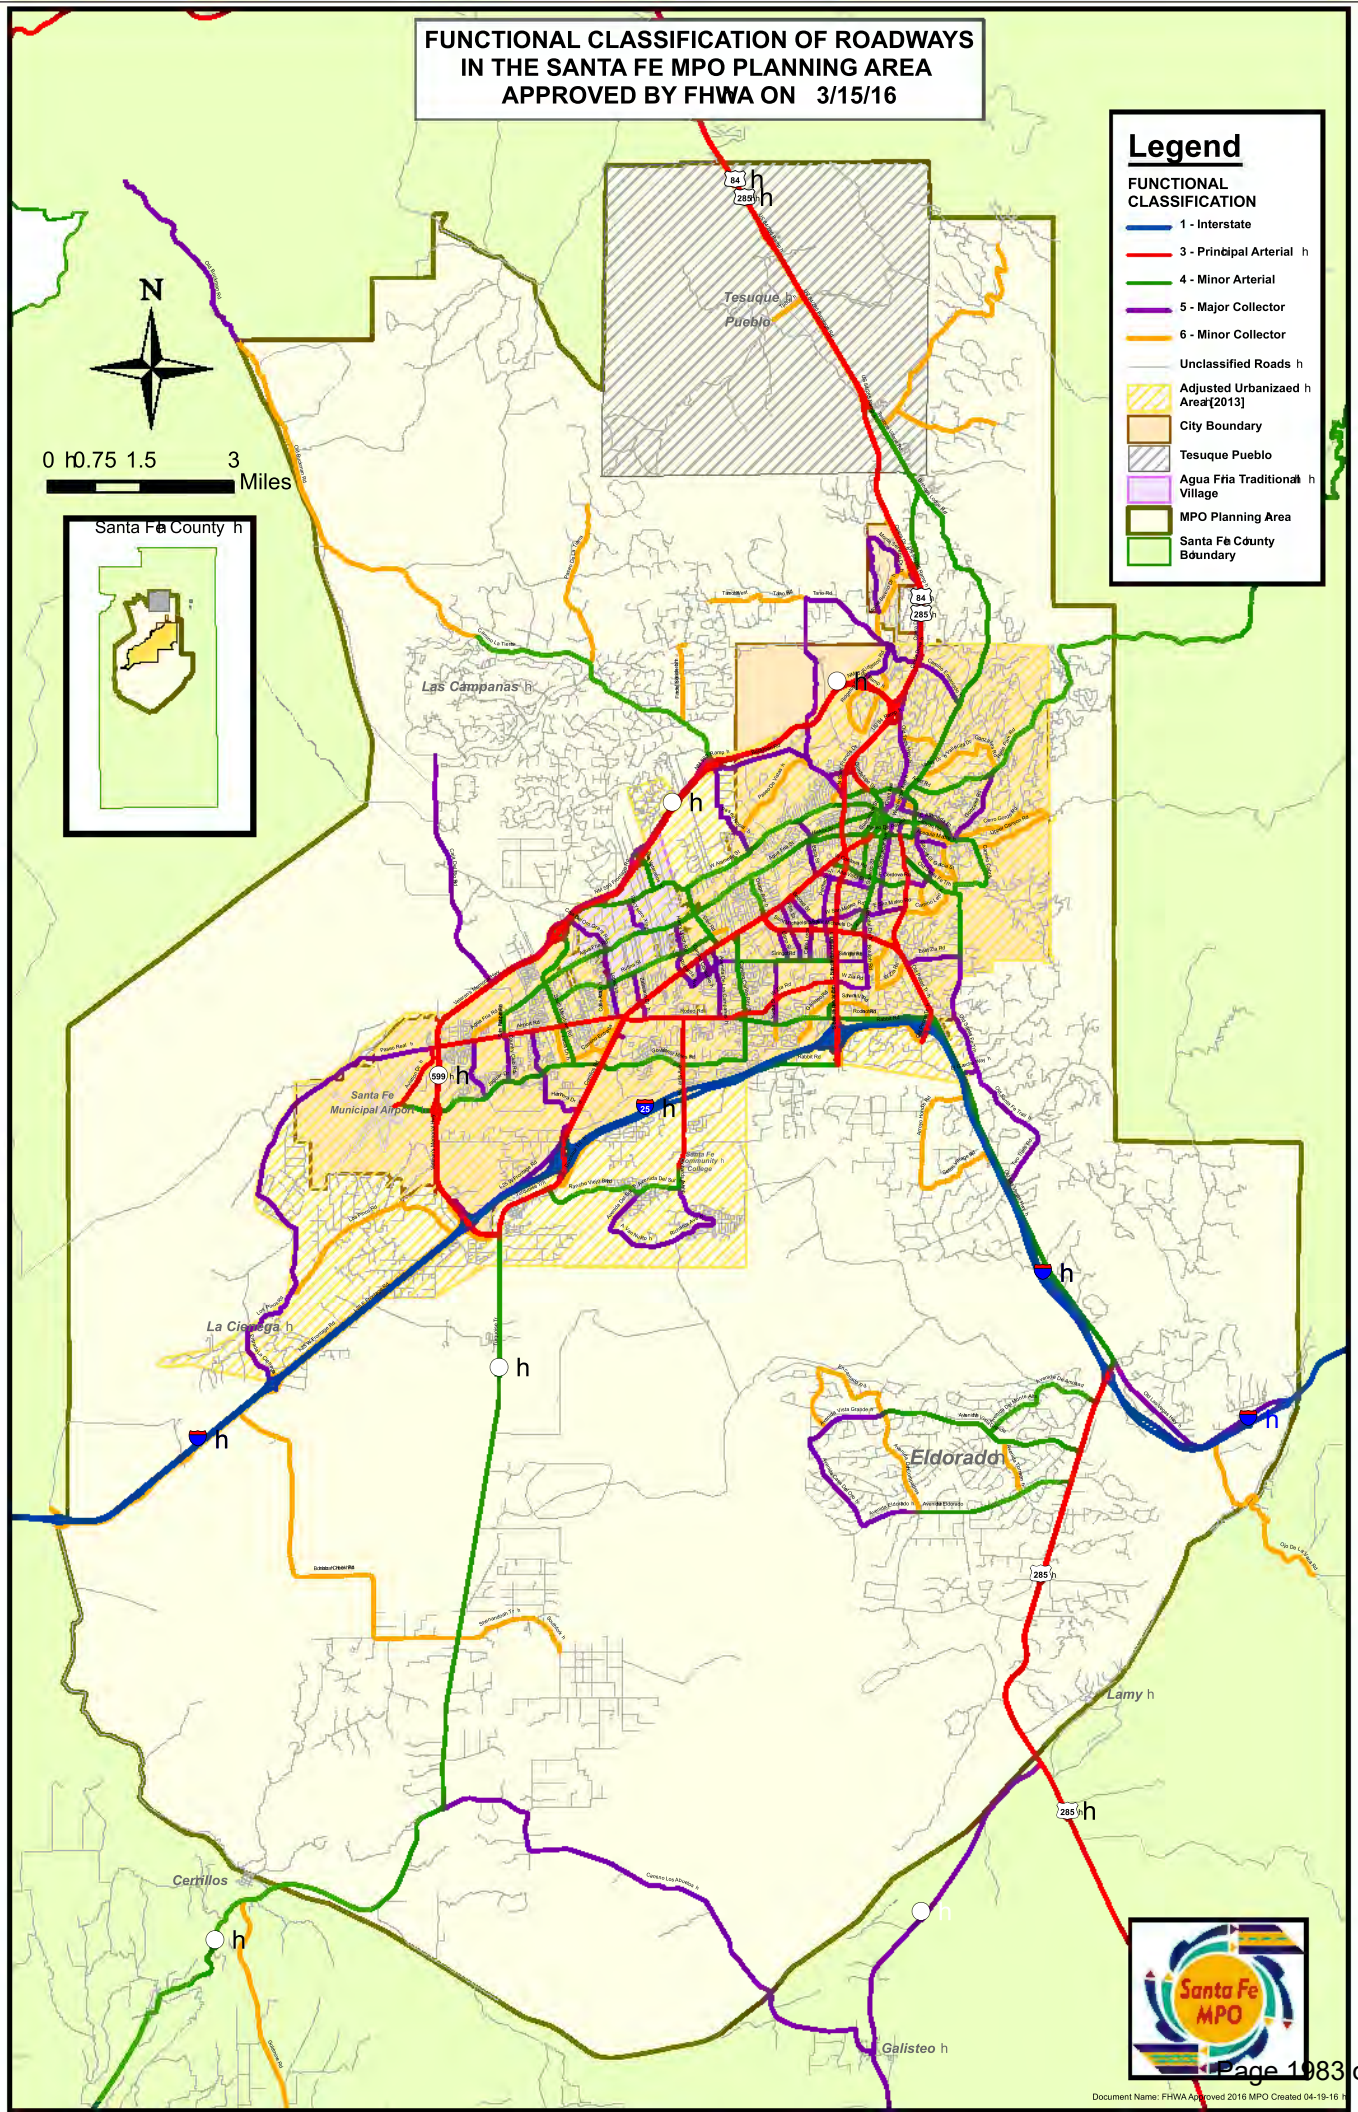
The northbound thru/right turn movement at the Calle del Cielo and Cerrillos Road intersection continues to operate at LOS E during both peak hours, while the southbound left turn movement degrades to LOS E in the AM peak hour due to the development traffic. With this decline and increase in queue distance needed, it is recommended to complete median modifications on the north side of this intersection along Calle del Cielo to adequately store the queue that will develop. The median should be a maximum of 5' with a 10' left turn lane, a 10' southbound through lane, and a 10' dedicated right turn lane. Additionally, traffic signal timing adjustments should be completed at the intersection to help address this issue. As this storage length was not adequate prior to the development, a cost share of this improvement should be evaluated between the City of Santa Fe and the developer to determine appropriate shares.

In the 2038 Build scenario, the Rufina Street and Rufina Circle (east) intersection and the two new access driveways on Rufina Circle will operate overall acceptably. The northbound left turn lane at both the East and West intersections of Rufina Street and Rufina Circle is recommended to be installed to address City of Santa Fe turn lane warrants.

At the Rufina Circle and Calle del Cielo the westbound left turn lane is warranted and should be installed. This lane should be a minimum of 50' and include a taper length as determined by the MUTCD and prescribed in the City of Sanat Fe standards.

Lastly, Rufina Circle and Access 1 meets warrants for a left turn lane at the entrance to the development. This left turn lane should be 50 feet in length for storage with a

taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards. All other turning movement volumes do not meet turn lane thresholds at either access.



B. RECOMMENDATIONS

- Install a southbound left turn lane at Rufina Circle and Access 1 with striping modifications. This will include removal of on-street parking and installation of the left turn lane by shifting the northbound lane, southbound lane, and bike lanes to incorporate an 11 foot left turning lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as prescribed in the City of Santa Fe standards.
- Install an Eastbound dedicated right turn lane at the intersection of Rufina Street and Siler Road. This lane should be accomplished by striping by removing on street parking near the intersection and including one 10' wide westbound lane leaving the intersection, a 10' wide dedicated eastbound left turn lane, one 10' eastbound through lane, and one 10' dedicated eastbound right turning lane. The dedicated right turn lane should include 225 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards
- Median modifications should be completed at the Cerrillos and Calle de Cielo intersection. The median should be a maximum of 5 feet and the southbound lanes should include a 10' right turn lane, a 10' through lane, and a 10' left turn lane. These lanes should extend the full length of Calle de Cielo from Cerrillos to Rufina Circle.
- The northbound approach at the intersection of Rufina Street and Rufina Circle (West) should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- At the intersection of Rufina Street and Rufina Circle (East), the northbound approach should be restriped to remove on street parking near the intersection. New striping should include a 5' bike lane, a 10' dedicated left turning lane and a 10' shared through/right turn lane. The dedicated left turn lane should include 50 feet for storage along with the

taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.

- Rufina Circle and Calle del Cielo warrants a westbound left turn lane. This lane should be included at this intersection through restriping. On street parking would be removed approximately 100 feet prior to the intersection. The roadway is recommended to be restriped to include a 5' bike lane, a 10' westbound through lane, and a 10' westbound left turn lane. The dedicated left turn lane should include 50 feet for storage along with the taper length as determined by the MUTCD and prescribed in the City of Santa Fe standards.
- All designs shall satisfy the Manual on Uniform Traffic Control Devices (MUTCD) and City of Santa Fe requirements.

GENERAL NOTES

1. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH APPLICABLE PROVISIONS OF CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
2. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF EACH APPLICABLE CITY OF SANTA FE ORDINANCE ADOPTED PRIOR TO SUBMITTAL WITH BUILDING PERMIT APPLICATION THAT MODIFIES ANY PROVISIONS OR REQUIREMENTS CALLED FOR IN CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
3. THE PROJECT SHALL COMPLY WITH THE CURRENTLY ADOPTED INTERNATIONAL FIRE CODE, INCLUDING SECTION 903 AUTOMATIC SPRINKLER SYSTEM & SECTION D105 AERIAL FIRE APPARATUS ACCESS ROADS.
4. PROPERTY WILL BE SUBJECT TO THE WATER ALLOCATION AND/ OR WATER OFFSET RETROFIT PROVISIONS OF ORDINANCE NO 2002-29 AND RESOLUTION 2002-55 AT THE TIME OF PERMIT APPLICATION OR WATER HOOKUP REQUEST. COMPLIANCE SHALL BE ACHIEVED BY USE OF RETROFIT CREDITS OR WATER TRANSFERS, IF APPLICABLE.
5. COMPLIANCE WITH PROVISIONS OF GUNNISON'S PRAIRIE DOG ORDINANCE SHALL BE COMPLETED PRIOR TO GRADING OPERATIONS.
6. AMERICANS WITH DISABILITIES ACT (ADA) INSPECTION SHALL BE CONDUCTED PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY. THE CONTRACTOR SHALL CONTACT CITY STAFF TO SCHEDULE AN INSPECTION.
7. FENCES, WALLS, OR OTHER OBSTRUCTIONS SHALL NOT BE PLACED OR CONSTRUCTED ACROSS PUBLIC SANITARY SEWER EASEMENTS, EXCEPT WHERE SHOWN AS NEEDED.
8. UTILITY EXPANSION CHARGES (UEC) SHALL BE PAID AT THE TIME OF BUILDING PERMIT APPLICATION FOR EACH LOT BY CONTACTING THE CITY OF SANTA FE PERMIT AND DEVELOPMENT REVIEW DIVISION.
9. ALL PROPOSED CHANGES TO THE APPROVED IMPROVEMENTS PLANS SHALL RECEIVE PRIOR APPROVAL BY THE CITY OF SANTA FE.
10. ALL PROPOSED IMPROVEMENTS WILL COMPLY WITH THE CURRENT CoSF WATER CONSERVATION STAGE.
11. LANDSCAPE DESIGN SHALL COMPLY WITH APPLICABLE PROVISIONS OF SFCC SECTION 14-8.4.
12. PROPERTY DEVELOPMENT MAY BE SUBJECT TO THE PROVISIONS OF SECTION 14-8.4(F)(5) "PRESERVATION OF EXISTING TREES" PER THE LAND USE DIRECTOR.
13. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF COSF ORD. NO. 2008-02 (IMPACT FEES).
14. PROPERTY DEVELOPMENT, BOTH PUBLIC AND PRIVATE OWNERSHIP, SHALL COMPLY WITH THE COSF ORDINANCE NO 2002-20 (TERRAIN AND STORMWATER MANAGEMENT) AT THE TIME OF BUILDING PERMIT APPLICATION.
15. FIRE DEPARTMENT ACCESS SHALL BE MAINTAINED THROUGHOUT ALL DEVELOPMENT CONSTRUCTION PHASES, PER IFC 1410.1.
16. AN APPROVED WATER SUPPLY FOR FIRE PROTECTION, EITHER TEMPORARY OR PERMANENT, SHALL BE MADE AVAILABLE AS SOON AS COMBUSTIBLE MATERIAL ARRIVES ON THE SITE, PER IFC 1412.1.
17. PERMANENT TRAFFIC CONTROL DEVICES SHALL BE INSTALLED BY THE DEVELOPER PER APPROVED PLAN.
18. THIS DEVELOPMENT LIES OUTSIDE OF A CITY OF SANTA FE HISTORIC DISTRICT.
19. THE LAYOUT SHOWN HEREON IS CONCEPTUAL AND MAY BE MODIFIED AS PART OF THE DEVELOPMENT PLAN PROCESS WITHOUT THE NEED FOR A MASTER PLAN AMENDMENT.

General Plan 1999 Chapter 1

Introduction and General Plan Themes

1

INTRODUCTION AND GENERAL PLAN THEMES

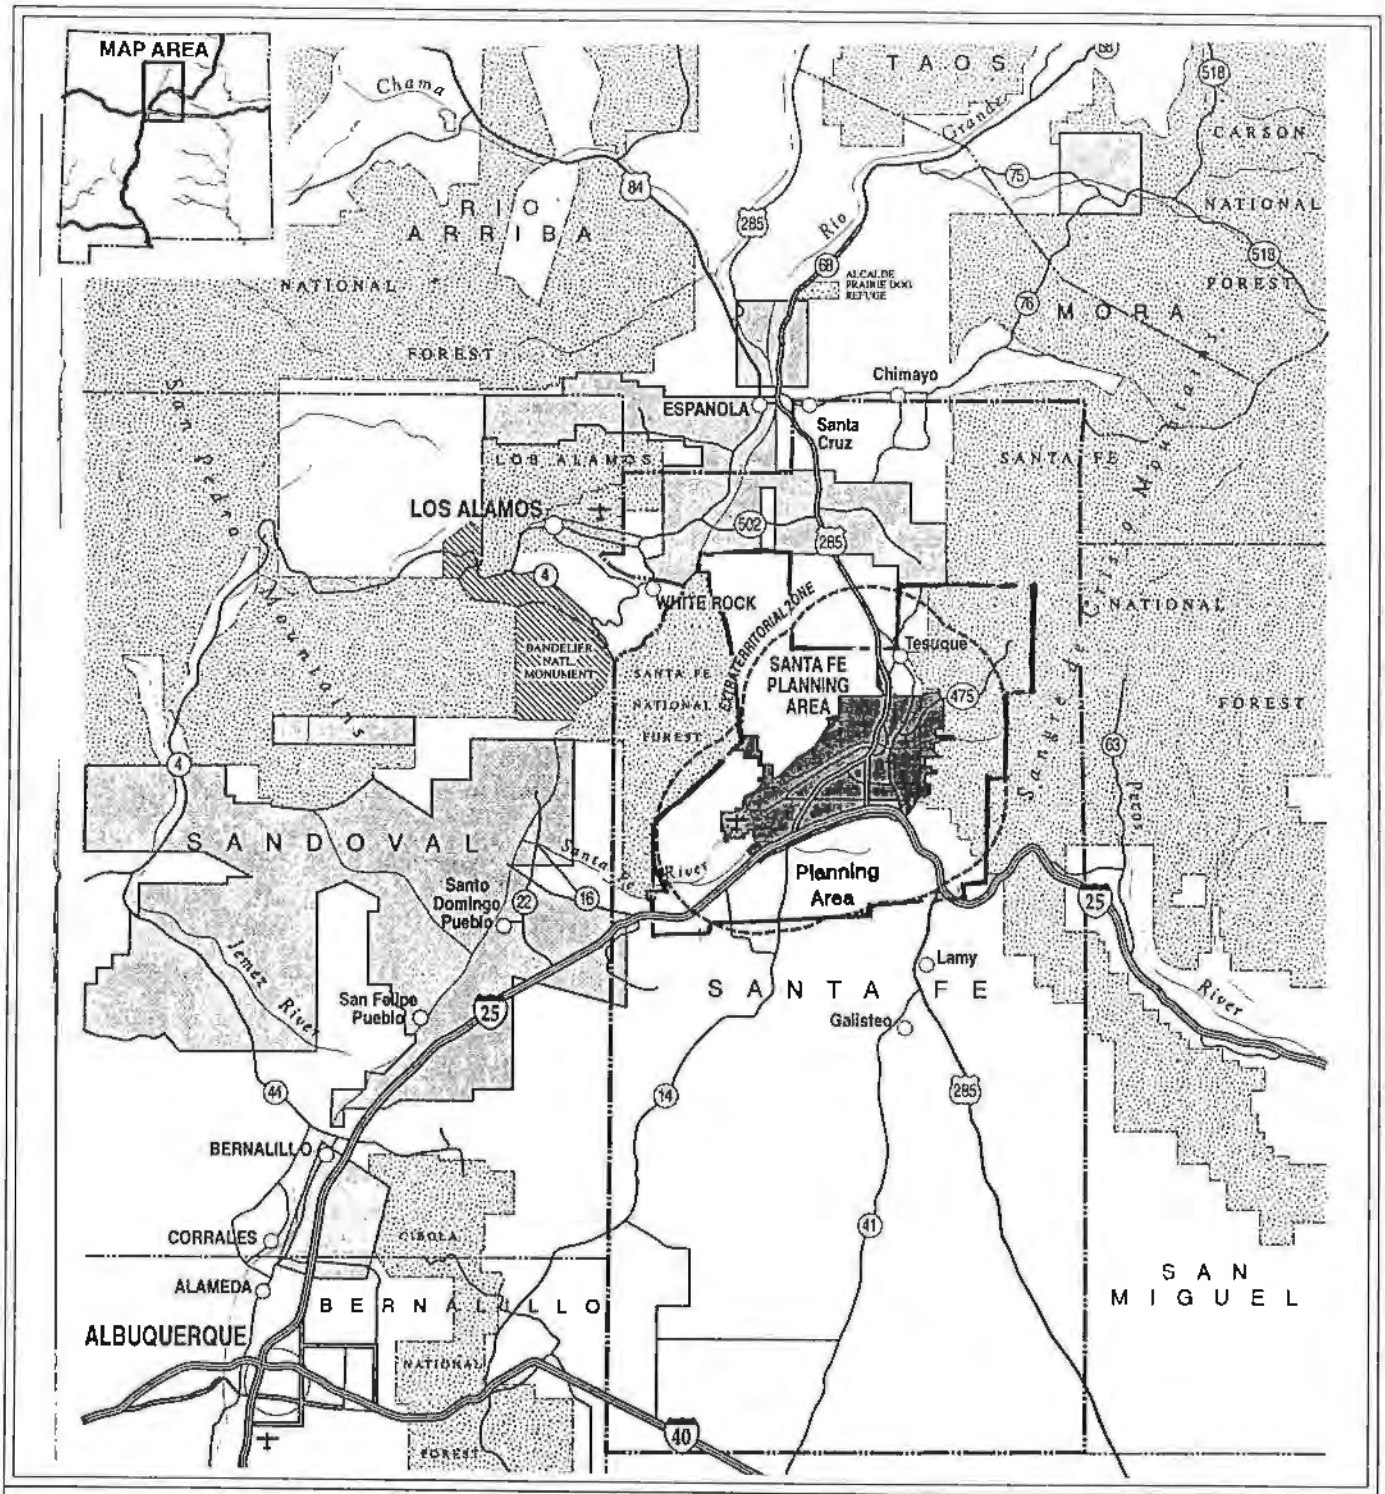
1 INTRODUCTION AND GENERAL PLAN THEMES

The City of Santa Fe and its surrounding region face many pressing planning challenges—from protecting a rich cultural heritage and magnificent physical setting to meeting the demand for affordable housing and reducing traffic congestion. This document attempts to embrace all segments of the city's population and guide the city toward its four-hundredth anniversary. This document replaces the *1983 General Plan* as amended and serves as the city's statement of direction for physical development and conservation.

1.1 SCOPE AND PURPOSE

Because this is a comprehensive, long-term plan for the physical development and conservation of Santa Fe, it lies at the heart of community decisionmaking. It provides guidance for development proposals, capital improvements, annexation, and extension of services.

This General Plan:



- Outlines a vision through the Plan themes that reflects the aspirations of the community;
- Establishes a basis for judging whether development proposals and public projects are consistent with the Plan themes;
- Provides for projects that will enhance the character of the community, preserve critical environmental resources, and minimize hazards;
- Provides the basis for establishing and setting priorities for implementing programs and regulations; and
- Provides the basis for nurturing a vital community and reaching out to all segments of the population.

To ensure that a variety of city actions are consistent with the General Plan, regular on-going use of the Plan is essential. Because the Plan is both general and long-range, there will be circumstances and instances when detailed studies are necessary to implement it.

This document represents the goals and desires of the Santa Fe community as a whole and should be recognized as the city's foremost public statement about Santa Fe's future.

1.2 PLANNING AREA BOUNDARIES

- Figure 1-1 depicts the regional location of the planning area, and Figure 1-2 depicts the urban planning area and urban growth boundary which includes:
- All land within the current city limits;
- Land to the north adjacent to Highway 285;
- Land to the east between the city limits and Santa Fe National Forest;
- Land to the south between the city limits and along Interstate-25; and

1.3 PLAN ORGANIZATION

- **Themes.** The policies within this document reflect 14 overall themes that closely track public comments. The themes are representative of citywide concerns and lay the foundations for the guiding and implementing policies.
- **Guiding Policies** are at the beginning of each chapter and state the city's goals and philosophy. The guiding policies describe ways or methods that the themes listed in each chapter can be achieved.
- **Implementing Policies** are at the end of each chapter and represent commitments to specific actions. They may refer to existing programs or call for establishment of new ones.
- **Standards** are set out in certain chapters and represent policies that can be mapped or measured.

  Together, themes, guiding and implementing policies, and standards articulate the vision for the City of Santa Fe.
- **Policy Numbering System.** Policies in this document are organized using a numbering system tied to sections, with a letter designation to distinguish guiding policies from implementing policies. For example, the first guiding policy in Section 3.4 is numbered 3-4-G-1 and the first implementing policy is 3-4-I-1. Thus, each policy in the General Plan has a discrete number. Where the same topic is addressed in more than one chapter, sections and policies are cross-referenced.
- **Explanatory Material or Commentary**, set in *italic*, accompanies some policies. This explanatory material provides background information or guides General Plan implementation.

1.4 PLANNING PROCESS

The city's planning process includes monitoring and updating the General Plan and preparing more detailed plans, such as resource management plans, neighborhood plans, and other special plans. An Annual General Plan Report will provide an overview of the status of the General Plan and its implementation programs.

Amendments to the General Plan

This document is the heart of the planning process. It is intended to be a living document and, as such, will be subject to more site-specific and comprehensive amendments over time. Amendments also may be needed from time to time to conform to state or federal law passed since adoption and to eliminate or modify policies that may have become obsolete or unrealistic because of changed conditions (such as completion of a task or project, development on a site, or adoption of an ordinance or plan). This document may also incorporate by reference other detailed studies and plans that may be prepared.

While the General Plan should be flexible enough to respond to changed conditions and amended over time to keep it current, it should not be amended so frequently as to diminish its authority. Amendments to the Plan should be limited to twice a year, although each amendment may include more than one change.

Neighborhood and Community Planning

To provide specific direction for development in certain geographic areas, this document calls for preparation of detailed community plans and neighborhood plan districts.

Community plans and neighborhood plan districts will provide specific design guidelines and standards for the conservation and enhancement of neighborhoods and other areas possessing distinctive features, opportunities, or characters. Community plans and neighborhood plan districts would be tailored to individual areas and needs. All community plans will have authority only upon adoption by the City Council and will still be required to be consistent with the General Plan. A neighborhood plan district requires considerable community consensus and planning effort with regulatory power.

Resource Management Plans

To protect sensitive environmental resources, this document requires preparation of resource management plans before any subdivision or development may be approved that would affect certain sensitive biological resources. The locations of these resources are mapped in Chapter 8, Natural Resource Management and Conservation. If these plans are prepared as part of specific plans, the City Council may establish fees to recoup plan preparation costs.

Annual General Plan Report

An annual progress report focusing on implementation of the Plan will be prepared by the Planning and Land Use Department and submitted to the Planning Commission, the Joint Planning Policy Commission, and City Council. The Annual Report should include a summary of all General Plan amendments adopted during the preceding year, an outline of upcoming projects, and General Plan issues to be addressed in the coming year, along with a work program and budget.

Public review and comment on the Annual Report can be heard by the Planning Commission and City Council at regularly scheduled public hearings.

Five-year Review

The city will undertake a comprehensive review of the General Plan every five years after adoption. The five-year review will include:

- Comprehensive evaluation of General Plan policies;
- Analysis of the effectiveness of implementation programs and strategies initiated to carry out the Plan;
- Review of five-year growth trends and reassessment of future urban land needs in light of the Urban Area's carrying capacity and available land inventory; and

- Systematic assessment of the resource based threshold, environmental standards, and resource management plans.

The focus of this Five-year Review will be to determine how well the General Plan has performed—whether policies related to development and environmental conservation have been effective. A report summarizing city staff findings and recommendations will be circulated for public comment and then presented to the Planning Commission. The Planning Commission will review the Five-year Review report and make a recommendation to the City Council. Public review and comment on the Five-year Review can be heard by the Planning Commission and City Council at regularly scheduled public hearings.

1.5 BACKGROUND STUDIES

A comprehensive analysis of existing conditions and major planning options for the City of Santa Fe Urban Area, and the Extraterritorial Zone was performed prior to the preparation of this document (1994 - 1995). Major documents produced as a result of the process leading to the General Plan include:

- *Public Outreach and Issues Identification: Summaries of Public Meetings and Survey Responses for the Urban Area*, August 1994;
- *Public Outreach and Issues Identification: Summaries of Public Meetings and Survey Responses for the Extraterritorial Area*, December 1994;
- *Working Paper: Existing Conditions and Planning Issues – Urban Area and Extraterritorial Zone,* June 1995. This 600-page illustrated report provides an evaluation of existing conditions and planning issues in the Urban Area and the Extraterritorial Zone. Analysis and conclusions in the *Working Paper* are based on technical work, including original data collection and fieldwork, and an extensive process of public outreach. Results of the public outreach process are also summarized. A summary version of the *Working Paper* is also available from the city.
- *Sketch Plans,* October 1995. This document includes three sketch plans showing how alternative scenarios or sets of development policies would be reflected in a future land use pattern. It also includes an analysis of the transportation impacts of the alternatives and estimates of infrastructure costs. The *Sketch Plans* were presented to the public in a series of five meetings, some of which were also televised on local cable channel 6.

While these background studies and working papers have guided General Plan preparation, **they do not represent adopted city policy.**

1.6 PUBLIC PARTICIPATION

Throughout the preparation of the General Plan, the city has been committed to active public outreach and participation. Plan policies have been shaped by comments made in public surveys and meetings. Public participation has included:

- **Community Meetings.** At the outset of the General Plan process, in the summer and fall of 1994, 20 public meetings were held (some televised) to receive residents' priorities for the General Plan. Five meetings were held in the fall of 1995 to present the alternative

Sketch Plans to the public. These meetings were attended by over 2,000 people. Comments made at these meetings were recorded and published, and forwarded to the City Council, Planning Commission, and appropriate city departments.

- **Newsletters and Survey.** Newsletters were prepared periodically and distributed to all households and other groups and interested parties. A postage-paid survey questionnaire was sent to each household in the Urban Area and the Extraterritorial Zone as part of the first newsletter, to which over 3,800 households (representing over 9,000 people) responded. The results of the survey were summarized, and all responses collected and made available at libraries and City Hall.
- **Open Houses.** These provided information about the Plan update and were held throughout the process. All public meetings were preceded by open houses, which were also held at high visibility locations such as Villa Linda and De Vargas malls.
- **Cable TV and Video.** Many public meetings were broadcast on local cable channel 6. Tapes of meetings were also made available at libraries and City Hall.
- **Meetings and Hearings.** The public participation process for the General Plan has been extensive. Public meetings were held to receive comments on the draft document; in addition, a public hearing regarding the Plan was held by the Planning Commission and City Council.

1.6.1 RESIDENTS' PRIORITIES FOR THE GENERAL PLAN

Policies have been shaped by active public participation and have resulted from the concerns and ideas presented at numerous public forums. Responses to the survey sent to all addresses in the city and the five-mile Extraterritorial Zone expressed the concerns of the residents. The following tables summarize residents' likes and dislikes about Santa Fe (Tables 1.1 and 1.2), trends that concern them (Table 1.3), and priorities for the General Plan (Table 1.4).

1.6.2 ROUNDTABLE REPORT, VISION SANTA FE, AND URBAN DESIGN GUIDELINES

The issues of concern to Santa Feans today are quite similar to those raised eight years ago when an update to the 1983 Comprehensive Plan was being considered. A brief review of these issues, and questions raised by Vision Santa Fe, a set of goals and policies for the Comprehensive Plan adopted in 1990, provided a useful perspective. These issues along with the Visual Preference Study for the Urban Design Guidelines are used through this document. The Vision Santa Fe states that:

> We must assure that the community's resources and opportunities are distributed more equitably; and that adequate employment opportunities, decent shelter, excellent education, ample recreational opportunities, and other basic human services are provided to nurture all of us. We believe that the beauty and visual resources of our natural environment need to be preserved, protected, enhanced, and made more accessible to all. The tolerance with which we have lived together must be nurtured as part of our great social legacy. We believe it to be essential that growth in and around our city should be complemented by the preservation of neighborhoods and traditional social and cultural patterns.
>
> In conjunction with Santa Fe County and our regional neighbors, diversification of economic resources must be pursued; fulfilling jobs must be created. We want to involve more people in community decision-making, planning, and leadership. We ask to give our children the strength of our traditions as well as broad options for future personal opportunity. Implicit in these concerns is a vision for Santa Fe of what we cherish and wish to preserve.

1.7 GENERAL PLAN THEMES

The policies of this document reflect 14 overall themes that track the results of the public survey. These themes are followed by discussion in *italics*. For purposes of this section the themes are equally weighted. However, the Planning Commission and the governing body have the right to prioritize these themes, either within specific cases or as a matter of general policy.

1.7.1 AFFORDABLE HOUSING

Actively participate in the creation of affordable housing.

Opportunities are provided for housing for all income segments of the population in all areas of the city, while restricting the supply of large lot housing, which belongs in rural areas outside the city and not inside it. Housing affordability will also be aided by not artificially limiting the supply of land or the rate of growth. Active efforts to increase the supply of affordable housing are outlined. Affordable housing is provided close to jobs to promote transit use.

1.7.2 QUALITY OF LIFE

Enhance the quality of life of the community and ensure the availability of community services for residents.

The General Plan seeks to promote interests of the community-at-large over private ones. Tools are provided for the public to be meaningfully involved in ongoing planning and decision making.

1.7.3 TRANSPORTATION ALTERNATIVES

Reduce automobile dependence and dominance.

The General Plan outlines a comprehensive strategy, including structuring of land uses to reduce automobile dependence and policies for neighborhood design which promote transit and alternative modes. The Plan delineates Transit Intensive Corridors that will have high frequency bus service, and locates sites for two intermodal (rail and bus) stations. The Plan also calls for preparation of a Transportation Demand Management Program and parking policies that make Downtown more accessible to local residents.

1.7.4 ECONOMIC DIVERSITY

Develop and implement a comprehensive strategy to increase job opportunities, diversify the economy, and promote arts and small businesses.

The General Plan includes policies to promote economic development and the arts; a strategy is outlined in the Community Economic Development Plan, a separate document maintained by the city. Themes of the strategy include regionalism, sustainability, quality of life, equity of education, economic opportunities, and diversification. The General Plan locates sites for arts and new businesses in a variety of settings.

1.7.5 SUSTAINABLE GROWTH

Ensure that development is sustainable and that growth, conservation, redevelopment, and natural resource protection are balanced.

There is clear consensus that growth should not diminish the quality and diversity of natural resources. Sensitive resources that require protection are mapped in the Plan, and resource-based development standards and project review procedures are established. The General Plan seeks to permit development only upon known and certain availability of water, and requires new growth to pay the costs of securing additional water rights. The Plan calls for adoption of an adequate public facilities ordinance.

1.7.6 REGIONAL PERSPECTIVE

Maintain a regional growth management perspective and work with other private and governmental entities towards that goal.

The destinies of the city and the surrounding areas are intertwined. The General Plan encourages city and other local, state, and federal agencies to work together on policies that are mutually supportive and to maintain consistent standards in the area surrounding the city. The Plan outlines a structure for long-range planning to be anticipatory and for the phasing of growth to minimize infrastructure costs. The Plan calls for preparation and implementation of a Growth Monitoring Program with both short-term and long-term elements.

1.7.7 WATER

Undertake comprehensive efforts to conserve water and ensure adequate supplies with growth.

Growth is likely to increase reliance on imported surface water and require active steps to increase the available water supply. The Plan provides a comprehensive strategy to promote conservation, recycling, and recharge. In addition, the Plan requires the adoption of a Comprehensive Impact Fees Program to pay the costs of capital facilities including water supply. Alternative methods of allocating the costs of securing and providing additional water to new water system customers will be examined in terms of those alternatives' projected impact on existing and new residents and businesses, impacts on affordability and other growth management objectives expressed in this plan, requirements for additional customers, and ways cost impacts could be mitigated.

1.7.8 CHARACTER

Maintain and respect Santa Fe's unique personality, sense of place, and character.

Increasing travel and communication have diminished the remoteness that Santa Fe's high desert location once afforded. One of the country's oldest cities, the city today faces the prospect of being overwhelmed by run-of-the-mill late twentieth century development. Residents have unequivocally stated that new growth should not erode the qualities that contribute to Santa Fe's unique character and ambiance. The General Plan delineates an Urban Growth Boundary and calls for stronger urban/rural edges. Land use and urban design standards, and guidelines for new and infill development are also included.

1.7.9 URBAN FORM

Promote a compact urban form and encourage sensitive/compatible infill development.

Promotion of a compact urban form has been a major criteria in selecting new growth areas. Growth and reintensification areas have been selected to minimize distances between different parts of the city, and between job centers and residential areas. Incentives are provided to promote infill development.

1.7.10 COMMUNITY-ORIENTED DOWNTOWN

Put community activities back into Downtown.

The loss of the Plaza area as a center of community activity and services is a major concern of many residents. While establishments such as drug, grocery, and small-scale service stores serve residents and office workers, they are unable to survive given the high rents that proliferation of tourism-oriented establishments have caused. The Plan outlines economic development components and steps to ensure that these vital activities can return to and survive in Downtown and are easily accessible to residents. Creation of a Public Market in Downtown is also identified.

1.7.11 COMMUNITY-ORIENTED DEVELOPMENT

Orient new development to the community; foster public life, vitality, and community spirit.

Plan policies call for new development to be oriented to established neighborhoods, to urban context, to pedestrians, and to promote active street and outdoor life. Urban design standards are offered that seek to prevent neighborhoods from being isolated from each other but to maintain a continuum of urban fabric, particularly regarding public access and vehicular/pedestrian circulation. Parks, open space, and neighborhood services are located within neighborhoods.

1.7.12 MIXED USE

Provide a mix of land uses in all areas of the city.

The General Plan provides a mix of compatible uses that fulfill everyday retail and service needs in existing and new neighborhoods. This urban structure affirms Santa Fe's traditional development pattern.

1.7.13 REVIEW PROCESS

Streamline the planning and development review processes.

Greater certainty in the planning process will benefit residents and project proponents, and facilitate long-range capital improvements planning. The General Plan proposes establishing thresholds and procedures for detailed environmental and neighborhood impact analysis. The approval process for small and routine projects that do not exceed the minimum thresholds will be "streamlined" by requiring only administrative review tracks rather than public hearings.

Neighborhood participation in the planning process is assured through public review and approval of projects by the Planning Commission, Summary Committee, Board of Adjustment, and the Governing Body.

1.7.14 IMPLEMENTATION

Ensure consistency between the General Plan, implementing ordinances (including zoning and impact fees), and the Capital Improvements Program (CIP).

With this General Plan, the city is committing itself to consistency between the General Plan and the implementing programs and regulations, including zoning and subdivision regulations and the CIP. Criteria and procedures to ensure consistency between the General Plan and Zoning Ordinance are also established, including an orderly process for General Plan amendments.

City of Santa Fe
Planning Commission
Findings of Fact and Conclusions of Law

Case #2025-11028
2904 Rufina St General Plan Amendment
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, changing the Future Land Use designation from Industrial and Business Park to Community Commercial.

In related Case #2025-11029, the Applicant requests a rezoning for Lot 3 at 2904 Rufina St, comprising approximately 3.87-acres, from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).

Additionally, in related Case #2025-11030, the Applicant requests approval of a Master Plan to construct a youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres.

After conducting a public hearing and having heard from staff and all interested persons, the Commission hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.2(E) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the General Plan Amendment request.
2) The Planning Commission heard Case #2025-11028 concurrently with Cases #2025-11029 and #2025-11030.
3) SFCC 1987 Section 14-3.2(D) sets out procedures for amendments to the general plan and requires the Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
4) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
5) The Applicant attended a pre-application conference on December 12, 2024.
6) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.

7) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
8) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve a General Plan Amendment.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose an amendment to the general plan, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 ("Submittal Requirements").
4) Pursuant to SFCC 1987 Section 14-3.2(B)(2)(b), the general plan must first be amended before approval of a change in zoning district designation that is inconsistent with the land use classification shown on the general plan's future land use map.
5) The Commission has the power and authority at law and under SFCC 1987 Subsections 14-2.3(C)(7)(a) and 14-3.2(D)(2)(a) to review the proposed amendment to the General Plan and to make recommendations regarding the proposed amendment to the General Plan to the Governing Body.
6) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(a), the Commission finds that the proposal is consistent with growth projections for Santa Fe, and that the project accommodates increased commercial land use, which supports the expanding community. The infrastructure, including wet and dry utility and roadway, can accommodate the proposed development with improvements by the Applicant.
7) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(b), the Commission finds that the proposal is consistent with other parts of the General Plan, aligning with several themes and policies, including but not limited to, quality of life, economic diversity, community-oriented development, and infill development.
8) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(c), the Commission finds that:
   a) The amendment does not allow uses or changes that are significantly different from or inconsistent with the prevailing use and character of the surrounding area. The proposed Community Commercial designation creates uniformity with nearby parcels.
   b) The amendment affects an area greater than two acres. The subject parcel is 3.87-acres.
   c) The amendment does not benefit one or a few landowners at the expense of surrounding landowners or the general public. The proposed change allows for a rezoning of the parcel to C-2 (Case #2025-11029) and a Master Plan for a youth center (Case #2025-11030); encouraging redevelopment of the infill site which is anticipated to bring

broader economic benefits such as employment and expanded services to serve the general public.

9) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(d), the Commission finds the amendment to align with the requirements of 14-3.2(E)(1)(c) while also promoting general welfare.
10) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(e), the Commission finds that this section is not applicable.
11) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(f), the Commission finds that the proposed amendment contributes to a coordinated, adjusted, and harmonious development of Santa Fe, meeting the future needs of the community and promoting convenience, prosperity, and general welfare in the area.
12) Pursuant to SFCC 1987 Section 14-3.2(E)(1)(g), the Commission finds that the proposed amendment does not conflict with existing City policies, ordinances, or regulations. The amendment is in line with the General Plan's themes and policies.
13) Pursuant to SFCC 1987 Section 14-3.2(E)(2)-(3), the Commission finds that the additional criteria specific to amendments to the Land Use Policies sections of the General Plan and Neighborhood Plans are not applicable to this case because the proposal does not amend the land use policies section of the General Plan nor adopt a Neighborhood Plan.
14) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
15) The Applicant met the applicable Submittal Requirements.
16) The Commission recommends approval of the requested General Plan Amendment because the applicable code requirements and criteria for recommendation for the proposed amendment to the General Plan have been addressed.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2024, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the general plan amendment as requested in the Application for Case #2025-11028.

Case #2025-11029
2904 Rufina St Rezoning from I-1 and I-2 to C-2
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests rezoning from I-1 (Light Industrial) and I-2 (General Industrial) to C-2 (General Commercial) on Lot 3 at 2904 Rufina St, approximately 3.87-acres ("Project").

In related Case #2025-11028, the Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, to change the Future Land Use designation from Industrial and Business Park to Community Commercial.

Additionally, in related Case #2025-11030, the Applicant requests approval of a Master Plan to construct a youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres.

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission ("Commission") hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.5(C) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the rezoning request.
2) The Planning Commission heard Case #2025-11029 concurrently with Cases #2025-11028 and #2024-11030.
3) SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Commission to hold a public hearing, review the Application, and make a recommendation to the Governing Body.
4) The property is approximately 3.9-acres, located at 2904 Rufina St.
5) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
6) The Applicant attended a pre-application conference on December 12, 2024.
7) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.

8) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
9) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve an Ordinance for a Rezoning from I-1 and I-2 to C-2.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose the rezoning of the Property. Pursuant to SFCC 1987 Section 14-3.5(A)(1)(d), any person may submit a written request for rezoning, along with all submissions required by the SFCC 1987 Chapter 14 and any other information requested by the land use director as reasonably necessary to determine compliance with Chapter 14 ("Submittal Requirements").
4) Pursuant to SFCC 1987 Table 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.5(B)(1), and 14-3.5(C), the Commission has the authority to review and recommend the Governing Body approve or deny the rezoning request.
5) SFCC 1987 Section 14-3.5(B) sets out procedures for rezoning and requires the Commission to hold a public hearing, review the Application, make a recommendation to the Governing Body, and transmit the application, including any plans, to the Governing Body, together with a recommendation as to findings and conclusions, desirable changes and recommendations for approval or disapproval.
6) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(a)(i)-(iii), the Commission finds:
   a) There is no mistake in the original zoning.
   b) The Siler-Rufina area has seen increasing rezonings from industrial to commercial that have changed the character of the area.
   c) A rezoning from I-1 and I-2 to C-2 zoning would align with the intent of the General Plan and the Future Land Use of the parcel as "Community Commercial," as proposed in the General Plan Amendment for this site (Case #2025-11028).
7) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(b), the Commission finds that the Applicant submittal is a complete application as required by Chapter SFCC 1987, 14-3.5(C) "Approval Criteria," and the rezoning request does meet all rezoning approval criteria required by Chapter 14 SFCC 1987, Subsection 14-3.5(C).
8) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(c), the Commission finds that the applicant addressed compliance to General Plan Themes and Policies to allow for a change from I-1 and I-2 to C-2. The Rezoning request satisfies all rezoning approval criteria.

9) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(d), the Commission finds the Rezoning request provides sufficient information to address 14-3.5(C)(1)(d): the Project meets city policies regarding the provision of urban land sufficient to meet the amount, rate, and geographic location of growth of the city. The Project is located within an infill area and proposed to meet the needs of the community while being served by sufficient infrastructure.
10) Pursuant to SFCC 1987 Section 14-3.5(C)(1)(e), the Commission finds that the existing and proposed infrastructure in the associated Master Plan (Case #2025-11030), such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the proposed youth center use with improvements by the Applicant.
11) Pursuant to SFCC 1987 Section 14-3.5(C)(2), the Commission finds:
    a) The prevailing use and character of the Rufina St area is a mix of industrial, commercial, and multi-family developments. The rezoning from industrial to commercial creates consistency with adjacent parcels to the south while aligning with general plan themes and policies.
    b) The subject property is 3.87-acres, greater than the 2-acres required.
    c) C-2 zoning creates consistency with parcels to the south, indicating that the rezoning does not disproportionately benefit a select few at the expense of the wider community. Further, redevelopment of this site for a future youth center (Case #2025-11030), as proposed, is anticipated to bring broader economic benefits such as employment and expanded services to serve the general public interest.
12) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
13) The Commission has the power and authority to review and recommend the Governing Body approve Case #2025-11029 2904 Rufina St Rezoning from I-1 and I-2 to C-2.
14) The Applicant met the applicable Submittal Requirements.
15) The Commission recommended the Governing Body approve the requested rezoning because the application met all applicable code criteria for approval.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2025, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the rezoning as requested from I-1 and I-2 to C-2, as requested in the Application for Case #2025-11029.

Findings of Fact and Conclusions of Law

Case #2025-11030
2904 Rufina St Master Plan
Owner's/Applicant's Name – Girls, Inc of Santa Fe
Agent's Name – JenkinsGavin, LLC

THIS MATTER came before the Planning Commission ("Commission") for public hearing on November 6th, 2025 ("Hearing") upon the application ("Application") of JenkinsGavin, LLC ("Agent") for Girls, Inc of Santa Fe ("Applicant").

The Applicant requests a Master Plan to develop an approximate 55,478 square foot youth center on Lots 3 and 2A, 2-2 at 2904 Rufina St, totaling approximately 4.27-acres ("Project").

In related Case #2025-11028, the Applicant requests a General Plan Amendment for Lot 3 at 2904 Rufina St, approximately 3.87-acres, to change the Future Land Use designation from Industrial and Business Park to Community Commercial.

Additionally, in related Case #2025-11029, the Applicant requests a rezoning for Lot 3 at 2904 Rufina St, comprising approximately 3.87-acres, from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).

After conducting a public hearing and having heard from staff and all interested persons, the Planning Commission ("Commission") hereby FINDS, as follows:

FINDINGS OF FACT

1) SFCC 1987 Section 14-3.9(D) sets out approval criteria and requires the Commission to make complete findings of fact sufficient to show that these criteria have been met before recommending the Governing Body approve the Master Plan.
2) The Planning Commission heard Case #2025-11030 concurrently with Cases #2025-11028 and #2024-11029.
3) SFCC 1987 Section 14-3.9(B) sets out applicability standards, that a Master Plan is required in conjunction with rezoning applications in certain districts as provided in Article 14-4 (Zoning Districts). Case #2025-11029 is the associated rezoning application, which requested to rezone an approximate 3.87-acre parcel at 2904 Rufina St from Light Industrial (I-1) and General Industrial (I-2) to General Commercial (C-2).
4) SFCC 1987 Section 14-3.1 sets out certain procedures to be followed on the Application, including, without limitation, (a) a pre-application conference [SFCC 1987 §14-3.l(E)]; (b) an Early Neighborhood Notification ("ENN") meeting [SFCC 1987 § 14-3.1(F)(2)(a)(iii)]; and (c) compliance with notice and public hearing requirements [SFCC 1987 §14-3.1(H)(1)].
5) The Applicant attended a pre-application conference on December 12, 2024.

6) The Applicant conducted an ENN meeting on July 23, 2025, virtually via Zoom. The Agent, Applicant, City staff, and a local news reporter attended the ENN meeting. No members of the public attended the ENN meeting.
7) At the Hearing, the Commission received reports from staff, as well as testimony and evidence from the Applicant and their Agent prior to making a decision. The Commission opened the hearing to public comment; members of the public testified in support of the project without concern.
8) Once the Chair closed the Public Hearing, the Commission discussed a motion and voted to recommend the Governing Body approve a Master Plan.

CONCLUSIONS OF LAW

Under the circumstances and given the evidence and testimony submitted during the hearing, the Commission CONCLUDES as follows:

1) Pursuant to SFCC 1987 Section 14-3.1(H)(1), notice of the ENN meeting was properly given. The Applicant gave notice of the ENN meeting by posting signs on two (2) locations on the property and mailing notice to all tenants and property owners within 300 feet of the property. No neighborhood associations were located within 300 feet of the property, and none were mailed notice.
2) The ENN meeting was properly conducted, pursuant to SFCC 1987 Section 14-3.1(F).
3) The Applicant has the right under the SFCC to propose the Master Plan of the Property. Pursuant to SFCC 1987 Section 14-3.9(B)(1), A master plan is required in conjunction with rezoning applications in certain districts as provided in Article 14-4 (Zoning Districts).
4) Pursuant to SFCC 1987 Table 14-2.1-1: Review and Decision-Making Bodies and Responsibilities and Section 14-3.9(B)(3), All use and development of land within a master-planned area must comply with the provisions of the adopted master plan. Final actions by the governing body, land use boards and the land use director concerning rezonings, subdivisions, special use permits, development plans and construction permits shall include a specific finding or determination that the action complies with all applicable provisions of the master plan.
5) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a-d), the Commission finds:
   a) The master plan is consistent with the general plan;.
   b) development of the master plan area will contribute to the coordinated and efficient development of the community;
   c) development of the master plan area will contribute to the coordinated and efficient development of the community; and
   d) the existing and proposed infrastructure , such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development.
6) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(a-d), the Commission finds that the Applicant submittal is a complete application as required by Chapter SFCC 1987, 14-3.9(D)(1) “Approval Criteria,” and the Master Plan request does meet all approval criteria required by Chapter 14 SFCC 1987, Subsection 14-3.9(D)(1).
7) Pursuant to SFCC 1987 Section 14-3.9(D)(1)(d), the Commission finds that the existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities,

such as fire stations and parks, will be able to accommodate the proposed youth center use with improvements to be completed by the Applicant.

8) Pursuant to SFCC 1987 Section 14-3.1, all procedural requirements regarding the pre-application conference, ENN meeting, and notice of public hearing have been met.
9) The Commission has the power and authority to review and recommend the Governing Body approve Case #2025-11030 2904 Rufina St Master Plan.
10) The Applicant met the applicable Submittal Requirements.
11) The Commission recommended the Governing Body approve the requested Master Plan because the application met all applicable code criteria for approval, subject to the conditions and technical corrections recommended by staff.

WHEREFORE, IT IS ORDERED ON THE 4TH DAY OF DECEMBER 2025, BY THE PLANNING COMMISSION OF THE CITY OF SANTA FE:

Considering the foregoing findings and conclusions, the Commission recommends the Governing Body approve the Master Plan as requested in the Application for Case #2025-11030, subject to the Conditions of Approval and Technical Corrections listed in Attachment A of Staff's Report, with the following additional condition: "Applicant shall include a phasing plan at the time of Development Plan submittal, should the applicant wish to phase this project."

Conditions of Approval and Technical Corrections

1. Table of Conditions of Approval
2. Table of Technical Corrections
3. Development Review Team Compiled Comments

Conditions of Approval & Technical Corrections

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
1	Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects: All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres All city projects over two (2) acres in size. All city park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Archaeology	Prior to building permit approval
2	Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Current Planning	Prior to public hearing (COMPLETED)
3	~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review.	Current Planning	~~Prior to public hearing~~ Prior to development plan approval
4	Add Case #2025-11030 to Master Plan sheets	Current Planning	Prior to public hearing (COMPLETED)
5	Shall comply with the most currently adopted International Fire Code	Fire	Prior to public hearing (COMPLETED)
6	Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021	Fire	Prior to public hearing (COMPLETED)

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
7	Shall verify compliance with section D105 Aerial Fire Apparatus Access Road as per IFC 2021	Fire	Prior to public hearing (COMPLETED)
8	Historic drainage calcs should include offsite flows onto property (if applicable)	Rivers and Watershed	Prior to Development Plan approval (In drainage report)
9	Provide a full drainage report	Engineering	Prior to Development Plan approval
10	Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.	Engineering	Prior to Development Plan approval
11	Include pond sections and show how ponds will overflow.	Engineering	Prior to Development Plan approval
12	Include lighting plan with photometrics	Engineering	Prior to Development Plan approval
13	A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.	Engineering	Prior to Development Plan approval
14	The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Wastewater	Prior to recordation
15	All 4-inch sewer lines shall connect directly to the public sewer lines	Wastewater	Prior to recordation
16	The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Wastewater	Prior to recordation
17	An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Water	Prior to building permit approval
18	An approved Water Plan will be required for all new public water infrastructure and fire services.	Water	Prior to development plan approval
19	A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	Water	At time of development

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
20	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	Water	At time of development
21	Each lot shall be served by a separate City water service.	Water	At time of development
22	See attached comments response letter dated 9/25/25 from Wilson & Company regarding Bohannon Huston, initial draft Traffic Impact Study dated 8/725	Traffic	Prior to public hearing (COMPLETED)
23	See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25	Traffic	Prior to Development Plan Approval
24	Elevations submitted for the development plan shall include a detailed Points analysis that is intergraded with the Elevations for review.	Current Planning	At time of Development Plan

Technical Corrections			
#	**Technical Correction**	**Dept. or Division**	**To be completed:**
1	Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
2	Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
3	Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
4	Include attached notes on development plan.	Engineering	Prior to recordation of Development Plan
5	The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe	Wastewater	-
6	Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property	Water	Prior to water plan approval

Cases #2025-11028, 2025-11029, and 2025-110330. 2904 Rufina St General Plan Amendment, Rezoning, and Master Plan. JenkinsGavin, Inc, Agent, for Girls Inc of Santa Fe, Applicant, requests a General Plan Amendment, Rezoning, and Master Plan for the property at 2904 Rufina St. This property is comprised of 2 parcels totaling approximately 4.85 acres, currently zoned I-1 (Light Industrial), I-2 (General Industrial), and C-2 (General Commercial).

This application was received on August 11, 2025 and has been reviewed by Planning Division staff (Staff) and the City's Development Review Team (DRT). Attached are the initial DRT review comments including conditions of approval and technical corrections. I would like to highlight and summarize the following key items:

A. Initial Planning Division Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by Planning Division staff and the following necessary revisions have been identified:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Submit a parking analysis at time of Development Plan
5. All utilities shall be underground

Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review or place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review

B. Initial DRT Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by the DRT and the following necessary revisions have been identified:

1. Shall comply with the most currently adopted International Fire Code
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
4. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services
5. An approved Water Plan will be required for all new public water infrastructure and fire services.
6. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service
7. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.
8. Each lot shall be served by a separate City water service.
9. Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.
10. Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.
11. Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.
12. Archaeological review will be required if the applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc.
    a. 14-3.13(B)(3) Suburban Archaeological Review District
        i. In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects:
        ii. All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres
        iii. All city projects over two (2) acres in size.
        iv. All city park projects over one (1) acre in size.
    b. Utility Mains:
        i. An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.
13. Provide full drainage report.

14. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.
15. Include pond sections and show how ponds will overflow
16. Include lighting plan with photometrics
17. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.
18. Include attached notes.
19. Historic drainage calcs should include offsite flows onto property (if applicable)
20. The 6-inch sewer service line(s) will be required to connect to a sewer manhole
21. All 4-inch sewer lines shall connect directly to the public sewer lines
22. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field
23. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe

The following DRT members did not have comments at this time:

- Parks and Open Space
- Water resources
- Metropolitan Planning organization
- Traffic

The following DRT comments are pending at this time:

- ADA
- Santa Fe Public Schools

C. Prior to Planning Commission, the following DRT comments must be satisfied:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Shall comply with the most currently adopted International Fire Code
5. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
6. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
7. An approved Water Plan will be required for all new public water infrastructure and fire services.
8. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.

The full DRT memos are attached for your review. Once revised submittals to the application are accepted, a public hearing date may be scheduled. Please let me know if you have any questions or concerns.

Thank you,

Alexa Hempel
Senior Planner, Planning and Land Use Department

Development Review Team (DRT)
Comment Form for
Planning Commission

Date: August 19, 2025

DRT Member: Fire Marshal Geronimo Griego

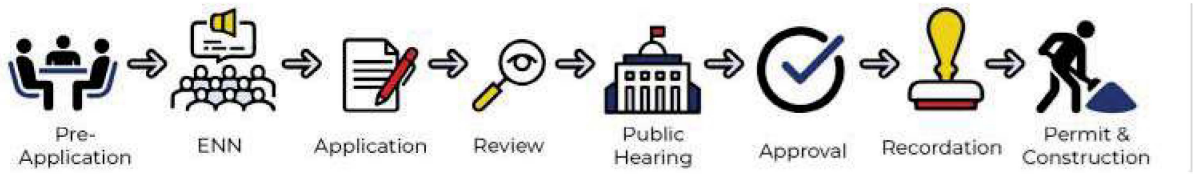
Dept/Div: Fire Marshal's Office

Case No.: 2025-11028,11029, & 11030

Case Planner: Alexa Hempel, Senior Planner

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall comply with the most currently adopted International Fire Code.	*Prior to Public Hearing*	
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021.		
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.

Explanation of Conditions or Corrections (if needed):

1. Verify that the right city adopted code is reference in documents for submission. International Fire Code (IFC) 2021.
2. Shall verify that building is provided with automatic fire sprinklers for proposed layout.
3. Shall verify two points of access to ladder building for proposed site layout conditions.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. Provide full drainage report.	Prior to Development Plan approval	
2. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.		
3. Include pond sections and show how ponds will overflow.		
4. Include lighting plan with photometrics		
5. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1. Include attached notes.		
2.		
3.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

See following pages for notes required on plat or plans

Form Updated: March 2024

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

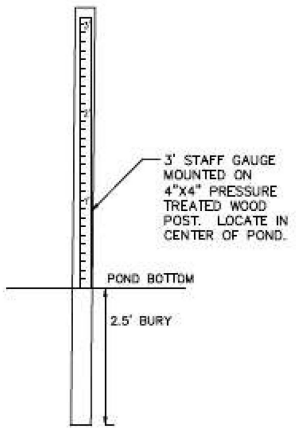
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

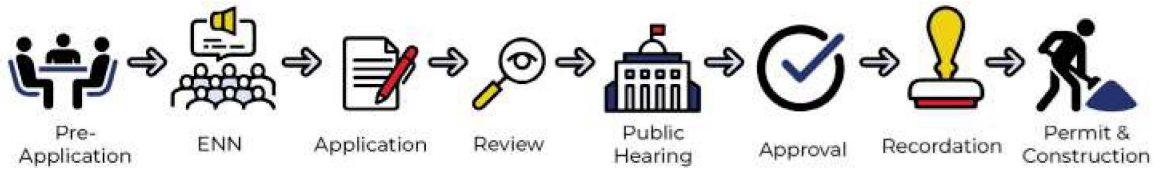
DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Development Review Process Flow Chart

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Historic drainage calcs should include offsite flows onto property (if applicable)	Include in drainage report with development plan	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1.		
2.		
3.		
4.		

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Existing vs Proposed Drainage Areas: looks like some ponding and drainages will be filled due to proposed building sites and new amenities; how is the developer planning to accommodate the excess water created by both the increase in imperviousness and the filling of these ponds? How do they plan to get the water to the new ponds, will it be piped? Will buildings have gutters and cisterns? Will landscaped areas be swaled to hold water? Etc…

Historical drainage: are they making sure to account for the entire basin in their drainage calcs, including offsite flows entering the property, esp. off the parking lot behind the school to the south if there is any?

From: Philip A. Gallegos, PE, Senior Transportation Engineer

CC: Robert Luna, PE, PTOE, Traffic Engineering Practice Lead, SW Region

Date: 10/17/2025

Re: Girl's Inc. TIA Review

Wilson and Company has reviewed the Revised DRAFT TIA dated October 6, 2025 for the Girl's Inc. Development prepared by Bohannan Huston and have the following comments. Please let me know if you have any questions or require further information.

REPORT COMMENTS

- All original Comments have been addressed
- On page 48 the report states that the common crash type was rear-end collisions for Richards and Rufina however on table 24 the highest crash type is Another Vehicle at an Angle. This should be corrected in the narrative.
- There is a large percentage of crashes that were not classified by Crash Type. The Crash Summary Tables shall also include the percentage of crash types with the "not available or not classified" crash types removed from the total number of crashes. Therefore, showing percentages of total known crash types.
- All developer mitigations shall be shown on the developments site plan.
- For the intersection of Calle del Cielo and Cerrillos Road the report recommends evaluation of a cost share with the COSF due to the spillover occurring in existing condition. Since this LOS is made worse by the added traffic by the developer this mitigation shall be implemented by the developer.

Sincerely,

Philip A Gallegos, PE
Senior Transportation Engineer

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case # 2025-11028/11029/11030

Conditions of Approval:	Must be completed by:	Applicant response**:
1. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Prior to Building Permit Approval	
2. An approved Water Plan will be required for all new public water infrastructure and fire services.	Prior to approval of Development Plan	
3. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	At the time of development	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Each lot shall be served by a separate City water service.	At the time of development	

Technical Corrections:	Must be completed by:	Applicant response**:
1. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.	Prior to Water Plan Approval	

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

MINUTES

REGULAR MEETING OF THE PLANNING COMMISSION
November 6, 2025, AT 6:00 PM

A. ROLL CALL

Commissioners Present:
Chair Janet Clow
Commissioner Scott Barber
Commissioner Matt Embry
Commissioner Sasha McGhee
Commissioner Gurushabad Mirando
Commissioner Thomas (TJ) Rieland

B. PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Commissioner Barber.

C. APPROVAL OF AGENDA

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve the agenda with postponement of the minutes from October 2, 2025, to November 20, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

D. APPROVAL OF MINUTES

1. July 17, 2025

MOTION: Commissioner Embry moved, seconded by Commissioner Rieland, to approve the minutes from the Planning Commission meeting on July 17, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

2. September 4, 2025

MOTION: Commissioner McGhee moved, seconded by Commissioner Mirando, to approve the minutes from Study Session of the Planning Commission on September 4, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

3. September 4, 2025

MOTION: Commissioner McGhee moved, seconded by Commissioner Mirando, to approve the minutes from the Planning Commission meeting on September 4, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

4. September 18, 2025

MOTION: Commissioner Mirando moved, seconded by Commissioner Barber, to approve the minutes from the Planning Commission meeting on September 18, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes

Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

5. October 2, 2025 (Postponed)

MOTION: No motion or vote.

VOTE: None

6. October 16, 2025

MOTION: Commissioner Mirando moved, seconded by Commissioner Rieland, to approve the minutes from the Planning Commission meeting on October 16, 2025.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

E. APPROVAL OF FINDINGS/CONCLUSIONS

1. **Case #2024-9320. 7205 Plaza Central Development Plan:** Pax Consulting, Agent, for Zydeco LLC, owner and applicant ("Applicant"), requests approval of a Development Plan for up to 165 units, a clubhouse, swimming pool and neighborhood coffee shop at property address located at 7205 Plaza Central and is zoned C-1 (office and related commercial). It consists of a 7.9-acre lot as the result of a lot line adjustment, zoned C-1 (Alexa Hempel, Case Manager, anhemple@santafenm.gov).

MOTION: Commissioner Mirando moved, seconded by Commissioner Barber, to approve Findings for Case #2024-9320 without changes or corrections.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: Commissioner Sasha McGhee: Yes

F. NEW BUSINESS

1. **Case #2025-11028. 2904 Rufina General Plan Amendment:** JenkinsGavin, Agent, for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a General Plan amendment changing the Future Land Use Map designation for Lot 3, comprising approximately 3.87-acres, located at 2904 Rufina Street, from a duel mapped area of "Industrial" and "Business Park" to "Community Commercial." (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11028, 2904 Rufina General Plan Amendment, as is.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

2. **Case #2025-11029. 2904 Rufina Rezoning:** JenkinsGavin, Agent, for Girls, Inc of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a rezoning, changing the Official Zoning Land Use Map designation for Lot 3 at 2904 Rufina Street, comprising approximately 3.87-acres, from a duel mapped area of "Light Industrial" (I-1) and "General Industrial" (I-2) to "General Commercial" (C-2). (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11029, 2904 Rufina Rezoning, as is.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

3. **Case #2025-11030. 2904 Rufina Master Plan:** JenkinsGavin, Agent, for Girls, Inc., of Santa Fe, "Applicant," asks the Planning Commission to recommend that the Governing Body approve a Master Plan of a proposed youth center at 2904 Rufina Street on Lots 3 and 2A, 2-2, totaling approximately 4.27-acres. Lot 3 is approximately 3.87-acres, and Lot 2A, 2-2 is approximately 0.399-acres and is located adjacent to the southwest side of Lot 3. (Alexa Hempel, Case Manager, anhempel@santafenm.gov).

PUBLIC COMMENTS: Seven (7) members of the public were sworn in and gave comments in favor of the 2904 Rufina Street Master Plan.

MOTION: Commissioner McGhee moved, seconded by Commissioner Embry, to approve Case #2025-11030, 2904 Rufina Master Plan, as is.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

4. **Case #2025-10685. Tierra Contenta Preliminary Subdivision Plat:** JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant"), requests review and approval of a Preliminary Subdivision Plat for 16 development tracts and six open space tracts for a total of 22 tracts and Innovative Street Design. The subject lots are 216.5 acres and are located at 6120, 6130, 6150, and 6135 Paseo del Sol. The lots are zoned Planned Residential Community District (PRC) and lie within the Suburban Archaeological Review District. (Rebekah Clouser, Case Manager, reclouser@santafenm.gov).

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve Case #2025-10685, Tierra Contenta Preliminary Subdivision Plat, subject to conditions of approval and technical corrections, and on the condition that the neighborhood park design and drainage ponding fencing shall be postponed in order to allow the Applicant and staff to discuss and resolve prior to final subdivision plat.

VOTE: The motion was approved on the following Roll Call vote:

For:
Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

---

5. **Case #2025-10688. Tierra Contenta Preliminary Subdivision Plat Variance (Slopes):** JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant"), requests a variance from SFCC 14-8.2(D)(2)(b) Terrain Management standards prohibiting disturbances of natural slopes of thirty percent (30%) for an approximate area of 27,179 square feet. The subject lots are approximately 216.5 acres and located at 6120, 6130, 6150, and 6135 Paseo del Sol, zoned Planned Residential Community District (PRC). (Rebekah Clouser, Case Manager, reclouser@santafenm.gov).

PUBLIC COMMENTS: One (1) member of the public was sworn in and gave comment not in favor of the Tierra Contenta Preliminary Subdivision Plat Variance.

MOTION: Commissioner Mirando moved, seconded by Commissioner McGhee, to approve Case #2025-10688, Tierra Contenta Preliminary Subdivision Plat Variance (Slopes), subject to conditions of approval and technical corrections.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Scott Barber: Yes
Commissioner Matt Embry: Yes
Commissioner TJ Rieland: Yes
Commissioner Gurushabad Mirando: Yes
Commissioner Sasha McGhee: Yes

Against: None

Abstain: None

---

6. **Case #2025-10690. Tierra Contenta Preliminary Subdivision Plat Variance (Significant Trees):** The request for a variance from SFCC 14-8.4(F)(5) for the removal and preservation of significant trees was withdrawn by JenkinsGavin, Inc., Agent, for Homewise, Inc., owner and applicant ("Applicant").

---

7. **Case #2025-11006. Vistas de la Sierra Phase 3:** Liaison Planning Services, Inc., Agent, for Forestar (USA) Real Estate Group, Inc., owner and applicant ("Applicant"), requests review and approval of a Preliminary Subdivision Plat, per § 14-3.7(B)(3) of the Land Development Code, for a 128-lot residential subdivision. The subject property is a 24.423-acre parcel located at 3800 Governor Miles Road and west of Richards Avenue. The proposed subdivision is Phase 3 and consists of 2 separate lots. Tract #A3 is 16.653 acres and Tract 3A4 is 7.77 acres. The subject property is zoned R-5 (residential 5 units per acre). (Claudia Kath, Case Manager, cmkath@santafenm.gov).

PUBLIC COMMENTS: Seven (7) members of the public were sworn in and gave comments not in favor of Vistas de la Sierra Phase 3.

MOTION: Commissioner McGhee moved, seconded by Commissioner Rieland, to approve Case #2025-11006, Vistas de la Sierra Phase 3, subject to conditions of approval and technical corrections, as well as the additional four conditions outlined by staff in discussion with the Applicant, and on the condition that the Applicant agree to limit the seven houses abutting Nava Ade Homeowners Association to single-story homes.

VOTE: The motion was approved on the following Roll Call vote:

For: Commissioner Sasha McGhee: Yes
Commissioner Gurushabad Mirando: Yes

Commissioner TJ Rieland: Yes
Commissioner Matt Embry: Yes
Commissioner Scott Barber: Yes

Against: None

Abstain: None

G. STAFF COMMUNICATIONS

A webinar on a new software platform to help regulate and manage short-term rentals will be held on November 13, 2025, at 12:00 P.M. An open house regarding the same will be held on November 13, 2025, at 5:00 P.M. Details are available on the Planning Commission website.

H. MATTERS FROM THE COMMISSION

It was confirmed that a Study Session of the Planning Commission will be held on November 7, 2025, at 10:00 A.M. in Council chambers.

CITY OF SANTA FE, NEW MEXICO

RESOLUTION NO. 2026-

A RESOLUTION

ADOPTING A MASTER PLAN, FOR THE TWO TRACTS OF LAND LOCATED AT 2904 RUFINA STREET, LOTS 3 AND 2A, 2-2, WITHIN THE CITY OF SANTA FE, COMPRISING AN AREA OF APPROXIMATELY 4.27 ACRES. (CASE NO. 2025-11030)

WHEREAS, the agent for the owner of the two tracts of land located at 2904 Rufina Street comprising approximately 4.27 acres of land (the "Subject Property"), as shown in Exhibit A, submitted a Master Plan application to the City of Santa Fe ("City") for the development of a youth center ("Master Plan"); and

WHEREAS, SFCC 1987, Section 14-3.9(C)(4)[1], requires the Planning Commission to review and make recommendation of a Master Plan to the Governing Body; and

WHEREAS, the Master Plan requires an early neighborhood notification ("ENN") meeting, and an ENN meeting was held on July 23, 2025; and

WHEREAS, approval of a Master Plan requires the following findings as set forth in SFCC 1987, Section 14-3.9(D)[2]:

[1]The provisions now appear at SFCC 1987, Section 14-2.1F.5(IV)(a), effective January 1, 2026, following recodification.
[2] The provisions now appear at SFCC 1987, 14-2.1F.5(IV)(a), effective January 1, 2026, following recodification.

(a) The Master Plan is consistent with the general plan;

(b) The Master Plan is consistent with the purpose and intent of the zoning districts that apply to, or will apply to, the Master Plan area, and with the applicable use regulations and development standards of those districts;

(c) Development of the Master Plan area will contribute to the coordinated and efficient development of the community; and

(d) The existing and proposed infrastructure, such as the streets system, sewer and water lines, and public facilities, such as fire stations and parks, will be able to accommodate the impacts of the planned development; and

WHEREAS, the Planning Commission reviewed evidence related to the proposed Master Plan and held a public hearing on November 6, 2025; and

WHEREAS, based on the Planning Commission Staff Report, attachments, and the testimony and evidence presented at the public hearing, the Planning Commission voted to recommend approval of the Master Plan subject to Conditions of Approval recommended by Staff; and

WHEREAS, the Planning Commission found all applicable review criteria in SFCC 1987, Section 14-3.9(D)(a-d)[3] to have been met; and

WHEREAS, on February 25th, 2026 the Governing Body held a public hearing on the Master Plan and having reviewed the Governing Body Staff Report, the recommendation of the Planning Commission, and the evidence obtained at the public hearing; and determined that the Master Plan, as recommended by the Planning Commission, meets the approval criteria set forth in SFCC 1987, Section 14-3.9(D)[4].

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF SANTA FE that the Master Plan for the Subject Property, as described in Exhibit B, is

[3] The provisions now appear at SFCC 1987, 14-2.1F.5(IV), effective January 1, 2026, following recodification.
[4] The provisions now appear at SFCC 1987, 14-2.1F.5(IV), effective January 1, 2026, following recodification.

approved, and subject to the Conditions of Approval, as shown in Exhibit C, is adopted.

PASSED, APPROVED, and ADOPTED this ____ day of ____, 2026.

GENERAL NOTES

1. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH APPLICABLE PROVISIONS OF CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
2. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF EACH APPLICABLE CITY OF SANTA FE ORDINANCE ADOPTED PRIOR TO SUBMITTAL WITH BUILDING PERMIT APPLICATION THAT MODIFIES ANY PROVISIONS OR REQUIREMENTS CALLED FOR IN CHAPTER 14, LAND DEVELOPMENT CODE, SFCC 1987 AND SUBSEQUENT AMENDMENTS.
3. PROPERTY WILL BE SUBJECT TO THE WATER ALLOCATION AND/ OR WATER OFFSET/ RETROFIT PROVISIONS OF ORDINANCE NO 2002-29 AND RESOLUTION 2002-55 AT THE TIME OF PERMIT APPLICATION OR WATER HOOKUP REQUEST. COMPLIANCE SHALL BE ACHIEVED BY USE OF RETROFIT CREDITS OR WATER TRANSFERS, IF APPLICABLE.
4. COMPLIANCE WITH PROVISIONS OF GUNNISON'S PRAIRIE DOG ORDINANCE SHALL BE COMPLETED PRIOR TO GRADING OPERATIONS.
5. AMERICANS WITH DISABILITIES ACT (ADA) INSPECTION SHALL BE CONDUCTED PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY. THE CONTRACTOR SHALL CONTACT CITY STAFF TO SCHEDULE AN INSPECTION.
6. FENCES, WALLS, OR OTHER OBSTRUCTIONS SHALL NOT BE PLACED OR CONSTRUCTED ACROSS PUBLIC SANITARY SEWER EASEMENTS, EXCEPT WHERE SHOWN AS NEEDED.
7. UTILITY EXPANSION CHARGES (UEC) SHALL BE PAID AT THE TIME OF BUILDING PERMIT APPLICATION FOR EACH LOT BY CONTACTING THE CITY OF SANTA FE PERMIT AND DEVELOPMENT REVIEW DIVISION.
8. ALL PROPOSED CHANGES TO THE APPROVED IMPROVEMENTS PLANS SHALL RECEIVE PRIOR APPROVAL BY THE CITY OF SANTA FE.
9. ALL PROPOSED IMPROVEMENTS WILL COMPLY WITH THE CURRENT CoSF WATER CONSERVATION STAGE.
10. LANDSCAPE DESIGN SHALL COMPLY WITH APPLICABLE PROVISIONS OF SFCC SECTION 14-8.4.
11. PROPERTY DEVELOPMENT MAY BE SUBJECT TO THE PROVISIONS OF SECTION 14-8.4(F)(5) "PRESERVATION OF EXISTING TREES" PER THE LAND USE DIRECTOR.
12. PROPERTY DEVELOPMENT IS REQUIRED TO COMPLY WITH THE PROVISIONS OF CoSF ORD. NO. 2008-02 (IMPACT FEES).
13. PROPERTY DEVELOPMENT, BOTH PUBLIC AND PRIVATE OWNERSHIP, SHALL COMPLY WITH THE CoSF ORDINANCE NO 2002-20 (TERRAIN AND STORMWATER MANAGEMENT) AT THE TIME OF BUILDING PERMIT APPLICATION.
14. FIRE DEPARTMENT ACCESS SHALL BE MAINTAINED THROUGHOUT ALL DEVELOPMENT CONSTRUCTION PHASES, PER IFC 1410.1.
15. AN APPROVED WATER SUPPLY FOR FIRE PROTECTION, EITHER TEMPORARY OR PERMANENT, SHALL BE MADE AVAILABLE AS SOON AS COMBUSTIBLE MATERIAL ARRIVES ON THE SITE, PER IFC 1412.1.
16. PERMANENT TRAFFIC CONTROL DEVICES SHALL BE INSTALLED BY THE DEVELOPER PER APPROVED PLAN.
17. THIS DEVELOPMENT LIES OUTSIDE OF A CITY OF SANTA FE HISTORIC DISTRICT.
18. THE LAYOUT SHOWN HEREON IS CONCEPTUAL AND MAY BE MODIFIED AS PART OF THE DEVELOPMENT PLAN PROCESS WITHOUT THE NEED FOR A MASTER PLAN AMENDMENT.

GENERAL NOTES

1. LANDSCAPE DESIGN SHALL COMPLY WITH ALL APPLICABLE PROVISIONS OF SFCC SECTION 14-8.4.
2. ALL DECIDUOUS TREES TO BE 3-INCH MINIMUM CALIPER.
3. ALL EVERGREEN TREES TO BE 6-FEET MINIMUM IN HEIGHT.
4. NEW PLANTS TO BE WATER-WISE CITY APPROVED PLANTS.
5. ALL PLANT MATERIAL SHALL BE COLD-HARDY TO USDA CLASSIFICATION ZONE 5.
6. NEW PLANT MATERIAL TO BE MULCHED TO A 2-INCH MINIMUM DEPTH.
7. A MINIMUM OF ONE TREE AND THREE SHRUBS SHALL BE PLANTED PER 500 SF OF REQUIRED PONDING AREA.
8. STREET TREES AND PEDESTRIAN WAY TREES SHALL BE PLANTED WITHIN THE ACCEPTABLE SPACING RANGE DESCRIBED IN SFCC SECTION 14-8.4.
9. THE LAYOUT SHOWN HEREON IS CONCEPTUAL AND MAY BE MODIFIED AS PART OF THE DEVELOPMENT PLAN PROCESS WITHOUT THE NEED FOR MASTER PLAN AMENDMENT.

GIRLS INC. DRAINAGE ANALYSIS SUMMARY

THE SUBJECT PROPERTY IS CURRENTLY 4.28 ACRES IN SIZE WITH A GENTLE GRADE TOWARDS THE NORTH. THERE ARE NO MAPPED FEMA FLOOD ZONES NOR DEFINED DRAINAGES ON THE SITE. THE PROPERTY HAD BEEN ALTERED EXTENSIVELY AND WAS USED FOR MORE THAN 50 YEARS AS A NURSERY. AN EXAMINATION OF GOOGLE EARTH HISTORIC PHOTOS SHOWS AT TIMES MORE GREEN HOUSES AND PARKING LOTS THAN WHEN THE GIRLS INC. ACQUIRED THE PROPERTY. PRIOR TO ANY SITE DEVELOPMENT, THE SITE HAD SOILS THAT WERE TYPICALLY MAPPED BY THE SOIL CONSERVATION SERVICE AS BEING HYDROLOGIC GROUP C. VEGETATION WAS DOMINATED BY SAGE BRUSH AND GRASSES, WITH A GOOD BASAL COVERAGE.

WITH THE NURSERY DEVELOPMENT, IMPERVIOUS AREAS WERE ADDED, INCLUDING GREEN HOUSES AND PARKING LOTS (56,660 SF OF IMPERVIOUS AREA WITH CN OF 98) AND THE SOILS WERE ENHANCED WITH EXTENSIVE MULCHING AND VEGETATION AND THE ADDITION OF SEVERAL PONDS. WITH THESE IMPROVEMENTS THE NET EFFECT HAS STORMWATER RUNOFF DECREASED DUE TO SOIL ENHANCEMENTS, INCREASED VEGETATION ON MUCH OF THE SITE AND THE ADDITION OF SEVERAL PONDS. AS A RESULT THE RUNOFF DECREASED SLIGHTLY FROM THE SITE.

SITE DEVELOPMENT WILL INCLUDE CLEARING OF 56,700 SF OF IMPERVIOUS AREA (GREENHOUSES, CONCRETE, ASPHALT AND GRAVEL PARKING LOTS AND DRIVES) ON THE SITE AND INSTALLING APPROXIMATELY 96,100 SF OF IMPERVIOUS AREA, OR ABOUT 40,000 SF OF ADDITIONAL IMPERVIOUS AREA. MOST OF THE HIGHLY VEGETATED AND ENHANCED SOILS AREAS LOCATED IN THE NORTHERN PORTION OF THE SITE WILL BE LEFT INTACT. RUNOFF WILL INCREASE POST DEVELOPMENT AND THEREFORE ADDITIONAL PONDING VOLUMES WILL NEED TO BE CREATED.

THE PROPOSED PLAN IS TO REUSE SEVERAL OF THE EXISTING PONDS AND ADD A COUPLE MORE. SOME OF THE EXISTING PONDS WILL BE RESHAPED TO INCREASE THEIR HOLDING CAPACITY. IN NO CASE WILL POND DEPTH EXCEED THREE FEET. THE PONDS WILL DETAIN THE WATER AND REDUCE THE PEAK FLOW FROM THE SITE.

Conditions of Approval and Technical Corrections

1. Table of Conditions of Approval
2. Table of Technical Corrections
3. Development Review Team Compiled Comments

Conditions of Approval & Technical Corrections

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
1	Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects: All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres All city projects over two (2) acres in size. All city park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Archaeology	Prior to building permit approval
2	Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)	Current Planning	Prior to public hearing (COMPLETED)
3	~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~ Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review **or** place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review.	Current Planning	~~Prior to public hearing~~ Prior to development plan approval
4	Add Case #2025-11030 to Master Plan sheets	Current Planning	Prior to public hearing (COMPLETED)
5	Shall comply with the most currently adopted International Fire Code	Fire	Prior to public hearing (COMPLETED)
6	Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021	Fire	Prior to public hearing (COMPLETED)

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
7	Shall verify compliance with section D105 Aerial Fire Apparatus Access Road as per IFC 2021	Fire	Prior to public hearing (COMPLETED)
8	Historic drainage calcs should include offsite flows onto property (if applicable)	Rivers and Watershed	Prior to Development Plan approval (In drainage report)
9	Provide a full drainage report	Engineering	Prior to Development Plan approval
10	Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.	Engineering	Prior to Development Plan approval
11	Include pond sections and show how ponds will overflow.	Engineering	Prior to Development Plan approval
12	Include lighting plan with photometrics	Engineering	Prior to Development Plan approval
13	A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.	Engineering	Prior to Development Plan approval
14	The 6-inch sewer service line(s) will be required to connect to a sewer manhole	Wastewater	Prior to recordation
15	All 4-inch sewer lines shall connect directly to the public sewer lines	Wastewater	Prior to recordation
16	The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field	Wastewater	Prior to recordation
17	An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Water	Prior to building permit approval
18	An approved Water Plan will be required for all new public water infrastructure and fire services.	Water	Prior to development plan approval
19	A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	Water	At time of development

Conditions of Approval			
#	**Condition of Approval**	**Dept. or Division**	**To be completed:**
20	Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	Water	At time of development
21	Each lot shall be served by a separate City water service.	Water	At time of development
22	See attached comments response letter dated 9/25/25 from Wilson & Company regarding Bohannon Huston, initial draft Traffic Impact Study dated 8/725	Traffic	Prior to public hearing (COMPLETED)
23	See attached comments response letter dated 10/17/25 from Wilson & Company regarding Bohannon Huston, revised draft Traffic Impact Study dated 10/6/25	Traffic	Prior to Development Plan Approval
24	Elevations submitted for the development plan shall include a detailed Points analysis that is intergraded with the Elevations for review.	Current Planning	At time of Development Plan

Technical Corrections			
#	**Technical Correction**	**Dept. or Division**	**To be completed:**
1	Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
2	Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
3	Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.	Landscape, Irrigation, Outdoor Lighting	Prior to recordation of Development Plan
4	Include attached notes on development plan.	Engineering	Prior to recordation of Development Plan
5	The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe	Wastewater	-
6	Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property	Water	Prior to water plan approval

From: Alexa Hempel, Senior Planner

Cases #2025-11028, 2025-11029, and 2025-110330. 2904 Rufina St General Plan Amendment, Rezoning, and Master Plan. JenkinsGavin, Inc, Agent, for Girls Inc of Santa Fe, Applicant, requests a General Plan Amendment, Rezoning, and Master Plan for the property at 2904 Rufina St. This property is comprised of 2 parcels totaling approximately 4.85 acres, currently zoned I-1 (Light Industrial), I-2 (General Industrial), and C-2 (General Commercial).

This application was received on August 11, 2025 and has been reviewed by Planning Division staff (Staff) and the City's Development Review Team (DRT). Attached are the initial DRT review comments including conditions of approval and technical corrections. I would like to highlight and summarize the following key items:

A. Initial Planning Division Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by Planning Division staff and the following necessary revisions have been identified:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Submit a parking analysis at time of Development Plan
5. All utilities shall be underground

Applicant shall consolidate Lots 3 and 2A, 2-2 concurrent with Development Plan review or place appropriate easements between Lots 3 and 2A, 2-2 in perpetuity concurrent with Development Plan review

B. Initial DRT Review Summary

Your General Plan Amendment, Rezoning, and Master Plan applications have been reviewed by the DRT and the following necessary revisions have been identified:

1. Shall comply with the most currently adopted International Fire Code
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
4. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services
5. An approved Water Plan will be required for all new public water infrastructure and fire services.
6. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service
7. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.
8. Each lot shall be served by a separate City water service.
9. Provide a landscape design compliant with City of Santa Fe Codes Chapter 14-8.4 Landscape and Site Design.
10. Provide a landscape irrigation design compliant with City of Santa Fe Codes Chapter 14-8.4(E) Landscape and Site Design Water Harvesting and Irrigation Standards and the City of Santa Fe Landscape Irrigation Design Standards (LIDS) Manual.
11. Provide an outdoor lighting plan with photometric data per 14-8.9(C) COSF code. A lighting design with footcandle points is required.
12. Archaeological review will be required if the applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc.
    a. 14-3.13(B)(3) Suburban Archaeological Review District
        i. In this district, an archaeological clearance permit shall be required prior to approval of the final development plan or plat for the following projects:
        ii. All annexations, rezonings, subdivisions, planned unit developments , or other development requiring approval by the Planning Commission, having over ten (10) acres
        iii. All city projects over two (2) acres in size.
        iv. All city park projects over one (1) acre in size.
    b. Utility Mains:
        i. An archaeological clearance permit is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.
13. Provide full drainage report.

14. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.
15. Include pond sections and show how ponds will overflow
16. Include lighting plan with photometrics
17. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.
18. Include attached notes.
19. Historic drainage calcs should include offsite flows onto property (if applicable)
20. The 6-inch sewer service line(s) will be required to connect to a sewer manhole
21. All 4-inch sewer lines shall connect directly to the public sewer lines
22. The Wastewater Division has concerns for the existing public sewer line with regards to the sites existing conditions. We are requesting to do a walk thru with the design engineer to discuss the landscaping, access and the condition of the sewer line in the field
23. The Wastewater Division shows all existing public sewer lines being 8-inch concrete pipe

The following DRT members did not have comments at this time:

- Parks and Open Space
- Water resources
- Metropolitan Planning organization
- Traffic

The following DRT comments are pending at this time:

- ADA
- Santa Fe Public Schools

C. Prior to Planning Commission, the following DRT comments must be satisfied:

1. Add all textures/symbols used on Proposed Site Master Plan (Sheet C-2) into legend (ex: gravel texture, utility lines, log shaped drawings, etc)
2. ~~Appropriate easements must be in place to cross between Lot 3 and 2-2 in perpetuity~~
3. Add Case #2025-11030 to Master Plan sheets
4. Shall comply with the most currently adopted International Fire Code
5. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021
6. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021
7. An approved Water Plan will be required for all new public water infrastructure and fire services.
8. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.

The full DRT memos are attached for your review. Once revised submittals to the application are accepted, a public hearing date may be scheduled. Please let me know if you have any questions or concerns.

Thank you,

Alexa Hempel
Senior Planner, Planning and Land Use Department

Development Review Team (DRT)
Comment Form for
Planning Commission

Date: August 19, 2025

DRT Member: Fire Marshal Geronimo Griego

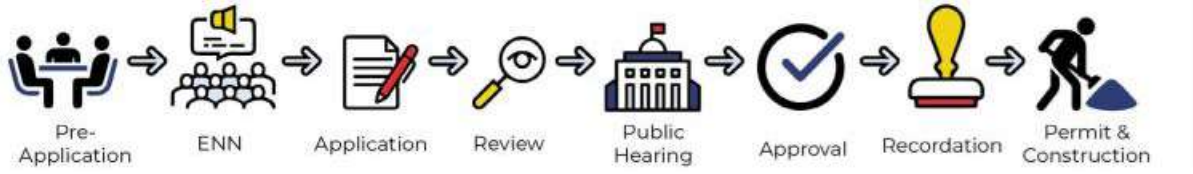
Dept/Div: Fire Marshal's Office

Case No.: 2025-11028,11029, & 11030

Case Planner: Alexa Hempel, Senior Planner

DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *At the time of development* -

Development Review Process Flow Chart

Form Updated: September 2023

*See the *2024 Development Review Schedule* for details

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

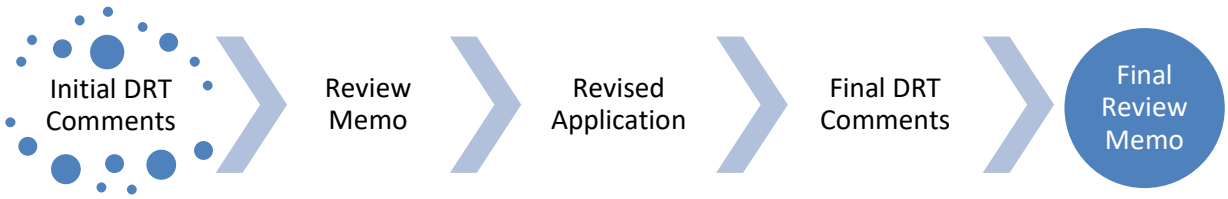
Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Shall comply with the most currently adopted International Fire Code.	*Prior to Public Hearing*	
2. Shall verify compliance with section 903 Automatic Sprinkler Systems of the IFC 2021.		
3. Shall verify compliance with section D105 Aerial Fire Apparatus Access Roads as per IFC 2021.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1.



Explanation of Conditions or Corrections (if needed):

1. Verify that the right city adopted code is reference in documents for submission. International Fire Code (IFC) 2021.
2. Shall verify that building is provided with automatic fire sprinklers for proposed layout.
3. Shall verify two points of access to ladder building for proposed site layout conditions.

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Case Planner: Alexa Hempel

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	Must be completed by:	Applicant response**:
1. Archaeological review will be required if The applicant exceeds 550-linear feet of utility lines including but not limited to water, gas, sewer, electric, power, etc. 14-3.13(B)(3) Suburban Archaeological Review District In this district, an archaeological clearance *permit* shall be required prior to approval of the final *development* plan or *plat* for the following projects: All annexations, rezonings, subdivisions, planned unit *developments* , or other *development* requiring approval by the Planning Commission, having over ten (10) acres All *city* projects over two (2) acres in size. All *city* park projects over one (1) acre in size. (4) Utility Mains: An archaeological clearance *permit* is required for new construction of sewer mains or main lines of other utilities such as telephone lines, gas lines, and fiber optics, including the entire construction easement: With an extension of sixty (60) feet or more if the main is in the historic downtown archaeological review district; With an extension of five hundred fifty (550) or more if the main is in the river and trails or suburban archaeological review district.	Building permitting	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	Must be completed by:	Applicant response**:

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Conditions of Approval:	**Must be completed by:**	**Applicant Response**:**
1. Provide full drainage report.	Prior to Development Plan approval	
2. Grading and Drainage plan must accurately show locations and dimensions of existing versus new impervious surfaces for verification. Ponding area volumes must be established for each ponding area showing dimensions. Label each pond with a pond number and the volume.		
3. Include pond sections and show how ponds will overflow.		
4. Include lighting plan with photometrics		
5. A financial guarantee will be required for all public and quasi-public infrastructure. The guarantee must be in place prior to recordation of development plan.		

Technical Corrections:	**Must be completed by:**	**Applicant Response**:**
1. Include attached notes.		
2.		
3.		

***The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.*

Form Updated: March 2024

DRAINAGE FACILITIES MAINTENANCE NOTE

ALL DRAINAGE FACILITIES SHALL BE MAINTAINED BY ALL PROPERTY OWNERS. THE PROPERTY OWNERS SHALL ALSO HAVE THE RESPONSIBILITY FOR MAINTENANCE OF THE PUBLIC DRAINAGE EASEMENT.

INSPECTIONS SHALL BE CONDUCTED BY A REGISTERED PROFESSIONAL ENGINEER IN THE STATE OF NEW MEXICO OR OTHER QUALIFIED PERSON. INSPECTIONS SHALL BE CONDUCTED ON THE DRAINAGE FACILITIES IN ACCORDANCE WITH THE FOLLOWING SCHEDULE:

ON OR ABOUT MARCH 15, ON OR ABOUT SEPTEMBER 15, AND AFTER EACH STORM EVENT OF 1-INCH OR GREATER. MAINTENANCE OF THE DRAINAGE FACILITIES SHALL BE CONDUCTED AND DOCUMENTED BY THE ENGINEER OR QUALIFIED PERSON AND THE OWNER. THE OWNER SHALL MAINTAIN A FILE OF THE INSPECTIONS AND REMEDIAL ACTION CONDUCTED ON THE DRAINAGE FACILITIES.

WORK SHALL BE CONDUCTED IN ACCORDANCE WITH THE ENGINEER'S RECOMMENDATIONS, AND SHALL INCLUDE, BUT IS NOT LIMITED TO THE FOLLOWING:

A. FLUSH ALL CULVERTS, DROP INLETS AND DRAINAGE PIPES TO REMOVE SEDIMENT AND VEGETATION THAT PREVENTS OR HINDERS THE FLOW OF STORM WATER IN THE DRAINAGE STRUCTURE(S).

B. REMOVE SEDIMENT IN PONDS THAT IS GREATER THAN 6-INCHES IN DEPTH, AND IF NECESSARY, RESEED WITH NATIVE GRASSES AND INSTALL FILTER FABRIC AND 3 TO 4 INCH COBBLE AS DIRECTED BY THE ENGINEER.

C. INSPECT FOR SEDIMENTATION IN ALL SWALES, DITCHES, DRAINGE PONDS AND REMOVE AND STABILIZE AS NECESSARY.

D. INSPECT FOR SOIL EROSION AT ALL DRAINAGE PONDS, CUT AND FILL SLOPES, AND REPAIR OR STABILIZE ACCORDINGLY.

E. INSPECT THE STRUCTURAL INTEGRITY OF DRAINAGE PONDS, SLOPES, RIP-RAP, GABIONS, DROP INLETS, CULVERTS, ENERGY DISSIPATORS, AND RETAINING WALLS, ROCK PLATING, EROSION CONTROL MATS OR BLANKETS, AND REPAIR OR STABILIZE ACCORDINGLY.

GUNNISON'S PRAIRIE DOG NOTE

THE PROJECT SHALL COMPLY WITH THE PROVISIONS OF THE GUNNISION'S PRAIRIE DOG ORDINANCE (ARTICLE 14-8.12).

DUST CONTROL NOTE

All on-site soil disturbing construction activities shall be addressed and provide measures to mitigate or control dust from being transported offsite and polluting neighboring properties.

Any person, owner, contractor or operator who conducts earthmoving and/or dust generating activities is responsible for implementing Best Management Practices (BMPs) in order to mitigate off-property transport of fugitive dust emissions.

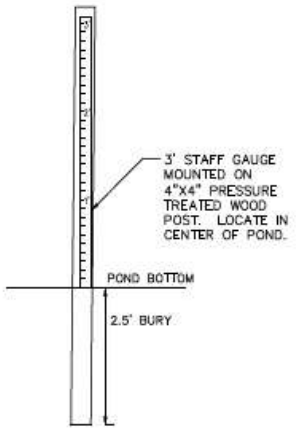
A plan, or storm water prevention plan (SWPPP) when applicable, listing the Best Management Practices (BMPs), shall be provided to the City Engineer, or their designee for review and approval. The approved BMPs shall be applied to the graded and/or disturbed soil in order to stabilize the site.

The initial BMP shall address how the Contractor will minimize the amount of disturbed soil, and how the Contractor will stabilize the disturbed surface area exposed to wind or vehicle traffic during construction.

Some BMPs shall include:

- The reduction of vehicle speeds: establish a maximum speed limit or install traffic calming devices to reduce speeds to a rate to mitigate off-property transport of dust entrained by vehicles.
- The minimization of drop height: Drivers and operators shall unload truck beds and loader or excavator buckets slowly, and minimize drop height of materials to the lowest height possible, including screening operations.
- High winds restriction: temporarily halt work activities during high wind events greater than 30 mph if operations would result in off-property transport.
- Restrict access: restrict access to the work area to only authorized vehicles and personnel.

In the event the above practices are ineffective to prevent off property transport, the owner or operator shall use at one or more of the following Best Management Practices (BMPs):



- Wet suppression: apply water to disturbed soil surfaces, backfill materials, screenings, and other dust generating operations as necessary and appropriate considering current weather conditions, and prevent water used for dust control from entering any public right-of-way, storm water drainage facility, or watercourse.
- Wind barrier: construct a fence or other type of wind barrier to prevent wind erosion of the graded or disturbed surface.
- Vegetation: plant vegetation appropriate for retaining soils or creating a wind break.
- Surface roughening: stabilize an active construction area during periods of inactivity or when vegetation cannot be immediately established.
- Cover: install cover materials such as tackifiers, erosion control blankets, gravel, vegetation (when appropriate), cold-millings, etc. during periods of inactivity and properly anchor the cover.
- Soil retention: stabilize disturbed or exposed soil surface areas that will be inactive for more than 30 days or while vegetation is being established.

ENGINEER'S STORMWATER INFRASTRUCTURE CERTIFICATION

I, the undersigned professional engineer in the State of New Mexico, do hereby certify that the record information shown hereon is based on actual field measurements and visual inspections performed by myself or under my direct supervision. I further certify that the record condition as of _____ is in substantial compliance with the approved grading and drainage plan prepared by _____, dated _____.

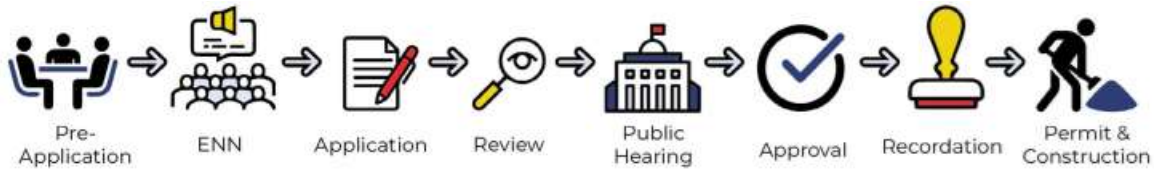
DRT Review Schedule – 9-12+ weeks*

Initial DRT Comments are due to the case planner within three weeks of the *DRT Application Intake* meeting. Initial DRT review should confirm that the application is complete (i.e. Water Budget has been submitted) and/or identify additional submittals or corrections (i.e. Water Budget needs revision). The case planner will review and convey all *Initial DRT Comments* to the applicant via a *Review Memo*. The applicant must respond to all *Initial DRT Comments* and submit a revised application for Final Review. *Final DRT Comments* are due to the case planner within two weeks of receipt of the revised application. The case planner will review and convey all *Final DRT Comments* to the applicant in a *Final Review Memo*. The complete DRT Review Timeline can range from 9-12+ weeks, depending on the complexity and quality of the application and the total number of applications under review.



Timing of Conditions of Approval + Technical Corrections

While all DRT conditions of approval and technical corrections must be met by the applicant, the timing of compliance varies. In the "Must be completed by" column in the following tables, please time your conditions of approval and technical corrections to the following development review stages:

a. *Prior to Public Hearing* – these conditions/technical corrections must be addressed before the case may move forward to the public hearing phase of the Development Review Process.
b. *Prior to Recordation* – these conditions/technical corrections may be resolved after the public hearing but must be addressed before the Development Plan or Subdivision plat is recorded.
c. *Prior to Building Permit Approval* – these conditions/technical corrections can be addressed during the building permit review process, but prior to issuance of the permit.
d. *During Construction* – these conditions/technical corrections can be addressed during construction.

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case #

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. Historic drainage calcs should include offsite flows onto property (if applicable)	Include in drainage report with development plan	
2.		
3.		
4.		
5.		
6.		

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1.		
2.		
3.		
4.		

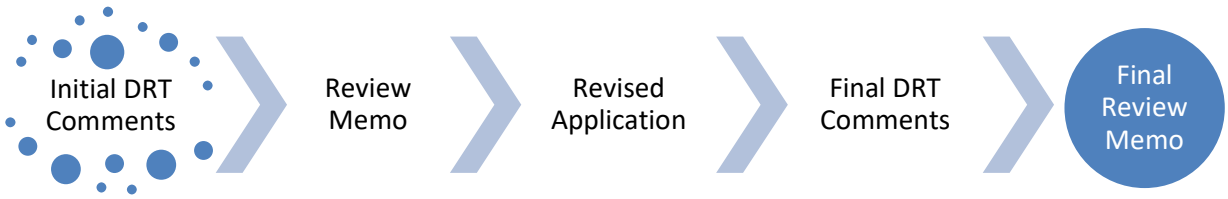
**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]
2.

Explanation of Conditions or Corrections (if needed):

Existing vs Proposed Drainage Areas: looks like some ponding and drainages will be filled due to proposed building sites and new amenities; how is the developer planning to accommodate the excess water created by both the increase in imperviousness and the filling of these ponds? How do they plan to get the water to the new ponds, will it be piped? Will buildings have gutters and cisterns? Will landscaped areas be swaled to hold water? Etc…



Historical drainage: are they making sure to account for the entire basin in their drainage calcs, including offsite flows entering the property, esp. off the parking lot behind the school to the south if there is any?

To: Leroy Pacheco, PE COSF

From: Philip A. Gallegos, PE, Senior Transportation Engineer

CC: Robert Luna, PE, PTOE, Traffic Engineering Practice Lead, SW Region

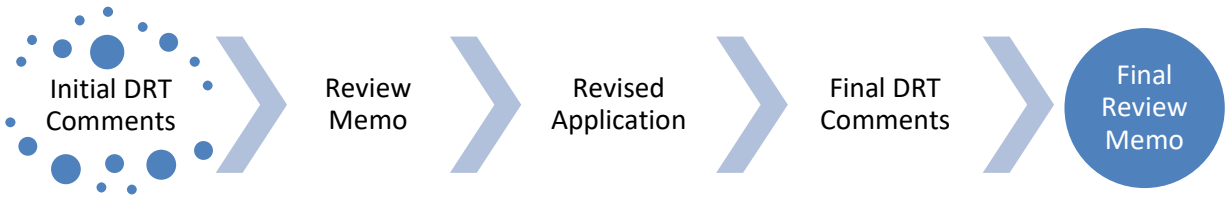
Date: 10/17/2025

Re: Girl's Inc. TIA Review

Wilson and Company has reviewed the Revised DRAFT TIA dated October 6, 2025 for the Girl's Inc. Development prepared by Bohannan Huston and have the following comments. Please let me know if you have any questions or require further information.

REPORT COMMENTS

- All original Comments have been addressed
- On page 48 the report states that the common crash type was rear-end collisions for Richards and Rufina however on table 24 the highest crash type is Another Vehicle at an Angle. This should be corrected in the narrative.
- There is a large percentage of crashes that were not classified by Crash Type. The Crash Summary Tables shall also include the percentage of crash types with the "not available or not classified" crash types removed from the total number of crashes. Therefore, showing percentages of total known crash types.
- All developer mitigations shall be shown on the developments site plan.
- For the intersection of Calle del Cielo and Cerrillos Road the report recommends evaluation of a cost share with the COSF due to the spillover occurring in existing condition. Since this LOS is made worse by the added traffic by the developer this mitigation shall be implemented by the developer.



Sincerely,

Philip A Gallegos, PE
Senior Transportation Engineer

Conditions of Approval and Technical Corrections Tables

Review by this division/department has determined that this application will meet applicable standards if the following Conditions of Approval and Technical Corrections are met:

Case # 2025-11028/11029/11030

Conditions of Approval:	**Must be completed by:**	**Applicant response**:**
1. An approved Agreement to Construct and Dedicate (ACD) will be required for new fire and domestic water services	Prior to Building Permit Approval	
2. An approved Water Plan will be required for all new public water infrastructure and fire services.	Prior to approval of Development Plan	
3. A separate irrigation meter will be required if the total landscaped area is 1,000 square feet or greater. An approved backflow prevention device shall also be installed beyond the meter on any new irrigation service.	At the time of development	
4. Any re-grading of site over existing water mains shall maintain a minimum of 4 feet of cover and not exceed 5 feet of cover. Depth of existing main to be adjusted to maintain a minimum of 4 feet of cover and not exceed 5 feet of cover if site grading impacts these depth requirements.	At the time of development	
5. Each lot shall be served by a separate City water service.	At the time of development	

Technical Corrections:	**Must be completed by:**	**Applicant response**:**
1. Developer will work with CoSFW Engineering to appropriately size and locate meters and fire hydrants. CoSFW will not approve new public infrastructure on private property.	Prior to Water Plan Approval	

**The Applicant must respond to the condition of approval or technical correction, indicating they have met the requirement and providing a reference in their revised submittals. If the applicant has not met the requirement, they must indicate as much and provide a response.

The applicant should be aware that the following code provisions or other requirements will apply to future phases of development of this project:

1. [list any additional items]

City of Santa Fe, New Mexico
Memorandum

DATE: **February 17, 2026**

TO: **Mayor Michael J. Garcia**

FROM: **Chelsey Johnson, Arts & Culture Director**

SUBJECT: **Arts Commission Appointment**

Summary:

As of February 2026, the Arts Commission has one vacancy to fill due to a Commissioner stepping down. This memo recommends the new appointment of one vetted candidate to join the Arts Commission.

Background:

Per City ordinance:

> There is created the "Santa Fe Arts Commission," hereinafter referred to as the "commission." The commission shall be advisory to the governing body and shall initiate, sponsor or conduct, alone or in cooperation with other public or private agencies, public programs to further the development and public awareness of, and interest in the fine and performing arts and cultural properties. The commission shall organize and adopt administrative rules and procedures necessary to accomplish its purposes. (Code of Ordinances 6-1.1)
>
> ... The commission shall consist of nine (9) members. On the first commission, four (4) of the members shall be appointed for one (1) year terms and five (5) shall be appointed for two (2) year terms. Subsequent terms shall be for two (2) years to maintain staggering of terms. Vacancies, other than by expiration of terms, shall be filled for the unexpired term in the same manner as original appointments. The mayor, with the advice and consent of the city council, shall appoint the commission members and the commission chairperson. All terms expire in October. (Code of Ordinances 6-1.1)

Following a public call for applicants, in early 2025, the Arts Commission's governance subcommittee reviewed and scored 49 applications, interviewed and scored ten, and submitted this list for mayoral approval. Mayor Garcia has selected **Oriana Lee** as the next new Commissioner from that list.

Brought forward for appointment to the Arts Commission by Mayor Garcia and confirmation by the Governing Body is the following candidate:

- **Oriana Lee,** first term 3/2026 to 10/2027
  Replacing Robyne Robinson, term 10/25-10/27

Action Requested:
The Arts Commission, along with Arts and Culture Department staff, respectfully requests appointment to the Commission of Oriana Lee to serve from March 2026 through October 2027.

CANDIDATE BIO

Oriana Lee is an entrepreneur, interdisciplinary artist, well-being coach, educator, and mother of five currently residing in Santa Fe, New Mexico. As a compelling creative and social justice activist, Lee explores themes of relationality, well-being, empowerment, and human rights while inspiring critical thinking, promoting human connection, and engaging leading-edge thought. Lee's contemporary art practices include recycled/upcycled, visual art, installation art, vocal artistry, written works, performance/theatrical, film, and circus arts. Lee is currently a member of Vital Spaces.

Lee holds a B.A. in English/Professional Writing with Teacher's Certification from Tennessee State University (Nashville, TN), pursued an M.A. in Marriage and Family Therapy at Harding School of Theology (Memphis, TN), has been ordained as a minister, and holds certification as a Life Coach. For over 25 years, Lee has been on the leading edge of the home-education movement and has organized educational support groups and developed curriculum across a diverse range of subject areas and ability levels. Lee has also served on a number of boards.

Lee is the founder of ESHE Wellness & Art, a business that helps people both personally and professionally to discover what they want, what's blocking them, and what works to move them forward so that they will be empowered to achieve successful results. As a wellness coach, Lee also partners with local and national organizations to create "well work environments'' through mindfulness practices.

Résumé attached.

ORIANA LEE

Santa Fe, NM | [redacted]

SUMMARY

I'm a whole systems thinker who understands the relationships between quality non-profit programming, arts, social justice, community participation, and input. Always in roles involving strategic planning and leadership, facilitation, teaching, curricula development, and outreach, I use my successes as fuel and evidence that growth and evolution through research, critical thinking, and collaboration create brave and conscious change agents and quality, culturally relevant programs and partnerships. Well-being, mindfulness, and mental health are core components considered in my programming and facilitation.
